Hot Programs for 2018-2019

The College of Science and Health at DePaul University offers 14 majors including the RN to MS program. The is a brief highlight of some of the college's newest majors. Please check out our website for a full list of programs.

B.S. Biochemistry: As a <u>Biochemistry major</u>, students learn the fundamentals of chemical and biochemical theory and practice through scientific investigation, laboratory experience and research opportunities. Students take core courses in chemistry, biology, physics, and mathematics.

B.A. Data Science: As a <u>data science major</u>, students develop skills to analyze massive amounts of data and extract information from complex data sources. This program is ideal for students with an interest and aptitude in the mathematical and computer sciences.

B.S. Neuroscience: Neuroscience has quickly become one of the fastest growing areas of study in both the natural and behavioral sciences. <u>Neuroscience majors</u> consider fundamental concepts that underlie the function of the nervous system on a cellular and molecular level, how the nervous system produces behavior and cognition, and the role of

computer science and mathematics in new technologies and therapies in neuroscience.

B.S. Psychology (health care): Students majoring in <u>B.S. psychology</u> with a concentration in healthcare can pursue their love of psychology along with the courses commonly considered prerequisites for professional programs in the medical field. This major can be an ideal fit for students interested in medical school.

Course Recommendations

The College of Science and Health recommends students possess a strong understanding of basic math and science concepts. Incoming transfer students are strongly recommended to successfully complete pre-calculus or calculus prior to transferring. All biology, biochemistry, chemistry, physics, and health sciences majors are encouraged to complete yearlong sequences of courses (i.e. one academic year of major level biology) instead of only one semester.

CSH recommends students consult the <u>course lists</u> under the Transfer Center tab on DePaul's website to learn more about the course equivalencies of various science and math courses.

Career Outcomes

According to the Career Center, approximately 93% of the 2016 undergraduate class are employed or continuing education within six months of completing their degree. Within that group, 27% choose to continue their education.

CSH graduates are obtaining employment is a variety of fields in education, government, and private industry. Click here to learn more about <u>career outcomes</u> for CSH students.
