DEPAUL UNIVERSITY
SCHOOL FOR NEW LEARNING

One of DePaul University's 10 colleges, the School for New Learning (SNL) is internationally acclaimed as a leader in educating adults. SNL offers innovative undergraduate and graduate degrees designed to meet the needs of working adults age 24 and older. SNL lets students combine the practical and the theoretical to satisfy their academic, professional and personal goals.

Accelerated Degree Completion Majors (DCM)

Students who have already earned an AA or AS degree can complete one of these degree options in 2 years. The degrees offer a schedule of courses that covers 93 of the required 192 quarter hours. Classes meet both on campus Tuesday evenings and online. Students will know their entire 2-year schedule from the start of their program. A DCM scholarship is offered which lowers the tuition rate by 25%.

- Leadership Studies (BA)

This degree program will develop your skills in communication, conflict management, developing leadership models, ethics, human interaction, negotiation and organizational change.

- Applied Behavioral Studies (BA)

This degree is for students interesting in pursuing a career in human services, social work, non-profit management and other related fields.

Business Administration (BA in Professional Studies)

NEW—Launching in fall 2017!
The Bachelor of Arts in Professional Studies with a major in Business Administration is designed for working adults seeking to advance their careers and build their professional portfolios with further study in a range of subfields associated with business administration and management. This degree emphasizes immediate practical application of academic knowledge and skills in the workplace. Courses will be offered both online and on campus, and students will be able to apply experience for credit, as appropriate.

Decision Analytics (BA)

Designed for working adults, the Bachelor of Arts in Decision Analytics has a strong industry orientation and provides students with the knowledge and skills they need for the jobs they hold today as well as those they might seek out tomorrow. Decision analytics is an interdisciplinary field dedicated to the collection, analysis and communication of complex and dynamic data sets. Students can fulfill program requirements by demonstrating what they already know from work and other life experiences so that they can focus on new learning.
