

# Student Achievement of University Goals & Outcomes

The following chart displays the percentage of students university-wide who have achieved the university learning outcomes listed below.

*Achievement of university learning outcomes is extrapolated from student achievement of program-level learning outcomes. Student achievement of university learning outcomes is calculated as the total number of students who achieved a program-level learning outcome that aligns with the university outcome, divided by the total number of students assessed on those program learning outcomes. The chart below includes data from annual program assessment projects conducted in AY 2013-14, 2014-15, and 2015-16.*
