- Pixl LLC
- Robert Bosch LLC
- Sierra Consulting
- Solstice Mobile
- Tagwire Media, LLC
- Textura Corporation
- Thomson Reuters
- TransUnion
- VergeIT
- World Computer Exchange

Curriculum updates

In June 2015, CDM updated that name of the BS in Network Technologies to the BS in Network Engineering and Security. This change was made to better align the name of our program with the expectation that network technologies professionals must have considerable expertise in network security. Additionally, the number of required security courses in the program has increased and we have added more security content to the capstone course.

The BS in Computer Science added a concentration in Game Systems and updated the name of the “standard” concentration to “Software Development”.

The BA in Digital Cinema added a concentration in Documentary Production.

CDM permits new transfer students to complete certain degree programs online. The following programs are offered through this program:

- BS-Computer Science
- BS-Information Technology

Women at CDM

CDM continues to support the efforts of the HerCDM student organization. HerCDM provides women at CDM opportunities for networking, service and leadership development. Over the last three years, the percentage of women enrolled in CDM has increased by 8% to a current level of 28%.

Facilities

CDM regularly expands and updates computing, production and classroom space. Recent highlights include:

- A 20,000 square foot production facility at Cinespace Chicago Studios, located just west of the Loop.
• Acquisition of lab and classroom space in the Richard and Maggie Daley Building at 14 E. Jackson on the 5th floor. This space includes Mac and PC labs as well as a capstone collaboration lab.
• State of the art specialized labs and studios, including:
  o Sound mixing studio
  o Game research lab
  o Playtest Laboratory and user group space
  o Stop motion animation lab
  o Graphic design studio and exhibition lab
  o Software observation and usability lab
