This course examines conceptual approaches and empirical findings related to the social and structural determinants of health. Students are introduced to the history and development of social epidemiology as a field of study, with emphasis on the tension between problem-focused and solution-focused research. Topics include the health effects of income inequality, racism/discrimination, and neighborhood effects, including social capital.

MPH 541
BIOSTATISTICS
Graduate
This course emphasizes the application of statistical methods to problems of human health and disease. It covers parametric and nonparametric statistical inferential methods for univariate and bivariate situations using SPSS. Specific topics include but are not limited to the following: Interpretation of graphic and descriptive statistics for both quantitative and categorical data, confidence interval estimation and hypothesis testing methods, linear and multiple regression logistic regression, analysis of categorical data and ANOVA. Course emphasizes the statistical interpretation of the literature and analytic projects based on large data sets from published studies, the internet, or the student's workplace.
**MPH 551**  
**GLOBAL HEALTH INEQUITIES**  
Graduate  
This course examines theories and data surrounding global health. Topics include epidemiologic transition, the burden of chronic non-communicable diseases in the global south, neglected tropical diseases, and access to medicines. Sociological and anthropological perspectives are explored to understand the structural causes of health inequalities around the world.

**MPH 552**  
**MATERNAL AND CHILD HEALTH**  
Graduate  
This course will utilize a life course perspective to examine contemporary health issues affecting women and children. Students will examine health disparities and social determinants of health, and engage in discourse on a variety of health topics from a social justice framework. Course exercises and assignments will focus on building skills in community assessment, program planning, evaluation, advocacy and policy development, as they apply to maternal and child health.

**MPH 553**  
**PUBLIC HEALTH AND FORCED MIGRATION**  
Graduate  
This course is an overview of key public health issues for populations undergoing forced migration. The course emphasizes the contextual factors relevant to the physical and psychosocial challenges faced by displaced populations. Using a community public health approach the course will address: the challenges of health promotion, health care access and delivery; the everyday contexts that affect health; strategies for conducting public health research; and interventions for addressing health outcomes.

**MPH 554**  
**GLOBAL PUBLIC HEALTH PRACTICE**  
Graduate  
This course introduces students to the concepts, principles, tools, and frameworks fundamental to further study in the field of global public health. The course is global in scope but emphasis will be on low and middle income countries. It explores health systems issues and their impact on the health of populations. It outlines theories and models used in interventions to change health behavior and provides an overview of key actors and organizations working to advance health around the globe.

**MPH 555**  
**EPIDEMIOLOGY IN A GLOBAL CONTEXT**  
Graduate  
This course will focus on the theories and methods used in the field of epidemiology to study the occurrence, distribution and determinants of infectious and non-infectious diseases, other forms of illness (particularly those impacted by social and environmental forces), and injury in human populations. The class examine epidemiology in various global contexts. The focus will be on 95 determining the impact, magnitude, and patterns of disease/illness/injury frequency so that causal agents can be identified and effective prevention, treatment and control measures can be designed and implemented. The course will explore variations of disease/illness/injury in relation to such factors as age, sex, race/ethnicity, occupational and social characteristics, place of residence, social inequality, susceptibility, exposure to specific agents, and other pertinent 100 characteristics. Also of concern will be the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease.

**MPH 556**  
**WOMEN’S HEALTH**  
Graduate  
An examination of women's health throughout the life cycle, with special emphasis placed on women's structural and societal roles within systems of health and in communities at large, which emphasizes on-going and emerging issues in women's health, such as sexual and reproductive health, contraception, gender-based violence, and chronic diseases, in order to address health disparities and redress health inequalities.

**MPH 557**  
**ENVIRONMENTAL EPIDEMIOLOGY**  
Graduate  
Environmental epidemiology is the science of identifying the role the environment has on the distribution of chronic and infectious disease. In this course, students will learn the practical techniques to identify health disparities and the associated environmental factors including the physical, chemical, biological, and socio-cultural determinants of health. Specific topics will include risk assessment, exposure estimation, and epidemiological study design demonstrated through case study analysis, critical review of the literature, data collection, and interpretation.
MPH 595
SPECIAL TOPICS IN PUBLIC HEALTH
Graduate
Special courses will be offered as students and faculty affiliated with the MPH program identify selected topics of common interest.

MPH 599
INDEPENDENT STUDY IN PUBLIC HEALTH
Graduate
This course can be taken in consultation with a supervising faculty member.

MPH 600
PREPARATION FOR PUBLIC HEALTH PRACTICE
Graduate
This year-long course includes a series of skills-based workshops designed to introduce students to the specialized skills and competencies needed in the public health workplace. These workshops are designed to complement the core MPH curriculum and are selected based on regular feedback from faculty, public health practitioners, and students.

MPH 602
COMMUNITY HEALTH ASSESSMENT
Graduate
This course is the first of a three-course sequence. Students are expected to use multiple methods to obtain and synthesize data pertaining to their practicum organization and the communities served. They will apply these skills to community health practice in their practicum agency, and to the development of preliminary chapters in the academic capstone.

MPH 603
COMMUNITY HEALTH PROJECT DESIGN
Graduate
This is the second course of the three-course sequence. Students are expected to assess and incorporate findings from their community health profile and organizational assessment to design a public health project plan that meets the needs of the community served by their practicum agency, and to further develop the academic capstone.

MPH 604
CAPSTONE SEMINAR IN COMMUNITY PUBLIC HEALTH
Graduate
This is the third course of the three-course sequence. Students are expected to describe and distill outcomes from their practicum project, and synthesize the meaning of these outcomes within a broader public health context. They will produce the final chapters of the academic capstone, submit the finalized capstone for review, and create a professional poster presentation.

MPH 699
COMMUNITY HEALTH PRACTICUM
Graduate
This year-long course includes a series of skills-based workshops designed to introduce students to the specialized skills and competencies needed in the public health workplace. These workshops are designed to complement the core MPH curriculum and are selected based on regular feedback from faculty, public health practitioners, and students.

MPH 600 is a prerequisite for this course.
MPS 500
INTRODUCTION TO PUBLIC SERVICE MANAGEMENT
Graduate
Introduces students to organizational theories and practices useful to public service managers. Teaches students how to use structural, human resource, political and symbolic perspectives to rethink public service organizations. Provides an introduction to managerial issues including workforce diversity, decision making and leadership; stresses critical thinking and writing skills.

School of Public Service student or department consent is a prerequisite for this course.

MPS 501
CROSS-SECTOR ANALYSIS
Graduate
This course examines the size, scope, capacity, and limitations of the nonprofit, government, and business sectors, in the domestic and international context. Students will be introduced to research and become familiar with print and electronic resources and databases. They will learn to develop meaningful research questions, write literature reviews, and analyze the interrelationships among the three sectors.

MPS 508
INTRODUCTION TO NONPROFIT MANAGEMENT
Graduate
This course provides an introduction to and overview of the most important skills needed in managing a nonprofit organization, and gives students a chance to practice those skills using contemporary and historical case studies. Topics covered include the history, scope, and significance of the nonprofit sector, theories of the nonprofit sector, law and governance, resource development and volunteer management, social entrepreneurship, marketing, external relations, the nonprofit life cycle, competition and collaboration, and relationships with business and government.

MPS 510
INTERNATIONAL DIMENSIONS OF PUBLIC SERVICE
Graduate
This course explores the institutional roles and responsibility of international public service organizations in relation to international affairs, peace and security, international development, humanitarian and human rights laws. Through real world case studies students learn about the complex legal, advocacy and capacity development work connected to political, economic, social, cultural and other human rights in international public service.

Status as an MPS student or department consent is a prerequisite for this class.

MPS 511
SUSTAINABLE INTERNATIONAL DEVELOPMENT
Graduate
This course provides an overview of theories and approaches to sustainable social and economic development and examines the roles of Non-Governmental Organizations (NGOs) as well as methods of evaluating their effect. The course covers the role of NGOs in building and strengthening sustainable communities and societies in developing countries.

MPS 513
VOLUNTEERISM
Graduate
This course examines the concept of volunteerism within global civil society, especially nonprofit organizations and government associations. This includes an analysis of the role of volunteers in American society, the motivation to volunteer and how to effectively recruit, train, supervise and evaluate volunteers. Students develop an understanding of the role of volunteers in the management of any social program. Assignments include group projects and service learning opportunities.

MPS 514
GOVERNMENT FINANCIAL ADMINISTRATION
Graduate
The basic principles, logic and processes of public budgeting are explored to understand the allocation of scarce resources. The concepts of efficiency and equity in taxation are applied to identify the advantages and disadvantages of specific taxes such as income, sales and property. Specific skill sets include present value techniques, interpreting the basic financial reports generated by governments, and evaluating financial performance of a government based upon its financial reports.

MPS 500 is a prerequisite for this course.
MPS 515
NONPROFIT FINANCIAL ADMINISTRATION
Graduate
This course explores key issues in operations budgeting and capital budgeting. Specific skill sets include cash flow analysis, variance analysis, present value techniques, interpreting financial statements, and evaluating financial performance.

MPS 500 is a prerequisite for this class.

MPS 516
MANAGEMENT OF INFORMATION TECHNOLOGY
Graduate
This course focuses on the management and use of information technology (IT). As the use of IT in society grows, particularly in business, graduates are likely to manage technology resources and participate in IT planning and development projects as founders, sponsors, team members, managers of development, or end-user developers. Students should become effective users of information, IT, and information services. The course explores a number of IT-related topics, such as the strategic role of IT, IT planning and architecture, building the telecommunications highway system, management issues on system development, the expanding universe of computing, group support systems, intelligent systems, electronic document management and managing the human side of systems.

MPS 519
RESOURCE DEVELOPMENT
Graduate
This course teaches students the theories and techniques of resource development. We discuss the fundraising tradition in the U.S., principal donor types, theories of donor behavior, and the organizational, legal and ethical contexts of fundraising. Students learn basic fundraising tools, including planning, grant writing, special events, major gifts, planned giving, and capital campaigns. Students work as volunteer consultants with nonprofit partners to analyze their current fundraising strategies and materials and help them develop new ones.

MPS 520
VALUES-CENTERED LEADERSHIP
Graduate
This interdisciplinary course explores service leadership through the lenses of Robert K. Greenleaf, The DePaul Leadership Project, Margaret J. Wheatley and other theorists and practitioners within the leadership field. The course expands our thinking on leadership to include modules dedicated to four topics: Service Leadership, Leadership and Diversity, International Leadership and Ethical Leadership. Students will assess their own leadership practices, develop a leadership action plan and participate in coaching, as coach and client. Student grading will be based on participation in self-reflection, course participation, project teams and a final project.

MPS 521
LEADERSHIP AND MANAGEMENT
Graduate
This course focuses on key factors which affect employee behavior and the nature and purposes of leader and managerial roles. In addition, it addresses recent research in leadership and management and the legal environment of personnel management. In depth analysis of psychological systems, interpersonal relations and the relationship of rewards to performance are addressed through case studies, role playing and readings.

MPS 522
FUNDAMENTALS OF HUMAN RESOURCE MANAGEMENT
Graduate
This course explores human resource issues facing employees with supervisory responsibilities in public service organizations, including those working in the volunteer, non-profit, religious, government, and education sectors. The course considers human resource planning, employee recruiting and selection, and the motivation and evaluation of staff personnel and managers both individually and in teams. Topics include recruiting and selecting employees and managers, fostering team development, managing employee stress, preventing workplace violence, and handling issues pertaining to termination, training, and development. The course also explores progressive discipline and, improving performance management of employees and volunteers.

School of Public Service student or department consent is a prerequisite for this course.
MPS 523
GROUP DYNAMICS FOR LEADERS
Graduate
This interactive course will explore the relevant theories and methods for understanding the structures and processes of groups. The course will also consider how leaders and managers function effectively within groups. An emphasis is placed on role and function, status, power, leadership, communication, decision-making, problem solving, conflict management, negotiation, and coalition.

MPS 524
MARKETING FOR SERVICE ORGANIZATIONS
Graduate
This course provides a broad understanding of marketing nonprofit, governmental, and advocacy organizations. Students learn how to analyze and develop a wide range of marketing plans and campaigns. Content includes the key theories, principles, and techniques of marketing and the differences between for-profit and non-profit efforts. The associated aspects of marketing--public relations, communications, advertising, and fundraising--are explained and compared. Students learn all aspects of the marketing process from identifying and defining the preferred target segments, crafting the key messages, and developing, executing, and measuring effective marketing campaigns.

MPS 525
WORKING WITH NONPROFIT BOARDS
Graduate
This course examines the legal and philosophical reasons that nonprofit organizations are governed by an external board of directors. Membership, structure and process for this body are examined, as well as the relationship of employees to the individual board members and the policies established by this group.

MPS 526
LOCAL GOVERNMENT ADMINISTRATION
Graduate
This course analyzes decision-making processes used in local government from the perspective of the chief executive officer such as city manager, township supervisor, special district administrator, or park superintendent. It includes operational aspects of municipal administration including the effect of intergovernmental relations on local government, the role of the local government administrator in policy implementation, chief executive and elected official interactions, and regional governance of the delivery of services that cross political boundaries.

MPS 528
FOUNDATION MANAGEMENT
Graduate
This course examines the concepts, functions and practices of organized philanthropy, with a primary emphasis on corporate, private and community foundations.

MPS 529
STRATEGIC MANAGEMENT AND PLANNING
Graduate
Students learn how to apply strategic management and planning concepts and tools to public and nonprofit organizations to achieve goals and objectives in meeting service delivery missions, both domestically and internationally. The course focuses on analyzing the interaction of trends, market forces, stakeholders, and core competencies in developing visions and strategies for alternative scenarios.

MPS 530
ANALYSIS OF NONPROFIT ORGANIZATIONS
Graduate
This course explores the art and science of nonprofit management. Students analyze nonprofits holistically, combining perspectives from law, governance, resource development, and finance. Students learn through hands-on analysis of existing nonprofit organizations and the analysis of historical case studies.

MPS 515 is a prerequisite for this class.
MPS 531  
HEALTH CARE ADMINISTRATION  
Graduate  
This course focuses on practical examples of financial management of health care institutions. It examines the financial system supporting health care institutions and the financial tools providers and insurers use to administer their programs and keep medical costs in check. Students learn financial management, third party payment methodologies, Medicare and Medicaid, cost accounting, rate setting, budgeting and financial analysis. The impact of the Patient Protection and Affordable Care Act will be evaluated.

MPS 514 or MPS 515 or MPS 541 is a prerequisite for this course.

MPS 532  
GRANTS AND CONTRACTS IN PUBLIC MANAGEMENT  
Graduate  
This class will cover the grant and contracting components of emergency preparedness. Students will learn about government and non-government grants, including how to search for Federal grants. In addition, the class will learn about the role contracts plays in emergency preparedness.

MPS 533  
APPLIED STATISTICS FOR PUBLIC SERVICE  
Graduate  
This course introduces students to the use of quantitative data in policy, public management, and nonprofit decision-making. Topics include: causal inference, descriptive statistics, data visualization, probability, statistical inference, and regression analysis. Students gain hands-on experience managing and analyzing large datasets and critically reviewing quantitative research conducted by others. Special attention is given to best practices for presenting quantitative findings to diverse stakeholders.

MPS 500 (or SUD 401) is a prerequisite for this course.

MPS 534  
MEDICAL SOCIOLOGY  
Graduate  
Overview of social systems of health care in the United States, including the health-seeking behavior of patients, relationships among health care providers and organizational settings in which services are delivered. Cross-listed with SOC 431.

MPS 535  
HEALTH CARE POLICY  
Graduate  
This seminar focuses on the analysis of contemporary issues in health care policy. Topics covered include public health initiatives, dimensions of health service delivery systems (cost, quality and access), and health policy reforms with a special emphasis on the opportunities to reduce disparities in health care. Students conduct a research project on a health care policy topic of their choosing. Classes include discussions on the challenges of developing and implementing policy changes in public health and health care administration.

MPS 537  
COMPARATIVE HEALTHCARE SYSTEMS  
Graduate  
This course offers a comparative analysis of the U.S. and selected international health care systems, including their relationships to social, political, economic factors and policies.

MPS 541  
ECONOMIC FOUNDATIONS OF PUBLIC SERVICE  
Graduate  
This course introduces students to the branches of economics known as microeconomics, public finance, and welfare economics. Students learn to apply standard economic tools to identify policy issues and to analyze them. Specific skill set includes present value techniques.

MPS 500 or SUD 401 is a prerequisite for this course.
MPS 542
POLICY DESIGN AND ANALYSIS
Graduate
Focuses on the processes and techniques of analyzing and designing public policies. Students are introduced to analytical ways of thinking that include: defining and modeling policy problems; designing policy alternatives; evaluating policy alternatives using ethical, legal, economic, organizational, and political criteria; and anticipating problems of policy implementation.

MPS 501 and MPS 541 (if MPA or LPS degree student) or MPS 501 and MPS 514 or MPS 515 or MPS 541 (if MPS degree student) or MPS 501 and department consent (if IPS degree student) are prerequisites for this class.

MPS 543
POLICY IMPLEMENTATION
Graduate
This course explores the policy making process, from agenda-setting and policy formulation to enactment, implementation, and policy revision. It explores the role of various units of government (local, state, national, international) in policy-making and the involvement of the non-governmental organizations that interact with government. The course also considers the structure and role of the bureaucracy in the formulation and implementation of public policies. Particular emphasis will be placed on the structure and function of administrative organizations within the larger governmental system, critiques of bureaucracy, and administrative reform. Throughout the term, participants explore the systemic factors that mold public policies.

MPS 542 is a prerequisite for this class.

MPS 546
ADVOCACY AND LOBBYING
Graduate
Explores the roles of individuals and organizations in the public policy process, particularly as power arrangements facilitate or impede consensus building. Examines how legislation is written and how administrative rules are formed in government agencies. Special attention is paid to advocacy techniques such as lobbying, public education, and litigation.

MPS 552
GIS FOR COMMUNITY DEVELOPMENT
Graduate
This course will focus on applications of Geographic Information Systems (GIS) to community studies and community development. As an amalgam of information technologies (e.g. database management, Web 2.0) and earth measurement technologies (e.g. global positioning systems, remote sensing), GIS is rapidly entering the realm of community development. The course will explain how GIS works; enable students to learn techniques including mapping, spatial analysis, and data management; and provide students with the opportunity to apply GIS to community development. Cross-listed with GEO 441.

MPS 554
PRINCIPLES OF EMERGENCY MANAGEMENT AND PLANNING
Graduate
Examines the theory and practice of strategic and operational planning for emergency management planning and response. Surveys government, nonprofit, and private sector activities in emergency and crisis management and policy. Reviews the principles associated with evaluation of risk and the formulation of prevention programs. Identifies the issues and policy responses necessary to achieve coordination of agencies and collaboration with appropriate private resources. The course will be organized around case study examination and table top scenario activities in order to apply concepts in practice.

MPS 559
ENTREPRENEURSHIP AND NEW VENTURE MANAGEMENT
Graduate
Entrepreneurship and New Venture Management. Cross-listed with MGT 570.

MPS 560
ADMINISTRATIVE LAW
Graduate
This course focuses on an understanding of government powers by federal, state and local agencies in the US such as oversights, rule making, adjudication and judicial review of local and federal actions, and enforcement of regulatory decision making. It examines how public administration decisions are affected by existing constitutional and legal constraints on the administrative process; it includes the Administrative Procedure Act, Open Meetings Act of Illinois, and the Freedom of Information Act.
MPS 561  
LAW AND NONPROFIT ORGANIZATIONS  
Graduate  
Introduces laws and regulations governing nonprofit organizations, including procedures for incorporation, maintenance of tax-exempt status, and compliance with relevant labor laws. No legal background is assumed.

MPS 562  
INTRODUCTION TO HEALTH LAW  
Graduate  
Introduces students from nonlegal backgrounds to the legal system. Examines legal materials, including statutes, judicial opinion, and administrative regulations. Basic legal research and writing skills are taught.

MPS 563  
LAW AND PUBLIC POLICY  
Graduate  
Provides an overview of the legal process, developing a basic understanding of legal principles, terms, and court systems. Applies legal analysis to policy issues in the three sectors. Examines the sources of law and explores methods of legal research within the context of public policy analysis.

MPS 542 is a prerequisite for this class.

MPS 564  
PUBLIC SAFETY ADMINISTRATION AND PLANNING  
Graduate  
This course covers management strategies and selected analytic tools for the administration of public safety agencies. Management, planning and coordination issues will be addressed across different governmental structures (federal, state, county, local and sub-local); as well as different functional areas across public safety operations, such as staffing/personnel management; special event planning/operations; interagency coordination; effective community partnership planning; and public communications.

MPS 571  
METROPOLITAN PLANNING  
Graduate  
The purpose of this course is to provide an introduction to the professional practice of urban planning and the basic theoretical concepts on which the discipline is based. Students will analyze urban issues, decision-making processes, and resources that affect planning across a metropolitan area, including urban-suburban relations, and the complexities of zoning, economic and community development.

MPS 572  
POVERTY, INEQUALITY AND PUBLIC POLICY  
Graduate  
This course explores the causes and extent of poverty and inequality in the US. It will also examine historical and contemporary public programs and policy approaches to the reduction of poverty and inequality, with a special focus on these issues in US central cities and metropolitan areas.

MPS 573  
HOUSING AND COMMUNITY DEVELOPMENT  
Graduate  
This course is focused on the theory and practice of community development with a special emphasis on affordable housing policies. Specific topics include: the history and context of housing and community development in the US; methods of identifying and analyzing community needs and assets; and planning and implementing a community-based development program.

MPS 575  
SEMINAR IN ADMINISTRATION/BRUSSELS  
Graduate  
This course increases understanding and knowledge of the European Union and the North Atlantic Treaty Organization as organizations of change. It focuses on the international public sector including relationships with NGO's and the nonprofit sector. Students expand experiential and intellectual understanding of these global actors and how they compare to the US. The course takes place in Brussels.
MPS 583
RESEARCH METHODS FOR PUBLIC SERVICE
Graduate
This course introduces students to the principles underlying scientific research and how these principles apply to policy design and evaluation. Students learn about research ethics, causality, sampling (both random and purposive), and collecting data through surveys, interviews, focus groups, and observation. Students learn applied research, including needs assessment, program theory and logic models, and process, outcomes, and impact evaluations. Students also develop the research proposal that they will carry out for their capstone or thesis project in MPS 593.

MPS 583 is a prerequisite for this class.

MPS 587
RESEARCH METHODS II, ADVANCED APPLIED RESEARCH AND STATISTICS
Graduate
This course introduces students to more advanced mixed methods of scientific research including interviews and focus groups, observation, and ethnography. Students learn about the design of experiments and the problems associated with spuriousness and control. Students calculate and interpret bivariate and multivariate statistics using statistical software. Students learn applied research, including needs assessment and outcomes evaluations. Students develop their own research proposal for their capstone or thesis project.

MPS 586 is a prerequisite for this course.

MPS 593
INTEGRATIVE SEMINAR
Graduate
In this capstone course students complete an action research project integrating applied research, theoretical frameworks, and professional practice.

MPS 533 (or MPS 583 or MPS 587 or MPS 589) is a prerequisite for this course.

MPS 594
ETHICAL LEADERSHIP IN PUBLIC SERVICE
Graduate
This course provides students with the framework for personal and professional ethical decision making applied in the context of diverse workplaces and international organizations. Through lectures on ethical theories, case studies in applied ethics, and specific assignments, students clarify their personal-professional values, assess their moral intelligence, and develop their ethical leadership integrity. Students will also study the ethics of organizations, including the formation of social norms, how they influence individual decisions, and how entire organizations can become more ethical.

MPS 533 is a prerequisite for this class.

MPS 597
PUBLIC SERVICE FELLOWS SEMINAR
Graduate
Elective available to students with MPS CGPA of 3.75 or greater. For MPS Fellows taking MPS 593, Integrated Seminar, or MPS 598, Thesis Research I, during the academic year, meets roughly every other week during winter and spring terms. Seminar includes distinguished academic and professional guest lectures and presentations of research by Fellows.

MPS 598
THESIS
Graduate
Students carry out a theoretically-based research project designed in the research sequence. The final product of this course is a master's thesis.

MPS 533 and MPS 583 (or MPS 586 and MPS 587 for SPS Online students) are prerequisites for this class.

MPS 600
INDEPENDENT STUDY
Graduate
Individually supervised learning experience, usually involving extensive library research and writing. Variable credit.
MPS 601
INTERNSHIP
Graduate
Supervised work experience during one or more quarters, usually involving application of administrative skills in an organizational setting new to the student.

MPS 602
CANDIDACY CONTINUATION
Graduate
Required of students who are not registered for regular courses during an academic quarter while completing course requirements or research.

MPS 603
CANDIDACY MAINTENANCE
Graduate
Placeholder course for students NOT actively working on their thesis. This course is meant only to maintain university student status, it will not give the student full- or part-time student status.

MPS 604
SPECIAL TOPICS
Graduate
Topics vary each term. (May be taken more than once).

MPS 606
LEADERSHIP IN HIGHER EDUCATION ADMINISTRATION
Graduate
This course introduces students to the organization and management of institutions of higher education with an emphasis on the administrative structures and functions of colleges and universities, as well as organizational theory as it applies to institutions of higher education. This course explores topics such as leadership, governance, strategic planning and budgeting, and human resource management, and also introduces students to allied higher education research and advocacy organizations.

MPS 607
SPECIAL TOPICS IN HIGHER EDUCATION ADMINISTRATION
Graduate
This course allows students to explore topics of current concern in the field of higher education in depth. Topics that may be addressed in this course include higher education finance, higher education law, diversity in higher education, enrollment management and marketing in higher education, and politics and policy in higher education. This course is an elective, repeatable for credit, in the Higher Education Concentration.

MPS 500 is a prerequisite for this course.

MPS 608
SEMINAR IN HIGHER EDUCATION ADMINISTRATION
Graduate
This course provides the opportunity for students to discuss and develop a greater understanding of issues of current concern in higher education. This course may explore issues of critical concern that take from current research and practice in the field and will allow students to integrate knowledge drawn from across the MPS program to the study of current issues in higher education.

MPS 500 is a prerequisite for this course.

MPS 610
INTERNATIONAL PROFESSIONAL INTERNSHIP
Graduate
The internship consists of work experience supervised by a site supervisor in an international or cross-cultural organization during one or more terms and involving the application of administrative skills in an organization new to the student. Students may take internship abroad or in the US.
MPS 611
MANAGEMENT OF INTERNATIONAL NGOs
Graduate
This course examines management skills and trends of international nongovernmental organizations. Through specific case studies in the fields of international public service, development and emergency, students learn current techniques to effectively manage projects, relations and operations of international non-governmental programs and development projects.

MPS 612
INTERNATIONAL POLITICAL ECONOMY
Graduate
This course provides an overview of major theories and practice in international political economy. It includes critical analysis of international political economy such as growth theories, capital and labor flows, and transformation of regimes. Students develop analytical skills for professional interests and research purposes.

MPS 613
COMPARATIVE PUBLIC POLICY
Graduate
Through comparative methods, this course examines cross-national social policy research and practices. Through case study analysis students learn about comparative welfare state research and reflect on major theoretical and methodological aspects of social policy. North American public policy approaches are compared and contrasted with European, Asian, African and Latin American policies on education, health care, housing, social security, labor market and other policy fields.

MPS 614
INTERNATIONAL ORGANIZATIONS SEMINAR
Graduate
This seminar introduces students to the contemporary international affairs of the United Nations and connected agencies, programs and organizations. Through conferences with high level UN representatives, students gain an inside view of this complex inter-governmental organization in its operations for peace and security, poverty reduction and development, human rights and humanitarian affairs and international relations and international law.

MPS 615
MANAGEMENT OF INTERCULTURAL DIVERSITY
Graduate
This course provides the necessary conceptual foundation and practical skills for leading, managing and communicating in a cross-cultural and diverse working environment. Students learn intercultural competency through applications and examples on international relations and human resource management.

MPS 616
INTERNATIONAL RELATIONS AND CONFLICT MANAGEMENT
Graduate
The course focuses on theoretical foundations and practical implications of diplomacy, negotiation, mediation and peace-building to solve and prevent conflicts. It offers reflective practices and concrete directions for creating constructive solutions to interpersonal, inter-group, and international conflict.

MPS 617
ECONOMICS OF THE EUROPEAN UNION
Graduate
This advanced course builds on INT 402 or MPS 612 by applying contemporary theories of political economy to topics that reflect current concerns.

INT 402 or MPS 612 is a prerequisite for this class.
MPS 618
MIGRATION AND FORCED MIGRATION
Graduate
This course examines the integral role that different processes of mobility play in shaping today's world: emigration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations. Cross-listed with INT 404.

MPS 619
INTERNATIONAL LAW
Graduate
This course offers students the opportunity to engage in an examination of recent developments in international treaties, legal process and international organization. Topics may include refugees, trade law, criminal law and the establishment of the international criminal court, international labor law, environmental law, theories of international law, human rights and the relationship between international law and local economic development. Cross-listed with INT 410.

MSC 111
OFFICERSHIP IN THE UNITED STATES ARMY
Undergraduate
The purpose of this class is to introduce cadets/students to the fundamental components of service as an officer in the United States Army. These initial lessons form the building blocks of progressive lessons in values, fitness, leadership, and officership. Additionally the class addresses "life skills" including fitness, communications theory and practice (written and oral), and interpersonal relationships.

MSC 112
PROBLEM SOLVING AND DECISION MAKING
Undergraduate
This course is an introduction to the "life skills" of problem solving, decision-making and leadership. The course is designed to help students in the near-term as leaders on campus. The class will help students be more effective leaders and managers in the long-term, whether they serve in the military or the civilian sector. Topics addressed include critical thinking, problem solving methods, leadership theory, followership, group cohesion, goal setting, and feedback mechanisms. Lessons are taught in a seminar format, emphasizing student discussions and practical exercises.

MSC 113
FUNDAMENTALS OF LEADERSHIP
Undergraduate
This course provides cadets/students an introduction to the critical topic of leadership. The course seeks to convince cadets/students that they can learn to be better leaders than they are now (i.e. leaders aren't born they are developed), and to provide them with a model for understanding their development as leaders.

MSC 151
PHYSICAL READINESS I
Undergraduate
Introduction to the principles of fitness: a fast-paced military-style interval training class that incorporates calisthenics and an emphasis on a healthy life style. Students will undergo an evaluation of their physical fitness level and it's progression over the course of the quarter.

MSC 211
LEADERSHIP AND PROBLEM SOLVING
Undergraduate
The purpose of this class is to introduce cadets/students to principal leadership instruction of the Basic Course. Building upon the fundamentals introduced in the MSC 100 level classes, this instruction delves into several aspects of communication and leadership theory.

MSC 212
MILITARY PRINCIPLES OF TACTICS
Undergraduate
This quarter focuses principally on officership, providing an extensive examination of the unique purpose, roles, and obligations of commissioned officers. It includes a detailed look at the origin of our institutional values and their practical application in decision-making and leadership. The lesson traces the Army's successes and failure as it evolved from the Vietnam War to the present.
MSC 213
OFFICERSHIP CASE STUDY
Undergraduate
This course builds on the MS I year's introduction to officership and provides an extensive examination of the unique purpose, roles, and obligations of commissioned officers. The aim is to convey a clear and complete understanding of what it means to be a commissioned officer. Special emphasis is given to the officer's role in shaping and guiding the growth and evolution of the Army through decisions, policies, and personal example.

MSC 252
PHYSICAL READINESS II
Undergraduate
Introduction to the principles of fitness: a fast-paced military-style interval training class that incorporates calisthenics and an emphasis on a healthy life style. Students will undergo an evaluation of their physical fitness level and its progression over the course of the quarter.

MSC 277
WAR & PEACE IN THE MODERN AGE
Undergraduate
A survey of military history from 1648 to the present with emphasis on the relationship between armed forces and the societies that create them, the impact of technology on warfare, and efforts to limit deadly conflict.

MSC 321
FUNDAMENTALS OF MILITARY LEADERSHIP AND TRAINING
Undergraduate
Instruction and case studies, which build leadership competencies and military skills in preparation for further responsibilities as Army Officers. Specific instruction in the principles of war, decision-making processes, planning models, and risk assessment. Advanced leadership instruction focuses on motivational theory, the role and actions of leaders, and organizational communications. Must be a contracted ARMY ROTC cadet.

MSC 322
ORGANIZATIONAL LEADERS
Undergraduate
Specific instruction is given in individual leader development, planning and execution of small unit operations, individual and team development, and the Army as a career choice. Must be a contracted ARMY ROTC cadet.

MSC 323 is a prerequisite for this class.

MSC 323
ADVANCED LEADERSHIP
Undergraduate
This course builds upon the previous lessons while introducing advanced leadership theories on motivation, leader modeling, and the role of a leader in an organization. Must be a contracted ARMY ROTC cadet.

MSC 322 is a prerequisite for this class.

MSC 341
COORDINATE ACTIVITIES WITH STAFFS
Undergraduate
This module consists of four lessons designed to give the cadet an understanding and appreciation of the critical importance that staff organization, planning, and coordination play in the success or failure of military operations. The module uses historical case studies initially to illustrate these points then transitions to provide an overview of staff fundamentals and principles contained in field manual FM 101-5. Must be a contracted ARMY ROTC cadet.

MSC 322 or MSC 323 is a prerequisite for this class.
MSC 342
ETHICAL IMPERATIVES FOR THE JUNIOR OFFICER
Undergraduate
This six-lesson module on ethics builds upon previous instruction presented in the Basic Course and the MS III year. These lessons further strengthen character and values within the cadets, increase their understanding of the Army's consideration of others' expectations, and improve their capacity to make correct decisions when presented with an ethical or moral dilemma. Must be a contracted ARMY ROTC cadet.

MSC 322 or MSC 323 is a prerequisite for this class.

MSC 343
ADVANCED MILITARY TOPICS
Undergraduate
This course builds upon the previous MS IV lessons while introducing advanced leadership theories on motivation, leader modeling, and the role of a leader in an organization. It will also address the responsibility and process of a leader on how to assess and apply risk assessment within the organization. Must be a contracted ARMY ROTC cadet.

MSC 353
PHYSICAL READINESS III
Undergraduate
Introduction to the principles of fitness: a fast-paced military-style interval training class that incorporates calisthenics and an emphasis on a healthy life style. Students will undergo an evaluation of their physical fitness level and its progression over the course of the quarter.

MSC 399
MILITARY THEORY
Undergraduate
(Independent Study) Intensive research and study of one or more selected topics. The topics and research methodology are determined in consultation with the instructor. May be repeated for maximum of six credit hours.

MSW 401
PROFESSIONAL WRITING AND DEVELOPMENT
Graduate
The practice of professional social work requires accurate and persuasive communication in multiple formats. This required, foundation-level course is designed to introduce students to the major possibilities and constraints of professional writing and other forms of communication as well as survey the career paths available to professional social workers. There is an emphasis on writing for professional settings including case studies, mandated reports, summaries, and professional publication.

Status as an MSW student or instructor permission is a prerequisite for this class.

MSW 411
HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I
Graduate
This is the first course of a two-part sequence designed to develop an understanding about human behavior and the social environment; the course offers an ecosystems framework and method for understanding human behavior within the context of personal, family, group and community systems. Using a bio-psycho-social theoretical framework, fundamental concepts and theories are introduced with the life cycle serving as the organizational focus. The course covers the first half of the life span: conception, infancy, childhood, adolescence and young adulthood.

MSW 412
HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II
Graduate
This is the second course of a two-part sequence designed to develop an understanding about human behavior and the social environment; the course offers an ecosystems framework and method for understanding human behavior within the context of personal, family, group and community systems, organizations, and institutions. Using a bio-psycho-social theoretical framework, fundamental concepts and theories are introduced with the life cycle serving as the organizational focus. The course covers the second half of the life span: young adulthood, middle adulthood, later adulthood and end of life.

MSW 411 and status as a MSW degree-seeking student or instructor consent are a prerequisite for this class.
INTRODUCTION TO SOCIAL WORK RESEARCH

Graduate

This course presents the conceptual foundations and methods of research needed in order to assist students with integrating research knowledge and professional social work practice. It presents social justice as an overarching paradigm in the study of social work research. MSW 421 presents the conceptual foundations and methods of research in order to assist students with integrating research knowledge with professional social work practice and ethics. The course focuses on the quantitative and qualitative methods. The course covers the research process from problem identification through the conceptualization of research questions, sampling, design, measurement, data collection, analysis, and dissemination of findings. Additionally the course pays specific attention to ethics in research and issues of race, class, gender and sexual orientation. As an alternative to the quantitative research method, the course touches briefly on qualitative methods. The course makes use of examples and readings that focus on conducting research with individuals, families, and communities in urban environments. Students engage in a critical analysis of the quantitative research method and consider alternative methods of developing knowledge as it pertains to social work. Additionally, the course provides a basic coverage of data analysis using both the quantitative and qualitative research methods with the goal of developing student's conceptual understanding and ability to critically interpret research findings.

Status as a MSW degree seeking student is a prerequisite for this class.

SOCIAL WELFARE POLICY I

Graduate

This foundation-level course is designed to provide students with the entry-level knowledge of social work ethics and values, policy formation and analysis, and practice skills necessary to impact and interpret the rules and regulations surrounding social welfare. Emphasis is placed on understanding political processes at the agency, local, regional and federal level and attention is given to economic considerations as well as the unique role of social welfare policy in regulating the lives of clients, particularly those from historically oppressed groups. This course is the first of two required social welfare policy courses for MSW degree candidates.

Status as an MSW student or instructor permission is a prerequisite for this class.

ADVANCED SOCIAL WELFARE POLICY II

Graduate

This is the second of two required Social Welfare Policy Courses in the MSW curriculum. This concentration course focuses on policy practice (including advocacy) skills in agencies and organizations. While including a review of analytical techniques, there is emphasis in this course on the human interactions which shape policy review and implementation. Only students who have successfully completed MSW 431 and the Foundation Practice and Field Education Sequence (MSW 481 thru 483 and MSW 491 thru 493) can be enrolled in this course.

MSW 431 or advanced standing is a prerequisite for this class.

SPECIAL TOPICS IN SOCIAL WORK

Graduate

See schedule for current offerings. Graduate standing required.

FOUNDATION PRACTICE I

Graduate

This course is the first in a series of three required foundational courses (MSW 481, MSW 482 and MSW 483) designed to equip students with the basic theoretical knowledge, analytical skills, practice skills, and values needed to practice generalist social work with diverse individuals and families in an urban context. The course is grounded in an empowerment model with an emphasis on social justice and the Vincentian values of respect, advocacy, service, and inventiveness. The course will explore the implementation of the ecosystems perspective as it applies to a generalist practice. The course will also cover the relationship between professional and personal values, social work ethics, assessment, relationship building, implementing change strategies, and practice evaluation. This course is to be taken concurrently with MSW 491 (Foundation Field Education I) and is required of all students enrolled in the first year field sequence.

Declared MSW student and department permission are prerequisites for this course.
This course is the second in a series of three required foundational courses (MSW 481, MSW 482 and MSW 483) designed to equip students with the basic theoretical knowledge, analytical skills, practice skills, and values needed to practice generalist social work with groups in an urban context. The course will emphasize the development, implementation, and evaluation of various forms of therapeutic groups along with some content on organizational task groups. Task groups will be covered more thoroughly in MSW 483. The course is grounded in the empowerment model with an emphasis on social justice and the Vincentian values of respect, advocacy, service, and inventiveness. This course is to be taken concurrently with MSW 492 (Foundation Field Education II) and is required of all students enrolled in the first year field sequence.

MSW 481 and department permission are prerequisites for this course.

This course is the third in a series of three required foundational courses (MSW 481, MSW 482 and MSW 483) designed to equip students with the basic theoretical knowledge, analytical skills, practice skills, and values needed to practice generalist social work within communities and organizations. Specifically, this course introduces skills associated with task groups which serve to meet client needs in communities and organizations. The course is grounded in the empowerment model with an emphasis on social justice and the Vincentian values of respect, advocacy, service, and inventiveness. This course is to be taken concurrently with MSW 493 (Foundation Field Education III) and is required of all students enrolled in the first year field sequence.

MSW 482 and department permission are prerequisites for this course.

This course is required for all Advanced Standing students and may be taken as an elective (with its co-requisite course, MSW 494) with permission of the Instructor. This course must be taken with MSW 494. This course is designed to equip students with the basic theoretical knowledge, analytical skills, practice skills, and values needed to prepare for advanced, community practice in social work. The course is grounded in the empowerment model with an emphasis on social justice and other Vincentian values. Additionally, it gives particular attention to the importance of diversity, including race/ethnicity, gender, economic class, disability, and sexual orientation in the context of social work macro practice. This course is to be taken concurrently with MSW 494 (Advanced Standing Foundation Field Education).

(MSW 483 and MSW 493) or MSW advanced standing is a prerequisite for this course.

This course is designed to support students in their Foundation Year of Field Education, and to complement the Foundation Year Sequence. Students will be provided with the opportunity to apply the beginning skills and knowledge needed to professionally aid individuals and families using the bio-psycho-social model and the empowerment approach, and introduce key components of field work and working with community organizations and social service agencies. This course is the first of three field education courses which are required of all MSW degree students. Concurrent enrollment in MSW 481 and confirmation of field placement for current academic year are required. The process for field placement and supporting policies are further articulated in the student handbook and the field education manual.

Declared MSW student and department permission are prerequisites for this course.

This course is designed to support students in their Foundation Year of Field Education, and to complement the Foundation Year Sequence. Students will be provided with the opportunity to apply the beginning skills and knowledge needed to professionally aid individuals and families using the bio-psycho-social model and the empowerment approach, and introduce key components of field work and working with community organizations and social service agencies. This course is the second of three field education courses which are required of all MSW degree students. Concurrent enrollment in MSW 482 and confirmation of field placement for current academic year are required. The process for field placement and supporting policies are further articulated in the student handbook and the field education manual.

MSW 491 is a prerequisite for this class.
MSW 493  
FOUNDATION FIELD EDUCATION III  
Graduate
This course is designed to support students in their Foundation Year of Field Education, and to complement the Foundation Year Sequence. Students will be provided with the opportunity to apply the beginning skills and knowledge needed to professionally aid individuals, families, and groups using the bio-psycho-social model and the empowerment approach, and introduce key components of field work and working with community organizations and social service agencies. This course is the third of three foundation field education courses which are required of all MSW degree students. Concurrent enrollment in MSW 483 and continuation in field placement for current academic year are required. The process for field placement and supporting policies are further articulated in the field education manual.

MSW 492 and department permission are prerequisites for this course.

MSW 494  
ADVANCED STANDING FOUNDATION FIELD EDUCATION  
Graduate
This field education course is required for all Advanced Standing students and may be taken as an elective (with its co-requisite course, MSW 484) with permission of the Instructor. The course must be taken with MSW 484. This course also requires enrollment in an approved field agency placement for the entire summer session. Students are required to complete a minimum of 150 contact hours at the agency. This course is designed to assist students with processing the many theoretical, analytical, and practice skills needed to prepare for community practice, an advanced approach to social work. This course is to be taken concurrently with MSW 484 (Advanced Foundation Practice).

MSW 499  
INDEPENDENT STUDY  
Graduate
Individually-supervised learning experience, usually involving extensive research and written analysis.

MSW 501  
PROGRAM EVALUATION  
Graduate
This course offers a comprehensive overview of how program evaluation fits in today's social service environment. It presents social justice as an overarching paradigm in the study of program evaluation. The course will cover three methods of program evaluation: needs assessments, outcome evaluations, and process evaluations. The course will also cover the history of evaluation and ethical considerations related to race, ethnicity and sexual orientation and emphasize the role of program evaluation with community-based organizations that exist in an urban context. Practical issues related to organizational mission, staff resistance, resource demands and evaluation ethics will be covered in order to offer a reality-based perspective on conducting program evaluation.

Declared MSW student and MSW 421 are prerequisites for this course.

MSW 521  
FUND DEVELOPMENT AND MANAGEMENT  
Graduate
This course introduces students to creating, implementing and adjusting budgets within agencies and programs which serve people, as well as program marketing and fundraising (including grant writing). This course is taken either concurrently with MSW 582 (Community Practice II) or before advanced field education. MSW 521 emphasizes budget preparation, fund acquisition and fund distribution. Successful completion of MSW 501 (Program Evaluation) is required for this course, as is the successful completion of the MSW research course (MSW 421). This course builds upon the constructs introduced in the advanced practice sequence. This course introduces students to budgetary operations and the ethical, value-based planning and decision making processes by which social workers must implement fiscal and administrative decisions.

MSW 421, (MSW 483 or MSW 484), (MSW 493 or MSW 494) and MSW 501 are a prerequisite for this class.
MSW 581
COMMUNITY PRACTICE I
Graduate
Using select theoretical approaches, including empowerment practice, this course equips students with the advanced skills and knowledge needed to practice in community-serving agencies and organizations. The emphasis in this course, which represents the first of three consecutive, required (advanced) practice courses, is on leadership and management of human service organizations. This course introduces students to the knowledge, skills and professional values essential to leadership of community-based or community-serving programs and organizations. This course covers leadership theories, styles, and techniques; supervision and facilitation; and the critical role(s) leadership play(s) in agency and program administration. Special attention is paid to the unique considerations of people with diverse backgrounds (and representatives of other marginalized groups) in leadership positions as well as working towards the promotion of social and economic justice. It is required that this course be taken concurrently with MSW 591 (Advanced Field Education I).

(MSW 483 or MSW 484) and (MSW 493 or MSW 494) are prerequisites for this course.

MSW 582
COMMUNITY PRACTICE II
Graduate
Using select theoretical approaches, this course equips students with the advanced skills and knowledge needed to practice in community-serving agencies and organizations. The emphasis in this course, which represents the second of three consecutive, required (advanced) practice courses, is on program planning. This course introduces students to the skills and knowledge needed to plan and design programs in community-based, people-serving organizations, starting with problem analysis and needs assessment. Related topics such as understanding the multiple dimensions of social problems, operationalizing concerns, and the importance of collaboration and addressing diverse groups' needs within a community practice framework are also addressed. Measures for accountability and effectiveness, especially for professional social workers, are also addressed. Attention is also given to the needs of historically-marginalized groups and planning for full social and economic justice. It is required that this course be taken concurrently with MSW 592 (Advanced Field Education II).

MSW 581 is a prerequisite for this class

MSW 583
COMMUNITY PRACTICE III
Graduate
Using select theoretical approaches, this course equips students with the advanced skills and knowledge needed to practice in community-serving agencies and organizations. The emphasis in this course, which represents the final of three consecutive, required (advanced) practice courses is on resource development and marketing. This course continues facilitation in planning and designing programs in community-based or community-serving organizations while also providing students with opportunities to integrate fund development, program evaluation, and effective stewardship of resources to leverage lasting social change, especially on behalf of historically-oppressed communities. Additional related topics include analysis of organizational change, partnerships, strategic planning, and quality assurance. It is required that this course be taken concurrently with MSW 593 (Advanced Field Education III).

MSW 582 is a prerequisite for this course.

MSW 591
ADVANCED FIELD EDUCATION I
Graduate
This course is the first in the final, three-part advanced field education sequence. This course also requires enrollment in an approved field agency placement for the entire academic year. The process for field placement and supporting policies are further articulated in the student handbook and the field education manual. This course is designed to assist students in processing the many theoretical, analytical, and practice skills needed to practice advanced social work in community settings. Attention is also paid to the unique considerations of women and representatives of other historically-marginalized groups in organizational leadership roles through required learning objectives and tasks.

MSW 581 is a corequisite for this class.
MSW 592
ADVANCED FIELD EDUCATION II
Graduate
This course is the second in the final, three-part advanced field education sequence. This course also requires enrollment in an approved field agency placement for the entire academic year. The process for field placement and supporting policies are further articulated in the student handbook and the field education manual. This course is designed to assist students in processing the many theoretical, analytical, and practice skills needed to practice advanced social work in community settings. Attention is also paid to the unique considerations of women and representatives of other historically-marginalized groups in organizational leadership roles through required learning objectives and tasks.

MSW 581 and MSW 591 are a prerequisite and MSW 582 is a co-requisite for this class.

MSW 593
ADVANCED FIELD EDUCATION III
Graduate
This course is the third in the final, three-part advanced field education sequence. This course also requires enrollment in an approved field agency placement for the entire academic year. The process for field placement and supporting policies are further articulated in the student handbook and the field education manual. This course is designed to assist students in processing the many theoretical, analytical, and practice skills needed to practice advanced social work in community settings. Attention is also paid to the unique considerations of women and representatives of other historically-marginalized groups in organizational leadership roles through required learning objectives and tasks.

MSW 582 and MSW 592 are a prerequisite and MSW 583 is a corequisite for this class.

MUS 100
UNDERSTANDING MUSIC
Undergraduate
Developing an understanding of musical elements and forms, and how composers use them to create music throughout the history of western music. This course also includes a look at the musics of the world and jazz. This course is not available to students in the School of Music. Arts and Literature.

MUS 102
COMPOSITION AND SOUND ART FOR NON-MUSIC MAJORS
Undergraduate
Through performing, recording, and studying a variety of compositional styles, students develop creative music projects. Instrumental, vocal, and/or computer music skills will be fostered throughout the course. No previous experience necessary. This course is not available to students in the School of Music. Arts and Literature.

MUS 105
ROCK MUSIC- THE BEATLES: MUSIC, AESTHETICS AND CULTURE
Undergraduate
This course is a survey of the music and movies of the Beatles. Topics covered in this class include the basic elements of music to allow students to analyze and compose simple songs. No previous knowledge of music is necessary. This course is not available to students in the School of Music. Arts and Literature.

MUS 107
GUIDE TO MUSIC THEORY
Undergraduate
The fundamentals of notation and elemental theory for non-music majors. Online drills and short composition studies will be included as course activities. Arts and Literature.

MUS 108
ROCK MUSIC OF THE WORLD
Undergraduate
A historical survey of the world's main styles of rock music, extending from Chuck Berry to Puff Daddy to Coldplay, from Bob Marley to Black Sabbath. Arts and Literature.
MUS 109  
**FROM WAGNER TO YOUTUBE: THE WEDDING OF MUSIC AND DRAMA**  
Undergraduate  
Examines the use of music to reinforce drama and visual image in opera, film, and rock video. This course is not available to students in the School of Music. Arts and Literature.

MUS 110  
**MUSICIANSHIP I**  
Undergraduate  
(Autumn) Theory fundamentals - from keys, scales, and intervals, through seventh chords and four-part writing.  
Status as an Undergraduate Music student is a prerequisite for this class.

MUS 111  
**AURAL TRAINING I**  
Undergraduate  
A six-quarter sequence of sight-singing and dictation, organized in coordination with the musicianship curriculum. Each quarter is a prerequisite for the following level. (1 quarter hour)  
Status as an Undergraduate Music student is a prerequisite for this class.

MUS 112  
**ROCK COMPOSITION**  
Undergraduate  
This course aims to provide students with the tools and historical perspective to compose Rock music. Students will transcribe and practice the techniques of songs in various classic Rock styles, learning the specifics of those styles in class and in reviewing live performances in the Chicago area. Students will also be educated in more general musical disciplines such as song-form, rhythm, harmony, melody, and text-setting. Arts and Literature.

MUS 113  
**GROUP PIANO I**  
Undergraduate  
The first six courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters. (1 quarter hour)  
Status as an Undergraduate Music student is a prerequisite for this class.

MUS 120  
**MUSICIANSHIP II**  
Undergraduate  
Integrated study of theory/history pertaining to music of the Baroque period. Activities include readings, listening, analysis, and theory exercises.  
MUS 110 is a prerequisite for this class.

MUS 121  
**AURAL TRAINING II**  
Undergraduate  
A six-quarter sequence of sight-singing and dictation, organized in coordination with the musicianship curriculum. Each quarter is a prerequisite for the following level. (1 quarter hour)  
MUS 111 is a prerequisite for this class.
MUS 123
GROUP PIANO II
Undergraduate
The second of six courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters. (1 quarter hour)

MUS 113 is a prerequisite for this class.

MUS 130
MUSICIANSHIP III
Undergraduate
(Spring) An integrated study of theory/history pertaining to music of the Classical period. Activities include readings, listening, analysis, and theory exercises.

MUS 120 is a prerequisite for this class.

MUS 131
AURAL TRAINING III
Undergraduate
A six-quarter sequence of sight-singing and dictation, organized in coordination with the musicianship curriculum. Each quarter is a prerequisite for the following level. (1 quarter hour)

MUS 121 is a prerequisite for this class.

MUS 133
GROUP PIANO III
Undergraduate
The third of three courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters. (1 quarter hour)

MUS 123 is a prerequisite for this class.

MUS 140
MUSIC OF THE WORLD'S PEOPLE
Undergraduate
A survey of music roles and practices in a variety of countries and continents. This course is not available to students in the School of Music. Arts and Literature.

MUS 200
MUSIC OF THE UNITED STATES TO 1900
Undergraduate
This course discusses two types of subject matter: the traditions of art music or "classical" American music from the Colonial era through the latter Nineteenth Century; and the important vernacular or popular tradition of music which emerged between 1830-40 and continued up through about 1900. Arts and Literature.

MUS 201
MUSIC OF THE UNITED STATES SINCE 1900
Undergraduate
This course discusses two types of subject matter: the traditions of art music or "classical" American music in the twentieth and twenty-first Centuries. Additionally, important vernacular or popular traditions since 1900 will be studied. This includes idioms such as: jazz blues, Broadway musicals, the standard popular song, motion picture music, commercial music, rock and roll, and various other types of popular music. Arts and Literature.
MUS 202
WOMEN AND MUSIC
Undergraduate
A survey exploring the roles of women musicians in their societies. Arts and Literature.

MUS 203
CONTEMPORARY MUSICAL IMPROVISATION: SCRATCH ORCHESTRA
Undergraduate
This course will focus on improvisational practices with a focus on experimental composers between 1959 - 1980. Students will form a large ensemble. Class activity will focus on hands-on music making with a combination of laptops and acoustic instruments. Arts and Literature.

MUS 204
WHAT WERE THE BLUES? 1920-1960
Undergraduate
This course will follow the history of the blues from its first recordings in the early 1920s through the “rediscovery” of classic blues artists in the late 50s, with an emphasis on listening to and discussing a rich legacy of classic blues recordings. Arts and Literature.

MUS 205
THAT HIGH LONESOME SOUND: BLUEGRASS 1936-1972
Undergraduate
A study of the social, cultural, and technological contexts of classical bluegrass, recordings made between 1936 and 1972. Arts and Literature.

MUS 206
ITALIAN POPULAR SONGS IN CONTEXT: THEN AND NOW
Undergraduate
Students will study Italian popular songs throughout the last eight centuries, emphasizing their use to mirror, reflect, and influence socio-cultural norms of the time and place of their creation. Arts and Literature.

MUS 207
INTRODUCTION TO SONGWRITING
Undergraduate
This course introduces students with no prior musical training to the methods of influential songwriters, and provides students with the basic musical literacy that will help them realize their own songs. Students will apply basic music theory concepts to the work of prominent popular songwriters from the late 1940s through the 1980s, a period of stylistic unity that shaped contemporary popular music. Orally, and through transcriptions and written analysis, students will discover musical characteristics that define historical styles, and pay particular attention to distinctive traits of individual artists. A typical class will consist of discussing recordings, transcriptions, and artist interviews as a class or in groups. Arts and Literature.

MUS 208
COMMUNITY AUDIO ART PRODUCTION
Undergraduate
This Experiential Learning course involves collaborative art production, electro-acoustic and computer music, experimental sound techniques, radio art, political music, socially engaged audio documentary, soundscape design, field recordings, sound installation, conceptual art, public service announcements, and interdisciplinary art. In addition to a historical survey of works in this genre, students will complete one group project and one solo project. This course may only be used as a free elective for students in the School of Music. Junior Year Experiential Learning.

MUS 210
MUSICIANSHIP IV
Undergraduate
(Autumn) An integrated study of theory/history pertaining to music of the 19th and early 20th century. Activities include readings, listenings, analysis, and theory exercises.

MUS 130 is a prerequisite for this class.
MUS 211
AURAL TRAINING IV
Undergraduate
A six-quarter sequence of sight-singing and dictation, organized in coordination with the musicianship curriculum. Each quarter is a prerequisite for the following level. (1 quarter hour)

MUS 131 is a prerequisite for this class.

MUS 213
GROUP PIANO IV
Undergraduate
The fourth of six courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters. (1 quarter hour)

MUS 133 is a prerequisite for this course.

MUS 220
MUSICIANSHIP V
Undergraduate
An integrated study of theory/history pertaining to music of the 20th and 21st centuries. Activities include readings, listening, analysis, and theory exercises.

MUS 210 is a prerequisite for this class.

MUS 221
AURAL TRAINING V
Undergraduate
A six-quarter sequence of sight-singing and dictation, organized in coordination with the musicianship curriculum. Each quarter is a prerequisite for the following level. (1 quarter hour)

MUS 211 is a prerequisite for this course.

MUS 223
GROUP PIANO V
Undergraduate
The fifth of six courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters. (1 quarter hour)

MUS 213 is a prerequisite for this course.

MUS 230
MUSICIANSHIP VI
Undergraduate
History of music of the Middle Ages and the Renaissance; readings of texts and articles; study of specific works.

MUS 220 is a prerequisite for this class.

MUS 231
AURAL TRAINING VI
Undergraduate
A six-quarter sequence of sight-singing and dictation, organized in coordination with the musicianship curriculum. Each quarter is a prerequisite for the following level. (1 quarter hour)

MUS 221 is a prerequisite for this course.
MUS 233
GROUP PIANO VI
Undergraduate
The last of six courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters. (1 quarter hour)

MUS 265
MUSICAL TRADITIONS OF AMERICA AND THE WORLD
Undergraduate
An introduction to the musical styles of world cultures and jazz. Required of all music majors. (2 quarter hours)

MUS 272
TRENDS IN 20TH CENTURY ART AND MUSIC
Undergraduate
Appreciative approach to the styles of selected 20th-century artists and composers. Arts and Literature.

MUS 274
THE GOSPEL MUSIC TRADITION IN AMERICA
Undergraduate
The origins, people, context, and spirit of gospel music. Arts and Literature.

MUS 277
GUIDE TO MUSIC THEORY II
Undergraduate
The advanced study of notation and elemental theory for non-music majors. Online drills and short composition studies will be included as course activities.

MUS 278
JAZZ
Undergraduate
A comprehensive study of the origins and developments of jazz, specifically concentrated on important jazz styles and performers since 1917. Arts and Literature.

MUS 280
POPULAR MUSIC OF AFRICA
Undergraduate
This course surveys a wide variety of popular music genres, songs, and performers from the continent of Africa. Students will learn about the cultural context and history of various pop music genres as well as how to recognize key stylistic features.

MUS 281
OPERA
Undergraduate
This class surveys the history and styles of opera from its beginning through the present, with a focus on examples from the 18th through the 20th centuries. While students will learn to identify major operatic styles, a major focus of the course will be the contribution music makes to drama in the context of opera. We will work on developing a vocabulary for discussing the music of opera and its interaction with the stories opera tells.
MUS 282
LOVE SONGS
Undergraduate
This course will investigate case studies of love songs in the Western tradition, considering contemporary conventions, the response of composers and poets to expectations, and the relation between first-person song and autobiography. In this interdisciplinary class, students will explore the historically contingent nature of musical and poetic convention, changing ideas of love and gender relationships, and the importance of biography in the reception of love songs. While the course will have a broad historical scope, an emphasis on modern popular music will allow students to apply critical reading and listening skills to the music they already appreciate.

MUS 283
INTRODUCTION TO LYRIC WRITING
Undergraduate
MUS 284
CINEMATIC SOUNDS: THE ROLE OF MUSIC IN FILM
Undergraduate
This course surveys the history of film music in the 20th century. Students will learn to identify the formal elements of both cinema and film music, and the various ways these elements can be combined to create a sense of narrative, genre, or spectacle.

MUS 303
BASIC CONDUCTING PRACTICUM
Undergraduate
An introduction to ensemble conducting. Students will learn to prepare a score and to execute a rehearsal with a live ensemble. Topics include score study, rehearsal skills, critical listening skills, and physical conducting skills. This course must be taken concurrently with Basic Conducting (MUS 304). (0 quarter hours)

MUS 304
BASIC CONDUCTING
Undergraduate
An introduction to ensemble conducting. Students will learn to prepare a score and to execute a rehearsal with a live ensemble. Topics include score study, rehearsal skills, critical listening skills, and physical conducting skills. COREQUISITE: Basic Conducting Practicum (MUS 303).

MUS 305
MUSICAL ENCOUNTERS OF THE PORTUGUESE EMPIRE
Undergraduate
This course explores the role that music played in encounters between Europeans traveling on behalf of the Portuguese Empire and the cultures colonized by the Portuguese beginning in the 15th century and continuing today in post-colonial contexts. This course will also examine the musical genres that developed as a result of cross-cultural contact. Musical case studies are selected from different historical periods and diverse cultures and geographical areas encompassed by the Portuguese Empire: Portugal, Asia, Africa, and South America. This class will include listening and reading assignments, and students will have the opportunity to further explore an area of interest in a research project on a topic of their choice. Arts and Literature.

MUS 306
PUNK ROCK THROUGH THE YEARS: ISSUES & AESTHETICS
Undergraduate
This course explores the aesthetic, political, and social issues that have shaped the development of punk rock and its various sub-genres in the United States and the United Kingdom since the early 1970's.

Status as an Undergraduate Music student is a prerequisite for this class.

MUS 308
ANALYTICAL TECHNIQUES
Undergraduate
Investigation of various analytical approaches to music syntax, structure, style and texture (including timbral and vocal or instrumental configurations) as exhibited in representative compositions from late Baroque to the 20th century. Intended for Bachelor of Arts majors.

MUS 230 is prerequisite for this class.
MUS 309
PERFORMANCE PRACTICE AND CRITIQUE
Undergraduate
This course will provide students will additional performance opportunities and will give them a chance to get critique from people not playing their instrument and, therefore, without the sympathy to its technical demands. Additionally, they will learn to criticize their peers in an appropriate and focused manner and will become better acquainted with the specifics of other instruments. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MUS 310
INTRODUCTION TO ETHNOMUSICOLOGY
Undergraduate
This course introduces students to the discipline of ethnomusicology, the study of why and how people around the world experience music. Students explore key themes and research methodology of ethnomusicology through selected readings, sound recordings, documentary film, live performances, site visits, and class discussions. Students complete an independent fieldwork project.

Status as an Undergraduate Music student is a prerequisite for this class.

MUS 360
TOPICS IN MUSICIANSHIP
Undergraduate
An in-depth investigation of a topic in musicianship studies. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MUS 379
BAROQUE MUSIC
Undergraduate
(2 hours) This course is concerned with the history and development of musical styles and procedures during the Baroque period, with reference to significant compositions, musical examples, and recordings. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MUS 381
HISTORY OF OPERA
Undergraduate
A history of opera from the 17th century to the present. Emphasis on the development of musical style with particular reference to significant operas, musical examples, and recordings. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MUS 386
MUSIC SINCE WORLD WAR II
Undergraduate
This course is concerned with the history and development of musical styles and procedures during post World War II period, with reference to significant compositions, musical examples, and recordings. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MUS 387
EARLY 20TH CENTURY MUSIC
Undergraduate
This course is concerned with the history and development of musical styles and procedures during the early 20th Century, with reference to significant compositions, musical examples, and recordings.

Status as an Undergraduate Music student is a prerequisite for this class.
MUS 395
SENIOR CAPSTONE SEMINAR
Undergraduate
This course is designed to fulfill the senior capstone experience for School of Music Bachelors of Arts students only. Students will develop a final project, culminating their musical studies in relationship to their liberal arts studies. The individual projects should reflect an advanced level of musical understanding, scholarship, and writing. The School of Music faculty member will meet with the students in a biweekly seminar throughout the quarter, and on an individual basis as needed.

Status as a Bachelor of Arts in Music student is a prerequisite for this class.

MUS 398
INDEPENDENT STUDY
Undergraduate
An in-depth study of a musicianship topic under the supervision of a faculty member. (Departmental permission required). (variable credit)

Status as an Undergraduate Music student is a prerequisite for this class.

MUS 400
MUSIC RESEARCH
Graduate
Introduction to music research types and techniques; bibliography and bibliographical sources; the development of writing skills; analysis of research examples.

Status as a Graduate Music student is a prerequisite for this class.

MUS 408
ANALYTICAL TECHNIQUES
Graduate
Investigation of various analytical approaches to music syntax, structure, style and texture (including timbral and vocal or instrumental configurations) as exhibited in representative compositions from many historical periods. Intended as an overview of theory/analysis for graduate students.

Status as a Graduate Music student is a prerequisite for this class.

MUS 409
PERFORMANCE PRACTICE AND CRITIQUE
Graduate
This course will provide students with additional performance opportunities and will give them a chance to get critique from people not playing their instrument and, therefore, without the sympathy to its technical demands. Additionally, they will learn to criticize their peers in an appropriate and focused manner and will become better acquainted with the specifics of other instruments. (2 quarter hours)

Status as a Graduate Music Performance student (degree or certificate) is a prerequisite for this class.

MUS 420
HISTORY OF THE ORATORIO
Graduate
An analytical and historical study of oratorio literature from 1600 to the present.

Status as a Graduate Music student is a prerequisite for this class.

MUS 435
18th & 19th WIND HISTORY AND LITERATURE
Graduate
A historical connection exists between wind music of the ancient and medieval periods, and the music of today. This course will trace that historical line, focusing on the 18th & 19th Centuries. The development of repertoire as well as the functions and uses of wind music will be explored. It is the intention of this class to address the needs of people who will perform, conduct, or teach "classical" wind music as part of a career. Emphasis will be placed on original music suitable for professional concert performance.

Status as a Graduate Music student is a prerequisite for this class.
MUS 436
20th CENTURY WIND HISTORY AND LITERATURE
Graduate
The role of this course is to inform students of the development of wind music through the exploration of ensemble size and instrumentation, civic or artistic purpose, influential composers and conductors, and specific repertoire.
Status as a Graduate Music student is a prerequisite for this class.

MUS 460
TOPICS IN MUSICIANSHIP
Graduate
An in-depth investigation of a topic in musicianship studies. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

MUS 475
MEDIEVAL MUSIC
Graduate
Historical survey of music from the Middle Ages: sacred and secular music as artistic, theoretical, and intellectual expression of the Middle Ages; history of musical styles to 1420; performance practice issues.
Status as a Graduate Music student is a prerequisite for this class.

MUS 478
RENAISSANCE MUSIC
Graduate
Historical survey of music from the Renaissance. Musical style, compositional procedures, and performance practice are studied, within the social, political and economic environment in which the composers worked.
Status as a Graduate Music student is a prerequisite for this class.

MUS 479
BAROQUE MUSIC
Graduate
Historical survey of Baroque music and performance practice. Representative examples of both vocal and instrumental music are studied, mostly using the analytical techniques of the period, with the aim of becoming familiar with the most significant manners of composition of Baroque composers.
Status as a Graduate Music student is a prerequisite for this class.

MUS 481
HISTORY OF OPERA
Graduate
The course surveys the history of opera in western culture from its beginnings in the 17th century through the 20th century. The class materials cover stylistic trends and genres as demonstrated through seminal works. Each class period will contain a relevant analytical study.
Status as a Graduate Music student is a prerequisite for this class.

MUS 482
WORLD MUSIC CULTURES
Graduate
This graduate course will provide a global musical perspective and widen the lens through which students experience music. Through lectures, listening, guest performances, and engaging discussion students will gain rich insights into new worlds of music.
Status as a Graduate Music student is a prerequisite for this class.
MUS 484
CLASSICAL MUSIC
Graduate
Traces the development of musical style during the Classical Era through the analytical study of examples in the principal musical forms such as sonata form. Reception and performance practice then and now will be addressed.

Status as a Graduate Music student is a prerequisite for this class.

MUS 485
ROMANTIC MUSIC
Graduate
Survey of nineteenth century music through a close analysis of representative Romantic works. The course will cover the expansion of both harmonic language and form leading to their eventual breakdown and reinterpretation.

Status as a Graduate Music student is a prerequisite for this class.

MUS 486
MUSIC SINCE WORLD WAR II
Graduate
This course surveys Western art music and related theoretical and technical issues from near the end of World War II to the present focusing on the development of new musical languages, new instruments and new methods of analysis.

Status as a Graduate Music student is a prerequisite for this class.

MUS 487
20TH CENTURY MUSIC BEFORE WWII
Graduate
This course surveys Western art music and related theoretical and technical issues from near the end of the 19th century to World War II, focusing on the new musical languages and aesthetics developed from 1890 until 1940.

Status as a Graduate Music student is a prerequisite for this class.

MUS 498
INDEPENDENT STUDY
Graduate
An in-depth study of a musicianship topic under the supervision of a faculty member. (Departmental permission required). (variable credit)

Status as a Graduate Music student is a prerequisite for this class.

NEU 201
INTRODUCTION TO NEUROSCIENCE
Undergraduate
This class will introduce the structure and function of the nervous system as well as approaches to study and model it. Anatomical, cellular, and molecular foundations will be covered and these will be related to behavior and cognition. Computational approaches will also be presented. A historical review will place neuroscience within its contemporary context and current approaches will be presented, discussed, and critiqued.

A grade of C- or better in BIO 191 or instructor consent is a prerequisite for this course.

NEU 228
NEUROETHICS
Undergraduate
This course examines moral standards and issues as these arise in the practice of neuroscience. Advances in this field have developed unprecedented ways of understanding, predicting, and even, influencing and controlling the human mind and, through this, human behavior. Neuroethics considers the ethical dilemmas that emerge in such research and the technologies that it fosters as well as the challenges these advances pose to some of the fundamental underlying concepts of moral theory: human nature, personal identity, and moral responsibility itself. Cross listed as PHL 228.
INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
Undergraduate
Provides an introduction to basic computational methods for understanding what nervous systems do and how they function. The course covers the structure of the brain, from neurons to circuits to regions, and also the computational and theoretical approaches to model the brain. The course will introduce students to the physiology of individual neurons, how they communicate through synapses and firing, and how they work together to create systems that control, learn and memorize. The course will include the application of mathematical and computational models to neural systems.

MAT 150, CSC 241 and NEU 201 (or consent of instructor) are prerequisites for this class.

NEU 301
RESEARCH METHODS IN NEUROSCIENCE
Undergraduate
This course is designed to provide students an understanding of how questions are answered in neuroscience by exploring experimental designs used in neuroscience research and individual techniques used by neuroscientists. In addition to reading about these methods, students will have hands on opportunities to conduct some of the methods discussed. Lastly, students will formulate their own research question and develop a proposal to answer their question.

(NEU 201 or BIO 193) and (one of the following: BIO 206, PSY 240 or IT 223) or instructor consent are prerequisites for this class.

NEU 339
CELLULAR NEUROBIOLOGY
Undergraduate
This course examines the cellular and molecular mechanisms of neuronal function and the changes that occur in processes such as learning and memory. Emphasis on electrophysiology, synaptic communication, and cellular signaling. Cross-listed as BIO339/439.

BIO 250 (or PSY 377 or HLTH 301) is a prerequisite for this class.

NEU 380
SPECIAL TOPIC IN NEUROSCIENCE
Undergraduate
A lecture and discussion based course focused on a particular topic in neuroscience. Topics may vary depending on the expertise of the instructor.

NEU 201 and Junior Standing are prerequisites for this class.

NEU 390
NEUROSCIENCE CAPSTONE
Undergraduate
This is a liberal studies course for seniors concluding their neuroscience major. The course will examine one topic in neuroscience from multiple viewpoints in the field of neuroscience as well as relate it to fields outside of science such as history, philosophy, religion, sociology, etc.

Senior standing and major in Neuroscience (or consent of instructor) are prerequisites for this class.

NEU 399
INDEPENDENT STUDY IN NEUROSCIENCE
Undergraduate
Experimental and/or library independent study of a topic in neuroscience. Can be repeated if the content of the independent study changes.

Status as a neuroscience major is a prerequisite for this course.

NMS 501
PROSEMINAR IN NEW MEDIA STUDIES
Graduate
The Proseminar in New Media Studies is an introduction to the field in both its academic and professional dimensions. The course addresses the humanistic and rhetorical approaches to new media that characterize the NMS program at DePaul, and helps students understand how these perspectives inform their work with new media.
NMS 502
NEW MEDIA, OLD MEDIA
Graduate
This course situates current media within a history of media technologies. Students examine the historical, cultural, and social contexts in which new media emerge, as well as how and why new media come to integrate with or supplant existing media.

NMS 504
TEXT AND IMAGE
Graduate
In this course we will explore the increasingly important dynamic between textual information and visual information. In this course we will read about how hypertext has changed the environment and nature of the written word, and we will examine how the Web has "remediated" previous media into a new dynamic. We will use this knowledge to perform analyses of visual and textual artifacts; students may also create their own artifacts.

NMS 505
WORKSHOP/PORTFOLIO SEMINAR
Graduate
Students will have a choice between a collaborative workshop or a more individually-centered portfolio development seminar. Each group prepares a digital media project for an existing community group, such as a social service organization. Those students preferring to work independently will, under the guidance of the advising professor, develop and defend a complete portfolio of their work within the NMS program. May be repeated for elective credit.

NMS 506
INTERNSHIP
Graduate
In consultation with the director of NMS, students design a field experience under the direction of a project director in the field. The field experience may be derived from issues raised in courses, from thesis research, or from personal research interests.

NMS 507
INDEPENDENT STUDY
Graduate
In consultation with the director, advanced students may devise, with the approval of an NMS faculty member, an independent course of study that is related to the field yet does not duplicate a core or elective course already available.

NMS 508
DESIGN RHETORICS
Graduate
This course provides students with a theoretical foundation and practical skills in the design of rhetorically sophisticated new media objects. We will learn basic principles of visual composition, both by examining existing compositions and building our own. We will also seek to understand the way visual literacies and culture shape the rhetorical choices we make as designers and managers of new media projects.

NMS 509
SPECIAL TOPICS IN NEW MEDIA STUDIES
Graduate
See schedule for current offerings. May be repeated for credit as topics vary.

NMS 510
WRITING DIGITAL CONTENT
Graduate
This course teaches students how to author written and multimodal digital content. Students also learn how to strategically deploy digital content for professional and civic purposes through such practices as content strategy, content management, and measurement analytics.
NMS 520
WEB DESIGN I
Graduate
An introduction to the process of making functional sites for display on the Internet. Students will learn HTML-based development software, and work with imaging software to apply fundamental theories of new media design to the production of working computer-screen applications.

NMS 521
WEB DESIGN II
Graduate
An introduction to digital authoring software, such as Macromedia Flash, that allows for the combination of animation, sound, and complex user interaction. Students will design and produce working animations while exploring the balance between purpose, usability, and aesthetic appeal.

NMS 530
HTML/CSS
Graduate
An introduction to fundamental web development and design languages. Students will learn HTML syntax, naming practices, and techniques for developing and structuring web pages and sites. Students will also learn how to style HTML pages with Cascading Style Sheets (CSS). While most instruction will proceed through XHTML, students will also have an opportunity to explore HTML5 and CSS3.

NMS 531
JAVASCRIPT
Graduate
An introduction to JavaScript and JavaScript libraries, focused on the rhetorical possibilities JavaScript makes available for web development. Students will learn the basics of JavaScript as a language, how it interacts with HTML and CSS, how to use it to produce dynamic and interactive structures in sites, and how to leverage existing JavaScript libraries.

NMS 540
DIGITAL ARCHIVES
Graduate
This course provides students with an overview of issues related to digital archives, and hands-on experience with contemporary archiving practices. Students in NMS 540 will explore digital archiving through theoretical readings and case studies, and create or maintain digital archives for local organizations.

NMS 541
DIGITAL STORYTELLING
Graduate
Digital storytelling is a community-based media arts practice for creating first-person video narratives. This course introduces digital storytelling and its allied values of personal storytelling, participatory process, and accessible production methods. Students learn the digital storytelling methodology, create their own digital story, and explore how personal storytelling is used in organizations and communities. Some sections may include a service-learning component.

NMS 551
USABILITY THEORY AND PRACTICE
Graduate
Students in the class will learn the theory and history of usability, exploring how the practice developed in technical writing, web design, and new media contexts. We will explore arguments for greater user inclusion in design and development processes as well as critiques of these practices in industry. Students will develop practical experience by composing usability protocols (how to design user testing), running various kinds of usability tests with real technologies and users, interpreting results of those tests for a variety of audiences, and writing usability test reports. The course will explore the usability of technologies generally, but focus particularly on web usability.

NMS 597
CANDIDACY CONTINUATION
Graduate
Masters candidates who are not enrolled in a course during a given quarter but who want to maintain active university status should register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit.
NSG 200
HEALTH AND NUTRITION
Undergraduate
This course provides an introduction to the complex interactions between nutrition, exercise, genetics, cultural factors, physiological and psychological stressors and health. Each class provides an overview on the various nutritional factors which influence the health of individuals. A population based approach is used to address the issue of world hunger and undernutrition. Multiple perspectives relating to nutrition are included such as cultural, religious, family and alternative nutritional lifestyles.

NSG 210
PARENTING IN MULTICULTURAL FAMILY SYSTEMS
Undergraduate
Families exist in complex systems of home, community and environment. Each family depends on their cultural history, previous experiences and social supports to assist with parenting. Today over 70% of families with children have two working parents. In the case of single parenting or blended families stressors are great. This course will examine the effect of culture and family traditions on parenting practices in the United States. Multiple family theories will be introduced and discussed. The primary focus is identification of child and family risk factors and strengths. Identifying positive parenting behaviors will enhance the well being, self esteem and health of the family.

NSG 230
WOMEN’S HEALTH: THE PHYSICAL SELF
Undergraduate
This course explores the biological dimensions of women's health. The theoretical bases for evaluating medical research, assessing personal health, and decision-making consumerism from a feminist perspective are emphasized. An advanced-level scientific research paper due at the end of the quarter.

WRD 103 or HON 101 or HON 100 or ENG 120 is a prerequisite for this class.

NSG 232
MEN’S HEALTH: THE PHYSICAL SELF
Undergraduate
This introductory course explores the unitary nature of men's health patterns focusing on anatomy and physiology of the major body systems emphasizing the difference in males. Health issues pertinent to these system differences in males will be presented based upon health risks, assessment, screening, diagnosis, management and treatment. Developing an understanding of male anatomy and physiology utilizing correct medical terminology to describe various parts and conditions. Elements of scientific research are explored in the context of lecture and laboratory sessions. Students select a research-based topic supported by clinical research studies to articulate their knowledge and understanding through a written paper and oral power point presentation.

NSG 260
STATISTICS FOR THE HEALTH SCIENCES
Undergraduate
This course introduces the health science student to theory and application of probability, risk, descriptive and inferential statistics. Computer laboratory experience focuses on using data sets in clinical trials, epidemiology, and critical pathway development.

NSG 261
INTRODUCTION TO FINANCE/ ACCOUNTING IN HEALTH CARE
Undergraduate
This course introduces students to basic principles, concepts, and techniques in cost accounting, reimbursement, budgeting, and financial management in health care for the practicing health professional.

NSG 301
INTRODUCTION TO THE ART AND SCIENCE OF NURSING I
Undergraduate
The foundations of the art and science of nursing and select theories are developed through the study and practice of basic nursing skills, therapeutic communication and critical thinking. Fundamental knowledge, skills and competencies are emphasized through the nursing care of individuals and families. Didactic, clinical, and laboratory experiences facilitate understanding of individual expressions of wellness, health and illness. Course includes 24 lab hours and 24 clinical hours.

NSG 322 and NSG 332 are prerequisites for this class.
**NSG 302**  
**INTRODUCTION TO THE ART & SCIENCE OF NURSING II**  
*Undergraduate*  
The art and science of nursing and select theories are examined to provide the basis for critical thinking, compassionate communication, and therapeutic interventions in the provision of medical/surgical nursing care with adult/geriatric populations. The role of the nurse as a health facilitator and provider of care are emphasized in working with common medical/surgical issues. Didactic, clinical, and laboratory experiences relate to individuals and families experiencing acute and commonly occurring patterns of illness. Course includes 80 clinical hours, 3 lab hours, and 16 CbSL hours. (8 quarter hours)  
NSG 301, NSG 322 and NSG 332 are a prerequisite for this class.

**NSG 303**  
**INTRODUCTION TO THE ART & SCIENCE OF NURSING III**  
*Undergraduate*  
The art and science of nursing and select theories are examined further as the basis for critical thinking, compassionate communication, and therapeutic interventions in holistic nursing practice with adult/geriatric populations. The role of the nurse as a health facilitator and provider of care are emphasized in working with complex medical/surgical issues. Didactic, clinical and laboratory experiences relate to health promotion and healing of individuals and families experiencing acute and commonly occurring patterns of illness. Course includes 80 clinical hours and 16 CbSL hours. (8 quarter hours)  
NSG 302, NSG 322 and NSG 332 are a prerequisite for this class.

**NSG 307**  
**ART AND SCIENCE OF NURSING IV: PSYCHIATRIC MENTAL HEALTH**  
*Undergraduate*  
This course examines the etiology, symptomatology, and clinical management of selected mental illnesses across the lifespan. A mental health recovery approach is utilized, focusing on the multi-factorial and individualized nature of illness presentations and the need for person-centered care and multi-modal treatment. Critical thinking, compassionate communication, and therapeutic nursing interventions are applied to practicum experiences. Various psychiatric nursing roles will be explored in the contexts of health promotion, disease management and rehabilitation. Course includes 60 clinical hours and 16 CbSL hours. (6 quarter hours)  
NSG 303 is a prerequisite for this class.

**NSG 322**  
**BASIC PATHOPHYSIOLOGY AND PHARMACOLOGY**  
*Undergraduate*  
The principles of pathophysiology and pharmacology are introduced and applied in the management of pharmacological therapy. Emphasis includes the fundamental principles of drug mechanism of action, application of specific drugs in the treatment of disease, and related nursing care. To ensure patient safety, attention is given to drug administration and calculations. Developmental changes related to pathogenesis are addressed.  
NSG 332 is a corequisite for this class.

**NSG 330**  
**FOUNDATIONS OF PROFESSIONAL NURSING PRACTICE**  
*Undergraduate*  
This course introduces the registered nurse student to the philosophy and mission of the De Paul University School of Nursing RN to MS Program. The central focus will be on the associate degree nurse transition to baccalaureate level education. Major areas of emphasis will include the evolution of nursing as a scientific professional discipline, the role of the professional nurse as a client advocate, change agent, the role of power and politics as sources of empowerment for practice, and legal, and ethical parameters in the scope of nursing practice.

**NSG 332**  
**HEALTH ASSESSMENT**  
*Undergraduate*  
This course is designed to prepare the student to perform a comprehensive history and physical assessment of the individual in the context of the family and community. Didactic and laboratory experiences are provided in the practice of physical assessment. Course includes 30 lab hours.  
NSG 322 is a corequisite for this class.
NSG 335
LESBIAN HEALTH MATTERS
Undergraduate
This course explores the unitary processes and experiences of health and quality of life for lesbians in diverse communities and with a range of identification and orientation. The idea that homophobia exists and serves as a significant barrier to access and to maintenance of health for lesbians underpins the course. The course uses multiple forms of scientific literature, general literature, film, and art to study the personal, ecological, and socially constructed determinants of health and quality of life. Various feminist, nursing, queer, and post-colonial perspectives on contemporary scientific and social discourse will emphasize linking health and illness with economic, social/cultural, and political dimensions of society. Concepts of personal health patterning, risk reduction, and health promotion will be stressed.

NSG 376
COMMUNITY HEALTH NURSING FOR THE PROFESSIONAL NURSE
Undergraduate
The emphasis of this course is on the delivery of comprehensive, culturally appropriate services to meet the continuing health needs of families, aggregates, and communities. Students will design population-focused nursing interventions to reduce assessed risk, incidence, and prevalence of community health problems. The role of the community health nurse in health promotion, disease, and injury prevention and management across the lifespan is examined, specifically across the continuum of care and coordination of services at the individual and population levels. Emphasis is placed on current trends and professional, legal/ethical, economic, cultural, and environmental issues as they apply to community health nursing.

NSG 377
PRACTICUM: THE PROFESSIONAL NURSE AND COMMUNITY HEALTH
Undergraduate
This provides opportunities for developing the professional nurse role in community health care. Experiential learning activities focus on community assessment, health program planning and evaluation, and management of innovation at the community level. Health education and leadership development are emphasized in both public health and community-based settings involved in health care delivery for individuals, families, and communities. Course includes 80 clinical hours.

NSG 376 is a prerequisite for this class.

NSG 380
UNDERGRADUATE NURSING SYNTHESIS
Undergraduate
This course provides a capstone experience of the art and science of professional nursing practice in contemporary society with integration of the liberal studies program. Applying a multidisciplinary view of baccalaureate level nursing practice, students will identify a practice concern in their nursing field of interest and develop a quality improvement plan or policy revision recommendation from assessment to an evaluation plan.

NSG 393
FOUNDATIONS FOR SUCCESS IN NURSING
Undergraduate
This course is designed to enhance the transition of the 3+2 Masters Entry to Nursing Practice student from undergraduate to graduate level work and from general academics to professional preparation. Students will learn the fundamentals of graduate level writing within a profession, develop critical thinking skills to enhance mastery and application of nursing content and obtain foundational knowledge of current issues in nursing and health care. The class will be taught as a hybrid and incorporate online tutorials, self-assessments and asynchronous discussion as well as face-to-face lecture, discussion and small group work.

NSG 399
INDEPENDENT STUDY
Undergraduate
INDEPENDENT STUDY (variable credit)
**NSG 400**  
**THEORETICAL COMPONENTS OF NURSING**  
Graduate  
This course is designed to examine the nature, function, and development of concepts, models, and theories for their relevance to advanced nursing practice and nursing research. The structure of theory is analyzed by examining the relationship between theoretical components. A variety of types of theoretical statements utilized to conceptualize nursing practice and research are presented and evaluated. A process for developing a conceptual framework for inquiry and data-based nursing practice is presented. Course includes 16 CbSL hours (MENP req. only).  
NSG 431 (or status as an RN to MS or DNP student) is a prerequisite for this class.

**NSG 401**  
**NURSING RESEARCH I**  
Graduate  
This is a seminar course emphasizing the components of the research process. Using discussions and analysis of published studies, students will examine current research problems and their associated methodological and ethical issues. Students will prepare problem statements, formulate research questions, review nursing research literature, and utilize appropriate methodologies to prepare a proposal for conducting an integrative review of literature.  
NSG 400 is a prerequisite for this class.

**NSG 422**  
**APPLIED PATHOPHYSIOLOGY**  
Graduate  
This course includes an intensive study of human anatomy, physiology, and complex pathophysiologic processes utilizing the principles underlying chemistry, biology, and genomics. Current research findings are incorporated for health promotion, maintenance, and restoration.  
Status as an NP student or (status as an MENP student and NSG 332) is a prerequisite for this class.

**NSG 424**  
**PATHOPHYSIOLOGY FOR ADVANCED PRACTICE**  
Graduate  
Survey of current advances on human physiology with emphasis on the cellular and microcellular basis of health and disease. Students will engage in intensive study of human anatomy and physiology and complex pathophysiologic processes. Current research findings are reviewed for implications for health promotion, health maintenance and health restoration.

**NSG 425**  
**FISCAL MANAGEMENT IN HEALTH CARE**  
Graduate  
Fiscal management and budgetary practices in health care institutions are explored. Budget preparation, cost-benefit, analysis, product costing, reimbursement, and analysis of financial status in organizations is emphasized.

**NSG 426**  
**PHARMACOLOGY II**  
Graduate  
Concepts from NSG 322: basic pathophysiology and pharmacology are reinforced and explored in greater depth and complexity. Additional classes of medications are introduced and integrated with an emphasis on assessing and evaluating patient responses.  
NSG 322 is a prerequisite for this class.

**NSG 428**  
**PATHOPHYSIOLOGY FOR ADVANCED PRACTICE**  
Graduate  
Using a case study approach, pathophysiologic and physiologic alterations will be analyzed in selected systems-related disease processes. Appropriate clinical and lab analysis will be included in preparation for advance practice. Using a variety of learning modalities, students will explore current theories and research related to pathology, pathophysiology and abnormal physiologic function including implications for health promotion, maintenance and restoration.
NSG 429
PATHOPHYSIOLOGY & APPLIED PHARMACOLOGY
Graduate
This course builds on the background of the registered nurse in exploring advanced concepts of pathophysiology and pharmacology. Emphasis is placed on concepts of pathophysiology in relationship to pharmacologic therapies and clinical management. The application of pharmacologic therapies in health promotion and patient management is explored from perspective of the masters prepared nurse.

NSG 430
POLITICAL AND LEGAL ISSUES IN HEALTH CARE
Graduate
Seminars will discuss social, economic, legislative and regulatory mechanisms that influence professional practice and health policy in the United States. Emphasis is on the legal definition of professional practice as well as major issues involved in designing, implementing and evaluating policy decisions including scope, dynamics, and conceptual and practical dilemmas. (2 quarter hours)

NSG 431
HEALTH PROMOTION FOR FAMILIES AND COMMUNITIES
Graduate
Examines issues, frameworks, theories and techniques relevant to health promotion for individuals, families and communities. Physical and social determinants of health are examined as are methods for assessing and facilitating cultural competence. The nurse's role as advocate for health promotion and wellness in public policy is discussed. Course includes 16 CbSL hours (MENP req. only).

NSG 433
NURSING AND BIOMEDICAL ETHICS IN HEALTH CARE
Graduate
Seminars and case studies are used to explore issues and frameworks for ethical practice and research in the health professions. (2 quarter hours)

NSG 440
MATERNAL HEALTH NURSING
Graduate
Focus is on the role of the nurse in providing care to individuals and families throughout the childbearing cycle, including care of the newborn. Didactic, clinical and laboratory experiences relate to maternal-child nursing. Course includes 60 clinical hours. (6 quarter hours)

NSG 441
INFANT, CHILD AND ADOLESCENT NURSING
Graduate
Focus is on the role of the nurse in caring for children ranging from newborns through adolescents. Emphasis is placed on the physical, psychosocial, and developmental needs of children within the family in the promotion of health as well as during the alterations that occur during illness. Didactic, clinical, and laboratory experiences relate to nursing care of children and families. Course includes 60 clinical hours and 16 CbSL hours. (6 quarter hours)

NSG 442
COMMUNITY HEALTH NURSING
Graduate
Emphasis is on principles of health care, strategies of health promotion, disease prevention and management across the life-span in community settings. Current trends and professional, legal/ethical, economic, cultural, and environmental issues are examined in the context of community health nursing. Didactic, clinical, and laboratory experiences relate to community-based nursing. Course includes 60 clinical hours and 16 CbSL hours. (6 quarter hours)

NSG 440 and NSG 441 are a prerequisite for this class.
**NSG 443**  
**CLINICAL IMMERSION AND INTERNSHIP**  
Graduate  
A 130 hour clinical capstone course in which the student is paired with a nurse preceptor in a healthcare setting. This bridging course facilitates student transition to entry-level nursing practice. Course includes 130 clinical hours. (6 quarter hours)

NSG 442 and NSG 472 are a prerequisite for this class.

**NSG 445**  
**NURSING PROFESSIONALISM, ADVOCACY, AND LEADERSHIP**  
Graduate  
This course discusses the concepts essential to the development of the professional identity and role of the nurse as a leader and advocate in a complex health care system. Drawing on current knowledge and theories of leadership, concepts such as communication, delegation, conflict resolution, negotiation and team building, and health care law and ethics will be discussed.

**NSG 448**  
**INDEPENDENT STUDY**  
Graduate  
This course is reserved for individuals who wish to do focused study at the graduate level. (variable credit)

**NSG 450**  
**SELECTED TOPICS IN NURSING**  
Graduate  
This course is reserved for special seminars organized from time to time to accommodate the needs of groups interested in specific topics. (2 quarter hours)

**NSG 451**  
**INTRODUCTION TO NURSING ADMINISTRATION AND LEADERSHIP**  
Graduate  
This course is an introduction to the nursing leadership concentration as well as an overview of current issues and theory of nursing administration for all advanced practice nurses. As an introduction to the nursing leadership concentration, this course places emphasis on developing master's level skills of critical reading, scholarly writing, analytical discussion, and shared leadership. May also be taken as a health sciences management elective. The expected outcome of the course is a nursing research question and literature review that will form the basis of the students work in their concentration and the final research project.

**NSG 452**  
**ORGANIZATIONAL AND FINANCIAL MANAGEMENT IN HEALTH CARE**  
Graduate  
This course provides insight and reflection on the executive role in advanced practice and organizational administration. Concepts, models, and techniques used to manage systems in a variety of health care organizations or practices are analyzed. Organizational assessment, resource development, and product costing are emphasized. This course provides insight and reflection on the executive role in advanced practice and organizational administration. Concepts, models, and techniques used to manage systems in a variety of health care organizations or practices are analyzed. Organizational assessment, resource development, and product costing are emphasized. (2 quarter hours)

**NSG 453**  
**CASE MANAGEMENT AND THE MANAGED CARE ENVIRONMENT**  
Graduate  
In this course, students engage in analysis of concepts central to an in-depth understanding of the managed care environment and case management as a clinical care system. Emphasis is upon development of skill in organizational and population-based assessment and data analysis, clinical pathway development, and interdisciplinary collaboration. Students develop a database for a clinical project focusing on a client population from their work environment.

**NSG 454**  
**INNOVATIONS IN HEALTH CARE DELIVERY**  
Graduate  
This course provides the instruction and clinical experience for the development of the advanced practice nurse role as case manager and administrator. Learning activities focus on implementing contemporary data-based nursing practice models in a variety of health care settings, and the diffusion of innovation at the individual, family and organizational levels.
NSG 455
CURRICULUM DEVELOPMENT FOR HEALTH CARE SYSTEMS
Graduate
Theories, principles and approaches to curriculum development are explored. Basic elements of curricular design are examined in relation to traditional and evolving paradigms, reflecting development in social and professional dimensions of health care.

NSG 456
PRACTICUM IN NURSING ADMINISTRATION I
Graduate
Practicum In Nursing Administration I (6 quarter hours)
NSG 451 and NSG 452 are a prerequisite for this class.

NSG 457
PRACTICUM IN NURSING ADMINISTRATION II
Graduate
Practicum In Nursing Administration II (6 quarter hours)
NSG 456 is a prerequisite for this class.

NSG 458
TEACHING IN HEALTH CARE SYSTEMS
Graduate
This course prepares the registered nurse to apply theories, principles and strategies in education. Emphasis is on education as a vehicle for enhancing the health of populations and systems from an ecological perspective.

NSG 459
PRACTICUM IN TEACHING IN HEALTH CARE SYSTEMS
Graduate
Practicum In Teaching In Health Care Systems (6 quarter hours)
NSG 455 and NSG 458 are a prerequisite for this class.

NSG 460
ADVANCED PHYSICAL ASSESSMENT ACROSS THE LIFESPAN
Graduate
Concepts from NSG 332: Health Assessment is reinforced and explored in greater depth and complexity with emphasis on differentiating the normal from the abnormal findings. Didactic and laboratory experiences are provided in the practice of physical assessment. Course includes 25 lab hours.
NSG 302 (or status as an RN to MS student) is a prerequisite for this class.

NSG 462
ADVANCED WOMEN’S HEALTH ASSESSMENT
Graduate
Lectures focus on the synthesis of scientific knowledge in performing integrated, comprehensive assessments of women from late adolescence through maturity. Emphasis is placed on the woman in the context of the family and community in health and illness. Laboratory practice includes taking the health history and performing the physical examination to evaluate primary and reproductive health care needs. (2 quarter hours)
NSG 422, NSG 424 and NSG 464 are a prerequisite for this class.
NSG 464
HEALTH ASSESSMENT FOR ADVANCED PRACTICE
Graduate
This course builds on the skills acquired in health assessment and will introduce the skills and knowledge needed to perform a history and physical examination on patients of all ages. Lecture will focus on the synthesis of scientific knowledge in performing integrated, comprehensive assessments of individuals from infancy through maturity. Emphasis is place on the child in the context of the family and community. Laboratory practice includes taking the health history and performing the physical examination to evaluate primary health care needs. Adult Nurse Practitioner students will not participate in the assessment of the infant and child, but instead will participate in more in-depth assessment of the older adult. Course includes 30 lab hours. (6 quarter hours)

NSG 472
CRITICAL CARE NURSING
Graduate
The focus is on the role of the nurse in caring for adults experiencing acute illness and complex multiple system disorders. Students will apply critical thinking to care for individuals in a critical care setting. Didactic, clinical, and laboratory experiences relate to individuals and families in critical care nursing. Course includes 120 clinical hours. (8 quarter hours)

NSG 440 and NSG 441 are a prerequisite for this class.

NSG 473
PRIMARY CARE OF THE INFANT, CHILD, AND THE ADOLESCENT
Graduate
This course is designed to explore health promotion, health protection, and disease prevention dimensions in pediatric primary care. The focus is on common issues related to clinical, developmental and behavioral needs of children and adolescents and their families. The dynamics of the pediatric client and nurse practitioner relationship will be analyzed, focusing on life transitions and the impact of health and illness on infants, children, adolescents and their families. Clinical practice guidelines will be evaluated through epidemiological and research evidence of selected developmental and behavioral disorders, as well as acute and chronic health problems. Selected theory-based models relevant to primary care of children will be critiqued.

NSG 428, NSG 464, and NSG 484 are prerequisites for this class.

NSG 474
PRIMARY CARE OF THE ADULT AND OLDER ADULT
Graduate
Lectures focus on synthesis and application of scientific knowledge for family advanced practice nursing in primary care. The emphasis of course content is on building advanced knowledge of chronic and complex health problems in the primary care management of adults. This course examines primary health care needs of adults across the life span, with a focus on health promotion and disease prevention. The integrated role of the advanced practice nurse in providing holistic care and collaborative practice is emphasized.

NSG 428, NSG 464, and NSG 484 are prerequisites for this class.

NSG 475
WOMEN’S REPRODUCTIVE HEALTH AND GYNECOLOGY
Graduate
This advanced practice course provides a comprehensive review of reproductive health and gynecology practice issues during a woman’s childbearing years. Course content consists of contraceptive options, sexually transmitted illnesses, low risk obstetrical prenatal & postpartum and well woman gynecology. Clinical practice guidelines for the advanced practice nurse in a women’s health specialty practice or in a practice devoted to the care of women in the family.

NSG 428, NSG 464, and NSG 484 are prerequisites for this class.

NSG 477
CLINICAL MANAGEMENT OF WOMEN’S HEALTH AND ILLNESS
Graduate
Lectures focus on synthesis and application of scientific knowledge for gynecologic advanced practice nursing. The integrated role of the advanced practice nurse in providing holistic care and collaborative practice is emphasized. (3 quarter hours)
NSG 478
CLINICAL MANAGEMENT OF ACUTE AND CHRONIC ILLNESSES IN PRIMARY CARE
Graduate

Lectures focus on synthesis and application of scientific knowledge for adult advanced practice nursing. The integrated role of the advanced practice nurse in providing holistic care and collaborative practice is emphasized. The dynamics of the adult client and nurse practitioner relationship will be analyzed, focusing on life transitions and the impact of health and illness on adults, families, and communities. Clinical practice guidelines will be evaluated through epidemiological and research evidenced of selected acute, emergent and chronic health problems.

NSG 474 is a prerequisite for this class.

NSG 479
ADVANCED GERONTOLOGICAL NURSING
Graduate

This course examines the biological changes of aging using a system approach and reviews selected clinical issues and health problems of older adults, particularly the common health conditions associated with geriatric syndrome. This course provides a foundation in advanced gerontological nursing theory and practice. Comprehensive geriatric assessment, changes in normal aging, geriatric syndromes and functional status of older adults will be explored. Students are expected to learn and apply evidence-based practice to promote wellness, maximize function, and enhance self-care of older adults.

NSG 481
BIOSTATISTICS AND EPIDEMIOLOGY
Graduate

The application of biostatistics/epidemiology to clinical practice and research is the intent of this seminar. Initial discussions will focus on understanding biostatistics and epidemiological statistics as applied to health and disease in diverse populations. From considering the relationship between measurement and biostatistics to understanding the importance of insuring data integrity throughout the research process, students will examine existing data sets (federal, voluntary agencies, professional/specialty organizations). Then the focus will be on understanding epidemiological statistics (rates, proportions, relative and absolute risk), descriptive statistics, measures of differences, measures of relationships/prediction, and multivariate statistical models as applied to health and disease.

NSG 482
INTRODUCTION TO EPIDEMIOLOGY
Graduate

An investigative problem-solving process is used to study the personal and ecological determinants of health and disease frequencies in diverse populations. Data are manipulated to plan, implement and evaluate health promotion and disease control programs for a variety of health care settings. Infectious and chronic disease prevention are emphasized. Students electing to take the course for four credit hours will complete a project using the epidemiologic method. (2 quarter hours)

NSG 483
PRACTICUM IN POPULATION-BASED NURSING PRACTICE I
Graduate

This is the first practicum in a sequence of supervised clinical experiences for nurse practitioner students. The focus of NSG 483 is on application of health assessment and examination skills in the clinical setting, identification of health risks, and learning how to manage common illnesses. Analysis and application of current research is used as the basis for decision-making in performing the health history and physical assessment, contributing to interdisciplinary treatment planning, and teaching for health promotion and illness prevention. Course includes 180 preceptor clinical hours.

NSG 484
PHARMACOLOGY FOR ADVANCED PRACTICE
Graduate

Provides the advanced-practice nurse with the knowledge base necessary to manage pharmacological therapy for acute and chronically ill clients collaboratively with other members of the health care team. Direct and indirect responsibility for clinical decision-making regarding the administration, management and evaluation of drugs are emphasized.

NSG 428 and NSG 464 are prerequisites for this class.
NSG 487
PRACTICUM IN POPULATION-BASED NURSING PRACTICE II
Graduate
This is the second practicum in a sequence of supervised clinical experiences for nurse practitioner students in which students demonstrate increasing comprehensive practice of primary care in the context of specialty practice for selected populations. Nurse practitioner student readings, assignments, and clinical experiences in primary care: family, adult, pediatric, or women's health with an emphasis on health promotion and disease prevention. Course includes 200 preceptor clinical hours.

NSG 483 is a prerequisite for this class.

NSG 488
PROFESSIONAL ISSUES & RESEARCH IN POPULATION-BASED ADVANCED PRACTICE NURSING
Graduate
This course introduces the graduate nursing students to a variety of advanced practice nursing roles and the competencies needed for successful practice in those roles. The students explore the conceptual, theoretical, and empirical bases of population based advanced practice nursing. Critical thinking skills are developed through the student's debate of current local, state, and national laws and analysis of coding case studies. Communication skills are fostered through the use of class discussions and development of various assignments. Scholarly written and verbal presentations enhance the student's understanding of historical, economical, political, legal, and ethical perspectives of advanced practice nursing.

NSG 490
PRACTICUM IN POPULATION-BASED NURSING PRACTICE III
Graduate
This is the third clinical practicum in a sequence of supervised clinical experiences for nurse practitioner students in which students demonstrate increasing comprehensive practice of primary care in the context of specialty practice for selected populations. This course provides the opportunity to integrate the multiple professional roles of the advanced practice nurse while refining their skills in the comprehensive practice of primary care and/or specialty practice for selected populations. Emphasis is on health promotion and disease prevention with unitary human beings in mutual process with their environment in the management of health and illness, teaching and health counseling and organizational and role competencies. Students select sites and preceptors in family, adult, pediatric or women's health promotion according to their area of concentration and self-assessed strengths and weaknesses. Course includes 220 preceptor clinical hours.

NSG 487 is a prerequisite for this class.

NSG 500
CHEMISTRY AND PHYSICS OF ANESTHESIA
Graduate
Review of principles of physics with emphasis on their application in the clinical practice of anesthesia. Nurse anesthesia residents (NAR) will engage in a comprehensive analysis of cell physiology and biochemistry with emphasis upon metabolism, enzyme function, and protein synthesis. Current research findings and their anesthetic implications will be discussed. (6 quarter hours)

NSG 501
ANATOMY AND PHYSIOLOGY I
Graduate
An intensive 6 quarter hour course designed to provide the nurse anesthesia resident (NAR) with current knowledge of advanced anatomy and physiology of the gastrointestinal, nervous and endocrine systems. The course is divided into three sections with emphasis placed on the structural and functional role of each system in maintaining homeostasis. Clinical implications of current research findings will be stressed. (6 quarter hours)

NSG 502
ANATOMY AND PHYSIOLOGY II
Graduate
An intensive 6 quarter hour course designed to provide the nurse anesthesia resident (NAR) with current knowledge of advanced anatomy and physiology of the cardiovascular, respiratory and renal systems. The course is divided into sections with emphasis placed on the structural and functional role of each system in maintaining homeostasis. Clinical implications of current research findings will be stressed. (6 quarter hours)
NSG 503
PATHOPHYSIOLOGY
Graduate
An intensive 6 quarter hour course designed to provide the nurse anesthesia resident (NAR) with current knowledge of diseases and disorders of the nervous, endocrine, cardiovascular, respiratory, renal, GI/hepatic, and musculoskeletal systems. Implications for the design and implementation of an appropriate anesthesia care plan for individuals with specific system disease/disorders will be discussed in detail. Emphasis will be placed on system-specific diagnostic and therapeutic procedures that require anesthesia services. (6 quarter hours)

NSG 504
PRINCIPLES OF ANESTHESIA PRACTICE I
Graduate
Designed to introduce the nurse anesthesia resident (NAR) to the advanced practice of nurse anesthesia. Emphasis is placed upon pre-operative patient assessment, anesthesia equipment and technology, airway management, intra-operative management, and postoperative care of patients undergoing general and regional anesthesia. Course includes orientation to clinical practice. Course includes 40 clinical hours and 30 lab hours.

NSG 505
PRINCIPLES OF ANESTHESIA PRACTICE II
Graduate
An intensive 4 quarter hour course designed to provide the nurse anesthesia resident (NAR) with current knowledge of special populations, including pediatric, obstetric, geriatric and trauma patients, as well as patients requiring pain management. Emphasis will be placed on the anatomical and physiological differences that characterize each population with a focus on the pathological disorders unique to each group. The preparation, implementation and evaluation of an appropriate nurse anesthesia care plan for these populations will be stressed.

NSG 506
PRINCIPLES OF ANESTHESIA PRACTICE III
Graduate
An in-depth course that places emphasis on perioperative anesthetic management of patients presenting for specialty surgical procedures or requiring management for chronic pain. Implications for the development, implementation, and evaluation of anesthesia care plans will be stressed. The ethical, legal and professional issues that influence the advanced practice of nurse anesthesia will be discussed. Course includes preparation for the Certification Examination for Certified Registered Nurse Anesthetists.

NSG 507
ANESTHETIC PHARMACOLOGY
Graduate
This course is an in depth introduction to anesthetic pharmacology. It covers the pharmacokinetics, pharmacodynamics, and pharmacotherapeutics of drugs used in the administration of general, local, and regional anesthesia and provides the scientific basis for the advanced practice of nurse anesthesia. (6 quarter hours)

NSG 508
ADJUNCTIVE ANESTHETIC
Graduate
This 4 quarter hour hybrid course (in class and on-line sections) includes the pharmacokinetics, pharmacodynamics, and pharmacotherapeutics of drugs used in the treatment of a variety of disease states. Implications of current therapy with these agents and use of selected agents as adjunctive therapy in the advanced practice of nurse anesthesia will be stressed.

NSG 509
ADVANCED PHYSICAL ASSESSMENT FOR NURSE ANESTHETISTS
Graduate
This course will provide strategies that promote effective history-taking along with cognitive and psychomotor skills needed for the advanced physical assessment of the neurological, musculoskeletal, respiratory, cardiac, circulatory, and gastrointestinal systems across the lifespan. The assessment of body systems includes an overview of anatomy and physiology, techniques necessary to perform inspection, palpation, percussion and auscultation; and interpretation of physical findings and laboratory testing relevant to the advanced practice of nurse anesthesia. (2 quarter hours)
NSG 510
ANESTHESIA PRACTICUM I
Graduate
An introduction to the clinical practice of anesthesia with emphasis on the principles introduced in ANES 500-504, 507 and 508. Includes administration of anesthesia for select patient populations under direct instruction and supervision of a certified registered nurse anesthetist (CRNA) or anesthesiologist. (0 quarter hours)

NSG 511
ANESTHESIA PRACTICUM II
Graduate
Expanded application and integration of basic principles applicable to ANES 510. (0 quarter hours)

NSG 510 is a prerequisite for this class.

NSG 512
ANESTHESIA PRACTICUM III
Graduate
This practicum provides the nurse anesthesia resident (NAR) with an opportunity to apply and integrate the basic principles of nurse anesthesia practice. Emphasis is on the anesthetic comprehensive management of the adult patient presenting for elective and emergency surgery. (0 quarter hours)

NSG 511 is a prerequisite for this class.

NSG 513
ANESTHESIA PRACTICUM IV
Graduate
The first of four advanced anesthesia practicums that allow the third year nurse anesthesia resident (NAR) the opportunity to develop, implement, and evaluate anesthesia care plans for all patient populations undergoing a wide variety of specialty surgical and therapeutic procedures. It is designed to broaden the knowledge and skill base of the NAR. Includes seminar presentations on selected topics or issues relative to the advanced practice of anesthesia and completion of online bimonthly review quizzes. (0 quarter hours)

NSG 512 is a prerequisite for this class.

NSG 514
ANESTHESIA PRACTICUM V
Graduate
The second in a series of advanced practicums that provide the third year nurse anesthesia resident (NAR) with the opportunity to develop, implement, and evaluate an anesthesia care plan for all patient populations undergoing a wide variety of surgical and therapeutic procedures. Emphasis is placed on application, integration, and synthesis of knowledge, skills, and attitudes that are representative of the advanced practice of nurse anesthesia. Includes seminar presentations on selected topics and issues relative to the advanced practice of anesthesia and completion of online bimonthly review quizzes. (0 quarter hours)

NSG 513 is a prerequisite for this class.

NSG 515
ANESTHESIA PRACTICUM VI
Graduate
The third in a series of advanced practicums that provide the third year nurse anesthesia resident (NAR) with the opportunity to develop, implement, and evaluate an anesthesia care plan for all patient populations undergoing a wide variety of surgical and therapeutic procedures. Emphasis is placed on application, integration, and synthesis of the knowledge, skills, and attitudes representative of the advanced practice of nurse anesthesia. Includes seminar presentations on selected topics or issues relative to the advanced practice of anesthesia and completion of online bimonthly review quizzes. (0 quarter hours)

NSG 514 is a prerequisite for this class.
NSG 516  
ANESTHESIA PRACTICUM VII  
Graduate  
The final advanced practicum in which the third year nurse anesthesia resident (NAR) demonstrates the knowledge, skills, and attitudes necessary for entry level nurse anesthesia practice: proficiency in providing perioperative nurse anesthesia care for all patient populations; an ethical and culturally sensitive approach to patient care; analysis and synthesis of current research for application into practice; ability to perform a comprehensive self evaluation; and display of a professional attitude toward life long learning. Includes seminar presentations on selected topics or issues relative to the advanced practice of nurse anesthesia.  

NSG 515 is a prerequisite for this class.

NSG 521  
INNOVATIONS IN HEALTH CARE DELIVERY  
Graduate  
This course provides the laboratory and clinical experiences for the development of the professional nurse role as case manager and administrator. Learning activities focus on implementing contemporary data-based nursing practice models in a variety of health care settings, and the diffusion of innovation at the individual, family and organizational levels.

NSG 522  
FINANCE AND COSTING IN HEALTH CARE  
Graduate  
This course provides learning experiences that focus on fiscal management and budgetary practices in health care institutions. Budget preparation, cost-benefit analysis, product costing, reimbursement, and analysis of financial status in organizations are emphasized. Health care finance is covered involving the major sources and uses of funds. Health care accounting is included which addresses financial reporting and cost measurement. An understanding of finance, accounting, policy and administration enables the advanced practice nurse to enhance the delivery of health care in a dynamic health care environment.

NSG 540  
CULTURE, ETHICS, AND POLICY ANALYSIS  
Graduate  
This seminar is designed to explore cultural and ethical perspectives and their relationships to health policy. Health disparities based on social and cultural difference are linked to major diseases such as heart disease, cancer, diabetes, hypertension and stroke, as well as access to and outcomes of health services. Class discussions will focus on the past, current and future health policy needs of multicultural and multifaceted societies. The phenomena of cultural, ethnic, gender, class, and sexual variation in complex societies; notions of diversity and social justice; understandings of cultural conflicts and how cultural differences are managed in healthcare settings will be considered. Students will integrate concepts of all levels of prevention in health care, examine research in health ethics and health policy and discuss legislative processes for their potential to improve the health of the public.

NSG 550  
HEALTHCARE ECONOMICS  
Graduate  
This course focuses on application of supply and demand theory to the healthcare industry as well as analysis of financing and healthcare delivery in the United States and other countries. The principles and tools of microeconomics and macroeconomics will be applied to the healthcare market. Applications particularly pertinent in economic climates include the supply and demand of healthcare, practice incentives, managed care, malpractice and pharmaceutical economics.

NSG 551  
LEADERSHIP AND ORGANIZATIONAL BEHAVIOR  
Graduate  
The course focuses on critical leadership characteristics that are necessary for transforming organizational behavior in healthcare organizations. Students will analyze leadership theories/styles and the interrelationship between leadership and management. Strategies for directing and managing successful change based upon an organization’s vision and mission will be explored. Students will have an opportunity to assess their personal leadership style and to develop effective strategic leadership skills.
NSG 552
PROGRAM EVALUATION
Graduate
This course will familiarize the student in different types of program evaluation, including objectives oriented evaluation, management oriented evaluation, consumer oriented evaluation, expertise oriented evaluation adversary oriented evaluation, participant oriented evaluation and alternative evaluation approaches. Students gain practical experience through a series of exercises involving the design of a conceptual framework, development of indicators, analysis of computerized service statistics, and development of an evaluation plan to measure impact.

NSG 553
POPULATION HEALTH QUALITY AND SAFETY
Graduate
This course enables the advance practice nursing student an opportunity to build a foundation of insight and knowledge about key issues and concepts related to population health and support high quality care and outcomes. Emphasis is on transforming healthcare leadership to improve patient care quality and safety, decrease costs and improve population health.

NSG 554
INFORMATICS AND TECHNOLOGY APPLICATIONS
Graduate
This course focuses on information systems technology and its application for the improvement and transformation of patient-centered health care. Implications of informatics for advanced nursing practice and health care in general are explored. Impact on consumer-provider relationships, ethical and legal issues, global/future informatics issues and electronic health record issues are being examined. The course prepares the student to become proficient at selecting and using technology for organizing, analyzing, managing, and evaluating information in nursing administration, education, and clinical practice settings. The use of technology as an adjunct to inquiry and how it supports clinical and professional decision-making is explained and demonstrated.

NSG 555
PHARMACOTHERAPEUTIC IMPLICATIONS FOR THE OLDER ADULT
Graduate
This course examines various factors that impact the pharmacokinetics and pharmacodynamics of drugs used in the care of the older adult. The primary focus will be on drug therapy in the older person, ensuring the appropriate use of frequently prescribed medications. Economic and policy issues regarding pharmacotherapy of the older adult will be explored. Students are expected to develop nursing assessments skills and plan nursing interventions that can promote the appropriate use of medications in this complex older adult patient population. (2 quarter hours)

NSG 561
EVIDENCE BASED MANAGEMENT
Graduate
This course provides an introduction to the utilization of best evidence in managing healthcare issues. The curriculum is intended to prepare the student to identify management problems and develop a related path of focused inquiry, evaluate reliable databases and searching strategies to find evidence, and base management decisions on the best evidence available. This course is offered through a consortium agreement with Rosalind Franklin University and follows the Rosalind Franklin calendar. (3 quarter hours)

NSG 564
ORGANIZATIONAL BEHAVIOR AND HUMAN RESOURCES
Graduate
This course in Organizational Behavior (OB), and Human Resources (HR), is designed to introduce organizational behavior theory; organizational communication, and human resource management principles to effectively lead and manage an organization. The OB Students will apply management and leadership techniques garnered from successful healthcare organizations to understand and practice management functions, including: understanding employee behavior and motivation, assessing performance, employing groups and teams, operationalize communication, evaluating conflict, and making appropriate business decisions. The HR functions of planning, recruiting, selecting, training, and appraising will be emphasized. Realistic case studies, collaborative discussions, practical research and peer reviews will be used to develop students' skills in organizational behavior and human resource management. This course is offered through a consortium agreement with Rosalind Franklin University and follows the Rosalind Franklin calendar. (3 quarter hours)
NSG 565
STRATEGIC PLANNING AND LEADERSHIP IN HEALTHCARE
Graduate
This course is intended to introduce the student to leadership skills and strategic planning in healthcare organizations. Creative, collaborative problem solving within the context of current strategic issues in healthcare will be explored. The course content provides an overview of the strategic planning process including the elements required to successfully develop and implement short and long-term plans. The course focuses on leadership skills and qualities necessary to succeed and thrive in the healthcare industry as well as assist the students in applying theories of leadership, motivation, communication and conflict management. Students will learn the construction of a strategic plan and analyze the state of strategic planning in the healthcare industry. Additionally, students will have the opportunity to analyze their own leadership skills and create an action plan for leadership development. This course is offered through a consortium agreement with Rosalind Franklin University and follows the Rosalind Franklin calendar. (3 quarter hours)

NSG 569
TOPICS IN HEALTHCARE ADMINISTRATION
Graduate
This course is offered through a consortium agreement with Rosalind Franklin University and follows the Rosalind Franklin calendar. (3 quarter hours)

NSG 570
LEARNING THEORIES
Graduate
Students will examine domains of learning and adult learning theories and how they apply to health professions students. Topics include best practices for motivation, adapting to various learning styles, teaching models/strategies, instructional paradigms, and interprofessional learning environments. The concept of lifelong learning is introduced and students will explore the role that higher education and corporate education/training play in instilling a desire for lifelong learning. In addition, students will develop statements of Teaching Philosophy and Philosophy on Interprofessional Education. This course is offered through a consortium agreement with Rosalind Franklin University and follows the Rosalind Franklin calendar. (3 quarter hours)

NSG 574
CLASSROOM ASSESSMENT
Graduate
Students will examine various tools to assess student learning in the classroom setting. Topics include annotated portfolios, concept maps, memory matrix, process analysis, rubrics development, and the use of reflective statements. Students will also discuss how to adapt assessment tools to include interprofessional students. This course is offered through a consortium agreement with Rosalind Franklin University and follows the Rosalind Franklin calendar. (3 quarter hours)

NSG 575
COURSE DEVELOPMENT
Graduate
Students will apply curriculum design techniques to develop a course in a health-related area of their own choosing. Activities will include writing learning objectives, planning and organizing content, selecting instructional methods and materials, and designing assessment tools. Students will also discuss how to adapt courses to include interprofessional students. This course is offered through a consortium agreement with Rosalind Franklin University and follows the Rosalind Franklin calendar. (3 quarter hours)

NSG 579
EVALUATING CLINICAL COMPETENCE
Graduate
Student will develop appropriate tools to evaluate student performance in a clinical setting. In addition, students will develop a clinical rotation manual in their area of interest. This course is offered through a consortium agreement with Rosalind Franklin University and follows the Rosalind Franklin calendar. (3 quarter hours)

NSG 580
BIOSTATISTICS & RESEARCH METHODS FOR ADVANCED PRACTICE
Graduate
This course provides an overview of the logical and appropriate use of epidemiological statistics (rates, proportions, relative and absolute risk), descriptive statistics, and most parametric and nonparametric procedures, including correlational and repeated measures analyses in the health profession as applied to health and disease in diverse populations. The course will develop the student's ability to apply and understand statistical and epidemiological concepts to guide evidence-based practice in a dynamic health care environment.
NSG 585
PORTFOLIO PRESENTATION
Graduate
Students will assemble and present their teaching portfolio. The portfolio documents student mastery of each core objective: facilitation of learning, curriculum design, student assessment and program evaluation, and educational leadership. Students will present an analysis of each item included in their portfolios along with reflections for each item. In addition, students will perform a self-evaluation regarding their teaching preparedness, including cultural competence and establishment of interprofessional relationships.

NSG 590
INDEPENDENT STUDY IN NURSING
Graduate
The student will work with a faculty mentor to develop an individualized plan of work involving in depth study in an area related to nursing and healthcare. This can include, but is not limited to, reviewing literature for evidence of best practices, developing a research project, collecting data on an ongoing project, coding or analyzing data, developing a research presentation, or working in the community on research or evidence-based intervention projects. (2 quarter hours)

NSG 596
CAPSTONE IN NURSING ADMINISTRATION
Graduate
This course provides a reflective synthesis of the coursework for Health Administration with an emphasis on the American Organization of Nurse Executive competencies. This final Practicum will include a formal synthesis paper and oral presentation that documents achievement of the MS degree outcomes and the competencies in the selected area of specialization. The paper will provide evidence of students' achievement of the program outcomes and the competencies required to become a nurse administrator and to sit for the certification exam in Executive Nursing Practice. Critical concepts covered will include communication, relationship-building, healthcare environment, leadership, professionalism, and business skills. Requires 200 hours of practicum plus online lecture/seminar. (6 quarter hours)

NSG 597
CAPSTONE IN NURSING EDUCATION
Graduate
This course provides a reflective synthesis of the coursework for Nursing Education. This final Practicum will include a formal synthesis paper and oral presentation that documents achievement of the MS degree outcomes and the competencies in the selected area of specialization. The paper will provide evidence of students' achievement of the program outcomes and the competencies required to sit for the Certified Nurse Education Examination (CNE) and become a nursing educator. Critical concepts covered will include effective teaching strategies, evaluation, measurement, and educational processes, and psychometric testing for academic outcomes. Current pedagogical, ethical, social and legal aspects of nursing education will be included. Requires 200 hours of practicum plus online lecture/seminar. (6 quarter hours)

NSG 598
GRADUATE RESEARCH SYNTHESIS
Graduate
The focus of NSG 598 is the synthesis of courses completed throughout the Masters of Science in nursing program of study. During the course students will review data collection procedures, address data entry and perform data analysis, and prepare and complete a research manuscript, and present their work at a research meeting. Students will also have the opportunity to discuss the interpretation and dissemination of research findings, to prepare abstracts for the research colloquium, and to submit research for publication in a professional journal.

NSG 401 and NSG 481 are a prerequisite for this class.

NSG 599
THESIS RESEARCH
Graduate
Students conduct supervised original research terminating in a completed and bound thesis. The study must be approved by the faculty advisor and the thesis committee approved by the School of Nursing prior to registration and must be completed during the term.

NSG 401 and NSG 481 are a prerequisite for this class.
NSG 600
EVIDENCE-BASED PRACTICE RESEARCH
Graduate
This course will focus on the evidence based practice process, theories, concepts, and methods. This will include the synthesis and application of scientific evidence to nursing and healthcare practice within a systems framework. Students will develop a proposal for an evidence-based, scholarly leadership proposal, which will translate science into practice. In order to accomplish this, the student will focus on a specific aggregate population, and develop the program to make a positive impact on healthcare delivery. This proposal will be presented to a faculty committee consisting of three faculty members for their approval.

NSG 580 is a prerequisite for this class.

NSG 601
EVIDENCE-BASED PRACTICE RESEARCH II
Graduate
Students will submit individual objectives to the faculty advisor and committee who will guide the student through project implementation. Students will implement their evidence based Scholarly Leadership Project during this course.

NSG 600 is a prerequisite for this class.

NSG 602
DNP PROJECT PRACTICUM
Graduate
Students will implement and evaluate their evidenced-based DNP Project during this 100 hour practicum. Upon completion of this project the results will be presented to their DNP Committee with a publishable quality manuscript and oral presentation for their approval. Course includes 100 project hours. (2 quarter hours)

NSG 601 is a prerequisite for this class.

NSG 603
DNP PROJECT CANDIDACY CONTINUATION
Graduate
Students who have completed their coursework but who must take extra time to complete the requirements for implementation and evaluation of their evidenced-based DNP project. Upon completion of this DNP Project the results will be presented to their DNP Committee with a publishable quality manuscript and oral presentation for their approval. Students must enroll in candidacy continuation each quarter of the academic year until the DNP project requirements have been completed. The course carries part-time student status. Non-credit.

NSG 610
ANESTHESIA PRACTICUM I
Graduate
An introduction to the clinical practice of nurse anesthesia with an emphasis on the principles introduced in ANES 500-504, 507, and 508. Includes administration of anesthesia for select patient populations under direct instruction and supervision of a certified registered nurse anesthetist (CRNA) or anesthesiologist. The course content focuses on specific general surgical procedures, including intra-abdominal, gynecological, urologic, ear, nose and throat, orthopedic, and endoscopic procedure. Content knowledge will be assessed through objective examinations. The preparation, implementation and evaluation of an appropriate nurse anesthesia care plan for these populations will be assessed through clinical performance evaluations and written care plans. Course includes Human Patient Simulation (HPS) assignments. Course includes 40 clinical hours/week and 20 lab hours/quarter.

NSG 504 and NSG 507 are a prerequisite for this class.

NSG 611
ANESTHESIA PRACTICUM II
Graduate
Includes administration of general and regional anesthesia for patients undergoing a variety of elective and emergency surgical procedures and diagnostic procedures. Management of special populations, including pediatric, obstetric, and geriatric patients is emphasized with a focus on the anatomical and physiological differences and pathological disorders that characterize each population. Content knowledge will be assessed through objective examinations. The preparation, implementation and evaluation of an appropriate nurse anesthesia care plan for these populations will be assessed through clinical performance evaluations and written care plans. Course includes Human Patient Simulation (HPS) assignments. Course includes 40 clinical hours/week and 12 lab hour/quarter.

NSG 610 is a prerequisite for this class.
NSG 612
ANESTHESIA PRACTICUM III
Graduate
Includes administration of general and regional anesthesia for patients undergoing a variety of elective and emergency surgical procedures and diagnostic procedures. In addition to anesthetic management of the trauma patient, the course includes acute and chronic pain management, and advanced regional anesthetic techniques. Content knowledge will be assessed through objective examinations. The preparation, implementation and evaluation of an appropriate nurse anesthesia care plan for these populations will be assessed through clinical performance evaluations and critically assessed topics (CAT assignments). Course include Human Patient Simulation (HPS) assignments. Course includes 40 clinical hours/week and 12 lab hour/quarter.

NSG 611 is a prerequisite for this class.

NSG 613
ADVANCED ANESTHESIA PRACTICUM I
Graduate
The first in a series of advanced practicums that provides the third year DNP student with the opportunity to develop, implement, and evaluate an anesthesia care plan for all patient populations with an emphasis on specialty surgical procedures, insertion of invasive monitoring and advanced airway management. Emphasis is placed on application, integration, and synthesis of knowledge, skills, and attitudes that are representative of the advanced practice of nurse anesthesia. This advanced practicum provides the opportunity to explore the professional aspects of nurse anesthesia practice, link policy making with clinical systems, and translate research into practice. Includes seminar presentations on selected topics relative to the advanced practice of nurse anesthesia and self assessment assignments. Course includes 45 clinical hours/week and 4 lab hours/quarter.

NSG 612 is a prerequisite for this class.

NSG 614
ADVANCED ANESTHESIA PRACTICUM II
Graduate
Description: The second in a series of advanced practicums that provides the third year DNP student with the opportunity to develop, implement, and evaluate comprehensive anesthesia care plan for all patient populations undergoing a wide variety of diagnostic, surgical and therapeutic procedures. This advanced practicum provides the opportunity to explore the professional aspects of nurse anesthesia practice, link policy making with clinical systems, and translate research into practice. Includes critically appraised topics, case narratives and seminar presentations on selected topics relative to the advanced practice of nurse anesthesia. Course also includes Crisis Resource Management in the Human Patient Simulator (HPS). Course includes 45 clinical hours/week and 4 lab hours/quarter.

NSG 613 is a prerequisite for this class.

NSG 615
ADVANCED ANESTHESIA PRACTICUM III
Graduate
The third advanced practicum for DNP students provides an opportunity to develop, implement, and evaluate an anesthesia care plan for all patient populations undergoing a wide variety of surgical and therapeutic procedures. This advanced practicum provides the opportunity to explore the professional aspects and link policy making with clinical systems, translate research into practice and serve as change agents for health care. Includes critically appraised topics, case narratives, seminar presentations on selected topics relative to the advanced practice of nurse anesthesia, and Crisis Resource Management in the Human Patient Simulator (HPS). Course includes 45 clinical hours/week and 4 lab hours/quarter.

NSG 614 is a prerequisite for this class.

NSG 616
ADVANCED ANESTHESIA PRACTICUM IV
Graduate
The final advanced practicum in which the third year nurse DNP student demonstrates the advanced knowledge and skills that comprise a foundation for nurse anesthesia practice, the ability to work independently or as a contributing member of the anesthesia care team, adherence to professional standards as well as ethical and moral principles while providing care to a multicultural patient population, analysis and synthesis of current research that support evidence based anesthesia practice, an awareness of limited healthcare resources and cost containment strategies, the ability to perform a comprehensive self evaluation; and display of a professional attitude toward lifelong learning. The practicum includes completion of a final comprehensive exam, the Self Evaluation Exam (SEE) and professional portfolio, and presentation and dissemination of the Scholarly Leadership Project. Course includes 45 clinical hours/week.

NSG 615 is a prerequisite for this class.
NSG 700
ADVANCED PRACTICUM FOR NURSE PRACTITIONERS I
Graduate
First of a series of two clinical courses that focus on developing proficiency in advanced nursing assessment and management for health promotion and disease prevention, management of complex health conditions, and working with interdisciplinary teams to provide care and services for persons across the lifespan. Students will ground their studies in the science of nursing interventions, moral/ethical issues, and nursing research. Practicum experiences are arranged to meet the individual needs of students while also meeting accreditation and certification requirements. This practicum provides an in-depth clinical experience for students in assessing an aggregate population within the context of a clinical setting, and developing programs to creatively and cost effectively affect changes in health care delivery. The clinical residency experience is facilitated by an advanced practice expert clinician, and forms the setting and basis for the Scholarly Leadership Project. There is no lecture/discussion component to this course. The student will meet with his/her course instructor on a regular basis for individual discussion and guidance in this Practicum course. Course includes 150 residency clinical hours.

NSG 701
ADVANCED PRACTICUM FOR NURSE PRACTITIONERS II
Graduate
Second of a series of two clinical courses that emphasizes incorporating current research and demonstrating increasing autonomy and proficiency in decision making and case management. This advanced practicum provides the student with the opportunity to link policy making with clinical systems, translate research into practice, and serve as change agents for health care. In addition, this course provides the student with an opportunity to demonstrate expert knowledge, and expert clinical assessment and diagnostic skills when working with various patient populations. This practicum provides an in-depth clinical experience for students in assessing an aggregate population within the context of a clinical setting, and developing programs to creatively and cost effectively affect changes in health care delivery, and to evaluate those programs. The clinical residency experience is facilitated by an advanced practice expert clinician, and forms the setting and basis for the Scholarly Leadership Project. There is no lecture/discussion component to this course. The student will meet with his/her course instructor on a regular basis for individual discussion and guidance in this Practicum course. Course includes 150 residency clinical hours.

NSG 700 is a prerequisite for this class.

ORGC 201
BUSINESS AND PROFESSIONAL COMMUNICATION
Undergraduate
Employers demand strong communication and presentation skills. In order to compete effectively in the job market, students need to acquire and practice the written and oral communication skills needed to interview successfully. Furthermore, as a professional you will not only be expected to be a confident speaker, but also to organize and prepare clear, concise and interesting presentations. You will also need to communicate effectively while working as the member of a team or in other group contexts. In developing the knowledge, competencies and skills needed to communicate effectively in these and other contexts, this course will embrace opportunities for both critical thinking and applied problem solving. (Formerly CMNS 201)

ORGC 212
SMALL GROUP COMMUNICATION
Undergraduate
A survey of the variables operating in group interactions. Combines principles with practice through participation in small group experiences. Topics include group formation, group formats, organizational approaches, decision-making models, group observation and evaluation. (Formerly CMNS 212)

ORGC 251
ORGANIZATIONAL COMMUNICATION
Undergraduate
This course focuses on the role of communication in organizational life. Attention will be devoted to exploring how communication simultaneously shapes and is shaped by organizations. Topics include conflict and mediation, stress and social support, the supervisor-subordinate relationships, workplace diversity, organizational consultation and new communication technologies in organizations. (Formerly CMNS 251)

ORGC 290
ORGANIZATIONAL COMMUNICATION WORKSHOP (VARIABLE TOPICS)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. (2 quarter hours)
ORGC 316  
COMMUNICATION AND GROUP DECISION-MAKING  
Undergraduate  
Advanced undergraduate course in small group communication. Students develop skills and abilities in identifying various factors that contribute to the success and failure of group decision-making in organizational contexts. Class sessions will focus on theories, research, and practices in group processes, and their applications to issues in real life. (Formerly CMNS 316)

ORGC 352  
COMMUNICATION AND THE CORPORATE CULTURE  
Undergraduate  
Focuses on the communicative implications of such cultural elements as values, heroes, rites, rituals, symbolism and storytelling. Analyzes and presents ways of adapting to the diverse components of a culture. (Formerly CMNS 352)

ORGC 353  
COMMUNICATION AND ORGANIZATIONAL CHANGE  
Undergraduate  
Explores the impact of change on the day-to-day work experience of organizational members. How culture, management philosophy and individual performances are influenced by change. Political, symbolic interactional, and human resource perspectives are explored. (Formerly CMNS 353)

ORGC 354  
EMPLOYMENT INTERVIEWING  
Undergraduate  
This course examines the theory and practice of on-the-job interviewing and is especially helpful to those students who will soon graduate and transition into the world of full-time work. Through the class, you will learn to: a) identify personal transferable skills acquired through a range of school and work activities and jobs; b) identify careers/professions whose functional makeup requires professionals with your skills; c) apply to an ideal job through a carefully crafted cover letter and resume; d) open and close any interview effectively; e) build an interview schedule for any information-seeking interview; f) align different types of questions with interview goals and in-the-moment interview developments; g) learn to avoid question-asking pitfalls; and h) respond effectively to competency-based employment interview questions. In this class, you will have the opportunity to practice your interviewing skills in simulated probing and employment screening interviews. While the principal emphasis of the class is on the employment screening interview, many interviewing skills and pitfalls that translate equally well to other interview contexts will be learned as well.

ORGC 355  
DARK SIDE OF ORGANIZATIONAL COMMUNICATION  
Undergraduate  
The dark side of organizational communication introduces students to some of the more unsavory dimensions of organizational life. While it is not a guarantee that you will experience all of the dysfunctional organizational activities reviewed in this course, it is a certainty that you will personally encounter, or at the very least witness a few. Throughout the quarter, attention will be devoted to reviewing what is known about a variety of dysfunctional and harmful organizational communication activities and to identifying ways of coping with them. Topics covered in this particular class include incivility, bullying and violence, social ostracism, gossip, prejudice and discrimination, sexual harassment, group (dy)synergies, and stress and burnout.

ORGC 356  
COMMUNICATION CONSULTING  
Undergraduate  
Examines how to partner with a client to facilitate constructive organizational change and behavioral growth in the workplace. Focuses on contemporary consulting through case studies. Previous courses in organizational, small group, or interpersonal communication are suggested. (Formerly CMNS 356)

ORGC 357  
TOPICS IN GROUP AND ORGANIZATIONAL COMMUNICATION  
Undergraduate  
Topics covered in this course might include: communication and customer service, assessment and intervention in organizations, comparative management, democratic participation in organizations, gender in the workplace, etc. (Formerly CMNS 357)
ORGC 358
DIVERSITY, LEADERSHIP, & TEAM BUILDING
Undergraduate
This is an advanced undergraduate course in small group communication that addresses how teams can benefit from effective leadership. Class materials will focus on various leadership theories and research, and their applications to leadership issues in real-life organizational teams. Students will acquire knowledge about what separates successful leaders from their unsuccessful counterparts, learn analytical tools to observe, diagnose, and choose appropriate responses to different leadership and team-related problems, and have opportunities to recognize and reflect on one's own leadership skills in a team context.

ORGC 359
VIRTUAL TEAMS
Undergraduate
Knowing how to work with others is crucial in the contemporary workplace. In fact, teamwork skills are consistently ranked high as one of the top qualities that employers look for in new hires. Particularly, as work teams grow to be more diverse across national, temporal, and geographic boundaries, working in the technology-mediated environment is becoming almost a necessity. In this course, students will learn what it takes to be a good team member and a leader in virtual teams - teams that primarily use communication technologies for collaboration. The class is fully online, and students will have hands-on experiences in a virtual team of their own through online simulations, virtual discussions, and team projects.

ORGC 393
ORGANIZATIONAL COMMUNICATION PRACTICUM
Undergraduate
Structured and supervised student participation group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours. (2 quarter hours)

PAM 200
INTRODUCTION TO MUSIC BUSINESS
Undergraduate
Through lecture and discussion, this course examines the changing music industry. As an overview of music business, this course studies the relationships between artists, managers, agents, and attorneys; recording companies; major and independent labels; music publishing and performing rights organizations; touring and merchandising; copyright and music licensing; careers in the music industry; and topical issues facing the industry today. (2 quarter hours)

PAM 301
PERFORMING ARTS MANAGEMENT I: INTRODUCTION TO MANAGEMENT CONCEPTS IN THE PERFORMING ARTS
Undergraduate
Through lecture, discussion, readings, videos, research and projects, the student learns about styles of arts leadership, contemporary issues and best practices in the field of arts management, the history of non-profit arts administration in the US including leaders in the field and opportunities for careers in the arts. Emphasis is placed on how non-profit organizations balance their commitment to the Art, the Artist and the Audience. Specific areas addressed include the role of the arts manager; the primacy of the mission; planning, change and adaptation; leadership and group dynamics; and human resources. (Cross-listed with THE 201)

PAM 200 and status as a Performing Arts Management student is a prerequisite for this class.

PAM 302
PERFORMING ARTS MANAGEMENT II: ORGANIZATIONAL STRUCTURE AND FINANCIAL MANAGEMENT
Undergraduate
Through lecture, discussion and projects, the student learns about non-profit arts organizational structures, short-and long-term planning, intersection of mission/vision/values and programming with growth and sustainability, producing vs. presenting organizations, financial management, management information systems and budgeting. (Cross-listed with THE 202)

PAM 301 and status as a Performing Arts Management student is a prerequisite for this class.
PAM 303
PERFORMING ARTS MANAGEMENT III: MARKETING FOR THE ARTS
Undergraduate
Through lecture, discussion and projects, the student learns about strategies and objectives in marketing and promoting the performing arts. Specific focus is given to integrated marketing and communication strategies; market research and evaluation techniques; organizational image and branding; patron support services; and audience development. Students will create marketing and public relations plans and materials, both independently and on teams, which incorporate targeting audiences; promotions, publicity, and advertising; and working with various forms of media, including social networking and technology-based platforms.

PAM 302 and status as a Performing Arts Management student is a prerequisite for this class.

PAM 304
PERFORMING ARTS MANAGEMENT IV: INSTITUTIONAL ADVANCEMENT & COMMUNITY ENGAGEMENT
Undergraduate
Through lecture, discussion and special projects, the student learns about institutional advancement and development as well as collaborations with internal and external constituencies. Topics include forming partnerships, community outreach, board development and engagement, fundraising and grant writing, donor cultivation, and the philanthropic community. This course is the final course in the four-course sequence on Performing Arts Management, and integrates the topics, vocabulary, themes, and subjects introduced in the previous three courses. (Cross-listed with THE 207)

PAM 303 and status as a Performing Arts Management student is a prerequisite for this class.

PAM 305
COMMERCIAL MUSIC BUSINESS
Undergraduate
Through lecture, discussion, reading and projects, this course provides an in-depth examination of the commercial/for-profit music business with a focus on artist management, record labels (present and future), marketing and touring. Specific attention is given to artist-manager relationship; artist-label relationship; marketing strategies; and the current changes and evolution of the industry, at large. (2 quarter hours)

PAM 200 is a prerequisite for this class.

PAM 306
TECHNOLOGICAL TRENDS & DEVELOPMENTS IN THE MUSIC INDUSTRY
Undergraduate
This course will examine the changes within the music industry; past, present, and future; and the technological advancements which provide the catalyst for those changes. Students will develop a basic understanding of the technological breakthrough, recognize its significance and examine how the music industry exploits these new developments into business opportunities never before possible. (2 quarter hours)

PAM 200 is a prerequisite for this class.

PAM 307
LEGAL ISSUES IN THE MUSIC INDUSTRY
Undergraduate
This course is a study of legal concepts and issues related to the music industry - types of contracts; contracts mechanics and formats; relationships between artists and key personnel; recording contracts and record labels; copyright issues related to artists, performers, and composers, copyright infringement issues; digital music issues; labor relations; landmark legal cases related to the music industry; and topical legal issues facing the industry today. (2 quarter hours)

PAM 200 is a prerequisite for this class.

PAM 308
MUSIC PUBLISHING
Undergraduate
This course is a study of the past, present, and future of music publishing. The course is designed to examine the principles and procedures involved in music publishing, nationally and internationally. Topics include music ownership and copyright registration; copyright searches and infringement; primary functions of a music publisher; sources of publishing income and licenses; current practices, trends, and future issues. (2 quarter hours)

PAM 200 is a prerequisite for this class.
PAM 309  
MUSIC ENTREPRENEURSHIP  
Undergraduate  
Through opportunity creation, case study, discussion and peer evaluation, this course analyzes and simulates the professional performing arts marketplace, providing collaborative hands-on experience for performers and arts managers-in-training. In this course, performers will hone their musical point-of-view and create an original, self-produced performance opportunity in the DePaul community, with marketing materials and a business structure to support their project. Arts Management students will collaborate with performers on these projects, providing support to their colleagues in a way that models their future professional activities. Each student will also be responsible for analyzing a current successful model, identifying keys to success. This course is intended to bridge the transition from college to career, providing the artistic, career development and entrepreneurship training that have become essential in today's professional environment. (Cross-listed with APM 309) (2 quarter hours)

PAM 310  
MUSIC FESTIVAL MANAGEMENT  
Undergraduate  
This course will provide an introduction to the successful fundamentals of managing a music festival. Topics include the various purposes of a festival, effects on community, music education, outreach, tourism, fundraising, public relations, programming, marketing, ticketing, risk management, and production. Students will acquire an understanding of the evolving trends in creating, sustaining, and assessing a festival. (2 quarter hours)

PAM 360  
TOPICS IN PERFORMING ARTS MANAGEMENT  
Undergraduate  
An in-depth study of special topics related to the fields of Performing Arts Management and/or Music Business. (2 quarter hours)

Status as an Undergraduate Music, Undergraduate Theater, Undergraduate Business student, or permission from the instructor is a prerequisite for this class.

PAM 398  
PERFORMING ARTS MANAGEMENT INTERNSHIP  
Undergraduate  
The internship provides the student with an experiential opportunity to learn by working with professionals in the Performing Arts Management and/or Music Business industries. (2 quarter hours)

Status as a Performing Arts Management student is a prerequisite for this class.

PAM 399  
INDEPENDENT STUDY  
Undergraduate  
(2 quarter hours)

Status as a Performing Arts Management student is a prerequisite for this class.

PAX 200  
COMMUNITIES WORKING FOR SUSTAINABLE JUSTICE AND PEACE: SERVICE IN CHICAGO AND THE U.S.  
Undergraduate  
The course introduces central concepts and strategies that can help U.S. society move toward sustainable justice and peace. A selection of issues relevant to students' service sites may include: a study of different forms of violence, such as structural and direct violence, an examination of nonviolent interventions for action and social change, and a recognition of the links with other parallel concerns (poverty, women's issues, social inequity). Students work 25 hours at community service organizations to provide a key learning resource.

PAX 201  
FRAMEWORKS FOR BUILDING A JUST AND PEACE-SUPPORTING SOCIETY  
Undergraduate  
An introductory course to positive models for building a peace culture, addressing structural conflicts and injustice, and discovering viable resolutions.
PAX 206
BOUNDARIES AND IDENTITIES
Undergraduate
This course explores how identity formation is shaped by cultural, historical, and political construction of barriers, borders, and boundaries, and how such formations are intertwined with ethnicity, race, nationality, gender and class. Cross-listed with INT 206 and GEO 206.

PAX 210
INTERNATIONAL CONFLICT AND PEACEBUILDING
Undergraduate
This interdisciplinary course examines the basic questions of peace studies in different and "diverse" contexts, from personal relationships to societies and states, and addresses the consequences of conflict and conflict resolution in the contemporary world.

PAX 212
SOCIAL JUSTICE AND SOCIAL CHANGE
Undergraduate
An exploration of the mutual interdependence of social justice and non-violence, understanding it as a strategy for social change and a vision for social concord. Formerly PAX 230.

PAX 214
CONFLICT: INTERVENTION, NEGOTIATION AND ADVOCACY
Undergraduate
An exploration of theories of conflict and the intervention methods for dealing with conflicts at the interpersonal and group levels.

PAX 218
HUMAN RIGHTS: PROMISE AND PROBLEMATICS
Undergraduate
This course will explore the historical origins, foundational principles, and socio-political efficacy of human rights discourse in contemporary international relations, domestic politics, and ethical thought. It consider issues such as the religious and/or secular foundation of human rights; their universality in relation to particular cultural customs and norms; the relative priority of individual and collective rights; and the legitimacy of international humanitarian intervention in sovereign nations.

PAX 220
SOCIAL ENGAGEMENT FOR PEACE AND JUSTICE
Undergraduate
This course will look at the various ways in which people across the globe become engaged in social issues of importance, particularly those dealing with achieving justice and peace. Examples are human rights, environmental protection, labor issues, sustainable development alternatives, political representation, and gender issues.

PAX 225
TRANSNATIONAL GRASSROOTS SOCIAL MOVEMENTS
Undergraduate
This course is an introductory course on that ways in which ordinary communities of people have promoted peace through nonviolent resistance and transnational connections. Each section of the course may take one specific situation of such collaborative efforts as the main case study or arena of action. Such situations will involve developing understandings of a history of the involvement of the United States with another country, whether through foreign aid or military interventions, and the efforts of citizens of both countries in working for a sustainable peace. The value of transnational solidarity and the complexities of power dynamics in both countries and between citizens will be studied. Formerly PAX 245.

PAX 231
ANALYZING POVERTY, ITS CAUSES AND CONSEQUENCES
Undergraduate
This course investigates a variety of viewpoints on the causes and effects of poverty. Poverty is a complex and multidimensional condition often difficult to measure, comprehend and change. It includes lack of or limited access to material needs (food, water, shelter, health care, etc.), social relations (participation, inclusion, rights, etc.), income and wealth (unemployment, resources, etc.) and moral, psychological, or spiritual well-being. This course reviews the current poverty debates from the economic, policy, social, political, cultural and moral perspectives that influence the implementation of poverty reduction programs.
PAX 235
THE ETHICS OF POVERTY
Undergraduate
This course reviews the current poverty debates from the economic, policy, social, political, and cultural perspectives that influence the implementation of poverty reduction programs, in order to bring an ethical analysis to bear on the degree of moral responsibility that can be argued for when seeking appropriate solutions to global poverty. Several ethical frameworks will be consider, allowing students to learn the critical application of arguments and evidence to a seemingly intransigent phenomenon.

PAX 240
VOICES OF WAR AND PEACE: ART, LITERATURE AND FILM
Undergraduate
This course is an overview of the ways in which the arts, including literature and film, portray warfare and the attempts to end violence and build reconciliation and peace.

PAX 241
HUMAN RIGHTS UNDER THE LENSES OF FILM AND OTHER ARTS
Undergraduate
This course is an overview of the ways in which the arts, including literature and film, portray situations in the United States and globally that limit human rights. Analyses of both the theoretical literature on human rights and the cinematic and other artistic attempts to capture both violations of human rights and the restoration and protection of these will be central to the course.

PAX 242
PICTURES OF INJUSTICE: NARRATIVE ARTS IN SOCIAL JUSTICE MOVEMENTS
Undergraduate
This course will critically examine social justice themes in documentary and feature films in order to consider the role film and filmmaking can play in social justice movements. Together, we will carefully analyze a wide variety of films with the goal of critically examining their representations of race, gender, class and their depiction of agency of their subjects. We will also examine the storytelling and technical techniques used by filmmakers and how these techniques support the goals of filmmakers. Finally, we will examine case studies of activists who are using film and film-making as a part of movements for social justice. Students will leave this course with a better understanding of the ethics of filmmaking and the use of film in social movements. They will be more critical consumers of media and more familiar with a variety of social justice issues. Cross-listed with CPL 242.

PAX 243
VISUALIZING POVERTY THROUGH FILM AND NARRATIVES
Undergraduate
Poverty is a complex and multidimensional condition often difficult to measure, comprehend and change. The use of film, literature and other arts allow for those who do not directly experience poverty to develop an understanding through their empathic responses to persons living in poverty. The course will use the lenses of film and literary analysis to measure the success of those uses, in light of a critical analysis of the need to alleviate poverty and its effects.

PAX 244
ARCHEOLOGY OF POWER: TESTIMONIES FROM FILM, LITERATURE, AND NARRATIVES
Undergraduate
This course is an overview of the ways in which the arts, including literature and film, portray power and its effects, particularly where these are unjust and oppressive. Different theories of power are investigated, so that students can begin a critical analysis of both the benefits and the limitations of the use of power and its effects on those using it well and abusing it. The ability of the arts to aid our understanding of power will be central to the course.

PAX 250
TOPICS ON PEACE, JUSTICE, AND CONFLICT STUDIES
Undergraduate
A workshop covering practical instruction in mediation, conflict resolution, and nonviolent methods for promoting social change.

PAX 252
FORGIVENESS AND RECONCILIATION
Undergraduate
A study of various understandings of "forgiveness" and "reconciliation" in several religions and cultures. The nature and dynamics of forgiveness and reconciliation will be examined both theoretically and in relationship to specific conflicts. Cross-listed with REL 252.
PAX 253
DESPAIR AND HOPE
Undergraduate
This course addresses the important religio-ethical concepts of despair and hope from both theoretical and applied perspectives. The course explores: a) various religious, ethical, and psychological understandings of these concepts and b) applications of these concepts, along with various methods and approaches, to a number of case studies involving personal and/or societal challenges. Cross-listed with REL 253.

PAX 255
LOVE, HATE AND RECONCILIATION
Undergraduate
Reconciliation between people when there is disagreement or other forms of conflict or violence is a crucial process to alleviate the negative side of conflict. Love and hate are two of the strongest emotions and consequently can generate conflict. A philosophical analysis of these aspects of human existence can uncover resources for creative approaches to the forms of peace-building that include reconciliation processes, as well as provide ethical arguments for their value.

PAX 256
INNER PEACE: EXPERIENCE AND PHILOSOPHICAL APPROACHES
Undergraduate
The idea of inner peace is a theme throughout the histories of many civilizations since recorded history. It provides a twin to the more obvious idea of outer peace, or peace in the environments surrounding us, whether the neighborhood, our tribes and social groups, our nation with other nations. This course will study theories of peace and how these correlate with the theme of "inner" peace. It will ask what practices have been used to promote or foster inner peace. It will bring a philosophical and critical lens to these theories and practices, whether they are found in religious texts, political understandings, personal narratives or fictional accounts, psychology, or phenomenological and other philosophical approaches to peace.

PAX 268
DISABILITY STUDIES: AN INTRODUCTION
Undergraduate
This course explores disability from an interdisciplinary perspective: first-person accounts, disability rights "theory," history, and institutional and legal frameworks. The course considers a number of related topics: What is disability? Is disability socially constructed? What history led to the disability rights movement? We will then turn to readings about power and control, oppression and freedom in relation to disabilities, as well as the challenges of identity, inclusion, and self-determination, and the wide variety of disabilities.

PAX 270
PEACE MOVEMENTS THROUGHOUT HISTORY
Undergraduate
An exploration using the tools of both peace studies and historical studies to understand the different attempts to bring about a peaceful solution to a conflictual situation, whether this involves citizen refusal to accept a governmental stance (e.g., for military dictatorship, laws such as those for immigration) or actual aggressive events (international war, civil strife, oppressions through structural situations). The course will be comparative and interdisciplinary, but may focus on a single movement.

PAX 275
MOVEMENTS FOR GENDER AND TRANS JUSTICE
Undergraduate
An exploration using the tools of both justice studies and historical studies to understand the different aspects to bring about changes in the lives of those affected by unjust social structures and persons acting to limit their freedom due to gender or transgender factors. The course will be comparative and interdisciplinary, but may focus on a single movement.

PAX 278
DISABILITY RIGHTS MOVEMENT
Undergraduate
An exploration using the tools of both justice studies and historical studies to understand the different aspects to bring about changes in the lives of those affected by disabilities and the ways in which a culture and its laws and persons limit the freedom and basic rights of those living with disability. The course will be comparative and interdisciplinary, but may focus one or several aspects of the disabilities movement.
PAX 290
TOPICS ON JUSTICE AND PEACE
Undergraduate
A topics course geared to introductory level discussions of the core elements of justice and peace-building as they occur in specific venues, such as religion.

PAX 299
INDEPENDENT STUDY
Undergraduate
The student and faculty member will design a syllabus with readings and assignments appropriate for a lower division course in PJC.

Sophomore or above standing and at least one PAX course is a prerequisite for this class.

PAX 300
TOPICS SEMINAR
Undergraduate
A seminar on a key theoretical topic in the interdisciplinary fields covered by the Peace, Justice, and Conflict Studies Program, using a variety of theoretical positions.

(Two from PAX 200, 210, 212, 214, 220) or permission of the Program Director is a prerequisite for this course.

PAX 301
THE THEORY AND PRACTICE OF NONVIOLENT ACTION
Undergraduate
This course will cover the basic theoretical groundwork on the practice of nonviolent action. As such, it will deal in depth with the subject matter of peace and justice making in the context of domestic and international conflict, specifically through a close reading and critical analysis of Gene Sharp's seminal The Politics of Nonviolent Action and other selected texts. Through this text, we will critically examine the philosophy and methods of nonviolent action, asking about their effectiveness and desirability in the context of real-world conflict situations, and analyzing their tactics as resources for thinking creatively about the practice of nonviolent action in the context of struggles for social change in the contemporary world.

One 200-level PAX course or instructor permission is a prerequisite for this course.

PAX 303
BORDER MATTERS: LITERATURE & CULTURE IN THE LATINO/A BORDERLANDS
Undergraduate
In this course, we will study the values and dynamic that is promoted in different Latino communities in the United States. In order to give context to the present situation of Latinos in the U.S. we will study some of the social issues in the countries of origin which have resulted in immigration and their encounter with borderlands. The notion of a Latina and Latino cultural "borderlands" has proven a ubiquitous and powerful conceptual paradigm in recent years, organizing distinct ethnic groups (Cuban American, Mexican American, Central American, Puerto Rican, etc.) according to the rubrics of pan-ethnic identity labels (Hispanic, Latina/Latino, etc.) and transnational geographies (Latin America, the Americas, etc.). This course will examine a wide range of Latino/a literary expressions produced in the Latina/Latino borderlands, particularly in areas of cultural contact and conflict. While the most obvious focus will be the Texas-Mexico border region, including ongoing efforts to establish the public meaning of the Alamo, additional borderlands, literal and figurative, will be considered. The Latina and Latino borderlands have also inspired critics and theorists to imagine postmodern, post-national subject formations, in which questions of ethnicity, gender, and sexuality are shifted from the margins to the center of critical discourse. We will therefore investigate the use and limits of recent "border theory". Cross-listed with LST 303.

PAX 304
TOPICS IN MIGRATION AND FORCED MIGRATION
Undergraduate
This course examines the integral role that different processes of mobility play in shaping today's world: emigration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations.
This course looks at a number of post-conflict situations and draws on a multi-perspectival series of reports concerning the processes and outcomes of them. It considers several of these questions: What happens after a ceasefire? What signifies peace: the signing of a peace agreement, or a free and fair democratic election, or a long-awaited atmosphere of calm? How do complex processes of reconciliation involve tending to the individual and societal needs associated with the transition from chaos and conflict to a new, shared, post-conflict future. How might a society’s search for the “truth,” its public grappling with justice and forgiveness, and the possibilities of accountability, (re-)building trust, and restoring relationships fortify a post-conflict area against the recurrence of conflict as well as empower all concerned (oppressed and oppressors) to pursue a collaborative, just, and peaceful coexistence? Examining multiple case studies through the lenses of theory, best practices, and primary source transcripts and footage of Truth and Reconciliation Commission proceedings, the course explores the possibilities and challenges of reconciliation.

PAX 210 or instructor permission is a prerequisite for this course.

This course is an interdisciplinary inquiry that draws on learning from different disciplines as well as our experiences in service, activism, and other forms of civic engagement. Through readings, discussions, and research, students will deepen their capacity for critical inquiry and integrative analysis concerning the causes, sustaining factors, and possible resolutions of conflict, violence, and injustice. We will ask challenging questions about conflict resolution, investigate contemporary developments in grassroots peacebuilding, and assess the comparative advantages and distinct applications of various conflict resolution modalities.

PAX 210 or instructor permission is a prerequisite for this course.

This course introduces students to transformative justice responses to violence that do not rely on state institutions. These include collective processes for support and healing, intervention, accountability, and prevention. The pedagogical praxis of learning will be through communal peacemaking circles and collective strategy sessions to create community responses to violence. Cross-listed with WGS 320.

Together we will examine the principles of restorative justice in relation to a number of systems and sites of justice in contemporary society. The topics of our inquiries include: justice/injustice, peace, violence/non-violence, reconciliation, harm/accountability, traditional values and practices, rights, conflict, diversity, structural (social) inequality, and local-state-global initiatives. Importantly, we will practice peace circles throughout the semester as our mode of engagement in class.

The seminar will examine the intellectual origins and historical traditions of “human rights” that led to the formal development of the UN Declaration of Universal Human Rights in 1948. While we will address 18th and 19th century influences on human rights thinking and practices, we will concentrate on 20th century contexts of two world wars, revolution, and genocide as they created the imperative for an agreed-upon international statement on human rights. The seminar will also examine the debates and negotiations among the authors of the Universal Declaration, the significance of the declaration during the cold war, and contemporary controversies about human rights in the post-9/11 world.

PAX 218 or permission of the instructor is a prerequisite for this course.
PAX 331
LIBERATION THEOLOGY
Undergraduate
Liberation Theology focuses upon a radical movement for the transformation of Christianity that originated in the "Christian Base Communities" of Latin America and spread from there to North America and the Third World. Tested in the fires of civil wars in Central American and political repression in Brazil and other parts of Latin America in the 1970s and 80s, Liberation Theology today seeks to respond to the forces of globalization. Liberation theology and Christian base communities will be studied in comparison to other religious movements in Latin America such as Pentecostalism. This course is offered in conjunction with the Peace, Justice and Conflict Studies program, the Master of Arts in Liberal Studies program and the Catholic Studies Program. We will give special attention to the impact of the new global economic order on the poorest segments of Latin American societies and to the issue of global migration. Cross-listed with REL 351.

PAX 344
TOPICS IN ENVIRONMENTAL JUSTICE
Undergraduate
This course explores a specific topic in environmental justice, such as advocacy. For example, the roles of individuals and organizations in advocacy are discussed, particularly how power arrangements facilitate or impede consensus building, how legislation is written, and how this process impacts communities of color. Special attention is paid to advocacy techniques such as lobbying, movement-building, public education and litigation.

PAX 345
WOMEN, WAR, AND RESISTANCE
Undergraduate
This course aims to make feminist sense of contemporary wars and conflicts. It analyzes the intersections between gender, race, class, and ethnicity in national conflicts. The class traces the gendered processes of defining citizenship, national identity and security, and examines the role of institutions like the military in the construction of femininity and masculinity. The course focuses on the gendered impact of war and conflict through examining torture, mass rape, genocide, and refugee displacement. It analyzes the strategies used by women's and feminist movements to oppose war and conflict, and the gendered impact of war prevention, peacekeeping, and post-war reconstruction. The class draws on cases from Africa, the Americas, Asia, Europe, and the Middle East and North Africa. The class is interdisciplinary and gives equal weight to theory and practice while drawing on writings by local and global activists and theorists. Cross-listed with WGS 345.

PAX 348
INDIGENOUS POLITICAL STRUGGLES
Undergraduate
This course explores the struggles for social justice and the right to have rights by indigenous peoples. It emphasizes contemporary cases and the cultural contexts in which indigenous political strategies have developed and transformed. It uses historical data to understand the issues faced by indigenous peoples. Students conduct research on indigenous struggles and their connections to other social movements at the local, national, and international levels. Cross-listed with LST 348.

PAX 350
CAPSTONE IN PEACE, JUSTICE & CONFLICT STUDIES
Undergraduate
An integrative seminar drawing together students' theoretical work and hands-on expertise.

Three 200-level PAX courses or instructor permission is a prerequisite for this course.

PAX 351
GEOGRAPHY, FOOD AND JUSTICE
Undergraduate
While the need for food is universal, geographies of food production, distribution and consumption are anything but even. This leads to multiple issues of food injustice at a variety of scales. This course critically examines the contemporary global food system with the goal of providing students with skills and knowledge to engage in food justice activism. Students study the development of food systems and how inequalities have emerged in production, distribution and consumption. The course then explores food justice movements including the emergence of alternative food networks in the U.S and internationally. Assignments may engage students in local food projects and/or advocacy campaigns. Cross-listed with GEO 351 and INT 329.
PAX 360
TOPICS IN DEVELOPMENT STUDIES
Undergraduate
A survey of the problem of endemic poverty in the Third World, together with a consideration of the various forms of public action designed to alleviate poverty. Considerable attention will be paid to the problems of rural poverty and the pitfalls and possibilities of industrialization.

PAX 362
LANGUAGE AND THE POLITICS OF TERROR
Undergraduate
Politics is, among other things, the arena in which human bodies are broken. This course will concern itself with the breaking of human bodies through torture, genocide, war and poverty. Throughout, a focus will be maintained on the interface between bodies and language, on how bodies placed under extremes of pain and degradation lose their capacity for speech, and how language reaches its intrinsic limits in trying to represent bodies in pain. Cross-listed with INT 362.

PAX 364
POLITICAL AUTOBIOGRAPHY: TRANSNATIONAL FEMINIST TALES OF HEALING AND RESISTANCE
Undergraduate
This class explores the interplay of political, social, economic and aesthetic factors in feminist autobiography from a transnational perspective. We examine the ways that women's autobiography is being used to write themselves into history. Story is integral in the process of healing and building solidarity and coalitions for gender based organizing. Further, autobiography creates a space for the “alter-history” to be told: the absence of testimony and experience is created for others to gain hope, strength, and deeper understanding of others and themselves. Various forms and critiques of feminist autobiographies are explored, and how each impacts the political possibilities for readers. Cross-listed with WGS 364.

PAX 365
TOPICS IN WAR AND PEACE
Undergraduate
This course will deal with one of many ways to discuss the large-scale conflict that is war and the different methods to prevent, delay, and conclude such conflicts, in order to have peace. Cross-listed with INT 365.

PAX 367
TRAUMA, ART & RESILIENCE
Undergraduate
The goal of recovery from trauma response engages the natural resilience of individuals through a multimodal healing process that often engages in arts activities, both individually or through community efforts. This course will study recent theories on the biological, psychological, and social-cultural components of how human respond to extreme difficulties, whether natural disaster or accidents, or an ongoing environment of oppression, marginalization, and poverty. It will then enlist students in some of the modalities for resilience training that have been proven highly effective in multiple settings.

PAX 368
LITERATURE OF WAR IN THE 20TH CENTURY
Undergraduate
For as long as there has been recorded history, there have been war...and literature of wars. Though a good deal of this literature has lauded the exploits and heroicism of individual warriors, much has also described the deprivations and destructiveness of war itself. The 20th century was one of the most violent epochs in world history and generated a rich literature of war, both starkly realistic and imaginatively symbolic. This course will examine the literature of war in the 20th century, beginning with the First World War, then touching on the Second World and Cold wars, as well as wars of repression and national liberation. We will explore memoirs, novels, short stories, poetry, and films of these conflicts to gain a deeper understanding of "the pity of war."

PAX 369
TOPICS IN NONVIOLENCE
Undergraduate
This advanced seminar will review historical, philosophical, and practical approaches to the use of nonviolence for addressing injustice and conflicts, including violent ones, as well as for enhancing life.

One 200-level PAX course is a prerequisite for this course.
PAX 381
TOPICS IN PEACE BUILDING
Undergraduate
An advanced course looking at the history, theory and implementation of a specific tool for peace building, from diplomacy (state or citizen), legislative & juridical interventions, inner peace practices, and the like.

One 200-level PAX course is a prerequisite for this course.

PAX 382
TOPICS IN SOCIAL JUSTICE AND SOCIAL CHANGE
Undergraduate
An advanced course that investigates one specific arena of social justice, such as environmental racism, gender injustice, religious bigotry, and the like, from a variety of disciplinary perspectives.

One 200-level PAX course is a prerequisite for this course.

PAX 383
TOPICS IN CONFLICT INTERVENTION
Undergraduate
An advanced course that studies one or more types of nonviolent interventions in conflict, including violent conflict and warfare; examples include community organizing, political interventions, educational campaigns, etc.

One 200-level PAX course is a prerequisite for this course.

PAX 384
TOPICS IN ACTIVISM AND ADVOCACY
Undergraduate
An advanced course that looks at the history, merits, values, and organizational possibilities for specific models of activism.

One 200-level PAX course is a prerequisite for this course.

PAX 385
TOPICS IN HUMAN RIGHTS
Undergraduate
Advanced topics on human rights, the competencies approach, institutionalized protection of rights, and the like.

One 200-level PAX course is a prerequisite for this course.

PAX 386
TOPICS IN GLOBAL JUSTICE
Undergraduate
The course will investigate the ways in which global agents, whether governments, NGOs, or corporations act and interact in order to address systemic global inequities and injustice.

PAX 387
TOPICS IN PEACE, JUSTICE AND RELIGION
Undergraduate
This course will investigate the interfaces between one or more religious traditions and the ways in which the questions of peace-building and social justice are handled and responded to with concrete action.

PAX 389
TOPICS IN COMMUNITY DEVELOPMENT, ADVOCACY, & ACTIVISM
Undergraduate
This course will use specific issues, groups, and actions to study how working for the just needs of communities occurs in a variety of ways and settings.

Two 200-level PAX courses are prerequisites for this course.
PAX 391
SPECIAL TOPICS IN POLITICS AND ENGAGEMENT
Undergraduate
Courses offered under this number will investigate topics dealing with how politics and political institutions, whether local, national, or global, interact with individuals and groups to engage in political action, social change, and organizing for the public good.

PAX 392
INTERNSHIP IN PEACE, JUSTICE, AND CONFLICT STUDIES
Undergraduate
The Internship in Peace, Justice and Conflict Studies exposes students to practical learning experiences in non-profit and government agencies through an intensive internship. Students work 100 hours with an organization arranged through Steans Center.

One 200-level PAX course is a prerequisite for this course.

PAX 398
SENIOR THESIS
Undergraduate
Students have the option of completing a senior thesis on a topic relevant to their major under supervision of a PJC faculty member.

One 300-level PAX course is a prerequisite for this class.

PAX 399
INDEPENDENT STUDY
Undergraduate
The content and evaluation methods for this course are negotiated by the student with an individual faculty member.

PE 60
AEROBIC CONDITIONING
Undergraduate
This course provides instruction and requires participation in the dynamics of exercises that train the cardio respiratory system. These exercises include but are not limited to low-impact aerobics, high impact aerobics, step-aerobics, use of cardio equipment, spin, slide, and circuit training. (2 credit hours)

PE 66
BEGINNING WEIGHT TRAINING
Undergraduate
This course introduces students to strength training principles and activities: free weights, resistance machines, and functional exercises. Emphasis is placed on the development of strength and flexibility of the major muscle groups. Health-related fitness guidelines are presented to assist the student in developing overall fitness. (2 credit hours)

PE 70
ADVANCED AEROBIC CONDITIONING
Undergraduate
Advanced instruction in appropriate conditioning techniques and daily participation in monitored strenuous levels of aerobic exercise. (2 credit hours)

PE 060 is a prerequisite for this class.

PE 71
FITNESS AND CONDITIONING
Undergraduate
(2 credits) The main components of health-related fitness: cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition are integrated into the fitness sessions, topic presentations, and health/fitness assessments. Emphasis is placed on improving overall wellness through exercise and healthy lifestyle choices. (2 credit hours)
PE 72
YOGA
Undergraduate
This course will introduce the philosophy, techniques, and benefits of Hatha Yoga to the beginning students and allow the experienced students to expand upon their knowledge. Participants will develop skills to deepen conscious awareness and focus through asana practice (physical practice of yoga), body alignment, breathing techniques, and relaxation. The emphasis of the class will be on how to properly practice yoga, how to incorporate it into daily life, and how to safely teach asana. Course modules will include physical practice, handouts, support materials, and a quiz. Students will be required to attend and participate in class. The development of an independent home practice of yoga outside of DePaul will be necessary for success in the course. (2 credit hours)

PE 76
ADVANCED WEIGHT TRAINING
Undergraduate
Advanced instruction and participation in the use of free weights and various machines for body building and weight training. (2 credit hours)

PE 066 is a prerequisite for this class.

PE 80
RAPE AGGRESSION DEFENSE SYSTEMS
Undergraduate
This 30-hour self-defense course is open to all female students and teaches awareness, prevention, risk reduction and avoidance techniques. In addition, students will learn the importance of physical fitness and perform exercises designed to improve their speed, physical strength and flexibility to aid them in self-defense. At the end of the course, students will be given the opportunity to test their knowledge and skills in various attack scenarios, under the supervision of at least one certified R.A.D. Basic Physical Defense instructor, in a safe and supportive environment. (2 credit hours)

PE 121
SWIMMING
Undergraduate
This course is designed to provide the student with skill instruction and analysis of the most widely used swimming strokes and basic dives. Principles of hydrodynamics and basic water safety will also be emphasized. Various individual skill levels will be considered to provide a safe and inclusive experience. Additionally, this course introduces the student to the concepts and procedures for teaching basic swimming in a school setting. (2 credit hours)

PE 151
GYMNASTICS
Undergraduate
This course introduces the student to the concepts and procedures for teaching basic gymnastics in a school setting. Emphasis will be given equally to skill acquisition, spotting techniques, explanation/demonstration of skills, and the theoretical framework that supports a gymnastics program. Students will be provided with the opportunity to acquire skills and spotting techniques for basic stunts, tumbling, balance, balance beam, parallel bars, vaulting, and rhythmic gymnastics. (2 credit hours)

PE 181
FLAG FOOTBALL
Undergraduate
Fundamental skills, group drills, strategy, and styles of offensive and defensive team play will be covered. Physical education majors will focus on teaching, officiating and assessment. (2 credit hours)

PE 182
VOLLEYBALL
Undergraduate
Offered alternate years. Fundamental skills, drills, strategy, team play, rules interpretation, and officiating will be covered. Physical education majors will focus on teaching, officiating and assessment. (2 credit hours)
PE 183
SOCCER
Undergraduate
Offered alternate years. Development of basic skills and progressive teaching stages: fundamental stage, game-related stage, game-condition stage, and functional training to include experience in soccer and other lead-up activities.

PE 185
SOFTBALL
Undergraduate
Offered alternate years. Fundamental skills, group skills, and styles of offensive and defensive team strategy will be covered. Physical education majors will focus on teaching, officiating and assessment. (2 credit hours)

PE 186
TRACK AND FIELD
Undergraduate
Offered alternate years. Track and field skills, rules, warm-up drills, and management of track and field meets will be covered. Physical education majors will focus on teaching, officiating and assessment. (2 credit hours)

PE 187
BASKETBALL
Undergraduate
This class introduces and reviews the fundamentals of basketball. It covers basic skills and knowledge of game play, court positions, rules, and drills carried out in practice situations. Physical education majors will focus on teaching, officiating and assessment. (2 credit hours)

PE 206
PERSONAL AND COMMUNITY HEALTH
Undergraduate
This course is designed to assist students in gaining insight into their health/wellness attitudes, behaviors, and choices. Health/wellness experiences and topics examine the total wellness concept, as a self-designed, dynamic style of living which focuses on optimal functioning and quality of life. Emphasis is placed on the physical, emotional, intellectual, social, occupational and spiritual dimensions of health/wellness.

PE 213
FOLK-SOCIAL DANCE
Undergraduate
Fundamentals, techniques, terms and teaching principles of line dance, square dance, ballroom, and swing dance will be covered. Students are introduced to basic style and basic choreography. (2 credit hours)

PE 273
HEALTH AND NUTRITION
Undergraduate
This course will provide students with an introductory background in nutrition throughout the life span. The study of foods and their effects upon health, development and performance of the individual will be emphasized. Software analysis of dietary intakes will facilitate an individual reflective approach to an application of the content.

PE 276
TENNIS
Undergraduate
Instruction and practice on basic patterns of movement of tennis skills. Knowledge of rules, etiquette, playing instructions and teaching methods for application of skills stressed. (2 credit hours)

PE 277
GOLF
Undergraduate
Basic patterns of movement for a controlled golf swing with woods and irons; chipping, pitching and putting skills. Golf course rules and playing instructions. Teaching methods for application of skills stressed. (2 credit hours)
PE 278
GOLF: FULL-SWING CLINIC
Undergraduate
This course will provide the student with advanced knowledge and practice of the full swing motion in golf. As a hybrid, it will allow the student to meet the professor and design the individual learning steps that will best meet the needs of each student. Course modules will include videotapes, handouts, support materials, and a quiz. Students will work through the modules independently to complete the course. Independent practice of the full swing outside of DePaul will be necessary for success in the course. Students must attend 4 1.5-hour classes per quarter. The first day and last day of class, as well as two additional 1.5-hour sessions arranged with the professor. (2 credit hours)

PE 302
FIRST AID: RESPONDING TO EMERGENCIES
Undergraduate
This course is designed to provide instruction, demonstration, and practice in application of basic emergency first aid skills. Students will learn to recognize the signs and symptoms of specific life threatening injuries and how to properly care for these injuries as citizen responders. Students will also have the opportunity to achieve Heartsaver CPR, AED, and First Aid Certification by the American Heart Association (2 credit hours)

PE 303
ATHLETIC INJURIES
Undergraduate
Principles and techniques of prevention, recognition, treatment, care including adhesive strapping and wrapping and rehabilitation of common athletic injuries. Attention given to role of coach-trainer for emergency field procedures

PE 304
THE SCHOOL HEALTH PROGRAM
Undergraduate
This course is designed to cover the scope of health services that could be provided through a comprehensive school health program. The school environment, community involvement, and legal/ethical considerations will be emphasized.

PE 311
MOTOR DEVELOPMENT THROUGHOUT THE LIFE SPAN
Undergraduate
Through lecture, film analysis, direct observation and instruction of children, and class discussion, students will gain a greater understanding of the maturational and environmental factors that affect human growth and motor development. Since this development is a process that continues throughout our life span, prenatal through adult characteristics will be examined.

PE 317
PHYSICAL EDUCATION AND CLASSROOM MANAGEMENT IN THE ELEMENTARY SCHOOL
Undergraduate
The course is designed to promote an understanding of the contribution that physical education makes to the elementary school curriculum and the development of the whole child. Lesson planning, instructional delivery, assessment of learning and classroom management will be focused as students engage in 15-20 hours of supervised field experience teaching whole classes of children in local schools. This course is for Physical Education majors only; however, EE majors will be considered if the course is needed for student teaching in the subsequent quarter.

A Physical Education major in Advanced Standing is a prerequisite for this class.
PE 325
LANGUAGE AND LITERACY IN THE PHYSICAL EDUCATION SETTING
Undergraduate
This survey course explores the roles of language and literacy in the physical education setting and the teacher's responsibility for fostering them in all students. Through guided examination of prevailing theories of language acquisition and development that currently influence classroom practices across the K-12 continuum as well as across disciplinary and content areas, this course enables future teachers of physical education to grow in their understanding of the varied literacy-learning contexts that students bring to their physical education experiences. Issues that emerge in planning and conducting literacy instruction in programs with diverse student demographics are discussed and deliberated through University classroom sessions as well as required field experiences (10 hours, minimum; Level I). Course participants enjoy multiple opportunities to apply and analyze theories; to observe, critique, and practice planning as well as instructional strategies; to make informed curricular and instructional decisions; and to use assessment in conjunction with knowledge of child development to inform their planning. This course is designed to assist future teachers in producing students who are strategic readers, skilled speakers and writers, effective communicators, active listeners, independent and critical thinkers/learners, and problem solvers. Such teachers will exhibit awareness of their own metacognitive processes, respect for diversity, necessary social skills, and an ability to develop, set, and strive for professional goals. Candidates enrolled in this course will be encouraged to become education advocates, positive role models for their students, effective colleagues and collaborators, and lifelong learners.

PE 341
HISTORICAL AND PHILOSOPHICAL FOUNDATIONS OF PHYSICAL EDUCATION
Undergraduate
This course will review the history of sport, fitness and physical education; the impact that events have had on their development; and how physical education, fitness and the use of sport is influenced by society. Emphasis will be placed on philosophical perspectives and ethical values of this profession, both for the educator and the sport & fitness management employee. Content is devoted to the study and understanding of sport and physical activity within numerous cultures throughout history to support diversity and help students consider the multiple perspectives expressed through the incorporation of sport and physical activity.

PE 346
ORGANIZATION/ADMINISTRATION OF PHYSICAL EDUCATION, SPORTS & FITNESS PROGRAMS
Undergraduate
Organization and Administration of Physical Education, Sports, and Fitness Programs. Emphasis is placed on understanding the management process: functions, application to various settings, program development, budget, facilities, marketing/promotion, and risk management.

Advanced Teacher Candidate Standing or status as an Exercise Science student is a prerequisite for this class.

PE 351
KINESIOLOGY
Undergraduate
Biomechanical analysis of the human body and how the human body moves. Scientific principals and their application to human movement are included. Application is made to fundamental and specialized motor skills. Development and maintenance of the human structure through intelligent selection of activities and efficient use. Lecture is supplemented with in class laboratory activities.

BIO 201 and BIO 202. Advanced Teacher Candidate Standing or students in BS-EXR-SCI plan, are prerequisites for this class.

PE 352
PHYSIOLOGY OF EXERCISE
Undergraduate
Effects of muscular activity on the systems of the body. Nature of neuro-muscular activity, circulatory and respiratory adjustments during exercise, metabolic and environmental aspects of exercise, fatigue and training fitness. Lecture is supplemented with in class laboratory activities.

BIO 201 and BIO 202. Advanced Teacher Candidate Standing or students in BS-EXR-SCI plan, are prerequisites for this class.

PE 360
EDUCATIONAL PSYCHOLOGY AND MEASUREMENT OF LEARNING
Undergraduate
This course presents those principles of educational psychology specifically related to the psychomotor learning domain, the selection of tests to measure learning of physical skills for all populations, administration of tests, data collection, and the statistical analysis needed to evaluate the learning process. Specifically, measures of central tendency, variability and correlation statistics; and standard tests of health and skill related components of fitness, motor performance, anthropometry, and specific sport analysis will be included in this course.

Advanced Teacher Candidate Standing or status as an Exercise Science student is a prerequisite for this class.
PE 362  
FITNESS TESTING, ASSESSMENT AND PRESCRIPTION  
Undergraduate  
This course is designed to provide theoretical knowledge of and select practical skills in fitness assessment, exercise program design, and client instruction in preparation for a national certification exam in personal training. Topics include guidelines for instructing safe, effective, and purposeful exercise, essentials of the client-trainer relationship, conducting health and fitness assessments, and designing and implementing appropriate exercise programming.

PE 372  
METHODS AND MATERIALS FOR PHYSICAL EDUC CURRICULUM/ INSTRUCTION-SECONDARY SCHL  
Undergraduate  
This course is designed to provide an understanding of physical education curriculum planning, teaching methods, classroom management, unit and lesson plans in a secondary school setting. Students will engage in 20-24 hours of field work to observe and participate in whole class instruction, in an attempt to integrate theoretical classroom content with on-site experiences.

Advanced Teacher Candidate Standing is a prerequisite for this class.

PE 374  
ADAPTED PHYSICAL EDUCATION  
Undergraduate  
Diversified program of development activities, games, sports and rhythms suited to the interests, capacities, and limitations of students with disabilities who may not be able to participate in the general physical education program.

BIO 201 and BIO 202, Advanced Teacher Candidate Standing or students in BS-EXR-SCI plan, are prerequisites for this class.

PE 378  
PHYSICAL EDUCATION STUDENT TEACHING IN ELEMENTARY EDUCATION  
Undergraduate  
Five school days a week of supervised teaching in a cooperating elementary school for half an academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. Application and approval required. Open to only DePaul students. (6 credit hours)

PE 379  
PHYSICAL EDUCATION STUDENT TEACHING IN SECONDARY EDUCATION  
Undergraduate  
Five school days a week of supervised teaching in a cooperating secondary school for half an academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. Application and approval required. Open only to DePaul students. (6 hours)

PE 380  
INTERNSHIP IN EXERCISE SCIENCE  
Undergraduate  
Four hundred hours of supervised training in a health, fitness, sport, or exercise setting will be completed through this course. Students will receive practical experience in fitness testing, individual and group training, class instruction, program planning, and other facets of exercise science programming. Students will complete a project that will relate their educational background to the practical setting they have chosen to work in, and present their work to the internship site. Special interests of students will be addressed based on the internship site. Open only to students who have applied and been accepted by the exercise science program advisor and must have completed all coursework and clinical hours for the exercise science degree). (12 credit hours)

PE 384  
PHYSICAL EDUCATION CAPSTONE  
Undergraduate  
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective physical education teachers with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to early childhood education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program.
PE 387
CAPSTONE SEMINAR IN PHYSICAL EDUCATION & EXERCISE SCIENCE
Undergraduate
This course is designed to help candidates integrate the central emphases of their Liberal Studies curriculum with their professional knowledge and behavior. It provides opportunities and activities to prospective professionals that engage them in being analytic and reflective upon their major and related disciplines; guide them in further considering their value commitments and how they relate to their chosen profession; apply critical and creative thinking in addressing ‘real-time’ professional issues and needs; and examine extant practices from multicultural perspectives. Candidates develop a professional portfolio that reflects the standards of the various guiding professional organizations and/or the Illinois State Board of Education (ISBE). The course is grounded in the College of Education’s framework for an Urban Professional Multicultural Educator as well as the goals of the Liberal Studies program. The course is taken simultaneously with student teaching or internship.  COREQUISITE(S): PE 378 and PE 379, or PE 380. (2 credit hours)

PE 390
PSYCHO-SOCIAL ASPECTS OF EXERCISE AND SPORT
Undergraduate
Psycho-Social Aspects of Exercise and Sport. Principles of human behavior, psychology, sociology, and motivational theory are covered as they relate to exercise fitness and sport. Students are introduced to personality factors, leadership skills, psychological skills training, and group dynamics which play important roles in the psychological development of individuals involved in exercise and sport programs.

Advanced Teacher Candidate Standing or status as an Exercise Science student is a prerequisite for this class.

PE 391
THEORY AND TECHNIQUES OF COACHING
Undergraduate
This course is designed to introduce areas from which basic coaching theories and techniques of various sports can be developed, to expose students to situations which place the coach in a decision making position and encourage students to examine practical problems which will influence the quality of an athletic program.

PE 392
ADVANCED ATHLETIC TRAINING TECHNIQUES
Undergraduate
This is an advanced course dealing with the principles and techniques of prevention, recognition, and treatment of athletic injuries.

PE 303 is a prerequisite for this class.

PE 393
THERAPEUTIC EXERCISE
Undergraduate
This course introduces students to the application and theory of specific exercise guidelines and program design for individuals with chronic illnesses, orthopedic conditions, and major athletic injuries. Special populations will also be addressed such as children, pregnant women, the elderly, blind, and deaf individuals. Emphasis is placed on planning and teaching techniques based on the basic FITT principle, and modifying programs to meet the needs of the specific individual. Students will learn specific modifications for all domains of exercise: cardiorespiratory, muscular strength and endurance, flexibility, and balance, with the focus on rehabilitation and health promotion.

Advanced Teacher Candidate Standing or status as an Exercise Science student is a prerequisite for this class.

PE 394
SPORT AND EXERCISE NUTRITION
Undergraduate
This course will provide the student with advanced knowledge of all areas of nutrition as they relate to the different types of exercise and sports. Prior basic nutritional knowledge is required for successful completion of this course. Topics will include but not limited to substrate utilization during different types of metabolic processes, hyper-hydration and nutrient loading prior to activity, nutrient maintenance during various types of exercise, recovery nutrition, nutrition planning for weight management, sport specific nutrition and consumer issues related to sport supplementation.

PE 273 is a prerequisite for this class.
PE 399
INDEPENDENT STUDY IN PHYSICAL EDUCATION
Undergraduate
Permission of Department Chair and Associate Dean are required. (1 credit hour)

PE 400
INTRODUCTION TO THE SPORT, FITNESS AND RECREATION LEADERSHIP PROGRAM
Graduate
This course will provide an overall introduction to the Sport, Fitness and Recreation Leadership online graduate program (MSFRL). Coursework, pillars of knowledge, expectations, potential employment, and management concepts in sport, fitness, and recreational will be covered. Acceptance into the MSFRL program is a prerequisite for this course.

PE 410
ORGANIZATIONAL LEADERSHIP AND MANAGEMENT IN SPORT, FITNESS AND RECREATION
Graduate
This course will examine concepts in administration and communication specific to supervisory relationships. Students will understand the function and application of administrative theory within the fields of sport and fitness.

PE 420
FACILITY AND RISK MANAGEMENT IN SPORT, FITNESS AND RECREATION
Graduate
Students will be introduced to the planning, designing and management of sport, recreation, and fitness facilities. Students will identify strengths and weaknesses of major facilities and will design their own facility upon completion of this course.

PE 430
ADVANCED HEALTH AND SCIENCE CONCEPTS IN SPORT, FITNESS AND RECREATION
Graduate
This course will present advanced concepts in health for the individual interested in Health Education or the Allied Health Professions. The content will include health principles related to individual athletes throughout the life span, wellness concepts, and strategies for coping with potentially dangerous behaviors. The students will reflect on how to incorporate knowledge of health into their physical education and health classes in schools or community settings.

PE 435
ADVANCED CARE OF THE ATHLETE
Graduate
This course is designed to expand the student's knowledge of athletic injuries, incorporating hands-on experience. Topics will include current issues in anatomy and physiology; athletic first aid and emergency situations; standard procedure for diagnosis and treatment; conditioning, pre-habilitation and rehabilitation; heat stress injuries; nutrition and eating disorders; taping, wrapping and bracing; and other related topics in sports medicine.

PE 440
STRATEGIC COMMUNICATION AND MARKETING IN SPORT, FITNESS AND RECREATION
Graduate
Students will examine communications tools such as advertising, sales, and publicity, social media, media relations and public relations to examine how they are vital to an organization's marketing plan. Students will create a marketing plan specific to a chosen area of study. This course also will focus on leadership and communication skills vital in building professional relationships. Relationships between sport and fitness organizations and consumers will be examined.

PE 442
ON-CAMPUS SEMINAR
Graduate
This course will provide 1st year students with the opportunity to network with their peers and professionals in the field. They will also attend presentations by local professionals in sport, fitness, and recreational fields, as well as presentations of 2nd year students' research projects. (2 credit hours)
This course also will introduce students to planning, operating, funding, and evaluating events within their chosen area of sport or fitness. Principles of hospitality and public relations also will be studied. Students will plan a hypothetical event upon the completion of this course.

A study of the philosophical and psychological concepts pertaining to sports, in general, and competitive athletic programs specifically. Students will analyze the various coaching and administrative techniques in sports programs. Emphasis will be given to intercollegiate sports. Elementary, secondary and professional sports programs will be examined and discussed. Motivation to exercise socially, recreationally, and in sport will be examined.

A study of the advanced concepts and theory pertaining to analysis of human movement. Application will be made for the teaching of fundamental motor skills as well as the specialized analysis made by the coach. Discussion of the various techniques, sophisticated equipment, and empirical evidence will support the conclusions determined in the seminar. The course will be designed for professional physical educators and individuals involved in the coaching profession.

This course is designed to cover a review of basic coaching theories and techniques of various sports and then cover advanced theories and application of these theories. The goal of the course is to expose students to situations that will place the coach in a decision making position and encourage students to examine practical problems that will influence the quality of an athletic program. (Cross-listed with PE 391)

This course will examine current issues and challenges related to the sport, fitness and recreation environments. The examination will focus on ethical behavior and decision making and ultimately to improve risk management in these area. Major consideration will be given to issues relating to development of goals and objectives, preparation of program budgets, financial considerations, media input, and legal ramifications of the various programs.

This course will develop a student's ability to apply legal principles to sport and fitness management situations. Students will examine legal liability of coaches, administrators and fitness professionals, negligence, constitutional and administrative law, product liability, and risk management. There also will be an analysis and study of the governing structure, rules, and legislative processes within the NCAA.

Students will understand basic concepts of financial management and managerial economics relevant to recreation and sport settings, emphasizing financial analysis, short- and long-term financing, fundraising, sponsorship, financial troubleshooting, capital structuring and budgeting, fundraising, revenue and cost-control.

This course will provide 2nd year students with the opportunity to network with their peers and professionals in the field of sport, fitness, and recreation. They will also attend presentations by local professionals, as well as present their final research projects. (2 credit hours)
PE 500  
CAPSTONE IN SPORT, FITNESS AND RECREATION LEADERSHIP  
Graduate  
The capstone experience will support the student during their last quarter in the program while completing program research and preparation for seminar presentation. (2 credit hours)

PE 555  
RESEARCH IN SPORT, FITNESS AND RECREATION  
Graduate  
Under the guidance of an advisor, students will complete a culminating research project for completion of the degree.

PHL 100  
INTRODUCTION TO PHILOSOPHY  
Undergraduate  
An introduction to basic philosophical concepts, methods, and problems.

PHL 200  
ETHICAL THEORIES  
Undergraduate  
Selected readings to acquaint students with different approaches to ethics.

PHL 202  
PHILOSOPHY OF GOD  
Undergraduate  
An investigation of the ways in which philosophers have talked about, and argued for or against, God.

PHL 204  
PHILOSOPHY AND EXISTENTIAL THEMES  
Undergraduate  
A study of the principal ideas regarding the human condition developed in existential literature: death, absurdity, alienation, freedom, God, authenticity.

PHL 206  
TOPICS AND CONTROVERSIES  
Undergraduate  
A study of selected topics and controversies.

PHL 208  
VALUES AND PERSONS  
Undergraduate  
A study of the connections between different conceptions of selfhood and different ethical, political and aesthetic values.

PHL 228  
NEUROETHICS  
Undergraduate  
This course examines moral standards and issues as these arise in the practice of neuroscience. Advances in this field have developed unprecedented ways of understanding, predicting, and even, influencing and controlling the human mind and, through this, human behavior. Neuroethics considers the ethical dilemmas that emerge in such research and the technologies that it fosters as well as the challenges these advances pose to some of the fundamental underlying concepts of moral theory: human nature, personal identity, and moral responsibility itself.Cross-listed with NEU 228.
PHL 229  
**BIOMEDICAL ETHICS**  
Undergraduate  
Moral and ethical issues arising in contemporary biomedical advances and in health care from the perspective of Philosophy.

PHL 230  
**CONTEMPORARY TOPICS IN ETHICS**  
Undergraduate  
This course will examine a range of ethical issues of contemporary concern, such as abortion, euthanasia, and capital punishment.

PHL 231  
**PHILOSOPHY AND THE QUESTION OF RACE**  
Undergraduate  
A philosophical inquiry into such issues as racism, anti-Semitism, genocide.

PHL 232  
**WHAT IS FREEDOM?**  
Undergraduate  
This course will investigate various conceptions of freedom, and will consider in particular the difference between freedom and "doing or saying whatever you wish."

PHL 233  
**ISSUES IN SEX AND GENDER**  
Undergraduate  
A philosophical investigation into the nature of sex and gender and the role they play in defining human identity.

PHL 234  
**PHILOSOPHY AND MODERN SOCIETY**  
Undergraduate  
This course will consider such issues as the relation between society and the state, the connections between work, leisure and poverty, and the social effects of prejudice and resentment.

PHL 235  
**PHILOSOPHY AND THE ENVIRONMENT**  
Undergraduate  
A philosophical study of our environment, the nature of nature, the ecosystem, and the planet.

PHL 236  
**PHILOSOPHY AND THE CITY**  
Undergraduate  
This course examines the meaning of the city for philosophy and the meaning of urbanization for the formation of values.

PHL 237  
**PHILOSOPHY, CONFLICT AND PEACE**  
Undergraduate  
A philosophical reflection upon the causes of war and the possibilities for peace.

PHL 238  
**PHILOSOPHY AND WOMEN**  
Undergraduate  
An examination of the unique contribution which women have made, and can make, to philosophy and the study of values.
PHL 239
PHILOSOPHIES OF AFRICA
Undergraduate
Philosophies Of Africa

PHL 240
LOVE, HATRED AND RESENTMENT
Undergraduate
A phenomenological inquiry into these three powerful emotional states.

PHL 241
ETHICS AND PUBLIC POLICY
Undergraduate
A study of the ways in which ethics can assist us in thinking about matters of public policy.

PHL 242
PHILOSOPHY AND TECHNOLOGY
Undergraduate
Philosophy And Technology

PHL 243
PHILOSOPHY AND FILM
Undergraduate
A study of philosophical themes that arise in films.

PHL 244
PHILOSOPHICAL THEOLOGY
Undergraduate
An introduction to the interactions of philosophy and Christian theology.

PHL 245
REASON AND SOCIETY
Undergraduate
A study not aimed at the production of particular skills but at understanding of the proper role of reason in social institutions and the formation of public opinion.

PHL 246
SURVEY OF BLACK AESTHETIC THOUGHT
Undergraduate
This course examines the history of the aesthetic thought that has emerged from the minds of Black creative intellectuals in the United States and globally. Cross-listed with ABD 234.

PHL 247
PHILOSOPHY AND THE VALUE OF MUSIC
Undergraduate
In this course, we will explore the philosophical dimensions of music, in particular, the value of music, both as a tool in the development of character and as a tool of social and political change. The examination of the value of music will involve us in an examination of music as an idea and of how we come to an understanding of the meaning of music.

PHL 248
BUSINESS ETHICS
Undergraduate
An examination of various ethical and moral issues arising in contemporary business and its activities which affect our society and the world. Cross-listed with MGT 248.
PHL 250
PHILOSOPHY AND SOCIAL CHANGE
Undergraduate
Junior Year Experiential Learning

PHL 263
PHILOSOPHY AND WOMEN OF COLOR
Undergraduate
An examination of the philosophical work of women of color, from a variety of ethnic, national, and global contexts.

PHL 264
PHILOSOPHY AND POSTCOLONIALITY
Undergraduate
An investigation of the central issues in the work that protests the colonial conditions in the United States and globally.

PHL 280
CRITICAL THINKING
Undergraduate
A study of argumentation as it occurs in everyday life, the media, etc.

PHL 281
BASIC LOGIC
Undergraduate
A study of fundamental logical concepts and techniques, methods of argument, and ways of detecting fallacies.

PHL 282
SYMBOLIC LOGIC I
Undergraduate
Symbolic Logic

PHL 283
SYMBOLIC LOGIC II
Undergraduate
A study of the methods and techniques of formulating and evaluating arguments with the help of symbolic notation.

PHL 282 is a prerequisite for this course.

PHL 287
INTRODUCTION TO ASIAN PHILOSOPHIES
Undergraduate
An introduction to Asian Philosophy, examining some of the central philosophical issues and movements in Asian thought, such as Hinduism, Buddhism, Confucianism, and Daoism.

PHL 290
PHILOSOPHIES OF GENDER
Undergraduate
A philosophical investigation into the concepts of sex and gender as categories of identity and their relation to philosophical knowledge.

PHL 100 or HON 105 is a prerequisite for this course.
PHL 291
MORAL PHILOSOPHY
Undergraduate
A philosophical investigation of ethical issues and theories.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 293
ANCIENT PHILOSOPHY
Undergraduate
A study of selected thinkers and issues from ancient Greece.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 294
MEDIEVAL PHILOSOPHY
Undergraduate
A study of selected thinkers and issues from the Medieval period. Cross-listed with CTH 239.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 295
EARLY MODERN PHILOSOPHY
Undergraduate
A study of some of the main philosophers and philosophical movements from the 17th and 18th centuries.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 296
KANT & 19TH CENTURY PHILOSOPHY
Undergraduate
A study of Kant and some of the most influential thinkers of the 19th century. Formerly PHL 313.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 297
20TH CENTURY PHILOSOPHY
Undergraduate
A study of selected thinkers and issues from the 20th century.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 314
SURVEY OF ETHICS
Undergraduate
An intensive study of the broad range of the history of and approaches to ethics.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 315
SURVEY OF POLITICAL PHILOSOPHY
Undergraduate
An intensive study of the broad range of the history of and approaches to political philosophy.

PHL 100 or HON 105 is a prerequisite for this course.
PHL 320
METAPHYSICS
Undergraduate
A critical examination of selected metaphysical systems and issues.
PHL 100 or HON 105 is a prerequisite for this course.

PHL 321
EPISTEMOLOGY
Undergraduate
An investigation of some of the central issues in the philosophy of knowledge, including the nature of knowledge, truth and certainty.
PHL 100 or HON 105 is a prerequisite for this course.

PHL 322
PHILOSOPHY OF LANGUAGE
Undergraduate
An investigation into the nature of language and its significance for philosophical inquiry.
PHL 100 or HON 105 is a prerequisite for this course.

PHL 325
BASIC CONCEPTS OF PHENOMENOLOGY
Undergraduate
This course emphasizes the principal themes of such thinkers as Husserl, Merleau-Ponty and Heidegger.
PHL 100 or HON 105 is a prerequisite for this course.

PHL 327
TOPICS IN ETHICS
Undergraduate
A focused discussion of specific issues in moral and ethical philosophy.
PHL 100 or HON 105 is a prerequisite for this course.

PHL 328
TOPICS IN ECONOMIC, SOCIAL AND POLITICAL PHILOSOPHY
Undergraduate
A focused discussion of specific issues in economic, social and political philosophy.
PHL 100 or HON 105 is a prerequisite for this course.

PHL 330
JUNIOR HONORS OPTION
Undergraduate
Junior Honors Option

PHL 339
BIOETHICS IN SOCIETY CAPSTONE SEMINAR
Undergraduate
This seminar is an interdisciplinary study of the function of bioethics in society. As a discipline and as a profession, bioethics stands as a distinctive barometer of our evolving and shifting conceptions not only of health and well-being, but of the world, society, and even ourselves. The seminar explores the history of bioethics, bioethics as a clinical practice, and the various questions that arise at this crossroad from health science, medical humanities, religious studies, sociological, and philosophical perspectives. Cross-listed with REL 339 and SOC 339.
PHL 229 or HLTH 229 or REL 229 is a prerequisite for this class.
PHL 340
PHILOSOPHY OF RELIGION
Undergraduate
A study into the significance of religious phenomena for philosophy.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 341
AESTHETICS
Undergraduate
A study of the relationship of philosophy and the arts, with a critical appraisal of theories of beauty.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 342
PHILOSOPHY OF LAW
Undergraduate
An examination of fundamental legal concepts, and particularly of the concept of law itself.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 343
PHILOSOPHIES OF PUNISHMENT
Undergraduate
An examination of theories of punishment, particularly the two dominant western concepts of retributive and rehabilitative.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 350
PHILOSOPHY AND THE NATURAL SCIENCES
Undergraduate
Philosophy And The Natural Sciences

PHL 353
PHILOSOPHY AND HISTORY
Undergraduate
A study of some of the most significant theories of history.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 354
PHILOSOPHY AND PSYCHOLOGY
Undergraduate
A philosophical inquiry into the nature and history of psychology, psychoanalysis, and psychotherapy.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 355
THEORIES OF INTERPRETATION
Undergraduate
Philosophical hermeneutics and Biblical interpretation. Cross-listed with CTH 336.

PHL 100 or HON 105 is a prerequisite for this course.
PHL 356
TOPICS IN POSTMODERNISM
Undergraduate
A philosophical study of selected themes concerning the condition of, and works about, postmodernity.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 357
TOPICS IN PSYCHOANALYSIS
Undergraduate
Selected philosophical issues in psychoanalysis, for example, from early writers like Janet through contemporary theorists such as Irigaray.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 360
GREEK PHILOSOPHY
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 361
PLATO
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 362
ARISTOTLE
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 363
MEDIEVAL AND RENAISSANCE PHILOSOPHY
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 364
17TH AND 18TH CENTURY RATIONALISM
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 365
17TH AND 18TH CENTURY EMPIRICISM
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 366
DESCARTES
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 367
THE ENLIGHTENMENT
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.
PHL 368
GERMAN IDEALISM
Undergraduate
German Idealism

PHL 369
KANT
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 370
HEGEL
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 371
19TH CENTURY PHILOSOPHY
Undergraduate
19th Century Philosophy

PHL 372
MARX
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 373
NIETZSCHE
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 375
PHENOMENOLOGY AND EXISTENTIALISM
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 376
AMERICAN PHILOSOPHY
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 377
PHILOSOPHY AND DECONSTRUCTION
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.

PHL 378
ANALYTIC PHILOSOPHY
Undergraduate
PHL 100 or HON 105 is a prerequisite for this course.
PHL 379  
EASTERN THOUGHT  
Undergraduate  
Eastern Thought

PHL 380  
SELECTED FIGURES AND TEXTS  
Undergraduate  
PHL 100 or HON 105 is a prerequisite for this course.

PHL 381  
DRAMATIC THEORY: TRAGEDY  
Undergraduate  
A study of some of the main philosophical theories of tragedy together with readings of some of the most important ancient and modern tragedies. Cross-listed with THE 224.

PHL 100 or HON 105 or THE 206 is a prerequisite for this class.

PHL 382  
DRAMATIC THEORY: COMEDY  
Undergraduate  
A study of some of the main philosophical theories of comedy together with readings of some of the most important ancient and modern comedies. Cross-listed with THE 225.

PHL 100 or HON 105 or THE 206 is a prerequisite for this class.

PHL 383  
PHILOSOPHICAL THEMES IN LITERATURE  
Undergraduate  
An investigation of philosophical topics as they appear in fiction, drama, and poetry.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 386  
PHILOSOPHIES OF AFRICA  
Undergraduate  
A study of patterns of philosophical thinking from the African continent.

PHL 100 or HON 105 is a prerequisite for this course.

PHL 387  
TOPICS IN ASIAN PHILOSOPHY  
Undergraduate  
Focuses on a particular issue, figure, or period in Asian philosophy. Topics will vary according to instructor.

PHL 388  
TOPICS IN COMPARATIVE PHILOSOPHY  
Undergraduate  
Draws on philosophies from different cultures to explore philosophical issues from a comparative perspective. Topics and areas will vary according to instructor.
What does it mean to speak of Latin American philosophy? What is the difference between merely doing philosophy in Latin America and doing Latin American philosophy? These are issues that some thinkers in Latin America grapple with. This course will explore the history and nature of Latin American philosophy. Moreover, we shall examine some of the reasons why, in sharp contrast to the European and Anglo-American philosophical traditions, questions of the very existence of an autochthonous Latin American philosophical tradition are heatedly debated both in Latin America and beyond.

Selected topics and controversies.

A capstone seminar on selected topics in philosophy, that integrates the goals of the liberal studies program.

Selected issues or approaches within feminist work, such as feminist metaphysics, feminist peace theory, particular feminist figures, and the like.

PHL 100 or HON 105 is a prerequisite for this course.

A study of the intersection of issues from critical race theory and feminist/gender studies.

PHL 100 or HON 105 is a prerequisite for this course.

Selected philosophical issues in postcolonial writings, such as notions of identity and place, key figures, representation and film, and the like.

PHL 100 or HON 105 is a prerequisite for this course.

An opportunity for intensive independent work, open to philosophy majors of outstanding achievement. By petition only. Contact the department office for further information. Philosophy 395 is not applicable to major field requirements, though it may be used as an open elective. Permission required.

An investigation into various philosophies as they originated in India, for instance, Hinduism substance metaphysics, Buddhist process metaphysics, Charvakan materialism.

PHL 100 or HON 105 is a prerequisite for this course.
PHL 398
TRAVEL/ STUDY
Undergraduate
By arrangement with sponsoring faculty, foreign and domestic travel or residence programs may be combined with lectures, readings, and research assignments. Variable credit.

PHL 399
INDEPENDENT STUDY
Undergraduate
Independent Study

PHL 400
SPECIAL TOPICS IN TRADITIONAL PHILOSOPHERS
Graduate
Special Topics In Traditional Philosophers

PHL 410
PLATO I
Graduate
A study of Plato's life and early dialogues.

PHL 411
PLATO II
Graduate
A study of the middle and later dialogues.

PHL 415
ARISTOTLE I
Graduate
A study of Aristotle's life and selected topics of his theoretical philosophy: organon, physics, psychology, and metaphysics.

PHL 416
ARISTOTLE II
Graduate
A study of aspects of Aristotle's practical and productive philosophy: ethics, politics, rhetoric, and poetics.

PHL 420
AUGUSTINE
Graduate
A study of Augustine's philosophy through an examination of some of his major writings.

PHL 425
AQUINAS
Graduate
A study of his philosophy, especially its relations to theology, through an examination of selected major works.

PHL 434
HOBBES
Graduate
An examination of Hobbes' role as the father of modern political philosophy: a study of the Leviathan and the Elements of Law.
PHL 435
DESCARTES
Graduate
An examination of Descartes' role as the father of modern philosophy; issues of the Regulae, the Discours, and the Meditations.

PHL 437
LOCKE
Graduate
A study of the major theoretical works.

PHL 438
LEIBNIZ
Graduate
A study of the major philosophical works.

PHL 440
SPINOZA
Graduate
A study of the Ethics and/or the Theologico-Political Treatise.

PHL 441
ROUSSEAU
Graduate
A study of the major theoretical works.

PHL 443
MEDICAL LEGAL ETHICS
Graduate
An examination of contemporary problems in the area of medical legal ethics.

PHL 445
HUME
Graduate
An examination of Hume's place in classical British empiricism; a study of A Treatise of Human Nature.

PHL 470
PHILOSOPHY OF WITTGENSTEIN
Graduate

PHL 500
SPECIAL TOPICS IN THE HISTORY OF PHILOSOPHY
Graduate
None

PHL 510
KANT I
Graduate
An introduction to the critical philosophy of Kant by concentrating on the Critique of Pure Reason.

PHL 511
KANT II
Graduate
A study of the Critique of Practical Reason or the Critique of Judgment.
PHL 512
KANT III
Graduate
Kant III: Kant's Political Writings

PHL 515
HEGEL I
Graduate
An Introduction to Hegel: The Phenomenology of Spirit.

PHL 516
HEGEL II
Graduate
Readings in the Science of Logic or the Philosophy of Right.

PHL 517
HOLDERLIN
Graduate
An examination of the major theoretical writings, ca. 1797-1804.

PHL 518
SCHELLING
Graduate
An examination of the treatise on human freedom (1809).

PHL 520
MARX I
Graduate
An introduction to Marx through a study of selected topics and works.

PHL 521
MARX II
Graduate
A study of selected topics and works from both Marx/Engels and their disciples.

PHL 522
SOCIAL AND POLITICAL PHILOSOPHY
Graduate
None

PHL 525
NIETZSCHE
Graduate
An introduction to the philosophy of Nietzsche through Beyond Good and Evil, Thus Spake Zarathustra and selected topics and works.

PHL 527
PHILOSOPHY, ETHICS, AND ECONOMICS
Graduate
An examination of classical and contemporary theories from Smith and Marx to Friedman, Held and others.
PHL 535
HUSSERL I
Graduate
An introduction to Husserl through a study of selected topics and works.

PHL 536
HUSSERL II
Graduate
Selected topics and works.

PHL 550
HEIDEGGER I
Graduate
An introduction to Heidegger through study of a major work and one of the Marburg lectures.

PHL 551
HEIDEGGER II
Graduate
Selected topics and questions.

PHL 552
HEIDEGGER III
Graduate
Heidegger III

PHL 557
TOPICS IN CONTINENTAL PHILOSOPHY
Graduate
None

PHL 559
FOUCAULT
Graduate
An introduction to Foucault through a study of selected topics and works.

PHL 560
THE PHILOSOPHY OF GABRIEL MARCEL
Graduate
The Philosophy Of Gabriel Marcel

PHL 561
LYOTARD
Graduate
An introduction to Lyotard through a study of selected topics and works.

PHL 565
MERLEAU-PONTY I
Graduate
A study of The Phenomenology of Perception with consideration given to Merleau-Ponty's place in contemporary philosophy.
PHL 566  
MERLEAU-PONTY II  
Graduate  
A study of the themes of his social philosophy and final ontology.

PHL 570  
SARTRE I  
Graduate  
A study of Being and Nothingness with attention given to Sartre's early phenomenological studies as background and to some of his literary works and criticism, such as Nausea and Saint-Genet.

PHL 571  
SARTRE II  
Graduate  
The social thought of Jean-Paul Sartre. A study of A Critique of Dialectic Reason along with appropriate literary works and more recent political writings.

PHL 577  
DERRIDA I  
Graduate  
An introduction to Derrida through a study of selected topics and works.

PHL 578  
DERRIDA II  
Graduate  
Selected topics and questions.

PHL 585  
RICOEUR  
Graduate  
A study of Ricoeur's philosophy and phenomenology of the will with stress on its background and its place in contemporary French phenomenology.

PHL 586  
METAPHOR AND POETIC LANGUAGE  
Graduate  
An examination of Ricoeur's work in poetics.

PHL 587  
READING LEVINAS I  
Graduate  
Reading Levinas I

PHL 588  
READING LEVINAS II  
Graduate  
Reading Levinas II

PHL 589  
PHILOSOPHY, LITERATURE, COMMUNITY  
Graduate  
Discussion of such thinkers as Bataille, Derrida, Jabes, and Nancy.
A look at the increasing importance of structuralism, deconstruction, philosophy of language, and hermeneutics in contemporary French thought.

Critical Race Theory.

A seminar in business ethics that centers on theoretical, practical, and pedagogical issues.

A comparative discussion of the ethical theories of Scheler, Hartmann, Brentano, Levinas, etc.

A seminar in business ethics that centers on theoretical, practical, and pedagogical issues.

A study of selected writings of key social and political thinkers.

Topics In Social And Political Thought
PHL 660  
SEMINAR IN FEMINIST ETHICS  
Graduate  
Examination of the care perspective as compared to the justice perspective on moral development. Cross-listed as MLS 477 and WMS 410.

PHL 661  
TOPICS IN FEMINIST THEORY  
Graduate  
Includes such themes as feminist ontologies, theories of discourse and writing, science and technology, etc.

PHL 697  
GRADUATE TEACHING PRACTICUM  
Graduate  
Examination of teaching method concepts.

PHL 698  
MASTER’S THESIS RESEARCH  
Graduate  

PHL 699  
DISSERTATION RESEARCH  
Graduate  

PHL 700  
INDEPENDENT STUDY  
Graduate  
None

PHL 701  
CANDIDACY CONTINUATION  
Graduate  
Students admitted to candidacy who have completed all Ph.D. course requirements and who are actively working on their dissertations during the quarter are to register by permission of the graduate director. Students are required to be registered for either PHL 701: Candidacy Continuation or PHL 799: Candidacy Maintenance each quarter of the academic year until the dissertation has been defended and the degree completed. The latter course, PHL 799, is to be used during quarters when the student is not actively doing dissertation work.

PHL 799  
CANDIDACY MAINTENANCE  
Graduate  
Ph.D. Candidates who are not actively working on their dissertations during a given quarter but who want to maintain active university status can register for this course by permission of the graduate director. Please note that this course does not maintain student status for purposes of student loans.

PHY 104  
THE SUN & ITS PLANETS  
Undergraduate  
This course focuses on the development of our knowledge about the Solar System with an emphasis on the origin, structure and motion of the planets and the Sun. Topics include both historical astronomy and our current understanding based on information from spacecraft sent to other planets. Cannot receive credit for both PHY 104 and PHY 114.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.
PHY 110
BASIC ELECTRONICS: PRINCIPLES & TECHNIQUES
Undergraduate
Introduction to analog electronics that develops the basic principles needed to understand consumer electronics. Emphasis is given to audio applications, but the same basic principles are the foundation of modern computer technology.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 114
EXPLORING OTHER WORLDS
Undergraduate
Activity-based course that compares the local environment of Earth in the Solar System to worlds and environments elsewhere in the Universe. Cannot receive credit for both PHY 104 and PHY 114.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 120
HOW THINGS WORK
Undergraduate
This course will develop an understanding of the physics of everyday objects and experiences such as bouncing balls, roller coasters, balloons, thermostats, violins, microwave ovens and sunglasses. The relevant physics concepts will be introduced through demonstrations and simple experiments.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 150
GENERAL PHYSICS I
Undergraduate
This course provides a comprehensive, non-calculus introduction to physics. Vectors, forces, Newtonian mechanics of translational and rotational motion. This course is intended for life science and health science majors.

MAT 131 or above is a prerequisite for this class.

PHY 151
GENERAL PHYSICS II
Undergraduate
Continuation of PHY 150. Topics include heat, thermodynamics, sound and light.

PHY 150 or PHY 170 is a prerequisite for this class.

PHY 152
GENERAL PHYSICS III
Undergraduate
Continuation of PHY 151. Topics include electricity, magnetism and modern physics.

PHY 151 or PHY 172 is a prerequisite for this class.

PHY 155
GENERAL PHYSICS
Undergraduate
A combination of Physics 150 plus half of 151. Summer only. (6 quarter hours)

MAT 131 or above is a prerequisite for this class.
PHY 156
GENERAL PHYSICS
Undergraduate
A combination of the last half of Physics 151 plus 152. Summer only. (6 quarter hours)

PHY 155, PHY 151, or PHY 171 is a prerequisite for this course.

PHY 170
UNIVERSITY PHYSICS I
Undergraduate
This course provides a comprehensive, calculus-based introduction to Newtonian mechanics. Topics include vectors, Newton's laws, linear and rotational motion. Course intended for majors in a physical science, required for the physics major. Autumn. COREQUISITE(S): MAT 147 or MAT 160 or MAT 170.

MAT 147 or MAT 150 or MAT 160 or MAT 170 is a corequisite for this class.

PHY 171
UNIVERSITY PHYSICS II
Undergraduate
A continuation of PHY 170. Topics include heat, sound and light. Winter. COREQUISITE(S): MAT 161 or 171 or 148.

PHY 170 is a prerequisite for this course.

PHY 172
UNIVERSITY PHYSICS III
Undergraduate
A continuation of PHY 171. Topics include electricity and magnetism. Spring. COREQUISITE(S): MAT 162 or 172 or 149.

PHY 171 is a prerequisite for this course.

PHY 190
MATLAB PROGRAMMING FOR SCIENTISTS AND MATHEMATICIANS
Undergraduate
Introduction to the Matlab Programming environment with an emphasis on applications of interest to science and mathematics students. Topics include basic operations, functions and scripts, arguments and scope, and graphics. Applications include curve fitting, visualization of data, root finding, and solving systems of equations. (2 quarter hours)

PHY 200
LIGHT AND ATOMS
Undergraduate
A conceptual treatment of light and matter, which emphasizes the counter-intuitive behavior of atoms, electrons and photons. Topics covered include the electrical nature of matter, wave-particle duality, the uncertainty principle, and philosophical implications. Some applications to technology will also be discussed such as lasers, fiber optic communication, superconductivity, and magnetic storage of data.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 204
FRONTIERS OF THE UNIVERSE
Undergraduate
Focuses on the tremendous increase in our understanding of the universe beyond the Solar System that has occurred in recent years. Topics include stellar evolution, the properties of stars, supernova explosions, black holes, galaxies, and the origin of the universe.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.
PHY 205  
EINSTEIN'S PECULIAR IDEAS  
Undergraduate  
A conceptual treatment of Einstein's groundbreaking ideas about space, time, and the nature of reality. Topics covered include special relativity, Einstein's contributions to quantum physics, including his criticisms of its orthodox interpretation, and some aspects of his theory of gravity. Aspects of Einstein's thoughts on social issues will also be briefly discussed.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 206  
SOUND AND ACOUSTICS  
Undergraduate  
Sound waves, their production, transmission and detection; applications to music, acoustics and noise pollution.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 220  
OCEANOGRAPHY  
Undergraduate  
Develops the concepts of physical oceanography. Topics include the chemical and physical properties of seawater, the dynamics of ocean currents and circulations, the physics of water waves and tides, the interaction of the ocean with the atmosphere, the formation of coastlines, and the effects of pollution on the ocean. Cross-listed with GEO 220.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 223  
LIGHT, COLOR, AND PHOTOGRAPHY  
Undergraduate  

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 225  
WEATHER AND CLIMATE  
Undergraduate  
Develops the physical concepts needed to understand the atmosphere, the oceans, and their interactions with the aim of building a conceptual model of weather and climate. Long-term climate variability and climate related environmental issues are also discussed. Cross-listed with GEO 225.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 231  
LINEAR ELECTRIC CIRCUITS  
Undergraduate  
Frequency response and feedback, operational amplifiers as linear amplifiers, active filters, oscillators, communication circuits and data conversion circuits.

PHY 110 is a prerequisite for this course.

PHY 232  
INTRODUCTION TO DIGITAL ELECTRONICS  
Undergraduate  

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.
PHY 236
THE SCIENCE OF DIGITAL AUDIO
Undergraduate
Introduction to the physics and mathematics of digital audio, including the conversion of sound energy into electrical signals, the digitization of the signal, conversion of the signal to a standard format, storage of the signal on a hard disk or a CD, and manipulation of the digitized signal. Also includes a discussion of the ethics and legality of downloading digitized audio, in the context of intellectual property rights. This course assumes familiarity with trigonometric mathematical functions.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PHY 270
UNIVERSITY PHYSICS IV
Undergraduate
An introduction to 20th-century physics. Topics include special relativity, quantum mechanics, and statistical analysis of data.

PHY 172 is a prerequisite for this course.

PHY 300
METHODS OF COMPUTATIONAL AND THEORETICAL PHYSICS I
Undergraduate
Computational and theoretical methods in ordinary differential equations, complex numbers, systems of equations, phase plane analysis, bifurcations. Applications to damped, driven oscillators, electronics. COREQUISITE(S):MAT 261.

PHY 301
METHODS OF COMPUTATIONAL AND THEORETICAL PHYSICS II
Undergraduate
Fourier series, Fourier transforms, partial differential equations, Legendre polynomials, special functions. Applications to wave motion, electricity and magnetism, modern physics, optics. Spring

PHY 300 is a prerequisite for this course.

PHY 310
MECHANICS I
Undergraduate
Newtonian motion in a one-, two-, and three-dimensional motion, conservative systems, variational principles, Lagrangian and Hamiltonian mechanics, central-force problems.

PHY 300 is a prerequisite for this course.

PHY 311
MECHANICS II
Undergraduate
Continuation of PHY 310. Topics include systems of particles, collisions and scattering, motion in rotating frames, rigid body motion.

PHY 310 is a prerequisite for this course.

PHY 315
CHAOS IN PHYSICAL SYSTEMS
Undergraduate
Motion in phase space, characteristics of chaotic systems, Lyapunov exponents, stability of equilibrium solutions, strange attractors, bifurcations, discrete dynamics, and applications to lasers, fluids, and other physical systems.

PHY 300 is a prerequisite for this course.
PHY 320
ELECTRICITY AND MAGNETISM I
Undergraduate
Solutions to electrostatic, magnetostatics, and boundary-value problems. Introduction to Coulomb's law, Gauss's law, Biot-Savart law, and electric and magnetic potentials.

PHY 301 is a prerequisite for this course.

PHY 321
ELECTRICITY AND MAGNETISM II
Undergraduate
A continuation of PHY 320. Topics include Maxwell's equations, time varying fields, electromagnetic waves, and radiation.

PHY 320 is a prerequisite for this course.

PHY 325
LASER PHYSICS
Undergraduate
Interaction of radiation and matter, pumping mechanisms for lasers, optical resonators, cw and transient laser behavior, laser types, current topics in optical physics. Cross-listed as PHY 425

PHY 300 is a prerequisite for this course.

PHY 330
SENIOR CAPSTONE PHYSICAL SCIENCE
Undergraduate
Senior Capstone in the Physical Sciences. Topics in the physical sciences and their social, political, environmental and economic impact.

Student standing of at least junior level is a prerequisite for this course.

PHY 335
NON-EQUILIBRIUM PHYSICS AND SELF-ORGANIZATION
Undergraduate
The spontaneous formation of structure is one of the most interesting phenomenon in nature and arises in fields as diverse as physics, chemistry, biology, management, economics, and sociology. Many self-organizing systems show similarities in the way the structure arises, indicating that there are underlying general principles that govern these systems. This course will investigate these principles. PHY 340 or consent recommended.

PHY 301 is a prerequisite for this course.

PHY 340
THERMAL PHYSICS
Undergraduate
Statistical interpretation of the fundamental concepts of thermodynamics and its physical applications.

PHY 301 is a prerequisite for this course.

PHY 342
COMPUTATIONAL PHYSICS
Undergraduate
Computational solution and simulation of physical systems; applications chosen from nonlinear dynamics, optics, central-force motion, fluids, condensed matter.

PHY 301 is a prerequisite for this course.
PHY 350
OPTICS
Undergraduate
Matrix methods for image formation, diffraction, interferometry, coherence, scattering, polarization, holography, Fourier transform spectroscopy. PHY 320 recommended.

PHY 301 is a prerequisite for this course.

PHY 356
FIBER OPTICS
Undergraduate
Solution of Maxwell's equations for dielectric waveguides, optical communications, nonlinear effects in dielectric waveguides, and current research. PHY 321 recommended. Cross-listed with PHY 456.

PHY 301 is a prerequisite for this course.

PHY 360
QUANTUM MECHANICS I
Undergraduate
Introduction to quantum mechanics, including the solution of the Schrodinger equation in one and three dimensions for a variety of potentials. Applications to atomic systems and solids.

PHY 301 is a prerequisite for this course.

PHY 361
QUANTUM MECHANICS II
Undergraduate
Continuation of PHY 360. Applications of quantum mechanics, including time-independent and time-dependent perturbation theory, the variational principle, and an introduction to scattering theory.

PHY 360 is a prerequisite for this course.

PHY 365
NUCLEAR PHYSICS
Undergraduate
Theoretical and phenomenological approaches to nuclear structure and strong, electromagnetic, and weak interactions of nuclei. Topics of study include the theory of scattering and decay of nuclei, resonances, nuclear models.

PHY 360 is a prerequisite for this course.

PHY 366
RADIATION PHYSICS
Undergraduate
Radioactive decay processes, interactions of radiation with matter, general properties of radiation detectors, and applications to basic nuclear spectroscopy, health physics and medical physics. Cross-listed w/ PHY 466.

PHY 270 is a prerequisite for this course.

PHY 370
ELECTRONICS
Undergraduate
A laboratory course covering analysis and construction of analog and digital circuits used in experimental research.

PHY 301 is a prerequisite for this course.
PHY 375  
**INTRODUCTION TO COSMOLOGY**  
**Undergraduate**  
Provides a foundation to the core concepts of cosmology, with an emphasis on developing physical insight. Discusses recent major developments in cosmology, such as the cosmological constant and accelerating universe, and key future developments, including details of the cosmic microwave background and gravitational wave detection. PHY 310 recommended.  
PHY 301 is a prerequisite for this course.

PHY 378  
**TOPICS IN PHYSICS**  
**Undergraduate**  
Current topics in applied physics, as determined by the interests of the instructor and students.  
PHY 301 is a prerequisite for this course.

PHY 380  
**EXPERIMENTAL PHYSICS I**  
**Undergraduate**  
Experimental techniques in optics, atomic and nuclear physics. Approved for Experiential Learning Credit.  
PHY 270 and PHY 301 are a prerequisite for this course.

PHY 381  
**EXPERIMENTAL PHYSICS II**  
**Undergraduate**  
Experimental techniques in solid-state and high-vacuum physics. Laboratory.  
PHY 380 is a prerequisite for this course.

PHY 382  
**EXPERIMENTAL PHYSICS III**  
**Undergraduate**  
Experimental Physics III (laboratory)  
PHY 381 is a prerequisite for this course.

PHY 384  
**ADVANCED LABORATORY**  
**Undergraduate**  
Variable credit Laboratory experience in techniques selected in consultation with instructor.

PHY 385  
**INTRODUCTION TO PHYSICS EDUCATION RESEARCH**  
**Undergraduate**  
This course covers effective teaching methods for physics, findings from physics education research, and the use of technology in physics classrooms. Course is required to serve as a Teaching Assistant within the department. Cross listed with PHY 485  
PHY 301 is a prerequisite for this course.

PHY 390  
**APPLIED COMPUTATIONAL PHYSICS LABORATORY**  
**Undergraduate**  
Project-based computational laboratory of problems in modern applied physics. Numerical modeling of experiments, computer interfacing of experiments, computational techniques in data analysis.  
PHY 301 is a prerequisite for this course.
PHY 391
ELECTRONIC PROPERTIES OF MATERIALS
Undergraduate
The free-electron gas model, energy band theory, theory of metals and alloys, transport phenomena, dia- and para-magnetism, ferromagnetism, and antiferromagnetism, superconductivity.

PHY 391 is a prerequisite for this course.

PHY 392
STRUCTURAL PROPERTIES OF MATERIALS
Undergraduate
Periodicity, symmetry and classification of crystal structure, X-ray diffraction, reciprocal lattice, crystal binding, Debye theory of heat capacity, anharmonic interactions, point defects, surfaces.

PHY 392 is a prerequisite for this course.

PHY 395
METHODS OF THEORETICAL PHYSICS
Undergraduate
Special functions, complex integration, calculus of variations, coordinate transformations.

PHY 395 is a prerequisite for this course.

PHY 398
READING AND RESEARCH
Undergraduate
Undergraduate research participation. (variable credit)

Student standing of at least junior level is a prerequisite for this course.

PHY 399
INDEPENDENT STUDY
Undergraduate
Independent Study. (variable credit)

PHY 400
CLASSICAL MECHANICS FOR TEACHERS
Graduate
Concepts and materials for teaching mechanics as part of high school physics. Only offered by arrangement.

PHY 401
ELECTRICITY AND MAGNETISM FOR TEACHERS
Graduate
The principles of electricity and magnetism, including electric circuits. This level is appropriate for regular and AP high school Physics teachers. Only offered by arrangement.

PHY 402
ATOMIC AND NUCLEAR PHYSICS FOR TEACHERS
Graduate
This course provides a broad perspective for teachers. It includes atomic, nuclear and some particle physics. Only offered by arrangement.

PHY 403
TOPICS IN PHYSICS TEACHING
Graduate
Selected topics for high school teachers. May be taken more than once. Only offered by arrangement.
PHY 404
OPTICS FOR TEACHERS
Graduate
Geometrical and physical optics from the perspective of high school teaching. Applications to photography and holography. Only offered by arrangement.

PHY 406
VIBRATIONS, WAVES AND SOUND FOR TEACHERS
Graduate
Techniques for teaching high school science including musical acoustics and sound reproduction. Only offered by arrangement.

PHY 410
CHAOS IN PHYSICAL SYSTEMS
Graduate
Motion in phasespace, characteristics of chaotic systems, Lyapunov exponents, stability of equilibria, strange attractors, bifurcations, discrete dynamics, applications to lasers, fluids, and other physical systems.

PHY 411
ELECTRODYNAMICS I
Graduate
Electrostatics and magnetostatics in vacuum and in media; electromagnetic induction; Maxwell's equations; the Poynting vector; electromagnetic wave propagation.

PHY 412
QUANTUM MECHANICS I
Graduate
Schroedinger equation, operators, eigenvalues; series of eigenfunctions; physical interpretation; one- and three-dimensional applications.

PHY 420
ELECTRODYNAMICS II
Graduate
Further studies of electromagnetic wave propagation; scattering; dispersion; bounded structures and guided waves; electromagnetic radiation, including multipole radiations and radiation from systems of radiators.

PHY 425
LASER PHYSICS
Graduate
Interaction of radiation and matter, pumping mechanisms for lasers, optical resonators, cw and transient laser behavior, laser types, current topics in optical physics. Cross-listed with PHY 325.

PHY 435
NON-EQUILIBRIUM PHYSICS AND SELF-ORGANIZATION
Graduate
The spontaneous formation of structure is one of the most interesting phenomenon in nature and arises in fields as diverse as physics, chemistry, biology, management, economics, and sociology. Many self-organizing systems show similarities in the way the structure arises, indicating that there are underlying general principles that govern these systems. This course will investigate these principles. PHY 340 or consent recommended.

PHY 440
CLASSICAL MECHANICS
Graduate
Variational principles; Lagrangian and Hamiltonian mechanics; small oscillations; canonical transformations; Hamilton-Jacobi theory.
Contemporary Topics in physics are examined via numerical solutions. Calculations using an interactive approach and graphical representation are used extensively.

Principles of statistical mechanics; applications to weakly interacting systems such as the classical plasma and Fermi gas; strongly interacting systems; transport theory; fluctuations and irreversible processes, phase transitions.

Applications of equilibrium statistical mechanics to the study of phase transitions and critical phenomena. Topics include the Ising model of magnetism, critical phenomena in fluids, mean field theory, Landau-Ginzburg theory, and the renormalization group.

PHY 340 and PHY 445 are prerequisites for this course.

Fourier Optics and optical processing of information. Topics include diffraction theory, optical transfer functions and holography. The Fourier Transform and Fast Fourier Transform are used extensively.

Solution of Maxwell's equations for dialectic wave guides, optical communications, nonlinear effect in dialectic wave guides, and current research.

Review of basic quantum theory; vector spaces; linear operators; observables; commutators; projection operations; representations; angular momentum theory; systems of identical particles; invariance.

PHY 412 is a prerequisite for this course.

Theoretical and phenomenological approaches to nuclear structure and strong, electromagnetic, and weak interactions of nuclei. Topics of study include the theory of scattering and decay of nuclei, resonances, nuclear models.

PHY 360 is a prerequisite for this course.

Interactions of X-rays, nuclear radiations, etc. with matter; radiation detectors; dosimetry; shielding; applications to medical physics. Cross-listed with PHY 366.
PHY 470
ADVANCED GRADUATE LABORATORY TECHNIQUES
Graduate
Advance laboratory techniques and measuring devices are used to study optics, atomic and nuclear, and condensed matter physics. Advanced data analysis techniques are also introduced. Emphasis is on individual research projects. Physics Graduate standing is a prerequisite.

PHY 475
INTRODUCTION TO COSMOLOGY
Graduate
Provides a foundation to the core concepts of cosmology, with an emphasis on developing physical insight. Discusses recent major developments in cosmology, such as the cosmological constant and accelerating universe, and key future developments, including details of the cosmic microwave background and gravitational wave detection.

PHY 478
TOPICS IN PHYSICS
Graduate
This course number is reserved for Individual study at the graduate level. Special seminars organized from time to time to accommodate the needs of groups of students in specialized subjects of topical interest.

PHY 480
THESIS RESEARCH
Graduate
This course number designates research performed to gather thesis material. Up to two registrations are allowed. No less than four quarter hours; no more than eight quarter hours total credit.

PHY 485
INTRODUCTION TO PHYSICS EDUCATION RESEARCH
Graduate
This course covers effective teaching methods for physics, findings from physics education research, and the use of technology in physics classrooms. Course is required to serve as a Teaching Assistant within the department. Cross listed with PHY 385.

PHY 490
STRUCTURAL PROPERTIES OF MATERIALS
Graduate
Periodicity, symmetry and classification of crystal structure; X-ray diffraction; reciprocal lattice; crystal binding. Debye theory of heat capacity; anharmonic interactions; point defects; surfaces.

PHY 360 is a prerequisite for this course.

PHY 491
ELECTRONIC PROPERTIES OF MATERIALS
Graduate
The free-electron gas model; energy band theory; theory of metals and alloys; transport phenomena; dia- and para-magnetism, ferromagnetism, and antiferromagnetism; superconductivity.

PHY 360 is a prerequisite for this course.

PHY 495
METHODS OF THEORETICAL PHYSICS
Graduate
Special functions, complex integration, calculus of variations, coordinate transformations. Cross-listed with PHY 395.
PHY 701
CANDIDACY CONTINUATION
Graduate
Non-credit. Students who are not registered for regular courses will be permitted to register in this course only if they are actively working on their thesis. (0 credit hours)

PHY 702
CANDIDACY MAINTENANCE
Graduate
Placeholder course for students not actively working on their thesis. This course is meant only to maintain university student status, it will not give the student full- or part-time student status and will not permit deferment of student loans. (0 credit hours)

PM 430
FUNDAMENTALS OF IT PROJECT MANAGEMENT
Graduate
This course concentrates on monitoring, managing and controlling assets and resources on a single IT project. Topics covered are risk management; procurement and contract management; time and cost estimating; controlling and tracking techniques; quality assurance; testing and audit. Students will use common project management software for resource allocation and balancing. PREREQUISITE(S): None

PM 440
COLLABORATIVE TECHNOLOGIES FOR LEADING PROJECTS
Graduate
Study of the process of virtual teaming with emphasis on facilitation of different time project activities and facilitation of same time meetings. Students will learn how small group psychology and group communication theories inform specific behaviors in the design and leadership of meetings. Several meeting types including information briefing, focus group, document writing, decision making, requirements gathering, and teaching/training will be explored. In addition, the course surveys current collaboration technologies and discusses how to select among those technologies usability and fit to purpose of a meeting agenda. DL students may be required to schedule same time sessions with the instructor and other DL students; see current quarter syllabus for more information on this point. PREREQUISITE(S): None

PM 535
INFORMATION TECHNOLOGY INVESTMENT FINANCIAL ANALYSIS
Graduate
This course focuses on the application of financial analysis and decision-making approaches to aid information technology investment decisions at the operational, project, tactical and strategic levels. Students will learn how to apply a variety of financial methods -- breakeven analysis, present value analysis, profitability index, and return on investment to various IT investment decisions. The course will also address cost benefit analysis, outsourcing, balanced scorecard, and multi-factor scoring, benchmarking, and IT investment portfolio methods. These techniques will prepare students to manage capital budgets, acquisition of system and application software, hardware, personnel, and professional services at project and system levels as well as enterprise investment portfolio. PREREQUISITE(S): SE 477 or IS 565 or ACCT 500 or IS 430 or PM 430 or ECT 455

SE 477 or IS 565 or ACC 500 or IS 430 or PM 430 or ECT 455 is a prerequisite for this class.

PM 556
ENTERPRISE PROJECT MANAGEMENT
Graduate
This course covers how an enterprise coordinates and effectively manages all its IT projects and programs through program management and the IT program management office. Students will learn the role of the IT program management office in establishing and maintaining the project and program infrastructure and in assisting project managers, program managers, and the executive steering committee. Students will analyze the role of program management in coordinating the delivery of expected program benefits, in managing stakeholder expectations, and in establishing program governance. PREREQUISITE(S): IS 430 or PM 430

IS 430 or PM 430 is a prerequisite for this class
PM 570
ENTERPRISE SYSTEM IMPLEMENTATION
Graduate
This course is targeted towards information systems professionals who are involved in the planning and implementation of large scale, cross-functional enterprise systems. Students will examine the characteristics of technology efforts that change and transform the way people perform their tasks and how the new technology structures the flows of information and decision making using workflow modeling methods. Through case studies and exercises students gain insights into the elements of successful implementations leading to the preparation of a change management plan. Emphasis is placed on developing mechanisms for communicating and training all affected agents.
PREREQUISITE(S): IS 430 or PM 430 or five or more other SoC MS level courses should contact the course instructor or an advisor.

IS 430 or PM 430 or completion of five or more other SoC MS level courses is a prerequisite for this class; contact instructor or advisor

PM 577
IT PORTFOLIO MANAGEMENT AND STRATEGIES
Graduate
This capstone course integrates the skills and techniques learned in previous IT Project Management courses. Through in depth analysis of case studies and readings, along with presentations by outside speakers experienced in IT Portfolio Management and IT strategy, students use their skills from previous IT project management courses to solve IT strategic and IT portfolio problems. The course starts with formulating the IT strategy from the corporate strategy. Then the IT Portfolio of initiatives, projects and assets is build and fine tuned. PREREQUISITE(S) IS 556 or PM 556

POL 101
BASIC POLISH I
Undergraduate
Listening to, speaking, reading and writing Polish in a cultural context for the beginning student. (Offered on a demand basis only.)

POL 102
BASIC POLISH II
Undergraduate
Continued emphasis on the four skills in culturally authentic situations. (Offered on a demand basis only.)

POL 103
BASIC POLISH III
Undergraduate
Further work on the basic elements of the Polish language, spoken as well as written, with due regard to the cultural context of Polish expression. (Offered on a demand basis only.)

POL 104
INTERMEDIATE POLISH I
Undergraduate
Intensive practice in the use of Polish through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. (Offered on a demand basis only.)

POL 105
INTERMEDIATE POLISH II
Undergraduate
Continuing practice in spoken and written Polish and further development of reading and listening abilities in an authentic cultural context. (Offered on a demand basis only.)

POL 106
INTERMEDIATE POLISH III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing Polish with a concomitant heightened awareness of the cultural dimensions of the Polish language. (Offered on a demand basis only.)
POL 110
INTERMEDIATE POLISH FOR HERITAGE SPEAKERS I
Undergraduate
Introduction to grammar and written composition for heritage speakers of Polish with little or no formal language training. For students who already speak Polish in their families or communities. (Offered on a demand basis only.)

POL 111
INTERMEDIATE POLISH FOR HERITAGE SPEAKERS II
Undergraduate
Introduction to grammar and written composition for heritage speakers of Polish with little or no formal language training. For students who already speak Polish in their families or communities. (Offered on a demand basis only.)

POL 112
INTERMEDIATE POLISH FOR HERITAGE SPEAKERS III
Undergraduate
Introduction to grammar and written composition for heritage speakers of Polish with little or no formal language training. For students who already speak Polish in their families or communities. (Offered on a demand basis only.)

Pps 200
Introduction to Public Policy
Undergraduate
This core course is designed to provide the student with an introduction to the field of public policy. The historical origins of policy analysis, definitions of what constitutes “public policy”, various theoretical approaches developed to address policy problems, and contemporary policy debates on various substantive issues. By the end of the course each student has a solid background for further study of public policy and the social sciences. This course should be taken as one of the first courses in the major.

Pps 201
Public Policy and Urban Issues
Undergraduate
This core course is designed to introduce students to the study of urban areas, to some of the more exciting and difficult issues faced by cities, and finally, to some of the policies designed to address these issues. Readings assist students in exploring what makes cities function, how they have changed over time and what it was like to live through those changes, can show us how modern ways of seeing and modern ways of making sense came into being. If student is a PPS major, then students are encouraged to take PPS 200 prior to PPS 201.

Pps 202
Public Policy and Environmental Issues
Undergraduate
This core course reviews the environmental public policy issues in the United States. The history of the modern environmental movement and the impact it continues to have on public policy is explored. Students apply concepts of environmental policy and move towards proposing policy solutions. If student is a PPS major, then students are encouraged to take PPS 200.
This core course provides students an understanding of and some experience with the qualitative and quantitative research methods used in public policy for collecting and identifying relevant data. Policy analysis, policy arguments, and policy making use of data to identify public problems, identify possible policies for public problems, and support arguments for specific policy alternatives. The credibility and quality of policy analyses and arguments depends in large part on the validity and reliability of that information.

This course focuses on writing of research questions and hypotheses, selection of appropriate quantitative statistical analyses for research questions, interpretation of statistical results, and communication of those results. A significant portion of the course work will involve doing statistical analyses of existing data using Statistical Package for the Social Sciences (SPSS) in the computer lab. Students will prepare a substantial paper using the techniques for public policy analysis learned in class. Students majoring in PPS are strongly encouraged to have completed PPS 205 before taking this course. This core course for PPS majors and minors should be taken before the senior year. Formerly PPS 204.

A major focus of urban policy and grassroots action is the condition of city neighborhoods. This course examines trends in urban policy as they have affected neighborhoods, neighborhood-grounded grassroots action, and local neighborhood development initiatives.

This course examines the demographics of poverty and its concentration in central cities. In addition, definitions of poverty and public policies aimed at alleviating poverty are explored with the aim of understanding why poverty remains prevalent in the United States.

This course examines the origins and evolution of urban public policy in the United States and other countries. Substantive emphases include city planning measures, urban redevelopment, health and environmental measures, as well as various social policies.

This course examines the relationship between the city and cinema and explores how the city both real and ideal is represented in film. Covering a diverse selection of films, genres, and historical periods, the course critically explores the relationship between urban forms and cinematic representations.

The course explores how suburbia was represented in cinema since the post-war period. Covering diverse selection of films and genre, the course examines how domesticity, family life, gender roles, race, suburbanization, domestic space and architecture have been in cinematic space. Drawing on historical and contemporary sources, the course places suburbia at the center stage and examines the relationship between cinema and suburban ideals and how cinema as a particular mode of representation has sought to address suburbia as a particular American social and cultural landscape.
**PPS 255**
**CITIES, GLOBALIZATION AND PUBLIC POLICY**
*Undergraduate*

The course will examine the process of globalization on cities and its policy implication. In particular, the course will explore how the impact of globalization on cities may be evaluated; what benefits or problems they produce and for whom. It will conclude by looking at how public policy professionals can influence these results.

**PPS 260**
**CLIMATE CHANGE POLICY**
*Undergraduate*

This course looks at the public policy responses to climate change in a variety of contexts. Beginning with a discussion of the unique, global nature of the problem, the course looks at how international, national, and subnational governments have developed policies to mitigate greenhouse gas emissions as well as ways to build resilience in the face of changing climatic conditions. Special attention will be placed on the role of uncertainty and risk management in the policy making process with regard to climate adaptation. There is no prerequisite for this course.

**PPS 300**
**APPLIED URBAN AND ENVIRONMENTAL ECONOMICS**
*Undergraduate*

The purpose of this core course is to provide students with a foundation in microeconomic analytical tools through which to analyze urban and environmental policy issues. This course is intended to be participatory and applied. A variety of public policy issues are examined in terms of microeconomic theory and application.

**PPS 301**
**PUBLIC POLICY AND THE POLITICAL PROCESS**
*Undergraduate*

Policy decisions almost inevitably involve politics. This core course explores the politics of the urban political machines that dominated politics in many cities for a long time, though some might argue that they actually had few policy interests other than to remain in power. The course examines how power is distributed in cities, and how it is used to get at the various problems confronting cities. That is, how politics affects policy. The course studies the players in the game of policy formation, and the policy process itself. While the focus may be on cities, make no mistake, politics impacts environmental policy decisions and the process of making those decisions as well.

**PPS 302**
**IMPLEMENTATION OF ENVIRONMENTAL AND URBAN POLICY**
*Undergraduate*

This course examines how organizational cultures affect decision making. The course focuses on bureaucratic decision making routines, the implementation of policy, and the factors which advance or constrain effectiveness in urban and environmental settings. The course also explores the utility of various communication strategies and techniques in executing policies.

**PPS 303**
**PUBLIC POLICY AND LEADERSHIP**
*Undergraduate*

This course analyzes modes of leadership within the context of public policy formulation and implementation. The policy-making process in post-industrial democracies will be discussed from bureaucratic, grassroots, and electoral standpoints, emphasizing the challenges for civic and community leadership that emerge from negotiating competing interests in policy outcomes.

**PPS 324**
**PUBLIC POLICY AND NATURAL RESOURCES**
*Undergraduate*

This course considers the present policies underlying the designation and management of national parks, national forests, wetlands, and other public lands and regulating the use, conservation, and preservation of land, mineral, timber, and water resources. Students will discuss the need for and evolution of public policies to regulate mining, fishing, timbering, and the use of water for generating electricity, irrigation, and recreation, as well as the strengths and limitations of these policies.
PPS 330  
SUSTAINABLE DEVELOPMENT  
Undergraduate  
Sustainable development has become a crucial concept in international initiatives worldwide. It attempts to foster policies that balance the need for economic development with practices that promote healthy communities and ecosystems. This course is based on the instructor's theoretical and practical experience gathered in developed and developing countries under market and command economies conditions. Special emphasis is placed on the role of institutions, both governmental and non-government, in shaping economic policies that are compatible with environmental health. The course pursues the objective of preparing students to understand main environmental problems and to generate solutions for these problems from a multidisciplinary perspective.

PPS 331  
ENVIRONMENTAL JUSTICE  
Undergraduate  
The purpose of this course is to provide students with a historical background on environmental justice (EJ) in the US and an understanding of the current EJ movement. Policy debates surrounding EJ are highlighted from recent studies on determining 'disproportionate impact' to local EJ communities. In addition, students will experience the challenges of EJ organizations in Chicago through the service-based leaning component of the course. Twenty-five hours of service learning is required for completion of this course.

PPS 332  
NATIONAL PARKS POLICY AND GOVERNANCE  
Undergraduate  
This course focuses on the interrelationship between public policy, human values, and nature as displayed through environmental policy governing our national parks. Special attention is given to the cultural dynamics (including political and legal) that are demonstrated in how public policies have been created and implemented over time in regards to our national parks. The course reviews the policy literature and theories associated with the management of the national parks as it reflects our societal values of the time period. These policies have dramatically changed over time, so it is an ideal venue that demonstrates a significant change in how we view nature. The role of tourism, economic development pressures and property owners (takings) concerns will be included. Also, critical thinking about national parks policy will be required. This is taught as a hybrid course.

PPS 333  
GREEN CITIES  
Undergraduate  
This course looks at public policies pertaining to urban sustainability. Low-carbon transportation, green building policies, locally produced renewable energy, and storm water management policies are among the topics discussed.

PPS 334  
SUSTAINABLE LAND REVITALIZATION AND BROWNFIELDS DEVELOPMENT PROJECT  
Undergraduate  
This course introduces students to environmental public policy issues associated with Brownfields, Superfund sites, and an assortment of state and local land revitalization programs. Substance emphasis includes examination of social problems and public policy impediments associated with the revitalization of neighborhoods.

PPS 340  
DYNAMICS OF PUBLIC POLICY  
Undergraduate  
Competing theories of policy formulation and the application of these theories to current policy contexts. Problems of policy implementation will be considered. Cross-listed with PSC 320.

PPS 350  
ISSUES IN URBAN REDEVELOPMENT  
Undergraduate  
The course examines the central issues in contemporary urban development: how urban restructuring, demographic shifts, new patterns of production and consumption, as well as technologically-grounded globalization processes, shape urban development. The course emphasizes the changing context of urban development policy and explores various critical approaches to interpreting urban development policy.
PPS 351
THE POLICY AND POLITICS OF URBAN HOUSING
Undergraduate
The course looks at housing as a social symbol and material commodity, with particular emphasis placed on the role of government in the direct provision of housing and the indirect support of home ownership, as well as housing policies indirect impact on neighborhood development, race relations, and metropolitan suburbanization.

PPS 352
ISSUES IN URBAN EDUCATIONAL POLICY
Undergraduate
This course examines the politics, history, and social context of urban education. Special attention is devoted to emerging policy alternatives such as the use of school vouchers and the formation of charter schools.

PPS 353
INEQUALITY AND PUBLIC POLICY
Undergraduate
Many recent studies have detailed the significant growth in economic inequality in the United States, showing a level not seen since the 1920s. Others have focused on the consequences on significant inequality for a society and its politics. Often this inequality is seen as a necessary (and even desirable) consequence of a free market. This course focuses, however, on policy aspects of our current inequality: the public policies that have contributed to current levels of inequality, reasons for reducing inequality, and public policies that may reduce inequality. U.S. inequality and public policies will also be contrasted with those of similar nations, such as Germany and Nordic countries.

PPS 359
SPECIAL TOPICS IN PUBLIC POLICY STUDIES
Undergraduate
This course provides an in-depth examination of various public policy issues.

PPS 360
GREAT LAKES GOVERNANCE POLICY AND MANAGEMENT
Undergraduate
The Great Lakes of the United States are a significant natural resource. This course will give an overview of the discovery, history, and policy development associated with the management and governance of the lakes. Students will research the different organizations involved with public policy of the lakes, as well as learn the legal framework in how they interact. This course takes an interdisciplinary approach to understanding the lakes.

PPS 361
PUBLIC SPACES AND SOCIAL CONTROL
Undergraduate
Several contemporary trends have led city governments to emphasize policies to attract middle class residents, tourists, and conventions back to the city. These policies often include means of increasing social control over public spaces so that these users feel safe. Also, given fiscal constraints, many local governments see privatization of some public spaces, including neighborhoods, as a means of stretching limited dollars while providing needed services. Many commentators and scholars, however, are greatly concerned about the resulting changes in public spaces of urban areas. They write about Disneyfication of urban areas, commodification of culture, the city as spectacle or theme park, the city as fortress or panopticon, the restrictions of certain behaviors and publics in urban areas---in other words, the loss of public space. These issues and policies raise questions about the differences between public and private spaces, the role of public spaces in democratic governance, the definition/identification of “the public” and citizens, the use of private governments for social control, police strategies for social control, and the equity of social control efforts in and current use patterns of public spaces. Those issues are the focus of the course.

PPS 393
CAPSTONE: GENTRIFICATION
Undergraduate
This course is designed to bring together much of the knowledge attained by Public Policy students during their four years at DePaul by focusing on the often contentious issues of urban gentrification and re-gentrification. Gentrification involves economic issues, political issues, environmental issues, educational issues, race and ethnicity, and equity issues as well. The course shall examine the variables associated with the process of gentrification, the advantages and disadvantages of that process, the winners and the losers in the process, and the political and economic implications of all of this.

Status as a Public Policy Studies major with Senior standing is a prerequisite for this class.
This course is designed to integrate the two concentrations of the Public Policy major to address sustainable management of essential urban infrastructure systems, including stormwater management, energy production and efficiency, and urban forests. The course shall examine how municipal green infrastructure investment reflects larger social values and encourages students to examine the social forces that impact the efficacy of green infrastructure.

Status as a Public Policy Studies major with Senior standing is a prerequisite for this class.

This course is designed to be a comprehensive introduction to the principles and practices of advertising. The course will cover topics such as ad agency structure, roles in an agency, types of advertising from TV to mobile, advertising's role in marketing, brand strategy, market research, creative development and copywriting, media planning and buying.

The foundational course in the public relations/advertising track traces the development of the public relations industry and practices. Students are introduced to theories and principles in public relations along with the roles and responsibilities of professionals working in the public relations discipline. Students examine industry regulations, societal implications, and strategic planning processes associated with public relations campaign and programs.

This class provides students the opportunity to apply Public Relations/Advertising theories and principles to the development of media materials. The course familiarizes students with various forms of persuasive writing and requires them to develop a writing portfolio that demonstrates their ability to write for diverse audiences. Assignments include campaign plans, news media kits, speeches, video scripts and more.

PRAD 244 or PRAD 255 is a prerequisite for this class.

This course allows students to sample a range of hands on, practical offerings in public relations and advertising that can enhance their knowledge and expertise. Workshop topics can include SEO/SEM, media sales and buying, focus group moderating, and Adobe Creative Suite (InDesign, Photoshop, Illustrator), among others. Students may take a maximum of 4 courses of PRAD 290 in the major, and a total of 8 credit hours. (2 quarter hours)
PRAD 291
RESEARCH METHODS FOR THE PRAD PROFESSIONAL
Undergraduate
Research is critical to any advertising or public relations campaign. This course introduces students to the uses and applications of research in the fields of public relations and advertising. The goal is to provide future practitioners with information needed to commission and apply research to their work problems in the industry. Students will learn to recognize valid and reliable research and to utilize this data in decision making for their agencies or clients. Students will learn to form appropriate questions, select and develop appropriate methods (qualitative and quantitative), and analyze the data for unique consumer insights. Students learn to develop research that ensures messages are able to meet the strategic needs of their clients and agencies. Students cannot earn credit for both CMNS291 and PRAD291.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 292
DESIGN APPLICATIONS FOR PRAD PROFESSIONALS
Undergraduate
This course will focus on developing a primary skill-set and a basic technical proficiency using the industry-standard creative design software applications for Advertising and Public Relations. The course will provide an instructional overview of the capabilities and functionality of Adobe Photoshop, Illustrator and InDesign, combined with hands-on labs that will parlay those ideas into practical application. Topics will demonstrate how the Adobe Creative Suite software can be used for creating logos, advertisements, brochures, and other digital imaging media used in Advertising and Public Relations.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 320
EVENT PLANNING
Undergraduate
This course aims to provide students with the occupational, technical and interpersonal skills necessary to "survive and thrive" in the special event industry. In addition to specific content knowledge, students will develop cross-cultural awareness, global understanding and communication skills as they relate to the event industry as a whole. The course will prepare students for a variety of options: pursuit of employment in the special events industry, professional development for those already employed in the field and general knowledge for those interested in the special events field. The purpose of this course is to acquire an in-depth knowledge about the specialized field of event planning, and to become familiar with management techniques and strategies required for successful planning, promotion, implementation and evaluation of special events.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 321
ADVANCED EVENT PLANNING
Undergraduate
The mission of the advanced Special Events Planning course is to provide students with further knowledge of the occupational, technical and interpersonal skills necessary to "survive and thrive" in the special events industry. In addition to the specific content knowledge, students will delve deeper into concepts that separate special event coordinators from special event leaders. Furthermore, this advanced level course places emphasis on higher level theoretical concepts that explain why event planning has become such a critical tool in the marketing and public relations industries. The purpose of this course is to acquire a complete understanding of successful event execution. While the first class (PRAD 320: Event Planning) focuses on successful planning, promotion, implementation and evaluation of special events, this advanced course is designed to provide a higher level skill set that covers topics that only become clear when a common understanding of event coordination are in place.

PRAD 255 and PRAD 320 are prerequisites for this class.

PRAD 323
ADVERTISING SALES
Undergraduate
This course familiarizes students with the process of advertising & media sales. Coursework will include sales call preparation and prospecting, preparing a sales pitch, the power of active listening and how to ask the right questions during a sales call. We'll discuss tips for organizing business leads and clients, managing sales funnels and territories from a financial standpoint, the importance of networking and client service and best practices for negotiating and closing the deal. This class will focus on solution-oriented selling processes and utilize real-life business examples to understand the art of selling. As part of the class, students will be selling advertising for the student newspaper, The DePaulia.

PRAD 244 and PRAD 379 is a prerequisite for this class.
PRAD 333
HUMOR AND ADVERTISING
Undergraduate
Roughly 60% of all ads are classified as “humorous”. This course aims to answer the question of why humor and what makes an effective humorous ad. By examining ads and current campaigns, we will look at the role of humor in advertising, what types of humor are more effective, the right humor for specific brands and situations, and the creative way to use humor. Additionally, students will be challenged to create marketing communication that uses humor to meet specific communication goals.

PRAD 244 is a prerequisite for this class.

PRAD 334
ADVERTISING AND PUBLIC RELATIONS ETHICS
Undergraduate
This class explores issues of Public Relations/Advertising from both theoretical and practical perspectives. A focus is on the professional and social responsibilities of Public Relations/Advertising professionals and prevailing norms in public relations, advertising and related disciplines. Students also address issues related to institutional ethical practices. Ethical standards and practices associated with the use of persuasive communication are also addressed.

PRAD 334 or PRAD 255 is a prerequisite for this class.

PRAD 335
ADVERTISING AND SOCIETY
Undergraduate
This course challenges students to think critically about the societal effect of public relations and advertising with regard to their roles in the production and maintenance of consumer culture and the formation of public opinion. Students read widely from a body of social criticism that may diminish democracy and endanger our collective public life. This course asks future practitioners to confront the uses and abuses of public relations and advertising, and to understand the negative social consequences that can result.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 336
ADVERTISING CAMPAIGNS
Undergraduate
This course is designed to help students develop a thorough understanding of the entire advertising campaign planning process. Working in teams, students will approach a communication problem for a real-world client just as an advertising agency would when working on new business. Students will bring together knowledge from past courses as they gather and analyze primary and secondary data to assess the client's situation then develop a comprehensive campaign plan. This includes the development of a creative message strategy and advertising campaign as well as a strategic media plan.

PRAD 244, PRAD 256, PRAD 291, PRAD 292 and Junior Standing are prerequisites for this class.

PRAD 337
PUBLIC RELATIONS CAMPAIGNS
Undergraduate
This class is designed to expose students to the use of public relations and advertising strategies and techniques in a variety of functions, including community relations, employee relations, government relations, and media relations. Through case studies, students examine contemporary examples of successful public relations programs and campaigns and discover how practitioners function as intermediaries between organizations and their publics.

PRAD 255, PRAD 256, PRAD 291, PRAD 292 and Junior Standing are prerequisites for this class.

PRAD 338
HEALTH AND PUBLIC RELATIONS
Undergraduate
Anchored at the intersection of health, healthcare, and public relations, this course will help students understand the organizational impact of health policy and the role of health communication in the United States. By extension, the course will aid students' preparation to assume communication and healthcare management positions. Specifically, the course explores health policy and communication issues, such as rising cost of health care, the problem of the uninsured, the impact of the Affordable Care Act (ACA), and competing health communication messages and narratives.

PRAD 255 or a Health Sciences major is a prerequisite for this class.
PRAD 340
CONSUMER PROMOTION
Undergraduate
This course explores the various ways marketers engage consumers with a specific goal of generating a purchase. This course will cover the basics of promotion, as well as the ways brands activate more image-based marketing tactics such as sports and arts sponsorships, cause marketing, and entertainment marketing. Students will learn how these tools can meet the dual objectives of driving purchase while maintaining a brand's image.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 350
ACCOUNT PLANNING
Undergraduate
The account planner represents the voice of the consumer in the advertising process. This course will examine the history of account planning and its relationship within advertising agencies to creative development. Special emphasis will be placed on the qualitative and ethnographic research techniques used by planners, and the role that curiosity and empathy play in understanding different consumer audiences.

PRAD 244 and PRAD 291 is a prerequisite for this class.

PRAD 351
COPYWRITING
Undergraduate
This course examines the various ways and styles of writing effective and persuasive advertising copy. Through in class and outside work, students will have the opportunity to develop a variety of advertising/communication pieces, from television and radio scripts, to print and alternative/new media. Emphasis is placed on defining an overriding strategy, and then translating that strategy into effective pieces of communication.

PRAD 244 and PRAD 256 is a prerequisite for this class.

PRAD 352
DIGITAL ADVERTISING
Undergraduate
This course is designed to provide students with an introduction to the dynamic field of digital advertising. The emergence of new media technologies has dramatically changed the ways and strategies for communicating with and engaging consumers. This course provides a conceptual basis of digital advertising that separates digital advertising from traditional advertising. This course helps students understand how the digital advertising industry is evolving with the new media technologies and addresses a wide variety of digital advertising through a practical and theoretical framework. Issues will include social media, user-generated content, online community, mobile advertising, and permission marketing, among others.

PRAD 244 is a prerequisite for this class.

PRAD 356
ADVANCED WRITING FOR PUBLIC RELATIONS
Undergraduate
This class is designed to give students an in-depth understanding and overview of the various writing techniques and formats used within public relations practice. Through dissection of examples of public relations writing, text readings and classroom discussion and labs, students will acquire the necessary writing and editing skills for PR. This course relies heavily on student writing assignments, editing, revising and critiquing these assignments, by the instructor and by peers. Classes will include lectures, student presentations, and writing lab time each week, plus guest speakers and a field trip.

(PRAD 244 or PRAD 255) and PRAD 256 are prerequisites for this course.
PRAD 357
ADVERTISING PORTFOLIO
Undergraduate
This advanced-level course is designed to provide students with hands-on knowledge of what it takes to succeed as a copywriter or art director in today's advertising industry. This course really focuses on the process of generating great ideas that translate into strategic and memorable advertising campaigns. Students learn about the importance of a strong selling proposition, about theories of the creative process, and about idea generation techniques. The course places particular emphasis on the finished campaign execution, as students gain practical knowledge in creative advertising. It all culminates in portfolio critique, where industry creatives come in to evaluate students' work.

PRAD 244 is a prerequisite for this class.

PRAD 361
ACCOUNT PLANNING AND CONSUMER INSIGHTS FOR LATINO MARKETS
Undergraduate
This course encompasses both the similarities and differences of Latino consumers in the U.S. and explores the differences among the unique Latino cultures, their media habits and the effectiveness of using various promotional tools to affect their consumer behavior. The account planner represents the voice of the consumer in the advertising process. This course will examine the role of account planning and its relationship within advertising agencies to creative development. Special emphasis will be placed on the qualitative and ethnographic research techniques used by planners, and the role that curiosity and empathy play in understanding different Latino consumer audiences to gain insight about these groups' motivations and behaviors.

PRAD 244 or instructor permission is a prerequisite for this course.

PRAD 362
LATINO INTEGRATED MARKETING COMMUNICATION
Undergraduate
Focuses on how to effectively target messages to Latino populations in ways that move beyond stereotypic and simplistic models of Latino audiences. Emphasis on developing culturally relevant integrated campaigns that incorporate appreciation of the diversity of Latino audiences. Students learn creative strategies for dialoguing with Latino consumers, customers, stakeholders, and influencers to develop public relations and advertising messaging in both the commercial and non-profit sector. Distinctive characteristics of the Latino population are considered, along with the rich diversity of these communities. Consideration given to effective use of new media and strategic decisions about communicating in English versus Spanish.

(PRAD 244 or PRAD 255) and PRAD 256 and (CMNS 291 or PRAD 291) is a prerequisite for this class.

PRAD 373
PUBLIC RELATIONS & ADVERTISING ENTREPRENEURS
Undergraduate
Entrepreneurship is at the core of the public relations and advertising (PRAD) profession. This course provides students with a grounding in the process of planning, funding, launching, growing and managing a successful new PRAD or media-related business; working on PRAD for an entrepreneurial venture; or freelancing. Through assignments, class discussions, site visits to entrepreneurial businesses and interaction with guest speakers, students will learn the risk, control and reward that comes with self-employment and working with startups in the PRAD profession and other fields. The course culminates with the development of a final project that involves business people so that students gain hands-on experience and feedback.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 374
MEDIA RELATIONS
Undergraduate
Developed in collaboration with media relations experts at leading public relations firms, this course will explore how media relations is evolving in the changing landscape of traditional and social media. Topics include understanding the kinds of stories that interest media, building long-term media relationships, identifying the most strategic media targets, developing a variety of story angles, writing attention-getting pitches, preparing spokespeople for effective interviews, and merchandising media results. Considers classic public relations situations through the lens of today's media environment and real-life case studies including new product launches, brand repositioning, issues management, and consumer engagement.

PRAD 255 is a prerequisite for this class.
PRAD 375
COMMUNICATION LAW
Undergraduate
This course is designed to provide students with an introduction to the portions of U.S. Law that define the scope of First Amendment protection for communication activities. The goal of the course is to help students understand legal issues important to professionals in the media-related fields of advertising, journalism, public relations and other communication specialties. The course helps students understand both their rights to communicate in political and commercial environments and the restrictions permitted on certain communication activities.
PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 376
CRISIS COMMUNICATION MANAGEMENT
Undergraduate
This course focuses on crisis communication and management, emphasizing practical application of theories, strategies, and tactics from a public relations perspective. Additionally, there is a focus on issues relevant to planning, development and execution of crisis communications programs for businesses and organizations and strategic public relations techniques for communication with stakeholders during a crisis.
PRAD 255 is a prerequisite for this class.

PRAD 377
MARKETING PUBLIC RELATIONS
Undergraduate
This course explores the strategic use of public relations to attain marketing objectives. Marketing Public Relations (MPR) is an important part of a reputation building or product branding effort for a corporation, and it can also be a valuable strategy for government agencies and non-profit organizations. Lectures and projects will demonstrate ways to use public relations strategically to add value to integrated marketing programs. By the end of the course, teams will prepare and present key aspects of a marketing public relations plan to a client.
PRAD 255 is a prerequisite for this class.

PRAD 378
CREATIVITY IN ADVERTISING
Undergraduate
This course focuses on creative processes critical to advertising planning, program implementation and organizational leadership. Overall, the course is designed to help students think more creatively, no matter what their specific goals may be. Readings include case studies and guides to creative processes in advertising, as well as more personal essays by people working in other creative venues. Class assignments direct students in different ways to strengthen their creative abilities.
PRAD 244 is a prerequisite for this class.

PRAD 379
ADVERTISING MEDIA PLANNING
Undergraduate
This course examines the diverse capabilities of various media available to advertisers and the process by which advertising media plans are constructed to help meet marketing communication objectives for a product or service. The course provides fundamentals on the language, tools, research methods and concepts employed in the media planning process and helps students build media plans using appropriate objectives, strategies and tactics. The course will help students develop a heightened appreciation for the roles of logic, analysis, and insight in the media planning and buying process.
PRAD 244 is a prerequisite for this class.

PRAD 380
POLITICAL COMMUNICATION
Undergraduate
This course examines how various U.S. government agencies, jurisdictions, and politicians communicate with the public and how the public influences the government through communication. Topics covered include: theory, strategies, and tactics behind effective government and political communication; how to critically evaluate government and political communication; and how individuals and groups influence the government and politicians through communication.
PRAD 244 or PRAD 255 is a prerequisite for this class.
PRAD 381
ADVERTISING AND CHILDREN
Undergraduate
This course examines the social and behavioral effects of advertising directed to children, and addresses such topics as what children know and think about advertising, how children respond emotionally to advertising, how advertising can affect behavioral patterns, the changing regulatory environment and related social and psychological issues including materialism and self-esteem. Students will have the opportunity to assess the existing environment and to design creative interventions.

PRAD 382
NON-PROFIT PUBLIC RELATIONS
Undergraduate
This course examines the philosophical and theoretical foundations of public relations and volunteerism. Strategic communication strategies relating to both internal and external publics will be explored including the unique legal and ethical issues that impact non-profit organizations. Students will gain hands-on experience, using a variety of theoretical foundations to guide development of strategic communication materials for local non-profit organizations.

PRAD 383
BRANDED CONTENT
Undergraduate
In today's new media world, brands have taken an old tactic of creating content and information to directly connect with their consumers and generate interest and participation. This course provides the approaches that brands take from a strategic point of view, the creation of relevant topics and content, be it entertainment or information, and the most appropriate use of available communication channels to best reach potential and current customers.

PRAD 384
INTERNATIONAL PUBLIC RELATIONS
Undergraduate
International public relations is an upper-level undergraduate course designed to introduce students to the global perspective of public relations. A primary goal of the course is to help students become knowledgeable of the ever-increasing development of the field across the world and the opportunities it offers to them, especially in government, transnational businesses, non-governmental organizations, and global agencies. Using a combination of real-world cases, interaction with industry professionals, on-site visit(s), and engagement with the multicultural aspects of the city of Chicago, students will put the class content in perspective and acquire competencies to be effective communicators and global public relations managers.

PRAD 386
BATEMAN PUBLIC RELATIONS STRATEGY
Undergraduate
Public relations Bateman strategy introduces students to the strategic planning process involved in putting together and coordinating organizational public relations efforts for a real-world business problem/situation. In this course, students will learn what is involved in developing, implementing, and evaluating public relations programs for a client. The course will teach how to conduct formative research to examine an organization’s internal and external environment; as well as identify and address public relations situations that emerge in these environments. Students will learn how to develop measurable objectives, and design strategies and select tactics that can better serve the organization’s goals.

PRAD 255 and instructor permission are prerequisites for this class.
PRAD 387
BATEMAN PUBLIC RELATIONS CAMPAIGNS
Undergraduate
Public relations Bateman campaigns is designed to prepare students for developing and implementing public relations campaigns, as well as to improve their problem-solving abilities. In this course, students apply the tools learned throughout their public relations studies including research, writing, and strategic planning. Working in teams, students will help a real-world client, assigned by the national Public Relations Student Society of America (PRSSA), address a real-world problem. Following the public relations process, students will design and implement a public relations campaign, and draft a case study on the experience to enter the annual PRSSA Bateman Competition.

PRAD 386 & instructor consent are prerequisites for this course.

PRAD 390
INTERNATIONAL ADVERTISING
Undergraduate
Along with the thriving of multinational corporations and the emergence of cross-cultural communities, globalization has brought both threats and opportunities to marketers. Given the advance in technologies and the growth of global media, marketers need to become familiar with factors influencing global advertising communications. Thus it is imperative for advertising students to understand how the dynamic global environment influences advertising decisions about strategy, creative, media, and execution. The goal of this course therefore is to introduce and discuss issues that affect advertising in an international and global context. Through theoretical and practical examination of international advertising, students will become aware of how the environmental factors affect international advertising decisions and develop an understanding of how these factors affect responses to advertising.

PRAD 244 is a prerequisite for this class.

PRAD 391
SPECIAL TOPICS IN PUBLIC RELATIONS
Undergraduate
This course allows students to sample a range of topical offerings in public relations that have included International Communication and PR, Event Planning, and Study Abroad. In addition to these topics, new topics for this concentration might include Media Relations in Latin America, The Use of Social Media Among Latinos, Marketing PR Strategies for Latino Markets, and other Latino relevant topics.

PRAD 255 is a prerequisite for this class.

PRAD 392
SPECIAL TOPICS IN ADVERTISING
Undergraduate
This course allows students to sample a range of topical offerings in advertising that have included Media Planning, Advertising in the Digital Age, Ad Copywriting, Advanced Advertising Campaigns, Consumer Promotions, and Psychology of Advertising. Topics for this concentration might include: Media Planning for Latino Markets, Ad Copywriting for Latino Markets, The Advertising Industry in Latin America.

PRAD 244 is a prerequisite for this class.

PRAD 393
SPECIAL TOPICS IN PUBLIC RELATIONS AND ADVERTISING
Undergraduate
PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 396
CAPSTONE IN PUBLIC RELATIONS AND ADVERTISING
Undergraduate
This culminating experience for PRAD majors integrates the knowledge learned during their undergraduate years with a forward-thinking professional curriculum designed to prepare students for the competitive 21st century workplace. The course will cover such essential career-building topics as social media management; creating and leveraging a professional network; understanding effective teamwork strategies; time management and work-life balance skills; and creating a plan and fine-tuning the skills needed to secure a full-time position in the public relations and advertising industries. Only PRAD majors who have 144 hours or above are eligible to register for capstone. PRAD majors may not earn credit for CMN 396.

Status as a senior PRAD major is a prerequisite for this class.
PRAD 398
ADVANCED SPECIAL TOPICS IN PUBLIC RELATIONS AND ADVERTISING
Undergraduate
PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 399
INDEPENDENT STUDY
Undergraduate

PRAD 505
CRITICAL PERSPECTIVES ON PUBLIC RELATIONS AND ADVERTISING
Graduate
This course examines the ever-increasing influence of public relations and advertising in our society, highlighting issues of power and social responsibility. Students are asked to think critically about the societal effects of public relations and advertising and their roles in the production and maintenance of public opinion. Future practitioners consider the potentially adversarial relationship that exists between public relations and advertising and the media in societies based on a free press.

PRAD 553 or PRAD 555 and status as a Graduate Public Relations and Advertising student are a prerequisite for this class.

PRAD 511
CONSUMER INSIGHTS FOR LATINO MARKETS
Graduate
The course encompasses both the similarities and differences of Latino consumers in the U.S. and focuses on how to uncover key insights about consumer buying and information processing behavior among a diverse group of Latino cultures. The insight process is commonly used in advertising and marketing but is gaining popularity in public relations and employee communications. Students will learn how to develop their own instincts as an information consumer, as well as learn some key consumer psychology and research methodologies to learn why individuals behave as they do in the marketplace. Students will find and distill secondary research data and then utilize some qualitative research techniques, such as focus groups, ethnographic research, projective techniques, and in-depth interviewing to develop a key insight into a target group. PREQ: PRAD 553

PRAD 553 and status as a Graduate Public Relations and Advertising student are a prerequisite for this class.

PRAD 512
LATINO INTEGRATED MARKETING COMMUNICATION
Graduate
Many organizations and businesses are actively pursuing the Latino market. Yet few PR/advertising programs train students to communicate effectively with this growing target audience. This course covers the process of uncovering Latino consumer insights and development of culturally relevant messages. Students gain practice in creating comprehensive strategic campaigns addressing various Latino consumer segments and exploring the effectiveness of using advertising, public relations and events, corporate social responsibility and social media specifically focused on the US Latino consumer.

Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 514
CONTEMPORARY ISSUES IN PUBLIC RELATIONS AND ADVERTISING
Graduate
A seminar devoted to the reading and discussion of contemporary academic and popular works dealing with emerging issues in the fields of public relations and advertising. Students gain advanced knowledge of new industry trends and explore issues central to current professional debates.

PRAD 553 or PRAD 555 and status as a Graduate Public Relations and Advertising student are a prerequisite for this class.
PRAD 515
PUBLIC RELATIONS WRITING
Graduate
The goal of this course is to help students develop the professional writing skills needed for success in public relations. Students analyze the process of strategic public relations planning and explore the communication techniques used to establish positive relationships with organizational constituents. They apply what they have learned by developing and presenting a variety of public relations materials, such as a news release, fact sheet, pitch letter, and blog. The course also includes an overview of the AP Style Guide. Upon the successful completion of this course, students will have a professional eportfolio of public relations writing samples.

Status as a Graduate Public Relations and Advertising student and PRAD 555 or (Status as a graduate Health Communication student and CMNS 500 or HTHC 515 or HTHC 517) or (instructor permission) are prerequisites for this course.

PRAD 521
PUBLIC RELATIONS MEASUREMENT AND DATA ANALYTICS
Graduate
PR measurement and data analytics is an applied course designed to introduce students to the measurement and evaluation principles, tools, and methods that they will use as strategic communication practitioners. Driven by practical focus, students will learn to monitor and assess communication efforts through real-world projects, assignments, and discussions. Using actual cases of research and analytics, the course will prepare students to work on future research projects or collaborate with research professionals.

Status as a Graduate Public Relations and Advertising student and PRAD 555 or instructor permission is a prerequisite for this course.

PRAD 530
PR/AD AGENCY ROLES & RESPONSIBILITIES
Graduate
Students will gain deeper career knowledge and insight as they study roles and responsibilities of all key functions in advertising and public relations firms (from interns to CEOs) via research, agency visits, in-class discussions and interviews with PR/AD professionals (formerly PUBLIC RELATIONS AND ADVERTISING MANAGEMENT).

PRAD 530 and PRAD 555 and status as a Graduate Public Relations and Advertising student are prerequisites for this class.

PRAD 535
PUBLIC RELATIONS IN HEALTH CARE
Graduate
This course will help students understand the organizational impact of health policy in America and prepare them to assume roles in communication management positions in the United States health care industry. Students will explore current issues in health policy such as the problem of the uninsured, the rising cost of health care, the politics of health, the impact of the Affordable Care Act (ACA), and the role of health communication in addressing these issues.

Status as a Graduate Public Relations and Advertising or Health Communication student is a prerequisite for this class.

PRAD 540
CRISIS COMMUNICATION MANAGEMENT
Graduate
This course examines institutional crisis communication from a management perspective. Emphasis is on crisis response strategies and organizational approaches for preventing and managing crisis events. Students develop case studies of contemporary crises and participate in simulations designed to develop professional expertise and practical skills in crisis communication management.

Status as a Graduate Public Relations and Advertising student and PRAD 555 or (Status as a graduate Health Communication student and CMNS 500 or HTHC 515 or HTHC 517) or (instructor permission) are prerequisites for this course.

PRAD 550
INTEGRATED COMMUNICATION CAMPAIGNS
Graduate
The course presents a formal model for the implementation of integrated marketing communication plans across a number of communication functional areas. The course stresses the importance of campaign consistency, expression of unique audience insights, creative leverage, and the establishment of zero-based execution parameters. Case studies are examined as models for understanding elements of successful programs and for the development of team projects.

PRAD 550 or PRAD 555 and status as a Graduate Public Relations and Advertising student or instructor permission are prerequisites for this class.
PRAD 551
ADVERTISING AND COPYWRITING
Graduate
This course will introduce students to the world of the ad copywriter. It will encompass everything from the development of a strategy, to the execution of that strategy in all forms of ad related communication. Students will learn the techniques of good ad writing and create work for Print, TV, Radio, IMC elements, new media, among other forms. PREREQUISITE(S): PRAD 553

PRAD 553 and status as a Graduate Public Relations and Advertising student are prerequisites for this class.

PRAD 553
ADVERTISING FOUNDATIONS
Graduate
This foundational course examines the theories, principles, applications and standards of advertising both from the perspectives of the practitioner and the consumer. It will cover such topics as integration of advertising with other marketing communication tools, advertising's role in society, advertising research and strategy, advertising creativity, and media planning and buying. The course is designed to equip students with skills to critically interpret, evaluate, and critique advertising messages and solve communication problems.

Status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this class.

PRAD 554
CREATIVE PROCESSES
Graduate
The course focuses on the development and importance of the creative role in integrated marketing communication. Students will differentiate between various creative positions functioning within the strategic communication process, and will learn best practices for working with creative teams. Lastly, students will develop personal techniques for managing, developing, and collaborating with creative teams to solve client needs. Students will engage with industry professionals, and will be exposed to a variety of case studies and readings to accomplish course objectives.

Status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this class.

PRAD 555
PUBLIC RELATIONS FOUNDATIONS
Graduate
This foundational course involves the study of the theory, history, practice and future of public relations in a comprehensive way. It is a course designed to allow students to understand the breadth of the field and to investigate specific areas of public relations (i.e., political, medical, financial, government, corporate, education, etc.). It will also cover the operations and the objectives of public relations practice from both the corporate and non-profit sectors.

Status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this class.

PRAD 556
STRATEGIC PLANNING IN PUBLIC RELATIONS
Graduate
Students will learn how to analyze an organization's initial situation, prior to public relations programs; how to formulate strategies and objectives for proper pre-planning; and how to develop a rich and measurable PR plan. Budgets, tactics and timelines will also be discussed and required as an aspect of the final PR plan project.

PRAD 555 and status as a Graduate Public Relations and Advertising student are prerequisites for this class.

PRAD 557
ADVERTISING COMMUNICATION STRATEGY
Graduate
The course examines the development of advertising communication strategy within the context of an organization's overall marketing objectives. The course emphasizes harmonization of strategies for internal and external audiences and for support of organizational vision. Case studies define the relationship of marketing communication to product and service innovation, pricing and distribution. Particular attention is given to strategies which are imaginative and cost-effective.

PRAD 553 and status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this course.
PRAD 558
CONSUMER PROMOTION
Graduate
This course explores the various ways marketers engage consumers with a specific goal of generating a purchase or an action such as lead generation. This course will cover the basics of promotion, as well as the ways brands activate more image based marketing tactics, such as sports and arts sponsorships, cause marketing, and entertainment marketing. Additionally, students will understand what marketers need to do at retail - the last mile on the purchase process - and the new world of shopper marketing. Students will learn how these tools can meet the dual objectives of driving purchase while maintaining a brand's image.
PRAD 553 or PRAD 555 and status as a Graduate Public Relations and Advertising student or instructor permission are prerequisites for this class.

PRAD 562
MEDIA RELATIONS
Graduate
The goal of this course is to provide students with a detailed understanding of the theory and practice of media relations, an essential function of the public relations and strategic communication professions. Through a mix of readings and discussions, assignments, guest speakers from industry and a final project, students develop a strong foundation in the fundamentals of media relations and working effectively with influencers, whether journalists, bloggers or other opinion leaders. Through a series of interrelated assignments that culminate with a final project and presentation, students gain practical experience working with a class client, which has included local Fortune 500 companies or other well-known Chicago organizations. Students also gain experience using media monitoring tools and databases.
PRAD 555 and status as a Graduate Public Relations and Advertising student are prerequisites for this class.

PRAD 563
MEDIA PLANNING
Graduate
This course is designed to introduce students to the concepts and skills essential for pursuing a career in advertising media. Students will learn the planning, selection, and evaluation of advertising media for possible use in advertising campaigns and discuss trends and challenges in current media environment. Fundamental media planning concepts such as reach, frequency, ratings, share, gross rating points, and other cost and audience measurement factors will be discussed in the context of traditional print, broadcast, out-of-home media as well as digital and alternative media options. Students will also become familiar with using syndicated data for developing a media plan.
PRAD 553 and status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 564
BUSINESS SKILLS FOR STRATEGIC COMMUNICATORS
Graduate
A global business center, Chicago boasts one of the country's largest concentrations of Fortune 1000 companies, employing thousands of strategic communication professionals in companies and agencies. This course provides students with a foundational overview of the corporate communication function and core business concepts for strategic communicators, including corporate reputation and intangible assets, corporate social responsibility, corporate governance and financial disclosures. Course concepts are applied through class discussions, activities, assignments, visits from industry professionals and a final project. For the final project, students work on a case study entry for submission to the annual Arthur W. Page Society case study competition. This case project bolsters the student's professional portfolio and business acumen (formerly CORPORATE COMMUNICATION).
PRAD 555 and status as a Graduate Public Relations and Advertising student are prerequisites for this class.

PRAD 565
INTERNATIONAL PUBLIC RELATIONS
Graduate
This graduate seminar is designed to help students gain an understanding of the theoretical and practical foundation of public relations in international, global, transnational, and multinational contexts. Using a combination of real-world cases, interaction with industry professionals, on-site visit(s), and engagement with the multicultural aspects of the city of Chicago, students will gain the knowledge necessary to prepare an international/global public relations program. Likewise, the academic and trade readings and lectures will introduce theories and best practices related to international public relations and how these inform scholarly work. The course will also help students become knowledgeable of the ever-increasing development of the field across the world and the opportunities it offers to them, especially in government, transnational businesses, non-governmental organizations, and global agencies.
PRAD 553 or PRAD 555 and status as a Graduate Public Relations and Advertising student or instructor permission are prerequisites for this class.
PRAD 575  
COMMUNICATION ETHICS AND LAW  
Graduate  
This course covers the ethical and legal responsibilities that advertising and public relations professionals encounter in their practice. Students will review legal topics including the First Amendment, libel, privacy and copyright. Additionally, they will analyze and apply the code of ethics that inform public relations and advertising in the U.S. They will learn the ethical values and principles that guide the practice, while discussing issues such as responsible advocacy, public communication campaigns and corporate social responsibility.  
Status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this class.

PRAD 585  
RESEARCH, DATA AND INSIGHTS  
Graduate  
Formative and evaluative research is at the core of effective public relations and advertising campaigns and programs. This course provides students with a foundation in research methods from the perspective of the public relations and advertising professional. Topics include sampling, data analysis, secondary and primary research, and a review of the major quantitative and qualitative research techniques, as well as the appropriate uses of such techniques. Through practical application of course concepts, students will learn how to use research to uncover stakeholder insights, and evaluate and improve the performance of campaigns and programs. (formerly RESEARCH METHODS FOR THE COMMUNICATION PROFESSIONAL)  
Status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this class.

PRAD 586  
ACCOUNT PLANNING  
Graduate  
As media forms converge, and content delivery and commerce blend, the importance of understanding the emotional connections between consumers and brands has assumed a larger role than ever in the marketing process. The account planner represents the voice, and feelings, of the consumer in this process. This course will examine the history of account planning and its relationship within advertising agencies to creative development and brand development. Special emphasis will be placed on the qualitative and ethnographic research techniques used by planners, and the role that curiosity and empathy play in understanding different consumer audiences.

PRAD 590  
PUBLIC RELATION & ADVERTISING WORKSHOP  
Graduate  
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include focus groups, idea generation, and social media insights. (2 quarter hours)  
Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 592  
INDEPENDENT STUDY  
Graduate  
Students will be guided in the development of a special research project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member.  
PREREQUISITE(S): Approval from instructor and department chair  
Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 595  
SPECIAL TOPICS IN PUBLIC RELATIONS & ADVERTISING  
Graduate  
This course examines a broad range of topics related to public relations and advertising processes. The course may address such topics as issues management, consumer behavior, relationship management, strategic planning and program development, or leadership development.  
PRAD 553 or PRAD 555 and status as a Graduate Public Relations and Advertising student or instructor permission are prerequisites for this class.
PRAD 599  
RESEARCH THESIS  
Graduate  
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.

Status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this class.

PRAD 601  
ACTIVE DEGREE COMPLETION  
Graduate  
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans. (0 credit hours)

Status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this class.

PRAD 602  
CANDIDACY CONTINUATION  
Graduate  
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans.

Status as a Graduate Public Relations and Advertising student or instructor permission is a prerequisite for this class.

PRELAW 150  
THE PRACTICE OF LAW  
Undergraduate  
What do lawyers do? Why and how do they do it? What does it mean to be an ethical lawyer? This exploration of the legal profession will engage students in a broad-ranging discussion of lawyers and their work, in both historical and contemporary perspectives. Students will examine the portrayal of the legal profession in popular culture, including in film and literature, and will explore the concept of ethics in the legal profession. The course will also include field trips to key sites where lawyers work throughout the city of Chicago.

Status as a 3+3 BA/JD student is a prerequisite for this class.

PRELAW 151  
RECENT CONTROVERSIES IN LAW  
Undergraduate  
This course for students enrolled in the 3+3 program addresses a timely topic of significant legal interest, such as gay marriage, affirmative action, campaign finance, etc. The topic varies according to current events and instructor interest. Students will use current topics to explore the broader theme of the relationship between law and society, particularly law’s relationship to social change. Readings each term will include multi-disciplinary perspectives, such as law, political science, philosophy, economics, history, etc. The course is designed to further develop students’ critical thinking skills.

Status as a 3+3 BA/JD Student and PRELAW 150 are prerequisites for this class.

PRELAW 152  
THINKING ABOUT THE LAW  
Undergraduate  
This course will explore the concept of jurisprudence, helping students to understand traditions of legal thought in the American legal system. What are the major theories of law and how are they reflected in today’s courts and congressional chambers? Students will explore the law from different vantage points, including those of judges, lawmakers, lawyers, philosophers, and clients. Major themes of the course will vary each year, but will typically include reflections on justice, punishment, rule of law, and other key foundational topics. Students will engage in significant writing assignments in the course that will help them develop the advanced writing skills necessary for success in law school.

Status as a 3+3 BA/JD Student and PRELAW 151 are prerequisites for this class.
**PRF 111**
**ACTING I**
**Undergraduate**
First course in a 3 course sequence. Intensive work with Spolin-based improvisation in which the issues of creating theatrical reality are addressed through the medium of theater games. The work culminates in the spring of the year with text-based experiences drawn from either contemporary plays and scenes or story theater.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 112**
**ACTING I**
**Undergraduate**
Second course in a 3 course sequence. Intensive work with Spolin-based improvisation in which the issues of creating theatrical reality are addressed through the medium of theater games. The work culminates in the spring of the year with text-based experiences drawn from either contemporary plays and scenes or story theater.

PRF 111 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 113**
**ACTING I**
**Undergraduate**
Third course in a 3 course sequence. Intensive work with Spolin-based improvisation in which the issues of creating theatrical reality are addressed through the medium of theater games. The work culminates in the spring of the year with text-based experiences drawn from either contemporary plays and scenes or story theater.

PRF 112 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 121**
**MOVEMENT I**
**Undergraduate**
First course in a 3 course sequence. Two quarters of movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use, and overall self awareness. One quarter will continue with the elements explored in yoga but will be more focused on freeing the self through the use of music, movement improvisation, and a variety of coordination skills.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 122**
**MOVEMENT I**
**Undergraduate**
Second course in a 3 course sequence. Two quarters of movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use, and overall self awareness. One quarter will continue with the elements explored in yoga but will be more focused on freeing the self through the use of music, movement improvisation, and a variety of coordination skills.

PRF 121 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 123**
**MOVEMENT I**
**Undergraduate**
Third course in a 3 course sequence. Two quarters of movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use, and overall self awareness. One quarter will continue with the elements explored in yoga but will be more focused on freeing the self through the use of music, movement improvisation, and a variety of coordination skills.

PRF 122 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 131
VOICE AND SPEECH I
Undergraduate
Voice & Speech I (4 quarter hours). First course in a 3 course sequence. The focus of the work is on relaxation, alignment, breathing, the development of free resonance flow, and good articulation of vowels and consonants.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 132
VOICE AND SPEECH I
Undergraduate
Second course in a 3 course sequence. The focus of the work is on relaxation, alignment, breathing, the development of free resonance flow, and good articulation of vowels and consonants.

PRF 131 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 133
VOICE AND SPEECH I
Undergraduate
Third course in a 3 course sequence. The focus of the work is on relaxation, alignment, breathing, the development of free resonance flow, and good articulation of vowels and consonants.

PRF 132 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 211
ACTING II
Undergraduate
First course in a 3 course sequence. Scene study work begins. Students explore the relationship of the self to the role through the use of intention, relationship, environment, and text. A variety of playscripts are drawn from contemporary theatre.

PRF 113 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 212
ACTING II
Undergraduate
Second course in a 3 course sequence. Scene study work begins. Students explore the relationship of the self to the role through the use of intention, relationship, environment, and text. A variety of playscripts are drawn from contemporary theatre.

PRF 211 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 213
ACTING II
Undergraduate
Third course in a 3 course sequence. Scene study work begins. Students explore the relationship of the self to the role through the use of intention, relationship, environment, and text. A variety of playscripts are drawn from contemporary theatre.

PRF 212 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 214
MAKE-UP
Undergraduate
First course in a 3 course sequence. Basic skills of two-dimensional painting as well as basic prosthetic and skin-texturing work are analyzed in this course designed to acquaint the actor with theatrical make-up. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 215
MAKE-UP
Undergraduate

Second course in a 3 course sequence. Basic skills of two-dimensional painting as well as basic prosthetic and skin-texturing work are analyzed in this course designed to acquaint the actor with theatrical make-up. (2 quarter hours)

PRF 214 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 216
MAKE-UP
Undergraduate

Third course in a 3 course sequence. Basic skills of two-dimensional painting as well as basic prosthetic and skin-texturing work are analyzed in this course designed to acquaint the actor with theatrical make-up. (2 quarter hours)

PRF 215 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 221
MOVEMENT II
Undergraduate

Focus will be on full body awareness through Feldenkrais' (and other) movement lessons and through the study of anatomy. Emphasis will be placed on recognizing limiting patterns of response in the self (including inappropriate tensions) and moving beyond those to increase the physical choices and alternatives available to the student. Work is begun on the dynamics of movement and on embodying a role. (3 quarter hours)

PRF 123 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 222
MOVEMENT II
Undergraduate

Focus will be on full body awareness through Feldenkrais' (and other) movement lessons and through the study of anatomy. Emphasis will be placed on recognizing limiting patterns of response in the self (including inappropriate tensions) and moving beyond those to increase the physical choices and alternatives available to the student. Work is begun on the dynamics of movement and on embodying a role. (3 quarter hours)

PRF 221 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 223
MOVEMENT II
Undergraduate

Actors will continue to develop material from previous movement classes, now placing specific focus on combining imaginative work with skill work to explore the realization of dynamics, rhythm, space and flow of energy. Techniques will be used to aid the actor physicalize inner needs, wants and intentions demanded by various roles. (3 quarter hours)

PRF 222 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 231
VOICE AND SPEECH II
Undergraduate

Actors are introduced to the progression of voice exercised in Kristin Linklater's Freeing the Natural Voice. The focus of the class is on developing techniques that foster the connection between the acting impulse and the voice. (3 quarter hours)

PRF 133 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 232
VOICE AND SPEECH II
Undergraduate

Actors explore the second half of the Linklater voice progression. The focus is on developing each actor's full vocal range. In addition to the voice exercises, students work on a variety of texts chosen to support their growing acquisition of skills. (3 quarter hours)

PRF 231 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
The focus is on speech. Clarity of articulation and effective use of vowels is developed by learning the International Phonetics Alphabet. (3 quarter hours)

PRF 232 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

First course in a 3 course sequence. Under the guidance of a director, all second-year acting majors rehearse and perform a play for faculty viewing and evaluation. Students are encouraged to integrate skills acquired in other classes. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Second course in a 3 course sequence. Under the guidance of a director, all second-year acting majors rehearse and perform a play for faculty viewing and evaluation. Students are encouraged to integrate skills acquired in other classes. (3 quarter hours)

PRF 261 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Third course in a 3 course sequence. Under the guidance of a director, all second-year acting majors rehearse and perform a play for faculty viewing and evaluation. Students are encouraged to integrate skills acquired in other classes. (3 quarter hours)

PRF 262 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Students learn the fundamentals of hand-to-hand combat and weaponry with a focus on developing skills safely and effectively for the stage. (1 quarter hour)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

First course in a 3 course sequence. Classical work begins with Shakespeare and possibly other classical texts. Specific focus is given to scansion and First Folio technique. This study is coordinated with both the movement and the voice and speech classes. (2 quarter hours)

PRF 213 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Second course in a 3 course sequence. Classical work begins with Shakespeare and possibly other classical texts. Specific focus is given to scansion and First Folio technique. This study is coordinated with both the movement and the voice and speech classes. (2 quarter hours)

PRF 311 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 313
ACTING III
Undergraduate
Third course in a 3 course sequence. Classical work begins with Shakespeare and possibly other classical texts. Specific focus is given to scansion and First Folio technique. This study is coordinated with both the movement and the voice and speech classes. (2 quarter hours)

PRF 314
ACTING LABORATORY
Undergraduate
First course in a 3 course sequence. (1 quarter hour)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 315
ACTING LABORATORY
Undergraduate
Second course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 316
ACTING LABORATORY
Undergraduate
Third course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 317
TOPICS IN SCENE STUDY
Undergraduate
Working with MFA II Directing students, this course will focus on scene study from plays by a particular seminal dramatist. Actors will benefit from in-depth analysis and rehearsal of scenes, exploring the playwright's style and dramatic influence. Course restricted to upper-level Theatre Performance Students only.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 318
TECHNIQUE
Undergraduate
First course in a 2 course sequence. An advanced level acting course which concentrates the work on carefully selected exercises, monologues, and scenes, in order to further develop physical, sensorial, and emotional skills, in preparing a role. (1 quarter hour)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 319
TECHNIQUE
Undergraduate
Second course in a 2 course sequence. An advanced level acting course which concentrates the work on carefully selected exercises, monologues, and scenes, in order to further develop physical, sensorial, and emotional skills, in preparing a role. (1 quarter hour)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
Actors will continue to build their vocabulary of effort/shape techniques, thereby helping them expand range of choice in physical shape and action for role work. Period dances, manners and clothing will be explored to help the students physically connect to the period and/or style work explored in acting and voice class. (2 quarter hours)

PRF 223 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Actors will continue to build their vocabulary of effort/shape techniques, thereby helping them expand range of choice in physical shape and action for role work. Period dances, manners and clothing will be explored to help the students physically connect to the period and/or style work explored in acting and voice class. (2 quarter hours)

PRF 321 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Actors will continue to further the work in period dances and manners with an emphasis on the student taking greater control of this research and its implementation into acting. Imaginative use of self is channeled through character mask work which is then applied to Shakespearean scenes. Full body awareness through movement lessons is continued. (2 quarter hours)

PRF 322 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 323
MOVEMENT III
Undergraduate
Actors will continue to further the work in period dances and manners with an emphasis on the student taking greater control of this research and its implementation into acting. Imaginative use of self is channeled through character mask work which is then applied to Shakespearean scenes. Full body awareness through movement lessons is continued. (2 quarter hours)

PRF 322 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 331
VOICE AND SPEECH III
Undergraduate
Breath work, vocal sounding, and physical alignment are focused on the poetry of Walt Whitman. (2 quarter hours)

PRF 233 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 332
VOICE AND SPEECH III
Undergraduate
An introduction to dialect study includes an exploration of the actor's own idiolect and the acquisition of several dialects, including American Southern, Irish, and varieties of British. (2 quarter hours)

PRF 331 and status as an Undergraduate Theatre student is a prerequisite for this class.

PRF 333
VOICE AND SPEECH III
Undergraduate
Speech work centers on verse speaking and character transformation through vigorous exploration of dramatic texts. Playwrights may include Moliere, Shaw and Howard Barker. (2 quarter hours)

PRF 332 and status as an Undergraduate Theatre student is a prerequisite for this class.

PRF 361
REHEARSAL AND PERFORMANCE I
Undergraduate
First course in a 3 course sequence. Advanced acting and directing students are continually involved in rehearsal and/or performance of plays in showcase, playworks, or workshop productions. These students constitute the acting company for the school. (6 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 362
REHEARSAL AND PERFORMANCE I
Undergraduate
Second course in a 3 course sequence. Advanced acting and directing students are continually involved in rehearsal and/or performance of plays in showcase, playworks, or workshop productions. These students constitute the acting company for the school. (6 quarter hours)

PRF 361 and status as an Undergraduate Theatre student is a prerequisite for this class.

PRF 363
REHEARSAL AND PERFORMANCE I
Undergraduate
Third course in a 3 course sequence. Advanced acting and directing students are continually involved in rehearsal and/or performance of plays in showcase, playworks, or workshop productions. These students constitute the acting company for the school. (6 quarter hours)

PRF 362 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 374
DIRECTING
Undergraduate
First course in a 3 course sequence. An introductory class in which the student is exposed to a wide range of topics related to the craft of the director. These range from pre-production preparation, to the theatre space and composition/picturization considerations, to the actor/director relationship. Teaching methods include lecture, discussion, and in-class projects.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 375
DIRECTING
Undergraduate
Second course in a 3 course sequence. An introductory class in which the student is exposed to a wide range of topics related to the craft of the director. These range from pre-production preparation, to the theatre space and composition/picturization considerations, to the actor/director relationship. Teaching methods include lecture, discussion, and in-class projects.

PRF 374 and status as an Undergraduate Theatre student is a prerequisite for this class.

PRF 376
DIRECTING
Undergraduate
Third course in a 3 course sequence. An introductory class in which the student is exposed to a wide range of topics related to the craft of the director. These range from pre-production preparation, to the theatre space and composition/picturization considerations, to the actor/director relationship. Teaching methods include lecture, discussion, and in-class projects.

PRF 375 and status as an Undergraduate Theatre student is a prerequisite for this class.

PRF 381
ADVANCED STAGE COMBAT
Undergraduate
In this course students will continue their study of unarmed and rapier-&-dagger techniques, as well as adding a third weapon discipline as taught by The Society of American Fight Directors (past options have included knife, broadsword, quarterstaff, small sword) for use in stage and film performance. The students will perform choreography in all three disciplines, in scenes which they themselves select but which are choreographed by the instructor. The students are then given the opportunity to take the SAFD's Skills Proficiency Test for all three weapons, with an outside adjudicator, in the hope of reaching "Actor Combatant" status within the SAFD. (1 quarter hour)

PRF 281 and status as an Undergraduate Theatre student is a prerequisite for this class.
PRF 390  
IMPROVISATION  
Undergraduate

This workshop for graduating performance students is designed to renew the student's relationship with the foundation of the training program: Spolin-based improvisational work. There is a particular emphasis on the use of the games as a stimulus for spontaneity, strong playing relationships and trouble shooting within the rehearsal process.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 399  
INDEPENDENT STUDY: PERFORMANCE  
Undergraduate  
Independent Study (variable credit)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 411  
ACTING IV  
Undergraduate

First course in a 3 course sequence. Utilizing an ensemble approach, this class helps prepare the student for the rigors of the professional world by integrating the skills learned in previous years training through the use of exercises, improvisations, reading and discussions, and a variety of performance projects including scenes and monologues.

PRF 313 and status as an Undergraduate Theatre student is a prerequisite for this class.

PRF 412  
ACTING IV  
Undergraduate

Second course in a 3 course sequence. Utilizing an ensemble approach, this class helps prepare the student for the rigors of the professional world by integrating the skills learned in previous years training through the use of exercises, improvisations, reading and discussions, and a variety of performance projects including scenes and monologues.

PRF 411 and status as an Undergraduate Theatre student is a prerequisite for this class.

PRF 413  
ACTING IV  
Undergraduate

Third course in a 3 course sequence. Utilizing an ensemble approach, this class helps prepare the student for the rigors of the professional world by integrating the skills learned in previous years training through the use of exercises, improvisations, reading and discussions, and a variety of performance projects including scenes and monologues. (2 quarter hours)

PRF 412 and status as an Undergraduate Theatre student is a prerequisite for this class.

PRF 414  
AUDITION  
Undergraduate

Students experience handling the range of possible audition situations. Topics include selecting and preparing materials, building a repertoire, and sight reading. Guest professionals lecture on practical survival techniques from job hunting to union membership. The work of the class culminates in The Graduate Showcase, when students audition for an audience of invited agents, casting directors, and directors. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 415
AUDITION
Undergraduate
Students experience handling the range of possible audition situations. Topics include selecting and preparing materials, building a repertoire, and sight reading. Guest professionals lecture on practical survival techniques from job hunting to union membership. The work of the class culminates in The Graduate Showcase, when students audition for an audience of invited agents, casting directors, and directors. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 416
GRADUATE SHOWCASE
Undergraduate
Through the rehearsal process, undergraduate acting majors prepare monologues and scenes, culminating ultimately in a showcase for an invited audience of casting directors, agents, and directors.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 417
NEW PLAY WORKSHOP
Undergraduate
A specialized workshop which brings together MFA 1 actors, MFA 3 Directors, and BFA 3 & 4 playwrights to explore the collaborative process of developing and staging new plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 418
NEW PLAY WORKSHOP
Undergraduate
A specialized workshop which brings together MFA 1 actors, MFA 3 Directors, and BFA 3 & 4 playwrights to explore the collaborative process of developing and staging new plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 419
NEW PLAY WORKSHOP
Undergraduate
A specialized workshop which brings together MFA 1 actors, MFA 3 Directors, and BFA 3 & 4 playwrights to explore the collaborative process of developing and staging new plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 420
ACTING FOR THE CAMERA
Undergraduate
"Film acting" prepares the student for the professional world in front of the camera(s). The student learns the different techniques between stage and film, between soaps, sitcoms, commercials, and features. The student is also exposed to life on the set, contracts, agents, managers and steps to finding work. This class is a bridge for the student from the classroom to the professional world. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 421
MOVEMENT IV
Undergraduate
The technique of movement to music will be used to: Stimulate the actor's imagination, experiment with the identification, translation, and articulation of creative impulses, intensify ensemble work, expand the range of expression, and strengthen and condition the body. (2 quarter hours)

PRF 323 and status as an Undergraduate Theatre student is a prerequisite for this class.
The technique of Movement to Music will be used to: Stimulate the actor's imagination, experiment with the identification, translation, and articulation of creative impulses, intensify ensemble work, expand the range of expression, and strengthen and condition the body. (2 quarter hours)

PRF 421 and status as an Undergraduate Theatre student is a prerequisite for this class.

This quarter the student will explore African dance, including West African dance styles, songs and rhythms, different ethnic groups from which the dances and songs originated, and the relationship between various West Africa tribal rhythms and movements. (2 quarter hours)

PRF 421 and status as an Undergraduate Theatre student is a prerequisite for this class.

Continued development of skills designed to assist the student with a comfortable transition to the professional world through an approach to singing. (2 quarter hours)

PRF 333 and status as an Undergraduate Theatre student is a prerequisite for this class.

The course is designed to continue the development of professional skills through the study of voiceover. (2 quarter hours)

PRF 432 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

A scene study and monologue class taught by a resident or visiting professional actor or director. Scenes and monologues are drawn from a variety of performance styles. The class is intended to help the student navigate the gap between training and the professional acting world.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 436
ADVANCED SCENE STUDY
Undergraduate
A scene study and monologue class taught by a resident or visiting professional actor or director. Scenes and monologues are drawn from a variety of performance styles. The class is intended to help the student navigate the gap between training and the professional acting world. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 461
REHEARSAL AND PERFORMANCE II
Undergraduate
Advanced acting and directing students are continually involved in rehearsal or performance of plays in Showcase, Playworks, or workshop productions. These students constitute the acting company for the school. (6 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 462
REHEARSAL AND PERFORMANCE II
Undergraduate
Advanced acting and directing students are continually involved in rehearsal or performance of plays in Showcase, Playworks, or workshop productions. These students constitute the acting company for the school. (6 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 463
REHEARSAL AND PERFORMANCE II
Undergraduate
Advanced acting and directing students are continually involved in rehearsal or performance of plays in Showcase, Playworks, or workshop productions. These students constitute the acting company for the school. (6 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 471
SEMINAR: SPECIAL TOPICS IN DIRECTING
Undergraduate
According to the expertise of faculty and the needs and interests of advanced students, this course deals variously with selected topics in stage directing, including the history and development of stage directing as an independent art form, directing theory, and directing methodology.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 511
GRADUATE ACTING I
Graduate
Beginning with a series of exercised and improvisations, the class introduces the acting student to the basic components of the acting process. Scene work forms the backbone of this class.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 512
GRADUATE ACTING I
Graduate
Beginning with a series of exercised and improvisations, the class introduces the acting student to the basic components of the acting process. Scene work forms the backbone of this class.

Status as Graduate Theatre student is a prerequisite for this class.
PRF 513
GRADUATE ACTING I
Graduate
Beginning with a series of exercises and improvisations, the class introduces the acting student to the basic components of the acting process. Scene work forms the backbone of this class.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 521
GRADUATE MOVEMENT I
Graduate
Movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use and over-all self-awareness. This class will also meet two extra hours with a different instructor to concentrated on the imaginative use of self, to explore physical improvisation and to explore movement techniques that will aid the student to use themselves more freely and expand their range of expression. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 522
GRADUATE MOVEMENT I
Graduate
Movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use and over-all self-awareness. This class will also meet two extra hours with a different instructor to concentrated on the imaginative use of self, to explore physical improvisation and to explore movement techniques that will aid the student to use themselves more freely and expand their range of expression. (2 quarter hours)

PRF 521 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 523
GRADUATE MOVEMENT I
Graduate
Work focuses on full body awareness through Feldenkrais (R) movement lessons and through the study of anatomy. The emphasis will be placed on deepening the actor's kinesthetic awareness and on developing a more articulate physical instrument, understanding the restrictions of habit, exploring dynamics and increasing the ability to make dynamic choices. (2 quarter hours)

PRF 522 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 524
GRADUATE MOVEMENT I: FELDENKRAIS
Graduate
An experiential and demonstration course in better self-use and physical organization. Approaches include Feldenkrais, "Awareness Through Movement" lessons and the study of anatomy. (1 quarter hour)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 525
GRAD MOVEMENT I: FELDENKRAIS
Graduate
An experiential and demonstration course in better self-use and physical organization. Approaches include Feldenkrais, "Awareness Through Movement" lessons and the study of anatomy. (1 quarter hour)

PRF 524 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 530
MFA I SPEECH
Graduate
This course is designed to open awareness regarding the placement of vocal resonance and the shaping of vowels and consonants. (1 quarter hour)

Status as Graduate Theatre student is a prerequisite for this class.
Foundation work consists of breathwork, skeletal alignment, and the development of free voice flow. Classes include a regime of intensive group exercises, and attention is paid to the expansion of each actor's individual expressiveness. The fundamental work is inspired by the Feldenkrais(r) and the Lessac System and is further influenced by the writings of Cicely Berry and Patsy Rodenburg. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

Actors will continue to explore fundamental skills acquired during Fall and Winter Quarters. The actors learn the first half of the progression of exercises in Kristin Linklater's Freeing the Natural Voice. The focus is on connecting acting impulses to the voice. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

Objectives are to extend the use of phonetic symbols to describe the speech of self and others, to explore an ever-widening range and flexibility of choice in pronunciation, to develop a more acute "ear" for the music of vowels and consonants and to apply the work to texts. (1 quarter hour)

Status as Graduate Theatre student is a prerequisite for this class.

Intensive work in Spolin-based improvisation in which the issues of creating theatrical reality are addressed through the medium of theatre games. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

Sanford Meisner said, "Acting is the ability to live truthfully under imaginary circumstances." In this first of a two quarter sequence, actors will participate in a sequence of structured improvisational exercises focused on the first half of that sentence: living truthfully. The foundational exercise is called Repetition. Using Repetition as a base, students will explore exercises specifically designed to improve their listening and answering skills and increase their ability to respond to their partner moment to moment. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.
Building on the work of the winter quarter, students will use their enhanced partner attention skills in order to focus on the second half of Meisner's definition of acting: "living truthfully under imaginary circumstances." Each exercise in the progression is designed to expand the actor's ability to imagine and personalize circumstances that are meaningful to them. We will also explore what the student needs to do to be ready for the first moment of a scene or play: Emotional Preparation. Finally, actors will learn how to carry over what they have learned into a scripted scene. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

Graduate acting and direction students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

Graduate acting and direction students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

Graduate acting and direction students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

MFA Workshop I (2) is a flexible laboratory time period designed to accommodate a number of possibilities of workshops, lectures, and demonstrations with guest artists mainly from the Chicago theatre community and beyond. MFA Workshop also accommodates a number of projects generated by the MFA Acting students themselves. As MFA Workshop is a process class, projects and workshops may or may not result in a showing. (Some activities in the class will combine MFA I and MFA II students and some will be specific to each class.) (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

STAGE COMBAT

Students learn the fundamental of hand-to hand combat and weaponry with a focus on developing skills safely and effectively for the stage. (1 quarter hour)

Status as Graduate Theatre student is a prerequisite for this class.

DIRECTING I

This course covers the basics of the directing process with an emphasis on textual analysis. Lecture discussion and performance projects are utilized to develop a common understanding and vocabulary useable in the wide variety of theatrical situations the contemporary director is likely to confront. The final project of the class is the direction of a short play. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 591
DIRECTING THEORIES
Graduate
This course is designed to introduce students to the history of stage directing as an independent art form and to the key directorial thinkers of Western theatre. Through both lecture and practice, students learn the theories and techniques of such innovators as Stanislavski, Meyerhold, Craig Artaud, Brecht, Clurman, Grotowski, Brook, LeCompte, and Bogart. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 592
DIRECTING THEORIES
Graduate
This course is designed to introduce students to the history of stage directing as an independent art form and to the key directorial thinkers of Western theatre. Through both lecture and practice, students learn the theories and techniques of such innovators as Stanislavski, Meyerhold, Craig Artaud, Brecht, Clurman, Grotowski, Brook, LeCompte, and Bogart. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 594
MFA MAKEUP
Graduate
MFA Makeup is a quarter-long course designed to give the graduate actor facility in conceiving and creating the makeup for a given character he or she might have to portray on stage. The goal of the course is to demystify the art of makeup by doing ten weeks of character development, visual research, and hands on painting that will produce a basic level of comfort with makeup techniques. Basic light and shade sculpting will be reviewed. Aging the face, making the face look younger, white face techniques, trauma, animal techniques, and non-realistic makeups will be explored and applied to the various theatre sizes we encounter here at DePaul as well as in stages all over Chicago. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 595
SOLO PERFORMANCE WORKSHOP
Graduate
Designed for advanced BFA and MFA acting students, Solo Performance Workshop offers students the opportunity to conceive, create and develop original solo works through writing exercises, structured improvisation, character creation, and formal experiments. At the end of the quarter, students share their works-in-progress with the TTS community.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 596
ADVANCED STAGE COMBAT
Graduate
An advanced movement class which, as an elective, builds new skills and furthers proficiency gained in the required Stage Combat class. Realistically portraying violence while remaining safe, good partnering, balance, and coordination are some of the movement skills that are honed through this course. Work continues on perfecting techniques and performance in Rapier-and-Dagger and Unarmed combat. Students may take this course more than once as a different third weapon (either knife, smallsword, quarterstaff, or broadsword) is added to the course-work each quarter. The students have the option to have their final scene-work adjudicated by a Fight Master from The Society of American Fight Directors, which, if successful, offers the opportunity to become a recognized “Actor-Combatant” with that institution. Entrance into class is competitive and is partially decided in accordance with discipline shown in the earlier course. (1 quarter hour)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 597
ADVANCED STAGE COMBAT II
Graduate
An advanced movement class which, as an elective, builds new skills and furthers proficiency gained in the required Stage Combat class. PRF 599
INDEPENDENT STUDY
Graduate
Independent Study (variable credit)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 611
GRADUATE ACTING II: CLASSICAL
Graduate
The goal of this year-long course in Heightened Text/Classical Acting is to join the emotional, physical and imaginative life of a role with the technical skills needed to express that character to its fullest. This is achieved through rigorous foundation work and applying the basic tenets of acting to the acting of plays in verse; making strong choices that are grounded in the text, establishing a connection to the scene partner, listening and responding to what is happening in the scene, and integrating the work done in other voice, speech and movement classes. (5 quarter hours)

PRF 513 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 612
GRADUATE ACTING II: CLASSICAL
Graduate
In winter quarter, students work with dramatic monologues, explore and study Shakespeare's prose and scenes from the Jacobean playwrights John Webster, John Ford and Thomas Middleton. Though prose lacks meter, it has its own rhythm, in part defined by punctuation and rhetorical shape. Finding that rhythm of thought is essential to the clarity and life of the prose. With prose, as with meter, rhetoric, and imagery, we approach the work through both brain and body: balancing analytical and physical techniques for understanding and harnessing the dynamics of Shakespeare's language. (5 quarter hours)

PRF 611 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 613
GRADUATE ACTING II: CLASSICAL
Graduate
The spring quarter will focus on comedies by Shakespeare, Moliere, Sheridan, Wilde and Coward. Students will call upon all of the truth-seeking, risk-taking and relish-making that comedy and heightened language requires. Only farce and commedia are larger. The resulting agility with text provides a firm foundation for confident performance of all classical and modern roles. Exploration of Shakespeare's comedies will include collaboration with M.F.A. Directors with scenes to be presented as an invited-audience showing. (5 quarter hours)

PRF 612 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 614
THE DIRECTOR AND THE ACTING PROCESS
Graduate
This year-long class focuses on how the director helps the actor. Through both participation and observation in this undergraduate scene study class taught by a senior member of the acting faculty, the directing student acquires the skills and strategies necessary in helping the actor personalize and embody the text. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.
PRF 615
THE DIRECTOR AND THE ACTING PROCESS
Graduate
This year-long class focuses on how the director helps the actor. Through both participation and observation in this undergraduate scene study class taught by a senior member of the acting faculty, the directing student acquires the skills and strategies necessary in helping the actor personalize and embody the text. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 616
THE DIRECTOR AND THE ACTING PROCESS
Graduate
This year-long class focuses on how the director helps the actor. Through both participation and observation in this undergraduate scene study class taught by a senior member of the acting faculty, the directing student acquires the skills and strategies necessary in helping the actor personalize and embody the text. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 617
DIRECTING: SCENE STUDY
Graduate
This is a two-quarter classic play scene study class. MFA directors will learn a variety of techniques in staging, text analysis, and working with actors. Directors will work with a variety of modern writers including Chekov, Ibsen, Miller, and O'Neill. They will also investigate working with heightened text including Moliere, Shakespeare, and the Greeks. (3 quarter hours)

PRF 583 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 618
DIRECTING: SCENE STUDY
Graduate
This is a two-quarter classic play scene study class. MFA directors will learn a variety of techniques in staging, text analysis, and working with actors. Directors will work with a variety of modern writers including Chekov, Ibsen, Miller, and O'Neill. They will also investigate working with heightened text including Moliere, Shakespeare, and the Greeks. (3 quarter hours)

PRF 583 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 619
THE DIRECTOR AND THE NEW PLAY DEVELOPMENT PROCESS
Graduate
This course is offered every other year and explores the director's role in the development of new plays. MFA Directors work with professional playwrights on new work. Directors are introduced to the many ways they may be charged with presenting new work, including table readings, staged readings, workshops, designed workshops and world premieres. Over the course of the quarter, directors rehearse and present one sit-down reading and one staged reading. Additionally, students rehearse and present a staged reading in a professional situation. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 621
GRADUATE MOVEMENT II
Graduate
Movement work focused on the exploration of effort/shape and how to function within the boundaries of form. Period dances, manners, and clothing will be explored and the creation of specific worlds (styles) will be emphasized. (2 quarter hours)

PRF 523 and status as a Graduate Theatre student is a prerequisite for this class.
PRF 622
GRADUATE MOVEMENT II
Graduate
Movement work focused on the exploration of effort/shape and how to function within the boundaries of form. Period dances, manners, and clothing will be explored and the creation of specific worlds (styles) will be emphasized. (2 quarter hours)

PRF 621 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 623
GRADUATE MOVEMENT II
Graduate
Movement work designed to further the work in period dances, manners, and the creation of specific worlds (styles) with an emphasis on the student taking greater control of this research and its implementation into actin. Full Body awareness through movement lessons is continued. Imaginative use of self is also channeled through character mask work. (2 quarter hours)

PRF 622 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 631
GRADUATE VOICE AND SPEECH II
Graduate
Intensive, individualized work on the development of the full range of the actor's voice. The second half of the Linklater progression is explored in depth. Texts are chosen that place greater demands on the actor's growing emotional and vocal capabilities. (2 quarter hours)

PRF 533 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 632
GRADUATE VOICE AND SPEECH II
Graduate
Intensive, individualized work on the development of the full range of the actor's voice. The second half of the Linklater progression is explored in depth. Texts are chosen that place greater demands on the actor's growing emotional and vocal capabilities. (2 quarter hours)

PRF 631 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 633
GRADUATE VOICE AND SPEECH II
Graduate
Intensive, individualized work on the development of the full range of the actor's voice. The second half of the Linklater progression is explored in depth. Texts are chosen that place greater demands on the actor's growing emotional and vocal capabilities. (2 quarter hours)

PRF 632 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 641
GRADUATE ACTING II: MYTH, FABLE, & FOLKLORE IN DRAMA
Graduate
This course explores the world of archetype, performance and magic in drama across boundaries of time and tradition. Inspired by folktales, myths, oral poetry and rituals from many traditions, the students develop original and play-based theatrical work both solo and ensemble. Resources include the traditional stories of African, Asian, South American, European and American literature, as well as plays from modernity that explore a mythic or folkloric basis. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 642
GRADUATE ACTING II: TRAGIC FOCUS FROM 1700 TO 1950
Graduate
This course explores a broad swath of tragic-focused dramatic material from Restoration through 1950. The students select scenes from plays that follow tragic shape and perform them in scene study form. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.
PRF 643
GRADUATE ACTING II: COMIC FOCUS FROM 1700 TO 1950
Graduate
This course explores a broad swath of comic-focused dramatic material from Restoration through 1950. The students select scenes from plays that follow comic shape and perform them in scene study form. (2 quarter hours)
Status as Graduate Theatre student is a prerequisite for this class.

PRF 661
REHEARSAL AND PERFORMANCE II
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)
Status as Graduate Theatre student is a prerequisite for this class.

PRF 662
REHEARSAL AND PERFORMANCE II
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)
Status as Graduate Theatre student is a prerequisite for this class.

PRF 663
REHEARSAL AND PERFORMANCE II
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)
Status as Graduate Theatre student is a prerequisite for this class.

PRF 671
MFA WORKSHOP II: ACTOR AS ENTREPRENEUR
Graduate
MFA Workshop is a flexible laboratory time period designed to accommodate a number of possibilities of workshops, lectures, and demonstrations with guest artists mainly from the Chicago theatre community and beyond. MFA Workshop also accommodates a number of projects generated by the MFA Acting students themselves. As MFA Workshop is a process class, projects and workshops may or may not result in a showing. (Some activities in the class will combine MFA I and MFA II students and some will be specific to each class.) (2 quarter hours)
Status as Graduate Theatre student is a prerequisite for this class.

PRF 672
MFA WORKSHOP II: ACTOR AS ENTREPRENEUR
Graduate
MFA Workshop is a flexible laboratory time period designed to accommodate a number of possibilities of workshops, lectures, and demonstrations with guest artists mainly from the Chicago theatre community and beyond. MFA Workshop also accommodates a number of projects generated by the MFA Acting students themselves. As MFA Workshop is a process class, projects and workshops may or may not result in a showing. (Some activities in the class will combine MFA I and MFA II students and some will be specific to each class.) (2 quarter hours)
Status as Graduate Theatre student is a prerequisite for this class.
PRF 673
MFA WORKSHOP II: ACTOR AS ENTREPRENEUR
Graduate

MFA Workshop is a flexible laboratory time period designed to accommodate a number of possibilities of workshops, lectures, and demonstrations with guest artists mainly from the Chicago theatre community and beyond. MFA Workshop also accommodates a number of projects generated by the MFA Acting students themselves. As MFA Workshop is a process class, projects and workshops may or may not result in a showing. (Some activities in the class will combine MFA I and MFA II students and some will be specific to each class.) (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 680
ADVANCED STAGE COMBAT
Graduate

In this course students will continue their study of unarmed and rapier-&-dagger techniques, as well as adding a third weapon discipline as taught by The Society of American Fight Directors (past options have included knife, broadsword, quarterstaff, small sword) for use in stage and film performance. The students will perform choreography in all three disciplines, in scenes which they themselves select but which are choreographed by the instructor. The students are then given the opportunity to take the SAFD's Skills Proficiency Test for all three weapons, with an outside adjudicator, in the hope of reaching 'Actor Combatant' status within the SAFD. (1 quarter hour)

PRF 580 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 681
DIRECTING II
Graduate

A laboratory class in which student directed scenes are rehearsed and presented for discussion and criticism. Several cuttings are directed during the year. (3 quarter hours)

PRF 583 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 682
DIRECTING II
Graduate

A laboratory class in which student directed scenes are rehearsed and presented for discussion and criticism. Several cuttings are directed during the year. (3 quarter hours)

PRF 681 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 683
DIRECTING II
Graduate

A laboratory class in which student directed scenes are rehearsed and presented for discussion and criticism. Several cuttings are directed during the year. (3 quarter hours)

PRF 682 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 690
INTERNSHIP
Graduate

The internship provides the student with an opportunity to learn by working with experienced professionals in an area related to his or her area of study at The Theatre School. (variable credit)

Status as Graduate Theatre student is a prerequisite for this class.
This course provides the opportunity for all three years of MFA directors and directing faculty to share, discuss and investigate particular and immediate aspects of directing. The course provides a forum for directors to discuss current rehearsal processes and troubleshoot with their colleagues and instructor. Additionally, directing students reflect on, discuss and receive feedback from their colleagues and instructor on production work. The second half of the course focuses on honing a specific directorial skill or exploring new directorial territory. This component changes quarterly at the discretion of the instructor. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

The second half of the course focuses on honing a specific directorial skill or exploring new directorial territory. This component changes quarterly at the discretion of the instructor. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

This course follows on the Audition class from fall quarter bringing the students into simulated auditions for weekly guests including professional casting directors, casting agents, talent managers, artistic directors, and filmmakers from Chicago and beyond. Feedback will focus on empowering the actors to strengthen their approach, courage, effectiveness and flexibility in the casting process as felt in the "real world."

PRF 711 and status as a Graduate Theatre student is a prerequisite for this class.
PRF 713
GRADUATE ACTING III: ADVANCED IMPROVISATION
Graduate
This intensive course capstones the impulse work and Spolin-based work from MFA I Improvisation by updating the class to improvisational forms that extend beyond scenic and sketch. Mining the rich and still-unfolding history of Chicago improvisation, students flex their creative muscles by exploring long-form improvisational models and unique multi-scenic structures. (2 quarter hours)

PRF 713 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 714
AUDITION
Graduate
This studio-based class introduces the student to multiple forms of audition practiced in professional theater as well as those forms practiced in film, television, and commercials. Students train rigorously with monologues, cold readings, callback scenes, copy reading, and reader-style auditions in weekly class simulations. The course will cover methods for researching and attending auditions, finding and preparing suitable material, as well as handling the audition process professionally and successfully. Discussions of "type," "color-blind casting," manager/agent relationships, and ethical concerns of auditions will be included. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 716
GRADUATE SHOWCASE
Graduate
Through the rehearsal process, graduate acting majors prepare monologues and scenes, culminating ultimately in a showcase for an invited audience of casting directors, agents, and directors. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 720
ACTING FOR THE CAMERA
Graduate
"Film acting" prepares the student for the professional world in front of the camera. Working in front of the camera(s), the student learns the different techniques between stage and film techniques and the differences, between soaps, sitcoms, commercials, and features. The student is also exposed to life on the set, contracts, agents, managers and steps to finding work. This class is a bridge for the student from the classroom to the professional world. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 721
GRADUATE MOVEMENT III
Graduate
The technique of movement to music will be used to: stimulate the actor's imagination, experiment with the identification, translation, and articulation of creative impulses, intensify ensemble work, expand the range of expression and strengthen and condition the body. (2 quarter hours)

PRF 623 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 722
GRADUATE MOVEMENT III
Graduate
An independent study of movement for the actor. (2 quarter hours)

PRF 721 and status as a Graduate Theatre student is a prerequisite for this class.
PRF 723
GRADUATE MOVEMENT III: AFRICAN DANCE
Graduate
This cross-listed course is designed to engage students across majors and expose them to a different culture. African Dance is an advanced movement class that teaches and demands spatial, gestural, and percussive coordination. It allows you to shine as an individual and work as an community of movers/ensemble. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 724
GRADUATE MOVEMENT III: PILATES
Graduate
This is a finishing level movement class that is taught by certified instructors at a nearby studio. Working on Pilates equipment (“reformers”, etc.), this class offers the student a chance to further learn about efficient patterns of motion while creating an evenly conditioned body. Pilates helps the student develop strong core muscles and build strength without “bulking up”. This class will draw upon the student's previous movement classes by challenging their awareness, levels of inquiry and physical decisions in a non-theatrical movement class. (2 quarter hours)

PRF 722 and status as a Graduate Theatre student is a prerequisite for this class.

PRF 730
MFA III VOICE & SPEECH
Graduate
This advanced voice and speech class will focus on the individual needs of the participating students. Students can expect a range of lessons designed to explore voice/body connections using monologues and scenes. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 731
GRADUATE VOICE AND SPEECH III
Graduate
Students continue to develop professional skills through singing. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 732
GRADUATE VOICE AND SPEECH III
Graduate
Students acquire flexibility in role development through vocal exploration. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 733
VOICEOVER
Graduate
The course is designed to continue the development of professional skills through the study of voiceover. (2 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

PRF 761
REHEARSAL AND PERFORMANCE III
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

Graduate acting and directing students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school. (5 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

According to the expertise of faculty and the needs and interests of advanced students, this course deals variously with selected topics in stage directing, including the history and development of stage directing as an independent art form, directing theory, and directing methodology.

Status as Graduate Theatre student is a prerequisite for this class.

A year long research and performance project that culminates in a fully supported production and written thesis. The production is part of The New Directors Series presented for the general public. (9 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

A year long research and performance project that culminates in a fully supported production and written thesis. The production is part of The New Directors Series presented for the general public. (9 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

A year long research and performance project that culminates in a fully supported production and written thesis. The production is part of The New Directors Series presented for the general public. (9 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

A survey of the national political system, including discussions of the political beliefs and behavior of citizens, the constitutional structure, and national political processes.
PSC 140
INTRODUCTION TO INTERNATIONAL RELATIONS
Undergraduate
Three main themes are dealt with: the nature of power in the international political system, conflict and conflict resolution in the system, and the basis of national foreign policy decisions. Issues of current importance, such as the likelihood of global war, conflict between rich and poor nations, and East-West relations, provide the substantive material to illuminate these main themes.

PSC 150
INTRODUCTION TO COMPARATIVE POLITICS
Undergraduate
This course focuses on the way in which political systems other than that of the United States operate. The common features of governments are identified and examined with special attention to such topics as political elites, political institutions, mass political behavior, political change and revolution. Examples are drawn from a wide range of political systems.

PSC 201
GEOGRAPHIC INFORMATION SYSTEMS
Undergraduate
An introductory-level course covering the fundamentals of Geographic Information Systems (GIS). Topics include GPS, remote sensing, data models (vector and raster), coordinate systems, and map design. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS. Cross listed with GEO 141.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

PSC 205
STATISTICS FOR THE SOCIAL SCIENCES
Undergraduate
Data description and interpretation; table construction; correlation, regression and ANOVA; introduction to multivariate analysis; statistical inference and hypothesis testing. Cross-listed with SOC 279.

MAT 100 or higher or placement by test is a prerequisite for this class.

PSC 213
POLITICAL SOCIALIZATION
Undergraduate
This course considers the social institutions important for the political development of individuals. The political significance of institutions such as the family, the school and the work place will be examined. (Please note that the catalog number for this course was changed from PSC 219 to PSC 213 effective Autumn, 2001)

PSC 214
POLITICS AND MULTICULTURALISM
Undergraduate
This course examines the theoretical and practical dilemmas facing multicultural societies, with special emphasis on the United States. Special attention is paid to questions of identity, integration, and separatism.

PSC 216
AMERICAN POLITICAL CULTURE
Undergraduate
An examination of the shared symbol systems that provide meaning and structure for political life. Key historic cultural concepts, such as individualism, materialism and mobility will be considered, and their connections to contemporary popular culture explored.

PSC 217
WOMEN AND POLITICS
Undergraduate
This course explores the ways in which women interpret, gain access to, and use political power. It focuses on sex- and gender-based differences in the political socialization process, and their implications for the participation and organization of women. Gender-related legislation and "women's" political issues are also evaluated. Particular attention is given to women and politics in the United States.
PSC 218
AFRICAN-AMERICAN POLITICS
Undergraduate
This course discusses the nature and scope of African-American politics. Major topics include the radical, liberal, moderate and conservative wings of African-American political discourse, the civil rights movement and its aftermath, the rise of African-American mayors, and presidential politics. An historical survey of African-American politics, and the factors that have shaped them, may also be included.

PSC 219
TOPICS IN POLITICAL CULTURE
Undergraduate
The course focuses on specific themes or concerns in politics and culture. Variable topics.

PSC 220
THE AMERICAN PRESIDENCY
Undergraduate
An examination of the structure of the presidency, its relationship to other political and social institutions, and the way in which that office is shaped by individual presidents.

PSC 221
CONGRESS AND THE LEGISLATIVE PROCESS
Undergraduate
This course provides an analysis of congressional elections, the structure and operation of the United States Congress, the behavior of its members, and the relationship of the Congress to interest groups, the public, the President and the bureaucracy.

PSC 222
POLITICAL PARTIES AND ELECTIONS
Undergraduate
The course explores the changing nature and function of political parties in the United States, factors that affect individual and aggregate vote choice, and the electoral process.

PSC 223
URBAN POLITICS
Undergraduate
Communities running the gamut from small towns through urban neighborhoods to big cities are examined with reference to their structures of government, systems of political influence, and public policy issues.

PSC 224
BUREAUCRACY AND POLITICS
Undergraduate
This course examines the ways that administrative organizations participate in and influence the policy-making process and the common forms of politics within bureaucracies.

PSC 225
STATE POLITICS
Undergraduate
The formal structures of government and political behavior found among the fifty states and their local subdivisions are surveyed.

PSC 229
TOPICS IN AMERICAN POLITICS
Undergraduate
This course discusses selected topics in American politics.
PSC 230
CLASSICAL POLITICAL THOUGHT
Undergraduate
This course examines early political thought, including the Ancient Greek, Roman, and medieval periods (roughly 400 BCE-1500 CE). Readings can include some combination of Thucydides, Aristophanes, Sophocles, Plato, Aristotle, Cicero, Saint Augustine, Saint Thomas Aquinas, and Machiavelli, among others, and topics could include considerations of power, justice, equality, liberty, virtue, civil disobedience, human nature, fraternity, and social harmony, among other themes. Focus will vary according to instructor.

PSC 231
MODERN POLITICAL THOUGHT
Undergraduate
Modern political thought covers the development of political thought from the Renaissance into the 19th century, as it might engage questions of liberty, equality, sovereignty, legitimacy, justice, human nature, the relationship of religion and politics, among other formative concepts. Readings may include some combination of works by Machiavelli, Luther, Calvin, Machiavelli, Hobbes, Locke, Rousseau, Burke, Wollstonecraft, Constant, Tocqueville, Hegel, Marx, Mill, and Nietzsche, among others. Focus will vary according to instructor.

PSC 232
LIBERALISM, CONSERVATISM, AND DEMOCRACY
Undergraduate
This is an introductory political theory course exploring the philosophical foundations of prominent contemporary political ideologies through an examination of historical texts. These texts may include a combination of Thucydides, Ibsen, Tocqueville, Mandeville, Marx, Oakeshott, Bentham, Mill, and Rawls, among others. Focus will vary according to instructor.

PSC 233
POLITICAL IDEAS AND IDEOLOGIES
Undergraduate
An introduction to the enduring political issues confronted by major theorists and political traditions.

PSC 234
FREEDOM AND EMPOWERMENT
Undergraduate
Considers different models for the distribution of power including forms of classic and modern elitism and representative and democratic theories. Explores issues of citizenship, community, participation, representation and constitutionalism. The dynamic of inclusion and exclusion within society are addressed as well as theories that point to political, economic, and cultural liberation.

PSC 235
EQUALITY AND SOCIAL JUSTICE
Undergraduate
Considers how societies distribute social goods of power, status, wealth, and informal resources and models of just distribution utilized in classic and modern political theory. Shifts in the meaning of social justice over the course of history and the critical contests over this issue are addressed, as well as the emergence of new models focusing on regional and global concerns. The major concepts including capitalism, socialism and meritocracy are considered.

PSC 236
LEGITIMACY AND CRISIS
Undergraduate
Considers how states achieve validation with their members and maintain that validation through such mechanisms as socialization, education, information flow, civil religion, and war. Theories of social crisis that challenge regime legitimacy are considered as well as issues of revolution, counterrevolution, and regime stabilization.

PSC 239
TOPICS IN POLITICAL THOUGHT
Undergraduate
Variable topics.
PSC 242
AMERICAN FOREIGN POLICY
Undergraduate
An examination of the forces that shape the broad outlines of United States foreign policy, including historical background, and the effects of social forces and governmental structures. The challenges, opportunities and constraints presented by the international environment are also considered.

PSC 243
RUSSIAN-AMERICAN RELATIONS
Undergraduate
This course will probe the institutions, objectives and techniques which are reflected in contemporary Russian external policy. Economic, military and cultural dimensions will augment the primarily political focus of the course. The principle focus of the course will be Russian-American relations.

PSC 244
LATIN AMERICAN-UNITED STATES RELATIONS
Undergraduate
This course analyzes the dual thrust of Latin American foreign relations: toward autonomy and "third world" nationalism on the one hand, and interdependence and integration on the other. The course analyzes the background of Latin American-United States relations in the 20th century, and also gives attention to the new relationships and issues emerging among Latin American states.

PSC 245
FOREIGN POLICIES OF WESTERN EUROPE
Undergraduate
This course examines the content and domestic and international contexts of the foreign policies of Western European nations, NATO, and the European Union.

PSC 246
ASIAN FOREIGN POLICY
Undergraduate
This course surveys the international relations of selected Asian countries. For each country, the course presents the basic historical background shaping foreign relations, introduces the external and domestic influences on foreign policy, and identifies emerging international challenges. It examines both the economic and military-security dimensions of Asian foreign relations.

PSC 247
U.S.-AFRICA RELATIONS
Undergraduate
This course examines the foreign policy of the United States toward Africa. The course focuses on the historical, civilizational, political, economic, ideological and strategic forces that shape U.S.-Africa relations over time.

PSC 249
TOPICS IN INTERNATIONAL RELATIONS
Undergraduate
This course discusses selected topics in the area of international relations.

PSC 250
EUROPEAN POLITICS
Undergraduate
An overview of European political and economic systems, including an examination of their historical origins, the implications for political and social outcomes, and the contemporary challenges facing Europe.
PSC 251
RUSSIAN POLITICS
Undergraduate
This course offers an overview of the fundamental premises, structures and political developments in Russia. Special attention is given to issues of transition from Communism to the new reality, and the emphasis is on contemporary politics. Key issues include the place of the military, economic and business patterns, health, education, and gender.

PSC 252
LATIN AMERICAN POLITICS
Undergraduate
An examination of the history of Latin America and the major institutions, social sectors, and actors that shape the political life of the region. The course focuses on the development of revolutionary regimes and movements as well as military regimes and their demise during the transition to democracy.

PSC 253
ASIAN POLITICS
Undergraduate
An introduction to contemporary government and politics in Asia, focusing on China and Japan, with comparative reference to other Asian and non-Asian political systems. Special attention will be made to the emerging political and economic role of the Pacific Rim.

PSC 254
AFRICAN POLITICS
Undergraduate
An introduction to African politics. The course will focus on the basic concepts, issues, and theoretical models used in studies of the dynamics of government and politics in Africa from the precolonial era to the contemporary period.

PSC 255
MIDDLE EAST POLITICS
Undergraduate
This course explores contemporary political issues in the Middle East. It includes country profiles, a review of the Arab-Israeli conflict, analysis of opposing viewpoints about the revival of Islam and about Islamic fundamentalism, and the region's position in the emerging new world order.

PSC 259
COUNTRY STUDIES
Undergraduate
Intensive study of the politics of one foreign nation.

PSC 260
LAW AND THE POLITICAL SYSTEM
Undergraduate
An examination of the American judicial system with special attention to the role of the Supreme Court in American politics, the personnel of the American legal system, the problem of crime and the nature of the criminal justice system, and selected issues in constitutional law, including discrimination, privacy, family life, and freedom of speech, press, assembly and religion.

PSC 261
FIRST AMENDMENT RIGHTS
Undergraduate
A discussion and analysis of Supreme Court decisions interpreting the meaning of the First Amendment guarantees of freedom of speech, press, assembly and religion.

PSC 262
RIGHTS OF DEFENDANTS
Undergraduate
A discussion and analysis of Supreme Court decisions interpreting the meaning of the phrase "due process of law" and the various specific provisions protecting the rights of criminal defendants.
PSC 263
EQUAL PROTECTION OF THE LAWS
Undergraduate
A discussion and analysis of Supreme Court decisions interpreting the meaning of the Equal Protection Clause of the 14th Amendment and resolving issues of race and sex discrimination, school segregation, and the status of indigents in American law.

PSC 265
LAW AND POPULAR CULTURE
Undergraduate
This course explores popular portrayals of a variety of legal topics in order to better appreciate how everyday understandings of the law are transmitted through movies, TV, and popular wisdom. Students will be asked to examine how legal meaning is socially constructed and to critically examine the normative implications of these constructions.

PSC 269
TOPICS IN PUBLIC LAW
Undergraduate
This course discusses selected topics in the area of public law.

PSC 281
MODEL UN
Undergraduate
This course will prepare students to participate in Model United Nations conferences. Students will learn about the history and institutions of the United Nations, international statecraft and diplomacy, and parliamentary procedure.

PSC 282
POLITICAL ACTION AND SOCIAL JUSTICE
Undergraduate
This course combines community-based service learning with readings, lectures and classroom discussions to investigate the nature of social justice and the extent to which individual and community political action can promote it. (Please note that the catalog number for this course was changed from PSC 396 to PSC 282 effective Autumn, 2001.)

PSC 284
MOCK TRIAL: CIVIL LAW
Undergraduate
Mock Trial is a co-curricular activity involving intercollegiate competitive simulation of court cases. This course is taught by attorneys and gives students a chance to learn first hand about the work of trial attorneys, understand the judicial system, examine the anatomy of the litigation process, develop critical thinking skills, enhance their communication skills, and participate in simulated trial experiences. Students will learn and practice the basic elements of trial advocacy, including opening statements, direct and cross-examination of witnesses, objections, and closing arguments. PSC 284 focuses on civil law, cases, and procedures.

PSC 285
MOCK TRIAL: CRIMINAL LAW
Undergraduate
Mock Trial is a co-curricular activity involving intercollegiate competitive simulation of court cases. This course is taught by attorneys and gives students a chance to learn first hand about the work of trial attorneys, understand the judicial system, examine the anatomy of the litigation process, develop critical thinking skills, enhance their communication skills, and participate in simulated trial experiences. Students will learn and practice the basic elements of trial advocacy, including opening statements, direct and cross-examination of witnesses, objections, and closing arguments. PSC 285 focuses on criminal law, cases, and procedures.

PSC 286
CAMPAIGNS AND SOCIAL ENGAGEMENT
Undergraduate
This course examines political campaigns and participation in the United States, the role of civic engagement in a representative and democratic political system, and the ethics of political campaigns. Students engage in an experiential project including participation in a political organization.
This class focuses on biking, politics and transportation policy. Through reading, riding, and reflection, students will examine and experience policies that generate bike friendliness. They will also meet with political actors and interest groups that contribute to continuing policy development. The bike's potential contribution to a green future and to alleviating the political problems of allocating scarce finite resources will also be assessed.

Various internships.

An introduction to the scientific method as applied in political science research. Among the topics covered are distinctions between normative and empirical statements, techniques for gathering data, basic data analysis, and interpretation of statistical results. This course is strongly recommended for students considering graduate study.

Good writers intensively revise their work. This class will improve students' writing through instruction and revision. The course is intended for students intending to go to law or graduate school or who struggle with writing papers in political science.

Examines the theoretical and empirical linkages between development and culture. Development remains a hotly contested concept, as its relationship with "culture," or the norms, customs, practices and institutions that govern social relations in a particular society. The relationship between culture and development poses significant challenges to students of international and comparative political economy, especially in an era of unprecedented globalization.

Explore the historical roots and contemporary realities of gay, lesbian, bisexual and transgendered (GLBT) politics, nationally and internationally. Such issues as hate crimes, marriage, AIDS, and ballot initiatives over non-discrimination law and policy have entered the political mainstream since the 1970's. This course examines the GLBT movement, its political and social strategies, conflicts and issues, and the political roles played by its members as participants in political culture. Cross-listed with WGS 332 and LGQ 332.

This course explores the evolving relationships that reside at the intersection of the Internet and politics. Themes covered in this course include the ways in which politicians and organizations use the Internet and how the Internet is changing the relationship between governments and citizens.
PSC 316  
RELIGION, NATIONALISM AND POLITICS  
Undergraduate  
This course looks at the role of religion, nationalism and ethnicity in contemporary political life. Attention is given to the various theories for explaining modern religious politics. The course also examines the phenomenon in practice. Case studies are drawn from a variety of regions and traditions.

PSC 319  
ADVANCED TOPICS IN POLITICAL CULTURE  
Undergraduate  
Various topics in political cultures.

PSC 321  
MASS MEDIA AND AMERICAN POLITICS  
Undergraduate  
The rise, fall and manipulation of public opinion and voting behavior, with special attention given to the mass media.

PSC 322  
URBAN POLICYMAKING  
Undergraduate  
U.S. urban policy is examined from the standpoints of program objectives, the mechanics of their evaluation, and the barriers to their effective implementation.

PSC 323  
CHICAGO GOVERNMENT AND POLITICS  
Undergraduate  
The particular socioeconomic characteristics of Chicago are linked with its formal government structure, informal political style, and prominent public issues. To enhance this analysis, comparisons with other U.S. cities are employed.

PSC 324  
INEQUALITY IN AMERICAN SOCIETY  
Undergraduate  
This course examines the nature and extent of inequality in American society and explores various psychological, political, social, and economic theories which attempt to explain the existence of this phenomenon.

PSC 326  
IDEOLOGY, ECONOMICS AND POLICY  
Undergraduate  
This course examines the economic theories and political ideologies behind the policies advocated by the major political parties in America. The course also examines the social and economic consequences of policies advocated by Democratic and Republican Administrations.

PSC 327  
PUBLIC OPINION  
Undergraduate  
An in-depth look into how individuals form opinions, how researchers attempt to measure attitudes, what the public thinks about a variety of social and public policy issues, and the role that public opinion plays in American society, politics and our notions of democracy.

PSC 328  
ADVANCED TOPICS IN AMERICAN POLITICS  
Undergraduate  
Advanced topics in American politics.
PSC 329
ADVANCED TOPICS IN PUBLIC POLICY
Undergraduate
Advanced Topics In Public Policy.

PSC 330
AMERICAN POLITICAL THOUGHT
Undergraduate
An examination of the enduring problems of American political thought from colonial time to the present, including puritanism, constitutionalism, Calhoun, populism, socialism, Social Darwinism, and pragmatism.

PSC 331
CONTEMPORARY POLITICAL THOUGHT
Undergraduate
This is a rigorous seminar course that covers the development of social and political ideas from roughly the 19th to 21st centuries. Themes can include critical theory/Marxism, democratic theory, human nature, the trajectory of history, the forces of social change, the nature of power, the relationship of religion and politics, egalitarianism, liberalism and republicanism, existentialism, post-modernism, and post-structuralism. Authors may include a combination of Marx, Nietzsche, Weber, Freud, Schmitt, Marcuse, Arendt, Habermas, Foucault, Rawls, Nozick, and others. Focus will vary according to instructor.

PSC 333
MARXISM
Undergraduate
An analysis of Marxist political and economic thought as represented by the writings of Marx, Lenin, Trotsky, Lukacs, Sartre. Primary texts will be examined, and their application to the contemporary setting considered.

PSC 335
THEORIES OF THE CHURCH
Undergraduate
This course deals with the theological, social, and political implications of ecclesiology, or "theories of the church". Students will explore ideas about the origins and purposes of the Church, notions of authority and membership, matters of church and state, and more. The impact of Marxist, feminist, and conservative ideologies on understandings of the church may also be explored. The course will integrate theological, sociological, and political methods of analysis. Cross-listed as CTH 209.

PSC 336
AFRICAN-AMERICAN POLITICAL THOUGHT
Undergraduate
Considers black political thought through a variety of ideological, political, legal and historical perspectives. First explores early efforts by blacks to challenge the racialized limitations of America's core principles of liberty, equality and democracy in the contexts of abolitionism, the women's suffrage movements, Manifest Destiny, and American industrialism. Then concentrates on the evolution of contemporary black political thought, with an emphasis on both conceptual diversity and continuity over time.

PSC 337
CHRISTIAN POLITICAL THOUGHT
Undergraduate
An exploration of key themes, thinkers and movements in the Christian tradition's engagement with power, governance, authority, and allegiance. Students explore scriptural and early church sources, important pre-modern theologians like Augustine and Aquinas, Reformation figures including Luther and Calvin, and contemporary philosophers, theologians and topics.

PSC 338
POLITICS AND LITERATURE
Undergraduate
This course investigates themes in politics through the perspective of major works of literature. The emphasis is on the ways in which writers utilize the imaginative process to represent and investigate the working of society, culture, the individual, the public and private realms, and relationships in order to convey a complex understanding of political values and processes in their eras.
PSC 339
ADVANCED TOPICS IN POLITICAL THOUGHT
Undergraduate
Advanced topics in political thought.

PSC 340
THE EUROPEAN UNION
Undergraduate
This course examines the history, institutional structures and processes, and policies of the EU. It will look at how the EU is unique, sharing characteristics of states and of international organizations.

PSC 341
POLITICAL ISLAM AND AMERICAN FOREIGN POLICY
Undergraduate
This course examines the historical development of the international Islamist movement and the U.S. government's response to it. The course will include a review of Islamist ideology and the debates over how to deal with the militant challenge. The course also examines U.S. policies in the post 9/11 period.

PSC 342
ARMS, SECURITY, AND WAR
Undergraduate
Focus is on the military dimensions of international politics, such as nuclear and conventional deterrence, arms races, arms control, alliances, and American defense policy, and how those affect war and peace.

PSC 343
ASIAN POLITICAL ECONOMY
Undergraduate
This course offers an overview of the geopolitics, culture and history behind the "East Asian Miracle." It provides students with the tools to analyze the core theories, actors, and current and historical events in the study of the international relations, business, politics, and economy of Asia.

PSC 344
WORLD POLITICAL ECONOMY
Undergraduate
Political conflicts over trade relations, global inequality, development, growth, inflation, and scarcity are analyzed, with special emphasis placed on a description of the institutions and processes that shape international economics.

PSC 345
THE CATHOLIC CHURCH IN WORLD POLITICS
Undergraduate
This course seeks to familiarize students with major theories, research traditions, and issues regarding the role of Catholicism in the contemporary world. It will assess the role of various levels and actors with the Church--the Vatican, priests and nuns, lay groups and movements, activists, and others--in working as forces of social change/stability in matters of world politics, economics, and culture. The course will also consider the impact of globalization and other transnational processes on the activities and options of Catholic institutions and actors.

PSC 346
THE UNITED NATIONS AND WORLD PROBLEMS
Undergraduate
This course will examine the historical and theoretical foundations of the United Nations, particularly in light of the changing problems and issues that confront the global community, such as international peace and security, global economic inequality, and environmental and human rights norms.
PSC 347
ETHICS IN WORLD POLITICS
Undergraduate
Drawing on general theories of international relations and historical cases, this course examines both the forces that inhibit the development and effectiveness of ethical norms at the international level and the conditions under which such norms develop and affect the behavior of states and other actors.

PSC 349
ADVANCED TOPICS IN INTERNATIONAL RELATIONS
Undergraduate
Advanced topics in international relations.

PSC 350
JAPANESE POLITICS
Undergraduate
This course examines the meeting of the ancient and the modern in the context of 21st century politics in Japan. Exploring political, economic, and cultural practices and institutions, this class provides an in-depth understanding of Japan's political system from its origins in Samurai traditions to current challenges facing Japan's democracy and economy.

PSC 351
REVOLUTION AND TERRORISM
Undergraduate
Aspects of revolution, emphasizing contemporary cases, including units on ideology, leaders, followers, organization, techniques, weapons, causes and theories of revolution.

PSC 352
CHINESE POLITICS
Undergraduate
This course examines the political system of China and the major domestic issues in contemporary Chinese politics. The course explores the rise and early governance of the Chinese Communist Party, the economic and political developments since the start of the reform (post 1978) era, and the main political challenges facing Chinese society today.

PSC 353
COMPARATIVE DEMOCRACY AND DICTATORSHIP
Undergraduate
This course compares democracies and dictatorships in order to ascertain how they differ and what are the requisite conditions for each type of political system. Among the concepts to be examined are elections, participation, distribution of resources, corruption, and transparency.

PSC 354
POLITICAL REPRESENTATION IN COMPARATIVE PERSPECTIVE
Undergraduate
A comparative treatment of those processes and institutions that comprise the representative system, including executives, legislatures, political parties, coalitions, and elections.

PSC 356
ETHNIC CONFLICT IN THE THIRD WORLD
Undergraduate
This course examines the nature, causes, and consequences of ethnic conflict in "Third World" nations, including conflict resolution in the presence of ethnic and racial cleavages.
PSC 358  
GLOBAL GENDER ISSUES  
Undergraduate  
This course examines how inequalities between women and men are connected to the global politics of power, security, the political economy, and ecology. It focuses on the theoretical and practical linkages between "women's issues" and political matters such as wars of secession, arms proliferation, global economic recessions, and environmental degradation. Questions of the nature of power, abuses of human rights, the human costs of global inequality, and the meaning of a just world order are explored.

PSC 359  
ADVANCED TOPICS IN COMPARATIVE POLITICS  
Undergraduate  
Advanced topics in comparative politics.

PSC 361  
INTERNATIONAL LAW  
Undergraduate  
The nature, sources, and applications of international law in the international community, including issues of recognition, territory, jurisdiction, settlement of international disputes, diplomatic agents, intervention and the use of force.

PSC 362  
THE CRIMINAL JUSTICE SYSTEM  
Undergraduate  
An overview of the important features of the American criminal justice system, including the role of police, courts and corrections. The course analyzes conventional and alternative definitions of crime and explanations for criminal behavior. An examination of race and class issues as they relate to criminal justice, and their implications for public policy, is also included.

PSC 363  
WOMEN AND THE LAW  
Undergraduate  
This course investigates the variety of ways in which women come into relation with the law, focusing on laws and judicial decisions dealing with equal opportunity. Cross-listed as WGS 326.

PSC 364  
COMPARATIVE PROTECTION OF INDIVIDUAL RIGHTS  
Undergraduate  
This course will compare the status of individual rights in Britain, the United States, and Canada, and under the European Convention on Human Rights. Course materials will consist of judicial decisions and other materials on specific areas of civil liberties.

PSC 365  
VOTING, REPRESENTATION, AND THE LAW  
Undergraduate  
This course explores key laws and policies governing voting rights, including the U.S. Constitution, the Voting Rights Act, voter ID laws, and the implications of mass incarceration on representation. The course is intended to familiarize students with various legal theories which courts use to evaluate our voting system. Course readings may include Supreme Court opinions, law review articles, and political analyses of voting rights and other electoral processes.

PSC 366  
NATIONAL SECURITY AND THE U.S. CONSTITUTION  
Undergraduate  
Explores the relationship between the U.S. Constitution and the government's responsibility for the protection of national security. The course examines the constitutional doctrine of separation of powers and the respective roles of Congress, the President, and the courts in the conduct of foreign policy and the use of military force. It also examines the relationship between national security and protection of various rights, including freedom of speech, freedom of the press, privacy, and personal liberty.
PSC 367
IMMIGRATION LAW
Undergraduate
Examines the various legal categories under the U.S. Immigration and Nationality Act that permits persons to be admitted to the United States either temporarily or permanently. It also examines U.S. policies toward illegal immigration and the rights of aliens after the 9/11 terrorist attacks.

PSC 368
RIGHTS-BASED SOCIAL MOVEMENTS
Undergraduate
This course offers an in-depth look at the relationship between rights, identity, and social movements. It will examine how activists pursue policy goals through the use of rights-based legal strategies. Course material will cover a diverse set of groups, which may include: African Americans, disabled persons, Native Americans, immigrants, gun owners, women, anti-abortion activists, opponents of affirmative action, and LGBTQ individuals.

PSC 369
ADVANCED TOPICS IN PUBLIC LAW
Undergraduate
Advanced topics in public law.

PSC 390
CAPSTONE SEMINAR
Undergraduate
Senior capstone seminar.
Senior standing is a prerequisite for this class.

PSC 392
INTERNSHIP
Undergraduate
By arrangement.

PSC 393
HONORS SEMINAR
Undergraduate
Variable credit.

PSC 394
SENIOR THESIS
Undergraduate
Variable credit.

PSC 395
TRAVEL/ STUDY
Undergraduate
By arrangement with sponsoring faculty, foreign and domestic tours or residence programs may be combined with lectures, readings, and research assignments. Variable credit.

PSC 399
INDEPENDENT STUDY
Undergraduate
Variable credit.
PSY 105
INTRODUCTORY PSYCHOLOGY I
Undergraduate
Introduction to the history and science of psychology; human development through the life span; learning, memory, thinking, language, and intelligence; personality; social psychology. PSY 105 and PSY 106 will include a research participation requirement of no more than six hours. PSY 105 and PSY 106 may be taken in either order; one is not a prerequisite for the other.

PSY 106
INTRODUCTORY PSYCHOLOGY II
Undergraduate
Introduction to the history and science of psychology; neuroscience and behavior; sensation and perception; states of consciousness; motivation and work; emotion; stress and health; psychological disorders; therapy. PSY 105 and PSY 106 will include a research participation requirement of no more than six hours. PSY 105 and PSY 106 may be taken in either order; one is not a prerequisite for the other.

PSY 210
PSYCHOLOGY OF BUSINESS AND INDUSTRY
Undergraduate
Applications of theories and methods of psychology to the study of human behavior in business, industry and other work environments. Cannot be used as psychology major course.

PSY 213
LESBIAN, GAY, BISEXUAL AND TRANSGENDER PSYCHOLOGY
Undergraduate
Overview of psychological and social issues relevant to lesbian, gay, bisexual, and transgendered (LGBT) individuals and communities. The course will examine key concepts, LGBT psychological research, and efforts to promote liberation and well being. Cannot be used as psychology major course.

PSY 215
HUMAN SEXUALITY
Undergraduate
Historical, cultural, psychological and physiological aspects of human sexuality. Cannot be used as psychology major course.

PSY 218
PSYCHOLOGICAL PROBLEMS OF CONTEMPORARY FAMILY
Undergraduate
An overview of the major psychological issues facing the contemporary family. Cannot be used as psychology major course.

PSY 220
LATINA/O PSYCHOLOGY
Undergraduate
The purpose of this course is to examine the psychological research literature on the mental health and well being of Latina/o populations in the United States. A number of relevant topics will be examined, including the current state of Latinas/os in psychology, cultural characteristics and values, immigration, acculturation, ethnic identity, stereotypes and discrimination, health, and education. The goal of this course is for students to be better equipped in understanding the factors that influence the psychology of the Latina/o population. Cannot be used as psychology major course.

PSY 240
STATISTICS I
Undergraduate
Descriptive and inferential statistics in the behavioral sciences.

MAT 100, MAT 101 or equivalent or higher is a prerequisite for this class.
PSY 241
RESEARCH METHODS I
Undergraduate
Introduction to methods of psychological research to enable students to become more sophisticated consumers of research information. Students will learn and apply basic methodological concepts and skills. Students will conduct a non-experimental research project, analyze the data, and write a paper based on the project. PSY 241 and PSY 242 may be taken in either order; one is not a prerequisite for the other.

A grade of C- or better in PSY 240 (or BIO 206 or ENV 260 or MAT 137 or MAT 242 or SOC 279) is a prerequisite for this course.

PSY 242
RESEARCH METHODS II
Undergraduate
Design, execution, analysis and interpretation of psychology research, with an emphasis on experimental design. Students will conduct an experimental research project, analyze the data, and write a paper based on the project. PSY 241 and PSY 242 may be taken in either order; one is not a prerequisite for the other.

A grade of C- or better in PSY 240 (or BIO 206 or ENV 260 or MAT 137 or MAT 242 or SOC 279) is a prerequisite for this course.

PSY 280
CONTEMPORARY ISSUES
Undergraduate
Psychological aspects of topics of current interest and relevance.

PSY 302
PERSONAL ADJUSTMENT AND MENTAL HEALTH
Undergraduate
Psychological principles involved in personality and interpersonal adjustments. Cannot be used as psychology major course.

PSY 303
HUMAN DEVELOPMENT
Undergraduate
Principles of development from conception through maturity. Cannot be used as a psychology major course.

PSY 305
PSYCHOLOGY AND SOCIAL JUSTICE
Undergraduate
This course is designed to provide students with both in-class and applied experience within the field of psychology, including an overview of psychology as an academic discipline. Offered every quarter.

PSY 306
SERVICE LEARNING
Undergraduate
This course is designed to provide students with both in-class and applied experience in a specific area of psychology. Course focuses on one particular topic per term, such as Mental Health Problems in Contemporary Society, Chronic Fatigue Syndrome, etc. Check course schedule for current offerings.

PSY 310
CONNECTING WITH YOUTH THROUGH RESEARCH, ADVOCACY, AND SERVICE: QUARTER I
Undergraduate
This course is the first in a three-quarter service learning sequence designed to teach students the latest research on stressors affecting low-income urban communities and effective strategies for making a difference in those communities. Students will put their learning into practice by connecting as mentors and advocates with low-income urban adolescents.
PSY 311
CONNECTING WITH YOUTH THROUGH RESEARCH, ADVOCACY, AND SERVICE: QUARTER 2
Undergraduate
This course is the second in a three-quarter service learning sequence designed to teach students the latest research on stressors affecting low-income urban communities and effective strategies for making a difference in those communities. Students will put their learning into practice by connecting as mentors and advocates with low-income urban adolescents. (variable credit)

PSY 312
CONNECTING WITH YOUTH THROUGH RESEARCH, ADVOCACY, AND SERVICE: QUARTER 3
Undergraduate
This course is the third in a three-quarter service learning sequence designed to teach students the latest research on stressors affecting low-income urban communities and effective strategies for making a difference in those communities. Students will put their learning into practice by connecting as mentors and advocates with low-income urban adolescents. (variable credit)

PSY 317
PSYCHOLOGY OF INTERPERSONAL RELATIONSHIP
Undergraduate
A review of psychological issues, theory, and research related to close relationships, e.g., attraction, love, attachment, friendship, sexuality, jealousy, conflict and power.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 325
PSYCHOLOGY OF WOMEN
Undergraduate
A review of research and theory on women, including sexist bias in methodology, violence and discrimination against women, gender differences in power and nonverbal behavior in relationships.

PSY 105 or 106 is a prerequisite for this class.

PSY 326
PSYCHOLOGY OF MEN
Undergraduate
This course evaluates and investigates research and theory of the psychology of males in present society.

PSY 105 or 106 is a prerequisite for this class.

PSY 333
CHILD PSYCHOLOGY
Undergraduate
Infancy and childhood. Description and evaluation of principles and theories of development from conception through childhood.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 334
ADOLESCENT PSYCHOLOGY
Undergraduate
Biological, cognitive, emotional and social development. Covers theories and research on normal and abnormal development during adolescence.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 340
STATISTICS II
Undergraduate
Introduction to advanced statistical techniques such as analysis of variance and regression models.

A grade of C- or better in PSY 240 (or BIO 206 or ENV 260 or MAT 137 or MAT 242 or SOC 279) is a prerequisite for this course.
PSY 342
RESEARCH METHODS III
Undergraduate
Advanced research methods; topics will vary by instructor. In addition to the prerequisites, completion of PSY 340 is highly recommended.

A grade of C- or better in PSY 240 (or BIO 206 or ENV 260 or MAT 137 or MAT 242 or SOC 279 ) and PSY 242 Research II are prerequisites for this course.

PSY 343
INTRODUCTION TO PSYCHOLOGICAL MEASUREMENT
Undergraduate
Measurement in psychology; emphasis on standardization, reliability, validity; test and scale development.

A grade of C- or better in PSY 240 (or BIO 206 or ENV 260 or MAT 137 or MAT 242 or SOC 279) is a prerequisite for this course.

PSY 345
CULTURAL ISSUES IN PSYCHOLOGY
Undergraduate
Race and ethnic relations in the U.S. is not a fixed, static phenomenon, but rather a dynamic, ever-changing pattern of relationships. This course assists students in understanding the diversity, heterogeneity, and complexity of race relations in American society.

PSY 105 or 106 is a prerequisite for this class.

PSY 346
PSYCHOLOGY OF THE AFRICAN-AMERICAN CHILD
Undergraduate
Development and socialization of the African-American child from infancy to adolescence. Emphasis on psychological and cultural factors which influence these processes. Understanding the child, family and the child, language and IQ, education and learning styles, and cultural identity are all emphasized. Cross-listed with PSY 521.

PSY 105 or 106 is a prerequisite for this class.

PSY 347
SOCIAL PSYCHOLOGY
Undergraduate
Survey of social psychological theory and research on how individual behavior, thoughts, and feelings are influenced by the social context in which they occur.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 348
SOCIAL COGNITION
Undergraduate
Theory and research addressing major aspects of social cognition, including how people subjectively understand and mentally represent themselves and others (e.g., in terms of unique attributes versus applicable stereotypes), and how these representations influence self-regulation, person and group perception, and social behavior.

A grade of C- or better in PSY 242 & PSY 347 are prerequisites for this course.

PSY 351
THEORIES OF PERSONALITY
Undergraduate
Survey of major personality theories with separate emphasis on clinically-derived and research-derived theories. Freudian psychoanalysis is especially emphasized in the clinical area. Personality research philosophy is presented separately and as part of the research-derived theories.

PSY 105 or 106 is a prerequisite for this class.
PSY 353
ABNORMAL PSYCHOLOGY
Undergraduate
Description of the nature, symptoms, treatment applications, and cause of psychological disorders.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 354
COMMUNITY PSYCHOLOGY
Undergraduate
Focus on systemic and ecological theories of human behavior, diversity, social support, community intervention and evaluation, empowerment, social change, and working with underserved populations. Cross level with PSY 654.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 355
GROUPS AND ORGANIZATIONS
Undergraduate
Issues related to how groups, small and large, function. Includes group formation, relationships, decision-making, performance, and conflict. Also, discussion of organizations as examples of large groups. Students in the I/O concentration are strongly advised to take PSY 380 before taking this course.

PSY 105 (or PSY 106) is a prerequisite for this class.

PSY 356
PRINCIPLES OF FIELD RESEARCH AND ACTION
Undergraduate
Basic knowledge of program development, program evaluation, consultation, human diversity, ethics, group dynamics, and interpersonal skills.

PSY 105 or 106 and PSY 354 are prerequisites for this class, and admission into the community psychology concentration.

PSY 357
APPLIED PSYCHOLOGY I
Undergraduate
Overview of behavioral principles, strategies, and system approaches to individual, organizational, and community change. Generally taken in junior year.

PSY 358
APPLIED PSYCHOLOGY II
Undergraduate
Approaches to counseling, psychotherapy and helping relationships. Generally taken in junior year.

PSY 357 is a prerequisite for this class.

PSY 359
FIELD WORK IN COMMUNITY RESEARCH AND ACTION
Undergraduate
Field work in community research and action.

PSY 356 and senior standing are a prerequisite for this class.

PSY 360
THEORIES OF LEARNING AND COGNITION
Undergraduate
Explores classical and modern theories and research in the science of learning and cognition.

PSY 105 or 106 is a prerequisite for this class.
PSY 361  
HISTORY AND SYSTEMS OF PSYCHOLOGY  
Undergraduate  
Historical development of psychology and its fields.

(PSY 105 or 106), (PSY 240 or equivalents), PSY 241 and PSY 242 are a prerequisite for this class.

PSY 363  
ALCOHOLISM, DRUG ADDICTION AND RECOVERY  
Undergraduate  
Survey of major research findings in the area of alcoholism and drug addiction. Description of treatment programs for recovery and explorations of drug free ways to alter consciousness.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 364  
HEALTH PSYCHOLOGY  
Undergraduate  
This course provides an overview of such topics as psychosocial factors in disease etiology, health behaviors and behavior change, stress and coping, adjustment to illness, social relationships and health, mind-body interactions and intervention, and patient-provider interaction.

PSY 105 or 106 is a prerequisite for this class.

PSY 366  
BEHAVIOR PROBLEMS OF CHILDREN  
Undergraduate  
Factors associated with deviance in children and adolescents. Examination of personal and social consequences. Review treatment programs for children.

PSY 105 or 106 is a prerequisite for this class.

PSY 367  
PSYCHOLOGY OF EXCEPTIONAL CHILDREN  
Undergraduate  
Comprehensive introduction to the study of special children--those children who do not reach their fullest potential because of physical, social, cognitive, or behavioral factors.

PSY 105 or 106 is a prerequisite for this class.

PSY 369  
ADVANCED LI FESPAN DEVELOPMENT  
Undergraduate  
Overview of cognitive, emotional, and social development across the lifespan. This course will take a topical approach to the study of development.

PSY 105 or 106 (or the equivalent) is a prerequisite for this course.

PSY 370  
SOCIAL AND EMOTIONAL DEVELOPMENT  
Undergraduate  
This course focuses on the development of emotions, social relationships and social interactions. Both theoretical perspectives and research findings are present and analyzed. Topics to be covered may include primary emotions and their development, nonverbal communication of emotion, socialization within the family, friendship and peer relations, aggression, moral development, sex role development and attachment.

PSY 105 or 106 and PSY 333 are prerequisites for this class.
PSY 372

PSYCHOLOGY OF DISASTER AND CRISIS INTERVENTION
Undergraduate

This course is designed for psychology majors as well as students from a variety of fields interested in careers related to crisis intervention. Students will learn about the psychological sequelae of natural and man-made disasters, terror, and war, as well as different models for crisis interventions. Students will review a combination of book chapters, scientific reviews, and primary empirical sources, and class discussion will be used to advance students' understanding of the state of this field and the central issues that practitioners face when working with vulnerable disaster survivors. Multiple assessment methods will be used to evaluate student learning and application of course material.

PSY 105 (or PSY 106 or instructor consent) is a prerequisite for this class.

PSY 373

HAPPINESS, JUDGMENT AND DECISION MAKING
Undergraduate

An introduction to research in judgment and choice behaviors. Judgment refers to how people evaluate information and make predictions. Choice concerns how people select a course of action among alternatives.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 377

PHYSIOLOGICAL PSYCHOLOGY
Undergraduate

Nervous system and endocrine functions as related to behavior.

A grade of C- or better in PSY 240 (or BIO 206 or ENV 260 or MAT 137 or MAT 242 or SOC 279) is a prerequisite for this course.

PSY 378

PSYCHOLOGY OF TRAUMA
Undergraduate

This course is designed for psychology majors as well as students from a variety of fields interested in careers working with children and adults who have experienced trauma. Students will learn about the psychological sequelae of different traumatic experiences, with emphasis on violence and victimization, as well as assessment methods and interventions aimed at reducing violence and addressing post-traumatic stress symptoms. Students will review a combination of book chapters, scientific reviews, and primary empirical sources. Lecture and class discussion will be used to advance students' understanding of the central psychological theories of trauma and issues that need to be addressed to advance this field. A variety of evaluation activities will be used to assess student learning and application of key concepts to real life issues.

PSY 105 or 106 (or the equivalent) is a prerequisite for this course.

PSY 379

COGNITIVE NEUROSCIENCE
Undergraduate

This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

A grade of C- or better in PSY 240 (or BIO 206 or ENV 260 or MAT 137 or MAT 242 or SOC 279) and NEU 201 (or BIO/NEU 339 or BIO 340 or PSY 377) is a prerequisite for this course.

PSY 380

INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
Undergraduate

Application of theories and methods of psychology to the study of human behavior in business, industry, and other organizations. Cross-listed with PSY 680.

PSY 105 or 106 is a prerequisite for this class.
PSY 381
PERSONNEL PSYCHOLOGY
Undergraduate
Application of concepts from differential psychology and measurement to employee selection, performance appraisal, placement and training in business and other organizations.

PSY 380 or consent is a prerequisite for this class.

PSY 382
ORGANIZATIONAL BEHAVIOR
Undergraduate
Theories in learning, personality, work motivation, job attitudes, and organizational culture, and application to employee behavior.

PSY 380 or consent is a prerequisite for this class.

PSY 385
TRAINING AND DEVELOPMENT IN ORGANIZATIONS
Undergraduate
Issues related to training in industry and other organizations. Such topics as needs assessment, training program design, and program evaluation will be covered, along with relevant ethical, social and economic issues.

PSY 380 or consent is a prerequisite for this class.

PSY 388
TOPICAL SEMINAR IN INDUSTRIAL-ORGANIZATIONAL PSYCHOLOGY
Undergraduate
Current topics and issues in I-O Psychology beyond the introductory course with particular emphasis on recent developments and research. Topics vary.

PSY 380 or consent is a prerequisite for this class.

PSY 390
INDEPENDENT RESEARCH IN PSYCHOLOGY
Undergraduate
Independent Research in Psychology. Student will work with a faculty mentor to develop an individualized plan of work involving some aspect of research. This can include, but is not limited to, reviewing literature, developing a research project, collecting data on an ongoing project, coding or analyzing data, developing a research presentation, or working in the community on research or intervention projects. Students taking the course for 4 or more units must produce a graded project at the end of the quarter. (variable credit)

PSY 394
ADVANCED TOPICS IN PSYCHOLOGY
Undergraduate
Senior standing is a prerequisite for this class.

PSY 395
FIELD WORK/INTERNSHIP
Undergraduate
Supervised experience in selected off-campus settings and associated readings. Generally taken in senior year.

PSY 357 and PSY 358 are a prerequisite for this class.

PSY 396
HONORS IN PSYCHOLOGY
Undergraduate
Attendance at monthly Honors Seminar is required. Honors thesis is completed during the student's senior year. Can be registered for more than once.

Senior standing is a prerequisite for this class.
PSY 397  
**EXPERIENTIAL LEARNING/PSYCHOLOGY RESEARCH**  
Undergraduate  
Experiential Learning/Psychology Research. (variable credit)

PSY 398  
**TUTORING AND MENTORING IN PSYCHOLOGY**  
Undergraduate  
(variable credit)  
Senior standing is a prerequisite for this class.

PSY 399  
**INDEPENDENT STUDY**  
Undergraduate  
(variable credit)

PSY 402  
**PERCEPTUAL PROCESSES**  
Graduate  
Analysis of the variables involved in the determination of perception with particular attention to the problems of space, motion, distance, size, form, aftereffects and constancies.

PSY 404  
**PERCEPTION AND COGNITION**  
Graduate  
Survey of classical and instrumental conditioning, biological constraints, attention, memory, cognition, and practical applications. Major theoretical approaches include stimulus-response, early cognitive theories and information processing theory.

PSY 406  
**PHYSIOLOGICAL PROCESSES**  
Graduate  
The functional role of neural systems important for the processes of motivation, emotion, sleep, memory, and cognition.

PSY 409  
**STATISTICS FOR THE BEHAVIORAL SCIENCES**  
Graduate  
Applied inferential statistics.  
PSY 240 is a prerequisite for this class.

PSY 410  
**ADVANCED STATISTICS I**  
Graduate  
Brief review of introductory statistics, followed by a focus on Analysis of Variance and related techniques for data analysis. One way, factorial, repeated measures and ANCOVA with a priori and post hoc tests. Nonparametric alternatives to mean-comparison tests.

PSY 411  
**ADVANCED STATISTICS II**  
Graduate  
Major issues in the Human Resource area. Topics include personnel selection methods, focusing on recruitment, biodata, references, testing, interviews. Discussion of psychometrics, validity generalization, utility.

PSY 410 is a prerequisite for this class.
PSY 412  
ADVANCED STATISTICS III  
Graduate  
Advanced Statistics III  

PSY 411 is a prerequisite for this class.

PSY 413  
ANALYSIS OF LONGITUDINAL DATA  
Graduate  
Analysis of changes and time-dependent data.  

PSY 411 is a prerequisite for this class.

PSY 414  
CATEGORICAL DATA ANALYSIS  
Graduate  
Analysis of contingency tables and count data logit, probit and loglinear models.  

PSY 411 is a prerequisite for this class.

PSY 416  
METHODS IN QUALITATIVE RESEARCH  
Graduate  
History and paradigms of qualitative research, the strategies and data collection methods used, and how to make sense of qualitative data once it is collected.

PSY 418  
MULTIVARIATE STATISTICAL ANALYSIS  
Graduate  
Multivariate regression, principal component, cluster analysis and multidimensional scaling. Canonical correlation, multivariate analysis of variance, linear discriminant function analysis.

PSY 411 is a prerequisite for this class.

PSY 419  
FACTOR ANALYSIS AND PATH MODELING  
Graduate  
Theoretical foundations, methods of analysis, and comparison of various factor analytic models. Structural equation and measurement models using the Mplus/ LISREL program.

PSY 411 is a prerequisite for this class.

PSY 420  
QUANTITATIVE RESEARCH DESIGN  
Graduate  
Design and analysis of basic and applied psychological research with an emphasis on experimental and quasi-experimental design, and basic issues of measurement.

Status as a Psychology graduate student (or permission of instructor) is a prerequisite for this course.

PSY 421  
ADVANCED EXPERIMENTAL DESIGN  
Graduate  
None  

PSY 420 is a prerequisite for this class.
PSY 422
COMPUTING FOR THE BEHAVIORAL SCIENTIST
Graduate
An introduction to computer programming, web development, and other computer-intensive techniques as applied to behavioral science research.

PSY 425
COGNITIVE PROCESSES
Graduate
Cognitive Processes

PSY 426
LANGUAGE AND COGNITION
Graduate
An overview of research in the psychology of language, including such topics as speech perception, sentence processing, discourse comprehension, and pragmatics. Classic and contemporary models and research paradigms are examined.

PSY 427
SENSORY PROCESSES
Graduate
Sensory Processes

PSY 430
SOCIAL PSYCHOLOGY OF THE SELF
Graduate
Theory and research addressing the social psychology of the self. The self is a central theme in psychological theory and research in many domains and on different levels of analysis. This class will explore the self as a basis for organizing and integrating information, as well as for guiding behavior in social contexts.

PSY 432
ATTITUDE ANALYSIS
Graduate
Theory and research in attitude formation and organization, communication and persuasion, resistance to persuasion, and measurement techniques.

PSY 433
SOCIAL JUDGMENT
Graduate
Theory and research in judgment of social stimuli, perceiving and evaluating persons, and social comparison processes.

PSY 434
SMALL GROUP BEHAVIOR
Graduate
Theory and research in goal formation, conformity, power and communication structures, cohesion, and task performance. The emphasis is on the behavior of persons within groups.

PSY 435
PSYCHOLOGY OF INTERPERSONAL RELATIONSHIPS
Graduate
Theory and research on selected aspects of close relationships.

PSY 437
ADVANCED PERSONALITY
Graduate
Critical analysis of research in personality with emphasis on the development and testability of major constructs in contemporary research.
PSY 439
COGNITIVE DEVELOPMENT
Graduate
This is a graduate course in advanced developmental psychology, with a focus on cognitive and social-cognitive development in infancy through childhood. Example topics include children's early thinking about number, morality, and social relationships, as well as how early environments inform children's cognitive and social-cognitive development. Where appropriate, this class will make links to both philosophical inquiries into the nature of the human mind and to practical inquiries concerning education and public policy.

PSY 440
PSYCHOLOGY OF WORK AND MOTIVATION
Graduate
Current research and theories in organizational psychology relating to motivation, job satisfaction, work attitudes, employee withdrawal, and counterproductivity.

PSY 440 is a prerequisite for this class.

PSY 441
PSYCHOLOGY OF LEADERSHIP
Graduate
Current research and theories in organizational psychology relating to leadership, supervision, job performance, and managerial training. Emphasis is on theoretical development and empirical evaluation of constructs in contemporary research.

PSY 441 is a prerequisite for this class.

PSY 442
PERSONNEL PSYCHOLOGY
Graduate
Major issues in the Human Resource area. Topics include personnel selection methods, focusing on recruitment, biodata, references, testing, interviews. Discussion of psychometrics, validity generalization, utility.

PSY 442 is a prerequisite for this class.

PSY 443
PSYCHOLOGY OF DESIGN
Graduate
This course helps students understand how theoretical principles of psychology can be applied to the design of human-centered organizations, environments and technologies. Prior familiarity with psychology and experimental design is strongly recommended. Cross-level with PSY 383.

PSY 443 is a prerequisite for this class.

PSY 444
PERFORMANCE APPRAISAL
Graduate
Theory of criterion development, the evaluation process, and measurement in performance appraisal. Emphasis on design and development.

PSY 444 is a prerequisite for this class.

PSY 445
ADVANCED TRAINING AND DEVELOPMENT IN ORGANIZATIONS
Graduate
In-depth exposure to issues related to training in industry and other organizations. Such topics as needs assessment, training program design, program evaluation, and relevant social and economic issues will be covered.

PSY 445 is a prerequisite for this class.
PSY 446
PSYCHOLOGICAL THEORIES OF ORGANIZATIONS
Graduate
Theory and research in the psychology of organizations relating to organizational design, analysis, systems, processes and change.

PSY 448 is a prerequisite for this class.

PSY 447
ORGANIZATIONAL CONSULTATION
Graduate
Applies behavioral science and managerial theories and methodologies to organizational consultation and change processes.

PSY 446 and PSY 448 are prerequisites for this class.

PSY 448
CONCEPTS, METHODS, AND ETHICS FOR INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Major concepts and techniques relevant to I/O Psychology. Topics include job analysis, job evaluation, basics of regression, legal issues, affirmative action, and ethics.

PSY 450
PSYCHOLOGICAL MEASUREMENT
Graduate
Logical and mathematical principles underlying test construction with emphasis on evaluating the reliability and validity of scores.

PSY 451
APPLIED STATISTICAL PREDICTION
Graduate
Applications of statistics and psychological measurement to the problems of predicting human performance. Several computer programs will be used to analyze data.

PSY 454
BEHAVIOR MODIFICATION
Graduate
Analysis of principles, practices and research related to learning theory and the modification of human behavior.

PSY 461
ETHICS & HISTORY OF PSYCHOLOGY SEMINAR
Graduate
A review of the history of modern psychology, including various theoretical systems and American Psychological Association ethical principles for psychologists. Topics covered will include contributions of important leaders in the field, specific trends throughout the history of psychology, and the major philosophical questions underlying psychological science. Students will learn the historical context from which ethical codes have emerged and how to apply them in a competent manner.

PSY 469
EMOTIONS AND EMOTIONAL DEVELOPMENT
Graduate
Emotions And Emotional Development

PSY 473
THE PSYCHOLOGY OF JUDGMENT AND DECISION-MAKING
Graduate
An introduction to research in judgment and choice behaviors. Judgment refers to how people evaluate information and make predictions. Choice concerns how people select a course of action among alternatives.
PSY 481
CHILD ASSESSMENT
Graduate
Introduction to the clinical assessment of children and adolescents using formal and informal tests of cognitive, social, and emotional functioning.

PSY 482
ADULT ASSESSMENT
Graduate
Introduction to the clinical assessment of adults using formal and informal tests of cognitive, personality, and emotional functioning.

PSY 481 is a prerequisite for this course.

PSY 483
ADVANCED ASSESSMENT
Graduate
Advanced study of projective techniques and other assessment methods, with emphasis on analysis, interpretation and integration of all pertinent clinical data, and report writing.

PSY 481 and PSY 482 are prerequisites for this class.

PSY 484
BEHAVIORAL ASSESSMENT
Graduate
Behavioral observation and recording. Self-report measures. Physiological measurement. Evaluation of behavioral measures and areas of research.

PSY 485
NEUROPSYCHOLOGICAL TESTING
Graduate
Introduction to theory and assessment techniques related to adult and child neurological functioning.

PSY 486
ADVANCED PSYCHOPATHOLOGY
Graduate
Review of the major diagnostic categories as outlined by the current Diagnostic and Statistical Manual. Current issues in psychopathology and related research are reviewed.

PSY 487
PSYCHOPATHOLOGY OF THE CHILD
Graduate
Introduction to the many categories of psychopathology affecting children and adolescents. Emphasis on the developmental and environmental contexts.

PSY 488
PRINCIPLES OF PSYCHOTHERAPY AND BEHAVIOR MODIFICATION
Graduate
Analysis of theoretical approaches to psychotherapy.

PSY 489
GROUP PSYCHOTHERAPY
Graduate
Principles, theories and techniques of group psychotherapy. Problems of selection of group members and evaluation of progress.
PSY 491
TREATMENT METHODS WITH CHILDREN
Graduate
Consideration of a variety of treatment approaches used to help alleviate the psychological problems of children.

PSY 492
PRINCIPLES OF CONSULTATION
Graduate
Principles and dynamics in consulting with communities. Emphasis on collaborative and participatory approaches to consulting with communities in social change efforts, research/evaluation, organizational development, and systems issues. Gaining entree, assessing community context, and maintaining relationships with diverse community stakeholders.

PSY 493
ADVANCED COMMUNITY PSYCHOLOGY
Graduate
An advanced introduction to community psychology with an emphasis on major historical and contemporary themes such as prevention of psychological problems and promotion of wellness, empowerment and social justice, community research methods, diversity in gender, ethnicity, sexual orientation and disability status, community processes, and collaboration and intervention to address social problems.

PSY 495
GRANT WRITING IN PSYCHOLOGY
Graduate
This course will facilitate students' ability to transpose psychology principles and theory into practice by preparing them to be psychology entrepreneurs via the grant writing process. Class members will become familiar with public and private funding sources, searching for appropriate funding sources, and reviewing a proposal. Class members will create a grant proposal that can be submitted to a funding organization.

PSY 500
PROFESSIONAL ETHICS
Graduate
Introduction to ethical issues in the field of clinical psychology. (2 quarter hours)

PSY 501
STATISTICAL APPLICATIONS SEMINAR
Graduate
Introduction to advanced applications of statistical packages for data analysis, data management, and simulation.

PSY 510
BEHAVIORAL MEDICINE
Graduate
Behavioral medicine approaches are introduced.

PSY 511
HEALTH PSYCHOLOGY
Graduate
A survey of the psychological factors involved in health and illness. Also explores the psychological issues in prevention of illness, and psychological considerations in treatment. Cross-listed as MPH 511.

PSY 520
PRINCIPLES OF HUMAN DIVERSITY
Graduate
Considerations related to minority status and issues specific to diagnostics and interventions with minority populations.
PSY 521
PSYCHOLOGY OF THE AFRICAN-AMERICAN CHILD
Graduate
Development and socialization of African-American child from infancy to adolescence. Emphasis on psychological and cultural factors which influence these processes. Understanding the child, family, language and IQ, education and learning styles, and cultural identity are all emphasized. Cross-level with PSY 346.

PSY 550
SEMINAR IN TEACHING PSYCHOLOGY
Graduate
This course exposes students to major pedagogical and classroom management considerations in higher education and familiarizes students with instructional support services across the university. This year-long, cohort-based course is required for graduate students prior to becoming instructors in the department. It begins each Winter Quarter and ends Autumn Quarter. Students who enroll should expect to complete all requirements for the master's degree prior to Autumn Quarter. (0 credit hours)

PSY 554
EMOTIONAL DEVELOPMENT
Graduate
Theory and research addressing major aspects of emotional development across the entire life span. Topics may include the development of stereotyping and attitudes, socio-emotional development from infancy into old age, age differences in positive and negative emotions, emotion regulation, cultural factors, decision making, caregiving, attachment, and sexuality.

PSY 555
SOCIAL DEVELOPMENT
Graduate
Theoretical foundations, methodology, and current research on social development from childhood through adolescence. Developmental issues in the contexts of peers, families, neighborhoods, culture, and media. Implications for prevention/ intervention programs and social policy will also be discussed.

PSY 556
PREJUDICE AND INTERGROUP RELATIONS
Graduate
Theory and research addressing major aspects of intergroup relations and perception, with an emphasis on the psychological and group-based underpinnings of identity, status and hierarchy, intergroup perception (stereotyping and prejudice), discrimination, conflict and cooperation. This class will draw from a variety of perspectives in social psychology including evolutionary, social cognitive, and minority perspectives.

PSY 558
SEMINAR IN ADVANCED STATISTICS
Graduate
PSY 411 and PSY 420 are a prerequisite for this class.

PSY 559
SEMINAR IN INDUSTRIAL/ ORGANIZATIONAL PSYCHOLOGY
Graduate
Four quarter hours.
PSY 448 or instructor consent is a prerequisite for this class.

PSY 560
SOCIAL COGNITION
Graduate
Theory and research addressing major aspects of social cognition, including how people subjectively understand and mentally represent themselves and others (e.g., in terms of unique versus applicable stereotypes), and how these representations influence self-regulation, person and group perception, and social behavior.
PSY 561
ADVANCED PSYCHOLOGY OF WOMEN AND GENDER
Graduate
A review of research and theory on women, including sexist biases in traditional research, feminist methodology, pedagogy and therapy, violence against women, gender differences in development, relationships, sexuality, and the interplay of gender, race and sexual orientation. Cross-listed with MLS 478 and WGS 470.

PSY 562
SEMINAR IN FAMILY THERAPY
Graduate
A review of systems theory and the assessment and treatment of families.

PSY 563
MENTAL IMAGERY
Graduate
Theory, research and practical applications of mental imagery are considered in lecture/discussion/student-report format. Variety of imagery techniques will be reviewed which have been found useful in research and practice. Special attention devoted to the differences between subjective approaches (consciousness and vividness ratings) versus objective approaches (memory measures) of studying imagery. Cross-listed with PSY 362.

PSY 565
PROFESSIONAL DEVELOPMENT SEMINAR
Graduate
An interactive seminar that provides guidance regarding master's thesis research, comprehensive examination or literature review, and/or dissertation plans. Attention to pathways for success in doctoral education, practica, internship, scientific research and careers. Selected topics vary with student needs and interests. (0 credit hours)

PSY 567
SPECIAL TOPICS IN COMMUNITY PSYCHOLOGY
Graduate
Explores topics of current interest in the area of Community Psychology and related fields for advanced graduate students, with emphases on theory, research and intervention.

PSY 568
SEMINAR IN PREVENTION AND INTERVENTION
Graduate
Analysis of theories of community and human behaviors from the standpoint of general systems principles.

PSY 569
SEMINAR IN PROGRAM EVALUATION
Graduate
Evaluation of social programs and policies (including needs assessment, logic models, process evaluation and outcome evaluation). Theories, methods, and practice of program evaluation

PSY 570
SEMINAR IN PSYCHOTHERAPY RESEARCH
Graduate
(variable credit)

PSY 572
PSYCHOBIOLOGY OF SOCIAL COGNITION
Graduate
Explores social cognition in the frame of evolutionary, neurophysiological, and developmental biology. Comparison of human with other animal social-cognitive characteristics will be examined. Neuropsychological data and developmental psychobiology will be studied.
PSY 574
PRACTICUM IN SPECIAL AREAS IN PSYCHOLOGY
Graduate
Supervised experience in advanced clinical practice in a clinic, hospital, or community agency setting. (0 credit hours)

PSY 577, PSY 578, PSY 579, PSY 582, PSY 583, and PSY 584 are prerequisites for this class.

PSY 575
PRACTICUM IN SPECIAL AREAS IN PSYCHOLOGY
Graduate
Supervised experience in advanced clinical practice in a clinic, hospital, or community agency setting. Zero credit hours.

PSY 577, PSY 578, PSY 579, PSY 582, PSY 583, and PSY 584 are prerequisites for this class.

PSY 576
PRACTICUM IN SPECIAL AREAS IN PSYCHOLOGY
Graduate
Supervised experience in advanced clinical practice in a clinic, hospital, or community agency setting. Zero credit hours.

PSY 577, PSY 578, PSY 579, PSY 582, PSY 583, and PSY 584 are prerequisites for this class.

PSY 577
PRACTICUM IN CLINICAL ASSESSMENT
Graduate
Supervised experience in intake interviewing, psychological evaluation, and case conference presentation in a clinic, hospital or community agency setting. (0 credit hours)

PSY 578
PRACTICUM IN CLINICAL PSYCHOLOGY
Graduate
Supervised experience in diagnostic assessment, intervention planning, psychotherapy and report writing through varied assignments to campus or community agencies. (0 credit hours)

PSY 579
PRACTICUM IN CHILD CLINICAL PROCEDURES
Graduate
Supervised practice in the diagnosis and treatment process of the problems of children and adolescents. May be repeated twice. (0 credit hours)

PSY 582
ADVANCED PRACTICUM-CLINICAL PSYCHOLOGY
Graduate
(0 credit hours)

PSY 583
PRACTICUM IN COMMUNITY MENTAL HEALTH
Graduate
(0 credit hours)

PSY 584
ADVANCED PRACTICUM IN EVIDENCE-BASED PRACTICE IN PSYCHOLOGY
Graduate
(0 credit hours)
PSY 585
FIELDWORK IN COMMUNITY SETTINGS
Graduate
An applied experience which integrates skills of consultation, program development, advocacy, and program evaluation. (0 credit hours)

PSY 586
PRACTICUM IN APPLIED INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Supervised experience in the application of I/O Psychology and technical report writing.

PSY 587
PRACTICUM IN ADVANCED RESEARCH IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Supervised experience in I/O research and the preparation of research results for publication.

PSY 588
TOPICS IN PSYCHOLOGICAL SCIENCE I
Graduate
Consideration of topics of current interest to the faculty and graduate students. Includes readings and discussion of important current research, discussions of professional development and presentations by invited speakers. (0 credit hours)

PSY 589
TOPICS IN PSYCHOLOGICAL SCIENCE II
Graduate
Continuation of PSY 588. Consideration of topics of current interest to the faculty and advanced graduate students.

PSY 590
THESIS RESEARCH SEMINAR
Graduate
Seminar for Master's students working on their thesis. Students will develop their proposals or write their results and discussion sections, depending on status of their thesis research. Students will also review and critique work of other students. (0 credit hours)

PSY 591
COLLOQUIUM IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Required of all I/O students. Register in Fall term; continues throughout the year. Presentations on research and other topics by students, faculty, and invited speakers. (0 credit hours)

PSY 592
DIRECTED RESEARCH
Graduate

PSY 593
PRE-DOCTORAL RESEARCH
Graduate
Graduate students in specific doctoral programs are required to register for this course for at least three quarters prior to registering for PSY 598 (Dissertation Seminar) or PSY 599 (Dissertation Research). This course requires full-time (at least 8-12 hours per week) work on research under the supervision of a faculty mentor. (0 credit hours)
PSY 594
DIRECTED READINGS IN PSYCHOLOGY
Graduate
A course involving intensive readings in contemporary psychological literature. (Arranged by prior consultation with the chair). (variable credit)

PSY 595
GRADUATE RESEARCH
Graduate
As needed for MS, MA, and PhD students. This course requires full-time (at least 8-12 hours per week) work on research under the supervision of a faculty mentor. (0 credit hours)

PSY 596
INTERNSHIP IN CLINICAL PSYCHOLOGY
Graduate
Arranged with consent of director of clinical training. (0 credit hours)

PSY 597
MASTER'S THESIS RESEARCH
Graduate
Original investigation of a specific research problem. Four hours required. (variable credit)

PSY 598
DISSERTATION RESEARCH SEMINAR
Graduate
Seminar for doctoral candidates working on their dissertation. Students will develop their proposals or write their results and discussion sections, depending on status of their dissertation research. Students will also review and critique work of other students. (0 credit hours)

PSY 599
DOCTORAL DISSERTATION RESEARCH
Graduate
Original investigation of a specific research problem. Four hours required. (variable credit)

PSY 634
YOUTH DEVELOPMENT
Graduate
Focus on normal processes in adolescent development as well as risk factors for maladaptive development.

PSY 639
ADVANCED DEVELOPMENTAL PSYCHOLOGY
Graduate
Focus on major theories and research in child development.

PSY 653
ABNORMAL PSYCHOLOGY
Graduate
Focus on the primary psychological diagnoses common today.

PSY 654
COMMUNITY PSYCHOLOGY
Graduate
Focus on systemic and ecological theories of human behavior, diversity, social support, community intervention and evaluation, empowerment, social change, and working with underserved populations. Community service project required. Cross-level with PSY 354.
PSY 663
ALCOHOLISM, DRUG ADDICTION, AND RECOVERY
Graduate
Research and theory on alcoholism, drug addiction, and recovery are the focus of this course. Cross-level with PSY 363.

PSY 678
CHILD ABUSE AND NEGLект
Graduate
This course surveys the causes, consequences, and contextual factors associated with child maltreatment (abuse and neglect) and interventions for children and families. The course considers maltreatment within an ecological context and works to build sensitivity to diverse families and cultural patterns. It is designed for graduate students with some prior coursework or experience in child psychology, mental health, or child welfare. Cross-level with PSY 368.

Graduate standing is a prerequisite for this class.

PSY 680
INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
Graduate
Application of theories and methods of psychology to the study of human behavior in business, industry, and other organizations. Cross-level with PSY 380.

PSY 701
CANDIDACY CONTINUATION
Graduate
Students admitted to candidacy for the doctoral degree who have completed all course and dissertation registration requirements are required to be registered each quarter of the academic year until the dissertation and final examination have been completed. (0 credit hours)

PSY 702
NON-RESIDENT CANDIDACY CONTINUATION
Graduate
Non-Resident Candidacy Continuation. (0 credit hours)

RE 250
CAREER MANAGEMENT FOR REAL ESTATE PROFESSIONALS
Undergraduate
This course is designed to introduce students to various career opportunities in the Real Estate industry and to develop skills to enhance their ability to secure a position and pursue a successful career. (2 quarter hours)

Declared or Intended Real Estate major or minor and junior standing are prerequisites for this class.

RE 300
REAL ESTATE LAW
Undergraduate
This course provides an overview of legal principles including: ownership structures, transactions and title issues, land use regulation, environmental constraints, and income tax and property tax.

RE 320
URBAN PLANNING AND PUBLIC POLICY
Undergraduate
This course provides a systematic introduction to urban planning issues for students who have little background in this area. The course will explore both historical and contemporary urban planning concepts and will cover a wide variety of topics including land use regulation, economic development, sustainability in the built environment, growth management and urban development issues, all generally from a real estate and built environment perspective.

Junior Standing or above is a prerequisite for this class.
RE 325
PROJECT MANAGEMENT: DESIGN & CONSTRUCTION
Undergraduate
This course provides a systematic introduction to building design and construction for students who have little background in this area. This course is an introduction to this topic and is not for those students who have significant experience in building design or construction. The course will explore both the conceptual and practical aspects of designing and constructing commercial buildings and will cover a wide variety of topics including: site development and zoning issues, building design and layout, building materials, systems and construction methods and practices, construction budgets, project scheduling and overall proforma feasibility.

Junior Standing or above is a prerequisite for this class.

RE 350
REAL ESTATE ANALYSIS
Undergraduate
This course introduces essential institutional, legal, regulatory, and financial aspects of real estate in the U.S. economy and financial system. It is designed to facilitate personal decisions on home ownership and investment and it incorporates demographic data for real estate market analysis, exercises in land use planning and investment decisions.

Junior standing with at least 88 cumulative units is a prerequisite for this class.

RE 352
REAL ESTATE FINANCE
Undergraduate
Patterns of financing real estate property, including a general overview of the importance of real estate capital markets. Institutional analysis, including critique of alternative mortgage instruments, an analysis of installment financing, construction financing, convertible mortgages, and leases and sale-leaseback financing. Secondary mortgage markets and mortgage-related securities, risk and return analysis.

FIN 310 is a prerequisite and RE 350 is a corequisite for this class.

RE 353
REAL ESTATE INVESTMENT
Undergraduate
The course explores real estate investment risk and opportunity. Topics include commercial lease transactions and value; impact of taxation on the investment decision, asset development and acquisition analysis, and alternative investment vehicles.

FIN 310 and (RE 350 or FIN 350) are prerequisites for this class.

RE 354
REAL ESTATE VALUATION
Undergraduate
Real Estate Valuation. Introduction to market analysis and the appraisal process. Basic approaches to valuation analysis including both residential and income properties. This course includes the income capitalization methods and complex valuation assignments.

RE 350 is a corequisite for this class.

RE 398
SPECIAL TOPICS
Undergraduate
Special Topics in Real Estate offers an in-depth study of current industry-related issues. Content, format, and prerequisites vary by section. Subject matter will be indicated in the class schedule.

RE 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in real estate. (variable credit)
RE 520
URBAN PLANNING AND PUBLIC POLICY
Graduate
This course provides a systematic introduction to urban planning issues for students who have little background in this area. The course will explore both historical and contemporary urban planning concepts and will cover a wide variety of topics including land use regulation, economic development, sustainability in the built environment, growth management and urban development issues, all generally from a real estate and built environment perspective.

RE 521
LEGAL ISSUES IN REAL ESTATE
Graduate
This is a survey course of real estate law and will be approached on both practical and theoretical levels, with an emphasis on the historical underpinnings of land law. Topics include contracts, landlord/tenant law, title, transactions, taxation, and land use.

RE 525
PROJECT MANAGEMENT: DESIGN AND CONSTRUCTION
Graduate
This course provides a systematic introduction to building design and construction for students who have little background in this area. The course explores both the conceptual and practical aspects of designing and constructing commercial buildings and covers a wide variety of topics including: site development - building design - building materials, systems and construction methods and practices- budgets - scheduling - overall proforma feasibility- LEED Certification, Sustainability and Green Building issuesThe course concludes with a major project that will allow each student to develop a conceptual building design, a construction budget, a construction schedule and a pro forma feasibility analysis.

RE 530
REAL ESTATE INVESTMENT AND FINANCE
Graduate
This course is designed to develop the vocabulary, concepts, and skills for rational real estate investment decisions. It will consider both the debt and equity side of private market real estate decision making. Topics include risk analysis, regional and sub-market economics, and property specific analysis. Case analysis is an integral part of the course.

Completion or concurrent enrollment in FIN 555 is required.

RE 531
REAL ESTATE CAPITAL MARKETS AND FINANCE
Graduate
Analysis of private and public institutions involved in real estate finance. A critical study of institutional arrangements facilitating real estate investment and development, and analysis of yields and risk in mortgages and mortgage backed securities.

RE 530 is a co-requisite for this class.

RE 533
REAL ESTATE MARKET ANALYSIS AND VALUATION
Graduate
Market analysis techniques and critical analysis of the appraisal process in the valuation of income producing properties. Exploration of both basic and innovative approaches to value employing computer databases and information technology.

RE 530 is a co-requisite for this class.

RE 535
INSTITUTIONAL REAL ESTATE INVESTMENT
Graduate
Analysis of complex ownership structures and the changing world of real estate capital markets. Case course with a focus on institutional investment portfolios including private equity, pension fund and REIT acquisition & disposition decisions.

RE 530 is a co-requisite for this class.
RE 570
ADVANCED REAL ESTATE ANALYSIS WITH ARGUS
Graduate
This course is designed to develop the vocabulary, concepts, and analytical skills necessary to make informed commercial real estate investment decisions at a very detailed level using the Argus software platform, as well as other software and database tools for research and analysis. RE530 is a prerequisite or may be taken concurrently with the permission of the instructor.

RE 530 is a prerequisite for this class.

RE 574
MULTIFAMILY HOUSING POLICY AND FINANCE
Graduate
This class will explore multifamily housing as a real estate asset type and the trends that are driving this product in today's market. As part of this discussion, we will explore the public policy options that have been used to make multifamily housing affordable to a broad range of the population, and both the public and private financing mechanisms that are used to reach that affordability goal. We will explore how this product type is designed, who are the people this product type is to serve, what information is important in developing the product design, and what are the available sources of funding and sources of profitability for multifamily development.

RE 574
MULTIFAMILY HOUSING POLICY AND FINANCE
Graduate
This class will explore multifamily housing as a real estate asset type and the trends that are driving this product in today's market. As part of this discussion, we will explore the public policy options that have been used to make multifamily housing affordable to a broad range of the population, and both the public and private financing mechanisms that are used to reach that affordability goal. We will explore how this product type is designed, who are the people this product type is to serve, what information is important in developing the product design, and what are the available sources of funding and sources of profitability for multifamily development.

RE 576
REAL ESTATE DEVELOPMENT
Graduate
This course is organized around the several states of real estate development: Project Feasibility, Design and Site Planning, Financing, Construction, Marketing, Operations and Disposition. At the end of the course, students will have developed an understanding of the complexity of the development process and its interdisciplinary nature. The course will utilize a major development case study project to demonstrate the key elements of the real estate development process and the challenges of bringing all these elements together into one coherent and feasible development proposal.

RE 530 is a prerequisite for this class.

RE 596
REAL ESTATE SEMINAR
Graduate
The objectives of this course are to identify current, researchable topics pertaining to real estate and for students to perform independent research on selected topics approved by the seminar professor. Meetings will be held on both a class and on an individual basis. Students will present both their proposals and the results of their preliminary investigations in class. A seminar research paper is required of each student.

RE 793
INTERNSHIP
Graduate
This is a unique opportunity in which interns gain experience and apply their skills in the workplace. While building an impressive resume for further job opportunities, the intern will be immersed in a stimulating environment with a pool of established resources. The course may be taken multiple times for a total of 4 credit hours. (1 quarter hour)

RE 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. In-depth study of current issues in Real Estate. Subject matter will be indicated in class schedule. Offered variably and may be taken multiple times provided the content is not duplicated.
RE 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in finance.

REC 200
INTRODUCTION TO SOUND RECORDING TECHNOLOGY
Undergraduate
Introductory course to acquaint students with concepts and techniques of sound recording technology. Open to all music students and required for SRT majors. (2 quarter hours)

Status as an Undergraduate Music student or a Music Recording Minor student is a prerequisite for this class.

REC 201
RECORDING TECHNOLOGY I
Undergraduate
Basic studies in audio engineering with technological application in recording studio settings. Emphasis on acoustics, microphones, and microphone techniques. This is part of a two-year sequence of courses for sound recording technology majors.

REC 200 and MUS 230 and status as a Sound Recording Technology student are prerequisites for this class.

REC 202
RECORDING TECHNOLOGY II
Undergraduate
Basic studies in audio engineering with technological application in recording studio settings. Emphasis on principles of digital recording and editing. This is part of a two-year sequence of courses for sound recording technology majors.

REC 201 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 203
RECORDING TECHNOLOGY III
Undergraduate
Basic studies in audio engineering with technological application in recording studio settings. Emphasis analog recording and signal processing. This is part of a two-year sequence of courses for sound recording technology majors.

REC 202 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 209
ELECTRONICS FOR MUSICIANS
Undergraduate
This course is designed to teach practical skills in analog electronics. Some basic theory will be outlined using as little mathematics as possible. Hands-on skills to be covered include soldering, testing, and modifying solid state circuitry.

Status as an Undergraduate Music student is a prerequisite for this class.

REC 216
PRO TOOLS AND THE DEVELOPMENT OF THE RECORDING STUDIO
Undergraduate
The goal of this course is to transform students from casual listeners of recorded music into educated critical analysts. Students will study the history and development of recording technology and recording studios. Lab exercises will teach the basics of recording and signal processing using Digidesign Pro Tools software. Arts and Literature.

REC 217
EDM AND THE ART OF ELECTRONIC MUSIC
Undergraduate
The course will trace the genesis of contemporary electronic dance music and explore the interrelationships between popular electronic music styles and the electroacoustic music of the twentieth and twenty-first centuries. Students will develop listening skills and key musical vocabulary to enable them to analyze, interpret and respond to historically significant works from a diverse body of relevant genres.
REC 300
CONTEMPORARY FILM SCORING
Undergraduate

Undergraduate level course designed for Music, CDM, Communication, and Theater majors who want an understanding of film music and the mechanics of scoring to picture. It will cover the basics of spotting films, writing with a click track, and utilizing synthesizers and samplers to realize film music.

Status as Undergraduate Music student, Undergraduate Theatre student, Undergraduate Communication student or Undergraduate CDM student is a prerequisite for this class.

REC 301
RECORDING TECHNOLOGY IV
Undergraduate

Basic studies in audio engineering with technological application in recording studio settings. Emphasis on consoles and audio for film. This is part of a two-year sequence of courses for sound recording technology majors. COREQUISITE(S): REC 304.

REC 203 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 302
RECORDING TECHNOLOGY V
Undergraduate

Basic studies in audio engineering with technological application in recording studio settings. Emphasis on music production and the capstone audio/video sound design project. This is part of a two-year sequence of courses for sound recording technology majors. COREQUISITE(S): REC 305.

REC 301 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 303
RECORDING TECHNOLOGY VI
Undergraduate

Basic studies in audio engineering with technological application in recording studio settings. Emphasis on surround sound mixing, and DVD authoring. This is part of a two-year sequence of courses for sound recording technology majors. COREQUISITE(S): REC 306.

REC 302 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 304
SOUND PRACTICUM I
Undergraduate

Practical experience with technological applications in the recording studio. CO-REQUISITE(S): REC 301. (2 quarter hours)

REC 203 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 305
SOUND PRACTICUM II
Undergraduate

Practical experience with technological applications in the recording studio. COREQUISITE(S): REC 302. (2 quarter hours)

REC 304 and status as a Sound Recording Technology student is a prerequisite and REC 302 is a corequisite for this class.

REC 306
SOUND PRACTICUM III
Undergraduate

Practical experience with technological applications in the recording studio. COREQUISITE(S): REC 303. (2 quarter hours)

REC 305 and status as a Sound Recording Technology student is a prerequisite and REC 303 is a corequisite for this class.
REC 307
COMMERCIAL MUSIC PRODUCTION
Undergraduate
For students with a music theory background who want to learn how to realize music using digital sequencing and sampling. This course will focus on creating tracks in pop genres for film, soundtracks, video games, and commercials.

Status as an Undergraduate Music student or a Music Recording Minor student is a prerequisite for this class.

REC 398
INDEPENDENT STUDY
Undergraduate
Independent Study (2 quarter hours)

Status as a Sound Recording Technology student is a prerequisite for this class.

REL 103
RELIGIOUS WORLDS IN COMPARATIVE PERSPECTIVE
Undergraduate
This course introduces the academic study of religion by studying religious communities in a comparative framework. Using methods such as historical, sociological, ethnographic, phenomenological and theological to contextualize religious myths, rituals, moral values, and institutions, this course examines the relation of culture, ethics and religion in the production of religious worlds and religious subjectivities that shape human interactions and experiences. (HON 104 can substitute for REL 103)

REL 107
JUDAISM IN HISTORY: FROM THE BIBLE TO 1492
Undergraduate
The purpose of this course is to provide a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people. It seeks to provide students an entree into the world of Jewish religious and historical experience and to help them develop a conceptual understanding of the thought and practice that underlies the Jewish worldview. It also seeks to examine certain continuities and discontinuities in the conception of Judaism as reflected in selected texts which express the full range of Jewish religious and national creativity. Among the topics to be discussed are the complex relations of Jewish thinkers to the surrounding non-Jewish cultures, and how these interactions affected the Jews' understanding of Judaism. The approach to this material will be intellectual-historical. The course is designed as the first part of a two-course sequence on the history of Judaism from the Bible to the present. It focuses on the history of Jewish tradition from the earliest references to Ancient Israel circa 1200 BCE to the expulsion of Jews from Spain in 1492.

REL 108
JUDAISM IN HISTORY: FROM 1492 TO PRESENT
Undergraduate
The purpose of this course is to provide a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people. It seeks to provide students an entree into the world of Jewish religious and historical experience and to help them develop a conceptual understanding of the thought and practice that underlies the Jewish worldview. It also seeks to examine certain continuities and discontinuities in the conception of Judaism as reflected in selected texts which express the full range of Jewish religious and national creativity. Among the topics to be discussed are the complex relations of Jewish thinkers to the surrounding non-Jewish cultures, and how these interactions affected the Jews' understanding of Judaism. The approach to this material will be intellectual-historical. The course is designed as the second part of a two-course sequence on the history of Judaism from the Bible to the present. It focuses on the history of Jewish tradition from the expulsion of Jews from Spain in 1492 to the present.

REL 109
THE JEWISH EXPERIENCE
Undergraduate
An introductory course offering a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people, surveying the basic aspects of traditional Jewish life and thought as well as the people's many-sided experience of the modern world.

REL 110
THE CHRISTIAN EXPERIENCE
Undergraduate
An introductory course surveying the range of traditions that have emerged within the Christian movement, and offering an historical perspective on the life and thought of Christian communities, and their prospects for the future. Cross-listed with CTH 110.
REL 111
THE AMERICAN RELIGIOUS EXPERIENCE
Undergraduate
Major religious movements in America with emphasis upon the development of religious pluralism. Impact of religious beliefs and values upon American culture.

REL 113
THE LATINO RELIGIOUS EXPERIENCE IN THE UNITED STATES
Undergraduate
An examination of the diverse nature of Latino religion, from its indigenous roots to its institutional forms, within the social and political context of American culture. Cross-listed with CTH 182 and LST 113.

REL 115
THE AFRICAN AMERICAN RELIGIOUS EXPERIENCE
Undergraduate

REL 116
THE ISLAMIC EXPERIENCE
Undergraduate
An introduction to major recurrent religious themes and alternative models of religious interpretation and authority in Islam's manifold expressions, from the life of Muhammad and the Qur'an, to popular ritual and spirituality and the Islamic humanities. Cross-listed with IWS 116.

REL 142
HINDU EXPERIENCE
Undergraduate
A survey of the varieties of Hindu practice and thought. Hinduism in India and throughout the world will be examined.

REL 143
BUDDHIST EXPERIENCE
Undergraduate
A survey of the varieties of Buddhist practice and thought. Different forms of Buddhism throughout the world will be examined.

REL 161
INDIGENOUS RELIGIONS OF NORTH AMERICA
Undergraduate
An introductory exploration of the close ties particular religious traditions of Native North America have with their own distinctive historical realities, geographic-celestial topographies, and political and social structures. Considers variety of oral, written, ritual, visual and archaeological texts.

REL 180
INTRODUCTION TO CATHOLICISM
Undergraduate
An examination of the breadth of the Catholic experience from a 1st-century Jewish religious movement to a 21st-century global religion. Cross-listed with CTH 180.

REL 183
THEMES IN CATHOLIC SOCIAL THOUGHT
Undergraduate
An initial, systematic examination of major themes in modern Catholic social thought. Cross-listed as CTH 183.
REL 190
INTERPRETING SACRED TEXTS
Undergraduate
A survey of the formation, use and interpretation of sacred texts by religious and secular communities.

REL 199
RELIGIOUS STUDIES - OFF CAMPUS
Undergraduate
Religious Studies credits earned off-campus. Topics vary.

REL 200
DEBATES ABOUT GOD
Undergraduate
A study of classical and contemporary arguments regarding the existence and meaning of "God," as developed in a variety of theistic traditions. Cross-listed with CTH 244.

REL 201
RELIGION AND ETHICS I
Undergraduate
Analytic and normative approaches to ethics in Western philosophical and Christian traditions.

REL 202
ETHICAL WORLDS: MORAL ISSUES ACROSS CULTURES
Undergraduate
An exploration of religion and ethics from a comparative and international perspective. Ethical dimensions of diverse world religious traditions will be investigated within their own particular historical and cultural contexts, and students will be asked to consider and evaluate their own ethical orientations in the light of these studies.

REL 205
RELIGION AND ETHICS II
Undergraduate
Analytic and normative approaches to ethics in a non-Christian tradition, such as Judaism, Islam or African traditional religions.

REL 206
CATHOLIC EXPERIENCE I: EARLY CHURCH - 1200
Undergraduate
This course is an introduction to the history of the Catholic Church and the evolution of Christian thought and practices, from the early Church to the thirteenth century. The course will include not only institutional history but also ecclesiastical, cultural, and social history of Catholicism in relation to foundational theological and spiritual texts written in this period. Main topics: The Early Church; Councils and Heresies; Missions in Northern Europe; Charlemagne, Carolingians and a new Roman Empire; Monasticism; Eastern Orthodoxy; Christianity and Islam (the Age of the Crusades); the Mystical Tradition; the Investiture Controversy. Cross-listed with CTH 220 and HST 218.

REL 207
CATHOLIC EXPERIENCE II: 1200 - FRENCH REVOLUTION
Undergraduate
This course provides an overview of the history of Catholicism and its interactions with institutional, political, and social history from 1200 to the French Revolution. The main topics of the class are the origin of the Universities and Scholasticism; Mendicant Orders and their impact on the Medieval Society; the Challenges to Papal Monarchy; Humanism and Erasmus; the impact of the Age of the Reformation; the Council of Trent; the geographic discoveries and the New Worlds; the Enlightenment and the Scientific Revolution; the Catholic Church and the French Revolution. Cross-listed with CTH 221 and HST 219.
This course will offer a survey of the political, cultural and intellectual history of the Catholic Church from 1789 through the early twenty-first century. It will include discussions of the Catholic Church in relation to the French Revolution; the Catholic Church and the formation of modern nation-states (including, inter alia, the unification of Italy and the German Kulturkampf); the relation between the Church and Liberalism; intellectual movements like theological Modernism and ressourcement theology; the First Vatican Council; the Church, Fascism and Communism; the Second Vatican Council; the Emergence of a Global Church, Latin American Liberation Theology, and more. Cross-listed with CTH 222 and HST 220.

An exploration of various forms of popular culture and their intersection with diverse religious traditions and ethical concerns. The course also examines the marketing in mass media of religious themes in popular culture.

A study of Islam's developments in various global contexts, including Arabian beginnings, the Middle East, Central, Eastern and Western Europe, China, the former Soviet States and South Africa, with a focus on the impacts that these cultures and Islam have had on each other. Cross-listed with IWS 217.

An introduction to Black intellectual traditions which emerge from and inform Black religious traditions and which have religious and/or liberation content. Thinkers and content vary. Cross-listed with ABD 233.

This class examines religious arguments, from the 1500's through the 1700's, for and against slavery. Students will investigate different historical and theoretical definitions of slavery. Students will also gain an introduction to the relationship between slavery, evangelicalism, capitalism, and Enlightenment moral philosophy.

Psychologically, religion exists because it meets the needs of believers. This course explores those dynamics and strives to deepen our appreciation of human psychological experience in general and religious experience in particular. Topics include: religion and health, emotion processing and management, emotional intelligence, cognitive dissonance theory and motivated reasoning, attachment, identity and belonging, activating authoritarian tendencies, psychology of rituals, etc. Students from a wide variety of viewpoint and religious backgrounds are encouraged to take this course as it adds to the richness of our exploration.

Sociological study of religious groups, institutions, behavior, and belief systems in human life and society. Cross-listed with SOC 343.

A study of the relations between religious beliefs and moral action to be carried out through an examination of the ethical and moral response of various religious traditions to selected moral issues such as war and peace, sexual behavior, etc.
REL 223  
LITERATURE AND THE SACRED  
Undergraduate  
Variable topics. How human beings across cultures express their intimations of ultimate meaning in a variety of genres ranging from aphorisms and autobiographies to mythic and fictional narratives. Cross-listed with CTH 265.

REL 224  
RELIGION AND POLITICS IN THE UNITED STATES  
Undergraduate  
Variable topics. Explores the interplay of religion, politics and culture in the United States, focusing on citizenship and religious identity in the USA's multicultural, multiethnic, multireligious society. Various sections will focus on different particular religious communities and themes, such as the Religious Right and the Religious Left, the political activities of particular communities, and the challenges of interreligious dialogue.

REL 225  
RELIGION AND THE ARTS  
Undergraduate  
Variable topics. How human beings across cultures express their comprehension and experience of ultimate meaning in a variety of artistic forms.

REL 226  
TECHNOLOGY/ETHICS AND SOCIETY  
Undergraduate  
An examination of the impact of modern technologies on society with particular attention paid to ethical issues.

REL 227  
RELIGIOUS ETHICS AND PROFESSIONAL LIFE  
Undergraduate  
A study of the ethical dimensions of contemporary professional life from the standpoint of religious traditions and values, focusing primarily on medicine, law and business.

REL 228  
BUSINESS, ETHICS AND SOCIETY  
Undergraduate  
This course will examine the nature and purpose of economic life and contemporary commerce as understood from the perspective of religious and secular communities, as well as the ethical implications that flow from the various worldviews. Sections of the course critically examine the thought of different religious traditions on specific business-related issues, placing a variety of religious discourses into direct conversation with secular voices regarding ethical business conduct. Cross-listed as MGT 228.

WRD 103 or HON 100 or HON 101 is a prerequisite for this class.

REL 229  
MEDICINE, ETHICS AND SOCIETY  
Undergraduate  
A study of moral/ethical issues arising in health care in light of contemporary biomedical advances and social changes (cultural, religious, economic, etc.). The viewpoints of various religious traditions and their rationales will be examined and critiqued.

REL 232  
ANCIENT ISRAEL: HISTORY, LITERATURE, AND RELIGION  
Undergraduate  
The development of Judaism from Moses to the Rabbinic era with special attention to social and historical questions. Cross-listed as CTH 212.
REL 233
THE NEW TESTAMENT
Undergraduate
An introduction to the historical-critical investigation of the New Testament. Topics include the earliest Christian writings (letters of Paul), the production of “gospels” about Jesus, and the development of early churches in the context of ancient history and society. Cross-listed with CTH 213.

REL 234
VARIETIES OF EARLY CHRISTIANITY
Undergraduate
An examination of multicultural diversity in early Christianity through a study of materials excluded from the New Testament canon; Christian apologists defending the church against pagan intellectuals and Roman imperial magistrates; comparisons of early Christian fiction and ancient Greek novels; and an examination of Gnostic writings. Cross-listed with CTH 215.

REL 235
PAUL AND HIS INFLUENCE IN EARLY CHRISTIANITY
Undergraduate
A critical study of Paul's literary remains as primary sources for reconstructing the development of the Christian movement, focusing on Paul's communities, ethics and theology. Early interpretations and assessments of Paul will also be considered. Cross-listed with CTH 216.

REL 236
VARIETIES OF JUDAISM IN THE GREEK AND ROMAN WORLD
Undergraduate
An examination of Judaism from the Jews' return from Babylonian exile in 538 BCE to the promulgation of the Mishnah in 200 CE, with a focus on the Roman period. The Dead Sea Scrolls, as well as concepts of the Messiah, the resurrection of the dead, the final judgment and the idea of the “Bible” will be studied.

REL 237
GODS IN THE ROMAN EMPIRE
Undergraduate
This course examines the role of gods in the social, political, and economic world of the first four centuries of the Roman Empire. Topics will include: the role of gods in civic life; the imperial cult; the use of the categories religion, superstition, and magic to mark social status; gods, family, and social values; religious innovation and the emergence of new gods; and the rise of Christianity and the worship of Jesus as a god. This course will pay special attention to the social interactions that create and sustain the plausibility of the existence of unseen deities governing the affairs of humans.

REL 238
THE HISTORICAL JESUS
Undergraduate
An investigation of the early Christian Gospels and other sources for reconstructing the life of Jesus of Nazareth. The relation of historical reconstruction and religious interpretation, and the significance of conflicting interpretations of Jesus, will also be considered. Cross-listed with CTH 214.

REL 239
THE BIBLE GOES TO THE MOVIES
Undergraduate
This course examines the interaction of the Bible and Hollywood movies by considering how stories, ideas, and themes from the Bible have been portrayed in movies. Specific biblical texts will be analyzed in their historical context and in relation to contemporary movies.

REL 241
RELIGION IN CHINESE HISTORY, SOCIETY AND CULTURE
Undergraduate
An exploration of the Chinese religious landscape, focusing on social and practical dimensions of Chinese religion, such as state rituals and private cults, liturgies and individual practices of Taoist priests and adepts, politico-religious ideas that inspired popular messianic movements throughout Chinese history, and interrelations of Buddhist and Taoist clergies and institutions in the state. Cross-listed with AAS 241.
Hinduism is one of the world's oldest religions, but it is also the world's most diverse religion. Despite its variety, certain themes have remained throughout the ages--karma and ethical responsibility, liberation from the bonds of worldly existence through yoga and devotion, communication with the divine through ritual, and the many forms, male and female, that God can take. This course traces the development of Hinduism from 5000 years ago to the present, with emphasis on change and continuity in those themes. Cross-listed with AAS 224.

An exploration of the Buddhist tradition, using original sources, from its beginnings in ancient India to a world religion with strong roots in the US. Students will discover how Buddhism interacts with cultures from Sri Lanka and Thailand to China, Japan and Tibet. Although this course is online, students in the region will have the opportunity to practice meditation at a Chicago zendo and tour the Buddhist art at the Chicago Art Institute. Cross-listed with AAS 243.

Explores the specific interplay between religion and culture in Japan. Taking historical and cultural factors into account, it considers prehistoric Japanese religion, ancient imperial myths, the assimilation of Buddhism, Confucianism, and continental (Chinese/Korean) culture, the religious and aesthetic worlds of the court nobility and the warrior class, popular mountain cults, the revival and systematization of Shinto, the impact of western culture, Japanese ultranationalism, and the religious situation in the post-war period. Cross-listed with AAS 245.

Promotes an understanding of Chinese worldview and life in the perspective of the common Chinese people from ancient to modern times. Based on historical and modern texts in translation, some historical and ethnographic studies, as well as visual and aural materials, the course explores gender and generational relations and conflicts, ancestor veneration, the worlds of ghosts and gods, festivals, art, and entertainment, but also aspects of misery and social unrest. Although the course will draw largely on popular and entertaining sources, it will also pay attention to historical developments, the relationship between popular and elite traditions, as well as sociological and anthropological issues arising from these contexts. Cross-listed with AAS 244.

Focuses on the pervasive influence of religious thought and sentiment on Japanese literature from ancient to modern times and explores the intricate relationship between religion, aesthetics, and the arts in Japanese culture. Considers original works including ancient Japanese mythology and poetry, the memoirs of court ladies and Buddhist hermits, romance, epics, folktales and social satire, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them. Cross-listed with AAS 247.

Focuses on the interpretation of literature and religion in China. Considers original works of literature and explores the religious origins of Chinese script and writing itself, poetry and mystical philosophy, cosmology and revealed scripture, popular tales, ballads, plays and novels, and the reworking of contemporary Chinese American authors of their literary and religious heritage, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them. Cross-listed with AAS 242.

This course will look at the phenomena of mysticism, its doctrines and practices, in various religious traditions. It will also look at how various forms of mysticism have influenced the religious traditions with which they associated, (e.g. how Sufism has impacted Islamic religion, civilization and society.) The course will then look at the present situation of mysticisms in regard to religious traditions and to broader societies.
REL 251
THE IDEA OF ‘EVIL’
Undergraduate
This course will try and answer the question what is evil? In religious traditions is evil a relative term? Or is it a universal absolute? Does evil exist independently, or is it a result of the absence of good? How do religious traditions deal with the notion of evil? After we look at the religious, philosophical, historical, conceptualization of evil and how different religious traditions deal with it, the class will look at evil in popular culture (anthropological understanding of evil). How does the popular imagination understand evil? How do they depict and imagine evil (in film, and in literature)? Are these universalities or are they cultural relativism? How has popular culture dealt with evil? Finally the course tries to see if there is any connection with the popular imagination and religious traditions when it comes to evil.

REL 252
FORGIVENESS AND RECONCILIATION
Undergraduate
A study of various understandings of “forgiveness” and “reconciliation” in several religions and cultures. The nature and dynamics of forgiveness and reconciliation will be examined both theoretically and in relationship to specific conflicts. Cross-listed with PAX 252.

REL 253
DESPAIR AND HOPE
Undergraduate
This course addresses the important religio-ethical concepts of despair and hope from both theoretical and applied perspectives. The course explores: a) various religious, ethical, and psychological understandings of these concepts and b) applications of these concepts, along with various methods and approaches, to a number of case studies involving personal and/or societal challenges. Cross-listed with PAX 253.

REL 254
THE BODY & HUMAN RELATIONSHIPS: DIVERGENT MEANINGS, CONFLICTING VALUES
Undergraduate
Love and sexuality in biblical and nonbiblical religions, examined cross-culturally, conceptually, and ethically.

REL 256
WELLNESS AND DISEASE IN RELIGIOUS PERSPECTIVE
Undergraduate
A study of notions related to human “health,” “well-being” and “disease” in various religio-cultural situations. Physical, mental and spiritual health -- individual and communal -- will be considered. The significance of “plague,” especially AIDS, as socio-religious and spiritual events will be critically examined.

REL 257
DEATH AND ITS BEYOND: EXPERIENCE, MYTH AND RITUALS
Undergraduate
Religious attitudes and practices responding to the phenomena of death and dying, studied cross-culturally, conceptually and ethically.

REL 259
RELIGION AND SOCIAL ENGAGEMENT
Undergraduate
An investigation of the ways in which various religious traditions engage the social order. Traditions, persons and movements that form the focus of the course will vary from section to section. The course will integrate theory and practice in studying forms of religious engagement. All students will perform some service to a community or within a community organization or agency.

Sophomore standing is a prerequisite for this class.

REL 260
RELIGION AND POLITICAL CONFLICT
Undergraduate
An examination of the role of religions and religious movements in political conflicts. Particular sections will examine the relationship of religions to violence and peacemaking in different areas of the world.
REL 262
RELIGION AND GLOBALIZATION
Undergraduate
An examination of the moral, religious, and social dimensions of the phenomenon of globalization. Through a critical assessment of both the positive and the negative dimensions of globalization, students will seek to understand more fully the ethical implications of globalization for economics, culture, and society.

REL 263
RELIGION AND POLITICS IN THE MIDDLE EAST
Undergraduate
An exploration of Judaism, Christianity and Islam as they develop and interact in the Middle East, historically and in terms of contemporary religious and political issues. Includes a study of personal narratives of people from Jewish, Christian and Muslim communities. Cross-listed with IWS 263.

REL 264
COLONIZATION, RELIGION AND RESISTANCE
Undergraduate
This course will explore the religious traditions and cultural identities of some of the peoples native to the Americas, Africa, Asia and Oceania; problems they have with the “civilized” world and their potential solutions to them.

REL 265
REFORM MOVEMENTS WITHIN ISLAM
Undergraduate
This course will deal with the idea of “reform” within Islamic political movements in the modern period. The course will analyze various Islamic reform movements such as the Wahhabis, the Muslim Brotherhood, the Modernists, the Traditionalists, seeking a pattern in these movements. Cross-listed with IWS 265.

REL 266
MUSLIM CULTURES IN NORTH AMERICA
Undergraduate
This course will explore Muslim cultures in Canada and the U. S. While the course may also investigate histories, ethnicities and religious ideologies, the organizing focus will be on struggle, contestation, maturity and change. Although Canadian provinces and U.S. states claim that religion should present no bar to full participation in the public square and religious discrimination is illegal, Muslims, in fact, are challenged as citizens. Living in religious Diasporas as minorities, communities north and south of the Canadian border, Muslims have found themselves contesting notions of integration, pluralism and acculturation. Often labeled “as the enemies within,” Muslims have laid their claims as productive citizens, determined to contribute to the security, welfare and advancement of their home. Cross-listed with IWS 266.

REL 268
MODERN JUDAISM
Undergraduate
An examination of central features of the modern Jewish experience including the transition from traditional to modern religious life and practice, American Judaism, the Holocaust, and the establishment of the State of Israel.

REL 269
JUDAISM IN ANTIQUITY
Undergraduate
This course traces the history of Israelite and Jewish culture and religion from their origins in the world of the Ancient Near East in the second millennium BCE until the rise of Islam in the seventh century CE. We will critically examine the meaning and mutual relationship of such categories as “ancient Israelite” religion, “biblical” religion, and “early Judaism.” We will also discuss the history of religious institutions, texts, and practices, as well as the dynamics of continuity and change in ancient Israelite and Jewish society. This course will pay special attention to the complex relationship that exists between history and collective memory as constructed through texts and rituals.

REL 270
WOMEN IN THE BIBLE
Undergraduate
An examination of the historical role of women in the Bible and the contemporary concerns of feminist theology, women's spirituality and ethical issues arising from the contemporary application of these biblical texts to women's experiences.
REL 271
THE QUR'AN AND ITS INTERPRETERS
Undergraduate
A study of the origin, transmission, and interpretation of the Qur'an. Cross-listed with IWS 271.

REL 272
GENDER AND SEXUALITY IN MUSLIM CULTURES
Undergraduate
Explores historical and contemporary trends in writing on Muslim women along modern and contemporary narratives on gender and sexuality in Muslim majority and minority cultures. Cross-listed as IWS 272.

REL 273
JESUS ACROSS CULTURES
Undergraduate
A study of the multiple and diverse (primarily theological, but also literary, artistic and philosophical) historical and contemporary images of Jesus, as a way of understanding the diversity of this tradition and of its impacts on society, and of understanding the issue of plurality or diversity itself in religious traditions. Cross-listed with CTH 270.

REL 275
COMMUNITY AND AUTHORITY IN MEDIEVAL JUDAISM
Undergraduate
An introduction to the history, religion and culture of the Jewish people under Christendom and Islam from the fourth through the end of the fifteenth centuries.

REL 278
WOMEN AND RELIGION
Undergraduate
A study of the historical and contemporary roles and contributions of women within major religious traditions, especially Christianity and Judaism.

REL 280
ROMAN CATHOLIC THEOLOGICAL THINKING
Undergraduate
A study of the Roman Catholic tradition of “faith seeking understanding” examining the content and the process of emergence of Catholic beliefs about such matters as God, sin, Jesus Christ, revelation, the church and eschatology. Cross-listed with CTH 243.

REL 281
ROMAN CATHOLIC LITURGY
Undergraduate
A study of the emergence, meaning and dynamics of ritual in the Roman Catholic tradition. Cross-listed with CTH 231.

REL 283
ROMAN CATHOLIC SOCIAL THOUGHT IN CONTEXT
Undergraduate
A study of Roman Catholicism's understanding of its relation to the social world, including such matters as the relation between Church and State, the moral authority of the Church, and of its teaching on such issues as social ethics, politics and economics. Cross-listed with CTH 247.

REL 284
CATHOLICISM AS A SPIRITUAL PATH
Undergraduate
An experience-centered study of the relationship between contemplation and action, prayer and service, liturgy and social justice, personal religious experience and the wider experience of Catholics. Both historical and contemporary spiritualities will be explored. Cross-listed as CTH 229.
REL 285
ROMAN CATHOLICISM'S ENCOUNTER WITH OTHER RELIGIONS
Undergraduate
A study of how Roman Catholicism understands and responds to other religious traditions, other ways of being religious, and how the encounter with those other traditions affects Roman Catholicism's understanding of itself and its teachings. Cross-listed with CTH 271.

REL 286
PILGRIMAGE, RELIGION AND POPULAR CULTURE
Undergraduate
How has the role of pilgrimage evolved from antiquity to the present age, and how can the phenomenon of pilgrimage provide a modern window into how a people define what is spiritually significant? Might the phenomenon of pilgrimage, as it is found in nearly every religious tradition, provide a common language and thus a means for building bridges across boundaries of religious difference? This course examines pilgrimage as a religious, cultural, historical and ethical phenomenon. Using methodologies developed in the study of religion, ethics, anthropology and popular culture, this course will introduce students to pilgrimage as it is practiced in expressions of Judaism, Christianity and Islam. The aim of this course is to explore some of the competing typologies and events associated with the formal study of religious ritual and then apply these learnings to modern cultural phenomena, work that will prepare students for the project of constructing their own pilgrimages.

REL 287
ROMAN CATHOLIC MORAL THOUGHT
Undergraduate
This course examines various moral topics within a Roman Catholic framework. Papal pronouncements, Magisterial statements, Episcopal texts, the works of influential theologians, and critical voices both within and beyond the Church will be critically examined. Special attention will be paid to the method of moral argumentation.

REL 290
LATINO/A LIBERATION TRADITIONS
Undergraduate
What does liberation mean in the context of the Americas today? How have people of Latin American descent -- both in Latin America and the United States -- connected conceptions of liberation to related ideas of liberty and freedom, as well as to notions of political revolution, cultural identity, and prophetic forms of religious faith? This course examines how these questions have been theorized across the Latino/a Americas, especially as they relate to questions of religion. Topics include liberation philosophy, critical pedagogy, prophetic religion, cultural praxis, Latina feminism, and decolonial thought. Cross-listed with LST 290.

REL 291
LOOKING FOR GOD IN LATIN AMERICA
Undergraduate
An examination of religious traditions such as Catholicism, indigenous religions, and Protestantism in Latin America, with special focus on how these traditions have been transplanted and reshaped upon entry into varied Latino communities in the United States. Historical analyses of the Latin American roots of these traditions will provide contextualization for the ongoing examination of transnational religious cultures in the U.S. Cross-listed with LST 291.

REL 295
SECTARIAN MOVEMENTS WITHIN ISLAM
Undergraduate
This course will look at the various sects within Islam such as Shi’ism, Kharjism, etc. The course will also look at theological sects such as the Mu'taziliets. The course will be concerned with the history, the beliefs, and the present circumstances (if they still exist today) of these sects. Cross-listed with IWS 295.

REL 298
METHODS AND APPROACHES IN THE STUDY OF RELIGION
Undergraduate
This course introduces students to the history of the discipline of religious studies with special attention to its emergence in the contexts of colonialism and the Enlightenment. The first goal of this course is for students to acquire a beginning understanding of how the field was constructed as a discipline of study and to explore the connections of its foundational methods of inquiry to the particular historical contexts in which those methods were developed. The second goal of this class is to expose students to important contemporary conversations within the discipline through the exploration of selected areas of inquiry and methods of analysis.
REL 299
RELIGIOUS STUDIES, OFF-CAMPUS
Undergraduate
Religious Studies credits earned off-campus. Topics vary.

REL 300
THEORIES OF CULTURE AND RELIGION
Undergraduate
This seminar explores contemporary approaches used to study religion as a cultural phenomenon. Drawing on scholarship from a variety of disciplines that has shaped the academic study of religion, we will explore the relationship among religion, culture, and power in the contemporary world. We will examine some of the key issues that confront scholars in the field as they grapple with the politics of knowledge production and representation in the contemporary world.

REL 301
THEORIES OF RELIGION AND SPIRITUALITY
Undergraduate
An interdisciplinary investigation into the nature of religious experience drawing on the fields of anthropology, psychology, sociology, and theology.

REL 302
THEORIES OF RELIGION AND ETHICS
Undergraduate
This seminar explores the intersection between religion and ethics, centering on the question of how the study of religion contributes to contemporary academic discourse on ethics and, in turn, how the discipline of ethics helps to deepen understanding of the roles of religion in society. To this end, the course prepares students not only to grapple with religious and ethical theories, but also to analyze modern economic, political, social and environmental structures with critical attention to the religious worldviews and ethical frameworks that emerge out of, and at once underwrite, those structures. The course is therefore designed to enable students to bring familiar norms, traditions, and cultural behaviors under critical scrutiny. Consequently, the nature of this seminar is comparative, proceeding through comparisons both within and among diverse religious traditions.

REL 305
TOPICS IN RELIGION AND CULTURE
Undergraduate
Examines particular issues in the relationship between religion and culture. Specific topics for current offering are noted in the current class schedule.

REL 311
SUSTAINABILITY AND RELIGIOUS WORLDVIEWS
Undergraduate
This course will analyze the nature of systemic change in the era of sustainability, considering the three dimensions of sustainability - social justice, economic viability, and environmental stewardship - from the perspective of one or more religious traditions, particularly the perspective of integral human development from Catholic social thought. It will use systems thinking to evaluate the economic, social, organizational, and personal contexts of promoting integral human development in a finite ecology. The course will ask students to identify a systemic change project that promotes integral human development, so that student learning is oriented toward, focused on, and expressive of their own interest relevant to a core challenge they have chosen. One key question will shape the trajectory of the course: How does one develop a systemic change project that promotes integral human development? The focus of this course is for the student to select a particular need or set of needs, to determine a sustainable way to deliver a product, service, or good, and to persuasively articulate the values and vision - personally and organizationally - driving their proposed solution. The systemic change project will also be a step toward answering some fundamental career questions: What need do I want to address that will lead to sustainable value for the organization I choose to join? How will this differentiate my organization from others? How should I understand this need in relationship to the natural world, and in relationship to my own place in the economy, in society? To address today's challenges, students must engage in new ways of thinking and new patterns of inquiry. This goal requires a new pedagogy - one that asks students to be conscious of their own assumptions, their own patterns of knowing.

REL 320
TOPICS IN RELIGIOUS ETHICS
Undergraduate
Examines methods and content of religious ethics. Specific topics for current offering are noted in the current schedule.
REL 322
FEMINIST ETHICS
Undergraduate
An investigation of theoretical issues regarding women's moral experiences and of feminist ethical arguments combatting various forms of oppression. Cross-listed with WGS 310/410 and MLS 477.

REL 324
ISLAMIC LAW (SHARIAH) AND AMERICAN CULTURE
Undergraduate
An intensive study of the many dimensions of religious liberties in a pluralist society. Explores the language of constitutional and political discourse generally, and the ways in which language affects an understanding of the First Amendment. Includes case studies on particular religious communities and their encounters with American law.

REL 340
INQUIRIES IN WORLD RELIGIONS
Undergraduate
Various topics within the comparative study of religions. Specific topics for current offering are noted in the current schedule.

REL 341
TAOISM: CHINA'S INDIGENOUS HIGH RELIGION
Undergraduate
A study of Taoist thought, imagination and expression, through sacred literature, the organization of clergy, and the nature and function of its institutions in interaction with the authority of the Chinese state, with Buddhism, and with the broader scheme of popular Chinese culture and religion.

REL 342
ZEN MIND
Undergraduate
A study of the thought and practice of Zen Buddhism, focusing on the role of Zen in shaping ideas, ethics and the arts in Japan and America. Cross-listed with AAS 341.

REL 343
MORAL PHILOSOPHY, POLITICAL POWER, & RELIGION IN PRE-MODERN CHINA
Undergraduate
An exploration of the major traditions informing pre-modern Chinese perspectives on morality, politics, social and personal formation, as well as cosmological and religious anchoring. Topics include Confucianism, Mohism, early Daoism, Legalism, correlative cosmology, liturgical Daoism, Buddhism, Neo-Confucianism, and also China's traumatic encounter with western power and thought. The course not only addresses comparative issues concerning Chinese values in relation to western views, but also questions common comparative constructs such as those contrasting religion & power; individualism & communalism, and tradition & modernity.

REL 344
YOGA AND TANTRA
Undergraduate
An examination of the history, philosophy and cultural meaning of body-oriented liberative techniques as they developed on the Indian subcontinent and Himalayan region in Hinduism and Buddhism. Students registering for this course are expected to have studied one or both of these traditions in courses such as REL 142, 143, 242, or 243, or in other courses. Background in theory is also useful. Cross-listed with AAS 344.

REL 350
TOPICS IN RELIGIOUS THOUGHT
Undergraduate
Examines specific methods, issues, and/or movements in religious thought. Specific topics for current offering are noted in the current class schedule.
REL 351
LIBERATION THEOLOGY
Undergraduate
Focuses upon the ideas and practices of a radical movement for the transformation of Christianity and for social justice that originated in the "Basic Christian Communities" of Latin America and spread from there to North America and the Third World. Entails either an Applied Research or Service Learning component. Cross-listed with CTH 341 and PAX 331.

REL 362
JEWS AND THEIR MESSIAHS
Undergraduate
This course will introduce students to the history of messianic beliefs in Judaism from biblical times to the present. It is often assumed that "messianism," i.e. the belief in a savior figure destined to come in the future to usher in a new age of redemption and moral goodness, has always been central to Judaism. The course will examine whether our modern concept of "messianism" can be used as a valid tool to describe Jewish religious experience. The course will also analyze the extent to which Jewish messianic beliefs varied over time by examining major messianic texts and movements in their historical, literary, and cultural contexts.

Sophomore standing is a prerequisite for this class.

REL 363
CLASSICAL TEXTS IN JUDAISM
Undergraduate
An advanced analysis of selected Jewish texts.

REL 370
FEMINIST THEOLOGIES
Undergraduate
An exploration of women's experience as a primary resource and norm for theology, focusing on themes of inclusion, exclusion, representation and liberation in particular social, political and historical contexts.

REL 380
TOPICS IN RELIGIOUS TEXTS
Undergraduate
Examines methods and meanings in the study of religious texts. Specific topics for current offering are noted in the current class schedule.

REL 382
RELIGION IN THE CONTEMPORARY UNITED STATES
Undergraduate
An advanced examination of traditional communities and contemporary movements in the United States.

REL 384
THE CULTURE OF AMERICAN CATHOLICS
Undergraduate
How has the unique experience of immigration shaped the American Catholic Church from the colonial period to the 21st century? How did the idea of "the Church" as an authoritative hierarchy come about in the mid-20th century, and how has that notion been challenged by immigrant communities, as well as artists and intellectuals? Drawing on the disciplines of history, sociology, anthropology, cultural theory, literature and the arts, this course looks at those who built the church and those who challenged and changed it. Cross-listed as CTH 384 and MLS 464.

REL 390
INTEGRATING SEMINAR
Undergraduate
This seminar is intended for Religious Studies majors and is designed around existing research projects in which students demonstrate their ability to analyze specific examples of religion in cultural context and to situate their analytical perspectives within particular approaches in the academic study of religion. Class readings and discussions will help students reflect critically on the relation of religious studies as a discipline to other disciplines, to their previous coursework, and to their intellectual development. Students will be expected to present their research projects at a meeting of the Religious Studies department, and encouraged to present their work in other venues.

Junior Standing or above is a prerequisite for this class.
REL 392
FOREIGN STUDY IN RELIGION
Undergraduate
Under this number, students taking courses in religion or theology as part of a DePaul-sponsored program of study abroad may receive Religious Studies credit when approved in advance by the director of the Foreign Studies Program and the chair of the Religious Studies Department.

REL 393
INTERNSHIP IN RELIGIOUS STUDIES
Undergraduate
Open only to students working on Religious Studies major or minor concentrations. For more information contact the department chair.

REL 397
SENIOR THESIS
Undergraduate
Junior Standing or above is a prerequisite for this class.

REL 398
INDEPENDENT STUDY
Undergraduate
A two-credit course done under the supervision of a faculty member with the permission of the Department Chair.

REL 399
INDEPENDENT STUDY
Undergraduate
Independent Study
Junior Standing or above is a prerequisite for this class.

RELC 500
RELATIONAL COMMUNICATION THEORIES
Graduate
Students will gain an understanding of the different meta-theoretical frameworks used to explain relational communication as well as an understanding of what theories are and how theories are developed. A wide range of relational theories will be used in explaining what constitutes relational communication. Students will be provided with opportunities to apply theoretical concepts to everyday personal and professional relations as well as given opportunities to critique and analyze the efficacy of those theories presented.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

RELC 502
ATTACHMENT & RELATIONAL COMMUNICATION
Graduate
This course will explore the unique role that attachment styles play in the formation, maintenance, and deterioration of close relationships. Attachment theory will be used to examine how working models of self and other influence patterns of interaction among relational partners. Topics will include how attachment styles influence self-disclosure, conflict resolution, jealousy and deceptive communication. Students will also explore communicative strategies for dealing with attachment related problems.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
**RELC 504**  
**RELATIONAL COMMUNICATION AND ENTREPRENEURSHIP**  
Graduate  
This seminar provides an overview of how theories and concepts of relational communication have and can be used to create business models. This course will also explore how entrepreneurial processes and frameworks can be used to create business models using a lean start-up approach.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

**RELC 511**  
**TOPICS IN INTERPERSONAL COMMUNICATION**  
Graduate  
Explores specialized topics within the field of relational communication. Past topics have included emotions and communication, gender and its relationship to interaction, and the social construction of interpersonal realities.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**RELC 513**  
**NONVERBAL COMMUNICATION**  
Graduate  
Nonverbal messages are important as we typically monitor our own nonverbal messages less, but believe others nonverbal messages more than their verbal messages. Likewise, research suggests that 65% of our communication is based on nonverbal messages and some estimates are as high as 93%. Clearly such messages are important, yet we spend little time examining such messages. That said, the goal of this course is to provide you with a research based overview of a variety of nonverbal messages, that is, everything we communicate without using our words. This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include physical appearances, gestures, face and eye behavior, vocalic, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**RELC 540**  
**COMMUNICATION AND CONTEMPORARY COURTSHIP DYNAMICS**  
Graduate  
This seminar focuses on communication processes relevant to the initiation, development, and management of non-platonic (i.e., sexual or romantic) relationships.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**RELC 599**  
**RESEARCH THESIS**  
Graduate  
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.

Status as a College of Communication Graduate Student and Director Consent is a prerequisite for this class.

**RELC 601**  
**ACTIVE DEGREE COMPLETION**  
Graduate  
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans. (0 credit hours)

Status as a Graduate Relational Communication student is a prerequisite for this class.
RELC 602
CANDIDACY CONTINUATION
Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans. (0 credit hours)
Status as a Graduate Relational Communication student is a prerequisite for this class.

RUS 101
BASIC RUSSIAN I
Undergraduate
This is an introductory course in Russian which assumes no previous knowledge of the language. Students will learn Russian grammatical structures and vocabulary through the lens of culture, politics, media and the arts. Students will work on reading, writing, listening and speaking skills and by the end of the first year sequence should be able to use their Russian to communicate using simple structures.

RUS 102
BASIC RUSSIAN II
Undergraduate
This is the second course in an introductory sequence of Russian which assumes no previous knowledge of the language. Students will learn Russian grammatical structures and vocabulary through the lens of culture, politics, media and the arts. Students will work on reading, writing, listening and speaking skills and by the end of the first year sequence should be able to use their Russian to communicate using simple structures.

RUS 103
BASIC RUSSIAN III
Undergraduate
This is the third course in an introductory sequence of Russian which assumes no previous knowledge of the language. Students will learn Russian grammatical structures and vocabulary through the lens of culture, politics, media and the arts. Students will work on reading, writing, listening and speaking skills and by the end of the first year sequence should be able to use their Russian to communicate using simple structures.

RUS 104
INTERMEDIATE RUSSIAN I
Undergraduate
Intensive practice in the use of Russian through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. Russian 103 or equivalent, including placement test or permission of instructor, is recommended.

RUS 105
INTERMEDIATE RUSSIAN II
Undergraduate
Intensive practice in the use of Russian through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. Russian 104 or equivalent, including placement test or permission of instructor, is recommended.

RUS 106
INTERMEDIATE RUSSIAN III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing Russian with a concomitant heightened awareness of the cultural dimensions of the Russian language. Russian 105 or equivalent, including placement test or permission of instructor, is recommended.

RUS 130
MOLILSAP STUDY ABROAD
Undergraduate
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

RUS 306
WARRIORS, WITCHES, FIREBIRDS AND VAMPIRES: INTRODUCTION TO RUSSIAN FOLKLORE
Undergraduate
This course will introduce students to the rich and dynamic body of Russian folk texts and belief. Course readings will include epic poems, skazki (fairy tales), ballads, legends, incantations, and elements of popular culture. Students will learn and apply contemporary theories of folklore and traditional folk belief. The course will touch on the role of Russian folklore themes in literature and film. Emphasis on primary source materials with supplemental theory and history. Readings in Russian. Cross-listed with MOL 306. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 316
RUSSIAN NOVEL
Undergraduate
The course will allow students to read and analyze novels from important Russian authors such as Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, as well as other. Students will write essays and participate in individual and group projects in the format of Round-Table discussion. Cross-listed with MOL 316. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 317
RUSSIAN SHORT STORY
Undergraduate
The course will allow students to read and analyze short stories from important Russian authors such as Pushkin, Gogol, Turgenev, Tolstoy, Chekhov, Gorky and Korolenko . Students will write papers and present short stories on these authors as well as others. Cross-listed with MOL 317. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 318
MASTERPIECES OF RUSSIAN LITERATURE
Undergraduate
This course will explore masterpieces of Russian literature from a variety of genres: plays, novels, short stories and poetry. Works by authors such as Tolstoy, Chekhov, Dostoevsky, Gogol, Nabokov, Pushkin, Turgenev, Akhmatova, Mayakovsky, Pasternak and Yevtushenko will be read within their historical context to provide a basis for literary appreciation and analysis. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 360
REALISM IN RUSSIAN DRAMA
Undergraduate
Russian Theater of the 18-19th century appeared in parallel to the development of realism in Russian literature. The movement dominated from approximately 1845 to 1905. The course presents some of the greatest Russian plays of the 19th century by Alexander Pushkin, Nikolai Gogol, Alexander Griboedov, Alexander Ostrovsky, and Anton Chekhov. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.
RUS 361
TWENTIETH CENTURY RUSSIAN DRAMA
Undergraduate

Russian plays by a selection of the most important authors. Readings may include Chekhov, Gorky, Bulgakov, Teffi and others. Some critical works will be included. The student will read, analyze and interpret the plays, comedies and dramas, both with respect to form and meaning. In the process they will develop greater insight into the social and multicultural issues of the time period in which the plays were written. Cross-list with MOL 361. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 364
MODERN RUSSIAN AUTHORS
Undergraduate

This course explores works of the most influential Russian authors of the Modern period. Authors might include Anton Chekhov, Vladimir Nabokov, Mikhail Bulgakov, Evgeny Zamyatin, and more. Students will explore several genres, including poetry, novel, short, story, and plays. These authors and works will be studied in the context of their times. Cross-listed with MOL 364. Russian 106 or equivalent, including placement test of permission of instructor, recommended.

RUS 369
RUSSIAN LITERATURE AND FILM
Undergraduate

Greatest Russian short stories, plays, and novels of the 19-20th century, as presented in films by Soviet and Post-Soviet film-makers. Readings in the original of Tolstoy, Dostoevsky, Ostrovsky, Chekhov, Bulgakov, and Pasternak. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 393
RUSSIAN FOR MASS MEDIA AND POLITICS
Undergraduate

Introduction to the structures and vocabulary of Russian news media with emphasis on politics and current events. Weekly readings and writing assignments from television, print media, and Internet news sources. Emphasis on building vocabulary and understanding of current political news and events. Individualized research/writing project. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate

The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Russian. Students must have the equivalent of 106 or higher ability in Russian to take this two credit component. Please contact the Department of Modern Languages if you have questions about this courses or about language placement.

Study Arabic language and culture in Jordan. Students will take classes at the American University of Madaba and complete an internship in Amman.

This short-term December intercession program explores the history, culture, economics, and politics of Argentina and Chile. The program includes meetings with university students and faculty, representatives of the arts, domestic and foreign businesses, the U.S. expatriate community, and Consular officials, as well as visits to cultural and historical institutions. The Program includes two coordinated courses taken in the fall and winter quarters.

This short-term seminar introduces students to the basic framework of Latin American Law and legal systems, as well as the key principles of international business law necessary for advising clients doing business in the region. (0 semester hours)

This short-term seminar introduces students to all aspects of viticulture and viniculture, as well as the geography of major wine producing regions of the world. The abroad portion focuses on more in-depth work related to a specific region, with introductions to that area's viticulture.
SAP ATHN97
TERM PROGRAM: ATHENS, GREECE
Undergraduate
This term-long study abroad program in Athens is offered for the Fall quarter through Greece's renowned College Year in Athens (CYA). Coursework and excursions juxtapose the history and contributions of ancient Greece with the Greece of today; a country situated geographically, socially and culturally at the confluence of Europe, Asia, Africa and the Middle East. Students earn a total of 32 credits for five courses through CYA. Two courses are required: a Modern Greek language course and an Art and Archaeology course. The remaining three electives are worth 6 credits each and may be chosen from CYA's wide range of disciplines, which include Art and Archaeology, Classical Languages, Environmental Studies, Ethnography, History, International Relations, Literature, Modern Greek Language, Philosophy, Political Science, and Religion.

SAP ATHN98
TERM PROGRAM: ATHENS, GREECE
Undergraduate
This term-long study abroad program in Athens is offered for the Academic Year through Greece's renowned College Year in Athens (CYA). Coursework and excursions juxtapose the history and contributions of ancient Greece with the Greece of today; a country situated geographically, socially and culturally at the confluence of Europe, Asia, Africa and the Middle East. Students earn a total of 32 credits for five courses through CYA. Two courses are required: a Modern Greek language course and an Art and Archaeology course. The remaining three electives are worth 6 credits each and may be chosen from CYA's wide range of disciplines, which include Art and Archaeology, Classical Languages, Environmental Studies, Ethnography, History, International Relations, Literature, Modern Greek Language, Philosophy, Political Science, and Religion.

Graduate  
This short-term program is designed to provide students with an understanding of social area analysis, neighborhood change, land use, and other topics by exploring the planning initiatives underway in Curitiba, Brazil, one of the most innovative urban areas in South America. The program site serves as an "urban laboratory" to evaluate a wide range of policies intended to enhance the efficiency and "livability" of a metropolitan region, improve public services, and support the development of critical infrastructure. At the host institution, the Pontificia Universidade Catolica do Parana (PUCPR), students critically evaluate how various strategies can be used to promote harmonious development and economic improvement in complex metropolitan areas involving many different units of government. They also compare the strategies used in Curitiba with those used in Chicago.

This short-term seminar will provide students with insight into the cultural, technological, and logistical issues that arise with distributed or on-site collaboration with Chinese IT companies.

This short-term seminar allows students to learn firsthand about the cultural transformations taking place in China by visiting two geographically and culturally distinct cities and providing students with an understanding of basic concepts and applications of psychology and human development from a cross-cultural perspective.

This short-term seminar offers students an opportunity to explore the universality of social entrepreneurship concepts in the rich and foreign cultural setting of Guizhou Province, China.

This short-term study abroad program to China and Tibet is offered by the School for New Learning during the summer. Focusing on ethnic minority cultures located mostly in and around Yunnan province, students examine China's current state as they encounter regions that practice traditional beliefs and customs despite the monumental changes that are occurring. By traveling in present-day China and Tibet, students gain insight into the balance between a society's rich and complex past and the present. Students can register for either 3 or 4 competencies (with committee permission). Non-SNL students may apply for credit for this course with the approval of their department advisors. (0 quarter hours)

This short-term study abroad program to Cartagena, Colombia is offered by the School for New Learning during December intercession. Cartagena, Colombia provides the backdrop for this course which will stimulate your thinking about the meaning of leisure in your life and the interrelated nature of leisure in our global society. Cartagena offers a rich sense of history, beautiful beaches, excellent food, cultural events, competitive sports, and superior natural areas. Its heterogeneous ethnic and racial make-up is unmatched in the world making it a perfect environment to study and experience leisure. This program will be led by a faculty member of the School for New Learning. (0 quarter hours)

This short-term seminar provides a comprehensive understanding of key elements of human rights law, which includes women's rights, children's rights and criminal procedure. (0 semester hours)
Study at University College Cork (UCC), a world class university that maintains a rich tradition of teaching, research and scholarship. UCC offers 40 academic programs and a vibrant student life.

This short-term Summer program explores the ways in which Irish landscapes set aside for nature are influenced by both natural and cultural forces.

Universidad Adolfo Ibanez (UAI) offers students the opportunity to study in a variety of disciplines in Via del Mar, Chile.

This study abroad program introduces the history, culture, economics, and politics of Cuba before and after the revolution of 1959. During their travels, participants will interact with Cuban students, professors, policy makers, artists, and average citizens. From a historical perspective on the Cuban Revolution, students will learn about its impact on Cuban society, Latin America, the "Third World," and the United States, while focusing specifically on the contemporary international business environment and economic climate in Cuba.

DePaul University Autumn 2017-2018 Page 2165 of 2468
This program seeks to expose students to comparative and foreign policy issues as they pertain to the bilateral relations between the United States and Cuba. By engaging with and learning from local practitioners, students will enhance their intercultural understanding, communication skills, and examine alternative approaches to issues in foreign policy. Students will learn about how policy issues cross borders and the cultural sensitivities that are often involved in foreign policy through an immersion in Havana, organizational site visits, and intensive fieldwork.

This short-term seminar introduces students to the evolving Cuban legal system and the Cuban legal and economic framework regulating foreign investment, trade, and international business transactions. (0 semester hours)

This short-term seminar to Prague and Vienna will broaden your general awareness of the international business climate of Central Europe. You will be provided with an understanding of the business, political and educational issues affecting this region's transition from a centralized to a market driven economy. (0 quarter hours)

This short-term summer program in France takes students on a cycling ‘pilgrimage’ as they explore issues associated with pilgrimage, Catholic Church history and the life of Vincent de Paul. Special attention will be given to an experiential exploration of the elements of pilgrimage, the historical dimensions of Vincent de Paul’s life and its influence on the ideas and practices of modern Vincentians. The purpose of this program is to offer students an intense experiential complement to academic study and intellectual investigations into topics like religious devotion, the historical development of ideas and practices, migration, multiculturalism, poverty, women’s leadership in the Catholic Church, and ‘Vincentianism.’ Students enroll in two courses associated with the program.

This international business seminar travels to Paris, one of Europe’s most treasured cities, to learn about the cultural differences between France and the United States through marketing communication and distribution programs. (0 quarter hours)

This is an academic year exchange program immersing the student in full French classes in liberal arts and sciences graduate level courses at the university of Ecole Normale Superieure.

This short-term seminar aims to educate students in the politics and cultural conflicts around integration in France. Based in historical and cultural analysis, the course will link postwar mobility with an analysis of how minorities in France have been marginalized and constructed as the Other.

This short-term seminar introduces students to all aspects of viticulture and viniculture, as well as the geography of major wine producing regions of the world. The abroad portion focuses on more in-depth work related to a specific region, with introductions to that area’s viticulture.
EXCHANGE PROGRAM: FRANCE (SCIENCES PO)
Undergraduate
Participants in this year-long exchange program with Sciences Po, an international university with campuses across France. Students are placed at one of their many campuses to study in courses focused on the historic, economic, political, and sociological facets of France, Europe, and the World.

SHORT-TERM: BUS FRANCE & SWITZERLAND
Undergraduate
Exploring the tourism industry in France and Switzerland, two of the most popular travel destinations in Europe, students compare and contrast customer behavior trends and tourism operations in these countries and the United States. In France, students concentrate on the infrastructure of transportation, lodging, food and beverage, and tourism opportunities for visitors. During the stay in Switzerland, students learn about regional transportation, the role of sports in tourism, and the cultural influences of national groups on the tourist experience. A major theme of the seminar is the concept of "a stranger in a strange land," providing students with a heightened awareness of what a traveler experiences, including the impact of jet lag, confusion in customs, and language difficulties with directions, instructions, explanations, and different foods. (0 quarter hours)

FY ABROAD: CHINA
Undergraduate
This Focal Point Seminar and First-Year Study Abroad program will introduce you to Chinese culture and society and, in particular, familiarize you with the causes and consequences of China's environmental challenge.

FY ABROAD: UNITED KINGDOM
Undergraduate
Through screenings, readings, and discussion, students will explore Doctor Who in order to learn different characteristics of television criticism. Students will be encouraged to develop a critical voice of their own, all the while learning to understand the popularity and cultural impact of this important television milestone.

SHORT-TERM: FY@FRANCE
Undergraduate
This short-term seminar examines pilgrimage as a religious, cultural, historical and ethical phenomenon in the context of modern Paris, while examining current efforts being made by Parisians to build bridges among Jews, Christians and Muslims.

SHORT-TERM PROGRAM: FY@GREECE
Undergraduate
This short-term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students examine how in ancient Greek poetry, history, and philosophy, we will find a certain tragic worldview at work. That is, a recognition of our human finitude, the potentially disastrous limitation of our understanding and power. Indeed, we will find here in their emergence many of the most fundamental concepts we use to make sense of our lives today. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.
SAP FYGR01
SHORT-TERM PROGRAM: FY@GERMANY
Undergraduate
This short term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students learn about the important scientific discoveries made by Johannes Kepler and Albert Einstein. Students learn about the people and the society these scientists lived in, apply their discoveries in lab activities, and investigate how science is presented by museums and science education centers in Germany and the U.S. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.

SAP FYIR01

**SAP JPN01**  
**SHORT-TERM PROGRAM: JAPAN (CDM)**  
**Undergraduate**  
This short-term December intercession program in Japan is open to undergraduate and graduate students in CDM who have a strong interest in computer gaming and animation. A 2-week trip to Tokyo and Kyoto takes students to visit several gaming and animation companies in Japan. Touring studios and meeting with their developers and managers help students learn the characteristics and practices of Japan’s gaming and animation industries. Students also learn about issues involved in developing games and animation for the global market, and strategies for international promotion. In addition, the program introduces some of the latest and upcoming technologies in the field. Throughout the trip, students learn about the culture of Japan and how it is reflected in Japanese computer games and animation films. (0 credit hours)
SHORT-TERM PROGRAM: JAPAN
Undergraduate
This short-term December intercession program in Japan focuses on the historical events of the 1945 atomic bombing, the religious sensibilities and ethics that informed responses to the event, and current nuclear issues. Students visit centuries-old temples and shrines in Kyoto, talk with an atomic-bomb survivor in Hiroshima, and visit Catholic churches Nagasaki, home to Japan's largest Catholic community. The Program includes two coordinated courses taken in the fall and winter quarters.

SHORT-TERM: BUS JAPAN
Undergraduate
This short-term seminar will focus on SMEs and their drive to accelerate into the 21st Century behind smart, unconventional, strategies and partnerships and local-community leadership. During the seminar, students will be exposed to the traditional Japan national culture juxtaposed against a new paradigm of industry innovation and entrepreneurship. Students will visit both large traditional firms as well as non-traditional entrepreneurial SME firms involved in product and process innovations across several industry sectors. (0 quarter hours)

SAP KNYA01
SHORT-TERM PROGRAM: KENYA GBM
Undergraduate
This short-term December intercession program to Kenya is organized in conjunction with the Green Belt Movement (GBM), a grassroots non-governmental organization founded by Nobel Prize winner Wangari Maathai. Her renowned organization focuses on providing income and sustenance to millions through planting trees and restoring the environment. Classroom activities on campus prior to travel introduce students to the courses' topics. While in Kenya, students and GBM members work on community projects such as tree planting, food security, and sustainable agriculture. Students enroll in two courses, one in the fall and one in the winter.

SAP KNYA02
SHORT-TERM PROGRAM: KENYA (SPSMSW)
Graduate
This short-term December intercession program offers graduate students the opportunity to study health, social welfare and development needs in metropolitan and rural Nairobi during the December intersession. Students will spend 2 to 3 weeks visiting schools, religious missions, community cooperatives, relief agencies and/or governmental offices to gain appreciation for the challenges and opportunities confronting Kenya and other African nations.

SAP KNYA03
SHORT-TERM PROGRAM: KENYA & TANZANIA (SNL)
Undergraduate
This program prepares students for lives in an increasingly globalized world by engaging issues and questions of the East African experience, including foreign pressures and influences on indigenous values and social justice dilemmas like class marginalization and the impacts of globalization on lifestyles and economies. Social and cultural exploration in which simple observation serves as a powerful tool for uncovering deeper meanings in everyday events in the lives of Kenyans and Tanzanians provides students with experiences to which they can compare their lives in the United States through personal reflection. The participants’ ongoing dialogue with local cultures and peoples raises consciousness on global issues of justice, peace, politics and traditions. In addition, students have the chance to explore the landscape and the major natural monuments of both countries. (0 quarter hours)

TERM PROGRAM: KRAKOW, POLAND
Undergraduate
This term-long study abroad program in Poland is offered in Autumn Quarter. For the first three weeks, students tour Germany, the Czech and Slovak Republics, Hungary, and Austria and meet with students from these countries to discuss current political issues and contemporary life in the region. Students then participate in a short study tour of Northern Poland before beginning classes in October at the Jagiellonian University. During the term additional weekend excursions are planned to sites within Poland. Students study basic Polish at the Jagiellonian University. Other classes are taught in English.

EXCHANGE PROGRAM: KYOTO, JAPAN (RITSUMEIKAN)
Undergraduate
The Study in Kyoto Program (SKP) at Ritsumeikan's Kinugasa Campus brings together students interested in Japanese studies from around the world. The SKP curriculum includes a range of Japanese language and Japanese studies courses, as well as practical seminars in traditional arts and crafts. Students stay in furnished private single rooms in dormitories on campus. Students participating in this student exchange program can apply for scholarships at the host institution at the time of application.

TERM PROGRAM: LEUVEN, BELGIUM (W-S)
Graduate
This term-long study abroad program in Fall and Winter-Spring offers upper level undergraduates an exciting opportunity to intern with a member of the European Parliament or for a non-governmental organization affiliated with the EU government. In addition to their internship, students take courses and live at the Louvain Institute for Ireland in Europe located in the Irish College. Winter-spring students earn a total of 27 credits: 4.5 credits for the internship and 4.5 credits for each of the five courses.

SAP MLBN99
TERM PROGRAM: MELBOURNE, AUSTRALIA
Undergraduate
This term-long study abroad program is offered during Summer-Fall terms. Students enroll at world-class Monash University, located outside of Melbourne. Monash's extensive range of course offerings satisfies the interests of students from any college or major. All students enroll in a Contemporary Australia course with excursions to the outback, the Great Ocean Road and sites around Melbourne. While in Australia, students can take advantage of many activities including outdoor excursions throughout Victoria and activities in and around Melbourne including attending sporting and cultural events. Students earn a total of 24 credits distributed between summer and fall terms.
SAP MRCC01
SHORT-TERM PROGRAM: MOROCCO
Undergraduate
This short-term December intercession program explores the society and culture of Morocco and the ways in which Morocco has been written about in literature. The program begins in the cosmopolitan capital of Rabat and continues on to the imperial cities of Meknes and Fez. Students learn about Moroccan family life during homestays in Fez. These experiences, as well as the camel trek and desert camping trip provide material for student writing and reflections. Students enroll in two courses associated with this program, one in the fall and one in the winter.

SAP MRCC02
FEZ/ARABIC LANGUAGE
Undergraduate
This summer Arabic language program in Morocco provides seven weeks of intensive Arabic language study combined with cultural immersion and a home-stay experience. Students partake in intensive language study in the centuries-old city of Fez, Morocco at the Arabic Language Institute in Fez (ALIF). Private tutoring and cultural activities will be provided to strengthen language and cultural learning. Students enroll in a course about Moroccan society and culture taught by DePaul faculty members during the spring quarter prior to travel. 16 credits total.

TERM PROGRAM: MERIDA, MEXICO (SQ-SERVICE)
Undergraduate
After successful completion of the Winter quarter program in Merida, a select number of students have the option of staying in Merida for the spring and conducting a service-learning internship. Students remaining for the spring enroll in Community Internship (CSS 395) in Merida and two Spanish courses.

SAP MRDA99
TERM PROGRAM: MERIDA, MEXICO
Undergraduate
This language intensive program in Merida, Mexico is offered during the Winter quarter. The activities, course work, and excursions highlight the ways in which the Yucatan Peninsula has developed cultural patterns and institutions quite different than the rest of Mexico. While in Merida for the winter, students enroll in two Spanish courses, Mayan Culture & Community (ANT 390/CSS 201), and a faculty director course.

SAP MXCY03
SHORT-TERM PROGRAM: MEXICO CITY
Undergraduate
This program focuses on three overlapping sites of analysis in Mexico City, the world's fourth-largest megacity. First, students learn about the intense growth Mexico City has experienced over the past several decades and the ways that official urban planning efforts by federal and local officials have addressed the social, environmental, and infrastructural challenges that accompany a massive increase in population. Second, students study neighborhoods that have developed reputations as bohemian enclaves and subsequently experienced gentrification. Finally, field studies provide opportunities to learn about formal and informal spaces of leisure and popular culture. Visits to outdoor marketplaces in a variety of neighborhoods, alternative musical cultural centers, media outlets, and public squares and stadiums that serve as sites of national identity and local pride are included in the itinerary.
In this two-way cultural exchange program in hospitality leadership, students compare and contrast tourism industry operations in Mexico and the United States with their peers at Iberoamerican University in Mexico City, whose visit to Chicago is coordinated by DePaul. Next, the DePaul students travel to Mexico City and Puerto Vallarta to visit local hospitality and tourism businesses with the Iberoamerican students. Through these visits, DePaul students explore the challenges of managing hospitality operations in Mexico and discuss differences in consumer behavior and preferences, impacts of culture in tourism behavior, forecasting issues, pricing strategies, ethical concerns, and service delivery variations. (0 quarter hours)

On this trip to Okinawa, Japan, students learn about how art and politics interact with everyday lives, history, and economics. Using photography and journals, students document their experiences as they explore and experience traditional Okinawan craft and contemporary art practices and learn about community based economic development against the backdrop of Okinawa's colonial, post-colonial and militarized history. Upon return, students share and reflect on their findings which culminate in a final project.

This short-term seminar allows students to examine the visual culture of the Islamic world, surveying major artistic developments with a particular interest in the Omani heritage, and considering art and architecture as an interplay between local culture and Islamic tradition.

Participants in this exchange program with Kansai Gaidai University take four courses, two of which are Japanese language classes. The remaining courses are taught in English and give students a broad understanding of Japanese culture, society, and economy. Students may choose electives from a variety of academic areas including art, international studies, political science, and sociology.

This short-term seminar introduces students to policy issues and different approaches to leadership in Panama and Latin America, with a focus on leadership, management and policy in relation to the Panama Canal.

Undergraduate
This term-long study abroad program in Spring Quarter places students in French language classes at the Alliance Francaise, an international language school. Participants increase proficiency in French while experiencing the rich cultural and political life of Paris. Students live with French families. During the homestay, students are paired with roommates from the Alliance Francaise. Students enroll in a total of 16 credit hours: 8 credit hours for French language, 4 credit hours for HAA 397: French Art History, and 4 credit hours for a course taught by a DePaul faculty director.
This Summer study abroad program aims to introduce students to the history, culture, economics and politics of Peru within the context of Peru's post-internal war process of reconstruction. Special emphasis will be given to social structure, gender issues and distribution of power. The purpose of this program is to immerse students in the culture of Peru, providing an experiential learning experience that complements academic and artistic learning, with intellectual investigations that concern the nature of service, social justice, democracy, globalization and human rights in contemporary Peru. This program responds to the College of Liberal Arts and Science's goals through the development of critical thinking and self-reflection while fostering social and cultural enrichment in an environment of respect and support. Students enroll in two courses associated with the program.

The Manila (Philippines) study abroad program in the December intercession is an opportunity to learn applied research methods and monitoring and evaluation approaches for urban poverty reduction. The program is a collaborative effort between DePaul University and Adamson University in Manila. The program places DePaul graduate students in collaborative teams of Adamson faculty and community leaders for evaluating the works of the Vincentian Center for Social Responsibility (VCSR) among marginalized sectors and informal settlers of Metro Manila. Students enhance their research skills for development research and monitoring and evaluation (M&E). The cross-cultural and service-learning character of this program offers to students a perfect opportunity to become effective, ethical and collaborative international public service researchers.

This short-term, MBA cohort-specific seminar, compares and contrasts business industry operations and management in the rapidly growing market of Qatar in order to heighten student learning. (0 quarter hours)

This program provides an opportunity to study how Italian culture and identity are portrayed through films from classics such as La Dolce Vita and Bicycle Thieves to acclaimed contemporary works like Romanzo Criminale. Visits to filming locations in Rome illuminate how cinema uses settings to shape a viewer's experience of a city, a nation, and a people. Furthermore, discussions with Italian film industry representatives provide a firsthand perspective on the filmmaking process, revealing how creative and practical choices affect the representation of cultural issues. The program includes a survival Italian course and a weekend excursion.

This term-long study abroad program in Rome is offered during the Autumn quarter. Students experience the culture and society of Italy while studying the language, art, history, and religious background of the city. They attend language classes at Italiaidea, a local language institute. Service placements are also arranged for students in advanced language classes. Students live with local host families in areas throughout the city. Students earn 18 credits during their stay: 9 credits through Italian courses at the students' appropriate levels, 4.5 credits for a faculty directed course and 4.5 credits for one elective course taught by a local professor.
SAP RSSA01
SHORT-TERM PROGRAM: RUSSIA
Undergraduate
This short-term summer program focuses on the medieval art and history of Imperial Russia. The program visits in Novgorod and St. Petersburg. These two cities, both designated UNESCO World Heritage Sites, offer one of the world's richest ensembles of urban planning, art, architecture, and historical treasures. Students participating in this program earn 8 credit hours for two 4 credit courses. They will select a course in the spring and summer session.

SAP SAFRC1

Their sustainable energy programs are known to be the best in the world and are therefore the perfect destination for studying the power and impact of sustainable energy. (0 quarter hours)

SAP SGMY01
SHORT-TERM PROGRAM: SINGAPORE & MALAYSIA
Undergraduate
This short-term seminar explores the cultural and historical links between Singapore and Malaysia while analyzing the similarities and differences in their economic strategies. With the influence of colonialism and rapid economic growth after independence, the seminar provides insights into the economic and political development of two important South Asian societies. Students participate in meetings with government agencies, financial institutions, macro- and micro-businesses and media agencies to learn about a variety of issues.
SAP SGMY02  
**SHORT-TERM PROGRAM: SINGAPORE & MALAYSIA**  
*Graduate*

This short-term seminar explores the cultural and historical links between Singapore and Malaysia while analyzing the similarities and differences in their economic strategies. With the influence of colonialism and rapid economic growth after independence, the seminar provides insights into the economic and political development of two important South Asian societies. SAP SHFF98  
**TERM PROGRAM: SHEFFIELD, ENGLAND (W-S)**  
*Undergraduate*

This term-long study abroad program is offered during the Winter-Spring quarters at the University of Sheffield in Northern England. Sheffield's student life is characterized by its diversity and a nationally-recognized student union. A wide variety of course offerings are available to DePaul students, including those in the humanities and social and physical sciences. Students attending Sheffield for winter and spring will enroll in 60 Sheffield credits, equivalent to 24 DePaul credits. These will be distributed evenly between the winter and spring quarters on their DePaul records.

SAP SHFF99  
**TERM PROGRAM: SHEFFIELD, ENGLAND**  
*Undergraduate*

This year-long study abroad program is offered at the University of Sheffield in Northern England. Sheffield's student life is characterized by its diversity and a nationally-recognized student union. A wide variety of course offerings are available to DePaul students, including those in the humanities and social and physical sciences. Academic year students register for a minimum of 120 Sheffield credit hours. These are equivalent to 48 DePaul credits that are distributed over the three DePaul quarters.

SAP SHMO01  
**SHORT-TERM PROGRAM: SINGAPORE, HONG KONG, MACAU**  
*Undergraduate*

This short-term seminar compares and contrasts the functioning of the tourism industry operations in the rapidly growing tourism markets of Singapore, Hong Kong, and Macau versus how it is conducted in the US to heighten student learning. It is an applied management program in hospitality leadership. (0 quarter hours)

SAP SHNG01  
**SUMMER: SHANGHAI/CHINESE LANGUAGE**  
*Undergraduate*

This eight-week summer language program in Shanghai, China allows students to study intensive Chinese. The program is designed for students who have the equivalent of at least one year of Chinese language learning. Intensive language study will be offered at Fudan University, one of China's most prestigious universities. Private tutoring and cultural activities such as tai chi, martial arts, and Chinese calligraphy, also will be provided during weekdays to strengthen language and cultural learning. Students also learn about contemporary life in China through lectures, readings, planned excursions and interactions with local people and students. This program is designed for students focused on intensive language study. Students enroll in a course about Chinese society and culture taught by DePaul faculty members during the spring quarter prior to travel. 16 credits total.

SCG 25  
BASIC TECHNOLOGY LITERACY  
Graduate  
(0 Credit) This online course provides students with a knowledge about assembling, using, and troubleshooting basic technology hardware and software. In this course, students demonstrate understanding of basic computer setup and the use of peripheral devices such as printers, speakers, flash drives, scanners, digital cameras, videos, and computer software. (0 credit hours)

SCG 401  
ADVANCED LIFESPAN DEVELOPMENT  
Graduate  
Current research and theories in human development relating to motivation, personality, learning and socialization. Case studies and an analysis of various developmental problems.

SCG 402  
PSYCHOLOGY OF LEARNING  
Graduate  
Study of the learning-teaching process with specific emphasis on the person as a learner, human capacity and potential, learning theories and materials, motivation, concept formation, and behavior.

SCG 403  
HUMAN DEVELOPMENT AND LEARNING: ELEMENTARY  
Graduate  
This course will focus on the developmental processes of school-age children, kindergarten through middle school, by beginning with the study of the young child's social, emotional, cognitive, and physical growth and change. The theoretical and observational study of child development will be framed by an examination of culture, gender, and socio-economic factors as they inform assumptions about normative processes. The relationship between development and learning in a social context will be examined with particular attention to children's developing concepts in math, science, and language arts. Attention will also be given to the role of teachers and schools and other institutions in fostering the healthy development and learning of young people.

SCG 404  
CHILD GROWTH AND DEVELOPMENT  
Graduate  
This course examines the growth and development of the young child in sociocultural context, from conception through age eight, including cognitive, language, physical, psychosocial, spiritual, creative, and emotional areas of development. Learning and development theories of young children, including those of Freud, Erikson, Garcia-Coll, Ainsworth, Bowlby, Piaget, Rogoff, Spencer, Vygotsky, Bronfenbrenner, and other modern developmental theorists, are explored. This course examines normative assumptions about children's processes of growth and change, and considers how learning and development occur through relationships in social contexts. The pedagogical implications of theories of development and of differences amongst children will be addressed throughout class discussions, child observations, and other course activities. This course requires 15 hours of field experience, working with infants and toddlers in a group care setting. Co-registration in T&L 480: Internship with Infants and Toddlers is recommended and encouraged.
SCG 406
HUMAN DEVELOPMENT AND LEARNING: SECONDARY
Graduate
This course focuses on the multiple factors that contribute to the period of adolescence, bridging childhood and adulthood. Particular attention is given to the intrapsychic, interpersonal, biological, and socio-cultural processes that are mediated by the meanings that youth give to their identity vis a vis race, class, and gender formations within the broader society. Students will engage in interdisciplinary study of theories to examine the implications for teaching and learning processes and the role of educational institutions in fostering the healthy development of youth in society. Forms of inquiry will include students' examination of their own lives and assumptions, critique of theory, and observations of young people in a variety of contexts.

SCG 408
EDUCATION AND SOCIETY
Graduate
A study of social forces that impinge upon the educational enterprise and analysis of the relationship to major social problems in urban education with emphasis on their social, economic, political, historical and philosophical dimensions.

SCG 409
SOCIOLOGY OF EDUCATION
Graduate
This course focuses on the relationship between school structures and culture, social relations of race, ethnicity, class, and gender, and ideologies organizing education in the United States. Students will explore a range of theories in the sociology of education and explore linkages between school structures and processes and broader social forces. Readings may examine the political economy of schooling, inequalities in educational practices, and student and teacher identities shaped by schools and the larger society.

SCG 410
INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES
Graduate
(formerly CUG 400) This course will examine the basic questions, issues and theoretical frameworks central to the purpose, conceptualization, conduct, writing, reading and the use of educational research as a means for informing educational theory, practice and policy. Students will be exposed to the multiple frameworks which inform education research, the various methodologies employed in collecting and analyzing data and will examine the advantages, limitations and values implicit in conducting and evaluating research.

SCG 411
PHILOSOPHY OF EDUCATION
Graduate
This course examines the relationship of education to the moral and ethical dilemmas or predicaments of the human condition. It will entail issues related to the nature of education's responsiveness, or lack there of, to the concerns of the human condition: for example, human alienation, suffering, success and failure, caring, freedom, responsibility, liberation and agency. Special attention will be given to how these concerns influence or have social, cultural and political implications for how teachers address them within the teaching and learning process.

SCG 435
YOUNG ADOLESCENT DEVELOPMENT IN CONTEXT
Graduate
This course considers how race/ethnicity, gender, social class, and sexuality inform teachers' perceptions of early adolescent development. It also examines middle grades teaching practices and has students analyze how those practices shape the growth and educational/learning experiences of early adolescents. It promotes a broad understanding of social, cultural, and historical conceptions of adolescence, and critically examines the complexities of the physical, social, intellectual, and emotional processes of growth and change of young adolescents. It explores the range of social contexts, interpersonal relationships, and societal views, which influence and give meaning to the development and learning of middle grade youth. This course uses observational experiences, reflective inquiry and interdisciplinary theories to prepare middle grades teacher candidates to design classroom experiences that reflect and are sensitive to the socio-cultural contexts and realities of diverse middle grades learners. ***The course meets in the afternoon and integrates community and/or after school field experience with young adolescents into coursework. Co-requisite for this course is MGE 400.In this course, students will: 1. Analyze and assess middle grades teaching practices for their relevance to social contexts that affect middle grades learners. 2. Design classroom experiences that reflect and are sensitive to the socio-cultural contexts and realities of diverse middle grades learners. 3. Interact directly with middle grades learners from a variety of communities and backgrounds and assess and articulate the educational impact of their particular needs.
SCG 439
PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION
Graduate
This course examines foundational and contemporary theories of youth and adolescent development. It considers how these theoretical ideas relate to contemporary questions of youth and middle level education. The course explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. This course seeks to develop in prospective educators a broader capacity to theorize about youth and schooling, and, hence, to act critically and reflectively in multiple contexts in which youth learn. 10 - 15 field experience hours are required as part of this course.

SCG 451
DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION
Graduate
This course introduces students to different approaches to education research and research methods with a focus on critical practitioner research. Students will become discerning readers of educational research and be able to design and conduct research related to teaching and learning in a variety of disciplinary areas (English, history/social sciences, mathematics, or science) at the secondary level. They will develop skills to critically examine and reflect on practice in the classroom through discipline-specific research projects. Taken concurrently with TCH 481, TCH 482, TCH 483, TCH 484.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class. SCG 451 has a co-requisite of TCH 481, or TCH 482, or TCH 483, or TCH 484.

SCG 527
GLOBAL ISSUES IN EDUCATION SEMINAR
Graduate
Studies of school systems outside the United States, their methods, curriculum and achievements.

SCG 582
PRACTICUM IN EDUCATIONAL TECHNOLOGY AND NEW MEDIA
Graduate
This course provides directed experiences in decision-making for curriculum planning, instructional design and delivery, scholarship and leadership in instructional technology-supported learning contexts. Students will engage in co-teaching activities in technology-rich classrooms; develop an instructional technology plan; make field evaluation and use of educational hardware and software; review and discuss research and professional literature in instructional technology; evaluate and use instructional products; develop and present a multimedia-based project; learn and apply theories and principles of instructional and information message design; engage in collaborative, micro-teaching activities online; develop a technology-enhanced instructional program for the K-12 environment; create a staff development plan with focus on technology applications for administrative purposes; conduct an evaluation study on-site; observe and experiment face-to-face and virtually with a range of instructional technology applications; produce comparative reviews on the use of instructional technology in various school settings. The practicum will also provide students with multiple opportunities to reflect and share their thinking with each other in a supportive community of learners and researchers. (Prerequisites: SCG 402 & CS 460).

SCG 588
INDEPENDENT STUDY IN SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION
Graduate
Independent Study in Social and Cultural Foundations in Education. PREREQUISITE: Permission of instructor, program chair and associate dean. (Variable credit)

SCG 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
(0 credit) Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.
SCG 603
CULTURE AND EDUCATION SEMINAR
Graduate
At its core, this course is an exploration of various ways in which culture has been conceptualized. This exploration will focus on the relationship between education, pedagogy, and theories of culture, all framed by a concern for social justice. Topics may include the pedagogical and political dimensions of popular culture, the interpretation of cultural products and expressions, and the relationship between knowledge and power in the political economy of culture production.

SCG 604
IDENTITY: CONSTRUCTIONS AND NEGOTIATIONS SEMINAR
Graduate
This course explores the self and identity as a complex and dynamic psychological, socio-historical, and cultural process, and is grounded in the theoretical frameworks in human development, cultural studies, psychoanalysis, and philosophy, including critical and postmodern perspectives in education. It examines the intersubjective experiences, social relations, institutional hierarchies, and ideological frameworks through which social identities and subject positions are created, negotiated, and transformed across educational institutions and societal culture.

SCG 608
IDEOLOGY, POWER AND POLITICS SEMINAR
Graduate
This course examines how power operates pedagogically and how domination and resistance get shaped in education. It considers how institutional ideologies and power relations in society enter into educational discourse and practice. It also explores ways in which power produces various educational practices and ways in which power gets psychically configured. Students will examine major theories of power, ideology, and politics and consider the educational implications of such an analysis.

SCG 610
INTRODUCTION TO RESEARCH METHODS
Graduate
This course examines the basic questions, issues and theoretical frameworks central to the purpose, conceptualization, conduct, writing, reading and the use of educational research as a means for informing educational theory, practice and policy. Students will be exposed to the multiple frameworks that inform educational research and the various methodologies employed in collecting and analyzing data, and will examine the advantages, limitations and ethical issues relating to conducting and evaluating research.

SCG 611
PHILOSOPHICAL STUDIES IN EDUCATION, CULTURE AND ETHICS SEMINAR
Graduate
This course examines philosophical questions regarding the moral and ethical meaning and purpose of education. Some of the questions explored are the nature of freedom, liberation, individuality, human difference, community, knowledge, reality, emotion, democracy, politics, aesthetics, self and other. In considering these questions in the context of education, particular attention is given to the philosophy of culture.

SCG 614
CRITICAL MEDIA LITERACY
Graduate
This course focuses on theories of media interpretation, cultural pedagogy, and cultural studies. Literature from critical media literacy, cultural studies, critical pedagogy, communication studies, sociology, and philosophy will inform student understanding of how media educates, how interpretations of media are struggled over, and how such practices relate to broader structures of power, identity formation, political economy of media, theories of communication and representation, and pedagogy.

SCG 615
THEORIZING IN EDUCATION, TECHNOLOGY AND SOCIETY
Graduate
This course explores philosophical and sociological theories of education, technology and society. Topics include the social, political, and pedagogical implications of educational technology and new media. The aim of the course is to introduce students to the history of critical theoretical perspectives on educative technologies through foundational texts in the humanities and social sciences as well as contemporary studies in the multiple educative aspects of technology. Course readings will draw on scholarship in philosophy, sociology, new media, educational foundations, and political theory.
SCG 617
SPECIAL TOPICS IN SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION:
Graduate
This course will provide students with an opportunity for critical examination of issues in the social and cultural foundations of education. Topics could include: educational theory; social context of education; education and social justice; education and social transformation, educational policy; and issues in educational reform.

SCG 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of thesis/capstone advisor required each term. Registration limited to three terms. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

SCG 635
ADVANCED QUALITATIVE RESEARCH METHODOLOGIES
Graduate
This course builds on fundamental principles of educational research first introduced in SCG 610. It provides students with experience conducting qualitative research, with particular attention to developing skills in various methods of data collection and analysis.

SCG 610 is a prerequisite for this class.

SCG 636
THESIS RESEARCH
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit. Completion of this course is required to receive the MA Degree in Social and Cultural Foundations in Education.

SCG 637
CAPSTONE: SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION
Graduate
The SCFE Capstone allows students to explore substantive areas of scholarship within their areas of interest and to create a final project or paper of their own design under the mentorship of a faculty member in the program. The Capstone is an opportunity to engage in a synthesis of what has been learned through coursework, and to integrate and compare knowledge gained from students' own research with that which was learned in the program. The capstone course will involve preparation of a substantive piece of work. Upon completion of all coursework, students enrolled in this course will select and work with a Capstone Advisor (a faculty member in the SCFE program) to discuss possible paper topics. The paper will generally consist of library-based research and will typically be 20-25 pages in length. Completion of this course is required to receive the MEd Degree in Social and Cultural Foundations in Education.

SCG 701
PHILOSOPHY OF ETHICS IN EDUCATION
Graduate
This course is a philosophical investigation into the structure and meaning of ethics within education. Education, a condition for self-formation and self-other relations, is explored as a site of ethical inquiry. It is within this framework that education, which involves learning, teaching, response, and communication, is posed as a condition of ethical possibility and not merely as the vehicle through which a certain ethics gets carried out. Primary and secondary philosophical and non-philosophical literature and authors within and outside of philosophy of education will be used to study these issues.

Status as an EDD student with a declared concentration is a prerequisite for this class.
SCG 711
CULTURE, POWER AND EDUCATION
Graduate
The purpose of this course is to facilitate the development of a critical understanding of the larger concept of culture within the notion of multiculturalism. This begins by recognizing that educational institutions such as schools and universities are cultural institutions engaged in the making of culture. While the focus of multiculturalism is about theorizing difference in relation to the particular cultural processes that go on in schools and universities, its focus does not address how educational institutions are shaped by broader cultural dynamics that are outside of the immediate context of educational institutions. It is in this context that doctoral students will examine how cultural processes are intimately connected with social relations, especially with class relations, with gender and ethnic divisions, and with the racial restructuring of social relations. They will also explore how culture involves power, which serves to produce inequalities in the abilities of individuals and social groups to define and realize their needs. In addition, culture will be analyzed as a site of social difference and struggle. The primary focus of the course will be to explore how the larger political economy, popular culture and politics of a society effect the dynamics of how culture is constructed within social life. Doctoral students from within this framework will analyze what we mean by culture; how it is produced and consumed; the relationship of everyday life are represented by dominant cultural and sub-cultural groups and institutions. It is in this context that the course also examines how relations of power, knowledge, social identity and pedagogy within educational institutions are conditioned and shaped by the educational practice that shapes and impinges upon the internal workings and purposes of educational institutions.

Status as a EDD student with a declared concentration is a prerequisite for this class.

SCG 721
HUMAN DEVELOPMENT AND THE EDUCATIONAL PROCESS
Graduate
This course will examine the process of human development and learning through the ages by critically examining cross-cultural research and developmental theories designed to describe and interpret the physical, social, emotional, intellectual, and psychological processes involved. Emphasis will be placed on the range of individual, familial, environmental, and cultural factors that may enhance or inhibit human growth and development, and on the critical role that human relationships play in the lifelong interactive processes of learning and growth. Considerable attention will be paid to the historical role of power, culture, class, gender and capability in defining and interpreting certain behaviors as indicators of normative development. These normative indicators will be critiqued with regard to underlying cultural assumptions and values, their function in fostering and maintaining current social, educational and political relations, and their contribution to the current crises in urban education and the development of children and youth. Class participants will examine their perspective on human development and learning and explore the socio-cultural and historical bases which contribute to their underlying values and assumptions. Through multifaceted inquiry utilizing self-reflection, case studies, theoretical analyses, and child assessment and observation, participants will consider the implications for their work as educational leaders in approaching current challenges with students, parents, community, and teachers and in creating schools that will foster societal change to support the healthy development of children and youth.

Status as a EDD student with a declared concentration is a prerequisite for this class.

SCG 735
QUANTITATIVE RESEARCH METHODS I
Graduate
This course is designed to provide doctoral level students with theoretical and practical preparation in quantitative research design including: instrumentation; data collection; statistical analysis; ethics and politics of the conduct of research; and development of analytical skills for critiquing quantitative research. Students will have the opportunity to work with real databases to conduct both univariate and multivariate analyses, including correlations, ANOVAS, and multiple regressions. Prerequisite: SCG 785.

SCG 785 and status as an EDD student is a prerequisite for this class.

SCG 745
QUALITATIVE RESEARCH METHODS I
Graduate
This course is designed to provide doctoral level students with theoretical and practical preparation in qualitative methods including: data collection and analysis; ethics and the politics of the conduct of research; and critical analytical skills for review and critique of qualitative research. Students will be introduced to a range of approaches to qualitative inquiry that may include: narrative inquiry; ethnography; case study; phenomenology; grounded theory; and participatory action research from a variety of theoretical perspectives. Prerequisite: SCG 785.

SCG 785 and status as an EDD student is a prerequisite for this class.
**SCG 755**  
**QUANTITATIVE RESEARCH METHODS II**  
**Graduate**  
A continuation of SCG 735. Students will prepare a methodology section of a research project and will learn how to write up quantitative results of their analyses. By the end of the course students should be able to: understand quantitative methodological approaches; select appropriate data collection strategies; conduct the appropriate analysis for the research question(s) proposed and the nature of the data; and be prepared to write a candidacy paper. Prerequisite: SCG 735.

SCG 755 and status as an EDD student is a prerequisite for this class.

**SCG 765**  
**QUALITATIVE RESEARCH METHODS II**  
**Graduate**  
A continuation of SCG 745. Students will conduct a pilot study on an issue of interest using a qualitative research design. By the end of the course students should be able to: understand qualitative methodological approaches; select appropriate data collection strategies; conduct the appropriate analysis for the research question(s) proposed and the nature of the data; and be prepared to write a candidacy paper. Prerequisite: SCG 745.

SCG 745 and status as an EDD student is a prerequisite for this class.

**SCG 775**  
**SEMINAR: FRAMEWORKS OF INQUIRY IN EDUCATIONAL RESEARCH I**  
**Graduate**  
This course offers doctoral students a general introduction to theory and practice in educational research. First, it is designed to help students develop an understanding of the assumptions that underlie multiple approaches to knowledge construction and the conduct of inquiry in education. Second, the course will introduce students to the structural organization of a research manuscript. By the end of the course students should be able to: understand key theoretical and methodological issues in educational inquiry; engage in the critical analysis of multiple educational frameworks; recognize the components of a research manuscript; and identify a general topic area for dissertation research.

Status as a EDD student with a declared concentration is a prerequisite for this class.

**SCG 785**  
**SEMINAR: FRAMEWORKS OF INQUIRY IN EDUCATIONAL RESEARCH II**  
**Graduate**  
Drawing upon the knowledge and skills developed in Frameworks of Inquiry I, this course is designed to enhance students' ability to critically analyze existing research as a crucial element in completing their own doctoral research. Emphasis will be placed on the preparation of a critical literature review. By the end of the course students should be able to: review the components of a research proposal; develop further the ability to evaluate research critically; conduct a literature review that will involve interpretation, evaluation, and synthesis of literature on a topic of their choice; refine a topic for dissertation research; and make an informed decision between the quantitative and qualitative sequences. Prerequisite: SCG 775

SCG 775 and status as an EDD student is a prerequisite for this class.

**SCU 207**  
**SOCIAL AND HISTORICAL ISSUES IN EDUCATION**  
**Undergraduate**  
This course examines through an interdisciplinary framework sociological and historical issues and concerns associated with the relationship between education and public life. The course analyzes education as a form of cultural power, addressing its political and ideological effects. Emphasis will be placed upon the social and historical meanings and purposes assigned to education, especially as it pertains to questions of race, gender, sexuality, and the political economy of class.
SCU 335
YOUNG ADOLESCENT DEVELOPMENT IN CONTEXT
Undergraduate
This course considers how race/ethnicity, gender, social class, and sexuality inform teachers' perceptions of early adolescent development. It also examines middle grades teaching practices and has students analyze how those practices shape the growth and educational/learning experiences of early adolescents. It promotes a broad understanding of social, cultural, and historical conceptions of adolescence, and critically examines the complexities of the physical, social, intellectual, and emotional processes of growth and change of young adolescents. It explores the range of social contexts, interpersonal relationships, and societal views, which influence and give meaning to the development and learning of middle grade youth. This course uses observational experiences, reflective inquiry and interdisciplinary theories to prepare middle grades teacher candidates to design classroom experiences that reflect and are sensitive to the socio-cultural contexts and realities of diverse middle grades learners. ***The course meets in the afternoon and integrates community and/or after school field experience with young adolescents into coursework. Co-requisite for this course is MGE 300. In this course, students will: 1. Analyze and assess middle grades teaching practices for their relevance to social contexts that affect middle grades learners. 2. Design classroom experiences that reflect and are sensitive to the socio-cultural contexts and realities of diverse middle grades learners. 3. Interact directly with middle grades learners from a variety of communities and backgrounds and assess and articulate the educational impact of their particular needs.

Junior standing is a prerequisite for this class.

SCU 336
ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
Undergraduate
Theories of development throughout adolescence including current issues of problems and growth crises in attaining maturation. The course also includes adult and aging life span considerations. Emphasis is placed on the role of the early childhood professional in interaction with adults in the lives of young children (i.e., parents, grandparents).

SCU 337
HUMAN GROWTH AND DEVELOPMENT
Undergraduate
This course is an introduction to the study of the process of human development from conception to old age. Through a range of theories, the periods of childhood, adolescence, and adulthood are examined with particular attention to the role of culture, gender, and class as they inform the contextualized process of growth and change across the life span.

SCU 338
THE PROCESS AND EVALUATION OF LEARNING
Undergraduate
The process involved in human learning is examined from alternative theoretical and research paradigms and perspectives. The roles of emotions, cultural differences, social realities, cognitive uniqueness, character and achievement tendencies are examined with respect to learner functioning. Alternative methods and techniques for evaluating learner development and academic achievement are surveyed and discussed. Emphasis is placed upon identifying the characteristics of individually and culturally responsive and responsible testing and assessment protocols in the school setting.

Advanced Teacher Candidate Standing is a prerequisite for this class.

SCU 339
PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION
Undergraduate
This course introduces foundational and contemporary theories of youth and adolescent development. It provides an investigation of how these theoretical ideas relate to contemporary questions of youth and middle level education. The course explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. This course seeks to develop in prospective educators a broader capacity to theorize about youth and schooling and, hence, to act critically and reflectively in multiple contexts in which youth learn. 10 - 15 field experience hours are required as part of this course.

Advanced Teacher Candidate Standing or status as an Exercise Science or World Language Education major is a prerequisite for this class.
SCU 351
DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION
Undergraduate
This course introduces students to different approaches to education research and research methods with a focus on critical practitioner research. Students will become discerning readers of educational research and be able to design and conduct research related to teaching and learning in a variety of disciplinary areas (English, history/social sciences, mathematics, or science) at the secondary level. They will develop skills to critically examine and reflect on practice in the classroom through discipline-specific research projects. Taken concurrently with SEC 381, SEC 382, SEC 383, SEC 385.

SEC 364 is a prerequisite for this class. SCU 351 has a co-requisite of SEC 381, or SEC 382, or SEC 383, or SEC 385.

SCU 399
INDEPENDENT STUDY
Undergraduate
Education core unit. Permission of Department Chair and Associate Dean is required. (Variable credit)

SE 325
INTRODUCTION TO SOFTWARE ENGINEERING
Undergraduate
This course introduces students to the activities performed at each stage of the development process so that they can understand the full lifecycle context of specific tasks such as coding and testing. Topics will include software development processes, domain modeling, requirements elicitation and specification, architectural design and analysis, product and process level metrics, configuration management, quality assurance activities including user acceptance testing and unit testing, project management skills such as risk analysis, effort estimation, project release planning, and software engineering ethics. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

CSC 301 or CSC 383 or CSC 393 is a prerequisite for this class.

SE 330
OBJECT ORIENTED MODELING
Undergraduate
Object-oriented modeling techniques for analysis and design. Provides the tools and techniques needed to solve complex, real-world software engineering problems in an object-oriented manner, using the most effective elements of the Unified Process. The course covers the essential concepts and notation of the Unified Modeling Language (UML), the standard notation for object-oriented analysis and design. Team project. PREREQUISITE(S): CSC 212 or CSC 262 or CSC 300

CSC 212 or CSC 262 or CSC 300 is a prerequisite for this class.

SE 333
SOFTWARE TESTING
Undergraduate
This course is designed for the software engineering professional to gain a greater understanding of the key ingredients in creating and/or managing a successful testing program to meet project needs. Topics covered include test lifecycle planning, test design & coverage analysis, complexity, levels of testing such as unit, integration, system, performance and stress testing. Best practice strategies in software testing such as verification & validation, early lifecycle testing, risk based testing and automation will also be examined including exposure to test automation methods and tools. PREREQUISITE(S): CSC 383 or SE 330 or CSC 301

CSC 383 or SE 330 or CSC 301 is a prerequisite for this class.

SE 350
OBJECT-ORIENTED SOFTWARE DEVELOPMENT
Undergraduate
Principles, techniques and tools of object-oriented modeling, design, implementation, and testing of large-scale software systems. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): CSC 301 or CSC 383

CSC 301 or CSC 383 is a prerequisite for this class.
SE 352
OBJECT-ORIENTED ENTERPRISE APPLICATION DEVELOPMENT
Undergraduate
This course focuses on applying object-oriented techniques in the design and development of software systems for enterprise applications. Topics include component architecture, such as Java Beans and Enterprise Java Beans, GUI components, such as Swing, database connectivity and object repositories, server application integration using technologies such as servlets, Java Server Pages, JDBC and RMI, security and internationalization. PREREQUISITE(S): CSC 301 or CSC 383.
CSC 301 or CSC 383 is a prerequisite for this class.

SE 356
SOFTWARE DEVELOPMENT FOR MOBILE AND WIRELESS SYSTEMS
Undergraduate
This course will focus on the unique aspects of developing software applications for mobile and wireless systems, such as personal digital assistant (PDA) devices and mobile phones. Topics will include user interface design for small screens with restricted input modalities, data synchronization for mobile databases as well as wireless programming and the use of web services. PREREQUISITE(S): SE 350
SE 350 is a prerequisite for this class.

SE 357
CONCURRENT SYSTEM DEVELOPMENT
Undergraduate
Fundamentals and techniques of developing concurrent object-oriented applications, using a patterns-based approach. Concepts covered include threads, synchronization and object locking, thread blocking and deadlock, safety and liveness, state-dependent action and concurrency control. PREREQUISITE(S): SE 350.
SE 350 is a prerequisite for this class.

SE 358
SOFTWARE DEVELOPMENT FOR LIMITED AND EMBEDDED DEVICES
Undergraduate
This course will focus on the unique aspects, tools, and techniques for developing software applications for limited and embedded devices, such as set-top boxes, micro-controllers and smart cards. Topics will include memory management for low-memory devices and efficient programming techniques for limited processors. Students will gain hands-on experiences in customizing and configuring embedded OS, handling various types of sensors and actuators such as barcode readers, RFID sensors, etc, and building software applications that meet the functional and non-functional requirements. PREREQUISITE(S): SE 350
SE 350 is a prerequisite for this class.

SE 359
AGILE SOFTWARE DEVELOPMENT
Undergraduate
This course focuses on the fundamentals, principles, tools, and techniques in agile software development. Students will gain hands-on experience in agile software development through projects dealing with various aspects of agile development, including planning, construction, testing, and integration. Students will be able to effectively participate in and manage agile software development as a result of their successfully completing this course. PREREQUISITE(S): SE 350
SE 350 is a prerequisite for this class.

SE 368
SOFTWARE MEASUREMENT AND PROJECT ESTIMATION
Undergraduate
This course will discuss various software metrics and defect models. Productivity and effort estimation models as well as software cost estimation will also be discussed. PREREQUISITE(S): IT 223 and SE 330.
IT 223 and SE 330 are prerequisites for this class.
SE 371
PRACTICES OF GLOBAL SOFTWARE DEVELOPMENT
Undergraduate
This course studies the challenges and solutions for developing software in a global environment. Topics covered include strategic issues related to allocation of tasks; communication issues that arise due to distance, time zone differences, infrastructure support, geographical dispersion, and lack of information communication; coordination complexity; cultural issues, technical issues related to information and artifact sharing, and architectural design, and finally knowledge management issues. Some sections of this course will include a hand-on global development project in conjunction with teams of students at other universities, while other sections will focus on a more in-depth theoretical discussion of these issues and concepts. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

CSC 301 or CSC 383 or CSC 393 is a prerequisite for this class.

SE 380
DESIGN OF OBJECT-ORIENTED LANGUAGES
Undergraduate
This course covers issues in the design and specification of object-oriented programming languages. Sample topics include the use of patterns in program representation, static and dynamic semantics, subject reduction, sub-typing, inheritance, polymorphism, genericity and concurrency. PREREQUISITE(S): SE 350.

SE 350 is a prerequisite for this class.

SE 391
SOFTWARE ENGINEERING STUDIO I
Undergraduate
Students will work in small teams to develop realistic software systems in a master-apprentice environment. The instructor will serve as a master/mentor/project leader. Students will apply the knowledge and skills they have learned in previous course in solving real world problems. PREREQUISITE(S): SE 350

SE 350 is a prerequisite for this class.

SE 392
SOFTWARE ENGINEERING STUDIO II
Undergraduate
This course is a continuation of SE 391. SE 391 and SE 392 must be taken as a sequence in consecutive quarters. PREREQUISITE(S): SE 391.

SE 391 is a prerequisite for this class.

SE 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. Prerequisite(s): Instructor consent required (variable credit)

SE 430
OBJECT ORIENTED MODELING
Graduate
Object-oriented modeling techniques for analysis and design. Provides the tools and techniques needed to solve complex, real-world software engineering problems in an object-oriented manner, using the most effective elements of the Unified Process. The course covers the essential concepts and notation of the Unified Modeling Language (UML), the standard notation for object-oriented analysis and design. Team project. PREREQUISITE(S): CSC 403

CSC 403 is a prerequisite for this class.
SE 433  
SOFTWARE TESTING AND QUALITY ASSURANCE  
Graduate  
This course is designed for the software engineering professional to gain a greater understanding of the key ingredients in creating and/or managing a successful testing program to meet project needs. Topics covered include test lifecycle planning, test design & coverage analysis, complexity, levels of testing such as unit, integration, system, performance and stress testing. Best practice strategies in software testing such as verification & validation, early lifecycle testing, risk based testing and automation will also be examined including exposure to test automation methods and tools. PREREQUISITE(S): CSC 403  
CSC 403 is a prerequisite for this class.

SE 441  
CONTINUOUS DELIVERY AND DEVOPS  
Graduate  
A study of the tools, techniques, and processes used in Continuous Delivery and DevOps. Learn to transform an organization that uses traditional software release methods into one that embraces continuous delivery and deployment. Topics will include: the economics of DevOps and continuous delivery; the role of virtualization, cloud technologies, and containers, automated builds and testing; value stream maps; the essentials of configuration management; effective use of source code control branches and feature flags to manage multiple lines of development. PREREQUISITE(S): CSC 403  
CSC 403 is a prerequisite for this class.

SE 450  
OBJECT-ORIENTED SOFTWARE DEVELOPMENT  
Graduate  
Principle, techniques and tools of object-oriented modeling, design, implementation, and testing of large-scale software systems. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): CSC 403  
CSC 403 is a prerequisite for this class.

SE 452  
OBJECT-ORIENTED ENTERPRISE COMPUTING  
Graduate  
This course focuses on applying object-oriented techniques in the design, development, and integration of server-side enterprise applications using technologies such as servlets, Java Server Pages, and JDBC. Topics include web applications, multi-tier architecture, model-view-controller architecture, database connectivity, and security. PREREQUISITE(S): CSC 403  
CSC 403 is a prerequisite for this class.

SE 453  
ARCHITECTURE AND FRAMEWORKS FOR DEVELOPING CLIENT APPLICATIONS  
Graduate  
This course will focus on software architectures, frameworks, and techniques for developing web-based thin client applications as well as rich desktop client applications. Topics will include discussion on design and architectural patterns, such as model-view-controller pattern; survey of widely used development frameworks for building client applications, such as Struts, Java Server Face (JSF), Swing, and SWT, etc.; discussion of widely used techniques such as AJAX; evaluation of the strengths and weaknesses of these technologies for making technology decisions. Students will gain hands-on experiences in developing applications that utilizes these frameworks and techniques. Prerequisite: SE 452.  
SE 452 is a prerequisite for this class.
ARCHITECTURE OF REAL-TIME SYSTEMS
Graduate
This course discusses the principles, styles, and patterns of real-time software architecture. Trade-offs and ramifications of software architecture with respect to performance, maintainability, and reusability, will be explored. The course will also investigate the design and implementation of real-time behavior and constraints for Common Design Patterns such as Observer, Visitor, and Strategy. Finally, the course will demonstrate how creation of real-time Data Driven environment allows the run-time object data to control the behavior and flow of an application. These topics will be discussed in the context of best practices in software engineering such as iterative development, testing, and continuous integration. PREREQUISITE(S): CSC 403

CSC 403 is a prerequisite for this class.

SERVICE-ORIENTED ARCHITECTURE
Graduate
An in-depth study of service oriented architecture (SOA) from the business, architectural, and technology perspectives. The business perspective will explain the imperatives behind SOA and discuss the significance of SOA in industry. The architectural perspective will discuss the different architectural models of software development and contrast these with SOA. The technology perspective will provide students with the opportunity to gain the required hands-on experience to analyze, design, implement and deploy SOA solutions that will meet both functional and non-functional requirements. Major topics include software architectures in practice, SOA development lifecycle, Enterprise Service Bus, SOA analysis and design methods, Web Services, and governance. Prerequisite: SE 450 or CSC 435

SE 450 or CSC 435 is a prerequisite for this class.

AGILE SOFTWARE DEVELOPMENT
Graduate
This course focuses on the fundamentals, principles, tools, and techniques in agile software development. Students will gain hands-on experiences in agile software development through projects dealing with various aspects of agile development, including planning, construction, testing, and integration. Students will be able to effectively participate in and manage agile software development as a result of their successfully completing this course. PREREQUISITE(S): SE 450

SE 450 is a prerequisite for this class.

SOFTWARE MEASUREMENT/ PROJECT ESTIMATION
Graduate
Software metrics. Productivity, effort and defect models. Software cost estimation. PREREQUISITE(S): IT 403 and (SE430 or SE450)

IT 403 and (SE 430 or SE 450) are prerequisites for this class.

MANAGING GLOBALLY DISTRIBUTED SOFTWARE DEVELOPMENT
Graduate
Managing Globally Distributed Software Development (GDSD) for IT projects. Issues associated with time zone differences, infrastructure support, geographical dispersion, and lack of centralized communication. The course will focus on the management, implementation and deployment of software within the context of outsourced, distributed development, and insourced projects. Additional topics include strategic management issues such as justification, vetting, consulting services and partnerships. Course will include several hands-on distributed development projects. PREREQUISITE(S): CSC 403

CSC 403 is a prerequisite for this class.

SOFTWARE AND SYSTEMS PROJECT MANAGEMENT
Graduate
Project Management is presented from a practitioner's view. The four basic building blocks of software project management: people, process, tools, and measurements are covered. Special emphasis is placed on professional standards such as the Project Management Book of Knowledge and IEEE Software Engineering Standards. Specific topics include Managing People, Selecting Project Tools, Leadership & Motivation, Software Development Processes, Estimation, Risk Analysis, Scheduling and Tracking, Leveraging Measurements, and Project Completion. Consideration is given to rapid development and project cultural issues. PREREQUISITE(S): Knowledge of the Software development life cycle model, for example through courses such as SE430, ECT455, IS425, MIS555 or through appropriate work experience.
SE 480
SOFTWARE ARCHITECTURE I
Graduate
The Software Architecture process is concerned with describing, evaluating, and designing systems at the architectural level. This course will discuss the role of architecture and the architect in the software development cycle. It will introduce architectural patterns and tactics, architecture assessment techniques, architecture driven design, and techniques for documenting architectures. The course will involve design, development, and assessment activities. PREREQUISITE(S): SE 450

SE 482
REQUIREMENTS ENGINEERING
Graduate
Requirements Engineering (RE) plays a critical role in the software development process. This course will introduce related vocabulary, concepts, and techniques, and will examine the role of RE in software and systems engineering. The course will cover topics related to eliciting, validating, negotiating, analyzing, specifying, and managing requirements. Popular RE tools will also be introduced. Prerequisite: SE430 or SE450.

SE 491
SOFTWARE ENGINEERING STUDIO
Graduate
Students will work in small teams to develop realistic software systems in a master-apprentice environment. The instructor will serve as a master/mentor/project leader. Students will apply knowledge and skills they have learned in previous course in solving real world problems. PREREQUISITE(S): SE 450.

SE 511
PRACTICES OF GLOBAL SOFTWARE DEVELOPMENT
Graduate
This course studies the challenges and solutions for developing software in a global environment. Topics covered include strategic issues related to allocation of tasks; communication issues that arise due to distance, time zone differences, infrastructure support, geographical dispersion, and lack of information communication; coordination complexity; cultural issues, technical issues related to information and artifact sharing, and architectural design, and finally knowledge management issues. Some sections of this course will include a hands-on global development project in conjunction with teams of students at other universities, while other sections will focus on a more in-depth theoretical discussion of these issues and concepts. Prerequisite(s): SE 450 or SE 430 or IS 430 or PM 430. A student may not take both IS 540 and SE 511 for credit toward a degree.

SE 525
SOFTWARE SECURITY ARCHITECTURE
Graduate
Students in this course will learn architectural patterns for integrating security into software such as web applications. Topics include: an overview of software security; integration of authentication, access control, and auditing into software; programming with symmetric-key and asymmetric-key cryptography, including key distribution and key management, use of certificates, and SSL/TLS; security mechanisms in modern runtime environments, e.g., code signing, code verification, access control, and security policies. Students will get hands-on experience designing and implementing secure software. PREREQUISITE(S): CSC 435 and SE 450

CSC 435 and SE 450 are prerequisites for this class.

SE 526
SOFTWARE SECURITY ASSESSMENT
Graduate
Students in this course will learn how to conduct software security assessment to identify software vulnerabilities in software such as web applications and operating system services. Topics include: common software vulnerabilities and attack vectors; malicious payloads, including shellcode structure; and application review techniques, including fuzzing and code auditing. Students will get hands-on experience identifying vulnerabilities in software. Prerequisite(s): CSC 435

CSC 435 is a prerequisite for this class.
SE 529
SOFTWARE RISK MANAGEMENT
Graduate
Identification, estimation, evaluation, planning, controlling, and monitoring of risk involved in the development, maintenance, operation and evolution of systems. PREREQUISITE(S): IT 403 and SE 430 or consent.

IT 403 and SE 430 or Consent of Instructor are prerequisites for this class

SE 533
SOFTWARE VALIDATION AND VERIFICATION
Graduate
Techniques, methods and tools for software inspection and testing. Theory and applications of formal verification of programs. Techniques and tools for automated analysis of programs. PREREQUISITE(S): SE 450.

SE 450 is a prerequisite for this class.

SE 546
SOFTWARE ARCHITECTURE AND DESIGN FOR DESKTOP APPLICATIONS
Graduate
This course will introduce students to architecture, design and implementation issues for developing GUI-based desktop application. The goal is to understand the engineering aspect of user interface development -- that is the basic software architectures and designs that govern the development of graphical user applications including patterns like the Model-View-Controller and its derivatives, event-driven design, as well as addressing concurrency, performance, caching, and software packaging and distribution issues. The course will also provide an in depth exposure to the toolkits available in Java. Examples include JFC/Swing, JMF, JAF. Prerequisite(s): SE 450

SE 450 is a prerequisite for this class.

SE 549
MODEL-DRIVEN SOFTWARE DEVELOPMENT
Graduate
Advanced methods and techniques in software specification, modeling, and model-driven development. Topics include approaches to software specification and modeling, formal specification languages, techniques for structural and behavioral modeling of software systems, and tools for analysis and transformation of software systems. PREREQUISITE(S): SE 430 or SE 450

SE 554
ENTERPRISE COMPONENT ARCHITECTURE
Graduate
This course will focus on object-oriented component architectures for enterprise applications. Topics include: Enterprise Java Beans (EJB), Java Naming and Directory Interfaces (JNDI), Java Mail and Messaging Services. PREREQUISITE(S): SE 450 or SE 452.

SE 450 or SE 452 is a prerequisite for this class.

SE 556
ADVANCED ARCHITECTURE OF COMPUTER GAMES
Graduate
This course discusses the advanced issues in software architecture and the engineering of computer games. The topics include engineering and programming issues in graphics, scene management, kinematics, simulation, collision detection. Software design patterns and frameworks for computer games. Project management, configuration management, and quality assurance of computer game development projects. PREREQUISITE(S): SE 456 and CSC 407

SE 456 and CSC 407 are prerequisites for this class.
SE 560
STRUCTURED DOCUMENT INTERCHANGE AND PROCESSING
Graduate
Document and data interchange among different applications is an extremely important aspect of software application development. This course will focus on emerging technologies associated with the Extensible Markup Language (XML), such as the Document Object Model (DOM), the Simple API for XML (SAX), the XML Stylesheet Language (XSL) and Transformation Language (XSLT), and XML Schema. Applications of these technologies will be discussed in conjunction with tools and techniques for parsing, transforming, and manipulating documents. PREREQUISITE(S): SE 450 OR ((CSC 383 or CSC 301) and SE 430).

SE 450 OR ((CSC 383 or CSC 301) and SE 430) are the prerequisites for this class.

SE 579
ANALYTICS AND DATA MINING IN SOFTWARE ENGINEERING
Graduate
This course discusses the application of selected statistical analysis, data mining, and machine learning techniques to the area of Software Engineering. These techniques are used for purposes as varied as stakeholder analysis, mining software repositories, trace retrieval, bug prediction, recommender systems in Software Engineering domains, and software process improvement techniques. The course demonstrates how these techniques can be used to enhance project management and other software engineering activities in software intensive systems and provides students with hands-on experience using them on real project data. (No prior knowledge of data mining and knowledge management is assumed.) PREREQUISITE(S): SE 450

SE 450 is a prerequisite for this class.

SE 581
SOFTWARE ARCHITECTURE II
Graduate
In this second Software Architecture course, students will be exposed to case studies of real-world software architectures for which reliability, performance, availability, scalability and other such concerns drive the architectural design. Students will gain hands-on practice in reverse engineering, designing, and assessing existing systems including performance testing. Student will build on their prior knowledge to design complex systems in principled and systematic ways. The course will involve designing and implementing a simulated high scalability, high reliability system. PREREQUISITE(S): SE 480

SE 582
SOFTWARE-INTENSIVE SYSTEMS ENGINEERING AND MANAGEMENT
Graduate
This course will introduce students to fundamental principles of systems engineering for large and complex software intensive systems. The course will include a study of systems engineering failures, and will cover topics related to problem frames; systems level modeling of hardware and software components, concept definition, design tradeoffs, risk assessment, interface definition and related systems engineering activities. Additional topics such as product line development, ultra-large scale systems, and engineering of safety critical systems will also be covered. PREREQUISITE(S): (SE 477 or PM 430 or IS 430) and (SE 430 or SE 482 or IS 485)

(SE 477 or PM 430 or IS 430) and (SE 430 or SE 482 or IS 485) are prerequisites for this class.

SE 591
SOFTWARE ENGINEERING STUDIO II
Graduate
This is the continuation of SE 491. SE 491 and 591 must be taken as a sequence in two consecutive quarters. PREREQUISITE(S): SE 491

SE 491 is a prerequisite for this class.

SE 598
TOPICS IN SOFTWARE ENGINEERING
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)
SE 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None. (variable credit)

SE 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. Students may register for this course no more than three times. PREREQUISITE(S): Consent of the instructor.

SE 691
RESEARCH SEMINAR CONTINUATION
Graduate
This course is intended for students not registering in either SE 696 or SE 698. After registering for SE 690, students register for this course in each subsequent quarter until they complete the research. Students who fail to do so will be required to re-enroll in SE 690 to meet the requirement for completing that course. Prerequisite: SE 690 (0 credit hours)

SE 690

SE 695
MASTER'S RESEARCH
Graduate
Students interested in a more in-depth study of a particular area will register for this course and work with a faculty member (not necessarily their academic advisor) on a research project. The work involved may include system development, empirical studies, or theoretical work. 4 credit hours of CSC 695 replaces one 500-level elective course in student's degree program. This course can be taken for 1-4 credit hours for up to 8 credit-hours. PREREQUISITE(S): Consent of research advisor. Independent study form required. Students must successfully complete the foundation courses prior to their first enrollment in CSC 695. (variable credit)

SE 696
MASTER'S PROJECT
Graduate
(4 credit hours) Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. PREREQUISITE(S): Consent of advisor.

SE 698
MASTER'S THESIS
Graduate
A student who has made an original contribution to the area (typically through 8 credit-hours' worth of work done in CSC 695, but not necessarily) may choose to complete a Master's Thesis. The student and the student's research advisor form a Master's Thesis Committee. The student submits to the committee a thesis detailing the original results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for this course and the transcript will show the thesis title as the course topic. PREREQUISITE(S): Successful defense of a Master's Thesis. (0 credit hours)

SE 699
SOFTWARE ENGINEERING RESEARCH CONTINUATION
Graduate
Students register for continuation credit after registering for SE 698 in each subsequent quarter until they complete their thesis. Students who fail to do so will have to reregister for SE 698 to meet the requirement for completing that course. PREREQUISITE(S): SE 698. (0 credit hours)
SEC 309
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Undergraduate
Prepares teacher-candidates for teaching mathematics at the middle school and secondary school levels. Examines contemporary issues in teaching mathematics, methods of teaching secondary mathematics, and recent history in mathematics curriculum development. Emphasis on the development of alternative teaching strategies and the implementation of the NCTM Standards. Lesson and unit development, evaluation, and classroom management also will be discussed. 30 Level 2 Field Experience hours.

SEC 309 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 310
TEACHING, HISTORY, AND SOCIAL SCIENCES IN SECONDARY SCHOOLS
Undergraduate
Prepares teacher-candidates for teaching history and social sciences at the middle and secondary school levels. Examines the nature and purpose of history and social sciences curriculum within secondary schools, the current status of social studies materials and practices, and issues confronting today's secondary social studies teachers. Emphasis on alternative teaching strategies, resources for teaching and learning, teachers' responsibilities in curriculum development and decision making, and methods and materials for addressing cultural diversity. Lesson and unit development, evaluation, and classroom management also will be discussed. 30 Level 2 Field Experience hours.

SEC 310 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 311
THE NATURE OF ENGLISH
Undergraduate
This course is designed to help students to see that the field of English Studies is bigger than the component they probably identify as English (its Literature, Writing, and Linguistics/Grammar). Students will explore the formation of the discipline up to the current day, focusing on the shifting understanding of ways of reading, writing and thinking about language. They will strive to answer the questions: What does it mean to be a student of language and literature? and, What are the ways of knowing writing, literature, and language? In doing so, students will relate their disciplinary content to their daily lives and interests and to the larger framework of human endeavor and understanding, including identifying its importance to the personal lives of high school students.

SEC 311 and Junior Status are prerequisites for this class.

SEC 312
THE NATURE OF HISTORY AND THE SOCIAL SCIENCES
Undergraduate
This course builds on the content course work students have done in the seven disciplines grouped under the heading "social sciences" (history, political science, geography, sociology, anthropology, economics, and psychology). In this class students will get further exposure to the basic concepts of the social science disciplines and consider the connections as well as differences between them. The course emphasizes how different disciplinary backgrounds lead students to bring different perspectives to their study of social phenomena and helps them see these phenomena from multiple vantage points. The course will employ a case study approach framed around social issues of interest to all seven disciplines (e.g. social control, threats, development, natural disasters). By the end of the course, students will have applied the knowledge and skills of multiple social science disciplines to evaluate social phenomena, considered the relationship and differences between those disciplines, and be prepared to enter SEC 322 where they will apply their content knowledge to inquiry and teaching in the field.

SEC 312 and Junior Status are prerequisites for this class.

SEC 313
THE NATURE OF MATHEMATICS
Undergraduate
This course builds on students' mathematics understanding by emphasizing the universality of mathematics as a cultural endeavor. In it, students will explore the historical trends in mathematic and how those trends have been taught. Students will understand that, mathematics, at its core, is deductive; however, it also requires intuition. Thus, the course examines the interaction among intuition, experimentation, conjecture, abstraction, and deductive reasoning not only in the classroom but also in the everyday use of mathematics. It also examines the interplay between concrete problem-solving and generalization.

SEC 313 and Junior Status are prerequisites for this class.
SEC 314
THE NATURE OF SCIENCE
Undergraduate
This course is about the nature of science and the interactions between science and society. It will build on the foundation of understandings that students already have about the processes and conventions of science developed through their years as science students to create opportunities for deeper understandings of the beliefs and assumptions inherent to the creation of scientific knowledge. These opportunities will be developed through direct interactions with professional scientists as well as through case studies and readings that illustrate the strengths, limits and pitfalls of the scientific endeavor as well as provide opportunities for students to relate science to their daily lives and interests and to a larger framework of human endeavor and understanding (e.g., relationships among systems of human endeavor including science and technology; relationships among scientific, technological, personal, social and cultural values). Cases will be drawn from different scientific disciplines as well as from modern and historic times. In this way, science students will have a better understanding of what it means to be a scientist and how science interfaces with society. The course is a prerequisite for SEC 324.

SEC 364 and Junior Status are prerequisites for this class.

SEC 321
INQUIRY & APPLICATION IN DEVELOPING SECONDARY ENGLISH PEDAGOGY
Undergraduate
This course builds on SEC 311 by preparing teacher candidates to distinguish between what needs to be taught (content) and how it is taught (pedagogy), with an emphasis on understanding the historical shifts in the teaching of content and how these shifts inform teaching and learning in today's English language arts classrooms. The course also introduces students to methods of inquiry and reflection on content pedagogical knowledge. Student will examine their own educational experience through the lens of the historical trends, focusing on how they learned and what they understood their teachers to be doing. This initial case study will serve as an introduction into case study methods. Students will also develop expertise in one of the three historical trend areas - reading, writing, and language - and examine how the trend has informed teaching and learning and shaped curriculum, pedagogy, and assessment. Students will develop a case study of a practicing teacher using the lens of the historical trend in which they are developing expertise. 25 Level 1 Field Experience hours.

SEC 364, SEC 311 and Junior Status are prerequisites for this class.

SEC 322
INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY
Undergraduate
This course builds on the content knowledge students developed and reinforced in SEC 312. More, it asks them to make the shift from considering how a person prepared in the social sciences analyzes social phenomena to how such a person teaches the social sciences. Students will do this by developing two units of inquiry-based case studies that they could use in their own classrooms. The topics of these case studies will vary from section to section, depending on the needs of the students and expertise of the instructor. Possible topics include the Constitution, the Cold War, slavery, and the Iraq War. As students work on these projects, they will continue to reflect on the course work they have done in the content areas as well as the instruction they see teachers delivering in their field experiences. They will contemplate such questions as: “What are the connections between the social science disciplines? How can they be taught together, creating interdisciplinary courses at the high school level? What are the differences between the social science disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about social events but also the freedom to pursue their interests and make sense of the world on their own terms?” By the end of this course, students through readings and their projects will have advanced their learning about the nature of inquiry, its implementation in the classroom, and the connections and differences between the social science disciplines. 25 Level 1 Field Experience hours.

SEC 364, SEC 312 and Junior Status are prerequisites for this class.

SEC 323
INQUIRY & APPLICATION IN DEVELOPING SECONDARY MATHEMATICS PEDAGOGY
Undergraduate
This course builds on SEC 313 by introducing students to inquiry methods to understand the teaching and learning of mathematics. Students will explore how mathematics has been and is taught by examining major paradigm shifts in mathematics education and the impact those paradigms and shifts have on pedagogical content knowledge, or knowledge of how to teach disciplinary content. Students will use case study methods to look at instructional practices and begin to articulate their own mathematics teaching pedagogy. With the completion of this course, students will have a deeper understanding of mathematical literacy and the barriers to understanding and teaching mathematics, as well as being able to identify what makes an exceptional math teacher who is able to address the needs of all students. 25 Level 1 Field Experience hours.

SEC 364, SEC 313 and Junior Status are prerequisites for this class.
SEC 324
INQUIRY & APPLICATION IN DEVELOPING SECONDARY SCIENCE PEDAGOGY
Undergraduate
Following SEC 314, this course transitions from asking “what does a scientist do?” to a consideration of why science literacy in the general public has been so difficult to achieve. The focusing questions for SEC 324 are: “How do we teach science? What is science literacy? Why is an understanding of science important to the general public? and What are the major obstacles and strategies to achieving science literacy?” The course begins by participants self-reflecting on their own educational experiences that led to their paths in science education: what have been their successful learning strategies, how have teachers influenced their education and what have been successful (and less than successful) classroom instructional strategies? From this, students will begin science classroom observation, discussing their observations with their peers, and speaking with educators about their experiences teaching high school science and about the goals and short-comings of science education. Throughout this process, students will read seminal literature on science literacy and explore cases challenging their notions of the teacher-learner relationship and the relationship between science and society. As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public. 25 Level 1 Field Experience hours.

SEC 325
LITERACY IN THE CONTENT AREAS
Undergraduate
The course explores the interrelationships between reading, writing, and other forms of communication (e.g., classroom talk, technology, visual arts) that are available to content area middle-level and high-school teachers. There will be an emphasis on the interrelationship of all aspects of language, oral and written, that result in literacy as a meaning-making tool in the construction of content-area knowledge. The course will discuss specific aspects of literacy processes from a multicultural, multilingual perspective as they apply to a variety of school settings in general and urban schools in particular. Students will become acquainted with theoretical issues as well as a wide range of literacy-teaching strategies including reading, writing, research, and study skills to be tailored to the needs of different students and to be applied across a variety of learning situations and text types. 30 Level 2 Field Experience hours.

SEC 326
TEACHING WRITING
Undergraduate
This course prepares teacher candidates for teaching writing and composition at the middle and secondary school levels. The course focuses upon methods of teaching composition, examination of literature and research about the composing process, the development of language and reading skills, and the assessment and evaluation of writing. The development of writing curriculums will also be explored. 30 Level 2 Field Experience hours.

SEC 328
TEACHING LITERATURE
Undergraduate
This course prepares teacher candidates for teaching literature at the middle and secondary school levels. Examines contemporary issues in the teaching of literature, explores methods of teaching major literary genres, addresses problems of literacy and focuses on the transactional nature of reading and writing. Emphasis on developing a repertoire of ways of teaching literature and a variety of literature curriculums.

SEC 329
TEACHING YOUNG ADULTS LITURATURE
Undergraduate
This course is devoted to the study of Young Adult Literature: an exciting, emerging genre of literature. Issues and ideas to be examined include the following: current debates regarding issues in curriculum and teaching; selecting, reading, evaluating, and teaching young adult literature; cultivation of life-long reading habits and literacy development. Students will become familiar with major writers of young adult literature, read diverse texts, explore major genres, review award winning novels, consider the role of the media, and develop creative projects. 20 Level 2 Field Experience hours.

SEC 364, SEC 314 and Junior Status are prerequisites for this class.
SEC 339
TEACHING SCIENCE IN THE SECONDARY SCHOOL
Undergraduate
This course prepares teacher-candidates for teaching science in the middle school and high school. This involves reviewing the processes of science, theories of learning, and instructional strategies appropriate to laboratory science. This course also provides an update on the current trends and issues in science education as well as an analysis of successful science curricula programs. 30 Level 2 Field Experience hours.

SEC 363
ORIENTATION TO SECONDARY TEACHING AS A PROFESSION
Undergraduate
(6 credits) In this process-oriented course, students engage in critical reflection on the roles and expectations of secondary educators from both institutional and community perspectives. Questions considered will include: what is an educator, what is a professional, what are the attributes of effective teachers, what do effective teachers do? Students will examine their own values and begin to develop their own philosophies about education and teaching. 30 Level 1 Field Experience hours at arranged sites. (6 credit hours)

SEC 364
METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
Undergraduate
(4 credits) This course will examine materials, methods, and techniques appropriate for teaching in secondary schools. Topics include: educational goals; the development of a rationale and underlying assumptions; instructional goals and objectives; learning objectives; both cognitive and affective; classroom environment; classroom management principles and techniques; multicultural materials in various content areas; the development of appropriate methods and materials; current curriculum issues and controversies. 30 Level 1 Field Experience hours at arranged sites.

SEC 365
ART AND PEDAGOGY
Undergraduate
This course alongside SEC 366 is intended as a two course sequence each complimenting the other. As SEC 366 explores the source materials and major concepts of visual art’s content, SEC 365 focuses on teaching visual art. Building from the content requirements from their program or experience, students will understand how the art studio (content) experiences where ideas are developed translate to the preparation of teaching. Students will do this through multiple curriculum based projects intended to use in their own classrooms, including a 6th - 12th grade general course reader to assist in introducing an art historical overview that influences and connects to general middle and high school studio practices. As students work on these projects, they will continue to reflect on the coursework they have done in the content area as well as watching and learning from classroom teachers and teaching artists in the field. They will contemplate such questions as: "What are the connections among the arts disciplines? How can they be taught together, creating interdisciplinary courses at the middle and high school levels? What are the differences among the arts disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about artists, artistic periods and the nature of how artworks are produced. 30 Level 2 Field Experience hours.

SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 366
TEACHER AS ARTIST
Undergraduate
This course builds on the work in SEC 365, which alongside SEC 366 is intended as a two course sequence each complimenting the other. As SEC 365 focuses on the art of teaching the visual arts, SEC 366 explores the source materials and major concepts of visual art content. Historically, artistic movements have shaped and currently identify the theories we use to define our most immediate environment. The major concepts can be connected to the artist studio and to the descriptions some artists make about the studio as a teaching space. In the course students will be introduced to a wide range of artists and their work, artistic movements and the individual artists who use teaching as a medium. How does an emerging artist or pre-service teaching artist draw on the understanding of their own work as a platform to build core principles of pedagogy. What is the link that combines a dynamic studio practice with an inspired methodology for teaching visual art. We will address these questions through creating a visual art teaching curriculum portfolio and writing a reflective artist monograph, produce a final exhibition of their work and work alongside teachers and artists in the field. 30 Level 2 Field Experience hours.

SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.
SEC 371
TEACHING ENGLISH IN THE HIGH SCHOOL 1
Undergraduate
This course introduces students to the theoretical and practical issues of teaching the English language arts in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.

SEC 371, SEC 311, SEC 321, Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 372
TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1
Undergraduate
This course introduces students to the theoretical and practical issues of teaching history and the social sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.

SEC 372, SEC 312, SEC 322, Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 373
TEACHING MATHEMATICS IN THE HIGH SCHOOL 1
Undergraduate
This course introduces students to the theoretical and practical issues of teaching mathematics in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of mathematics in all its representations. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.

SEC 373, SEC 313, SEC 323, Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 374
TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
Undergraduate
This course introduces students to the theoretical and practical issues of teaching the sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.

SEC 374, SEC 314, SEC 324, Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.
SEC 381
TEACHING ENGLISH IN THE HIGH SCHOOL 2
Undergraduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in SEC 321 and SEC 371. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities, with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in SEC 371, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken in conjunction with SCU 351.

SEC 371 is a prerequisite for this course.

SEC 382
TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2
Undergraduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in SEC 322 and SEC 372. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in SEC 372, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken in conjunction with SCU 351.

SEC 372 is a prerequisite for this course.

SEC 383
TEACHING MATHEMATICS IN THE HIGH SCHOOL 2
Undergraduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in SEC 323 and SEC 373. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of mathematics in all its representations with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in SEC 373, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken in conjunction with SCU 351.

SEC 373 is a prerequisite for this course.

SEC 384
CAPSTONE IN SECONDARY EDUCATION
Undergraduate
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to reflect, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific early childhood education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program. COREQUISITE(S): SEC 390.
SEC 385
TEACHING THE SCIENCES IN THE HIGH SCHOOL 2
Undergraduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in SEC 324 and SEC 374. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in SEC 374, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.
COREQUISITE(S): Taken in conjunction with SCU 351.
SEC 374 is a prerequisite for this course.

SEC 387
CAPSTONE SEMINAR IN SECONDARY EDUCATION
Undergraduate
This course is designed to help candidates integrate the central emphases of their Liberal Studies curriculum with their professional knowledge and behavior. It provides opportunities and activities to prospective educators that engage them in being analytic and reflective upon their major and related disciplines; guide them in further considering their value commitments and how they relate to their chosen profession; apply critical and creative thinking in addressing 'real-time' professional issues and needs; and examine extant practices from multicultural perspectives. Candidates develop a professional teaching portfolio that reflects the standards of the various guiding professional organizations and the Illinois State Board of Education (ISBE). The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator as well as the goals of the Liberal Studies program. The course is taken simultaneously with student teaching.
COREQUISITE(S): SEC 390. (2 credit hours)

SEC 390
SECONDARY STUDENT TEACHING
Undergraduate
(12 credits) Five school days a week in supervised teaching in a cooperating school for a full academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. Application and approval required. Open only to DePaul students. (12 hours)

SEC 395
ASSESSMENT ISSUES IN SECONDARY EDUCATION
Undergraduate
This course introduces candidates to theoretical and philosophical issues related to educational assessment. It addresses the range of assessments teachers will encounter in school settings, including individual cognitive and social and emotional assessments; course material, curricula, and disciplinary program assessments; and large scale high-stakes testing. The course provides candidates opportunities to explore student, program, and curricular assessment issues, including assessment methods and tools; standardized, quantitative, and qualitative assessments; formal and informal assessments; formative and summative assessments; integrated, self-, and peer assessments; cultural, social, economic, and language influences on assessments; and issues of reliability and validity in assessment. COREQUISITE(S): Taken in conjunction with SEC 371/SEC 372/SEC 373/SEC 374 OR SEC 381/SEC 382/SEC 383/SEC 384.
Exercise Science (BS) students are restricted from taking this class.

SEC 399
INDEPENDENT STUDY IN SECONDARY EDUCATION
Undergraduate
Permission of instructor, program chair and Associate Dean are required. (1 credit hour)
SEV 611
RETURN DRIVEN STRATEGY
Graduate
This course provides a framework and strategic skills that will enable Kellstadt students to make a significant impact on the future of their organizations and in their careers. The seminar course focuses on the Return Driven Strategy framework which describes the 11 tenets of successful business strategy, leveraging genuine assets, managing significant forces of change and understanding strategic valuation. This seminar course will focus on a deep analysis of the strategies and successful value creation of great companies. Each student will participate in a team project to apply the tenets of Return Driven Strategy to a high performance company. The Return Driven Strategy framework will be useful for MBA candidates working in various areas of corporate management, management consulting, investment banking, equity research, and for entrepreneurs. The seminar-driven course will include an executive seminar session for the morning session of the first day which will include presentations by executives and top thought leaders in strategy.

ACC 500 or its equivalent is a prerequisite for this course

SEV 621
STRATEGY EXECUTION
Graduate
The course focuses on strategy execution and strategic performance measurement, including the balanced scorecard and value-based management as frameworks for describing and executing strategy. The course includes the latest developments in Strategic Risk Management and the implications for strategy and performance measurement. The course will study how high performance companies measure and manage performance, strategic risk, and corporate sustainability performance, as well as the ethical dimensions of strategy and execution. The seminar-driven course will include an executive seminar session for the morning session of the first day which will include presentations by executives and top thought leaders in strategy execution.

ACC 500 or instructor's consent is a prerequisite for this class.

SEV 641
STRATEGIC VALUATION
Graduate
This course focuses on leading practices in valuation and practical methods for driving valuations from strategic corporate analysis. The course shows the link between strategic analysis and valuations - converting our qualitative understanding of company initiatives into quantitative forecasts and valuation models. The guiding principles for developing valuation models, and the tools and techniques for enhancing that analysis are introduced. This course builds a skillset for evaluating other valuation models and a first-hand experience in building valuation models for companies. The course differs from traditional treatments in its focus on the actual building of valuation models directly from financial performance and the valuation projects based on real-time data. This course is co-designed and co-taught by Dr. Mark L. Frigo, and Joel C. Litman, Clinical Professor of Business Strategy at DePaul's Kellstadt Graduate School of Business. They have been combining their efforts in the research, study, and development of business strategy models and frameworks for execution and value-creation and have assisted a wide range of public and private companies in the application of these concepts.

ACC 500 or its equivalent is a prerequisite for this course

SNC 185
THE BEATLES AND THE CREATIVE PROCESS
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition. Arts and Literature.
SNC 186
SPIRITUALITY AND HOMELESSNESS
Undergraduate
This course will examine the broad issue of homelessness by providing students the opportunity to reflect upon a service learning experience at a community-based organization that serves the homeless population in Chicago. Students will explore what can be learned about themselves as reflective practitioners, service learners, and spiritual human beings when reflecting upon this experiential learning process. Through the class discussions, assigned readings, invited speakers, and journal assignments, students will reflect on their own beliefs and perceptions of homelessness and analyze the history, causes, and policy associated with this societal problem. Junior Year Experiential Learning.

SNC 187
RACE AND IDENTITY IN THE AMERICAN THEATER
Undergraduate
This course will explore issues of race and racial identity in American society through the medium of theater. Students will examine a diverse range of theatrical pieces and consider the social and political context for each work as well as the impact each has had on American culture. The class will also view a play on these themes at a Chicago theater. Arts and Literature.

SNC 188
PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. An introduction to moral philosophy with emphasis on the conflict between “moral relativism” (or “subjective” ethics) on the one hand and “moral realism” (or “objective” ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world. Philosophical Inquiry.

SNC 189
CONTEMPORARY NATIVE AMERICAN/AMERICAN INDIAN ISSUES
Undergraduate
Native Americans are part of our history and heritage, yet many Americans have little knowledge beyond stereotypes. While invisible to the mainstream, Native American cultures are surviving, striving and in some cases, thriving as we enter the new millennium. This course will explore the complex issues facing Native Americans today through discussions, films, readings, experiential learning activities and Native American news media to enable students to gain a cross-cultural perspective. Students will choose an area of focus on this subject and conduct independent research to present to their classmates. Self, Society and the Modern World.

SNC 190
AFRICAN-AMERICAN STUDIES IN CRITICAL PERSPECTIVE
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. This course is important for students who seek to gain a comprehensive understanding of African-American history in the United States. It will begin with discussions of African culture, the Atlantic Slave Trade, and early forms of slavery/indenturing. It will pay particular attention to the colonial and Revolutionary experience, delving into the mass exodus of Africans during the Revolutionary War, and African-American's role and position in the country's formative years. Enslavement, the Civil War and Reconstruction will follow as key areas of study. In every discussion, students will be asked to look for parallels between the contemporary and 18th and 19th century African-American experience and, where appropriate, to identify key social and cultural thinkers and leaders of the various historical periods. The primary texts for the course will be John Hope Franklin's From Slavery to Freedom, articles and readings written by scholars and important early African-American artists and intellectuals, and video presentations. Understanding the Past.

SNC 191
ISSUES IN SCIENCE AND RELIGION
Undergraduate
This course develops students' understandings of the scientific and religious constructions of self in the modern world (natural and social). The institutions and bodies of knowledge comprising science, religion, and their overlap are critically analyzed. Key historic debates are examined, for example: the Vatican's trial of Galileo for his teachings of a heliocentric universe; the controversial reception of Darwin's theory of evolution; and the 2001 U.S. policy on embryonic stem cell research. Through such analyses, the course develops students' skills in making ethically-informed decisions and thus recognizing their roles in the public debates involving the intersection of science and religion. Self, Society and the Modern World.
SNC 192
NEW ORLEANS IN SONG, STORY & STRUGGLE
Undergraduate
The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry: music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, rhythm and blues, zydeco and funk. We will situate these art forms in social and historical context and examine the complex creative processes which have shaped them. We will become familiar with innovators and icons such as Louis Armstrong, Professor Longhair, Clifton Chenier, the Neville Brothers and Dr. John. We will also read works by literary artists who have a background in and/or fascination with New Orleans, including The Awakening by Kate Chopin, A Streetcar Named Desire by Tennessee Williams, and Mumbo Jumbo by Ishmael Reed. Moreover, we will consider the role played in American history and imagination by New Orleans, as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level. Arts and Literature.

SNC 193
SEXUAL ORIENTATION & SCIENCE
Undergraduate
This course will engage you in scientific inquiry on the nature of sexual orientation. You will be challenged to master the scientific content of leading programs of research on twins, brain and other anatomical structures, hormones, genetic linkages, birth-order, and animal behavior through assigned readings, lectures, and multimedia resources. Moreover, you will also engage in the scientific process through a collaborative research project concerning an aspect of sexual orientation that leads you through the steps of stating a question, designing a study, collecting and analyzing data, and interpreting the results. You will also develop skills in identifying the limits to particular forms of scientific inquiry by recognizing the constraints of methods, sources of bias, reliability of results, and certainty of conclusions. This course will encourage you to place the modern research within ethical and social contexts in which to make judgments about the potential relevance and impacts of scientific knowledge about sexual orientation. Scientific Inquiry [SI]

LSP 120 is a prerequisite for this class.

SNC 194
CHINA: MONEY, POWER AND THE 21ST CENTURY
Undergraduate
This online course analyzes the dramatic impact of the greatest migration of people in the history of the world, which is occurring right now, in China. Students will become more aware of the relationship between growth in China and the balance of power in the world. Understanding China's two economic systems, one country policy will help learners better understand diverse cultures, inequities and differing theories about self and society. Theory, current and projected economic and demographic data and academic research will equip students with the skills to analyze the institutions, societies and decisions that will shape the world in the 21st century.

SNC 195
UNDERSTANDING GLOBAL HEALTH CONCEPTS AND PRACTICES
Undergraduate
Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences and humanities, learners will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. We will explore the factors shaping the global distribution of disease and their connection with issues of social, economic and political development, as reflected in the Millennium Development Goals. We will also consider the impacts of globalization on health risks and availability of health resources.

SNC 196
BEAUTY POLITICS IN CULTURAL CONTEXT
Undergraduate
How can we celebrate our different skin tones, body sizes, hair textures, and cultures, and yet still acknowledge our similarities? How can hair/body stories help us understand each other and ourselves? This course explores the complex ways the body is portrayed, (mis)understood, and celebrated worldwide. The experiences of hair/body politics of African descended peoples are centered and Latin, Asian, and European cultures are also discussed. Critiques of scholarship, media, and applied research will afford students the opportunity to examine social constructs about gender, sexuality, race, class, ability, and emerging issues such as biracialism and multiculturalism in global, virtual and political contexts.
SNC 197
ANALYZING AUSTEN’S PRIDE AND PREJUDICE
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. Jane Austen must have known something about universal truths. Her novel, Pride and Prejudice, which begins with the sentence quoted above, was first published in 1813. Still in print today, it has also been made into at least eleven movies, four of which were released since 2000, including a Mormon and a Bollywood version. In this class, we will read the novel in the context of the gender and class norms at the time Austen wrote her book and then consider how Austen's exploration of universal truths is reinterpreted in more contemporary film versions of this novel. In exploring Austen's creation and the many reinterpretations of her work, we will use both analytic and creative writing assignments as well as class discussion to examine how context informs creativity and how creativity informs analysis. You most definitely do not need to be a creative writer to take this class.

SNC 198
MINDFULNESS MEDITATION RETREAT AT STARVED ROCK
Undergraduate
This online-offsite hybrid course includes a four-day mindfulness meditation retreat at Starved Rock State Park in Utica, IL as well as online learning activities throughout the quarter. Mindfulness meditation practices are powerful ways of regulating and investigating our awareness of our experience. They are rooted in Buddhist traditions and are being widely re-interpreted by neuroscientists, psychologists, philosophers and others. There is a fee for the retreat. Contact Dr. Michael Skelley at mskelley@depaul.edu for more information and permission to enroll.
Junior Standing or above is a prerequisite for this class.

SNC 199
WORK, PLAY AND REST: INTEGRATING THE FRAGMENTS
Undergraduate
Life has become fragmented. In our modern lives, we strive to maintain work, play and rest in separate realms, within which we work hard, play hard, and even rest hard, all in the hope of finding balance. But when work invades play, and rest is sacrificed for either one, it might be time to shift the paradigm of separateness we have sought to maintain. This course will explore ways we can integrate the fragments of our lives in order to find more fulfillment, balance, satisfaction, and consequently relief both within these three arenas and in the "gray areas" in between. Learning will occur in two modalities, each of which will enhance the other: experiential guided movement, storytelling and vocal activities from the improvisational practice of InterPlay (http://www.interplay.org/) and the study of literature (articles, books, websites and videos) concerning mind-body awareness. Through the in-class practices of InterPlay, students will explore how stressors are held in the body, and define for themselves which aspects of creative expression help to release what no longer serves. Basic movement, storytelling and vocal activities will be introduced in an incremental way, with no prior experience necessary. The focus will be on both individual expression and collaborative possibilities, and personal as well as community and organizational applications will be explored. In our study of the science behind mind-body awareness through class discussions and written assignments, students will explore the application of concepts in conjunction with the experiential model offered by the InterPlay practice. Part practical activities, part reflection, and part synthesis of defined concepts and models, students will be asked to come to this class as willing participants and identify what methods and systems are applicable to their own lives, and what, from their unique vantage point, could constitute elements toward a new model of health and wholeness.

SNC 201
PSYCHOLOGY FROM AN AFRICAN-CENTERED PERSPECTIVE
Undergraduate
This course utilizes an African-centered theoretical framework to examine salient themes pertinent to the psychology of people of African descent, including child development, family functioning, identity, education, racial oppression, spirituality, and healing. It takes an historical and topical approach to foster greater understanding about the course content. Through this examination, the learner will become more knowledgeable about the psychological experiences of people of African descent, the role of history and culture in human development, and the subjectivity of research in the social and natural sciences. They will also reflect on the relevance of the course material to their personal lives.

SNC 202
GLOBAL BUSINESS, TECHNOLOGY AND THE UNITED NATIONS
Undergraduate
In this course, discussions focus on global business and technology issues U.S. and Mexican companies face today and UN experts in New York bring other countries into the global perspective via video conferencing. Topics include how corporations are using technology to facilitate their global operations; the work of the United Nations in helping implement corporate responsibility, international labor rules and human rights in businesses; best practices in cross-cultural business; and, other related global business issues. Several students outside of Chicago will participate via video conferencing application. Students and professors at University Panamericana in Mexico City and in Guadalajara will participate in discussions with the UN experts and with DePaul students via video conferencing. UN discussions are videotaped and posted on DePaul iTunes for student review.
SNC 203
PARTICIPATION AND DEMOCRACY IN AMERICA
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. The course explores inequalities in American democratic participation, investigating why different groups do or do not engage with the political process. The course begins with some famous arguments about why participation matters. Trends in voter turnout then become the primary object of study, but we also consider other forms of participation including writing to members of Congress, attending political meetings, and contributing money. Different factors we explore over ten weeks include the impact of education, income, age, and knowledge about and psychological interest in politics. We also investigate legal-institutional barriers to participation, both historically and in the present day.

SNC 204
DEMOCRACY IN EVERYDAY LIFE
Undergraduate
Democracy may be described as a form of government in which the general public can participate in its decision making process. However, democracy is often used as a term to identify any system that is not patently a dictatorship. Democracy may be addressed not only as a political, but also as a social system with implications in everyday life. How does literature about social and private life define democracy? What criteria do democratic environments meet? How should people behave to foster democratic environments? How do democratic leaders behave? This course will foster a profound understanding of democracy and democratic behavior and identify criteria, which define democratic environments like equality, solidarity, positive human relationships, participation and commitment to each other. These and other criteria will be analyzed critically and applied to everyday contexts in the private sphere and the workplace. The role of authority, power and leadership in a democratic environment will be discussed. The course offers a wide range of activities like research for literature, critical reading and discussion of topics, analysis of cases, simulation of democratic and non-democratic environments and problem solving of real life issues. The ideas of others serve as a common course content, as presented in the material assigned to this course. Students are asked to participate actively and critically, to work individually and in study groups, using their own experience as a field of analysis and reflection. Active participation in group activities will make the course itself a model for a democratic teaching and learning environment.

SNC 205
RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II
Undergraduate
This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today.

SNC 206
THE FIGHT FOR HUMAN RIGHTS: ONE WOMAN'S CRUSADE
Undergraduate
Helen Prejean is a leading human rights activist in the United States. For the past 30 years, she has helped shape conversation about equal treatment for all within the criminal justice system, especially persons of color and the materially poor. Dead Man Walking, the eyewitness account of her experience accompanying condemned prisoners to execution, has had a major influence on discussion of violence, poverty, civil rights, criminal law, and social justice. In this course, we use her work and interact with her personally to study power inequities across race and class lines that perpetuate injustice and examine her strategies for reform.

SNC 207
URBAN DIRT
Undergraduate
This is a course designed for the student who desires to know the difference, complexity, and the diversity between soil and dirt. The benefits of learning about soil are multi-fold: understanding the Earth, understanding how and where your food grows, gardening, impact on water quality, and most of all understanding your role in improving overall environmental quality and sustainability. In addition, this class will offer introductory knowledge of soil and its dynamism. Although learning about soil can be very scientific, there are several social and artistic views of soils. If you ever wanted to know why soils are various colors, various fertility, uses, mapping, home to various organisms, then this is the course to take. Understanding the complexities of soil will aid in understanding Earth and its intricacy.
SNC 208
THE BILL OF RIGHTS IN CONTEMPORARY LIFE AND WORK
Undergraduate
The Bill of Rights is that part of the Constitution that protects you from undue and unwarranted governmental regulation and interference. Learn how your rights of free speech, privacy and association in the workplace, on the street and in your home are secured by the first ten amendments to the U.S. Constitution. What does the government allow you to say and do in the presence of fellow workers? How safe is your home from police searches? Are there limits to whom you are allowed to associate with on a public street or even in the privacy of your own home? This course will deal with these and similar questions. Along the way, we will learn about the history and theory behind the adoption of the Constitution, how judges and lawyers interpret the Constitution, in particular the Bill of Rights, and what role the Constitution plays in the debate over the significant legal and social issues of our day, such as abortion, the death penalty, gay marriage, and physician-assisted suicide. We will read and discuss political theory, the Bill of Rights and actual court cases.

SNC 209
EXPLORING EARTH'S PHYSICAL FEATURES
Undergraduate
This course advances student exploration of earth's 4.5 billion year geologic record in order to evaluate the planet's evolution and the interrelationships between humans and landforms. Through the application of scientific reasoning, mathematical inference, and prevailing technologies used by geologists, emphasis is on plate tectonics, geologic time, the rock cycle, weathering, earthquakes, fluvial features, rock structures, volcanoes, mountains, plateaus, plains, glacial features, deserts, caves, and coasts. Students also assess human reliance on landforms, the economics of landforms, and cases of earth pseudoscience. Learning is assessed through labs, fieldtrips, a scientifically-formatted research paper, an exam, and contributions to online discussions.

SNC 210
PREHISTORIC LIFE
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. This course promotes students' investigation of fossils to interpret the character of 3.5 billion years of biological evolution and ecological change on earth. By way of scientific reasoning, mathematical inference, and applicable technologies, emphasis is on the exploration of the earliest evidence of life, development of multi-celled plants and animals, dinosaur evolution, mass extinction events, mammal diversification, human origins as well as appraisal of the societal reliance on fossil resources and the persistent debate over evolution versus creation. Learning is assessed through labs, fieldtrip, an exam, video summaries, contributions to online discussions, and a research paper in a scientific format.

SNC 211
WRITE WHERE YOU ARE: WRITING ABOUT THE PLACES WE LIVE
Undergraduate
In "A Walk in Chicago: Never a City so Real," Alex Kotlowitz, a "Chicagoan by accident," claims, "An imperfect place, Chicago is America's city; it dreams America's dream." In this course, students will investigate the ways in which location has shaped their own American dream. Place is an indispensable factor in any person's negotiation of his or her dream, as Kotlowitz points out in his portraits of individuals who have shaped and been shaped by their city, Chicago. To understand ourselves, then, we must understand our cities. To understand our cities we must understand their influences from science (geology, biology, ecology), art (literature, film) and social science (history, psychology, sociology). To write about our cities, we must understand and synthesize the city and our selves. In the convergence of these experiences comes a new understanding of space, place and identity. This subject requires students to investigate how events of personal significance are affected by location and the disciplines. This class will meet in the classroom five times; students will also be required to complete four field trips to locations in and around their city and one "virtual" field trip. Sharing on D2L will complete the field trip experience. Students will grow to appreciate their home cities/towns for their evolution and current struggles; students will learn about themselves by placing themselves in the midst of this evolution and struggle. Writing the personal essay, which requires synthesis of one's self-reflection, reflection on one's surroundings, and research into the place we are located, is the medium for transformation and understanding to take place.

SNC 212
ROOTED IN THE CITY: WRITERS & WRITING IN CHICAGO
Undergraduate
Who are the writers rooted in Chicago? What were and are their concerns, themes, styles? How can they teach us about the city, but also about writing? In this class, students will read, discuss and write about work written by such Chicago writers as Nelson Algren, Gwendolyn Brooks, Stuart Dybek, Sandra Cisneros, Studs Terkel, Marc Smith, and Mike Royko. We will consider the nature of civic engagement and creativity in the literary arts, as well as pay close attention to the formal elements of the poems, short stories, and essays read in this class. We'll also explore how these texts compel us to think about power and its circulation in cultural as well as social contexts.
FAMILY LIFE: THE PAST, PRESENT AND FUTURE OF FAMILIES  
**Undergraduate**

In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, single parents, and blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1950s. What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality and religion? Is the two parent family necessary? What role do grandparents and great grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future? How do these changes impact individuals in society?

SOCIETY AND THE FAMILY, PLOTTING THE FUTURE  
**Undergraduate**

In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, single parents, and blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1950s. In this course, learners will pursue the following questions: What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality and religion? Is the two parent family necessary? What role do grandparents and great grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future?

ISSUES IN HEALTH POLICY AND ADMINISTRATION  
**Undergraduate**

The goal of this course is to provide a general overview of the American health care and health insurance systems. We first will discuss the debates over the enactment and framing of the American constitution, and the political institutions that the nation then developed. We then will analyze the health care system that emerged in this political context, focusing on 1) the rise of the private health insurance system; 2) the incentives provided by government to encourage employers to purchase such insurance on behalf of their employees; and 3) the debate over the role of government in providing coverage for those outside the employer-sponsored health insurance systems. We will examine in some depth the evolution and current context of the Medicaid Program, taking a close look at the politics that led to the 2003 Medicare Modernization Act, as well as the issues raised by the implementation of that law. The following questions will be examined in this course: Is it possible to provide coverage to the uninsured without increasing the national debt? What are the main drivers of rising health care costs and what are the options for cost-containment? What are the options for aiding the uninsured? What are the options for paying for any such initiatives? What are the longstanding obstacles to comprehensive reform proposals? What are the politics of the current, Affordable Care Act, reform initiative? Why is it that the American health delivery system suffers from specialty maldistribution (too many specialists and not enough generalists) and geographic maldistribution (too many providers in some communities and too few in others)? What is managed care? What does the managed care industry look like today? What is the difference between disease management, care management and the current efforts to create "medical homes?" What are provider profiles and how are they used to improve quality? Why is it that the nation does not have an effective long-term care insurance system? What are the alternatives to institutionalization for those in need of long-term care services?

LEISURE, RECREATION AND HEALTH  
**Undergraduate**

This course will stimulate your thinking about the meaning of leisure in your life. Leisure today and historically has been central to the human experience. It is an elemental experience, essential to the total well-being of every person; it is a reflection and expression of the cultural values of a society; it is an important vehicle for medical treatment. Leisure and recreation services are also essential for healthy communities in terms of social climate, environmental quality, and economic stability. Leisure services comprise one of the largest and fastest growing industries in the world, whether measured in dollars spent, persons served, hours of time devoted, or resources used. The study of leisure and recreation is a broad discipline, combining diverse fields of study and professional practice. This course will (1) illustrate the importance of leisure to you and your loved ones, (2) contribute to your ability to become an informed consumer of leisure, (3) question the binary relationship of work and leisure, (4) teach you how to use leisure to increase emotional and physical health, resulting in a higher quality of life and, (5) demonstrate social injustice related to leisure behavior and administration. The course will be interactive and
SNC 217
SOUTH AFRICA AND THE QUEST FOR CHANGE: 25 YEARS AND COUNTING
Undergraduate
In 1990, sociopolitical forces in South Africa began formally dismantling the structure of racial segregation known as “apartheid” that had been in force since 1948. In 1994, the first bi-racial democratic elections were held, bringing the African National Congress (ANC) to power and Nelson Mandela to the presidency. Since then, the Republic of South Africa has faced considerable challenges on various fronts, which required careful calibration of the new governance system: providing social and economic equality for all races and groups; maintaining the country's economic strength while fostering social justice; and battling the largest HIV/AIDS epidemic in the world. Additionally, over the years, the ANC has seen challenges to its power both within its own ranks and from other parties and groups, a situation likely to intensify with the recent death of Mandela, its most prominent historical leader. This course seeks to give students a thorough grounding in the recent history of South Africa, with particular emphasis on the evolution of its Constitution, on the features that have made it one of the most advanced economies in the whole Africa, and on the country's struggles with the HIV/AIDS epidemic. Students will visit relevant sites and programs and interact with experienced professionals in these 3 domains in both Johannesburg and surrounding areas (Pretoria and Soweto), and Cape Town. Sites include the Apartheid Museum, the Constitutional Court, and Gold Reef City in Johannesburg, the Union Building in Pretoria, Soweto Township, and Robben Island and the District Six Museum in Cape Town. Side trips are also planned to a game reserve and other areas of natural beauty near these two cities.

SNC 218
THE HAPPINESS PROJECT
Undergraduate
What is happiness? How do we know that we are happy? How can we become happier in our lives? In recent years, there have been an increasing number of college courses dedicated to the study of happiness, positive psychology, life satisfaction, etc. This course will be an introduction to how various fields and disciplines are examining topics relevant to the nature of happiness and well-being, while providing an opportunity for students to examine their own ideas and expectations for happiness. Using Gretchen Rubin's popular book, The Happiness Project, as a guide, we will review the latest scholarship, theories and research in psychology and the sciences, as well as religion, ancient wisdom and popular culture, to determine what is known and presumed about happiness. Participants in the course will develop and assess their own “happiness project” during the last several weeks of the course.

SNC 219
CONNECTING WITH AFRICA: CULTURAL AND SOCIAL ISSUES IN EAST AFRICA
Undergraduate
This travel course will introduce students to two East African countries, Kenya and Tanzania, where they will have the opportunity to investigate cultural and social issues in accordance with their particular interests for study. Students will have the opportunity to study and compare issues of cultural, economic, social, and political interest as they manifest themselves in the USA and in East Africa. Intensive study in Chicago and onsite in Kenya and Tanzania will give students a unique opportunity to reflect on and then compare and contrast what goes on in their own country and in these two East African countries. One of the main aims of this course therefore is to give students the opportunity to engage in passionate conversation with Kenyans and Tanzanians on issues of justice and peace, politics and social services in order to raise their consciousness on these global issues that face humanity in East Africa and in so many other parts of the globe today.

SNC 220
ETHICAL ISSUES IN BIOMEDICINE AND HEALTH
Undergraduate
Should parents be allowed to genetically "engineer" designer babies? Given the rapid pace of developments in genetic engineering, this capacity is eminent. Emerging technological capacities in a variety of arenas are creating a host of social questions and potential ethical implications: What are the ethical issues associated with accelerating accumulation of health data? Do pharmaceutical companies have a moral obligation to expand global access to life-saving AIDS drugs? Given our ever-unfolding understanding of the human brain, what regulatory concerns ought to accompany the rollout of new, powerful brain-based biotechnologies? Which methods and approaches are needed to make sense of the impact of science and technology on people's lives worldwide? This course is both an introduction to bioethics, -- an area concerned with moral questions related to health, medicine and society, as well as a reflection upon the ethical and social implications of rapidly emerging technological and scientific capacities. In this course, learners will learn and use ethical theories to consider and analyze general bioethical issues with special attention paid to the unique challenges that emerge as a result of rapid advancements in scientific and technological knowledge. While this course is housed in the School for New Learning (SNL), it is also cross-listed with DePaul University's department of public health. For graduate students taking this course for credit, there is an additional assessment required, specified in the syllabus section below. This course will also require students to deploy and hone critical thinking skills, writing-related capacities as well as reasoning skills.
SNC 221
EVERYDAY EVIDENCE: HOW SCIENCE SHAPES DECISIONS IN EVERYDAY LIFE
Undergraduate
This is a science course designed for those majoring in non-science disciplines. In this class we will explore the debates that are taking place in our society right now, from ideas about evolution, climate change and genetically modified foods, to the more personal issues of our diet, exercise habits and medical care for our kids. The question facing us is how, in the great flood of information available to us, do we decide what is right for us? To answer this, we will examine what constitute good evidence, how scientists know what they know, why science seems to always be changing, and why it seems hard to get a scientist to just state the facts. Each weekly topic will be used as an example of how science shapes what we know, and how to distinguish good science from sketchy. We will also explore the role media plays in shaping public understanding of science. In addition to the weekly discussions, students will pick a topic of their own choosing to research and will write a short literature review of that topic as their final paper.

SNC 222
CONNECTING THOUGHT AND BEHAVIOR IN THE WORKPLACE, THE COMMUNITY, AND IN YOUR PERSONAL LIFE
Undergraduate
This course introduces students to practical concepts of Cognitive Behavioral Psychology and offers them new perspectives on how to observe and understand the interaction between thoughts and behaviors in their daily lives. Students will evaluate the tendencies and correlations between what a person "thinks" and what that person "does" through observation and interpretation of their own experiences. A report will be generated that will include an analysis of the student's own cognitive behavioral tendencies and a plan for personal development.

SNC 223
ACTIVE CITIZENS: MAKING A DIFFERENCE IN THE COMMUNITY, WORKPLACE WORLD
Undergraduate
Americans are known for active participation in organizations that strengthen our communities. We coach our kid's sports teams, take meals to members of our congregations, work for candidates that we believe in and join marches to support or oppose government action. With all these activities, we engage with other members of our community and workplace to make it better for ourselves and our families and to promote social justice. In this class, we will develop the knowledge and practice skills that enhance civic engagement.

SNC 224
ZOMBIES: MODERN MYTHS, RACE, AND CAPITALISM
Undergraduate
The figure of the zombie entered US popular culture from Haitian spiritual practice bringing with it concerns of power and race. As the zombie mythology developed in the United States, it has been adapted to address issues as varied as gender and capitalism. Zombie mythology has become so prominent that the philosophers Gilles Deleuze and Felix Guattari asserted that the zombie was the only unique myth of the twentieth century. This class will examine the development of the zombie myth as a reflection of US societal concerns while using the lenses of Post-Colonial and Post-Marxist theory. Specifically, we will use these lenses to explore Halperin's film White Zombie, Romero's films Night of the Living Dead and Dawn of the Dead, Kirkman's comic books The Walking Dead, and Boyle's 28 Days Later.

SNC 225
BIO DIVERSITY
Undergraduate
The science of Biodiversity is the study of life on earth, both past and present. It involves the exploration and measurement of the amount of genetic, species, and ecological variation on earth and is emerging as one humanity's most important and urgent endeavors. Scientific efforts to study earth's biodiversity have intensified because of our growing appreciation of the role human population growth and urbanization play in accelerating the extinction of plant and animal species. This course introduces students to the nature of science and the central issues concerning life on earth including: the current state of biodiversity, valuing life's variations, human dependence on biological diversity, the origin and extinction of species, mass extinction, critical habitats at risk, and policies and approaches to conserve biodiversity

SNC 226
CHICAGO AND NEW YORK: VARIED HISTORICAL PERSPECTIVES
Undergraduate
New York and Chicago have stood for many years as America's premier cities, symbols of American power as well as U.S. expansionism. In this course, we will explore aspects of the rich histories of these longtime rivals while focusing on some of their common themes and palpable differences. Students will be treated to readings, documentaries and primary source materials that address such varied subjects as urban fiscal policy, comparative political histories and icons, culture and geography. Lastly, we will consider the role that both of these cities have played in U.S. history, delve into the distinctions between global and national cities and explore their respective approaches to urban life over the course of the past three decades.
SOC 101
INTRODUCTION TO SOCIOLOGY
Undergraduate
Introduction to the language, theories, methods, and research findings of the sociologist at work.

SOC 102
INTRODUCTION TO CRIMINOLOGY
Undergraduate
The course uses the lens of crime and response to crime as a way of looking at society--at justice, inequalities, central social institutions, values, social policies, and the relation of individuals to society; theories and research are included.

SOC 105
SOCIAL PROBLEMS
Undergraduate
Examination of important societal problems and issues with attention to their causes, their impact, and the possibility of resolution. The course considers the role of social movements, government and the private sector.

SOC 200
SOCIAL WORK AND SOCIAL WELFARE
Undergraduate
The nature of social work with a focus on the delivery of a variety of human services like health care and welfare; emphasis on professional-client relationships; examination of government agencies and voluntary associations.

SOC 202
PHILOSOPHY AND SOCIAL THOUGHT
Undergraduate
The course examines the philosophical roots of social thought and social theory; it compares and contrasts philosophy and social thought as ways of knowing and as ways of reflecting on culture and societies.

SOC 203
RACE AND ETHNIC RELATIONS
Undergraduate
Interpretation and understanding of relationships between religious, ethnic and racial groups. The course emphasizes racial conflict and its resolution as well as the need to eradicate racism.

SOC 205
SELF AND SOCIETY
Undergraduate
The course examines the relationship between individuals and the social and cultural environment. It introduces theories of the self and society (psychoanalytic theories, Weberian perspectives, symbolic interaction and social construction, feminist theories, existential perspectives, etc.). Readings include field studies and case studies. Students are introduced to research methods such as life narrative analysis and observation.

SOC 207
YOUTH AND SOCIETY
Undergraduate
Using an historical and cross-cultural perspective, this course examines the social position of youth in today's society; youth subcultures; key institutions within which youth are socialized and controlled.

SOC 101 or SOC 105 is a prerequisite for this class.

SOC 208
LAW AND SOCIETY
Undergraduate
Examines the legal system in its social contexts; considers its moral and social roots, its continuity and contradictions, and its ability to deliver justice. Draws upon cross-national comparison.
SOC 209
SOCIOLOGY OF WOMEN
Undergraduate
Cross-cultural analysis of women's roles. How various social institutions the media, work, the family, education, religion treat sex-role distinctions and how the women's movement is attempting to confront them.

SOC 212
COMMUNITY AND SOCIETY
Undergraduate
An analysis of neighborhoods, cities, suburbs and utopian communities; the examination of major trends in urbanization and the evaluation of urban and community policies.

SOC 214
POLICE AND THE URBAN COMMUNITY
Undergraduate
The nature of police work, decision-making structures and processes, conflict and cooperation in police-community relationships.

SOC 217
WORK IN A GLOBALIZED WORLD
Undergraduate
The purpose of this course is to make a direct connection between the needs and strategies of individuals, companies, industries, and nations regarding work, and how they interact to create specific work environments and work outcomes for individuals in a globalized world. The course emphasizes how globalization, by creating an international labor market and an environment of competition between nations to attract jobs, has deeply transformed the work experience of individuals and the quantity and quality of jobs available in the United States, Latin America, Asia, and the rest of the world.

SOC 218
CYBERCRIME AND TECHNOLOGY
Undergraduate
This course provides students with a critical overview of the social, legal, economic, and technical mechanisms and consequences of "cybercrime" in global systems. Although this course is multidisciplinary in scope, the content focuses on cybercrime---its precursors, manifestations, consequences, and surveillance and punishment system---as a sociological phenomenon.

SOC 220
THEORIES OF CRIME AND DELINQUENCY
Undergraduate
Analysis of theories of causes and control of crime and juvenile delinquency; examination of delinquency subcultures, and the distribution of crime and juvenile delinquency.

SOC 221
INTRODUCTION TO THE U.S HEALTH CARE SYSTEM
Undergraduate
Examination of occupations and organizations in the U.S. health care system. Topics include: quality, access, and cost of health services; occupations and organizations involved in delivering health care; financing of care through health insurance and government programs. Recommended gateway course for all students in Health and Health Services concentration.

SOC 223
SOCIOLOGY OF HEALTH AND ILLNESS
Undergraduate
Examines how illness is related to sociological phenomena such as the social class of the patient or the organization of the health care delivery system. Formerly SOC 350.
SOC 224
INTRODUCTION TO STATISTICAL REASONING
Undergraduate
Introduction to statistics including data description and statistical inference used in many scientific fields of knowledge. Introduces students to computers in statistical analysis with examples drawn from social and natural sciences.

SOC 230
SEX AND GENDER IN THE CITY
Undergraduate
Examines the role of sex, sexuality, and gender in urban life, their interaction in urban spaces, and the formation of related private and public social policies.

SOC 231
RACE AND ETHNICITY IN THE CITY
Undergraduate
The social and cultural importance of urban ethnic communities and their interrelationships are investigated through a study of neighborhood development and change. Special emphasis on the major ethnic communities of Chicago.

SOC 232
GLOBAL CITIES
Undergraduate
An examination of the interaction between the process of globalization and urban areas throughout the world. Develops an understanding of the city as a critical location within a world that is growing ever more socially, politically and economically interconnected.

SOC 233
SOCIOLOGY OF SPORT
Undergraduate
This course examines sports as a societal microcosm and as an idealized world for both individuals and institutions. Sport is also viewed as a major element in the making of American mythology.

SOC 235
ADOLESCENT HEALTH
Undergraduate
Examination of social, political, geographic, and psychological forces affecting adolescent health in the U.S. Focus on occurrence, cause, and prevention of adolescent health risk behaviors, such as sexual behavior, violence, and substance use. Discussion of policy and community practice.

SOC 236
IMMIGRATION, HEALTH AND ILLNESS
Undergraduate
Examines linkage of immigration to health and illness, including health status of immigrants, differences in health outcomes in the host country and countries of origin, occupational health and injury patterns, eating habits, healing practices, and access to health care. Includes fieldwork and review of research findings.

SOC 245
URBAN SOCIOLOGY
Undergraduate
Study of urban growth and its impact. Topics explored include metropolitan development and change, population density, diversity and migration, urban life styles, urban institutions and important societal trends. Local, national and cross-national cases are examined. (Formerly taught as SOC 345)
SOC 246  
**HOMELESS IN THE CITY**  
*Undergraduate*  
This course explores homelessness on a global/urban scale in relation to poverty, discrimination, health and mental illness, war, refugee status, and natural and man-made disasters (e.g. earthquake, nuclear event, hurricane, etc.) and examines governmental and community/organizational solutions.

SOC 248  
**WHITE RACISM**  
*Undergraduate*  
This seminar is an introduction to white studies and white racism. White racism is a set of socially organized attitudes, behaviors and beliefs about differences between Blacks and other groups of color in the United States. The focus is on how the color White is constituted as dominant in social life throughout the United States and Western Europe.

SOC 253  
**SLAVERY AND RACIALIZATION**  
*Undergraduate*  
Addresses both the coming of slavery in Western civilization and how the ideology of race is used to interpret historical events and situations. The course will consider how slavery created the formation of a racist color line.

SOC 254  
**ANCIENT GREECE AND ROME**  
*Undergraduate*  
The course explores the society and culture of ancient Greece and Rome, including mythology, art, and social institutions. The impact of these cultures on contemporary popular culture and social thought is considered. Emphasis on primary materials.

SOC 256  
**SOCIAL CHANGE**  
*Undergraduate*  
Examines changes in societies since 1800, including change in technology, culture, and social and political institutions. Topics include modernization, revolution and media. The course emphasizes comparative, global perspectives and use of primary sources.

SOC 271  
**POPULATION PROBLEMS**  
*Undergraduate*  
Analysis of population characteristics and population policies. Topics include understanding population change, fertility and mortality patterns, population growth, patterns of illness and epidemics, migration, refugee issues, the impact of age structure, population policies, and methods for studying populations.

SOC 279  
**INTRO STATS FOR THE SOCIAL SCIENCES**  
*Undergraduate*  
Data description and interpretation; table construction; correlation, regression and ANOVA; introduction to multivariate analysis; statistical inference and hypothesis testing. Cross-listed with MAT 242.

(MAT 095 and MAT 100) or MAT 101 or placement are prerequisites for this class.

SOC 280  
**MASS MEDIA AND CULTURE**  
*Undergraduate*  
Analysis of the relations between modern society and the mass media such as TV, film, radio and the print media.
SOC 281
SOCIOLOGY OF ROCK MUSIC
Undergraduate
Rock music is studied as an object of culture, both as art and as mass culture. Attention is given to its creation, dissemination and appreciation.

SOC 290
SPECIAL TOPICS IN SOCIOLOGY
Undergraduate
In-depth examination of selected and timely social issues. Topics vary from quarter to quarter. Topics may be initiated by students.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 291
SPECIAL TOPICS IN SOCIOLOGY
Undergraduate
Two-credit-hour courses on special topics in Sociology.

SOC 292
COLLECTIVE ACTION
Undergraduate
The socio-legal implications of violent and nonviolent protest in bringing about social change. Emphases: social and historical causes that precipitate violence; court response to civil disobedience.

SOC 301
THE JUVENILE COURT SYSTEM: ITS OPERATIONS
Undergraduate
An introduction to the juvenile-court system. The interaction of police, judges and court officers. The role of discretion in disposition.
SOC 208 or SOC 220 or PSC 260 or BLW 201 is a prerequisite for this course.

SOC 304
SOCIAL DEVIANCE
Undergraduate
Comparison of theories and conceptual frameworks about deviance. Analysis of deviant life styles and careers. Examination of societal efforts to control deviance. Cross-listed with SOC 468.

SOC 305
POWER, DEVIANCE AND SOCIAL CONTROL
Undergraduate
This course employs a variety of theoretical paradigms to examine social constructions of deviance and conformity. It pays close attention to the relationship of such behaviors to conventional values, institutions, power, and mechanisms of social control.

SOC 306
FAMILIES
Undergraduate
Ideas, theories and research on families. Topics include change and variety in family patterns, fertility and child rearing.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 307
SOCIOLOGY OF SUBSTANCE USE AND ABUSE
Undergraduate
Sociological perspectives on substance use and abuse, related high-risk behavior, drug traffic, community impact, and prevention and public policy.
SOCl 309
SOCl OLOGY OF SEXUALITY
Undergraduate
Explores social construction of sex and sexuality, the intersection of gender, race, and sexuality, sexual orientations, and major issues in sexual politics, such as the gay/lesbian movement, discrimination, abortion, and sterilization.

SOC 309 or 12 credits in SOC or 12 credits in WGS courses is a prerequisite for this class.

SOCl 310
CRIMINAL- LEGAL SYSTEM: CRITICAL PERSPECTIVES
Undergraduate
In this course, students will explore the history and social meaning of "criminal justice" in the United States. Readings, reflections, and discussions will push students to examine the criminal justice system as a system of social control and will alert students to the raced and classed character of this system.

SOCl 313
SOCl OLOGY OF EDUCATION
Undergraduate
Examines the structure of schooling in the United States and other societies. Topics include: Schools as organizations; teaching as a profession; peer cultures in schools; racial/ethnic, class, and gender inequalities in education.

SOCl 315
LAW, POWER AND RESISTANCE
Undergraduate
In this course, students examine the law in its social context. Readings, reflections, and discussions will push students to explore the role of law both in the production and maintenance of inequality and in marginalized people's struggles for justice.

SOCl 316
STREET GANGS
Undergraduate
Examines the problems associated with street gangs and "troublesome youth groups" in the United States and Europe. Classical and contemporary theories of gang formation and proliferation are reviewed. Both quantitative and qualitative gang research efforts are studied. Street gang reduction policies and programs (national and local) are scrutinized. Emphasis is placed on the street gang's relationship with other organizations and social actors in the same "habitat."

SOC 220 is a prerequisite for this class.

SOCl 317
GENDER, CRIME AND JUSTICE
Undergraduate
In this course students explore the ways in which gender intersects with crime and justice in the U.S. and increasingly, globally. Using feminist and critical perspectives, this course interrogates the gendered and racial nature of the criminal justice system, examines the ways in which gender intersects with patterns of offending, victimization, survival, and resistance, and looks at the ways that criminal justice institutions and gender interact. It also asks students to think critically about alternatives to incarceration and other ways of establishing "justice".

SOCl 321
HEALTH AND HUMAN SERVICE ORGANIZATIONS
Undergraduate
The work of health and human service organizations is examined; the origins of these organizations, their goals and the problems inherent in attaining the goals, are considered.

SOCl 322
TREATMENT AND PREVENTION OF DELINQUENCY
Undergraduate
A review of traditional and current practices of programs designed to treat delinquents and prevent delinquency, with emphasis on the variety of available correctional facilities.
SOC 323
THE SOCIAL WELFARE INSTITUTION
Undergraduate
The evolution of social welfare as an urban institution and the creation of the welfare state are examined. An analysis of social welfare in the United States within the context of economic, political, social and philosophical developments.

SOC 326
AGING AND THE LIFE COURSE
Undergraduate
A look at the changing age composition of the population; meaning and societal definition of aging, the different types of responses to growing older and the various social programs designed for older people. Introduction to life course theories.

SOC 330
THEMES IN SOCIAL THOUGHT
Undergraduate
Consideration of the writings of social philosophers regarding the nature, origins and meanings of human society.

SOC 331
SOCIOLOGICAL THEORY
Undergraduate
Exploration of the nature of theory and an analysis of selected social theorists.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 332
THEORETICAL CRIMINOLOGY
Undergraduate
Theoretical Criminology is concerned with theories and concepts, of crime, criminal behavior, deviance, social regulation and sovereignty. The course explores interlinked notions of security, territory, population, and social control, through a plurality of techniques and mechanisms (policing, punishment, surveillance, law, incarceration, neoliberalism, bio-politics), which structure society in racial and class domination. In doing so, the course links criminology and criminological analysis to wider issues in social, political, and cultural theory.

SOC 340
SOCIAL INEQUALITY
Undergraduate
Examination of inequalities in wealth and power and their consequences for individuals and the society; for example, the institutions of law, health care, education and politics.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 342
ORGANIZATIONAL DYNAMICS
Undergraduate
Examination of the structure and process of organizations in the public and private sectors, life in organizations and the interrelationship of individuals and organizations.

SOC 343
SOCIAL DIMENSIONS OF RELIGION
Undergraduate
Analysis of the interplay of society and religion, the clergy as an occupational group, and the relationship of religious ideology to social change. Cross-listed with REL 221.

SOC 344
POLITICAL SOCIOLOGY
Undergraduate
Social and economic bases of the political system in a comparative perspective.
SOC 346
URBAN ETHNOGRAPHY
Undergraduate
An introduction to field research in an urban environment.

SOC 347
CLASS, POWER AND DECISION MAKING IN THE CITY
Undergraduate
Analysis of decision-making in urban settings. Considers the role of class disparities, power, citizen protest and community participation in urban outcomes.

SOC 348
THE CITY IN THE FUTURE
Undergraduate
Alternative views of urban structures and social life in the post-industrial age. Considerations of the implications of energy, different technologies, future shock and social trends.

SOC 351
HEALTH DISPARITIES
Undergraduate
Examination of persistent health disparities in the U.S. and the influence of social settings on morbidity and mortality, as well as the impact of social class, gender, and race/ethnicity on disease and illness patterns and access to health care.

SOC 353
SOCIOLOGY OF MENTAL ILLNESS
Undergraduate
Examines the social history of, and societal reaction to, the mentally ill. Review of contemporary social perspectives on mental illness and social research on mental hospital institutionalization; the dynamics of the therapist-patient relationship.

SOC 355
CHICAGO AS A SOCIAL SYSTEM
Undergraduate
This course draws upon the rich tradition of sociological work carried out in Chicago to exemplify, illuminate, and integrate a variety of sociological concepts, theories and methodologies.

SOC 356
THE CITY IN CROSS-CULTURAL PERSPECTIVE
Undergraduate
This course examines the city as a type of human settlement, focusing on the different forms, functions, images and ideological perceptions of cities across a number of different cultures.

SOC 358
REVOLUTIONS AND PEASANT REbellions
Undergraduate
This course focuses on theories on the international, national, regional, and local factors contributing to the weakening of states that result in revolutions, civil wars, and peasant rebellions. Case studies include revolutions in France, Russia, China, Mexico, Cuba, Nicaragua, and Iran. Contemporary social movements and insurrections are analyzed based on the theories of the course. Cross-listed with LST 358 and INT 319.

SOC 360
SOCIAL SERVICES IN CONTEMPORARY SOCIETY
Undergraduate
Social services and welfare programs as developed in contemporary industrial societies. Comparison between European social services and the American social services provides a basis for considering the implications of social policy. Cross-listed with SOC 432.
**SOC 365**
**HEALTH AND GLOBALIZATION**
**Undergraduate**
Comparative approach to understanding changes in health and illness patterns, diet and consumption, and access to health care associated with economic expansion, global inequalities, and changes in local economies, occupations and cultures. Case studies of selected non-industrialized countries.

**SOC 370**
**PEOPLE, PLACES, AND FOOD**
**Undergraduate**
Exploration of community food resources and the relationship to chronic disease such as obesity, diabetes, and hypertension. Qualitative methods focus on meanings of eating habits and how people secure food. Analyzes barriers and supports for healthy eating habits in Chicago neighborhoods. Service-learning component.

**SOC 372**
**HEALTH CARE SYSTEMS: A COMPARATIVE PERSPECTIVE**
**Undergraduate**
Examines the variations in health care delivery systems across selected countries and analyzes social and cultural forces that influence these systems, with an emphasis on differences in health outcomes.

**SOC 373**
**PUBLIC HEALTH AND HIGH RISK BEHAVIOR**
**Undergraduate**
Explores problems in community and public health such as HIV/AIDS and injection drug use. Topics may vary.

**SOC 378**
**QUANTITATIVE METHODS IN CRIMINOLOGY**
**Undergraduate**
The course introduces students to a wide range of quantitative designs and methods such as finding publicly available datasets, cleaning and coding, describing, and analyzing data with a particular focus on for studying harms, state punishment, and the criminal-legal system. The course highlights the special legal and ethical issues in criminological research and showcases the use of quantitative methods for evaluating policies of state punishment and harm reduction.

**SOC 379**
**QUALITATIVE METHODS IN CRIMINOLOGY**
**Undergraduate**
The course introduces students to a wide range of qualitative designs and methods such as ethnography, biographical methods, interviewing, and content analysis for studying crime, punishment, and the criminal-legal system. The special legal and ethical issues in criminological research are highlighted, and attention is given to the use of qualitative methods for evaluating policies of crime control and harm reduction.

**SOC 380**
**RESEARCH METHODS IN SOCIOLOGY I**
**Undergraduate**
The logic of social science research: Formulation of research questions; research designs; data collection and analysis; research report writing. Overview of methods for quantitative social research.

SOC 279 or PSY 240 or MAT 242 or MAT 137 is a prerequisite for this class.

**SOC 381**
**RESEARCH METHODS IN SOCIOLOGY II**
**Undergraduate**
Overview of qualitative designs and methods such as ethnography, focus groups, content analysis, and visual methods. Research ethics and human participant protection are covered.
SOC 382
QUALITATIVE METHODS
Undergraduate
Introduction to qualitative methods in sociology, grounded theory, data collection and analysis, field research, life histories, and unobtrusive measures.

SOC 383
VISUAL SOCIOLOGY
Undergraduate
Examines the history of the still photograph as a document of social problems and conditions, a cultural artifact with a linguistic structure of its own. Methodological issues involved in using photographs as research tools are studied. Students conduct own documentary research project.

SOC 384
ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
Undergraduate
This course imparts the art, craft, and discipline behind the making of sociological ethnographic documentary films. Throughout the course students learn ethnographic concepts and methods, develop film criticism faculties, and build a film production skill set.

SOC 386
POPULAR CULTURE AND THE ARTS
Undergraduate
Multiple perspectives, from modern to post modern, are applied to a range of forms of popular culture, both in historical context and in their current forms. Topics to be covered include examining the concept of popular culture, the analytic tools to understand it, and analyzing some of its manifestations (e.g. sports, mass media, gambling, holiday presentations, shopping, theme parks, theme restaurants, etc. Cross-listed with SOC 480.

SOC 387
SOCIOLOGY OF CELEBRITY
Undergraduate
“Celebrities are known for being well-known.” The course explores the role of media and fans in the making of celebrity and considers celebrity as a key feature of contemporary society.

SOC 388
SOCIOLOGY OF CONSUMPTION
Undergraduate
Sociological perspectives on shopping, consumer culture, and social-psychology of consumer behavior.

SOC 390
SEMINAR IN SOCIOLOGY
Undergraduate
Selected topics form the basis of an in-depth consideration. Topics vary and may be initiated by students.

SOC 101 (or SOC 102 or SOC 105) and Junior standing (or above) are prerequisites for this class.

SOC 391
SEMINAR IN SOCIOLOGY
Undergraduate
Two-credit-hour course on special topics in Sociology.

SOC 394
COMMUNITY BASED SOCIOLOGY
Undergraduate
Combines basic understanding of sociological principles with field experience.
SOC 395
CAPSTONE IN SOCIOLOGY
Undergraduate
A senior seminar course that enables students to conduct original research and integrate theory and methods.

Senior standing and a minimum of 12 hours in SOC classes is a prerequisite for this class.

SOC 397
TRAVEL/STUDY
Undergraduate
Foreign and domestic study tours with lectures and research by special arrangement with sponsoring programs.

SOC 398
INTERNSHIP
Undergraduate
Placement of students in work-study situations relevant to careers in health and human services, social work, juvenile justice, law and society, urban and community services. Clinical and Experiential (can fulfill jr. yr. requirement). (1 to 4 credit hours).

SOC 399
INDEPENDENT STUDY
Undergraduate
Independent Study
Senior status and permission of the department chair are prerequisites for this course.

SOC 401
ADVANCED INTRODUCTION TO SOCIOLOGY
Graduate
A focused and intense introduction to the current state of the discipline of sociology: its basic concepts, theories, methodologies and research strategies. Students completing the course are expected to be able to engage successfully in the department's graduate program.

SOC 402
STATISTICS FOR THE SOCIAL SCIENCES
Graduate
Introduction to quantitative and statistical reasoning in the social sciences, quantitative data analysis, and computer software.

SOC 403
SOCIAL POLICY AND SOCIAL CHANGE
Graduate
Examines the process of policy-making and the effects of policies on individuals, organizations, and communities.

SOC 404
CLASSICAL AND MODERN THEORY
Graduate
Covers classical social theory (Marx, Durkheim, and Weber) and social theory through the 1960s.

SOC 405
SOCIOLOGICAL PERSPECTIVES
Graduate
Examines sociological theories, methods and concepts through a study of the work of contemporary sociologists.
SOC 411
SOCIAL RESEARCH
Graduate
This course presents the logic of social science inquiry and familiarizes students with a wide range of quantitative and qualitative research designs and methods such as ethnography, survey research, case studies, analysis of existing data sets, focus groups, content and discourse analysis, interviews, social autopsies, and comparative-historical research. Policy research and program evaluation may also be included among the topics. Emphasis is placed on formulating research questions and linking designs and methods to the questions. Students read examples of research and develop their own proposals. Research ethics and human-participant protection are key concerns of the course. Status as a SOC Graduate student is a prerequisite for this class.

SOC 412
DATA ANALYSIS
Graduate
The implementation of a research project. Analytic techniques, data processing and the preparation of a written research report. SOC 411 is a prerequisite for this class.

SOC 413
QUALITATIVE METHODS
Graduate
An examination of qualitative methods in sociology: data collection and content analysis, field research, life histories, and unobtrusive measures. Status as a SOC Graduate student is a prerequisite for this class.

SOC 414
LITERATURE REVIEW WRITING PROJECT
Graduate
This course requires students to complete a paper reviewing the sociological literature on a topic of their choice. Successful completion of the literature review paper is one of the ways in which students may fulfill the final project requirement leading to the master's degree.

SOC 415
WRITING A RESEARCH PAPER
Graduate
This course is one of three options for fulfilling the MA-Sociology writing project requirement. The course focuses on original research. The final paper for the course is a draft of the research report that may be used to complete the program.

SOC 417
ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
Graduate
This course imparts the art, craft, and discipline behind the making of sociological ethnographic documentary films. Throughout the course students learn ethnographic concepts and methods, develop film criticism faculties, and build a film production skill set.

SOC 420
URBAN SOCIOLOGY
Graduate
Introduction to advanced level studies in applied urban sociology: contemporary urban theory, research, and policy issues.

SOC 422
URBAN AND COMMUNITY ANALYSIS
Graduate
Quantitative analysis of urban issues including social-area analysis, patterns of segregation, neighborhood change, and other selected topics.
SOC 423
RESEARCH ON URBAN CULTURES
Graduate
Ethnological approach to urban life stressing the qualitative analysis and evaluation of different types of urban communities, community organizations, and urban life styles.

SOC 426
URBAN DEVELOPMENT POLICIES
Graduate
Community agencies viewed as problem-solving organizations. Concentration on the impact of state and local government on community organizations and how community organizations influence social policy. Sequel to SOC 425.

SOC 431
SOCIOLOGY OF HEALTH, ILLNESS AND MEDICINE
Graduate

SOC 432
SOCIAL SERVICES IN CONTEMPORARY SOCIETIES
Graduate
Analysis of the concept of welfare, evaluation of the social organization of welfare and the problems of welfare service systems. The interrelationships between welfare and the family, employment, health and crime are explored. Cross-listed with SOC 323.

SOC 433
THE SOCIOLOGY OF EDUCATION
Graduate
Analysis of educational organizations and their effects—including characteristics of institutional structures, teaching as an occupation, and the relationship between educational attainment and social mobility.

SOC 434
YOUTH SERVICES: HEALTH AND WELFARE
Graduate
Review of research on various youth problems (e.g., substance abuse, pregnancy, runaways) and consideration of efforts at amelioration and control.

SOC 438
SOCIOLOGY OF SUBSTANCE USE & ABUSE
Graduate
Sociological perspectives on substance use and abuse, related high-risk behavior, drug traffic, community impact, and prevention and public policy.

SOC 440
SOCIOLOGY OF LAW
Graduate
Analysis of the American legal system as an instrument of social control, social change, and social reform. The impact of social science research on public policy decisions.

SOC 441
PUBLIC HEALTH AND HIGH RISK BEHAVIOR
Graduate
This course brings sociological theory, concepts, and methods to bear on HIV/AIDS, hepatitis B and C (HBV, HCV), and other adverse health outcomes prevalent among injection drug users (IDUs), men who have sex with men (MSM), and "high risk heterosexuals" (HRHs).
SOC 442
CRIMINAL JUSTICE: HISTORY, THEORY, AND ANALYSIS
Graduate
Study of major criminological theories and their application to systems of corrections. Present trends at federal, state, city and private correctional institutions.

SOC 443
CRITICAL LEGAL THEORY
Graduate
Analysis of legal systems and their implementation; jurisprudence and its role in the development and change of legal systems; role of the courts and the police as related to community social problems.

SOC 447
SOCIAL CONTROL AND SOCIAL DEVIANCE
Graduate
Examines theories and research on the social organization of institutions that label and process deviants.

SOC 448
STREET GANGS
Graduate
Examines the problems associated with street gangs and "troublesome youth groups" in the United States and Europe. Classical and contemporary theories of gang formation and proliferation are reviewed. Both quantitative and qualitative research on gangs are studied. Gang reduction policies and programs (national and local) are scrutinized. Emphasis is placed on the street gang's relationship with other organizations and social actors in the same "habitat."

SOC 450
ADVANCED STATISTICS I
Graduate
Advanced Statistics I (cross-Listed as PSY 410)

SOC 455
CHILDHOOD, FAMILY, PUBLIC POLICY
Graduate
Examines contemporary public policy issues and relevant research concerning parenting, marriage, household structure, and family formation, with a focus on the U.S.

SOC 460
SOCIOLOGY OF THE FAMILY
Graduate
Examines demographic trends in this century, recent literature on women and men, wives and husbands, children and parents. Some comparative material is included.

SOC 461
SOCIOLOGY OF YOUTH
Graduate
Critical analysis of literature on nondelinquent youth; focus on the social contexts within which the transition to adulthood occurs.

SOC 463
SOCIAL PSYCHOLOGY
Graduate
The influence of group life on personality development, social interaction, and social behavior.
SOC 464
SOCIAL INEQUALITY AND STRATIFICATION
Graduate
An analysis of inequalities in power, wealth and prestige with an emphasis on the concept of social class, trends in social mobility, and relationships to current social topics such as housing, welfare and political participation.

SOC 465
RACE AND ETHNIC RELATIONS
Graduate
Theoretical perspectives on racial, ethnic, gender, sexual orientation and differentially abled groups emphasizing processes of group formation, patterns of prejudice and discrimination, and an evaluation of methods to reduce prejudice and discrimination.

SOC 466
SOCIAL MOVEMENTS
Graduate
Study of social trends, social movements, communications, and crowd behavior. Emphasis on processes of social change, includes examination of historical and cross-cultural case material.

SOC 467
ORGANIZATIONS
Graduate
The functioning, premises, and consequences of formal organizations will be considered using a variety of perspectives.

SOC 468
SOCIAL DEVIATION
Graduate
Research and theory in the sociology of deviant behavior, emphasis upon such topics as the labeling of deviants, the analysis of deviant careers, patterns of deviant socialization, and the roles of agents or agencies of social control. Cross-listed with SOC 304.

SOC 469
SOCIOLOGY OF LIFE CYCLE
Graduate
A look at the changing age composition of the population; meaning and societal definition of aging, the different types of responses to growing older, and the various social programs designed for the aged.

SOC 470
GENDER AND SOCIETY
Graduate
Theory and research on roles of men and women, sexual behavior and patterns of gender inequality. Cross-listed with MLS 447 and WGS 460.

SOC 471
SOCIOLOGY OF KNOWLEDGE
Graduate
An analysis of the social forms of knowledge and the social processes by which individuals acquire this knowledge. The institutional organization and social distribution of knowledge.

SOC 474
INTRODUCTION TO DEMOGRAPHY AND POPULATION STUDIES
Graduate
Introduction to the study of population characteristics including fertility, migration, illness and epidemics, age structure, and the social and economic causes and impact of population change. The course examines historical forces in population change, as well as quantitative methods, theories, and policy issues.
SOC 475
SOCIOLOGY OF WORK
Graduate
Examination of the nature, meaning and history of work and leisure in Western culture; and the relationship of work and leisure to issues associated with the contemporary concept of "quality of life". Cross-listed with MLS 443.

SOC 477
SEX, SEXUALITY AND POLITICS
Graduate
Focus on sexuality as one of the central organizing ideologies shaping the fabric of our social life. Topics covered include the medicalization of sex, sex and race, pornography, sex and globalization, and gay liberation movement, etc.

SOC 479
MEN, MASCULINITY AND POWER
Graduate
This course reviews the development of men's studies and its connection with the development of women's studies. It examines the construction of masculinity and the issue concerning gender inequality.

SOC 480
POPULAR CULTURE AND THE ARTS
Graduate
(Cross-listed as SOC 386) The course explores topics in popular culture and the arts from a sociological perspective. The focus includes specific arts (film, music, photography, etc), subcultures of artists and performers and the impact of the market on the arts and popular culture.

SOC 487
SOCIOLOGY OF CELEBRITY
Graduate
"Celebrities are known for being well-known." The course explores the role of media and fans in the making of celebrity and considers celebrity as a key feature of contemporary society.

SOC 493
VISUAL SOCIOLOGY
Graduate
A sociological view of documents that record social reality. These documents primarily include photographs but can also include paintings and sculpture.

SOC 494
RACISM AND RESISTANCE
Graduate
In this course, although we will be particularly interested in the way White Supremacy is created and maintained in the post-civil rights era, we will ground our examination in the histories that created our present. We will end the course with a frank discussion of what can be done to resist racism and racial oppression in our own lives.

SOC 495
SPECIAL TOPICS IN SOCIOLOGY
Graduate
Special courses will be offered as students and faculty identify selected topics of common interest.

SOC 498
INTERNSHIP
Graduate
Students may be placed with agencies where they will have the opportunity to participate in activities such as research and counseling. Credit may vary but is subject to the limit of eight quarter hours.
SOC 499
INDEPENDENT STUDY
Graduate
Independent Study

SOC 500
THESIS RESEARCH
Graduate
The thesis research should culminate in the acceptance of a thesis. Four quarter hours, one registration.

SOC 510
MA PROJECT COMPLETION
Graduate
Students may register for this class if they are engaged in work on a writing project (thesis or MA project). Registration requires certification by the chair that the student is engaged in research or writing. The course does not apply to completion of an IN in a class. This course may be taken at most 3 times.

SOC 601
ACTIVE STUDENT STATUS
Graduate
Registration in this course provides access to the library and other university facilities. There is no indication whether or not the student is working on the writing project. Non-credit.

SPN 101
BASIC SPANISH I
Undergraduate
This is the first course in a three-course introductory sequence that as a whole constitutes "first year college Spanish" (SPN 101, SPN 102 and SPN 103). The course has three main goals: to develop some basic knowledge of Spanish as a foreign language, to develop some communicative skills in that language, and to attain some basic knowledge of the cultures of the Spanish-speaking world and to learn some cultural differences between the U.S. and these cultures.

SPN 101S
BASIC SPANISH I FOR SUMMER
Undergraduate
(Covers the equivalent of SPN 101 and the first half of SPN 102.) The first half of beginning Spanish. Listening to, speaking, reading, and writing Spanish in a cultural context for the beginning student.

SPN 102
BASIC SPANISH II
Undergraduate
This is the second course in a three-course introductory sequence that as a whole constitutes "first year college Spanish" (SPN 101, SPN 102 and SPN 103). The course has various goals. The first one is to develop some basic communicative skills in Spanish as a second language. These include but are not limited to the following sample abilities: talking about pastimes and leisure activities, talking about activities in the past, describing typical household chores, using expressions associated with technology, and giving instructions.

SPN 103
BASIC SPANISH III
Undergraduate
This is the third course in a three-course introductory sequence that as a whole constitutes "first year college Spanish" (SPN 101, SPN 102 and SPN 103). The course has several goals. The first one is to develop some basic communicative skills in Spanish as a second language. These include but are not limited to the following sample abilities: taking about feelings and mood changes, talking about what people do to and for each other, expressing wishes and desires, narrating present and past actions, describing current events, using vocabulary related to professions and daily life.
SPN 103S  
**BASIC SPANISH III FOR SUMMER**  
Undergraduate  
(Covers the equivalent of the second half of SPN 102 and all of SPN 103.) The second half of beginning Spanish. Further work on the basic elements of the Spanish language, spoken as well as written, with due regard to the cultural context of Spanish expression.

SPN 104  
**INTERMEDIATE SPANISH I**  
Undergraduate  
This is the first course of the sequence of Intermediate Spanish (SPN 104, SPN 105 and SPN 106). The course follows a content-based approach where students learn about Hispanic culture through interaction and communication. The fundamental language learning goal of this course is to help students express, interpret, and negotiate meaning in context. SPN 103 or equivalent, including placement test or permission of instructor, is recommended.

SPN 105  
**INTERMEDIATE SPANISH II**  
Undergraduate  
This is the second course of the sequence of Intermediate Spanish (SPN 104, SPN 105 and SPN 106). The course follows a content-based approach where students learn about Hispanic culture through interaction and communication. The fundamental language learning goal of this course is to help students express, interpret, and negotiate meaning in context. SPN 104 or equivalent, including placement test or permission of instructor, is recommended.

SPN 106  
**INTERMEDIATE SPANISH III**  
Undergraduate  
This is the third course in the sequence of Intermediate Spanish (SPN 104, 105 and 106). The course follows a content-based approach where students learn about Hispanic culture through interaction and communication. The fundamental language learning goal of this course is to help students express, interpret, and negotiate meaning in context. SPN 105 or equivalent, including placement test or permission of instructor, is recommended.

SPN 114  
**INTERMEDIATE SPANISH FOR HERITAGE SPEAKERS I**  
Undergraduate  
This is the first course of Intermediate Spanish for Heritage Speakers (SPN 114, 115 and 116) a combined basic and intermediate sequence for home-background speakers of Spanish who have had little or no previous formal study of the language. The course will help students further develop their communication skills while increasing the ability to improve their reading, speaking, listening, and writing skills as they explore and foster an appreciation of the Latino culture and heritage.

SPN 115  
**INTERMEDIATE SPANISH FOR HERITAGE SPEAKERS II**  
Undergraduate  
This is the second course of Intermediate Spanish for Heritage Speakers (SPN 114, 115 and 116) a combined basic and intermediate sequence for home-background speakers of Spanish who have had little or no previous formal study of the language. The course will help students further develop their communication skills while increasing the ability to improve their reading, speaking, listening, and writing skills as they explore and foster an appreciation of the Latino culture and heritage.

SPN 116  
**INTERMEDIATE SPANISH FOR HERITAGE SPEAKERS III**  
Undergraduate  
This is the third course of Intermediate Spanish for Heritage Speakers (SPN 114, 115 and 116) a combined basic and intermediate sequence for home-background speakers of Spanish who have had little or no previous formal study of the language. The course will help students further develop their communication skills while increasing the ability to improve their reading, speaking, listening, and writing skills as they explore and foster an appreciation of the Latino culture and heritage.
This is the first course in a three-course intermediate sequence that as a whole constitutes “second year college Spanish” (SPN 124, SPN 125 and SPN 126). This course covers all the material of Spanish 104, but it offers students the unique opportunity to enhance knowledge of the Spanish-speaking world both inside and outside the classroom. Students will spend 25 hours per quarter (3 hours/week) working with one of several organizations in Chicago’s Latino communities. These sites mostly serve new immigrants from Mexico and Central America who are in the process of integrating into new cultural environments. By participating in a language exchange on a weekly basis the student will be an active learner and teacher. SPN 103 or equivalent, including placement test or permission of instructor, is recommended.

This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

See schedule for current offerings.

Variable credit.

Variable credit.

This course provides transitional Spanish for intermediate Heritage Learners whose primary goal is to increase basic communication in the language and an expanded understanding of Hispanic culture. Listening, speaking, reading and writing skills continue to be developed with an emphasis on conversation, facilitated by the study of vocabulary and structure, exciting readings and films.
SPN 201  
ADVANCED GRAMMAR AND COMMUNICATION  
Undergraduate  
In this class students will work toward improving their speaking, listening, reading, and writing skills in Spanish at the advanced level as they explore various topics related to the history and cultures of the Spanish-speaking world. Students will also focus on four major grammar points that typically cause difficulty for students of Spanish as a foreign language: the distinction between ser and estar, verb tense, verb aspect (preterite/imperfect), and verb mood (indicative/subjunctive). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 202  
ADVANCED COMPOSITION AND COMMUNICATION  
Undergraduate  
Students will work on improving their speaking, listening, reading, and writing skills in Spanish at the advanced level as they explore various topics related to the history and cultures of the Spanish-speaking world. Students will focus a little more, however, on written expression. Readings for the class will serve as models for various types of writing (primarily exposition and argumentation), and students will analyze the structure of these models as well as discuss their content. The course will also place emphasis on the effective use of the dictionary and on mechanics (such as spelling and punctuation). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 203  
ADVANCED CONVERSATION  
Undergraduate  
This course will focus on improving the student's oral skills in Spanish through intensive practice. Students will discuss a wide range of topics, and they will practice conversational strategies for a variety of situations. Upon completing this course, students should be able to do the following: 1) talk about the past in a coherent and fairly detailed manner; 2) deal effectively with unanticipated complications (e.g., a lost ticket); 3) adapt to formal and informal situations; 4) speak broadly on topics of personal interest; and 5) make themselves easily understood by Spanish speakers who are unaccustomed to dealing with non-native speakers. Class preparation will include readings (from various genres) and films. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 205  
ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS I  
Undergraduate  
This course is the first in a series (SPN 205, SPN 206 and SPN 207) that offers a comprehensive, structural review of the Spanish language for heritage speakers. The course objectives include: 1) increasing the students' vocabulary in Spanish, 2) improving their reading and writing skills (students will read short stories and essays, and students will write guided compositions), 3) improving the students' oral proficiency (through presentations and discussions), and 4) exploring and fostering an appreciation of Latino culture and heritage. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 206  
ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS II  
Undergraduate  
This course is the first in a series (SPN 205, SPN 206 and SPN 207) that offers a comprehensive, structural review of the Spanish language for heritage speakers. The course objectives include: 1) increasing the students' vocabulary in Spanish, 2) improving their reading and writing skills (students will read short stories and essays, and students will write guided compositions), 3) improving the students' oral proficiency (through presentations and discussions), and 4) exploring and fostering an appreciation of Latino culture and heritage. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 207  
ADVANCED CONVERSATION FOR THE HERITAGE SPEAKER  
Undergraduate  
Spanish 207 is the continuation of 205 and 206. It is the third part of a comprehensive, structural review of the Spanish language for heritage speakers' college students. The purpose of this course is to improve and polish the student's fluency in Spanish. The student's oral skills will be enhanced through careful and guided readings that will lead to open class discussions of fiction and nonfiction materials from around the Hispanic/Latino world. Students will be required to do a significant amount of reading, and writing in order to prepare themselves for class discussions and for their oral presentations. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 220
INTRODUCTION TO LITERARY ANALYSIS IN SPANISH
Undergraduate
The main purpose of this course is to provide students with the critical tools and vocabulary that they need in order to analyze various types of literary texts written in Spanish. Students will read and discuss a variety of poems, short stories, and plays, focusing on their various levels of meaning and also on the various ways by which they (or their authors or their readers) create meaning. Other aims of the course include helping students improve their oral and written communication in Spanish, introducing them to research methods in literary studies, and familiarizing them with the MLA style for documenting sources. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 221
INTRODUCTION TO PENINSULAR CIVILIZATION
Undergraduate
This course introduces students to the cultures of Spain and provides them with a panoramic view of peninsular civilization from ancient times to the present. Students will explore selected topics related to geography, language, politics, religion, literature, art, architecture, music, dance, and film. This course is a good preparation for those who plan to study in Spain. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 225
INTRODUCTION TO TRADITIONAL AND TECHNOLOGICAL BASED APPROACHES TO TRANSLATION
Undergraduate
The main objective of this course is to introduce students to the history, theory and fundamental principles of translation practice as well as the latest technologies available to the translator. Students will practice the art of translation through the newest technologies available in fields such as medicine, law, sports, travel, education, and business. This introductory course will train students to recognize, comprehend and translate idioms and fixed expressions into Spanish and/or English equivalencies. Students will learn to use monolingual dictionaries and constitute glossaries, computer-based tools and the internet for translating. Students will gain the necessary skills to proof and edit professional documents in order to provide polished and professional translations. A whole range of texts, videos from Spanish to English, and from English into Spanish, will be used for practice. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 242
INTRODUCTION TO SPANISH LINGUISTICS
Undergraduate
This course is an introduction to the structure of the Spanish language and its use in the Spanish speaking world. It is offered to those students who have already studied Spanish for at least two years. The objectives of this course are the following: (1) introduce basic linguistic terminology and the fundamentals of this science, (2) help the student to analyze the grammatical structures and sounds of the Spanish language, (3) familiarize the student with different varieties of Spanish, (4) introduce the student to the study of linguistics as a cognitive science. This course counts toward the major and minor in Spanish and prepares students for later linguistics courses. Strongly recommended for students planning to take any 300-level linguistics course. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 243
INTRODUCTION TO TRADITIONAL AND TECHNOLOGY BASED APPROACHES TO TRANSLATION
Undergraduate
The main objective of this course is to introduce students to the history, theory and fundamental principles of translation practice as well as the latest technologies available to the translator. Students will practice the art of translation through the newest technologies available. This introductory course will train students to recognize, comprehend and translate idioms and fixed expressions into Spanish and/or English equivalencies. Students will learn to use monolingual dictionaries and glossaries, computer-based tools and the internet for translating. Students will gain the necessary skills to proof and edit professional documents in order to provide polished and professional translations. A whole range of texts, videos from Spanish to English, and from English into Spanish, will be used to practice. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 244
**COMPUTER-ASSISTED TRANSLATION TOOLS**
*Undergraduate*
This course provides an overview of computer-assisted translation (CAT) tools used in the translation industry. It will guide students to understand the difference between computer-assisted translation and machine translation. It will also analyze several Internet-based resources available to translators so that decisions to use these tools will be based on quality control and faithfulness of translation, rather than on mere productivity and profit. In this way, prospective translators will be able to choose best business practices and abide by professional ethics. In particular, this course will explore the main features of SDL Trados Studio, the leading software suite in the market, as well as a variety of open source translation tools, such as Memsource, memoQ, MateCAT, WordFast, and OmegaT. This is a hands-on course that will teach students the basic use of CAT tools, computer skills required of a translator in today's language service provider (LSP) environment.

SPN 251
**SPANISH FOR THE MEDICAL PROFESSIONS**
*Undergraduate*
This course aims at developing communication skills for students, health care professionals (physicians, nurses, nurse practitioners, social service workers) and workers in related fields. It reviews structures of Spanish grammar and introduces medical terms and expressions in the context of "real life" situations. Emphasis is given to developing cultural awareness of the U.S. Hispanic population and to preparing students to handle crises and daily concerns in a hospital or medical office setting and in other health care situations. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 252
**COMMERCIAL SPANISH I**
*Undergraduate*
An introduction to Commercial Spanish designed to provide the business-oriented student with sufficient Spanish language skills to be able to conduct basic business activities in Spanish-speaking countries. Students will be exposed to a wide variety of vocabulary to help them explore various topics related to the cultures of the Spanish-speaking world. There will also be ample oral and written practice related to the business world. The ability to communicate and perform business-related tasks is the focus of each lesson. Classroom sessions will include oral presentations, discussions of the assigned readings and related topics. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 254
**SPANISH FOR LAW PROFESSIONALS**
*Undergraduate*
The objective of this course is to provide vocabulary, idiomatic expressions, and cultural information for the specific needs of the professionals in the legal field. This class is intended for those who want to learn about the general content of law and legal vocabulary which are applicable in the Spanish world. In every class the participants will analyze texts, review grammar as necessary and practice in context. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 297
**SPECIAL TOPICS IN SPANISH**
*Undergraduate*
See schedule for current offerings.

SPN 298
**STUDY ABROAD**
*Undergraduate*
Variable credit.

SPN 299
**INDEPENDENT STUDY**
*Undergraduate*
Variable credit.
SPN 301
SPANISH LITERATURE I: MIDDLE AGES THROUGH THE GOLDEN AGE
Undergraduate
This course introduces students to the literature of medieval and Golden Age Spain, and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the literary genres written in Castilian from 1100 CE to 1700 CE, tracing the development of various styles and their contribution to a national literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 302
SPANISH LITERATURE II: THE ENLIGHTENMENT TO THE PRESENT
Undergraduate
A critical survey of Spanish peninsular literature from 1700 to the present: this course provides an overview of the historical, intellectual, artistic, and socio-political factors that have shaped Spanish life from the Enlightenment to our times as viewed through selected literary texts. (Literature category #2: Spanish literature from 1700 to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 303
LATIN AMERICAN LITERATURE & CULTURE I
Undergraduate
A critical survey of Spanish American literature from its origins to modernism. The course is an overview of the physical, intellectual, artistic, and socio-political currents of Spanish American literature that have helped to shape its thought and culture. Classroom sessions will include lectures and discussions of the assigned readings and related topics. Students in the course will read a number of representative works written by a diverse variety of the period's principal writers. Genres included are poetry, prose fiction, theater, and the essay. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 304
LATIN AMERICAN LITERATURE AND CULTURE II
Undergraduate
This course is a critical survey of Spanish American literature from 1880 to the present. It is an overview of the physical, intellectual, artistic, and socio-political currents of Spanish American literature that have helped to shape its thought and culture. Classroom sessions will include lectures and discussions of the assigned readings and related topics. Students in the course will read a number of representative works written by a diverse variety of the period's principal writers. The readings will provide a wide sample of different types of writing; genres included are poetry, prose fiction, theater, and the essay. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 305
LATIN AMERICAN NOVEL
Undergraduate
This course is a survey of contemporary Latin American novels and will include works by a variety of Latin American authors. Throughout the course students will explore the development of the novel in Latin America; the revision and reinterpretation of history, gender, and the concept and construction of the novel and characters from the perspective of twentieth and twenty first century authors. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 306
HISPANIC LITERATURE OF THE CARIBBEAN
Undergraduate
This course covers Hispanic literature of the Caribbean from a variety of perspectives and may have different topics each quarter. Variable topics may include: Cuban, Puerto Rican, Dominican or Afro-Caribbean Literature. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 307  
**PENINSULAR CIVILIZATION**
Undergraduate
This course is an integrated survey of civilization and culture of the Iberian Peninsula from prehistoric times to the present. The survey course concentrates on Spanish arts and intellectual achievements. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 308  
**MEDIEVAL SPANISH LITERATURE**
Undergraduate
This course introduces students to the literature of medieval Spain, and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the poetry, prose, and drama written in Castilian from 1100 to 1500, tracing the gradual unification of a national language and literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 309  
**SPANISH BALLAD**
Undergraduate
This course will explore social diversity and the Spanish visions of Identity and Peninsular culture through the Spanish Ballad. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 310  
**GOLDEN AGE POETRY**
Undergraduate
This course will introduce students to the Spanish poetry of the sixteenth and seventeenth centuries, from Boscan and Garcilaso to Calderon and Sor Juana. Students will emphasize the major poetic movements, such as Petrarchism, mysticism, conceptismo and culteranismo. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 311  
**CERVANTES**
Undergraduate
This advanced course focuses on Miguel de Cervantes's Don Quijote. This course will consider how this "first modern novel" responds critically to developments in Renaissance literature, religious and political thinking, and theories of fictional and non-fictional representation. In addition to the Quijote, students will also read short selections of background material and criticism in order to situate this work in its historical context and to understand why it is considered to be among the most influential works of world literature. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 312  
**THE SPANISH NOVEL**
Undergraduate
This advanced course is a survey of modern and contemporary Spanish novels and will include works by a variety of authors. Throughout the course students will explore the development of the novel in Spain; the revision and reinterpretation of history, gender, and the concept and construction of the novel and characters from the perspective of modern and contemporary authors. Group work, class discussions and individual projects will help the student gain a comprehensive view of the significant currents of the Spanish peninsular novel. This course will stress and encourage the examination of the roles of women, class, culture, and religion. (Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 313
THE GENERATION OF 1898
Undergraduate
This advanced course will focus on the key group of Spanish writers known as the Generation of 1898. These writers felt that Spain at the end of the 19th century did not measure up to European standards of modernity and progress, and that its cultural and social life was at an inferior level when compared to the leading European countries. Spain was diagnosed as having a national malaise known as “abulia”; it was a kind of national sluggishness that prevented the country from profiting from and adjusting to the rapidly changing currents of modern world civilization. The task facing the Generation of 1898 was to bring Spain up to the level of the times. Students in the course will read a number of representative works written by some of the Generation’s principal members. (Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 314
CONTEMPORARY HISPANIC LITERATURE
Undergraduate
This course is a panoramic study of principal works and authors of literature of the Spanish-speaking world. Topics vary. The literary production of representative authors is studied and analyzed. Students will take a thematic approach to the textual analysis of works by selected poets, musical artists, dramatists, essayists and fiction writers. (Literature category #3: Latin American literature from the origins through Romanticism or Literature category #4 Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 315
MEXICAN LITERATURE
Undergraduate
This course is an overview of Mexican literature from the colonial period to the present. Through writings, films, arts, and music, the course explores the intellectual, political, social, and historical events that have shaped the life and experience of Mexican people. Particular emphasis will be placed on the Mexican Revolution and the post Revolution, as well as the U.S. presence in Mexico and Mexicans in the United States. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4 Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 316
THE HISPANIC ESSAY
Undergraduate
This advanced course will explore the history of ideas, cultural diversity and Latin American visions of identity through the Latin American essays. In this class students will decode and analyzed problems of theory, criticism and study of this genre. Through the works of a selection of authors, such as Eduardo Galeano, Octavio Paz, Jose Marti, Manuel Gonzalez Prada and others, this class will study how political, social, economical, rhetorical and gender issues have affected this genre. Students will examine issues such as the construction of power, the treatment of sex, gender and cultural difference in literature; how the Latin American experience is reflected in these readings; and how they contribute to Hispanic literature as a whole. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4: Latin American literature from Modernism to present) SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 317
THE HISPANIC SHORT STORY
Undergraduate
This course explores the Hispanic short story from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latino short story. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 318
THE HISPANIC THEATER
Undergraduate
This course explores Hispanic theater from a variety of perspectives and may have different topics each quarter. Through the discussion and analysis of theatrical texts, students will improve their knowledge of Hispanic culture, socio-political vision, and tools of literary expression. Variable topics may include: Peninsular, Latin American or Latino theater. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 319
CONTEMPORARY POETRY
Undergraduate
This advanced course in modern Latin American and Spanish literature focuses on poetical representations of identity; poetical representations of gender and the cultural readings of "machismo", the role of poetry and other forms of artistic expression in shaping societies; theory and critical analysis of poems as a way to understand culture, the politics of marginality and forms of political mobilization among other issues. (Literature category #4: Latin American literature from Modernism to present or Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 320
COMMERCIAL SPANISH II
Undergraduate
This is a course designed to provide the business-oriented student with sufficient Spanish language skills to be able to function credibly in a business environment where a knowledge of Spanish is necessary. Students will be exposed to a wide variety of commercial terminology and will have ample oral and written practice related to the business world. Principal topics include: 1) readings on business topics, translation, writing; 2) study and practice of business vocabulary; 3) study and discussion of business topics; 4) readings on Spanish-speaking countries and their people and economies to provide the students with an increased awareness of the diversity and complexity of the cultures and business practices in the many different countries in Latin America and other Spanish-speaking areas. SPN 106 or equivalent, or permission of instructor, is recommended.

SPN 321
U.S. LATINO/A WRITERS
Undergraduate
This advanced course is a critical survey of Latino literature. This course will provide the student with an overview (cultural, social, and political) of the contributions of Latinos to the development of society in the United States. The course will call attention to topics that are and have been important to Latino culture and identity. Particular emphasis will be given to topics such as: oppression, isolation, cultural identity (within the U.S.), education and anti-immigrant issues. The objective of this course is to provide the student with a better understanding of the Latino communities in the United States, as seen by themselves. Through the works read in class, films and music the student will also acquire a better understanding of the social and political situation of Latinos in the United States. Literature category #4 (Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 322
HISPANIC WOMEN WRITERS
Undergraduate
This advanced course explores Hispanic women writers from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latina writers of the United States. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 323
REVOLUTION IN LATIN AMERICAN LITERATURE
Undergraduate
This advanced course explores Revolution in Latin American literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: The Mexican Revolution, the Cuban Revolution, Revolutions in Central America, or a Survey of Revolutionary Movements. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 324
THE BIRTH OF THE NOVEL IN SPAIN
Undergraduate
In this advanced course students will read and discuss examples of the major sixteenth-century narrative genres (chivalric romance, prose drama, picaresque, pastoral, la novela morisca, and historiography) that paved the way for Cervantes's synthesis. Texts include, Amadis de Gaula (selections), La Celestina, El Abencerraje, La vida de Lazarillo de Tormes, and two of Cervantes's novelas. Topics to be treated include questions of social class and caste, gender roles, notions of love and honor, the rise of the modern nation-state, imperialism, mysticism, verisimilitude, literal and figurative language, and the problems associated with interpreting texts that are culturally distant from modern readers. Class will consist primarily of discussion of the assigned readings. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 325
ADVANCED SPANISH TRANSLATION
Undergraduate
This course will focus on the translation of journalistic, legal, literary, pedagogical and commercial texts. The course will also improve the student's knowledge of translation and interpretation theory and provide, through a variety of translation assignments, the opportunity to review their writing skills and knowledge of the culture in order to be able to work within different registers and learn appropriate vocabulary. Guest lectures may provide the students with first-hand experience in the field and the opportunity to explore possible future use of their experience in translation. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 326
SPANISH STYLISTICS
Undergraduate
This advanced expression class builds on the skills developed in Spanish 201 & 202 (or 205 & 206) with a clear emphasis on writing. Students will write numerous texts of different length and purpose. The focus will be on developing a more effective and sophisticated prose style. In-class time will be spent on writing activities which will give students practice in performing specific writing tasks following a variety of writing styles. In-class time will also be spent on oral and written exercises designed to reinforce the correct use of grammatical structures. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 327
AREA STUDIES IN LATIN AMERICAN LITERATURE
Undergraduate
This course explores Area Studies in Latin American literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: Central American, Andean, or Southern Cone literature. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 328
MODERN LATIN AMERICAN THEATRE
Undergraduate
This course explores Modern Latin American theatre from a variety of perspectives and may have different topics each quarter. Variable topics may include: a survey of representative dramas from the "revolutionary" period in modern Latin American theater, 1960s-1970s or other specialized topics. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 329
LATINO GAY AND LESBIAN LITERATURE
Undergraduate
This course explores Latino gay and lesbian literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: a survey of representative texts of Latino and Hispanic gay and lesbian authors or other specialized topics. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 330
LATIN AMERICAN, LATINO AND SPANISH CINEMA
Undergraduate
This course explores Latin American, Latino and/or Peninsular cinema from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latino film directors and their works in Spain, Latin America or the United States. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 331
FILM AS A SUBVERSIVE ART
Undergraduate
This course explores contested images of resistance in Latin American, Latino and/or Peninsular films from a variety of perspectives and may have different topics each quarter. The course questions the construction of individual and collective identities in film, focusing on the intersections of cultural factors such as gender, race and ethnicity, social class, and language, among others. It also examines the ideological underpinnings involved in the shaping and conforming of those identities by cultural institutions and social systems. Variable topics may include: Decoding literature through Peninsular, Latin American or Latino films based on literary works by Peninsular, Latin American or Latino authors, or other specialized topics. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 332
NINETEENTH-CENTURY SPANISH NOVEL
Undergraduate
This advanced course is based on the reading, discussion and critique of major representative works in nineteenth-century Peninsular novel. The course will focus on the conflicting interest of nineteenth-century society paying special attention to the theme of marriage and relationship between sexes. This course will stress and encourage the examination of the roles of women, class, culture, and religion. (Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 333
GOLDEN AGE THEATER
Undergraduate
This advanced course will introduce students to the Spanish theater of the seventeenth century, with a focus on the comedia, a new popular art form that appealed to audiences across social classes. Students will endeavor to read these literary works in their cultural contexts and consider their current relevance. Students may also view film adaptations of some of the plays. Topics include questions of class and caste, gender roles, various notions of honor, the early modern monarchy, the idea of free will within the context of the Counter Reformation, and the theatrical elements of everyday life. Class will consist primarily of discussion of the assigned readings. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 334
ADVANCED TRANSLATION IN THE PROFESSIONAL WORLD: COMMUNITY-BASED SERVICE LEARNING
Undergraduate
This is an advanced course with practical experience designed to bring translation knowledge and skills together to produce accurate and clear translations from English into Spanish and vice versa. Students will review fundamental translation theories and applications of written texts in various disciplines. They will acquire the skills and knowledge needed to ensure contextually-accurate terminology in the preparation of translated documents. Additionally, they will maintain the standards of the ethical code formulated by the American Translators Association, (ATA) Students will be exposed to the most modern online translation technology available, computer assisted translation (CAT) tools that supplement classroom learning with user-friendly online exercises of technical vocabulary designed to reinforce translation skills. Students will participate in a Community-Based Service Learning (CBL) for 25 hours per quarter, where they will help to produce “translations in progress” for local business and non-profit organizations that require translation services. As a final project, students will create a translation portfolio, which is composed of a reflection paper of the CBL experience, translation projects, curriculum vitae, and a cover letter. SPN 106 or equivalent, including placement test or permission of instructor, is recommended. Cross-listed with SPN 434.

SPN 335
U.S. LATINA WRITERS
Undergraduate
This course is a survey of literature by modern Latina women writers from the United States, focusing on the social, cultural and political development of Latinas and their affirmation and reaffirmation of identity through their literature in today's society. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 339
THE GENERATION OF 1927
Undergraduate
This advanced course examines the peninsular Spanish "Generation of 1927" in considerable depth with emphasis on the best known literary figure in the group, Federico Garcia Lorca. (Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 340  
SPANISH CREATIVE WRITING WORKSHOP  
Undergraduate  
This advanced course seeks to reinforce and further develop the student's expression in Spanish by exploring different techniques in writing poetry and fiction. After approaching some basic concepts involved in the creative writing process, and with the constant practice of writing, students will be able to create texts in the style of preference. They will also gain more confidence with linguistics abilities. This class will be conducted in a workshop format, consisting of in-class writing exercises, workshop-like peer-sharing of texts, and discussions about the creative process. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 351  
SPANISH IN THE U.S.  
Undergraduate  
Spanish is the second most widely spoken language in the United States; it has been spoken in this country longer than English has. This course is an introduction to the varieties of Spanish spoken in the US. Students will examine the evolution of the phonological, grammatical, and lexical linguistic system of the Spanish of US Latino/a communities. Students will also explore how sociolinguistic concepts such as bilingualism, diglossia, code-switching, linguistic variation, linguistic change, standard vs. non-prestigious varieties, and language attitudes manifest in the US Spanish context. This course is intended to familiarize the students with issues of language use in social context. Students will discuss results of research on the relationship between language and society in US Spanish-speaking communities. They will become familiar with sociolinguistic concepts. Students also acquire experience in carrying out sociolinguistic research. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 352  
SPANISH PHONOLOGY AND PHONETICS  
Undergraduate  
This is an introductory course on the nature and structure of the sound system of the Spanish language. This course is offered to students who, having studied the language for at least two years, need a solid grounding of Spanish phonology and--in the case of non-native speakers of Spanish--a systematic practice of correct pronunciation patterns. It is also a requirement for Spanish majors. After a thorough study of the Spanish sound system, students will explore some related topics such as Spanish orthography, the history of the Spanish language, its place among Romance, Iberian, and American languages, and its rich dialectal variation. Lectures and discussions will be based on the required textbook and on additional materials (both written and audio). This class will be conducted in Spanish. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 353  
THE STRUCTURE OF SPANISH  
Undergraduate  
This course is an introduction to the scientific study of the structure of language, with a special emphasis on Spanish. It examines the structure of sentences (syntax), the formation of words (morphology), and the construction of meaning (semantics/pragmatics) in Spanish, and in contrast to English and other languages. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 354  
SPANISH SOCIOLINGUISTICS  
Undergraduate  
This course is an introduction to the study of the relationship between language and society through the Spanish varieties in the Spanish-speaking world. Students will examine and revise ideologies, attitudes and beliefs about the Spanish language to understand this relationship. To lead students to examine their own beliefs and attitudes about language, they will be equipped with methods of linguistic analyses and strategies to find the social in the linguistic and the linguistic in the social from a critical perspective. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 355  
THE HISTORY OF THE SPANISH LANGUAGE  
Undergraduate  
This course is a journey through the history of the Spanish language from Latin to the present day. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 370
LATIN AMERICAN CIVILIZATION
Undergraduate
The course will explore the politics, social structures, traditions, artistic movements and historical periods of Latin America. The scope of the course covers the main pre-Columbian civilizations, the time of the Spanish discovery and colonization, the rise of new nationalities and their development, especially in relation to the United States and the emerging globalized world. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 371
CULTURAL DIVERSITY AND LEGACIES THROUGH FILM
Undergraduate
This course explores Latin American, Latino and/or Peninsular cultures which grapple with various historical, socio-economic and political issues through film. Throughout the course, students will question the construction of individual and collective identities in film, focusing on the intersections of cultural factors such as gender, race and ethnicity, social class, and language, among others. Students will also focus on the ideological substructures involved in the shaping and conforming of those identities by cultural institutions and social systems. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 372
LITERATURE OF THE DOMINICAN REPUBLIC
Undergraduate
This advanced course will explore cultural diversity and the Dominican Republic political, gender and ethnic visions through poetry. Through poetic class experience students will decode culture and society in the Caribbean and U.S. Dominican Latino communities. Students will focus on the following issues: political representations of identity; representations of gender and the cultural readings of "machismo"; the role of art and other forms of cultural expression in shaping identity; cultural criticism of poems as a way to understand culture and the politics of marginality and forms of political mobilization. Literature category #4 (Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 373
AFRO-HISPANIC LITERATURE
Undergraduate
This course in contemporary literature will seek to determine what distinguishes the Afro-Hispanic novel, short story, drama or poetry from other works in these genres written in Spanish. Students will read original works in order to analyze how the use of language, imagery and narrative voice reflect the experience of people of African descent in the Spanish-speaking world as seen (or heard) in the text and context of these works. In addition, students will explore how race, class, politics and culture interact and find expression in Afro-Hispanic literature. (Literature category #2: Spanish literature from the Enlightenment to the present or Literature category #4: Latin America from Modernism to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 374
LITERATURE OF THE CONQUEST
Undergraduate
This advanced course in Latin American literature explores the early encounters between Europe and the Americas. Students will analyze letters, reports, histories, and political tracts from European, Amerindian, and Mestizo sources. Students will also consider some visual documents, such as images from the Lienzo de Tlaxcala and early maps. Typical areas of focus include the initial contact (Columbus), Mexico (Cortes, Diaz del Castillo, the Florentine Codex), Peru (Xerez, "El Inca" Garcilaso, Guaman Poma de Ayala), and the sixteenth-century debates over the wars of conquest (Las Casas, Sepulveda). Topics include the role of these texts as instruments of empire, strategies of representation, strategies of resistance to imperialism, the role of women in the conquest, debates over what constitutes a "just" war, and the relevance of these texts for modern Latin American identities. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 375
LATIN AMERICAN LITERATURE FROM INDEPENDENCE TO MODERNISM
Undergraduate
This advanced course in Spanish literature will introduce students to the most important literary movements in Hispanic American countries, beginning with the wars of independence from Spain until the last part of 19th century. Special attention will be given to authors such as Jose Marti, Jorge Issacs, Andres Bello and Ruben Dario, among others. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 376  
SOR JUANA INES DE LA CRUZ  
Undergraduate  
This advanced course in literature will explore the main works of the most influential Mexican poet of the Colonial period, Sor Juana Ines de la Cruz (1648-1695). One of the major themes in Sor Juana's work is the right of women to education. Sor Juana wrote poetry, plays, and essays in seventeenth-century Mexico, a society in which women's intellectual inquiry and access to knowledge was an unsafe endeavor and controlled by patriarchal hierarchies. Students will examine the relationship between politics, gender and writing in the context of the historical period, and analyze the spaces and borders occupied and visited by Sor Juana's lyric, ludic, astronomical, polemical, theatrical, theological, cosmological, culinary, colonial, and criollo writings. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 377  
PERUVIAN REALITIES IN A MULTICULTURAL SOCIETY: HISTORY, CULTURE, POLITICS, VIOLENCE & SOCIAL JUSTICE  
Undergraduate  
This interdisciplinary course will introduce students to the history, culture, politics, and general life of the peoples of Peru. Through an exploration of a vast array of interdisciplinary readings, visual arts and films, students will gain a deep understanding of Peru's history from its extraordinary pre-Columbian civilizations to its citizens' twenty-first century post civil war struggles to achieve dignity and justice in a multicultural, multilingual and multiethnic nation where Andean, Amazonian, African, Asian and European traditions meet. As a consequence of immense economic and social inequalities, Peru has a long history of violence that resulted in an internal war that ended recently. Particular attention will be given to contemporary developments in terms of the interaction between culture and politics. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4 (Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 378  
FOUNDATIONAL FICTIONS  
Undergraduate  
This advanced course in Latin American literature explores the relationship of national consolidation and romantic novels. This course is based on the reading, discussion and critique of major representative "Foundational Fictions" in 19th-century Latin American literature. Students will examine how the construction of gender and race in these novels portrays the quest to forge new national identities. At the same time, students will analyze how the novels use their characters' romantic relationships to suggest their nation's political relationships, and thus contribute to the discourse on building the new societies that would replace Spain's colonial empire and serve as a prototype for the modern Latin American state. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 391  
SOCIOLINGUISTICS OF HERITAGE LANGUAGE LITERACY  
Undergraduate  
A heritage language learner has been described as "a student who is raised in a home where a non-English language is spoken, who speaks or merely understands the heritage language, and who is to some degree bilingual in English and the heritage language" (Valdes 2000:1). It is well-documented that for such students, literacy in the heritage language is often lost within just one or two generations. In this third course of DePaul's series on Latino Literacy, students will identify the prominent sociolinguistic issues that intersect with heritage language literacy. Through the reading of selected bibliography and guided reflections on both personal and service learning experiences, each student will arrive at a personalized assessment of the key topics affecting heritage language literacy. Possible topics include language socialization, language ideology and identities, and issues related to language contact with English such as code-switching and language shift/loss. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 392  
TRANSNATIONALISM AND SOCIAL JUSTICE  
Undergraduate  
This course explores the overarching theme of violence across different Latin American social realities. This course uses an interdisciplinary approach to explore the experience of revolution and repression in contemporary Latin America. Focusing on twentieth-century literature, films and culture, students will explore the making and unmaking of revolutionary political projects and human rights issues, the construction of distinct forms of cultural resistance and the different expressions of violence. (Literature category #4: Latin America from Modernism to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 393  
LATINO MEDIA AND DIGITAL CULTURE LITERACY 
Undergraduate  
This course will explore the role and impact of the media in the Latino community, and how, in this context, Latinos view themselves and how others view them. Students will explore Latino communities' participation as creators and consumers of popular and media culture. Students will examine media organizations and their participants in their role in shaping popular culture. Finally, students will study the various ways that Latino communities exercise cultural citizenship as a form of resistance and in their struggle for just representation in an increasingly global society. This is an upper-level undergraduate/graduate inter-disciplinary seminar that draws on readings in cultural economy, political economy, cultural studies, history and sociology. Students who choose to take the class for JYEL credit are required to do a minimum of 25 hours of service. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 394  
LATINO CULTURAL LITERACY AND COMMUNITY ENGAGEMENT  
Undergraduate  
This course explores local Chicago histories and institutions and their engagement in politics and advocacy for Latinos. This is a Junior Year Experiential Learning (JRYR) course, and as such requires 25 hours of service. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 395  
FOREIGN LANGUAGES ACROSS THE CURRICULUM  
Undergraduate  
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Spanish. Students must have the equivalent of 106 or higher ability in Spanish to take this two credit component. Please contact the Department of Modern Languages if you have questions about this courses or about language placement.

SPN 397  
SPECIAL TOPICS IN SPANISH  
Undergraduate  
See schedule for current offerings.

SPN 398  
STUDY ABROAD  
Undergraduate  
Variable credit.

SPN 399  
INDEPENDENT STUDY  
Undergraduate  
Variable credit.

SPN 401  
SPANISH LITERATURE I : MIDDLE AGES THROUGH THE GOLDEN AGE  
Graduate  
This course introduces students to the literature of medieval and Golden Age Spain, and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the literary genres written in Castilian from 1100 CE to 1700 CE, tracing the development of various styles and their contribution to a national literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts. (Literature category #1: Spanish literature before 1700).

SPN 402  
SPANISH LITERATURE II: THE ENLIGHTENMENT TO THE PRESENT  
Graduate  
This course is a critical survey of Spanish peninsular literature from 1700 to the present and provides an overview of the historical, intellectual, artistic, and socio-political factors that have shaped Spanish life from the Enlightenment to our times as viewed through selected literary texts. (Literature category #2: Spanish literature before 1700).
This course is a critical survey of Spanish American literature from its origins to modernism. It is an overview of the physical, intellectual, artistic, and socio-political currents of Spanish American literature that have helped to shape its thought and culture. Classroom sessions will include lectures and discussions of the assigned readings and related topics. Students in the course will read a number of representative works written by a diverse variety of the period's principal writers. The readings will provide a wide sample of different types of writing; genres included are poetry, prose fiction, theater, and the essay. (Literature category #3: Latin American literature from origins through Romanticism).

This course is a critical survey of Spanish American literature from 1880 to the present. It is an overview of the physical, intellectual, artistic, and socio-political currents of Spanish American literature that have helped to shape its thought and culture. Classroom sessions will include lectures and discussions of the assigned readings and related topics. Students in the course will read a number of representative works written by a diverse variety of the period's principal writers. The readings will provide a wide sample of different types of writing; genres included are poetry, prose fiction, theater, and the essay.

This course is a survey of contemporary Latin American novels and will include works by a variety of Latin American authors. Throughout the course students will explore the development of the novel in Latin America; the revision and reinterpretation of history, gender, and the concept and construction of the novel; and characters from the perspective of twentieth and twenty first century authors.

This course covers Hispanic literature of the Caribbean from a variety of perspectives and may have different topics each quarter. Variable topics may include: Cuban, Puerto Rican, Dominican or Afro-Caribbean Literature.

This course is an integrated survey of civilization and culture of the Iberian Peninsula from prehistoric times to the present. The survey course concentrates on Spanish arts and intellectual achievements.

This course introduces students to the literature of medieval Spain, and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the poetry, prose, and drama written in Castilian from 1100 to 1500, tracing the gradual unification of a national language and literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts.

This course will explore social diversity and the Spanish visions of Identity and Peninsular culture through the Spanish Ballad.
SPN 410
GOLDEN AGE POETRY
Graduate
This course introduces students to the poetry of Golden Age Spain (1500-1700), and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the poetry written in Castilian from 1500 to 1700, tracing the development of major styles and their contribution to a national literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts.

SPN 411
CERVANTES
Graduate
This advanced course focuses on Miguel de Cervantes's Don Quijote. This course will consider how this "first modern novel" responds critically to developments in Renaissance literature, religious and political thinking, and theories of fictional and non-fictional representation. In addition to the Quijote, students will also read short selections of background material and criticism in order to situate this work in its historical context and to understand why it is considered to be among the most influential works of world literature.

SPN 412
THE SPANISH NOVEL
Graduate
This advanced course is a survey of modern and contemporary Spanish novels and will include works by a variety of authors. Throughout the course students will explore the development of the novel in Spain; the revision and reinterpretation of history, gender, and the concept and construction of the novel and characters from the perspective of modern and contemporary authors. Group work, class discussions and individual projects will help the student to gain a comprehensive view of the significant currents of the Spanish peninsular novel. This course will stress and encourage the examination of the roles of women, class, culture, and religion.

SPN 413
THE GENERATION OF 1898
Graduate
This advanced course will focus on the key group of Spanish writers known as the Generation of 1898. These writers felt that Spain at the end of the 19th century did not measure up to European standards of modernity and progress, and that its cultural and social life was at an inferior level when compared to the leading European countries. Spain was diagnosed as having a national malaise known as "abulia"; it was a kind of national sluggishness that prevented the country from profiting from and adjusting to the rapidly changing currents of modern world civilization. The task facing the Generation of 1898 was to bring Spain up to the level of the times. Students in the course will read a number of representative works written by some of the Generation's principal members.

SPN 414
CONTEMPORARY HISPANIC LITERATURE
Graduate
This course is a panoramic study of the principal works and authors of literature from Spanish-speaking countries. The literary production of representative authors is studied and analyzed. Students will take a thematic approach to the textual analysis of works by selected poets, musical artists, dramatists, essayists and fiction writers.

SPN 415
MEXICAN LITERATURE
Graduate
This course is an overview of Mexican literature from the colonial period to the present. Through writings, films, arts, and music, the course explores the intellectual, political, social, and historical events that have shaped the life and experience of Mexican people. Particular emphasis will be placed on the Mexican Revolution and the post Revolution, as well as the U.S. presence in Mexico and Mexicans in the United States.

SPN 416
THE HISPANIC ESSAY
Graduate
This advanced course will explore the history of ideas, cultural diversity and Latin American visions of identity through the Latin American essays. In this class students will decode and analyzed problems of theory, criticism and study of this genre. Through the works of a selection of authors, such as Eduardo Galeano, Octavio Paz, Jose Marti, Manuel Gonzalez Prada and others, this class will study how political, social, economical, rhetorical and gender issues have affected this genre. Students will examine issues such as the construction of power, the treatment of sex, gender and cultural difference in literature; how the Latin American experience is reflected in these readings; and how they contribute to Hispanic literature as a whole.
SPN 417
THE HISPANIC SHORT STORY
Graduate
This course explores the Hispanic short story from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latino short story.

SPN 418
THE HISPANIC THEATER
Graduate
This course explores Hispanic theater from a variety of perspectives and may have different topics each quarter. Through the discussion and analysis of theatrical texts, students will improve their knowledge of Hispanic culture, socio-political vision, and tools of literary expression. Variable topics may include: Peninsular, Latin American or Latino theater.

SPN 419
CONTEMPORARY POETRY
Graduate
This advanced course in modern Latin American and Spanish literature focuses on the following issues: poetical representations of identity; poetical representations of gender and the cultural readings of "machismo"; the role of poetry and other forms of artistic expression in shaping societies; theory and critical analysis of poems as a way to understand culture, the politics of marginality and forms of political mobilization among other issues.

SPN 420
COMMERCIAL SPANISH II
Graduate
Advanced Commercial Spanish is designed to provide the business-oriented student with sufficient Spanish language skills to be able to function credibly in a business environment where a knowledge of Spanish is necessary. Students will be exposed to a wide variety of commercial terminology and will have ample oral and written practice related to the business world.

SPN 421
U.S. LATINO/A WRITERS
Graduate
This advanced course is a critical survey of Latino literature. This course will provide the student with an overview (cultural, social, and political) of the contributions of Latinos to the development of society in the United States. The course will call attention to topics that are and have been important to Latino culture and identity. Particular emphasis will be given to topics such as: oppression, isolation, cultural identity (within the U.S.), education and anti-immigrant issues. The objective of this course is to provide the student with a better understanding of the Latino communities in the United States, as seen by themselves. Through the works read in class, films and music the student will also acquire a better understanding of the social and political situation of Latinos in the United States.

SPN 422
HISPANIC WOMEN WRITERS
Graduate
This advanced course explores Hispanic women writers from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latina writers of the United States.

SPN 423
REVOLUTION IN LATIN AMERICAN LITERATURE
Graduate
This advanced course explores Revolution in Latin American literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: The Mexican Revolution, the Cuban Revolution, Revolutions in Central America, or a Survey of Revolutionary Movements.
THE BIRTH OF THE NOVEL IN SPAIN
Graduate
"The Birth of the Novel in Spain" is an advanced course in Spanish literature (category #1: Spanish literature before 1700). Students will read and discuss examples of the major sixteenth-century narrative genres (chivalric romance, prose drama, picaresque, pastoral, la novela morisca, and historiography) that paved the way for Cervantes's synthesis. Texts include, Amadís de Gaula (selections), La Celestina, El Abencerraje, La vida de Lazarillo de Tormes, and two of Cervantes's novelas ejemplares. Topics to be treated include questions of social class and caste, gender roles, notions of love and honor, the rise of the modern nation-state, imperialism, mysticism, verisimilitude, literal and figurative language, and the problems associated with interpreting texts that are culturally distant from modern readers. Class will consist primarily of discussion of the assigned readings.

ADVANCED SPANISH TRANSLATION
Graduate
This course will focus on the translation of journalistic, legal, literary, pedagogical and commercial texts. The course will also improve the student's knowledge of translation and interpretation theory and provide, through a variety of translation assignments, the opportunity to review their writing skills and knowledge of the culture in order to be able to work within different registers and learn appropriate vocabulary. Guest lectures may provide the students with first-hand experience in the field and the opportunity to explore possible future use of their experience in translation.

SPANISH STYLISTICS
Graduate
This advanced expression class has a clear emphasis on writing numerous texts of different length and purpose. The focus will be on developing a more effective and sophisticated prose style. In-class time will be spent on writing activities which will give students practice in performing specific writing tasks following a variety of writing styles. In-class time will also be spent on oral and written exercises designed to reinforce the correct use of grammatical structures.

AREA STUDIES IN LATIN AMERICAN LITERATURE
Graduate
This course explores Area Studies in Latin American literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: Central American, Andean, or Southern Cone literature.

MODERN LATIN AMERICAN THEATRE
Graduate
This course explores Modern Latin American theatre from a variety of perspectives and may have different topics each quarter. Variable topics may include: a survey of representative dramas from the "revolutionary" period in modern Latin American theater, 1960s-1970s or other specialized topics.

LATINO GAY AND LESBIAN LITERATURE
Graduate
This course explores Latino gay and lesbian literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: a survey of representative texts of Latino and Hispanic gay and lesbian authors or other specialized topics.

LATIN AMERICAN, LATINO AND SPANISH CINEMA
Graduate
This course explores Latin American, Latino and/or Peninsular cinema from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latino film directors and their works in Spain, Latin America or the United States. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative.
**SPN 431**
FILM AS A SUBVERSIVE ART  
Graduate  
This course explores contested images of resistance in Latin American, Latino and/or Peninsular films from a variety of perspectives and may have different topics each quarter. The course questions the construction of individual and collective identities in film, focusing on the intersections of cultural factors such as gender, race and ethnicity, social class, and language, among others. It also examines the ideological underpinnings involved in the shaping and conforming of those identities by cultural institutions and social systems. Variable topics may include: Decoding literature through Peninsular, Latin American or Latino films based on literary works by Peninsular, Latin American or Latino authors, or other specialized topics. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative.

**SPN 432**
NINETEENTH-CENTURY SPANISH NOVEL  
Graduate  
This advanced course is based on the reading, discussion and critique of major representative works in nineteenth-century Peninsular novel. The course will focus on the conflicting interest of nineteenth-century society paying special attention to the theme of marriage and relationship between sexes. This course will stress and encourage the examination of the roles of women, class, culture, and religion.

**SPN 433**
GOLDEN AGE THEATER  
Graduate  
This advanced course will introduce students to the Spanish theater of the seventeenth century, with a focus on the comedia, a new popular art form that appealed to audiences across social classes. Students will endeavor to read these literary works in their cultural contexts and consider their current relevance. Students may also view film adaptations of some of the plays. Topics include questions of class and caste, gender roles, various notions of honor, the early modern monarchy, the idea of free will within the context of the Counter Reformation, and the theatrical elements of everyday life. Class will consist primarily of discussion of the assigned readings.

**SPN 434**
ADVANCED TRANSLATION IN THE PROFESSIONAL WORLD: COMMUNITY-BASED SERVICE LEARNING  
Graduate  
This is an advanced course with practical experience designed to bring translation knowledge and skills together to produce accurate and clear translations from English into Spanish and vice versa. Students will review fundamental translation theories and applications of written texts in various disciplines. They will acquire the skills and knowledge needed to ensure contextually-accurate terminology in the preparation of translated documents. Additionally, they will maintain the standards of the ethical code formulated by the American Translators Association. (ATA) Students will be exposed to the most modern online translation technology available, computer assisted translation (CAT) tools that supplement classroom learning with user-friendly online exercises of technical vocabulary designed to reinforce translation skills. Students will participate in a Community-Based Service Learning (CBL) for 25 hours per quarter, where they will help to produce "translations in progress" for local business and non-profit organizations that require translation services. As a final project, students will create a translation portfolio, which is composed of a reflection paper of the CBL experience, translation projects, curriculum vitae, and a cover letter. SPN 106 or equivalent, including placement test or permission of instructor, is recommended. Cross-listed with SPN 334.

**SPN 435**
U.S. LATINA WRITERS  
Graduate  
This course is a survey of literature by modern Latina women writers from the United States, focusing on the social, cultural and political development of Latinas and their affirmation and reaffirmation of identity through their literature in today's society.

**SPN 439**
THE GENERATION OF 1927  
Graduate  
This advanced course examines the peninsular Spanish "Generation of 1927" in considerable depth with emphasis on the best known literary figure in the group, Federico Garcia Lorca.
SPN 440
SPANISH CREATIVE WRITING WORKSHOP
Graduate
This advanced course seeks to reinforce and further develop the student's expression in Spanish by exploring different techniques in writing poetry and fiction. After approaching some basic concepts involved in the creative writing process, and with the constant practice of writing, students will be able to create texts in the style of preference. They will also gain more confidence with linguistics abilities. This class will be conducted in a workshop format, consisting of in-class writing exercises, workshop-like peer-sharing of texts, and discussions about the creative process.

SPN 451
SPANISH IN THE U.S.
Graduate
Spanish is the second most widely spoken language in the United States; it has been spoken in this country longer than English has. This course is an introduction to the varieties of Spanish spoken in the US. Students will examine the evolution of the phonological, grammatical, and lexical linguistic system of the Spanish of US Latino/a communities. Students will also explore how sociolinguistic concepts such as bilingualism, diglossia, code-switching, linguistic variation, linguistic change, standard vs. non-prestigious varieties, language attitudes, manifest in the US Spanish context. This course is intended to familiarize the students with issues of language use in social context. Students will discuss results of research on the relationship between language and society in US Spanish-speaking communities. They will become familiar with sociolinguistic concepts. Students also acquire experience in carrying out sociolinguistic research. SPN 242 strongly recommended.

SPN 452
SPANISH PHONOLOGY AND PHONETICS
Graduate
This is an introductory course on the nature and structure of the sound system of the Spanish language. This course is offered to students who, having studied the language for at least two years, need a solid grounding of Spanish phonology and—in the case of non-native speakers of Spanish—a systematic practice of correct pronunciation patterns. It is also a requirement for Spanish majors. After a thorough study of the Spanish sound system, students will explore some related topics such as Spanish orthography, the history of the Spanish language, its place among Romance, Iberian, and American languages, and its rich dialectal variation. Lectures and discussions will be based on the required textbook and on additional materials (both written and audio). This class will be conducted in Spanish.

SPN 453
THE STRUCTURE OF SPANISH
Graduate
This course is an introduction to the scientific study of the structure of language, with a special emphasis on Spanish. It examines the structure of sentences (syntax), the formation of words (morphology), and the construction of meaning (semantics/pragmatics) in Spanish, and in contrast to English and other languages.

SPN 454
SPANISH SOCIOLINGUISTICS
Graduate
This course is an introduction to the study of the relationship between language and society through the Spanish varieties in the Spanish-speaking world. Students will examine and revise ideologies, attitudes and beliefs about the Spanish language to understand this relationship. To lead students to examine their own beliefs and attitudes about language, they will be equipped with methods of linguistic analyses and strategies to find the social in the linguistic and the linguistic in the social from a critical perspective.

SPN 455
THE HISTORY OF THE SPANISH LANGUAGE
Graduate
This course is a journey through the history of the Spanish language from Latin to the present day.

SPN 470
LATIN AMERICAN CIVILIZATION
Graduate
The course will explore the politics, social structures, traditions, artistic movements and historical periods of Latin America. The scope of the course covers the main pre-Columbian civilizations, the time of the Spanish discovery and colonization, the rise of new nationalities and their development, especially in relation to the United States and the emerging globalized world.
SPN 471
CULTURAL DIVERSITY AND LEGACIES THROUGH FILM
Graduate
This course explores Latin American, Latino and/or Peninsular cultures which grapple with various historical, socio-economic and political issues through film. Throughout the course, students will question the construction of individual and collective identities in film, focusing on the intersections of cultural factors such as gender, race and ethnicity, social class, and language, among others. Students will also focus on the ideological substructures involved in the shaping and conforming of those identities by cultural institutions and social systems. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative.

SPN 472
LITERATURE OF THE DOMINICAN REPUBLIC
Graduate
This advanced course will explore cultural diversity and the Dominican Republic political, gender and ethnic visions through poetry. Through poetic class experience students will decode culture and society in the Caribbean and U.S. Dominican Latino communities. Students will focus on the following issues: political representations of identity; representations of gender and the cultural readings of “machismo”; the role of art and other forms of cultural expression in shaping identity; cultural criticism of poems as a way to understand culture and the politics of marginality and forms of political mobilization.

SPN 473
AFRO-HISPANIC LITERATURE
Graduate
This course in contemporary literature will seek to determine what distinguishes the Afro-Hispanic novel, short story, drama or poetry from other works in these genres written in Spanish. Students will read original works in order to analyze how the use of language, imagery and narrative voice reflect the experience of people of African descent in the Spanish-speaking world as seen (or heard) in the text and context of these works. In addition, students will explore how race, class, politics and culture interact and find expression in Afro-Hispanic literature.

SPN 474
LITERATURE OF THE CONQUEST
Graduate
This course in Latin American literature explores the early encounters between Europe and the Americas. Students will analyze letters, reports, histories, and political tracts from European, Amerindian, and Mestizo sources. Students will also consider some visual documents, such as images from the Lienzo de Tlaxcala and early maps. Typical areas of focus include the initial contact (Columbus), Mexico (Cortes, Diaz del Castillo, the Florentine Codex), Peru (Xerez, “El Inca” Garcilaso, Guaman Poma de Ayala), and the sixteenth-century debates over the wars of conquest (Las Casas, Sepulveda). Topics include the role of these texts as instruments of empire, strategies of representation, strategies of resistance to imperialism, the role of women in the conquest, debates over what constitutes a “just” war, and the relevance of these texts for modern Latin American identities.

SPN 475
LATIN AMERICAN LITERATURE FROM INDEPENDENCE TO MODERNISM
Graduate
This advanced course in Spanish literature will introduce students to the most important literary movements in Hispanic American countries, beginning with the wars of independence from Spain until the last part of 19th century. Special attention will be given to authors such as Jose Marti, Jorge Issacs, Andres Bello and Ruben Dario, among others.

SPN 476
SOR JUANA INES DE LA CRUZ
Graduate
This advanced course in literature will explore the main works of the most influential Mexican poet of the Colonial period, Sor Juana Ines de la Cruz (1648-1695). One of the major themes in Sor Juana's work is the right of women to education. Sor Juana wrote poetry, plays, and essays in seventeenth-century Mexico, a society in which women's intellectual inquiry and access to knowledge was an unsafe endeavor and controlled by patriarchal hierarchies. Students will examine the relationship between politics, gender and writing in the context of the historical period, and analyze the spaces and borders occupied and visited by Sor Juana's lyric, ludic, astronomical, polemical, theatrical, theological, cosmological, culinary, colonial, and criollo writings.
This interdisciplinary course will introduce students to the history, culture, politics, and general life of the peoples of Peru. Through an exploration of a vast array of interdisciplinary readings, visual arts and films, students will gain a deep understanding of Peru's history from its extraordinary pre-Columbian civilizations to its citizens' twenty-first century post civil war struggles to achieve dignity and justice in a multicultural, multilingual and multiethnic nation where Andean, Amazonian, African, Asian and European traditions meet. As a consequence of immense economic and social inequalities, Peru has a long history of violence. This resulted in an internal war that ended ten years ago. Particular attention will be given to contemporary developments in terms of the interaction between culture and politics. (Literature category #3: Latin American literature from origins through Romanticism/Literature category #4 (Latin American literature from Modernism to present).

This advanced course in Latin American literature explores the relationship of national consolidation and romantic novels. This course is based on the reading, discussion and critique of major representative "Foundational Fictions" in 19th century Latin American literature. Students will examine how the construction of gender and race in these novels portrays the quest to forge new national identity/ies. At the same time, students will analyze how the novels use their characters' romantic relationships to suggest their nation's political relationships, and thus contribute to the discourse on building the new society/ies that would replace Spain's colonial empire and serve as a prototype for the modern Latin American state. (Literature category #3: Latin American literature from origins through Romanticism).

A heritage language learner has been described as "a student who is raised in a home where a non-English language is spoken, who speaks or merely understands the heritage language, and who is to some degree bilingual in English and the heritage language" (Valdes 2000:1). It is well-documented that for such students, literacy in the heritage language is often lost within just one or two generations. In this third course of DePaul's series on Latino Literacy, students will identify the prominent sociolinguistic issues that intersect with heritage language literacy. Through the reading of selected bibliography and guided reflections on both personal and service learning experiences, each student will arrive at a personalized assessment of the key topics affecting heritage language literacy. Possible topics include language socialization, language ideology and identities, and issues related to language contact with English such as code-switching and language shift/loss.

This course explores the overarching theme of violence across different Latin American social realities. This course uses an interdisciplinary approach to explore the experience of revolution and repression in contemporary Latin America. Focusing on twentieth-century literature, films and culture, students will explore the making and unmaking of revolutionary political projects and human rights issues, the construction of distinct forms of cultural resistance and the different expressions of violence.

Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

See schedule for current offerings.

Variable credit.
SPN 499  
INDEPENDENT STUDY  
Graduate  
Variable credit.

STEM 230  
INTRODUCTION TO EARTH AND SPACE SCIENCE  
Undergraduate  
This course provides an overview of the dynamic geological nature of Earth, its place in the solar system and universe, and the fundamental Earth-sky-human relationship. The format of the course is lecture, discussion, laboratory activities, and student group presentations. The course content is aligned with the Illinois Earth and Space Science Content Area Standards for educators and thus also meets the needs of secondary education majors wishing to pass the Illinois state exam for certification in earth and space science. LSP 120 or HON 180 is recommended. Formerly SDV 230.

STEM 231  
INTRODUCTION TO EARTH AND SPACE SCIENCE (WITHOUT LAB)  
Undergraduate  
This course provides an overview of the dynamic geological nature of Earth, its place in the solar system and universe, and the fundamental Earth-sky-human relationship. Students will develop an understanding of 1) the processes that shape Earth's surface and interior over geologic time, 2) the formation, evolution, and physical properties of the sun and its planets, asteroids, and comets, 3) the physical basis for phenomena such as eclipses, phases, and seasons, 4) the formation, evolution, and properties of stars, galaxies, and the universe, 5) the historical progression of human understanding of Earth's geologic history and its place in space and time, and 6) the associated technologies that have enabled this progression. Students will encounter several historical examples that illustrate the provisional nature of science and the interaction of experiment, observation, and theory. The format of the course is lectures, discussions, laboratory activities, and student group presentations. Formerly SDV 231.

STEM 240  
SCIENCE AT THE EDGE OF SPACE  
Undergraduate  
Earth's atmosphere and near-space environment play an increasingly important role in our lives in areas such as global warming, ozone depletion, and telecommunications. The upper atmosphere is also a starting point for human exploration of space beyond Earth. In addition to learning about Earth's upper atmosphere and beyond, students will build simple scientific experiments and launch them on a weather balloon to an altitude of 100,000 feet. Formerly SDV 240.

STEM 310  
SCIENTIFIC MODELING  
Undergraduate  
Introduction to mathematical models used in scientific work: discrete dynamical systems, continuous models, stochastic models, Markov chains, and compartment models. Course is example-driven, with models being implemented on the computer. MAT 151 recommended. Formerly SDV 310.

MAT 150 or LSP 120 and 121 are a prerequisite for this class.

STEM 360  
SCIENTIFIC DATA ANALYSIS I  
Undergraduate  
Descriptive methods of data analysis, probability models, statistical inferential procedures including regression and analysis of variance, especially as it relates to scientific data arising from observations and experiments. Includes the use of one or more computer statistical analysis packages. MAT 150 recommended. Formerly SDV 360.

STEM 361  
SCIENTIFIC DATA ANALYSIS II  
Undergraduate  
Advanced statistical and data-mining methods with science-related case studies. Topics include multiple regression, logistic regression, decision trees, and naive Bayesian classification. STEM 360 recommended. Formerly SDV 361.
STEM 390  
SENIOR CAPSTONE I  
Undergraduate  
Students will examine a scientific issue with historical or public policy significance from multiple points of view, ethical, social, as well as scientific. The topic will necessarily be one in which the interpretation and visualization of data plays a significant role in framing debate. Students will work individually or in small groups to create projects featuring the interplay of quantitative and non-quantitative approaches. STEM 361 recommended. Formerly SDV 390.

STEM 391  
SENIOR CAPSTONE II  
Undergraduate  
Students work on a quarter-length project whose end product is either a detailed mathematical analysis or a visualization of several large scientific data sets. The project will integrate a few of the science topics done in SDV 390 with data analysis and visualization. Collaborations with researchers and organizations such as educational institutions and museums are especially encouraged.

STEM 399  
INDEPENDENT STUDY  
Undergraduate  
Formerly SDV 399. (variable credit)

STEM 405  
ECOLOGY FOR TEACHERS  
Graduate  
This course provides a broad survey of ecological principles through laboratory and field investigations appropriate in an urban setting. The course focus is on the use of local environments to promote awareness of and appreciation for the complexity, diversity and structure of the natural world while developing skills in hypothesis testing, experimental design and data analysis. Formerly SDV 405.

STEM 409  
MATHEMATICAL METHODS FOR MIDDLE SCHOOL SCIENCE TEACHERS  
Graduate  
This course develops the mathematical methods that support the teaching of science at the middle school level: proportional reasoning, rates, exponents and scientific notation, graphing, and elementary modeling. The course incorporates the use of technology such as calculators and spreadsheets for scientific analysis.

STEM 410  
TOPICS FOR TEACHERS  
Graduate  
Selected topics in science and science education. Formerly SDV 410. (variable credit)

STEM 411  
FOUNDATIONS OF PHYSICAL SCIENCE I  
Graduate  
This course explores the nature of scientific inquiry, using a historical case study of the development of classical physics in the work of Copernicus, Brahe, Kepler, Galileo, and Newton. It explores the roles of observation, classification, experiments, theory, and mathematical models in science as well as the character of scientific change. Formerly SDV 411.

STEM 412  
FOUNDATIONS OF PHYSICAL SCIENCE II  
Graduate  
Fundamental concepts of physics examined quantitatively: velocity, acceleration, surface area, volume, density. Elementary modeling for data analysis, including spreadsheets and data acquisition software. Scaling of physical quantities. Formerly SDV 412.
STEM 413
LIGHT AND WAVES
Graduate
Fundamentals of wave motion with application to light, water, and sound. Teachers are introduced to a variety of physical science topics in the curriculum as well as an example of the extraordinary unifying power of physics concepts such as waves. Formerly SDV 413.

STEM 420
CHEMISTRY FOR TEACHERS
Graduate
The structure and composition of matter. Physical and chemical change, examined from conceptual viewpoints which include atomic theory, stoichiometry, periodicity, bonding, equilibrium, thermodynamics and kinetics. Formerly SDV 420.

STEM 421
CELL BIOLOGY FOR TEACHERS
Graduate
This course focuses on the chemical and cellular nature of living organisms, cell structure and function, and heredity. Enzymes, the movement of materials across membranes, photosynthesis, respiration, cell division, and basic genetics. Formerly SDV 421.

STEM 422
EVOLUTION AND DIVERSITY FOR TEACHERS
Graduate
This course explores the subjects of biological evolution and species diversity. Topics covered include the history of our understandings of the origin and nature of species, mechanisms that produce evolutionary change, geographic variation and speciation, current theories and evidence of life’s origin and the history of life on earth. Controversies in biological evolution, both scientific and cultural will be discussed. Formerly SDV 422.

STEM 423
PLANT AND ANIMAL BIOLOGY FOR TEACHERS
Graduate
This course focuses on the structure and function of living organisms. Students will investigate how different organisms solve common problems of food acquisition, digestion and the distribution of nutrients, waste removal, gas exchange, maintenance of homeostasis and reproduction. While this course examines the diversity of living forms, there is a special emphasis on the structure and function of the human body. Formerly SDV 423.

STEM 425
TOPICS IN LIFE SCIENCES FOR TEACHERS
Graduate
Diverse topics in Life Sciences appropriate for middle school and high school students.

STEM 430
ASTROBIOLOGY FOR TEACHERS
Graduate
Astrobiology focuses on basic questions such as: How does life of any kind begin and develop? Does life exist elsewhere in the universe? What are the environmental limits for life? What is the future of life on the earth and beyond? The course reviews the origin and evolution of life on Earth and goes on to examine the prospects of habitats capable of supporting life in our solar system, and the potential for planets and life to exist orbiting other stars. Students will work with NASA remote sensing data of the earth, the other planets, and their moons. Formerly SDV 430.

STEM 431
ASTRONOMY FOR TEACHERS
Graduate
This course emphasizes astronomy particularly relevant to the middle school science curriculum. The structure of the solar system, motion of the sun, phases of the moon, familiarity with the night sky, stellar structure and evolution, galaxies, and introduction to cosmology. Students will be familiarized with student reading materials particularly appropriate for the combined teaching of science and reading. Students will make observations and use sky simulation software. Formerly SDV 431.
STEM 432
GEOLOGY AND PLANETARY SCIENCE FOR TEACHERS
Graduate
Planetary formation and evolution. Plate tectonics and the rock cycle, including volcanism, planetary interiors, weathering, sedimentation, and metamorphism. Formerly SDV 432.

STEM 440
HEAT AND ENERGY FOR TEACHERS
Graduate
Concept of energy, its nature, forms, and transfer with applications to physical science and earth science. Definition of energy in terms of work, potential and kinetic energy, conservation of energy, thermal energy, solar energy, energy in earth systems. Formerly SDV 440.

STEM 441
WEATHER AND CLIMATE FOR TEACHERS
Graduate
Basic physical and chemical processes that shape weather and climate. Solar radiation and the seasons, composition and structure of the atmosphere, atmospheric processes, human effects, historical and contemporary climate change. This course emphasizes quantitative methods. Formerly SDV 441.

STEM 442
ENVIRONMENTAL SCIENCE FOR TEACHERS
Graduate
A general introduction to the scientific background of some of the most important environmental problems facing urban areas, the nation and the world. Population dynamics, water and energy resources, ecosystem degradation, extinction and the loss of biodiversity, and climate change. The course will include a field observation and experiment.

STEM 490
SCIENCE TEACHING CAPSTONE
Graduate
Teachers will further examine current research on how students at the middle school level learn science concepts and conduct an action research project involving science teaching. STEM 405, STEM 412, STEM 413 and six content courses recommended. Formerly SDV 490.

STEM 698
TOPICS FOR MATHEMATICS AND SCIENCE TEACHERS
Graduate
Diverse topics in teaching and learning of mathematics and science. These courses are designed for current and future teachers. (variable credit)

STEM 699
INDEPENDENT STUDY
Graduate
Formerly SDV 699. (variable credit)

SUD 401
SUSTAINABLE URBAN DEVELOPMENT I: PLANNING, POLICY & COMMUNITY DEVELOPMENT
Graduate
This course addresses the concepts, practices, and tools for sustainable planning and provides an understanding for how to apply these to urban communities. The course is an intensive, topics-based overview of sustainable land use, housing, transportation, infrastructure, and community and economic development practices. The course is largely directed at contemporary policy issues and technical processes within the United States.
SUD 402
SUSTAINABLE URBAN DEVELOPMENT II: GREEN INFRASTRUCTURE & THE ENVIRONMENT
Graduate
This class focuses on the environmental aspects of city planning, including: resource management, environmental policy, transportation, LEED ratings and measures of environmental impact, integration of ecosystems within a land use planning framework, and community-based solutions to historical environmental injustice.

SUD 403
BROWNFIELDS REDEVELOPMENT: PRACTICE AND IMPLEMENTATION
Graduate
Students form a grounded understanding of the Brownfield lifecycle: how and why they were created and the general processes governing their redevelopment. The class will review the current regulatory, economic, environmental, community, public health, and development conditions of brownfields, through site visits and, when possible, discussions with stakeholders from public agencies, community organizations, and the private sector. Through a practice component, class members work in teams to apply their general brownfields knowledge to particular challenges in the field and gain hands-on experience in applied environmental and economic development research and analysis, community brownfield practices, and sustainability planning.

SUD 404
URBAN DESIGN LABORATORY
Graduate
This course teaches digital methods of creating visual information. Software used may include: Adobe Creative Suite, Google SketchUp, and advanced techniques for Microsoft PowerPoint, which can be applied by students in the SUD 501 and 502 courses.

SUD 420
SUSTAINABLE URBAN FOOD SYSTEMS
Graduate
SUD 420 offers a critical analysis of the policies and practices that contribute to development of sustainable urban food systems in the North American context. The course surveys current literature on urban food systems and explores ways that cities have become centers for capital investment in (re)localization and regionalization of food production and distribution to serve higher income residents and to encourage community building, enhance education, improve food access and nutrition, and spur environmental restoration in economically distressed neighborhoods. Particular attention is paid to the concept of community food system as it is employed as an alternative narrative and practice to the concept global food system. Attention is paid to the way that historically marginalized groups seek to take control over food as a means to assert self-determination of communities. And a centerpiece of the course is engagement in field service with community groups that engage in local food systems development. Readings, lectures, films, guest speakers, site visits, and field service provide students with an overview of emerging efforts to build sustainable urban food systems within the context of climate change, gentrification, racial segregation, labor exploitation and wage suppression. Emphasis will be placed on (1) for-profit, nonprofit, and community-based food projects within urban contexts in North America; (2) whether or not these projects constitute more environmentally, socially, and economically sustainable approaches to provisioning cities; and (3) the degree to which such projects enhance access to and control over food by urban populations. Cross-listed with CSS 320.

SUD 451
SUSTAINABLE CITIES AND FOOD JUSTICE
Graduate
While the need for food is universal, geographies of urban food production, distribution and consumption are anything but even. This course critically examines the contemporary global food system with the goal of providing students with skills and knowledge to understand the intersection of food justice activism and the development of sustainable cities. Students explore literature focused on current and past food justice campaigns that focus on how activists create policies and practices in support of more just urban food systems. Through examining--and taking part in--contemporary food justice advocacy campaigns, the course specifically explores urban food justice movements in the U.S. and internationally and guides students to form a critique of how literature on alternative food systems is incorporated into theories of sustainable urban development. Cross-listed with GEO 351 and PAX 351.

SUD 490
SPECIAL TOPICS
Graduate
A course related to sustainable urban development.
**SUD 499**
**INDEPENDENT STUDY**
*Graduate*
Intensive study of a topic of special interest; requires that the student and instructor work together independently on a specific topic or project. Instructor consent required.

**SUD 501**
**PROFESSIONAL INTERNSHIP**
*Graduate*
A 100-hr internship with one of the following: a local government, non-profit organization, or private corporation. Students are encouraged to work onsite, integrating their learning into a Chicago-area organization. Students unable to identify an internship will be assisted by the Steans Center for Community-based Service Learning, the Chaddick Institute, and other DePaul resources.

**SUD 502**
**CAPSTONE - PROFESSIONAL PORTFOLIO**
*Graduate*
A discussion seminar that puts the skills learned on site into the wider academic context of the course. Students will draw from their internship to complete a project report as the culmination of this course.

**SUD 600**
**CANDIDACY CONTINUATION**
*Graduate*
Students who must take extra time to complete the requirements for the Master's portfolio must enroll in candidacy continuation each quarter of the academic year until this Master's requirement has been completed. Students may register for this course by permission of the graduate director and no more than three times. Non-credit.

**SUD 601**
**CANDIDACY MAINTENANCE**
*Graduate*
Masters candidates who are not actively working on a portfolio during a given quarter but who want to maintain active university status can register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit.

**SW 105**
**INTRODUCTION TO COMPUTER INFORMATION TECHNOLOGY**
*Undergraduate*
In this Bridge course, students will learn about personal computing by exploring Windows Vista operating systems, including an introduction to common personal computer productivity applications software using MS Office 2007. Students will learn the basic, intermediate, and advanced level of MS Word, Excel, Power Point, and Access. They will also explore home networks and wireless systems, developing basic technical skills in designing, managing, and securing home networks. May be taken for a maximum of 3 competences. (2-6 quarter hours)

**SW 106**
**MIND, BRAIN, CONSCIOUSNESS: THE MIND AND BIOTECH REVOLUTION**
*Undergraduate*
What is so special about the mind? Why is brain-death the death of the human? What is consciousness and how do we define it? Does artificial intelligence actually exist or is this a construct of the technologists? In this Bridge course, we will examine questions about the mind-body division, right brain-left brain distinctions, the differences between robots and humans, and how the brain processes information and sensory data. We will use both biotechnology research and artistic experience to explore these questions. Can be taken for up to 3 competences. (2-4 quarter hours)
SW 121
INTERNET APPLICATIONS FOR SMALL BUSINESSES
Undergraduate
This course examines the design and development of web applications for small business. The course focuses on Internet technology to support consumer-oriented e-commerce, enterprise e-business solutions, and emerging business-to-business trading models. The topics will cover e-business models, internet marketing, online transactions ethical and social issues and internet security. Students will study different models for e-commerce applications and build a web application for small business using HTML, VB Script and Active Server Page. (2-4 quarter hours)

SW 126
S5 / EXPERIENTIAL LEARNING EVALUATION: INFORMATION TECHNOLOGY
Undergraduate
S5 Information Technology. Can use contemporary information technology effectively. (0 quarter hours)

SW 141
MARINE ECOLOGY
Undergraduate
This course focuses on the biology and ecology of marine ecosystems and oceanography. The biological, chemical, physical and geographical factors of marine ecosystems are explored, including the inter-tidal zones, sandy and rocky shores, the ocean floor, seagrass, mangroves, coral reefs, open ocean, and the abyss. A survey of the biodiversity of marine organisms includes algae, plankton, invertebrates, reptiles, birds, fishes and mammals. Behavioral characteristics of unique species are discussed. The impact of humans on the marine environment, conservation, and management are highlighted. A theme of sustainability runs throughout. Discussion and activities will be emphasized. (0 quarter hours)

SW 142
EVOLUTION: THEN & NOW
Undergraduate
This course is a survey of the biological theory of evolution and the study of evolutionary processes. Major topics include a history of evolutionary studies, fossil evidence, embryology, comparative anatomy, skull structure, molecular evaluation, mathematical theory, the basic mechanisms for evolution, basic genetics, the origin and history of life, and primate evolution. Special topics include the origins and maintenance of biodiversity, an examination of the role of humans in the extinction of other species, and the effects of climate change on evolution. A theme of sustainability runs throughout. Discussion and activities will be emphasized. (2-4 quarter hours)

SW 152
STRESS REDUCTION USING HUMOR AND SPIRITUALITY
Undergraduate
Stress affects the body in dramatic ways, and is a major contributing factor in chronic and degenerative diseases. We will understand/describe the physiology and biochemistry of stress and, more importantly, apply effective methods to reduce and manage it. Effective stress reduction and burnout prevention then become important health, wellness, productivity and disease prevention strategies for individuals, schools, businesses, the medical industry and the culture. The effective stress reduction techniques include breathing, biofeedback, humor, spiritual exploration, connection and inspiration. The holistic paradigm of body, mind and spirit supports our informed search for meaning, connection, calm productivity and enhanced health. (2-4 quarter hours)

SW 153
SCIENCE FOR CITIZENS
Undergraduate
Students will learn basic knowledge of science as they engage in activities that are connected to their everyday life. They will explore their natural ecosystem and be able to describe various functions. They will engage in the scientific method through observations, hypotheses, data collection and basic data analysis. Students will apply their critical thinking based on the scientific method to local environmental or science related issues/events. (2-4 quarter hours)
SW 160
CliMATE CHANGE BASICS: CHALLENGES AND OPPORTUNITIES
Undergraduate
Climate impacts every moment of our lives. We are, in fact, dependent for survival upon climatic conditions remaining within certain rather narrow ranges of the possible variation. However, for the past ten millennia climate has been comfortable enough to permit the rise (and fall) of many civilizations. Climate’s stability? Over the last 4,500 years has permitted us to invent cities and engage in agriculture and hydraulic engineering, science, and many other activities which we recognize as civilized and like to think of as advances. But now, in an extremely short period of time? only two centuries? since the beginning of the industrial revolution and its attendant binge on fossil carbon - we have reached a stage of interaction with the climate which jeopardizes the very regularities in climate on which we depend. In this course we will build from simple observations to more complex understandings of our planetary climates, and then onto the exploration of possible futures with scenario thinking. Scenario thinking requires us to think very seriously about possible outcomes of our actions and the actions of others and how these would impact the world and all its creatures. We will engage in discussion around lectures illustrated with power point, our texts, and current developments reported in scientific journals, contemporary press, and on the web. (2-4 hours)

SW 175
CAREGIVING AND WELLNESS
Undergraduate
Who takes care of the family caregiver? All of us at one time or another inevitably face the challenge of either being a caregiver for a child, sibling, partner or parent, supporting another family member in this role, or caring for ourselves. This human experience can be overwhelming and affects the caregiver’s mental, emotional, spiritual and physical well-being. It is well-documented that this role can take an emotional toll. Although caregiving can be very rewarding, it can also be a difficult experience plagued with stress, fear, anxiety, depression and isolation. These factors add strain to all members of the family and can either threaten our health or compound an existing health condition. Students review the implications of being a caregiver, develop a plan, learn to recognize health-threatening symptoms, identify support systems and prepare to be proactive in finding solutions to remain healthy while they face any life challenge. This course also teaches students how to overcome obstacles and practice relaxation techniques. The final paper may consist of writing a personal health plan to maintain optimal health or a plan for how to remain a healthy family caregiver.

SW 193
SEXUAL ORIENTATION & SCIENCE
Undergraduate
This course will engage you in scientific inquiry on the nature of sexual orientation. You will be challenged to master the scientific content of leading programs of research on twins, brain and other anatomical structures, hormones, genetic linkages, birth-order, and animal behavior through assigned readings, lectures, and multimedia resources. Moreover, you will also engage in the scientific process through a collaborative research project concerning an aspect of sexual orientation that leads you through the steps of stating a question, designing a study, collecting and analyzing data, and interpreting the results. You will also develop skills in identifying the limits to particular forms of scientific inquiry by recognizing the constraints of methods, sources of bias, reliability of results, and certainty of conclusions. This course will encourage you to place the modern research within ethical and social contexts in which to make judgments about the potential relevance and impacts of scientific knowledge about sexual orientation.

SW 195
ELEMENTS OF ALGEBRA
Undergraduate
This course provides an introduction to the use of algebra. Students will begin by exploring arithmetic and plane geometry skills including fractions, decimals, percentages, and metrics. When ready for algebra, the class will learn to manipulate equations. The emphasis will be placed on building confidence in solving everyday problems through algebra. Although the course will move to complex and simultaneous equations, the focus will remain on algebra basics and their applications. You may register for up to 2 competencies.

SW 201
WEB PAGE DESIGN
Undergraduate
With so many people jumping on the web publishing bandwagon, you can easily feel like you've been left in the dust. Today, people are cranking out publications with worldwide distribution and impact as a result of web publication software. This course is designed for webpage content creators and aims to give you the skills needed to build basic pages on the internet.

SW 202
WEB PAGE DEVELOPMENT AND DESIGN
Undergraduate
This course describes the tools and techniques needed to design a web site for personal and professional use. We will cover the fundamentals of web site design practices, HTML, forms, image creation and editing, and Javascript through lecture, discussion, lab and homework. Students will complete a series of exercises that lead toward building a functional web site using these tools and techniques. Successful completion of Exploring the Internet is required to register.
SW 203
STATISTICS FOR USE
Undergraduate
This course is designed for students who, for their careers or further academic studies, need to cover quantitative and numerical skills. Topics will include the center and risk associated with financial data, identifying trends and making predictions for economic and scientific data, measuring the likelihood of an occurrence in a game of chance, or even estimating a political candidate’s chances based on polls. Examples will be used to introduce and reinforce theory. The student will build confidence and learn to solve practical problems by using statistics. Some facility with algebra is required.

SW 204
URBAN GROWTH AROUND THE GLOBE
Undergraduate
This course will analyze the interrelationships among population, the environment, and economics. Past, current, and potential future policies relative to these issues will be evaluated.

SW 205
PRACTICAL ALGEBRA
Undergraduate
This course covers algebraic concepts and computational skills ranging from basic variable representation to solving equations and deriving/using advanced mathematical formulas to solve financial problems. The basic skills needed for comprehension will be reviewed as each new concept is introduced. Calculators will be used throughout the course. A scientific calculator with the “log” function is the most useful.

SW 206
NUTRITION AND BIOLOGICAL DEVELOPMENT
Undergraduate
Today’s consumers want and need to be educated about taking charge of their own health. With the current fast-paced world that has spilled over into our eating habits, food choices have become unlimited. Choosing a healthful approach to diet requires basic information about our body’s nutritional needs. The greater our understanding of our basic bodily needs, the better we are able to make choices concerning our health. This course will offer an overview of the basic science of nutrition, with an emphasis on the relationship between disease and nutrition, and current research findings.

SW 207
PUBLIC HEALTH ISSUES IN AFRICA
Undergraduate
Public health issues have an impact on any ministry in which a student might serve. This course will build students’ capacities to understand the scientific information that explains public health issues such as HIV/AIDS, malaria and other infectious diseases. They will learn about health care practices and strategies that can be used to address public health issues, especially in their ministries. They will examine cultural and gender dimensions of public health issues. Through this course, therefore, students will develop and demonstrate their competence to describe, categorize, and analyze the interactions and exchanges between living organisms and their physical environments and to assess health care practices based on an understanding of the biological and social factors that contribute to definitions of health.

SW 208
ISSUES IN SCIENCE AND RELIGION
Undergraduate
This course develops students’ understandings of the scientific and religious constructions of self in the modern world (natural and social). The institutions and bodies of knowledge comprising science, religion, and their overlap are critically analyzed. Key historic debates are examined, for example: the Vatican’s trial of Galileo for his teachings of a heliocentric universe; the controversial reception of Darwin’s theory of evolution; and the 2001 U.S. policy on embryonic stem cell research. Through such analyses, the course develops students’ skills in making ethically-informed decisions and thus recognizing their roles in the public debates involving the intersection of science and religion.
SW 210
ENVIRONMENTAL ISSUES OF THE 21ST CENTURY
Undergraduate
Have you ever wanted to enhance your environmental awareness locally, nationally, and internationally? Do you ponder your impact on the earth's natural resources? Students will explore environmental quality, sustainability, natural resources, water, soil, and air quality, global warming, and human interactions with the environment. A series of discussions, activities, guest speakers, debates, oral presentations, and computer modeling exercises will offer concept comprehension as well as insight in improving environmental quality. At the end of the course students will reflect on ways to improve environmental quality individually and as a community.

SW 211
SITES, GAMES, AND TOOLS FOR TRAINING
Undergraduate
This course is geared to be a survey course covering five key applications of more advanced tools for work and leisure, it also presents techniques to address challenges that always arise in learning new technologies. (No advanced technology skills are required.) The five key applications are creating websites, video enhancing with Screencast or Camtasia, Animation, introduction to e-game designs, and delivering applications using mobile delivery. The assignments for this course will provide opportunities to learn how to use these five applications but will also require students to use critical problem solving skills for these apps so that what they learn in this course that can be transferrable across the constantly growing array of new technologies.

SW 212
URBAN ENVIRONMENTAL SCIENCE
Undergraduate
The study of environmental science uncovers the relationship between the built environment and the natural processes of the earth. This includes human interactions and the impact on habitats, plants, animals and those non-living entities that we rely on such as water, air and soil. An examination of the dynamics of human population growth and migration, food production and climate issues, chemical toxicology and health, waste and sustainability, energy production and consumption will illustrate how these issues are connected by increasing global urbanization. This course will provide the framework to guide your decisions as a consumer and a citizen in both a global and local environment. Role-playing and discussions on everything from the choices of fabrics for clothes, transportation, animal rights to the amount of water used while brushing your teeth will show the connections of your behavior to global consequences. Through reading, research, writing, class discussion, individual and group projects, students will learn the key to a sustainable future.

SW 213
MEASURING GLOBAL CLIMATE CHANGE
Undergraduate
In this course we will view global climate change from several angles and through various lenses. What happened to climate during the last 800 million years? What happened since the beginning of the industrial revolution? We'll evaluate predictions and prescriptions for the future. We'll consider politics, economics, and human beliefs and behaviors as they relate to the current global warming trend. Topics for study can range from one person's daily decisions about tooth-brushing or commuting, up to larger issues such as "Why did nearly 200 countries, but not the U.S., ratify the Kyoto Protocol?" or "What happens to Europe, and the rest of us, if the Atlantic Ocean Gulf Stream stalls out?" Doing a major paper or project for each chosen competence will allow you to focus on whatever aspects of global climate change you find most compelling. The overall goal is to become more informed, and to act more responsibly, about Earth, its living organisms and climates, and our influences on them.

SW 214
OUTCOME ORIENTED COMMUNICATION
Undergraduate
Businesses are run by people who work in a constantly changing communication and organizational environment. Modern communication involves many types of communication media such as written reports, telephone, email, websites, text messaging, online conferencing and face-to-face meetings. All of these communication media are not equal when addressing business problems and using the wrong communication media for specific types of problems can actually create problems that were not there in the first place. The "Outcome Oriented Communication" method covered in this class presents communication as a proactive tool for avoiding problems instead of as a remediation tool for correcting problems that might have been avoided with proper communication. It was developed by the instructor in conjunction with his consulting, academic and professional work. Students will be encouraged to use their "life as a laboratory" during the duration of this course as a way of testing the concepts against their own reality, finishing the course with a much better understanding of how to adapt their personal communication style to different personal and business problem solving situations.
SW 215
STRESS MANAGEMENT FOR HEALTH AND WELLNESS
Undergraduate
This course will explore the effect of stress upon the physiology of the body and offer a variety of alternative methods to alleviate these symptoms. Students will gain an understanding of the body's stress response mechanisms and how this response when not checked can lead to consequences that diminish the quality of life. Students will learn techniques for activating the body's relaxation response mechanisms. We will explore the theoretical and practical application of relaxation techniques such as controlled breathing, meditation, self-massage, biofeedback, Yoga, Tai Chi and other alternative health practices. The importance of nutrition as a means of combating stress will also be covered. Through experiencing the physiological response of the body to stress reduction techniques, students will gain the ability to assess and manage their own stress. Other skills students will be able to acquire include: recognizing stress symptoms in self and others, how to choose a stress reduction method, understanding the relationship between stress and wellness, and devising stress reduction regimes for others. Journaling, a short paper, selected readings and demonstration of advanced Yoga and Tai Chi techniques by a guest speaker will enhance the learning experience.

SW 216
THE SCIENCE AND COMMERCE OF COFFEE AND TEA
Undergraduate
The class will use a variety of readings, discussions, and activities to explore the science and economics of popular hot beverages. This class will focus on the science behind growing and brewing coffees and teas (and tisanes) and the effect of these beverages on the human body. Coffees, in particular, teas and tisane elements less so, are grown in highly specific ecosystems. The class will learn about and compare these ecosystems, earth-friendlier alternative ecosystems for these commodities and common forest ecosystems that are found in Northern Illinois. The class will also look at the historic and current state of coffee and tea commerce. The class will include field trips to locations such as: local orchards, area coffee houses, area organic food stores, teahouses, etc. Some of these trips will be during regularly scheduled class time and others may be assigned as independent student work outside of class. WARNING: Basic taste testing during the class will focus on coffee and tea without additions. While students will have many opportunities to review popular, flavored coffee and tea drinks, in-class taste tests will focus on unadulterated coffee and tea comparisons. Students must be willing to sample espressos and coffees black.

SW 217
UNDERSTANDING AND MEASURING INTELLIGENCE
Undergraduate
In this course, students examine intelligence testing and its uses in employee selection and placement. Students learn the principles of assessing human traits (reliability, validity, bias and other systematic errors), and apply them to intelligence testing. We will work to define “intelligence” and consider various approaches to intelligence, contrasting the theories of unitary vs. multiple intelligences. Students will examine the implications of the definitions and measurement approaches on different groups of people, both historically and currently, with attention to the unintended effects of the biases of test developers and the ethical implications of different approaches and uses of intelligence testing.

SW 218
W.A.T.E.R. - WHAT ABOUT THE OTHER ESSENTIAL RESOURCE?
Undergraduate
Water supports all aspects of our life. Water impacts our environment, health, security, and the economy. There is a need for society to be water wise? in today’s world. Creating sustainable methods to resolving water quantity and quality problems in stormwater, wastewater, watershed and water distribution systems is essential. If you are interested in learning more about the dynamics of water and how you can be an engaged citizen, this is the learning experience for you. We will explore and discover scientific, social, cultural, artistic, and historical viewpoints of water. Finally, this course offers an opportunity for learners to think critically, problem-solve, engage in active learning, and most of all peer collaboration. (2-4 hours)

SW 219
NEUROPLASTICITY AND THE AGING BRAIN
Undergraduate
In this course, we will examine the latest research on the aging process and, specifically, its relationship to the brain. We will cover a mix of material from psychological and, especially, neuroscientific fields. Students will also be introduced to the field of neuroplasticity, which is revolutionizing the way we understand the functioning power of the brain. Neuroplasticity, in simple terms, is the brain's ability to rearrange its connections and, therefore, its functions based on experiences. In other words, the brain has the capacity to literally change itself, based on experiences, to achieve positive results. The goals of this course are to understand how the brain works, examine its impact on our daily actions, study how aging impacts brain functioning, discover the learning and adjustment potential of the brain, and apply the principles of the 3 P's. We will use numerous examples to understand the brain, including health, work, relational, and personal settings. Students will ultimately answer the question of whether they will have an aging or reengaging brain.
SW 220
COSMIC HISTORY: FROM BIG BANG TO MANY UNIVERSES
Undergraduate
This course invites students to enter into some of the universe's most mysterious spaces, especially black holes, red shifts, and tenth dimensions. Scientific studies of the cosmos have reached a remarkable level of consensus, but mysteries continue to boggle astrophysicists' minds. Einstein's Theory of General Relativity, Hubble's "Big Bang," and subsequent theories regarding dark energy, dark matter, black holes, and other features of cosmic history are now supported by a growing body of evidence from studies of background radiation, "red shifts," and other astrophysical data. But puzzles remain that compel the boldest of thinkers to reconsider the physics of both the cosmic and the subatomic. This course invites students to engage in critical analyses of twentieth-century developments in the science of cosmic history, its creative process, and its movement toward connecting diverse aspects of the universe within a Grand Unified Theory.

SW 221
BUILDING AN ONLINE CATALOG OF CHICAGO ACTIVISM
Undergraduate
This class will chart, categorize, and record all the civic activism and social change organizations working in Chicago and post mini-profiles to a Wikipedia space that the general public will be able to search by type of issue and neighborhood. This publishing project will grow with each class's contributions and will allow viewers to post comments and add links and other resources. Students will be provided with information about the types of community change organizations working in Chicago and will then have a choice of assignments such as the following: research groups within a specific setting (e.g. recycling); research groups working in a specific community (e.g. Lawndale); research a hero/heroine of social change (e.g. Gail Cincotta); or research a specific incident in Chicago's social change history (e.g. The Haymarket Riot). Students will also work on the user interface and conduct user experience tests to see how casual viewers use the site. Viewers on the site will be able to browse the organizations by type of issue and neighborhood. This reference will be a significant resource for citizens who want to make a difference in Chicago.

SW 222
WEB SITE DESIGN
Undergraduate
Designing a web site, for personal or professional use, requires a number of skills. This course serves as an introduction to the tools and methods for creating effective web sites. Students will learn the fundamentals of HTML, forms, image creation and editing, and JavaScript through exercises which will lead to the creation of a functional web site by the end of the course. In addition to these practical skills, the course will also discuss the effective design practices for a successful web site. Successful completion of "Exploring the Internet" course, familiarity with Windows, ability to use a word processor, and some experience using the Internet are recommended.

SW 223
PRINCIPLES OF A SUSTAINABLE LIFESTYLE
Undergraduate
Our consumer choices, habits and lifestyle have a local and global impact. The items we consume, such as housing, furnishings, clothing, transportation, travel, food, recreation, entertainment, and disposables mainly come from non-renewable natural resources produced in far away lands and have a cradle-to-grave lifecycle. Awareness and education as to the safety and efficacy of consumer products is often suspect with contradicting information from the media, manufacturers, government and advocacy groups. Employing a sustainable paradigm for all of your consumer choices will allow you to have a smaller footprint, (ecological and carbon) on the planet and live a healthier, guilt free existence. We will explore the meaning of the "triple bottom line" or cradle to cradle approach to consumption. Consumer models, field trips and personal experiments will help pave the way to become a conscientious global citizen.

SW 224
ENVIRONMENTAL SOCIOLOGY
Undergraduate
This course opens the discussion of the relationships and conflicts of society's perception of the built and natural landscape. It crosses the intersection of technology and industry and their resulting social problems. The study of society includes the phenomena of equity and inequality that beset humans and the living and non-living components that we experience daily. The act of consumption and the economy of technology, over time, impact human populations, mold our social experiences, and inform the actions that determine the physical environment in which we live. Ideologies, cultural, moral and ethical values present risk and knowledge that hone the attitudes and actions within our human communities. Humans, often being pragmatic, ultimately learn to mediate conflicts (environmental, social, cultural, economic and political) in order to perpetuate the institutions and social dynamics of our civilization.
SW 225
INFORMATION TECHNOLOGY
Undergraduate
The world in which students will live and minister will be shaped more and more by information technology. In this course, students will learn how to effectively use computers and computer programs. They will develop computing skills that they can use in their academic studies, in their community lives, and in their ministries. They will learn how to use computers to communicate more effectively, to do research, to find information on the Internet, to organize and analyze data, to manage financial information, and to present information to others. Through this course, therefore, students will develop and demonstrate their competence to use contemporary information technology effectively and to understand general computing principles and solve problems using computer-based applications.

SW 226
CAREERS IN SCIENCE
Undergraduate
This is a course designed to enlighten and broaden your knowledge about the many science careers (i.e. environmental science, biology, chemistry, food science, nutrition, geology, math etc). You will determine the appropriate career path that is best suited to your interests, knowledge, skills and abilities. This course will also offer graduate school and/or professional training preparation.

SW 227
HUMAN GROWTH AND AGING
Undergraduate
As we progress through life and its stages, we realize and experience the fact that the human body is biologically changing, growing and aging. This course provides a study of the basic structure and functions of the human body, its anatomy and physiology. With this foundation, age-related characteristics and some dysfunctions associated with the aging process are studied. Students will apply learned theoretical principles by using their own bodies and through the examination of preserved materials in laboratory experiments to explore and assess anatomy and body functions as they apply to age-related changes.

SW 228
ENVIRONMENTAL SCIENCE
Undergraduate
Africa has some of the most valuable environmental resources in the world. But it is also experiencing some of the greatest environmental tragedies. Everyone is affected by the degradation of the land, the destruction of forests, the loss of biodiversity and the pollution of air, water and food. The poor and marginalized are the most vulnerable to these problems. Justice and peace are impossible without healthy, sustainable environmental policies and practices. Everyone ministering in the contemporary Church and society must understand and address these environmental challenges. This course will help students learn how to interpret contemporary scientific information about the environmental issues that impact every aspect of life in Africa. They will examine gender and cultural issues that relate to environmental problems. They will also critique potential solutions to environmental problems. Through this course, therefore, students will develop and demonstrate their competence to describe and explain connections among diverse aspects of nature and to understand the scientific and social dimensions of an environmental issue.

SW 229
ISSUES IN HEALTH POLICY AND ADMINISTRATION
Undergraduate
The goal of this course is to provide a general overview of the American health care and health insurance systems. We will first discuss the debates over the enactment and framing of the American constitution, and the political institutions that the nation then developed. We then will analyze the health care system that emerged in this political context, focusing on 1) the rise of the private health insurance system; 2) the incentives provided by government to encourage employers to purchase such insurance on behalf of their employees; and 3) the debate over the role of government in providing coverage for those outside the employer-sponsored health insurance systems. We will examine in some depth the evolution and current context of the Medicaid Program, taking a close look at the politics that led to the 2003 Medicare Modernization Act, as well as the issues raised by the implementation of that law. The following questions will be examined in this course: Is it possible to provide coverage to the uninsured without increasing the national debt? What are the main drivers of rising health care costs and what are the options for cost-containment? What are the options for aiding the uninsured? What are the options for paying for any such initiatives? What are the longstanding obstacles to comprehensive reform proposals? What are the politics of the current Affordable Care Act, reform initiative? Why is it that the American health delivery system suffers from specialty maldistribution (too many specialists and not enough generalists) and geographic maldistribution (too many providers in some communities and too few in others)? What is managed care? What does the managed care industry look like today? What is the difference between disease management, care management and the current efforts to create “medical homes?” What are provider profiles and how are they used to improve quality? Why is it that the nation does not have an effective long-term care insurance system? What are the alternatives to institutionalization for those in need of long-term care services?
Project Management is a very important business discipline that can become very complicated. There are numerous Project Management methodologies, and all of them share the same basic steps and tools. The purpose of this course is to demystify Project Management by presenting its basic framework and tools. The course translates Project Management theory into a practical and effective methodology the student will be able to apply on the job. Starting with working definitions of Project and Project Management, the course describes how projects are initiated, evaluated and organized with analytic techniques such as discounted cash flow and PERT/CPM. Project execution and control are covered next, along with the documentation and communications skills that are needed to keep a project on track. The course concludes with an overview of Project Management applied to computer software development.

This is a course designed for the student who desires to know the difference, complexity, and the diversity between soil and dirt. The benefit of learning about soil is multi-fold: understanding the Earth, understanding how and where your food grows, gardening, impact on water quality, and most of all understanding your role in improving overall environmental quality and sustainability. In addition, this class will offer introductory knowledge of soil and its dynamism. Although learning about soil can be very scientific, there are several social and artistic views of soil. If you ever wanted to know why soils are various colors and fertility, and home to various organisms, as well as the uses and mapping of soils, then this is the course to take. Understanding the complexities of soil will aid in understanding Earth and its intricacy.

Living longer provides us many opportunities and challenges. Our parents, our relatives, our friends and we ourselves are all involved in aging. This is a journey that we all take without much planning or preparation. We will explore many facets and perspectives on aging to deepen our understanding and empathy and enable us to develop our own plan. Students will examine the aging process from many perspectives, including social, psychological, economic, physical, and health. We will identify and analyze our attitudes toward aging. Through reading, lectures, guest speakers, interviews and personal planning we will: Analyze and evaluate broad societal and specific cultural attitudes toward aging; evaluate strategies for successful aging and design a personal plan; and, develop interviewing and discussion skills around complex and changing identities related to aging.

Paleontology is the study of fossils which are the remains and traces of past living things. The investigation of fossils is essential to our understanding of how life originated and evolved on earth. Fossils provide us with critical information regarding the character and age of the most significant biological events in earth's history, including: the earliest forms of life, the pivotal development of multi-celled plants and animals, the rise and demise of the dinosaurs, the adaptive diversification of mammals, and the origin of our own species. This course will examine how fossils can be used to decipher ancient patterns of development and change within earth's physical and biological systems, how biodiversity patterns for fossil groups compare to living groups, and how the anatomy of plant, invertebrate, and vertebrate fossil groups evolved in both form and function. Other topics will include: fossil preservation, determining the age of fossils, reconstructing ancient environments and ecosystems, lifestyles of fossils, dinosaurs, mass extinctions and the evolution-creation controversy.

The ancient practice of yoga offers a combination of benefits: physical endeavor, relaxation, contemplation and stress reduction. This course will explore the many dimensions of yoga. Class meetings provide time for the practice of yoga movement, focused breathing and meditation, all of which help to reduce stress. Students explore the impact of these practices on body and mind through independent research, reflection and class discussion. As a result of this course, students will learn fundamental yoga movement; identify the impact of yoga on the physical body; explore yoga philosophy; and understand how yoga is one component of well-being.
SW 236
ADVANCED INTERNET
Undergraduate
This course will extend the introductory concepts of CIS 120 and CIS 158 by exposing the students to a variety of office suites, web apps, internet, and networking concepts for business solutions. Topics include analysis and design of office suites, web projects for a business solutions, network fundamentals, including Wi-Fi, and internet security. This course is designed for students who want to move their basic computer skills up to the next level. It addresses more advanced concepts of computer literacy. Students in this course will take their Internet skills to new levels, how to optimize web researches and navigate the flood of information. Students will learn how to enhance effectiveness of, apply the techniques to safeguard against viruses and SPAM and keep computers free from unwanted visitors. Students will find helpful information on the most talked about newcomers to the online world such as social networking sites like Facebook and MySpace, blogging, and downloading media content from YouTube and iTunes, as well as an introduction to the personal email and instruction for safe surfing.

SW 237
INTRODUCTION TO COMPUTERS AND INFORMATION TECHNOLOGY
Undergraduate
This course provides an overview of microcomputer applications including Microsoft Windows 8, Microsoft Office 2013, Microsoft Word 2013, Microsoft Excel 2013, Microsoft Access 2013, and Microsoft PowerPoint 2013.

SW 238
BIOLOGY OF AGING
Undergraduate
Students will explore current and historical understanding of the human aging process, with emphasis on normal versus abnormal changes. Each student will select 1) a body system and 2) a related disorder/abnormality to focus on in anchoring their experiences. In addition, students will complete a project for each competence selected on enrollment.

SW 239
THE BOTANICAL WORLD
Undergraduate
All life is dependent on plants. They are our most precious resource. Our relationship with the plant world encompasses things we take for granted: food, clothes, furniture, musical instruments, medicines, homes and the aesthetic qualities of plants that permeate and refresh the human condition. Recent scientific successes in genetics and biotechnology have made us more aware of what has been done to plants. In this highly interactive course, we will explore these new controversial revelations and the connections between plants and our individual lives. While this is not a laboratory course, we will look at and take apart real plants in and outside the classroom, and even grow some lower plants (molds) at home. There will be one field trip to the Lincoln Park Conservatory and a walk around the Loop (weather permitting).

SW 240
THE SCIENCE OF TRADITIONAL CHINESE MEDICINE
Undergraduate
This is a 10-week, four competence course that explores the science of Oriental Medicine and its system of interconnection to nature and the human body. Students will study Chinese Medicine (CM) theory, investigating this healthcare model that is based on imbalances or blockages in the body leading to illness. They will study CM Five Element theory which connects personal constitution to nature and the elements. Students will explore the system of "meridians" or nerves whose interconnectedness generate health in CM. Through processes of self-exploration, written essays and reflection, students will review the sciences of CM theory, pathology, diagnosis and basic applications of the medicine (Acupressure/herbology).

SW 241
GOLD, OIL, GEMS AND SOIL: THE SCIENCE OF MINERAL AND ENERGY RESOURCES
Undergraduate
From the oil, coal, and nuclear materials that supply us energy to the metallic minerals and soils that provide building materials, electronics, jewelry and food, modern civilization is dependent on an assortment of non-renewable resources. This course will introduce you to the geologic processes that generate society's principal mineral and energy resources including oil, natural gas, coal, nuclear materials, gold, industrial metals, gems, and soils. We will investigate how geological circumstances result in the geographic distribution and scarcity of mineral and energy resources, the historic interdependence and competition of societies for these resources, and the geopolitical and economic consequences of resource depletion due to population growth and global industrialization. Topics investigated will include: oil formation and peak oil; coal/natural gas formation and cap and trade policies; nuclear fuels and enviro-statism; gold formation, gold as money, and gold as a cultural artifact; gem formation, crystallography and gem use in jewelry; metallic mineral formation, industrial use, and scarcity trends; soil formation, farming and soil depletion; and the global outlook on mineral and energy resources.
SW 242  
FOOD: CULTURE, CUISINE AND SCIENCE  
Undergraduate  
This course sets students loose in the environment of their own kitchens with a number of structured exercises that demonstrate scientific principals first hand. It includes classroom discussion and examination of these principles. Furthermore, students will discuss how cuisine and cooking styles are unique to and important to world cultures and the people who experience them. In addition to attendance and discussion, learners will keep food journals and write short final papers or give presentations.

SW 243  
DESIGNING ONLINE TRAINING  
Undergraduate  
This course looks at instructional design in much more depth than the Technology, Training and Human Performance Course. In this course, the student will study what Instructional Design is, how it works, and why it is important in the creation of all types of career and educational training. The course will present various models of instructional design, then have the students design actual instructional training modules.

SW 244  
STATISTICAL REASONING: UNDERSTANDING AND USING STATISTICS  
Undergraduate  
This course will teach students the basic concepts of statistics. Students will investigate topics including descriptive statistics, correlation, normal distributions, probability, sampling distributions and hypothesis testing. By the end of this course, students will be able to complete a statistical analysis of datasets using Microsoft Excel as the primary tool. Considerable time will also be devoted to discussing how statistics are used and abused.

SW 245  
GLOBAL PERSPECTIVES: AFRICA AND TECHNOLOGY  
Undergraduate  
This course is designed to provide learning opportunities that derive their unique attributes from a focus on the African continent. We will review definitions of technology and globalization as they apply to emerging African nations. We will study how the general application and use of various technologies have affected the developing countries of Africa from a social, cultural, economic and practical perspective. Technologies to be reviewed include electrification, radio and television, telecommunications, computers, and the Internet. Students will participate in a live video conference with a group of United Nations delegates assigned to committees that oversee technology matters around the world for the purpose of discussing the dispersion of technology. Students must have regular access to the Internet because of research requirements.

SW 246  
PHARMACOLOGY AND HEALTH  
Undergraduate  
This course will be an overview of the main human biological systems in health while highlighting and emphasizing the chief pharmacological agents used to treat common human diseases and pathologies of those systems. Discussion will include pharmacokinetics, drug action mechanisms, side effects, costs, and the role that prevention might play in attempting to minimize drug utilization. The course will include a historical overview of the use of medicine throughout the ages and consider current drug development. Through the use of a textbook, current literature review, discussion and audio visual adjuncts, the course will help to build a foundation for basic understanding of the relationship between healthy human biological systems, pathology development, and how pharmaceutical agents relate to health and disease.

SW 247  
CREATING ACADEMIC AND BUSINESS DOCUMENTS  
Undergraduate  
This hands on course is conducted in a computer classroom so students can learn software skills by creating academic and business documents using MS Office 2013?PowerPoint and Word. This is not a writing class - students will not write any papers. Focus is on mastering PowerPoint and Word software skills. Plain text will be provided for classroom work and for weekly homework assignments. Students will format text and analyze the impact of colors in PowerPoint and develop Word formatting skills for academic papers and business documents including flyers and brochures. Students will analyze real-world situations, identify appropriate software solutions and apply the best software to accomplish tasks and goals. Students will present their own PowerPoint creation in the last class. (2 hours)
SW 248
THE SCIENCE BEHIND ENVIRONMENTAL SCIENCE
Undergraduate
This course is designed to equip students with the necessary learning experiences to enable them to make informed decisions that affect environmental well-being and environmental sustainability. Learning experiences will include, but are not limited to, classroom instruction, group discussions, and individual research.

SW 249
ANIMAL SCIENCE AND THE ROLE OF MODERN ZOOS
Undergraduate
The main objective of this course is for students to increase their love and understanding of animals!!! It will be a fun and interactive course where you will gain a general understanding of the animal kingdom and how animals are classified. You then will be able to identify animals as an individual organism, describe their natural habitat and better understand their role or ecological niche as it relates to its environment. Students will discover the importance of zoos and how they have become leaders in providing the knowledge needed to preserve the natural world. You'll learn what zoos do with that information and how they make a difference with regards to environmental issues such as habitat destruction and the importance of species preservation. Students will investigate different zoological institutions and compare how each are unique in their animal collections, the way they support and conduct research, and convey that knowledge to the scientific community and the general public.

SW 250
WIDGETS, CLICKS, & TWEETS: ESSENTIALS OF APPLIED WEB TECHNOLOGY
Undergraduate
This course will provide students with an overview of the history of the Internet and basic marketing strategies as they relate to the Internet and Web 2.0 technologies. Students will learn about how to keep abreast of new technology, how these technologies can be used to market services and products as well as how they can be used to create and maintain social networks for professional use.

SW 251
UNDERSTANDING GLOBAL HEALTH CONCEPTS AND PRACTICES
Undergraduate
Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences and humanities, learners will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. We will explore the factors shaping the global distribution of disease and their connection with issues of social, economic and political development, as reflected in the Millennium Development Goals. We will also consider the impacts of globalization on health risks and availability of health resources. By engaging in critical assessment and proposing innovative solution ideas, we will develop all four competences offered for this course.

SW 252
ENVIRONMENT AND HEALTH
Undergraduate
Using scientific reasoning, the student will determine how and to what extent the quality of health and life can be altered in varied geographic and personal environments. As a foundation, emphasis will be placed on the scientific method, cellular structure and reproduction, and an overview of environmental issues impacting health today. Relationships of the nutrition-digestive and respiratory systems of the human body as environmental portals will be studied. Problem-solving skills will be employed in the manipulation of data. Investigation of norms and their deviations in selected physiological systems will also be studied.

SW 253
USING STATISTICS
Undergraduate
This course is designed to introduce the basic concepts of descriptive statistics, employ their use in everyday life, and make sense of the data. Students will create statistical analyses of data and learn to make decisions from reports that they produce in Excel. Understanding statistical concepts is emphasized instead of memorization of formulas. Students will learn from group projects how to analyze data using Excel spreadsheets. The course involves participation in discussion, presentation of cases and demonstration of analyses.
SW 254
ENVIRONMENTAL SUSTAINABILITY AND ADVOCACY
Undergraduate
BRIDGE PROGRAM COURSE. This course focuses on the interdisciplinary study of humans, the environment, and their interrelationships. It includes natural resources and processes, growth and change, values, and individual responsibility and civic engagement. It will explore the complex relationship of the individual to urban systems and of urban systems to the world environment. Emphasis will be given to the ecology of metropolitan Chicago, engaging and challenging students to propose and advocate for programs and policies that bring about a more sustainable city --- "What could a sustainable metropolitan Chicago look like? What are you willing to do to achieve that ideal?" Writing assignments and field work, as appropriate to the discipline, are part of the course.

SW 255
BRAIN, MIND AND BEHAVIOR
Undergraduate
Scientists have only recently found means to isolate chemicals of the brain, analyze its electrical systems and try to answer questions such as: How does the brain strike a balance between its genetic blueprint and influences from the environment? Where does it "hold" language? This course explains what science knows and does not know about the human brain. It draws on the most current findings, theories, and applications of brain science. Students will meet for guided discussions and will be given textual material for class activities and independent assignments.

SW 256
EVERYDAY ECOLOGY
Undergraduate
Every week, we learn of typhoons and landslides, floods and hurricanes, droughts and other natural catastrophes. Scientists now agree that the major cause of climate shift is man-made, specifically our use and abuse of global energy resources. In Everyday Ecology we will analyze our energy use patterns and explore practical alternatives. The word "ecology" originates from the meshing of two Greek words meaning the "study of homes." Although the main focus of this course is the individual household, another "household" we must take into account is the economy. Ecological economics examines how both disciplines need to look toward the other to be viable long term. We will examine options to bring the earth household (ecology) and the human household (economy) together for the benefit of both. This course observes how "man" is connected to the world around him. It allows us to see our options in response to growing concern over global climate change. Through readings, field trips, activities, discussions and an analysis of our personal use of energy, this course enables us to become increasingly aware of ecological issues. You will learn to evaluate the effect of personal choices on the earth and be introduced to alternative, "greener" options.

SW 258
THE CITY IN THE YEAR 2030
Undergraduate
What will cities be like 25 years from now? The history of cities throughout the world offers clues to this question. This course will explore the theories of leading experts in the field of urban research and prognostication. Students will examine these views in the context of the political system, population trends, and urban economic activity. Recommended strategies to improve the strength of historically great cities will be analyzed and compared. Practical application of concepts utilized in other areas will be evaluated in terms of their potential use in the City of Chicago.

SW 259
PREHISTORIC LIFE
Undergraduate
This course promotes students' investigation of fossils to interpret the character of 3.5 billion years of biological evolution and ecological change on earth. By way of scientific reasoning, mathematical inference, and applicable technologies, emphasis is on the exploration of earliest evidence of life, development of multi-celled plants and animals, dinosaur evolution, mass extinction events, mammal diversification, human origins as well as appraisal of the societal reliance on fossil resources and the persistent debate over evolution versus creation. Learning is assessed through labs, a fieldtrip, an exam, video summaries, contributions to online discussions, and a research paper in a scientific format.

SW 260
CLIMATE CHANGE & GLOBAL RISK MANAGEMENT
Undergraduate
This course design positions students to analyze the distributive effects of climate change on natural and social systems. These consequences must be identified and their interactive effects measured. Social structures are vulnerable to major shifts in natural systems, and the security concerns linked to climate change require awareness and preparedness. Models of risk management and public security are analyzed in the light of the cascading effects of this global phenomenon. (2-4 hours)
SW 261
EXPLORATIONS IN BIOLOGY
Undergraduate
This course provides an introductory study of organic macromolecules, the cell, genetic activity and the theory of evolution. Throughout the course we will stress the interdependence of the three biological sub-specialties of genetics, ecology and evolution.

SW 262
THE HAPPINESS PROJECT
Undergraduate
What is happiness? How do we know that we are happy? How can we become happier in our lives? In recent years, there have been an increasing number of college courses dedicated to the study of happiness, positive psychology, life satisfaction, etc. This course will be an introduction to how various fields and disciplines are examining topics relevant to the nature of happiness and well-being, while providing an opportunity for students to examine their own ideas and expectations for happiness. Using Gretchen Rubin's popular book, The Happiness Project, as a guide, we will review the latest theories and research in psychology, the sciences, religion, and the arts, as well as ancient wisdom and popular culture, to determine what is known and assumed about happiness. Participants in the course will develop and assess their own happiness project during the last several weeks of the course.

SW 263
THE CITY IN NATURE: WRITING THE URBAN LANDSCAPE
Undergraduate
In the 200-year-old tradition of American Nature Writing, its practitioners--from John Muir to Thoreau to Edward Abbey--have been indifferent if not openly hostile to cities. The nature essay has tended to focus on the writer's experience of landscapes where people are not normally resident: deserts, mountains, the deep forests. This focus suggests that nature is out there, and that to feel a part of it, we must leave where we live and go visit it. In this nonfiction writing course, students use the conventional essay to offer an alternative possibility: that we inhabit nature wherever we live, including cities, and that the intersection of nature and culture in urban environments is an important subject for analysis and exposition. To prepare themselves to write their own nature essays, students will read along the extraordinary canon of American nature writing; become familiar with the natural history of their own local environments; keep an urban nature journal; and familiarize themselves with current readings in environmental philosophy and ecopsychology.

SW 264
GLOBAL RISK MANAGEMENT AND URBAN SCIENCE CONNECTIONS
Undergraduate
New developments in environmental and climate science are raising local and global implications for security and risk management. In this course, we use blended learning strategies (in-person and online) to examine competencies in this area, applying policing experience to learning outcomes. (2-4 hours)

SW 266
AN APPROACH TO SYSTEM THINKING
Undergraduate
This course provides an introduction to the form of systems thinking called system dynamics. This course introduces the theory and application of the system dynamics modeling approach as it is used to support strategic decision making in complex social systems. It involves the qualitative and quantitative mapping of the relevant system structure (including physical processes, information links and human decision-making) and the simulation of the dynamic consequences of that structure. The aim is both to examine the general modes of behavior that result so as to gain qualitative insights and also to experiment with alternative policies in order to formulate ones which improve behavior. It has three distinctive themes: the concept of information feedback, the use of computer simulation models to explore complex behavior and the need to work with the mental models of relevant system actors (with a view both to drawing on the relevant knowledge and interpretations of the system and to implementing the insights gained from the modeling process). The course deals with all stages of the modeling approach as well as introducing some research topics in the field. Students will use ‘state of the art’ simulation software with a graphical interface (such as STELLA/iThink) and will be expected to work with quantitative computer models. The practical application of system dynamics will be emphasized throughout, using various cases studied from business public-policy making and elsewhere.

SW 267
NUTRITION FOR A LIFETIME
Undergraduate
Today's consumers want and need to be educated about taking charge of their own health. With the current fast-paced world that has spilled over into our eating habits, food choices have become unlimited. Choosing a healthful approach to diet requires basic information about our bodies' nutritional needs. The greater our understanding of our basic bodily needs, the better we are able to make choices concerning our health. This course will offer an overview of the basic science of nutrition, with an emphasis on the relationship between disease and nutrition, and current research findings.
SW 268
WOMEN, NATURE, AND ECOLOGY
Undergraduate
Women and nature have been linked since earliest times. As our ideas about both have changed, so have our ideas of their relationship. Changing conceptions of the body, as part of nature, have impacted our understanding of the mind's functioning, approaches to physical and psychological health, and religious thought. Students will study three models of nature to formulate how each looks at the human relationship to nature, defines sex roles, impacts health, and religious standards. We will use readings and discussion.

SW 269
ENERGY AND HEALTH
Undergraduate
This course will provide a framework for understanding human energy systems, such as digestion and respiration, in relation to current healthcare practices to enhance their effectiveness (dietary approach, manipulation therapies, acupuncture, exercise, and meditation). We will consider connections between social and environmental variables such as constitution, stress, lifestyle, and vital physiological functions. Each class will build on the basic understanding of biological systems in relation to energy through lecture and discussion. We will review literature on various healthcare practices to discern sound approaches and practical applications. Students will cultivate an appreciation for daily health choices that cumulatively affect their health.

SW 270
MAKING STATISTICS WORK
Undergraduate
This highly interactive course will help students understand and use statistics to their advantage at work, and in their lives as informed citizens, consumers, and/or parents. Using examples from daily life and work, students will learn to frame and solve common problems. Despite its scary (or boring) reputation, statistics is at heart a set of very powerful tools for thinking and communicating. With the tools learned in this course, students will be better able to cut through reports at work, weigh the claims of political candidates, drill holes in misleading information, and hammer out the real significance of the news. This is a course for all those who have ever wondered: how likely they are to be hit by lightning, whether they are “normal,” what percentage of the population really elects the President, or what the odds are of winning the Lottery.

SW 271
CHEMICALS IN THE ENVIRONMENT
Undergraduate
Confusion and controversy permeate the discussion of the role man-made chemicals play in the environment. This course will provide an understanding of some basic principles of chemistry, so students can evaluate current environmental issues in their communities, and in the press. A major emphasis will be on the total picture: benefits, costs, risks, and hazards associated with common man-made chemicals. We will follow the chemicals from their manufacture through their use and ultimate disposal. Demonstrations, discussions, readings, and reports will stimulate the student to critically evaluate the impact a group of chemicals has on the quality of our lives, and on the ecosystem.

SW 274
IMPACTS OF VARIED ENVIRONMENTS ON HEALTH
Undergraduate
Using scientific reasoning, the student will determine how and to what extent the quality of health and life can be altered in varied geographic and personal environments. The physiological relationships of the nutrition-digestive and respiratory systems of the human body will be studied in depth as systems susceptible to negative environmental influences. Use of mathematics and problem-solving skills will be employed in the manipulation of data in the investigation of norms and the deviations from these norms in selected physiological systems. Students will be actively involved in the learning process. Class activities will include lecture, laboratory group projects (including examination of preserved materials), videos, readings and manipulations of data.
Why are 20 million Americans practicing yoga? This course answers that question with an introduction to yoga and meditation techniques and the underlying scientific and philosophical principles of the system of yoga. The first half of each class will be experiential, conducted as a yoga and meditation class for beginners, providing tools to reduce stress, focus the mind, and cultivate inner peace. This first hour and a half will use yoga postures, breathing exercises, and meditation techniques. The second half of each class will use readings, reflection, and discussion to examine the scientific and philosophical knowledge of yoga as a way to ease stress, strengthen the bone and muscle structures, lower blood pressure, increase flexibility and strength, improve mind functioning, and provide spiritual sustenance. We will read Yoga Mind Body and Spirit: A Return to Wholeness by Donna Farhi, and The Yoga Sutras of Patanjali, research articles on the scientific studies of yoga's benefits from journals and websites, etc. Students will keep weekly reflection journal observations on the changes(s) they notice in themselves. This course will refresh, relax, rejuvenate. Yoga mats and other props will be provided. Bring/wear comfortable clothes (no jeans, belts, dresses). This is a Gentle Yoga class for beginners. Yoga means to unite or yoke so course will explore the ways to unite body, mind, spirit. This course is designed to 1) help establish good health and well-being; 2) gain scientific knowledge and understanding of the various systems of the human body; and 3) explore the spiritual benefits of meditation.

As many as 93% of diseases are now believed to be related to stress. This astounding figure underscores the importance of understanding the various aspects of stress, particularly the biological dimensions. The links among perceptions, personality type, brain chemistry, and the endocrine and cardiovascular functions are becoming increasingly well established. More recently, links between our immune system and the activities of the brain are helping us to recognize the truly integrated functions of our bodies in ways which will have very important impacts on our conceptions of health and disease. Students will develop an understanding of stress and stressors, the relationship of stress and the General Adaptation Syndrome as a focal point for applying this information. Exploration of individual differences in stress responses and stress-management techniques will provide a platform for synthesizing information on a personal basis and for analyzing environment/biological interactions.

The search for balance between economic goals and environmental concerns is an ongoing struggle faced by communities, states, and countries throughout the world. The successes and failures of population and environmental planning will be reviewed in both an historical and a theoretical context. Students will explore issues involved in establishing vital and healthy places to work and live. Through lecture-discussions, readings, films, and independent research, the relationships among population, public services, corporate growth and development, and environmental regulations will be examined. Students will select an area for study and formulate their own demographic and planning strategies.

From the mid-century push for statehood and the 1960's fight for Native land rights, through the pipeline boom of the 1970's and the economic bust of the 1980's, Alaska's recent history has been tumultuous and presents an ideal context for exploring the challenges of resource development. Many of the controversies which have recently divided Alaska result from the complex relationship between rights of indigenous people and development of the state's rich natural resources. (2-6 quarter hours)

This introductory course will provide a framework for understanding the fundamentals of nutrition, vitamins and minerals, nutrition and disease prevention, food labeling, nutrition through the life cycle, weight management and more. Each class will build upon the basics by exploring current issues and research related to specific topics. Throughout the course, students will begin to separate information from misinformation as well as gain practical knowledge to incorporate into day to day life.
SW 283  
SOCIETIES IN TRANSITION: ERITREA AND ETHIOPIA  
Undergraduate  
Throughout the world, societies are changing as former political and economic structures are supplanted by emerging democratic systems. SNL has developed travel-study courses under the general title "Societies in Transition" as a way of introducing adult learners to these dramatic changes and as a means of allowing them to experience rich and diverse histories, new cultures, and extraordinary physical environments. Emergent Eritrea: Independence Along the Red Sea is the first in this series to focus on the Horn of Africa, a region of significant geopolitical importance. This course provides students first hand exposure to Eritrea, one of Africa's newest nations, during its critical phase of postwar reconstruction and modernization. Our exploration of the geographic features, ecology and natural resources of Eritrea will elucidate the environmental challenges facing the inhabitants of this sub-Saharan region. Students will have the opportunity to meet with individuals from many sectors of this society, including artisans, teachers, Eritrean students, government officials, freedom fighters, priests, members of the women's federation, and business owners. (2-6 quarter hours)

SW 285  
PRECALCULUS  
Undergraduate  
The purpose of this course is to continue to develop the student's logical, pattern recognition, organizational, and algebraic skills. The goals are to prepare the student to deal with the increasing mathematical nature of life's problems and to prepare the student for possible future calculus courses. The course will rely heavily on the interactive approach. Examples will be studied to introduce theory and applications. Discussion and questions will be encouraged. Homework will be recommended and discussed, and the student will do problems in class.

SW 286  
SEXUAL HEALTH  
Undergraduate  
We will study the male/female anatomy and physiology, and its dysfunction, including impotency and infertility. We will discuss how these dysfunctions affect normal sexual function, and how sexually transmitted diseases are identified and avoided. Emphasis will be on healthy and safe sexual physiological function. We will explore sexual development throughout the life cycle from adolescence, middle age to maturity and how these biological changes impact our sexual health. The learning experience will include lectures, discussions, and expert speakers from the field.

SW 287  
ROCKET TO THE STARS 2000: SPACE FLIGHT IN FILM SOCIETY  
Undergraduate  
This course explores the impact of space flight in the 20th century. We have witnessed development of space flight, and have extended our reach beyond the surface of our planet. Outer space has provided a host of new discoveries that have revolutionized our understanding of ourselves, the universe, and our significance within it. It has also created serious social, economic, and political repercussions for our society. Culturally, Space has also been a kind of blank screen upon which we project our aspirations, our fears, and our speculations. We will examine how popular film has also fashioned our hopes, our fears, and reflected our thoughts about space flight.

SW 288  
DESIGNER LIVING: RELATING WORK AND LIVING TO HEALTH  
Undergraduate  
Creating a balanced lifestyle is coming to be seen as the core of preventive medicine and holistic approaches to health. In this course, students will create a self-care program comprising diaphragmatic breathing, the relaxation response, pacing, exercise, and a balanced diet. In class, focus will be placed on such issues as reappraising our concept of work and leisure, the impact of belief-systems on human biology, and the influence of our concept of time and of light on the human body.

SW 289  
MAKING MULTIMEDIA BUSINESS PRESENTATIONS  
Undergraduate  
This course will instruct the student in the use of popular multimedia software for the development of professional-quality business presentations. Training will be provided in the areas of video and audio editing, graphics enhancement, slideshow creation, and moviemaking. Students will demonstrate their work through in-class presentations and via the internet. The primary focus of each student's multimedia presentation will be the impact of technology on the current state of the U.S. economy. Each student will select and research a specific issue related to technology and finance, prepare a professional-quality video, and present the results of his/her work in class.
SW 290
CONCEPTS IN MATHEMATICS
Undergraduate
This course will focus on interpreting numerical data and problem-solving using basic mathematical tools. Selected topics from branches of mathematics will be reviewed, including: probability, statistics, charts, graphs, linear equations, and solving word problems through basic algebra. Methods will include lectures, hands-on applications, small group problem-solving, quizzes, and research.

SW 291
HISTORY OF LIFE ON EARTH
Undergraduate
The study of fossils, the remains and traces of past living things, is essential for understanding and reconstructing the history of life on earth. Fossils provide us with critical information regarding the character and age of the most significant biological events in earth's history including the earliest forms of life, the pivotal development of multi-celled plants and animals, the rise, success, and demise of the dinosaurs, the diversification of the mammals, and the origins of our own species. In this course, you will explore how fossils and scientific reasoning are integrated to discern the complex history of life on earth. You will also evaluate the impact the discovery and recognition of earth's fossil record has had on society over the last several hundred years such as the position of humans among other species and the corresponding creation-evolution debate.

SW 292
EXPLORING EARTH'S PHYSICAL FEATURES
Undergraduate
This course advances student exploration of earth's 4.5 billion year geologic record in order to evaluate the planet's evolution and the interrelationships between humans and landforms. Through the application of scientific reasoning, mathematical inference, and prevailing technologies used by geologists, emphasis is on plate tectonics, geologic time, the rock cycle, weathering, earthquakes, fluvial features, rock structures, volcanoes, mountains, plateaus, plains, glacial features, deserts, caves, and coasts. Students also assess human reliance on landforms, the economics of landforms, and cases of earth pseudoscience. Learning is assessed through labs, fieldtrips, a scientifically-formatted research paper, an exam, and contributions to online discussions.

SW 293
AGING REASON
Undergraduate
Reasoning, like human life, comes in layers that need to be unravelled if we are to make sense of it. As Bernard Shaw put it, "Reason makes a good servant but a bad master" That may come as a surprising thought to those of us brought up to think that everything desirable and true is scientific and science is based on reason. This course will examine the maturing of the reasoning processes employed in science, the mechanisms or methodologies used to validate data, namely the development of scientific reasoning in the Western hemisphere from naive realism through logical positivism to Popperian falsification. This will help us to clarify the status of the data that we use or write about. It will also examine the maturing of the biological processes of the human being, the mechanisms of aging, including modern research experience demonstrating the way in which underlying assumptions can influence both reasoning about and experience of biological aging processes. Class presentation and discussion backed up by library-based reading. In class, we will focus on the key concepts of paradigms in science and religion, in youth and aging and the way in which basic assumptions influence perception, behavior, and experience.

SW 294
GLOBAL ENVIRONMENTAL CHANGE
Undergraduate
Many ongoing changes in the natural environment are so extensive in scale that scientists consider them a threat to sustaining a reasonable quality of life for humans worldwide. Examples of issues of particular and urgent concern are: the rapid changes in the chemistry of the atmosphere that can alter the earth's prevailing climate patterns; the amount of pollutants in the oceans that can breach essential parts of the food chain; the consumption or contamination of natural resources, such as minerals for industrial use, petroleum, groundwater, and agriculturally important soils and; the spatial reduction of terrestrial biomes with corresponding extinctions of organisms. In this course, we will review and analyze the recent earth science research on these and other global change issues in order to assess their relative importance for the human community. We will also examine and evaluate how human activities can have direct and causal relationships to specific adverse global environmental changes. Additional topics that will be addressed include emerging theories of sustainable development, ecological ("Green") economics, and environmental laws. Through readings, discussions, lectures, and original inquiry, students will be introduced to the principal global environmental change issues. Students will select one issue for more detailed analysis and utilize the course learning experience to formulate a plan for personal, governmental, and/or global action to address an environmental problem.
SW 295
SUCCESSFUL INTERVIEWING
Undergraduate
Interviewing "the process of asking and answering questions" is a part of everyday experience. This course introduces and explores the fundamental principles, theories and techniques of interviewing including the interpersonal communication process, common types of interviews, interview structure, questions and responses. Through collaborative and experiential learning activities, students will prepare for and participate in all aspects of the interview process as the interviewer and interviewee.

SW 296
A BIOLOGICAL APPROACH TO VIOLENCE
Undergraduate
There is a significant difference of opinion concerning aggressive or violent human behavior. Is it a social response to an environment of poverty and other psychological phenomena? Or can it be explained in terms of a biochemical syndrome consistent with scientific data and therefore remediable with psychoactive drugs? In this course, students will be introduced to normal brain anatomy and biochemistry and the technologies that have helped us understand cerebral function. We will examine literature in the biological, medical, and psychological sciences in an effort to develop and demonstrate critical reading and analytic skills of both scientific and pseudoscientific material. We will explore the relative contributions of environment and biology to understanding aggressive and violent behavior as well as potential modifiers of the same.

SW 297
WRITING THE EARTH
Undergraduate
In this course, students will learn creative writing while exploring geologic history. Geology is the window into the history of the earth and all the organisms that have lived and died here. Every rock in quarries, road cuts, or pebbles on a beach carries part of the earth's story. Students will learn to read rocks and open the book of the earth's history. There, one can find the drama of evolution and mass extinction, the violent uplift of mountains and their slow erosion into plains, the crashing of seas flooding the continents and the drying of sediments abandoned as the seas recede, the first steps of an ape that would be human and the changes that made all of us from that beginning. Earth history is filled with drama, with actual adventure, and light romance, and grim catastrophe. Factual writing alone cannot communicate the emotions we feel as we experience earth's own poetry. For that, we need the depth and energy of creative expression. In this course, students will learn the basics of reading rocks and explore earth history for themselves. They will also learn to communicate their experience to others through creative writing in fiction, essays, or poetry. Regular class meetings will be held with full day field trips. Class time will be divided between the explorations of geologic concepts and creative writing. Geologic concepts will be introduced through readings, discussion, and hands-on experience with real rocks. Creative writing will be introduced through readings, discussions, and writing exercises. Most of the writing exercises for each class will be based on student's hands-on experience in that class.

SW 298
EXPLORING THE INTERNET
Undergraduate
In this introductory-level course, you will develop a broad knowledge of the Internet technology and understand how it can be useful to personal and work life. The class will be "hands on" and you will learn how to access Internet applications and use them. We will discuss the history of the Internet, getting connected to the Internet, and the various functions used on the Internet. We will also create websites, focusing on their design.

SW 299
MATTERS OF SCIENCE
Undergraduate
One set of laws describes all motion. All matter is made of atoms (actually quarks and leptons!). Stars live and die like everything else. All life is based on the same genetic code. These basic ideas of science and their application to technology are the focus of this course and they offer you what will probably be a new way of thinking about science. If you can get excited about recognizing and discovering what lies behind many everyday encounters with the world around you -- and some not so everyday as well -- just for the enjoyment of learning about them and how they work, this course may be the way to put capstones on your Physical World competencies. This will be a course unlike any other you have experienced -- you will be learning on an independent study basis but also interacting and exchanging ideas with others in a virtual classroom located on the Internet. Through your research in response to questions and pursuit of independent projects, guidance by a primary text, other readings and the instructor, the fruits of your classmates' efforts, and the unexpected that can come from (written) conversation, this course will touch on the roots of most scientific disciplines (eg. physics, chemistry, astronomy, biology, ecology). It will do so in ways that should help you to see their connections to each other and to various technologies. You will also examine your own problem-solving strategies and various aspects of scientific inquiry. An overall outcome of achieving the competencies of this course will be the development of a scientific literacy to build on in the future. You are invited to visit the course home page: www.depaul.edu/~mfiddler/ms/home.
SW 300
SUSTAINABILITY AND PROFESSIONAL PRACTICE
Undergraduate
Environmental sustainability problems are multidimensional and interconnected to both the earth and human relationships. In this course, students will analyze their workplace, organization or a desired professional setting using the principles of environmental sustainability and recognized best practices. On the basis of this analysis, they will make recommendations. Students will learn to use decision tools and data to conduct this analysis and make strategic environmentally sustainable decisions within their professions. Learners will explore how to make complex and current science content relevant, accessible, and personal. They will be able to explain the science behind sustainability and environmental management, as well as how sustainability connects with the human dimensions of organizational relationships. Additionally, this course will provide a hands-on approach to allow learners to acquire the analytic, communication, and work skills required to be problem-solving professionals and contributors to human sustainability within organizations.

SW 315
ENVIRONMENTAL ETHICS AND SUSTAINABILITY
Undergraduate
This experiential class focuses on readings from Leopold's A Sand County Almanac, including his important essay, "Thinking Like a Mountain" as well as readings from John Muir, who grew up in nearby Portage, Wisconsin. Students will visit the Leopold Center, the world's greenest building, as well as the famous' shack where Leopold lived and wrote. They will also tour the Crane Foundation, which works with endangered waterbirds around the world. A visit to one of America's largest farmers' markets, followed by a sustainable lunch at a Wisconsin restaurant, will provide ideas on how Leopold's philosophy can be brought into daily life. During the class, students will reside at Holy Wisdom, a retreat center with a restored prairie in Madison. The area to be visited is unique in the Midwest. Most of the prairieland in the region was formed when vast glaciers crushed the land flat during various Ice Ages in the past. But a small area of southwestern Wisconsin, northwestern Illinois, and eastern Minnesota were never glaciated. There, the hill-and-stream erosion of more than 400,000 years has led to a quite different environment than the surrounding area. Called the "Driftless Area" (because there was no glacial "drift" or dust), the region is famously scenic and was home to the great American architect Frank Lloyd Wright, whose designs reflect the landscape of the region. As the course will be held in autumn, we may anticipate beautiful colors in the deciduous forests.

SW 316
RISE OF THE MAMMALS
Undergraduate
The modern world is dominated by mammals. Mammals have evolved, adapted and currently thrive in tremendously diverse habitats, including the oceans, lakes, rivers, tropical and temperate forests, mountain regions, caves, deserts, grasslands, the arctic tundra and polar regions. How did mammals become so diverse on the planet? Why did they remain small and relatively insignificant for the first two-thirds of their extraordinary 200 million year history? Where and when did modern mammal groups originate? What does the fossil record indicate about the character and timing of human physical and behavioral evolution? In this course, we will explore the extensive fossil record of mammals in order to gain insights to these and other questions concerning the history of this critically important animal group. Through discussions, readings, lectures, labs, examination of fossil specimens, original inquiry, analysis of museum exhibits, and application of scientific reasoning, students will be introduced to the fossil record of mammals and its critical role in establishing patterns of mammalian evolution and historical biogeography. Topics will include: fossil preservation; determining the age of fossil mammals; the transition from reptiles to mammals; Mesozoic mammals; the rise of mammals and extinction of large dinosaurs; evaluating the ecology of ancient mammals; and, the origins and diversification of modern mammal groups. Particular emphasis will be placed on examining the fossil record of primates leading to Homo sapiens and relating ancient mammal biodiversity patterns to current mammal extinction concerns.

SW 317
BODY SCAN: PRACTICAL ANATOMY AND YOUR ENVIRONMENT
Undergraduate
We are confronted daily with a barrage of physical challenges to our body - particularly, our musculoskeletal system. This we experience as pain and altered or loss of function: headaches, backaches, muscle spasms, pinched nerves, etc. When assessing the physical ramifications of stress and strain, an understanding of basic anatomy in the context of our environmental issues (i.e., work, exercise) and the process of aging, is key to making positive choices and changes. In this course, students will utilize a text/workbook, clinical case histories, presentation of a research topic, and class discussions.

SW 318
THE UNIVERSE, SCIENCE, AND THE QUEST FOR UNDERSTANDING
Undergraduate
Astronomy, one of the oldest sciences, links our wonder at the beauty of the night sky, and our quest for meaning, and practical necessities such as navigation and communications. Students will discover in a playful, conceptual, and generally non-mathematical way how science, with intuition, inspiration, and logic helps us to understand our most basic questions: how are the stars made, how is the stuff that we are made of produced, where is the universe headed, and what lies at the end of time? Learning in class will be achieved by a combination of readings, discussion, observational exercises, with one field trip to a major scientific site.
SW 319
ENCOUNTERING UNCERTAINTY AND CHANGE
Undergraduate
Ambiguity, confusion, doubt -- these seem to be synonyms for uncertainty. But the word has had a special meaning since quantum physicist Werner Heisenberg articulated the Uncertainty Principle more than 50 years ago. What effect does an observer have on an event? Can we accurately judge two things at once? How does the decision of what to analyze affect the outcome of the analysis? These are some of the questions which the Uncertainty Principle poses. This course explores the revolutionary change from mechanistic science to relativity and quantum theory. The challenge of Uncertainty in the arts and social sciences will also be considered. Finally, the role which Uncertainty plays in our lives will be explored. This course will involve selected readings, including nonmathematical explanations of Heisenberg's work as well as application of his theory to other disciplines. Videos and films will provide other texts for examination. Classroom work will include thought experiments, small-group interaction, and nongraded writing; tour of Fermilab particle accelerator will be required.

SW 320
CHAOS AND COMPLEXITY
Undergraduate
Chaos: the word is often used to indicate a state of utter disorder. Yet dynamical systems theory -- the science of chaos -- suggests that the connection between chaos and order is not a simple opposition. Chaos may, in fact, be the seed-bed for emergent order. This course examines theories of chaos and the connected theories of complexity, both in terms of scientific applications and as metaphors for the creative process. Students will develop a solid grounding in the development and current state of chaos/complexity theory. Several media, together with simple experimentation, will be used to study fractal geometry, entropy and negentropy, and thermodynamics. After this grounding, students will have the opportunity to analyze their own creative process in terms of the principles of chaos and complexity.

SW 321
BIOLOGY AS DESTINY: GENETICS AND THE RE-MAKING OF HUMANKIND
Undergraduate
From scholarly conferences which debate the site of the "gene for criminality" to mass-appeal treatises on IQ such as The Bell Curve, contemporary biological research is "turning up the heat" on the long-simmering "nature vs. nurture" controversy. The question of whether we are determined by our biology or are products of our culture is once again on the center stage of public concern. Moreover, it seems the very definition of ourselves as unique organisms is under assault. From transplanting the organs of other species into humans, test-tube babies, and surrogate mothers - to genetic testing, DNA fingerprinting, and sex selecting - from cloning to engineering super-humans: these are but a small sample of the disturbing potential suggested by biology's current "tinkering with life." This course explores the intermingling of biological theories and methods, political ideologies, and social dynamics found in research such as the project to map the human genome. Primarily through lecture, we will first establish a basic knowledge of current genetics. On that basis, through discussion and class exercises, we will explore the history and present status of the shifting definition of "human nature." We will be interested particularly in how the scientific and social processes involved are influenced by class, race, culture, and gender considerations.

SW 322
EVOLUTION: A HISTORY OF CONTROVERSY
Undergraduate
The biological universe is wondrously complex and diverse. Evolutionary biologists study the processes that brought about that diversity and complexity. Evolutionary theory attempts to answer many questions. What are the different kinds of organisms? Why are there these kinds of organisms and not others? By what mechanisms do new kinds appear or old kinds change? What is a biologic species? Why do some organisms have sex while others do not? The history of evolutionary thought is a history of controversies in evolutionary thought. We will examine the evidence and arguments on all sides of a question and we will discover how that evidence and those arguments changed through time. Through lecture, readings, and hands-on activities, students will be introduced to form and content of major evolutionary debates. Through class discussion and short position papers, students will argue their opinions on these debates from the point of view of their selected competencies. Students will be expected to complete an exploratory visit to the Field Museum as a homework assignment. The Internet is a lively resource for any course on evolution. In this class, students will gain some Internet literacy as they search for sources and view newsgroup debates. They may even correspond with some of today's evolutionary thinkers. We will also have a pass-word-protected newsgroup for private class discussion.

SW 323
EARTH SCIENCE AND THE HUMAN FUTURE
Undergraduate
This course is rooted in the scientific investigation of the earth, its elements and history, with an eye toward patterns leading to probable future changes. The learning experience includes current literature in relevant disciplines, journal writing and an outdoor lab component.
In this class we will be discussing some of the history of electrical power generation and regulations that formed the way the business developed in the United States. We will review environmental regulations and their effect on the electrical power generation business today. We will evaluate the deregulation of the electrical generation business and discuss the facts, the pro and cons and current events occurring throughout the United States. Finally, the students will be challenged to propose solutions to avoid energy shortages in the future.

Science appears daunting, but few subjects are as exciting and dramatic as the ageless story of the human mind challenging itself to figure out something altogether new about our evolving universe. Through rich and varied original writings of the greatest scientific thinkers, we will explore some of the most remarkable milestones and breakthroughs in scientific thought from physics to paleontology. Famous scientific personalities will come to life in their vivid explanations of astonishing insights and experiences of discovery in their memoirs and biographies. We will glean understanding into the adventure of the creative process by looking through the eyes of the scientist and ponder the paradoxes, mystery and beauty of human life and what it means to be human. We will emphasize both the contrasts and continuity of scientific thought between the ancient and modern eras, and proceed from the premise that science is inspired by simple wonder and curiosity about the universe of life. By asking "why?", we will live science in its purest form, for each answer only sparks new questions and allows us to take the words of Einstein to heart: "The important thing is not to stop questioning. Curiosity has its own reason for existing. Never lose a holy curiosity."

In this web page design course, students will design a web site for a Catholic elementary school as a service learning project in a collaboration between SNL and the Office of Catholic Education, Chicago. Depending on the size of the school, two students may volunteer to collaborate on one school or work alone. Students will meet for seven to eight classes and allocate time to meet with their school representative the other two to three classes. These meetings do not have to be traditional class time but can be scheduled at the convenience of the student and school representative. Students will receive material from their school representative that includes text and images and will collaborate with the school representative in designing the web site. Class time will include editing images, scanning, inserting sound clips and evaluating school web pages. Students must know inserting formatted text, links, tables and targets. Because of the skill level required for this project, students must apply for and be approved by the instructor before course registration. Applicants must have successfully passed the Internet Technology and Its Applications course or have significant experience in fundamentals of web page design.

In 1967 the United States Surgeon General announced that it was "time to close the book on infectious disease". Antibiotics had been introduced in the 1940’s, there was an ever-lengthening list of diseases for which immunization was available, and many world health officials imagined a future free of infectious diseases. Yet, as we begin the twenty-first century, infectious diseases are still the leading cause of death in the world. Why? How do we begin to understand the emergence of AIDS, Ebola virus, Lyme disease or Hantavirus? How can we explain the worldwide reemergence of tuberculosis, a disease that had come close to being relegated to history books? In this online course we will seek answers as we study the nature of microbes and the complex, often interrelated factors that contribute to their ability to challenge us even as we pit our science and technologies against them. We will examine such factors as population growth, urbanization, ecological disruption, human migration and antibiotic misuse. In 1996 the Director-General of the World Health Organization announced, "We stand on the brink of a global crisis in infectious diseases." Clearly the book on infectious disease is still wide open, and we will read some of its pages.
SW 329
DATABASE DEVELOPMENT FOR MANAGING INFORMATION
Undergraduate
Using MS Office tools suite (in particular Access), this course takes students through the entire process for building a database system that will be used to capture, store and present information. In addition to database concepts like designs, reports and SQL queries, the students will discuss and analyze relationships between technology and society.

SW 330
THE LIVING BIOSPHERE: A NEW LOOK AT LIFE ON EARTH
Undergraduate
This course will expose students to nature’s dynamic synergy through a variety of integrative learning techniques using modern technology, videos, group projects and provocative readings. Students will develop a strong understanding of Gaia theory and its place in contemporary natural science. This theory, proposed by the English chemist, James E. Lovelock, conceptualizes the earth as a large nesting, interactive system of life, soil, atmosphere and ocean. Earth is assumed to be a breathing biosphere; a symbiotic world. This course presents radical and cutting-edge views of life on earth for learners’ discussion, reflection and critique.

SW 331
BIRDS IN THE ENVIRONMENT: ORNITHOLOGY
Undergraduate
Does habitat and biodiversity loss pertain to cities like Chicago? Can species and habitats still exist in urban areas, which are so different from jungle and ocean? The answer to both questions is “yes” when we look at seasonal bird migration. Birds have migrated to and from nesting and breeding sites for thousands of years. They can travel from pole to pole, not only passing through our backyards, but even staying and nesting there. The goal of our class is to experience birds and habitat that are unique to this area and to study their relationship to humans. This relationship puts birds in peril by forcing them into concentrated, small patches of habitat, yet shows signs of hope in the form of protecting habitats such as our forest preserves and restoring habitats such as the Midewin prairie. Participants should expect to work in the field.

SW 332
BIODIVERSITY
Undergraduate
The science of Biodiversity is the study of life on earth, both past and present. It involves the exploration and measurement of the amount of genetic, species, and ecological variation on earth and is emerging as one humanity’s most important and urgent endeavors. Scientific efforts to study earth’s biodiversity have intensified because of our growing appreciation of the role human population growth and urbanization play in accelerating the extinction of plant and animal species. This course introduces students to the nature of science and the central issues concerning life on earth including: the current state of biodiversity, valuing life’s variations, human dependence on biological diversity, the origin and extinction of species, mass extinction, critical habitats at risk, and policies and approaches to conserve biodiversity (2-4 hours)

SW 333
THE HUMAN GENOME PROJECT
Undergraduate
This course presents a basic understanding of genetic principles necessary to discuss the impact on society of the Human Genome Project. Classical genetics, from its inception as a discipline, held that every organism’s genetic makeup was conditioned primarily by environmental factors. Darwin summarized this by claiming that environmental pressures produced organisms whose genetic makeup ensured survival in a particular environment (the survival of the fittest). Contemporary genetics, however, is entering a new era in which both the environment and genetic technologies share in the mission of modifying an organism’s genetic makeup. The project of sequencing the human genome has enabled scientists for the first time to identify health-related genes and, based on this, to design new treatments for age-old diseases. At the same time, the Human Genome Project, and genetic research based on it, is raising ethical concerns for the way genetic knowledge will impact health care into the 21st century. Genomics, as the new discipline is being called, explores this complex but fascinating world of cutting-edge genetic research. It is this very world that we will explore in our class setting through a variety of methods including laboratory investigations, class discussions, and student presentations. You may register for up to three competencies.

SW 334
EVERYDAY CHEMISTRY
Undergraduate
Each day we are immersed in chemicals and are participants in and observers of many chemical reactions. This course is designed to teach chemistry and physical science through the observation and explanation of many events we observe in daily life. It has been specially planned for students who have little or no background in science. We will examine the chemistry of substances from table salt and food additives, to fuels for our cars and homes, to semiconductors, new plastics, and revolutionary materials that will improve our lives in the 21st century. This class will emphasize the interconnections in our world through science. We will address safety and the “positive” and “negative” impact of chemicals on our world. There is a chemistry kit required for this course, so that you can perform the experiments safely at home.
SW 335
USING THE INTERNET TO ENHANCE YOUR CAREER
Undergraduate
The Internet has radically expanded the options available to people looking for employment and the alternatives available to employers looking for people. These new options are available for the most part only to people who know how to use the PC, who understand the internet, and who can capitalize on the bewildering array of resources in this new medium. This course will focus on how to make effective use of electronic media to manage and enhance your career. Students will participate in both individual and group exercises designed to sharpen their web-based research, networking, personal marketing, and communication skills.

SW 336
CONTEMPORARY COMPUTING
Undergraduate
The twentieth century not only brought us the dawn of the Information Age, but continued to bring us rapid changes in information technology. All computer systems and applications will change over time. As business requirements change and new techniques are implemented, computers and applications will need changes to keep pace. As we begin the 21st century, computer literacy will undoubtedly become prerequisite in whatever career a student chooses. In this course, we will enhance your knowledge of Microsoft Office software applications. The class consists of some lecture and mostly computer Lab activities. We will expand your knowledge and skills required for communicating and moving information electronically by introducing you to application shortcuts and seldom used features. We will also gain an appreciation for the effect of information technology on people. The framework of this course is based on the use of Microsoft Office.

SW 337
THE HUMAN GENOME AND ITS IMPACT
Undergraduate
This course will address the principles of genetics with an emphasis on the genetic code of the human genome. In this course we will examine: how the genetic code is stored, how it is used, how it is evolving, how it is passed from one generation to the next, the consequences of genetic code errors, the medical, technological, legal and ethical issues associated with the human genome. We will discuss how we can, and how we should, use the information on the human genome.

SW 338
ANCIENT WISDOM VERSUS MODERN SCIENCE
Undergraduate
In ancient times, science and philosophy were one and the same. Our contemporary views of nature and the scientific method are relatively late additions to the world's bank of knowledge. In this class, students will explore how thinkers in older societies make sense of nature. Systems to be examined include mythological approaches to explaining the natural world, and ancient laws derived from Anthropology, Archeology, Astronomy and the theories of Quantum Physics. Students may take this course for only one competence.

SW 339
USING TECHNOLOGY AT THE WORKPLACE
Undergraduate
This course concerns the effective use of microcomputer technology for working professionals, business analysts, project administrators, and support specialists. The course utilizes a project-oriented approach to achieving computer software proficiency in a PC environment, using word processing, spreadsheets, databases, e-mail, and Internet applications. Students will analyze real-world situations, identify underlying issues and possible solutions, and apply best use of technology and available resources to accomplish tasks and goals. Students should have a basic familiarity with the use of microcomputers in a Windows environment.

SW 341
ECOLOGY OF PERSONAL LIFE
Undergraduate
Today, global climate change is threatening human society. Sometimes incorrectly called "global warming," these shifts in the earth's weather systems have been tied to the burning of fossil fuels in industrialized countries like the United States. But we have to drive to work, don't we? We need to heat our homes, don't we? Besides, what difference does one person make? This course considers the way that human life is connected to the world around us. It also provides an opportunity to see how you might make changes in response to growing concern over global climate change. The course does not propound one solution over another. Rather, it encourages you to become aware of ecological issues and to determine your own answers to the questions they raise. In this class, you will learn to assess the effect of personal choices on the earth and be introduced to other possible choices.
SW 342
INTERNET SECURITY AT HOME AND AT WORK
Undergraduate
The objective of this course is to provide a basic understanding of Information Technology security. It will address technology approaches in detail for both home and work protection. This course will provide an overview of the objectives of security and a framework for understanding fundamentals which should be in place for an Information Technology setting to achieve an adequate security level.

SW 343
SYSTEMS IN BIOLOGY
Undergraduate
What is human biology? What are cellular functions? Homeostasis? How, precisely, does the human being work? In this course, students will examine how biological systems work together to create a functional human. Each week, students look at a different human biological system, will examine the basic cellular makeup/anatomy of that system as well as the general functioning of that system, and then will apply that information to overall health issues.

SW 344
THE INTERNET
Undergraduate
In this course, students will be introduced to the world of the Internet. Students will develop some knowledge of internet technology and how it can be useful in personal and work life. Items to be discussed include Internet history, getting connected, and such functions as email, browsing and search engines.

SW 345
CREATING PRESENTATIONS IN POWERPOINT, WORD, AND PUBLISHER
Undergraduate
As the workplace becomes increasingly sophisticated, more and more companies expect employees to create attractive PowerPoint presentations, use Publisher to create flyers, brochures and newsletters, and create attractive Word documents. In this course, students will learn design skills in creating work and classroom presentations using PowerPoint, Word and Publisher. Students are encouraged to use course materials from other classes and/or from the workplace and format these materials in PowerPoint, Word and Publisher. Students can then present these projects in other classes and at the workplace but are not required to do so. This course utilizes a project-oriented approach to achieving skills in presentation software. Students will analyze real-world situations, identify appropriate software solutions and apply the best software to accomplish tasks and goals.

SW 346
WHAT IS SCIENCE?
Undergraduate
What comes to mind when you think about science and technology? Do they seem mysterious, incomprehensible and yet powerful? Could science and the machines it creates both benefit some and harm others? In the best sense, science is about asking questions and continually questioning itself. It is considered a systematic, precise, objective way to study the natural world. Yet if science attempts to be neutral and unbiased in its approach, its results historically leave us with a bitter irony. One example is nuclear energy. It gives us terrible power to destroy and creates extremely harmful radioactive waste, yet through modern medicine using nuclear equipment it has also saved many lives and eliminated suffering. Our daily lives are governed by scientific and technological systems run by experts. Foresters know how to plant trees, but not how to establish conditions under which villagers in developing countries can manage natural forests for themselves. Engineers know how to develop technologies that benefit industries, but not how to dissuade factories from polluting. How much do we really know about the definition of science and its influence on our culture? Did pre-farming cultures use science as a way of understanding their role in the world or is science a phenomenon of modern cultures? In this course, students will examine through critical thinking the nature and history of science and its effects on the future. Students will also address issues in conflicting global views of the use and abuse of technology and developing methods of sharing, controlling, and monitoring our scientific output.
SW 347
ENVIRONMENTAL ETHICS: HUMAN VALUES, CULTURE AND THE ENVIRONMENT
Undergraduate
For thousands of years humans, from the time they were able to make the first tools to the production of nuclear technologies, have changed and in many cases radically altered their environment. Their perceptions (values and culture) with respect to the human relationship (and or responsibility) to the environmental spaces in which they lived and or the global commons (like space and the oceans) for the benefit of their current or future society has been critical in influencing the way in which the integrity of the environment and global commons has been impacted. This course will provide a survey of various environmental ethics that have emerged during human history among Western and non-Western cultures; and how these divergent environmental ethics have shaped and influenced not only planetary but space ecosystems. This course will also examine the consequences of environmental ethics on past current and future human societies from economic, political, social and environmental health perspectives. This course is an excellent elective for business, education, religion, sociology/anthropology and science/engineering focus area who seek to understand the foundations and ramifications of human ethics, values and culture on decisions and policies which impact the global environment (or ecosystems).

SW 348
NATURE WRITING
Undergraduate
Observation is the beginning of science. It is also the beginning of the process of writing. This class is designed to encourage you to observe the natural world and to write clearly about it. Thus you will be simultaneously strengthening your observational skills and your expressive skills. You will observe a single natural setting over the course of a quarter, writing short prose pieces that follow specific guidelines. Some of these pieces will be posted on the class website for those outside the class to read, thus providing you with an experience of online publication. Basic skills in grammar and punctuation are assumed; although it is not a prerequisite, you will find it helpful to have completed College Writing before you start this class.

SW 349
RELATIONSHIPS BETWEEN PLANT AND HUMAN LIFE
Undergraduate
The purpose of this course is to increase student's awareness and understanding of plant structure, function and diversity, and to help students discover past, current and potential future uses of plants. This course uses Ethnobotany to help students understand how the scientific process leads to new understandings about how our world works and how it can aid us in understanding ways we use science in our lives. Specific learning objectives of the course are to understand and appreciate: (1) plant structure and function and the relationship between the two, (2) plant adaptations and how these adaptations affect the distribution and abundance of plants in nature, (3) the diversity of plants and the ways in which botanists group plants, (4) the way that science contributes to our understandings of how the world works and informs our decisions of how we want our society to be.

SW 350
CAPSTONE SEMINAR: PHYSICAL WORLD
Undergraduate
Capstone Seminar is designed to permit students to explore a topic as a group integrating various methods of inquiry. Pre-99 students will address one set of capstone competencies of their choice. Specific assessment and evaluation criteria as well as learning activities will be articulated by the instructor for a particular section of the course. Successful completion of Research Seminar is required to register. (2-6 quarter hours)

SW 352
TECHNOLOGY, TRAINING, AND HUMAN PERFORMANCE
Undergraduate
What Robinson and Robinson describe as "the shift from providing training to improving performance" has been cited as a top priority in our fast-paced, global economy. This course covers the principles of training and human performance through an analysis of real case studies in a number of work environments. The course will also present the necessary technology and instructional design tools so that students can design their own training program and develop a basic training and performance plan that reflects their own work environments. Students are expected to have basic computer skills, including the ability to use and save work with Microsoft Word.

SW 353
THE CREATIVE BRAIN
Undergraduate
While brain structure and function can seem daunting, exploring this organ from the perspective of creative output gives learners a non-threatening frame of reference to which all can relate. Learners will look into traditional and contemporary theories of both creativity and brain versus mind, as well as how creativity is perceived in society.
SW 354
INTEGRATING MS OFFICE APPLICATIONS FOR REPORT WRITING
Undergraduate
Students will use an array of Microsoft applications and the Internet to set up a marketing conference spanning several days. They will create documents and solve problems using multiple applications to complete these tasks more efficiently.

SW 355
COMPUTERS AND SOCIETY
Undergraduate
This course explores how computing technologies such as computer software, hardware, and networking have affected our society. We will examine the basics of how these technologies work and how they have affected areas of human endeavors, as well as how they have changed, improved, simplified and complicated society.

SW 356
DATABASE DESIGN AND IMPLEMENTATION FOR SMALL BUSINESS APPLICATIONS
Undergraduate
This course will teach non-computer literate persons to be able to translate a business problem into a conceptual database design, and further to convert the design into a database application using Microsoft Access. By the end of the course, the student should be able to apply knowledge to the following: (1) describing basic database concepts and using common database terminologies; (2) designing databases using appropriate designing notations; (3) translating a schema into a database application in Access; (4) conducting simple user-interface design; and (5) designing small business-based applications.

SW 357
URBAN GEOGRAPHY: THE STUDY OF CITIES
Undergraduate
Course topics include the following: early settlement patterns, their political and social development; transportation mechanisms and their impact on concentrated centers of population; consumerism and trade; locational factors for settlements; neighborhood development, from ghettos to gentrification; urban planning issues; ethnic diversity, poverty and social planning; the built environment of structures; modes of communication with respect to technology, its impact on the global population; comparisons/contrasts of contemporary development between global world cities and American cities.

SW 358
INTRODUCTION TO SPREADSHEETS
Undergraduate
This is an introductory course with Microsoft Excel. Topics include spreadsheet basics, formatting and printing, formulas and functions, charting, and data management. No prior knowledge of spreadsheet software is required; however, students are expected to have a working knowledge of Windows. Upon successful completion of this course, students will be able to do the following: create and test spreadsheets using Microsoft Excel; explain and use functions; create pie, bar, column, and line graphs; explain and use linking and embedding; use clip art to add visual interest to a spreadsheet; and explain and use data management capabilities such as data forms, query, filter, subtotals, sort, and pivot tables.

SW 359
EVERYDAY BIOMEDICAL ETHICS
Undergraduate
‘Right, wrong; sometimes right, rarely wrong; wrong for children, right for women’: Biomedical issues are in the news almost every day, and often it’s hard to understand what to think, even less how to think, about their ethical implications. Some ethical issues have a long history and substantial background, while others are so new that even ethical experts struggle. How can a non-expert intelligently read and understand what’s published?

SW 360
SOCIETY AND INFORMATION TECHNOLOGIES
Undergraduate
Humans have a long line of technological advances that includes tools, weapons, transportation, mechanical, industrial, and medical advances. On one hand, the computer is just another invention that is part of this long line of technological advances. On the other hand, the ability to program the computer makes it different with an incredible diversity of uses. Computer technology has made large impacts in diverse areas such as sports management, health care, employment, manufacturing, education, defense, and automobiles and many other areas. This course explores how computing technologies such as computer software and hardware, and networking has affected our society. Students will examine the basics of how these technologies work and how they have affected areas of human endeavors. We will examine how these technologies changed, improved, simplified and complicated society.
Microsoft Office is the most ubiquitous application suite in personal computing. There is little Office cannot do, from document creation and editing, e-mail and scheduling, spreadsheet and database management, desktop publishing, image editing and even Web design. In this course, we will explore several component applications of Office, focusing on word processor Word, spreadsheet Excel and presentation software PowerPoint, with the goal of developing facility with each application individually and using an integrated approach.

This course will look at instructional design in much more depth than the Technology, Training and Human Performance Course. In this course, the student will study what Instructional Design is, how it works, and why it is important in the design of all types of career and educational training. The course will present various models of instructional design, then have the students design actual instructional training modules.

Yoga is an ancient system of spiritual development and transformation. In the process of spiritual development, the practitioner of Yoga acquires a wide array of physical and psychological benefits that improve health and well being. Yoga and meditation (meditation is a branch of Yoga) have been demonstrated to be effective in relieving stress, treating anxiety and depression, preventing and healing injuries and improving the functioning of children with special needs. The Science of Yoga will explore the positive physical and psychological benefits of Yoga from a scientific perspective. We will examine scientific studies that have been done on the effects of Yoga and meditation to gain an understanding of why this system of spirituality has become an increasingly integral part of modern health and fitness practice. The ancient origins and philosophical foundations of Yoga will be evaluated in the context of modern understanding of physiological and psychological processes. Students in this class will practice Yoga and meditation techniques and keep a journal of the effects that they experience. They will compare their experiences with the data from scientific studies. Students will also share and compare their experiences from practicing Yoga and meditation with their classmates.

Students will explore the contributions of women scientists through recorded history, the essence and importance of their work, the social world in which they worked and their contemporaries, and the challenges they faced at various times in history. Each student will select a scientist about whom he or she will develop a final project, to include: biographical data, a synopsis of the scientist's socioeconomic and political world, description of her work and how it affected contemporary understanding of the world. Also, students will work in teams to find and present initiatives undertaken since 1945 to encourage involvement of women in science, math and technology fields.

This is an introductory course in the field of addiction studies. In this course we will examine the relationship between drugs and behavior, the personal and social concerns of drug-taking behavior and how drugs work in the body and mind. Legal and legally restricted drugs as well as medical drugs will be discussed. We will also cover issues of prevention, treatment and education. By the end of this course students will understand (1) the differences between use, abuse and addiction to drugs; (2) the extent of substance abuse in the United States today; (3) the legal, social and cultural ramifications of substance abuse; (4) methods of treatment and prevention of substance abuse; (5) major classifications of addictive substances; and (6) how drugs work in mind and body. This course will be a mix of lecture, discussion, videos and other supplemental materials. In addition to their competence papers, students will work in small groups on projects related to addiction and will present their group's findings to the class.
SW 366
EXPRESSIVE ARTS THERAPY
Undergraduate
This course offers a multi-arts approach in which different art modalities are woven into the therapeutic process as appropriate to a client's situation. It is grounded not in any particular techniques or media but in the capacity of the arts to respond to human suffering. Various arts--poetry, movement, drawing, painting, journaling, improvisation, music, and sculpture--are used in a supportive setting to facilitate growth and healing. Expressive arts processes have been used successfully in almost all psychotherapeutic contexts, ranging from work with the severely ill to the facilitation of human growth and potential. There is a growing use of the arts in health education, hospice work, and in community art projects especially after catastrophic events. The class will be conducted in a workshop format in which theoretical content will be combined with experiential learning. Lecture, discussion, audio-visual presentation, experiential exercise, guest speakers, and field trips comprise the structure of the class.

SW 367
LEISURE, RECREATION, AND HEALTH
Undergraduate
This course will stimulate your thinking about the meaning of leisure in your life. Leisure today and historically has been central to the human experience. It is an elemental experience, essential to the total well-being of every person; it is a reflection and expression of the cultural values of a society; it is an important vehicle for treatment. Leisure and recreation services are also essential for healthy communities in terms of social climate, environmental quality, and economic stability. Leisure services comprise one of the largest and fastest growing industries in the world, whether measured in dollars spent, persons served, hours of time devoted, or resources used. The study of leisure and recreation is a broad discipline, combining diverse fields of study and professional practice. This course will (1) illustrate the importance of leisure to you and your loved ones, (2) contribute to your ability to become an informed consumer of leisure, (3) question the binary relationship of work and leisure and, (4) teach you how to use leisure to increase emotional and physical health, resulting in a higher quality of life. The course will be interactive and participatory.

SW 368
ADVANCED POWERPOINT AND WORD
Undergraduate
In this advanced course, students will master higher level skills in PowerPoint and Word and study beginning principles of design. Course skills include organizing content, formatting content, collaborating on documents, and formatting and moving documents. This course will begin with studying the Microsoft Certificate Exams for PowerPoint and Word.

SW 369
CHRONIC ILLNESS: WHEN SOMETHING IS ALWAYS WRONG
Undergraduate
Everyone has either a disorder or a relative with a disorder, but often we focus only on the clinical information that physicians give us, especially since they can’t quantify suffering and impact. We will do a bit of applied anatomy, and look at the psychosocial aspects of chronic illness.

SW 370
SEXUAL HEALTH AND DEVELOPMENT
Undergraduate
This course will introduce students to a variety of topics related to human sexuality. The course will begin with a historical view of sexuality and lead to an analysis of current topics in sexuality related to health and physical development, culture and politics. The format of the course will consist of class meetings every other week and attentive participation to the online discussion board in between class sessions. Students will be required to read articles provided by the instructor and discuss them during class and on the course discussion board. The course will be divided into several modules related to sexual and physical health, relationships and gender issues, atypical sexual behavior and the roles of spirituality, culture, media, gender and aging. Students will participate in class presentations and present research on the web board related to the competencies taken in the class.
Dinosaurs are one of the most diverse and successful groups of vertebrates in earth's history. Originating over 220 million years ago, they dominated earth's land biomes for over 150 million years and diversified to include the largest land animals in earth's history, a wide range of aquatic groups, and even a diverse clade capable of flight (the birds). Consequently, mammals remained in the background as small nocturnal creatures during the dinosaurs' long reign. Only after a cataclysmic extinction event 65 million years ago involving most dinosaur groups did the mammals diversify into modern groups including our own primate lineage. This course will introduce students to the remarkable dinosaurs, tracking their origin, surveying their success, and evaluating their decline. Learning will emphasize investigation of the forms, function, and variation within the major dinosaur groups as well as the connections of dinosaur evolution to diverse factors such as climate change, ecology, biological competition, and mass extinction. The course learning activities will encompass discussions, readings, lectures, labs, internet resources, museum resources and original inquiry.

In this course, students will be introduced to common computer applications in MS Office: Word, Excel, Power Point, Access and Outlook. Students will also learn how to use browsers as well as learn how to navigate the Web, mark favorite pages, save pages, set options and security levels. We will explore PCs and Mac operating system environments; reviewing their similarities and differences. Finally, we will develop basic technical skills in designing and managing home networks in terms of connections, security, and wireless systems.
T&L 406
LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD (BIRTH TO 8)
Graduate
This course examines language acquisition and development in young children, including culturally and linguistically diverse learners and children with atypical language development. Attention will be given to dialectical issues as these apply to growth and development of linguistic competencies through the early childhood years. Explored in this course are the core topics of linguistic?morphology, syntax, semantics, pragmatics, phonetics, and phonology. Psycholinguistic and sociolinguistic theories anchor the discussion of language learning in childhood. Issues of language delay and processing of symbolic information to facilitate the development of articulation, fluency, voice, and functional language are included.

T&L 407
PREPRIMARY PROGRAMS: CURRICULUM AND STRATEGY
Graduate
Students will plan, implement and evaluate activities that promote the physical, emotional, social, spiritual, creative, and cognitive development of preschool children from diverse cultural and socioeconomic backgrounds. Methods of facilitating children's play, individualization through building on children's experiences, learning styles and interests, using technology, and developing learning centers will be emphasized. Assessment practices are incorporated in this experience.

T&L 408
CURRICULUM AND INSTRUCTION IN PRIMARY GRADES
Graduate
This course provides an examination of the objectives, content, methods and materials used in the primary grades of elementary schools. A variety of teaching methods and classroom management strategies will be discussed and illustrated, including teacher-led instruction and student-centered instruction. Students will be encouraged to reflect upon their own emerging educational philosophies and teaching styles as they take part in laboratory and clinical experiences. Many opportunities for planning, using and evaluating a variety of teaching methods will be offered. Each student will prepare one teaching unit on a primary social studies theme. Appropriate tests and assessment are included.

T&L 409
PROFESSIONAL PRACTICE IN ELEMENTARY SCHOOLS
Graduate
This course is an introduction to the professional roles required of elementary school teachers. Students will develop a knowledge-based framework for considering the many factors involved in decision-making in an elementary classroom. This framework will serve to guide students as they create a social studies curriculum unit, which integrates planning skills, teaching strategies, classroom management and evaluation techniques. Daytime clinical hours are required during this course. (Only for Special and Elementary Education (SEE) majors).

T&L 410
CHILDREN'S LITERATURE AND FAMILY LITERACY
Graduate
This course addresses literacy development in young children and the roles of families and early childhood programs in fostering that development. Strategies for enhancing literacy, such as word play, storytelling, conversations will be provided and all appropriate genres of children's literature will be explored. Finally, the course features appropriate poetry, early books for infants and toddlers, read-aloud materials, and all genres of children's literature for young children.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 411
ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE SETTINGS
Graduate
Candidates will study, use, and evaluate early childhood assessment methods and tools that are appropriate for young children with diverse learning, cultural, and socioeconomic experiences. Focus of the course is on the teacher candidate's acquisition of knowledge and skill regarding an array of formal and informal assessment instruments and techniques used to gather information needed for making decisions about typical and atypical children served in individual and group learning situations. Focus is directed toward the development of curricular goals and instructional approaches that evolve from the assessment information. Such information is used to create learning plans, including Individualized Family Service Plans (IFSP) and Individualized Education Plans (IEP), serving child and family responsively.

Advanced Teacher Candidate Standing is a prerequisite for this class.
T&L 412
EMERGING READING AND LANGUAGE ARTS
Graduate
This course focuses on the curriculum content and sequence, instructional and assessment strategies as well as considerations integral to the creation of authentic, effective emergent literacy environments and engagements for first through third grade. Theory and practice principles are woven into course assignments and required field experiences designed to observe, teach, and reflect upon instructional decisions made for individual as well as groups of children. Prevailing curricular and instructional models (e.g., code-based, meaning-oriented, balanced) and their histories are compared and contrasted. The influences of development, home language(s) and dialect(s) (especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidate instructional planning and teaching. Case studies and lesson planning facilitate the application of course content. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 416 and T&L 583 is required.

(T&L 404 or T&L 408) and Advanced Teacher Candidate Standing are prerequisites for this class.

T&L 413
READING/LANGUAGE ARTS IN THE INTERMEDIATE GRADES
Graduate
This course extends Emerging Reading and Language Arts to facilitate increased independence in students as strategic readers and competent writers. It focuses on the further development of reading comprehension and writing abilities in the intermediate grades. Emphasis is placed on the complex nature of literacy addressing issues such as content-area literacies, learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Application of course material is facilitated through fieldwork focusing on the design, teaching, and reflection on literacy lesson(s) for intermediate learners. COREQUISITES: For T&L EE majors, concurrent enrollment in LSI 446 and T&L 583 in a public school is required.

T&L 412 and Advanced Teacher Candidate Standing or admission in the SEE program are prerequisites for this class.

T&L 415
TEACHING AND LEARNING ELEMENTARY SCHOOL SCIENCE
Graduate
This course is an introduction to materials, methods and strategies for helping students in grades 1-6 become scientifically literate: i.e., to understand the nature of science and its impact on technology. Particular attention will be given to theoretical views about how children learn science, the proper use of materials and equipment, the development of scientific thinking, e.g., skills in observing, classifying, collecting, and interpreting data, questioning strategies, and ways to assess student progress. Inquiry-based lesson plans and case studies invite application of course content. Daytime field required during this course. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 419 and T&L 584 is required.

T&L 404 or T&L 409 and Advanced Teacher Candidate Standing are a prerequisite for this class.

T&L 416
TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS
Graduate
This course is an introduction to materials, processes for developing, and strategies for mathematical literacy in grades 1-6. Particular attention will be given to the theoretical views about how children learn mathematics, the proper use of manipulative materials, the development of mathematical thinking, e.g., skills in estimation, pattern recognition, or spatial perception; the use of technology, and ways to assess student progress. Lesson planning, teaching, and critical reflection are an integral component of this course. Clinical hours required. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 412 and T&L 583 is required.

T&L 404 or T&L 409 and Advanced Teacher Candidate Standing are a prerequisite for this class.

T&L 418
LEARNING THROUGH THE ARTS
Graduate
This course focuses on the arts (visual art, music, drama and dance) as an integral component of teaching and learning in the elementary school curriculum. Students will explore a variety of art forms and disciplines to develop a critical aesthetic and artistic vocabulary. Students learn to help children utilize artistic media in the exploration and expression of thoughts and feelings. Emphasis is placed on design, construction, and implementation, and assessment of authentic conceptual classroom arts activities that integrate the arts with other classroom curricula. Daytime clinical hours (10) are required during this course. Formerly CDG 418. COREQUISITES: For T&L EE majors, concurrent enrollment in SCG 408 is required.
T&L 419  
**CURRICULUM AND STRATEGIES: SOCIAL STUDIES**
Graduate

This course is an introduction to an integrated view of social studies for engaged citizenship. Through the study of strategies (such as concept formation, historical inquiry, role-play, etc), materials (such as primary sources) teacher candidates will learn and apply principles of curricular integration to create curriculum/units that engage elementary learners in the exploration of issues, ideas, and perspectives that impact our world. **COREQUISITES:** For T&L EE majors, concurrent enrollment in T&L 415 and T&L 584 is required.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 420  
**MATH AND SCIENCE IN EARLY CHILDHOOD**
Graduate

This course applies child development principles to the planning of science and mathematics experiences for both typically and atypically developing young children. Emphasis is placed on understanding how children develop problem-solving skills, and on recognizing how teachers can facilitate inquiry-discovery experiences for young children with diverse learning styles and needs. Course assignments include participation in experiments and field-based experiences in mathematics and sciences. Teacher candidates are required to develop and provide developmentally and culturally appropriate activities in science and mathematics activities for young children.

SCG 404, T&L 432, and Advanced Teacher Candidate Standing are prerequisites for this class.

T&L 421  
**CHILD AND FAMILY IN THE URBAN COMMUNITY**
Graduate

This course focuses on understanding the diversity of children and families in approaches to development, learning, and disability. Strategies in developing positive and supportive relationships with families of young children with special needs, including family-centered practices, will be explored. Particular attention is given to the challenges faced by teachers and other professionals in early intervention in assessing children's needs and providing services, which are reflective of the child's development within his/her diverse cultural and community context. In addition, the course examines ways to develop and maintain productive and collaborative relationships among professionals and families, communities, and other professionals across the range of support systems in the IFSP and IEP planning processes.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 422  
**CLASSROOM ASSESSMENT**
Graduate

This course focuses on study, use, and evaluation of assessment practices in diverse, elementary school contexts. Assessment is addressed as part of instructional systems, attending to issues including: the appropriate use of standardized measures, formal and informal classroom assessment, portfolio development, as well as reporting to all stakeholders. This course also emphasizes ways of involving students and parents in assessment processes, how to observe and assess children individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 423  
**FUNCTIONAL BEHAVIOR ASSESSMENT: INTERVENTION AND SUPPORT IN EARLY CHILDHOOD**
Graduate

This course is designed to prepare early childhood pre-service teachers to work with children who present a variety of challenging behaviors in the classroom. Grounded in principles of Applied Behavior Analysis, the philosophy of the course is based on the premise that understanding the underlying causes of children's externalizing and internalizing behavior enables the teacher to utilize appropriate techniques in conducting behavior intervention and classroom management. Using Positive Behavioral Support and Functional Behavior Analysis (a competency required for all teachers under the provisions of IDEA), students will learn how to design and develop a Behavior Intervention Plan. Diverse methods for addressing a variety of behaviors are explored and practiced through field-based assignments that include application of behavioral assessment and intervention tools, as well as techniques. Understanding the impacts of current legislation, policy and research on practice is fostered and developed.

SCG 404 and Advanced Teacher Candidate Standing is a prerequisite for this class.
**T&L 424**
**INTRODUCTION TO SECONDARY EDUCATION**
*Graduate*

This course is an introduction to the DePaul Secondary Education program as well as the professional world of secondary school teaching. In this course, candidates develop the knowledge and skills necessary for being a reflective practitioner. Candidates focus on understanding themselves (professional identity) and their behaviors in teaching situations with students in schools. These insights, combined with subject-matter knowledge, guide the development of various course assignments. Candidates will learn how to observe effectively in a school setting, to identify school governance issues, to understand school environment and the current social issues that shape it, and will experience a variety of teaching methods and resources for their future teaching. Candidates will acquire knowledge of important social concepts and theories that affect education, especially as they affect educational change in urban societies. As candidates become aware of differences in individual, ethnic, and cultural group attitudes, values and needs, they also will learn to recognize the complexities of teaching and learning in a pluralistic society. Candidates will be committed to teaching as responsible professionals who act ethically as well as in a collegial fashion. In addition to class attendance, candidates are required to complete 15 daytime fieldwork hours as part of the course. It is highly recommended that this course be taken concurrently with SCG 406.

**T&L 425**
**CURRICULUM AND INSTRUCTION IN SECONDARY EDUCATION**
*Graduate*

This course will examine materials, methods, and techniques appropriate for teaching in secondary schools. Topics include writing instructional objectives, developing lesson plans, designing a curriculum unit, understanding classroom management and assessment related issues. Students will be encouraged to reflect upon their own emerging educational philosophies as well as draw from previous courses they have taken. Students will be given many opportunities for planning, using and evaluating a variety of instructional strategies while preparing and teaching a micro lesson in front of their peers. Students will be committed to teaching as a professional acting responsibly, ethically, and collegially in accordance to Vincentian Personalism. 30 hours Level 1 Field Experience required.

**T&L 426**
**TEACHING WRITING**
*Graduate*

Prepares teacher candidates for teaching writing and composition at the middle and secondary school levels. The course focuses upon methods of teaching composition, examination of literature and research about the composing process, the development of language and reading skills, and the assessment and evaluation of writing. The development of writing curriculums will also be explored. 30 hours Level 2 Field Experience required.

T&L 425 and Advanced Standing are a prerequisite for this class.

**T&L 427**
**YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS**
*Graduate*

This course is a survey of the field of early childhood special education, including the Early Intervention System. Characteristics of infants, toddlers, and young children with special needs are examined in this course. Methods of working with different disabilities during children’s early years will be explored. Strengths and needs of families of young children with disabilities and collaboration with family members will be emphasized. Understanding the impacts of current legislation, policy, and research on practice is fostered and developed. Completing 15 hours of field experience in an early childhood special education setting is a part of this course’s requirements.

SCG 404 and Advanced Teacher Candidate Standing is a prerequisite for this class.

**T&L 428**
**TEACHING LITERATURE**
*Graduate*

Prepares teacher candidates for teaching literature at the middle and secondary school levels. Examines contemporary issues in the teaching of literature, explores methods of teaching major literary genres, addresses problems of literacy and focuses on the transactional nature of reading and writing. Emphasis on developing a repertoire of ways of teaching literature and a variety of literature curriculums. 30 hours Level 2 Field Experience required.

T&L 425 and Advanced Standing are a prerequisite for this class.
**T&L 429**  
**TEACHING YOUNG ADULT LITERATURE**  
**Graduate**  
This course is devoted to the study of Young Adult Literature: an exciting, emerging field. Issues and ideas to be examined include the following: current debates regarding issues in curriculum and teaching; selecting, reading, evaluating, and teaching young adult literature; cultivation of life-long reading habits and literacy development. Students will become familiar with major writers of young adult literature, read diverse texts, explore major genres, review award winning novels, consider the role of the media, and develop creative projects.

T&L 425 and Advanced Standing are a prerequisite for this class.

**T&L 430**  
**TEACHING LITERACY K-12**  
**Graduate**  
This course provides an overview of the curriculum, instruction, and assessment strategies used in K-12 classrooms to foster and develop students’ L1 and L2 literacies. Through guided examination of prevailing theories of language acquisition and development that currently influence classroom practices across the K-12 continuum, this course enables future teachers of world languages to grow in their understanding of the literacy-learning contexts that students will bring to their language classrooms. Issues that emerge in planning and conducting literacy instruction in schools are discussed and deliberated through university classroom experiences as well as required field experiences (15 hours, minimum; level 1). Course participants enjoy multiple opportunities to apply and analyze theories; to observe, critique, and practice instructional strategies; to make informed curricular and instructional decisions; and to use assessment to inform one's planning.

**T&L 431**  
**EARLY LANGUAGE AND LITERACY DEVELOPMENT**  
**Graduate**  
This course will focus on enhancing language development and promoting early literacy in young children. It addresses instruction and assessment of language and literacy skills. Students will learn how family/child and teacher/child interactions promote language and literacy development and learning. Implementation of language and literacy curricula and activities that lead to growth in the key areas of literacy development for preschool and primary aged children will be explored. (Combination of previous T&L 406 and T&L 412).

**T&L 432**  
**EARLY CHILDHOOD CURRICULUM STRATEGIES AND PHILOSOPHY (BIRTH-8)**  
**Graduate**  
Operating from a constructivist curricular perspective that considers individual child and the social learning context, candidates will plan, implement and evaluate activities that promote the physical, emotional, social, spiritual, aesthetic, creative, and cognitive development of young children from diverse cultural and socioeconomic backgrounds. Methods of facilitating children's play; individuation through building on children's experiences, learning styles and interests; using technology and, developing learning centers will be emphasized. A variety of teaching methods and classroom management strategies will be discussed and illustrated, including teacher led instruction and student-centered instruction. Students will be encouraged to reflect upon their own emerging educational philosophies and teaching styles as they take part in laboratory and field experiences. Many opportunities for planning, using and evaluating a variety of teaching methods will be offered. Each student will write at least one teaching unit on a primary social studies theme. (Combination of previous T&L 407 and T&L 408)

Advanced Teacher Candidate Standing is a prerequisite for this class.

**T&L 433**  
**EARLY CHILDHOOD SPECIAL EDUCATION STRATEGIES**  
**Graduate**  
This course focuses on a range of curricular and instructional strategies that foster individual abilities and meet the individual learning needs within the contexts of group and individualized instruction in a variety of learning situations: classrooms, community and home environments. Teacher candidates acquire knowledge and skill to develop individual long-term and short-term educational service plans based on knowledge of children's needs and abilities; families' goals, priorities, and concerns for their children; communities; content areas; and early childhood curriculum goals. (Replaced HSC 408).
T&L 434
LITERACY, LITERATURE, & THE YOUNG CHILD
Graduate
This course addresses the phenomenal process of literacy development in young children. Strategies for enhancing literacy through unlocking the phonemic code, acquiring vocabulary, and comprehending oral as well as print messages are emphasized within the context of choosing and using high-quality literature for children from birth through age 8. Curriculum content and sequence, instructional strategies, and assessment processes are interwoven across course assignments and field experiences. The influences of development, home languages and dialects (especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidates’ instructional planning and teaching.

SCG 404 and Advanced Standing are a prerequisite for this class.

T&L 436
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Graduate
Prepares teacher candidates for teaching mathematics at the middle school and secondary school levels. Examines contemporary issues in teaching mathematics, methods of teaching secondary mathematics, and recent history in mathematics curriculum development of alternative teaching strategies and the implementation of the NCTM Standards. Lesson and unit development, evaluation and classroom management also will be discussed. 30 hours Level 2 Field Experience required.

T&L 425 and Advanced Standing are a prerequisite for this class.

T&L 439
METHODS OF SECONDARY SCIENCE EDUCATION
Graduate
This course is designed to update teachers in the methods of teaching science. This involves reviewing the processes of science, theories of learning, and instructional strategies appropriate to laboratory science. This course also provides an update on the current trends and issues in science education as well as an analysis of successful science curricula programs. 30 hours Level 2 Field Experience required.

T&L 425 and Advanced Standing are a prerequisite for this class.

T&L 440
EARLY CHILDHOOD EDUCATION CROSS-CULTURAL STUDIES
Graduate
The course will discuss the historical, philosophical and cultural foundations of the education of young children in a multicultural society, emphasizing the role of ethnicity in development of young children within the context of families, childcare centers, and educational systems. Topics include: history of immigration and predictions for the future; the effects of population shifts on the education of English Language Learners; the impact of laws, litigation and executive orders on bilingual/English-as-a-Second-Language education; understanding cultural and linguistic differences regarding locating and using educational resources.

This course focuses on best practices in teaching and learning in ESL and bilingual early childhood classroom contexts. Students will learn about different approaches and methodologies currently used to support the development of listening, speaking, reading and writing in social and academic contexts in learners of English as a second language. Curriculum based-assessment, cultural awareness and self-reflective practice will also be addressed.

T&L 442
EARLY LITERACY DEVELOPMENT AND SECOND LANGUAGE ACQUISITION
Graduate
This course will examine the process of learning and using a second language. Research in second language acquisition (SLA) is multi-disciplinary in nature, reflecting the complexity of language learning and use. Linguistic, psychological and social processes that underlie language(s) learning and use will be introduced and applied to the understanding of this learning in young children. In this course, language acquisition theory concerning relationships between early literacy and oral language development in first and subsequent languages will be addressed.
ASSESSING YOUNG BILINGUAL/ ESL LEARNERS
Graduate
This course will focus on the discussion of basic principles and current approaches to assessment of language learning students in ESL Children's language learning or language learning of children in EST and bilingual early childhood and early elementary educational settings. The different purposes of process and product assessment tools, authentic and curriculum-based forms of assessment, issues in the assessment of English Language Learners (ELLs), and assessment in academic areas for early elementary ELLS will be explored.

INTERNSHIP IN EARLY CHILDHOOD ESL/ BILINGUAL EDUCATION SETTINGS
Graduate
This course will focus on application of the theories in effective teaching practices, and assessment procedures appropriate for young English Language learners. It will emphasize on application of knowledge gained from previous ESL/ELL courses, and demonstration of skills necessary to work collaboratively and effectively with families of young English Language learners. Professional behaviors that respect, value, and support all children's native language and culture will be reinforced. (100 clock hours)

STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
Graduate
This course prepares candidates to teach world languages at the elementary, middle and secondary school levels consonant with an aligned approach to meeting national and state WLE standards and Common Core standards. It examines the theory and practice of traditional or standard methods of teaching world languages (e.g., communicative approach, natural approach, etc.) with an emphasis on developing alternative, post-method strategies and using diverse resources, as well as on reformulating world languages instruction to integrate subject matter content into the curriculum, including science, social studies, math, fine arts, etc. Engages candidates in understanding and applying the "Five Cs" - Communication, Cultures, Connections, Comparisons, and Communities outlined in the national standards - toward this end. Lesson and unit development, evaluation/assessment, and classroom management also will be discussed. Issues that emerge in planning and instruction are discussed and deliberated through university classroom experiences as well as required fieldwork (20/15 hours; level 1 in language of certification).

TEACHING HISTORY AND SOCIAL SCIENCE IN SECONDARY SCHOOLS
Graduate
Teaching, History and Social Science in Secondary Schools. Prepares for teaching history and social sciences at the middle and secondary school levels. Examines the nature and purpose of history and social sciences curriculum within secondary schools, the current status of social studies materials and practices, and issues confronting today's secondary social studies teachers. Emphasis on alternative teaching strategies, resources for teaching and learning, teachers' responsibilities in curriculum development and decision-making, and methods and materials for addressing cultural diversity. Lesson and unit development, evaluation and classroom management also will be discussed. 30 hours Level 2 Field Experience required.

READINGS IN AMERICAN HISTORY
Graduate
Prepares students for teaching American history at the secondary level. Readings focus on the foundational texts of American history from the colonial era to the late 20th century, with an emphasis on gaining content knowledge and applying it to teaching in the secondary classroom. Class discussions focus on matters of interpretation, evidence, and historiography. Offered during Fall and Summer terms.
This course alongside T&L 466 is intended as a two-course sequence each complementing the other. As T&L 466 explores the source materials and major concepts of visual art's content, T&L 465 focuses on teaching visual art. Building from the content requirements from their program or experience, students will understand how the art studio (content) experiences where ideas are developed translate to the preparation of teaching. Students will do this through multiple curriculum based projects intended for use in their own classrooms, including a 6th - 12th grade general course reader to assist in introducing an art historical overview that influences and connects to general middle and high school studio practices. As students work on these projects, they will continue to reflect on the coursework they have done in the content area as well as watching and learning from classroom teachers and teaching artists in the field. They will contemplate such questions as: What are the connections among the arts disciplines? How can they be taught together, creating interdisciplinary courses at the middle and high school levels? What are the differences among the arts disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about artists, artistic periods and the nature of how artworks are produced. Site visits required. 30 hours Level 2 Field Experience required.

T&L 425 and Advanced Standing are a prerequisite for this class.

This course builds on the work in T&L 465, which alongside T&L 466 is intended as a two-course sequence each complementing the other. As T&L 465 focuses on the art of teaching the visual arts, T&L 466 explores the source materials and major concepts of visual art content. Historically, artistic movements have shaped and currently identify the theories we use to define our most immediate environment. The major concepts can be connected to the artist studio and to the descriptions some artists make about the studio as a teaching space. In the course students will be introduced to a wide range of artists and their work, artistic movements and the individual artists who use teaching as a medium. How does an emerging artist or pre-service teaching artist draw on the understanding of their own work as a platform to build core principles of pedagogy? What is the link that combines a dynamic studio practice with an inspired methodology for teaching visual art? We will address these questions through creating a visual art teaching curriculum portfolio and writing a reflective artist monograph, produce a final exhibition of art and work alongside teachers and artists in the field. Site visits are required. 30 hours Level 2 Field Experience required.

T&L 425 and Advanced Standing are a prerequisite for this class.

Candidates conduct 75 hours of intense supervised fieldwork in an infant/toddler center where they are observing and documenting behavior and interactions, planning activities, and assessing development in children ages birth to 3. Candidates will also participate in a twice a quarter, hour and a half, seminar to reflect and discuss aspects of infant/toddler development and care, making connections between theory and practice. Onsite meetings with groups of candidates will be held weekly for supervision and reflection on practice. (2 credit hours)

Candidates conduct 75 hours of intense supervised field work in preschool during the winter quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have either taken ECE 310: Preprimary Programs: Curriculum and Strategy (at the undergraduate level), and T&L 432: ECE Curriculum Strategies and Philosophy (at the graduate level) in a previous quarter, or they are taking these courses as co-requisites with this internship. (2 credit hours)

Advanced Teacher Candidate Standing is a prerequisite for this class.

Candidates conduct 75 hours of intense supervised field work in a primary grade (K-3) during the spring quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have either taken ECE 311: Curriculum and Instruction in Primary Grades (at the undergraduate level), and T&L 432: ECE Curriculum Strategies and Philosophy (at the graduate level) in a previous quarter, or they are taking these courses as co-requisites with this internship. (2 credit hours)

Advanced Teacher Candidate Standing is a prerequisite for this class.
T&L 495
DESIGNING CURRICULUM FOR INFANTS AND TODDLERS
Graduate
Research in neuroscience indicates that the brain developmental foundation for all later learning is created in the first three years of life. The impact and impetus for the adults (families and caregivers) who nurture and teach children from birth to three will be explored in this course. The course will examine the developmental milestones, as well, as each child’s developmental profile to create a developmentally appropriate curriculum to enhance the “foundation for all later learning.” The course explores ways to provide a safe and challenging environment; to focus on play as a vehicle for learning for optimal developmental outcomes. Collaboration with families in addressing each child’s development is featured in the course. Candidates will be expected to design curricula to meet the needs of linguistically and culturally diverse children, as well as young children with special needs.

T&L 525
READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM
Graduate
This course analyzes the relationships among reading, writing, speaking and listening. It encourages middle level and high school teachers in all disciplines to take these interrelationships into account and to plan curricula that include current teaching strategies to enable students to become better readers, writers and thinkers in their various content-areas. This course will also concentrate on group process and its role in effective teaching within and across content-areas. Language use, learning and teaching are considered from a multicultural perspective. 30 hours Level 2 Field Experience required.

TCH 471 or TCH 472 or TCH 473 or TCH 474, and Advanced Teacher Candidate Standing are prerequisites for this class.

T&L 565
INDEPENDENT STUDY TOPICS
Graduate
This course is a self directed graduate course in the Visual Arts Education Program. Candidates who consider this course must develop a written proposal for their work and identify professional expectations of this quarter long immersion in advanced study. Candidates may select from a range of possible pursuits from preparing a new body of work or preparing an exhibition to working within a host of selected museums or galleries as an art education intern throughout the city and suburbs. All candidates are required to meet with a faculty member for an initial interview to discuss contact hours, needs and limitations, critique times and locations and the required documentation from the 11 week experience. All proposals must be approved by a faculty member in the program.

T&L 575
WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
Graduate
This course engages students in WLE curriculum development and language program advocacy, creation, and sustainability based on an examination of federal and state WLE history and policies and on a review of national and state standards. Reviews theory and application of curriculum development to world language instructional programs, such as design, scope and sequence, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal world language education program models are examined and analyzed in light of WLE history, policy, and standards (20/15 hours; level 1).

T&L 449, BBE 407, BBE 526, BBE 560 and BBE 570 are prerequisites for this class.

T&L 583
FIELD EXPERIENCE LAB
Graduate
This field-based course will facilitate pre-service teacher candidates' experiences working in elementary and middle school classrooms. This supervised field experience is an opportunity to apply content and pedagogical knowledge in authentic settings. 24 clock hours are scheduled at school sites and visible during registration though subject to modification based on changes in schools' schedules. Students will enroll in this course multiple times during their program across diverse sites and will engage in different activities aligned with concurrent courses. COREQUISITES: For T&L EE majors, T&L 404 and SCG 403; or T&L 412 and T&L 416; or T&L 413 and LSI 446. (1 credit hour)

T&L 584
PRE-STUDENT TEACHING FIELD EXPERIENCE
Graduate
This field-based experience occurs in teacher candidates' student teaching sites. Scheduling is negotiated between teacher candidate and mentor teacher based on classroom social studies and science content area schedule. This supervised field experience is an opportunity to apply content and pedagogical knowledge as well as gain introductory contextual understandings of student teaching site. For T&L EE majors, completed application to student teaching. COREQUISITES: For T&L EE majors, T&L 419 and T&L 415. (1 credit hour)
T&L 585
ELEMENTARY STUDENT TEACHING
Graduate
Students will be placed for a minimum of 10 weeks in an elementary school. Seminar will meet once a week, in the participating schools and/or at DePaul. At first, they will focus on issues of immediate concern to student teachers. As the students gain experience the seminar will examine six or eight classroom issues, that is, topics which students have found to be significant on the basis of their experience. These would include such things as assessment, evaluation, classroom management, curriculum planning, and relationships with colleagues. After delineating what the issues are, students would be expected to analyze and discuss readings which relate to the issues. Open only to DePaul students. (6 credit hours)

T&L 586
ELEMENTARY STUDENT TEACHING SEMINAR
Graduate
This course is taken concurrently with T&L 585, Elementary Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and careers as teachers. COREQUISITE(S): T&L 585 (2 credit hours)

T&L 588
INDEPENDENT STUDY IN TEACHING AND LEARNING
Graduate
PREREQUISITE(S): Permission of instructor, department chair and Associate Dean. (1 credit hour)

T&L 589
THESIS RESEARCH IN TEACHING AND LEARNING
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

SCG 451 and an approved thesis proposal is a prerequisite for this class.

T&L 590
SECONDARY STUDENT TEACHING
Graduate
Students will be placed for a minimum of 10 weeks in a secondary school. Seminar will meet once a week, in the participating schools and/or at DePaul. At first, they will focus on issues of immediate concern to student teachers. As the students gain experience, the seminar will examine six or eight classroom issues; that is, topics which students have found to be significant on the basis of their experience. These would include such topics as assessment, evaluation, classroom management, curriculum planning, and relationships with colleagues. After delineating what the issues are, students would be expected to analyze and discuss readings that relate to the issues. Open only to DePaul students. (6 credit hours)

T&L 591
SECONDARY STUDENT TEACHING SEMINAR
Graduate
This course is taken concurrently with T&L 590, Secondary Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and careers as teachers. COREQUISITE(S): T&L 590 (2 credit hours)

T&L 592
WORLD LANGUAGES STUDENT TEACHING
Graduate
Student teaching is the culminating experience of the World Languages certification program. It is a ten-week, 30-hour/week experience. Students must successfully complete student teaching with a grade of B- or better in a language classroom in which they are seeking certification to teach. The course is taken concurrently with T&L 593, World Languages Seminar. Open only to DePaul students. (6 credit hours)
T&L 593
WORLD LANGUAGES SEMINAR
Graduate
This course is taken concurrently with T&L 592, World Languages Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and careers as teachers. COREQUISITE(S): T&L 592 (2 credit hours)

T&L 595
EARLY CHILDHOOD STUDENT TEACHING
Graduate
This course requires students to participate in supervised teaching at a cooperating school, five full days per week, for an academic quarter. Part of the teaching will be in a preprimary setting and part will be in a primary setting. Feedback and discussion of issues encountered in student teaching as well as new materials and techniques of student teaching will be included. Open only to DePaul students. (6 credit hours)

T&L 596
EARLY CHILDHOOD STUDENT TEACHING SEMINAR
Graduate
In this seminar, candidates will reflect upon their teaching experiences with young children, and collaborate with colleagues and instructor to identify alternative strategies for problematic situations. Candidates will outline ways to maintain strategies for lifelong learning. In addition, candidates will share resume development and job-search strategies. COREQUISITE: T&L 595.

T&L 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

T&L 614
INDUCTION INTO THE TEACHING OCCUPATION: EARLY CHILDHOOD
Graduate
This course is designed to assist first-year early childhood teachers in making the transition from student teaching to teacher. It creates a bridge between first-year teachers' formal education and the realities of their classrooms, providing assistance with: understanding their induction into the profession; analyzing their new educational contexts; actualizing their educational philosophies; developing their pedagogical knowledge; and identifying and making the most of professional support systems within their schools.

T&L 595 is a prerequisite for this course.

T&L 615
SPECIAL TOPICS IN TEACHING AND LEARNING
Graduate
Current issues and problems in education will be discussed. Focus will be current research and best practices.

T&L 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.
TCH 302
EXPLORING TEACHING IN THE URBAN HIGH SCHOOL
Undergraduate
(JYEL CREDIT) This course is an invitation to secondary education as a profession, an opportunity for students considering education as a career to explore the reality of teaching and learning a disciplinary content area in a variety of Chicago-area schools. Students will become familiar with different narratives of teaching through teacher and student biographies, testimonials, literature, film, and classroom observations. They will explore the interrelationships between, for example, popular cultural beliefs about schooling; teacher and student identities; and classroom interaction. The instructor will coordinate observations in several classrooms as the basis for intensive, guided reflective work, aimed at supporting students’ initial and subsequent efforts of developing identities as disciplinary content educators (25 hours of high school classroom observation required). Course is also an introduction to the TEACH Program. Offered during Fall, Winter, and Spring terms.

TCH 390
CAPSTONE: INTEGRATING EDUCATION & DISCIPLINARY FOUNDATIONS
Undergraduate
This course is designed to help students conceptualize issues and opportunities in teaching their disciplinary content to diverse students and in different classroom contexts. Up to ten hours of community-based service/observation required. In this course, students will analyze and reflect on how teaching in their disciplines is informed by diverse cultures of schooling and youth, including the influences of economic, social, cultural, political, gender, and religious factors on schooling, educational policy and opportunity. Students will use disciplinary content to critically and creatively reflect on the teaching of that content in secondary schools. Students will be introduced to issues and ways of presenting essential disciplinary content in ways that engage diverse learners, including learners who have not been served well by formal education. Students will also develop a theory of teaching that emphasizes the intersection of disciplinary content with multicultural perspectives. Offered during Spring term only.

TCH 401
TEACHING AS A PROFESSION IN SECONDARY SCHOOL
Graduate
This course is an introduction to the TEACH Program, including the College of Education’s conceptual framework and teacher dispositions, and to the professional world of secondary school teaching, including the policy bodies and stakeholders that impact teaching. Within this developing understanding of the larger context of secondary education, students will begin to articulate clearly professional identities and the behaviors inherent in those identities, including their impact on student learning. Drawing on previous coursework and their growing understanding of differences in individual, ethnic, and cultural group attitudes, values, and needs, students also will learn to recognize the complexities of teaching and learning in a pluralistic society. Ultimately, students will be committed to teaching as a responsible professional who acts in an ethical and collegial fashion. 25 Level 2 field experience required. Offered during Fall term only.

TCH 411
THE NATURE OF ENGLISH
Graduate
This course is designed to help students to see that the field of English Studies is bigger than the component they probably identify as English (it’s Literature, Writing, and Linguistics/Grammar). Students will explore the formation of the discipline up to the current day, focusing on the shifting understanding of ways of reading, writing and thinking about language. They will strive to answer the questions: “What does it mean to be a student of language and literature?” and, “What are the ways of knowing characteristic of English and Writing, Rhetoric, & Discourse majors?” In doing so, students will relate the disciplinary content of their major to their daily lives and interests and to the larger framework of human endeavor and understanding, including identifying its importance to the personal lives of high school students. The course is a prerequisite for TCH 421. Offered during Winter term only.

TCH 412
THE NATURE OF HISTORY AND THE SOCIAL SCIENCES
Graduate
This course builds on the content course work students have done in the seven disciplines grouped under the heading “social sciences” (history, political science, geography, sociology, anthropology, economics, and psychology). In this class students will get further exposure to the basic concepts of the social science disciplines and consider the connections as well as differences between them. The course emphasizes how different disciplinary backgrounds lead students to bring different perspectives to their study of social phenomena and helps them see these phenomena from multiple vantage points. The course will employ a case study approach framed around social issues of interest to all seven disciplines (e.g. social control, threats, development, natural disasters). By the end of the course, students will have applied the knowledge and skills of multiple social science disciplines to evaluate social phenomena, considered the relationship and differences between those disciplines, and be prepared to enter TCH 422 where they will apply their content knowledge to inquiry and teaching in the field. Offered during Winter term only.
TCH 413
THE NATURE OF MATHEMATICS
Graduate
This course builds on students' mathematics understanding by emphasizing the universality of mathematics as a cultural endeavor. In it, students will explore the historical trends in mathematics and how those trends have been taught. Students will understand that, mathematics, at its core, is deductive; however, it also requires intuition. Thus, the course examines the interaction among intuition, experimentation, conjecture, abstraction, and deductive reasoning not only in the classroom but also in the everyday use of mathematics. It also examines the interplay between concrete problem-solving and generalization. Offered during Winter term only.

TCH 414
THE NATURE OF SCIENCE
Graduate
This course is about the nature of science and the interactions between science and society. It will build on the foundation of understandings that students already have about the processes and conventions of science developed through their years as science students to create opportunities for deeper understandings of the beliefs and assumptions inherent to the creation of scientific knowledge. These opportunities will be developed through direct interactions with professional scientists as well as through case studies and readings that illustrate the strengths, limits and pitfalls of the scientific endeavor as well as provide opportunities for students to relate science to their daily lives and interests and to a larger framework of human endeavor and understanding (e.g., relationships among systems of human endeavor including science and technology; relationships among scientific, technological, personal, social and cultural values). Cases will be drawn from different scientific disciplines as well as from modern and historic times. In this way, science students will have a better understanding of what it means to be a scientist and how science interfaces with society. The course is a prerequisite for TCH 424. Offered during Winter term only.

TCH 421
INQUIRY & APPLICATION IN DEVELOPING SECONDARY ENGLISH PEDAGOGY
Graduate
This course builds on TCH 411 by preparing teacher candidates to distinguish between what needs to be taught (content) and how it is taught (pedagogy), with an emphasis on understanding the historical shifts in the teaching of content and how these shifts inform teaching and learning in today's English language arts classrooms. The course also introduces students to methods of inquiry and reflection on content pedagogical knowledge. Student will examine their own educational experience through the lens of the historical trends, focusing on how they learned and what they understood their teachers to be doing. This initial case study will serve as an introduction into case study methods. Students will also develop expertise in one of the three historical trend areas — reading, writing, and language — and examine how the trend has informed teaching and learning and shaped curriculum, pedagogy, and assessment. Students will develop a case study of a practicing teacher using the lens of the historical trend in which they are developing expertise. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 411 is a prerequisite for this class.

TCH 422
INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY
Graduate
This course builds on the content knowledge students developed and reinforced in TCH 412. More, it asks them to make the shift from considering how a person prepared in the social sciences analyzes social phenomena to how such a person teaches the social sciences. Students will do this by developing two units of inquiry-based case studies that they could use in their own classrooms. The topics of these case studies will vary from section to section, depending on the needs of the students and expertise of the instructor. Possible topics include the Constitution, the Cold War, slavery, and the Iraq War. As students work on these projects, they will continue to reflect on the course work they have done in the content areas as well as the instruction they see teachers delivering in their field experiences. They will contemplate such questions as: “What are the connections between the social science disciplines? How can they be taught together, creating interdisciplinary courses at the high school level? What are the differences between the social science disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about social events but also the freedom to pursue their interests and make sense of the world on their own terms?” By the end of this course, students through readings and their projects will have advanced their learning about the nature of inquiry, its implementation in the classroom, and the connections and differences between the social science disciplines. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 412 is a prerequisite for this class.
TCH 423
RESEARCH METHODS & DISCIPLINARY INQUIRY: ENGLISH
Graduate
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, students will read seminal literature on science literacy and explore cases challenging their notions of the teacher-learner relationship and the relationship between science and society. As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 424
RESEARCH METHODS & DISCIPLINARY INQUIRY: HISTORY AND THE SOCIAL SCIENCES
Graduate
Following TCH 414, this course transitions from asking "what does a scientist do?" to a consideration of why science literacy in the general public has been so difficult to achieve. The focusing questions for TCH 424 are: "How do we teach science? What is science literacy? Why is an understanding of science important to the general public? What are the major obstacles and strategies to achieving science literacy?" The course begins by participants self-reflecting on their own educational experiences that led to their paths in science education: what have been their successful learning strategies, how have teachers influenced their education and what have been successful (and less than successful) classroom instructional strategies? From this, students will begin science classroom observation, discussing their observations with their peers, and speaking with educators about their experiences teaching high school science and about the goals and short-comings of science education. Throughout this process, students will read seminal literature on science literacy and explore cases challenging their notions of the teacher-learner relationship and the relationship between science and society. As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 451
RESEARCH METHODS & DISCIPLINARY INQUIRY: ENGLISH
Graduate
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, students will read seminal literature on science literacy and explore cases challenging their notions of the teacher-learner relationship and the relationship between science and society. As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 452
RESEARCH METHODS & DISCIPLINARY INQUIRY: HISTORY AND THE SOCIAL SCIENCES
Graduate
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, students will read seminal literature on science literacy and explore cases challenging their notions of the teacher-learner relationship and the relationship between science and society. As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public. 25 Level 1 Field Experience hours required. Offered during Spring term.
TCH 453
RESEARCH METHODS & DISCIPLINARY INQUIRY: MATHEMATICS
Graduate
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, the course focuses on research related to the teaching of mathematics in the middle school and high school and pedagogical content knowledge, including research on teaching and learning, curricula and instructional delivery, assessment, and the relationship of socio-cultural, economic, and language use to teaching and learning disciplinary-specific content. Students will develop and implement small discipline-specific research projects, identifying research questions, conducting a literature search, developing a theoretical framework, and collecting and analyzing data. NOTE: Offered concurrently with TCH 483.

TCH 454
RESEARCH METHODS & DISCIPLINARY INQUIRY: SCIENCE
Graduate
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, the course focuses on research related to the teaching of the sciences in the middle school and high school and pedagogical content knowledge, including research on teaching and learning, curricula and instructional delivery, assessment, and the relationship of socio-cultural, economic, and language use to teaching and learning disciplinary-specific content. Students will develop and implement small discipline-specific research projects, identifying research questions, conducting a literature search, developing a theoretical framework, and collecting and analyzing data. NOTE: Offered concurrently with TCH 484.

TCH 471
TEACHING ENGLISH IN THE HIGH SCHOOL 1
Graduate
This course introduces students to the theoretical and practical issues of teaching the English language arts in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. Offered during Fall term.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

TCH 472
TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1
Graduate
This course introduces students to the theoretical and practical issues of teaching history and the social sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. Offered during Fall term.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.
TCH 473  
TEACHING MATHEMATICS IN THE HIGH SCHOOL 1  
Graduate  
This course introduces students to the theoretical and practical issues of teaching mathematics in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of mathematics in all its representations. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. Offered during Fall term.  

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

TCH 474  
TEACHING THE SCIENCES IN THE HIGH SCHOOL 1  
Graduate  
This course introduces students to the theoretical and practical issues of teaching the sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. Offered during Fall term.  

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

TCH 481  
TEACHING ENGLISH IN THE HIGH SCHOOL 2  
Graduate  
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 421 and TCH 471. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities, with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 471, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 451 or SCG 451. Offered during Winter term.  

TCH 471 and Advanced Teacher Candidate Standing are prerequisites for this class.

TCH 482  
TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2  
Graduate  
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 422 and TCH 472. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 472, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 452 or SCG 451. Offered during Winter term.  

TCH 472 and Advanced Teacher Candidate Standing are prerequisites for this class.
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 423 and TCH 473. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of mathematics in all its representations with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 473, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 453 or SCG 451. Offered during Winter term.

TCH 483 and Advanced Teacher Candidate Standing are prerequisites for this class.

This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 424 and TCH 474. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 474, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 454 or SCG 451. Offered during Winter term.

TCH 473 and Advanced Teacher Candidate Standing are prerequisites for this class.

This course introduces candidates to theoretical and philosophical issues related to educational assessment. It addresses the range of assessments teachers will encounter in school settings, including individual cognitive and social and emotional assessments; course material, curricula, and disciplinary program assessments; and large scale high-stakes testing. The course provides candidates opportunities to explore student, program, and curricular assessment issues, including assessment methods and tools; standardized, quantitative, and qualitative assessments; formal and informal assessments; formative and summative assessments; integrated, self-, and peer assessments; cultural, social, economic, and language influences on assessments; and issues of reliability and validity in assessment. Offered during Fall, Winter, and Spring terms. COREQUISITE(S): Taken in conjunction with TCH 471/TCH 472/TCH 473/ TCH 474 OR TCH 481/TCH 482/TCH 483/TCH 484.

T&L 425 and Advanced Teacher Candidate Standing are prerequisites for this class.

This course is the culminating experience for TEACH Program students and requires 11 weeks of onsite student teaching in a high school content area classroom. The course requires students to be in a high school full-time, participating in both in-class instruction and extra-curricular activities related to the school. Open only to TEACH Program Students; Student teaching application and approval required. (6 credit hours)

This course must be taken concurrently with TCH 590. The seminar format provides students an opportunity to reflect on their student teaching experiences and to reach back and consider what they have learned in the TCH Program and their next steps as practicing teachers. COREQUISITE(S): TCH 590. (2 credit hours)
TDC 261
BASIC COMMUNICATION SYSTEMS
Undergraduate
(Formerly TDC 361) Introduction to voice, data, and multi-media network communications fundamentals. Wired, Wireless, and Optical applications in Local, Metropolitan, Wide Area Networks are explored. The overview explains how technical, regulatory, competitive, standardization and cultural factors impact modern network applications. Approved for Scientific Inquiry credit. PREREQUISITE(S): NONE.

TDC 311
COMPUTERS IN TELECOMMUNICATIONS SYSTEMS
Undergraduate
This course is an introduction to computer architecture and operating systems with an emphasis on network systems. Topics covered include computer components and functions, logic circuits, process management, memory management, file management, interrupts and I/O peripheral devices, as well as computer networks, distributed systems, and network administration. Students will have several hands-on labs utilizing a Linux environment and will use Shell script for basic systems and network administration as well. PREREQUISITE(S): None

TDC 362
PRINCIPLES OF DATA COMMUNICATIONS
Undergraduate
Theory and components of data communication systems, modes, codes, and error detection techniques for data transmission, network protocols and line control procedures, communication carrier facilities and system planning. PREREQUISITE(S): (TDC 311 or CSC373) and (IT 263 or TDC261)

(TDC 311 or CSC 373) and (IT 263 or TDC 261) are prerequisites for this class.

TDC 363
INTRODUCTION TO LOCAL AREA NETWORKS
Undergraduate
This course covers the principles of local area network (LAN) technologies including protocols, hardware, LAN software and design concepts. The course will focus on the lower layers of the OSI model and explore Ethernet, bridging/switching, VLANs, securing the network and Spanning-tree and Rapid-Spanning-tree protocols. Basic inter-VLAN routing will also be investigated. The course will involve several extensive lab exercises and troubleshooting activities to help reinforce the concepts. PREREQUISITE(S): TDC 261 or IT 263

TDC 261 or IT 263 is the prerequisite for this class.

TDC 364
VOICE COMMUNICATIONS TECHNOLOGIES
Undergraduate
A detailed study of transmission, signaling and switching systems for facilities-based public and private voice networks. Voice digitization and transmission over circuit-switched and packet-switched infrastructures. Computer telephony integration techniques. Quality of service issues in integrated voice-over-data systems. Course may include laboratory work with PBX lab. PREREQUISITE(S): IT 263

IT 263 is a prerequisite for this class.

TDC 365
NETWORK INTERCONNECTION TECHNOLOGIES
Undergraduate
A comprehensive study of network interconnection technologies including layer 2 bridges and switches, layer 3 routers and higher-layer gateways. The TCP and IP protocols will be studied in detail, including IP address management and router operations and management along with associated Internet protocols. RIP and OSPF protocols will be considered. Course includes laboratory work with protocol analyzers and router administration. PREREQUISITE(S): TDC 363

TDC 363 is a prerequisite for this class.
**TDC 368**  
**NETWORK PROGRAMMING**  
*Undergraduate*

Programming distributed client/server applications; the sockets interface and multitasking issues; client/server models; remote procedure call; examples of applications such as electronic mail and file transfer.  **PREREQUISITE(S):** CSC 261 or CSC 309.

CSC 261 or CSC 309 is a prerequisite for this class.

---

**TDC 369**  
**NETWORK PERFORMANCE ANALYSIS AND DESIGN**  
*Undergraduate*

Quantitative foundations of network performance analysis. Probability theory and queueing theory will be developed and applied to problems in LAN performance, traffic engineering, and the analysis of throughput and response time measures for data communications networks. Performance tradeoffs in network design. **PREREQUISITE(S):** IT223 and MAT151 and TDC365.

---

**TDC 371**  
**WIRELESS COMMUNICATIONS NETWORKS**  
*Undergraduate*

TDC 261 or IT 263 is the prerequisite for this class.

---

**TDC 372**  
**DIGITAL ACCESS SERVICES**  
*Undergraduate*

A survey of access line technologies used to access Internet and other business network services. Topics will include traditional DS1, DS3 and SONET transport as well as Integrated Services Digital Network (ISDN), Digital Subscriber Line (DSL), Cable Modems, satellite services, Asynchronous Transfer Mode (ATM), and wireless data access methods.  **PREREQUISITE(S):** TDC 362

TDC 362 is a prerequisite for this class.

---

**TDC 375**  
**NETWORK PROTOCOLS**  
*Undergraduate*

Advanced routing technologies, BGP protocols, multi-area routing protocols, network management protocols, Secure protocols, IP multicasting protocols.  **PREREQUISITE(S):** TDC 365.

TDC 365 is a prerequisite for this class.

---

**TDC 376**  
**NETWORK PROJECT**  
*Undergraduate*

Case study in developing a large network project. Students will work in groups to analyze and design a major network system. **PREREQUISITE(S):** TDC 365.

TDC 365 is a prerequisite for this class.

---

**TDC 377**  
**FUNDAMENTALS OF NETWORK SECURITY**  
*Undergraduate*

Fundamentals of Network security design and implementation. Review of components used in an enterprise security infrastructure including routers, firewalls, security auditing and assessment tools, Virtual Private Networks (VPN) and Intrusion Detection Systems (IDS). The integration of the different components will be studied in detail, including IP addressing, Network Address Translation (NAT), design of firewall rule sets and performance considerations. Course includes laboratory work with routers, firewalls, Virtual Private Networks and security assessment tools. Pre-req: TDC 365.

TDC 365 is a prerequisite for this class.
TDC 378
INFORMATION STORAGE AND MANAGEMENT
Undergraduate
This course provides a comprehensive overview of network-based storage technology and information storage infrastructure. Major topics include the storage architectures, service features, and benefits of Intelligent Storage Systems. Networked storage technologies include fiber channel (FC), based Storage Area Network (SAN), Network Attached Storage (NAS), and IP-SAN. Advanced storage technologies on Content Addressed Storage (CAS), information security, and storage virtualization are also discussed. PREREQUISITE(S): none

TDC 379
TELECOMMUNICATION AND NETWORK SECURITY PRACTICUM
Undergraduate
Design and implementation of telecommunication and network security infrastructure. This laboratory-based class includes the setup of realistic network infrastructure environment using bridges, routers, layer 2/3 switches and servers. Advanced routing infrastructure implementation using OSPF, RIPV2, EIGRP, BGP, multi-homed BGP setups and IGP/EGP redistribution. Network infrastructure hardening using routers and switches. PREREQUISITE(S): TDC 365 or Instructor consent. Good knowledge of TCP/IP is required.

TDC 384
SCRIPTING FOR NETWORK MANAGEMENT
Undergraduate
This is a hands-on course on using script languages to develop practical applications for Network Management. Students will first learn the fundamentals of Linux system and script language(s) for task automation, and use scripts to develop dynamic web sites. After that, the course will cover Simple Network Management Protocol (SNMP), and use Application Programming Interface (API) to automate networks tasks of Fault Management, Configuration Management, Accounting Management, Performance Management, and Security Management (FCAPS). The final project of the course is to develop a dynamic web site with the above five functional areas to manage Linux servers, Ethernet switches and IP routers. PREREQUISITE(S): IT 263

IT 263 is a prerequisite for this class.

TDC 390
TOPICS IN NETWORK TECHNOLOGY
Undergraduate
Specific topics will be selected by the instructor and will vary with each quarter. Prerequisite(s): See syllabus

TDC 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. Prerequisite(s): None

TDC 405
VOICE AND DATA NETWORK FUNDAMENTALS
Graduate
This course provides an introduction to voice and data networking technologies, including public and private voice services, Ethernet and Internet data technologies, network security, business applications and network management. The structure, regulation, and history of the telecom and data network industry will be discussed as well. PREREQUISITE(S): None

TDC 411
INTRODUCTION TO COMPUTER AND NETWORK SYSTEMS
Graduate
This course is an introduction to computer architecture and operating systems with an emphasis on network systems. Topics covered include computer components and functions, logic circuits, process management, memory management, file management, interrupts and I/O peripheral devices, as well as computer networks, distributed systems, and network administration. Students will have several hands-on labs utilizing a Linux and Cisco IOS environment and will use Shell script for basic systems and network administration as well. PREREQUISITE(S): None
TDC 413
INTRODUCTION TO LAN AND WAN
Graduate
This course covers the principles of local area network (LAN) and wide area network (WAN) technologies including structured cabling, protocols, network devices, and network operating systems. Students will learn the theories and practices of designing, provisioning, and deploying LAN and WAN in an enterprise environment. Assigned lab exercises involving LAN/WAN configuration and troubleshooting will help reinforce various concepts. PREREQUISITE(S): None

TDC 431
EMERGING WIRELESS AND MOBILITY NETWORKS
Graduate
A study of evolving 2.5, 3rd & 4th Generation Wireless Networks, and disruptive technologies like WiFi(802.11), WiMax, Bluetooth, RFID, Ultra-Wideband and the security implications mobility networks. This course provides a balanced view of the Wireless Industry in transition, through evolving technology, regulation, competition and standards. Students will be better prepared to deal with the rapid changes and seize the opportunities as data mobility impacts traditional telecommunications and private networks. In addition students will have access to extensive Global Wireless Education Consortium materials to support their individual advanced interests. Formerly TDC 531. PREREQUISITE(S): TDC 405

TDC 460
FOUNDATIONS OF NETWORK TECHNOLOGIES
Graduate
An introductory course on network technologies for local and wide area networks. The course examines in detail the core concepts for network architectures, Ethernet systems including wired, wireless, and Metro, virtual local area networks, storage area networks, optical networking, and the more traditional network services such as T-1, frame relay, Asynchronous Transfer Mode (ATM), and SONET. PREREQUISITE(S): TDC 405 and TDC 413

TDC 463
COMPUTER NETWORKS AND DATA SYSTEMS
Graduate
A detailed discussion of the upper layers of network architectures. Network protocol organization will be discussed using TCP/IP as an example. IP addresses, subnetting, supernetting, and CIDR. Routing algorithms. Transport layer protocols. Application layer protocols. Introduction to IPv6. PREREQUISITE(S): TDC 405 and TDC 413

TDC 464
CONVERGED MULTIMEDIA NETWORKS
Graduate
Exploration of multimedia networks including voice, data, and video services offered by network carriers and Internet Service Providers (ISP) to both enterprise and residential customers. The course starts with an overview of current voice and data networks and presents the driving forces leading to a converged multimedia network. The focus is on Voice over IP (VoIP), including signaling, protocols, equipment, network architecture/design, traffic engineering, and service deployment strategy. PREREQUISITE(S): TDC 413

TDC 468
NETWORK PROGRAMMING
Graduate
The course covers the basic and advanced issues of TCP/IP networking programming such as multiple processes, I/O multiplexing, multi-threaded processes, multicasting and secure network programming USING C/C++. Application examples such as Internet browsing, instant messaging, proxy filtering and file transfer protocols are discussed. PREREQUISITE(S): (TDC 463 OR CSC 435) and CSC 404

(TDC 463 OR CSC 435) and CSC 404 are prerequisites for this class.
TDC 477
NETWORK SECURITY
Graduate
Network infrastructure security issues, including perimeter security defense, firewalls, Virtual Private Networks, Intrusion Detection Systems, wireless security, network security auditing tools and ethical considerations. Strategies for the deployment of "Defense-In-Depth" mechanisms in an enterprise computing environment. PREREQUISITE(S): TDC 463 or CSC 435

TDC 463 or CSC 435 is a prerequisite for this class.

TDC 478
INFORMATION STORAGE AND MANAGEMENT
Graduate
This course provides a comprehensive overview of network-based storage technology and information storage infrastructure. Major topics include the storage architectures, service features, and benefits of Intelligent Storage Systems. Networked storage technologies include fiber channel (FC), based Storage Area Network (SAN), Network Attached Storage (NAS), and IP-SAN. Advanced storage technologies on Content Addressed Storage (CAS), information security, and storage virtualization are also discussed. PREREQUISITE(S): none

TDC 484
SCRIPTING FOR NETWORK MANAGEMENT
Graduate
This is a hands-on course on using script languages to develop practical applications for Network Management. Students will first learn the fundamentals of Linux system and script language(s) for task automation, and use scripts to develop dynamic web sites. After that, the course will cover Simple Network Management Protocol (SNMP), and use Application Programming Interface (API) to automate networks tasks of Fault Management, Configuration Management, Accounting Management, Performance Management, and Security Management (FCAPS). The final project of the course is to develop a dynamic web site with the above five functional areas to manage Linux servers, Ethernet switches and IP routers. PREREQUISITE(S): TDC 413

TDC 413 is a prerequisite for this class.

TDC 511
TELECOMMUNICATIONS PRACTICUM
Graduate
Introduction to the design and management of data networks for the enterprise environment. Network design includes physical design, logical design, LAN, WAN, and experimental design. Network managements includes switch, router, and firewall configuration, SNMP configuration, performance measurement, and network trouble shooting. Students will have many hands-on lab exercises to strengthen their learning of network concepts. PREREQUISITE(S): TDC 411 and TDC 460 and TDC 463

TDC 411 and TDC 460 and TDC 463 are prerequisites for this class.

TDC 512
CELLULAR AND WIRELESS TELECOMMUNICATIONS
Graduate
A survey course which includes an overview of all the design and network elements that comprise the foundation of today's cellular networks. Topics include the evolution of cellular technology; basic cellular design and operation principles; cell base station design and function; a review of digital wireless technologies; radio frequency (RF) and antenna propagation basics; an overview of towers; microwave radio systems; roaming and intercarrier networking; the business side of wireless and landline interconnection to the Public Switched Telephone Network (PSTN). PREREQUISITE(S): TDC 464

TDC 464 is a prerequisite for this class.

TDC 514
COMPUTER TELEPHONY
Graduate
A study of enabling technologies allowing the integration of voice communications services with personal computers, LANs and mainframes. Telephony programming interfaces, call management software, intelligent fax/data retrieval and interactive voice response systems will be considered. PREREQUISITE(S): TDC 463 and TDC 464.

TDC 463 and TDC 464 are prerequisites for this class.
TDC 532
WIRELESS SYSTEM ENGINEERING AND DEPLOYMENT
Graduate
The course covers technologies and theories that support the design, deployment and operation of modern-day digital wireless networks. The first half of the course will address concepts of RF theory, RF propagation, base station engineering, and antenna propagation. The second half of the course focuses on distributed antenna systems (DAS), and various digital wireless technologies used on modern networks and emerging technologies for the future. IP Multimedia Subsystem (IMS) technology and architectures, along with its interfaces to future wireless networks, will also be addressed. PREREQUISITE(S): TDC 512

TDC 542
PROTOCOLS FOR ADVANCED WIRELESS NETWORKS
Graduate
This course provides students with an in-depth study of the advanced wireless communication protocols and technologies. It starts with an overview of the wireless evolution from the first generation network to the modern and future wireless technologies. It will then go on to explore major aspects of each advanced wireless technology: air interface, smart antennas, network infrastructure, network elements and their functions, QoS, security, mobility, and performance. Wireless protocols, including both User-to-Network Interface (UNI) and Network-to-Network Interface (NNI), are also studied in detail. Students will also learn new service opportunities provided by these advanced wireless technologies. PREREQUISITE(S): TDC 512

TDC 560
ADVANCED NETWORK TECHNOLOGIES AND DESIGN
Graduate
This course introduces advanced network technologies and design, including Multi-Protocol Label Switching (MPLS), MPLS Virtual Private Networks, IP storage networks, content distribution, capacity planning and traffic engineering. PREREQUISITE(S): TDC 460 AND TDC 463

TDC 562
COMPUTER-COMMUNICATION NETWORK DESIGN & ANALYSIS
Graduate
This course provides an in-depth study of Internet protocols from the perspective of network planning, simulation and troubleshooting. The course includes in-depth study of Internet traffic, traffic measurement techniques, network planning and simulation using simulation tools, and packet management techniques. PREREQUISITE(S): TDC 463

TDC 563
PROTOCOLS AND TECHNIQUES FOR DATA NETWORKS
Graduate
Advanced topics in TCP/IP including in-depth study of IPv6, TCP traffic control, and routing protocols; multicast routing protocols; upper layer protocols supporting Quality of Service (QoS); Software Defined Network (SDN); data compression techniques; and other advances in networking technologies. PREREQUISITE(S): TDC 463

TDC 567
TELECOMMUNICATION SYSTEMS DESIGN AND MANAGEMENT
Graduate
The theory and practice of Telecommunication system design. Ongoing systems management. Telecommunication management including selection of vendors/systems, structuring an RFP systems proposal analysis, computer aided telecommunications management. Telecommunication management strategies from a business perspective. PREREQUISITE(S): TDC 463
TDC 568  
**NETWORK MANAGEMENT**  
Graduate  
The five major areas of network management--fault management, performance management, security, accounting and configuration management—are discussed. Advanced topics such as fault diagnosis and isolation, event correlation, MIB design, SNMP programming, performance monitoring, service level agreements and network security architectures are also discussed. **PREREQUISITE(S):** TDC 463  

TDC 463 is a prerequisite for this class.

TDC 577  
**NETWORK SECURITY II**  
Graduate  
This course is an advanced class in network security. Topics include: Intrusion Detection and Prevention Systems; Security Engineering processes; Advanced firewall considerations; Honeypots; Incident response; Forensics; Enterprise security policy development and complex enterprise security infrastructure design and integration. **PREREQUISITE(S):** TDC 477  

TDC 477 is a prerequisite for this class.

TDC 593  
**TOPICS IN NETWORK ENGINEERING AND SECURITY**  
Graduate  
Specific topics will be selected by the instructor and will vary with each quarter. **Prerequisite(s):** See syllabus

TDC 594  
**NETWORK CAPSTONE**  
Graduate  
In this class students will synthesize knowledge from previous courses to design, build, test, and demonstrate a comprehensive network project as members of a project team. Topics introduced or reviewed, and used in completing the project, will include network requirement analysis, network architecture design, vendor evaluation, planning, experimental design, physical design, logical design, security design, testing strategy, documentation, change management, and network management strategy. Other topics include reasoning about uncertain user requirements, negotiation, online meeting techniques, and group dynamics. **PREREQUISITE(S):** TDC 477 and TDC 511

TDC 599  
**INDEPENDENT STUDY**  
Graduate  
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. (variable credit)

TDC 690  
**RESEARCH SEMINAR**  
Graduate  
Readings and discussion on current research topics. Students may register for this course no more than twice. **PREREQUISITE(S):** Consent of the instructor. (variable credit)

TDC 696  
**MASTER'S PROJECT**  
Graduate  
(4 credit hours) Students may register for this course only after their advisor has approved a written proposal for their project. **PREREQUISITE(S):** Consent of advisor. Independent study form required.

TDC 698  
**MASTER'S THESIS**  
Graduate  
Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. **PREREQUISITE(S):** Consent of advisor. Independent study form required. (2 quarter hours)
TEC 104
INTRODUCTION TO THEATRE TECHNOLOGY
Undergraduate
This course introduces students to technical systems and standard technical theatre practices. The course emphasizes proper industry-accepted nomenclature of systems, tools, materials, and integrated infrastructure and introduces the steps involved in larger processes. In addition, a specific focus of the course is the establishing of collaborative team work between peers. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 105
INTRODUCTION TO STAGE MANAGEMENT
Undergraduate
Intro to Stage Management is a required class which takes place during the fall quarter of the stage management students' first year. The class covers a combination of stage management methods used at The Theatre School and best professional practices for the beginning stage manager. Visits to The Theatre School shops and discussions with shop supervisors introduce the first year stage managers to the needs, requirements, and preferred professional methods as defined by the construction processes of the shops. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 107
THEATRE CREW
Undergraduate
Theatre Crew. All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 108
THEATRE CREW
Undergraduate
Theatre Crew. All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 109
THEATRE CREW
Undergraduate
Theatre Crew. All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 120
SOUND SOFTWARE
Undergraduate
This class is an overview of the computer programs Sound Design majors will need to create their work. This helps them get a jump-start on how to manipulate sound files on the computer within Peak and Logic, with an overview of the M7CL console they will be using when they start designing the following year. (3 quarter hours)

TEC 151
TECHNICAL DRAWING I
Undergraduate
First course in a 3 course sequence. Mechanical drawing techniques and projection theories are practiced, including drawing board geometry, scale and dimensioning, and orthographic principles. This quarter focuses on basic drafting and layout skills. (2 quarter hours)

Status as a Theatre Undergraduate or Graduate student (or concentration in Production Design in the School of Cinematic Arts) is a prerequisite for this course.
TEC 152  
TECHNICAL DRAWING I  
Undergraduate  
Second course in a 3 course sequence. Mechanical drawing techniques and projection theories are practiced, including drawing-board geometry, scale and dimensioning, and orthographic principles. This quarter focuses on correct layouts of multiple views of objects, and entertainment industry drafting conventions. (2 quarter hours)

TEC 153  
TECHNICAL DRAWING I  
Undergraduate  
Third course in a 3 course sequence. An introduction of computer aided drafting.  

TEC 154  
INTRODUCTION TO VECTOR WORKS  
Undergraduate  
Students will learn to use the Vector Works drafting program to create construction drawings and Light Plots. Classes will include an instructional lecture/demo and instructed work time. This course is a requirement for Lighting Design Majors. (2 quarter hours)

TEC 208  
SOUND TECHNOLOGY I  
Undergraduate  
This class introduces students to the fundamentals of sound technology. Students will become familiar with a range of audio components and specifications, and learn how they function, how they connect to each other, and why they are used in a modern theatre. Students will be able to put together a sound system and understand how audio signals flow thru that sound system. (3 quarter hours)

TEC 209  
SOUND TECHNOLOGY I  
Undergraduate  
This class teaches the history of the recording industry by learning about the most popular studios that shaped the sound of recorded music. You will also learn the practice and set-up of studio recording. (3 quarter hours)

TEC 210  
SOUND TECHNOLOGY I  
Undergraduate  
Every day of this class presents you with a sound system that is not producing sound. And each day there is a lesson to learn about how to approach and troubleshoot problems that often arise when designing sound for theatre. (3 quarter hours)

TEC 251  
TECHNICAL DRAWING II  
Undergraduate  
First course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I. (3 quarter hours)

TEC 151 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

TEC 152 and status as an Undergraduate or Graduate Theatre student (or Production Design concentration in the School for Cinematic Arts) are prerequisites for this class.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 252
TECHNICAL DRAWING II
Undergraduate
Second course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I. (3 quarter hours)

TEC 251 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 253
TECHNICAL DRAWING II
Undergraduate
Third course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I. (3 quarter hours)

TEC 252 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 254
COSTUME TECHNOLOGY I
Undergraduate
First course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 255
COSTUME TECHNOLOGY I
Undergraduate
Second course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes. (2 quarter hours)

TEC 254 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 256
COSTUME TECHNOLOGY I
Undergraduate
Third course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes. (2 quarter hours)

TEC 255 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 257
CONSTRUCTION AND RIGGING I
Undergraduate
First course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 258
CONSTRUCTION AND RIGGING I
Undergraduate
Second course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware. (3 quarter hours)

TEC 257 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 259
CONSTRUCTION AND RIGGING I
Undergraduate
Third course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware. (3 quarter hours)

TEC 258 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 267
STAGE MANAGEMENT I
Undergraduate
First course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day "nuts and bolts" in the stage management process. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 268
STAGE MANAGEMENT I
Undergraduate
Second course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day "nuts and bolts" in the stage management process. (2 quarter hours)

TEC 267 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 269
STAGE MANAGEMENT I
Undergraduate
Third course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day "nuts and bolts" in the stage management process. (2 quarter hours)

TEC 268 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 271
TECHNICAL PRODUCTION PRACTICE I
Undergraduate
First course in a 3 course sequence. For all technical students, this course makes production assignments based on the student's ability and experience. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 272
TECHNICAL PRODUCTION PRACTICE I
Undergraduate
Second course in a 3 course sequence. For all technical students, this course makes production assignments based on the student's ability and experience. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 273
TECHNICAL PRODUCTION PRACTICE I
Undergraduate
Third course in a 3 course sequence. For all technical students, this course makes production assignments based on the student's ability and experience. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 310
COSTUME MANAGEMENT
Undergraduate
Within the theatre there are three costume areas that can be approached from a managerial point of view: shop management, costume storage management, and wardrobe management. Each area can be independent of each other or responsibilities can overlap in a given theatre. This course will cover the responsibilities and challenges of each area from a managerial perspective.

TEC 320
TECHNICAL COLLABORATION
Undergraduate
This class is designed to teach students how to collaborate, and hone their tech cueing skills, within a small storefront theatrical setting that they will undoubtedly come across when they graduate and move into the Chicago theatre community. In this class, the students will learn how to create opening and closing cues; transitions that punctuate, build/decline, propel, and show passage of time. The cues will then be amended in the workshop, to help the students learn to work quickly in changing timings and mood. Making quick artistic decisions and implementing them efficiently is the goal. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 354
COSTUME TECHNOLOGY II
Undergraduate
First course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students' knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

TEC 256 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 355
COSTUME TECHNOLOGY II
Undergraduate
Second course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students' knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

TEC 354 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 356
COSTUME TECHNOLOGY II
Undergraduate
Third course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students' knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

TEC 355 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 357
CONSTRUCTION AND RIGGING II
Undergraduate
First course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware. (3 quarter hours)

TEC 259 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 358
CONSTRUCTION AND RIGGING II
Undergraduate
Second course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware. (3 quarter hours)

TEC 357 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 359
CONSTRUCTION AND RIGGING II
Undergraduate
Third course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware. (3 quarter hours)

TEC 358 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 367
STAGE MANAGEMENT II
Undergraduate
First course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 368
STAGE MANAGEMENT II
Undergraduate
Second course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions. (3 quarter hours)

TEC 367 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 369
STAGE MANAGEMENT II
Undergraduate
Third course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions. (3 quarter hours)

TEC 368 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 371
TECHNICAL PRODUCTION PRACTICE II
Undergraduate
First course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 372
TECHNICAL PRODUCTION PRACTICE II
Undergraduate
Second course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 373
TECHNICAL PRODUCTION PRACTICE II
Undergraduate
Third course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 399
INDEPENDENT STUDY: TECHNICAL
Undergraduate
Independent Study: Technical
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 454
COSTUME TECHNOLOGY III
Undergraduate
First course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.
TEC 356 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

TEC 455
COSTUME TECHNOLOGY III
Undergraduate
Second course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.
TEC 454 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

TEC 456
COSTUME TECHNOLOGY III
Undergraduate
Third course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.
TEC 455 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.
TEC 457
PRODUCTION MANAGEMENT SEMINAR
Undergraduate
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 458
PRODUCTION MANAGEMENT SEMINAR
Undergraduate
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 459
PRODUCTION MANAGEMENT SEMINAR
Undergraduate
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required. (3 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 460
THEATRE MANAGEMENT
Undergraduate
Theatre Management

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 467
STAGE MANAGEMENT III
Undergraduate
A continuation of 369 - this course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions. With the addition of a lab session.

TEC 369 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 468
STAGE MANAGEMENT III
Undergraduate
A continuation of 467 with the addition of a lab session.

TEC 467 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 469
STAGE MANAGEMENT III
Undergraduate
A continuation of 467 with the addition of a lab session.

TEC 468 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 471
TECHNICAL PRODUCTION PRACTICE III
Undergraduate
First course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience. (5 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 472
TECHNICAL PRODUCTION PRACTICE III
Undergraduate
Second course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience. (5 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 473
TECHNICAL PRODUCTION PRACTICE III
Undergraduate
Third course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience. (5 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 490
INTERNSHIP
Undergraduate
The internship provides the student with an opportunity to learn by working with experienced professionals in an area related to his or her area of study at The Theatre School. (5 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 105
HISTORY OF DRAMATIC LITERATURE
Undergraduate
Second course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 106
HISTORY OF DRAMATIC LITERATURE: CLASSICAL GREECE AND ROME
Undergraduate
Third course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 141
DESIGN WORKSHOP
Undergraduate
First course in a 3 course sequence. This course will introduce the student to the art of theatre design through the examination of the principles of design and composition, the elements of theatrical design, and the nature of collaboration and communication. It is intended for those who plan to work in the theatre in areas other than design. The focus is on the aesthetic, rather than the technical, aspects of design and on how design fits into the framework of the study of theatre in general. The class is intended to prepare those pursuing a career in theatre for communicating and working with designers. Assignments will emphasize the development of creative skills and a common vocabulary in order to establish a framework for informed choices, and for an appreciation of theatre design and its various areas of specialization. In this first course we will explore the fundamentals of visual design. Students will do several basic design projects during the quarter. The process of theatrical design will be introduced by working with a classic script for design analysis and preliminary design parameters.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 142  
DESIGN WORKSHOP  
Undergraduate  
Second course in a 3 course sequence. In the second quarter the class will focus on applying the fundamentals of the first course to the specific task of theatre design. The emphasis is on scenic design, but costumes, lighting, and sound will also be featured. The script analyzed in the first course will continue to be used to explore the integration of design parameters with the aesthetic and conceptual goals of production. We will also discuss the design process and some of the techniques utilized by designers. Later in the quarter another classic script will be used as the foundation for a final design project culminating in a scenic design for that script.

THE 141 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 143  
DESIGN WORKSHOP  
Undergraduate  
Third course in a 3 course sequence. In the third quarter the emphasis is on group artistic work. In this 'practicum' quarter students will collaborate in small groups on a design for a mythological story. Following that, and for the bulk of the quarter, students will be assigned to design teams consisting of director and designers. These teams will follow the entire design process, using a Shakespeare script, culminating in the formal presentation of a fully designed production. It is important to understand that the focus of this course is on design process and communication. The technical aspects of theatre design are kept to a minimum. The course aims to help theatre artists in their collaboration with theatre designers.

THE 142 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 201  
THEATRE MANAGEMENT I: INTRODUCTION TO MANAGEMENT CONCEPTS IN THE PERFORMING ARTS  
Undergraduate  
Through lecture, discussion, readings, videos, research and projects, the student learns about styles of arts leadership, contemporary issues and best practices in the field of non-profit arts management, the history of non-profit arts administration in the US including leaders in the field and opportunities for careers in the arts. Emphasis is placed on how non-profit organizations balance their commitment to the Art, the Artist and the Audience. Specific areas of non-profit arts management to be addressed include the role of the arts manager; the primacy of the mission; planning, change and adaptation; leadership and group dynamics; and human resources. (Cross Listed with PAM 301)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 202  
THEATRE MANAGEMENT I: ORGANIZATIONAL STRUCTURE AND FINANCIAL MANAGEMENT  
Undergraduate  
Through lecture, discussion and projects, the student learns about non-profit arts organizational structures, short- and long-term planning, intersection of mission/vision/values and programming with growth and sustainability, producing vs. presenting organizations, financial management, management information systems and budgeting. (Cross-listed with PAM 302)

THE 201 and status as an Undergraduate Theatre student are prerequisites for this class.

THE 203  
THEATRE MANAGEMENT I: MARKETING FOR THE ARTS  
Undergraduate  
Through lecture, discussion and projects, the student learns about strategies and objectives in marketing and promoting the performing arts. Specific focus is given to integrated marketing and communication strategies; market research and evaluation techniques; organizational image and branding; patron support services; and audience development. Students will create marketing and public relations plans and materials, both independently and on teams, which incorporate targeting audiences; promotions, publicity, and advertising; and working with various forms of media, including social networking and technology-based platforms. (Cross-listed with PAM 303)

THE 202 and status as an Undergraduate Theatre student are prerequisites for this class.

THE 204  
HISTORY OF DRAMATIC LITERATURE  
Undergraduate  
First course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasizes theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 205
HISTORY OF DRAMATIC LITERATURE
Undergraduate
Second course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasizes theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 206
HISTORY OF DRAMATIC LITERATURE
Undergraduate
Third course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasizes theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 207
THEATRE MANAGEMENT I: INSTITUTIONAL ADVANCEMENT AND COMMUNITY ENGAGEMENT
Undergraduate
Through lecture, discussion and special projects, the student learns about institutional advancement and development as well as collaborations with internal and external constituencies. Topics include forming partnerships, community outreach, board development and engagement, fundraising and grant writing, donor cultivation, and the philanthropic community. This course is the final course in the four-course sequence on Performing Arts Management, and integrates the topics, vocabulary, themes, and subjects introduced in the previous three courses. (Cross-listed with PAM 304)

THE 203 and status as an Undergraduate Theatre student are prerequisites for this class.

THE 208
UNDERAGE ONSTAGE
Undergraduate
This class examines theatrical literature from the Ancient Greeks through today to uncover how and why playwrights include children in their works and what effect this has on audiences. Contributing variables examined while studying these plays include the time period in which they were written, the social, political, and cultural context, the playwright's style, and the genre. The class will also explore the choice faced by a number of directors: whether to use children true to the age in the script, or adults who can still play young people. The vocabulary of Dramatic Text Analysis will be taught and used when providing written and oral examination of plays covered.

THE 210
SCRIPT ANALYSIS
Undergraduate
A study of classical text analysis. Using dramatic literature from naturalism to the avant garde, students will dissect how the plays work structurally.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 212
INTRODUCTION TO THEATRE STUDIES
Undergraduate
This course is a general introduction to the aesthetics of the various forms and permutations of theatrical performance. It is a study of performance as an art, with particular emphasis upon its cultural and social influences in our society, and its relationship with the other arts and humanities. The course will emphasize the development of skills for articulate verbal and written response to performances.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
Ethical decisions are a challenging part of every profession. Ethical Decision-Making in the Theatre assumes two basic questions: What is an ethical decision, and why is ethics of particular resonance for theatre professionals? Through readings, writing assignments, and class discussions, this course will work to define ethics by examining examples of both ethical and unethical behavior, will examine the ethical role that theatre plays in our society, and will debate the responsibilities that we carry into the profession as theatre artists and professionals. Through group work we will determine a framework for ethical thinking and will apply this framework to specific situations facing the theatre profession today, ultimately determining whether or not the result is an ethical decision.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

An introduction to the major developments in dramatic theory from Aristotle to the present. Through reading essays on theory along with plays, the course will create a context for understanding how the ethical, aesthetic and social philosophies of dramatic theory inform theatrical production and literature. May be taken by non-Theatre majors. THE 206 is a prerequisite for this class.

First Course in a three course sequence. A practical course introducing students to the fundamentals of dramatic writing. Students engage in a variety of writing exercises exploring various elements of writing for the stage. Each quarter students will complete short works for the stage that include 10 minute plays, one acts or first acts of longer works.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Second in a three course sequence. A practical course introducing students to the fundamentals of dramatic writing. Students engage in a variety of writing exercises exploring various elements of writing for the stage. Each quarter students will complete short works for the stage that include 10 minute plays, one acts or first acts of longer works.

THE 228 and Status as an Undergraduate Theatre student is a prerequisite for this class.

Third in a three course sequence. A practical course introducing students to the fundamentals of dramatic writing. Students engage in a variety of writing exercises exploring various elements of writing for the stage. Each quarter students will complete short works for the stage that include 10 minute plays, one acts or first acts of longer works.

THE 228 and Status as an Undergraduate Theatre student is a prerequisite for this class.
THE 232
PLAYWRIGHT'S SEMINAR I
Undergraduate

In this course students explore the underlying formal principles found in various works of architecture, music, visual art, literature, and theatre. Each week students apply these principles to the writing and presentation of short theatrical works. The goal of this course is to expose students to a wide array of approaches to dramatic form.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 234
DRAMATURGY I: INTRODUCTION TO DRAMATURGY
Undergraduate

The first course in the three-term Dramaturgy I sequence. Through reading about the history of dramaturgy, the course develops the intellectual framework necessary to think about the art and science of the discipline and focuses on the study of dramaturgical issues of the past two decades. Students work on theoretical projects. Some attendance at theatre productions may be required.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 235
DRAMATURGY I: INTRODUCTION TO PRODUCTION DRAMATURGY
Undergraduate

The second class in the three-term Dramaturgy I sequence, this course continues the work of THE 234 and emphasizes writing in a workshop context as well as the process of collaboration and hands-on collaboration itself. Much of the student work focuses on in-house theoretical theatre productions. Students who are dramaturgy-criticism majors prepare to work on their first dramaturgy project, the MFAI short plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 236
DRAMATURGY I: TYA AND PLAYWORKS DRAMATURGY
Undergraduate

The third class in the three-term Dramaturgy I sequence, this course focuses on the dramaturgy for theatrical productions aimed at young audiences. A major emphasis in the class is the preparation of the actor packets and study guides for The Theatre School's Playworks series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 246
STAGE DESIGN FOR NON-MAJORS
Undergraduate

The course introduces the essential principles of designing for the stage. The art of stage design is explored through the analysis and interpretation of dramatic literature. Students will engage in script analysis, creative research, critical writing, model building and rendering to present visual and written work that represents their personal reflection on the plays examined in the class.

THE 254
POLITICAL THEATRE
Undergraduate

This course surveys political theatre from the ancient Greeks right up until today. Through an examination of the political contents of specific plays and of theoretical reading, such as manifestos, the course instructs students in critical thinking, the relationship between form and content, and between a society and one genre of art.

THE 258
SHADOWS OF UNDERSTANDING: THE HOLOCAUST IN THEATRE AND PERFORMANCE
Undergraduate

The Holocaust of the 20th Century perpetrated and executed by Nazi Germany, has both seared itself into people's consciousness and become very much a part of world culture. Theatre and performance have been created to try to understand this event and search for meaning. Created through multiple perspectives and styles - historical and political, philosophical and religious, realistic and surrealistic, using dark humor and the power of memory, focusing on gender relations -- there is no one method of presenting the Holocaust artistically. Through a close investigation of key theatre and performances, students will discover many works that were unknown to them and that will help to shed some light on these representations more deeply, reflecting the complexity of the Holocaust in a search for understanding and ultimately seeking to answer this imperative, "Can and should art be made from representations of genocidal atrocity?"
THE 259
PERFORMING MOSAIC: JEWISH CULTURE'S INFLUENCE ON AMERICAN THEATRE AND PERFORMANCE
Undergraduate
Over the years the abundance of artistic contributions from Jewish creators--playwrights, performers, composers and lyricists, acting teachers and producers--has helped to shape the American Theatre as we know it. Through a critical reading of the plays in their context and viewing performances on video this course will explore the unique synthesis and the long and colorful relationship between Jews and theatre in America. Critical questions to be asked are: How does the ethnic mosaic of America and American values and multi-culturalism act as an incubator? How did anti-Semitism and stereotypes play a role? Does the cultural memory of the Jew as the “outsider and survivor in history” provide a particular aesthetic?

THE 260
CHICKS, MEAN GIRLS AND FEMMES FATALES: WOMEN WRITING IN THE AMERICAN THEATRE
Undergraduate
This course examines ninety years of women's dramatic writing in America from the jazz age to today. We will look at plays written by women, and theoretical essays about the plays and playwrights; biographies, as well as historical materials illuminating plays; themes and forms. Identity has always been important to American dramaturgy and women have always occupied a unique place in the theatre: as actresses, as spectators, as icons, as demons, and finally as creators. Women have been playwrights but they have also been producers and theatre adventurers.

THE 261
OCULAR PROOF: SHAKESPEARE'S INFLUENCE IN CINEMA
Undergraduate
Shakespeare's plays explore the scope and depth of the human experience. Using the visual elements of cinema, these epic stories translate effectively for modern audiences. Students will read four plays by Shakespeare, and explore their thematic and dramatic interpretations on film: two adapted from Shakespeare's themes and two cinematic versions of the plays themselves which will elucidate the 'ocular proof' of Shakespeare's influence on cinema.

THE 268
INTRODUCTION TO THE PRODUCTION PROCESS
Undergraduate
This course introduces students to the specifics of the production process and focuses on similarities and differences between the curricular perspective of the production process at The Theatre School and that of the professional world. Through readings, lecture, and discussion, students will gain an orientation to the responsibilities and expectations of first-year crew assignments, basic skills involved in stage management, examples of the production process from both the Chicago and national theatre scenes, and the concept of collaboration as a fundamental component of all production work.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 269
STAGE MANAGEMENT WORKSHOP
Undergraduate
Second course in a 2 course sequence. A survey of the stage manager's role in pre-production, rehearsal, tech and performance. The course will explore the techniques and responsibilities of the stage manager in a variety of theatrical venues.

THE 268 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 271
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
First course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 272
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
Second course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 273
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
Third course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 280
AFRICAN-AMERICAN THEATRE: GREAT BLACK PLAYS, THEN AND NOW
Undergraduate
This course introduces students to African American Theatre and the impact of African-Americans in theatre performance. The course includes critical discussions of plays and historical events, and allows students to discuss ideas such as: How non-traditional casting affects the playing and development of a theatrical performance, the need for stories of people of color, the cultural impact of society, laws and practices on the theatre and the need for the voice of minorities. The course will explore the similarities and differences of theatrical styles and tactics as they pertain to African-American theatre and performance. Warning: strong images, language and topical events are a major portion of the class discussions and assignments.

At least Sophomore Standing is a prerequisite for this course.

THE 291
PERFORMANCE WORKSHOP I
Undergraduate
The first course in a 3-course sequence. Students work on basic performance skills through individual and group exercises in acting, voice and speech, and movement. The work culminates in in-class performances of selected scenes and/or monologues from a variety of contemporary American plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 292
PERFORMANCE WORKSHOP II
Undergraduate
The second course in a 3-course sequence. Students expand on basic performance skills emphasized in Performance Workshop I. The emphasis in this second quarter focuses on the actor's approach to text, intentionality and motivation, objectives, obstacles, the tactics used in realizing physical actions in performance, and an introduction to the director-actor relationship in rehearsal.

THE 291 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 293
PERFORMANCE WORKSHOP III
Undergraduate
The third course in a 3-course sequence. The focus of the final course is on the practical dynamics of the director-actor relationship. Students in Performance Workshop 3 serve as the acting company for those students in the third quarter of the BFA Directing sequence.

THE 292 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THEATRE MANAGEMENT II: INTRODUCTION TO COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about the current environment in the world of commercial theatre. Focusing on the study of producing, students will learn about the nature of the work of the producer, general manager, and other key figures; securing rights to theatrical properties; raising capital for theatrical productions (filings, offerings, Securities and Exchange Commission); facilities and touring issues. Studies include researching commercial theatre entities and individuals.

THE 203 and status as an Undergraduate Theatre student are prerequisites for this class.

THEATRE MANAGEMENT II: HUMAN RESOURCES MANAGEMENT IN THE COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about human resource management and compliance with federal employment laws including review of employee handbooks, employee benefits, payroll and withholding, I-9, W-2 and W-4 forms, employee vs independent contractor status as well as hiring someone who is a corporation. The course reviews the history, membership, contracts and work rules of the theatrical unions in the United States, collective bargaining, labor arbitration and non-union human resource management in commercial theatre.

THE 301 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THEATRE MANAGEMENT II: FINANCIAL MANAGEMENT IN THE COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about financial planning, budgeting and accounting, box office income, booking agreements and deals, paying labor and other expenses, income statements, and settlements. Attention is paid to distinguishing between facility licensing agreements and booking contracts.

THE 302 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

WRITING ABOUT THE ARTS
Undergraduate
In this advanced course students will take a crash course in writing about the arts. Not what they think that is or how they read about it in high school, but through hands on experience, and reading literary and political journalists, as well as making filed trips. By arts we mean all the arts, but there will be, of course, a special concentration on theater. Students will have lively discussions and will come away with at least two finished writing pieces.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRACTICUM IN CRITICAL WRITING
Undergraduate
An elective course for students who are working on The Grappler. In consultation with The Grappler advisor, students whose work on The Grappler warrants receiving production practice credit will be registered for this course. The Grappler, in effect, is a production of the dramaturgy program, and as such, enables students the opportunity to gain valuable experience in critical thinking and writing, analysis, editing, and the visual layout of the blog itself. (pre-requisite, New Writing about the Arts).

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

MOVEMENT WORKSHOP
Undergraduate
By exploring a beginning approach to one or more methodologies intended to increase an actor's movement and use of self, this course provides a starting point for the analysis of the processes an actor uses to broaden, deepen, and clarify physical work on a character and as a member of an artistic ensemble.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 324
DRAMATIC THEORY
Undergraduate
This course explores the art and craft of reviewing and writing about theater and the other performing arts in a variety of different media, from newspapers to alternative weeklies to magazines. The course also aims at developing for the student a systematic understanding of the concepts and issues that have historically informed theatrical criticism, as well as those that inform the contemporary period.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 325
DRAMATIC CRITICISM
Undergraduate
Through reading, lecture, discussion, and writing practicum, the course introduces foundational concepts in descriptive and evaluative criticism. Through the process of writing critical responses to theatre performances, the course addresses topics from criteria for script evaluation to expected outcomes of the theatrical experience. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 326
DRAMATIC CRITICISM
Undergraduate
Through reading, lecture, discussion, and writing practicum, the course introduces foundational concepts in descriptive and evaluative criticism. Through the process of writing critical responses to theatre performances, the course addresses topics from criteria for script evaluation to expected outcomes of the theatrical experience. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 327
PLAYWRITING II
Undergraduate
First course in a 3 course sequence. Students in this year long course focus on the completion of a major, full length work for the stage. Through writing exercises, table work sessions, storyboarding, targeted rewriting, minimal staging, and other means, students will experience the various stages of the process of writing a major work - from conception to development to public presentation. Plays written in this course are presented in the annual Wrights of Spring Festival and considered for production in the Theatre School season.

THE 229 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 328
PLAYWRITING II
Undergraduate
Second course in a 3 course sequence. Students in this year long course focus on the completion of a major, full length work for the stage. Through writing exercises, table work sessions, storyboarding, targeted rewriting, minimal staging, and other means, students will experience the various stages of the process of writing a major work - from conception to development to public presentation. Plays written in this course are presented in the annual Wrights of Spring Festival and considered for production in the Theatre School season.

THE 327 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 329
PLAYWRITING II
Undergraduate
Third course in a 3 course sequence. Students in this year long course focus on the completion of a major, full length work for the stage. Through writing exercises, table work sessions, storyboarding, targeted rewriting, minimal staging, and other means, students will experience the various stages of the process of writing a major work - from conception to development to public presentation. Plays written in this course are presented in the annual Wrights of Spring Festival and considered for production in the Theatre School season.

THE 328 and Status as an Undergraduate Theatre student is a prerequisite for this class.
THE 330
MUSICAL THEATRE WORKSHOP
Undergraduate
This course provides an introduction to musical theatre through performance (including solo and group singing and scene preparation) and historical and theoretical studies (including vocal technique, musical theatre history and literature, and music theory).

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 332
PLAYWRIGHT'S SEMINAR II
Undergraduate
Continues and deepens the exploration of form students begin in Playwrights Seminar I. In this course students explore the underlying formal principles found in various works of architecture, music, visual art, literature, and theatre. Each week students apply these principles to the writing and presentation of short theatrical works. The goal of this course is to expose students to a wide array of approaches to dramatic form.

THE 232 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 334
DRAMATURGY II: CIVIC DRAMATURGY
Undergraduate
The first class in the three-term Dramaturgy II sequence, this course continues the work of Dramaturgy I and focuses on the preparation for work on a classical play.

THE 234, 235, 236 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 335
DRAMATURGY II: NEW PLAY DRAMATURGY
Undergraduate
This course is taught in conjunction with The Theatre School's playwriting program and focuses on the dramaturgical work involved in new play development.

THE 234, 235, 236 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 336
DRAMATURGY II: DIY DRAMATURGY
Undergraduate
The final class in the dramaturgy sequence, this course focuses on issues relevant to dramaturgical work. Students in the class will be required to write a thesis essay that emphasizes a dramaturgical issue relevant to their own production work.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 344
HAMLET IN PERFORMANCE: SCRIPT, STAGE, SCREEN
Undergraduate
It is through performance that the essence of Shakespeare materializes. In this course we will examine the relationship of Hamlet to theory, theatrical performance, and film. What makes a good production of Hamlet or a bad one? Was Hamlet rooted in economic necessity? What is lost or gained by filmic representation? To comprehend Shakespeare as a writer whose Hamlet continues to fascinate modern audiences, the course looks at not only the page-to-stage translations but also the critical cultural context in which he first achieved artistic success.

THE 345
POLITICAL THEATRE
Undergraduate
This course surveys political theatre from the ancient Greeks right up until today. Through an examination of the political contents of specific plays and of theoretical reading, such as manifestos, the course instructs students in critical thinking, the relationship between form and content, and between a society and one genre of art.
THE 371
THEATRE STUDIES PRODUCTION PRACTICE II
Undergraduate
First course in a 3 course sequence. This course makes assignments based on the student's ability and experience.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 372
THEATRE STUDIES PRODUCTION PRACTICE II
Undergraduate
Second course in a 3 course sequence. This course makes assignments based on the student's ability and experience.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 373
THEATRE STUDIES PRODUCTION PRACTICE II
Undergraduate
Third course in a 3 course sequence. This course makes assignments based on the student's ability and experience.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 381
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
First course in a 3 course sequence. The course explores the styles and aesthetics of art, architecture, fashion and the decorative arts from ancient Egyptian, Roman, Byzantine, medieval and Romanesque cultures, with emphasis on research techniques and effective use of period references in theatre disciplines. Can be taken by non-Theatre School students with permission of instructor.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 382
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
Second course in a 3 course sequence. The course explores the styles and aesthetics of art, architecture, fashion and the decorative arts from 14th to 17th centuries - Gothic, Renaissance, Baroque, and Chinese cultures - with emphasis on research techniques and effective use of period references in theatre disciplines. Can be taken by non-Theatre School students with permission of instructor.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 383
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
Third course in a 3 course sequence. The course explores the styles and aesthetics of art, architecture, fashion and the decorative arts in the 18th to 20th centuries ? Rococo, Neoclassical, Romanticism, and the industrial age, as well as Japanese and African design, with emphasis on research techniques and effective use of period references in theatre disciplines. Can be taken by non-Theatre School students with permission of instructor.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 399
INDEPENDENT STUDY
Undergraduate
Independent Study (variable credit)
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
Preparing for the Profession is the first course in the 2-term Capstone sequence. This course serves as a cumulative and summative examination of both the academic and practical components of a 4-year BFA program in theatre studies. Through readings, writing, and discussion, the course will emphasize a number of theoretical issues such as the question of ethical decision-making in theatre practice and the interrelationship between liberal studies coursework (what we make theatre about) and theatre coursework (how we make theatre). From a more practical perspective, this course will also provide students with an introduction to portfolio preparation and cover letters and resumes for prospective jobs as students prepare to enter the professional market.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Graduating students will explore the practical and philosophical issues of contemporary theatre. Topics will range from the preparation of resumes and portfolios for various positions to explorations of the role of the arts in society. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Portfolio Preparation expands and heightens the work begun in THE 408, Preparing for the Profession, and THE 410, Capstone. Students during the spring quarter course will work to develop a variety of cover letters for prospective jobs, refine and finesse their resumes, review interviewing techniques, and participate in a series of mock interviews for specific theatre companies - all in preparation for Theatre Studies participation in Graduate Showcase. (2 quarter hours)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Seminars will offer intensive study of various areas of theatrical study including history, criticism, performance and production. The courses may be organized around specific topics, issues, artists or themes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 427
PLAYWRITING III
Undergraduate
First course in a 3 course sequence. Advanced playwrights work on independent projects one on one with faculty. Students have the opportunity to refine existing work for workshop in Wrights of Spring or production in the Theatre School season. Students will also be exposed to the practical business of being a playwright entering the profession.

THE 329 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 428
PLAYWRITING III
Undergraduate
Second course in a 3 course sequence. Advanced playwrights work on independent projects one on one with faculty. Students have the opportunity to refine existing work for workshop in Wrights of Spring or production in the Theatre School season. Students will also be exposed to the practical business of being a playwright entering the profession.

THE 427 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 429
PLAYWRITING III
Undergraduate
Third course in a 3 course sequence. Advanced playwrights work on independent projects one on one with faculty. Students have the opportunity to refine existing work for workshop in Wrights of Spring or production in the Theatre School season. Students will also be exposed to the practical business of being a playwright entering the profession.

THE 428 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 430
TOPICS IN PLAYWRITING I
Undergraduate
The first in a three sequence course. In these courses, advanced playwriting students are exposed to a wide array of approaches to playwriting. Topics might include improvisational based dramatic writing, the playwright-dramaturg relationship, adaptation, collaboratively written work and writing from a multicultural framework.

THE 332 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 431
TOPICS IN PLAYWRITING II
Undergraduate
The second course in a three course sequence. In these courses, advanced playwriting students are exposed to a wide array of approaches to playwriting. Topics might include improvisational based dramatic writing, the playwright-dramaturg relationship, adaptation, collaboratively written work and writing from a multicultural framework.

THE 430 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 432
TOPICS IN PLAYWRITING III
Undergraduate
The third course in a three course sequence. In these courses, advanced playwriting students are exposed to a wide array of approaches to playwriting. Topics might include improvisational based dramatic writing, the playwright-dramaturg relationship, adaptation, collaboratively written work and writing from a multicultural framework.

THE 431 and Status as an Undergraduate Theatre student is a prerequisite for this class.
Seminars will offer intensive study of various areas of literature created for the theatre. The courses may be organized around specific playwrights, historical periods, styles or themes.

THE 204, 205, 206 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 436
SEMINAR: TOPICS IN DRAMATIC LITERATURE
Undergraduate
Seminars will offer intensive study of various areas of literature created for the theatre. The courses may be organized around specific playwrights, historical periods, styles or themes.

THE 204, 205, 206 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 471
THEATRE STUDIES PRODUCTION PRACTICE III
Undergraduate
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 472
THEATRE STUDIES PRODUCTION PRACTICE III
Undergraduate
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 473
THEATRE STUDIES PRODUCTION PRACTICE III
Undergraduate
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 490
THEATRE STUDIES INTERNSHIP
Undergraduate
The internship provides the student with an opportunity to learn by working with professionals in an area related to his/her area of study at The Theatre School. (variable credit)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 511
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training course as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of tickets sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure. (6 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 512
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure. (6 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 513
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure. (6 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 521
ARTS LEADERSHIP SYNTHESIS SEMINAR
Graduate
All study revolves around this weekly seminar that includes aspects of the Chicago Shakespeare work experience and DePaul course integration in addition to readings, field trips, projects, and time for independent study. The Synthesis Seminar is fluid and reflective, allowing for both examination of coursework and on-the-job experience. Each seminar session synthesizes the students' weekly studies, experiences both at work and in the community, independent research, and natural curiosity in close connection with Theatre School faculty, program director, and the Chicago Shakespeare department heads. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 522
ARTS LEADERSHIP SYNTHESIS SEMINAR
Graduate
All study revolves around this weekly seminar that includes aspects of the Chicago Shakespeare work experience and DePaul course integration in addition to readings, field trips, projects, and time for independent study. The Synthesis Seminar is fluid and reflective, allowing for both examination of coursework and on-the-job experience. Each seminar session synthesizes the students' weekly studies, experiences both at work and in the community, independent research, and natural curiosity in close connection with Theatre School faculty, program director, and the Chicago Shakespeare department heads. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 523
ARTS LEADERSHIP SYNTHESIS SEMINAR
Graduate
All study revolves around this weekly seminar that includes aspects of the Chicago Shakespeare work experience and DePaul course integration in addition to readings, field trips, projects, and time for independent study. The Synthesis Seminar is fluid and reflective, allowing for both examination of coursework and on-the-job experience. Each seminar session synthesizes the students' weekly studies, experiences both at work and in the community, independent research, and natural curiosity in close connection with Theatre School faculty, program director, and the Chicago Shakespeare department heads. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.
THE 534
DRAMATURGY I
Graduate
This course develops the skills necessary to begin work as a production dramaturg through a consideration of practical, historical, and theoretical issues. The students work on both in-class and school productions as well as writing critical essays.

Status as Graduate Theatre student is a prerequisite for this class.

THE 535
DRAMATURGY I
Graduate
This course develops the skills necessary to begin work as a production dramaturg through a consideration of practical, historical, and theoretical issues. The students work on both in-class and school productions as well as writing critical essays.

Status as Graduate Theatre student is a prerequisite for this class.

THE 580
AFRICAN-AMERICAN THEATRE: GREAT BLACK PLAYS, THEN AND NOW
Graduate
This course introduces students to African American Theatre and the impact of African-Americans in theatre performance. The course includes critical discussions of plays and historical events, and allows students to discuss ideas such as: How non-traditional casting affects the playing and development of a theatrical performance, the need for stories of people of color, the cultural impact of society, laws and practices on the theatre and the need for the voice of minorities. The course will explore the similarities and differences of theatrical styles and tactics as they pertain to African-American theatre and performance. Warning: strong images, language and topical events are a major portion of the class discussions and assignments.

THE 599
INDEPENDENT STUDY
Graduate
Independent Study (variable credit)

Status as Graduate Theatre student is a prerequisite for this class.

THE 601
GRADUATE SEMINAR
Graduate
The course familiarizes the student with the requisites of the thesis project and prepares the student to successfully complete this graduate requirement. Additionally, students review material in preparation for the comprehensive exam in the history of theatre and dramatic literature. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 602
GRADUATE SEMINAR
Graduate
The course familiarizes the student with the requisites of the thesis project and prepares the student to successfully complete this graduate requirement. Additionally, students review material in preparation for the comprehensive exam in the history of theatre and dramatic literature. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 603
GRADUATE SEMINAR
Graduate
The course familiarizes the student with the requisites of the thesis project and prepares the student to successfully complete this graduate requirement. Additionally, students review material in preparation for the comprehensive exam in the history of theatre and dramatic literature. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.
THE 611
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure. (6 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 612
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure. (6 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 613
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theatre. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure.

Status as Graduate Theatre student is a prerequisite for this class.

THE 621
ARTS LEADERSHIP SYNTHESIS SEMINAR
Graduate
All study revolves around this weekly seminar that includes aspects of the Chicago Shakespeare work experience and DePaul course integration in addition to readings, field trips, projects, and time for independent study. The Synthesis Seminar is fluid and reflective, allowing for both examination of coursework and on-the-job experience. Each seminar session synthesizes the students' weekly studies, experiences both at work and in the community, independent research, and natural curiosity in close connection with Theatre School faculty, program director, and the Chicago Shakespeare department heads. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 622
ARTS LEADERSHIP SYNTHESIS SEMINAR
Graduate
All study revolves around this weekly seminar that includes aspects of the Chicago Shakespeare work experience and DePaul course integration in addition to readings, field trips, projects, and time for independent study. The Synthesis Seminar is fluid and reflective, allowing for both examination of coursework and on-the-job experience. Each seminar session synthesizes the students' weekly studies, experiences both at work and in the community, independent research, and natural curiosity in close connection with Theatre School faculty, program director, and the Chicago Shakespeare department heads. (3 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.

THE 681
ARTS LEADERSHIP THESIS PROJECT
Graduate
As the final term of the Synthesis Seminar, this course focuses on the culmination of the program and successful completion of a final capstone project. These projects will be individually selected in conference with the Program Director during the second year of the program. Possible projects include analytical reports, a specific and substantial employment undertaking, and exploration and treatise with an innovative focus in the industry. (5 quarter hours)

Status as Graduate Theatre student is a prerequisite for this class.
TV 110
FOUNDATIONS OF TELEVISION
Undergraduate
This course provides an introduction and framework of the history of television production. Evolving story forms will be examined from television’s beginnings to the present. Developments in story and production styles will be analyzed and discussed. Professionals from different sectors of the Chicago television industry will speak to the class in panels.

TV 271
INTRODUCTION TO TELEVISION PRODUCTION
Undergraduate
An introduction to the basic principles, procedures, and techniques of television production. The course heavily utilizes Digital Cinema's TV studio. Students are organized in teams and create various TV broadcasts. Students learn how to operate TV switchers, TV cameras, sound, and graphic equipment. The course covers the fundamentals of producing, scripting, directing, and editing for television.

TV 289
THE BUSINESS OF TELEVISION
Undergraduate
Course provides historical background of the television business, beginning with the initial launch of the industry in the 1940s. Students examine the establishment of the regulatory system, including the Federal Communications Commission (FCC), the operational structure of stations and networks, the development of cable and satellite broadcasting, and the programming policies and strategies of the present broadcasting industry.

TV 301
THE WRITERS ROOM: DEVELOPING THE HOUR LONG DRAMA
Undergraduate
This is a creative and intense course that takes you from the germ of a story idea to a fully thought out one-hour drama. In this class, you will work with your colleagues and the instructor to enhance your skills in storytelling and in laying out a complete season of your show for cable, broadcast or digital distribution. Additionally you will develop a minimum of one outline for an episode in the season. PREREQUISITE(S): DC 307

TV 302
THE WRITERS ROOM: DEVELOPING THE HALF HOUR COMEDY
Undergraduate
This is a creative and intense course that takes you from the germ of a story idea to a fully thought out half-hour comedy series. In this class, you will work with your colleagues and the instructor to enhance your skills in storytelling and in laying out a complete season of your show for cable, broadcast or digital distribution. Additionally you will develop a minimum of one outline of an episode in the season. PREREQUISITE(S): DC 306

DC 306 is a prerequisite for this class.

TV 310
TV PRODUCTION WORKSHOP
Undergraduate
In this workshop students will produce projects for internal and external clients. Students will learn professional practices and work with clients to create projects such as promos, documentaries, commercials, short series and live events from concept inception to finished product. Through this process, students will examine different professional roles involved in the TV production process. PREREQUISITE(S): None (2 quarter hours)

TV 320
EDITING FOR TELEVISION
Undergraduate
Class emphasizes editing and post production producing under tight deadlines. Students edit commercials, trailers, and PSA projects. PREREQUISITE(S): DC 220 and TV 271

DC 220 and TV 271 are prerequisites for this class.
TV 330
DIGITAL SERIES PRODUCTION
Undergraduate
Students will write, produce, edit, screen and webcast a series of five-minute webisodes over the course of the quarter, focusing on short form storytelling for online distribution. Students will have to think creatively, collaborate and act quickly to complete the webisodes on deadline. The class will focus on short serial storytelling discussing composition, structure and editing for the various forms the work will take (narrative, documentary, sitcom, reality, etc...). Production groups will be assigned and create a series. Each student will write at least one script of that series that will be produced. All will take part in the production process. PREREQUISITE(S): DC 210 and TV 271

DC 210 and TV 271 are prerequisites for this class.

TV 351
ADVANCED TELEVISION PILOT PRODUCTION
Undergraduate
Advanced production class focused on the pre-production, casting, production, and post of a pilot script. PREREQUISITE(S): DC 210 and TV 271

DC 210 and TV 271 are prerequisites for this class.

TV 372
TOPICS IN TV PRODUCTION
Undergraduate
This course is a hands-on experience in television production of news and public affairs programs. Students learn through theory and practice the role TV Producers and their teams play in creating various TV programs. PREREQUISITE(S): None

TV 373
REALITY TELEVISION PRODUCTION
Undergraduate
Advanced production class develops a reality or factual show concept and treatment. Students will produce and cast a pilot based on their treatments. The class will focus on techniques and methods to build engagement and conflict within the reality or factual genre.

TV 381
LIVE EVENT/ TALK TV WORKSHOP
Undergraduate
In this workshop students will produce events with guest artists, presented in front of a live studio audience. Students will help prep each appearance and participate a crew members in the multi-camera production and telecasting of the events. They will learn the professional practices and positions that constitute talk-show format television production. Post-production and finishing for Web Streaming and VOD delivery will also be addressed. May be repeated for credit. (2 quarter hours)

TV 385
PRODUCING TELEVISION
Undergraduate
This is a course discussing the different roles of the television producer and show runners. Particular emphasis will be put on exploring and discussing the difference between line, segment, coordinating, field, executive (show-runner), and supervising producers. Students wear many television producer hats through the quarter, and will explore those roles in relation to different scripted and non-scripted formats. Examining and performing various tasks like budgets, staffing, and scheduling will give students a comprehensive view of the needs and responsibilities of different producers. Additional consideration will be given to the on-set roles and responsibilities of the showrunner in the television production environment. The class will culminate in the creation of short promo segments of various styles of television shows. PREREQUISITE(S): DC 210, TV 306 or TV 307

TV 398
TELEVISION CAPSTONE
Undergraduate
This course provides a television-specific capstone experience for the student. The capstone course will connect the student's television production course work with the University courses s/he has taken through three components: student-generated production packages, class/instructor discussions, and the actual production of the student's production proposal.
**TV 430**  
**DIGITAL SERIES PRODUCTION**  
**Graduate**  
Advanced production class focused on the techniques and production methods of a television program. Students will learn three-camera and one-camera directing and on-set and on-location television shooting and lighting workflows. The class will culminate in the pre-production, casting, production, and post of a television pilot script in a collaborative environment.

**TV 451**  
**ADVANCED SCRIPTED TELEVISION PRODUCTION**  
**Graduate**  
Advanced production class focused on the techniques and production methods of a television program. Students will research and create case studies comparing the methods of productions of different shows. Students will learn three-camera and on-camera directing and on-set and on-location television and lighting workflows and will create short scene studies using the different methods of production. Collaboratively, students will work to create a television pilot using an advanced production technique of their choosing.

**TV 481**  
**LIVE EVENT/ TALK TV WORKSHOP**  
**Graduate**  
In this workshop students will produce events with guest artists, presented in front of a live studio audience. Students will help prep each appearance and participate as crew members in the multi-camera production and telecasting of the events. They will learn the professional practices and positions that constitute talk-show format television production. Post-production and finishing for Web Streaming and VOD delivery will also be addressed. May be repeated for credit. (2 quarter hours)

**UIP 240**  
**CAREER PATHWAYS: EXPLORE CAREER OPTIONS**  
**Undergraduate**  
This 2-credit course will help you analyze your values, skills, personality preferences and studies as a foundation for career possibilities. You will meet with a mentor from the Chicago community, who shares your career interests, and you will examine a variety of career paths, supported by research and personal reflection.

**UIP 241**  
**UNCOVERING YOUR SKILLS**  
**Undergraduate**  
In this 2-credit course, you will learn how your academic studies, as well as your work and campus activities, will transfer to the workplace. By the end of the course, you will know how to articulate both your academic accomplishments and relevant skills in a way that will impress potential employers.

**UIP 243**  
**CAREER PATHWAYS: WORKING ABROAD**  
**Undergraduate**  
This 2-credit course is part of a 2 course series. This course will give undergraduate students who are interested in careers abroad a chance to analyze their own individual skills, values, and interests and explore career options. In addition, this course will involve a study abroad trip to London, England. In this study abroad component students will meet alumni who have worked and lived abroad. Students will research international careers ahead of the meeting and ask thoughtful and relevant questions to support their reflection assignments on careers abroad. The course will provide a self-evaluation that will help point students towards careers that best fit their interests and abilities. It will also introduce students to many different careers abroad and the process of finding work abroad and following through with the process.

**UIP 244**  
**UNCOVERING YOUR SKILLS (FOR WORKING ABROAD)**  
**Undergraduate**  
This 2-credit course is part of a two course series. The series is designed to help undergraduate students, who are interested in working abroad, with an opportunity to assess values, skills, interests and career options as well as connect with alumni who are working abroad in London, England. In this second course of the series, students will learn how their recent study abroad experience as well as their academic courses, campus activities and work experience will transfer to the workplace and be of interest to potential employers. Students will then identify the wealth of transferable skills they have already acquired, which will give employers concrete evidence of their qualifications for positions. These transferable skills, such as how to communicate clearly and effectively, the ability to be creative and solve complex problems, and having had multicultural experiences are characteristic of a liberal arts education and are much in demand. At the end of the course, students will learn how to articulate both their academic accomplishments and transferable skills in a way that will impress potential employers.
UIP 250
YOU, YOUR WORK AND THE WORLD
Undergraduate
UIP 250 integrates academic curriculum with supervised work experiences in both the private and public sectors. Internships are an essential part of a student's academic experience at DePaul. The course promotes the life-long education process of integrating work and learning; enables students to view their internship experiences within a broad world perspective; assists career decision-making; drives individual success through on-the-job experiences; and provides students with valuable networking and other career-development opportunities. The course includes 5 2-hour classroom meetings and ongoing D2L discussions. Some sections of UIP 250 are completely online. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 251
FINDING YOUR LEADERSHIP POTENTIAL
Undergraduate
In UIP 251 students will learn about the principles and practices of effective leadership through the study of leadership topics and by researching visionary leaders. Students will also strengthen key leadership skills, apply those skills at their internship sites and identify ways to be a leader in a potential career. This is a hybrid course that will meet five times per quarter. Students are required to work 100 hours. Attendance at an internship orientation is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 252
CREATIVITY AS A CHANGE AGENT IN THE WORKPLACE
Undergraduate
Creativity as a Change Agent in the Workplace examines creative innovations related to invention, leadership, advertising and marketing, teaming concepts and collaboration, and the drive behind entrepreneurship. Students are required to work at least 100 hours during the quarter. Attendance at an internship orientation meeting is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 253
CAREERS FOR THE COMMON GOOD
Undergraduate
Public service careers involve working with organizations that produce a public good. Those organizations may be nonprofits (providing low-income housing, or supporting the arts, e.g.); community organizing groups; foundations, which typically provide funding; unions; and the local, state, and federal governments. Students will familiarize themselves with career options and gain valuable networking opportunities. This hybrid course will meet five times per quarter. Students are required to work 100 hours during the quarter. Attendance at an internship orientation is required. This course will provide an opportunity to students to familiarize themselves with career opportunities in the public service sector by focusing on (a) the types of problems that public service organizations attempt to address; (b) the different strategies used by different types of public service organizations; and (c) the range of available public service jobs. The course will promote the life-long process of integrating work and learning, enable students to view their internship within a broad perspective, assist career decision-making, promote individual success through on-the-job experience, and provide students with valuable networking opportunities, all with a focus on public service careers. Attendance at an internship orientation meeting is required prior to the start of the course. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 254
CORPORATE SOCIAL RESPONSIBILITY
Undergraduate
Students will examine their own internship experiences, along with real world case studies, research, and commentary, to learn about the critical decision-making processes organizations address as they balance competitive advantages against the weight of social progress. This is an online course. Students are required to work at least 100 hours during the quarter in which they are enrolled in the class. Attendance at an internship orientation is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.
UIP 350
NAVIGATING THE CHANGING WORKPLACE
Undergraduate
UIP 350 is an online course, where students use their current work experience to examine and report on key issues impacting their organizations and personal work lives. Students will study internal and external factors affecting their work environment, traditional and virtual work arrangements, the increased influence of technology, as well as ethical questions and leadership styles. They will also develop interviewing and networking skills. Requirements for UIP 350 enrollment are more than three years of work experience or an already-completed department or UIP internship course. Students are required to work 100 hours during the quarter. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 367
GLOBAL PERSPECTIVES
Undergraduate
Global Perspectives is designed to support students’ developing viewpoints and experiential reflections during an intensive internship in Honduras. Students will explore case studies, commentary, research, and personal interviews in order to draw conclusions and apply what they’ve learned to their own future careers. Students are required to work 100 hours. Attendance at an internship orientation meeting is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

VCE 510
TSUNESABURO MAKIGUCHI’S EDUCATIONAL PHILOSOPHY AND PRACTICE (1)
Graduate
This course introduces candidates to the biography, early educational ideas, and practices of Tsunesaburo Makiguchi (1871-1944), the progenitor of value-creating pedagogy. The course covers the history and context informing Makiguchi’s early pedagogy and examines three of the five periods in the Makiguchi corpus: 1) early essays on national language instruction, Herbartian approaches, geography, efficiency of learning, play, and multiple grade classrooms; 2) major writings on human geography and community-based learning and instruction; and 3) efforts educating girls and foreign students. The course will address key ideas in the Makiguchi pedagogy such as humanitarian competition, direct observation, living standards, and the three-tiered level of identity.

VCE 511
TSUNESABURO MAKIGUCHI’S EDUCATIONAL PHILOSOPHY AND PRACTICE (2)
Graduate
This course introduces candidates to the later educational ideas and practices of Tsunesaburo Makiguchi (1871-1944), the progenitor of value-creating pedagogy. The course covers the history and context informing his later pedagogy, Buddhist conversion, and death. The course focuses on two of the five periods in the Makiguchi corpus: 1) his major writings on value-creating pedagogy and educational leadership and 2) his writings and activities after his conversion in 1928 to Nichiren Buddhism. The course will address key ideas in the Makiguchi pedagogy such as truth and value, value creation, happiness, empowerment, and faith.

VCE 520
JOSEI TODA’S EDUCATIONAL PHILOSOPHY AND PRACTICE
Graduate
This course introduces candidates to the biography, educational ideas, and practices of Josei Toda (1900-1958). The course covers the history and context informing Toda’s early and late pedagogy and examines themes in the Toda corpus, including his approaches to mathematics education, reading and composition instruction, literacy development, educating the impoverished, educational leadership, test-preparation, and his practices of value-creating pedagogy in the Jishu Gakkan. The course will address key terms in the Toda pedagogy such as value creation, human revolution, and education for students’ happiness.

VCE 531
DAISAKU IKEDA’S EDUCATIONAL PHILOSOPHY AND PRACTICE (1) MAJOR EDUCATION WRITINGS
Graduate
This course introduces candidates to the biography, educational ideas, and practices of Daisaku Ikeda (b. 1928). The course covers the history and context informing Ikeda’s early and late approaches to education and engages students in analyzing Ikeda’s major writings and speeches on education. The course will address key concepts in the Ikeda framework such as human education, Buddhist humanism, value creation, human revolution, interdependence, student-teacher relationship, happiness, world citizenship, and dialogue.
VCE 532
DAISAKU IKEDA’S EDUCATIONAL PHILOSOPHY AND PRACTICE (2) DIALOGUES
Graduate
This course introduces candidates to Daisaku Ikeda's (b. 1928) philosophy and practice of dialogue in, as, and for education. The course covers the history and context informing Ikeda's approach to dialogue across difference and examines key themes and topics in Ikeda's over 70 published dialogues with leaders in politics, peace, culture, and education. Candidates in this course will read a number of Ikeda's published dialogues on education.

VCE 533
DAISAKU IKEDA’S EDUCATIONAL PHILOSOPHY AND PRACTICE (3) PEACE PROPOSALS
Graduate
This course introduces candidates to Daisaku Ikeda's (b. 1928) philosophy and practice of peace. The course covers the history and context informing Ikeda's extensive peace proposals and engages students in reading in translation a number of Ikeda's published peace proposals, particularly as these relate to education in global contexts. The course will address key concepts in Ikeda's peace proposals such as human education, human dignity, human security, nuclear abolition, Buddhist humanism, value creation, human revolution, interdependence, student-teacher relationship, happiness, world citizenship, and dialogue.

VCE 540
THEORETICAL FOUNDATIONS OF VALUE-CREATING EDUCATION
Graduate
This course introduces candidates to the Eastern and Western theoretical foundations undergirding the educational philosophies and practices of Tsunesaburo Makiguchi, Josei Toda, and Daisaku Ikeda. Although, theoretical foundations of Makiguchi's early curriculum theorizing will be addressed, special focus will be placed on the Eastern and Western perspectives and practices informing Makiguchi's value-creating pedagogy and Ikeda's value-creating education.

VCE 550
EDUCATION FOR GLOBAL CITIZENSHIP
Graduate
This course examines education for global citizenship, or what is also called cosmopolitanism and world citizenship. Global citizenship is the idea that human individuals, irrespective of place of birth or cultural background, are citizens of the world. This course explores the idea of global citizenship and its implications for questions of justice, culture, and education. The course engages global citizenship from its historical development in the Western philosophical tradition, beginning in Ancient Greece, through the Enlightenment and into its most recent incarnation as a response to conditions of globalization. It will consider the manifestations of global citizenship beyond the West, with an especial focus on global citizenship in the pedagogy of value-creating educators Tsunesaburo Makiguchi, Josei Toda, and Daisaku Ikeda. Drawing resources from various disciplines (political theory, anthropology, moral philosophy, curriculum theory), this course seeks to understand the potential and limitations of global citizenship to respond to contemporary issues in education in times of globalization.

VCE 560
DIALOGUE AND EDUCATION
Graduate
This course examines dialogue in, as, and for education. It explores the role of dialogue across difference and dialogue relative to questions of justice, culture, and education. The course engages dialogue as conceptualized from various educational philosophers and in various contexts, including its most recent incarnation as a necessity in an interdependent, multilingual, and globalized world. The course will consider the manifestations of dialogue and education beyond the West, with an especial focus on dialogue for global citizenship in the pedagogy of value-creating educators Tsunesaburo Makiguchi, Josei Toda, and Daisaku Ikeda. Drawing resources from various disciplines (political theory, anthropology, literary theory, moral philosophy, education), this course seeks to understand the potential and limitations of dialogue in response to contemporary issues in education in times of globalization.

VCE 570
ANALYZING RESEARCH AND PRACTICE IN SOKA AND NON-SOKA SCHOOLS
Graduate
This course examines the extant research on and practice of value-creating education. Special focus will be placed on examining research and practice in the 15 Soka kindergartens, schools, and universities founded by Daisaku Ikeda across Asia and the Americas, as well as in non-Soka kindergartens, schools, and universities inspired by value-creating pedagogy worldwide. Attention will be given to questions such as what constitutes value-creating education and “Soka education” in practice by students, teachers, leaders, paraprofessionals, and institutions.
VCE 580
PRACTICAL APPLICATION OF VALUE-CREATING EDUCATION (LOCAL AND GLOBAL CONTEXTS)
Graduate
This course engages candidates in applying value-creating education in local and global contexts. A special focus is given to navigating value-creating education's twin realms of cultivating knowledge and wisdom and individual and social benefit. Candidates will actively incorporate content from at least six VCE courses on theory, research, and practice into program and curriculum design, unit and lesson planning, assessment and evaluation, and teacher and leader dispositions. Class requirement: at least 6 VCE courses (or equivalent)

VFX 200
INTRODUCTION TO VISUAL EFFECTS
Undergraduate
Introduction to the use, history, and production methodologies of visual effects. Fundamental techniques will be explored through compositing exercises and projects. PREREQUISITES: NONE

VFX 301
VISUAL EFFECTS FOR EDITING
Undergraduate
This course integrates principal visual effects tools into post-production editorial workflows. Emphasis on efficient image manipulation and basic compositing practices. PREREQUISITE(S): VFX 200

VFX 374
DIGITAL COMPOSITING I
Undergraduate
Compositing is the art and science of manipulating the content of photographic images. This project-based course builds the core tool set for compositing live-action filmed footage. PREREQUISITE(S): VFX 200

VFX 378
DIGITAL COMPOSITING II
Undergraduate
This course expands compositing into three dimensional space for set extensions and the integration of computer generated content. Emphasis on camera tracking, projections, multi-pass, and 3D compositing techniques. PREREQUISITES: VFX 374

VFX 390
ADVANCED TOPICS IN VISUAL EFFECTS
Undergraduate
Advanced study in visual effects focusing on a specific area each quarter such as: virtual reality, stereoscopic compositing, visual effects supervising, visual effects producing, optical effects, etc. May be repeated for credit.

VFX 391
VIRTUAL CINEMA
Undergraduate
Utilizing traditional, live-action, filmmaking techniques along with green screen compositing and CGI students will create high-definition narrative motion pictures. Working on a "digital backlot" students will employ HD cameras while actors work in front of a green screen for the artificial backgrounds as well as some major foreground elements to be added later during the post-production stage. Students will be expected to collaborate with animation students in the creation of their final projects. PREREQUISITES: VFX 378, DC 390

VFX 378 and DC 390 are prerequisites for this class.

VFX 474
DIGITAL COMPOSITING I
Graduate
Compositing is the art and science of manipulating the content of photographic images. This project-based course builds the core tool set for compositing live-action filmed footage. Students will be introduced to design, supervision and production of a visual effects project. PREREQUISITE(S): DC 420
VFX 478
DIGITAL COMPOSITING II
Graduate
This course expands compositing into three dimensional space for set extensions and the integration of computer generated content. Emphasis on camera tracking, projections, multi-pass, and 3D compositing techniques. Students will supervise CG integration into a visual effects project. PREREQUISITE(S): VFX 474

VFX 474 is a prerequisite for this class.

VFX 490
ADVANCED TOPICS IN VISUAL EFFECTS
Graduate
Advanced study in visual effects focusing on a specific area each quarter such as: virtual reality, stereoscopic compositing, visual effects supervising, visual effects producing, optical effects, etc. May be repeated for credit.

WGS 100
WOMEN’S LIVES: RACE/CLASS/GENDER
Undergraduate
This course will introduce students to Women's & Gender Studies by exploring a range of issues that contemporary women face through experiences stratified by race, class, gender, sexuality, and disability. Topics will include women's identities; body image and the media; women's sexuality; intimate relationships and families; women, violence and criminalization; women's work, wage discrimination, and welfare reform; women's health issues, such as reproductive rights, and medical research. Participants will have opportunities to examine ways that this stratification interacts in varied eras, cultures, and sub-cultures to shape women's lives. Students will engage in an activist focus as they are introduced to the layers of oppression that affect many women's lives, from the personal to the global. As they analyze social, cultural, and political issues through "gendered lenses", participants may expand a view of their personal lives to include a framework that encourages resilient responses to such oppression.

WGS 105
DATING IN COLLEGE: ENDING VIOLENCE AND CREATING CHANGE
Undergraduate
Growing out of a decade-long community-based service learning program held in Chicago high schools entitled "Take Back the Halls: Ending Violence in Relationships and Schools," this college course brings topics of activism, community, and ending violence into a university setting. In this course, we will meet weekly to examine personal, interpersonal, and institutionalized systems of oppression including issues of domestic violence, sexual violence, racism, homophobia, and sexism, among others. We will explore how these issues intersect with one another and will formulate strategies on how to activate against forms of violence and systems of oppression. The course will operate as a seminar in which we will discuss these issues in relation to readings, popular media, and personal lived experience.

WGS 200
WOMEN’S STUDIES IN TRANSNATIONAL CONTEXTS
Undergraduate
This course is a transnational approach to Women's & Gender Studies, examining how goods, money, and media images of women cross national in new ways. A further focus is on how this transformation of national boundaries depends not only upon political changes but also upon economic and cultural shifts. This transnational perspective pays attention to the inequalities and differences intersecting race, class, and gender that arise from new forms of globalization as well as from older histories of colonialism and racism. The course is designed to give the student an in-depth look at a world of connections that do not necessarily create similarities in how women variously experience that world. It introduces students to research by and about women that reflects transnationality in all of its possibilities and challenges.

WGS 212
GROWING UP FEMALE IN THE U.S.
Undergraduate
This course examines what it means to grow up female in the contemporary U.S. It explores the ways in which girls develop and are socialized through childhood and adolescence, focusing on how families, schools, peers, and the larger culture influence young women's lives and the ways in which race, ethnicity, class and sexual orientation affect their growth and learning and how their interaction might affect the behaviors and choices of young women as they mature.
WGS 215
GENDER AND EDUCATION
Undergraduate
This course examines gender as a social construct and its meanings within the context of educational institutions, its implications for teaching and learning, and organizational practices that may oppress and/or empower groups or individuals. Emphasis is given to social forces within the larger society that affect education and schooling; sex-stereotyping and gender bias; teacher behaviors; attitudes, practices, and expectations; student motivation and achievement; principles of non-sexist education; gender bias in settings outside of schools; current issues in the media and popular culture; and the ways in which gender bias and sexism interact with other forms of prejudice, inequality, and oppression.

WGS 225
CONSTRUCTING GENDER AND SEXUALITY
Undergraduate
This course will explore through interdisciplinary theory and research how gender and sexuality are socially constructed. It will examine how such constructions have evolved over time and how individuals of diverse identities and cultural backgrounds have been affected by the changes. Discussion will focus on the roles played by powerful societal institutions (e.g. religious, political, and medical) in effectively defining what is considered gender-appropriate behavior and legitimate sexual expression. Finally, the activism of recent social movements to psychologically and politically empower individuals who are neither heterosexual nor traditionally masculine or feminine will be explored.

WGS 230
CONTESTED BODIES
Undergraduate
This course will consider the theories and practices of differential embodiments and the experiences of bodies that don't fit the norm: queer bodies, fat bodies, transgender bodies, bodies of color. In Western/Global North cultures, the mind is given more importance than the body, and historically, oppressed groups have been associated more with bodies than minds. The course will aid in understanding and questioning the dominant norms that promote "normal" bodies and normative embodiment and offer alternative theories and practices of embodiment. Students interested in the performing arts, social and health sciences, fat studies and disability studies, as well as women's and gender studies students will find valuable frameworks in this class.

WGS 249
GENDER AND POLITICS IN IRELAND
Undergraduate
This course explores the relationship between gender and politics in Ireland, focusing on the political history of gender relations in Ireland, women's political involvement throughout the enormous changes of the 20th Century, and contemporary legal and public policy issues related to sex/gender. The attitudes and behaviors of women as voters, activists, officeholders and peace activists will be examined, as will Ireland's place in global gender issues. We will pay particular attention to the changes that have taken place since Ireland's entry into the EU, the "Celtic Tiger" transformations of the Irish economy, and the impact of the recent worldwide economic recession on gender and politics in Ireland, along with the efforts of women, North and South, to further the process of peace in the North, which has been wracked by violence for several decades. Cross-listed with IRE 249.

WGS 250
FEMINIST FRAMEWORKS
Undergraduate
This course introduces feminist theories and methodologies with an emphasis on how theoretical frameworks shape specific research, policies, and praxis. The course will provide an introductory exploration of feminist frameworks in relationship to specific issues and questions within women's studies, with some attention to the resulting research/analytic methods. The class will delineate, analyze and compare the underlying assumptions and frameworks of a variety of feminist theories (i.e. historical materialist, liberal, radical, standpoint and identity-based, critical race, postcolonial, and transnational theoretical frameworks) in relation to a set of issues and questions (e.g. violence against women, sex discrimination, reproductive rights). The class will explore the relationship between these frameworks and knowledge production, public policy, and social change efforts within national and transnational contexts. Thus, the students will be able to discern how theories frame research questions and methods, as well as how they frame policy issues and action proposals; and students will be able to analyze the theoretical frameworks comparatively.
WGS 255
DECONSTRUCTING THE DIVA
Undergraduate
This course studies the figure of the diva as a powerful cultural text, central to both understanding historical conceptions of socially normative femininity and to uncovering and examining our own present-day conceptions of what it means to be feminine, to be a woman. Through fiction, drama, biography, autobiography, film, audio recordings, and gender, the course explores representations of the diva in literature, art, and popular and high culture. The goal of this course is to investigate the ways that “diva” has actually been code for women (and sometimes men) behaving outside of societal norms. Students will do this both historically and thematically, uncovering a path in which “women behaving badly” are routinely censured, and silenced. Students will also investigate how women both resist and re-appropriate this label. This course also seeks to explore the lives of both extraordinary and ordinary women, contextualizing the historical moments that they both contested and were sometimes consumed by.

WGS 260
GENDER, SEXUALITY AND VIOLENCE
Undergraduate
This course explores the social, political, and cultural contexts of interpersonal violence with a focus on sexual violence and dating violence among and against adolescents and young adults. This course also will emphasize activist strategies and anti-violence movements.

WGS 270
WOMEN IN CARIBBEAN SOCIETIES
Undergraduate
This is a survey course which focuses on the diverse social, cultural and political realities of women in the Caribbean region across and within historical periods marked by colonialism, slavery and indentureship; anti-colonial, nationalist and labor movements; economic globalization and the emergence of the postcolony. Drawing on primary documents, images, feminist postcolonial writings, the course investigates how women of indigenous, African, Chinese, Indian and multiracial (or “mixed”) descent have been positioned within various societies, and in relationship to each other. Topics covered include visual representations of women, gender and sexuality; forms of resistance and political engagement; motherhood, reproduction and the State; women in various religious traditions; work and economic status; social class, color and femininities; popular culture.

WGS 275
BLACK FEMINIST THEORIES IN A U.S. CONTEXT
Undergraduate
This course introduces students to the major figures, statements, and movements that shape Black feminist thinking, writing and activism in the United States. Issues examined may include social and economic equity, beauty and voice, activism and social change; and the exploration of identity and subjectivity through the lens of intersectionality, including race, gender, sexual orientation, class, citizenship, and immigrant status. Throughout we will consider how Black feminist thought is situated in larger frameworks of Western feminist thought and its linkages with international feminist discourses.

WGS 290
SPECIAL TOPICS
Undergraduate
See course schedule for current offerings.

WGS 300
FEMINIST THEORIES
Undergraduate
Disagreements about what counts as feminist theory have raged as the borders of feminist discourse have shifted over the past two and a half decades. Yet most feminists continue to insist that sex/gender be considered basic categories of analysis and theory. Broadly conceived, feminist theory—historical or contemporary—represents an attempt to understand and interpret the roots and causes of women's place in the world. This course examines how different theoretical perspectives address gender, class, racial, and sexual inequalities and the method(s) proposed for social change. Students will be required to critically engage these theories in terms of how they address the commonalities and differences among women, especially insofar as these are grounded in race, class, and sexual identifications and dissonances. This course is a core requirement for the Women's & Gender Studies major.

WGS 250 is a prerequisite for this course.
WGS 303
GENDER, VIOLENCE AND RESISTANCE
Undergraduate
This course explores the social and cultural contexts of interpersonal violence in women's lives, with a focus on domestic violence, rape, harassment. The course seeks to understand how gender, race, class, sexuality, and national differences and inequalities shape the experiences of violence, the social and institutional responses to violence, and strategies for resistance and change.

WGS 306
GENDER AND FAMILIES
Undergraduate
Gender and Families is an upper-level undergraduate course that considers issues raised by the diverse roles that women, men, and children play in families. It focuses particular attention on the social construction of gender in families, and examines families in their social, economic, and political contexts. Topics covered include adult intimate relationships, the social construction of motherhood and fatherhood, and shifting gender relations of power in families, family stress and adaptation, and the impact of social policies on families' lives.

WGS 307
WOMEN IN THE MIDDLE EAST: BEYOND THE VEIL
Undergraduate
This course explores how Middle Eastern Women have been represented in the media outside of the Middle East, by Arab women scholars, and “Third World” feminists and challenges these representations by focusing on issues such as veiling, the everyday lives of Middle Eastern Women, political activism, literary works, economics and social class, and media representations.

WGS 310
FEMINIST ETHICS
Undergraduate
This course explores theoretical issues regarding women's moral experience and feminist approaches to liberation from various forms of socio-cultural and political oppression. It explores the moral status of women from their own experiences and perspectives, in contrast to traditional Western ethics' characterizations, as well as feminist ethical perspectives on oppressive social practices, such as racism and violence against women, and the ethical dimensions of difference among women.

WGS 314
ANTIRACIST FEMINISMS
Undergraduate
This course introduces students to the wide array of feminist thinking regarding ideologies of race, racism, white privilege, ethnocentrism, racial and ethnic identifications, and their relationship to gender, class, sexual and national identities and locations. The ways that racism has divided women's movements and feminist organizations will be examined along with the work of feminist scholars, writers, activists, and advocates who have articulated explicitly anti-racist theories, analyses, and programs within the U.S. as well as internationally.

WGS 316
REPRESENTATIONS OF THE BODY
Undergraduate
This course reflects the current explosion of intellectual interest in the body as a site of cultural meaning. The course addresses the questions of how the body is socially created and sustained. It explores those questions in terms of tensions between nature and culture, body and spirit, and how discourses of power converge in and on the body.

WGS 320
TRANSFORMATIVE JUSTICE: THEORY AND PRACTICE
Undergraduate
This course introduces students to transformative justice responses to violence that do not rely on state institutions. These include collective processes for support and healing, intervention, accountability, and prevention. The pedagogical praxis of learning will be through communal peacemaking circles and collective strategy sessions to create community responses to violence. Cross-listed as WGS 420.
WGS 322
FEMALE IDENTITIES: YOUNG ADULT LITERATURE
Undergraduate
This course is an introduction to Young Adult Literature as a genre and explores how this literature relates to adolescent girls' experiences in diverse cultural contexts. It addresses themes related to physical and emotional development, the development of personal values and beliefs; the construction of identity; beliefs and attitudes about the body; interpersonal relationships; gender and sexuality; and coping with change, death, belonging, alienation, and escape. Course materials are multicultural with a focus upon the experiences of female adolescents in terms of ethnicity, culture, gender, religion, disability, as well as other dimensions of difference within national and international contexts.

WGS 324
WOMEN IN THEATRE: A GLOBAL PERSPECTIVE
Undergraduate
This course examines the concepts of gender and theatrical performance with reference to history, culture, critical response, viewer interpretation, and identity in a global context. Students will study character as a dramatic construct with respect to gender, race, and class; it examines how dramatic images are as diverse as their cultural contexts; explores the concepts of reader and viewer response to theater; and interrogates the relationship between the American theatrical image and the larger global context within which images are created.

WGS 326
WOMEN AND LAW
Undergraduate
This course investigates the variety of ways in which women come into relation with the law, e.g., through laws and judicial decisions dealing with equal opportunity. Cross-listed as PSC 363.

WGS 330
LESBIAN LIVES
Undergraduate
This course explores constructions of lesbian lives, politics, and communities in the U.S. using the political cartoons of artist Alison Bechdel as a primary text, along with theoretical and historical readings. Students examine the constructions of identities and politics within lesbian culture, paying particular attention to how these have changed and evolved over time, and how community can be created and sustained. Cross-listed with WGS 430.

WGS 332
CREATING CHANGE: CONTEMPORARY GLBT POLITICS
Undergraduate
This course explores the historical roots and contemporary realities of gay, lesbian, bisexual and transgendered (GLBT) politics, nationally and internationally. GLBT groups and individuals are gaining political recognition, challenging institutions, and creating change by asserting claims to rights and protections under law. Such issues as hate crimes, marriage, AIDS, and ballot initiatives over non-discrimination law and policy have entered the political mainstream since the 1970’s. This course examines the GLBT movement, its political and social strategies, conflicts and issues, and the political roles played by its members as participants in political culture. Cross-listed as PSC 312 and LGQ 332.

WGS 334
GIRLHOOD ALL AROUND THE WORLD
Undergraduate
This course will address issues related to growing up female and coming of age in the 21st century within a global context. We will focus on the following questions, what does it mean to be female, a girl, a young woman in diverse cultural and cultural contexts, examining the ways in which community, family, peers, schools and relationships with others, popular culture and public policy influence their lived experiences, attitudes, beliefs, behaviors, choices and possibilities. The analytical framework will be rooted in understanding how the intersections of race, ethnicity, class, sexual orientation, religion, and belief systems influence notions of the self, the body, and the construction of female identities.

WGS 336
WOMEN AND FILM
Undergraduate
This course engages in the practice of critical literacy in the viewing of films, U.S. based and international, with attention to issues of representation, images, construction of identities and circulation of messages about what it means be to female in the contemporary world. Central topics will include issues and ideas about film as art, as a cultural product, and as an industry. Various genres of films will be examined and the course will also explore women as subjects, actors, producers and critics of film.
WGS 338  
SEXUAL JUSTICE: LESBIANS, GAYS AND THE LAW  
Undergraduate  
This course examines the historical and contemporary relationships between lesbians, gays, and the law in the U.S., focusing on the intersections of power, sexuality, and identity with issues of sexuality-based discrimination. It focuses on case law, along with social science and legal literature, seeking out a diversity of voices and experiences. Primary emphasis will be on cases that have come before the U.S. Supreme Court since the mid-1950's, with particular attention paid to how groups and individuals have reached out to the court system for redress of injustice and how these groups and individuals have exercised or failed to exercise power within the legal process. Cross-listed with LGQ 338.

WGS 342  
QUEER PIONEERS: CULTURE, GENDER, AND POLITICAL ACTIVISM  
Undergraduate  
This course examines some of the historical roots and contemporary realities of lesbian and gay politics in the United States through the biographies of pioneering individuals whose lives and work shaped an ongoing struggle for civil rights and social justice. The biographies of individuals who, as activists and artists, rose to challenge the conventions of culture, gender, and political exclusion will be studied in-depth to both illuminate the politics of social movement and suggest how these diverse individuals and experiences may influence past and future efforts for cultural and political change. Cross-listed with LGQ 319.

WGS 345  
WOMEN, WAR AND RESISTANCE  
Undergraduate  
This course aims to make feminist sense of contemporary wars and conflicts. It analyzes the intersections between gender, race, class, and ethnicity in national conflicts. The class traces the gendered processes of defining citizenship, national identity and security, and examines the role of institutions like the military in the construction of femininity and masculinity. The course focuses on the gendered impact of war and conflict through examining torture, mass rape, genocide, and refugee displacement.

WGS 352  
GENDER, COMMUNITY, AND ACTIVISM: COMMUNITY-BASED LEARNING IN WGS  
Undergraduate  
Gender, Community, and Activism : Community-Based Learning in WGS is an interdisciplinary experiential/service learning seminar designed for undergraduate and graduate students in the field of Women's and Gender Studies. In an effort to provide students with an experience that integrates the feminist-informed theoretical work of the classroom with practical application in the community, the course will pair students with internship opportunities at community-based organizations that focus on a cause/issue related to their particular area of scholarly interest. The course is designed to encourage learning by doing and reflecting, where students will be asked to reflect on their internship experiences outside of the classroom through course readings, written assignments, and class discussion.

WGS 354  
CONTEMPORARY KNITTING: GENDER, CRAFT, AND COMMUNITY SERVICE  
Undergraduate  
This course will explore the gendered history of knitting and its contemporary popularity as both a creative leisure-time activity and a means of providing community service. The social history and social construction of a gendered division of labor surrounding knitting, with its complexities, provide the theoretical foundation of the course. Students will learn the basic techniques of knitting and will be expected to practice their new skills in- and out-side of the classroom. They will reach a level of proficiency sufficient to producing a minimum of three contributions to service knitting projects.

WGS 355  
WOMEN AND ART  
Undergraduate  
This class considers both the history of women artists and representations of women from other cultures around the world, from prehistory to the contemporary era. In addition, it will introduce feminist methodologies that can be applied to specific case studies. Cross-listed with HAA 366, WGS 455 and MLS 474.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.
WGS 362
INTRODUCTION TO TRANSGENDER STUDIES
Undergraduate
This course considers the emerging interdisciplinary field of transgender studies and its indebtedness to transgender history and activism, paying particular attention to the relationship between trans studies in the academy and in queer and feminist communities. Introducing the student to the relationship between trans studies and feminist studies, philosophy, science and LGBTQ studies, we won't attempt to justify trans existence or identity but rather address the interlocking structures that both survey and exclude trans bodies. Cross-listed with LGQ 362.

WGS 363
GLOBALLY QUEER: TRANSNATIONAL LGBTQ POLITICS
Undergraduate
This course explores how political issues affecting lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities and individuals are linked to global and transnational politics of citizenship, power, security, and political economy. It focuses on how gender roles, relationships, and identities are constructed, deployed, challenged, and resisted around the world, paying particular attention to how these systems and structures are interconnected. Cross-listed as WGS 463.

WGS 364
POLITICAL AUTOBIOGRAPHY
Undergraduate
This class explores the interplay of political, social, economic and aesthetic factors in feminist autobiography from a transnational perspective. We examine the ways that women's autobiography is being used to write themselves into history. Story is integral in the process of healing and building solidarity and coalitions for gender based organizing. Further, autobiography creates a space for the "alter-history" to be told: the absence of testimony and experience is created for others to gain hope, strength, and deeper understanding of others and themselves. Various forms and critiques of feminist autobiographies are explored, and how each impacts the political possibilities for readers.

WGS 375
FEMINISMS OF THE BLACK DIASPORA
Undergraduate
This course is designed to offer a critical examination of black women's experiences and thought within a global and transnational framework. The course examines works by and about black women in diverse social, political, and geographical contexts: the continent of Africa, Western Europe, Canada, Latin America, the Caribbean, and Australia. Topics to be explored will include issues of politics and ideology; power and inequality based on intersectionality of race and other dimensions of identity; agency, activism, and social movements; the mass media, popular culture and social policies. Cross-listed with WGS 475.

WGS 378
UTOPIAN AND DYSTOPIAN LITERATURE AND FILM: GENDER, RACE AND BEYOND
Undergraduate
What does the future hold for humankind on this planet and elsewhere? What will life be like in the not too distant as well as far distant futures? How will societies be organized? What kinds of cultural milieus will shape life and living? How will identities be articulated and negotiated? Who will govern? Who will be in resistance? Who will be present and who will be absent? How will things come to be? These questions will form the core of our study of a genre devoted to social commentary, envisioning vastly different ideas about the future, emergent from 20th century works.

WGS 386
BLACK WOMEN'S EXPERIENCES: VARIABLE TOPICS
Undergraduate
Topics vary. This course is designed to address issues related to the particular experiences of women in the Black Diaspora. Topics will vary in terms of their particular focus in addressing issues that are important to understanding Black women's experiences in a US context and globally--making interconnections to the experiences of women of other ethnic, cultural, and national backgrounds. The course will provide occasions for students to study and examine issues such as Black women's cultural criticism, Black women in the arts, engagement in activism and social and political movements--literature and the media. Cross-listed with WGS 486 and ABD 386.
WGS 387
TEEN VIOLENCE PREVENTION
Undergraduate
This course is an interdisciplinary experiential/service learning seminar in which students will participate in, and critically reflect upon, a relationship violence prevention program in Chicago area high schools. This class will explore adolescent development, considering the ways in which economic, social, political and cultural contexts influence that development. In addition, we will focus on adolescent relationships, group work with teens, aggression and violence in intimate -- in particular teen -- relationships, and evaluation of programs to prevent teen violence. Each week students will address a set of theoretical and/or practical themes that in some way relate to teen violence and aggression, as well as prevention of such violence. Discussions of each theme will draw on course readings, lecture materials, and perhaps most importantly, students' experiences working with teens in schools.

WGS 388
QUEER THEORY: AN INTRODUCTION
Undergraduate
This course examines some of the central texts of queer theory in order to contextualize and historicize the notion of homosexuality as a primary category of identity. The issue of sexual normativity as it relates to gay and lesbian assimilation will also be discussed. Because of the significant relationship of gender and sexuality, we will also examine theories of embodiment and take up the debates around the politics of intersex and transgender identities. Formerly WMS 284.

WGS 390
WOMEN ACROSS CULTURES
Undergraduate
A critical analysis of the experiences of women around the world in diverse social contexts, examined through different disciplines, with a special emphasis on economics, politics and culture. Focus is on African, Asian and Latin American cultures and nondominant groups within western societies. (Cross-listed as WGS 490 and MLS 441)

WGS 391
METHODS AND SCHOLARSHIP IN WOMEN'S STUDIES
Undergraduate
An exploration of the transforming effects that feminist methodologies and scholarship have had in the social sciences and humanities. This course emphasizes interdisciplinary research approaches, feminist publishing, and the interplay of research and activism, as it prepares students to write a research proposal. Not recommended for non-majors. (Cross-listed as WGS 491)

WGS 392
INTERNSHIP
Undergraduate
By arrangement. Variable credit.

WGS 394
WOMEN, SELF, AND SOCIETY SEMINAR
Undergraduate
Women, Self and Society Seminar (cross-listed as Women's and Gender Studies 480 and Master's of Liberal Studies 468). Variable Topics. See course schedule for current offerings.

WGS 395
WOMEN’S STUDIES ADVANCED SEMINAR
Undergraduate
The Advanced Seminar emphasizes interdisciplinary methodology and students' independent research. Designed to be an integrating experience, the seminar will focus on discussion, response to research, and blending theory and application. The primary goal of the Advanced Seminar is the successful completion of a project or thesis reflecting your knowledge and passionate interests developed in your Women's and Gender Studies major, and it is designed to facilitate this process. Not recommended for non-majors.

WGS 399 or instructor permission is a prerequisite for this course.

WGS 398
TRAVEL/STUDY
Undergraduate
(Cross-listed with WGS 498)
WGS 399
INDEPENDENT STUDY
Undergraduate
By arrangement. Variable credit.

WGS 400
FEMINIST THEORIES
Graduate
This course is designed to provide you with an introduction to the development of some contemporary feminist theories: local, global, transnational. The theories are interpretive frameworks to analyze, understand and act in the world. The theorists/writers offer concepts to critically analyze structures and practices of oppression, privilege, resilience, and resistance; they provide frameworks for conducting feminist research, advocacy, and activism for personal, social, intellectual, and/or political change and transformation. In this course, we will examine how these theoretical perspectives seek to understand and address various systems of inequality and power and the method(s) that we - theorists, scholars, researchers, advocates, activists, artists, writers - propose for change. We will discuss how these various feminisms continue to develop and evolve in relation to one another and to changing historical, political, social, economic contexts. Cross-listed with MLS 440.

WGS 406
GENDER AND FAMILIES
Graduate
This course considers issues raised by the diverse roles that women, men, and children play in families. It focuses particular attention on the social construction of gender in families, and examines families in their social, economic, and political contexts. Topics covered include adult intimate relationships, the social construction of motherhood and fatherhood, and shifting gender relations of power in families, family stress and adaptation, and the impact of social policies on families' lives.

WGS 407
WOMEN IN THE MIDDLE EAST: BEYOND THE VEIL
Graduate
This course explores how Middle Eastern Women have been represented in the media outside of the Middle East, by Arab women scholars, and "Third World" feminists and challenges these representations by focusing on issues such as veiling, the everyday lives of Middle Eastern Women, political activism, literary works, economics and social class, and media representations.

WGS 410
FEMINIST ETHICS
Graduate
This course explores theoretical issues regarding women's moral experience and feminist approaches to liberation from various forms of socio-cultural and political oppression. It explores the moral status of women from their own experiences and perspectives, in contrast to traditional Western ethics' characterizations, as well as feminist ethical perspectives on oppressive social practices, such as racism and violence against women, and the ethical dimensions of difference among women.

WGS 414
ANTIRACIST FEMINISMS
Graduate
This course introduces students to the wide array of feminist thinking regarding ideologies of race, racism, white privilege, ethnocentrism, racial and ethnic identifications, and their relationship to gender, class, sexual and national identities and locations. The ways that racism has divided women's movements and feminist organizations will be examined along with the work of feminist scholars, writers, activists, and advocates who have articulated explicitly anti-racist theories, analyses, and programs within the U.S. as well as internationally.

WGS 415
CONTENTIONS IN FEMINIST AND GENDER THEORIZING: NEW DIRECTIONS
Graduate
This course addresses different aspects of feminist and gender theorizing and their interrelationships, focusing on exploration and critical examination of controversies and debates in the field. The course content engages students in examining philosophical, ideological, social, political, and cultural fault lines that offer opportunities to deepen and extend our understandings about discourses on women's and gender studies constructions and negotiations, in the late 20th century as well as in the early 21st century. The lens through which particular issues and ideas are viewed draws upon multiple perspectives, taking into consideration issues of culture and context, grounded in examining specificities of the local in relationship to global or transnational dynamics.
WGS 416
REPRESENTATIONS OF THE BODY
Graduate
This course reflects the current explosion of intellectual interest in the body as a site of cultural meaning. The course addresses the questions of how the body is socially created and sustained. It explores those questions in terms of tensions between nature and culture, body and spirit, and how discourses of power converge in and on the body.

WGS 420
TRANSFORMATIVE JUSTICE: THEORY AND PRACTICE
Graduate
This course introduces students to transformative justice responses to violence that do not rely on state institutions. These include collective processes for support and healing, intervention, accountability, and prevention. The pedagogical praxis of learning will be through communal peacemaking circles and collective strategy sessions to create community responses to violence. Cross-listed with WGS 320.

WGS 422
FEMALE IDENTITIES: YOUNG ADULT LITERATURE
Graduate
This course is an introduction to Young Adult Literature as a genre and explores how this literature relates to adolescent girls’ experiences in diverse cultural contexts. It addresses themes related to physical and emotional development, the development of personal values and beliefs; the construction of identity; beliefs and attitudes about the body; interpersonal relationships; gender and sexuality; and coping with change, death, belonging, alienation, and escape. Course materials are multicultural with a focus upon the experiences of female adolescents in terms of ethnicity, culture, gender, religion, disability, as well as other dimensions of difference within national and international contexts.

WGS 424
WOMEN IN THEATRE: A GLOBAL PERSPECTIVE
Graduate
This course examines the concepts of gender and theatrical performance with reference to history, culture, critical response, viewer interpretation, and identity in a global context. Students will study character as a dramatic construct with respect to gender, race, and class; it examines how dramatic images are as diverse as their cultural contexts; explores the concepts of reader and viewer response to theater; and interrogates the relationship between the American theatrical image and the larger global context within which images are created.

WGS 426
WOMEN AND LAW
Graduate
This course investigates the variety of ways in which women come into relation with the law, e.g., through laws and judicial decisions dealing with equal opportunity.

WGS 430
LESBIAN LIVES
Graduate
This course explores constructions of lesbian lives, politics, and communities in the U.S. using the political cartoons of artist Alison Bechdel as a primary text, along with theoretical and historical readings. Students examine the constructions of identities and politics within lesbian culture, paying particular attention to how these have changed and evolved over time, and how community can be created and sustained. Cross-listed with WGS 330.

WGS 440
GENDERED COMMUNICATION
Graduate
Examines research into the ways the various aspects of communication are affected by and affect the social construction of gender. Topics covered include language and language usage differences, interaction patterns and perceptions of the sexes generated through language and communication. (Cross-listed as CMNS 523)
WGS 445
WOMEN, WAR AND RESISTANCE
Graduate
This course aims to make feminist sense of contemporary wars and conflicts. It analyzes the intersections between gender, race, class, and ethnicity in national conflicts. The class traces the gendered processes of defining citizenship, national identity and security, and examines the role of institutions like the military in the construction of femininity and masculinity. The course focuses on the gendered impact of war and conflict through examining torture, mass rape, genocide, and refugee displacement. Cross-listed as WGS 345.

WGS 452
GENDER, COMMUNITY, AND ACTIVISM: COMMUNITY-BASED LEARNING IN WGS
Graduate
Gender, Community, and Activism : Community-Based Learning in WGS is an interdisciplinary experiential/service learning seminar designed for undergraduate and graduate students in the field of Women's and Gender Studies. In an effort to provide students with an experience that integrates the feminist-informed theoretical work of the classroom with practical application in the community, the course will pair students with internship opportunities at community-based organizations that focus on a cause/issue related to their particular area of scholarly interest. The course is designed to encourage learning by doing and reflecting, where students will be asked to reflect on their internship experiences outside of the classroom through course readings, written assignments, and class discussion.

WGS 455
WOMEN AND ART
Graduate
Examines the work of the most significant women artists from the Renaissance to the present. It will also investigate how women have been represented in Western art by both male and female artists. Cross-listed as MLS 474.

WGS 460
GENDER AND SOCIETY
Graduate
Attention to the growing literature and empirical research on changing patterns in economic, psychological, and social outcomes for women and men. Consideration of various theories of gender differentiation and equality. (Cross-listed as MLS 447 and SOC 470)

WGS 462
INTRODUCTION TO TRANSGENDER STUDIES
Graduate
This course considers the emerging interdisciplinary field of transgender studies and its indebtedness to transgender history and activism, paying particular attention to the relationship between trans studies in the academy and in queer and feminist communities. Introducing the student to the relationship between trans studies and feminist studies, philosophy, science and LGBTQ studies, we won't attempt to justify trans existence or identity but rather address the interlocking structures that both survey and exclude trans bodies.

WGS 463
GLOBALLY QUEER: TRANSNATIONAL LGBTQ POLITICS
Graduate
This course explores how political issues affecting lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities and individuals are linked to global and transnational politics of citizenship, power, security, and political economy. It focuses on how gender roles, relationships, and identities are constructed, deployed, challenged, and resisted around the world, paying particular attention to how these systems and structures are interconnected. Cross-listed as WGS 363.

WGS 464
POLITICAL AUTOBIOGRAPHY
Graduate
This class explores the interplay of political, social, economic and aesthetic factors in feminist autobiography from a transnational perspective. We examine the ways that women's autobiography is being used to write themselves into history. Story is integral in the process of healing and building solidarity and coalitions for gender based organizing. Further, autobiography creates a space for the "alter-history" to be told: the absence of testimony and experience is created for others to gain hope, strength, and deeper understanding of others and themselves. Various forms and critiques of feminist autobiographies are explored, and how each impacts the political possibilities for readers.
**WGS 465**  
GLOBALIZATION, TRANSNATIONALISM, AND GENDER  
Graduate  
This course examines how gender-based inequities are linked to global and transnational politics of power, security, political economy, militarism, and ecology. There will be a focus on how gender roles, relationships, and identities are constructed, deployed, challenged, and resisted around the globe, paying particular attention to how systems and structures of gender, race, class, sexuality, age, ability, culture, religion, nation etc. are interconnected. It will explore how resistance to structural inequities is constructed within and across national boundaries, paying particular attention to the role of non-governmental organizations (NGOs) worldwide and how the responses of NGOs to crises (e.g., nuclearism, uneven economic development, environmental degradation) highlight the shortcomings of state-centered decision making.

**WGS 470**  
ADVANCED PSYCHOLOGY OF WOMEN AND GENDER  
Graduate  
A review of research and theory on women's and gender, including sexist biases and methodology, feminist therapy, violence against women, and gender differences in the development of power and sexuality. Cross-listed as MLS 478 and PSY 561.

**WGS 475**  
FEMINISMS OF THE BLACK DIASPORA  
Graduate  
This course is designed to offer a critical examination of black women's experiences and thought within a global and transnational framework. The course examines works by and about black women in diverse social, political, and geographical contexts: the continent of Africa, Western Europe, Canada, Latin America, the Caribbean, and Australia. Topics to be explored will include issues of politics and ideology, power and inequality based on intersectionality of race and other dimension of identity; agency, activism, and social movements; the mass media, popular culture and social policies. Cross-listed with WGS 375.

**WGS 478**  
UTOPIAN & DYSTOPIAN LITERATURE AND FILM: GENDER, RACE AND BEYOND  
Graduate  
What does the future hold for humankind on this planet and elsewhere? What will life be like in the not too distant as well as far distant futures? How will societies be organized? What kinds of cultural milieus will shape life and living? How will identities be articulated and negotiated? Who will govern? Who will be in resistance? Who will be present and who will be absent? How will things come to be? These questions will form the core of our study of a genre devoted to social commentary, envisioning vastly different ideas about the future, emergent from 20th century works.

**WGS 480**  
SELECTED TOPICS: WOMEN, SELF AND SOCIETY  
Graduate  
Topics vary. See schedule for current offerings. [Cross-listed as MLS 468 and WGS 394]

**WGS 485**  
WOMEN, GENDER, AGENCY, AND SOCIAL CHANGE  
Graduate  
This course will examine women's individual and collective involvement in social, economic, and political resistance and change. The course will focus on women's participation with attention to the ways that gender shapes the history and development of social movements organized at local, national, regional and global levels, within and across differences of race, class, ethnicity, nationality, religion, geographic location and sexuality. Concrete examples of women's and gender movements within particular historical and geographical contexts, including within Africa, Latin America, Europe, the Middle East, Asia, the United States, among others, will be highlighted.

**WGS 486**  
BLACK WOMEN'S EXPERIENCES: VARIABLE TOPICS  
Graduate  
Topics vary. This course is designed to address issues related to the particular experiences of women in the Black Diaspora. Topics will vary in terms of their particular focus in addressing issues that are important to understanding Black women's experiences in a US context and globally: making interconnections to the experiences of women of other ethnic, cultural, and national backgrounds. The course will provide occasions for students to study and examine issues such as Black women's cultural criticism, Black women in the arts, engagement in activism and social and political movements --literature and the media.
WGS 488  
QUEER THEORY: AN INTRODUCTION  
Graduate  
This course examines some of the central texts of queer theory in order to contextualize and historicize the notion of homosexuality as a primary category of identity. The issue of sexual normativity as it relates to gay and lesbian assimilation will also be discussed. Because of the significant relationship of gender and sexuality, we will also examine theories of embodiment and take up the debates around the politics of intersex and transgender identities.

WGS 490  
WOMEN ACROSS CULTURES  
Graduate  
A critical analysis of the roles of women in societies around the world, with special emphasis on economics, politics and culture. Focus is on African, Asian and Latin American cultures and nondominant groups within Western societies. Topics vary each quarter. (Cross-listed as MLS 441 and WGS 390)

WGS 491  
METHODS AND SCHOLARSHIP IN WOMEN'S & GENDER STUDIES  
Graduate  
An exploration of the transforming effects that feminist methodologies and scholarship have had in the social sciences and humanities. This course emphasizes interdisciplinary research approaches, feminist publishing, and the interplay of research and activism, as it prepares students to write a research proposal.

WGS 400 is a prerequisite for this course.

WGS 493  
FINAL PROJECT INDEPENDENT RESEARCH  
Graduate  
This course involves individual investigation and research (toward completion of the Master's thesis, project, or portfolio) under the supervision of a faculty member. A minimum of 4 credit hours required. Course can be repeated for a total of 8 credit hours.

WGS 495  
SPECIAL TOPICS IN WOMEN'S STUDIES  
Graduate  
Topics vary. See schedule for current offerings.

WGS 496  
CANDIDACY CONTINUATION  
Graduate  
Students who must take extra time to complete the requirements for the Master's thesis, project, or portfolio must enroll in candidacy continuation each quarter of the academic year until this Master's requirement has been completed. Non-credit.

WGS 497  
CANDIDACY MAINTENANCE  
Graduate  
Masters candidates who are not actively working on their thesis, project, or portfolio during a given quarter but who want to maintain active university status can register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit.

WGS 498  
FOREIGN STUDY  
Graduate  
Foreign Study

WGS 499  
INDEPENDENT STUDY  
Graduate
WLE 326
THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
Undergraduate
This course introduces key foundational theories of English as a second language and world language education that form the basis of our development as language education practitioners and professionals. The course explores theories of language, theories of learning and learners, and theory-driven teaching, as well as the philosophical paradigms that inform them. Foundational theories are introduced as problem-solving tools that provide interdisciplinary perspectives of English as a second language and world language education, and as frameworks for critically reading literature on language education theory, research, and methods.

WLE 349
STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
Undergraduate
This course prepares candidates to teach world languages at the elementary, middle and secondary school levels consonant with an aligned approach to meeting national and state WLE standards and Common Core standards. It examines the theory and practice of traditional or standard methods of teaching world languages (e.g., communicative approach, natural approach, etc.) with an emphasis on developing alternative, post-method strategies and using diverse resources, as well as on reformulating world languages instruction to integrate subject matter content into the curriculum, including science, social studies, math, fine arts, etc. Engages candidates in understanding and applying the "Five Cs"-Communication, Cultures, Connections, Comparisons, and Communities outlined in the national standards toward this end. Lesson and unit development, evaluation/assessment, and classroom management also will be discussed. Issues that emerge in planning and instruction are discussed and deliberated through university classroom experiences as well as required fieldwork (20/15 hours; level 1 in language of certification).

WLE 360
SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
Undergraduate
This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective at the K-12 levels. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and SLA; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second and world language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences (20/15 hours; level 2).

WLE 370
SECOND & WORLD LANGUAGE LITERACIES AND CULTURES
Undergraduate
This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the word. Especial focus is placed on these topics as they pertain to the extant research on language, literacy, and culture represented in the WLE certification language communities, as well as in the literature, art, music, and popular culture of those communities as means of advocating students' sense of identity as global citizens (20/15 hours; level 1).

WLE 375
WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
Undergraduate
This course engages students in WLE curriculum development and language program advocacy, creation, and sustainability based on an examination of federal and state WLE history and policies and on a review of national and state standards. Reviews theory and application of curriculum development to world language instructional programs, such as design, scope and sequence, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal world language education program models are examined and analyzed in light of WLE history, policy, and standards (20/15 hours; level 1).

WLE 326, WLE 349, WLE 360, WLE 370 and BBE 307 are prerequisites for this class.

WLE 384
CAPSTONE I IN WORLD LANGUAGE EDUCATION
Undergraduate
This course is taken concurrently with WLE 385, Student Teaching in World Languages. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and career as teachers. COREQUISITE(S): WLE 385.
WLE 385
STUDENT TEACHING IN WORLD LANGUAGES
Undergraduate
(12 credits) Student teaching is the culminating experience of the World Languages certification program. It is a ten-week, 30-hour/week experience. Students must successfully complete student teaching with a grade of B- or better in a language classroom in which they are seeking certification to teach. The course is taken concurrently with WLE 384, World Languages Capstone. Application and approval required. Open only to DePaul students. (12 credit hours)

WRD 98
PREPARATION FOR COLLEGE READING
Undergraduate
For students who need extra preparation in the development of college reading skills. Emphasizes development of reading strategies suitable for understanding a range of texts.

WRD 102
BASIC WRITING II
Undergraduate
WRD 102 prepares students for college-level writing by examining composing processes and the way writers function in a community of other writers and readers. The course helps students increase the effectiveness of their writing practices and develop a sense of confidence in themselves as writers. The course is ideal for students with less writing experience or those who want more exposure before taking WRD 103.

WRD 103
COMPOSITION AND RHETORIC I
Undergraduate
An introduction to the forms, expectations, and conventions of writing at the college level. Emphasis on audience analysis, rhetorical stance, and the nature of the composing process.

WRD 103X
COMPOSITION AND RHETORIC I (FOR NON-NATIVE SPEAKERS)
Undergraduate
An introduction to the forms, expectations, and conventions of writing at the college level. Emphasis on audience analysis, rhetorical stance, and the nature of the composing process. These sections are specifically designed for students whose first or dominant language is not English. Students will have the opportunity to focus on writing challenges that are unique to writing in a second or additional language, including increased attention to language skills and to the cultural expectations of U.S. academic audiences. The lower enrollment capacity of this section will allow for greater attention to students' individual writing needs. These sections address the same course objectives all WRD 103 sections.

WRD 104
COMPOSITION AND RHETORIC II
Undergraduate
Developing a convincing argument with information and evidence drawn from a variety of sources. Emphasis on effective research strategies and professional use of sources.

WRD 104X
COMPOSITION & RHETORIC II (FOR NON-NATIVE SPEAKERS)
Undergraduate
Developing a convincing argument with information and evidence drawn from a variety of sources. Emphasis on effective research strategies and professional use of sources. These sections of WRD 104 are specifically designed for students whose first or dominant language is not English. Students will have the opportunity to focus on writing challenges that are unique to writing in a second or additional language, including increased attention to language skills and to the cultural expectations of U.S. academic audiences. These sections address the same course objectives all WRD 104 sections.

WRD 103 or WRD 103X or equivalent is a prerequisite for this class. A grade of C- or better is required in the prerequisite class.
WRD 108
COLLEGE READING
Undergraduate
Devoted to the acquisition and development of analytical, critical, and interactive reading skills essential to continued success in college, regardless of intended major. Emphasizes effective reading techniques, vocabulary development, and comprehension improvement applicable to all academic disciplines.

WRD 111
TRANSITION DEPAUL
Undergraduate
This course prepares new international transfer students for academic success at DePaul. It serves as an introduction to academic support services and opportunities available at DePaul, and the conventions of US academic culture, and the City of Chicago as an academic and culture resource. Topics include differences in approaches to teaching and learning; creating and sustaining productive student-faculty relationships; successful study patterns; and the relationship between liberal and professional education in American culture. Students will do assigned reading on course topics, keep a reflective journal, and engage with each other through discussion and presentation.

WRD 200
WRITING IN THE DISCIPLINES
Undergraduate
Preparation for writing in academic disciplines. Special attention to forms, conventions, and expectations in university writing at the intermediate level.

WRD 201
DIGITAL WRITING
Undergraduate
An introduction to the study and practice of writing in the digital age. Students will consider a range of digital text types, such as web pages, social media, blogs, online videos, and interactive media, to better understand the technologies, rhetorical conventions, and practices that contribute to and emerge from digital texts. Students will also produce digital texts of their own. No prior digital production experience is necessary.

WRD 103 (C- or better required) or HON 100 is a prerequisite for this course.

WRD 202
PROFESSIONAL WRITING FOR BUSINESS
Undergraduate
Effective organization and design of documents common in business life - letters, memos, reports, and resumes. Attention to audience, purpose, and style. Two quarter hours credit.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 202X
PROFESSIONAL WRITING FOR BUSINESS (FOR NON-NATIVE SPEAKERS)
Undergraduate
Effective organization and design of documents common in business life - letters, memos, reports, and resumes. Attention to audience, purpose, and style. These sections are specifically designed for students whose first or dominant language is not English. Students will have the opportunity to focus on writing challenges that are unique to writing in a second or additional language, including increased attention to language skills and to the cultural expectations of both U.S. and international business audiences. These sections address the same course objectives all WRD 202 sections. Two quarter hours credit.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 203
STYLE FOR WRITERS
Undergraduate
This course provides students with opportunities to explore stylistic choices in written prose. Students will examine both published work and their own writing to explore how to manipulate language in specific contexts to achieve specific ends. Writing workshops will help students provide and receive constructive comments aimed at revision of drafts.
WRD 204
TECHNICAL WRITING
Undergraduate
In this course, students learn to communicate and interpret specialized information for readers' practical use. The course highlights the action-orientated goals of technical writing and the importance of accurately communicating information to users. The course provides an overview of key issues related to technical writing such as usability, audience analysis, designing pages and screens, effective collaboration with peers, interpreting and presenting data, and writing clearly and persuasively. Students learn to write, revise and present common technical writing genres such as instructions, tutorials, manuals, reports, product/process descriptions, proposals, and oral presentations.

WRD 205
HISTORY OF LITERACIES AND WRITING
Undergraduate
Literacy is traditionally defined as the ability to read and write. This course will expand that definition to also explore the technological, cultural, and political aspects of literacy from the earliest archeological record of writing to modern information technology and digital literacy. Students will examine practices and narratives surrounding literacy, learn how both physical media and social power constrain what information gets recorded and how, and question the implications of these constraints on the ways we define and engage literacy and writing.

WRD 206
PROFESSIONAL WRITING
Undergraduate
In this introductory course, students learn fundamentals of professional writing, with a special focus on distinguishing academic writing from workplace writing. The course provides a solid foundation that students can build on as they develop specializations in their professional fields. Through a series of short assignments, students explore the structure and format of typical professional writing documents, examine a variety of workplace writing situations, and begin developing a clear and concise style appropriate for professional settings. Students analyze and write a number of workplace genres, such as memos, emails, letters, resumes, short reports, web documents, and professional presentations.

WRD 207
INTRODUCTION TO WRITING AND RHETORIC
Undergraduate
An introduction to key concepts in the history of rhetoric, the development and current state of rhetoric and writing, and the impact of rhetoric on contemporary life. The course aims at understanding rhetoric as a theoretical approach, a set of practices, and a discipline.

WRD 208
INTRODUCTION TO REASONED DISCOURSE
Undergraduate
Study of the problems of reasoned discourse, emphasizing invention and construction of arguments for varied audiences.

WRD 209
GENRE AND DISCOURSE
Undergraduate
In this class, students examine how discourse and genres are used to frame issues and instantiate values and beliefs. Students will explore theories of genre and discourse, learn to analyze how genre and discourse operate, understand the relationship of formal features to beliefs and practices, and produce texts in a variety of genres.

WRD 240
ARGUMENTATIVE WRITING
Undergraduate
Students in this course will learn techniques for constructing argumentative writing, working with rhetorical methods of inventing and arranging written arguments. Students will examine different genres of argument, but the focus in the course will be on student production and revision. This course builds on and extends skills in argumentative writing that students gain in the first-year writing program.

WRD 104 or HON 100 is a prerequisite for this course.
WRD 241
THE ESSAY FROM PRINT TO NEW MEDIA
Undergraduate

An introduction to one of the most elastic of artistic forms, this course explores the history of the essay from its origins in alphabetic text to contemporary renditions in film, audio, and interactive media. With close attention to social, political, and historical contexts, students will consider how essayists join content with form to simultaneously meet aesthetic and persuasive ends. By composing their own essays in varied media, students will explore the essay as both a work of art and a work of social action.

WRD 260
RHETORICAL ANALYSIS
Undergraduate

This course will introduce students to methods for analyzing symbolic acts and artifacts in order to understand the perspectives and motivations which shaped them. Students will analyze a variety of rhetorical artifacts from several perspectives including classical rhetoric, argumentation, metaphor, feminism, dramatism, and ethics. Through analysis, students will learn how messages are constructed in order to produce certain effects as well as how to question and respond critically to communication.

WRD 261
DIGITAL CULTURE
Undergraduate

Digital information technologies proliferate in our culture, significantly impacting the rhetorical contexts in which we work and play. This course will explore a variety of topics related to the expansion of digital culture and rhetoric such as the development of the Internet, gaming; the construction of personal and group identity; media convergence; the distribution of work; community, group, and subculture formation online; political and policy issues; cyberterrorism; privacy, and the representation of technology in popular media.

WRD 262
THE RHETORIC OF EVERYDAY TEXTS
Undergraduate

From transit signs to nutritional information, to tagging, to social media posts, we encounter “everyday texts” continually in our day-to-day lives. This course examines the social, rhetorical, and technological contexts that form and are formed by such texts, while examining how and why such texts can and do become notable or even extraordinary. The course considers print, digital, and hybrid platforms for both readers and writers. No prior experience with production technologies is necessary.

WRD 263
READING BETWEEN THE GROOVES: THE RHETORICAL POWER OF POPULAR MUSIC
Undergraduate

How do songs from rock, hip hop, R&B, country, folk, and other genres make arguments? How do performances by popular musicians offer perspectives on society, politics, and culture? This course takes up these and other questions as it analyzes the power of popular music, guided by the premise that it is both serious and rhetorically complex. The course explores the cultural work of diverse genres, and students may apply what they learn to artists of their choice in papers and projects.

WRD 264
LANGUAGE, SELF AND SOCIETY
Undergraduate

This course will explore the way language fundamentally shapes culture and identity. The course will focus particular attention on how we use language and its relationship to thought and power.

WRD 103 (C- or better required) or HON 100 is a prerequisite for this course.

WRD 265
SOCIAL MOVEMENT, SOCIAL MEDIA, AND AMERICAN IDENTITIES
Undergraduate

From civil rights and black power movements to women’s liberation and gay rights judicial activism, Americans have participated in social movements to protest precarious conditions and achieve a more livable life. This course introduces students to the study of social movements from a rhetorical perspective and explores ways that social media has reoriented American political participation by democratizing access to information, disrupting old models of power distribution, and allowing for rapid, broad coalition building and immediate moments of multimodal protest.

WRD 103 (C- or better required) or HON 100 is a prerequisite for this course.
WRD 270
ACADEMIC READING FOR INTERNATIONAL/MULTILINGUAL STUDENTS
Undergraduate
This course prepares international/multilingual students to become more efficient, effective, and critical readers. By developing a range of focused reading strategies, and a deeper awareness of how academic texts function rhetorically within scholarly conversations, students will strengthen their abilities to understand, analyze, and respond to academic readings. Students will practice applying critical reading skills to selected texts from their specific majors. WRD 103 is recommended.

WRD 281
WRITING CENSORSHIP
Undergraduate
An introduction to censorship as both a mechanism of social control and a fundamental element of all rhetorical situations. Explores the history of censorship in the West and engages theoretical questions about the power of language and its suppression as a force for violence. Affords students opportunities to experiment with effective strategies of resistance by writing under varied conditions of censorship.

WRD 282
ETHICS OF PUBLIC AND PROFESSIONAL WRITING
Undergraduate
This course introduces a critical moral philosophical framework for the study of public and professional writing. Students will learn to critique historic and contemporary texts from an ethical perspective. Students will also explore contemporary ethical issues for writing in digital environments and varied professional contexts.

WRD 283
ENVIRONMENTAL WRITING
Undergraduate
In this class, students will develop knowledge, critical thinking skills, and multi-modal literacies that define writing practices in the environmental community. In order to become more proficient writers, students will analyze and practice a range of genres relevant to environmental issues in the workplace and the larger public sphere, from professional documents such as proposals and reports to research articles aimed at the general public and published in traditional or electronic media. Students will also analyze various new-media genres as indicators of public interests and as tools for reaching and engaging diverse audiences. WRD 104 is recommended.

WRD 284
SPORTS WRITING IN AMERICA: MYTHS, MEMORIES, HEROES AND VILLAINS
Undergraduate
This course explores the role of writing within and across multiple sports, viewed through historic, cultural, social, and economic lenses. Students will read, analyze, and discuss multiple genres, including reporting, memoir/nonfiction, and argument, and draft and revise their own writing in these genres on the sports of their choice. WRD 104 is recommended.

WRD 285
TRUTH IN DISGUISE: THE RHETORIC OF SATIRE
Undergraduate
Attention to satire as a rhetorical strategy used to persuade, convince, inform, and provoke change or action. Examination of the use of satire to comment on social and political issues across multiple modes and media through the study of particular satirical texts in contemporary and historical contexts. Through the study and composition of satire, students will develop a critical attitude toward satire and the capacity to use satire with rhetorical awareness.

WRD 103 (C- or better required) or HON 100 is a prerequisite for this course.
WRD 286
WRITING WITH PHOTOGRAPHS
Undergraduate
This course explores how writers can use photographs and photography in their writing process and in their texts. Students will use writing to engage with photographs from their personal archives and from public collections, as well as shoot their own photographs and write accompanying text. The course also introduces literary, documentary, and theoretical works that model how photographs and language can work together. No prior experience with photography is necessary, though students must have access to a camera or camera phone.

WRD 287
THE COMIC BOOK AS VISUAL ARGUMENT
Undergraduate
This course explores the rhetorical interplay between text and image in the medium of the comic book. The study of the rhetorical art of graphic discourse and the various techniques used by authors and artists working in the medium. Students will examine how the genre of the comic combines text and image to introduce real social questions and argue for interpretations of historical events. Students will move from written analysis of texts to production of their own visual texts in the graphic medium using digital applications.

WRD 288
DIGITAL STORYTELLING
Undergraduate
This course is an introduction to the theory and practice of digital storytelling, a workshop-based community arts process in which trained facilitators help individuals to write and produce short videos that combine personal photographs with a meaningful personal narrative. In recent years, communities and organizations worldwide have used digital storytelling initiatives to start important community discussions and create powerful media for outreach and advocacy. Students will read and discuss foundational digital storytelling texts, create their own digital story, and facilitate a digital storytelling workshop for members of a Chicago-area community group.

WRD 290
WRITER’S TOOLS WORKSHOP
Undergraduate
Introduction to and practical engagement with specific digital technologies and/or multimodal environments. Two Credit Hours. Tools/topics vary. Can be repeated for credit as topics vary.

WRD 291
THE SCIENTIFIC RESEARCH POSTER
Undergraduate
An introduction to the poster as a mode for presenting scientific research in conference settings. In-class workshops will step students through the poster writing and design process, including modules on project planning, the composition and organization of written content, data visualization, fundamentals of visual design and how to talk about your poster with conference attendees. Students will compose and design a poster on a timeline to present at DePaul’s annual Natural Science, Mathematics and Technology Showcase.

WRD 300
COMPOSITION AND STYLE
Undergraduate
Advanced instruction in invention, arrangement, and style, toward developing clear and effective prose styles.

WRD 301
WRITING IN WORKPLACE CONTEXTS
Undergraduate
Students examine the roles of writing (transactional, informative, and persuasive) in professional contexts and learn common features of workplace writing situations (internal vs. external documents, collaboration, distribution of expertise and authority, content management, globalization) and strategies for responding to them. They will also learn about stylistic conventions common to workplace genres (building an effective professional persona through writing - tone, document design) and their typical formats. Theory and analysis will ground discussions of production and production-based projects.
WRD 306
RHETORICAL TRADITIONS
Undergraduate
In this historical survey course, students examine a variety of traditions in rhetorical thought. Students will become familiar with key concepts in the Western rhetorical traditional, while also interrogating the centrality of that tradition by examining marginalized or resistant currents in rhetorical thought.

WRD 309
TOPICS IN WRITING, RHETORIC AND DISCOURSE
Undergraduate
May be repeated for credit as topics vary. See schedule for current offerings.

WRD 103 (C- or better required) or HON 100 is a prerequisite for this course.

WRD 320
TOPICS IN PROFESSIONAL WRITING
Undergraduate
May be repeated for credit as topics vary. This course provides students opportunities to explore concepts in depth and apply specialized practices related to a rotating selection of dedicated topics in technical and professional writing.

WRD 321
WRITING IN THE LEGAL PROFESSION
Undergraduate
This course explores the role of writing, thinking, and problem-solving in legal contexts. Students will gain an understanding of the principles involved in writing effective narrative and persuasive prose for a variety of legal purposes, and be able to apply these principles to their own writing. Students who completed this course as WRD 320, Topics in Professional Writing, may not take the course as WRD 321.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 322
WRITING AND METADATA
Undergraduate
Writing in digital environments often involves layers of information beyond the written text itself, ranging from the markup languages that identify and structure the text, to hashtags and similar grouping data. Students in this class explore the way those additional layers shape meaning and rhetorical strategies in for both human and machine readers in digital environments; the semantic elements of markup languages; and cultural understandings of metadata, machine reading, and privacy.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 323
EDITING
Undergraduate
Students will explore a range of practices associated with the revision of prose for publication. Students will learn to edit for style and consistency at the document, paragraph, and sentence levels. They will also compare and learn to apply differing style guides, learn technologies central to modern editorial practice, and examine related topics such as the Plain Language Movement and preparing documents for translation.

WRD 324
WRITING FOR PUBLIC HEALTH AND HEALTH CARE
Undergraduate
This course will explore writing in public health and health care. You will analyze contemporary writing produced by government and NGOs, research organizations, public and professional forums and related sites of action. You will apply what you learn to a health writing project on a topic of your own choice.
WRD 330
LANGUAGE AND LINGUISTICS
Undergraduate
This course introduces students to major concepts in and approaches to studying language, covering topics such as language structure, language acquisition, dialect variation, language and identity, language policy, and literacy. The course presumes no prior knowledge of linguistics and will be relevant to students studying in a wide variety of majors.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 340
WRITING AND REVISING
Undergraduate
This course operates on the assumption that the secret to strong writing is revision. Students will learn about theories of revision, studying how successful writers revise, and will then put those techniques into practice. The goal of the course is to develop strategies and understanding of the rhetorical situations of writing in different contexts. Students will work on developing voice, taking ownership of work, and creating strong, well supported arguments.

WRD 345
GHOSTWRITING
Undergraduate
This course explores the phenomenon of ghostwriting and affords students opportunities to develop ghostwritten projects. Considers the appearance of ghostwriting across historical and contemporary genres, in print and online, in academic, professional, and imaginative contexts. An introduction to interview as research method and attention to related ethical questions will inform students' own ghostwriting.

WRD 103 (C- or better required) or HON 100 is a prerequisite for this course.

WRD 360
TOPICS IN RHETORIC
Undergraduate
May be repeated for credit as topics vary. This course provides students opportunities to explore concepts in depth and apply specialized practices related to a rotating selection of dedicated topics in the theory and history of rhetoric.

WRD 361
TOPICS IN ALTERNATIVE RHETORICS
Undergraduate
Women, ethnic minorities, gay/lesbian/and transgender writers, and individuals with disabilities are forced to navigate the dominant culture through strategies that draw upon and transform dominant cultural practices. Courses in this topics category will consider questions raised by alternative rhetorics and examine the way rhetorical acts construct such categories and shape the ways in which people are included or excluded from social groups and movements through language use. Students will examine and assess these mediation strategies while also developing theoretical frameworks to analyze and understand them. May be repeated for credit as topics vary.

WRD 362
SEMIOTICS
Undergraduate
The study of “the sign,” semiotics extends the notion of “text” beyond the written page to any artifact that can "stand for" something else?not only pictures, sounds, gestures, and body language, but also objects and even the spaces between them! Semiotics is therefore the study of making meaning (both "encoding" and "decoding") in its widest possible sense. You will be invited to explore in course projects?drawing on the full range of media and signifying practices?the value of semiotic principles to your program of study and/or non-academic area/s of interest.

WRD 363
VISUAL RHETORIC
Undergraduate
As both consumers and producers, we engage daily with a variety of textual and graphical elements. Participation in this course encourages critical consideration of such encounters. Students will examine the assumptions and practices that inform the authorship and interpretation of both print-based and electronic texts. The course will explore cultural and rhetorical frameworks for understanding, evaluating, and composing visual elements in various media.
At the start of the 21st century, English is a global language used in commerce, technology, research, education, and even popular culture around the world. This course explores the role and nature of the English language in a global context. Course readings and discussions will examine the historical context and cultural legacy of the spread of English, global varieties of English, uses and contexts of English, issues of ownership and identity, and the future of English.

This course is for any student who is interested in both mentoring young writers and understanding how writing in community functions as an identity-building process. In this class, you will have the opportunity to not only provide extensive online feedback for middle school writers engaged in writing projects, but also to pay occasional visits to them at their school. Course readings will address the value of writing groups and communities, attention to writing as a process, and best practices for effective and empowering feedback on writing. You will also reflect extensively on the intersection of identity, community, and mentoring through writing.

WRD 103 (C- or better required) or HON 100 is a prerequisite for this course.

The study and production of writing about art as social engagement, this course explores various genres of arts writing and their functions from the perspective of critic and artist. Combines fieldwork in the Chicago arts scene "collaborating and conversing with artists and professional writers" with classroom-based discussion. Students produce a portfolio of writing about art in a variety of genres including the critical, informative, and reflective.

Using writing within community service. See schedule for current offerings.

WRD 104 or HON 100 is a prerequisite for this course.

Students explore the theory and practice of learning and teaching English as a Second Language (ESL) through readings and classroom discussion while teaching or tutoring adult ESL learners at a Chicago-area community center. Classroom and service experiences together help students develop an understanding of second language learning, teaching strategies and approaches, and issues of immigration and language policy in both U.S. and global contexts. (Can count for both JYEL credit and minor credit.)

This course encourages a reflective stance on the development of the individual writer through the educational process, particularly as that relates to the interplay of the Liberal Studies experience and the WRD major. Students will be asked to look back for the purpose of looking forward, to consider how this broad preparation to excel at rhetorical action across communities of discourse prepares one for public life as a writer. Students will develop a reflective portfolio of prior work and prepare new writing for contexts beyond undergraduate life.

Introduction to current theories and practices in writing instruction; prepares students to develop and administer writing centers and to work as writing consultants. (Writing Center practicum required).

WRD 104 or HON 100 is a prerequisite for this course.
WRD 396
WRITING FELLOWS THEORY AND PRACTICE
Undergraduate
A seminar on tutoring writing across the curriculum. Students will read articles and do writing assignments designed to familiarize Fellows with theories of writing and tutoring and to stimulate thinking about the issues these theories raise. This course will also help develop tutoring skills, including practice writing comments on sample papers, participating in mock conferences, and sharing specifics from students' experiences as Fellows.

WRD 398
INTERNSHIP
Undergraduate
An approved internship obtained in consultation with the department's Internship Coordinator. In addition to internship duties, students will produce weekly journal entries that reflect on internship activities and related coursework; and compile a portfolio of written work product developed during the internship. May be repeated for credit.

WRD 399
INDEPENDENT STUDY
Undergraduate
Independent study guided by a faculty member. Written permission of supervising faculty member and by department chair required before registration. May be repeated for credit.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 500
PROSEMINAR
Graduate
An introduction to the intellectual/scholarly traditions of writing studies, rhetorical theory, and discourse. Students learn different theoretical perspectives as well as the field's lexical-conceptual vocabulary, providing a gateway to the field and the program's concentration areas.

Status as a Graduate Writing, Rhetoric and Discourse student is a prerequisite for this class.

WRD 503
ANCIENT RHETORICS
Graduate
A survey of rhetorical theory from ancient Greece and Rome and as well as various Eastern traditions. The course examines important definitions and discussions of rhetoric from Plato to Augustine, with attention to their implications for an understanding of the roles of rhetoric and writing in modern society.

WRD 505
CONTEMPORARY RHETORICS
Graduate
A survey of theories and practices in 19th- and 20th-century rhetoric. Examines psychological, social and philosophical roots of contemporary rhetorics and the influence of scientific and literary studies on theories of discourse.

WRD 506
MULTICULTURAL RHETORICS
Graduate
An introduction to written rhetoric and culture. Explores competing conceptions of culture and meanings of literacy, particularly as they relate to American literacy education.

WRD 507
GLOBAL ENGLISHES
Graduate
Explores the role and nature of the English language in a global context, focusing on the historical context and cultural legacy of the spread of English, global varieties of English, uses and contexts of English, issues of ownership and identity, and writing and language instruction. Course content draws upon theoretical models of World Englishes, scholarly debates, descriptions of spoken and written English around the world, and artifacts of global Englishes.
WRD 508
DISCOURSE AND STYLE
Graduate
Explores discourse theory and practice in examining features of style, including linguistic and rhetorical perspectives.

WRD 509
GENRE THEORY AND PRACTICE
Graduate
An overview of the study of non-literary genres, focusing on contemporary theories and practices of genre and genre learning. Students become familiar with various disciplinary perspectives on genre theory, methods for analyzing non-literary genres, and pedagogical approaches to teaching genre in the writing classroom. Explores genres from textual, social, and critical perspectives, considering how genres within social and institutional contexts such as the academy, the workplace, and the public sphere.

WRD 510
TOPICS IN RHETORICAL HISTORY
Graduate
Explores topics in rhetorical history. May be repeated for credit as topics vary.

WRD 511
TOPICS IN COMMUNITY, CULTURE AND IDENTITY
Graduate
Explores topics related to community, culture, and identity from the perspectives of rhetoric and discourse. May be repeated for credit as topics vary.

WRD 512
TOPICS IN LANGUAGE
Graduate
Explores topics related to language and its intersections with rhetoric and discourse. May be repeated for credit as topics vary.

WRD 513
SEMIOTICS
Graduate
An introduction to semiotics, or the study of 'the sign': a theory of meaning that is concerned with anything intended to or interpreted to stand for something else, including objects, pictures, sounds, gestures, and body language. The course examines the construction of meaning in manifold contexts, extending the notion of 'text' beyond the written page to any artifact that functions as a 'message' embodied in a genre and a medium.

WRD 514
SOCIOLINGUISTICS
Graduate
An introduction to the study of language in social contexts. Explores the principles of language variation and change within social contexts.

WRD 515
THE ESSAY
Graduate
Explores the history of the essay as genre from the Renaissance to the present, compares and contrasts literary essays with those written in most school settings, and offers students the opportunity to write their own extended essays on personal and professional topics.

WRD 521
TECHNICAL WRITING
Graduate
An introduction to various aspects of technical writing, including readability, document design, editing and usability.
WRD 522
WRITING I N THE PROFESSIONS
Graduate
This course introduces concepts important to professional writing and provides opportunities to practice creating professional texts. Students write workplace documents such as emails, memos, and reports with a focus on developing rhetorically appropriate content, structure, style, and design. To build conceptual foundations and critical awareness, students also read research on workplace writing and investigate writing practices in particular professions.

WRD 523
EDITING
Graduate
An introduction to editing principles and practices in professional and technical fields.

WRD 524
DOCUMENT DESIGN
Graduate
Theories, concepts, and components of effective document design, including the interrelation of visual displays and written texts across a range of electronic and print genres.

WRD 525
WRITING FOR THE WEB
Graduate
An introduction to various genres of web-based communication and the roles played by writers, readers, and users of web sites. Includes analysis, design, and revision of web-based writing as well as practice producing written documents which accompany the development of web information.

WRD 526
GRANT AND REPORT WRITING
Graduate
An introduction to the purpose and structure of these common workplace genres through analysis of successful documents and guided practice in producing their own.

WRD 530
TOPICS IN PROFESSIONAL AND DIGITAL WRITING
Graduate
Explores topics in professional, digital, and/or technical writing. May be repeated for credit as topics vary.

WRD 531
DIGITAL STORYTELLING
Graduate
This course introduces the genres, principles, and techniques most important to writers tasked with creating digital stories in workplace settings. Students analyze conventional and innovative examples of profiles, testimonials, and other narrative forms, and practice using digital tools to create stories suitable for workplace purposes. The course also provides conceptual frameworks for strategizing effective and ethical distribution of digital stories.

WRD 532
CONTENT STRATEGY
Graduate
This course examines the practice of content strategy in professional settings. Students learn how to assess existing organizational content, how to develop a content strategy, and how to create guidelines and governance documents to manage organizational content. The course features a substantial client project---students work on a team to develop a content strategy for a nonprofit organization.
WRD 533
WRITING ACROSS MEDIA
Graduate
This course explores the rhetorical potential of different modes available to writers today, including written text, sound, images, and video. Through theoretical readings, analysis of new media texts, and production projects---which may include infographics, podcasts, short videos, and other web-based text---students develop their ability to compose multimodal digital content.

WRD 540
TEACHING WRITING
Graduate
Introduction to teaching composition at the secondary and college undergraduate levels. The course helps students develop methods of teaching composition based on modern theories of rhetoric, reading and language acquisition. Formerly ENG 480.

WRD 541
COMPOSITION THEORY
Graduate
Explores the development of contemporary theories of written composition; focuses on contexts for writing, the writing process, and reader-writer relationships.

WRD 542
URBAN LITERACIES
Graduate
Explores the multiple definitions of literacy with a special emphasis on adult literacy in an urban environment. Students examine the relationship between theory and practice, reading about theories of literacy from psychology, cognitive science, education, composition & rhetoric and linguistics while engaging in literacy tutoring at Chicago-area literacy sites.

WRD 543
TEACHING ESL WRITING
Graduate
Provides an overview of the theory and practice of writing in a second language. Examines distinctions between first and second language writing and major issues and dilemmas within the field, including composing processes, error correction and feedback, contrastive rhetoric, culture, course design, plagiarism, and U.S. composition classrooms.

WRD 544
TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE
Graduate
A survey course in the teaching and learning of English as a Second Language (ESL). Familiarizes students with theoretical foundations and basic principles of second language learning and teaching, the components of the major language skills (listening, speaking, reading, writing), and the social and political dimensions of teaching and learning ESL.

WRD 545
TEACHING WRITING ONLINE
Graduate
Explores the teaching of writing in online-supported distance-learning. Introduces students to challenges and best practices and techniques for specific technologies.

WRD 546
PEDAGOGICAL GRAMMAR
Graduate
An introduction to grammar instruction for language and writing classrooms. Introduces students to current research in grammar instruction and applies that research to develop strategies for the instruction of a range of aspects of English grammar, with an emphasis on rhetoric and context.
WRD 547
AP INSTITUTE IN ENGLISH LANGUAGE AND COMPOSITION
Graduate
A workshop designed to help Advanced Placement teachers prepare their students for the AP exam in English Language and Composition and for the demands of college writing. The institute is a week-long, full-day intensive workshop that covers teaching, reading, writing, style, assessment, and argumentation in accelerated high school classes. This course is offered in the summer only.

WRD 550
TOPICS IN TEACHING WRITING AND LANGUAGE
Graduate
Explores topics related to teaching writing and language. May be repeated for credit as topics vary.

WRD 551
TEACHING APPRENTICESHIP PRACTICUM
Graduate
Ongoing support in instructional practice to include grading and responding to student work; facilitating in-class activities such as discussion and peer workshopping; student-teacher conferencing; classroom management; and related topics. Available only to MA in WRD students admitted to the Teaching Apprenticeship Program.
WRD 540 is a prerequisite for this course.

WRD 580
MARKUP AND TEXT ENCODING IN THE HUMANITIES
Graduate
This course introduces students to the digital encoding and analysis of text in the humanities. Students will explore theoretical and methodological discussions related to digital encoding and analysis while working with typical encoding languages (XML and TEI) and text analysis tools. Students gain a broad understanding of digital humanities tools and methods while developing hands-on skills encoding and analyzing humanities texts.

WRD 582
WRITING CENTER THEORY AND PEDAGOGY
Graduate
Introduction to current theories and practices in writing instruction; prepares students to develop and administer writing centers and to work as writing consultants. (Writing Center practicum required.)

WRD 587
AMERICAN ACADEMIC CULTURE FOR INTERNATIONAL GRADUATE STUDENTS
Graduate
This course is intended for international graduate students from across the university who want to participate successfully in American academic culture. Through advanced readings and discussions, students will learn how to navigate the writing conventions, classroom practices, and research expectations that shape American academic life both broadly and within their chosen fields. Class projects will allow students to investigate genres in their specific areas of study and practice the kinds of writing that define their disciplines.

WRD 590
INTERNSHIP IN PROFESSIONAL AND DIGITAL WRITING
Graduate
Internship in professional and/or digital and/or technical writing. May be repeated for credit.

WRD 591
INTERNSHIP IN TEACHING WRITING AND LANGUAGE
Graduate
Internship in teaching writing and/or language. May be repeated for credit.
WRD 595
INDEPENDENT STUDY
Graduate
Independent study guided by a faculty member. May be repeated for credit.

WRD 597
CANDIDACY MAINTENANCE
Graduate
Masters candidates who are not enrolled in a course during a given quarter but who want to maintain active university status should register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit.

WRD 598
THESIS RESEARCH
Graduate
Independent thesis research guided by a WRD faculty member. Written permission of supervising faculty member and of graduate director required before registration. This course may be taken up to two times for credit.

WRD 599
PORTFOLIO
Graduate
A capstone seminar course in which students select, revise, and write supplementary documentation for a collection of their work appropriate to a job search in their area of concentration or for doctoral program application.

WRD 231
GOOGLING GOD: RELIGIOUS PRACTICES IN DIGITAL CULTURE
Undergraduate
This course examines how religious rituals and practices, in both historical and contemporary contexts, have been adopted and adapted in digital culture and by new media technologies. By exploring the intersections of religious and digital practices, students will consider the relationship between spiritual transcendence and secular technologies and will identify diverse religious perspectives and evaluate ethical positions on the relationship of religion, technology, and culture.

About This Handbook
The Handbook provides University policies that support both academic and behavior expectations.

The University reserves the right to change programs, courses and requirements; and to modify, amend or revoke any rules, regulations, policies, procedures or financial schedules at any time during a student's enrollment period provided.

In addition to the policies and information included in this Handbook, your college or school may have specific guidelines, policies, and procedures for which you are responsible. Please consult your college section.

The Handbook also includes sections on General Information and University Resources.

About DePaul
DePaul University was founded in 1898, by the Congregation of the Mission (or Vincentian) religious community, which follows the teachings of 17th century French priest St. Vincent de Paul. The university's mission emphasizes academic excellence, service to the community, access to education and respect for the individual.
University Officers

A. Gabriel Esteban, Ph.D.
President

Rev. Edward R. Udovic, C.M., Ph.D.
Secretary of the University

DePaul University Mission

This mission statement embodies the principal purposes of DePaul University. As such it is the nexus between past, present and future; the criterion against which plans are formulated and major decisions made; the bond which unites faculty, students, staff, alumni, and trustees as an academic community. As a university, DePaul pursues the preservation, enrichment, and transmission of knowledge and culture across a broad scope of academic disciplines. It treasures its deep roots in the wisdom nourished in Catholic universities from medieval times. The principal distinguishing marks of the university are its Catholic, Vincentian, and urban character.

Central Purposes

DePaul, in common with all universities, is dedicated to teaching, research, and public service. However, in pursuing its own distinctive purposes, among these three fundamental responsibilities this university places highest priority on programs of instruction and learning. All curricula emphasize skills and attitudes that educate students to be lifelong, independent learners. DePaul provides sufficient diversity in curricular offerings, personal advisement, student services, and extracurricular activities to serve students who vary in age, ability, experience, and career interests. Full-time and part-time students are accorded equivalent service and are held to the same academic standards.

As a comprehensive university, DePaul offers degree programs at the undergraduate and graduate levels and a range of professional programs. The liberal arts and sciences are recognized not only for their intrinsic value in undergraduate and graduate degree programs, but also because they are foundational for all specialized undergraduate programs and supportive of all advanced professional programs. The university maintains that depth of scholarship to offer the doctorate in selected academic disciplines. Libraries, computer resources, and other academic support services match the levels and diversity of degree programs.

Research is supported both for its intrinsic merit and for the practical benefits it offers to faculty, students, and society. Broadly conceived, research at the university entails not only the discovery and dissemination of new knowledge but also the creation and interpretation of artistic works, application of expertise to enduring societal issues, and development of methodologies that improve inquiry, teaching and professional practice.

In meeting its public service responsibility, the university encourages faculty, staff and students to apply specialized expertise in ways that contribute to the societal, economic, cultural and ethical quality of life in the metropolitan area and beyond. When appropriate, DePaul develops service partnerships with other institutions and agencies.

Students and Faculty

DePaul University Autumn 2017-2018
DePaul invites to its programs of study students from across the nation. Originally founded for students from the greater Chicago area, and still serving them predominantly, DePaul continues its commitment to the education of first generation college students, especially those from the diverse cultural and ethnic groups in the metropolitan area. Admission standards for all degree programs are selective or highly selective. In admitting students the university places greatest weight on intellectual potential and academic achievement. It seeks diversity in students’ special talents, qualities, interests, and socio-economic background.

DePaul University seeks to manage its resources effectively so as to control the costs it charges students for programs and services. Moreover, it makes available as much financial aid as possible to assure access to a broad range of talented students. The university identifies and offers special assistance to students of high potential who have been handicapped by educational, personal or societal obstacles beyond their control. From its first charter DePaul has supported a philosophy which now is expressed as being an equal opportunity educator and employer. DePaul continues to provide equal opportunities to students and employees without regard to age, national origin, race, sex, handicap, creed or color. Moreover, it strives to recruit faculty and staff who reflect the diverse mix of the student body.

The faculty, learned yet learning, gives substance to the mission of the university. These men and women personify the intrinsic value of scholarly inquiry and the force of creative and intellectual efforts. Through their dedication to learning, their contributions to a personalistic environment, and their faith in the potential of their students, the faculty and staff serve as role models for students.

Distinguishing Marks

By reason of its Catholic character, DePaul strives to bring the light of Catholic faith and the treasures of knowledge into a mutually challenging and supportive relationship. It accepts as its corporate responsibility to remain faithful to the Catholic message drawn from authentic religious sources both traditional and contemporary. In particular, it encourages theological learning and scholarship; in all academic disciplines it endorses critical moral thinking and scholarship founded on moral principles which embody religious values and the highest ideals of our society.

On the personal level, DePaul respects the religiously pluralistic composition of its members and endorses the interplay of diverse value systems beneficial to intellectual inquiry. Academic freedom is guaranteed both as an integral part of the university's scholarly and religious heritage, and as an essential condition of effective inquiry and instruction.

The university derives its title and fundamental mission from St. Vincent de Paul, the founder of the Congregation of the Mission, a religious community whose members, Vincentians, established and continue to sponsor DePaul. Motivated by the example of St. Vincent, who instilled a love of God by leading his contemporaries in serving urgent human needs, the DePaul community is above all characterized by ennobling the God-given dignity of each person. This religious personalism is manifested by the members of the DePaul community in a sensitivity to and care for the needs of each other and of those served, with a special concern for the deprived members of society. DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.

As an urban university, DePaul is deeply involved in the life of a community which is rapidly becoming global, and is interconnected with it. DePaul both draws from the cultural and professional riches of this community and responds to its needs through educational and public service programs, by providing leadership in various professions, the performing arts, and civic endeavors and in assisting the community in finding solutions to its problems.

Vincentian Identity

The university derives its title and fundamental mission from St. Vincent de Paul, the founder of the Congregation of the Mission, a Roman Catholic religious community whose members, Vincentians, established and continue to sponsor DePaul. Motivated by the example of St. Vincent, who instilled a love of God by leading his contemporaries in serving urgent human needs, the DePaul community is above all characterized by
ennobling the God-given dignity of each person. This religious personalism is manifested by the members of the DePaul community in a sensitivity to and care for the needs of each other and of those served, with a special concern for the deprived members of society. DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.

**Academic Calendar 2017-2018**

Academic calendars for additional years are available on the Academic Affairs website.

Please note any student enrolled in an online learning class offered by the College of Computing and Digital Media (CDM): Online learning classes offered by CDM have different registration dates than the institutional registration dates. Please consult the Academic Affairs calendar for these dates.

Admission

Admission to graduate programs is determined by each individual graduate program. Please consult the catalog of the respective college for additional information. For general information or to apply to a graduate program consult the Office of Admission website.

Schools and Colleges

Driehaus College of Business

Established in 1912, the Driehaus College of Business is the nation's tenth oldest business school and serves individuals and organizations seeking access to the highest quality business education as a means for achieving intellectual and professional goals. The College also encompasses our highly respected graduate programs in business.

The Kellstadt Graduate School of Business prepares students to be leaders by frequently updating its programs to keep pace with the dynamics of global business.

College of Communication

The College of Communication provides students with a combination of timeless principles and up-to-the-minute tools, whether they're pursuing journalism; public relations and advertising; media studies; radio, television and film; relational, group and organizational communication; or intercultural communication.

College of Computing and Digital Media

The College of Computing and Digital Media (CDM) offers students a collaborative education where technology, artistry and business intersect. CDM is organized into three schools:

The School of Cinematic Arts is home to our animation and cinema programs, which merge creativity, technology, imagination, technique, vision and execution.

The School of Computing houses programs across the technology spectrum, and combines theoretical fundamentals with hands-on practice.

The School of Design – CDM's newest school – is home to programs in graphic design, interactive and social media, game development, human computer interaction, and digital communication and media arts.

College of Education

The College of Education offers degree programs in bilingual/bicultural education; counseling; curriculum studies; early childhood education; educational leadership; elementary education; middle school mathematics education; reading specialist education; secondary education; social and cultural foundations of education; special education; sport, fitness and recreation leadership; and world language education.

College of Law

The DePaul College of Law was one of the first law schools in the country to introduce educational innovations like the study of negotiation techniques, courses in international criminal law and pre-trial courses in skills
techniques. Today, our health law and intellectual property programs are among the best in the country, according to U.S. News & World Report.

**College of Liberal Arts and Social Sciences**

The oldest college at DePaul, the College of Liberal Arts and Social Sciences (LAS) offers more than 28 undergraduate and 30 graduate degree programs. Courses meet during the day, evenings and on weekends, primarily on the Lincoln Park Campus.

**College of Science and Health**

The College of Science and Health (CSH) was established in 2011 to help its students meet the demands of the growing fields of science and health. CSH offers multiple undergraduate majors and graduate programs in the areas of biology, chemistry, environmental science, mathematics, nursing, physics and psychology.

**School of Music**

DePaul’s School of Music was founded in 1912 and is dedicated to excellence in both music teaching and performance. When they’re not working with DePaul students, many of the school’s faculty serve as members of the Chicago Symphony Orchestra, Lyric Opera of Chicago, or the Grant Park Symphony Orchestra, or as some of the city’s most prominent freelance, chamber and jazz musicians.

**School for New Learning**

Created in 1972 to serve the learning needs of adult students, the School for New Learning (SNL) is one of the first university-wide efforts in the United States catering to older students through a separate college. SNL’s innovative approach to teaching the adult student, which gives students credit toward degrees for life experience, has earned it international acclaim.

**The Theatre School**

Founded in 1925 as the Goodman School of Drama, The Theatre School at DePaul is the Midwest's oldest theatre training conservatory. Known for its highly structured program and set in a world-renowned theater city, the school has earned a reputation as a standard of excellence in American professional theatre training.

**DePaul Campuses/ Locations**

Students of any school or college may register for classes on any campus, arranging hours and courses in a manner designed to afford maximum educational advantage.

**Campuses**

**The Lincoln Park Campus** is situated about three miles north of the Chicago Loop in the vicinity of Webster (2200 N), Halsted (800 W) and Racine (1200 W). The offices for the College of Liberal Arts and Social Sciences, the College of Science and Health, the School of Music, the College of Education, and The Theatre School are located on this campus.

**The Loop Campus** is located at 1 East Jackson Boulevard, between State, Jackson and Wabash. The offices for the Driehaus College of Business, the College of Computing and Digital Media, the College of Communication, the College of Law and the School for New Learning are located on this campus.
Suburban Sites

The Kellstadt Graduate School of Business, the College of Science and Health, the College of Education, the College of Communication and the School for New Learning offer some courses at a number of the following suburban sites:

The Naperville Campus is located at 150 W. Warrenville Road, Naperville, Illinois (at I-88 and Naperville Road).

The O'Hare Campus is located in the Triangle Plaza, 8770 W. BrynMawr Ave Suite 100, Chicago, Illinois (at I-90 and Cumberland).

Rosalind Franklin University of Medicine and Science is located 3333 Green Bay Road in North Chicago, Illinois. DePaul students have the option of taking the Master’s Entry in Nursing Practice (MENP) on the RFU campus.

Overseas Locations

Tangaza College located in Nairobi, Kenya.

Bahrain Institute of Banking and Finance located in Manama, Bahrain.

Academic Partnerships

DePaul University has entered into a variety of relationships with other educational institutions to provide enhanced learning opportunities for students.

American University in Paris

DePaul and The American University of Paris (AUP) are partnering to offer an innovative two-year program leading to an MBA from DePaul’s Kellstadt Graduate School of Business and a M.A. in Cross-cultural and Sustainable Business from AUP.

Catholic Theological Union

With permission, upper-level students in Catholic Studies and Religious Studies may elect to complete courses at the Catholic Theological Union.

Illinois Institute of Technology

Through a five-year joint program between DePaul and the Illinois Institute of Technology, students may earn a degree in physics from DePaul and degree in engineering from IIT, with a concentration in Mechanical, Aerospace, Electrical, or Computer Engineering.

IIT/ Chicago Kent College of Law

Students in DePaul's College of Law may pursue courses in specialized areas of legal study at IIT/Chicago Kent College of Law.

Loyola University Chicago School of Law

Students in DePaul's College of Law may pursue courses in specialized areas of legal study at Loyola University Chicago School of Law.

NorthShore University Health System

DePaul University Autumn 2017-2018
DePaul offers a Doctor of Nursing Practice degree in Nurse Anesthesiology in conjunction with NorthShore University Health System’s School of Nurse Anesthesia in Evanston.

Northwestern Memorial Hospital Clinical Schools – School of Nuclear Medicine Technology & Radiation Therapy

Through a partnership with Northwestern Memorial Hospital Clinical Schools, select DePaul students may pursue bachelor of science degrees in Allied Health Technologies in either Nuclear Medicine Technology or Radiation Therapy.

Rosalind Franklin University of Science and Medicine

DePaul has partnered with the Rosalind Franklin University of Science and Medicine in North Chicago to provide numerous degree program offerings, including:

- RN to MS in Nursing
- MA, Health Communication
- Master’s Entry to Nursing Practice (MENP)
- 3+4 PharmD

Rush University

In conjunction with the Department of Health Systems Management in the College of Health Sciences at Rush University Medical Center, the Kellstadt Graduate School of Business of the College of Commerce offers a joint MBA/MS (Master of Science in Health Systems Management) degree program.

Truman College, City Colleges of Chicago

Through an agreement with the City Colleges of Chicago, students may complete their first years in college at Truman College, then seamlessly transfer their credits towards a DePaul undergraduate degree through the School for New Learning.

Wright College, City Colleges of Chicago

Through an agreement with the City Colleges of Chicago, students may complete their first years in college at Wright College, then seamlessly transfer their credits towards a DePaul undergraduate degree through the School for New Learning.

Study Abroad Opportunities

DePaul partners with a substantial number of institutions around the world to provide a wide variety of study abroad options for students. Information about those agreements can be found on the International Programs website (http://international.depaul.edu/).

Complaints and Grievances

DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.

In support of this mission, DePaul University is committed to treating every member of its community with dignity, justice and respect fostering a positive learning environment and providing quality service. It is important for students to know how to address concerns and issues that may be contrary to this commitment.

Complaints or concerns that a policy or procedure has been incorrectly or unfairly applied can often be resolved through an initial conversation with the staff, faculty member or department where the issue originated and his/her supervisor if necessary.

DePaul has established a number of policies and procedures for responding to particular types of concerns. Contact information for these policies and procedures can be found in the bottom section of this page:

- Concerns about grades are addressed through the University's Grade Challenge policy. Detailed information is available in the Academic Handbook section of the University Catalog.
- Concerns about academic integrity are addressed through the Academic Integrity policy and process. Detailed information is available on the Academic Integrity website.
- Concerns related to student conduct are addressed through the Code of Student Responsibility, and the Student Conduct Process. Detailed information is available in the Academic Handbook section of the University Catalog.
- Concerns about discrimination or harassment on the basis of a variety of protected characteristics are addressed by the Office of Institutional Diversity and Equity through the Anti-Discrimination and Anti-Harassment Policy and Procedures
- Concerns based on sexual violence, sexual harassment, or other sex discrimination (Title IX) are addressed through the DePaul's Title IX Coordinator located in the Office of Institutional Diversity. Detailed information is available on the Office of Public Safety website or in the Code of Student Responsibility section of the University Catalog.
- Concerns about the confidentiality of education records (FERPA-Family Educational Rights and Privacy Act), are addressed through the Office of the University Registrar.
- Concerns about academic issues relating to faculty or staff can often be resolved through an initial conversation with the faculty, staff member or student employee involved in the situation. Therefore,
students with academic complaints or concerns should address the issue following the steps indicated below:

1. The issue should first be discussed with the faculty or staff member.
2. If this does not resolve the issue the student should then discuss the issue with the department chairperson or program director for faculty issues or the individual's supervisor for staff. If you are unsure of the appropriate college contact, please see below for a directory of College and College Dean’s Offices.
3. If the issue is still not resolved, the student should then discuss the matter with the Office of the Dean of the faculty member's college for faculty issues or the department supervisor for staff issues.
4. If the issue is still not resolved, the student may discuss the issue with the Office of the Provost.

The Dean of Students Office is a central location to which students can turn with problems they have been unable to resolve. The Dean of Students Office hears student concerns and helps students understand their options for resolving the concerns and/or locating appropriate services: http://offices.depaul.edu/student-affairs/about/departments/Pages/dos.aspx.

In addition, the University Ombudsperson is available to provide consultation about conflict resolution, to clarify policies and procedures, and to help find the right person or department to respond to questions. Students may also always choose to report concerns or misconduct through the University's confidential reporting mechanisms: 877.236.8390 or https://compliance.depaul.edu/hotline/index.asp

The U.S. Department of Education requires institutions offering online education to provide contact information for students to file complaints with its accreditor and state agencies. Contact information for DePaul's regional accreditor (the Higher Learning Commission), programmatic/specialized accreditor and state agencies is available in the Handbook section of the University Catalog.

University Learning Goals and Outcomes

Preamble

In common with all universities, DePaul strives to ensure that its students come away from their experience with knowledge and skills that will enable them to fulfill their personal and professional aspirations, interact productively with others in all their diverse perspectives, contribute meaningfully to society, and continue learning throughout their lives. Moreover, DePaul shares with other universities the goal that students will use their knowledge and skills to conduct themselves ethically and humanely, with an appreciation for the past and an eye towards shaping an even better future.

At the same time, DePaul’s mission — Catholic, Vincentian, urban — calls on us to consider these broad goals for learning in a manner that honors the university’s distinctive qualities. DePaul’s Catholic heritage encourages us to study religious traditions, and to critically examine the moral underpinnings of all academic disciplines. The example of St. Vincent, who worked with people from all strata of society in order to address urgent human needs, infuses our understanding of both education and service with a concern for social justice, for the university mission statement reminds us that “the DePaul community is above all characterized by ennobling the God-given dignity of each person.” And as an urban university, DePaul’s deep involvement in multiple communities, within Chicago and beyond, invites us to both draw on the city’s rich opportunities for learning and serve as partners in helping them move forward. In sum, the mission statement tells us, “DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.”

With the university’s mission as their foundation, these Learning Goals and Outcomes prepare students to engage in the world of the twenty-first century, carrying with them the heritage and values that distinguish DePaul.

Goal 1. Mastery of Content

This goal embraces the breadth and depth of ideas, theories, approaches, and information which DePaul students encounter through and beyond their studies.

Outcomes: DePaul graduates will demonstrate and be able to apply:

- general knowledge of cultures, religions, science, the arts, history, and computational reasoning.
- specialized knowledge and skills from within a specific discipline or field.

Goal 2. Intellectual and Creative Skills

In order to fully engage with knowledge, whether for a specific purpose or for its own sake, DePaul students are encouraged to develop the ability to think critically and imaginatively, formulate their own understanding, and effectively communicate their ideas. This goal articulates specific skills that comprise these broader abilities.
Outcomes: DePaul graduates will be able to:

- systematically access, analyze and evaluate information and ideas from multiple sources in order to identify underlying assumptions, and formulate conclusions.
- solve quantitative problems.
- create and support arguments using a variety of approaches.
- use existing knowledge to generate and synthesize ideas in original ways.
- communicate clearly in speech and writing.

**Goal 3. Personal and Social Responsibility**

This goal honors the notion that knowledge reflects and contributes to the values of individuals and communities. DePaul students, in particular, are challenged to consider their own values in light of the university’s mission.

Outcomes: DePaul graduates will be able to:

- articulate their own beliefs and convictions, as well as others’ beliefs, about what it means to be human and to create a just society.
- articulate what is entailed in becoming a self-directed ethical decision-maker and living a life of personal integrity.
- evaluate ethical issues from multiple perspectives and employ those considerations to chart coherent and justifiable courses of action.
- benefit their communities through socially responsible engagement and leadership.

**Goal 4. Intercultural and Global Understanding**

This goal speaks to the likelihood that, in our diverse and increasingly interdependent world, the future depends on individuals being able to learn from each other and make the best use of finite resources.

Outcomes: DePaul graduates will demonstrate:

- respect for and learning from the perspectives of others different from themselves.
- knowledge of global interconnectedness and interdependencies.
- knowledge to become a steward of global resources for a sustainable future.

**Goal 5. Integration of Learning**

Given the wide range of opportunities for learning at DePaul, it is important for students to develop the ability to consider relationships among individual experiences of learning so as to make meaning of their education in all its variety.

Outcomes: DePaul graduates will be able to:

- relate their learning -- curricular and co-curricular -- to multiple fields and realms of experience.
- make connections among ideas and experiences in order to synthesize and transfer learning to daily practice.
- design, develop, and execute a significant intellectual project.

**Goal 6. Preparation for Career and Beyond**

This final learning goal builds on all the rest and calls on students to be ready to apply their knowledge and skills to the changing world that awaits them.

Outcomes: DePaul graduates will be able to effectively:

- set goals for future work that are the result of realistic self-appraisal and reflection.
- articulate their skills and knowledge and represent themselves to external audiences.
- work toward goals independently and in collaboration with others.
- employ technology to create, communicate, and synthesize ideas.
- set priorities and allocate resources.
- apply strategies for a practice of life-long learning.

**Additional Notes**

These University Learning Goals and Outcomes were approved by Faculty Council and the Interim Provost in October 2012.

A prior version of this document was drafted in Spring 2011 by a group of faculty, staff and students in the early stages of the strategic planning process that led to Vision 2018. In Autumn 2011, at Faculty Council’s direction,
the draft went to the university’s Committee on Learning and Teaching, which sought input from stakeholders across the university and incorporated their valuable contributions into the revised document here. As a result of this process, the University Learning Goals and Outcomes represent a true community effort.

These university-wide goals do not exhaust the learning goals pursued at DePaul. Notably, they do not explicitly refer to the expectations specific to the various schools and departments. Nor will they be pursued in the same manner nor to the same degree in every unit. Nevertheless, the education of all recipients of DePaul undergraduate degrees should be characterized by these goals along with the goals specific to the student’s unit. Since graduate and professional schools encounter students at different stages of their education and at different levels of maturity, their approaches to these goals and their methods of measuring them will have to be adjusted accordingly.

Graduate Program Learning Outcomes

DePaul is committed to ensuring educational excellence in each of our academic programs. Articulating learning outcomes for each of our academic programs is an important first step in our ongoing assessment and improvement cycle. By having well-defined learning outcomes as a guide, our programs are positioned to implement and assess quality educational experiences. These outcomes are also mapped to institutional learning goals, further strengthening the connection to overall student learning at DePaul University.

Academic Advising, Statement on

Academic Advising at DePaul helps students achieve their educational, personal, and career goals by providing guidance and assistance in the decision-making process. Academic Advising is most effective when all participants anticipate their future needs, commit to the process, do their part, and then reflect on their results. Students should work closely with their advisors to plan workable educational goals, to understand the degree options and requirements, to understand the financial implications of their decisions, to assess their strengths and challenges as scholars, and to clarify realistic career objectives for themselves upon graduation.

Students bear ultimate responsibility for decisions and actions that determine their success at DePaul University.

- Students will make informed decisions and register for classes on time.
- Students will obtain the necessary information for course selection and planning in their individualized programs.
- Students will make and keep appointments with their advisors.
- Students will communicate honestly and fully in these advising discussions.
- Students will regularly reflect on the consequences, both academic and financial, of their decisions as they progress in their academic careers toward life choices.

Advisors are responsible for helping students improve their decision making skills.

- Advisors guide students through this learning process during regular interactions at key points during their academic careers.
- Advisors will be available on a regular basis for consultation and encourage students to make and keep regular advising appointments.
- Advisors will monitor their advisees’ academic progress.
- Advisors will encourage students to consult available material related to their program and career choice.
- Advisors will encourage students to reflect on the academic and financial consequences of their decisions about degree programs and course-taking plans.
- Advisors will assist students to set realistic career goals that extend beyond their time at DePaul.
- Advisors will encourage students to incorporate their basic values and beliefs into their decision making process.

The university is responsible for providing the infrastructure for students, faculty, and staff to support effective advising.

- The university will provide the information that students and their advisors need to make informed and timely decisions.
- The university will provide adequate resources of personnel, funding and facilities to support the advising process.
- The university will clearly communicate to advisors and students the policies and options regarding student financial aid.
- The university will regularly evaluate the policies and procedures surrounding advising to improve the advising process on an ongoing basis.
- The university will provide training to help both advisors and students work more effectively together.
The university will acknowledge the important contribution advisors make by recognizing advising within the institutional reward system.

DUAL DEGREE STUDENTS Students enrolled in dual-degree programs between two schools or colleges at DePaul may be charged per credit hour per course according to the program that offers each particular course. If you are registered for classes from both the College of Law and College of Computing and Digital Media, for instance, tuition for each course will reflect the tuition rate of the school or college offering that course.

If you have any questions regarding tuition rates, please contact Student Accounts, (312) 362-8610.

Financial Aid

Financial aid applicants must meet the federal eligibility requirements for aid, and if asked, provide documents as needed to support eligibility:

- You must be a U.S. citizen or eligible non-citizen.
- You must be accepted and currently active in a graduate or professional degree program, or a financial aid-eligible non-degree graduate program. For most financial aid programs, and for loan deferment, you must
enroll in your program at least half-time. Your classes must be taken for credit and must be part of your
degree or financial aid-eligible non-degree graduate program.

- Audited courses are not eligible for financial aid consideration. In addition, if it is determined that you
have completed your degree or your financial aid-eligible non-degree graduate program requirements, or if
you wish to repeat a course for which you have previously earned credit, your financial aid options are
limited and you should contact the Office of Financial Aid at DePaul Central for more information.

- You must be in good academic standing and comply with the federal satisfactory academic progress
requirements in your course of study.

- You must be in good academic standing and comply with the federal satisfactory academic progress
requirements in your course of study.

- You must not be in default on any federal loan or owe a repayment on any federal grant.
- You must comply with all federal regulations governing Selective Service registration and use of funds for
educational purposes.

- You must meet all federal eligibility requirements. To learn more about these eligibility requirements,
including information about any prior drug conviction and federal student aid eligibility, please refer to the

More information is available in Complying with Terms & Conditions in the Maintaining Eligibility section of the
Financial Aid website.

---

**Scholarships**

Scholarships and assistantships are awarded at the program level by your college office and academic
department. Please consult your college or school for additional information. You may also visit DePaul
Scholarship Connect throughout the year to see specific scholarship opportunities available.

**Double Demon Scholarship**

DePaul is committed to your continued professional and personal growth, both while you are a student and after
you graduate from DePaul. This scholarship is available to DePaul alumni doing graduate work at DePaul. It
covers 25 percent of the tuition for a master's degree, graduate level non-degree coursework or graduate level
coursework in select certificate programs*.

Alumni from any of DePaul's colleges who are admitted into a graduate program -- including degree, non-
degree or select certificate programs* -- automatically qualify for the Double Demon Scholarship. Both full-time
and part-time students are eligible. No scholarship application is required. (Note: This scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards. University employees are eligible for other tuition benefits and are not eligible. And it does not cover coursework from the Center for Professional Education (CPE), Institute for Professional Development (IPD), coursework in a doctoral program or a master of fine arts (MFA), Music, Theatre, Law and a few other select programs.)

To learn more details about this scholarship, please contact one of the college admissions offices below.

Veterans Assistance

DePaul’s Office of Veteran Affairs handles the following VA educational benefit programs:

- The Post-9/11 GI Bill® (Chapter 33) - for those who served at least 30 consecutive days on active duty after September 10, 2001
- The Post-9/11 GI Bill® Yellow-Ribbon program - for qualified Post-9/11 applicants
- The Montgomery GI Bill® – Active Duty (Chapter 30) - for those who enlisted after 7/1/1985
- The Montgomery GI Bill® – Selective Reserve (Chapter 1606)
- The Survivors’ and Dependents’ Educational Assistance Program (Chapter 35) - for spouses and children of deceased or disabled veterans
- The Vocational Rehabilitation Program (Chapter 31) - for disabled veterans approved by Veterans Affairs for study at DePaul
- The Marine Sergeant John David Fry Scholarship – this additional provision of the Post-9/11 GI Bill® may be awarded to a surviving spouse and children of an active duty member of the Armed Forces, who has died in the line of duty, on or after September 11, 2001. Eligible children may be married and under the age of 33.

Additional information specific to veteran students is available through the Admission and Aid website.

DePaul DREAM Statement

At DePaul University we affirm the dignity of the individual. We value diversity and culture because these are part of our core values and traditions as a Catholic, Vincentian, and urban university. DePaul University has decided to take a strong and public stand for supporting undocumented students, and DREAM Act legislation. We believe supporting undocumented students is smart policy that will yield significant benefits for our university, city, state, and nation. We also know these young people who enter our doors are part of the next great generation who will build our collective future. It is for this reason that DePaul admits students regardless of their citizenship status. Because we welcome these students, it is incumbent upon all members of the DePaul community to understand DePaul’s position on assisting undocumented students, realize the value that they bring to our university, and support their success as we support all of our students.
General Information

This section of the handbook provides an alphabetical listing of all University policies, procedures, and regulations related to academics. As a student, you are responsible for adhering to the policies, procedures, and regulations included here, so please familiarize yourself with them. In addition, consult your college or school catalog for information specific to your program.

Academic Integrity

DePaul University is a learning community that fosters the pursuit of knowledge and the transmission of ideas within a context that emphasizes a sense of responsibility for oneself, for others and for society at large. To preserve the quality of education offered to students, the university is responsible for maintaining academic integrity and protecting all those who depend on it, including DePaul's community partners and institutional affiliates. Violations of academic integrity, in any of their forms, are, therefore, detrimental to the values of DePaul, to the students' own development as responsible members of society, to the pursuit of knowledge, and to the transmission of ideas. All members of the university community share the responsibility for creating conditions that support academic integrity.

Violations of academic integrity include but are not limited to the following categories: cheating; plagiarism; fabrication; falsification or sabotage of research data; destruction or misuse of the university's academic resources, alteration or falsification of academic records; academic misconduct; and complicity. Violations do not require intent. This policy applies to all courses, programs, learning contexts, and other activities at the university, including but not limited to experiential and service-learning courses, study abroad programs, internships, student teaching, providing false information on an application, and not disclosing requested information. If an instructor finds that a student has violated the Academic Integrity Policy, the appropriate initial sanction is at the instructor's discretion. Actions taken by the instructor do not preclude the university from taking further action, including dismissal from the university. Conduct that is punishable under the Academic Integrity Policy could also result in criminal or civil prosecution.

Additional Information and the complete Academic Integrity policy can be found on the Academic Integrity website (http://academicintegrity.depaul.edu/).
**Admission**

Admission decisions at DePaul University are based on a strong academic record, as well as personal and occupational achievements, ambition, energy, resourcefulness and leadership. The University recognizes that each individual brings unique abilities to the DePaul community and works with every student through a personalized and holistic application process. DePaul University does not discriminate on the basis of race, color, national origin, religion, gender, sexual orientation, age or handicap in admissions, employment, or the provision of services.

For information on the types of admission, see the Admission page in the University Information section of this handbook.

**Dismissal/ Readmission**

Dismissal and Readmission decisions are made by each graduate program. Please consult your school or college catalog for additional information.

**Evaluation and Credit**

At DePaul, credit towards a degree is accumulated on the basis of quarter hours (for College of Law, see the College of Law Handbook). The unit of credit is one quarter hour granted for 45 minutes of instructional time and at least two hours of additional assigned work each week, or an equivalent amount of work for other credit-bearing activities. The standard course extends over a ten-week period and a final examination week; courses that occur over a different time-period (e.g. in the summer or December quarter) must incorporate the same total amount of instructional time and additional assigned work per credit hour as a standard course.

Undergraduate and graduate courses carry 4 quarter hours of credit unless otherwise specified. Credit is earned if a student receives an A through D, or PA grade. Undergraduate credit may also be earned through credit-by-examination and transfer credit. The School for New Learning and the School of Nursing also may award credit based on assessment of prior learning. Some graduate programs may accept a limited number of transfer credits which is specified in the graduate program information.

Among other requirements specified in their respective catalogs, graduation with a bachelor’s degree requires that a student successfully complete a minimum of 192 quarter hours of college credit; graduation with a master’s degree requires that a student complete a minimum of 45 quarter hours of credit beyond the bachelor’s degree. The requirements for approved combined bachelor’s/master’s degree require at least 36 quarter hours of credit beyond the bachelor's degree (with a minimum of 12 applicable graduate hours completed as part of the bachelor’s degree). Graduation with a doctorate degree will require the minimum number of quarter hours specified by the degree awarding department or college.
Evaluation and Credit/ Cross-listing Graduate with Undergraduate Courses

The Department of Education (ED) wants to ensure that students in graduate programs are earning credit for graduate-level work and that federal financial aid is going to support work toward a graduate degree. In its charge to carry out the ED rules, our accreditor, the Higher Learning Commission, has called on institutions to create policies that will “distinguish the various levels of learning that the institution offers, such as graduate and undergraduate, and may distinguish among departments or disciplines.”

Graduate programs will continue to abide by the policies set out in the Graduate Handbook of the DePaul University Catalog. In addition, to ensure that graduate programs are appropriately distinct from undergraduate programs in the same or a related discipline, all graduate degree programs will include the following:

1. A core of courses that is offered solely at the graduate level, supported by a written rationale for the content of the core.

2. Course syllabi, including learning outcomes and assignments appropriate for graduate-level coursework. Any graduate courses that are cross-listed with undergraduate courses must have separate syllabi for each side of the cross-list, with distinct learning outcomes and assignments for each group. Undergraduate courses must be at the 300-level or above to be cross-listed with a graduate course.

Evaluation and Credit/ Limitations

Consult your graduate program for information regarding the transfer of graduate credit from other institutions.

FERPA/ Annual Notification

Annual Notification for DePaul Students: Your FERPA Rights

We want to take this opportunity to provide you with a summary of your rights under The Family Educational Rights and Privacy Act (FERPA), the federal law that governs release of and access to student education records. Please view Understanding FERPA, a DePaul Central Learning Center video for information and instructions.

Your FERPA rights include:

1. The right to inspect and review your education record within 45 days after the University receives a request for access. If you want to review your record, contact the University office that maintains the record to make appropriate arrangements.

2. The right to request an amendment of your education record if you believe it is inaccurate or misleading. If you feel there is an error in your record, you should submit a statement to the University official responsible for the record, clearly identifying the part of the record you want changed and why you believe it is inaccurate or misleading. That office will notify you of their decision and advise you regarding appropriate steps if you do not agree with the decision.

3. The right to provide written consent before DePaul discloses personally identifiable information contained in your education records, except to the extent that FERPA authorizes disclosure without consent.
Some examples of exceptions include:

- School officials with "legitimate educational interests." A school official has a legitimate educational interest if the official has a professional need to review your education record in order to fulfill his or her official responsibilities. Examples of people who may have access, depending on their official duties, and only within the context of those duties, include: university faculty and staff, agents of the institution, students employed by the institution or who serve an official institutional committees, and representatives of agencies under contract with the University.

- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer.

- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local educational authorities, such as a state postsecondary authority that is responsible for supervising the university's state-supported education programs. Disclosures under this provision may be made in connection with an audit or evaluation of federal- or state-supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs. These entities may make further disclosures of personally identifiable information to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, enforcement or compliance activity on their behalf.

- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid.

- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate or administer predictive tests; (b) administer student aid programs; or (c) improve instruction.

- To accrediting organizations in order to carry out their accrediting functions.

- To appropriate officials in connection with a health or safety emergency.

- Information the school has designated as "directory information."

Directory information may be released without your written consent and includes the following: name, address, e-mail, telephone number, date of birth, college of enrollment, year in school, major, enrollment status (including current enrollment, dates of attendance, full-time/part-time or withdrawn), degrees, awards and honors received (e.g., Dean’s List recognition), participation in officially recognized activities and sports, weight and height of members of athletic teams, photographs (including ID pictures), videos depicting and/or concerning University life, and previous educational institutions attended. Please note that you have the right to withhold the release of directory information except to the extent that FERPA authorizes disclosure without consent (see #3 above).

To withhold the release of your directory information, you must log into the student portal, Campus Connect, and, under Student Privacy settings, indicate your preference. Please note two important details regarding placing a "No Release" on your record:

1. A "No Release" on your record will prevent your name from being included on lists of students released to honor societies, dean’s list and graduation announcements to local newspapers, and enrollment and degree verification to anyone, including potential employers.
2. A "No Release" applies to all elements of directory information on your record.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

For additional information, please consult the U.S Department of Education (http://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.htm/) website.

Questions concerning FERPA should be referred to DePaul Central:

**DePaul Central**

Lincoln Park: Schmitt Academic Center, 101
Loop: DePaul Center, Suite 9100
Tel: (312) 362-8610 | dpcl@depaul.edu | depaulcentral.depaul.edu
Final Exams

During the regular academic year, faculty are expected to include a final examination, final project or final exercise in all classes. In order to provide students with sufficient time to prepare, a final examination (or exercise) is expected to take place on the scheduled examination date and period as approved by the university. Final projects that are substituted for a final examination or exercise are expected to be due at the time of the scheduled examination date and period. Only under rare circumstances and with the permission of the dean of the college may this allocated period of time for the completion of course work be shortened.

Grades

Grades can be accessed online via Campus Connect. Grades can be viewed and printed using the Unofficial Transcript in the Student Center in Campus Connect. This comprehensive report can be used for corporate tuition reimbursement. Some companies may allow the student to log onto Campus Connect with a company representative present to verify grades for an individual term.

Following is the key to the system of evaluating a student’s academic achievement of the educational objectives specified by the instructor in the course syllabus. These definitions apply to the straight letter grade. A plus grade represents slightly higher achievement than the straight letter grade. A minus grade represents slightly lower achievement than the straight letter grade. For undergraduate students, the addition of a # indicates an original attempt of a course which has been repeated; therefore the grade and credit are removed from the term and cumulative grade point average and credit hours.

Once a grade is assigned, university policy prohibits faculty from changing the grade without the permission of the college-based exceptions committee. Errors made in computation of the final grade (clerical error) and removal of an IN grade in accordance with university policy are exceptions to the grade change policy. Faculty may not assign or accept additional graded material in order to improve a student’s final grade.

A  The instructor judged the student to have accomplished the stated objectives of the course in an EXCELLENT manner.

B  The instructor judged the student to have accomplished the stated objectives of the course in a VERY GOOD manner.

C  The instructor judged the student to have accomplished the stated objectives of the course in a SATISFACTORY manner.

D  The instructor judged the student to have accomplished the stated objectives of the course in a POOR manner. (A grade of D will not fulfill the requirements in a major field of concentration.)

F  The instructor judged the student NOT to have accomplished the stated objectives of the course.

FX  Student failed to accomplish the stated objectives of the course due to non-attendance. Non-attendance is defined as never attending or ceasing to attend an in-person course (or never participating or ceasing to participate in an online course) without officially withdrawing. The FX is calculated into the student's GPA as an F. Instructors are required to provide the last date of attendance/participation.

IN  Temporary grade indicating that, following a request by the student, the instructor has given his or her permission for the student to receive an incomplete grade. In order to receive an IN grade, the student must have a) a satisfactory record in the work already completed for the course, b) encountered unusual or unforeseeable circumstances which prevent him/her from completing the course requirements by the end of the term, and c) applied to the instructor for permission to receive an IN. Please see the Grades, Incomplete (IN) and Research (R) Expiration Policy page in this handbook for additional information.
Permanent grade assigned to a degree recipient who chooses not to resolve a grade of "IN" awarded during the two terms prior to graduation. The grade of "ING" (Incomplete, Graduated) is final, and cannot be changed or lapsed to "F" once the degree is posted.

**PA**
Passing achievement in a pass/fail course. (Grades A through D represent passing performance.)

**W**
Withdrawal from the course initiated by the student after the Last Day to Drop With No Penalty and before the Withdrawal Deadline. The W grade is automatically recorded on the student’s transcript once it has been processed.

**WA**
Withdrawal from the course initiated by an advisor or administrator at the student’s request, usually outside of established deadlines. Administrative withdrawals may be granted under extraordinary circumstances and require documentation for support. See the Withdrawal Policy page in this handbook for more information. During their DePaul career, students may be allowed one medical/personal approved administrative withdrawal and one college office administrative withdrawal, each for one or more courses in a single term.

**R**
Temporary grade indicating that the student is making satisfactory progress in a course that formally extends beyond the end of a term. Only designated courses are eligible for R grades. Please see the R grade expiration policy on the Grades, Incomplete (IN) and Research (R) Expiration Policy page in this handbook for additional information.

Permanent grade assigned to a degree recipient who chooses not to resolve a grade of "R" awarded during the last year prior to graduation. The grade of "RG" (Research, Graduated) is final, and cannot be changed or lapsed to "F" once the degree is posted.

**M**
Final grade not submitted by instructor.

**AU**
Auditor status; course does not earn credit.

### Quality Points

Quality points are awarded to a student in relation to the grade given and the number of quarter hours of credit attempted in the course. Quality points are awarded according to the following schedule:

<table>
<thead>
<tr>
<th>GRADE</th>
<th>QUALITY POINTS PER CREDIT HOUR</th>
<th>CREDIT HOURS</th>
<th>QUALITY POINTS</th>
</tr>
</thead>
<tbody>

Grade Point Average

In general, a student's grade point average is computed by dividing the total number of quality points accumulated by the total number of credit hours attempted with quality points assigned. In addition, a number of graduate programs have specific regulations regarding the computation of the grade point for coursework outside the program. The grade point average is calculated only upon grades earned at DePaul University.

Grades, Challenges to

A. General Policies on Grading

1. Grades are determined solely on the basis of the academic performance of each student according to pre-established criteria determined by the course instructor and consistent with university, college and departmental policies.

2. Grade determination is the prerogative of the instructor subject to the constraint that any successfully challenged grade will be changed through faculty action.

3. The criteria for evaluating academic performance are to be consistent with a course's goals and objectives, which have been approved by the appropriate academic authority before the course is scheduled. On the first day of class of each course the instructor is to explain in writing to the students the criteria for evaluating as well as the methods for grading student performance (examinations, papers, reports, etc.).

4. The instructor in each course shall decide what criteria and methods for evaluating students are to be applied in the specific course. These decisions of the instructor, however, must be compatible with any policies previously accepted by the faculty of a department or college with respect to particular courses, especially courses offered in sequence where the qualifications of a student to begin an advanced course depend upon performance in a previous course. The methods of conducting a course are determined by the instructor within limitations set by the classification of a course as lecture-discussion, seminar, laboratory, etc. An instructor may vary the teaching methodology to meet particular circumstances of a course (type or number of students enrolled, concentrated calendar as in summer sessions, etc.) or the instructor's own desires to innovate or experiment with different approaches.

   Any method selected must be compatible with the predetermined goals and objectives of the course. While teaching methodology may change after the course has begun, grading methodology may be changed only with the consent of a majority of students in the course, taking into consideration hardships imposed upon students opposed to the change.

5. The actual evaluation and grading of academic performance is subject to the professional judgment of each instructor. Considerable personal discretion is required in these judgments - a justifiable margin of difference can exist between the evaluations made by two or more professional persons of the same academic performance.

6. Students are entitled to compare their work in the course with the criteria applied in deciding the final grade for the course. Accordingly, the course instructor is required either to return major papers and examinations to students or to make such available for students until the end of the following term. Spring Quarter materials are to be available until the end of the Autumn Quarter. For pedagogic reasons, an instructor is expected to review with the student the relative success of the student's accomplishments. The instructor is not expected to debate the grading.

7. A student may object to a grade for one or more of the following reasons:

   1. The methods or criteria for evaluating academic performance, made explicit by the instructor at the beginning of the course, usually in a course syllabus or as subsequently modified with the majority consent of the students, were not actually applied in determining the grade.

   2. The grade was determined or influenced by criteria other than those explained by the instructor or by criteria not relevant to academic performance.

   3. The instructor applied predetermined criteria unfairly, which may include but not be limited to the following items:
1. The instructor's evaluation of academic performance so exceeded the reasonable limits of the instructor's discretion as not to be acceptable to the instructor's peers.
2. Predetermined criteria were not explained at the beginning of the quarter or semester.

B. Policies Regarding Grade Challenge

1. All Grade Challenge Review Boards must follow the procedures listed below.
2. A challenge to a grade will be reviewed and decided by tenured faculty unless the college or school has an insufficient number of tenured faculty to staff a Review Board.
3. The student who challenges a grade bears the full burden of proof that there are sufficient grounds for changing a grade.
4. Only the final grade of a course and its means of determination may be challenged.

C. Procedures for Establishing Grade Challenge Review Boards

1. At the beginning of each academic year, the Committee on Committees will recommend to the Faculty Council, the faculty members and alternates for one Review Board for each of the following colleges: Business, Computing and Digital Media, Communication, Education, Law, Music, School for New Learning, Science and Health, and Theatre.
2. It will recommend two boards for Liberal Arts and Social Sciences covering the following areas: Humanities and Behavioral and Social Sciences. The Faculty Council will make all appointments to Review Boards. The dean of a college may request the establishment of additional Review Boards.
3. Each Review Board will consist of three faculty members and two alternate faculty members and one student. Faculty members may not serve on challenges in which they are involved. Involvement includes assignment of the grade in question and/or attendance or participation in the class. In either of these cases, one of the alternates will be asked to serve.
4. The student representative on the Review Boards in Business, Computing and Digital Media, Communication, Education, Liberal Arts and Social Sciences, Science and Health, Law, Music, School for New Learning, and Theatre will be the elected Senator from the college or school. In cases where this Senator is involved in the claim; i.e., had registered for, attended or participated in the class, the SGA EVP of Academic Affairs will serve as an alternate or if necessary, the president may appoint the alternate.
5. The Review Board will select its own chair and vice chair (to serve in the absence of the chair). The Chair of the Review Board receives all requests for hearing from the dean or chair of the affected department, sets the calendar, notifies all board members and involved parties of the dates and times of the hearings and informs students by written notice of the recommendations of the board. The chair is responsible for adherence to the Procedures for Filing a Grade Challenge.
6. The boards will serve until the beginning of the Autumn Quarter of the academic year.
7. A quorum of the Review Board consists of three members of the board.
   Challenges will be upheld by a vote of three or more of the four member board. All members are voting members.
8. The members of the Review Board are expected to disqualify themselves should a conflict of interest arise.

D. Procedures for Filing a Grade Challenge

In order to provide a forum for the fair resolution of academic disputes involving individual students and appropriateness of course grades, the following procedures have been developed and will be applied to all cases involving DePaul University students.

1. A student who is considering a grade challenge must discuss the grade with the instructor before the end of the following regular term. (Spring and Summer Quarter challenges must be made before the end of the Autumn Quarter. Law students challenging a Fall semester grade have a deadline of March 1 of the following Spring semester. Law students challenging a Summer/Spring semester grade have a deadline of October 1 of the following Fall semester) The instructor is expected to explain the reason for the grade to the student.
   Only if the instructor is not at the university during the following regular term after the grade was issued, may the student proceed to challenge the grade without meeting with the instructor.
2. If, after the discussion with the faculty member, the student still disputes the final grade, the student may continue his or her challenge by submitting a written request for a hearing to the office of dean of the college or school in which the course was offered within the term following the award of the disputed grade. Since the following burden of proof rests upon the student, it is important that the student include a clear and coherent statement (typed) with the reason for the appeal, together with any supporting documents the student may wish to include. Students may request that copies of supporting documents in possession of the faculty members be forwarded to the chair of the Review Board. All challenges will be thoroughly and fairly reviewed.
3. The dean of the college or school shall forward a copy of the request to the chair of the Review Board, the involved faculty person and the student. This must be signed and dated by the dean or chair of the affected department.
4. Once filed, the formal challenge is automatically forwarded through all stages of the appeal process unless
the Review Board determines it to be groundless or frivolous. Additionally, the student has the option to
discontinue the appeal at any stage by submitting a letter stating such to the instructor and chair of the
Review Board.

Both the student and instructor will be informed in writing of all committee recommendations and
decisions as well as any new written information bearing on the case. Only the instructor and/or the
Review Board are empowered to change a grade.
5. The Review Board chair will send a copy of the grade appeal request and relevant materials received with it
to the instructor involved. The instructor will return the materials with a written response within two weeks
unless circumstances warrant an extension.

The chair is responsible for monitoring the time period. A copy of the instructor's response will be
forwarded to the student who has filed the challenge. If the instructor does not respond within the time
period, the committee will conclude its deliberations and vote on the challenge.
6. The Review Board may, at its discretion, seek oral clarification of the written responses from the student
and faculty member. If it requests this further clarification, the Review Board must meet with both the
student and faculty member separately if the student requests.
7. The Review Board shall evaluate the challenge and vote to approve or deny. Decisions of the Review Board
arrived at by secret ballot are to be determined by a majority vote.

Such action must be taken within two months of the date of filing. (If the grade appeal is not passed along
its designated route within the times specified, the student should notify the dean of the school or college
who will determine the reason for the delay.)
8. The Review Board is to reach one of the three following decisions:
   1. Challenge affirmed and settled by consent: i.e., the Review Board conducting the review devises a
      conciliation mutually acceptable to the student and the instructor who gave the grade. Should the
      acceptable conciliation involve a change of grade, the instructor will submit a change of grade.
   2. Challenge affirmed and the Review Board may submit a change of grade card to the dean of the
      college or school in which the course was taught.
      In determining the student's final grade, the Review Board will take into account all evidence of the
      student's academic performance in the course under challenge as well as the implications for the
      student's grade of the instructor's actions in the case in question.
   3. Challenge denied; original grade stands.

9. The decision reached by the Review Board is to be communicated by the chair of the Review Board in
writing directly to the dean of the college or school, the instructor, and the student. The explanation for the
decision will also be communicated.
10. Decisions by the Review Board are final and binding on all parties. The board's decision does not require
    the approval of the dean of the college or school, or the chair of the affected department.

Grades, Incomplete (IN) and Research (R) Expiration Policy

Incomplete (IN) Grade

Undergraduate and graduate students have at most two quarters to complete an incomplete. At the end of the
second quarter (excluding summer) following the term in which the incomplete grade was assigned, the
incomplete will automatically convert to an F grade. In the case of the Law School, incompletes must be
completed by the end of the semester following the one in which the incomplete was assigned.

A faculty member has the prerogative to assign a completion date earlier than the two quarter deadline (one
semester deadline for the Law School) and this date will supersede the two quarter timeframe (one semester
timeframe for the Law School) stated above.

Students must adhere to the incomplete grade request procedure of the academic unit offering the course for
which they are requesting the incomplete grade.

Ordinarily no incomplete grade may be completed after the grace period has expired. Instructors may not
change incomplete grades after the end of the grace period without the permission of a college-based Exceptions
Committee.
In the event that the original instructor is no longer available to grade the work, the Department Chair, where applicable, or the Associate Dean will identify the faculty member who will resolve the incomplete.

NOTE: Incomplete grades are not encouraged in the student’s final two terms of study. However the exceptional cases, where an incomplete is approved in his or her final term and for students with an incomplete grade in a course from the term immediately preceding their final term of study, may result in the denial of final degree certification for that term and the regular incomplete grade policy will then be enforced.

Students who have completed degree requirements, but have an IN grade that has not yet expired can elect to have the degree posted and the IN grade changed to a permanent incomplete, ING. This grade is permanent and cannot be changed in the future. The student can also elect to postpone degree conferral until the IN grade is resolved.

**Research (R) Grade**

An R grade is given when a student is making satisfactory progress in a course that extends beyond the end of the term or in a project extending over more than one term. R grades, with the exception of students completing a thesis or a dissertation research course, must be completed within one academic year of the posting of the R grade or it reverts to an F grade.

A faculty member has the prerogative to assign a completion date earlier than the one academic year deadline and this date will supersede the one academic year stated above.

Ordinarily no R grade may be changed after the grace period has expired. Instructors may not change R grades after the end of the grace period without the permission of a college-based Exceptions Committee.

In the event that the original instructor is no longer available to grade the work, the Department Chair, where applicable, or the Associate Dean will identify the faculty member who will resolve the R grade.

Students who have completed degree requirements, but have an R grade that has not yet expired can elect to have the degree posted and the R grade changed to a permanent R grade. The RG (Research, Graduated) grade is permanent and cannot be changed in the future. The student can also elect to postpone degree conferral until the R is resolved.

**Grades, Repeating Classes**

Graduate students may have the need to repeat courses. When that occurs, all grades achieved are recorded on the academic record. All attempts are to be calculated into the grade point average. Moreover, only credit for the last attempt will be applied for the degree.

**Graduation, Commencement Ceremony**

The University’s annual graduate and undergraduate commencement exercises are conducted in June. Traditionally the University hosts a baccalaureate mass to which all graduating students and their families are invited the Friday of graduation weekend.

Attendance at the graduation exercise is optional, however, graduates must notify their college office of their intention by the published deadline date. Graduates will receive detailed instructions concerning the commencement exercise from the college office.
Graduation, Degree Conferral Policy

Final certification of degrees is completed by the Office of the University Registrar thirty days after the conferral date.

In dual degree programs authorized by the colleges, the degrees will be conferred simultaneously.

Academic records will be locked upon degree conferral. Under no circumstances will changes be made to the academic record after degree conferral.

If the student begins a new program of study at DePaul, the student’s GPA will be restarted. The one exception to this rule involves Masters’ students whose DePaul Master’s Degree is accepted to meet DePaul’s PhD requirements either in the same or a new field. In this instance the GPA in the PhD program will include the GPA from the DePaul Master’s Degree.

Combined Bachelors/ Masters Degree Program

Students combining a Masters degree with a Bachelors degree in an approved DePaul Combined Bachelor’s/Master’s Program will restart their GPA at the beginning of their graduate career.

JD/LLM Program

In the case of students who are accepted into the joint JD/LLM program, the students’ GPA in the LLM program will include the GPA from the JD program. Students who have completed the JD degree and are independently pursuing the LLM degree will have their GPA restarted.

Graduation Requirements

1. The student must have satisfied all the requirements and regulations of the individual program and college or school granting the degree.
2. A formal application for graduation must be filed by a candidate. Application for graduation may be made only by classified degree seeking students. The student must complete the online degree conferral application in Campus Connect by the designated deadline date.

<table>
<thead>
<tr>
<th>Degree Conferral</th>
<th>Date</th>

<td>July 15</td>
</tr>
</tbody>
</table>

Submitting this on-line application does not guarantee the conferral (granting) of a degree from DePaul University. A student can change the expected completion term up to the last day of that term. Degree requirements are reviewed at the end of the expected completion term indicated. If all requirements are met, the degree will be conferred within 30 days of the end of the term. Diplomas are mailed (to graduates without financial holds), generally within 45-60 days after the end of the term.

DePaul reports degree information to the National Student Clearinghouse monthly. Many companies and agencies use this service to verify awarded degrees. A student’s degree will only be verified by the Clearinghouse if the student does not have a FERPA/Privacy restriction in Campus Connect at the time the degree is conferred. Students should verify Privacy Settings before the end of their completion term.
**Graduation with Honors**

Please consult your graduate program for specific information regarding graduation with honors.

---

**Immunization, Proof of**

DePaul University complies with Illinois state law (College Student Immunization Act [110 ILCS 20]) and the Illinois Department of Public Health College Immunization Code (77 Ill. Adm. Code 694), which mandates post-secondary institutions to submit an annual report on student immunization requirements. All DePaul University students, born on or after January 1, 1957 and attend a university campus location, must provide proof of the required immunizations. Additionally, Illinois law requires that universities prevent students from registering for any subsequent terms if proof of immunization is not provided.

Proof of the following immunizations is required:

- **Tetanus/Diphtheria/Pertussis** - 3 doses (at least 1 tdap in lifetime, last dose within past 10 years)
- **Measles** - 2 doses (at least 28 days apart, after first birthday. Neither dose can be prior to 1968.)
- **Mumps** - 2 doses (at least 28 days apart, after first birthday. Neither dose can be prior to 1968.)
- **Rubella** - 2 doses (at least 28 days apart, after first birthday. Neither dose can be prior to 1968.)
- **Meningococcal** - 1 dose (if under the age of 22, taken on or after 16th birthday)

Please visit the [Immunization Requirements](#) webpage for more information.

---

**Military Academic Adjustments**

DePaul University will make academic adjustments for students in the military consistent with all applicable legal requirements. This could include, for example: academic adjustments with a course, options regarding withdrawals or leaves of absence, and readmission at the conclusion of active duty. The details of any academic adjustments are dependent on the student's specific military orders.

Procedures Regarding Withdrawals and Leaves of Absence: Students who are in the military and called to active duty that interrupts their enrollment must complete the DePaul University Permanent Withdrawal/ Military Leave Request in Campus Connect. Students should indicate "military" on the application in Campus Connect. Upon their return, they will meet with an academic advisor to discuss resuming their studies.

Students are encouraged to contact the [Veterans Student Affairs Office](#) for more information about other specific procedures regarding withdrawals, leaves of absence, academic adjustments, and for information regarding other policies that may be particularly applicable to students in the military.
NonEnrollment/ Discontinuation

Students who complete a term and do not enroll for the following term at DePaul remain active and eligible to enroll until they are formally discontinued. Discontinuation occurs when:

1. The student does not register in the term for which they were admitted.
2. The student does not register for three consecutive quarters (or for Law two semesters), excluding summers. In these cases students must seek readmission.
3. The student has not made progress toward the degree for three consecutive terms, excluding summers.
   Candidates for theses, dissertations and students on year-long study abroad programs are excluded from this rule. In these cases, students must meet with a college academic advisor to get permission to register and/or seek readmission.

Note: Students in the School of Music, the Theatre School and the College of Law who need to take a term (or terms) off must consult their college office.

Posthumous Degree

A posthumous degree may be awarded to degree-seeking candidates who were actively enrolled, in good academic standing, and on track to have met all degree requirements by the end of the term in which their death occurred.

For all other cases, the Dean may request a Certificate of Accomplishment be awarded to honor the student's progress toward the degree and accomplishments as a member in good-standing of the DePaul community.

Probation

Please consult your graduate program for information regarding probation. Academic disciplinary action including dismissal from the University may be taken by the dean of student's home college or school in accordance with the degree of the student's academic deficiency.

Registration

Students are responsible for planning their own programs and for completing course sequences and degree requirements. In planning each quarter's course of studies, students should remember that required courses take precedence over elective courses, and that some advanced courses have pre-requisites that must be completed first. Students should be guided by their interests or needs where electives are indicated. A student regularly employed is advised to discuss his or her course load for each quarter with an advisor prior to registration. Advisors are available to assist students in planning programs and schedules.

General Regulations

1. Students can add, drop, or swap classes via Campus Connect. It is the student’s responsibility to verify
that the transaction has been processed.

2. Students will receive credit only for classes for which they are registered.

3. Students who are not on the class roster are responsible for completing the steps necessary to resolve the issue. It is not the responsibility of the instructors to resolve the problem.

4. Students must officially register for classes by the stated deadline. For 10-week classes, the deadline is the end of the first week of the term. In addition, students should consult individual college regulations regarding special registrations (e.g., independent studies, internships, etc.).

5. The University is required to report enrollment and attendance to fulfill requirements established by several governmental agencies. To satisfy these requirements, it is University policy that attendance will be monitored in all classes. Each school or college maintains additional specific policies concerning attendance. Students should become familiar with these policies. Promptness is expected of a student for all class sessions. Tardiness of more than ten minutes is generally to be considered by the instructor as an absence.

6. Students' status at the university will be changed from "active" to "discontinued" if:
   1. There is no enrollment in the term of admittance.
   2. There is no registration activity for three consecutive quarters - excluding summers - in which case these students must seek readmission;
   3. No progress has been made towards their degree for three consecutive terms, excluding summers. (Candidates for theses and students on year-long study abroad programs are excluded from this rule.)

7. Students who have been "discontinued," must apply and be approved for readmission to continue their studies.

**Academic Calendar Formulas**

Academic calendar deadline dates are based on the following formulas. These formulas are particularly important for classes that meet outside the standard (10 week term plus finals week) start and end dates for a term. Please consult your college office for specific dates relevant to your class.

- Students may not add classes after 10% of the scheduled class has elapsed.
- Students who drop a class or classes after 20% of the scheduled class has elapsed will be responsible for 100% tuition and a grade of W will be assigned.
- Students may not select a Pass/Fail grading option after 20% of the scheduled class has elapsed.
- Students may not select Audit (non-credit) grading option after 30% of the scheduled class has elapsed.
- Students may not withdraw from classes after 70% of the scheduled class has elapsed.

**College/ School Regulations**

- Students may audit classes only with permission of their advisor or college office. Students may not change from the status of credit to audit or vice-versa after 30% of the term has elapsed (the third week of class for a 10 week class). Full tuition is assessed for audited classes.
- Students interested in earning credit in transfer must obtain approval from their college office prior to registration at the other institution.
- Extension courses taught through other accredited institutions are accepted only when the sponsoring institution itself conducts the courses and certifies the grade and credit through an official transcript. A DePaul degree-seeking student must obtain the written permission of his or her dean before enrolling in an extension course.

**Registration, Student Enrollment Classifications**

College credit is accumulated on the basis of quarter hours earned:

**Full-time Student Status**

An eight-quarter hour course load is considered full-time for graduate studies.

**Half-time Student Status**

A four- to seven-quarter hour course load is considered half-time for graduate studies.
Students Completing Thesis/Dissertation Requirements

Students should consult their program for enrollment information.
Self-service Enrollment Verifications are available through Campus Connect.

Requirement Term

Graduate Program Specific Information

A student will complete the graduate program requirements in place at the time of the student's first enrollment term in the graduate program. A student who changes graduate programs while his/her studies are in progress will complete the requirements in place at the time he or she enrolls in the new program.

A student who changes graduate programs during a break between terms (e.g. winter, spring) will follow the requirements in place for the term immediately following the break.

A student who applies for readmission will be subject to the program and concentration requirements in place in the enrollment term of readmission.

Other Information

A student currently enrolled in a degree program in which revisions are approved while their studies are in progress may elect to formally adopt the revised requirements.

Requirements, Curriculum

Official changes in courses, course numbers, titles, descriptions, and prerequisites and minor changes in program requirements may be made on a quarterly basis.

Multiple changes or thorough revisions in the requirements of a program, major, or concentration or the addition of new majors or concentrations which have received the required university approvals may be made twice each year. Changes approved by May 15th will be effective for the Autumn term, and those by October 15th will be effective for the Winter/Spring/Summer terms.

Requirements, Program Termination/Substantial Changes

If an undergraduate major, graduate or law degree program is terminated or a program undergoes substantial changes, there must be a plan in place and a commitment to provide a reasonable opportunity for those active in the program to complete the current requirements of the degree.

The chart below provides the maximum time frame allowed to complete the degree from the point of termination/change:
<table>
<thead>
<tr>
<th>Type of Program</th>
<th>Maximum Time Allowed*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Undergraduate majors</td>
<td>4 years</td>
</tr>
<tr>
<td>Undergraduate SNL programs</td>
<td>6 years</td>
</tr>
<tr>
<td>Graduate programs (thesis required)</td>
<td>4 years</td>
</tr>
<tr>
<td>Graduate programs (MFA)</td>
<td>4 years</td>
</tr>
<tr>
<td>Graduate programs (thesis not required) and Professional MJ and LLM programs</td>
<td>3 years</td>
</tr>
<tr>
<td>Doctoral programs (embedded master's program)</td>
<td>8 years</td>
</tr>
<tr>
<td>Doctoral programs (stand-alone)</td>
<td>5 years</td>
</tr>
<tr>
<td>Professional JD programs</td>
<td>4 years</td>
</tr>
</tbody>
</table>

*If a program wishes to set shorter time frame for completion, they must explain their rationale and obtain approval from Faculty Council.

For programs with substantial changes, students may elect to pursue the new requirements in accordance with the Requirement Term Policy. Those students who are not able to complete their degree requirements within this time frame will be moved into the new requirements. For programs that have been terminated, undergraduate students may request to pursue a new major and graduate students may apply to a new graduate program. In addition, those students who are not able to complete a terminated degree program within this time frame will be advised of other program opportunities that may be available.

Students are responsible for working with their advisors to develop a plan to finish within the stated timeframe. It is the student’s responsibility to complete required courses when they are offered. Students should not wait to complete required coursework.

For required courses that will no longer be offered, the department will provide substitutions. Waivers may also be granted; however the student must still meet the minimum credit hours required.

Students admitted into or those who are in the admission process for a terminated program will be advised of alternative programs.

Once a program has been approved for termination, students will no longer be admitted or readmitted into the program and students will no longer be able to declare that major or program. The only exceptions to this are active students officially in an "intended" or "pre" major or students officially in a combined bachelor’s/master’s program. In accordance with the requirement term policy, students who are discontinued will not be eligible to be readmitted into a terminated program.

**Transcripts**

The Office of the University Registrar processes official transcript requests for DePaul University. Official transcripts can be requested on-line through Campus Connect.

The Family Educational Rights and Privacy Act of 1974 prohibits release of confidential transcript information without the student’s authorization.

Transcripts will be issued only after the student has fulfilled all financial obligations to the University.
**Tuition Policy**

All tuition and fees are due to DePaul University by the published tuition due date for that term. All charges must be paid in-full by the payment date.

Tuition charges for any course registrations made after the due date must be paid in full within 24 hours of registration.

Tuition bills may be accessed online through Campus Connect. The student will be required to sign up for E-Bill to access their bills or to grant access to a guest user.

Students whose accounts show a balance due after the tuition due date will be subject to a late fee and prohibited from future registration, receiving transcripts and other university services.

---

**Withdrawal/ Drop Policy**

The following policies pertain to the withdrawal from individual courses, the withdrawal of all courses for a given term, and withdrawal from the University.

There are two categories of Withdrawals:

- Student Initiated
- College/University Initiated

**Student Initiated**

Students who must withdraw either from a course or from the University may do so by using Campus Connect, the University's web registration system. Students unable to use the web registration system should contact their home school/college office, whether in person, phone or email (emails must be sent from the student's preferred email listed in Campus Connect). Students who are physically unable to contact the university may designate someone to act on their behalf.

Withdrawals processed through Campus Connect are effective the day on which they are made. Withdrawals processed through the student's home school/college office are effective:

- in person: the date the student had the transaction processed in the office
- for email: the date the email was sent
- for mail: the date the letter was received

Simply ceasing to attend, or notifying the instructor, or nonpayment of tuition, does not constitute an official withdrawal from the course and will result in academic as well as financial penalty.

**A. Withdrawal from one or more courses:**

Students who wish to withdraw from one or more courses within a term, must do so by the stated deadline dates for that term. Students who missed the deadline due to extenuating circumstances should consult section C.

Students who withdraw from all courses for a term, and who plan to return the next term, are eligible to register for the next term.

Students who plan to permanently withdraw from the University should consult Section B.
B. Withdrawal from the University

Students who decide to permanently withdraw from the University must do so using the DePaul University Permanent Withdrawal/ Military Leave Request application in Campus Connect. Students are strongly encouraged to consult with their advisor before doing so.

1. Students enrolled for current and/or future terms are required to withdraw from all courses before requesting permanent withdrawal in the DePaul University Permanent Withdrawal/ Military Leave Request application in Campus Connect.
2. Students who are not currently enrolled and wish to permanently withdraw from the university should complete the DePaul University Permanent Withdrawal/ Military Leave Request application in Campus Connect.
3. Students who wish to return to the University after a permanent withdrawal must complete an application for readmission.

C. Late Withdrawals

In rare circumstances, students who missed the deadline to withdraw from a course (or courses), may request a late withdrawal from either the Dean of Students office or the student's home college office.

1. Decision-making for late withdrawals resides primarily in the Dean of Students Office for personal/medical issues; and in the School/College Offices for all other issues. These principles underlie the decision-making processes:
   - All policies are driven by academic concerns:
     1. Decisions are guided by the best interests of the students.
     2. Decisions will be made in compliance with federal regulations.
   - Restrictions on requesting approval for late withdrawal:

For Undergraduate/Graduate:

   Autumn Quarter: Last day of the last final exam of the subsequent winter quarter.
   Winter Quarter: Last day of the last final exam of the subsequent spring quarter.
   Spring Quarter: The end of the second week of the subsequent autumn quarter.
   Summer Terms: Last day of the last final exam of the subsequent autumn quarter.

For the College of Law:

   Fall Semester: Last day of the final exam period for the fall semester.
   Spring Semester: Last day of the final exam period for the spring semester.
   Summer Semester: Last day of the final exam period for the summer semester.

College of Law students filing a late withdrawal appeal in the Fall or Spring semester of the first year of law school must request withdrawal from all courses.

During their college career, students may be allowed one medical/personal approved administrative withdrawal and one college office administrative withdrawal, each for one or more courses in a single term.

College/ University Initiated

Under rare circumstances, DePaul University may need to administratively drop a student from a course (or courses) for which the student is registered. This policy outlines those instances and establishes the procedures to be followed by the University to drop a student from the course.

DePaul University reserves the right to administratively drop a student from a course (or courses) under a limited number of circumstances. These fall into two categories: those performed by the college offices and those performed by the Office of the Registrar.

College Office:

A student may be administratively dropped from a course (or courses) by the home college, if the student is:
1. registered for a course (not repeatable for credit) for the third or more time and has not received appropriate permission to repeat the course again.
2. registered for a course (not repeatable for credit) in which the student originally earned a C- or better and has not received appropriate permission to repeat the course.
3. on probation and exceeds the allowable number of credit hours and has not received the appropriate permission to register for the additional hours.
4. registered for more than the maximum number of competencies allowed within competency-based courses (SNL).
5. academically dismissed from the University.
6. registered for a course that has been cancelled.

**Office of the University Registrar:**

A student may be administratively dropped from a course (or courses) by the Office of the University Registrar, if the student has:

1. not met the prerequisites for the course and has not received appropriate permission to take the course without the prerequisite.
2. been suspended for the term or permanently dismissed from the University as the result of an academic integrity violation hearing or a student code of conduct judicial board hearing.

**Withdrawal, Tuition**

Students must withdraw from classes through the registration function in Campus Connect. Students unable to use the web registration system should contact their home school/college office, whether by email, in person, or by phone. Withdrawals processed via the web or through direct contact with the home school/college office are effective the day on which they are made. Simply ceasing to attend, or notifying the instructor, or nonpayment of tuition, does not constitute an authorized withdrawal from class and will result in academic as well as financial penalty.

When the withdrawal occurs, the tuition charge for courses during a 10-week quarter will be reduced according to the following schedule, in accord with the tuition package:

| Up to 20% or 2 weeks of a ten week term | 100% refund |
| After 20% of the term | 0% refund |

**Notes**

- Students receiving financial aid are advised to contact a Financial Aid Counselor to discuss the consequences of a withdrawal impacting academic progress and aid eligibility at DePaul University or any other school to which they may transfer. Students in university housing are advised to contact Housing to discuss the consequences of withdrawal impacting eligibility to maintain residence.

**University Resources**

This section provides information on an array of university resources, all designed to help you make the most of your experience at DePaul. We encourage you to read through this whole section when you arrive at DePaul, and then refer back to individual pages for information on specific resources as you need them.
Adult, Veteran and Commuter Student Affairs

Through collaborations with university and external partners, the Office of Adult, Veteran and Commuter Student Affairs assists students in their transition to college, provides support, resources and programs that help students persist and succeed academically, and works to promote an environment that is inclusive of the non-traditional student experience in which adult, veteran and commuter students can thrive as engaged members of the DePaul community.

As a result of participating in Adult, Veteran, and Commuter Student Affairs programs, students will be able to:

- Demonstrate life, academic, and career skills.
- Actively manage their transition to DePaul student life.
- Demonstrate self-advocacy and utilize appropriate resources when needs arise.
- Overcome engagement barriers associated with their non-traditional student status to participate in and contribute to the DePaul Community.

Career Center

At the DePaul University Career Center, we believe the path to your successful future starts with you. By helping you understand and shape your passions, interests and skills, we connect you with majors, internships, jobs and opportunities so that you can take on Chicago—and the world—with vigor, knowledge and preparation. No matter where you are in your career search, whether it's deciding on a major or career path, making a career change, or preparing for your first job interview, we can help.

- Explore career options whether you are just starting your job search or are looking for a change.
- Get career and graduate school advice and resources from specialists in your field. Our career advisors are available to meet one-on-one with you to discuss your needs.
- Gain experience and earn academic credit with an internship through the University Internship Program.
- Find a job with one of the thousands of employers who recruit DePaul grads.
- Connect with DePaul alumni for career-related networking and mentoring.

The Career Center is located at DePaul's Lincoln Park Campus in SAC 192 and at the Loop Campus in DePaul Center 9500. Students may contact the office at (312) 362-8437 for appointments, or visit careercenter.depaul.edu for additional information.

Center for Students with Disabilities

The Center for Students with Disabilities (CSD) coordinates DePaul University's provision of accommodations and other services to students with disabilities pursuant to the Americans with Disabilities Act and Section 504 of the Rehabilitation Act. CSD regularly works with students diagnosed with a range of disabilities such as learning disabilities, AD/HD, medical conditions, chronic illness, mental health disorders, and physical/visual disabilities, amongst others. Student success is at the core of the CSD's mission and fits integrally with DePaul University as a diverse learning community.

Students are encouraged to enroll with CSD to receive accommodations and additional support services. CSD
students are enrolled in all Colleges and Schools at DePaul, and may be full-time, part-time, undergraduate, or graduate level students. Some accommodations and services may include extended time on exams, assistance with note-taking, adaptive equipment, real-time captioning, classroom accommodations, advocacy, and assistive technologies amongst other support services.

CSD enrollment procedures require appropriate documentation of a student’s disability and other identified information, as well as a personal meeting with CSD staff.

CSD is also a resource for faculty and staff who may have questions about accommodating, or otherwise working with, students with disabilities.

CSD has two full-service office locations:
Lincoln Park Campus, Student Center 370, 773/325-1677
Loop Campus, Lewis Center 1420, 312/362-8002

For more information, please view the Center for Students with Disabilities website [http://offices.depaul.edu/student-affairs/about/departments/Pages/csd.aspx](http://offices.depaul.edu/student-affairs/about/departments/Pages/csd.aspx) or contact staff at csd@depaul.edu.

As a result of participating in **Center for Students with Disabilities** programs and services, students will be able to:

- Develop competencies in effective communication, critical thinking, technological prowess, and wellness skills to foster academic and personal success at DePaul and afterwards.
- Develop self-awareness and understanding of personal strengths and challenges to become effective self-advocates and assume their individual responsibilities in actively pursuing their roles in the academic community.
- Accept aspects of disability culture and diversity.
- Effectively manage personal and learning challenges to successfully interact in academic, professional, and social environments and as future contributing members of society.
- Demonstrate connections of acquired knowledge to other knowledge, ideas and experiences and relate knowledge to daily life.

Croak Student Legal Services
Croak Student Legal Services (C SLS) provides high quality, free and confidential legal advice to DePaul students on a wide range of common legal issues, including landlord disputes, misdemeanor criminal offenses and more. While we cannot represent you in court, we can help you understand your rights and obligations, provide general recommendations, and help you find useful resources, including referrals to licensed, practicing attorneys with experience related to your case. CSLS is available by appointment only. Please call (773) 325-1588 to set up an appointment. You can find more information at http://sls.depaul.edu.
Dean of Students Office

The Dean of Students Office is an invaluable resource, advocate and support for providing and identifying resources and services for students. The office helps individuals in navigating the university, particularly during difficult situations, as in personal, medical, mental health, and/or family crises. The Dean of Students Office is also responsible for overseeing the Code of Student Responsibility and managing the Student Conduct Process.

Additional information is available from the Dean of Students Office [http://offices.depaul.edu/student-affairs/about/departments/Pages/dos.aspx](http://offices.depaul.edu/student-affairs/about/departments/Pages/dos.aspx)

As a result of participating in Dean of Students programs and services, students will be able to:

- Utilize appropriate university and community resources to manage personal, professional and academic challenges.
- Utilize self-assessment strategies and develop skills to become empowered self-advocates.
- Communicate community standards and take responsibility for choices and actions.

DePaul Central

DePaul Central is your one-stop resource for helping students manage the business side of being a student. Services include: Account Transactions, Financial Aid Inquiries, Ordering Transcripts, Payment Plan Inquiries, Personal Financial Planning and Submitting Immunization Records.

DePaul Central ensures student issues are resolved in a timely manner and with the right level of attention and care they deserve so students can focus on what really matters: their academics.

- Visit with DePaul Central staff:
  - Lincoln Park: Schmitt Academic Center 101, 2320 N. Kenmore Avenue
  - Loop: DePaul Center Suite 9100, 1 E. Jackson Boulevard
- You also can get answers to many questions online or over the phone.

Financial Fitness

Financial Fitness provides free services, resources and tools to help students manage costs from freshman year through graduation and beyond. Services include:

- Confidential one-on-one financial counseling
- Accessible written and online resources and tools
Health Promotion and Wellness

Health Promotion & Wellness (HPW) provides holistic education, support and resources for individuals to create and sustain long-term, healthy behaviors.

SURVIVOR SUPPORT ADVOCATES

The Survivor Support Advocates within HPW provide confidential and holistic support to survivors of sexual violence, relationship violence and stalking. The Advocates provide emotional care; information about counseling, medical resources, reporting processes, academic accommodations and safety planning; and referrals and help with navigating appropriate on- and off-campus resources.

ALCOHOL AND SUBSTANCE ABUSE PREVENTION

Alcohol and Substance Abuse Prevention at DePaul University stems from a harm-reduction approach, which encourages healthy choices and responsible decision-making regarding the use of alcohol, tobacco and other drugs. Students are also asked to consider their own safety and the safety of the community in relation to alcohol and substance use. The office offers various programs and presentations throughout the year, while also providing support to those in recovery or experiencing any issues related to substance misuse.

HEALTH EDUCATION

Health Education includes providing resources, events, trainings, workshops and presentations on various health related topics. These topics include: sexual health, sexual violence, relationship violence, stalking, healthy relationships, alcohol and drug abuse prevention, mental health, stress, nutrition, meal planning, physical activity and more.

Office of Health Promotion and Wellness
Lincoln Park Student Center, Suite 302
2250 N. Sheffield Ave.
773-325-7129
hpw@depaul.edu

Co-Curricular Learning Outcomes

As a result of participating in Health Promotion and Wellness programs, students will be able to:

- Develop decision-making skills related to their personal health and community well-being.
- Utilize on and off-campus resources related to their well-being and the well-being of others.
- Demonstrate reflective thinking about the impact of their choices on themselves and others.
- Articulate the relationship between societal norms and their perception of their personal health and community well-being.
Health Services

Health Services are offered through Presence SAGE medical group. It is available to all enrolled students for a fee. If you live in a residence hall, with the exception of 1237 West Fullerton or University Center, you are automatically enrolled in DePaul Student Health Services.

Student Health Service is NOT health insurance; you may need additional coverage.

Additional information is available from the Office of Health Promotion and Wellness http://go.depaul.edu/healthservices.

Housing Services

The Department of Housing Services provides facilities and services that create the premier residential experience at DePaul University. Grounded in DePaul University's Vincentian values and distinguishing marks, staff of the department of Housing Services administer the processes for living on the Lincoln Park and Loop campuses and partner with others in promoting this experience. We strive to provide exceptional services within our high-quality, residential facilities while also encouraging residents' personal growth and community responsibility.

For more information, including how to apply for campus housing, visit http://offices.depaul.edu/housing.

Language Learning Center

Free tutoring service is available in the Department of Modern Languages (MOL).

- Each tutor holds one-on-one meetings with students by appointment in the Language Learning Center (SAC 305).
- Tutors are generally available 8am-8pm, Monday through Friday each quarter (although specific hours may vary by language).
- Our tutors provide the following language-related assistance:
  - Helping improve students' pronunciation;
  - Explaining grammar structures;
  - Practicing conversational skills;
  - Assisting with reading assignments;
  - Helping with writing assignments;
  - Offering other language-related support in all academic subjects.

To make a tutoring appointment, please call (773) 325-1888 or stop by the Language Learning Center (SAC 305).

The Language Learning Center also provides tutoring on weekends. Call the center for Saturday availability. The Center partners with the Learning Commons to offer free tutoring services in the Richardson library on Sundays. See the Learning Commons website for hours.
Learning Commons

The Learning Commons is a collaborative learning space located on the first floor of the John T. Richardson Library. It provides a variety of peer tutoring and career consulting services in one convenient location.

- Tutoring is available from the Science and Math Learning Center and the Language Learning Center
- Supplemental Instruction conducts peer-assisted study sessions for historically difficult courses
- Writing help is offered by the Writing Center
- The Career Center hosts resume review clinics
- Startup advising is provided by the Coleman Entrepreneurship Center
- The Office of Multicultural Student Success holds communal "Study Jams"

Services are available to all students on a walk-in basis. For a daily schedule or more information, see go.depaul.edu/learningcommons.

Libraries

The University Library provides information resources and services to students, faculty, and staff at three library locations: the John T. Richardson Library in Lincoln Park, the Loop Library in the DePaul Center, and the Vincent G. Rinn Law Library. The suburban campuses have access to the full array of electronic resources provided by the Library as well as delivery service for print materials. Online journals, e-books, and scholarly databases are available both on and off campus. Print books, dvds, cds and journals in the campus libraries may be supplemented with direct borrowing from other Illinois libraries through the I-Share consortium and outside Illinois through the ILLiad inter-library loan system. Librarians provide research support and information literacy instruction in person and via the online "Ask a Librarian" email, text and chat reference services. Special Collections and Archives provides a gateway for research utilizing rich primary source materials, unpublished documents, rare and specialized books, maps, graphic materials, and three dimensional objects. The Information Commons, located on the first floor of the John T. Richardson Library, provides academic support services as well as spaces for collaborative work. Group study rooms, media:scape tables and quiet study areas are available at both the Loop and the John T. Richardson Library.

Additional information is available from the DePaul University Library.

Office of Multicultural Student Success

The Office of Multicultural Student Success seeks to cultivate academic success and personal development for students of color, low-income college students, or first generation college students through sustained developmental programming, financial resources, and advocacy.

Additional information is available from the Office of Multicultural Student Success http://offices.depaul.edu/student-affairs/about/departments/Pages/omss.aspx.

As a result of participating in **Multicultural Student Success** programs, students will be able to:

- Demonstrate effective decision-making related to personal financial management.
- Demonstrate healthy decision-making related to effective self-care.
- Identify and use relevant campus resources in order to navigate their academic experience.
- Apply the concepts of Socially Responsible Leadership in order to challenge oppressive systems and behaviors and work to create change.
- Construct a career plan towards post-college career success.
Science and Math Learning Center

Currently enrolled DePaul students have access to free tutoring services at the Science and Math Learning Center (SMLC). Tutoring is available in the areas of chemistry, mathematical sciences, nursing, physics, and psychology (statistics only). All of the SMLC’s tutors are either graduate students or upper-level undergraduate students in their respective fields of study.

The SMLC’s tutoring center is located in O’Connell 300 on the Lincoln Park campus. A schedule of tutoring services is available online and is subject to change every term – check the schedule regularly for updates. No appointments are necessary to receive tutoring, however, students must bring a valid DePaul ID card with them to utilize the SMLC’s services. The SMLC partners with the Learning Commons to offer free tutoring services in the Richardson library as well.

Student Affairs

The Division of Student Affairs provides support services, such as counseling, advising and disability accommodations, in addition to programs that encourage students to explore their personal identities, faiths, values and roles in a multicultural world. Through these programs and services, we strive to reduce barriers to student progress and degree completion, promote socially responsible leadership, build community and create an environment that fosters students’ overall development.

Student Involvement

The Office of Student Involvement fosters student learning and success by providing opportunities for engagement through a wide variety of campus activities and organizations, holistic and intentional advising of student leaders, and the development of purposeful and mutually beneficial partnerships across the University and City of Chicago to maximize access to resources for a rich DePaul campus experience.

Additional information is available from the Office of Student Involvement go.depaul.edu/involvement

As a result of participating in Student Involvement programs, students will be able to:

- Apply communication, critical thinking, and professional skills to involvement opportunities on campus.
- Participate thoughtfully and respectfully as members of an inclusive community.
- Develop a sense of self, awareness of others, and understand their responsibility for choices and actions.
**Technology Resources**

The following list introduces some of the technology resources that are available to students at DePaul. Additional information is available on the Information Services website (is.depaul.edu).

**Campus Connect**

Campus Connect provides access to many of DePaul's primary services, including course registration, grades, tuition billing, transcripts, Demon Express and much more.

**Computer Labs and Classrooms**

There are many technology-enabled classrooms across the DePaul campuses. Technology resources in these rooms include desktop computers, LCD projectors, connections for laptops, and integrated, amplified sound systems. Specialty rooms exist across the university for classes with specific needs, and additional technology is available upon request.

DePaul also has computers available for use by students, faculty or staff, located in computer labs, lounges and lobbies across the campuses. Additional technology access is available to residence hall students; each residence hall is outfitted with study lounges allowing for student access to computers and printers at any time.

**CTA U-Pass**

Your CTA U-Pass provides unlimited rides on the CTA bus and rail systems during an academic term. It also functions as a Ventra card, allowing you to add funds to be used during university breaks. All students meeting the requirements are automatically enrolled in the program. If your eligibility changes before the last day to drop courses, your U-Pass will be adjusted accordingly.

U-Pass pick-up dates are held at the beginning of each quarter. Students must pick up CTA U-PASS cards in person, by presenting a valid DePaul ID Card. Your Ventra U-Pass is valid for 5 years. It will be deactivated and reactivated each quarter based on your enrollment. Do not discard your U-Pass, or you will be assessed a fee by the CTA for a replacement card.

Full details regarding the U-Pass can be found on the DePaul U-Pass website http://upass.depaul.edu/.

**DePaul ID Card**

Your DePaul ID Card serves as your identification to enable access to various DePaul buildings, computer labs, printers, and libraries and is used to purchase items using your Demon Express account and meal plan. You must have your ID Card on hand while on campus. New students receive their ID Card at student orientation. Students can also visit ID Services to obtain an ID card.

**Demon Express**

Demon Express is a prepaid debit account that is linked to your DePaul ID Card. Demon Express can be used at DePaul cafeterias, coffee shops, campus bookstores, libraries, printers, copiers, and other areas.

**Desire2Learn (D2L)**

D2L is an electronic course management system that enables interaction between students and faculty. D2L incorporates document sharing, discussion boards, e-mail, an online grade book, assignment drop boxes, chat rooms, small group areas, online quizzes, and more. To log in, use your Campus Connect username and password. If you need assistance using D2L, training is available.

**Discounts**

Demon Discounts provides discounted goods and services, including computer hardware and software, to DePaul students.

**E-Mail**
All students are provided a free DePaul e-mail account. Additional information is available on the Information Services website.

**Printing**

The Intelliprint system allows students to print from DePaul computer labs. Students use their DePaul ID card to pay for prints and are entitled to a set amount of free printing per quarter. Additional funds can be added to Demon Express as needed. You may also print to the Intelliprint system wirelessly.

**Residence Hall Technology**

Lincoln Park residence hall rooms are equipped with high speed Internet connections, wireless Internet access, and free telephone connections.

**Technical Support**

The Technology Support Center (TSC) is your first point of contact for technical assistance. The TSC provides free assistance via phone, e-mail and web for current DePaul students. We support all DePaul wireless networks, telephones, e-mail accounts and software. Please call (312) 362-8765 or email tsc@depaul.edu for support.

Direct, walk-up support is also available through the Genius Squad; a free tech support resource available to all current students. The Genius Squad can support desktops, laptops, phones, tablets, and other personal electronic devices. Please see go.depaul.edu/gs for more information.

**Technology Training**

Media Production and Training (MPT) provides technical training to the DePaul community, allowing employees and students to fully utilize current technologies. MPT offers both online training resources as well as campus workshops.

Lynda.com - DePaul students, faculty, and staff can log in to lynda.com for unlimited free access to a vast online library of the instructional videos covering the latest software, creative, and business skills.

**Wireless Internet Access**

Wireless internet access is available to students on all DePaul campuses.

---

**University Center for Writing-based Learning**

The University Center for Writing-based Learning (UCWbL) works with all members of the DePaul University community to support writers and to promote the use of writing in teaching and learning through five major initiatives:

**The Writing Center**

Peer writing tutors offers DePaul students, staff, faculty, and alumni individualized and small group writing feedback on any type of writing at any stage of the writing process. Tutors provide feedback face-to-face on the Lincoln Park and Loop campuses, through written feedback via email, and real time online through IM and webcam. The Writing Center also facilitates Writing Groups at the Loop, Lincoln Park, and Suburban Campuses.

**The Writing Fellows Program**

The Writing Fellows Program links undergraduate peer writing tutors with writing-intensive courses across the curriculum -- from physics to journalism, religious studies to computer science. Writing Fellows work with the same set of writers from a particular course for an entire quarter, responding to two of their papers through
written comments on drafts and in individual conferences.

**Workshops**

The UCWbL offers both in-class and in-house interactive writing workshops on topics ranging from grammar and usage to thesis development to ePortfolios.

**The Collaborative for Multilingual Writing and Research (CMWR)**

The CMWR is open to all members of DePaul's community interested in multilingual and cross-cultural interactions. To support English Language Learners specifically, the CMWR hosts a range of enterprises such as conversation opportunities, workshops, and publications.

**Faculty Development**

The UCWbL provides a range of support to DePaul instructors who teach with writing and who are working on their own writing projects.

For more information, please visit www.depaul.edu/writing.

---

**University Counseling**

University Counseling Services (UCS) is committed to providing a range of services intended to help currently enrolled DePaul students remove barriers to academic and personal success by addressing emotional, psychological and interpersonal concerns.

UCS provides group counseling, personal growth-oriented workshops, time-limited individual psychological counseling, psychiatric evaluation and crisis management services. Sometimes a skill-building workshop or small group counseling experience is the most effective intervention given a student's presenting concerns.

UCS has a diverse, caring, and competent professional staff that works from a variety of theoretical perspectives. Some students find that talking to a counselor once is sufficient to resolve their immediate concern. Our counselors can help you in a variety of ways because they are excellent sounding boards, compassionate listeners, and skillful experts in the problems of living. If further services would be beneficial, these will be discussed and recommendations will be made by the counselor.

UCS offers primarily short-term counseling and provides referrals and linkages to community providers when students could benefit from longer term services.

**Co-Curricular Learning Outcomes**

As a result of participating in University Counseling programs and services, students will be able to:

- Develop skills for coping, communication, self-care, and responsible decision-making.
- Identify and make progress on their personal goals.
- Identify and navigate resources both within DePaul University and within the surrounding community in order to remove barriers to academic or personal success.
- Enhance their self-awareness, self-worth, and emotional health.
General Information

In this section of the Code of Student Responsibility, you will find a variety of information that is important for students to read and understand. This section also includes definitions of terms that are used at other places in the Code of Student Responsibility.

Letter from the Dean of Students

To the University Community,

The Dean of Students Office is committed to partnership in the educational mission of DePaul University. This mission is enhanced by a Code of Student Responsibility, which includes policies that outline expectations and standards of behavior for the student community. Any community of more than 23,000 people needs rules. As a DePaul University student, the policies in the DePaul Code of Student Responsibility are not a list of things you can do wrong; it is a code designed to protect your rights and those of all DePaul students. Any student who feels that another student in the community has violated their rights is encouraged to use this Code and the Dean of Students Office as a resource.

The Dean of Students Office can be an invaluable advocate and support in identifying resources and services for students. In an institution of such size and complexity it is often difficult to know where to begin when a student is struggling or having difficulty navigating the University setting. This office can be of particular help in areas of personal and/or family crisis, economic distress, or a medical/personal leave of absence. The office serves as principal liaison and resource for students and other divisions and departments within the University community.

Finally, our work with students is guided by the Socially Responsible Leader framework which is grounded in our Catholic, Urban, and Vincentian mission. The development of socially responsible leaders in today’s complex, global, and ever-changing world requires a campus community that is committed to holistic learning and the fostering of a campus community based on respect. It is our hope that you will make full use of the opportunities to reach your full potential that are available for you at DePaul University. In that regard, the Dean of Students Office is here to serve you with locations on both the Loop and Lincoln Park campuses.

Locations: Student Center 307 DePaul Center 11001
Lincoln Park Campus Loop Campus
(773) 325-7290 (312) 362-8066

In emergency situations, the office can also be reached 24 hours a day through our Public Safety Office at (773) 325-7777.

Sincerely,
Ashley Knight, Ed.D.
Dean of Students
Definitions

Advisor
An advisor is a member of the DePaul University community who may act as a support person for either the complainant or referred student. All students involved in a Student Conduct Process have the right to bring one advisor to any meeting or hearing related to the Student Conduct Process. An advisor may attend any related meeting but may not directly address the members of the University Board, an administrative hearing officer, or anyone else present at a meeting or hearing.

The Dean of Students retains a pool of faculty and staff that are trained to serve as advisors for students and can be provided at the student's request. Furthermore, if a student selects an advisor who is not part of this trained pool, the Dean of Students Office offers information and consultation on the role of the advisor and training, if needed and requested by the student or their advisor. All advisors must be approved in advance by the moderator, administrative hearing officer, or other University designee.

Because an advisor must be a current member of the DePaul community, students are prohibited from having an attorney or legal representative who is not a current member of the DePaul community be an advisor during the Student Conduct Process. Students may choose to consult or retain independent legal counsel as a result of their participation in the Student Conduct Process, but such legal counsel may not attend any meetings or hearings, and does not have a role in the Student Conduct Process. More information for attorneys can be found at the DePaul University Student Conduct Process Guide for Attorneys.

For student conduct cases involving the Sexual & Relationship Violence Prevention and Response policy, please refer to the information on advisors in that policy.

Administrative Hearing
An administrative hearing is a hearing process in which a student conduct case is reviewed by an administrative hearing officer. The administrative hearing officer will review all of the information, determine responsibility and sanction if appropriate. The procedures for an administrative hearing are set forth in the “Administrative Hearing Process” section of the Code of Student Responsibility.

Administrative Hearing Officer
An administrative hearing officer is the individual who serves as the hearing officer in an administrative hearing.

Complainant
A complainant is a student who is alleging a potential violation of a policy and participating in the Student Conduct Process in this role. An individual may allege a potential violation of a policy but then choose not to participate in the Student Conduct Process as a complainant. Under some circumstances (for example, where a non-student has alleged a policy violation or when a student chooses not to participate in the Student Conduct Process in the complainant role), the University may serve as the complainant in a Student Conduct Process. In these instances, the individual who has alleged a potential violation of a policy is being given the opportunity to provide information through the University representative.

Moderator
A moderator is a designated University staff member (typically a Dean of Students Office staff, or other Student Affairs professional) who is responsible for managing the University Board hearing process. The moderator has no voting role in the outcome of any University Board hearing, but all determinations by a University Board panel as to whether a violation has occurred or related sanctions will be reviewed with the moderator.

Referred Student
A referred student is a student who has been referred to the Dean of Students Office for a potential violation of a policy.

Student
For purposes of the Code of Student Responsibility and the Student Conduct Process, an individual becomes a student at the time they are admitted to the University and remains a student until (1) they graduate; (2) they have not been in attendance at the University for three consecutive quarters such that they would need to reapply prior to enrolling; (3) they withdraw; or (4) they are dismissed. The term student includes both degree-seeking and non-degree seeking individuals. The term student includes individuals who are taking courses for credit or not for credit (for example, students in the English Language Academy and Continuing Professional Education). The term student also includes registered student organizations.

Student Organization
A student organization is any student organization registered with the Office of Student Involvement for that academic year. The Office of Student Involvement will maintain comprehensive policies and procedures for registering as a student organization and for maintaining that status.
Student organizations and their advisors are expected to abide by all University policies, including the policies in
the Code of Student Responsibility.

**University Board**
The University Board is a pool of DePaul community members who are recruited, selected and trained by
Student Affairs to comprise the panel for a University Board hearing. All members of the University Board will
receive annual training regarding student conduct principles and techniques, student development, DePaul
policies, the Student Conduct Process, and various other information, including information as required by
applicable legal mandates. Attendance at the annual training is mandatory. The members of the University Board
are current students, faculty and staff consisting of at least:

- Six current students with at least second-year status appointed by the Student Government Association;
- Six faculty members appointed by the Faculty Council; and
- Six staff members appointed by the Staff Council

Individuals panels selected to serve on a hearing are determined on a case by case basis with consideration that
the panel be representative of the diversity within the larger campus community.

**University Board Hearing**
A University Board hearing is a hearing process by which a student conduct case is brought before a University
Board panel for the purposes of reviewing information to determine finding of responsibility and appropriate
sanctions to the Dean of Students Office. The University Board hearing process is managed by a moderator. The
procedures for a University Board hearing are set forth in the "University Board Hearing Process" section of the
Student Conduct Process.

**University Board Panel**
A University Board panel is chosen by the Dean of Students Office and is comprised of three individuals from the
general University Board membership (with representation from each population; one student, one faculty
member and one staff member). The University Board panel is charged with reviewing all of the information,
and determining responsibility and sanctions if appropriate.

**Witness**
A witness is an individual who has information to present that directly bears upon the circumstances of a conduct
case or has supporting statements to add to those of the complainant or referred student during the Student
Conduct Process. Generally, a witness must be a current member of the DePaul community (faculty, staff or
student) and must be approved in advance by the University.

In general, witnesses must present their information in person. It is the responsibility of a complainant or a
referred student to make sure that a witness who is appearing on their behalf can attend an administrative
hearing or University Board hearing. In some cases, the University will, in its discretion, approve the use of
written statements from witnesses, or telephone participation by witnesses.

**Jurisdiction**

The University may initiate a Student Conduct Process when a student or student organization is alleged to have
violated a policy as follows:
(1) The alleged policy violation occurred on-campus.
(2) The alleged policy violation occurred on or off-campus at a University activity, program, function or
sponsored event.
(3) The alleged policy violation occurred off campus (including in online communities) and involves a member of
the campus community (student, faculty or staff).
(4) The alleged policy violation involved the student or student organization using their status as a member of
the DePaul community.
(5) The alleged policy violation affects the University or its community members.
Notification of FERPA Rights

Annual Notification for DePaul Students: Your FERPA Rights

We want to take this opportunity to provide you with a summary of your rights under The Family Educational Rights and Privacy Act (FERPA), the federal law that governs release of and access to student education records. Please view Understanding FERPA, a DePaul Central Learning Center video for information and instructions.

Your FERPA rights include:
1. The right to inspect and review your education record within 45 days after the University receives a request for access. If you want to review your record, contact the University office that maintains the record to make appropriate arrangements.

2. The right to request an amendment of your education record if you believe it is inaccurate or misleading. If you feel there is an error in your record, you should submit a statement to the University official responsible for the record, clearly identifying the part of the record you want changed and why you believe it is inaccurate or misleading. That office will notify you of their decision and advise you regarding appropriate steps if you do not agree with the decision.

3. The right to provide written consent before DePaul discloses personally identifiable information contained in your education records, except to the extent that FERPA authorizes disclosure without consent.

Some examples of exceptions include:

- School officials with “legitimate educational interests.” A school official has a legitimate educational interest if the official has a professional need to review your education record in order to fulfill his or her official responsibilities. Examples of people who may have access, depending on their official duties, and only within the context of those duties, include: university faculty and staff, agents of the institution, students employed by the institution or who serve an official institutional committees, and representatives of agencies under contract with the University.
- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student's enrollment or transfer.
- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local educational authorities, such as a state postsecondary authority that is responsible for supervising the university's state-supported education programs. Disclosures under this provision may be made in connection with an audit or evaluation of federal- or state-supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs. These entities may make further disclosures of personally identifiable information to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, enforcement or compliance activity on their behalf.
- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid.
- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate or administer predictive tests; (b) administer student aid programs; or (c) improve instruction.
- To accrediting organizations in order to carry out their accrediting functions.
- To appropriate officials in connection with a health or safety emergency.
- Information the school has designated as "directory information."

Directory information may be released without your written consent and includes the following: name, address, e-mail, telephone number, date of birth, college of enrollment, year in school, major, enrollment status (including current enrollment, dates of attendance, full-time/part-time or withdrawn), degrees, awards and honors received (e.g., Dean's List recognition), participation in officially recognized activities and sports, weight and height of members of athletic teams, photographs (including ID pictures), videos depicting and/or concerning University life, and previous educational institutions attended. Please note that you have the right to withhold the release of directory information except to the extent that FERPA authorizes disclosure without consent (see #3 above).

To withhold the release of your directory information, you must log into the student portal, Campus Connection, and, under Student Privacy settings, indicate your preference. Please note two important details regarding placing a "No Release" on your record:

1. A "No Release" on your record will prevent your name from being included on lists of students released to honor societies, dean's list and graduation announcements to local newspapers, and enrollment and degree...
verification to anyone, including potential employers.

2. A "No Release" applies to all elements of directory information on your record.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

For additional information, please consult the U.S Department of Education (http://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.htm/) website.

Questions concerning FERPA should be referred to DePaul Central:

DePaul Central
Lincoln Park: Schmitt Academic Center, 101
Loop: DePaul Center, Suite 9100
Tel: (312) 362-8610 | dpcl@depaul.edu | depaulcentral.depaul.edu

Statement of Non-Discrimination

DePaul University strictly prohibits discrimination, including harassment, on the basis of any status or characteristic protected by local, state or federal law. DePaul's full policy on discrimination and harassment is the Anti-Discrimination and Anti-Harassment Policy and Procedures.

Title IX Information

Title IX of the Education Amendments of 1972 (commonly known as "Title IX") is a federal law that prohibits discrimination on the basis of sex in federally funded education programs and activities. Sex discrimination includes sexual harassment, and sexual and relationship violence. When the University receives a complaint, it will respond to the complaint in a prompt and equitable manner. Every complaint is based on its own facts and circumstances, which can impact the course of response. DePaul University prohibits retaliation against any person, including complainants, respondents and witnesses exercising his or her rights and/or responsibilities in good faith pursuant to Title IX and related University policies.

Karen Tamburro in the Office of Institutional Diversity and Equity is the Title IX Coordinator for DePaul University. The Title IX Coordinator's Offices are located on the 8th floor of the Daley Building (14 East Jackson). Please call (312-362-8970) or email (titleixcoordinator@depaul.edu) to schedule a meeting. Walk-ins are welcome.

As appropriate, the Title IX Coordinator works with other offices to address Title IX complaints and other Title IX compliance issues. These offices include Student Affairs, Academic Affairs, Human Resources, Athletics, Compliance and Risk Management, Enrollment Management and Marketing, and others as appropriate.

More information about DePaul's response to Title IX complaints and sexual and relationship violence can be found on the Public Safety website.
Changes to Policies

Students have the right to have access to information regarding academic policies and other University policies, including the policies in this Code of Student Responsibility. Students are advised to read the Academic Student Handbook and any associated references, and all other policies, including those available on the University Policies and Procedures website, carefully.

The University reserves the right to change policies or procedures at any time and according to established procedures, provided such changes are updated as appropriate, including for example on the University Policies and Procedures website or in the online Academic Student Handbook or any associated references.

Student Representation

Students have the right to participate in the governance of the University through the Student Government Association. More information about the Student Government Association can be found on the Student Government Association website.

Students also have the opportunity to participate in various University processes according to the policies and procedures of a particular academic unit or process. This includes for example, participation in the University's Promotion and Tenure process as detailed in the Faculty Handbook.

Speech and Expression

Inside and outside of the classroom, DePaul values inquiry and expression. DePaul has articulated its commitment to speech and expression in the Guiding Principles on Speech and Expression.

DePaul encourages students to operate student media, and will provide support and advisors in this endeavor. It should be understood that supporting these efforts in no way implies DePaul approval or endorsement of the views expressed in student media.

DePaul University encourages student organizations to sponsor guest speakers whose presentation will contribute to the role of the university as a forum for intellectual discussion, debate, investigation and/or artistic expression. Through this forum, speakers bring to the University an opportunity for students to hear and discuss opposing viewpoints on a wide range of issues. It should be understood that providing a forum in no way implies DePaul approval or endorsement of the views expressed by the sponsored speaker. A statement indicating that the presence of the speaker on campus does not imply that DePaul has approved or endorsed the views expressed by the speaker must be included in all publications for and advertising about any speaker event.
Student Contact Information

Students are expected to ensure that their contact information is current on Campus Connect. All notices in the Student Conduct Process will be delivered personally, via the postal service, or to a student's current preferred email as noted in Campus Connect.

Emergency Contacts

The University reserves the right to contact a student's parent, legal guardian, spouse, and/or other designated emergency contact in emergency situations, and in certain situations involving violations of university policies or laws related to alcohol and controlled substances.

Clery Act Statement

DePaul University complies with its obligations pursuant to the Clery Act. More information about the Clery Act, DePaul's policies related to the Clery Act, and DePaul's Annual Security Report can be found on the Public Safety website.

Drug Free Schools and Community Act Statement

DePaul University complies with the requirements of the Drug Free Schools and Communities Act. DePaul has policies and procedures to prevent the unlawful possession, use or distribution of illicit drugs and alcohol by students and employees. This includes the Alcohol policy, the Illegal Use or Possession of Drugs or Controlled Substances policy, and the Drug Free Workplace and Legal Drinking Age Compliance policy.

DePaul distributes an annual notification to all students and employees that includes standards of conduct, sanctions under law and University policy, a description of the health risks association with alcohol and drug use, and a description of treatment programs. The University reviews its compliance on a biennial basis to determine its effectiveness and to ensure that the standards of conduct and conduct sanctions have been consistently enforced. This review is documented in a report.

Any DePaul student who has a drug or alcohol related problem may call upon the University for assistance. Please contact the Office of Health Promotion and Wellness for more information. The Office of Health Promotion and Wellness can provide a confidential referral to a drug or alcohol treatment program.

Information on the effects of drugs and alcohol is available through the Office of Health Promotion and Wellness, University Counseling Services, the Ray Meyer Fitness Center and Sage Medical/DePaul Health Services.
Information Regarding Registered Sex Offenders

Information regarding sex offender registration and regarding registered sex offenders enrolled or employed at DePaul University can be obtained from DePaul Public Safety.

Code of Student Responsibility Policies

In this section of the Code of Student Responsibility, you will find information about DePaul's policies that apply only to students.

As an academic and religious institution, DePaul has a vested interest in both the safety and the well-being of the members of its campus community. A student by voluntarily joining the University community agrees to abide by the standards that have been instituted by DePaul University. The Code of Student Responsibility gives formal recognition to the rights and responsibilities of students at DePaul University. Students are responsible for being familiar with all of the policies included in the Code of Student Responsibility.

The University expects that students will take responsibility for confronting behaviors exhibited by their peers that negatively impact their experiences and violate established standards of behavior as articulated in policies. It is imperative that students work in partnership with University faculty and staff member to protect the rights that have been afforded them.

Alcohol

The State of Illinois prohibits the sale, use, distribution, manufacture, or possession of all forms of alcoholic beverages by persons under 21 years of age. Students under 21 years of age may not sell, use, distribute, manufacture, or possess all forms of alcoholic beverages.

Providing or distributing alcohol to individuals under the age of 21 is prohibited. Students, even those 21 years of age or older, may not possess or consume alcohol in common or non-reserved areas on university premises.

Alcohol consumption that results in behavior that infringes on the rights of others in the community is prohibited.

Alcohol consumption that creates a risk of harm to self, including requiring a transport to the hospital for intoxication, is prohibited.

For specific policies regarding alcoholic beverages in the residence halls, please see the Guide to Student Housing.

For specific policies regarding events sponsored by student organizations at which alcohol is served, please see the Student Organization Handbook.

Alcoholic beverages may not be served at events sponsored by student organizations without authorization from the Office of Student Involvement. Unless specific risk management mechanisms are in place, authorization will generally not be given to any student organization that is hosting an event at which students under 21 will, or could be, present. Notification of such authorization will be sent to the student organization itself, the organization's moderator/advisor, the building director and the Public Safety Office.
DePaul community members owe it to themselves and others to make educated decisions about their use of alcohol.

This University also seeks to educate students about making safe, responsible decisions when it comes to alcohol use. Detailed information about DePaul's efforts and programming related to alcohol use can be obtained from the Office of Health Promotion and Wellness. Students who have concerns about their alcohol use (or someone else's) may confidentially contact the Office of Health Promotion and Wellness at any time.

Criminal and Civil Law Violations

Students must abide by all local, state, and federal laws. Any student who violates a local, state, or federal law is in violation of DePaul University policy.

Damage to Property

A student may not take action that damages or that could reasonably be expected to damage property, including University property, that is not the student's own property without the consent of the owner of the property or other person legally responsible for the property.

Demonstrations and Other Similar Events

DePaul recognizes that students may organize or participate in demonstrations and other similar events in order to make their voices heard and effectuate change.

The University has an obligation to ensure the safety of individuals, the protection of property, and the continuance of University business. As such, the University will have the final determination as to the time, place, and manner of all demonstrations and other similar events on-campus.

All demonstrations and other similar events on or adjacent to campus must be orderly and peaceful. Demonstrations or other similar events on or adjacent to campus may not impede passage, may not create excessive noise, or may not interfere with the business operations of the University.

Disorderly, Violent, Intimidating or Dangerous Behavior

Students may not engage in behavior that threatens or harms, or that may reasonably be expected to threaten or harm, other people. Students may not engage in behavior that is dangerous, destructive, or disorderly.

Conduct that may violate this policy includes, but is not limited to:
1. Physically harming another person, either intentionally or by taking actions that create a substantial risk of physical harm to another person.
2. Threatening to physically harm another person.
3. Causing significant emotional harm through bullying or other means.
4. Disrupting the peace.
5. Impeding the business operations of the University.
6. Obstructing emergency routes.
7. Failing to abide by emergency regulations and evacuation procedures.
8. Urinating or defecating in public view or public place.

False Information and Misrepresentation

Students may not provide false information to the University. Students may not assist with providing false information to the University. This includes taking any action based on known incorrect information. This also includes making a false report of an emergency regarding the University.

Students may not falsify, misuse, or knowingly misrepresent any University record or document.

Students may not engage in forgery, alteration or misuse of University documents, records, or identification or other materials submitted to the University.

Students may not misrepresent that they have authority to bind the University in any way, including by entering into contracts on behalf of the University.

Students may not intentionally misrepresent the position of the University.

Students may not use, possess, alter, manufacture or distribute an identification card or any similar document or information that is false or fraudulent in that it misrepresents an individual's identity or personal characteristics. This includes using another individual's identification.

Gambling

Students may not engage in any form of gambling. Gambling includes illegal wagering (including regarding sports), bookmaking, or unauthorized games or contests of chance. Students may not provide information to others to assist in any gambling activities.

Guest Responsibility

Students are responsible for the behavior of their guests. A host assumes full responsibility for their guests’ compliance with all University policies and procedures, including policies specific to Residential Education/Housing or the Office of Student Involvement.
Hazing

DePaul prohibits hazing, as defined under applicable laws. Hazing includes, but is not limited to, any action taken or situation created to produce mental or physical discomfort, embarrassment, ridicule or endangerment of a student or group of students for the purpose of initiation into, affiliation with, or admission to, or as a condition for continued membership in a group, team, club or other organization. Falsely leading an individual or individuals to believe that they will be inducted/initiated by participating in particular activities may also be considered hazing. Acceptance of the activity on the part of a new member or individual does not excuse sponsorship of the activity.

Examples of hazing include, but are not limited to: use/abuse of alcohol, paddling in any form, creation of excess fatigue, physical and psychological shocks, and morally degrading or humiliating games and activities. Other activities and requirements that should be planned with care so as to avoid hazing include wearing particular apparel or accessories, scavenger hunts/treasure hunts, and road trips.

Illegal Use or Possession of Drugs or Controlled Substances

Students may not illegally use, sell, possess, manufacture or distribute any substance prohibited by local, State or federal law. This includes but is not limited to illegal drugs and controlled substances (including marijuana, narcotics, cocaine, heroin, prescription medications, synthetic cannabinoids or other drugs, and any chemical substantially similar to a controlled substance. Students should be aware that it is unlawful to distribute prescription medication to other students for whom the medication was not prescribed.

Use, possession, manufacturing, or distribution of drug paraphernalia is also prohibited.

This University also seeks to educate students about the use of illegal drugs and controlled substances. Detailed information about DePaul's efforts and programming can be obtained from the Office of Health Promotion and Wellness. Students who have concerns about their substance use (or someone else's) may confidentially contact the Office of Health Promotion and Wellness at any time.

Reasonable Directives from the University

A student may not disregard a reasonable directive, either verbal or written, from a University official or office acting in their official capacity.

Student Conduct Process Compliance

A student may not take any action to influence or coerce information that is provided in a Student Conduct Process.

A student may not take any action that disrupts or impairs the Student Conduct Process.

A student may not retaliate against another student on account of that student's participation in the Student Conduct Process.
A student may not knowingly provide false information or misrepresent information in a Student Conduct Process, which includes any investigation, hearing, or administration of cases of alleged violations of the Code of Student Responsibility.

A student may not publicly release confidential information regarding to, or learned through, a Student Conduct Process.

A student who fails to complete sanctions imposed through the Student Conduct Process may be in violation of the Student Conduct Process Compliance and face additional sanctions.

**Theft and Unauthorized Use**

Student may not use, possess or remove from an authorized area property that does not belong to the student without the consent of the owner of the property or other person legally responsible for the property.

Conduct that could violate this policy includes, but is not limited to:
1. Theft of property or services
2. Unauthorized alteration, misuse, or tampering with safety and security equipment
3. Unauthorized use of University resources
4. Knowing possession of stolen property or materials

**Unauthorized Entry or Exit**

Students may not attempt to obtain unauthorized entry, whether or not with force, into a building, structure, facility, room or container (file cabinet, desk drawer, etc.).

Students may not climb or scale buildings without authorization.

Students may not improperly use designated exits.

**Other Policies Applicable to Students**

In this section of the Code of Student Responsibility, you will find information about other policies besides those policies in the Code of Student Responsibility that apply to students. This includes policies for student organizations, policies for students who live in the residence halls, and policies that apply to the entire university.

As described in more detail in this section, potential student violations of these policies will be addressed either through the Student Conduct Process or through the policies and procedures of the specific area.
Student Organizations

Student organizations are expected to abide by all University policies, including the policies in the Code of Student Responsibility. In addition, the Office for Student Involvement may set forth additional policies applicable to student organizations. In addition, University Ministry may set forth additional policies applicable to student religious organizations. In addition, Campus Recreation may set forth policies applicable to club sports.

Potential student organization violations of University policies and the policies in the Code of Student Responsibility will be addressed through the Student Conduct Process. Potential student organization violations of policies set forth by the Office for Student Involvement, University Ministry or Campus Recreation will be addressed through those areas.

Student organizations are expected to comply with all University policies, including the Code of Student Responsibility and all additional policies pertaining to groups and organizations. A group or organization may be held responsible for the actions and behaviors of its members and guests. The decision to hold a group or organization responsible as a whole is ultimately determined by examining all the circumstances of a situation and by taking into account factors including, but not limited to, whether the actions:

1. Were committed by one or more officers or authorized representatives acting in the scope of their organizational capacities;
2. Involved, were committed by, or were condoned by (actively or passively) a significant number of organization members, alumni, or guests;
3. Occurred at or in connection with an activity or event funded, sponsored, publicized, advertised, or communicated about by the organization;
4. Occurred at a location over which the organization had control at the time of the action;
5. Occurred at or in connection with an activity or event that reasonable people would associate with the organization;
6. Should have been foreseen by the organization or its officers, but reasonable precautions against such actions were not taken;
7. Were the result of a policy or practice of the organization;
8. Would be attributable to the organization under the organization's own policies (including local or national risk management guidelines); or
9. Were taken by individuals who, but for their affiliation with the organization, would not have been involved in the incident.

Or whether:

1. One or more officers or members of an organization fail to report knowledge or information about a violation to, or otherwise fail to cooperate with, appropriate University or emergency officials; or
2. The organization, or any member acting on its behalf, fails to satisfactorily complete the terms of any disciplinary sanction or outcome.

Collective & Individual Responsibility

Student organizations, as well as their members and officers, may be held collectively and/or individually responsible for violations of the Code of Student Responsibility or other University policies.

Residential Education and Housing Services

Resident students are expected to abide by all University policies, including the policies in the Code of Student Responsibility. In addition, Residential Education and Housing Services may set forth additional policies applicable to students who live or visit the residence halls.

Residential Education administers the Student Conduct Process for many potential violations of policies related to resident students. More information about the Student Conduct Process as managed by Residential Education can be found in the Guide to Student Housing. In some instances, Residential Education may refer a situation to the Dean of Students to manage the Student Conduct Process. All decisions about which area will conduct a Student Conduct Process are at the discretion of the University.
Student Centers

Student Centers may set forth additional policies applicable to students who use the Student Centers. Potential student violations of policies set forth by Student Centers will typically be addressed through that area. In some instances, Student Centers may refer a situation to the Dean of Students to initiate a Student Conduct Process in response to a potential violation of a Student Center policy.

Academic Policies

All of the University's academic policies can be found in the Student Handbook. In addition, individual Colleges, Schools, departments or other academic unit may set forth particular academic policies in their Student Handbooks or other student materials. Potential student violations of academic policies will typically be addressed by Academic Affairs. In some instances, Academic Affairs may refer a situation to the Dean of Students to initiate a Student Conduct Process in response to a potential violation of a particular policy.

Other University Policies

Students must abide by all University policies applicable to them as students. Students should make themselves aware of all University policies. The policies listed below are some of the policies that are most relevant to the day-to-day lives of students. This list is not intended to exempt students from all other University policies applicable to students.

Academic Integrity

Acceptable Use/Network Security

Anti-Discrimination and Anti-Harassment

Display of Promotional Materials

Drug Free Workplace and Legal Drinking Age Compliance

Endorsements

Political Campaign Activities

Prohibition of Weapons

Sales and Solicitation—Residence Halls

Sexual and Relationship Violence Prevention and Response

Smoking

Space Reservations
Student Conduct Process

In this section of the Code of Student Responsibility, you will find information about the Student Conduct Process. The Student Conduct Process protects students and the University by delineating specific procedures for addressing potential policy violations.

A student may violate a policy by engaging in the conduct detailed in the policy or by assisting others with engaging in the conduct detailed in the policy.

In general, the Vice President for Student Affairs, or his/her designees, maintains exclusive authority for imposing sanctions for behaviors that violate the policies in the Code of Student Responsibility and for student violations of University policies.

There are some exceptions to this general statement. For example, Academic Affairs addresses potential violations of academic policies and maintains a separate process for addressing potential violations of the Academic Integrity policy.

The Dean of Students Office within Student Affairs is primarily responsible for managing the Student Conduct Process. Residential Education also manages the Student Conduct Process for certain policy violations by residential students.

Student Rights Within the Student Conduct Process

A student participating in the Student Conduct Process is entitled to the following rights as a guarantee of fundamental fairness:

1. The right to a Student Conduct Process that proceeds in a prompt and equitable manner.
2. The right to be given an opportunity for a hearing in accordance with the Student Conduct Process.
3. The right to a written statement of the alleged violations in sufficient enough detail to prepare.
4. The right to be accompanied by an advisor.
5. For the complainant(s) and referred student(s), a written statement of the possible sanctions that may be imposed.
6. For the complainant(s) and referred student(s), the right to submit information and witnesses on one's behalf and, to the extent necessary, to question witnesses' statements, whether verbally or in writing.
7. The right to have the Student Conduct Process explained and to ask for clarification of any policies or procedures.
8. The right to have reasonable access to information specific to one's case.
9. The right to a separate hearing when a single incident gives rise to charges against more than one referred student.
10. The right to speak on one's own behalf (or, in the case of a student organization, for the student organization's officers to speak on the student organization's behalf).
11. The right to promptly know the names of the individuals who will be serving as an Administrative Hearing officer, moderator, on a University Board panel, or reviewing an appeal, and to request a substitution of any such individual for justifiable reason.
12. The right to have proceedings and documentation kept private and confidential. All hearings, proceedings and case information are considered confidential except to those who have a legitimate educational interest in them, or as permitted or required under FERPA, the Clery Act, or any other legal mandate.

13. The right to a written decision, which the University will take reasonable measures to provide within five business days of completion of the last hearing.

14. The right to request an appeal on specific grounds.

15. The right for any student registered with the Center for Students with Disabilities to request accommodations to ensure their full and equal participation in any conduct process and/or proceeding. Accommodation requests are to be made directly to the Dean of Students Office. Accommodations are determined on an individual basis in consultation with the Center for Students with Disabilities.

16. The right to request to bring a language interpreter at the sole expense of the student making the request. The Dean of Students Office must be notified of this request. An interpreter would be an addition to an approved advisor.

University Rights Within the Student Conduct Process

The University reserves the following rights:

1. The right, in accordance with applicable legal mandates, to refer any matter involving a potential violation of criminal or civil law to the proper law enforcement agency.

2. The right to initiate a Student Conduct Process based on reliable information indicating a potential policy violation.

3. The right to sanction a student on an interim basis in accordance with the procedures described in the Student Conduct Process.

4. The right to share the outcomes of the Student Conduct Process as permitted or required under FERPA, the Clery Act, or any other legal mandate.

5. In keeping with its commitment to offer a fundamentally fair process for all students involved in the Student Conduct Process, the right to adapt certain aspects of the Student Conduct Process in specific circumstances, in order to meet the interests of all involved parties, including the University.

6. The right to cease the Student Conduct Process under appropriate circumstances.

Relationship Between the Student Conduct Process, Law Enforcement, and Legal Proceedings

The Student Conduct Process is designed to be educational, not legal, in nature. Rules of evidence and discovery do not apply to the Student Conduct Process. Students should not draw parallel interpretations between the Student Conduct Process and legal proceedings.

The University may proceed with a Student Conduct Process independently of any action taken by law enforcement or local, State or federal courts or government agencies. Similarly, the University may, in its discretion, decide to delay a Student Conduct Process until the conclusion of a court proceeding or other law
enforcement or legal process.

The outcome of a legal proceeding is not determinative on the Student Conduct Process.

Students are not required to report incidents to local law enforcement in order for the University to proceed with a Student Conduct Process. The University does, however, reserve the right in accordance with applicable legal mandates, to refer any matter involving a potential violation of criminal or civil law to the proper law enforcement agency.

---

**Failure to Participate**

If a complaining student chooses not to participate in the Student Conduct Process as a complainant, the University may proceed with the Student Conduct Process with the University serving as the complainant. The complaining student may choose to participate as a witness or not at all. The hearing officer will render a decision and, if appropriate, impose sanctions, based solely on the information available, without the benefit of any additional information from the complaining student.

If a referred student chooses not to participate or not to fully participate in the Student Conduct Process, the hearing officer, or University Board panel, will render a decision and, if appropriate, impose sanctions, based solely on the information available, without the benefit of any additional information from the referred student.

All students participating in the Student Conduct Process will be provided specific deadlines at various stages of the Student Conduct Process. Failure to respond in a timely manner according to deadlines provided may result in a student's inability to participate in the Student Conduct Process. The University reserves the right to continue with the Student Conduct Process at its discretion.

A student is never required to participate in a Student Conduct Process as a witness. However, all students are encouraged to comply with the Student Conduct Process. Witnesses who provide false or misleading information may have the matter referred to the Dean of Students Office for consideration of a policy violation and subsequent Student Conduct Process.

---

**Blue Demon Duty**

At DePaul University, the health, safety, and welfare of our students and community are paramount concerns. DePaul hopes that students will alert appropriate officials in the event of any health or safety emergency, specifically including those involving the abuse of alcohol or other drugs, even if violations of University policies may have occurred in connection with such an emergency. DePaul expects that students will, to the degree safe and appropriate, be an active bystander in situations where a fellow community member may need help.

Because the University understands that fear of possible disciplinary actions may deter requests for emergency assistance, the University has adopted the following protocol to alleviate such concerns and promote responsible action on the part of students.

In a situation involving imminent threat or danger to the health or safety of any individual(s), students are urged to (1) contact emergency officials by calling Public Safety or 911 to report the incident, (2) to remain with the individual(s) needing emergency treatment and cooperate with emergency officials, so long as it is safe to do so, and (3) meet with appropriate University officials after the incident and cooperate with any University investigation.

The University will consider the positive impact of taking responsible action in an emergency situation when
determining the appropriate response for alleged policy violations that may have occurred prior to or contemporaneously with the emergency notification.

Additionally, students who report in good-faith a violation of another University policy will not generally be subject to sanctions through the Student Conduct Process related to conduct that is revealed in the course of making the report. For example, a student who reports sexual or relationship violence will not generally be subject to sanctions through the Student Conduct Process related to attendant violations related to drug or alcohol use.

Notwithstanding the above, a student may be held responsible for egregious policy violations or policy violations that create a health or safety risk. This could include conduct such as physical violence, hazing, vandalism, harassment or in instances where multiple individuals require medical attention.

Additionally, this protocol does not preclude or prevent action by Public Safety, police or other legal authorities.

Although no sanctions will be imposed through the Student Conduct Process, the incident will be documented and educational interventions may be required as a condition of deferring disciplinary actions or sanctions. Contact with a student's emergency contact may be made at the time of the incident if medical transport of the reporting party is deemed appropriate.

### Preliminary Investigations

When the University is made aware of a potential student violation of a policy in the Code of Student Responsibility or another University policy, it may be necessary to conduct an investigation prior to referring the incident to the Student Conduct Process. Such investigations are either conducted by or in collaboration with the Dean of Students Office. Some examples of other offices that may conduct investigations include the Office of Institutional Diversity and Equity, Residential Education, the Office of Student Involvement, Internal Audit, Academic Affairs, and Information Security.

Offices charged with conducting an investigation may gather information, conduct interviews, and solicit materials. Investigations will be conducted with all reasonable speed. At the conclusion of the investigation, an investigator will work with the Dean of Students Office or other appropriate offices to determine whether the Student Conduct Process will begin. To the extent necessary, an investigator will provide information that will become part of a Student Conduct Process or an investigator may participate in the Student Conduct Process as a witness.

A student may choose to have an advisor at any meeting related to an investigation that may give rise to a Student Conduct Process.

### Standard for Hearing Determinations

All determinations as to whether a student is or is not in violation of a policy will be based on the standard of "whether it is more likely than not" that the student is in violation of the policy at issue.

A finding of “IN VIOLATION” means that, based on the information available at the time, it is more likely than not that the student is in violation of the policy at issue. A finding of “NOT IN VIOLATION” means that, based on the information available at the time, it is more likely than not that the student is not in violation of the policy at issue.
Overview of the Student Conduct Process

The Student Conduct Process begins when the University receives information that a student's conduct may be in violation of the policies in the Code of Student Responsibility or other University policies.

The University will review the information provided and make a decision that:

(a) It is appropriate to initiate a Student Conduct Process.

(b) More information or investigation is needed before making a determination whether to initiate a Student Conduct Process.

(c) It is not appropriate to initiate a Student Conduct Process at this time.

If a Student Conduct Process is initiated (including after further investigation or information gathering), the Student Conduct Process will proceed as follows:

(1) The University will promptly communicate with the relevant parties, including the complainant and the referred student, in order to explain the Student Conduct Process. See details in Initial Meetings.

(2) Depending on the circumstances, the University may decide to impose interim sanctions. See details in Interim Sanctions.

(3) The University will determine whether the Student Conduct Process will proceed with an administrative hearing or a University Board hearing. This determination will be discussed with the relevant parties during any initial meetings. Factors that contribute to the decision include but are not limited to the type of violation, severity of the incident, consideration for potential likely sanctions, the impact on the larger University community, and the role of the complainant.

(4) The University will work with the individuals involved to determine each individual’s level of participation in the Student Conduct Process and what role each individual will have in the Student Conduct Process. For example, whether the referred student will be participating in the Student Conduct Process; and whether the complaining individual will serve as a complainant, witness, or not participate at all.

(5) The University will hold an administrative hearing or a University Board hearing. See details in Administrative Hearing Process and University Board hearing process.

(6) If a referred student is found "IN VIOLATION" of any policy, conduct sanctions will be assigned. See details in Information About Conduct Sanctions.

(7) The complainant and the referred student will have the opportunity to appeal all determinations as to policy violations and sanctions. See details in Conduct Appeals Procedures.

Initial Meetings

This section explains the details of the initial meeting of the Student Conduct Process. For a complete overview of the Student Conduct Process go to Overview of the Student Conduct Process.

At the beginning of a Student Conduct Process, both the complainant and the referred student will promptly be offered:

• A detailed explanation of the Student Conduct Process, including student rights within that process, and an opportunity to answer any questions that the student might have about the Student Conduct Process.

• A written statement of the alleged violations in sufficient enough detail to prepare.

• Reasonable access to the information that will be considered throughout the Student Conduct Process.
• Instructions as to next steps in the Student Conduct Process.

• Options regarding level of participation in the Student Conduct Process and roles in the Student Conduct Process, including the consequences of each option.

• Information about the individuals who will participate in managing the Student Conduct Process moving forward (for example, the moderator, administrative hearing officer, University Board panel, etc.) and the opportunity to request a substitution of any such individual because of a possible conflict of interest or other prejudice. All decisions about removal of individuals from their participation in a Student Conduct Process will be made by the Dean of Students or the Dean's designee. All such decisions are final.

• Information about any interim sanctions, if applicable.

If possible, the complainant and referred student will be given the opportunity to participate in a face-to-face meeting, or series of meetings, in order to communicate this information. If this is not possible, information will be communicated via phone, email, or other means.

During initial meetings, the University may also request additional information from the complainant or referred student or otherwise collect additional information.

Interim Sanctions

This section explains the details of interim sanctions in the Student Conduct Process. For a complete overview of the Student Conduct Process go to Overview of the Student Conduct Process.

In order to protect the health, safety, security and well-being of the University community and its members, the University reserves the right to immediately impose interim sanctions at any point during a Student Conduct Process. These interim sanctions could include, for example, a suspension.

In general, the University will impose an interim sanction if it determines that there is:

(1) An ongoing threat to an individual, including a complainant or referred student;

(2) An ongoing threat to property; or

(3) A risk of disruption of University business.

Interim sanctions may not be appealed.

In cases where interim sanctions are imposed, the University will take reasonable measures to ensure that a Student Conduct Process proceeds to a final determination as to whether or not there was a policy violation, and any final sanctions, within ten business days of the imposition of any interim sanctions. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure proper review of all relevant material.

During the time that an interim sanction is in place, a student must abide by the requirements of the interim sanction.

Administrative Hearing Process

This section explains the details of an administrative hearing in the Student Conduct Process. For a complete overview of the Student Conduct Process go to Overview of the Student Conduct Process.

If the University determines that an administrative hearing is appropriate, the University will take reasonable
measures to ensure that the first session of the administrative hearing takes place within five business days of the conclusion of the initial meetings. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

A mutually convenient time for the administrative hearing will be decided upon. If necessary, and at the discretion of the administrative hearing officer, an administrative hearing may take place over the telephone and/or video conferencing. In an administrative hearing a complainant does not attend a meeting with the referred student, however, any relevant information or questions will be relayed between the parties by the administrative hearing officer. The administrative hearing officer will hold as many meetings as necessary.

An administrative hearing will proceed as follows:

1. The administrative hearing officer will confirm that the referred student understands the student’s rights.
2. The administrative hearing officer will review all relevant information that has been provided by the complainant, as a result of investigation, etc.
3. The administrative hearing officer and referred student will discuss the alleged violation.
4. The referred student will have an opportunity to give a statement about the alleged violation.
5. The referred student will have the opportunity to provide witness information and, to the extent necessary, to question witnesses’ statements, whether verbally or in writing.
6. After the administrative hearing officer has examined all of the information, the administrative hearing officer will determine that the student is or is not in violation of the policy at issue.
7. If the administrative hearing officer finds the student in violation, the administrative hearing officer will determine the appropriate sanctions. The University will take reasonable measures to notify the complainant and referred student of the outcome and sanctions in writing within five business days of the last session of an administrative hearing. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.
8. The administrative hearing officer will inform the complainant and the referred student of their appeal options.

University Board Hearing Process

This section explains the details of a University Board hearing in the Student Conduct Process. For a complete overview of the Student Conduct Process go to Overview of the Student Conduct Process.

If the University determines that a University Board hearing is appropriate, the University will take reasonable measures to ensure that the first session of the University Board hearing takes place within seven business days of the conclusion of the initial meetings. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

A mutually convenient time for the University Board hearing will be decided upon. If requested by a party or otherwise necessary, and at the discretion of the moderator, a University Board hearing may take place entirely over the telephone and/or video conferencing, or with one or more parties participating by telephone and/or video conferencing. The University Board hearing will proceed over as many sessions as necessary, although each session will be limited to no more than three hours.

The moderator will set a date by which all materials for the hearing will be sent to the University Board. Materials turned into the moderator after that date will be sent to the University Board if feasible.

The actual University Board hearing will proceed as follows:

1. The University Board panel will select a chairperson. The chairperson is charged with maintaining an orderly discussion throughout the University Board Hearing and ensuring that there is equal opportunity for both the complainant and the referred student to present their information.
2. The Chairperson will confirm that all students understand their rights.
3. The Chairperson will describe the information before the University Board panel and will make sure that all students have copies of materials as needed.
4. The complainant and the referred student will have an opportunity to give an initial statement about the alleged violation. In cases where a University representative is serving as the complainant, the University representative will present any information that has been made available. The initial statement may be read aloud or submitted in writing. In the interest of time, the University Board panel may place a time limit on the initial statements.
5. If an investigator was utilized prior to the University Board hearing, the investigator will provide an overview of the investigation and answer questions from the panel, complainant and referred student. The investigator will be present for the entirety of the hearing should additional questions arise.

6. Both the complainant and the referred student will have the opportunity to provide witnesses. In cases where a University representative is serving as the complainant, the University representative will present any witness information that has been made available. The University Board panel may also request additional witnesses. Witnesses will provide their information one at a time. A witness may only be present when that witness is providing information. The University may approve the use of written statements from witnesses who are not available to be present in person.

7. The University Board panel may present questions to witnesses who are present at the University Board hearing. If the complainant or the referred student have any questions for witnesses, they may offer those questions to the chairperson of the University Board panel to ask the witness. The University Board panel may decline to ask any question provided. The University Board panel may ask that a witness return later in the University Board hearing for additional questions.

8. Members of the University Board may ask questions to the complainant and the referred student at any time during the University Board hearing. If the complainant or the referred student have any questions for each other, they may offer those questions to the chairperson of the University Board panel to ask the witness. The University Board panel may decline to ask any question provided.

9. After the University Board panel has reviewed all the relevant information provided in the University Board hearing, the chairperson will ask the complainant and the referred student whether there is any additional information that needs to be considered but that has not already been provided.

10. The complainant and the referred student will have an opportunity to give a final statement about the alleged violation. In cases where a University representative is serving as the complainant, the University representative will simply summarize the information already provided. The final statement may be read aloud or submitted in writing. In the interest of time, the University Board panel may place a time limit on the final statements.

11. The moderator will excuse everyone from the University Board hearing except for the University Board panel and the moderator.

12. The University Board panel will determine that the student is or is not in violation of the policy at issue. A majority vote by the University Board panel will be used to make this determination. The decision will be reviewed with the moderator before being finalized.

13. If the University Board panel finds the student in violation, the University Board panel will determine the appropriate sanctions. Prior to making any determinations about sanctions, the moderator will inform the University Board panel of any previous student conduct matters involving the referred student. A majority vote by the University Board panel will be used to make this determination. The decision will be reviewed with the moderator before being finalized.

14. Typically, the moderator will invite the referred student back into the University Board hearing and the chairperson will announce the decisions of the University Board panel. Typically, the decision will be announced to the complainant by the moderator as appropriate.

15. The University will take reasonable measures to notify the complainant and referred student of the outcome and sanctions in writing within five business days of the last session of a University Board hearing. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

16. The moderator will inform the complainant and the referred student of their appeal options.

Student organizations have the same rights as students, modified as necessary to address the group or organizational context.
Information About Conduct Sanctions

This section explains the details of conduct sanctions. For a complete overview of the Student Conduct Process go to Overview of the Student Conduct Process.

The Student Conduct Process is an educational one by which the University strives to instill in its students an understanding that they are responsible for their actions. There are several reasons for imposing conduct sanctions:

1. To educate students and redirect behavior toward a standard more acceptable for members of the University community.
2. To protect the University community from possible harm or injury.
3. To require restitution for property that is lost, stolen or damaged.

In general, conduct sanctions become effective immediately when given. In certain circumstances, the University may delay the effective date of sanctions. Students will be informed of any decision to delay the effective date of sanctions.

Conduct sanctions are determined based on a consideration of the totality of the circumstances. This could include, for example, a student's prior record of conduct; the severity of the incident; and the impact on the community. Students may be assigned a single sanction or multiple sanctions.

As detailed in Emergency Contacts, a student's emergency contacts or other individuals may be made aware of sanctions in certain situations involving violations of university policies or laws related to alcohol and controlled substances.

The following is a list of sanctions that the University may impose on a student or student organization through the Student Conduct Process:

1. Restriction: Restrictions upon a student's University privileges may be imposed for a set period of time. These restrictions may include, but are not limited to, removal from student housing, the denial of the right to represent the University in any way, access to facilities or individuals, parking privileges, and/or participation in certain curricular, co-curricular or extra-curricular activities.

2. Restitution: A student who damages property may be required to pay actual repair or replacement costs. Failure to pay may result in withholding of the student's records and/or additional sanctions.

3. Educational Project: An educational project is a sanction designed to assist the student in better understanding the overall impact of the policy violation. Educational projects might include research papers, the creation of educational materials, or the planning and/or presentation of educational programs related to the policy infraction. Assigned projects may not include physical labor unless they are directly related to the violations(s) and do not cause humiliation or degradation to the student.

4. Alcohol and Other Drug Intervention: A student who is found responsible for violation a policy related to alcohol or controlled substances may be required to meet with the Office of Health Promotion and Wellness and/or participate in an intervention called BASICS (Brief Alcohol Screening and Intervention for College Students).

5. University Reprimand: University reprimand signifies that any further policy violation may result in additional sanctions. It does not restrict the student in any way.

6. University Probation: University probation is a written statement to the student indicating that the student's behavior is of such a nature as to jeopardize continued enrollment at the University. University probation can be for a specified period of time or for as long as the student is enrolled. Any additional policy violation during the probationary period may result in additional sanctions.

7. Suspension: Suspension is a total separation from the University for a required period of time and/or until particular conditions for readmission are met. Suspension may include various prohibitions regarding a student's ability to be on University property or participate in University activities. A sanction of suspension is permanently noted on a student's transcript, regardless of whether or not the student is successfully readmitted at the conclusion of a suspension. At the end of the suspension period and/or once the student can demonstrate that the conditions for readmission have been met, the student may be required to meet with the Dean of Students or other designee before being readmitted to the University.

8. Dismissal: Dismissal is a permanent separation from the University. Dismissal is a permanent bar to readmission to the University. A sanction of dismissal is permanently noted on a student's transcript. Dismissal
may include various prohibitions regarding a student's ability to be on University property or participate in University activities.

9. Revocation of Admission: Revocation of admission signifies that a student who has previously been admitted to the University, but has not yet matriculated, is no longer admitted for enrollment in the planned term and program. Revocation of admission may be a permanent separation from the University and permanent bar to readmission to the University, or it may be limited to a particular time frame or program. The student may be required to meet with the Dean of Students or other designee before being readmitted to the University.

10. Revocation of Degree: Revocation of degree signifies that the University is withdrawing a degree that has been awarded. Revocation of degree is a permanent separation from the University. Revocation of degree is a permanent bar to readmission to the University. A sanction of revocation of degree is permanently noted on a student's transcript.

Student organizations are subject to the same sanctions as students, modified as necessary to address the group or organizational context, plus any such other sanctions or outcomes that are deemed appropriate under the circumstances. Other sanctions may be imposed on students or student organizations for policy violations related to processes managed by other University areas.

---

**Conduct Appeal Procedures**

This section explains the details of appeals in the Student Conduct Process. For a complete overview of the Student Conduct Process go to [Overview of the Student Conduct Process](#).

Determinations as to whether or not a policy has been violated and sanctions may be appealed through these procedures. Both complainants and referred students may appeal determinations as to policy violations and sanctions. The reason for the appeal process is to guarantee that the situation has been resolved through a fundamentally fair process in accordance with established policies and procedures.

Students will be informed of these appeals procedures, including to whom an appeal should be directed, at the conclusion of an administrative hearing, University Board hearing, or otherwise when a determination of a policy violation is made and/or sanctions are determined.

Typically, appeals from a University Board hearing will be submitted to the Dean of Students, while appeals from an administrative hearing will be submitted to the supervisor of the administrative hearing officer. The individual reviewing an appeal will have had no involvement in the initial determination. Either party will have the opportunity to request the substitution of the individual reviewing an appeal because of a possible conflict of interest or other prejudice.

A complainant or referred student may only appeal the determination as to a policy violation or sanction on the following three grounds:

1. A substantial procedural error occurred that unreasonably impaired a fair process or rendering of a determination or sanction, and that made the process or the final decision fundamentally unfair.

2. New information of a substantive nature that was impossible to have been considered at the time of the hearing or determination has been discovered, and it would be fundamentally unfair to not consider the information.

3. The initial sanction(s) are fundamentally unfair, disproportionate, or inappropriate.

In order to appeal, the complainant and/or referred student must submit a written request for appeal to the designated individual within five business days of being notified of the initial decision. The individual designated to review the appeal may decide that the sanctions imposed should not go into effect until the appeal process is completed. Complainants and referred students should understand, however, that, unless otherwise stipulated, sanctions are considered in effect once a hearing is completed, regardless of whether an appeal is requested.

The individual designated to review the appeal will make a determination that:

1. The appeal is denied because none of the grounds for an appeal above have been met.
2. The appeal is granted because one or more of the grounds for an appeal have been met.

The designated reviewer will take reasonable measures to notify the complainant and/or referred students of the
appeal determination within five business days of when the University receives the appeal. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

If an appeal is granted, then the individual designated to review the appeal will determine whether the matter can be resolved without a new hearing (for example, modification of sanctions so that they are not fundamentally unfair or inappropriate) or whether a new hearing is necessary. If a new hearing is necessary, the University will determine whether this hearing will be an administrative hearing or a University Board hearing. All hearings that take place after an appeal has been granted will proceed in accordance with established procedures.

All decisions regarding whether an appeal will be granted are final. If the appeal is denied, then all sanctions imposed will remain in effect.

Student Conduct Records

Student conduct records are maintained in accordance with the University's Records Retention Schedule. Specifically, student conduct records from a Student Conduct Process that did not result in a sanction of dismissal or suspension are retained for ten years after a student's graduation or last date of attendance.

In accordance with the University Records Retention Schedule, transcripts are retained permanently. As such, student conduct records from a Student Conduct Process that resulted in a sanction of dismissal or suspension are retained permanently.

The University may also report disciplinary matters that remain unresolved and pending at the time a student left or withdrew from the University. Records of pending matters are kept indefinitely; once resolved, they are kept and maintained according to the policy stated above.

The University will release student conduct records and the information in those records only as permitted or required under FERPA, the Clery Act, or any other legal mandate.

Additional Procedures Regarding Sexual and Relationship Violence

In addition to the procedures in the Student Conduct Process, students should also consult the Sexual and Relationship Violence Prevention and Response policy for additional procedural information for Student Conduct Process matters involving a potential violation of that policy.

In order to be eligible to conduct an administrative hearing, sit on a University Board panel, or hear an appeal, involving a violation of the Sexual and Relationship Violence Prevention and Response policy, an individual must also receive at least 8 hours of annual training on issues related to the issues detailed in that policy. A sufficient number of individuals will receive this annual training such that substitutions of personnel and University Board panel members for conflict of interest and other matters can occur as needed.
Student Care Team and Threat Assessment

DePaul University’s Student Care Team (SCT) is responsible for assessing and coordinating a response to a wide-range of concerns about students. The SCT also fulfills the role of the Campus Threat Assessment Team with respect to students (DePaul University Campus Violence Prevention Plan). The SCT is charged with proactively monitoring the University’s campus environment from a threat perspective, as well as providing leadership and coordinating the University’s response to critical incidents that affect individual students.

Members of the campus community are encouraged to report concerns about disturbing behavior exhibited by a DePaul student to the Dean of Students, Chair of the Student Care Team (SCT), as soon as possible. Whenever there is concern for immediate physical danger, individuals should call 911.

In general, the Dean of Students will review the information provided, involving the SCT as appropriate. Depending on the behavior, this review could include a threat assessment. Based on this review, the SCT will determine an appropriate, individualized, situation-specific response action plan. This could include case management, recommendations about behavioral intervention (either by the SCT or by another individual), and/or referrals to, or recommendations regarding, other University processes or supports. As circumstances warrant, these responses could happen simultaneously.

University-Initiated Temporary Medical Withdrawal Process

Note: The process and criteria described in this section apply in situations in which DePaul University initiates a discussion with a student regarding the student’s temporary withdrawal from DePaul for medical reasons. Students looking to voluntarily take a leave of absence or withdraw from DePaul for medical or other reasons should consult the Withdrawal policy.

DePaul University places the utmost priority on student welfare and community safety. DePaul provides a continuum of support services to address the needs of students within the context of the university community. Sometimes students may have health needs that require a level of care exceeding that which DePaul can effectively provide. Being able to safely participate in the programs, services, or activities of the university is an essential requirement for a student’s continued participation. As such, in some situations, it may be appropriate to consider options for a student’s temporary withdrawal from DePaul or for altering a student’s ability to fully participate in certain programs, services, or activities at DePaul.

This university-initiated temporary medical withdrawal process is not a disciplinary process. Rather, under this process, DePaul will work with a student regarding a university-initiated temporary medical withdrawal. If a withdrawal is appropriate, the university will also work with the student on a plan for return and plan for success upon return.

As further detailed below, all determinations as to withdrawals and plans for return and success will be based upon an individualized assessment of the student’s situation, including an evaluation of current medical information and/or best available objective information about the student. DePaul will consider this information in assessing circumstances such as the nature, duration, and severity of the risk to the student and/or university community, the probability that the behavior of concern will occur, and whether reasonable accommodations would mitigate the risk.

This process is intended as an interactive dialogue between the student and DePaul concerning the student’s continued participation in the programs, services, or activities of DePaul. At all times during the process, DePaul will work with the student to determine whether other options or reasonable accommodations would be appropriate instead of, or in addition to, a university-initiated temporary medical withdrawal process or alterations to a student’s ability to fully participate in certain programs, services, or activities at DePaul. More information about the interactive process for establishing reasonable accommodations is available from DePaul’s Center for Students with Disabilities.

When a student demonstrates conduct that violates DePaul’s Code of Student Responsibility or other DePaul policies, that conduct will be addressed through the appropriate disciplinary processes. There may be situations in which both the university-initiated temporary medical withdrawal process and the Code of Student Responsibility and/or other DePaul policies are applicable (see below for further details).

Students may choose to have an advisor join them for any meeting or conversation that is a part of this process. An advisor is a member of the DePaul University community who acts as a support person for the student. The role of the advisor is to quietly confer with and support the student throughout the process.
Criteria

DePaul may initiate this process if a student:

(a) Demonstrates behavior that is unreasonably disruptive to the normal education processes and orderly operation of the university;

(b) Demonstrates behavior that poses a serious and imminent health or safety risk to the themselves, or

(c) Demonstrates behavior that poses a serious and imminent health or safety risk to others.

Initial Determination and Notification to the Student

The university-initiated temporary medical withdrawal process begins when the Dean of Students Office receives information indicating that a student appears to have demonstrated behavior consistent with one or more of the criteria listed above. In many instances, this information will come from the Student Care Team, which will have conducted an individualized threat assessment in accordance with its established procedures and determined that the student has demonstrated behavior consistent with one or more of the criteria listed above.

If, after reviewing the information received, the Dean of Students Office initially determines that the information indicates that the student has demonstrated behavior consistent with one or more of the criteria listed above, the Dean of Students Office will inform the student of the following in writing:

(1) That the Dean of Student Office has made an initial determination based on available information that the student has demonstrated behavior consistent with one or more of the criteria listed above (with the specific criterion or criteria identified).

(2) That the university is initiating a process pursuant to this university-initiated temporary medical withdrawal process (with a copy of or link to the process).

(3) That the student is required to have a meeting with the Dean of Students Office to discuss potential next steps, including the possibility of a university-initiated temporary medical withdrawal or alterations in a student's ability to fully participate in certain programs, services, or activities at DePaul. The Dean of Students Office will attempt to schedule this meeting within one (1) business day of the student receiving this initial notification.

(4) That the student may bring an Advisor to this meeting, or any other meeting or conversation that is part of this process, as further detailed above.

(5) Any interim restrictions, as further explained below.

Interim Restrictions

The Dean of Students may place interim restrictions on the student's participation in university programs, services, or activities (including attending classes, extra-curricular activities, and residential arrangements). Any interim restrictions will be determined on an individualized basis and will be consistent with the goals of reducing the impact of any behavior that indicate the criteria listed above and ensuring the safety of the student and the university community where this is of immediate concern. All interim restrictions will be communicated in writing to a student. In general, interim restrictions will remain in place until a final determination is made concerning a possible withdrawal (including any appeal).
Initial Meeting and Additional Information Gathering

In this initial meeting, the Dean of Students Office will explain the university-initiated temporary medical withdrawal process to the student. The Dean of Students Office will review with the student the information that appears to indicate that the student has demonstrated behavior consistent with one or more of the criteria listed above.

The Dean of Students Office will give the student an opportunity to respond to the information orally at the meeting. The student will also be given an opportunity to respond to any interim restrictions that have been put in place. If the student would like to submit additional information in response to the information provided, the student may choose to do so. This information could include, for example, a written response, a request from the student that the Dean of Students Office speak with a qualified care provider, or other documentation.

If the student wishes to submit additional information, the Dean of Students Office will work with the student to develop a reasonable timeline for submitting this information, balancing the need for a prompt decision with the student's need to provide information.

Determination and Plan for Return

The Dean of Students will make a determination as to whether a university-initiated temporary medical withdrawal or any alterations to a student’s ability to fully participate in certain programs, services, or activities at DePaul is appropriate based on the criteria listed above. In making this determination, the Dean of Students will consider all information available, including any information provided by or on behalf of the student, including information provided by a student’s qualified care providers, and information learned from consultation with others with particular subject-matter expertise as needed (for example, a counselor from University Counseling Services or a physician from DePaul Health Services). All determinations as to withdrawal or alterations to a student’s ability to fully participate in certain programs, services, or activities will be as narrowly tailored as possible under the circumstances given the nature, duration and severity of any risk to the student and/or university community.

The student will generally be informed of this determination, including the basis for the determination, in writing within two (2) business days of the initial meeting, or within two (2) business days of the university receiving all information. However, the university reserves the right to extend this time limit, in its sole discretion, in order to ensure proper review of all relevant material. The university will provide the student with written notice of any extension.

At the time that the university provides the student with the determination, the university will also provide the student with a written individualized plan for return to full participation in programs, services, or activities at DePaul. The purpose of the plan for return is to clearly establish the path by which the student can return to safe and successful full participation in programs, services, or activities at DePaul following a university-initiated temporary medical withdrawal or other alterations to a student’s ability to fully participate in certain programs, services, or activities at DePaul. Plans for return to full participation in activities will be as narrowly tailored as possible under the circumstances given the nature, duration and severity of any risk to the student and/or university community.

Specific elements of the plan for return could include, for example:

(a) Successful demonstration that the behaviors that led to the university-initiated temporary medical withdrawal have been mitigated to the extent that the student is no longer demonstrating behavior consistent with the criteria listed above; or

(b) Development of a treatment plan and/or verification from a qualified care provider that an individual is consistently and satisfactorily complying with a treatment plan.

If possible, the Dean of Students Office will meet with the student in person in order to provide the determination and discuss the plan for return.
If the Dean of Students Office determines that a university-initiated temporary medical withdraw or any alterations to a student's ability to fully participate in certain programs, services, or activities at DePaul will begin, the student will also be informed in writing about options for appeal (as detailed below).

Students are responsible for contacting appropriate offices at DePaul or elsewhere in order to ensure that their academic and financial affairs are in order (including any on-campus housing). All determinations as to the effect of a university-initiated temporary medical withdrawal or other alterations to the ability to fully participate in programs, services, or activities at DePaul will be made by the applicable offices in accordance with existing policies. If requested by the student, the Dean of Students Office can assist a student with facilitating conversations with appropriate offices as needed. This could include, for example, the possibility of a late withdrawal through the Late Withdrawal Process.

**Appeal**

A student may appeal the determination of the Dean of Students Office that a university-initiated temporary medical withdrawal or other alterations to the ability to fully participate in programs, services, or activities at DePaul will begin, including aspects of the plan for return. A student has five (5) business days from the date on which the student was informed of the determination and plan to request this appeal.

A student may appeal on the following three grounds:

1. A substantial procedural error occurred that unreasonably impaired the student's ability to achieve a fair process or final decision and that made the process or final decision fundamentally unfair;

2. New information of substantive nature, impossible to have been considered at the time of the original determination, has been discovered and it would be fundamentally unfair not to consider the information; or

3. Aspects of the determination and/or plan for return are fundamentally unfair or inappropriate.

The student must submit their appeal to the Vice President for Student Affairs. In the appeal, the student should explain why one or more of these three grounds for appeal has been met. In reviewing the student's appeal, the Vice President for Student Affairs will review the information received from or on behalf of the student, and all other available information, including all information considered by the Dean of Students Office. If deemed necessary, the Vice President for Student Affairs may also speak further with the student or others to ask additional questions or otherwise collect additional information.

After review, the Vice President for Student Affairs will make a determination that:

1. The appeal is denied because none of the grounds for an appeal have been met. The determination and plan for return will remain as-is.

2. The appeal of the withdrawal determination is denied because none of the grounds for an appeal have been met, but the appeal of the plan for return is granted because one or more of the grounds for appeal have been met. The determination will remain as-is, but the plan for return will be modified; or

3. The appeal of the withdrawal determination is granted because one or more of the grounds for an appeal have been met. The university is no longer initiating a temporary medical withdrawal or other alterations to the ability to fully participate in the program, services, or activities at DePaul at this time.

DePaul will notify the student of the appeal determination in writing within five (5) business days of when the appeal is received. However, the university reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material. The university will provide the student with written notice of any extension.

The decision of the Vice President for Student Affairs is final.

If a student is no longer temporarily medically withdrawn, alterations to the ability to fully participate in programs, services, or activities at DePaul are no longer in place as the result of an appeal, or modifications are made to the plan for return the Dean of Students Office will work with the student to address any outstanding concerns on an individualized basis.
Student’s Return to the University and Plan for Success

A student is eligible to return to full participation in the programs, services, or activities at DePaul when the student's individualized plan for return is successfully completed. If at any time a student believes that current circumstances have changed such that the individualized plan for return should be modified, the student should contact the Dean of Students Office to discuss that possibility. All modifications to a plan for return will be established in writing.

Students wishing to return to DePaul following a university-initiated temporary medical withdrawal must schedule a meeting with the Dean of Students Office to discuss the student's successful completion of the plan for return. In general, this meeting must be in-person. However, exceptions may be made at the discretion of the Dean of Students Office.

In addition to participating in this meeting in order to demonstrate their successful completion of the plan, students may also be asked to speak with others with particular subject-matter expertise as needed (for example, a counselor from University Counseling Services or a physician from DePaul Health Services) or may be asked to submit additional information or documentation. As appropriate, this could include a requirement that the student complete a release of information such that the Dean of Students Office may speak with a student's qualified care providers or others, or review current medical documentation. All requests for information will be made as narrowly as possible in order to fulfill the need to consider whether a student has successfully completed the plan.

Based on all of the information available, the Dean of Students Office will make a determination as to whether the student has successfully completed the plan.

In order to continue to support the student, the Dean of Students Office may also work with the student to develop an on-going, individualized plan for student success and to provide for the student's safe and successful enrollment and participation in the university’s programs, services or activities. Specific elements of the plan for student success could include, for example:

(a) An on-going monitoring plan;
(b) Consistent compliance with a recommended treatment plan;
(c) Periodic conversation with the Dean of Students Office or others to discuss continued success;
(d) Specific on-going behavioral expectations aligned with DePaul's established policies and procedures, and designed to prevent or mitigate the behaviors that led to the university-initiated temporary medical withdrawal to the extent that the student is no longer demonstrating behavior consistent with the criteria listed above; and
(e) Options for utilizing available resources and implementing reasonable accommodations to facilitate success.

This determination and any on-going plan for student success will be communicated to the student in writing.

The student may request a meeting with the Dean of Students Office to respond to the plan for success. If at any time a student believes that current circumstances have changed such that the plan for success should be modified, the student should contact the Dean of Students Office to discuss that possibility. All modifications to a plan for success will be established in writing.

All determinations as to whether the student has successfully completed the plan for return, as to whether a plan for return should be modified, as to an on-going plan for student success, as to whether a plan for success should be modified, and as to successful fulfillment of the on-going plan for student success will be made by the Dean of Students Office. These determinations are final.
Other Important Information Regarding This Process

Because conduct that gives rise to a university-initiated temporary medical withdrawal or alterations in a student's ability to fully participate in certain programs, services, or activities at DePaul might also violate the Code of Student Responsibility, it is possible that a student who has successfully completed the plan for return might still not be eligible for return to full participation due to student conduct sanctions. Similarly, it is possible that a student who has satisfied all required student conduct sanctions might still not be eligible for return to full participation in programs, services, or activities at DePaul because of an inability to successfully complete the plan for return.

At any point during the university-initiated temporary medical withdrawal process, a student may decide to take a leave of absence or withdraw from DePaul for medical or other reasons pursuant to the Withdrawal policy. However, once a university-initiated temporary medical withdrawal process has begun, DePaul may make the determination that it is appropriate to develop a plan for return. In that instance, the procedures detailed in this process would apply.

DePaul may make such reasonable exceptions to the university-initiated temporary medical withdrawal process as circumstances may require for the welfare of the university and/or the involved student(s), provided that fundamental elements of fairness and due process are observed.
