College of Science and Health (CSH) 2017-2018 Information

New Programs for 2017-2018

B.S. Biochemistry: As a <u>Biochemistry major</u>, students learn the fundamentals of chemical and biochemical theory and practice through scientific investigation, laboratory experience and research opportunities. Students take core courses in chemistry, biochemistry, biology, physics, and mathematics.

B.A. Data Science: As a <u>data science major</u>, students develop skills to analyze massive amounts of data and extract information from complex data sources. This program is ideal for students with an interest and aptitude in the mathematical and computer sciences.

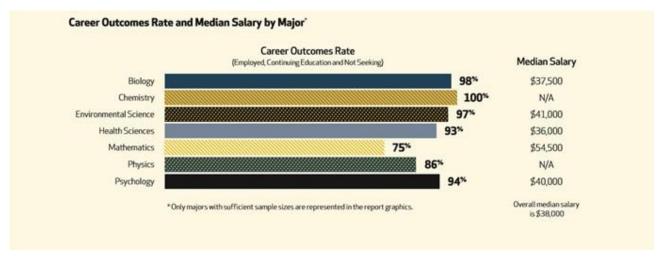

Course Recommendations

The College of Science and Health recommends students possess a strong understanding of basic math and science concepts. Incoming transfer students are strongly recommended to successfully complete pre-calculus or calculus prior to transferring. All biology, biochemistry, chemistry, physics, and health sciences majors are encouraged to complete yearlong sequences of courses (i.e. one academic year of major level biology) instead of only one semester.

CSH recommends students consult the <u>course lists</u> under the Transfer Center tab on DePaul's website to learn more about the course equivalencies of various science and math courses.

Career Outcomes

According to the Career Center, approximately 93% of the 2016 undergraduate class are employed or continuing education within six months of completing their degree. Within that group, 27% choose to continue their education.

CSH students pursue a variety of graduate programs at colleges and university across the country. Several top graduate and professional schools include Adler School of Professional Psychology, George Washington University, University of Chicago, and Marquette University Law School.

CSH graduates are obtaining employment is a variety of fields in education, government, and private industry. Click here to learn more about <u>career outcomes</u> for CSH students.
