At the end of the second quarter, students revisit their selected area of practice, select purposes for their program portfolio, and plan for development of the Elements of Better Practice. (.5 quarter hour)

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 536
REFLECTIVE PRACTICE SEMINAR II
Graduate
After the third quarter, students come together for group reflection and review of their progress in the program. This seminar assists students in planning their electives, reflecting on applications of their learning, and assessing growth in the Elements of Better Practice, mapping theories and concepts to their practice settings, and sharing approaches to their program portfolio. (.5 quarter hours)

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 537
REFLECTIVE PRACTICE SEMINAR III
Graduate
At the end of quarter six, this seminar offers students an opportunity to get feedback on plans for the Applied Inquiry Project, to conduct an informal mid-program review, to examine ways in which students are applying the three Elements of Better Practice, to identify significant threads across the curriculum, and present on aspects of their program portfolios. PREREQUISITE(S): Status as an MAEA student or departmental permission is a prerequisite for this class. (.5 quarter)

Status as an MAEA student or departmental permission is a prerequisite for this class.
EA 538
REFLECTIVE PRACTICE SEMINAR IV
Graduate
At the end of quarter eight, students join in a summit to review their program, engage in discussion on their next steps, review their personal philosophy of educating adults, reflect again on the three Elements of Better Practice, present their program portfolio, and share progress on their applied inquiry projects. (.5 quarter hour)

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 540
DESIGNING AND DELIVERING TECHNOLOGY-ENHANCED LEARNING OFFERINGS
Graduate
This course focuses on designing and delivering educational experiences using the web, digital video, animation, gaming and mobile delivery formats. Students explore instructional design theory and bridge its application into/through basic training in each of these technological applications, including consideration of relevant examples of best practices and instructions regarding when to employ each application. This course does not have prerequisites; however, students are expected to be familiar with basic learning design principles.

EA 541
TEACHING WITH WRITING IN ANY COURSE
Graduate
This online course (six-modules) for teachers in any discipline focuses on making the most of writing as a tool for teaching and learning in undergraduate and graduate courses. In the course, teachers will explore practical ideas for in-class writing assignments that initiate discussions and provide quick input regarding student learning. Teachers will also learn strategies for developing assignments and providing feedback while maximizing efficiency and minimizing frustration. Opportunities to share ideas and receive coaching on current writing assignments and ways of giving feedback are included. This course does not have prerequisites; however, those taking it should have undergraduate or graduate courses that they wish to develop or revise and experience teaching at the college level that they can draw upon for discussions. (2 quarter hours)

EA 542
DESIGNING OUTCOME-BASED PROGRAM EVALUATION: PERSPECTIVES & PRACTICES
Graduate
This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Each student designs a plan for outcome-based program evaluation, along with evaluation tools, that are relevant to his/her practice setting. This evaluation approach is then considered in relation to other models and approaches to evaluation of education, training and professional development programs. Illustrations of current program evaluation practices are included (2 quarter hours)

EA 543
INNOVATIVE FACILITATING GFDIS
Graduate
This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Students participate in SNL's Adult Learning Innovation Institute (Module: Innovative Strategies for Facilitating Adult Learning), learn innovative strategies for engaging and motivating adult learners in various educational and training settings and subsequently apply their learning in specific ways within their practice settings. Students also receive feedback and coaching from instructors and institute peers. (Questions? For information regarding the Institute, contact caea@depaul.edu. For information regarding the GFDIS-course, contact its instructors.) (2 quarter hours)

EA 544
BUILDING GAMES FOR LEARNING GFDIS
Graduate
This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Technology advances make it possible to enhance social learning (interpersonal) in cost-efficient ways by creating simulations and other forms of virtual delivery. This course focuses on ways to apply game concepts and game techniques, supported by foundational theories, that can be applied in various settings, e.g., corporate, higher education, community-based. Using simulation software (Articulate Storyline provided by the instructor), students will produce interactive serious games for virtual delivery for their targeted audience. Students are expected to be proficient in use of Microsoft Work and Power Point and have a computer with Internet access.
EA 545
PARTNERING FOR SOCIAL ACTION GFDIS
Graduate
This course functions as a Graduate-Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) This course provides opportunities for students to engage in community settings throughout Chicago. Students will learn how to: observe social agency in action; build relationships across class, race and other barriers to mutual understanding; and, actively participate in service opportunities with organizations addressing social justice concerns. In addition to hands-on engagement in the field, students will explore theories and principles related to community empowerment work in community settings. Students must contact the instructor prior to registering for this GFDIS to obtain information about available community settings/projects and time/schedule/location expectations. Onsite community project work and meeting schedule (max five) will be determined based on the selected project work.

EA 546
EDUCATING FOR SOCIAL JUSTICE GFDIS
Graduate
This course functions as a Graduate-Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Students critically examine and apply diverse ways of defining, analyzing and engaging in social justice education, as both educators and learners. Key dimensions of social justice approaches to education of adults (culture, ethics and politics; facilitation; curriculum development; and, educator as change-agent) will be addressed. In addition to critical reflection on assigned readings, students will observe social justice education in a community context (arranged by the instructor) and will apply social justice principles to an educational offering in their own practice sites.

EA 547
DESIGNING ONLINE LEARNING GFDIS
Graduate
This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Course addresses the process of designing effective, learner-centered online offerings such as webinars, workshops, or modules for use in formal education or training settings. Using adult learning principles, best practices, and backward planning, learning outcomes, content, and assessments are developed and delivered in a virtual environment. Formal and informal learning communities are explored using social media for learner engagement and interaction. The instructor incorporates interactive lectures and group discussions. Assessment criteria and rubrics guide feedback for ongoing learning as well as for final evaluation of performance. Students will have an opportunity to design an offering specifically applicable to their needs and interests with regard to helping adults learn.

ECE 91
CLINICAL EXPERIENCES WITH INFANTS AND TODDLERS
Undergraduate
Candidates will observe and interact with infants and toddlers (25 clock hours) and attend a weekly seminar in which they will be required to reflect on their experiences in relation to the development and learning processes of infants and toddlers. Appropriate early childhood lesson planning and assessment techniques and tools will be emphasized. COREQUISITE: ECE 290. (1 credit hour)

ECE 92
CLINICAL EXPERIENCES WITH YOUNG CHILDREN AND FAMILIES
Undergraduate
Candidates will observe and interact with young children and their families in school and child care settings with family/parent education programs; family conferences and home visits will be included in the options. (25 clock hours). Candidates will meet once a week in a seminar to reflect and discuss topics around parental involvement, parental support, and building communities through connections between schools and homes. COREQUISITE: ECE 302. (1 credit hour)

ECE 93
CLINICAL EXPERIENCES WITH PRE-SCHOOLERS
Undergraduate
Candidates will observe and interact with preschool age children (25 clock hours) and attend a weekly seminar in which they will be required to reflect on their experiences in relation to the development and learning processes of preschool age children. Appropriate early childhood assessment and instructional methodologies will be emphasized. COREQUISITE: ECE 310. (1 credit hour)

Advanced Teacher Candidate Standing is a prerequisite for this class.
ECE 94
CLINICAL EXPERIENCES IN PRIMARY GRADES
Undergraduate
Candidates will observe and interact with primary age children (25 clock hours) and attend a weekly seminar in which they are required to reflect on their experiences in relation to the development and learning processes in the primary years (K-3). Appropriate assessment and instructional methodologies for children in the primary grades will be emphasized. COREQUISITE: ECE 311. (1 credit hour)

Advanced Teacher Candidate Standing is a prerequisite for this class.

ECE 175
EDUCATING THE TWENTY-FIRST CENTURY YOUNG CHILD
Undergraduate
Course is for students with interests in early childhood programs in the United States. Course explores issues influencing early childhood education, such as socio-historical factors, family policy, diversity, and federal/state regulations. Students examine programs using readings from the Vincentian Collection, child psychology, social theories and the current media. Students compare Vincentian Heritage, current and past federal policies, applying this study to their understanding of social justice to modern childcare practices. To guide students deeper into understanding the lives of young children, the course offers an option for service learning with Jumpstart, Chicago-area Head Start, and other early childhood education centers.

ECE 280
INTERNSHIP WITH INFANTS AND TODDLERS
Undergraduate
Candidates conduct 75 hours of intense supervised fieldwork in an infant/toddler center where they are observing and documenting behavior and interactions, planning activities, and assessing development in children ages birth to 3. Candidates will also participate in a twice a quarter, hour and a half, seminar to reflect and discuss aspects of infant/toddler development and care, making connections between theory and practice. Onsite meetings with groups of candidates will be held weekly for supervision and reflection on practice. Co-requisite ECE 290. (2 credit hours)

ECE 286
ART, MUSIC, AND MOVEMENT FOR THE YOUNG CHILD
Undergraduate
This course will focus on the theory, research, methods, and activities of art, music, and movement for young children birth through age 8. Emphasis will be on the integration of developmental domains, creative and critical thinking as developmental domains are integrated.

ECE 290
CHILD GROWTH AND DEVELOPMENT
Undergraduate
This course examines human growth and development of the child from pregnancy through age eight, including cognitive, language, physical, social, spiritual, creative, and emotional areas of development. Learning and development theories of young children, including those of Freud, Erikson, Bowlby, Piaget, Vygotsky, Bronfenbrenner, and other modern developmental theorists are explored. Pedagogical implications of these developmental theories are embedded in class discussions and course activities. COREQUISITE: ECE 280.

ECE 298
CHILD HEALTH SAFETY AND NUTRITION
Undergraduate
This course focuses on the interrelationships among child, family and the areas of health, safety and nutrition. Special emphasis will be placed upon the issues of health, safety and nutrition that affect young children from the ages of birth through age 8. Understanding cultural issues and special needs of individual children are addressed, as are aspects of health and safety. Central to this course is the acquisition of knowledge and application of practices that promote good nutrition, dental health, and the physical, social and emotional well being of young children. The course includes information on common diseases and health problems.
ECE 302
CHILD AND FAMILY IN THE URBAN COMMUNITY
Undergraduate
This course focuses on understanding the diversity of children and families in approaches to development, learning, and disability. Strategies in developing positive and supportive relationships with families of young children with special needs, including family-centered practices, will be explored. Particular attention is given to the challenges faced by teachers and other professionals in early intervention in assessing children's needs and providing services, which are reflective of the child's development within his/her diverse cultural and community context. In addition, the course examines ways to develop and maintain productive and collaborative relationships among professionals and families, communities, and other professionals across the range of support systems in the IFSP and IEP planning processes.

ECE 303
INTRODUCTION TO EARLY CHILDHOOD EDUCATION
Undergraduate
This course will introduce students to the professional ethics of early childhood education and the critical role of federal policy in the evolution of the field. Historical, sociological, philosophical, and psychological foundations of early childhood education are explored. Of special interest is a review of key theories and research that inform the development of early childhood education goals and practices, as well as administrative, pedagogical, and ethical professional standards for working with children from diverse communities. The course includes foci on Developmentally Appropriate Practice (DAP), inclusive pedagogical practice, appropriate use of technology with young children, and various curricular models: Montessori, Reggio Emilia, High Scope, and Creative Curriculum.

ECE 306
FUNCTIONAL BEHAVIOR ASSESSMENT: INTERVENTION AND SUPPORT IN EARLY CHILDHOOD
Undergraduate
This course is designed to prepare early childhood pre-service teachers to work with children who present a variety of challenging behaviors in the classroom. Grounded in principles of Applied Behavior Analysis, the philosophy of the course is based on the premise that understanding the underlying causes of children's externalizing and internalizing behavior enables the teacher to utilize appropriate techniques in conducting behavior intervention and classroom management. Using Positive Behavioral Support and Functional Behavior Analysis (a competency required for all teachers under the provisions of IDEA), students will learn how to design and develop a Behavior Intervention Plan. Diverse methods for addressing a variety of behaviors are explored and practiced through field-based assignments that also include application of behavioral assessment and intervention tools, as well as techniques.

ECE 290 and Advanced Teacher Candidate Status is a prerequisite for this class.

ECE 307
LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD (BIRTH TO 8)
Undergraduate
This course examines language acquisition and development in young children, including culturally and linguistically diverse learners and children with atypical language development. Attention will be given to dialectical issues as these apply to growth and development of linguistic competencies through the early childhood years. Explored in this course are the core topics of linguistic?morphology, syntax, semantics, pragmatics, phonetics, and phonology. Psycholinguistic and sociolinguistic theories anchor the discussion of language learning in childhood. Issues of language delay and processing of symbolic information to facilitate the development of articulation, fluency, voice, and functional language are included.

ECE 290 and (Advanced Teacher Candidate Standing or a declared ECE minor) are a prerequisite for this class.

ECE 309
YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS
Undergraduate
This course is a survey of the field of early childhood special education, including the Early Intervention System. Characteristics of infants, toddlers, and young children with special needs are examined in this course. Methods of working with different disabilities during children's early years will be explored. Strengths and needs of families of young children with disabilities and collaboration with family members will be emphasized. Understanding the impacts of current legislation, policy, and research on practice is fostered and developed. Completing 15 hours of field experience in an early childhood special education setting is a part of this course's requirements.

ECE 290 and Advanced Teacher Candidate Status is a prerequisite for this class.
ECE 310  
PREP☰ARY PROGRAMS: CURRICULUM AND STRATEGIES  
Undergraduate  
Candidates will plan, implement, and evaluate activities that promote the physical, emotional, social, spiritual, cognitive, and creative development of preschool children from diverse cultural and socioeconomic backgrounds. Emphasis will be placed on creating learning environments that facilitate children's learning through play. Developmentally appropriate practices, with a particular emphasis on social studies, use of technology, and learning centers will be thoroughly investigated. COREQUISITE: ECE 381.

ECE 290 or a declared ECE Minor is a prerequisite for this class.

ECE 311  
CURriculum AND INSTRUCTION IN PRIMAR¥ GRADES  
Undergraduate  
This course provides an examination of the objectives, content methods and materials used in the primary grades of elementary schools (K-3). A variety of teaching methods and classroom management strategies will be discussed and illustrated, including teacher-led and student-centered instruction. Candidates will be encouraged to reflect upon their own emerging educational philosophies and teaching styles as they take part in laboratory and clinical experiences. Many opportunities for planning, using and evaluating a variety of teaching methods will be offered. Each student will develop at least one teaching unit on a primary social studies theme. COREQUISITE: ECE 382.

ECE 290, ECE 310 and Advanced Teacher Candidate Standing is a prerequisite for this class.

ECE 312  
BIlingual THEORY IN EARLY CHILDHOOD DEVELOPMENT  
Undergraduate  
This course is designed to equip bilingual and second language teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, political and legal foundations of bilingual education programs in the United States. It will examine different models of bilingual programs and the psycholinguistic and sociolinguistic principles upon which they are based.

ECE 313  
CROSS CULTURAL STUDIES IN EARLY CHILDHOOD EDUCATION  
Undergraduate  
The course will discuss the historical, philosophical and cultural foundations of education of young children in a multicultural society, emphasizing the role of ethnicity and cultural variables in development of young children within the context of families, childcare centers, and educational systems. Topics include: history of immigration and predictions for the future; the effects of population shifts on the education of English Language Learners and their families; the impact of laws, litigation and executive orders on bilingual/English-as-a-Second-Language education; understanding cultural and linguistic differences regarding locating and using educational resources.

ECE 314  
METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS IN EARLY CHILDHOOD EDUCATION  
Undergraduate  
This course focuses on best practices in teaching English Language Learners, helping them to learn English while maintaining their native language, in bilingual/ESL early childhood classrooms, from birth through age 8. Candidates will demonstrate competencies with different approaches and methodologies currently used to support the development of listening, speaking, reading, and writing in social and academic contexts in learners' first and second language. Curriculum-based assessment, cultural awareness, and self-reflective practice will also be addressed.

ECE 325  
SECOND LANGUAGE ACQUISITION AND EARLY LITERACY DEVELOPMENT  
Undergraduate  
This course will examine the process of learning and using a second language. Research in second language acquisition (SLA) is multi-disciplinary in nature, reflecting the complexity of language learning and use. Linguistic, psychological and social processes that underlie language learning and use will be introduced and applied to the understanding of this learning in young children. Language acquisition theory concerning relationships between early literacy and oral language development in first and subsequent languages will be explored. Understanding developed through this exploration will then be applied to the classroom in the form of strategies and literacy development activities.
ECE 326
PRINCIPLES AND STRATEGIES FOR FAMILY ADVOCACY AND ACTION IN EARLY CHILDHOOD
Undergraduate
This course develops knowledge and skills to assist families of young children who face the stress of living in poverty. The focus will be on developing empathetic relationships with families so that family service and education can be optimized. Candidates will be assisted in learning to identify community resources and ways to support families in accessing resources. A focal point will be on ways to empower families, recognizing family strengths and respect for cultural variables, as they apply.

ECE 302 is a prerequisite for this class.

ECE 327
IMPACT OF PUBLIC POLICY ON FAMILIES OF YOUNG CHILDREN
Undergraduate
This course is grounded in social justice practice and designed to promote an understanding of the ethical principles, legal issues, policies, and law influencing the well being of families, including those families of young children with disabilities and those who are English Language Learners. A particular focus will be on how federal childcare and education policy affects and shapes early childhood practice and service delivery to families. This course explores historical development of laws and public policy affecting families. Ethics and ethical implications of social change will be explored.

ECE 328
WORKING WITH FAMILIES OF CHILDREN WITH DISABILITIES AND CHRONIC ILLNESS
Undergraduate
This course will strengthen the knowledge and skills of early childhood educators and other professionals working with young children in cultural competency (at the individual and institutional level), family-centered care, family-professional partnerships, family-directed practices, and family empowerment. Candidates will develop best practices to assure the health and well being of children and their families and to honor the strengths, cultures, traditions and expertise that everyone brings to this relationship.

ECE 329
YOUNG CHILDREN'S LITERATURE AND FAMILY LITERACY
Undergraduate
This class explores the joys of reading and provide strategies for candidates to awaken and encourage the joy of reading in the children and families with whom they work. It focuses on how early childhood educators are uniquely positioned to foster literacy in children and their families through thoughtful, theoretically based programming and activities.

ECE 331
BEGINNING MATH AND SCIENCE INSTRUCTION
Undergraduate
This course applies child development principles to the planning of science and mathematics experiences for both typically and atypically developing young children. Emphasis is placed on understanding how children develop problem-solving skills, and on recognizing how teachers can facilitate inquiry-discovery experiences for young children with diverse learning styles and needs. Course assignments include participation in experiments and field-based experiences in mathematics and sciences. Teacher candidates are required to develop and provide developmentally and culturally appropriate activities in science and mathematics activities for young children.

ECE 290 and Advanced Teacher Candidate Standing are a prerequisite for this class.

ECE 332
EARLY LITERACY AND ASSESSMENT FOR YOUNG CHILDREN WITH DISABILITIES
Undergraduate
This course focuses on the nature of the reading process, current literacy theory and practices, and research-based instructional strategies to develop literacy skills in emergent and developing readers and young children with reading/learning disabilities. Emphasis is placed on understanding the reading process, analyzing and applying research-based instructional practices, administering, analyzing, and interpreting formal and informal reading assessments, and making informed instructional decisions to meet the unique needs of individual readers. Differences in reading abilities will be examined in light of providing appropriate, effective, and meaningful literacy instruction for young children with disabilities.
ECE 333  EARLY CHILDHOOD EDUCATION FOR LOW INCIDENCE DISABILITIES  
Undergraduate  
This course focuses on an examination of the developmental and learning characteristics of young children with low incidence disabilities. A specific focus is on educating early childhood students with Autism Spectrum Disorders and those with Intellectual Disabilities. A primary goal of this course is to understand the learning needs of these children, and to examine and evaluate various educational and therapeutic methods of working with them. A major part of this course is devoted specifically to the characteristics associated with and interventions for children with Autism Spectrum Disorders.

ECE 334  SPECIAL EDUCATION CURRICULUM AND STRATEGIES FOR YOUNG CHILDREN  
Undergraduate  
Study of the theoretical and practical approaches to instruction for young children with high incidence disabilities. Emphasis is placed on the development of supportive learning environments, using special curricular and behavioral management strategies for all early childhood settings; application of collaborative practices with multiple service providers and families to meet the needs of diverse learners with high incidence disabilities. Strategies and materials for improving the social, emotional, and academic adjustment and functioning of young children with high incidence disabilities are examined. Includes teaching social and emotional curricula; implementing functional behavioral assessment; and monitoring growth and development in targeted areas. Strategies to increase the young child's self-awareness, self-management, self-control, self-reliance, and self-esteem are considered. Application of diagnostic information into teaching strategies and implementation of an instructional plan (IEP) is a central tenet of the course. It is recommended for students to take ECE 290 and ECE 309 and to have 25 clock hours of Level II Experience prior to taking this class.

ECE 375  ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE SETTINGS  
Undergraduate  
Candidates will study, use and evaluate early childhood assessment methods and tools that are appropriate for use with young children with diverse cultural and socioeconomic experiences. Focus of the course is on the teacher candidate's acquisition of knowledge and skills regarding an array of formal and informal assessment instruments and techniques used to gather information needed for making decisions about typical and atypical children served in individual and group learning situations. Focus is directed toward the development of curricular goals and instructional approaches that evolve from the development of curricular goals and instructional approaches that evolve from the assessment information. Such information is used to create learning plans, including Individual Family Service plans (IFSP) and Individualized Education Plan (IEP), serving child and family responsibly.

ECE 290 and (Advanced Teacher Candidate Standing or a declared ECE minor) are a prerequisite for this class.

ECE 377  ASSESSMENT OF YOUNG BILINGUAL/ESL STUDENTS  
Undergraduate  
This course will focus on the discussion of basic principles and current approaches to assessment of language learning students in ESL and bilingual early childhood and early elementary educational settings. Candidates will learn about the different purposes of process and product assessment tools, authentic and curriculum-based forms of assessment, issues in the assessment of English Language Learners (ELLs), and assessment in academic areas for early elementary ELLs. Research on language and literacy acquisition in multilingual learners vis à vis instruction and assessment will be discussed. Candidates will have opportunities to critically examine and learn how to administer assessment tools used in current practice.

ECE 380  EARLY CHILDHOOD SPECIAL EDUCATION PRACTICUM  
Undergraduate  
Supervised teaching in a cooperating school serving young children with disabilities for 150 clock hours; arranged in collaboration with supervising faculty member and the Field Experience Office. Candidates will reflect upon their teaching experiences with young children with disabilities and collaborate with colleagues and instructor to identify alternative strategies for problematic situations. Application and approval required prior to registration. Open only to DePaul students.

ECE 381  INTERNSHIP IN PRESCHOOL SETTING  
Undergraduate  
Candidates conduct 75 hours of intensive supervised field work in preschool during the winter quarter. The internship is designed to be taken by ECE teacher candidates before student teaching. Candidates enrolling in this internship have completed or are taking ECE 310: Preprimary Programs: Curriculum and Strategy concurrently. (2 credit hours)

ECE 290 is a prerequisite for this class.
ECE 382
INTERNSHIP IN PRIMARY SETTING
Undergraduate
Candidates conduct 75 hours of intense supervised field work in a primary grade (K-3) during the spring quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have taken ECE 311: Curriculum and Instruction in Primary Grades. (2 credit hours)

Advanced Teacher Candidate Standing is a prerequisite for this class.

ECE 383
INTERNSHIP IN EARLY CHILDHOOD ESL/ BILINGUAL EDUCATION SETTINGS
Undergraduate
This course will focus on application of the theories of effective teaching practices and assessment procedures appropriate for young English Language learners. It will emphasize an application of knowledge gained from previous ESL/ELL courses and demonstration of skills necessary to work collaboratively and effectively with families of young English Language Learners. Professional behaviors that respect, value, and support all children's native language and culture will be reinforced. (100 clock hours)

ECE 313, ECE 314, ECE 325, ECE 377, and (BBE 305 and BBE 306) or (BBE 325 and BBE 366) are prerequisites for this class.

ECE 384
EARLY CHILDHOOD EDUCATION CAPSTONE
Undergraduate
The senior capstone course is designed to help Candidates integrate the central emphases of their liberal learning studies curriculum with their professional behavior. It will provide prospective early childhood educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to early childhood education. Candidates will develop a professional portfolio that reflects the standards of the various guiding professional organizations. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program. This course is taken before student teaching.

ECE 385
EARLY CHILDHOOD STUDENT TEACHING
Undergraduate
This course requires students to participate in supervised teaching at a cooperating school, five full days per week, for an academic quarter. Part of the teaching will be in a preprimary setting and part will be in a primary setting. Feedback and discussion of issues encountered in student teaching as well as new materials and techniques of student teaching will be included. Application and approval are required. Open only to DePaul students. (12 credit hours)

ECE 387
CAPSTONE SEMINAR IN EARLY CHILDHOOD EDUCATION
Undergraduate
This course is designed to help candidates integrate the central emphases of their Liberal Studies curriculum with their professional knowledge and behavior. It provides opportunities and activities to prospective educators that engage them in being analytic and reflective upon their major and related disciplines; guide them in further considering their value commitments and how they relate to their chosen profession; apply critical and creative thinking in addressing 'real-time' professional issues and needs; and examine extant practices from multicultural perspectives. Candidates develop a professional teaching portfolio that reflects the standards of the various guiding professional organizations and the Illinois State Board of Education (ISBE). The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator as well as the goals of the Liberal Studies program. The course is taken simultaneously with student teaching.
COREQUISITE(S): ECE 385. (2 credit hours)
ECE 390
DEVELOPMENTAL THERAPY STRATEGIES FOR INFANTS AND TODDLERS IN EARLY INTERVENTION
Undergraduate
This course will focus on the knowledge and skills needed to work effectively with young children from birth through age 3, who have disabilities and special learning needs. The course will use child-centered, play-based interventions and developmentally appropriate practice as the central approach. Furthermore, students will examine learning outcomes and related intervention (lessons), which will be used to effectively address these outcomes, as well as aligning ongoing assessment of the intervention strategies. Students will examine issues related to the impact that disability conditions have on young children’s learning needs in all developmental domains. Additionally, students will explore issues related to intervention of young children within the context of families and caregivers - that is within natural and inclusive settings, such as the family’s home, community settings, or center-based programs.

ECE 290 and ECE 309 (or equivalent) are prerequisites for this class.

ECE 391
ASSESSMENT OF INFANT AND TODDLERS
Undergraduate
Built on a partnership with families, this course focuses attention on all aspects of development including social/emotional, cognitive, sensory/motor and communication. Beginning with observation and naturalistic assessment processes, teachers examine the principles of best practice for assessing babies and toddlers for service in infant/toddler care, Early Head Start and early intervention. Teacher candidates learn to administer screening tools, criterion referenced instruments and leading standardized instruments and procedures, including the transdisciplinary approach and the Hawaii Early Learning Profile.

ECE 290 and ECE 309 (or equivalent) are prerequisites for this class.

ECE 392
WORKING WITH FAMILIES OF INFANTS AND TODDLERS: PARTNERSHIP AND COLLABORATION IN EARLY INTERVENTION
Undergraduate
This course will focus on the knowledge and skills needed to work effectively with families of young children from birth through age 3, who have disabilities and special learning needs. The course will examine philosophical foundations and collaboration strategies for teachers and other professionals working with families of young children with exceptionality in Early Intervention programs and inclusive settings where the infants and toddlers may be served.

ECE 306 (or equivalent) is a prerequisite for this class.

ECE 393
INTERNSHIP EXPERIENCES WITH INFANTS, TODDLERS AND TWOS WITH SPECIAL NEEDS
Undergraduate
This course is a supervised internship, in which the candidates will practice early intervention strategies in a field experience of 40 clock hours with infants and toddlers with special needs. In this internship candidates will practice 1) assessment of infants and toddlers, 2) developmental therapy and play strategies with infants and toddlers, and 3) collaboration working in partnership with family members of children with special needs. Co-requisite: ECE 390; ECE 391; ECE 392. (2 credit hours)

ECE 395
DESIGNING CURRICULUM FOR INFANTS AND TODDLERS
Undergraduate
Research in neuroscience indicates that the brain developmental foundation for all later learning is created in the first three years of life. The impact and impetus for the adults (families and caregivers) who nurture and teach children from birth to three will be explored in this course. The course will examine the developmental milestones, as well, as each child’s developmental profile to create a developmentally appropriate curriculum to enhance the foundation for all later learning. The course explores ways to provide a safe and challenging environment; to focus on play as a vehicle for learning for optimal developmental outcomes. Collaboration with families in addressing each child’s development is featured in the course. Candidates will be expected to design curricula to meet the needs of linguistically and culturally diverse children, as well as young children with special needs.

ECE 398
SPECIAL TOPICS IN EARLY CHILDHOOD EDUCATION
Undergraduate
This course offers intensive study of selected topics in the field of early childhood education and care. Course content and credits vary according to topic. Syllabus is tailored to the topic of special study. Example topics include: Implementing common core in kindergarten; Social-emotional learning programming in K-3; Using data to make curricular decisions in PK-3; Mentoring families who are teen-agers.
ECE 399
INDEPENDENT STUDY IN EARLY CHILDHOOD EDUCATION
Undergraduate
(1-4 Credits) PREREQUISITE(S): Permission from instructor, program chair and associate dean.

ECE 490
DEVELOPMENTAL THERAPY STRATEGIES FOR INFANTS AND TODDLERS IN EARLY INTERVENTION
Graduate
This course will focus on the knowledge and skills needed to work effectively with young children from birth through age 3, who have disabilities and special learning needs. The course will use child-centered, play-based interventions and developmentally appropriate practice as the central approach. Furthermore, students will examine learning outcomes and related intervention (lessons), which will be used to effectively address these outcomes, as well as aligning ongoing assessment of the intervention strategies. Students will examine issues related to the impact that disability conditions have on young children’s learning needs in all developmental domains. Additionally, students will explore issues related to intervention of young children within the context of families and caregivers that is within natural and inclusive settings, such as the family’s home, community settings, or center-based programs.

SCG 404 and T&L 427 (or equivalent) are prerequisites for this class.

ECE 491
ASSESSMENT OF INFANT AND TODDLERS
Graduate
Built on a partnership with families, this course focuses attention on all aspects of development including social/emotional, cognitive, sensory/motor and communication. Beginning with observation and naturalistic assessment processes, teachers examine the principles of best practice for assessing babies and toddlers for service in infant/toddler care, Early Head Start and early intervention. Teacher candidates learn to administer screening tools, criterion referenced instruments and leading standardized instruments and procedures, including the transdisciplinary approach and the Hawaii Early Learning Profile.

SCG 404 and T&L 427 (or equivalent) are prerequisites for this class.

ECE 492
WORKING WITH FAMILIES OF INFANTS AND TODDLERS: PARTNERSHIP AND COLLABORATION IN EARLY INTERVENTION
Graduate
This course will focus on the knowledge and skills needed to work effectively with families of young children from birth through age 3, who have disabilities and special learning needs. The course will examine philosophical foundations and collaboration strategies for teachers and other professionals working with families of young children with exceptionalities in Early Intervention programs and inclusive settings where the infants and toddlers may be served.

T&L 421 (or equivalent) is a prerequisite for this class.

ECE 493
INTERNSHIP EXPERIENCES WITH INFANTS, TODDLERS AND TWOS WITH SPECIAL NEEDS
Graduate
This course is a supervised internship, in which the candidates will practice early intervention strategies in a field experience of 40 clock hours with infants and toddlers with special needs. In this internship candidates will practice 1) assessment of infants and toddlers, 2) developmental therapy and play strategies with infants and toddlers, and 3) collaboration working in partnership with family members of children with special needs. Co-requisite: ECE 490; ECE 491; ECE 492. (2 credit hours)

ECE 704
SEMINAR IN RESEARCH IN CHILD DEVELOPMENT
Graduate
The focus of the seminar is to introduce the doctoral students to major research questions and issues in child development. The doctoral students will lead discussions on the most current and seminal research in the field of child development. In addition, the students will participate in analyses of existing US Policies in regards to child development. The seminar will have the following objectives: 1) Examination, analysis, and evaluation of the seminal and contemporary research and research methodologies in child development. 2) Examination and analysis of major theories of child development through a study of the original literature. 3) Examination and analysis of contemporary issues regarding maternal health and early development. 4) Examination, analysis, and evaluation of US policy approaches to maternal health and early child development and education.

Status as a EDD student with a declared concentration is a prerequisite for this class.
ECE 706  
CANDIDACY PAPER  
Graduate  
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 714  
SEMINAR IN DEVELOPMENT, RISK, AND RESILIENCE  
Graduate  
This seminar will examine the concept of risk and its influence on child development within various frameworks such as environment, genetics and neurobiology, psychopathology, family, public policy and education. An issue of interest will be the development of children who are at-risk due to environmental factors. The U.S. policies in addressing this population will be examined. The seminar will have the following objectives: 1) In-depth analysis of the concepts of risk and resilience through examination of the original research literature. 2) Examination and analysis of various risk factors (e.g.: genetics, biology, poverty, family, socio political influences) with attention given to neurobiological risk factors, including disabilities. 3) Examination and analysis of factors of resilience (including implications for intervention and early childhood education). 4) Examination and analysis of U.S. Policies in relationship to promotion of resilience via early childhood intervention and education programs.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 724  
SEMINAR IN CURRICULAR APPROACHES IN EARLY CHILDHOOD EDUCATION  
Graduate  
This seminar will examine issues related to curriculum in early childhood education and intervention, including assessment and other contemporary schooling issues. An in-depth analysis of various theoretical approaches influencing curriculum design in early childhood and family intervention will be conducted, as well as a review of the most influential and current educational models guiding curriculum in current early childhood settings. Through participation in this seminar candidates will meet the following objectives: 1) Examination of theoretical approaches influencing early childhood curriculum design. 2) Examination and analysis of contemporary curricular and assessment issues in early childhood education. 3) Examination and analysis of current early childhood educational models guiding curriculum. 4) Observation and analysis of model early childhood programs. 5) Exploration of other relevant contemporary early childhood education issues.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 734  
SEMINAR IN EARLY CHILDHOOD PROGRAM DESIGN AND EVALUATION  
Graduate  
Doctoral students will examine the design and goals of various nationally funded early childhood programs from their philosophical and policy perspectives. Doctoral students will devote the major part of this seminar to conducting a research evaluation of one selected national early childhood program as a class team project. The research may require utilizing field research methodologies of one or more centers belonging to the selected program. When feasible the students will present their research findings in a local or national conference. The seminar will have the following objectives: 1) Understanding program design. 2) Developing program evaluation to match questions and address stakeholder needs. 3) Acquiring hands-on experience conducting a program evaluation on a selected early childhood program. 4) Written and oral dissemination of study.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 744  
SEMINAR IN CULTURE, LANGUAGE AND LEARNING  
Graduate  
This seminar will focus on examining the influences of culture and language in development and education of children. Current cross-cultural, cross-lingual educational research will be examined in detail. The seminar will have the following objectives: 1) In-depth examination and analysis of influences of race and culture on development based on current research. 2) Examination and analysis of multicultural issues, and implications for early education method and practices. 3) Examination and analysis of issues related to the education of interracial children. 4) Examination of bilingual issues and implications for early education methods and practices. 5) Examination and evaluation of current educational policies in relationship to bilingual and bicultural children in the US.

Status as a EDD student with a declared concentration is a prerequisite for this class.
ECE 759  
**TEACHING INTERNSHIP IN EARLY CHILDHOOD EDUCATION**  
**Graduate**  
This teaching internship is designed to respond to the growing need for preparing high quality teaching professionals in the field. Early Childhood Education Doctoral students acquire hands-on experience in college-level teaching in early childhood education or related fields. The doctoral student will teach one course under the supervision of an early childhood program faculty member. The course to be taught is recommended by the supervising faculty advisor based on the doctoral student's background and career goals. The major objectives of this internship are: 1) Demonstrating mastery of course content. 2) Demonstrating knowledge, skills, and dispositions for teaching college and university level students and pre-service early childhood professionals from diverse backgrounds.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 769  
**RESEARCH INTERNSHIP IN EARLY CHILDHOOD EDUCATION**  
**Graduate**  
This research internship is designed to provide an actual research experience in early childhood education. With the approval of the ECE program faculty, the candidates will work either with a faculty from the College of Education, from another college at DePaul University, or with a research associate or scientist at DePaul or in another institution to assist on a research project in one of the following areas: child development, early childhood education, child and family studies, developmental psychology or another closely related field. The student's progress will be followed up by an early childhood advising faculty. The internship has the following objectives: 1) Understanding DePaul's IRB protocol and application process to acquire certification for conducting research. 2) Acquiring first-hand experience while assisting research faculty in conducting various phases of research. 3) Collecting, analyzing, and interpreting data under supervision. 4) Understanding various research methodologies employed in the field of early childhood education.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 849  
**SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT**  
**Graduate**  
Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

ECE 859  
**INDEPENDENT DISSERTATION RESEARCH: EARLY CHILDHOOD EDUCATION**  
**Graduate**  
Students register for this course for the quarter in which they defend their dissertations. Permission of dissertation chair required.

ECO 101  
**INTRODUCTION TO ECONOMIC ISSUES**  
**Undergraduate**  
This course will introduce students to basic concepts from both micro- and macroeconomics. The goal is for students to gain an appreciation of how economics can be used to understand the world. Students will enhance their analytical skills by using basic economic concepts to examine current domestic and international issues. Students will improve their oral communication skills during class discussions and debates. This course is intended for non-Commerce students and cannot be counted toward a major or minor in economics.

LSP 121 or MAT 130 is a prerequisite for this class.

ECO 105  
**PRINCIPLES OF MICROECONOMICS**  
**Undergraduate**  
Principles of Microeconomics. Basic theories of micro (or individual) economic units; the theory of consumer demand, the firm, and distribution; pricing and production in competitive, monopolistic and oligopolistic industries.

MAT 130 or equivalent is a prerequisite for this class.
ECO 106
PRINCIPLES OF MACROECONOMICS
Undergraduate
Principles of Macroeconomics. Fundamental theories of macro (or aggregate) economics: supply and demand, national income accounting and analysis, and international trade. Analysis of unemployment, and inflation, and policies designed to combat these and other current problems.
MAT 130 or equivalent is a prerequisite for this class.

ECO 250
CAREER PREPARATION FOR ECONOMICS MAJORS
Undergraduate
Students will explore possible career options for economics majors while addressing three competency areas: self-management skills, career building skills, and general business skills. The course will focus on further developing students' quantitative skills as they research career options and will include the development of a portfolio as a final assignment. (2 quarter hours)
MAT 137, ECO 105, ECO 106, junior standing, and an intended or declared ECO major in the College of Business is a prerequisite of this class.

ECO 305
INTERMEDIATE MICROECONOMICS
Undergraduate
Continuation of topics treated in Economics 105, especially consumption and production theory. Marginal analysis and indifference curves are major tools used in discussion of demand for products, pricing output, wages, and distribution of output.
ECO 105 and MAT 135 (or equivalent) are prerequisites for this class.

ECO 306
INTERMEDIATE MACROECONOMICS
Undergraduate
The purpose of this course is to develop macroeconomic models that assist in understanding the myriad economic problems facing us today, both domestic and foreign, and in evaluating proposed solutions. These static and dynamic models are used to understand interactions in the macroeconomy, and will serve as a tool in predicting the level of GDP, inflation, unemployment and interest rates. Models included are: traditional short-run Keynesian analysis; the New Classical market-clearing approach; and the recent work in Neo-Keynesian thought.
ECO 105, ECO 106 and MAT 135 (or equivalent) are prerequisites for this class.

ECO 310
URBAN ECONOMICS
Undergraduate
This course discusses the economic rationale for the existence of cities and urban areas. Location decision-making by both firms and households is analyzed with attention given to the resulting land values, land rents, population density gradients, and urban land use patterns. We study models of the supply and demand for housing, the measurement and determination of house value, and the corresponding problems of segregation, housing abandonment, property taxation, and public housing. Other urban problems such as poverty, crime, and transportation are also discussed.
ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 311
BUSINESS AND ECONOMIC FORECASTING
Undergraduate
Students will learn forecasting tools for microeconomic variables such as sales and profits and macroeconomic variables such as interest rates and GDP growth rates.
ECO 375 is a prerequisite for this class.
The first part of this course will focus on changes in the Chicago metropolitan economy over time. Topics to be covered will include the development of the Chicago economy in the 19th Century, modern economic development, land use, and suburbanization. The second part of the course will focus on selected policy issues including poverty, housing, pollution, crime, education, transportation, and taxes.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

Social Control of Business. Relationships between government, business and society. Both the institutional and theoretical aspects of governmental intervention in economic life examined.

A grade of C- or better in ECO 305 is a prerequisite for this course.

This course discusses market failures and the economic role of government. Topics covered will include: government interventions that correct market failures, the efficiency of government policies, collective decision-making and voting, as well as the theory of optimal taxation and the incentive effects of taxes. Specific government programs such as Social Security and welfare programs are also analyzed. The emphasis is on the revenues, expenditures and policies of the federal government.

A grade of C- or better in ECO 305 is a prerequisite for this course.

Introduction to Money and Banking. The structure of the American banking system; role of the Federal Reserve System; private financial markets and institutions; the effectiveness of monetary policy, and international finance.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

European Economic History. Major factors and institutions which have influenced the economic development of European nations. Impact of these nations on U.S. development is also discussed.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

This course addresses the major factors and institutions which have influenced the economic development of the United States, including differences in regional development, slavery, transportation improvements, western expansion, the rise of large scale business, and government policy responses.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

Historical and theoretical analysis of labor groups and labor market problems (including wage determination, unemployment and discrimination), with particular reference to the dynamic economy of the United States.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.
ECO 319  
**ECONOMICS AND GENDER**  
**Undergraduate**  
This course covers economic trends concerning women in the economy and examines economic analyses of gender issues, with special emphasis on gender issues in the workplace. The increase in the number of women in the work place has been a major change in labor markets, affecting workers, employers and families. Different economic perspectives are examined to give students an understanding of the range of contributions by economists to this field. The course also examines feminist economics which raises concerns about economic analysis in general and as it is applied to this field.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 320  
**ECONOMICS OF RELIGION**  
**Undergraduate**  
This course examines selected economic and sociological aspects of religion in society. Some of the topics that are covered include marriage and divorce, fertility and population growth, schooling, church contributions and work.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 321  
**LAW & ECONOMICS**  
**Undergraduate**  
The overall goal of this course will be to demonstrate how businesses and government interact by surveying the economic and legal aspects of this relationship. This course is designed to prepare students to engage in methods of formal inquiry. The students will examine the American historical aspects of this relationship from the industrial revolution to the present. All topics are discussed with an emphasis on real-world applications and will include: a review of microeconomic theory pertaining to market structures with an emphasis on oligopolies; the history of antitrust; a review of the US legal and political framework; government regulation and key judicial decisions affecting businesses and industries concentrating on the legal and economic logic of those decisions. Class will begin with a discussion of current events once a week and it is expected that each student will attempt to participate and be knowledgeable of what is occurring locally, nationally and internationally.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 322  
**ECONOMICS AND FINANCIAL POLICY**  
**Undergraduate**  
This class explores policy approaches to regulating the financial system and the macroeconomy. The recent financial crisis has spurred interest in financial reform, culminating in the passage of the Dodd-Frank Wall Street Reform and Consumer Protection Act in 2010. Students examine the current and historical issues facing the US financial system and economy. They draw on their Business core curriculum (Money & Banking, ECO315 or FIN320) to critically evaluate reform proposals.

ECO 315 or FIN 320 is a prerequisite for this class.

ECO 325  
**THE ECONOMICS OF POVERTY**  
**Undergraduate**  
This class addresses society's view of poverty. It begins with an introduction to theories of economic justice for perspective. The introduction is followed by empirical issues related to the measurement of poverty and identification of its causes. An assessment of programs designed to ameliorate the effects of poverty also is covered.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.
ECO 326
HEALTH ECONOMICS
Undergraduate
Taking a microeconomic perspective, this course provides a comprehensive overview of the field of health economics building on economic principles, recent research, and problem-based learning. Students will consider conceptual and empirical analyses of: supply of and demand for health and medical services; role of insurance; influence of physicians and hospitals on price, quantity, and quality of services; factors that distort the market; and the impact of technological change on health care cost. The recent changes in federal law regarding health insurance coverage are considered as well.

ECO 105, ECO 106 & MAT 130 (or equivalent) are prerequisites for this class.

ECO 330
THE ECONOMICS OF SOCIALISM
Undergraduate
The origin of socialist economic theory and its relationship to modern economic analysis. Socialist critiques of capitalist economies and capitalist economic theory are developed and related to the theoretical basis for socialism in modern economic theory.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 333
TOPICS IN GLOBAL ECONOMIES
Undergraduate
This course provides an introduction to the major changes in the global economy in the twentieth century. It will devote particular attention to comparative analysis of national economic institutions and performance and business conditions, as well as prominent international institutions such as the International Monetary Fund, World Bank, and World Trade Organization. Knowledge of microeconomic and macroeconomic analysis (Economics 105 and 106) will be presumed and applied to global economic flows and national institutions. Selection of countries and case studies from advanced and developing countries will vary according to recent economic developments.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 334
UNDERSTANDING CHINA'S ECONOMY
Undergraduate
The expansion of relations between China and foreign enterprises continues to entwine China's economy with those of the world. This course will analyze China's continuing evolution into a global market economy. We will examine China's impact on the world economy and the problems that must be overcome for China to continue its dynamic growth. We will further discuss the characteristics of China's evolution and how they can be extrapolated to other nations undergoing similar transitions.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 335
ENERGY AND ENVIRONMENTAL ECONOMICS
Undergraduate
The fundamental problems of resource depletion and environmental deterioration. Alternative methods to achieve an optimal ecological system. Methods of economic analysis include cost-benefit techniques, the role of effluent fees, government subsidies, and legislative action.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 336
EXPLORING ECONOMICS & STATISTICS THROUGH SPORTS
Undergraduate
The main objective of this course is to have students use and understand economics analysis. It covers many of the basic principles/theories in microeconomics, using the sports industry to illustrate these topics. Students use concepts from Business core courses (microeconomics and statistics) to analyze questions such as 'Do large-city professional sports franchises have a competitive advantage over their small-market counterparts?' or 'Why did Chicago and the State of Illinois use $463 million of public money to refurbish Soldier Field?'

ECO 105, ECO 106 and MAT 137 (or equivalents) are prerequisites for this class.
ECO 340
DEVELOPMENT OF ECONOMIC THOUGHT
Undergraduate
A study of the most influential contributions to our understanding of political economy broadly understood. An historical examination of the development of economic theories with special emphasis placed upon their relevance to present economic and political issues.

ECO 306 is a prerequisite for this course.

ECO 341
BEHAVIORAL ECONOMICS
Undergraduate
Behavioral Economics incorporates insights from psychology to expand the standard models of economic choice. This course will examine the findings from the psychology literature that inform the issue of decision making, explore how these findings have challenged standard economic models, and examine how the findings are being incorporated into economic thinking about choice. In addition to an introduction to the Behavioral Economics literature, students will have the opportunity to develop a project of their own using behavioral economics to examine a current economic issue.

A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 359
DEVELOPMENT ECONOMICS
Undergraduate
By some estimates, approximately 1.4 billion people live on less than $1.25 a day. When the world's per capita GDP is $10,000, why do so many people live on so little? Life expectancy in many parts of sub-Saharan Africa is less than 50 years, and in Burundi the average adult has less than three years of schooling. Why does this happen, and what can be done to change this? Students will learn how to objectively measure levels of poverty and development. Students will come to understand and analyze which types of interventions lead to improvements in people's lives. Using Stata, students will also learn techniques that researchers use to identify causal relationships between interventions and outcomes.

A grade of C- or better in ECO 305 is a prerequisite for this course.

ECO 360
ECONOMICS OF LOW-INCOME COUNTRIES
Undergraduate
This course analyzes economic development issues in low-income countries. Attention is given to several key issues including agricultural and rural development, population growth, human capital, international trade, foreign resource flows, the role of the public sector, and environmental quality.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 361
INTERNATIONAL TRADE
Undergraduate
This course deals primarily with the trade side of international economic relations. The main objective is the development of analytical tools required for an understanding of the gains from trade and barriers to trade. Particular emphasis is placed on currently pressing issues including the impact of trade on domestic employment and income, international trade tensions, and the rise of regional trade blocks.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 362
INTERNATIONAL MONETARY ECONOMICS
Undergraduate
How do fiscal and monetary policy choices change as a country's economy opens more and more to international trade and capital flows? This question and others of international importance will be analyzed with an open-economy, macroeconomic framework. Topics to be explored will include: the foreign exchange market under both fixed and floating exchange rate regimes; the balance of payments, output, prices, and income in an open economy; the international monetary system; and the macro issues of economic development and transition.

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.
The European Union, established in 1993 by the Treaty of Maastricht, has become the world's largest economy as a result of gradual incorporation of European countries. The euro represents approximately one fourth of the world's foreign currency reserves. In the economic and political-economic literature the euro has acquired relevance as a possible substitute of the U.S. dollar, especially during the period 2005 - 2010. However, as of 2008, along with the increase of trade among the EU countries, the single currency has been confronting issues with some of its weakest countries which are highly dependent on tourism [Greece, Ireland, Portugal, Italy and Spain]. The loss of independent monetary policy assigns a crucial role to fiscal policy as the only tool designed to stabilize the economy especially in times of recession. The budget deficit and the public debt levels of the weaker countries, during the world economic crisis of 2009, have also extended since then to the majority of the EU members. The political economy convenience of the single currency is now questioned in academic and business environments. The bail outs of Greece and Ireland by the European Central Bank and the International Monetary Fund, and the reduction of the Moody's credit ratings to several countries have considerably contributed to the panic of contagion.

Techniques of estimation and testing of economic relationships. Probability theory, probability distributions, least squares estimation and correlation.

This course introduces time series regression models. Rather than focusing only on the technical and theoretical sides, primary attention is given to applications of time series regression models using economic and financial data. The data will be drawn from websites such as wsj.com and government website FRED (Federal Reserve Economic Data). The course will build upon the STATA programming skills learned in ECO375 [Introduction to Econometrics], particularly as they relate to extracting currently available data into the STATA program. Additionally, students will learn various methodologies to understand the time series processes in economics and finance.

The primary purpose of the course is to learn and apply the tools of game theory in order to understand important economic phenomena. Game theory is widely applicable within the realm of economics, to areas such as: industrial organization, international trade, and corporate finance (not to mention, macroeconomics, law and economics, money and banking, public choice, and environmental economics).

Review of various mathematical functions useful in formulating economic theories followed by elements of Matrix algebra and its application to concepts of micro and macro economic equilibria. Particular emphasis will be placed on differential calculus, including the use of partial derivatives. These mathematical tools will be applied to optimization problems in micro and macro economic theory.

The internship in applied economics is an opportunity to apply knowledge acquired in the classroom to a real world situation under supervision of a carefully selected private or public enterprise. The course is by permission of the instructor following internship approval.

ECO 363, ECO 375, ECO 376, ECO 379, ECO 380, ECO 393 are prerequisites for this course.
ECO 395  
CAPSTONE SEMINAR IN ECONOMICS  
Undergraduate  
A seminar in which students explore how the discipline of economics addresses issues from a different perspective than other disciplines within and beyond the social sciences. This course is the Liberal Studies Capstone Requirement for the LA&S Economics major and is restricted to LA&S economics majors with senior standing. 

ECO 305, ECO 306 and status as an LAS Economics major with Senior standing is a prerequisite for this class.

ECO 398  
SPECIAL TOPICS  
Undergraduate  
Special Topics. Content and format of this course are variable. All topics will include an in-depth study of current issues in Economics. Subject matter will be indicated in class schedule. 

ECO 105, ECO 106 and MAT 130 (or equivalent) are prerequisites for this class.

ECO 399  
INDEPENDENT STUDY  
Undergraduate  
An Independent Study may be available to students of demonstrated capability for intensive independent work in economics. Written permission of supervising faculty member, chair, and director of undergraduate programs is required prior to registration. (variable credit)

ECO 423  
ENVIRONMENTAL ECONOMICS AND PUBLIC POLICY  
Graduate  
This course is designed to give the student an understanding of economic theory as it applies to the environment and how we use natural resources. We will look at situations where self-interest, government regulation, and market conditions affect our decisions as they relate to environmental conditions and issues. Remember, economics is a discipline of understanding choices and how different incentives affect those choices, and that remains true when dealing with the environment and natural resources.

ECO 424  
MICROECONOMIC THEORY  
Graduate  
This course further develops the basic theories of individual economic agents: the consumer and the firm. However, unlike ECO 105, this course will place a lot of emphasis on algebra and calculus.

ECO 425  
PUBLIC ECONOMICS  
Graduate  
In this course we will apply the tools of microeconomics to analyze the economic functions of government, including expenditure and tax policies. We will devote considerable time to understanding the role of government in market economics. In particular the tradeoff between efficiency and equity is analyzed in various contexts. You have already learned what markets can do in your ECO 105 course. In this course we will learn what markets cannot do and where governments must step in.

ECO 435  
REAL ANALYSIS I  
Graduate  
This course covers real number system, completeness, supremum, and infimum, sequences and their limits, lim inf, lim sup, limits of functions, continuity.  

(MAT 149 or MAT 152 or MAT 162 or MAT 172) and (MAT 141 or MAT 215) are a prerequisite for this class.
ECO 436
REAL ANALYSIS II
Graduate
This course follows ECO 435 and covers properties of continuous functions, uniform continuity, sequences of functions, differentiation, integration.

ECO 435 or MAT 335 or equivalents is a prerequisite for this class.

ECO 500
MONEY AND FINANCIAL SYSTEMS
Graduate
This course examines both the role of money in the economy from a functional and macroeconomic perspective as well as the structure and function of the most important financial institutions and financial markets. Topics covered include the role of the Federal Reserve as monetary policymaker, interest rate and exchange rate determination, the relationship between money and economic activity, and the organization and importance of money markets, capital markets, markets for derivative securities, commercial banks and other intermediaries in a well-functioning financial system.

MS in Taxation and MSAA students are restricted from registering for this class.

ECO 501
CONCEPTS OF MICRO AND MACRO ECONOMICS
Graduate
This course investigates the basic elements of the economic way of thinking. Students will begin with models of the consumer and the producer, looking specifically at demand and supply, elasticity, measures of efficiency, production and cost theory, and the determination of price and quantity under different market structures. The remainder of the course is devoted to analyzing the economy as a whole, focusing on the determination of Gross Domestic Product, the role of money and monetary policy, labor markets and unemployment, price stability, and short-run fluctuations in output.

Status as a graduate accountancy student is a prerequisite for this class.

ECO 502
SELECTED TOPICS IN MACROECONOMICS
Graduate
This brief two credit hour course in macroeconomics will cover the nature of macroeconomic activity including the component parts of aggregate expenditures and the nature of key indicators of the economy's performance. The roles of fiscal and monetary policy makers will be examined as well as the structure of the central bank. (2 quarter hours)

MS in Taxation and MSAA students are restricted from registering for this class.

ECO 503
GLOBAL ECONOMY
Graduate
This course is designed to be an introduction to the economic environment in which businesses operate. With the increasing interdependence of national economies and the growing role of global enterprises, the understanding of international economic issues is vital to decision-makers. The material covered will include both socio-cultural aspects and economic and financial dimensions of global business. Students should obtain a grasp of the basic theory as well as a knowledge of the major current issues in the global economy.

ECO 505
ADVANCED MICROECONOMICS
Graduate
An advanced course in microeconomic theory. This course will present a systematic and rigorous analysis of price determination and the allocation of specific resources to particular uses.

ECO 555 or admission to the MS-EPA program is a prerequisite for this class.
ECO 506
ADVANCED MACROECONOMICS
Graduate
An advanced course in macroeconomic theory that examines the determination of income, employment, and prices, and their interrelations. Covers traditional Keynesian as well as alternative models of output, consumption, investment, money demand, inflation and unemployment. The dynamic character of income determination is emphasized, along with effects of government policy, economic institutions, and social goals.

ECO 502 or ECO 509 or admission to the MS-EPA program is a prerequisite for this class

ECO 507
RESEARCH METHODS FOR POLICY ANALYSIS I
Graduate
This course focuses on the tools and techniques used to statistically analyze economic data. We will focus on both theoretical understanding (why do we use such tools and how do they work) and applied understanding (the ability to carry on a research project using these tools). Students will learn Stata, which is the most widely used statistical analysis programming language in Economics. Students will learn the practical skills of how to choose the right tools for the analysis, how to prepare and inspect the data, and how to run an analysis that is robust, can be replicated, and can be understood and used by others - all extremely valuable qualities in real life work.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 508
RESEARCH METHODS FOR POLICY ANALYSIS II
Graduate
This course focuses on advanced techniques used to statistically analyze economic data. We will focus on both theoretical understanding (why do we use such tools and how do they work) and applied understanding (the ability to carry on a research project using these tools). Topics to be covered include the analysis of time series and panel data, discrete choice models, simultaneous equations, forecasting and experimental methods. Students will learn statistical Stata commands that apply to the advanced topics covered.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 509
BUSINESS CONDITIONS ANALYSIS
Graduate
This course teaches students how to use available economic data to assess business conditions. This is done by: (1) evaluating the sources and usefulness of data periodically released by government and private sources and (2) developing a macroeconomic framework that the student can use to analyze business conditions. Completion of this course will allow students to understand economic news and relate it to their business or job.

MS in Taxation and MSAA students are restricted from registering for this class.

ECO 510
ECONOMETRIC METHODS FOR BUSINESS ANALYSIS
Graduate
This course is designed to provide the student with more advanced methods in quantitative analysis. Topics covered include hypothesis testing, probability, correlation analysis and multiple regression. This course will be offered every Winter quarter.

ECO 555 or equivalent is a prerequisite for this class.

ECO 511
BUSINESS AND ECONOMIC FORECASTING
Graduate
This course surveys a number of quantitative techniques commonly used to forecast business and economic variables. Emphasis will be on techniques, their relative strengths and weaknesses and real-world economic applications. Topics include smoothing techniques, regression and econometric analysis and Box-Jenkins time series.

GSB 420 or ECO 375 or equivalent is a prerequisite for this class.
ECO 512  
APPLIED TIME SERIES FORECASTING  
Graduate  
Theory and computer implementation of the Box-Jenkins Techniques with emphasis on forecasting business and industrial activity. Cross-listed as MAT 512.

ECO 509 and ECO 510 are prerequisites for this class.

ECO 513  
DEMYSTIFYING THE FEDERAL RESERVE BANK  
Graduate  
This is a course about monetary policy. The Federal Reserve has (and other central banks have) the capacity to directly control interest rates and the monetary base (money supply) with an impact on real output growth, unemployment, inflation and financial stability. The expected movement in these variables is important for business and consumer decisions. The Fed has been criticized as of late for policies that put us into the recent financial crisis and for policies that do not appear to be getting us quickly out of the current slowdown, but instead are setting the country up for higher inflation. This course will focus on the theory and evidence of what the Fed does (and other central banks do), why they do it and how what they do affects our well-being. It is meant to demystify their policies by providing a rationale behind their statements and actions. Unlike most courses that rely on textbooks, this course will have numerous topics and readings that do not yet appear in traditional texts. Consequently, it will include some of the latest (over the last couple of years or months) ideas on what central banking is and should be about.

ECO 502 or ECO 509 or ECO 506 is a prerequisite for this class.

ECO 514  
INDUSTRIAL ORGANIZATION  
Graduate  
This course is concerned with how the market system directs production decisions under varying deviations from the competitive environment. The links between market structure, conduct and performance are examined. Topics include determinants of market structure, various theories of imperfect competition, price discrimination, predatory pricing, and antitrust policy.

ECO 555 or ECO 505 is a prerequisite for this class.

ECO 515  
MICROECONOMICS OF MARKET ORGANIZATION  
Graduate  
Imperfectly competitive markets are more common than perfectly competitive markets. This course is about the effects of imperfectly competitive market structure on the organization, pricing, product choice, and entry of firms. We will study the acquisition and use of market power, strategic competition across firms, private sector sources of market failure, and the role of government competition policy. Factor markets will also be discussed.

ECO 505 is a prerequisite for this class.

ECO 516  
ECONOMICS OF THE PUBLIC SECTOR I  
Graduate  
Application of microeconomic analysis to the role of government in society. The theoretical foundation for the design of an efficient and equitable tax and expenditure program is presented and the impact of such a program on the economy is explored through general equilibrium analysis. Students must have a solid foundation in basic calculus.

ECO 555 or ECO 505 is a prerequisite for this class.
ECO 517
THE PUBLIC POLICY, BUSINESS, AND ETHICAL ENVIRONMENT OF GOVERNMENT
Graduate
Businesses are becoming more involved in deal making both in the public and private sector. Individuals now sit on the boards of public and private companies and are being asked to provide business analysis and networking skills. Moreover, many firms have established PACS and have set-up governmental practice sections. These firms are also becoming more dependent on the government for business opportunities and are more involved in fundraising on behalf of public officials in order to gain access and to influence the regulatory and legislative process. In fact many business people have raised money for both political parties with the hope of leveraging their contributions for future work or political appointments.

ECO 555 or equivalent is a prerequisite for this class.

ECO 518
LABOR ECONOMICS AND LABOR RELATIONS
Graduate
A study of the American labor force: measurement, characteristics and behavior under changing income, employment and technology. An examination of recent labor market developments provides the basis for a critical analysis and appraisal of contemporary wage theory. Topics include changes in the labor force, unemployment, wage determination, the minimum wage, internal labor markets, productivity, discrimination, unions and collective bargaining.

ECO 555 or ECO 505 is a prerequisite for this class.

ECO 520
ECONOMICS OF THE PUBLIC SECTOR II
Graduate
This course covers public finance and is the second course in a two course sequence on public Economics. Its focus is on the role of government in public expenditure and taxation. It is assumed that previous course work in economics has been satisfactorily completed, and the student has a basic understanding of basic microeconomic theory.

ECO 516 is a prerequisite for this class.

ECO 521
POLICY & REGULATION IN FINANCIAL MARKETS
Graduate
This course focuses on the economic rationale and consequences of U.S. financial regulation. We will emphasize the implications of regulation for future public policy. We will approach this topic by giving a rationale for financial regulation and then go into regulation associated with particular financial institutions. We concentrate on commercial banks and investment banks, although we will touch on insurance and life assurance companies, stock markets, bond markets and hedge funds. Because of systemic risk (the main focus of financial regulation) associated with commercial banking, we spend most of the course dealing with banking regulation.

ECO 505 or ECO 555 is a prerequisite for this class.

ECO 522
CURRENT POLICY ISSUES
Graduate
This course focuses on current policy issues in the United States. Specific topics depend on current legislative issues facing the country and bills being debated in Congress. There will typically be detailed coverage of two main policy issues. The analysis will include an economics analysis as well as extensive reading of political and legal documents.

ECO 505 or ECO 555 is a prerequisite for this class.
ECO 525
STRATEGIC DECISION MAKING AND GAME THEORY
Graduate
The goal of this course is to introduce students to game-theoretic way of thinking and show its usefulness in understanding various problems arising in business, economics, as well as many other disciplines and every day life. The tools used in game theory are analytical in nature, and hence the building blocks of the course will necessarily draw on analytics. The instructor’s job will be to make these analytics accessible to students without using too much mathematics. Once students grasp these tools, a variety of applications will be presented, discussed, and illustrated using experiments. These applications will be mainly in the fields of business and economics, but will often span to other areas like law, politics, biology, and ethics. In this way, students will get a broad perspective of the multiple applications of game-theoretic reasoning.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 526
BUSINESS STRATEGY
Graduate
This class deals with firms’ business plans and policies and how they change in response to various incentives and stimuli. We will discuss frameworks used to analyze and formulate business strategies. We will introduce tools and techniques for diagnosing a firm’s competitive position, identifying managerial and organizational issues, evaluating plans of action, and anticipating the consequences of alternative decisions.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 527
BUSINESS REGULATION AND ANTITRUST
Graduate
This course examines the rationale for and efficiency of government regulation of business in the United States. Various forms of government regulation are evaluated to determine their effectiveness in promoting market efficiency. We will emphasize the importance of market structure and industrial performance, including the strategic interaction of firms. We will examine the behavior of individual markets in some detail, focusing on cost analysis, the determinants of market demand, investment behavior, market power, and the implications of government regulatory behavior.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 528
STRATEGIES AND PROCESSES OF NEGOTIATIONS
Graduate
This course is geared towards developing negotiation skills that are important in both the business world as well as day to day life. We will consider both practical and theoretical aspects of negotiations. In the theoretical part, we will learn what factors affect negotiations success. For example, what is the alternative if an agreement is not reached? In the practical part, we will practice negotiations in class using relevant case studies.

ECO 555 is a prerequisite for this class.

ECO 529
COMPETITION, STRATEGY AND POLICY
Graduate
This class introduces major topics in the economics of imperfectly competitive industries, competition policy, and the economics of incentives and information. The main goals are to understand basic firm behaviors and interactions under various industry configurations, and to scrutinize these behaviors and interactions through the lenses of competition policies (antitrust laws and regulation). We will draw on microeconomic theory, game theory and competitive strategy, as well as empirical evidence and a variety of case studies.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 530
HISTORY OF ECONOMIC THOUGHT
Graduate
A study of the evolution of the science of economics. Emphasis is on the important contributions made to the field by the great thinkers, starting with the Physiocrats and extending to the work of contemporary institutional and post-Keynesian economists.

ECO 555 or ECO 505 is a prerequisite for this class
ECO 542
HEALTH ECONOMICS
Graduate
Health Economics is the study of the allocation of resources relating to health and the market for medical care. Taking a microeconomic perspective, this course provides a comprehensive overview of the field of health economics building on economic principles, recent research, and problem-based learning. Students will consider conceptual and empirical analyses of: supply of and demand for health and medical services; role of insurance; influence of physicians and hospitals on price, quantity, and quality of services; reimbursement mechanisms; factors that distort the market; and the impact of technological change on health care cost. Students will also learn how analytic tools such as cost-benefit and cost-effectiveness analyses can contribute to decision making for the provision and financing of health care.

ECO 550
REGIONAL AND URBAN ECONOMICS
Graduate
The course investigates the spatial character of an economic system. The first part of the course is concerned with theories in regional economics, including business and household location theory, urbanization, and regional development. The latter part of the course deals with urban economics, a specialized area concerned with the economic forces behind many urban problems. Topics include the economics of housing, transportation, poverty, crime and urban public finance.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 555
ECONOMICS FOR DECISION-MAKING
Graduate
This course provides students with an opportunity to apply microeconomic principles to managerial decision-making. These principles include those underlying the theories of consumer choice, production and cost as they relate to decisions made by firms and households. Specific topics include consumer demand analysis and estimation; elasticity; production theory; cost structure and estimation; profit maximization; and the effect of market structure on pricing, output and profit.

GSB 420 is a prerequisite for this class.

ECO 557
INTERNATIONAL TRADE THEORY & POLICY
Graduate
Modern theories of international trade: classical theory of comparative advantage, factor proportions theory, factor price equalization, application of welfare economics to international trade, including regional economic integration, commercial policy and tariff problems. Cross-listed with IB 520.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 558
INTERNATIONAL MACROECONOMICS
Graduate
Analyze traditional macroeconomic issues in a framework that allows for international trade and capital flows. Cross-listed as IB 521.

ECO 506 or ECO 509 is a prerequisite for this class.

ECO 560
DEVELOPMENT OF THE AMERICAN ECONOMY
Graduate
This course describes the economic development of the United States by examining topics such as: colonial settlement patterns, the impact of the railroad, the development of the financial system and the Great Depression.

(ECO 505 or ECO 555) and (ECO 506 or ECO 509) are prerequisites for this class.
ECO 561  
ECONOMICS OF DEVELOPING COUNTRIES  
Graduate  
Introduction to the economist's analytical skills applied to problems of developing and newly industrialized countries. Studies economic theory of development, development policy, and decision-making in the developing world; several case studies are examined. Cross-listed with IB 525.

ECO 555 or ECO 505 is a prerequisite for this class.

ECO 576  
ADVANCED ECONOMETRICS  
Graduate  
The fundamental problems in the application of statistical procedures to econometric estimation will be studied: multicollinearity, identification, serial correlation, and nonhomogeneity of error variance. In addition, more sophisticated estimation techniques will be studied, e.g., reduced-form and multiple-stage regression techniques.

ECO 510 or (ECO 507 and ECO 508) are prerequisites for this class.

ECO 600  
THESIS RESEARCH  
Graduate  
Thesis Research

ECO 798  
SPECIAL TOPICS  
Graduate  
Content and format of this course are variable. An in-depth study of current issues in economics. Subject matter will be indicated in class schedule.

ECO 799  
INDEPENDENT STUDY  
Graduate  
Available to graduate students of demonstrated capability for intensive independent work in economics.

ECT 250  
INTERNET, COMMERCE, AND SOCIETY  
Undergraduate  
An introduction of Internet technology, its application for commerce, and its social impact. This course surveys Internet technology, collaboration and commerce activities, digital media distribution, online communities, and social networking in the Internet environment.

ECT 310  
INTERNET APPLICATION DEVELOPMENT  
Undergraduate  
Development of Internet-based applications using client and server-side scripting. Students will design and build an Internet application that accesses a database. PREREQUISITE(S): CSC 211 or IT 231 or CSC 241

CSC 211 or IT 231 or CSC 241 is a prerequisite for this class.

ECT 330  
ADVANCED INTERNET APPLICATION DEVELOPMENT  
Undergraduate  
This is a programming course focusing on advanced Internet technologies such as tiered design of Internet applications, transactions, creating components, and Web services. PREREQUISITE(S): IT 212 or CSC 242 or CSC 243 or IT 232 or ECT 310

IT 212 (or CSC 242 or CSC 243 or IT 232 or ECT 310) is a prerequisite for this class.
ECT 355
INTERNET SYSTEMS: COLLABORATION, COMMERCE, AND MEDIA
Undergraduate
This course examines the application of Internet technology to support collaboration, commerce, and digital media distribution activities. It will focus on the latest technologies, new development models and their social impact. Students will explore different models and develop applications to support collaborative commerce. Prerequisites: ECT 310 or ECT 330 or IT 232

ECT 360
INTRODUCTION TO XML
Undergraduate
An introduction to Extensible Markup Language (XML) and XML transformations. XML syntax, processing and validation. Namespaces. Transformations using XSLT and XPath. XML applications such as XHTML, RDF, SVG, XSL. PREREQUISITE(S): CSC 211 or CSC 241 or CSC 261.

ECT 410
DEVELOPMENT OF WEB-BASED BUSINESS APPLICATIONS
Graduate
Development of web-based business solutions using client-side and server-side technologies. Major topics include analysis and design of web projects for a business, web application design patterns, server-side programming, and access to databases. PREREQUISITE(S): CSC 401 or IT 411

ECT 424
ENTERPRISE INFRASTRUCTURE
Graduate
Introduction to modern infrastructure and the evolving technology environment. Major topics include: computer networks, Internet infrastructure, Web 2.0, Enterprise 2.0, social media and networking, software as a service, content management systems, cloud computing, and portal.

ECT 436
SOCIAL MARKETING AND SOCIAL NETWORKING APPLICATIONS
Graduate
Online social media and culture, online social marketing concepts, online social networking applications and their design/development. Students develop dynamic web sites and applications on social networking platforms using server-side programming technology to meet strategic marketing goals. PREREQUISITE(S): None

ECT 455
E-COMMERCE WEB SITE ENGINEERING
Graduate
(Formerly ECT 555, cross-listed with HCI 513) An introduction to Web site engineering methods and processes to support e-commerce development. Web site engineering life cycle and user-centered design, including site goals, business models, value propositions, user analysis, information architecture, interface and navigation design, usability guidelines, database, testing, hosting strategies, usage metrics, and collaborative development. Technologies for e-commerce, shopping cart, digital payments, promotion strategies, and security issues. Students will build fully functional Web sites using database and client- and server-side technologies. PREREQUISITE(S): CSC 401 or IT 411 or ECT 410 or ECT 436 or HCI 430

CSC 211 or CSC 241 or CSC 261 is a prerequisite for this class.

CSC 401 or IT 411 is a prerequisite for this class.

CSC 401 (or IT 411 or ECT 410 or ECT 436 or HCI 430) is a prerequisite for this class.
ECT 480
INTRANETS AND PORTALS
Graduate
Intranet development methodology. Data warehousing concept and On-Line analytic processing (OLAP) for information management. Enterprise information portals (EIP). Transforming information into knowledge. Major applications involve: decision support, customer applications and content personalization for intranet. Students will conduct case studies and projects. PREREQUISITE(S): ECT 424

ECT 481
INTERNET SUPPLY CHAIN MANAGEMENT
Graduate
This course examines system architectures, technologies, approaches, and infrastructure requirements in the context of supply chain systems. The focus is on the design, development and implementation of systems that facilitate the collaboration of an enterprise with its buyers and suppliers. Topics include development of messaging-based collaboration framework with web services. Students will design and implement a collaborative extranet system component in team projects. PREREQUISITE(S): CSC 401 or IT 411 or ECT 410 or ECT 436

ECT 556
ENTERPRISE ARCHITECTURE AND DESIGN
Graduate
This is an advanced course on the design and planning of enterprise architecture that enables intra-/multi-enterprise collaboration and interoperability. The emphasis is on the alignment between IT and organizational objectives through the integration of business architectures, data and information architecture, application architecture, technology architecture, interfaces and infrastructure. Topics include: frameworks, tools, and methodologies for enterprise architecture design; data and process modeling, application integration, implementation fundamentals, adaptability to changing organizational needs, and managing costs of implementation. Students will conduct case studies and develop architecture plans. Prerequisites: ECT 424 and SE 430

ECT 565
MOBILE ENTERPRISE
Graduate
Mobile enterprise information systems are becoming increasingly complex and consist of existing systems with enabling middleware to achieve end-to-end enterprise mobile solutions. Mobile infrastructure performs content adaptation, data synchronization, bridging corporate and mobile messaging systems and support mobile information portals. The course will discuss web services oriented component architecture and system integration with Adaptive Application Architecture (AAA) with Wireless application gateway (WAG) and Multi-channel Access Gateways (MAG) supporting mobile and wireless access for heterogeneous devices. Such concepts as content distribution, connectivity and security, scalability and load balancing, device management will be discussed. Additional topics include Location-aware applications supporting mobile knowledge workers, business process for value contribution, and investment decisions on mobile technologies. Students will become familiar with mobile enterprise tool suites, mobile messaging delivery platforms, wireless Web portals. Students will be implementing mobile enterprise solution components. PREREQUISITE(S): ECT 455

ECT 582
SECURE ELECTRONIC COMMERCE
Graduate
This course studies security requirements, threat modeling, and appropriate safeguards for e-commerce systems. Major topics include web application security, web service security, and web server security. PREREQUISITE(S): ECT 424 or CSC 435 or TDC 463

ECT 424 is a prerequisite for this class.

ECT 481 is a prerequisite for this class.

CSC 401 (or IT 411 or ECT 410 or ECT 436) is a prerequisite for this class.

ECT 424 and SE 430 are prerequisites for this class.

ECT 455 is a prerequisite for this class.

ECT 424 OR CSC 435 OR TDC 463 is a prerequisite for this class.
ECT 583
ADVANCED SCRIPTING TECHNOLOGIES
Graduate
This course focuses on applying advanced scripting technologies in the design and development of large Web applications. Major topics include tiered application design, transacted Web applications, components, and Web services. Prerequisites: CSC 401 or IT 411 or ECT 410 or ECT 436

ECT 584
WEB DATA MINING
Graduate
An in-depth study of the knowledge discovery process and its applications in Web mining, Web analytics and business intelligence. The course provides coverage of various aspects of data collection and preprocessing, as well as basic data mining techniques for segmentation, classification, predictive modeling, association analysis, and sequential pattern discovery. The primary focus of the course is the application of these techniques to Web analytics, user behavior modeling, e-metrics for business intelligence, Web personalization and recommender systems. Also addressed are privacy and ethical issues related to Web data mining. Students can choose from three types of final course projects: implementation projects, research papers, or data analysis projects. Throughout the course, the students will learn and use a variety of data mining tools to analyze sample data sets as part of class assignments. PREREQUISITE(S): IT 403 AND (CSC 451 or CSC 453 or CSC 455)

ECT 586
CUSTOMER RELATIONSHIP MANAGEMENT TECHNOLOGIES
Graduate
An in-depth study of customer relationship management (CRM) technologies and applications. The special focus will be on the application of CRM technologies for managing the customer lifecycle across Internet and offline channels. Topics include customer identification, data integration, personalization technologies, web and email interaction techniques; sales force automation applications; call centers, field service and logistics applications; customer self-service and customer knowledge management technologies. Students will review and compare specific eCRM technologies and develop an Internet customer interaction system to support an eCRM strategy in group project. PREREQUISITE(S): ECT 424

ECT 587
MOBILE COMMERCE TECHNOLOGY
Graduate
This course examines leading wireless and mobile technologies for consumer and enterprise mobile commerce. This course discusses how mobile technologies have changed the business community with an emphasis on major mobile platforms. Major topics include analysis and design of business applications in a mobile environment, and wireless user interface design. Students will develop mobile applications using a prominent mobile technology. PREREQUISITE(S): CSC 401 or IT 411 or ECT 410 or ECT 436 or ECT 455

ECT 589
E-BUSINESS STRATEGIES
Graduate
Designed for ECT majors and IS majors in ECT concentration, this course focuses on the deployment of Internet and enterprise technologies to support organization's e-business initiatives and collaborative commerce. Conducted in the format of seminar, case analysis, and dialogue with industry practitioners, this course requires students to actively participate in the study of models and approaches for e-business technology implementation and transformation. Topics include: the impact of Internet on industry structure and organizational transformation, enterprise application architecture, planning and implementation of technology and process to support an increasingly collaborative and integrated environment for e-commerce. Students have to complete an organization case study of e-business technology implementation to fulfill the requirement of this capstone course. This course should be taken at the conclusion of the ECT program. PREREQUISITE(S): Completion of ten or more School of Computing MS level courses is required.

ECT 596
TOPICS IN E-COMMERCE TECHNOLOGY
Graduate
Independent study form required. PREREQUISITE(S): Consent of instructor.
ECT 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. Students may register for this course no more than twice. PREREQUISITE(S): Consent of the instructor. (variable credit)

ECT 696
MASTER'S PROJECT
Graduate
Four credit hours. Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. (PREREQUISITE(S): Consent of advisor).

ECT 698
MASTER'S THESIS
Graduate
(2 credit hours) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. Independent study form required. PREREQUISITE(S): Consent of advisor. (2 quarter hours)

EDU 25
BASIC TECHNOLOGY LITERACY
Undergraduate
This online course provides students with a knowledge about assembling, using, and troubleshooting basic technology hardware and software. In this course, students demonstrate understanding of basic computer setup and the use of peripheral devices such as printers, speakers, flash drives, scanners, digital cameras, videos, and computer software. (0 credit hours)

EDU 95
CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH
Undergraduate
Required of all students. Observations and participatory experience with children and youth in a school or agency. This course is a prerequisite for student teaching and related professional courses. (0 credit hours)

EDU 100
INTEGRATIVE KNOWLEDGE E-PORTFOLIO
Undergraduate
This course provides an introduction to the Digication e-portfolio platform and the development of integrative knowledge e-portfolios. Prerequisite: Permission of instructor. (0 credit hours)

EDU 115
CRITICAL THINKING AND LEARNING STRATEGIES
Undergraduate
This 2 quarter hour course is designed to develop a learning community for transfer students and/or students who desire to advance academic skills and knowledge through professional writing, metacognitive study strategies, critical thinking and reading, and research and technology. (2 credit hours)

EDU 125
THE SCIENCE OF HUMAN COGNITION
Undergraduate
In this course we will consider traditional and modern practices for measuring human cognition. We will read, think, and talk about these practices from a variety of social and cultural contexts. We will consider the application and value of cognitive neuroscience to the future of this field of study. We will also venture into how, over time, research into human cognition and how people learn has impacted schooling, teaching practices, and political agendas.
EDU 499
LANGUAGE AND LITERACY PRACTICES ACROSS THE ACADEMY
Graduate
This course addresses issues related to the use of English in the Academy, particularly (1) in classrooms where English is not the native language of the instructor or students but is the language of instruction and/or (2) in scholarship written in English by non-native speakers of English. Topics include but are not limited to academic writing, curriculum development, classroom pedagogy, content pedagogical knowledge, globalization and international education, 21st century technologies, and English as a medium of instruction. Registration with permission of instructor only. (0 credit hours)

EE 281
INTRODUCTION TO EDUCATIONAL PRACTICE
Undergraduate
This is the first in a sequence of theory and practice courses that serves to familiarize teaching candidates with the world of elementary. Through observation and participation in schools, self-reflection, independently created assignments, cooperative learning assignments and classroom discussion, candidates will acquire familiarity with schools and classrooms including: social/cultural context, classroom climate, classroom management, curricular coherence, standards-based instruction, and teacher professional beliefs and practices. Written critical reflections and papers serve as initial foundation for the development of teaching philosophies. Required field experiences are integrated into this course.

EE 317
PHYSICAL EDUCATION AND CLASSROOM MANAGEMENT IN THE ELEMENTARY SCHOOL
Undergraduate
The course is designed to promote an understanding of the contribution that Physical Education makes to the elementary school curriculum and the development of the whole child. Lesson planning, instructional delivery, and classroom management will be focused as students engage in 15-20 hours of supervised field experience teaching whole classes of children in local schools.

EE 324
READING/LANGUAGE ARTS IN THE EARLY YEARS
Undergraduate
This course focuses on the curriculum content and sequence, instructional and assessment strategies as well as considerations integral to the creation of authentic, effective emergent literacy environments and engagements for kindergarten through third grade. Theory and practice principles are woven into course assignments and required field experiences designed to observe, teach, and reflect upon instructional decisions made for individual as well as groups of children. Prevailing curricular and instructional models (e.g., code-based, meaning-oriented, balanced) and their histories are compared and contrasted. The influences of development, home language(s) and dialect(s) (especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidate instructional planning and teaching. Case studies and lesson planning facilitate the application of course content.

EE 326
READING/LANGUAGE ARTS IN THE INTERMEDIATE GRADES
Undergraduate
This course extends Emerging Reading and Language Arts to facilitate increased independence in students as strategic readers and competent writers. It focuses on the further development of reading comprehension and writing abilities in the intermediate grades. Emphasis is placed on the complex nature of literacy addressing issues such as content-area literacies, learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Application of course material is facilitated through the design, teaching, and reflection on literacy lesson(s) for intermediate learners in required field experiences.

EE 330
URBAN EDUCATION RESIDENCY
Undergraduate
The Urban Education Residency is designed to enhance students' knowledge and experiences working in urban school settings. Working along professional urban educators, preservice elementary candidates will gain first-hand experience in best pedagogical practices that make teaching and learning culturally relevant in diverse urban elementary classrooms and support students' academic success. Students will build a repertoire of strategies that will enable them to become reflective and effective urban professional educators.

Advanced Teacher Candidate Standing is a prerequisite for this class.
EE 333
TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS
Undergraduate
This course is an introduction to materials, processes for developing, and strategies for mathematical literacy in grades 1-6. Particular attention will be given to the theoretical views about how children learn mathematics, the proper use of manipulative materials, the development of mathematical thinking, e.g., skills in estimation, pattern recognition, or spatial perception; the use of technology, and ways to assess student progress. Daytime clinical hours are required. Note: MAT 111 may be taken as a prerequisite OR it may be taken concurrently with EE 333.

MAT 110, EE 281, and Advanced Teacher Candidate Standing are a prerequisite for this class.

EE 334
ELEMENTARY SCIENCE INQUIRY TEACHING STRATEGIES
Undergraduate
This course is an introduction to instructional strategies for helping students in grades 1-6 become science literate: i.e., to understand the nature of science and its impact on the world. Particular attention will be given to theoretical views about how children learn science and develop scientific process skills, e.g., skills in observing, classifying, collecting and interpreting data and questioning strategies, and ways to assess student progress. Daytime clinical hours are required.

EE 281 and status as an Advanced Teacher Candidate are a prerequisite for this class.

EE 344
ART AND MUSIC IN THE ELEMENTARY SCHOOL
Undergraduate
This course focuses on the arts (visual art, music, drama and dance) as an integral component of teaching and learning in the elementary school curriculum. Students will explore a variety of art forms and disciplines to develop a critical aesthetic and artistic vocabulary. Students learn to help children utilize artistic media in the exploration and expression of thoughts and feelings. Emphasis is placed on design, construction, and implementation, and assessment of authentic conceptual classroom arts activities that integrate the arts with other classroom curricula. Daytime clinical hours (10) are required during this course.

EE 281 and status as an Advanced Teacher Candidate are a prerequisite for this class.

EE 347
CHILDREN'S LITERATURE
Undergraduate
This course familiarizes students with quality children's literature for infancy through young adulthood. Students will select, discuss, critique, and share books appropriate for this age span, focusing primarily on ages 1-6 years. The influences of child development, culture, technology, and education stakeholders (i.e., parents, students, teachers, administrators, and their community) on literature selection are emphasized. Students will develop skills in evaluating books, responding to books, and using literature across the curriculum.

EE 355
METHODS: CONTEMPORARY TEACHING OF SOCIAL STUDIES
Undergraduate
This course is an introduction to an integrated view of social studies for engaged citizenship. Through the study of strategies such as concept formation, historical inquiry, and role-play, and materials, such as primary sources, teacher candidates will apply principles of curricular integration to create curriculum/units that engage elementary learners in the exploration of issues, ideas, and perspectives that impact our world. Daytime clinical hours are required.

EE 281 and status as an Advanced Teacher Candidate are a prerequisite for this class.

EE 356
ASSESSMENT IN THE ELEMENTARY CLASSROOMS
Undergraduate
This course focuses on study, use, and evaluation of assessment practices in diverse, elementary school contexts. Assessment is addressed as part of instructional systems, attending to issues including: the appropriate use of standardized measures, formal and informal classroom assessment, portfolio development, as well as reporting to all stakeholders. This course also emphasizes ways of involving students and parents in assessment processes, how to observe and assess children individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system.

EE 281, SCU 337 and (EE 324, EE 333, EE 334 or EE 355) and status as an Advanced Teacher Candidate is a prerequisite for this class.
EE 384
CAPSTONE IN ELEMENTARY EDUCATION
Undergraduate
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to engage in critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to elementary education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies Program. COREQUISITE(S): EE 385.

EE 385
ELEMENTARY STUDENT TEACHING
Undergraduate
Five school days a week supervised teaching in a cooperating school for a full academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. Application and approval required. Open only to DePaul students. (12 credit hours)

EE 399
INDEPENDENT STUDY IN ELEMENTARY EDUCATION
Undergraduate
Permission of program chair required. (1 credit hour)

ELA A030
ADVANCED WRITING AND WORD PROCESSING
Continuing Education
An advanced-level course in English-as-a-second-language writing. Students learn to write 3-to-5 page compositions including a research paper.

ELA A031
ADVANCED READING AND VOCABULARY DEVELOPMENT
Continuing Education
An advanced-level course in English-as-a-second-language reading. Students build on their reading skills by identifying intended audience, source and tone of a reading, acquire more literary terms, read longer newspaper articles, editorials, plays, and novels.

ELA A032
ADVANCED GRAMMAR
Continuing Education
An advanced-level course in English-as-a-second-language grammar. Students build on the work from previous levels with the future perfect and future perfect progressive tenses, negative and past forms of modals, passive voice, causative verbs, conditionals, and gerunds and infinitives.

ELA A033
ADVANCED SPOKEN ENGLISH AND LISTENING
Continuing Education
An advanced-level course in English-as-a-second-language spoken English. Among other skills, students learn to manage small group discussions, defend positions, speak persuasively, deliver a formal presentation, draw inferences from authentic speech, and takes notes from short lectures.

ELA B040
UNIVERSITY BRIDGE WRITING: SERVICE, RESEARCH AND WRITING
Continuing Education
A university bridge-level course in English-as-a-second-language writing. Students learn to write first-person narrative and a research essay through participation in community service.
ELA B041
UNIVERSITY BRIDGE READING AND VOCABULARY DEVELOPMENT
Continuing Education
A university bridge-level course in English-as-a-second-language reading. Students build on their reading skills by comparing points of view, paraphrasing and outlining ideas, acquiring higher-level literary terms, and read more complex articles, novels, plays, or several short stories.

ELA B042
UNIVERSITY BRIDGE GRAMMAR
Continuing Education
A university bridge-level course in English-as-a-second-language grammar. Students build on the work from previous levels with more complex uses of such structures as auxiliary verbs, noun modifiers, adjective and adverb clauses, and unreal conditionals.

ELA B043
UNIVERSITY BRIDGE SPOKEN ENGLISH AND LISTENING
Continuing Education
A university bridge-level course in English-as-a-second-language spoken English. Students master previous functions at the highest level, such as persuading, negotiating, and debating; deliver formal presentations; demonstrate skill at note taking and comprehending regional dialects.

ELA CP050
UNIVERSITY EXPERIENCE RESEARCH AND WRITING
Continuing Education
University Experience Research and Writing provides non-native speaking students authentic experiences preparing and writing papers using American academic standards and styles. This course teaches students to select and effectively evaluate scholarly sources appropriate to their discipline, to organize their research and to present a thesis logically using American academic styles. Ideally, the course is taken in conjunction with CP052 University Experience Reading or other similar academic English reading course.

ELA CP051
UNIVERSITY EXPERIENCE READING AND SURVEY OF TEXTS
Continuing Education
University Experience Reading & Survey of Texts provides university level reading instruction and prepares non-native speaking students to evaluate and categorize university level texts within their chosen discipline. The course focuses on using reading strategies that maximize reading efficiency and comprehension and is designed specifically for students who are preparing to enroll in university degree programs. The course is an ideal complement to CP050 University Experience Research and Writing.

ELA CP053
UNIVERSITY EXPERIENCE ACADEMIC AND CLASSROOM CULTURE
Continuing Education
University Experience Academic and Classroom Culture prepares non-native speaking students for success in American university classrooms. The course focuses on becoming an effective oral communicator in university environments. Instruction helps students develop effective strategies for note taking, classroom participation, and successful interaction with other students and instructors in a variety of teaching modes that are common in American universities.

ELA CP054
UNIVERSITY EXPERIENCE ADVANCED ENGLISH PRACTICE
Continuing Education
University Experience Advanced English Practice offers students a selection of options that allows them to address individual English language development needs from pronunciation to interviewing skills to advanced topics within their proposed discipline of study. The exact structure of this module is determined by individual student needs and each student works with an ELA advisor to select options that will provide maximum individual language growth. The individual student plan requires approval of the ELA director.

ELA F000
FOUNDATIONS WRITING AND WORD PROCESSING
Continuing Education
A beginning-level course in English-as-a-second-language writing. Students learn basic paragraph structure, topic sentences and how to support them. (Students should have an active vocabulary of 200-400 words in English.)
ELA F001
**FOUNDATIONS READING AND VOCABULARY DEVELOPMENT**
Continuing Education
A beginning-level course in English-as-a-second-language reading. Students practice various reading skills, such as locating the main idea; study vocabulary acquisition; and read ESL specific readings and newspaper articles. (Students should have an active vocabulary of 200-400 words in English.)

ELA F002
**FOUNDATIONS GRAMMAR**
Continuing Education
A beginning-level course in English-as-a-second-language grammar. Students work on basic grammar, such as simple tenses, modals, and articles, as well as nouns, pronouns, adjectives and adverbs. (Students should have an active vocabulary of 200-400 words in English.)

ELA F003
**FOUNDATIONS SPOKEN ENGLISH AND LISTENING**
Continuing Education
A beginning-level course in English-as-a-second-language spoken English. Students learn many basic practical functions, such as asking for and giving opinions and leaving a simple message. (Students should have an active vocabulary of 200-400 words in English.)

ELA H020
**HIGH INTERMEDIATE WRITING AND WORD PROCESSING**
Continuing Education
A high intermediate-level course in English-as-a-second-language writing. Students learn to write academic compositions using specific organizational patterns.

ELA H021
**HIGH INTERMEDIATE READING AND VOCABULARY DEVELOPMENT**
Continuing Education
A high intermediate-level course in English-as-a-second-language reading. Students build on their reading skills by learning the difference between fact and opinion, understanding inferences, acquiring more literary terms, reading newspaper articles, short stories and novels.

ELA H022
**HIGH INTERMEDIATE GRAMMAR**
Continuing Education
A high intermediate-level course in English-as-a-second-language grammar. Students build on the work from previous levels with perfect progressive tenses, adjective clauses, reflexive pronouns, and more advanced modals, adjectives and adverbs.

ELA H023
**HIGH INTERMEDIATE SPOKEN ENGLISH AND LISTENING**
Continuing Education
A high intermediate-level course in English-as-a-second-language spoken English. Students practice such functions as supporting opinions, expressing empathy and compromise, reporting and summarizing; make a presentation; and listen effectively to authentic speech.

ELA I010
**INTERMEDIATE WRITING AND WORD PROCESSING**
Continuing Education
An intermediate-level course in English-as-a-second-language writing. Students begin connecting paragraphs into longer essays.

ELA I011
**INTERMEDIATE READING AND VOCABULARY DEVELOPMENT**
Continuing Education
An intermediate-level course in English-as-a-second-language reading. Students build on the work in the Foundations level and learn to restate the author’s point of view, acquire literary terms, and read stories.
**ELA I012**  
**INTERMEDIATE GRAMMAR**  
Continuing Education  
An intermediate-level course in English-as-a-second-language grammar. Students build on the work in Foundations grammar and learn progressive and past tenses, question formation, noun clauses, and comparative and superlative forms of adjectives and adverbs.

**ELA I013**  
**INTERMEDIATE SPOKEN ENGLISH AND LISTENING**  
Continuing Education  
An intermediate-level course in English-as-a-second-language spoken English. Students practice such functions as giving advice, apologizing, complaining, asking for explanations and make a simple presentation.

**ELA T200**  
**GRAMMAR FOR TOEFL WRITING**  
Continuing Education  
An English-as-a-second-language course that reinforces and reviews the grammar skills necessary to excel on the Writing portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as in future academic pursuits.

**ELA T201**  
**TOEFL READING AND READING LAB**  
Continuing Education  
An English-as-a-second-language course that prepares students for the Reading portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice reading strategies and the variety of reading skills tested on the TOEFL iBT. In addition, students expand their academic vocabulary and knowledge of word roots. Moreover, students get valuable exposure to the testing lab environment by doing practice computerized tests in this skill area.

**ELA T202**  
**TOEFL WRITING AND INTEGRATED SKILLS**  
Continuing Education  
An English-as-a-second-language course that prepares students for the Writing and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the writing skills necessary to produce the high-quality essays required during the writing portion of the test. They also practice and learn the skills necessary to synthesize and summarize information in a written format, as required in the Integrated Skills portion of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional practice writing and integrated skills computerized tests in this skill area.

**ELA T203**  
**TOEFL SPEAKING AND INTEGRATED SKILLS**  
Continuing Education  
An English-as-a-second-language course that prepares students for the Speaking and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the speaking skills and strategies which must be applied during the Integrated Skills portion of the test. Students also practice useful idioms that can be applied in both the listening and speaking portions of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional integrated skills computerized tests in this skill area.

**ELA T204**  
**TOEFL PRACTICE TESTS**  
Continuing Education  
An English-as-a-second-language lab that allows students to apply the skills they have been learning and check their progress in a timed, self-testing environment.

**ELA T205**  
**TOEFL LISTENING AND LISTENING LAB**  
Continuing Education  
An English-as-a-second-language course that prepares students for the listening portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as for future academic study. Students learn and practice the listening skills and strategies which must be applied during the listening portion of the test. Moreover, students get valuable exposure to the testing lab environment through computerized practice tests in this skill area.
ELA 100
PRONUNCIATION WORKSHOP: A COURSE IN ACCENT REDUCTION
Continuing Education
An English-as-a-second-language course designed to help students improve their pronunciation.

ELA 101
TOEFL (TEST OF ENGLISH AS FOREIGN LANGUAGE) PREPARATION
Continuing Education
An English-as-a-second-language course designed to help students prepare for the TOEFL (Test of English as a Foreign Language).

ELA 102
GMAT/ MBA (GRADUATE MANAGEMENT ADMISSION TEST/ MASTERS IN BUSINESS ADMINISTRATION) PREPARATION
Continuing Education
An English-as-a-second-language course designed to help students prepare for the GMAT (Graduate Management Admissions Test).

ELA 109
VOCABULARY DEVELOPMENT FOR NON-NATIVE SPEAKERS OF ENGLISH
Continuing Education
This class is designed to expand students' vocabulary by reinforcing ability to use vocabulary accurately, by use of new vocabulary-learning skills, and by acquisition of word decoding skills and strategies. Students will be introduced to approximately 25-40 new words per class. (Students in this class should have at least high intermediate proficiency in English.)

ELA 110
TALKING BUSINESS
Continuing Education
Talking Business is an intensive course for non-native English speakers preparing for business school or expanding their careers in the business world. The course will focus on improving students' vocabulary, knowledge of key concepts in business and economics, and listening and speaking skills related to those concepts. Each day, students will have the opportunity to read and listen to authentic materials as well as to engage in lively, informative discussion.

ELA 120
ELA ORIENTATION AND NEW STUDENT REGISTRATION
Continuing Education
New ELA students enroll in ELA 120 to reserve a place in a coming term. Only new students enroll in ELA 120.

ELA 130
CONTINUING STUDENT REGISTRATION
Continuing Education
Students wishing to continue enrollment at ELA select ELA 130. Only continuing students enroll in ELA 130.

ELA 300
ELA TOPICS
Continuing Education
Special courses and workshops offered by the English Language Academy.

ELA 301
SIT TESOL PROGRAM
Continuing Education
A 130-hour TESOL/TEFL certificate course during which students learn how to teach English-as-a-Second-Language, including 36 hours of practice teaching with ESL students. Taught by the School for International Training at DePaul's English Language Academy.
ELA 302
DECEMBER INTERSESSION TOPICS
Continuing Education
December Inter session Topics is an intensive course that seeks to develop the academic English skills of English-language students through exploration of current, controversial or topical matters that change from term to term.

ELA 305
SUMMER LANGUAGE AND CULTURE
Continuing Education
Summer Language and Culture a 4-week non-credit language and culture program that builds students' English language skills through in-class and experiential study of American culture and intercultural communication. The course also includes weekly excursions in the City of Chicago.

ENG 101
INTRODUCTION TO LITERATURE
Undergraduate
This course introduces students to the art of literary analysis. Through reading novels, stories, plays, and poems, students will develop the skills needed to gain a deeper appreciation of literature. Students will learn about the choices authors make to convey meaning, and will practice reading closely and deeply in order to understand the nuances of literary language. Each section of this course will focus on a specific theme (e.g. "Heroes and Villains," "Passion and Betrayal," "Coming of Age," etc.), and different sections will focus on different literary genres; please see the schedule for current offerings. This course is not repeatable.

ENG 120
READING LITERATURE
Undergraduate
Study of the elements and construction of literary texts, of the vocabulary of literary criticism, and of various literary modes and genres.

ENG 130
THEMES IN LITERATURE
Undergraduate
Introduction to the study of literature through selected literary texts focused on a particular theme. Variable topics. May not be repeated.

ENG 201
INTRODUCTION TO CREATIVE WRITING
Undergraduate
This course provides an introduction to the art of writing poetry, short stories, and creative nonfiction. Students will study the work of published authors in order to learn about craft elements, techniques, language usage, and literary forms before composing and revising original poems, stories, and essays of their own.

ENG 205
LITERATURE TO 1700
Undergraduate
This course will provide a general overview of literature written primarily in English up to 1700, with a focus on medieval and Renaissance literature. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include generic emulation and adaptation, literary nationalism, the relationship between oral and written culture and popular and elite literature, the emergence of popular theater, the development of English as a language suitable for literary composition, gender and sexuality, and the historical importance accorded to same sex friendship. Authors studied might include Virgil, Geoffrey Chaucer, Margery Kempe, Sir Thomas Malory, Christopher Marlowe, William Shakespeare, Sir Philip Sidney, John Donne, George Herbert, Margaret Cavendish, and John Milton, as well as anonymous epics and morality plays, such as Beowulf and Everyman.
ENG 206
LITERATURE FROM 1700 TO 1900
Undergraduate
This course will provide a general overview of literature written primarily in English between 1700 and 1900. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include the rise of the novel; 18th-century satire; Gothic literature; Romanticism; Transcendentalism; literary responses to the American Revolution, the American Civil War, the Industrial Revolution, and the expansion of the British empire; slavery and abolition; women, domesticity, and early feminism; the Victorian novel; and the Fin de Siecle. Authors studied might include Daniel Defoe, Jonathan Swift, Benjamin Franklin, Jane Austen, Mary Shelley, John Keats, Frederick Douglass, Ralph Waldo Emerson, Nathaniel Hawthorne, Emily Dickinson, Mark Twain, Walt Whitman, Charlotte and Emily Bronte, Charles Dickens, and Oscar Wilde.

ENG 207
LITERATURE FROM 1900 TO THE PRESENT
Undergraduate
This course will provide a general overview of literature written primarily in English between 1900 and the present. The course will focus on major literary movements and developments, and will situate important literary texts in their historical contexts. Topics might include modernism and postmodernism; divisions between mass and high culture; literary responses to the World Wars, the feminist and civil rights movements, and immigration; and post-colonial literatures. Authors studied might include W. B. Yeats, T. S. Eliot, James Joyce, Virginia Woolf, Ernest Hemingway, Ralph Ellison, William Faulkner, Jean Rhys, Samuel Beckett, Tennessee Williams, Toni Morrison, Salman Rushdie, Derek Walcott, Wole Soyinka, and Zadie Smith.

ENG 209
TOPICS IN WRITING
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 211
GRAMMAR AND STYLE
Undergraduate
An introduction to elements of the linguistic structure of English as they are employed to create stylistic effects in writing. The course aims at clarifying ways that language can affect audiences' perceptions and responses to writing.

ENG 216
CREATING CHARACTERS
Undergraduate
This cross-genre course—open to students interested in fiction, journalism, screenwriting, playwriting, animation, and game design—will introduce students to the tools writers use for making fictional characters and real people come alive on the page. In addition to studying the ways in which detail, setting, point of view and dialogue affect character, students will learn the art of the interview and the craft of writing nonfiction profiles. Participants will also gain basic skills in reading and responding to other students' stories in a workshop setting.

ENG 218
READING AND WRITING FICTION FOR NON-MAJORS
Undergraduate
An introduction to the art of fiction through analysis and criticism of fiction by established writers and through writing and revising the student's own stories.

ENG 219
READING AND WRITING POETRY FOR NON-MAJORS
Undergraduate
An introduction to the art of poetry through analysis and criticism of poems by established poets and through writing and revising the student's own poems.

ENG 220
READING POETRY
Undergraduate
Introduction to poetry, poetic forms and meters, and the vocabulary of poetic study.
ENG 221
READING PROSE
Undergraduate
An introduction to close analytical reading of the fundamental prose genres that students will encounter in the English major, including short stories, novels, literary nonfiction, and criticism.

ENG 227
STUDIES IN DRAMA
Undergraduate
Introduction to the appreciation and analysis of drama as a cultural form, with attention to both text and performance. Readings vary, including plays from different dramatic genres, historical periods, and cultures.

ENG 228
INTRODUCING SHAKESPEARE
Undergraduate
Introduction to the basic structures and conventions of representative plays by William Shakespeare, emphasizing film and stage interpretations. May not be taken by students who have completed ENG 328.

ENG 231
THE GOTHIC
Undergraduate
Introduction to Gothic narratives. Emphasis on characteristics of Gothic narratives and methods of interpreting the Gothic. Variable emphasis on particular genres or historical periods. (See schedule for current offerings.)

ENG 232
THE ROMANCE
Undergraduate
Introduction to the genre of the romance. Emphasis on characteristics of the genre in particular historical moments. Variable emphasis on particular historical periods or topics. (See schedule for current offerings.)

ENG 235
SCIENCE FICTION
Undergraduate
Introduction to science fiction as a literary genre. Variable topics, including history of the genre, multi-media adaptations, cyberpunk, global variants.

ENG 245
THE BRITISH NOVEL
Undergraduate
Studies in the British novel. Variable emphasis on particular historical periods or topics from 1700 to present.

ENG 250
GREAT WRITERS
Undergraduate
Introduction to the works of one or more writers of classic or influential literary texts. Authors vary; please see schedule for current offerings. This course is not repeatable.

ENG 265
THE AMERICAN NOVEL
Undergraduate
Studies in the American novel. Variable emphasis on the historical development, regional expression, multicultural scope, ethical engagement, and/or recurring thematic concerns of the genre.
ENG 268
LITERATURE ACROSS CULTURES
Undergraduate
Readings in literature by writers from various ethnic backgrounds. Works may be by American minority authors or by authors writing in English from outside Britain and the U.S. This course takes a comparative approach to studying concepts of ethnicity and identity in literature drawn from several ethnic traditions. Variable emphasis on different groups, genres, themes, or historical periods. See schedule for current offerings. This course is not repeatable.

ENG 271
AFRICAN AMERICAN LITERATURE (DT)
Undergraduate
Introduction to works of poetry, fiction, nonfiction, and/or drama by African-American authors.

ENG 272
LITERATURE AND IDENTITY
Undergraduate
Studies in the literary expression and representation of identity. Variable emphasis on different groups, genres, themes, or historical periods. (See schedule for current offerings.) This course is not repeatable.

ENG 273
GLOBAL ASIAN LITERATURE
Undergraduate
Introduction to selected authors, genres, and topics in Asian American or Asian diasporic literature from the mid-nineteenth century to the present. Variable emphasis on different groups, genres, or historical periods.

ENG 275
LITERATURE AND FILM
Undergraduate
Introduction to the comparative study of literature and film. Emphasis on construction of narrative, development of character, point-of-view, and adaptation across genres and mediums. (See schedule for current offerings.) This course is not repeatable.

ENG 276
LATINO/A LITERATURE
Undergraduate
Introduction to works of poetry, fiction, nonfiction, and/or drama by Latino/a authors.

ENG 279
STUDIES IN LITERATURE
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 280
THE EPIC
Undergraduate
Introduction to the appreciation and analysis of epic as a cultural form, with attention to the genre in both its oral and written forms. Special consideration will be given to issues of gender, sexuality, and politics. Texts discussed will span a range of cultures and historical periods. Readings will vary, but may include translations of Homer and Virgil, as well epics by Milton, Margaret Atwood and Derek Walcott.

ENG 281
LITERARY CLASSICS
Undergraduate
This course focuses on great works of literature that are widely considered to be classics. Works studied might range from Greek drama up through modern American novels, by authors such as Shakespeare, Dante, Austen, Tolstoy, Goethe, Bronte, Dostoevsky, Hemingway, Yeats, Virginia Woolf, or Toni Morrison. Variable emphasis on different authors, texts, themes, and historical periods. See schedule for current offerings. This course is not repeatable.
ENG 283
GENDER IN LITERATURE
Undergraduate
Studies in representations of gender in literature. Variable emphasis on different groups, genres, themes, or historical periods. See schedule for current offerings. This course is not repeatable.

ENG 284
THE BIBLE AS LITERATURE
Undergraduate
Introduction to the major stories, genres (e.g., poems, parables, prophecies) and intra-textual echoes of the Bible.

ENG 285
LGBTQ LITERATURE
Undergraduate
Studies in representations of queer identities, sexualities, and communities by LGBTQ authors. Variable emphasis on different groups, genres, themes, or historical periods. See schedule for current offerings. This course is not repeatable.

ENG 286
TOPICS IN POPULAR LITERATURE
Undergraduate
Studies in the forms and functions of popular fiction. Variable emphasis. (See schedule for current offerings.) This course is not repeatable.

ENG 288
AUTOBIOGRAPHY AND BIOGRAPHY
Undergraduate
Introduction to the forms, functions, problems and purposes of life-writing.

ENG 290
THE CRAFT OF CREATIVE NONFICTION WRITING
Undergraduate
Writing and analyzing creative nonfiction. May be taken twice. May not be taken pass/fail.

ENG 291
THE CRAFT OF FICTION WRITING
Undergraduate
Writing and analyzing short prose fiction. May be taken twice. May not be taken pass/fail.

ENG 292
THE CRAFT OF POETRY WRITING
Undergraduate
Writing and analyzing poems. May be taken twice. May not be taken pass/fail.

ENG 299
CAREERS FOR ENGLISH MAJORS
Undergraduate
An introduction to the many careers available to English majors. The course will use literary and contemporary work-related readings along with guest speakers to help students explore their options and develop a unique career path.
ENG 300
COMPOSITION AND STYLE
Undergraduate
Advanced instruction in invention, arrangement, and style, toward developing clear and effective prose styles.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 305
LITERARY MAGAZINES
Undergraduate
This course examines the literary magazine--exploring the missions, personalities, processes, histories, and aesthetics of print and/or online journals and little magazines publishing work by poets and creative prose writers. Variable emphasis. (See schedule for current offerings.)

ENG 201 or instructor permission is a prerequisite for this class.

ENG 306
ADVANCED CREATIVE NONFICTION WRITING
Undergraduate
Writing and analyzing creative nonfiction, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 307
ADVANCED FICTION WRITING
Undergraduate
Writing and analyzing short prose fiction, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 308
ADVANCED POETRY WRITING
Undergraduate
Writing and analyzing poems, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 309
ADVANCED TOPICS IN WRITING
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 201 is a prerequisite for this class.

ENG 310
ENGLISH LITERATURE TO 1500
Undergraduate
Survey of English literature from the beginnings to 1500.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 311
CHAUCER
Undergraduate
Study of selected poetry and prose by Geoffrey Chaucer.

ENG 220 or (ENG 205 and ENG 101 or HON 101) is a prerequisite for this class.
ENG 319
TOPICS IN MEDIEVAL LITERATURE
Undergraduate
See schedule for current offerings. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 320
ENGLISH RENAISSANCE LITERATURE
Undergraduate
Survey of English literature from 1500 to 1660.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 327
MILTON
Undergraduate
Study of selected poetry and prose by John Milton.

ENG 220 or (ENG 101 or HON 101) is a prerequisite for this class.

ENG 328
STUDIES IN SHAKESPEARE
Undergraduate
Study of selected plays and poetry of William Shakespeare in relation to early modern English culture. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 329
TOPICS IN RENAISSANCE LITERATURE
Undergraduate
See schedule for current offerings. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 205 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 330
RESTORATION AND 18TH-CENTURY LITERATURE
Undergraduate
Survey of British literature from 1660 to 1780.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 332
MAJOR AUTHORS BEFORE 1800
Undergraduate
Study of one or two major authors whose works were published before 1800. This course is repeatable with different authors. (See schedule for current offerings.)

ENG 220 or (ENG 101 or HON 101) is a prerequisite for this class.

ENG 335
TOPICS IN EARLY AMERICAN LITERATURE
Undergraduate
Selected authors, genres and topics in American literature written before 1800. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) are prerequisites for this class.
ENG 339
TOPICS IN RESTORATION AND 18TH CENTURY BRITISH LITERATURE
Undergraduate
Selected authors, genres and topics in British Literature, 1660-1780. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 340
19TH-CENTURY BRITISH LITERATURE
Undergraduate
Survey of British literature from 1780 to 1900.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 342
MAJOR AUTHORS 1800-1900
Undergraduate
Study of one or two major authors whose works were published between 1800 and 1900. This course is repeatable with different authors.
(See schedule for current offerings.)

ENG 220 (or ENG 221 or ENG 101 or HON 101) is a prerequisite for this class.

ENG 345
TOPICS IN 19TH-CENTURY AMERICAN LITERATURE
Undergraduate
Selected authors, genres and topics in nineteenth-century American literature. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) are prerequisites for this class.

ENG 346
19TH-CENTURY IRISH LITERATURE
Undergraduate
This course focuses on some of the important works of nineteenth-century Irish literature. It sees them as engaging with the often traumatic political and social changes of their time.

ENG 348
TOPICS IN 19TH-CENTURY LITERATURE
Undergraduate
Selected authors, genres, and topics in 19th-century literature. This course is repeatable with different topics.

ENG 101 (or HON 101) and ENG 206 are prerequisites for this class.

ENG 349
TOPICS IN 19TH-CENTURY BRITISH LITERATURE
Undergraduate
Selected authors, genres and topics in British literature, 1780 - 1900. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

ENG 350
MODERN BRITISH LITERATURE
Undergraduate
Survey of British literature in the twentieth century.

(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.
ENG 351
POSTCOLONIAL LITERATURE
Undergraduate
This course explores the cultural legacy of colonialism and imperialism through literature. Variable emphasis on different authors and national traditions. See schedule for current offerings. This course is repeatable with different topics.

ENG 352
GLOBAL ENGLISH LITERATURE
Undergraduate
Study of literature written in English from outside Britain, Ireland, and the U.S. Variable emphasis on different authors, national traditions, ethnic backgrounds, or historical periods. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 353
TOPICS IN GLOBAL ASIAN LITERATURE
Undergraduate
Selected authors, genres, and topics in Asian-American or Asian diasporic literature. See schedule for current offerings. This course is repeatable with different topics.

ENG 354
THE IRISH REVIVAL
Undergraduate
The course invites a study of the cultural ferment of the decades from the 1890's to the 1920's in Ireland. Particular attention will be given to an introduction to the work of canonical writers such as Yeats and Joyce who emerged from it.

ENG 355
MODERN IRISH LITERATURE
Undergraduate
This course provides an introduction to Irish literature, including some poems in the Irish language with English translations on facing pages, written from the Literary Revival to the late twentieth century. It emphasizes the transitions from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

ENG 357
TOPICS IN IRISH STUDIES
Undergraduate
Selected authors, genres, and topics in Irish literature and culture. This course is repeatable with different topics.

ENG 358
TOPICS IN 20TH-CENTURY LITERATURE
Undergraduate
Selected authors, genres, and topics in 20th-century literature. This course is repeatable with different topics.

ENG 359
TOPICS IN MODERN BRITISH LITERATURE
Undergraduate
Selected authors, genres, and topics in twentieth-century British literature. This course is repeatable with different topics.

ENG 360
AMERICAN LITERATURE TO 1830
Undergraduate
Survey of American literature from the beginnings to 1830.

ENG 101 (or HON 101) and ENG 207 are prerequisites for this class.

(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) or (THE 204, THE 205 and THE 206) are prerequisites for this class.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (AMS 200 or AMS 211 or AMS 213 or AMS 215) are prerequisites for this class.
ENG 361
AMERICAN LITERATURE 1830 TO 1865
Undergraduate
Survey of American literature from 1830 to 1865.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (AMS 200 or AMS 211 or AMS 213 or AMS 215) are prerequisites for this class.

ENG 362
AMERICAN LITERATURE FROM 1865 TO 1920
Undergraduate
Survey of American literature from 1865 to 1920.

(ENG 220 and ENG 221) or (ENG 206 and ENG 101 or HON 101) or (AMS 200 or AMS 211 or AMS 213 or AMS 215) are prerequisites for this class.

ENG 363
AMERICAN LITERATURE SINCE 1920
Undergraduate
This survey focuses on twentieth- and twenty-first century American literary works, authors, and movements. Coverage will explore several genres, and expose students to the diversity of some major American literary movements and authors since high modernism.

(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) or (AMS 200 or AMS 211 or AMS 213 or AMS 215) are prerequisites for this class.

ENG 364
TOPICS IN GENRE STUDIES
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 365
TOPICS IN 20TH-CENTURY FICTION
Undergraduate
Selected authors, genres, and topics in 20th-century American literature. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 207 and ENG 101 or HON 101) are prerequisites for this class.

ENG 366
STUDIES IN POETRY
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 220 or (ENG 101 or HON 101) is a prerequisite for this class.

ENG 367
TOPICS IN AMERICAN STUDIES
Undergraduate
Selected authors, genres, and topics in American literature and culture. This course is repeatable with different topics.

ENG 368
STUDIES IN LITERATURE ACROSS CULTURES
Undergraduate
Selected authors, genres, and topics in literature by writers from various ethnic backgrounds. Works may be by American minority authors or by authors writing in English from outside Britain and the U.S. This course takes a comparative approach to studying concepts of ethnicity and identity in literature drawn from several ethnic traditions. This course is repeatable with different topics.
ENG 369
TOPICS IN AMERICAN LITERATURE
Undergraduate
See schedule for current offerings. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) or (AMS 200 or AMS 211 or AMS 213 or AMS 215) are prerequisites for this class.

ENG 370
HISTORY OF THE ENGLISH LANGUAGE
Undergraduate
Examination of the development of vocabulary and structure of English from its beginnings to contemporary British and American English usage.

ENG 371
TOPICS IN AFRICAN AMERICAN LITERATURE (DT)
Undergraduate
Selected authors, genres, and topics in African American literature. See schedule for current offerings.

ENG 373
MULTIETHNIC LITERATURE OF THE U.S.
Undergraduate
Readings in recent literature, primarily fiction, by American writers of various ethnic backgrounds, exploring the evolving concept of ethnicity in literature.

ENG 374
NATIVE LITERATURE (DT)
Undergraduate
This course provides an introduction to a wide range of Native and First Nations literature. Students will read a selection of work, including some early contact and expansion texts, but will focus on the prose and poetry of mid-to-late 20th century and contemporary writers. Students will examine, compare and contrast the ways in which Native literary writing approaches agendas and ideas such as personal and community identity; racial and cultural stereotypes; social and cultural obligations and duties; self-expression and humor as acts of survival; re-appropriation and redefinition; and encounters with a dominant culture.

ENG 375
STUDIES IN SHORT FICTION
Undergraduate
The development of European, English, and American short fiction.

ENG 101 (or HON 101) is a prerequisite for this class.

ENG 376
CREATIVE WRITING AND SOCIAL ENGAGEMENT
Undergraduate
Study and practice of creative writing in the contexts of community service. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 377
TOPICS IN EDITING AND PUBLISHING
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 378
LITERATURE AND SOCIAL ENGAGEMENT
Undergraduate
Study of selected literary works in the contexts of community service. See schedule for current offerings. This course is repeatable with different topics.
ENG 379
TOPICS IN LITERATURE
Undergraduate
See schedule for current offerings. This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 380
MASTERPIECES OF WORLD LITERATURE
Undergraduate
Selected works in translation from Classical Antiquity to the present. Variable emphasis. (See schedule for current offerings.)

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 381
LITERARY THEORY
Undergraduate
Study of the major approaches to analyzing literature, including formalist, historicist, psychoanalytic, post-structuralist, and feminist readings.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) or instructor permission are prerequisites for this class.

ENG 382
MAJOR AUTHORS
Undergraduate
Study of one or two major writers. This course is repeatable with different authors. (See schedule for current offerings.)

ENG 383
WOMEN AND LITERATURE
Undergraduate
Study of literature by women, with attention to the traditions of women's literature, historical and theoretical perspectives on women as writers and readers, and issues of feminist literary history and criticism.

ENG 384
TOPICS IN LATINO/A LITERATURE
Undergraduate
Selected authors, genres, and topics in Latino/a literature. See schedule for current offerings.

ENG 385
TOPICS IN LGBTQ LITERATURE
Undergraduate
Selected authors, genres, and topics in LGBTQ literature. See schedule for current offerings. This course is repeatable with different topics.

ENG 386
POPULAR LITERATURE
Undergraduate
Studies in selected forms of popular literature. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

ENG 387
TOPICS IN CONTEMPORARY LITERATURE
Undergraduate
Study of selected late twentieth- and twenty-first century literary works, authors, and movements. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.
ENG 388
TOPICS IN TRANS ATLANTIC LITERATURE
Undergraduate
Study of transatlantic or circum-atlantic literary production and consumption. Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 389
TOPICS IN COMPARATIVE LITERATURE
Undergraduate
See schedule for current offerings. This course is repeatable with different topics.

ENG 390
SENIOR CAPSTONE SEMINAR
Undergraduate
Variable emphasis. See schedule for current offerings. This course is not repeatable.

Senior Status and (ENG 220 and ENG 221) or (ENG 101 or HON 101 and ENG 205 and ENG 206 and ENG 207) are prerequisites for this class.

ENG 391
TEACHING ENGLISH
Undergraduate
Strategies for teaching composition, literature, and language skills to secondary-school students.

(ENG 220 and ENG 221) or (ENG 101 or HON 101) are prerequisites for this class.

ENG 392
INTERNSHIP
Undergraduate
Internship in such fields as writing, editing, and publishing supplemented by readings and assignments.

Junior standing or above and permission of the internship coordinator are a prerequisite for this class.

ENG 397
NEWBERRY LIBRARY SEMINAR
Undergraduate
Newberry Library Seminar

ENG 398
LITERARY AND CULTURAL HERITAGE
Undergraduate
Study tours - locations, topics, fees, and credit vary.

ENG 399
INDEPENDENT STUDY
Undergraduate
Written permission of supervising faculty member and of department chair required before registration.

ENG 400
STRUCTURE OF MODERN ENGLISH
Graduate
A systematic outline of modern English from both traditional and contemporary linguistic perspectives. Examines descriptive grammars, word and phrase structure, syntax and semantics, and formal issues of style and rhetoric. Formerly ENG 416.
ENG 401
HISTORY OF THE ENGLISH LANGUAGE
Graduate
A systematic study of the nature, history and usage of the English language. The course traces the language from its origin to its present status in England and America.

ENG 402
HISTORY OF ENGLISH PROSE STYLE
Graduate
A survey of alternative theoretical approaches to the study of style, followed by intensive study of changes in the conventions of English prose from the Renaissance to the present.

ENG 407
LANGUAGE AND STYLE FOR WRITERS
Graduate
A comprehensive examination of structural elements and stylistic devices that experienced writers use across a number of creative and professional genres. Topics include components of style, sentence rhythm and prosody, diction choices, rhetorical punctuation, and the development of one's personal writing voice.

ENG 408
STYLISTICS
Graduate
Theory and practice in examining features of prose style, including linguistic, rhetorical and literary perspectives on style.

ENG 411
CHAUCER
Graduate
Chaucer's works in context of his milieu.

ENG 412
STUDIES IN ARTHURIAN LITERATURE
Graduate
Geoffrey of Monmouth, Wace, Layamon and Malory.

ENG 413
STUDIES IN MEDIEVAL LITERARY FORMS
Graduate
Alternating emphasis on poetic, narrative and dramatic genres of the 14th and 15th centuries.

ENG 419
TOPICS IN MEDIEVAL LITERATURE
Graduate
See schedule for current offering.

ENG 421
STUDIES IN ENGLISH RENAISSANCE PROSE
Graduate
Major prose works, including More's Utopia, Sidney's Apology for Poetry, Bacon's Essays, and Milton's Areopagitica.

ENG 422
STUDIES IN ENGLISH RENAISSANCE POETRY
Graduate
Alternating emphasis on the English epic, the 16th-century lyric, and the 17th-century lyric.
ENG 423  
STUDIES IN ENGLISH RENAISSANCE DRAMA  
Graduate  
Tudor-Stuart drama, including works by Kyd, Marlowe, Jonson, Webster and Ford.

ENG 426  
THE ESSAY: HISTORY, THEORY, PRACTICE  
Graduate  
Explores the history of the essay as genre from the Renaissance to the present, compares and contrasts literary essays with those written in most school settings, and offers students the opportunity to write their own extended essays on personal and professional topics. Formerly ENG 488.

ENG 427  
MILTON  
Graduate  
Major poems and selected prose.

ENG 428  
STUDIES IN SHAKESPEARE  
Graduate  
Study of selected plays through various critical and scholarly perspectives.

ENG 429  
TOPICS IN RENAISSANCE LITERATURE  
Graduate  
See schedule for current offering.

ENG 431  
STUDIES IN THE EIGHTEENTH CENTURY NOVEL  
Graduate  
Representative English prose fiction, including Defoe, Richardson, Fielding, Sterne and the Gothic novel.

ENG 432  
STUDIES IN RESTORATION AND 18TH CENTURY DRAMA  
Graduate  
Studies in the comedy of manners, sentimental comedy, heroic drama, and bourgeois tragedy.

ENG 434  
STUDIES IN RESTORATION AND EIGHTEENTH CENTURY AUTHORS  
Graduate  
Alternating emphasis on, for example, Dryden, Pope, Swift, Johnson or other authors.

ENG 439  
TOPICS IN RESTORATION AND EIGHTEENTH CENTURY LITERATURE  
Graduate  
See schedule for current offerings.

ENG 441  
STUDIES IN ENGLISH ROMANTIC PROSE  
Graduate  
Major Romantic nonfiction prose writers, including Burke, Coleridge, Hazlitt, DeQuincey and Lamb.
ENG 442
STUDIES IN ENGLISH ROMANTIC POETRY
Graduate
Alternating emphasis on major Romantic poets, including Blake, Wordsworth, Coleridge, Byron, Shelley and Keats.

ENG 443
STUDIES IN VICTORIAN PROSE
Graduate
Major Victorian nonfiction prose writers, including Carlyle, Newman, Ruskin, Mill, Arnold and Pater.

ENG 444
STUDIES IN VICTORIAN POETRY
Graduate
Major Victorian poets, including Tennyson, Browning and Arnold.

ENG 445
STUDIES IN 19TH CENTURY BRITISH FICTION
Graduate
Alternating emphasis on major novelists including Dickens, Thackeray, the Brontes, Eliot, Trollope and Hardy.

ENG 446
NINETEENTH CENTURY IRISH LITERATURE
Graduate
This course surveys a broad range of literature from nineteenth-century Ireland. It reads literature within the social and historical context of its day; in terms of the formation of individual, social and national identities; and within today's debate about Ireland's status at the time.

ENG 449
TOPICS IN 19TH CENTURY BRITISH LITERATURE
Graduate
See schedule for current offering.

ENG 451
STUDIES IN THE MODERN BRITISH NOVEL
Graduate
Alternating areas of emphasis, including Woolf, Joyce, Forster and Conrad.

ENG 452
STUDIES IN MODERN BRITISH POETRY
Graduate
Alternating areas of emphasis, including Yeats, Auden, Lawrence, Dylan Thomas, Eliot and Larkin.

ENG 453
STUDIES IN MODERN DRAMA
Graduate
Study of selected modern plays from 1870 to present. Authors studied might include Henrik Ibsen, Anton Chekhov, George Bernard Shaw, Eugene O'Neill, J. M. Synge, Tennessee Williams, Samuel Beckett, Caryl Churchill, Maria Irene Fornes, and Wole Soyinka.

ENG 455
MODERN IRISH LITERATURE
Graduate
This course uses both historical and theoretical approaches to Irish literature written from the Literary Revival to the late twentieth century. It emphasizes the transition from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.
ENG 456
CONTEMPORARY IRISH LITERATURE
Graduate
This course relates contemporary Irish literature to recent Irish history and to social and cultural change. It charts the ways in which patterns of individual, social and national identity have been challenged and renegotiated.

ENG 459
TOPICS IN MODERN BRITISH LITERATURE
Graduate
See schedule for current offering.

ENG 464
STUDIES IN AMERICAN AUTHORS
Graduate
Alternating emphasis on major writers, including Hawthorne, Melville, Poe, Whitman, Dickinson, Twain, Chopin, Crane, James, Wharton and Cather.

ENG 465
STUDIES IN THE MODERN AMERICAN NOVEL
Graduate
Alternating emphasis on major 20th-century writers, including Fitzgerald, Hemingway, Stein, Faulkner, Steinbeck, Porter, Penn Warren, Bellow, O'Connor, Oates and Morrison.

ENG 466
STUDIES IN MODERN AMERICAN POETRY
Graduate
Introduction to a wide range of twentieth-century American poetries, with alternating emphasis on modernists such as Frost, Eliot, Pound, Stevens, Williams, Moore, HD., Hughes, and Rukeyser as well as more recent figures and trends.

ENG 467
STUDIES IN AMERICAN DRAMA
Graduate
American dramatists and dramatic movements.

ENG 469
TOPICS IN AMERICAN LITERATURE
Graduate
See schedule for current offering.

ENG 471
BOOK AND MEDIA HISTORY
Graduate
Selected topics in book and media history.

ENG 472
LITERARY THEORY
Graduate
Studies in literary theory and cultural criticism.

ENG 473
TEACHING CREATIVE WRITING
Graduate
Prepares English teachers to teach creative writing at the secondary and college undergraduate levels. Models the planning and directing of effective workshops in poetry, creative nonfiction, and fiction writing. Formerly ENG 485.
ENG 474
TEACHING LITERATURE
Graduate
Prepares English teachers to teach literature at the secondary and college undergraduate levels. The course develops methods of teaching all literary genres, addresses problems in literacy, and focuses on the transactional nature of reading and writing.

ENG 475
TOPICS IN LITERATURE
Graduate
See schedule for current offering.

ENG 476
TOPICS IN GENRE AND FORM
Graduate
See schedule for current offerings. Formerly ENG 479.

ENG 477
TOPICS IN PUBLISHING
Graduate
See schedule for current offerings.

ENG 478
TOPICS IN TEACHING
Graduate
See schedule for current offerings.

ENG 480
INTRODUCTION TO CREATIVE WRITING
Graduate
An introductory creative writing course open to all DePaul graduate students and non-degree-seeking students with a bachelor's degree in any field.

ENG 484
WRITING WORKSHOP TOPICS
Graduate
See schedule for current offerings.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 487
TRAVEL WRITING
Graduate
Writing travel essays: history and forms of the literary travel essay; writing about travel for the book and magazine market.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 488
WRITING THE PERSONAL ESSAY
Graduate
Focuses on studying and writing creative nonfiction essays, with particular attention paid to voice, style, form and structure, narration and exposition, scene, and narrative distance.

Status as a MAWP or MAE student is a prerequisite for this class.
ENG 489  SCREENWRITING  Graduate
An introduction to the craft of screenwriting. Covers principles of plot, dramatic conflict, characterization, dialogue, and screenplay form. Students develop short dramatic and documentary screenplays.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 490  WRITING FOR MAGAZINES  Graduate
Covers the range of skills necessary for magazine writing. Discussion of the elements of style, humor, research, concept and imagery that characterize the literature of fact. Students investigate, compose and edit finished magazine articles to be submitted for publication.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 491  SCIENCE WRITING  Graduate
An introduction to the creative career of science writing. Students research, write, and market articles on such subjects as astronomy, genetics, health, and technology for newspapers, magazines, e-zines, and innovative journals. No prior science background required.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 492  WRITING FICTION  Graduate
A course in writing short stories. Emphasis is placed on class discussion of student writing.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 493  WRITING POETRY  Graduate
A course in writing and reading poetry. Emphasis is placed on class discussion of student writing.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 496  EDITING  Graduate
An introduction to editing principles and practices in professional and technical fields.

ENG 497  WRITING THE LITERATURE OF FACT  Graduate
An advanced course in reading and writing true-life stories in the nonfiction tradition exemplified by such writers as Dickens, Agee, McPhee, and Didion.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 500  INDEPENDENT STUDY  Graduate
Written permission of supervising faculty member and of the program director is necessary before registration. Variable credit.
ENG 501
THEESIS RESEARCH
Graduate
Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

ENG 502
CANDIDACY CONTINUATION
Graduate
Non-credit. Required of all students who are not registered for regular courses but who occasionally utilize University facilities during completion of course requirements and/or research.

ENG 509
INTERNSHIP
Graduate
Internship: Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

ENV 101
INTRO TO ENVIRONMENTAL SCIENCE WITHOUT LAB
Undergraduate
ENV 101 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Students cannot receive credit for both ENV 101 and ENV 102.

ENV 102
INTRO TO ENVIRONMENTAL SCIENCE WITH LAB
Undergraduate
ENV 102 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Lab investigations further develop scientific and environmental understandings. Students cannot receive credit for both ENV 101 and ENV 102.

ENV 115
ENVIRONMENTAL GEOLOGY
Undergraduate
An examination of the earth's materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic resources and the geological aspects of waste disposal and pollution. The course includes a three-hour lab. Students cannot receive credit for both ENV 115 and ENV 116.

ENV 116
GEOLOGY OF THE ENVIRONMENT
Undergraduate
An examination of the earth's materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic resources and the geological aspects of waste disposal and pollution. Students cannot receive credit for both ENV 115 and ENV 116.
ENV 117
EARTH THROUGH TIME WITH LABORATORY
Undergraduate
A general introduction to the 4.6 billion-year geologic history of planet Earth. The course scientifically explores the history of the earth from its formation to present day, the origin and transformation of rocks, internal and external geologic processes and structures, evolution and extinction of organisms, and patterns of Earth's environmental conditions through time. The course includes a three-hour lab.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 150
FOUNDATIONS OF ENVIRONMENTAL STUDIES
Undergraduate
The purpose of this course is to introduce students to environmental studies. It presents students with an overview of the intersections between ecology, the social sciences, and the humanities that inform our vision of the rigor and power of interdisciplinary environmental studies. It draws upon the natural sciences, communication, geography, philosophy, religion, history, literature, art and design, and public policy to stress the interrelationships between human society and the natural world. Students will study the effects of the human use of the natural world and the interactions of culture, society, resources, and the environment. We will examine the social, political, and economic institutions that impact the environment. Particular attention will be paid to how the role of power and inequality contribute to environmental problems and how those problems in turn, impact certain groups more than others (e.g. citizens of undeveloped nations, people of color in urban areas).

ENV 151
INTRODUCTION TO SUSTAINABILITY
Undergraduate
This course provides an interdisciplinary introduction to sustainability and examines the essential interdependence between environmental, human, and economic systems. The class focuses on the theories and practices that respect the Earth's ecological limits so that these systems remain viable now and into the future. Students will explore the interrelated environmental, social, and economic problems that we currently face at the local, national, and global scale and the solutions that individuals, governments, and institutions are implementing in an effort to ensure a sustainable future.

ENV 152
ECOLOGICAL AND SOCIAL ECONOMICS
Undergraduate
In this course, students examine the role of the environment and natural resources in neoclassical, environmental and ecological economics. First, students study mechanisms for efficiently allocating scarce resources among specific alternative ends and take a brief foray into environmental economics and learn methods of resource/environmental valuation. We also discuss aspects of macroeconomics as it pertains to ecological economics. Students come away able to critically assess the benefits and drawbacks of these three ways that the economy incorporates the environment. It also encourages ethical reasoning as we discuss distribution of environmental benefits over generations and globally.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 160
IDEAS OF NATURE
Undergraduate
This course is an introductory history of the ideas of nature that emerged over the last two and a half centuries in Europe and the United States. We examine how the conceptions, meanings, and values of nature today have been influenced by the Scientific and Industrial Revolutions, Romanticism, and evolutionary theory; notions of the sublime, the frontier, and wilderness; and the practices of conservation, preservation, and restoration. Also discussed are the ideological commitments of current environmentalisms, in particular sustainability.
ENV 165
NATIONAL PARKS HISTORY
Undergraduate
This course is designed, in part, as an intensive introduction to the history of national parks, both in the United States and abroad, and will cover a broad swath of history, from the historical antecedents that influenced the founding of America's earliest parks to twenty-first century issues throughout the world. By necessity, this will not be an exhaustive survey of the history of all fifty-nine national parks in the United States, let alone the roughly 7,000 national parks worldwide. Instead, we will use illustrative examples to highlight key moments in national park history, including nineteenth-century intellectual movements that inspired the creation of national parks, the debates over conservation and preservation, legislative acts such as the Antiquities Act and the National Park Service Organic Act, the democratization of tourism in America, the rise of the wilderness and environmental movements, the conservative revolution, the exportation of the national park ideal throughout the burgeoning world, and the future of American national parks. The historical knowledge gained through course readings and lectures will be essential for completion of both writing assignments and the two exams.

ENV 170
ENVIRONMENTAL ETHICS
Undergraduate
The environmental issues that confront us are both global and local; they involve political, economic and ethical decision-making by governments, corporations and citizens. Students will explore and evaluate diverse approaches to a range of such issues, as well as the ways different thinkers and different cultures have envisioned the relationship between human beings and the natural world—all with a view to understanding their own relationships to the natural world, their own environmental ethics.

ENV 180
ISSUES IN ENVIRONMENTAL DESIGN
Undergraduate
Issues in Environmental Design is an introductory course that will examine concepts, theories and practices across multiple scales of design, including architecture, landscape architecture and urban design. Students will discuss and evaluate the design decisions that compose our built environment with a focus on contemporary ideas of ecological sustainability. Examples of excellence will be explored through the examination of case studies. The underlying theme is the connection between culture and nature, and how we may reduce our negative impact on systems that support all life while building positive systems that support all life.

ENV 181
LANDSCAPE AND MEANING
Undergraduate
In this course students will engage issues central to the design of landscapes, examining the complex exchange between social perception, ecological function and physical form in landscape architecture. Students will evaluate the formal character of particular landscapes and how this expression contributes to the overall experience of a place. The literary perspective of the course will focus on the rich tradition of associations between landscape design and social ideologies. Students will be asked to apply concepts from the literature to landscapes from their own personal experience to understand how meaning is both deeply personal and culturally derived. Students will extend this interpretation to creating their own landscape design for transforming an existing site in Chicago.

ENV 200
CITIES AND THE ENVIRONMENT
Undergraduate
This course focuses on the interactions between urban areas and the environment. It presents a discussion of the physical setting of cities; the water, energy, air and waste disposal needs of urban areas; and the effects of urban development on air, soil, and water quality, and the health of the community of non-human organisms. In particular, it presents this topic in the context of the emerging discipline of urban ecology, and introduces the notion of cities as social ecological systems where both people and nature interact.

ENV 202
RESOURCES, POPULATION, AND THE ENVIRONMENT
Undergraduate
A course on the relationship between the exploitation of the biological, mineral and energy resources of the earth to support an increasing population, and the environmental effects of this development. To provide an overview of the current debate on the relationship between the growing human population worldwide, the natural resources required to sustain this population, and the consequences of resource exploitation for managing environmental quality. We will integrate the ecological, economic, and policy factors involved in natural resource management.
ENV 203
CHEMISTRY FOR ENVIRONMENTAL STUDIES
Undergraduate
ENV 203 is a course for Environmental Studies majors that develops the fundamental concepts of chemistry with experimental exploration in the context of societal issues. Chemistry topics include atomic structure, chemical bonding, chemical reactions, thermodynamics, and acid-base behavior. These topics are discussed on a "need-to-know" basis, embedded in discussions of air pollution, ozone depletion, global climate change, energy, water pollution, and acid rain.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 204
ENERGY AND THE ENVIRONMENT
Undergraduate
This course is designed to provide students with the scientific tools necessary to understand and critically evaluate both personal and policy decisions regarding the variety of options (e.g. fossil fuel, solar, wind, etc.) for energy generation and use. The course also focuses on the environmental impacts of all forms of energy, from the extraction of fossil fuels and mineral resources from the earth, to the generation, distribution and consumption of energy, and ultimately emission of fossil fuel combustion products, notably carbon dioxide and other heat trapping gasses, to the atmosphere.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 216
EARTH SYSTEM SCIENCE
Undergraduate
This course focuses on three of the great spheres of the Earth (lithosphere, hydrosphere and atmosphere) and how they interact with the biosphere to create an integrated Earth system with an emphasis on how human activities impact important earth system cycles. Students should have a basic understanding of how living organisms interact with their physical environment. Laboratory activities provide experience with the tools and methodology of systems thinking.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 217
HUMAN IMPACTS ON THE ENVIRONMENT
Undergraduate
A science-based course that examines the interface between humans and the living and non-living environment, the consequences of these interactions, and options for mitigating environmental impacts.

ENV 222
TOPICS IN ENVIRONMENTAL STUDIES
Undergraduate
Variable topics in environmental studies.

ENV 230
GLOBAL CLIMATE CHANGE
Undergraduate
Climate change is a crucial issue facing society and involves intricate interactions between human pollution, processes in the Earth system and societal impacts. The course will cover the basic science of climate change and also consider its ethical dimensions. Solutions to climate change that incorporate sound science and social behavior will be explored through student-driven projects.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.
ENV 235
ENVIRONMENTAL EDUCATION: THEORY AND PRACTICE
Undergraduate
This course, led by educators from the Chicago Academy of Sciences and its Peggy Notebaert Nature Museum (PNNM), examines theories and models of environmental education (EE) and the status of environmental literacy in the US. The goal is to equip you, as future environmental professionals, to effectively engage audiences in environmental topics and issues. In this experiential learning course, you will participate in and observe aspects of program implementation, development, and evaluation at PNNM. These experiences serve as an additional “text” for you to reflect on and connect with course content, and ultimately utilize in your future career paths. As a result of this course, you will be able to: 1. Articulate trends in environmental education theory and practice across a range of educational settings 2. Connect course content (readings, lectures, and discussion) to firsthand experiences with PNNM program development, implementation, and evaluation 3. Apply EE best practices in the development of an educational experience for audiences and topics aligned with PNNM

ENV 240
INTRODUCTION TO HORTICULTURE
Undergraduate
This course introduces the principles and core practices involved in the culture of plants. Topics include the uses of plants and horticultural practices throughout history; the botanical and horticultural classification of plants; plant structure and function, growth and regulation; environmental requirements for plant growth; genetic modification of plants; plant reproduction and propagation; and plant pests and diseases. The course also considers environmental issues in horticulture including xeriscaping, biodiversity and the use of native plants, water management and rain gardens and hydroponics and container gardens.

ENV 245
URBAN AND COMMUNITY AGRICULTURE
Undergraduate
This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, case-study approach, this course will explore issues such as food security, community gardening, farmers markets, the locavore food movement, entrepreneurial aspects of urban agriculture, methods of urban food production, and food consumption patterns. The course will meet in the classroom and on-site at the DePaul urban farm and greenhouses. In addition, students are expected to spend several hours each week outside of class time engaged in hands-on experience in urban farming at DePaul or at local sites arranged with the instructor.

ENV 250
APPLIED ECOLOGY
Undergraduate
This course provides a broad survey of ecological principles and methods of lab and field investigation. Topics include the distribution and abundance of organisms in nature including those factors that influence population size, growth, and regulation; species interactions; community organization and change; and ecosystem level processes that move matter and energy among the living and non-living parts of the environment. The lecture also integrates ecological theory with natural history and environmental issues. Lab goals are to help students 1) acquire experience in ecological methods and sampling techniques, 2) better understand ecological concepts, 3) develop skills in hypothesis testing, experimental design, and the analysis of ecological data and 4) gain an increased awareness of and appreciation for the complexity, diversity, and structure of the natural world.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 260
ENVIRONMENTAL DATA ANALYSIS
Undergraduate
This course will provide students with skills to implement the most common statistical methods used in the environmental sciences. It emphasizes statistical literacy and develops statistical thinking, examines real data to address authentic questions, and fosters active learning by experiencing statistics; student design studies, collect data, analyze data using graphs and numerical tools, interpret results, communicate statistical inferences with written and oral reports.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.
ENV 261  
MIXED METHODS IN ENVIRONMENTAL STUDIES  
Undergraduate  
Environmental studies as a discipline is increasingly interdisciplinary and requires knowledge and skills in not only the natural sciences, social sciences, and humanities, but also quantitative and qualitative analytical methods. In this class, students will learn how to effectively blend different theories and methodologies to examine interactions between humans and the environment. Skills gained will include survey design and implementation, qualitative interviewing and analysis, photo interpretation, case study, ethical considerations in environmentally-focused human subjects research, and more.  
ENV 250 & LSP 120 are prerequisites for this class.

ENV 294  
SECOND YEAR SEMINAR  
Undergraduate  
The purpose of this course is to advance ecological literacy. The seminar presents the study of the environment to students in a philosophical, cultural, and historical context, and in addition makes them aware of some foundational ideas of the discipline through a selection of new and classic literature. (2 quarter hours)

ENV 300  
PLANT IDENTIFICATION  
Undergraduate  
An in-depth overview of plant families and species in the Chicagoland area. Lectures will focus on morphology of plants, evolutionary relationships among plant families, and terminology of plant structures. Students will use botanical keys and manuals for the area to identify plants and will learn collection techniques. Plant species will be collected in their natural habitats during field trips.  
ENV 250 or BIO 215 is a prerequisite for this class.

ENV 310  
ENVIRONMENTAL SOIL SCIENCE  
Undergraduate  
An examination of the physical, chemical, biological and engineering properties of soils, their genesis and classification, how they function as sites of waste disposal, and their role in global agricultural production. The course includes a three-hour lab and a mandatory Saturday field trip.  
(LSP 120 or LSP 121 or MAT 130) and (CHE 103 or CHE 130 or ENV 203) are prerequisites for this class.

ENV 315  
PLANT ECOLOGY  
Undergraduate  
This course focuses on how plants are affected by abiotic factors in the environment and interactions with other organisms. Goals are to improve students' abilities to understand research papers, present overviews of current research, design experiments, and analyze data. The course includes weekly labs with greenhouse experiments or field trips followed by data analysis. Topics include germination ecology, pollination biology, competition between plants, and effects of herbivory.  
ENV 250 or BIO 215 is a prerequisite for this class.

ENV 316  
CHEMISTRY OF EARTH SYSTEMS  
Undergraduate  
This class focuses on the impact of pollution on the Earth's ability to provide clean air, water and food for human consumption. The industrialization of the economy during the last 150 years has greatly increased the amount of waste that is sent into the four Earth spheres: the atmosphere, hydrosphere, lithosphere and biosphere. These emissions directly harm organisms and also cycle back to pollute essential ecosystem services provided by the Earth. This class will consider the source, transport, transformation and ultimate fate of pollution emitted into the air, water and solid Earth. Examples will include relatively simple cases (agricultural pesticides harming birds) and range to more complex interactions (depletion of stratospheric ozone by CFCs and the increase in harmful ultraviolet radiation). The laboratory component will be project-based and some work can be completed outside of the assigned lab time.  
ENV 216 and CHE 132 are a prerequisite for this class.
ENV 320
CONSERVATION BIOLOGY
Undergraduate
Conservation biology is an interdisciplinary field that has developed in response to the challenge of preserving species and ecosystems. With a specific focus on the Chicago area, students in this course will: assess key threats to biodiversity and the challenges associated with conservation of native communities, evaluate how different institutions implement conservation in the region, and engage with the primary literature related to the field of conservation biology.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 322
ECOSYSTEM ECOLOGY
Undergraduate
This course will introduce students to the conceptual and methodological tools of ecosystem ecology. The course will focus on understanding the fundamental structure and function of ecosystems but will also address very recent debates on the economic value of ecosystem services, the role of biological diversity in maintaining ecosystem processes, and the consequences of stressed and degraded ecosystems for human welfare. Finally, we assess the role of ecosystem ecology in designing sustainable restoration projects. The course includes a weekly lab.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 331
URBAN ENVIRONMENTAL MONITORING
Undergraduate
As the world’s population shifts into cities, there is an increasing interest in measuring the quality of the urban environment. From air quality to soundscapes, urban dwellers want to live in an environment that is healthy and sustainable. However, deteriorated environmental conditions are widespread and often unfairly distributed with regards to race, ethnicity and class. Assuming that knowledge is power, person-centered environmental monitoring can identify hotspots, highlight injustices and lead to improvements. The class will focus on a new generation of wearable/deployable sensors that use cell phones and other technology advances to measure air, sound and visual quality. This project-driven class will have students personally investigating an urban environmental question using wearable sensors or easily deployable environmental monitors.

(LSP 120) or (LSP 121) or (MAT 130 or above) is a prerequisite for this class.

ENV 340
URBAN ECOLOGY
Undergraduate
Urban ecology has been described as an upstart discipline. This is because it is relative new, and challenges the historical emphasis that scientific ecology has placed on pristine and wilderness locations. Thus, this novel discipline examines the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more sustainable - cleaner, healthier and more biodiverse. We also examine how ecology as a discipline can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, geography, economics, demography, architecture and planning. In particular we develop the notion of the system as a social ecological system. This course has a required lab; and some Saturday field trips.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 341
URBAN FOREST AS SOCIAL-ECOLOGICAL SYSTEMS
Undergraduate
Urban forests include all the trees, forests, and greenspaces in cities and towns. Urban forest management, or urban forestry, is the discipline/profession that seeks to plan and manage this green infrastructure in order to provide ecological, economic, and social benefits to all residents. Trees and vegetation have long been protected and planted in cities and towns for a variety of reasons. Recently, urban forestry has expanded to be a lead focus in the broader arena of urban ecology and urban ecosystem management, with a clear goal of creating sustainable ecosystems. This course will look at urban forests through the lens of social-ecological systems (SESs) of linked human and natural components, with a focus on teaching students the hands-on skills of urban forest management. The course will utilize the talents of a number of guest speakers and field experience facilitators who are professionals in urban forestry to give students a practical, real world introduction to the subject. The DePaul University campus and the City of Chicago and surrounding region will serve as our field laboratory to view an actively managed urban forest. This course meets learning outcomes 1 and 4 for the Environmental Science and Studies majors, outcomes 5 through 8 for the Environmental Science major, outcome 6 in the Environmental Studies major, and outcome 9 for the sustainability concentration.

ENV 250 (or permission of instructor) is a prerequisite for this course.
ENV 344
ENVIRONMENTAL JUSTICE AND ADVOCACY
Undergraduate
This course explores the roles of individuals and organizations in advocacy through the lens of environmental justice, particularly as power arrangements facilitate or impede consensus building. The course examines how legislation is written and how this process has impacted communities of color. Special attention is paid to advocacy techniques such as lobbying, movement-building, public education and litigation.

ENV 345
URBAN AGRICULTURE
Undergraduate
This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, integrative, case-study approach, this course will explore issues such as food access, food security, food deserts, community gardening, farmers markets, locavore food movement, entrepreneurial aspects of urban agriculture, method of food production, community nutrition, and food consumption patterns. The course will meet both in the classroom and on-site at an urban farm, where students will work in all aspects of the farm as well as learn to organize communities in an effort to help them create food security and access to healthy food systems.

ENV 350
ENVIRONMENTAL SCIENCE AND STUDIES CAPSTONE
Undergraduate
This course examines basic core concepts of and current issues in environmental science drawing on perspectives of the liberal studies curriculum, including reflectiveness, value consciousness, critical and creative thinking, and a multicultural perspective.

Status as a senior Environmental Studies or Environmental Science major is a prerequisite for this class.

ENV 355
INTRODUCTION TO ENVIRONMENTAL HEALTH
Undergraduate
Study of the environment factors that influence health. Topics include air and water pollution, global population and local community dynamics, toxicology, infectious and chemical agents, radiation, and management.

ENV 250 or BIO 215 is a prerequisite for this class.

ENV 359
ECOLOGICAL AND ENVIRONMENTAL MODELING
Undergraduate
Introduction to mathematical models commonly used in ecological and environmental science. Students will learn the basics of modeling with sufficient depth to critically evaluate models in the literature and to construct and analyze novel models of ecological or environmental phenomenon of their choosing.

ENV 360
RESEARCH METHODS
Undergraduate
This course is intended for junior year Environmental Science majors who are preparing for their senior thesis research projects. Topics include the nature and philosophy of science, experimental design, scientific ethics, and scientific writing. Students will prepare a thesis research proposal on a topic to be determined in the first week of the course.

Status as an Environmental Science major with junior standing or above is a prerequisite for this class.

ENV 361
RESEARCH I IN ENVIRONMENTAL SCIENCE
Undergraduate
ENV 361 is for students who are currently working with an ENV faculty mentor on a research project. Restricted to students majoring in Environmental Science or Environmental Studies; permission of instructor required.
ENV 362
SENIOR THESIS
Undergraduate
ENV 362 is designed for Environmental Science students working on their senior thesis. (2 quarter hours)

ENV 360 is a prerequisite for this class.

ENV 390
SPECIAL TOPICS IN ENVIRONMENTAL SCIENCE
Undergraduate
Variable topics.

ENV 398
TRAVEL/STUDY
Undergraduate
Foreign and domestic study tours by special arrangement with sponsoring programs: Variable credit.

ENV 399
INDEPENDENT STUDY
Undergraduate
Variable credit. Permission of instructor and chair required.

ENV 440
URBAN ECOLOGY
Graduate
In this course we examine the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more habitable - cleaner, healthier and more biodiverse. We will pay considerable attention to the ways in which ecology can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, economics, demography, architecture and planning. This course has a required lab; some Saturday field trips.

ENV 506
EARTH RESOURCES AND HUMAN SOCIETY
Graduate
This course will provide an overview of the relationship between the growing human population worldwide, the natural resources required to sustain this population, and the consequences of resource exploitation for managing environmental quality. We will integrate the ecological, economic, and policy factors involved in natural resource management. For graduate students in sustainable management.

Graduate standing is a prerequisite for this class.

EXP 210
DESIGN AND FABRICATION FOR PHYSICAL SPACE WORKSHOP
Undergraduate
This workshop introduces students to design principles for public spaces and physical interaction. Students will explore space through wayfinding, installations, kiosks and other projects to understand the role technology plays in varying environments. A focus on 3D design principles and ergonomics will be a prominent theme throughout the course. Students will experiment with various materials, including cloth, clay, 3D printing and other 3D modeling materials.

EXP 250
HARDWARE DESIGN BASICS WORKSHOP
Undergraduate
This workshop applies problem solving and programming skills toward building physical systems using an array of fundamental skills. The course will cover basic electronics and hardware skills like soldering, circuit building, and basic programming for an electronic prototyping platform to interface with digital and analog inputs (sensors), control motors, and use displays. Throughout the workshop you will work in groups to build basic physical systems (e.g., controlling LEDs) to moderately sophisticated ones (e.g., developing remote controls).
PREREQUISITE(S): GAM 240 or CSC 241 or IT 130

GAM 240 or CSC 241 or IT 130 is a prerequisite for this class.
EXP 340
DESIGNING FOR AUTONOMY
Undergraduate
Through the emergence of open source software, as well as widely-available and inexpensive hardware, creating autonomous robots has become easier than ever. This hands-on course will cover the evolution of robotics, including the concepts and philosophy behind autonomy that govern seemingly organic behavior. Student groups will use a framework to develop robots with a wide range of behaviors, including following, patrolling, avoiding, and exploring. Accompanying lectures will cover the theory and practical application behind designing for organic behavior. PREREQUISITE(S): EXP 250 and EXP 210

EXP 350
DESIGNING FOR THE INTERNET OF THINGS
Undergraduate
From everyday household items like thermostats and locks to cities developing arrays of climate and traffic sensors, the world is increasingly becoming an interconnected system of aware and responsive devices. This course will cover the development and evolution of our connected world, and the possibilities for designing future products. Students will be introduced to ambient intelligence through exercises, collaborative projects, in-depth discussions, and instructor-led tutorials. The course will cover ambient sensing, communication, embedded systems, and designing experiences for the Internet of Things. Students will be familiar with the considerations involved in designing an interconnected system, and work in groups to prototype an "IoT" product. PREREQUISITE(S): ISM 210 and EXP 250

EXP 360
PHYSICAL & INTERACTIVE EXHIBITS
Undergraduate
With the introduction of new, widely-available interactive technologies, physical computer-based exhibits are adapting to incorporate multi-touch interfaces, motion-sensing spaces, and interconnected systems. In this workshop, students will explore the development of interactive exhibits while utilizing skills in interaction design, physical technology, and desktop fabrication. Accompanying lectures will cover the affordances of physical space in design and the utilization of augmented reality, real-time sensing, eye tracking, and other technologies while rethinking how technology is used in museums and other public spaces. EXP 250 and EXP 210 and ISM 210

EXP 370
GAMES AND PLAY IN PHYSICAL SPACE
Undergraduate
This course introduces hardware design and programming to designers and artists. Students will cover the knowledge needed to craft interactive experiences using microcontrollers, electronics, and programming. Students will experiment with circuitry, soldering, and designing for an electronic prototyping platform while developing small-sized physical games. No prior programming experience is required. PREREQUISITE(S): EXP 250

EXP 390
PHYSICAL TECHNOLOGY COLLABORATIVE STUDIO I
Undergraduate
This is the first course in a two-quarter sequence. The second quarter will be EXP 391. You will earn four quarter hours of credit for each quarter for a total of eight quarter hours of credit. You must complete both quarters to receive any credit. Students explore studio-based collaborative creation of physical technology projects and work processes. Students will work together in cross disciplinary teams to research and define design challenges that will be solved through the creation of physical technology projects. Students may work with community partners or other disciplines at DePaul to create applicable solutions with real-world context. Some examples of projects may include wearables, installations, toys, games, etc. PREREQUISITE(S): EXP 250 and EXP 210 and ISM 210

EXP 250 and EXP 210 and ISM 210 are prerequisites for this class
EXP 391  
PHYSICAL TECHNOLOGY COLLABORATIVE STUDY II  
Undergraduate  
This is the continuation of EXP 390. EXP 390 and EXP 391 must be taken as a sequence in two consecutive quarters. PREREQUISITE(S): EXP 390  

EXP 390 is a prerequisite for this class.

EXP 440  
PLAY AND EXPERIENCE DESIGN  
Graduate  
This course focuses on the pedagogy of play within the design dissemination and critique of designed experiences. The course will begin with an inquiry into the origins of the term, its role in human development, cultural ritual, and social interaction before moving on to a series of design investigations into the affordances of play as design principles for the creation of engaging experiences. Further, we will use the study of play mechanics as a way to broadly explore the larger concept of "playful systems." How might interesting play mechanics be used to structure interactive experiences in systems that aren't necessarily games? Students will explore systems such as museums, classrooms, and social media to apply these concepts. PREREQUISITE(S): (HCD 421 and HCD 450) or HCI 440  

(HCD 421 and HCD 450) or HCI 440 are prerequisites for this class.

EXP 441  
LEARNING AND EXPERIENCE DESIGN  
Graduate  
This course will focus on re-envisioning the future of learning, as a robust context for the application of experience design principles. Through a study of literature on human development, principles of learning and motivation, design processes, and the unique affordances of learning contexts, students will explore strategies for the design of innovative learning environments. From the design of mobile apps, to tools, to classroom spaces, to social interfaces, students will challenge their own thinking about what it means to learn and the role design can play in transforming the experiences of learners. PREREQUISITE(S): (HCD 421 and HCD 450) or HCI 440  

(HCD 421 and HCD 450) or HCI 440 are prerequisites for this class.

EXP 442  
INTERFACE AND EXPERIENCE DESIGN  
Graduate  
This course focuses on the concept of "interface" as it relates to the design of human-centered experiences. From an inquiry into the design of digital interfaces for web and mobile platforms, to the exploration of non-digital social interfaces in day-to-day life, students will apply user research and design methods to prototype and test a range of interface solutions. The course is designed as a stepping stone to a student's own investigations and interests, as well as a space for exploration and experimentation with alternative design processes and methodologies. PREREQUISITE(S): (HCD 421 and HCD 450) or HCI 440  

(HCD 421 and HCD 450) or HCI 440 are prerequisites for this class.

EXP 450  
PORTFOLIO WORKSHOP  
Graduate  
Students review previous course projects and prior work in order to prepare a final portfolio as well as their own design identity and a resume in preparation for job interviews. Visiting design professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development. PREREQUISITE(S): HCD 421  

HCD 421 is a prerequisite for this class.

EXP 480  
COLLABORATION STUDIO  
Graduate  
This is a unique type of studio course, pairing interdisciplinary teams of students with community-based organizations or groups to undertake real-world projects. Working in teams, students engage with a local group to study and identify an area of inquiry, to be formulated by students into one or more design problems to be solved. Applying user research methods, a rigorous design, design and production skills, and effective teamwork, the students propose and prototype solutions in partnership with members of the local community. PREREQUISITE(S): HCD 421  

HCD 421 is a prerequisite for this class.
FA 105
ESSENTIALS OF COMPENSATION MANAGEMENT
Undergraduate
This course will examine the strategic use of compensation systems by management to attract, motivate, retain, and reward employee performance. This course will explore the factors of job analysis, job description, and job evaluation as the basis of compensation strategy offering students an opportunity to develop competencies in making equitable compensation decisions. (2-4 quarter hours)

FA 108
SMALL BUSINESS TAX PLANNING
Undergraduate
This course will examine how the Internal Revenue Service (IRS) deals with small businesses and entrepreneurs. It will help students (prospective entrepreneurs) understand the policies and procedures of the IRS and how to defend themselves in audits, appeals and hearings. Upon completion students should have a clearer understanding of how to avoid common tax traps and unnecessary fines and penalties assessed in the areas of federal income, payroll and investment planning. Additionally, students will be able to recognize differences between IRS policies and tax laws passed by Congress. (2-4 quarter hours)

FA 109
TAX PLANNING FOR A SECURE RETIREMENT
Undergraduate
The Internal Revenue Service (IRS) administers tax laws which affect retirement income. What investment options are sheltered against taxes? What are some of the growth funds that have historically kept pace with economic growth in spite of taxes? These are some of the questions which will be addressed in this course. Students will learn to describe, differentiate, and explain form, function, and variation within functional business processes. More specifically, this course examines: 1. Social security, medicare, defined benefit plans and defined contribution plans. 2. Quantitative methods to determine the amount of retirement money you may need in the future. (2-4 quarter hours)

FA 110
ESSENTIALS OF TRAINING AND DEVELOPMENT
Undergraduate
This is a 5-week, 1-competence course on Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results. (2 quarter hours)

FA 111
SNL AND CAREER PATHWAYS
Undergraduate
Are you trying to decide on a career path, or want to change careers and are not sure in which direction to head? Career Pathways is a one-competence hybrid course designed to complement a student's plan of study. It is an exploration of the academic, cognitive and interpersonal skills that a liberal arts education fosters, with an emphasis on the practical value of a liberal arts education in today's workplace. Students will explore the career potential of their education, examine a variety of career pathways and determine the important role careers can play in contributing to society and the global workplace. During the course students will assess their personalities, interests and leveraging their skill set into a matching career. Under close examination, students will study their own individual skills, values and interests; learn how to manifest these skills, values and interests effectively; and begin to articulate possible career pathways which are mindful of society and workplace needs. Can only be taken for one competence. (2 quarter hours)

FA 112
EXPLORING SUCCESS TECHNIQUES FOR ENHANCING CAREER SKILLS
Undergraduate
This course will address challenges that individuals encounter as they seek to advance in the job market as well as the problems faced within the workplace. The purpose of the course is to refresh and increase your effectiveness and preparation as a job seeker in your chosen field. The course will cover areas such as resume and cover letter writing, interviewing techniques, and effective job searches. Meets first five weeks of the quarter. May only be taken for one competence.
MANAGING CHANGE FOR ORGANIZATIONAL LEADERSHIP

If change were simple, all organizations would be effective and thrive in the presence of great challenges. Implementing change involves complex skills combining visionary leadership with project and other management skills. This 5-week class provides an introduction into the management and leadership skills change agents use on a regular basis as they implement organizational change. The focus of the class will be departmental or division change to be most relevant to SNL students. It will provide skill development of both managerial and interpersonal skill elements crucial to the success of change implementations. (2-4 quarter hours)

IS OBAMACARE HEALTHY FOR AMERICA?

The Patient Protection and Affordable Care Act (better known as Obamacare), passed by Congress in 2010 and deemed constitutional by the Supreme Court of the United States, has been called the most sweeping government program of our time. Everyone has an opinion about it. Few understand the law itself. Perhaps even fewer understand how we got the health care system that we have had for generations. It is a system that many fear will be irreparably harmed by Obamacare. It is a system rife with opposing outcomes. It provides some of the world’s highest quality health care and worst accessibility. It works well for the majority of the American population but fails to cover 40 to 50 million or more of its people. It is a system that is affordable for some but has led to the inability to pay medical bills as the number one reason for bankruptcy in the United States. What about Obamacare? Will it make our national health dilemma better or worse? Is it affordable? Will it improve healthcare access? Will it save lives or lower medical standards? Will it economically harm individuals and businesses in the short and long term? Is it a product worth having and a price worth paying? Is Obamacare healthy for America? This course will actively engage the student in finding their own answer to this question and sharing their findings with the greater community in which we live. (2-4 quarter hours)

COMMUNITY CONNECTIVITY

Prosperous local economies are built upon the foundation of strong communities. Community economic vitality is largely determined by the quantity of leaders in a community and how, individually and collectively, they talk, decide, act, and interact with one another. While businesses certainly play important roles in the economic development of their communities, so do the school teacher, the store clerk, the plant manager, the girl scout troop leader, and the citizen who organizes a block party. Community leadership and engagement is the cornerstone for building strong and prosperous local economies. Business retention and expansion, small business, retail and commercial development, and tourism, for example, are also important components of a diverse economic development strategy. In this course, students will analyze the interaction between small business and local civic engagement in their community, and identify opportunities for everyday citizens and small local businesses to become a more responsible civic partner. The course will include discussions, group exercises and speakers to explore various aspects of civic engagement at the local level for both individuals and small businesses. (2-4 quarter hours)

GET TO WORK! COMMUNICATION AND JOB SEARCH SKILLS FOR A SUCCESSFUL CAREER

How can adults enhance their employability in today's business world long term? This course will provide strategies for participants to design and navigate a successful job search in today's competitive market. The course will focus on the development of communication skills, both written (online applications, resumes, and cover letters), verbal (interviewing), and non-verbal (body language, presenting one's self as a professional) in order to provide a foundation for a lifetime of career development and success. (2-4 quarter hours)

WORK IN A GLOBAL ENVIRONMENT

Globalization of the world's economy has dramatically changed the interactions of people from different cultures. As a result, the importance of understanding cultural difference has increased significantly. This seminar will introduce students to the challenges and opportunities associated with living, working and learning in a global environment. This will be done through discussion, reading, case studies, films and exercises to increase cultural self awareness as well as cross-cultural sensitivity. (2-4 quarter hours)
Effective coaching has long been recognized as a key element of success in the world of sports. More recently, a new breed of coaches has emerged to help people transform their personal and professional lives. In this course, we will explore the theories, concepts, and techniques of personal life and business coaching. Students will learn about the history of coaching, its uses in personal and professional development and practical applications. Working individually, in pairs, and in small groups, students will practice coaching skills and keep a detailed learning journal. This course will be highly experiential and collaborative in nature. Students will learn concepts of coaching for personal development and professional effectiveness. In addition, students will learn models of collaborative learning and will apply one model in the exploration of their coaching practice in the course. (2-4 quarter hours)

FA 121
F1 / EXPER LRNG EVAL: DESIGN A PLAN FOR DEVELOPMENT IN ONE'S FOCUS AREA
Undergraduate
This course satisfies a degree requirement in the Focus Area. Competence: F1 - Statement: Can design a plan in one's focus area based on an analysis of elements that comprise that area. (0 quarter hours)

FA 122
FX / EXPERIENTIAL LEARNING EVALUATION: INDIVIDUAL FOCUS AREA ELECTIVE
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX - Individual Focus Area Elective (0 quarter hours)

FA 123
FX / EXPERIENTIAL LEARNING EVALUATION: INDIVIDUAL FOCUS AREA ELECTIVE
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. F3 /Experiential Learning Evaluation: Individual Focus Area Elective (0 quarter hours)

FA 124
FX / EXPERIENTIAL LEARNING EVALUATION:
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX /Experiential Learning Evaluation: (0 quarter hours)

FA 125
FX / EXPERIENTIAL LEARNING EVALUATION: INDIVIDUAL FOCUS AREA ELECTIVE
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX /Experiential Learning Evaluation: Individual Focus Area Elective (0 quarter hours)

FA 126
FX / EXPERIENTIAL LEARNING EVALUATION: INDIVIDUAL FOCUS AREA ELECTIVE
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX /Experiential Learning Evaluation: Individual Focus Area Elective (0 quarter hours)

FA 127
FX / EXPERIENTIAL LEARNING EVALUATION: INDIVIDUAL FOCUS AREA ELECTIVE
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX /Experiential Learning Evaluation: Individual Focus Area Elective (0 quarter hours)
FX / EXPERIENTIAL LEARNING EVALUATION: INDIVIDUAL FOCUS AREA ELECTIVE
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX / Experiential Learning Evaluation: Individual Focus Area Elective (0 quarter hours)

EDITING YOURSELF AND OTHERS: A COLLABORATIVE APPROACH TO WRITING AT WORK
Undergraduate
In a professional or business setting, writing is not only a main means of communicating but also a tool for getting things done. It is through writing that an organization demonstrates its worth and achieves its goals. Anyone with good writing skills is at an advantage in the workplace. Unfortunately, when people lack good writing skills, their overall abilities and performance may be questioned. It is not surprising that many professionals, no matter how accomplished they are in their area of expertise, are anxious when they have to write. And, writing often becomes a point of contention when people on the job don't agree on whether a piece of writing is effective or how to go about improving it. Those who delegate responsibility for writing to others often feel frustrated that they end up having to do the work themselves - a situation that invariably leads to their employees feeling criticized and insecure in their job. Needless to say, the duplication of work effort, the loss of productivity, and the inevitable bad feelings undermine the work environment, often leading to individuals resigning or being dismissed. In fact, according to a recent survey of Fortune 500 executives, poor reading and writing skills is the most frequent reason for dismissal of first-year employees. (2-4 quarter hours)

ESSENTIALS OF MANAGING INTERNATIONAL RELATIONS - A CROSS-CULTURAL PERSPECTIVE
Undergraduate
This course will examine main subject areas in cross-cultural management and will bring together important research findings related to International Relations. As globalization shapes the role of managers, managers' responsibilities in the international business affairs become the norm rather than the exception, and as such, establishing and maintaining contacts with other cultures becomes commonplace. In this course you will examine cross-cultural management issues from a predominantly psychological perspective, as opposed to being country specific. Thus, the focus will be placed on interactions of people from different cultures in organizational settings. This approach helps you understand the effect of culture that can be applied to a wide variety of cross-cultural interactions in a number of organizational contexts. Students of organizational behavior, industrial and organizational psychology, and social psychology will find many of the topic areas familiar; however, the focus of this course is on application of these concepts to managing international affairs. (2-4 quarter hours)

PROPERTY: LAW, POLICY AND EVERYDAY IMPLICATIONS
Undergraduate
This course will examine how the American legal system defines and handles transactions and disputes related to real estate and personal property. Simulations and written exercises will help to explain in practical terms how law surrounding property issues was made, and how it evolves. Topics to be addressed in this course will include: finance & sale of real property, how the title system works, zoning and government taking by eminent domain, the intersection of civil rights and the U.S. Constitution with property law, landlord-tenant issues, and disputes related to personal property. Whether you are interested in learning about how law and public policy are made, or simply wish to know more about real-life issues that arise when you buy or sell a home or must default on a mortgage, this course will advance your understanding and arm you with useful information. (2-4 quarter hours)

THE LANGUAGE AND LEADERSHIP OF ORGANIZATIONAL CHANGE
Undergraduate
This class would explore the impact of language on an individual's ability to learn and change him/herself as well as the human systems or organizations we are in. Using as a primary text "How the Way We Talk Can Change the Way We Work" by Robert Kegan and Lisa Laskow Lahey, students will examine the inclination not to change (or equilibrium) that is inherent in each individual and organization and how language impacts this. Students will also examine individual learning and bottom up change in the context of organizational learning and change. In addition to providing learning around the content of the class, students will work collaboratively in small groups to support each others' efforts thereby functioning as learning communities. (2-4 quarter hours)
The United States monetary and fiscal policies have been dramatically affected by some of our Presidents. In this course, students will learn about 10 selected presidents and their economic policies. The course will give a background and summary of the President and his major activities. Significant domestic and foreign issues that the President was involved in will be discussed. However, the main part of the course will be the economic policy and laws that the President led and executed. Some of the Presidents include, Woodrow Wilson who introduced Income Tax and the Federal Reserve system. George Washington who was involved in chartering the 1st National Bank of the United States, President Obama and the Affordable Health Act, Ronald Reagan and his Reagonomics, with supply side focus. (2-4 quarter hours)

The recent financial crisis has taught us that we must become literate in economics. What do we know about derivatives, bubbles, collateralization of debt, no doc loans, and open market operations? How do these things influence us? The recent debate and implementation of universal health care raises many ethical issues. Does every citizen have the right to health care? Is it the government's role to ensure that this happens? What economic rights does a citizen have? Should the government foster entitlement programs? How does the current US health care system compare with other industrialized nations' systems? In this course, students will study the major components of our economic system and will review its current stressors and weak points. (2-4 quarter hours)

The intent of business planning is to set the foundation for business success. More than one business has been put out of business when it experienced unplanned rapid growth. Students learn the financial and management aspects of business along with techniques for defining financial tracking methodologies that uncover and deal with potential problems at an early stage. Special emphasis is placed on merger and acquisition as a forward-looking method for creating new business opportunities and success. Students will work in groups to understand the detailed realities associated with being on the seller and buyer side of a business sale/purchase. Methods of post sale business integration are also discussed. It is strongly recommended but not required that students take "Starting a Successful Business" before taking this class. (2-4 quarter hours)

As we enter the 21st Century, a change is occurring with respect to the age and the make-up of the working population, which can have a significant impact on the management of people. Furthermore, American managers today must not only face the challenges of profit/loss-oriented business decision-making, but must also improve their skills in working with people. Topics that will be covered not only prepare managers for change, but also guide and position them for the future. Workforce 2020 offers the best ideas about what lies ahead and what Americans - collectively and individually, in large and small firms, in federal agencies and in small-town development commissions - should do to prepare for the journey to Workforce 2020. This course will examine how fundamental changes are altering the workforce of tomorrow and address the seemingly intractable issues and concerns managers face today and offer a new way of dealing with them. (2-4 quarter hours)

This course concentrates on the financial issues of retirement: income, savings, pensions, annuities, portfolios, health care, and taxes. We look carefully at the range of decisions facing adults in the U.S. as they plan for their post-working years. Learning focuses on best models of collaborating with financial experts, and planning for balance in life expectancy and assets (including real estate). The culmination of our course lies in the question of whether to remain employed for life; to resist retirement. We examine that possibility in the light of current labor market practices and the potential benefits of elder entrepreneurship. (2-4 quarter hours)

In this course, students use structured analysis and reflection, research and planning to create a professional development portfolio. Students learn strategies for reflecting, assessing strengths and growth opportunities, practicing smart goal setting, and attaining goals. Opportunities to return to this portfolio will be built into the major courses for purposes of ongoing assessment, reflection and planning. (2-4 quarter hours)
This course is designed to teach strategies to adults for helping children in school, regardless of age. We will explore the various ways people learn and discover techniques used to enhance learning. This course combines lecture, discussion, small group work, student presentation, and student participation in class discussion. (2-4 quarter hours)

We've all known people who were brilliant but ineffective because they couldn't manage themselves or learn to interact with others. It is nearly impossible to be successful at work or beyond without balancing thinking and feeling and developing skills in self-awareness, self-regulation, and interpersonal communication. This course will examine a framework of emotional competence and its application to a variety of settings, with special emphasis on abilities required to work effectively in teams. Readings will be drawn from emotional intelligence as it relates to the workplace, to parenting and public education, and to personal growth. In addition, film will be used to demonstrate these abilities and to inspire us to work toward our own development. (2-4 quarter hours)

We live in times of dramatic change and unprecedented challenges and opportunities. Changing demographics, mobile technology, a global economy, and new demands on workers will bring major change to the world of work of the 21st century. More women, minorities, and immigrants are entering the workforce; the workforce is aging, as is society in North America. How do we manage professionally and personally in this world of chaos and confusion? And how do we find happiness and meaning in this new world? Whether switching jobs or careers, leaving or returning to school, getting married or divorced, change brings both challenges and opportunities. Some people thrive on change while others struggle through such periods. Based on William Bridges' classic book Transitions and on University of California professor Sonja Lyubomirsky's new book The How of Happiness, this class will show how to make successful transitions in personal as well as professional settings and how to increase happiness in our day-to-day lives-in the short term and over the long term. (2-4 quarter hours)

The abundant supply of goods and services on the market makes the business environment challenging for any business. There are several regulations and laws to protect both the business owner and the consumer. Businesses try to differentiate their products through innovation and by effectively marketing their products with strategic branding. In order to be successful, it is imperative that business leaders understand the laws pertaining to their business, and that they rely on one or more types of intellectual property. Business leaders and managers must have an understanding of the intellectual property tools at their disposal, and how to exploit these tools when marketing and promoting their business. This class provides an introduction to business law and an overview of the various types of intellectual property that exist with an emphasis on copyrights and trademarks. Students will gain an understanding of how to use these laws to successfully promote, market, develop, and grow their business. (2-4 quarter hours)

Teamwork is a highly valued and often misunderstood means of getting something accomplished through a collective effort. It is the most complex competence in Goleman's emotional intelligence constellation because it relies on the personalities, histories, preferences, skills and other attributes of individuals who comprise the group. This hybrid course will explore the variety of skills and abilities of individuals that contribute to effective teamwork. Our sessions will explore the learning dimension through a structured simulation and will discuss other approaches to teamwork based on readings from the text and readings drawn from the literature of organizational development and emotional intelligence. (2-4 quarter hours)

HR professionals will tell you that liking people is not a good reason to go into their field. In fact, it sometimes seems likely that HR decisions are made with anything but the human element in mind. Is business in general a field which fits into the human community or is it something which exists outside our social structures and social rules? In this course, students will examine a variety of examples of how people act at work, and how the vicissitudes of the workplace influence their lives. (2-4 quarter hours)
In this course, students will learn that the Federal Reserve System, our national bank is a privately held corporation and not part of the national government. Who controls the Fed? How well do we understand the institution that influences so much of the average American's financial security as well as the American economy through interest rates? This course will explore the history of the Federal Reserve System and its historical effects on the American and global economic systems. (2-4 quarter hours)

Sales Management is one of the most important jobs in business today. It is the focal point for managing customer relations, and is critical for sustaining profitability and growth. It draws on a broad spectrum of skills and offers many desirable career paths for both entry level as well as experienced workers. Sales Management techniques are applicable in a wide variety of business settings, and the basic framework and details apply in all of them. The purpose of this course is to present a practical, contemporary framework for Sales Management. It starts with basic sales analysis techniques for determining company position in the market. From there it explores modern sales techniques for facilitating the customer's buying decision. It then covers the major Sales Management job functions, such as Territory Management and Sales Training. The course concludes with a discussion of leadership and psychological skills that make for Sales Management excellence. Students will learn Sales Management via course lectures, textbook reading, Internet searches and independent research on the company they work for. (2-4 quarter hours)

In the Consumer Behavior Insights course, students explore the processes that consumers use to make decisions. Understanding of consumer segments is developed and applied to create communication strategies using a decision-making framework. Through coursework, students demonstrate an understanding of various topics including how market intelligence is collected, market segmentation, the impact of various cultural influences on behavior, elements of persuasive communication and development of consumer-oriented strategies. Cultural norms influence receptivity to marketing communication messages. In-depth consumer knowledge of a sub-cultural segment is learned and applied as students conduct market research. Based on analysis, students develop communication objectives, positioning statements and strategies for consumer communication. The role of mass media is examined in two distinct areas. Mass media influence cultural values by reinforcing norms for consumer needs and wants. Mass media are also important means for communication of targeted advertising messages. (2-4 quarter hours)

This course provides an overview of the American criminal justice system. Examines the history, functions, structures, processes and interactions of the three principal components of American criminal justice: police, courts, and corrections. This includes an analysis of the major components of criminal justice and their inter-relationship in the administration of justice. (2-4 quarter hours)

The design of new products and services that exceed customer expectations with quality is a key competitive advantage in today's markets. The course will provide students with an overview of the Total Design Process Methodology, as well as an introduction to tools and techniques that enable the integration of marketing, design and other supply chain elements to develop successful projects. Students will apply the tools and ideas described in the course in the generation of a consumer product or service concept that will be developed throughout the term. (2-4 quarter hours)

Integrative thinking, connecting disparate and conflicting ideas to generate solutions, and learning from experience by reflecting on what one has done, are vital skills for navigating the unanticipated challenges and unscripted problems of contemporary adult life. Students demonstrate this competency by taking FA 212 Reflective Practice 1. In this course, students develop their strategies for integrative thinking and reflecting on practice, assess the development of their meta-competences, and review and adjust their goals and learning plans. Completion of Reflective Practice 1 is a prerequisite for FA 222 Reflective Practice 2. Prerequisite: Completion of FA 199 Career Assessment & Planning (2 credit hours)
Entrepreneurial Accounting is a thorough coverage of financial and management accounting topics in an economically challenging business environment. Clear principles and procedures are used to demonstrate the complete accounting cycle in any type of organization: For-Profit or Non-Profit. General purpose financial statements are prepared and examined from a fundamental understanding of how for-profit and non-profit businesses operate in a dynamic and changing business marketplace. Specifically, the reach of this course will be on a global environment that is characterized by a high degree of uncertainty. We will examine a variety of accounting challenges faced by business from an international perspective. This will have important implications on the way a company becomes more competitive and thus profitable. As such each of you will be assigned a company on day one of class to manage through a series of accounting dilemmas often both inside and outside our borders. As you acquire the requisite skills (throughout the term) to meet those challenges you'll execute decisions that will change the management course of the company. It is through this individual decision making that you'll learn what works and what doesn't and why. This is not a static accounting course. Your decisions will have an impact on the direction of the company. We will also cover a series of topics that will enhance your understanding of financing techniques and options through detailed ratio-analysis. This will advance your ability to understand and seek creative financing for any ideas you might have in the future. This is essential if you have that entrepreneurial spark that just needs some financial backing and support to get started. As this is an accounting course we would expect some proficiency in basic quantitative/mathematical ability. You should also be able to use a calculator reasonably well. (2-4 quarter hours)

Theories and Methods

This is a required, four-credit-hour course for students in the Professional Studies Concentration of the B.A. Individualized Focus Area. It has two main parts: First, we identify the most common problems and opportunities facing professionals in various organizational positions, analyzing their components and sought outcomes. We develop methodological responses to a set of common professional challenges, analyzing their probable effectiveness. Students design a methods-based initiative, or an applied intervention, to address a work-based problem surfaced via case study. Second, in order to understand the context of professional experience, we study the rise of the professional classes, and their contemporary functions and crises. We examine models of professional education and evolving standards of professional practice, using that knowledge and at least one self-generated data set, to craft general predictions about the future structure and meaning of professional labor. Prerequisite: Completion of FA 199 Career Assessment & Planning (4 credit hours)

New Social Media Marketing and Culture

This course discusses how digital media technology has changed marketing and examines the strategic use of digital and social media for business on platforms such as Facebook, YouTube and Blogs. Students will learn how to integrate these new technologies in marketing campaigns to enhance branding and create product awareness. Students will be able to use new media applications and conduct a digital media analysis. This course is designed to teach how to use new media to create a marketing and communications strategy; special technology skills such as HTML or programing are not required, but internet skills are necessary. Students are encouraged to use multimedia tools in the production of final work. (2-4 quarter hours)

Market Research, Corporations, and You

In this class, students will learn fundamental market research concepts and methodologies, apply them to both the business world and their personal world, and become "intelligent consumers" who can more consciously navigate the relationship between those worlds. In doing so, students will also develop perspectives on market research processes and practices related to the field's three guiding participants: Market researchers, who want to use the tools at their disposal to present information they can trust and support; Businesses, which need to translate these findings into real-world decision making that helps sell consumer products and services; and Consumers, whose purchasing behavior and arguably much of their everyday existence is influenced significantly by market researchers and businesses intent on accessing their wallets. To gain these perspectives, students will learn and apply quantitative and qualitative research tools and methodologies used by businesses to identify, build, and leverage their relationships with consumers. Examples include secondary research assessment and synthesis; survey design; ethnography; and focus groups. Statistics and advanced math are not required for this course and will not be taught during the course. Building blocks for success include logical reasoning and critical thinking skills, a strong spirit of inquiry, inquisitiveness about human behavior, and analytical creativity. (2-4 quarter hours)
Negotiation techniques are applicable in a wide variety of personal or business settings, and the basic framework and details apply in all of them. The purpose of this course is to emphasize business negotiation and cover those practical and contemporary techniques that work. It starts with a basic framework for negotiation and its components. From there it explores negotiation from a global perspective. This has become increasingly important as a result of the rapidly developing world economy, offshore outsourcing and the power of multinational corporations. The topic is even more vital as business negotiations, particularly on the global front, can be expected to toughen in the wake of the economic crisis that emerged in 2008. The course concludes with a discussion of personal and psychological skills for persuading and influencing others. (2-4 quarter hours)

This course will help students learn how to start and operate a consulting business enterprise. Materials will address consulting purposes, skills, and techniques. Through class discussions and exercises, readings and assignments, students will learn how to create, organize, and operate a consulting enterprise. Students will review detailed analyses of consulting proposals, contracting, client needs and expectations, needs analyses and evaluation, project planning, data collection and analysis, resistance, client relationships, change management, feedback, pricing, presentation and facilitation skills, and ethical considerations. (2-4 quarter hours)

In this course, students learn the essential attributes of an entrepreneur and the stages one goes through in taking the seed of an idea and growing it into a successful business. But it also takes more than a good business plan and money to succeed - entrepreneurs must understand that all too often, the strengths that helped them be successful as a start-up become liabilities to overcome in order to take their business to the next level. This course provides practical insights into the differences between effective leadership and management by exploring the concepts of Emotional Intelligence in the workplace and how to identify and develop human capital - the lifeblood of every business. Competences: L7, H2C, H3D, FX. (2-4 quarter hours)

Building on the work completed in Reflective Practice 1 and their additional learning across the curriculum, students apply, assess and adapt strategies for integrative thinking and reflective practice in a variety of contexts. Students also re-assess the development of their meta-competences, and review and adjust their goals and learning plans. Students demonstrate this competency by completing FA 222 Reflection on Practice 2. Completion of Reflection on Practice 2 is a prerequisite for FA 302 Advanced Project Proposal. Prerequisite: Completion of FA 222 Reflection on Practice 2. (2 credit hours)

This course introduces the basic principles of accounting and finance from the perspectives of an investor and an entrepreneur. This will be accomplished by allowing students to role-play as both an investor and an entrepreneur in a simulation game called "The Barracuda Tank". The marketplace of the game will be worldwide (international). The course demonstrates how the disciplines of finance and accounting complement each other to facilitate various types of sensitivity analyses in a global environment. The students will learn (1) the fundamental framework of accounting; (2), the criteria used for making finance decisions related to investing, forecasting, and planning; and (3) the financial tools applied to evaluate the financial performance of a business. Additionally, students will be given an introduction to the international financial markets, the international flow of funds and exchange and interest rate determinations. There is no accounting or finance background required for this course. (2-4 quarter hours)

An overview of the evolution of the Department of Homeland Security (DHS) in the U.S. and surveys the major policies, practices, concepts and challenges confronting the field. An analysis of various organizations under the authority of DHS and an assessment of the current threats from international and domestic terrorism will be examined. Examination of government, private organizations, and citizens involvement in protecting against and responding to terrorist threats. (2-4 quarter hours)
FA 225  
FOCUS AREA RESEARCH AND DEVELOPMENT  
Undergraduate  
Prerequisite: Completion of FA 199 Career Assessment & Planning (2 credit hours)

FA 226  
FUTURE AMERICAN WORKPLACE  
Undergraduate  
This course will examine social, political and economic trends and their potential impacts on society and individual lives. This course meets for five weeks during the December Term. Through lecture, discussion, small group work, and individual research and presentation, students will develop an understanding of how the social, political, and economic trends impact society as well as their individual World of Work area of specialization or Individual Focus Areas, and will apply those understandings to their own decision-making process. (2-4 quarter hours)

FA 228  
THE MARKETING MINDSET  
Undergraduate  
How customers are created and kept is the function of marketing. How marketing functions within an organization is the focus of this course. It is designed to give students an understanding of the marketing process that covers everything from advertising to warranties. Through simulation exercises, students will learn about the strategies available for marketing products and how a given strategy affects decisions. Students will also explore how advertisements have become a part of our popular arts, transmitting culture and values while creating cultural stereotypes and influencing our language. (2-4 quarter hours)

FA 229  
FINANCIAL MANAGEMENT  
Undergraduate  
Most people have heard about the Federal Reserve System, but few would be able to describe its structure, its purposes or the tools it uses to influence our economy. But it has a vast impact on every individual's economic health and wealth. Understanding the structure of the various investment markets, what causes them to move one way or the other, the individual types of investments and their tax implications is key to managing one's financial future. (2-4 quarter hours)

FA 230  
ONLINE PROJECT MANAGEMENT  
Undergraduate  
In this online class, students will learn the fundamentals of creating and managing web-related projects. Topics will include website design, graphics, fonts, colors, links, frames, HTML, and Java. (2-4 quarter hours)

FA 231  
PERSONAL FINANCIAL PLANNING  
Undergraduate  
This course will help students organize their financial lives by learning and implementing selected principles of accounting, finance, and management. The course will address value and risk determination by dealing specifically with the analysis of one's financial status, goal setting and planning, and decision making. Risk analysis, savings and investment principles, taxes, debt management, retirement, and estate considerations are areas which guide the financial management of individuals and businesses alike. (2-4 quarter hours)

FA 233  
BUSINESS CONTINUITY MANAGEMENT  
Undergraduate  
The main goal of the course is to provide students with a comprehensive overview of Business Continuity Management impacts that threaten an organization and provides a framework for building resilience with the capability for an effective response that safeguards the interests of its key stakeholders, reputation and value creating activities. The primary objective of Business Continuity Management is to allow the Executive to continue to manage business operations under adverse conditions, by the introduction of appropriate resilience strategies, recovery objectives, business continuity, operational risk management considerations and crisis management plans. The sections within subject area overview are not presented in any particular order of importance or sequence, as it may be necessary to undertake or implement sections in parallel during the development of the BCM Program. (2-4 quarter hours)
FA 234  
**PROBLEMS IN MARKETING AND ADVERTISING**  
*Undergraduate*  
In this course, students will examine the roles of marketing not only in the selling of products and ideas, but also as a vehicle for the dissemination of public information and socially relevant developments. Students will discuss how marketing might be viewed as a social institution and will analyze how advertising can change attitudes. Specific attention will be paid to television commercials and other forms of advertising. (2-4 quarter hours)

FA 235  
**MANAGING ORGANIZATIONAL BEHAVIOR**  
*Undergraduate*  
While no organization will ever achieve functional perfection (organizational nirvana), employees possessing an understanding of performance necessities will be empowered to make incremental, and possibly radical, change. This course is designed to give students a fundamental understanding of the organizational components, systems, and behaviors that must be in place to ensure optimal performance. Topics will include organizational vision, mission and structures; employee motivation; team behavior; and performance management. In addition, students will apply the tools introduced in the course to real or realistic situations. (2-4 quarter hours)

FA 236  
**MARKETING YOU: COMMUNICATING YOUR PROFESSIONAL IDENTITY ON AND OFFLINE**  
*Undergraduate*  
In the emerging world of cloud computing and in the context of a competitive global economy, communicating one's personal brand effectively either virtually or offline will become increasingly important. In this hybrid course, students use innovative tools and approaches to assess their unique strengths and weaknesses, passions and prior learning, and expertise and experience to identity their personal brand, plan career goals, and create or add to a career ePortfolio. Theoretical frameworks that address opportunities and risks associated with hyperconnectivity as well as concerns about managing personal, professional, and social identities are also explored. (2-4 quarter hours)

FA 237  
**CONFLICT MANAGEMENT, NEGOTIATION, AND CLIENT RELATIONS**  
*Undergraduate*  
This course will introduce students to a variety of strategies for conflict management and negotiation. Students will engage in a number of hands-on activities to develop skills that will benefit them in and beyond the workplace. (2-4 quarter hours)

FA 238  
**NAVIGATING LIFE TRANSITIONS**  
*Undergraduate*  
We live in times of dramatic change and unprecedented challenges and opportunities. Changing demographics, emerging technologies and a global economy shape the way we live and work in the 21st century. How do we manage personally and professionally in this world of chaos and confusion? How do we find happiness and meaning in this new world? Whether switching jobs or careers, returning to school or graduating, getting married or divorced, change brings both problems and possibilities. Some people thrive on change while others struggle through such periods. This seminar will explore how to make successful transitions in personal as well as professional settings. (2-4 credit hours)

FA 239  
**GRANT WRITING**  
*Undergraduate*  
Fundraising is very competitive among nonprofit organizations, so the ability to target the right foundations and to write proposals that sell your program or organization is important. This course will teach the basics of good proposal writing. It will also explore the tools and resources available to organizations trying to identify which foundations can best respond to their funding needs. Students will learn how to use proposal writing to market programs to potential funders and to increase the chances that their proposals will be read and approved for funding. (2-4 quarter hours)
One of the realities of the business world in which we find ourselves is the speed and frequency with which strategies, markets, products, programs, leadership, and even entire companies change. This course explores the field of organization development, the discipline that applies behavioral science knowledge and practices to help organizations achieve greater effectiveness through the change and development process. Using case studies, simulations, role plays, and individual work experiences, students will examine how and why organizations change and develop and the implications and consequences of various strategies and activities directed toward that effort. Topics include the nature of planned change, change management, transformational change, organization diagnosis, intervention design, and human process interventions. Students will also explore the relationship between organization and personal change and strategies and methods designed to effectively manage that relationship. (2-4 quarter hours)

This course is designed for participants to examine how organizations can motivate their employees to become fully engaged and committed to their workplace. Apart from the benefit and moral value of an altruistic approach to treating employees and colleagues with human dignity, research has shown that well motivated employees are more productive and creative. (2-4 quarter hours)

The purpose of this course is to understand the nature of groups, the ways in which small groups come together and behave, and the principles that govern the behavior of small groups. The class will combine experiential learning with reading and discussions about the theories of small group development and group dynamics. Course content will include: 1) the nature of small groups and group dynamics; 2) feedback and good interaction; 3) the process of group development, i.e. forming, storming, norming, performing, adjourning; 4) factors that interfere with optimal group performance; 5) leadership and leader effectiveness; 6) problem solving techniques. Teaching methods include "ice breaker" exercises, self-assessment forms, such as LEAD and FIRO B, some lecture, discussions and experiential learning. (2-4 quarter hours)

This course will introduce a method of using interviews to assess the characteristics of employees in order to make more strategic choices in selection, training and development. In addition to learning how to conduct behavioral interviews, participants will become familiar with the structure of competence models used to guide assessment. Students will work on gaining an understanding of the various applications of interview assessment and be able to apply one specific model of behavioral interviewing. You may only register for one competence. (2 quarter hours)

The purpose of this course is to heighten the students' awareness of diversity. This may take the form of critical self-assessment of one's knowledge of diversity and/or identifying prejudices, what they are and how they began. Through group discussions, analyzing case studies and lectures, students will be provided with opportunities to gain a deeper understanding of their own prejudices and to develop a rationale for valuing human differences in their respective lives. (2-4 quarter hours)

At work, we often learn how to use another language. That is, we learn to speak about technology, or about marketing, finance, or human resources with a specific vocabulary and referring to particular ideas. However, we also bring our own unique perspectives to the workplace. Our individual approaches to problem solving and to human relations at work define our contributions. In this course, students will use short story and journal writing to define and assess their contributions to the workplace. Students will produce written accounts of their lives at work. Students will assess their work not only for the clarity of the stories told, but also for elements which contribute to good writing. Looking at the literature of work will help students see their own work in the context of this literary genre. (2-4 quarter hours)
American business and the free enterprise system developed together with the nation itself. All three phenomena have their roots in the knowledge, skills and values that the earliest Europeans brought to this country. This course provides an overall view of the relationship between American history and culture, the development of its central business system, and contemporary implications for business environments. (2-4 quarter hours)

In this course, students will delve deeply into corporate training programs, learning strategies for identifying specific training needs and ways to target training to appropriate organizational levels. This is especially important in firms undergoing significant structural change. Next, students gain knowledge of the way to create effective training programs to directly address organizational and role-based needs. The culmination of competence is the development of expertise in testing, assessing, and evaluating training outcomes. Students work in groups, reviewing prize-winning video and web training programs. (2-4 quarter hours)

This course provides an overview of the concept of organizational learning and an opportunity to gain hands-on experience with two communication practices related to it: collaborative learning and storytelling. The class will be highly experiential and focused on immediate application of learning. It will consist of in-class activities in groups of two and larger and will draw heavily on students' workplace experiences and environments. Collaborative learning results when two or more people help each other create or enhance their knowledge relative to specific challenges or opportunities. Its goal is to stimulate new insights and support changes in assumptions, beliefs and/or behaviors. The ancient oral tradition of storytelling is a powerful practice used in virtually all societies to pass on a tribe's culture, values, and the knowledge that permitted survival. It's no different in today's organizations. Stories can ground people in the organization's culture, capture and transmit knowledge, and promote change. (2-4 quarter hours)

SNL courses are designed specifically to focus on the competencies of the SNL curriculum. Courses are competence-based, and revolve around particular content. Students who are interested in a specific content area might not always find these interests addressed through SNL courses. Furthermore, students, particularly those nearing the completion of the SNL BA degree, find that they have some competencies which are not addressed by SNL courses in the time frame necessary. Contract Learning is designed to address the needs of these students. In this course, students can address a variety of competencies from the SNL competence framework, and can focus their work around content of their choice. By means of detailed and comprehensive contracts, learners will work with faculty to develop materials addressing their chosen competencies. Students will work with David Kolb's Learning Styles Inventory first introduced in the Learning Assessment Seminar, to revisit their preferred methods of discovering and absorbing information. In class discussions, learners will also analyze their topics, and their competencies to develop ways of expanding their knowledge and meeting the requirements of the competence statements. (2 quarter hours)

This is a ten week course on strategic management in organizations. Students will learn the basic concepts of strategic formulation including understanding the competitive forces, competitive advantage, strategic decisions, and the impact of the internet on strategy. Next students will look at how strategy can be applied to business, governmental, societal and global issues. Students may focus on developing a strategy for an organization for the F-X competence, or look at strategy from a governmental or societal prospective with the H-1-I competence, or analyze the strategy of a country or global issue for the H5 competence. (2-4 quarter hours)
Everyone has had the delightful experience of learning by accident - of being surprised by insights and skills that emerge from experience. But accidental learning can be time consuming and therefore costly to organizations and individuals in organizations that have specific learning goals to meet. Engaging and effective learning in organizational settings is most often the product of systematic analysis and planning. This course will prepare participants to design and deliver training in a variety of adult learning settings. Principles of adult learning theory and best practices in adult learning will be examined to derive criteria for sponsoring learning experiences of adults. In addition, a five stage training design protocol (analysis, design, development implementation, evaluation) will provide a context for participants to address the following questions and understand their implications: 1) Who is the audience and what is the training context? 2) What is to be learned and why? 3) What methods are best suited to the target learning outcomes? 4) What resources are available and appropriate to the learning outcomes and methods? (2-4 quarter hours)

This course concerns marketing in a global context. We will understand and examine the difficult problems facing many companies from U.S. and international perspectives. This course will introduce key concepts in marketing, and it will use a variety of frameworks to steer your way through many of today's critical marketing issues. (2-4 quarter hours)

This course provides an overview of the fundamentals of Project Management for non-Project Managers. It introduces the four phases of the project management process: Initiating, Planning, Managing, and Closing; the role of the Project Manager; tools, techniques and deliverables associated with successful project management; and troubleshooting techniques. (2-4 quarter hours)

In an economic downturn, how do we navigate the changing worlds of work? This class will investigate current theories and models as well as offer students first hand experience observing and analyzing changes in the organization of work. We will approach issues concerning work from a number of perspectives--history, gender, technology, ethics, environmental, and global. As a way to explore the multiple issues related to the reorganization of work, ethics, culture, and technology, we will read texts, analyze websites, and view films to assist you in class assignments and projects toward fulfilling course competencies. You will also learn several qualitative research methods and approaches by becoming an apprentice and using them first hand. The culmination of our individual and collective work will be a public educational event, paralleling Trump's "Apprentice" show. First, each student will investigate and study issues of work/business by conducting an investigation of a workplace of your choice. Then, as a team, each group will devise a vision, plan, marketing, and publicity educational campaign about one aspect of work reform. (2-4 quarter hours)

The purpose of this course is to help students develop skills in organization building--skills that they can use to make good decisions in the business environment as well as in personal life. Students learn to take control of their own decision-making processes, rather than resorting to perceiving their experiences passively as the result of "chance" or luck. The course focuses on the process of building an organization through human resources, but the skills taught and learned in the course are helpful to all members of the business community in their personal and professional lives. (2-4 quarter hours)

An understanding and an ability to apply the basic disciplines of project management can boost your success in work and personal endeavors. Project management as a discipline provides the tools for accomplishing complex objectives - ones that may require different resources applied over extended periods of time. However, there is a danger in following a set of empty procedures, in hopes that adherence to guidelines can substitute for content expertise, common sense, and an understanding of human motivation. There is considerable evidence that projects fail for human and organizational reasons, not mechanical or procedural ones. The key ingredient in project success is this personal dimension, and that is the main theme for our course. We will use the mechanics of the project management process as the platform for exploring how to recognize and deal with the real underlying issues in managing projects - recognizing and managing people and organizational issues. (2-4 quarter hours)
FA 269
ENTREPRENEURSHIP: HOW TO FIND AND FUND YOUR DREAM
Undergraduate
Did you know that 90% of new restaurants are doomed to fail? Have you always wanted to be your own boss? Are you presently conducting a small business from your garage that you'd like to make bigger and more profitable? Who makes a great entrepreneur? Are businesses easier to manage in the age of technology? In this course, Students will learn how to identify an appropriate small business for their talents and time restrictions. Learners will also consider methods of financing their dream work lives, and review the pitfalls awaiting new businesses in today's economic climate. Students need not have a business in mind, but must be willing to consider how they might go about putting together a plan for a successful venture. Ideas about the definition of business in modern society, of entrepreneurship, about the psychological make up of the successful small business owner, and about the long term view for small businesses will also be covered. (2-4 quarter hours)

FA 270
STARTING UP AND RUNNING YOUR OWN BUSINESS
Undergraduate
This course will help students learn how to start and operate an independent business enterprise. We will address entrepreneurship, defining your markets, accounting basics, business plans, financing, establishing the business, hiring employees, business equipment, software, and marketing. Through readings, discussion, and home assignments, students will learn how to increase the probability of reaching their business goals while minimizing risks and costs. By applying management, financial, and software concepts and practices, students will have the knowledge to start and run a new business. (2-4 quarter hours)

FA 274
APPLYING ORGANIZATIONAL BEHAVIOR TO TODAY'S BUSINESS ENVIRONMENT
Undergraduate
A conceptual and practical look at the discipline, nature and scope of organizational behavior and its importance in today's global and diverse business environment. This course is designed with a management focus that will offer knowledge of and applications, challenges and opportunities for diverse viewpoints, teamwork, group dynamics and problem solving in organizations in order to enhance and achieve productivity, performance and satisfaction in the workplace. (2-4 quarter hours)

FA 276
MANAGING AN INVESTMENT PORTFOLIO
Undergraduate
This course will discuss how some top money managers build diversified investment portfolios (past performance is no guarantee of future performance), as well as the Nobel Prize winning theory behind their decisions. This will not be a "how to invest" type of course but rather a forum for ideas to consider. It will touch upon other important subjects that an informed investor should be aware of, such as: load vs. no-load mutual funds, active investment managers vs. passive indexes, the money management industry, behavioral finance, market efficiency, and valuation techniques. This class is meant to be accessible to all students, so there are no prerequisites; only an interest in the subject is required. Knowledge of financial math or spreadsheets is not needed, though examples of both will be demonstrated in class. (2-4 quarter hours)

FA 278
EFFECTIVE WORKPLACE PERFORMANCE THROUGH COLLABORATION
Undergraduate
In this course, students examine models of effective performance management, within and beyond institutions of banking. We study the connections between organizational and employee goals, giving special attention to the role of collaborative teamwork. Strategies for effective measurement of performance, both individual and group-level, are examined in the light of the need for continuous performance improvement. Course-based collaborative projects offer an opportunity to apply concepts to everyday-worklife scenarios. (2-6 hours)

FA 279
WRITING FOR MANAGEMENT AND BUSINESS
Undergraduate
Developed to serve in the creation of compelling business communications designed to be clearly understood, this course instructs corporate writing that communicates with certainty and conviction. Every type of corporate writing is covered, ranging from resumes and cover letters, through business reports, to the creation of short and long proposals, good-news and bad-news letters, memorandums, direct requests, and other persuasive business expression. Special attention is paid to the technique of unearthing valid and reliable research supported with modern document design. (2-4 quarter hours)
FA 281
BUSINESS WRITING
Undergraduate
Business Writing provides students with an opportunity to develop concise, articulate, and actionable written business documents. Students will learn to plan, organize and write effective business documents such as business letters, memoranda, e-mail, business reports, abstracts, executive summaries, cover letters, and resumes. In addition, students will learn to examine and write to a specific audience, to select the most effective wording and phrasing, to analyze and revise written works (either their own, or the work of others), to identify logical fallacies, to write within a specific context, and to unearth valid and reliable research. (2-4 quarter hours)

FA 283
A CRISIS IN CREDIT: READING AND INTERPRETING FINANCIAL STATEMENTS
Undergraduate
The record collapses of first home builders, such as Levitt and Sons, WCI Communities, and Matrix Development Corp., then financial giants Lehman, Fannie Mae, Freddie Mac, Wachovia, and Merrill Lynch beg the question, how did we get here? More importantly, how do we avoid repeating this “crisis” in the future? This course will examine these questions in light of corporate balance sheets and income statements. Students will learn to read and interpret financial statements. In addition to the technical details related to financial reporting, the course will examine the political and social implications of the U.S. Treasury addressing the problems of the housing and credit sectors. This will involve a historical review of the roles of government and the private sector in the development of financial systems in the United States. (2-4 quarter hours)

FA 286
THE ART OF THE INTERVIEW
Undergraduate
An interview is just a conversation with a purpose and in this class we will look at all kinds of interviews: entertainment, investigatory, forensic; structured and freeform, research, medical, diagnostic, job, group, etc. We will examine some venerable sources: The Proust Questionnaire, Chicago's own Studs Terkel, and a variety of well-known current practitioners of the art. The class will look at oral arguments before the US Supreme Court, which are just interviews by the members of the court with presenting legal counsel. We will also briefly evaluate the use of interrogation and torture to gather intelligence. Students should expect to perform, document and analyze a variety of simple interviews in this class: simple job interviews, interviews to gather family history, patterned and freeform interviews, questionnaires, etc. Students will also analyze the techniques used in a variety interviews, using audio streamed recordings and transcripts. (2-4 quarter hours)

FA 288
MARKETING FOR THE SOCIAL GOOD
Undergraduate
This is a ten week course on the nonprofit and public organizational issue of social marketing. Generally social marketing techniques are used to influence individuals, or groups to change their behavior in order to improve a social good such as: individual health, the environment, and the community. Students will develop an appreciation for the principles of social marketing and will be taught the techniques for conducting social marketing programs. Students will also learn how to develop social marketing plans and meaningful promotions, including utilizing imagery/art to understand and create advertisements. (2-4 quarter hours)

FA 289
BUSINESS WRITING AND INTERNET COMMUNICATION
Undergraduate
E-mail has flooded the information highway allowing us to communicate on an immediate basis. But has this immediacy caused us to drop our guard so that our communications are not as effective? This course will give students a solid foundation in business writing so all communications - business-to-business, business-to-consumers, in-house memos to instant messages - can be clear and concise. Students will also review written etiquette and explore the impressions created by the spoken word compared with the written word. (2-4 quarter hours)

FA 290
USING FINANCIAL DATA
Undergraduate
In this course, students will learn practical applications of the fundamentals for making financial and investment decisions. Students will work with cases and problems drawn from business experience. They will work with economic and philosophical theory, as well as economic data, and learn to understand such concepts as supply and demand, competition and monopoly, and the money supply. Students will become familiar with financial information, learn how to assess financial risks and rewards, and become conversant with the terms, symbols, and abbreviations that are used in current business publications. (2-4 quarter hours)
This course reviews the process of creating, planning, developing and analyzing a business document. Students will learn how to structure, write and control such demanding projects to relate information, interpret data and recommend solutions to business problems. Students are expected to possess writing skills that enable concentration to be placed on developing a clear, concise and consistent writing style in complex and sophisticated documents. Class discussions will cover pros and cons of using certain document formats and what, in turn, makes them effective. Upon completion, students are expected to possess the necessary skills and confidence to develop sophisticated, highly professional business documents. (2-4 quarter hours)

One of the most sought-after business skills is public speaking ability. We all have equal access to high-technology; high-touch skills give us the competitive advantage. Through discussions, exercises and presentations, students will have many opportunities to build their skills in both casual and formal speech. Each student will prepare presentations in a variety of styles, including impromptu, persuasive and informative. Through regular feedback from the instructor and peers, students will build their presentation skills in organization, topic development, use of visuals and delivery. Students will be video-taped regularly so that they can chart their progress and participate in self-assessment. (2-4 quarter hours)

This is an introductory course that assumes no previous experience on the student's part. The class seeks to familiarize you with some basic principles of effective and ethical public speaking, to give you experience in enacting those principles through practice, and to instill a sense of the importance of public communication in shaping our lives. Through class feedback and videotapes of your own speeches as well as critiques of other communicators, you will discover how personal style, appearance and body language impacts the message. (2-4 quarter hours)

Thriving in the internet economy requires rapid adaptation, technological excellence and motivated personnel. Using a detailed case study, students will learn strategies for optimal organizational development in this new world economy. We will investigate its various historical bases, the elements of its uniqueness, and analyze several theoretical models of structure and process in organizational function. (2-4 quarter hours)

This course will examine basic ideas in the practice of law. It will also examine contemporary legal issues in the world of work. Students will examine the structures of the legal community and the impact it has on how business is conducted, and on the economic system in which we live and work. Through readings, discussion, and group projects, students will investigate current issues which have evolved as the practice of law has become a big business itself. Students will develop and evaluate plans individually or through group interaction for applying new insights to effecting change in their own working environments. May be taken for only one competence. (2-4 quarter hours)

Remember when things were simple? It was a long, long time ago. These days, issues in finance are complex to the point that many of us feel excluded. How can we make and use money if we don't understand how it works? How can we educate ourselves enough? In this course, students will examine how money works in contemporary society. Furthermore, students will discuss how developing technology has changed the flow and focus of money matters in our time. (2-4 quarter hours)
COMMUNICATING IN A GLOBAL BUSINESS ENVIRONMENT
Undergraduate
Effective and efficient communication is a challenge in our own culture, but this is compounded when we face communicating in a culture other than our own. This course will begin by examining and practicing communication formats that are accepted in the Western world. Following this we will examine the historical background and sample presentations of leaders other than those from the United States and Europe. In addition, learners will have opportunity to format their own presentations using those of the world's great leaders as models. Learners will be encouraged to incorporate their own professional situation as a place to begin experimenting with their newly acquired knowledge. (2-4 quarter hours)

PROJECT MANAGEMENT
Undergraduate
Project Management is a business concept which has received a great deal of attention over the last few years. Business managers are discovering that the complexity of human and technological systems forces workers to organize, prepare, and monitor project development in a way which was not necessary in simpler times. In this course, students will discuss and discover methods of project organization and execution which will help them achieve efficacy and success in the workplace. This course will cover concepts in describing project goals, setting priorities, identifying needs, and designing realistic time lines. Students will learn how to execute successful projects from start to finish. (2-4 quarter hours)

ADVANCED PROJECT PROPOSAL
Undergraduate
Students demonstrate this competency by planning their Advanced Project in FA 300 Advanced Project Proposal. They first brainstorm theoretical or practical problems that they find worthwhile to address and that follow from the goals that define their Focus Area. After identifying a problem to be addressed, students will use their lifelong learning skills to gather relevant scholarly and professional sources as well as pinpoint methods of investigation or application. Students will complete a proposal that explains the importance of their question, identifies sources and describes the final product to be submitted. Tools of project planning, such as constructing a thorough timeline, will be utilized to ensure that the Advanced Project achieves the goals stated in the proposal. Completion of this competency is a prerequisite for FA 304 Advanced Project. Prerequisite: Completion of FA 222 Reflection on Practice 2, LL 300 Research Methods and completion of or simultaneous enrollment in final FX electives. (2 credit hours)

INDIVIDUAL ADVANCED PROJECT
Undergraduate
This required course is a problem-solving experience which represents the culmination of an SNL student's learning in a specific area. Students, guided by their academic committee, design and execute an independent project which demonstrates the integration of theory and practice, and the ability to pursue and document avenues of inquiry with excellence. * Successful completion of Research Seminar is required before registration. This course satisfies a residency requirement.

LL 300 is a prerequisite for this class.

ADVANCED PROJECT COURSE
Undergraduate
The main purpose of this course is to guide you through the various steps involved in designing and carrying out an Advanced Project (AP) on a subject that is related to your particular focus Area (FA). Whether you want to address a practical problem or a theoretical question, in this course you will be guided through the process of investigating a problem or issue in depth, and establishing clear links between the definition of the problem or issue, discussion of conceptual issues, methods of investigations, analysis of findings, and practical applications. Successful completion of the Advanced Project will satisfy the F-11 and F-12 competences. This course satisfies a residency requirement.

LL 300 is a prerequisite for this class.
FA 309
STARTING A SUCCESSFUL BUSINESS
Undergraduate
Starting a new business is now more possible than ever. All businesses start as an idea but not all ideas are good ones. To decide that an idea is worth a major time, career and financial investment, it is best to critically evaluate its likelihood of success in light of the marketplace, the competition, the economic environment, its financial costs and opportunities, and the needs of the entrepreneur. In this course, students learn evaluation techniques for determining the business viability of a new idea and methods of performing an overall critical financial analysis with special focus on spotting business environment marketing and demographic trends. Students learn the details associated with starting a functional new business with the ultimate deliverable being a written 10-15 page business plan for a new product or service idea that would be worthy of review by potential investors. Students will work together on a group project that entails the writing of a business plan and then a Shark Tank type of group presentation to classmates for evaluation and grade. This is a challenging and potentially life-changing course. (2-4 quarter hours)

FA 310
GENDER IN BUSINESS AND LEADERSHIP
Undergraduate
Women's work is never done. Not only are women mothers and wives, but these days the expectation is that women will take on leadership roles outside the home as well. What makes a woman a leader? How did the workplace differ when women were not corporate leaders? Who are today's prominent female leaders and how are they shaping our future? In this course, learners will study the lives and contributions of various important women from business, politics, and social action. Students will assess equality in management and leadership, the psychological make up of the woman leader, and the ways in which women's contributions to leadership differ from men's. Furthermore, the class will endeavor to define leadership, its consequences, and its personal ramifications. Students should expect to read extensively about the lives and characteristics of contemporary women who have surfaced in leadership roles. Learners will also identify women leaders in their own workplaces and communities and assess their involvement in the corporation and/or general public. (2-4 quarter hours)

FA 311
BUILDING QUALITY INTO PROJECT MANAGEMENT
Undergraduate
Today's business environment is time-based and cost-conscious with expectations for quality and excellence. An understanding of project management processes and developing the essential skills and tools can optimize time, cost and quality. This course will provide an introduction to the theories and concepts of project management and how those theories and concepts apply to today's business practices. (2-4 quarter hours)

FA 312
FINANCIAL LITERACY
Undergraduate
The purpose of this class is to learn the language of business and the "grammar rules" required to apply this language to different scenarios and our own lives. We will discover who the audience for financial information is and develop the ability to see how financial activities affect and are relevant to this audience. We will explore the topic of financial literacy both from the global and the personal perspective. Big corporations, small businesses and we the individual have something in common. All must ask the question: How do we control, organize and communicate financial situations and information in a way that is meaningful to us and that will help accomplish long term goals. Simply having money does not guarantee that we know how to manage it or that resources are being used effectively or appropriately to realize our goals. In this class, we will first establish a common framework and terminology for financial literacy and then explore questions such as "Why is financial planning important?"; "What are common budgeting systems and tools?"; "How can a budget or financial plan be used to help identify and achieve monetary goals?"; "Why do such plans often fail?" By considering the economy, assessing our own individual financial situations, by applying financial concepts learned to real world situations, students should be able to apply skills learned within both a personal and global context. (2-4 quarter hours)

FA 313
PROCESS MANAGEMENT AND DESIGN
Undergraduate
From erecting an architectural monument to developing training materials to planning an international seminar, it's all process. Process Management and Design begins with an examination of the origins of work systems and process design, ranging from the principles of Frederick Taylor to the philosophies of Deming, Duran, and Cosby. The course of study then moves into an unfettered exploration of process within the context of organizations and leadership, as well as an experiential consideration of the manner in which process applies in non-traditional contexts. Class participants will learn to create, define, analyze and classify processes; develop and apply process measures, and determine customer and consumer needs and expectations. Other topics covered include process re-engineering, continuous process improvement, process benchmarking, and systems thinking. Class participants are encouraged to engage in this learning experience with fresh perspectives about process, and its potential meaning in unconventional settings. (2-4 quarter hours)
The famous business theorist Peter Drucker has called American culture a unique combination of materialism and idealism. These qualities have combined to make America a consumer based society unlike any other culture. What is it about American stores and the American shopper that makes both so unique? Super stores, the consolidation of regional stores into multinational conglomerates, online shopping, the emergence of an-ever-more savvy and demanding consumer, economic cycles, international monetary values and the demographics of American shoppers have combined to transform the experience of shopping in the last twenty years. How do stores entice consumers to buy? That question will be answered in this class. This class will look at a variety of store environments and will feature student-based discussion of weekly store visits. Using the science of shopping (as defined by Paco Underhill and others) the class will visit and evaluate, time and scheduling permitting, a wide range of retail options. (2-4 quarter hours)

A successful business leader's actions are underscored by efficient and effective skills in communication. This course will position you to move forward with the respect of others and a heightened sense of self worth. We will focus on looking at communications in contemporary business contexts; determining your skill in presentation/platform applications, and ways to advance; and effectively demonstrating your increased understanding and application level. (2-4 quarter hours)

This course examines the process and responsibilities of the manager in the budget formation, interpretation and implementation process. Students will learn to read and interpret financial budgets and understand the practical and ethical implications that budget implementation has on managers and workers. The class consists of case studies with analytical problem solving, introductory lectures on basic financial concepts and theoretical frameworks. Students will develop and analyze financial budgets, participate in discussions of current ethical implications of budget implementations, and write reflective papers addressing their competencies. (2-4 quarter hours)

When we die, our tombstones record our birth date and our death date, with a hyphen in between. How we live our lives is represented by that hyphen. This course is intended to help students identify what they want their hyphen to represent and how that applies to their career and life choices. Special attention is given to methods of identifying personal calling and for achieving personal fulfillment goals. Students also examine the views of philosophers, spiritual leaders, and artists, both historical and contemporary. Students create their own mission statement for work and life. A primary objective of the course is to expose students to resources that can be used in their own self-discovery process. Multi-media activities include small and large group discussions and presentations, research, and report writing, video and audiotapes. Students are encouraged to use the Internet in their research. (2-4 quarter hours)

Business managers as well as investors must have a basic understanding of financial statements as not only a management tool but also as a way of communicating the financial and operational well-being of a company. This course teaches students the essential elements of financial statements, their interpretation and their impact on investors and society. This is a particularly important topic and skill in light of the recent corporate financial reporting scandals plaguing Wall Street and the nation. (2-4 quarter hour)

In this class, students will look at how numbers add up to give us reasons to be for or against ideas. This course will center on how to create, decode, and analyze statistics. Some knowledge of mathematics is essential to understanding statistics so prior completion of the Quantitative Reasoning course or it's equivalent would be very beneficial to having success in this class. (2-4 quarter hours)
Investors range in age from newborn babies to centenarians. Population as a whole can be segmented according to various attributes, some of which have a decided influence on one's spending and investment proclivities. Identifying those attributes is essential in determining the appropriate types of investments for the individual investor. Understanding the role of the economic, interest rate, and inflation cycle are also critical to putting together an efficient, effective, and suitable investment portfolio. Prerequisite: Completion of Risk vs. Reward in Investing. Building on what was learned in the prerequisite class, we will examine the segments of the population and what causes them to make their investment decisions. We will then put together sample portfolios for hypothetical investors for different points in the economic cycle. This course can be taken for only one competence. (2-4 quarter hours)

FA 321
BUSINESS AND PROFESSIONAL WRITING
Undergraduate
As contemporary American business continues to move toward internet- and web-based communication, and with increasing demands on business managers to communicate key messages quickly and effectively, the ability to write clearly and effectively becomes an increasingly valuable skill. Business and Professional Writing offers students practical experience in developing cogent, concise and articulate written products. Students will learn to plan, organize and write effective business documents such as, business letters, memoranda, E-mail, business reports, abstracts, executive summaries, cover letters, and resumes. In addition, students will learn to examine and write to a specific audience, to select the most effective wording and phrasing, to analyze and revise written works (either their own, or the work of others), to identify logical fallacies, to write within a specific context, and to work collaboratively in creation and modification of business and professional written documents. (2-4 quarter hours)

FA 322
SINO-AMERICAN RELATIONS: A BUSINESS PERSPECTIVE
Undergraduate
In this class, students will analyze contemporary Sino-American relations from a cross-cultural perspective, with an emphasis on developing an understanding of how particular issues impact the business climate through the interplay of macroeconomics and geopolitics. (2-4 quarter hours) Additionally, students in this class will identify and analyze those specific issues in contemporary Sino-American relations that have the greatest potential to impact the present and future operations.

FA 323
SURVIVING RAPID BUSINESS GROWTH
Undergraduate
A successful new business often experiences tremendous revenue, personnel and financial growth. Ineffective management of this growth with all of its opportunities as well as pitfalls can put a successful business out of business. This course covers the areas of concern, shows methods of monitoring financial and operational information to highlight potential problem areas before they become major problems and then shows methods of effectively dealing with these challenges. (2-4 quarter hours)

FA 324
INTERVIEWING FOR EMPLOYEE POTENTIAL
Undergraduate
What are the obligations of the workplace to the worker and vice versa? Does the individual worker matter more or does the organization? How can the organization honor both words in "human capital" and be fiscally responsible? The ways that organizations approach selection, hiring, and training express their answers to these questions, intended or not. This course will examine ways to assess the competence and potential of individuals and to create avenues for individual development in the context of organizational effectiveness. Participants will learn skills of behavioral interviewing, interpreting interview data, and developmental feedback and will devise strategies for the ethical use of assessment results. (2-4 quarter hours)

FA 325
CONNECTING THOUGHT AND BEHAVIOR IN THE WORKPLACE, THE COMMUNITY, AND IN YOUR PERSONAL LIFE
Undergraduate
This course introduces students to practical concepts of Cognitive Behavioral Psychology and offers them new perspectives on how to observe and understand the interaction between thoughts and behaviors in their daily lives. Students will evaluate the tendencies and correlations between what a person “thinks” and what that person “does” through observation and interpretation of their own experiences. A report will be generated that will include an analysis of the student's own cognitive behavioral tendencies and a plan for personal development. (2-4 quarter hours)
FA 326
GENDER, SEX AND LATER LIFE
Undergraduate
This course will compare the aging experiences of men and women in later life and the relevancy of gender roles to the aging process across ethnic, racial and cultural diversity differences. Although this course is sociological, we will examine the physiological/psychological differences and similarities between older adult men and women. Specific topics of analysis will include gender, politics and power, the gender gap in longevity, why aging women have a longer life expectancy than men, but experience more chronic illnesses and report less physical and mental well-being in advanced ages. This course will explore society's attitudes and myths about sexuality in later life, as well as presenting realistic information on ongoing research into the physiological and emotional changes affecting sexuality and intimacy. (2-4 quarter hours)

FA 327
TECHNIQUES OF BUSINESS REPORT WRITING
Undergraduate
Most training programs are created as the result of a report, and reports also document the effect of the training on the trainees. Either way, the report is a legitimate component of all training programs. Learn the procedures used in creating detailed reports that can be implemented in your workplace. Examine the ‘voice’ of a business report, and learn ways to turn reports into RFPs for further programs. A five-week, close examination of the steps involved in creating detailed reports for business is encountered in this class. This course can be taken for only one competence. (2-4 quarter hours)

FA 328
APPRECIATIVE INQUIRY, POSITIVE ACTION: UNDERSTANDING THE POWER OF STORY TELLING
Undergraduate
Traditional approaches to organizational change place the practitioner (manager, consultant, or other change agent) in the role of diagnostician or problem-solver. This approach is based on the concept that organizations are like machines: when they break down, the expert simply needs to find the source of the problem and repair it. Organizational developers have discovered that organizations rarely act as predictably as machines, and repairs led by experts rarely have lasting impact. In the early 1980's a new model for organizational development began to emerge in response to the frustration with traditional approaches. Appreciative Inquiry, founded by David Cooperrider and colleagues provides a new theoretical and practical approach to change that engages the positive energy of the organization. In this course, you will learn how Appreciative Inquiry evolved in the relatively new field of organizational development, understand its core concepts and learn how to use the process to unleash the power of positive change in your organization. This course is excellent for anyone working in a management, leadership, consulting or supportive role in an organization (or who aspires to). (2-4 quarter hours)

FA 329
DEVELOPING AND MANAGING A MARKETING COMMUNICATIONS PROGRAM
Undergraduate
This course will provide the student with the understanding of the principles of marketing communication, the marking communication vehicles most commonly employed by corporations in America and Western Europe, and the situations in which each marketing communication vehicle may be most effectively used in an ethical manner. The students will learn both the principles of marketing communication and how to target a market demographically, geographically, and psychographically, to ensure that the marketing communication strategy developed and program executed are consistent with the "best in class" principles of marketing communications. (2-4 quarter hours)

FA 330
FUNDAMENTALS OF GLOBAL MARKETING
Undergraduate
This course will help students to understand the basic concepts and practices necessary to market products and services in the global marketplace. The major outcomes of this learning experience will be: identifying activities, principles, and challenges of the marketing process, as applied domestically and internationally; understanding market segmentation, target marketing, and market research and their applications; applying the "4 Ps" of marketing - product, price, promotion, and place/distribution - to domestic and global business; and becoming familiar with key issues and international situations encountered when marketing products and services globally. (2-4 quarter hours)

FA 331
COMMUNICATION, PRESENTATIONS, PUBLIC SPEAKING
Undergraduate
According to The Book of Lists, fear of speaking in public ranks ahead of fear of dying and disease. While it might not be this extreme for everyone, this course addresses "speaker-fear" and provides learners with both theory and practical experience in the art and science of getting their point across clearly. We will examine personal learning styles and social styles and also work on developing presentations and actually delivering the message. Ice breakers, difficult situations, pacing and diction, openings and closings, and other tools and techniques are explored. (2-4 quarter hours)
FA 332
INVESTMENTS AND THE ECONOMY: A WELL-OILED MACHINE
Undergraduate
In this class, we will review major economic theories and determine what factors were in play when the theories were conceived, and how each has been used in the 20th century (and thus far in the 21st) to structure investment decisions. We will determine the various economic variables, as well as tax consequences, and how they impact choices we make for our investment portfolios. This course can be taken for only one competence. (2-4 quarter hours)

FA 333
SELF, WORK AND FAMILY: CHALLENGES AND CHOICES IN A CHANGING WORLD
Undergraduate
This course is designed for everyone who has experienced the challenge of managing a multi-faceted life in a rapidly changing world. It begins with an analysis of the definitions of “self,” “work,” and “family” across cultures, and examines recent research into generational theory to identify some of the psychological and historical antecedents of contemporary attitudes about these concepts. We then explore the dynamics among these concepts, including conflict, balance, integration, and boundary setting, paying particular attention to the impacts of technological change and the growing number of women in the workforce. Finally, we examine various models for adult development and engage in activities that allow for each student to articulate his or her personal priorities and to develop life and work strategies that enhance workplace performance, productivity, and personal fulfillment. (2-4 quarter hour)

FA 334
HUMAN RESOURCE AND TALENT DEVELOPMENT FUNDAMENTALS FOR MANAGERS
Undergraduate
This course is designed as an introduction to the practices of human resources (HR) in a corporate environment. It will target the practices that managers need to know such as recruiting, training, hiring, and terminating employees as well as the basics of HR law. Additional content that will be addressed includes headcount management, performance appraisals, learning & development, compensation basics, and grievance processes. This course will equip managers with the information they need to know without making them Human Resource experts but rather how to work effectively with their HR counterparts. (2-4 hours)

FA 335
UNDERSTANDING RISK MANAGEMENT IN THE WORKPLACE
Undergraduate
This overview course in risk management will introduce managers to the various types of risk that needs to be managed in the workplace. Numerous areas such as operational risk, market risk, global risk, and customer risk will be investigated. While this course is not to create students who will be experts in risk management this course will allow them to identify and analyze areas of potential risk to the assets of their organization. Students will use case studies to ensure that proper communication happens for key risks within the organization. (2-4 hours)

FA 336
DESIGNING PROFESSIONAL TRAINING PROGRAMS
Undergraduate
Training is one thing; training that's really used is the thing. This course prepares the student to identify and select design elements that vary training rhythm in order to maintain interest. Next, the training program content -video clips, role-playing exercises, quizzes, and round-table discussion-fosters behavioral change in those being trained. This course can be taken for only one competence. (2-4 quarter hours)

FA 337
FOCUSBNG ON ASSESSMENT OF TRAINING NEEDS
Undergraduate
To put it simply: who needs training and why? Needs Assessment is the third key step in the creation of business training programs. It unearths areas for training and identifies groups who should receive it. A five-week, close examination to help recognize and prioritize essential information. (2-4 quarter hours)

FA 338
EVALUATION AND VALIDITY OF TRAINING RESULTS
Undergraduate
Discover how your training benefits both student and the company. Sophisticated evaluation techniques currently in use by the most respected training organizations are analyzed and tested in this class. In addition, we examine ways to support your own training designs with proof of their validity and reliability. This course can be taken for only one competence. (2-4 quarter hours)
FA 339
PROFESSIONAL BUSINESS WRITING
Undergraduate
This course develops writing skills used in a business setting. Effective writing skills are directly related to a person's ability to successfully maintain and grow in a career. And as our world continues to shrink globally, being able to produce clearly written communication across all cultures is a skill that is not only desirable but also essential. Through a process-oriented approach, you will learn to plan, investigate, organize, write, and revise successful business reports and correspondence. Emphasis is given to principles of effective professional writing, especially as they pertain to memos, letters, reports, proposals, e-mails and employment messages. You will also be introduced to collaborative writing and intercultural communications within a business context. Finally, you will learn to correctly use one of three different “styles” for documentation: AP (Associated Press), MLA (Modern Language Association) and APA (American Psychological Association). (2-4 quarter hours)

FA 340
IMPLEMENTING CORPORATE TRAINING PROGRAMS
Undergraduate
In this course, students will learn about the strategic process of effectively and efficiently implementing a corporate training program based on business drivers from design stages through measurement of results. This process includes defining requirements and success criteria, designing the process, implementing and powerfully communicating the program to the learners, and then understanding how to measure the success of the program. It is imperative to measure and report on the trends of the program and to understand why it is important. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation, communication, and measurement to ensure success in their future training program implementations. (2-4 quarter hours)

FA 341
MANAGING THROUGH TRANSITION: CHANGE MANAGEMENT FOR FIRST-LINE LEADERS
Undergraduate
An examination of the initiation and management of change processes in today's corporate environment. Special emphasis is placed on managing the effects of organizational change on the work group. Students learn to introduce, implement, and drive change. Additionally, students will learn to recognize and overcome resistance to change. Classes will contain videos and leading edge management techniques. (2-4 quarter hours)

FA 342
MARKETING MOVIES IN TODAY'S HOLLYWOOD
Undergraduate
The course will study in depth the art and science of motion picture marketing for both the major studio films as well as the smaller independent films that are released today. Film marketing encompasses different areas of responsibility and expertise including advertising, publicity, promotion, market research and merchandising, and we will study how they all work together in bringing a movie into the marketplace. The course will examine how a marketing campaign is created, how strategies differ for studio and independent films, and how the movie trailer and poster are created, as well as the costs of advertising, the power of publicity, and the importance of finding the right hook and target audience for niche films. This course provides an inside look into the economic and power structures behind the scenes that help determine which movies are made, distributed and marketed to the public. (2-4 quarter hours)

FA 343
TEAM LEARNING THROUGH PROJECTS
Undergraduate
This course focuses on both theory and practice of how teams learn. Related to theory, participants will review the text of various authors who have written about team learning. Each participant reads the required text and reviews a second book of their choice related to team learning. The participants then learn from each other the key points of the authors. In practice, participants immerse themselves in a project team that follows a sequence of problem solving steps from analysis through solutions.
FA 344
UNDERSTANDING AND ADDRESSING CONFLICT AT WORK: A LEADER'S GUIDE
Undergraduate
In the workplace differences of opinion are an important source of change, innovation and creativity. Yet when differences are not dealt with effectively, they can grow into conflicts that shatter important working relationships and require precious resources to resolve. Leaders need to be adept at dealing with differences respectfully and creatively to maintain the interdependent relationships that are replacing command and control power structures in today's decentralized, fast-paced organizations. This five-week course will introduce the skills needed to address conflicts in a constructive way and provide an opportunity to practice them. It provides an overview of skills and techniques that help leaders identify and address workplace differences that can lead to conflict as well as help them resolve conflict productively when it occurs so that relationships are preserved. Students will be able to distinguish between the methods of addressing conflict including arbitration and mediation; will identify potential sources of conflict in their own workplace; use skills associated with conflict resolution to facilitate change in non-conflict situations; identify archetypal roles associated with conflict and the story framework associated with the conflict resolution process. (2-4 quarter hours)

FA 345
THRIVING FROM BUSINESS SUCCESS
Undergraduate
Once an idea is proven feasible, time must be put into creating a business entity within which that idea can become a reality. This course teaches students the details associated with writing a business plan and forming and managing a functional business, and creates a deeper appreciation for what goes into starting and running a business. This class can only be taken for one competence. (2-4 quarter hours)

FA 346
LEADING FROM WITHIN: TAPPING YOUR INTERNAL WISDOM
Undergraduate
This course looks at leadership as a process of understanding the internal building blocks of effective leadership, whether you are a sole-entrepreneur or the CEO of a fortune-100 firm. It enables students to experience and learn the skills/tools necessary for an innovative approach to leading. The format is largely experiential, with emphasis on exercises, techniques and readings through which the students will investigate the creative process and how it is integral to all aspects of the business. The course is designed to open students to the creativity within themselves and their organizations, and to the tools that promote innovation and enhanced organizational effectiveness. (2-4 quarter hours)

FA 347
WRITING PERSUASIVE BUSINESS PROPOSALS
Undergraduate
The first step in the creation of effective training programs for in-house or out-sourced clients, this course probes deeply into the art and craft of creating persuasive proposals. It may be a surprise to learn that proposals are written to an effective, sensible formula. (2-4 quarter hours)

FA 348
UNDERSTANDING ORGANIZATIONS AND OURSELVES
Undergraduate
Organizations play an enormous role in our personal, business, and community development. At the same time organizations are shaping us, our participation in these organizations shapes their structure, values and behavior. In this course you will begin to understand the dynamic relationship between the individual and the organization, using your own experience as a starting point. This highly participatory seminar format course will give you many opportunities to learn from your own experience of organizations, and those of your colleagues. You will learn to frame your experience in terms of existing and emerging organization theory from the modernist and post-modernist perspective. While this course will be relevant to many, it will be particularly useful to those interested in working with or influencing organizations, including business people, managers, human resource and organizational development practitioners, and those working in the non-profit sectors. (2-4 quarter hours)

FA 349
TRAINING, TEACHING AND TEAMS IN THE WORKPLACE
Undergraduate
What is workplace learning? Why do employers want to train employees instead of hiring people already skilled, and how is the teaching task accomplished? Is workplace learning different from classroom learning? Do people learn better in groups? Do people accomplish more in groups? Less? Who is the best workplace teacher? Why? In this course, students will address the many concepts and problems raised by the acquisition of skills and knowledge in the workplace. By examining texts, case studies, and experience, we will uncover theories and methods of teaching and will define productive workplace education. (2-4 quarter hours)
FA 350
EFFECTIVE COLLABORATION: SKILLS, STRUCTURE AND CULTURE
Undergraduate
Collaboration or working in teams is part of most 21st century workplaces. It is intended to be a way to tap into the creativity, problem-solving skills and diverse perspectives of today's organizations in an effort to be competitive through creating and sharing knowledge. Collaboration is encouraged in traditional settings "face-to-face" as well as virtually. What does it mean to collaborate effectively? What are the skills, structures/tools and organizational cultures that promote collaboration? During this class students will take a very hands-on approach to exploring these questions while practicing the individual skills that support collaborative work. They will also explore and discuss the types of organizational structures and organizational cultures that support effective collaborative work. Working in groups they will document their shared understanding of these concepts using a free tool for creating a knowledge model of their collaborative efforts. (2-4 quarter hours)

FA 352
BUSINESS ETHICS AND SOCIETY
Undergraduate
In this class, we will explore major issues in business ethics related to labor, equal employment opportunity, worker safety and health, environmental quality, financial disclosure, and the role of government and free enterprise in preserving and enhancing our society and market operations. We will examine accepted business practices in light of human needs, justice, rights, and dignity. By exploring a variety of ethical frameworks and perspectives, we will consider the questions of whether or how moral imperatives and values work in the conduct of business.

FA 353
SYSTEMS CHANGE AND CHAOS THEORY
Undergraduate
This course focuses on the phenomenon of organizational change. It examines the natural environment as an example of the ways chaos can be a healthy, and often necessary, aspect of an organization's identity. As organizations continually reinvent themselves, chaos models are useful tools for assessing this change strategically. We address the following specific issues: (1) the complexities of inside, and outside, collaboration; (2) reinvention of the organizational relationship; (3) building a shared vision; (4) systems thinking; (5) Strategies for team-based learning and related leadership skills. (2-4 quarter hours)

FA 355
USING PERFORMANCE METRICS TO ANALYZE AND ENHANCE BUSINESS RESULTS
Undergraduate
Business performance cannot be viewed in a vacuum. It must be viewed in terms of past performance, current results, and where performance levels need to be in order to achieve desired outcomes. This course will explore the use of performance metrics as a strategic tool to enhance business results. Without an accurate, quantitative assessment of what is being done from actions to outcome perspective, it is difficult to set a course for positive change. Establishing a set of integrated performance metrics involves numerous business processes. In this context, the course will also examine mission statements, business plans, databases, the creation of key tasks, and the establishment of good employee relations through leadership initiatives. The importance that each of these elements has in the business process, as well as how they need to be integrated to produce optimum business results, will be discussed. (2-4 quarter hours)

FA 357
INTERNATIONAL BUSINESS IN THE GLOBAL ECONOMY
Undergraduate
The advances in communications technology have changed the global economy and have shaped communities throughout the world. The advent of the Internet, email systems, worldwide shipping capabilities and the pressure for profit production have contributed to the erosion of political and national lines in favor of international trade. Global trade agreements, the World Trade Organization, and the European Union illustrate the new era of cross-national trade taking precedence over tradition nationalistic interests. As the economy becomes more global, it becomes essential for all participants to understand emerging trends in order to thrive, sustain or survive. This course examines the resources used in international business and analyzes movements in the global economy. The process will include a study on how these economic changes affect global communities and redefine ethical systems. Students will learn to identify the underlying factors that move the global economy and what effects those movements have on various ethical, social and economic systems. New economies, economic processes and implementation, as well as political, social and ethical systems construct the global community of today. This globalization affects all in the workforce, regardless of level or perceptions. Each member of the global society should be able to recognize, adapt and interpret current trends in this new economy in order to make appropriate business, social and ethical decisions. This class consists of discussions focused on global systems, economic and ethic, introductory lectures on basic global economic concepts and theoretical frameworks. Students will participate in discussions of current events related to economic globalization and write reflective papers addressing their competencies. (2-4 quarter hours)
FA 359
ETHICAL BUSINESS BEHAVIOR
Undergraduate
Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations. (2-4 quarter hours)

FA 360
UNDERSTANDING TRAINING AND DEVELOPMENT BASICS
Undergraduate
Both in a stable and unstable economy, employers are compelled to make the best use of their human resources. With globalization of business, widespread and ever changing use of technology, and the ever-increasing demand by employees for work/life stability, employers are seeking ways to keep talented individuals a part of their workforce. One way in which they go about doing this is through training and development. As a manager, supervisor or HR specialist, it is important to understand the basic principles of employee training. Whether you are the initiator or consumer of training instruction, this course will help you develop an awareness of opportunities and challenges in employee training such as assessment of needs, training objectives, needs priorities, training methods and evaluation. This course has been designed as an overview course, and it is not intended for students who have extensive training and development experience. (2-4 quarter hours)

FA 361
TEAM BUILDING
Undergraduate
No matter what our expertise, discipline, or area of interest, we are and will continually become members of teams, work groups, task forces and committees in both our work and personal lives. What we once did in isolation, we now do with others. This awareness has required truly effective organizational leaders to examine, understand, and master the ways in which individuals interact in group and team settings. Team Building utilizes an experiential format to focus on a variety of concepts and practices associated with developing and managing effective teams. Different approaches to management, motivation and performance are addressed, along with barriers to effective team efforts. Participants will experience the roles of team member and team leader as they develop their understanding of the “whats” and “whys” of effective teams. Expected student outcomes include mastering the basic concepts, theories, and fundamental techniques in team development and maintenance, identifying current challenges and issues that exist in a variety of settings, including “virtual” teams, and identifying positive team management strategies and their application to those situations. (2-4 quarter hours)

FA 362
CHICAGO: AN ENVIRONMENTAL HISTORY
Undergraduate
This course will explore the history of Chicago from an environmental perspective. From the city's first days, its geographic location amidst surrounding natural resources has been key to the city's development. In this class, we will trace the historical relationship between Chicago and its environs. We will examine the transition of Chicago from a rising industrial power to its position as a burgeoning green urban center. We will study environmental movements of the last century and a half, from early urban reformers to more modern efforts to clean up the city’s air, water, and land resources. We will also consider issues of environmental justice, in terms of the distribution of living, working, and waste spaces. Finally, we will investigate contemporary environmental problems and solutions. Students will be expected to attend lectures, participate in class discussions, and research and present their findings on a current environmental issue in Chicago. (2-4 quarter hours) Competencies: S3C, H4, H1H.

FA 363
ACHIEVING WORK AND LIFE GOALS
Undergraduate
You will study the process of goal achievement from goal definition through development of a vision, review of resources and obstacles, strategic ordering of tasks and steps, effective communication and problem solving and development of an action plan. You will consider theories of goal setting, planning, communication, and negotiation, and engage in practical exercises that will require the application of theory. You will produce a completed action plan for a defined career or personal goal. (2-4 quarter hours)
FA 364
STATISTICS FOR MANAGERIAL DECISION, SOCIAL AND BEHAVIORAL SCIENCES
Undergraduate
This course introduces the fundamental concepts and methods of statistics with emphasis on real world applications to a wide variety of fields. Statistical methods constitute valuable analytical tools for decision and policy makings in the twenty first century. The apprehension of such techniques should enable business managers, policy makers, educators, behavioral scientists, and other social scientists to reach an informed and well presented conclusion that is based on real-life trackable phenomena. The course begins with a survey of basic descriptive statistics, data sources, and data collection and presentation. It then covers elementary probability theory, sampling, estimation, hypothesis testing, and linear regression. Those statistics and characteristics will be easily computed using the Microsoft Excel, Minitab, or other software. The course focuses not on mathematical proofs of theorems, but rather on practical issues involved in the collection, treatment, and interpretations of historical data from a wide variety of areas of interest, including finance, economics, education, psychology, public opinion, demography, immigration, and data in the related fields using the techniques of statistical inference. More importantly, it is crucial to keep in mind throughout this course that the reliability of any decision or policy making based on historical data depends on well constructed statistical inference. (2-4 quarter hours)

FA 365
THE LEADERSHIP EDGE
Undergraduate
The course is designed to give students a practical understanding of the ways transformational leaders are having a lasting impact on a wide array of organizations ranging from major corporations, to nonprofits, to international institutions. In the process, students will learn leadership lessons that can contribute to their personal and professional growth and development. The principles of deep change can apply to people at every level of an organization regardless of its size. The class is interactive and will include case studies as well as movies portraying transformational leaders who have pursued the vision of deep change. Multi-media activities will include small and large group discussions and presentations, research, report writing and video and audio tape presentations. Students prepare a paper based on personal experience, class activities and independent research to demonstrate their understanding of the competency chosen.

FA 366
CULTURAL PERSPECTIVES ON THE GLOBAL ECONOMY
Undergraduate
This course explores economic globalization from the perspective of the ethical and religious values of the world's major cultural traditions. For all their differences, the religious traditions of the world have one thing in common: the poverty, suffering and violence that afflict a tremendous number of people in our global economy. This course will explore how the world's religious and spiritual traditions can help us collaborate to reduce economic injustice and promote environmentally responsible development. In particular, we will focus on the unique perspective that Buddhism can bring to economics. The goal is to promote an intercultural dialogue that will help us learn collaboratively about some of the most important and practical issues of our day. (2-4 quarter hours)

FA 367
INTEGRATED MARKETING COMMUNICATIONS
Undergraduate
This course introduces the concept of Integrated Marketing Communications (IMC) which is the approach that more and more marketing and communications professionals are using to face the challenges of the contemporary market place. An increased rate of advertising clutter in most traditional media, the rapid growth of the internet, a more product knowledgeable and demanding consumer with an increased variety of options to chose from, higher pressures from manufacturers to retail chains and a global economy are only a few characteristics of today's business environment. We will use real examples of companies and industries to analyze the concepts of advertising, sales promotion, direct marketing, interactive/internet marketing, public relations and personal selling and the most common techniques for understanding consumer behavior and create an effective promotional campaign that integrates some of these tools to target specific markets. Additional skills for the creation of visual layouts and global market penetration analysis will be developed for some students depending upon their selected competences. (2-4 quarter hours)

FA 368
STRESS REDUCTION IN THE WORKFORCE
Undergraduate
A system of spiritual growth, a system of stress relief. In the business world, the stress on a person's life and health has a direct impact on their productivity and creativity. Studies have shown that as stress increases in someone's life, their productivity at work goes down. The current state of humanity and technology has created a world with a new type of stress; the pace and speed of interaction has increased to a rate where a person has to deal with an influx of information and, often, interactions with hundreds of people per day via different technologies. In this course we will study another worldview in order to develop survival skills that reduce our stress. This different world view is the Yogic tradition from India called Kundalini Yoga. By taking this course, students will develop stress relief techniques and a sense of great purpose in their business lives. We will lower the stress level in our lives by participating in Kundalini Yoga stress reduction techniques from a video, weekly meditation exercises and textbooks. (2-4 quarter hours)
FA 369
HUMAN RELATIONS IN THE WORKPLACE
Undergraduate
In this career analysis and development course, students examine the six key Human Resource functions with their accompanying principles, then examine and practice key Human Relations skills and roles in order to develop their competence in understanding how people perform in the workplace. Specifically, students will be involved in understanding the interrelated functions of: workforce planning, design of productive work systems, structure and process of labor law, development of flexible compensation/benefits programs, design of effective employee safety/security/health programs, and construction of intelligent information systems for the human resources environment. Students will witness and measure the practice of the key skills and roles including goal-setting, communicating, and negotiating. Students will also practice assessing performance, retention, and other human resource functions. Competencies: FX, L7, H3X, S3X. (2-4 quarter hours)

FA 370
STRATEGIC APPROACHES TO PROJECT MANAGEMENT
Undergraduate
Project management can be broadly defined as planning, scheduling of non-routine tasks, and allocation of resources to complete a specific project deliverable within a given time period. Today, global economic competition, limited resources, tight deadlines, and the complexity of projects demand knowledge of systematic project management techniques and applications of project management tools. This course is designed to provide a general framework to assist you in developing fundamental project management skills and the application of strategic approaches to successful project management. Topics include concepts and techniques in developing a project plan, budgeting, cost management, and scheduling. Project scheduling topics will address scheduling techniques (PERT- Program Evaluation Review Technique and CPM- Critical Path Method), methods to assess risk, resource allocation, and project acceleration. Additional topics include project monitoring, control, evaluation, and project termination processes. To demonstrate a basic knowledge of project management concepts, individual project case studies for this course will build upon competencies and utilize basic project management tools. (2-4 quarter hours)

FA 371
WORK AND THE MODERN SELF
Undergraduate
Our identities are shaped by the work that we do (and by the work that we do not have the opportunity to do). This course will address the impact of working and of the products of our work on our sense of self. For some people, "work" refers to one's job, the means of one's livelihood. Others use the word to describe volunteer work, housework, or other productive activities. Some people associate "work" with drudgery and compulsion, while others think of the word in terms of productivity and stimulation. We will consider work from the perspective of our needs and values, but also from the perspective of the needs of society. We will also consider the value that society assigns to different types of work (and the impact of that valuation on us and on various social groups). Other topics will include how work affects our family and social lives, how our private lives affect our experience of work, and the impact of technology on our work. (2-4 quarter hours)

FA 372
GENDER, MIGRATION AND THE NEW WORLD ORDER
Undergraduate
All over the world more and more women are migrating to different countries or parts of the world. The majority of these migrants are employed as “nannies, maids, and sex workers.” The global restructuring of national or regional economies results in massive unemployment and the destruction of traditional sources of livelihood. Women therefore migrate to other countries or parts of the world in order to secure their own and their family members' livelihoods, and an array of national policies and institutions propagate, mediate, and benefit from the global free trade of domestic or sex workers. In this course we address these issues by asking to what extent the traditional gender-based values of the old world order remain intact in this new economy while crossing divisions based on class, racial-ethnic, geopolitical, or cultural differences. Migrant women's experiences, voices, and individual and collective acts of resistance or organization are at the center of this course. (2-4 quarter hours)

FA 373
IRELAND FROM THE INSIDE OUT
Undergraduate
The Irish can lay claim to shaping and exporting to the larger world the work of musicians, poets, novelists, screenwriters and directors and the re-emergence of Celtic spirituality. All of this is an outgrowth of the tremendous social, economic and political changes occurring over the past twenty years in Ireland. This course examines the economic, social and political history of Ireland, as well as the forces shaping recent changes within the society. While the island's total size is only 52,341 mi² or approximately the size of Alabama with close to 4 million people living in the Republic of Ireland, it has been at the center of historic change and a crossroads for many shifts in European and world history. Students will demonstrate the competencies through class participation, field work, research and other assignments that will allow them to apply course readings, guest speakers, videos and discussion to their own interests. (2-6 quarter hours)
FA 374
LITERATURE AND CINEMA AND THEIR IMPACT ON THE HUMAN EXPERIENCE
Undergraduate
How does literature and film transform the human experience? Through fiction, drama, and film from different cultures, in this course, students will explore how these art forms shape the individual, and have the ability to transform us mentally, emotionally and physically. Through international literature and films, this course will emphasize the study of different cultures, different views, different systems of thought and values. The goal of this course is to learn that in spite of differences, there is a universality and sameness in humanity's emotions and needs. This course will focus on screening a variety of films, reading different forms of literature, and will require students to discuss and analyze films and books. (2-4 quarter hours)

FA 375
NARRATIVE FOR FREEDOM: THE LITERATURE OF AMERICAN ABOLITIONISM
Undergraduate
This course facilitates discussion and learning about a challenging subject in American history. Through literary writings from the Abolitionist Movement, we will study the oppressive nature of the American system of slavery as we read stories of resistance. Autobiographies are powerful sources— they animate life experiences and bring the past to life. The Narratives of slavery and freedom we will read in this class galvanized their 19th Century readers, as men and women bore witness to the violence and injustice they experienced under the slave system. They explicitly called upon the conscience of the nation— to abolish slavery and to live up to the ideals of freedom, equality, and democracy. In addition to rooting these Narratives in history, we will also explore how and why they were created, their rhetorical styles, as well as their place in black literary history. (2-4 quarter hours)

FA 376
PERSONAL MASTERY AND THE ORGANIZATION
Undergraduate
Peter Senge says, "Personal mastery goes beyond competence and skills...it means approaching one's life as a creative work, living life from a creative as opposed to a reactive viewpoint." This course starts with an introspective look into managing oneself, then moves into using tools to provide data on oneself and lastly, integrating the information into one's personal and professional life. Various personal development theories and models will be explored and used to build a Personal Development Plan. This course is for students who wish to engage in continual learning and self-reflection, and will provide an opportunity to identify ways for improving personal effectiveness, both at life and at work. (2-4 quarter hours)

FA 377
A LIVING MOVEMENT: TOWARD A WORLD OF PEACE, SOLIDARITY AND JUSTICE
Undergraduate
How can we make sense of the enormous changes taking place in our world? From the Egyptian victory to overthrow a dictator to the struggle of Wisconsin union members, non-violent actions are spurring more peace, solidarity and justice. How do we take part in building a movement of peace, solidarity and justice? Join the Living Movement course and travel to Memphis, TN for the joint conference of the Peace and Justice Studies Association and the Gandhi-King Conference. Over 1,000 people will attend to share stories from the front lines of the struggles for peace and justice and listen to evidence from scholars on the victories of non-violent action. Meet national leaders and network with activists from all over the country. (2-4 quarter hours)

FA 378
THE UNDERGROUND RAILROAD
Undergraduate
This course focuses on the geographic region of west central Illinois, specifically Jacksonville, the seat of Morgan County, Illinois. The engaging learning questions are: What does Jacksonville have to teach us about the Underground Railroad and why is that important? The activities of a developing nation coming to grips with the institution of slavery, manifest destiny, expansion and growth are the sources of present day identity. How these giant issues made an impact in a small town that was growing along with the rest of the nation serve as a metaphor for development of the west. Though we will deal with the real lives of real people and their experiences of daily life, we will also consider Jacksonville as an example for all those places that were equally active on the stage of national development and the pathway that led inevitably to the Civil War. We cannot consider all of the issues with which these early settlers contended, but we will focus our attention more narrowly and peer into the lives and times of these pioneers through the lens of "...our peculiar institution..." now known as slavery and the flight for freedom. We will consider the experiences associated with this flight from the perspectives of those who fled and those who helped the freedom seekers flee. We will consider a thirty-year time frame from 1830 to 1860 and we will inquire into the political, theological, educational, agricultural, and motivational traits and attitudes that brought people to this place and influenced their actions. We will draw connections between important personal values and why people came to this frontier of the national western boundary of the U.S., as well as how the institutions they built continue to transform our lives. (2-4 quarter hours)
WAR PRESIDENTS/ PEACE PRESIDENTS
Undergraduate
Presidents of the United States have been analyzed from various perspectives over the years: as Federalists or Anti-Federalists; as Whigs, Democrats or Republicans; as activists or conservatives; as friendly to business or labor or consumers; as good campaigners or bad; as popular or unpopular; successful or unsuccessful, and so forth. This course will look at the history of the U.S. presidency through the lens of War and Peace. Presidents have been entrusted by the People with enormous powers, but none so solemn and vital as those of "Commander-in-Chief." During the nation's 229 years, which Presidents have been primarily known for their roles as War Presidents? Which wars were "major" and which "minor"? Which wars were initiated by which Presidents? Which were wars in response to attacks on the United States? Which were wars initiated by Congress? Were all of these wars "Just Wars"? What is a "Just War"? Does it matter whether or not it is just or just that we win? Which Presidents pursued diplomacy to avert war? Which Presidents were known for their dedication to Peace? Which were both? How did the various Presidents handle tough times of war or peace? How did they perform as leaders and react to public dissent or support? What was the impact of their decisions on the nation's well-being? What lessons can we learn from these histories? Each student will individually study one President from the 18th or 19th century during the first five weeks of class; and a 20th century President during the final five weeks, by reading from various biographical sources. Each week students will bring their reading and research results to share with the class, so we gain an even broader perspective. We also will follow the unfolding events of the current U.S. overseas wars and the actions of the current President of the United States, Congress and Press.

ARTISTIC EXPRESSION THROUGH DIGITAL PHOTOGRAPHY
Undergraduate
A photographer is someone who combines the compositional skills of an artist, the analytical mind of a scientist and the observational soul of a poet. In this introductory course you will become all three as you study traditional photographic composition and interpret the images you captured with your digital camera in the darkroom of Adobe PhotoShop. (2-4 quarter hours)

CONFLICT AND COOPERATION AMONG NATIONS: BUILDING DEMOCRACY AND A FREE MARKET IN IRAQ
Undergraduate
This course is an introduction to international relations, the analysis of the actors, institutions, and events, which influence the processes of international politics, the market, and the development of strategy. The context of the course is based on the changes caused by 9-11 to international politics, markets, strategies, and the consequences of those changes. This course will use the effort to construct a democracy and a free market in Iraq as a case study to explore the larger changes occurring in the international system in the post 9-11 era. Every student will be expected to know the substance and controversies attendant to political, economic, and military developments in Iraq. Each of these areas is fundamentally critical in assessing whether building democracy in Iraq can succeed. A critical analysis of democracy in Iraq is a major goal of this course. (2-4 quarter hours)

DESIGNING ORGANIZATIONS
Undergraduate
While examining theories of organization and organizational behavior, students will: 1) Explore the raison d'etre of modern organizations and how they evolve. 2) Learn the core variables and processes that determine an organization's structure and capacity for achievement. 3) Consider the accelerating and transformational changes in current organizational design, including the impact of digital technology on organizational form, from classic forms to distributed and virtual organizations; the shift from organizations being risk averse to taking risks to enhance innovation; virtual work environments and shared offices; and how emphasis on collaboration has changed the organizational landscape. (2-4)

CONTEMPORARY ETHICS
Undergraduate
This course briefly examines the ethical responses to problems in contemporary society. The main emphasis will be to establish basic competence in the comparison of systems of ethics in an effort to assist dialogue in our pluralistic world. The goal of this course is to assist students in making decisions in today's highly charged socio-political world characterized and fueled by competing ethical tenets, and to consider their roles in the development of a tolerant society. (2-4 quarter hours)

THE ROLE OF GLOBAL BUSINESSES IN ERADICATING POVERTY
Undergraduate
In this course, students will explore globalization and the role of international businesses in creating jobs and making a profit as perhaps the best way to eradicate poverty in developing countries. We will also examine the role of the Millennium Development Goals (MDGs) in reducing poverty, promoting human rights, safeguarding the environment, and creating new global business partnerships. (2-4 quarter hours)
FA 385
THE AMERICAN DREAM: MAKING IT OR NOT IN THE USA
Undergraduate
Throughout our country's history, our culture has embraced the notion of the Great American Dream. Rags-to-riches heroes have fascinated and inspired us; have shaped a cultural belief system which teaches that anyone can be anything in America if they demonstrate the talent, the intelligence, and the willingness to work hard for financial success. Critics of the American Dream argue that it is simply not possible for everyone to prosper through determination and hard work alone. Our continued belief in the American Dream, they suggest, blinds us to the structural factors that influence individual success or failure such as class privilege and institutional discrimination. In this class we will examine the American Dream in detail. How and why did it develop in our culture? How is it taught and shared by members of our culture? How does the American Dream compare to cultural messages regarding individual capabilities in other countries? Does our belief in the American Dream empower or restrict individual potential? Through an examination of interdisciplinary readings, film and television material, and lively in-class discussions, students in this course will critically examine the American Dream and its impact on our culture, and on individual life experience. (2-4 quarter hours)

FA 386
EXPLORING THE NONPROFIT WORKPLACE
Undergraduate
Working in a non-profit organization can be a very rewarding experience. But how do you know what would be a good fit based on what you can offer? This exploratory course provides students with an overview of what ingredients make a non-profit successful. The lessons provide students with an understanding of how a social issue can be conceptualized into a program to form a non-profit organization. Students learn the basic operational components of an effective non-profit, explore best practices, determine how institutions impact social problems and evaluate their effectiveness. Students also reflect upon their own skills and abilities as they research or interact with non-profits to help guide them into an environment that matches their interests. The course is interactive and consists of a film, reflection, group and individual exercises, readings, discussion, research and writing. The final paper may consist of examining a social issue from an ethical perspective, analyzing the challenges faced by urban, suburban or rural settings, evaluating the effectiveness of how a social institution addresses a social problem or designing an individualized transition plan to volunteer or work in a non-profit organization. (2-4 quarter hours)

FA 387
AFRICAN-AMERICAN STUDIES IN CRITICAL PERSPECTIVE
Undergraduate
This course is important for students who seek to gain a comprehensive understanding of African-American history in the United States. It will begin with discussions of African culture, the Atlantic Slave Trade, and early forms of slavery/indenturing. It will pay particular attention to the colonial and Revolutionary experience, delving into the mass exodus of Africans during the Revolutionary War, and African-American's role and position in the country's formative years. Enslavement, the Civil War and Reconstruction will follow as key areas of study. In every discussion, students will be asked to look for parallels between the contemporary and 18th and 19th century African-American experience and, where appropriate, to identify key social and cultural thinkers and leaders of the various historical periods. The primary texts for the course will be John Hope Franklin's From Slavery to Freedom, articles and readings written by scholars and important early African-American artists and intellectuals, and video presentations.

FA 388
PUBLIC/ COMMUNITY RELATIONS
Undergraduate
Public relations is a tool for promoting an activity, an event, a company, a product, or a person. Students will learn about the various contexts where public and community relations activities can be used to increase the public's awareness of the value and worth of a particular product, person, or activity. Case studies will be used to illustrate how public relations can enhance one's image and visibility, especially in the fundraising or marketing world. Students will learn: 1) the overall purpose of public and community relations, 2) its use as a strategic marketing/promotional tool, and 3) how to develop a public relations plan that can be implemented. They will also learn the importance of knowing their audience and appropriately communicating messages to different groups. The course will examine the role that media, as both a social institution and a technological tool, plays in communicating a wide range of messages and information. (2-4 quarter hours)

FA 389
INTRODUCTION TO RESTORATIVE PEACEMAKING PRACTICES
Undergraduate
The course will provide an introduction to the emerging field of restorative justice and its application in the criminal justice system, schools, workplaces, communities, families and organizational settings. Restorative approaches are based on aboriginal and indigenous practices and traditions to build community, problem solve, resolve conflict, decision make, develop consensus, reconcile, celebrate and possibly heal. It is a growing movement that explores how relationships can be restored or built by recognizing the capacity of the individuals and community to identify, address and resolve their issues in a manner that meets their needs and allows them to move forward. We will examine various approaches to implementing restorative principles as well as the challenges of creating and sustaining restorative environments, initiatives and resources to support communities in developing safer and healthier relationships. The underlying dynamics that are usually at the root of conflict and alienation will also be considered to better understand and appreciate the possibilities and promise of restorative processes. (2-4 quarter hours)
FA 390
DIVERSITY: IN AND BEYOND THE WORK PLACE
Undergraduate
Diversity, Multiculturalism, Affirmative Action, Equal Opportunity Employer: these are all words that have historical significance and power in today's workplace. This course will examine how the United States workplace has attempted to address diversity and what have been the challenges along the way. Other aspects of life in the United States such as families, schools, churches and neighborhoods have functioned with less of an effort to represent the pluralism of society. This course will explore these differences and evaluate the experiences of the individual, organizations, and institutions from a multitude of perspectives. Students will demonstrate the competencies through class participation, group projects, journal entries and other assignments that will allow them to apply course readings, films, and discussion to their own personal experience. (2-4 quarter hours)

FA 391
THE POLITICS AND HISTORY OF THE VIETNAM WAR
Undergraduate
The Vietnam War was the longest and, perhaps, the most controversial of American Wars. This course will briefly examine Vietnamese society and the First Indochina War as introduction to discussing the Second Indochina War. This course has four main objectives: 1.) to examine why and how the Second Indochina War was fought; 2.) to analyze the portrayal of the war in literature and film; 3.) to analyze what has been learned, and what should have been learned, from this war and 4.) examine how such lessons influence contemporary policy and perceptions, (i.e. the significance of the Vietnam War in assessing the wars in Iraq and Afghanistan, the effect of the war on the decision making calculus of the media, public, and politicians). (2-4 quarter hours)

FCH 101
BASIC FRENCH I
Undergraduate
First quarter of beginning French. Listening, speaking, reading and writing French in a cultural context for the beginning student. This course is an introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

FCH 101S
BASIC FRENCH FOR SUMMER
Undergraduate
(Covers the equivalent of FCH 101 and the first half of FCH 102.) The first half of beginning French. Listening to, speaking, reading, and writing French in a cultural context for the beginning student.

FCH 102
BASIC FRENCH II
Undergraduate
Second quarter of beginning French. Continued emphasis on the four skills in culturally-authentic situations. This course is a continued introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.
FCH 103
BASIC FRENCH III
Undergraduate
Third quarter of beginning French. Completion of the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression. This course completes the introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and Francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

FCH 103S
BASIC FRENCH III FOR SUMMER
Undergraduate
(Covers the equivalent of the second half of FCH 102 and all of FCH 103.) The second half of beginning French. Further work on the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression.

FCH 104
INTERMEDIATE FRENCH I
Undergraduate
First quarter of intermediate French. Intensive practice in the use of French through listening, speaking, reading, and writing, and continued enhancement of the cultural awareness intrinsic to those skills. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students’ knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 103 or equivalent, including placement test or permission of instructor, is recommended.

FCH 105
INTERMEDIATE FRENCH II
Undergraduate
Second quarter of intermediate French. More concentration on the four language skills in an authentic cultural context. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students’ knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 104 or equivalent, including placement test or permission of instructor, is recommended.

FCH 106
INTERMEDIATE FRENCH III
Undergraduate
Third quarter of intermediate French. Developing more fluency in speaking, understanding, reading and writing French with a concomitant heightened awareness of the cultural dimensions of the French language. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students’ knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life. FCH 105 or equivalent, including placement test or permission of instructor, is recommended.

FCH 130
MOILSAP STUDY ABROAD
Undergraduate
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.
FCH 197
SPECIAL TOPICS IN FRENCH
Undergraduate
See schedule for current offerings.

FCH 198
STUDY ABROAD
Undergraduate
Variable credit.

FCH 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

FCH 201
ADVANCED COMMUNICATION I
Undergraduate
First quarter of advanced French. Developing culturally appropriate speech and writing through the study of speech acts and written
documents within the context of a systematic study and review of grammar and an introduction to translation. Students will read and prepare
orally all texts and questions assigned for each session. In class, time will be spent on oral communication activities. These activities will allow
students to express their views and impressions with precise terminology and help students acquire greater fluency and accuracy. FCH 106 or
equivalent, including placement test or permission of instructor, is recommended.

FCH 202
ADVANCED COMMUNICATION II
Undergraduate
Second quarter of advanced French. Focus on the differences between speech and writing with an emphasis on the latter as expressed in
compositions, editing, translation, and other writing activities. This course is designed to help students develop culturally appropriate speech,
writing, and translation through the study of speech acts and written documents within the context of a systematic study and review of
grammar. The course introduces sophisticated syntactical patterns of the language and increases students' vocabulary, thus enabling them to
write more elaborate compositions and improve their oral communication skills in a culturally appropriate manner. All students become
editors of DePaul's literary French magazine, Mille-Feuille, and participate in all stages of its publication. The overarching theme of the course
is the geography of France. Students will gain an in-depth understanding of France's geography, and be introduced to some of the regional
characteristics of its literature and culture, economy, cuisine, music, and handicap. FCH 106 or equivalent, including placement test or
permission of instructor, is recommended.

FCH 203
ADVANCED COMMUNICATION III
Undergraduate
Third quarter of advanced French. Developing a sophisticated spoken and written fluency using authentic texts as models for elaborated
discourse. Written texts and writing exercises reinforce oral expression through extensive (journal) writing and intensive writing (individual
and team compositions). The course includes advanced grammar work, occasional translation, and vocabulary enrichment. It utilizes Internet
resources to create a simulation. Students write collaborative chapters based on their work. FCH 106 or equivalent, including placement test or
permission of instructor, is recommended.

FCH 204
ADVANCED COMMUNICATION IV
Undergraduate
Continued refinement of advanced speaking skills by focusing on oral texts discussed in their sociocultural context. Backup support provided
through written texts and exercises. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 297
SPECIAL TOPICS IN FRENCH
Undergraduate
See schedule for current offerings.
FCH 298
STUDY ABROAD
Undergraduate
Variable credit.

FCH 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

FCH 301
THE MIDDLE AGES
Undergraduate
This course is an overview of medieval literature such as the Chanson de Roland and the poetry of Francois Villon. It looks at the diverse literary genres that characterize medieval literature and create its diversity. Some genres, such as the "roman courtois," are given special attention because of their singular importance. Readings are placed within the cultural context of their times in order to understand the values they convey. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 302
SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE
Undergraduate
This course follows themes developed across two centuries of French literature from 1600 to the end of the ancien regime. It looks at notions such as religion and disbelief as they move from philosophers like Descartes and the French moralistes to the philosophes; it presents conceptions of theater, the novel, and the essay as they evolve from the "grand siecle" to the "siecle des lumieres." It looks at the unfolding of classical French literature in a historical context that moves from royal absolutism to the demands of political and intellectual freedom that arise during the Enlightenment. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 303
ROMANTICS, REALISTS, AND REBELS
Undergraduate
This course is an introduction to the writings of the French Realists and to nineteenth-century reactions against Romanticism. Readings might include works by Balzac, Baudelaire, Rimbaud and Flaubert. The course objectives are to familiarize students with Realist writers in the tradition of French literature and to examine ways in which Realism helped define French literary thought in the nineteenth century. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 304
FRENCH CIVILIZATION I
Undergraduate
A survey of French civilization from its Gallic origins to the end of the ancient regime, this course focuses primarily on the history and culture of France, although it accords special attention to broader international developments such as the crusades. Beyond the tensions and exchanges between Islam and Christianity, some of the other key subjects this course addresses are feudalism, the Renaissance, the wars of religion, the centralized monarchy, and the Enlightenment. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 305
RENAISSANCE
Undergraduate
This course provides an overview of the literature of the French Renaissance with strong emphasis on its most distinguished writers. These may include Rabelais (novel), Ronsard and Du Bellay (poetry), and Montaigne (essays). The course also may treat some lesser literary figures such as D’Aubigne, Marot (poetry) and Garnier (theater). The course conveys a sense of the unfolding Renaissance aesthetic and objectives, ranging from the early exuberance of Rabelais to the later skepticism and caution of Montaigne. It chronicles the self-conscious attempt of French authors to create a literature that rivaled that of Greco-Roman antiquity. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.
FCH 306
SEVENTEENTH-CENTURY FRANCE
Undergraduate
This course is an overview of French literature of the classical period, i.e., the literature largely written during the reign of Louis XIV. The course approaches materials by genre covering theater (Corneille, Racine, Moliere), poetry (La Fontaine, Malherbe, Regnier, Tristan l'Hermite), the novel (Mme de LaFayette, Sorel, Furetiere), literary theory (Boileau), and the moralistes (Pascal, La Rochefoucauld, La Bruyere). FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 307
THE AGE OF ENLIGHTENMENT
Undergraduate
This course presents the French Enlightenment as a period of multiple liberations: the promotion of political liberty (the revolt against the absolutist monarchy), the condemnation of human slavery (most particularly in the colonies where it was rampant), the rejection of religious authority and dogma in the secular sphere (critique of the Roman Catholic Church and the advocacy of deism and atheism in place of Christianity), the exaltation of sensuality and the passions (libertine literature and the contestation of monogamy). The course examines the new cultural ideal, the philosophe, who fills the salons of the period. The course ends with several texts from the French Revolution. Most of the readings come from key writers of the period such as Diderot, Montesquieu, Rousseau and Voltaire, though they also include other writers of lesser magnitude. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 308
THE ROMANTIC MOVEMENT
Undergraduate
This course is a study of the works of Lamartine, Hugo, Vigny, and Musset, all major representatives of the Romantic movement in France. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 309
THE FRENCH NOVEL
Undergraduate
Topics may include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel. This course examines the structures and situations that often typify the novel and asks why the genre has enjoyed such a continuous popularity among readers over so many centuries. It treats topics such as the transformation of the hero/heroine, the relationship of the greater society to the protagonist, the trials of the protagonist, the cultural ideals embodied by the hero/heroine, and the implications of the fate of the main characters. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 310
FRENCH DRAMA
Undergraduate
Topics include: classical drama; romantic drama; contemporary drama. This course examines theatre practices in France across several centuries looking at the various art forms that populated its stages: tragedy, comedy, existentialist theatre, theatre of the absurd and contemporary creations. In addition to reading plays spanning from the 17th to the 21st centuries and putting these in their social context, students may view filmed productions of theatre performances and attend plays if possible. Authors might include Racine, Corneille, Moliere, Beaumarchais, Musset, Ionesco, Beckett and Reza. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 311
FRENCH POETRY
Undergraduate
Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets. This course is an exploration of French poetry. It provides a history of French poetry while outlining the socio-historical and intellectual context for poetic creation. The course is also an introduction to the techniques of literary analysis as characterized by "explication de texte," a close reading that looks at the various components of texts: the imagery, the style, rhyme scheme, structure, characterization, tone, etc. leading to an understanding of the overall structure and meaning of the piece. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.
FCH 312
TWENTIETH CENTURY WRITERS
Undergraduate
This course introduces students to some of the most prestigious literary figures of the earlier period of the past century, such as Proust, Gide, Malraux, Camus, Sartre, and De Beauvoir. It explores their work in the novel and, when appropriate, in other genres. The course situates the texts and authors within an historical and stylistic framework that indicates major twentieth-century concerns. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 313
THE SURREALIST REVOLUTION
Undergraduate
Nerval, Lautreamont, Breton, Aragon; films of Man Ray and Bunel. This course takes an interdisciplinary approach to the surrealist movement because the European avant-garde of the early twentieth century used all modes of expression to convey their artistic theories. The course explores surrealist writings and art of all kinds to assess the totality of surrealist modes of expression. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 314
CONTEMPORARY FRENCH WRITERS
Undergraduate
This course is an exploration of texts written by French authors since the 1940's. Students are taught to analyze a series of novels and short stories as well as the themes they develop and the narrative strategies they adopt. This course will also study the theories that have shaped the period: existentialism, the New Novel, feminism, the literature of transgression, the question of being and language, and Neo-Realism. Authors might include: Bataille, Perec, Blanchot, Yourcenar, Duras, Tournier, LeClezio, Guibert, Cixous, Ernaux, Tremblay, Conde, Ben Jelloun. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 315
CONTEMPORARY FRENCH CRITICISM
Undergraduate
Topics include: structuralist critics; feminist critics; post-modernist critics. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 316
FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN
Undergraduate
Classic and emerging writers of these regions. This course might include the contemporary Haitian writer Dany Laferriere in a multi-faceted course examining the historical, cultural, and political background of the Haitian question. Other iterations of this course might include writings of authors from Francophone Africa or the Caribbean studied within the context of their nations and of the Francophone world. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 317
THE LITERATURE OF FRENCH CANADA
Undergraduate
Classic and contemporary French-Canadian writers. This course is an introduction to established authors of French Canada whose works are considered classics. Authors to be read might include Louis Hemon, Gabrielle Roy, Yves Theriault, Antonine Maillet, Anne Hebert, and Michel Tremblay. While acquainting students with several forms of Canadian literature, this course intends also to familiarize them with many aspects of French Canadian culture in all its diversity. Topics covered might include the way of life in the wilderness of the Eastern Canadian forest; the disenfranchised in Montreal; Eskimo life and the Inuit culture; " le grand derangement " the removal of the Acadians from their land, now known as Nova Scotia, to Louisiana. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 319
FRENCH/ FRANCOPHONE WOMEN WRITERS
Undergraduate
This course is an exploration of recent texts written in French by a variety of women across the globe. It gives students a chance to discuss not only the place of these women within their own society but also the specificity of their relationship to French culture and language. From France, to Senegal, Benin, Congo, Algeria, Quebec, Egypt, Vietnam and Guadeloupe, the course will allow students to travel across socio-geopolitical borders and to explore the narrative strategies specific to these women. A few films might further contextualize the material. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.
FCH 320  
FRENCH FOR BUSINESS  
Undergraduate  
Advanced preparation for the use of French in the business world. This course focuses on acquiring business vocabulary, skills for dealing with French business partners, and the ability to comprehend specialized business journals and reports. It prepares students for using their knowledge of French in a business context. Extensive discussions of the role France plays in the European Union will also be included. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 321  
TRANSLATION  
Undergraduate  
Fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of the latest technologies such as web-based dictionaries, and provides an introduction to translating technical documents in medicine, law, sports, travel, and business. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 322  
FRENCH GRAMMAR AND USAGE  
Undergraduate  
This course is an examination of French grammar as a linguistic system and of notions of "standard" in written and spoken French. Recommended for future teachers and students interested in grammatical analysis. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 323  
TRANSLATION II  
Undergraduate  
Continued introduction to fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of translation theory and provides an introduction to translating documents in theory, journalism, hotel management, psychoanalysis, literature, advertising, cooking and cinema. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 324  
TRANSLATION III  
Undergraduate  
Intensive practice of French-English and English-French translation. The course includes a major portfolio project requiring collaborative work. It aims to equip students with proficiency in translating at an advanced level, to train them to locate and make appropriate use of reference material from a variety of sources, to write introductions and footnotes as needed, to help them understand the importance of familiarity with a subject matter and distinguish between various lexical fields, to teach them to comprehend and effectively manage the linguistic and cultural aspects of language transfer. Furthermore, the course provides students with an understanding of professional expectations in the field of translation. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 326  
FRENCH STYLISTICS  
Undergraduate  
An intensive writing course, providing rhetorical, linguistic, and literary analysis of varied styles of writing. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.
FCH 329
FRENCH CINEMA
Undergraduate
Topics in French film from its origins to the present day. A course on iconic French filmmakers of the last fifty years and their contributions to a creative reorientation of cinema in the context of the history of French cinema and film criticism. Topics might include: the New Wave and after, growing up in France and its colonies, love and eroticism, the representation of women in cinema, women directors and the deconstruction of female stereotypes, living on the margins, cinema of the suburbs, social renegades, the construction of the city. Through readings, class discussions, and film viewings, students gain an understanding of French films in light of their cultural and historical contexts. Directors studied might include: Francois Truffaut, Jean-Luc Godard, Diane Kurys, Claire Denis, Patrice Leconte, Andre Techine, Agnes Varda, Bertrand Blier, Matthieu Kassowitz and Sylvain Chomet. Students learn the basic concepts of film aesthetics necessary to an appreciation of cinema, along with a critical vocabulary in French for analyzing and discussing films. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 332
FRENCH CIVILIZATION II
Undergraduate
Intellectual, political and social background from the rise of Napoleon to the current time. This course describes the various political mutations of France from the Empire of the early nineteenth century to the Fifth Republic. The course presents critical social, literary, and artistic developments throughout the two centuries under consideration. A sample of cultural topics includes impressionism and cubism in art, and romanticism, realism and existentialism in literature. The course devotes significant attention to the creation of late-nineteenth century and early twentieth-century Paris (a time of French cultural pre-eminence in the West) when the city, initially under Haussmann's urban renovation projects, began to take on the physical form that so many people associate with Paris today. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 333
PASTEUR, MICROBES AND 19TH CENTURY FRANCE
Undergraduate
Louis Pasteur, one of the world's most important scientists, lived during a time of turmoil and explosive growth in France. A chemist and microbiologist, he is famous for his discoveries of the principles of vaccination, fermentation and pasteurization. In this course, students will read his scientific writings, as well as historical documents explaining the turbulent times in which Pasteur lived and worked. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 340
CONTEMPORARY FRANCE
Undergraduate
This course is an introduction to contemporary France through articles, books, films, web sites, and, when possible, direct interaction with French people via social networks. Although the course emphasizes France as it is today, it also seeks to point out underlying cultural/historical factors that govern French responses to particular situations. The course covers numerous topics from both high and popular culture. When timely, it makes comparisons between diverging French and American cultural perspectives. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 341
INTRODUCTION TO FRENCH LITERATURE I
Undergraduate
(Required of all majors.) Taught in Autumn quarter every two years on a rotating basis with FCH 342. This course is a survey of French Literature from the Middle Ages through the seventeenth century (le grand siecle). It treats some of the major authors/texts of the medieval, renaissance and classical periods of French literature and offers readings from a variety of genres: poetry (epic, lay, ballad, sonnet), theater (religious, profane, farce, high drama), and prose (philosophical musings, aphorisms, essays, novel). The course provides an overview of approximately six hundred years of French literature. FCH 106 or equivalent, including placement test or permission of instructor, is recommended. Offered autumn quarter of even numbered years.

FCH 342
INTRODUCTION TO FRENCH LITERATURE II
Undergraduate
(Required of all majors). Survey of French literature of the 18th and 19th centuries. Taught in Autumn quarter every two years on a rotating basis with FCH 341. By analyzing works and excerpts from major writings of the French canon, the course treats the progression from the Age of Enlightenment, putting an emphasis on the themes of love and virtue, to pre-Romanticism, and the libertine culture. The course then provides an overview of Romanticism and later nineteenth-century developments such as Symbolism in poetry and modernity. Authors to be read may include Rousseau, Sade, Laclos, Nerval, Hugo, Lamartine, Vigny, Balzac, Sand, Colet, Mme. d'Agouet, Mme. de Stael, and Flaubert. FCH 106 or equivalent, including placement test or permission of instructor, is recommended. Offered autumn quarter of odd numbered years.
FCH 345
THE AFRICAN PRESENCE IN FRANCE
Undergraduate
This course offers a cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. It is designed to increase students' understanding of immigration in France as experienced by a variety of African communities. Through sociological documentaries, literature, manifestoes, legal documents, music, films and cooking, students will learn about the experiences and reshaped identities of first and second generation immigrants from both Western and Northern Africa. A brief introduction to the history of immigration in France and to the French colonization and subsequent decolonization of Africa will be provided. Countries discussed include Algeria, Morocco, Tunisia, Senegal, Cameroun, and Mali. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 350
FRENCH PHONOLOGY AND PHONETICS
Undergraduate
(Required of all majors). An in-depth study of the language's sound system and intensive pronunciation practice. This course is designed to introduce advanced students to the structure of the sound system of the French language and--on a practical level--to help them improve their pronunciation. Lectures, discussions, practice sessions and group work are based on a main manual and various handouts as well as recordings of French speakers. FCH 106 or equivalent, including placement test or permission of instructor, is recommended.

FCH 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in French. Students must have the equivalent of 106 or higher ability in French to take this two credit component. Please contact the Department of Modern Languages if you have questions about these courses or about language placement.

FCH 397
SPECIAL TOPICS IN FRENCH
Undergraduate
See schedule for offerings.

FCH 398
STUDY ABROAD
Undergraduate
Variable credit. Students participating in the Institute of European Studies will be allowed to count a total of three courses (semester program) or five courses (year program) towards their major or minor requirements.

FCH 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

FCH 401
THE MIDDLE AGES
Graduate
This course is an overview of medieval literature such as the Chanson de Roland and the poetry of Francois Villon. It looks at the diverse literary genres that characterize medieval literature and create its diversity. Some genres, such as the "roman courtois," are given special attention because of their singular importance. Readings are placed within the cultural context of their times in order to understand the values they convey.
This course follows themes developed across two centuries of French literature from 1600 to the end of the ancien regime. It looks at notions such as religion and disbelief as they move from philosophers like Descartes and the French moralistes to the philosophes; it presents conceptions of theater, the novel, and the essay as they evolve from the "grand siecle" to the "siecle des lumieres." It looks at the unfolding of classical French literature in a historical context that moves from royal absolutism to the demands of political and intellectual freedom that arise during the Enlightenment.

This course is an introduction to the writings of the French Realists and to nineteenth-century reactions against Romanticism. Readings might include works by Balzac, Baudelaire, Rimbaud and Flaubert. The course objectives are to familiarize students with Realist writers in the tradition of French literature and to examine ways in which Realism helped define French literary thought in the nineteenth century.

A survey of French civilization from its Gallic origins to the end of the ancien regime, this course focuses primarily on the history and culture of France, although it accords special attention to broader international developments such as the crusades. Beyond the tensions and exchanges between Islam and Christianity, some of the other key subjects this course addresses are feudalism, the Renaissance, the wars of religion, the centralized monarchy, and the Enlightenment.

This course provides an overview of the literature of the French Renaissance with strong emphasis on its most distinguished writers. These may include Rabelais (novel), Ronsard and Du Bellay (poetry), and Montaigne (essays). The course also may treat some lesser literary figures such as D'Aubigne, Marot (poetry) and Garnier (theater). The course conveys a sense of the unfolding Renaissance aesthetic and objectives, ranging from the early exuberance of Rabelais to the later skepticism and caution of Montaigne. It chronicles the self-conscious attempt of French authors to create a literature that rivaled that of Greco-Roman antiquity.

This course is an overview of French literature of the classical period, i.e., the literature largely written during the reign of Louis XIV. The course approaches materials by genre covering theater (Corneille, Racine, Moliere), poetry (La Fontaine, Malherbe, Regnier, Tristan l'Hermite), the novel (Mme de LaFayette, Sorel, Furetiere), literary theory (Boileau), and the moralistes (Pascal, La Rochefoucauld, La Bruyere).

This course presents the French Enlightenment as a period of multiple liberations: the promotion of political liberty (the revolt against the absolutist monarchy), the condemnation of human slavery (most particularly in the colonies where it was rampant), the rejection of religious authority and dogma in the secular sphere (critique of the Roman Catholic Church and the advocacy of deism and atheism in place of Christianity), the exaltation of sensuality and the passions (libertine literature and the contestation of monogamy). The course examines the new cultural ideal, the philosophe, who fills the salons of the period. The course ends with several texts from the French Revolution. Most of the readings come from key writers of the period such as Diderot, Montesquieu, Rousseau and Voltaire, though they also include other writers of lesser magnitude.

This course is a study of the works of Lamartine, Hugo, Vigny, and Musset, all major representatives of the Romantic movement in France.
**FCH 409\nTHE FRENCH NOVEL\nGraduate**

Topics may include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel. This course examines the structures and situations that often typify the novel and asks why the genre has enjoyed such a continuous popularity among readers over so many centuries. It treats topics such as the transformation of the hero/heroine, the relationship of the greater society to the protagonist, the trials of the protagonist, the cultural ideals embodied by the hero/heroine, and the implications of the fate of the main characters.

---

**FCH 410\nFRENCH DRAMA\nGraduate**

Topics include: classical drama; romantic drama; contemporary drama. This course examines theatre practices in France across several centuries looking at the various art forms that populated its stages: tragedy, comedy, existentialist theatre, theatre of the absurd and contemporary creations. In addition to reading plays spanning from the 17th to the 21st centuries and putting these in their social context students may view filmed productions of theatre performances and attend plays if possible. Authors might include Racine, Corneille, Moliere, Beaumarchais, Musset, Ionesco, Beckett and Reza.

---

**FCH 411\nFRENCH POETRY\nGraduate**

Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets. This course is an exploration of French poetry. It provides a history of French poetry while outlining the socio-historical and intellectual context for poetic creation. The course is also an introduction to the techniques of literary analysis as characterized by "explication de texte," a close reading that looks at the various components of texts: the imagery, the style, rhyme scheme, structure, characterization, tone, etc. leading to an understanding of the overall structure and meaning of the piece.

---

**FCH 412\nTWENTIETH CENTURY WRITERS\nGraduate**

This course introduces students to some of the most prestigious literary figures of the earlier period of the past century, such as Proust, Gide, Malraux, Camus, Sartre, and De Beauvoir. It explores their work in the novel and, when appropriate, in other genres. The course situates the texts and authors within an historical and stylistic framework that indicates major twentieth-century concerns.

---

**FCH 413\nTHE SURREALIST REVOLUTION\nGraduate**

Nerval, Lautreamont, Breton, Aragon; films of Man Ray and Bunel. This course takes an interdisciplinary approach to the surrealist movement because the European avant-garde of the early twentieth century used all modes of expression to convey their artistic theories. The course explores surrealist writings and art of all kinds to assess the totality of surrealist modes of expression.

---

**FCH 414\nCONTEMPORARY FRENCH WRITERS\nGraduate**

This course is an exploration of texts written by French authors since the 1940's. Students are taught to analyze a series of novels and short stories as well as the themes they develop and the narrative strategies they adopt. This course will also study the theories that have shaped the period: existentialism, the New Novel, feminism, the literature of transgression, the question of being and language, and Neo-Realism. Authors might include: Bataille, Perec, Blanchot, Yourcenar, Duras, Tournier, Le Clezio, Guibert, Cixous, Ernaux, Tremblay, Conde, Ben Jelloun.

---

**FCH 415\nCONTEMPORARY FRENCH CRITICISM\nGraduate**

Topics include: structuralist critics; feminist critics; post-modernist critics.
FCH 416
FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN
Graduate
Classic and emerging writers of these regions. This course might include the contemporary Haitian writer Dany Laferrière in a multi-faceted course examining the historical, cultural, and political background of the Haitian question. Other iterations of this course might include writings of authors from Francophone Africa or the Caribbean studied within the context of their nations and of the francophone world.

FCH 417
THE LITERATURE OF FRENCH CANADA
Graduate
Classic and contemporary French-Canadian writers. This course is an introduction to established authors of French Canada whose works are considered classics. Authors to be read might include Louis Hemon, Gabrielle Roy, Yves Thériault, Antonine Maillet, Anne Hebert, and Michel Tremblay. While acquainting students with several forms of Canadian literature, this course intends also to familiarize them with many aspects of French Canadian culture in all its diversity. Topics covered might include the way of life in the wilderness of the Eastern Canadian forest; the disenfranchised in Montreal; Eskimo life and the Inuit culture; “le grand dérangement” the removal of the Acadians from their land, now known as Nova Scotia, to Louisiana.

FCH 419
FRENCH WOMEN WRITERS
Graduate
This course is an exploration of recent texts written in French by a variety of women across the globe. It gives students a chance to discuss not only the place of these women within their own society but also the specificity of their relationship to French culture and language. From France, to Senegal, Benin, Congo, Algeria, Quebec, Egypt, Vietnam and Guadeloupe, the course will allow students to travel across socio-geopolitical borders and to explore the narrative strategies specific to these women. A few films might further contextualize the material.

FCH 420
FRENCH FOR BUSINESS
Graduate
Advanced preparation for the use of French in the business world. This course focuses on acquiring business vocabulary, skills for dealing with French business partners, and the ability to comprehend specialized business journals and reports. It prepares students for using their knowledge of French in a business context. Extensive discussions of the role France plays in the European Union will also be included.

FCH 421
TRANSLATION
Graduate
Fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of the latest technologies such as web-based dictionaries, and provides an introduction to translating technical documents in medicine, law, sports, travel, and business.

FCH 422
FRENCH GRAMMAR AND USAGE
Graduate
This course is an examination of French grammar as a linguistic system and of notions of "standard" in written and spoken French. Recommended for future teachers and students interested in grammatical analysis.

FCH 423
TRANSLATION II
Graduate
Continued introduction to fundamental principles of translation. The main objective of this course is to introduce students to the fundamental principles of translation and to help them acquire the techniques for translating a range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of translation theory and provides an introduction to translating documents in theory, journalism, hotel management, psychoanalysis, literature, advertising, cooking and cinema.
FCH 424
TRANSLATION III
Graduate
Intensive practice of French-English and English-French translation. The course includes a major portfolio project requiring collaborative work. It aims to equip students with proficiency in translating at an advanced level, to train them to locate and make appropriate use of reference material from a variety of sources, to write introductions and footnotes as needed, to help them understand the importance of familiarity with a subject matter and distinguish between various lexical fields, to teach them to comprehend and effectively manage the linguistic and cultural aspects of language transfer. Furthermore, the course provides students with an understanding of professional expectations in the field of translation.

FCH 426
FRENCH STYLISTICS
Graduate
An intensive writing course, providing rhetorical, linguistic, and literary analysis of varied styles of writing. Cross-listed with FCH 326.

FCH 429
FRENCH CINEMA
Graduate
Topics in French film from its origins to the present day. A course on iconic French filmmakers of the last fifty years and their contributions to a creative reorientation of cinema in the context of the history of French cinema and film criticism. Topics include: the New Wave and after, growing up in France and its colonies, love and eroticism, the representation of women in cinema, women directors and the deconstruction of female stereotypes, living on the margins, cinema of the suburbs, social renegades, the construction of the city. Through readings, class discussions, and film viewings, students gain an understanding of French films in light of their cultural and historical contexts. Directors studied might include: Francois Truffaut, Jean-Luc Godard, Diane Kurys, Claire Denis, Patrice Leconte, Andre Techine, Agnes Varda, Bertrand Blier, Matthieu Kassowitz and Sylvain Chomet. Students learn the basic concepts of film aesthetics necessary to an appreciation of cinema, along with a critical vocabulary in French for analyzing and discussing films.

FCH 432
FRENCH CIVILIZATION II
Graduate
Intellectual, political and social background from the rise of Napoleon to the current time. This course describes the various political mutations of France from the Empire of the early nineteenth century to the Fifth Republic. The course presents critical social, literary, and artistic developments throughout the two centuries under consideration. A sample of cultural topics includes impressionism and cubism in art, and romanticism, realism and existentialism in literature. The coursedevotes significant attention to the creation of late-nineteenth century and early twentieth-century Paris (a time of French cultural pre-eminence in the West) when the city, initially under Haussmann's urban renovation projects, began to take on the physical form that so many people associate with Paris today.

FCH 440
CONTEMPORARY FRANCE
Graduate
This course is an introduction to contemporary France through articles, books, films, web sites, and, when possible, direct interaction with French people via social networks. Although the course emphasizes France as is it is today, it also seeks to point out underlying cultural/historical factors that govern French responses to particular situations. The course covers numerous topics from both high and popular culture. When timely, it makes comparisons between diverging French and American cultural perspectives.

FCH 441
INTRODUCTION TO FRENCH LITERATURE I
Graduate
Taught in Autumn quarter every two years on a rotating basis with FCH 442. This course is a survey of French Literature from the Middle Ages through the seventeenth century (le grand siecle). It treats some of the major authors/texts of the medieval, renaissance and classical periods of French literature and offers readings from a variety of genres: poetry (epic, lay, ballad, sonnet), theater (religious, profane, farce, high drama), and prose (philosophical musings, aphorisms, essays, novel). The course provides an overview of approximately six hundred years of French literature.
FCH 442
INTRODUCTION TO FRENCH LITERATURE II
Graduate
Survey of French literature of the 18th and 19th centuries. Taught in Autumn quarter every two years on a rotating basis with FCH 441. By analyzing works and excerpts from major writings of the French canon, the course treats the progression from the Age of Enlightenment, putting an emphasis on the themes of love and virtue, to pre-Romanticism, and the libertine culture. The course then provides an overview of Romanticism and later nineteenth-century developments such as Symbolism in poetry and modernity. Authors to be read may include Rousseau, Sade, Laclos, Nerval, Hugo, Lamartine, Vigny, Balzac, Sand, Colet, Mme. d'Agouet, Mme. de Stael, and Flaubert.

FCH 445
THE AFRICAN PRESENCE IN FRANCE
Graduate
This course offers a cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. It is designed to increase students' understanding of immigration in France as experienced by a variety of African communities. Through sociological documentaries, literature, manifestoes, legal documents, music, films and cooking, students will learn about the experiences and reshaped identities of first and second generation immigrants from both Western and Northern Africa. A brief introduction to the history of immigration in France and to the French colonization and subsequent decolonization of Africa will be provided. Countries discussed include Algeria, Morocco, Tunisia, Senegal, Cameroun, and Mali.

FCH 450
FRENCH PHONOLOGY AND PHONETICS
Graduate
An in-depth study of the language's sound system and intensive pronunciation practice, this course is designed to introduce students to the structure of the sound system of the French language and--on a practical level--to help them improve their pronunciation. Lectures, discussions, practice sessions and group work are based on a main manual and various handouts as well as recordings of French speakers.

FCH 491
FRENCH FOR READING
Graduate
Intensive review of basics of French grammar, vocabulary and sentence structure, for reading knowledge of scholarly articles in French.

FCH 496
PRACTICUM IN FRENCH INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

FCH 497
SPECIAL TOPICS IN FRENCH
Graduate
See schedule for current offerings.

STUDY ABROAD
Graduate
Variable credit.

FCH 499
INDEPENDENT STUDY
Graduate
Variable credit.
FIN 202
QUANTITATIVE REASONING
Undergraduate
This course is designed to provide students with an overview of basic statistical tools of financial analysis. Students will become familiar with the design and application of spreadsheet models for the analysis of financial data and tests of hypotheses. (2 quarter hours)

FIN 310 is a prerequisite for this class.

FIN 250
PROFESSIONAL BEHAVIOR & COMMUNICATION DEVELOPMENT
Undergraduate
This course is designed to help students articulate specific goals and implement strategies to successfully pursue career opportunities and help to develop a professional persona. Students will fine-tune their professional resume, begin to establish a personal brand, practice a variety of professional communications, and hone their interviewing skills. Students will participate in a variety of activities including lectures, assignments, and group collaboration.

Students must be intended or declared Finance majors to take this course.

FIN 290
FINANCE FOR NON-BUSINESS MAJORS
Undergraduate
This course will provide to non-business majors a foundation in the concepts and basic tools used in finance and financial management of the business firm, including time value of money, risk and return, interest rates and how companies raise money and reward their investors. Students will be able to understand at a basic level the financial statements, ratios and performance measures and financial markets and institutions they are likely to encounter in a general business environment. Students will also learn how to analyze and make more effective the operations of the firm from a financial perspective.

ACC 101, ECO 105 and MAT 137 are prerequisites for this class. MAT 137 may also be taken as a co-requisite.

FIN 310
INTRODUCTION TO FINANCE
Undergraduate
This course introduces students to the logic, principles, institutions, and terminology of finance. The goal of the course is to provide students with a basic understanding of the role of finance and its functions. It is designed to familiarize the students with tools necessary for making sound financial decisions, both at a personal level and at an enterprise level.

ACC 101, ECO 105 and MAT 137 are prerequisites for this class. MAT 137 may also be taken as a co-requisite.

FIN 311
CORPORATE FINANCE
Undergraduate
The goal of the course is to provide students with the basic tools and theoretical background necessary to understand the corporate financial decision making process. Emphasis is on valuation principles with application to bonds, stocks, and capital budgeting as well as issues involving the capital structure, working capital, and dividend policy.

FIN 310 and an intended or declared Finance major or minor are prerequisites for this class.

FIN 313
INVESTMENT BANKING
Undergraduate
This course is designed to provide students with an overview of investment banking, focusing on valuation, mergers & acquisitions, leveraged buyouts, and debt capital markets. The course is intentionally taught from a practitioner's point of view, exposing students to various analytical tools and to a full appreciation of what is all required to complete an investment banking transaction. The course will foster collaboration skills through group case studies and presentations. A real world learning component designed to give students a true sense of working in an investment banking environment is integrated into the course.

FIN 311 & (FIN 333 or ACC 304 or ACC 307) are prerequisites for this course.
FIN 317  
**PRINCIPLES OF CORPORATE FINANCE FOR ACTUARIES**  
Undergraduate  
This is the first course in corporate finance which is designed to introduce students to concepts and techniques necessary to analyze and implement optimal investment decisions by firms. The course focuses on the effect of time and uncertainty on decision-making. In the process, the course develops a framework for corporate financial decision-making, thus providing a solid foundation in the principles and practice of financial management. Topics include basic discounting techniques, stock and bond valuation, capital budgeting under certainty and uncertainty, and asset pricing. Also covered are the following valuation methods: Valuation with Multiples and Unlevered Free Cash Flow and the use of the weighted average cost of capital (WACC).  
ACC 101, ACC 102, ECO 105, ECO 106 and ([MAT 150, MAT 151 and MAT 152] or [MAT 160, MAT 161 and MAT 162]) and an intended or declared Actuarial Science major or concentration are prerequisites for this class.

FIN 320  
**MONEY AND BANKING**  
Undergraduate  
The study of money and banking as a means to understanding how operations of our financial institutions affect functioning of our economic system and evaluation of monetary policies and goals.  
ECO 106 and (FIN 310 or FIN 317) are prerequisites for this class. FIN 310 may also be taken as co-requisite.

FIN 323  
**COMMERCIAL BANKING**  
Undergraduate  
This course will analyze the role of commercial banks in the financial system and will focus on understanding what banks actually do, how they make money and how this has been changing over time, what risks they are exposed to and how they manage those risks. Students will learn how to analyze and evaluate banks' financial statements, develop an appreciation for the complexity of risk in banking and the role and responsibility of regulators. The course will introduce students to banking case studies designed to take concepts learned and how to apply them to real world situations. This real world learning experience will revolve around a corporate credit risk analysis.  
FIN 320 & (FIN 333 or ACC 305) are prerequisites for this class.

FIN 330  
**INVESTMENTS: THEORY & PRACTICE**  
Undergraduate  
This course focuses on Investment principles and problems. It seeks to develop the student's perception of risks and opportunities in investment instruments and markets. It will inform their description of the markets and the operational effects of current financial events upon the various markets.  
FIN 202 and 320 are a prerequisite for this class.

FIN 333  
**FINANCIAL STATEMENTS ANALYSIS**  
Undergraduate  
FIN 311 is a prerequisite for this class.

FIN 335  
**PORTFOLIO MANAGEMENT**  
Undergraduate  
Theories and techniques to achieve superior selection and management of securities portfolios. Review and evaluation of significant literature. Problems of timing and strategies in response to changing economic and financial conditions.  
FIN 330 is a prerequisite for this class.
FIN 340
INTERNATIONAL FINANCE
Undergraduate
The objectives of this course include: understanding the effect of political and economic factors on the financial decision-making of the firm, determining the major factors influencing currency value; analyzing and managing the spectrum of risks arising from a firm's international operations; and acquiring knowledge of the international financial system and the major players in that system.

FIN 320 is a prerequisite for this class.

FIN 350
REAL ESTATE ANALYSIS
Undergraduate
This course introduces essential institutional, legal, regulatory, and financial aspects of real estate in the U.S. economy and financial system. The course incorporates demographic data for real estate market analysis and includes an exercise in land use planning. PREREQUISITE(S): Junior standing

FIN 360
IPOs & VENTURE CAPITAL
Undergraduate
IPOs and Venture Capital will explore equity financing alternatives for private companies, including their final funding step as a private company - their initial public offering or IPO, when they go public. Although the course has some quantitative elements, the focus will typically be on the analytics - on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest and optimize incentives. The main emphasis is on the U.S., but fund-raising methods and options in other countries also will be covered. This course should be useful for those interested in investment banking, venture capital, private equity, or securities law, or those that hope to have a start-up of their own someday.

FIN 310 is a prerequisite for this class.

FIN 362
RISK MANAGEMENT
Undergraduate
Theories and techniques of risk management that employ statistical techniques which enhance risk decision-making. This course develops a framework of analysis that can be applied by corporate or investment risk managers.

FIN 320 is a prerequisite for this class.

FIN 363
DERIVATIVES: PRICING & APPLICATIONS
Undergraduate
This is an advanced course that focuses on the pricing models for the four derivative instruments: forwards, futures, options and swaps. The first part of the course is devoted to the two general classes of derivative pricing models: discrete time and continuous time, with each model's properties discussed in detail. These models are then applied to a range of realistic pricing situations which include swaps, exotic options and fixed income derivatives. The course concludes with a detailed examination of value at risk.

FIN 330 is a prerequisite for this class.

FIN 365
PRINCIPLES OF RISK & INSURANCE
Undergraduate
This course surveys fundamental principles of risk, the risk management process, and insurance as a systematic approach to transfer and finance risk. It examines how insurance offers protection against major risks that firms and individuals face, how the insurance market is structured, and how and why the industry is regulated. This course also delve into theories and philosophies that provide insights into how the risk management industry functions in the larger society. Emphasis will be placed on understanding that insurance is just one of the techniques to be relied upon in planning a comprehensive risk management program.

(FIN 310 & FIN 311) or FIN 317 are prerequisites for this class.
**FIN 366**
**FINANCIAL MODELING**
*Undergraduate*

This course will focus on the use of EXCEL in implementing financial theory to solve practical, real world problems in finance.

FIN 311 and FIN 330 are a prerequisite for this class.

---

**FIN 367**
**PROPERTY & LIABILITY INSURANCE**
*Undergraduate*

This course identifies property and liability loss exposures that corporations commonly face and examines how they manage these exposures. The theories and principles governing insurance contracts addressing these risks are then discussed in detail. The course also offers cases and data for an analysis of the commercial property liability Insurance and Reinsurance industry and recent market performance.

FIN 365 is a prerequisite for this class.

---

**FIN 368**
**INSURANCE INDUSTRY STRUCTURE & OPERATIONS**
*Undergraduate*

The course provides a study of the industrial organization of the evolving Insurance and financial services markets. Students are exposed to the structure, conduct and performance of the US and selected non-US markets. Students also develop an understanding of the state of captive developments and other alternative market participants.

BLW 201, FIN 320, FIN 365, MAT 135, MAT 136 and MAT 137 are prerequisites for this class.

---

**FIN 369**
**ACTUARIAL CAPSTONE**
*Undergraduate*

This is the capstone course for all Actuarial Science majors. The course is team taught by the math and Finance departments and is based on the material contained in the Actuarial Core Curriculum. The course mixes case studies with lectures to hone the student's analytical skills as well as to further develop verbal and written communication skills, the ability to work effectively within teams, and to engage in reasoned debate.

BLW 201, MAT 260, MAT 261, MAT 351, MAT 352, MAT 353, MAT 361, MAT 362, MAT 363, FIN 320, FIN 362, and FIN 365 are prerequisites for this class.

---

**FIN 380**
**CASES IN FINANCIAL DECISION MAKING**
*Undergraduate*

This is the capstone course for students majoring in Finance. The course applies the case study methodology to hone the student's analytical skills with applied finance issues, as well as to further develop verbal and written communication skills, the ability to work effectively within teams, and to engage in reasoned debate. This course will provide students the opportunity to apply and integrate the knowledge acquired in their previous finance courses.

FIN 310, FIN 311, FIN 320, FIN 330, FIN 202 and (WRD 202 or WRD 204 or WRD 206 or WRD 301) are prerequisites for this class.

---

**FIN 381**
**BEHAVIORAL FINANCE**
*Undergraduate*

The primary objective of this course is to better understand investor behavior, return predictability in asset markets, and corporate decisions by considering behavioral aspects of decision making. We will discuss market efficiency, psychology of decision making, anomalies, investor behavior, limits of arbitrage, and behavioral corporate finance.

FIN 310 is a prerequisite for this class.
FIN 393
FINANCE INTERNSHIP
Undergraduate
An academically supervised working experience in a major financial institution. Registration in this program requires approval of the department internship director.

FIN 394
APPLIED INTERNATIONAL PORTFOLIO MANAGEMENT
Undergraduate
This class manages real-dollar scholarship endowment that focuses on investments in international stocks. The course setting is a real world, collaborative, interactive environment that reflects the decision making process of an institutional portfolio team. Students will gain direct exposure to the management of a long-term, institutional portfolio with a stated hurdle rate and cash flow objectives. The class will have an investment fund structure, complete with industry analysts, regional analysts and portfolio managers (from an organizational standpoint, students select from "professional job descriptions" each quarter. Students earn 4 credits over 2 continuous quarters. They can also inquire about staying on for a third quarter. In their first quarter, students choose between taking a Regional Analyst or Investment Analyst role. Different roles have different responsibilities and provide different experiences to the student. All analysts are provided with an analytical framework and professional level tools to conduct equity research. Investment Analysts value, recommend and defend their investment analysis and make equity recommendations to their peers. Regional Analysts focus on political, economic and cultural issues that might affect the investing environment in each region and industry. In their second quarter, students will be eligible to move to a Portfolio Management role, but they can also choose to remain an Analyst (subject to space fulfillment). Portfolio Managers take an active role in the selection of securities, asset allocation and portfolio analytics of the fund. They also serve as mentors to the new Analysts, guiding and facilitating the overall research. Each role is fully outlined in a separate document (called Roles & Responsibilities). (2 quarter hours)

FIN 395
INVESTMENT SEMINAR
Undergraduate
The Investment Seminar is intended to provide a rich learning and application opportunity focusing on financial investing. The learning module comes about through the fusion of the academic knowledge gained from advanced courses in investments and corporate finance with the actual practice of analyzing securities and making and defending buy and sell recommendations for a ?live? portfolio. Students taking the course are paired with executives from top financial firms and will present stock recommendations at company headquarters. The course is unique to collegiate business education and provides a definite competitive edge in the job market.

FIN 396
HONORS SEMINAR
Undergraduate
This is a required course for all Honors Students in Finance. It is conducted on a year-long basis (Fall, Winter & Spring) for the benefit of the students in the program. Participants are required to attend all events sponsored by the class conductor. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the seminar's conductor. (2 quarter hours)

FIN 397
HONORS SEMINAR CONTINUATION
Undergraduate
This is a continuation of FIN 396 Honors Seminar. Students register for FIN 397 during autumn and winter quarters. Participants are required to attend all events sponsored by the seminar's coordinator. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the coordinator.

Status as an Honors Finance student is a prerequisite for this class.
FIN 398
SPECIAL TOPICS
Undergraduate
Content and format of this course are variable. An in-depth study of current issues in finance. Subject matter will be indicated in class schedule.

FIN 310 is a prerequisite for this class.

FIN 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in finance. (variable credit)

Junior standing with at least 88 cumulative units is a prerequisite for this class.

FIN 400
FOUNDATIONS OF QUANTITATIVE ANALYSIS
Graduate
This course provides basic instruction in mathematical and statistical methods as a foundation for GSB 420 Applied Quantitative Analysis. This course will focus on strengthening students' algebra and calculus skills and provide basic instruction in statistical methods. (0 quarter hours)

FIN 455
PRINCIPLES OF FINANCIAL MANAGEMENT
Graduate
This course provides an introduction to finance. The goal of the course is to provide students with the basic tools and the background necessary to understand and analyze the corporate financial decision-making process. The course is designed to familiarize accounting students with tools necessary for making sound financial decisions at the enterprise level. Topics covered include concepts in time value of money and their application to stock and bond valuation, capital budgeting, portfolio management, firm's capital structure, dividend policy, and derivative instruments. (2 quarter hours)

Status as a graduate accountancy student is a prerequisite for this class.

FIN 500
UNIVERSITY EXPERIENCE: ACADEMIC AND BUSINESS CULTURE
Graduate
This course provides students with an understanding of how to be successful in the United States academically and professionally. The course covers concepts, methods, and tools necessary to face the challenges of studying and working in the U.S., paying particular attention to unique challenges faced by international students from Asia and other regions of the world.

FIN 501
ETHICS IN FINANCIAL MARKETS
Graduate
This seminar course will examine both ethical issues and conflicts of interest that face financial decision makers in today's business world. The class will feature case studies and guest speakers as the key teaching tools, supplemented by short lectures and student simulations/exercises. Each class period will be devoted to a different contest in which to consider topical issues. We will look at and discuss ethical issues facing financial services companies, corporates (both public and private), as well as not for profits. We will examine these issues, where applicable and relevant, from multiple perspectives: Board of Directors, Executive Management, Shareholders, Regulators, Suppliers and Customers, Competitors, Employees and Communities. Some of the discussion will purposefully consider the additional realities of differing culture and values in the international context.

FIN 523 is a prerequisite for this class.
FIN 510
ADVANCED MONETARY THEORY AND POLICY
Graduate
This course is designed to provide the analytical tools for a critical examination of monetary and fiscal policies together with their impact on economic activity in general, and on the commercial banking system in particular. Problems involving interest rates, the value of money and qualitative portfolio changes are examined in detail in the light of current theoretical contributions.
FIN 555 is a prerequisite for this class.

FIN 512
COMMERCIAL BANKING
Graduate
The objective of this course is to analyze the role of commercial banks in the financial system in order to understand the problems and issues confronting bankers now and in the future. The student will learn to measure and evaluate bank performance; understand how banking firms make their money and how this has been changing over time; understand the management of assets and liabilities, the valuation of bank mergers and acquisitions, and how government policy influences the behavior of commercial banking firms. The course applies traditional finance and strategic management concepts to the management of financial institutions. The emphasis will be on developing a toolkit to solve problems not only in commercial banks but also in other financial services firms. The student will develop proficiency in relevant financial concepts, analytical frameworks, data analysis, and techniques in the field of financial economics. The course consists of a blend of lectures, discussions, and case studies.
FIN 555 and GSB 420 are prerequisites for this class.

FIN 513
MONEY AND CAPITAL MARKETS
Graduate
This course analyzes interest rates, foreign exchange rates, federal funds futures market, the operation and regulation of financial institutions, and the impact of Central Bank actions on securities markets and the economy. The educational objective of the course is to provide graduate business students with the opportunity to acquire a thorough understanding of the theoretical and applied concepts that determine the operations of the money and capital markets. When you finish this course you will be able to demonstrate how the release of economic news about the real sector and the conduct of monetary policy influence the pricing of assets (interest rates and foreign exchange rates); measure and evaluate the impact of central bank actions on securities markets and the economy; understand the importance of having an independent central bank for macroeconomic performance; measure and evaluate the price volatility of interest-bearing securities; and understand how central bank monetary and regulatory actions can affect the stability and soundness of financial institutions. This course is designed to achieve maximum student involvement in order to add the greatest amount of value to their graduate educational experience. The emphasis will be on developing a toolkit to solve problems that financial analysts and other researchers encounter in security markets and financial institutions. We desire to become proficient in certain financial market concepts, analytical frameworks, data analysis, and various techniques in the field of financial economics. Accordingly, the course is structured to include extensive reading, several written statistical assignments, and class discussions that are based on the readings. These written assignments have three objectives: to make sure that the reading material has been absorbed in full measure; to serve as the foundation for class discussions; and, to provide students with the opportunity to demonstrate their understanding of the substantive class material and the ability to apply this material in "real world" situations.
FIN 555 and GSB 420 are prerequisites for this class.

FIN 523
INVESTMENT ANALYSIS
Graduate
This course provides an introduction to capital markets and financial instruments with an emphasis on security valuation. It is not a course on personal investing. The course builds on FIN 555 and covers relevant aspects of fixed-income markets, asset pricing, portfolio management, equity markets, and derivatives markets. The course provides background material for both FIN 662 (Derivatives Valuation) and FIN 675 (Cases in Investments and Financial Engineering).
FIN 555 and GSB 420 are prerequisites for this class.

FIN 524
FINANCIAL STATEMENT ANALYSIS
Graduate
This course provides an introduction to financial statement analysis from a global perspective by focusing on the International Financial Reporting Standards (IFRS). The emphasis is on the use of company financial reports to evaluate the historical, present, and prospective performance and financial soundness of a company for the purpose of financial decision-making.
FIN 555 and GSB 420 are prerequisites for this class.
FIN 525  
PORTFOLIO MANAGEMENT  
Graduate  
This course covers topics and techniques appropriate for institutional portfolio management. The course does not examine personal investment or personal portfolio management. The topics and readings are designed to be at the level of the portfolio management coverage in all the three levels of the CFA program.

FIN 523 is a prerequisite for this class.

FIN 526  
ADVANCED TOPICS IN INVESTMENTS  
Graduate  
This course provides an understanding of several topics that are important to successful completion of the CFA examination. The course will focus on equity valuation including valuation of closely held companies, real estate valuation, venture capital, behavioral finance, hedge funds, distressed debt, commodity futures, and benchmarks. The course will proceed from simple valuation models to those used to value assets wherein daily mark-to-market accounting is not available (e.g., real estate, venture capital, etc.).

FIN 523 is a prerequisite for this class.

FIN 528  
ALTERNATIVE INVESTMENTS  
Graduate  
Alternative investments are the fastest growing sector of the financial industry, and probably the least understood, including by many market professionals. Although the range of sophistication in people associated with alternative investments varies, it is more and more common to use them in investment strategies, either as direct investments, through funds of funds or structured products. The purpose of this course is to give students a good understanding and workable knowledge of the techniques that should be part of the toolkit of anyone investing in, analyzing and/or advising private and institutional clients on the inclusion of alternative investments in their portfolios. Because this course is geared for students wishing to pursue careers in Wealth Management or related fields, it will largely be taught from a practitioner’s point of view. Throughout the course we will pay special attention to capital market trends as they relate to the various investment vehicles we discuss. We will also turn our attention to corporate governance issues as they pertain to alternative investment strategies.

FIN 523 is a prerequisite for this class.

FIN 530  
REAL ESTATE INVESTMENT AND FINANCE  
Graduate  
Analysis of real estate investment opportunities and the characteristics that distinguish them from other assets. Emphasis is upon forecasting cash flows and estimating risk. Case analysis is an integral part of the course technique.

Completion or concurrent enrollment in FIN 555 is required

FIN 540  
CORPORATE GOVERNANCE  
Graduate  
This course addresses the overall role that internal audit plays as a critical part of an organization's risk control and governance structure. Internal risk management systems and metrics are examined in detail. Compliance with these risk parameters are examined from the perspective of the Chief Risk officer, the Board of Directors, and the Chief Executive Officer.
FIN 551
PROBLEMS IN CORPORATE FINANCIAL POLICY
Graduate
This course enables the student to apply the basic principles of corporate finance learned in FIN 555 and in FIN 553 to problems in corporate finance with the complexities encountered in practice. Through cases and discussion of topical issues, the course provides the student with an opportunity to analyze practical financial situations and problems. The course requires the student to be familiar with fundamental concepts such as valuation methods (WACC, Free Cash Flow and Capital Cash Flow, APV, Trading and Transaction Multiples), portfolio selection, CAPM, and analysis of capital structure. The course emphasis is sufficiently general so as to be of interest to a wide cross-section of students. At its most fundamental level, the course attempts to improve problem-solving skills that relate to problem definition, gathering and organizing the relevant information, developing feasible alternative courses of action, evaluating alternative choices, and recommending and defending the best course of action. In addition to analyzing specific problems or issues, the course will consider how these issues relate to the strategic objectives of the firm and examine the "big picture" assumptions that are used in the numerical calculations. FIN 553 is strongly recommended.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 552
HEDGE FUND MANAGEMENT
Graduate
This is an experiential course focusing on investment analysis in the context of the hedge fund industry. The goal of this class is to give students working knowledge of the hedge fund industry by drawing upon the experience of simulated investment presentations to portfolio managers (in the classroom setting). It is designed to give students rigorous exposure to long/short equity strategies as a gateway to explore other fund strategies. Topics will include securities analysis, research strategies, short selling and portfolio management. The course will help students generate superior investment ideas by conducting creative, value-added research. Students will act as hedge fund analysts by working through the investment process: idea generation, analysis, and presentation, and should walk away with a working knowledge of the hedge fund industry.

FIN 523 is a prerequisite for this class.

FIN 553
ADVANCED CORPORATE FINANCE
Graduate
This course builds on FIN 555 and focuses on fundamental themes in corporate finance. Topics covered include the analysis of capital investments, valuation methods, cost of capital, real options, agency costs, corporate governance, payout policy, equity issues, hybrid forms of financing, and mergers and acquisitions. The main theme of the course is on valuation and the overall focus is on enhancing enterprise value. The course also uses several case studies to illustrate the application of finance theory to practical problems.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 555
FINANCIAL MANAGEMENT
Graduate
This course provides an introduction to concepts and techniques required to analyze and implement optimal financial decisions by firms and serves as the core course in the corporate finance sequence. The course focuses on the effect of time and uncertainty on investment and financing decisions. It develops a framework for corporate financial decision-making. Topics covered include basic discounting techniques, stock and bond valuation, capital budgeting, portfolio theory, asset pricing, and capital structure. The course uses several case studies to illustrate the application of finance theory to practical problems.

ACC 500 and ECO 555 and GSB 420, or equivalents, are prerequisites for this class.

FIN 557
INTERNATIONAL FINANCE
Graduate
This course examines the effect of political and economic factors on the financial decision-making of the firm. The objective of the course is to enable the student to i) utilize the knowledge of the determinants of currency values, and the mechanism through which they work, to forecast changes in currency values ii) to analyze and manage the spectrum of risks arising from a firm's international operations and iii) to be familiar with how the international financial system works and with the major players in the system.

FIN 555 and GSB 420 are prerequisites for this class.
FIN 558
MERGERS AND ACQUISITIONS
Graduate
The course provides an overview of common corporate restructuring strategies and the economic motives for undertaking them. Topics covered include mergers, acquisitions, friendly and hostile takeovers, financial re-capitalization, leveraged buyouts, management buyouts, going private, convertible securities, tracking-stock, spin-offs, split-ups, carve-outs and reorganization under bankruptcy, liquidation, and out-of-court restructuring. The course integrates corporate governance and agency dimensions, financial and strategic management aspects, and legal and accounting considerations into a unified framework. This framework is then used to investigate issues such as pre-merger planning, fact-finding, accounting and tax implications, anti-trust problems, post-merger integration, and the short-term and long-term shareholder wealth consequences of financial and organizational restructuring transactions. The course examines transactions that significantly affect a corporation's assets, liabilities, and/or equity claims. Transactions will be examined from the perspectives of both the corporation (e.g. CFO and CEO) and the capital markets (e.g. investors). Common "arbitrage" trading strategies involving corporate transactions will also be discussed. A basic understanding of financial options and pricing is recommended.

FIN 555 and (FIN 551 or FIN 553) are prerequisites for this class.

FIN 559
SUSTAINABLE VALUE CREATION
Graduate
This course is designed to introduce the concept of sustainability to the process of value creation. The role of financial management has traditionally been defined as one of value maximization. A complex set of questions arises, however, as to whether such maximization is to be undertaken 'unconstrained' and from the perspective of the shareholders alone. For example, should the interests of others, including those of the customers, employees, society at large, the government, the environment, be regarded as constraints to such an endeavor? Some of the recent contributions to the field suggest that most assumptions of the traditionalists (those arguing that the only purpose of the firm is to serve the shareholders and maximize their wealth) do not hold in 'the real world.' Therefore, they conclude that it is necessary that all relevant interests be recognized and taken into account. However, the unanswered question is: 'how does one do this?' This course is designed to pave the way toward the answers to this question. Our goal therefore, is to develop the theoretical relationship that exists between finance and sustainability, and to explore the practical issues associated with its implementation. In plain language, we will learn how to make a business case for making investments in sustainable and socially responsible projects. More ambitiously, our objective will be to develop a framework for the evaluation of all long-term benefits and costs associated with a project.

FIN 562
RISK MANAGEMENT
Graduate
This course examines risk management from a broad enterprise perspective by focusing on the various risks faced by a firm. The course covers various methods that can be used to minimize risk and its effect on firm value.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 564
RISK MANAGEMENT FOR INDIVIDUALS, FAMILIES AND ENTITIES
Graduate
This course develops an analytical framework that employs the tools and techniques for managing risks that affect total wealth throughout the lifetime of an investor or throughout an extended period defined by a family's or entity's objectives. The course starts with insurance markets and insurance products. After the discussion on insurance as a risk management tool, the discussion shifts to topics in financial risk management, including risk tolerance and asset allocation in a mean-variance framework. The remainder of the course adopts an integrative framework for managing other risk factors; such as those generated by uncertain earnings, mortality and longevity - that are not present in an institutional investment setting and discusses the role of financial risk management and insurance products for hedging those risk factors. At the level of the individual, the course views total wealth as a combination of financial assets and human capital and develops portfolio allocations and strategies for risk management accordingly. For families and entities, the focus is on asset-liability management as a tool for portfolio allocation and risk management.

FIN 528 is a prerequisite for this class.

FIN 565
PRINCIPLES OF RISK AND INSURANCE
Graduate
This course will provide students with an over view of the insurance industry and a foundation in the areas of property, casualty, and life insurance. Students will have a firm grasp of how insurance firms are able to meet their obligations while creating value for their stakeholders.
FIN 566  
RISK MANAGEMENT MODELING  
Graduate  
This course will use mathematical techniques via EXCEL to identify various risks and exposures affecting enterprises. Then, students will apply solutions that mitigate and control the risks and exposures as identified.

FIN 570  
WEALTH MANAGEMENT BOOT CAMP  
Graduate  
This zero credit course is designed to familiarize the student with the depth and breadth of topics covered throughout the curriculum. The overriding theme of this boot camp is two-fold: (1) to instill and emphasize the importance of ethical conduct in a field best characterized by the element of trust. Entering students will receive a preview of the standards of practice and the importance of ethical conduct to their long-term success. (2) to provide the students a means of an in-depth evaluation of his/her decision to pursue the degree. The student will be provided the opportunity to evaluate suitability of the field and the degree for his/her future career goals. The course will be delivered over a Friday-Saturday period (9:00A.M. - 5:00P.M.) immediately prior to the start of the Fall and Spring quarters. It will be taught by the team of academic and industry directors of the program. Where appropriate, industry guest speakers will also be utilized.

FIN 571  
FINANCING NEW VENTURES  
Graduate  
This course will focus on identifying, examining and evaluating various sources of original and growth capital. Emphasis will be on legal, financial and tax issues related to capital formation as well as specific problems experienced by the small-to-medium-sized firm undergoing rapid growth. Topics discussed will include financing startups, financial planning and strategy, going public, selling out and bankruptcy. A formal proposal for capital acquisition developed through field research will be required of each student. Cross-listed with MGT 571.

FIN 572  
FINANCIAL PLANNING, CAPSTONE I  
Graduate  
This course serves as a capstone course for the multifaceted task of providing wealth management services to high net worth families. Wealth management encompasses assessing the changing financial needs of a family over time, providing financial services to help them achieve their goals, assisting in the implementation of the plans, the monitoring of the changing environment and family circumstances, and the periodic review of the financial plan. The course will review the general principles of financial planning, address the need for wealth management services, the objectives of the planning process and the analysis of personal financial statements. In addition, the marketing of wealth management services will be woven into the course, since knowledge of the subject matter is most valuable when it can be applied to actual families. Development of a strategy, utilizing the tools and techniques for managing risk, requires the use of many different components, which must be considered on a consolidated basis. The basic components can be broken down into:1. General Principles of Financial Planning2. Insurance Planning and Risk Management3. Employee Benefits Planning4. Investment Planning5. Income Tax Planning6. Retirement Planning7. Estate PlanningThe course will emphasize the ethical and legal issues involved in maintaining and growing a wealth management services business. The course will be focused on a case study, in which financial plans, marketing plans, and revisions to those plans will be developed based on the changing needs of the family. Both written and oral presentations will be required. Can only be taken during the last quarter of study.

FIN 573  
FINANCIAL PLANNING, CAPSTONE II  
Graduate  
This course serves as a capstone course for the multifaceted task of providing wealth management services to high net worth families. Wealth management encompasses assessing the changing financial needs of a family over time, providing financial services to help them achieve their goals, assisting in the implementation of the plans, the monitoring of the changing environment and family circumstances, and the periodic review of the financial plan. The course will review the general principles of financial planning, address the need for wealth management services, the objectives of the planning process and the analysis of personal financial statements. In addition, the marketing of wealth management services will be woven into the course, since knowledge of the subject matter is most valuable when it can be applied to actual families. Development of a strategy, utilizing the tools and techniques for managing risk, requires the use of many different components, which must be considered on a consolidated basis. The basic components can be broken down into:1. General Principles of Financial Planning2. Insurance Planning and Risk Management3. Employee Benefits Planning4. Investment Planning5. Income Tax Planning6. Retirement Planning7. Estate PlanningThe course will emphasize the ethical and legal issues involved in maintaining and growing a wealth management services business. The course will be focused on a case study, in which financial plans, marketing plans, and revisions to those plans will be developed based on the changing needs of the family. Both written and oral presentations will be required. Can only be taken during the last quarter of study.

FIN 572 is a prerequisite for this class.
FIN 581
THE PSYCHOLOGY OF FINANCIAL DECISION MAKING
Graduate
This course studies the various behavioral strategies that people rely upon to make financial decisions. The course starts with a review of psychological research on intuitive judgment, belief formation, learning, memory, utility theory, risk attitudes, and choice over time. The course introduces concepts such as framing, heuristics, self-control, and conformity. These ideas are illustrated with practical applications to saving decisions, entrepreneurship, trust between financial advisors and their clients, and decision-making in groups. Class discussions are based on academic research.
FIN 555 is a prerequisite for this class

FIN 582
THE PSYCHOLOGY OF FINANCIAL MARKETS
Graduate
This course examines the structure and dynamics of asset prices in world financial markets from the perspectives of research in behavioral finance, portfolio management, and macroeconomic policy. Some prior learning in finance (preferably investments), economics and statistics, and a broad interest in the social sciences (psychology; sociology; history) are required. The course has use for investors and their advisors, as well as for anyone interested in financial history. Class discussions are based on academic research and accepted wisdom.
FIN 555 is a prerequisite for this class

FIN 583
BEHAVIORAL ASPECTS OF CORPORATE FINANCE
Graduate
This course examines selected aspects of investment and financing decisions made in corporations as well as some questions of corporate governance and organizational architecture. The course places special emphasis on corporate decision processes, i.e., on the psychological, sociological and organizational determinants of behavior (e.g., bureaucracy, management fads, or executive hubris). Class discussions are based on academic research.
FIN 555 is a prerequisite for this class

FIN 594
APPLIED INTERNATIONAL PORTFOLIO MANAGEMENT I
Graduate
The Applied Portfolio Management class is a hands-on experience where students learn through taking on key roles in managing an international endowment portfolio that supports scholarships in the Driehaus School of Business and the College of Music. The course setting is a real world, collaborative, interactive environment that reflects the decision-making processes of an institutional portfolio team. In their first quarter, students are assigned the role of Investment Analyst or Regional Analyst. Investment Analysts value, recommend and defend their investment analysis and make equity recommendations to their peers. Regional Analysts focus on political, economic and cultural issues that might affect the investing environment in each region and industry. In their second quarter, students are eligible to move to a Portfolio Management role (subject to position availability). Portfolio Managers take an active role in the selection of securities, asset allocation and portfolio analytics of the fund. They also serve as mentors to the new analysts, guiding and facilitating the overall research process. This course is open to undergraduate and graduate students. To be considered for this course, students must complete an application and provide supporting materials. If you are interested in enrolling in this course, please email Brian A. Thompson at bthomp24@depaul.edu.
FIN 555 is a prerequisite for this class

FIN 594-2
APPLIED INTERNATIONAL PORTFOLIO MANAGEMENT II
Graduate
This course is a continuation of FIN 594. Students taking this class will analyze the economic, political and investing climate of each region and country that is available for investing outside of North America. This class is as much about asset allocation as stock selection. The portfolio should consist of investments in both developed and emerging markets with an overall goal of creating a diversified portfolio that is structured in a way to minimize risk and maximize returns. Investments can include common stock, and exchange traded funds. (0 credit hours)
FIN 594 is a prerequisite for this class.
FIN 595
INVESTMENT SEMINAR
Graduate
The Investment Seminar is intended to provide a rich learning and application opportunity focusing on financial investing. The learning module comes about through the fusion of academic knowledge gained from advanced courses in investments and corporate finance with the actual practice of analyzing securities and making and defending buy and sell recommendations for a ?live? portfolio. Students taking the course are paired with executives from top financial firms and will present stock recommendations at company headquarters. The course is unique to collegiate business education and provides a definite competitive education and provides a definite competitive edge in the job market.

FIN 555 is a prerequisite for this class

FIN 617
QUANTITATIVE METHODS
Graduate
This course provides the student with a comprehensive introduction to the mathematics of finance. The course will focus on applying mathematical concepts, quantitative tools, and modeling techniques to practical problems encountered in finance.

FIN 555 is a prerequisite for this class

FIN 660
IPOs AND VENTURE CAPITAL
Graduate
In IPOs and Venture Capital, we will explore equity financing alternatives for private companies, including their final funding step as a private company: their initial public offering or IPO, when they go public. Unlike many finance classes, this is not primarily a quantitative course. While there are some quantitative elements, the focus will typically be on the analytics: on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest and optimize incentives. Our focus will be largely on the U.S., but we will also cover fund-raising methods and options in other countries. We will work in part from Harvard Business School Case Studies. This course should be useful for those interested in investment banking, venture capital, private equity, or securities law, or those who hope to have a start-up of their own someday.

FIN 523, FIN 555, and (GSB 400 or GSB 420) are prerequisites for this class.

FIN 662
DERIVATIVES VALUATION
Graduate
This course focuses on the theory and practice of the valuation of derivative securities such as forward contracts, futures contracts, swaps, and options. The course also examines the underlying properties of each of these instruments and their use in managing the various risks faced by market participants.

FIN 523, FIN 555, and (GSB 400 or GSB 420) are prerequisites for this class.

FIN 675
CASES IN INVESTMENTS AND FINANCIAL ENGINEERING
Graduate
This course primarily uses case studies to illustrate the application of concepts learned in Fin 523 (Investment Analysis) and in Fin 662 (Derivatives Valuation). The topics covered in the course include the term structure of interest rates, portfolio management, asset pricing, and market efficiency; portfolio performance evaluation; option pricing; management of interest-rate risk, credit risk, foreign-exchange risk, and liquidity and basis risk with options, forwards, futures, and swaps; and enterprise risk management. The course will hone the student's analytical and writing skills through group analyses of case studies and preparation of (case) write-ups.

GSB 420, FIN 555, FIN 523, FIN 617 and FIN 662 are prerequisites for this class.

FIN 676
CASES IN RISK MANAGEMENT
Graduate
This course addresses the overall role that internal audit plays as a critical part of an organization's risk control and governance structure. Internal risk management systems and metrics are examined in detail. Compliance with these risk parameters are examined from the perspective of the Chief Risk officer, the Board of Directors, and the Chief Executive Officer.
FIN 793
INTERNSHIP
Graduate
Knowledge acquired in the classroom is applied in an actual business environment through varied theoretical and basic assignments under supervision in industry, government or public finance.

FIN 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. In-depth study of current issues in finance. Subject matter will be indicated in class schedule. Offered variably.

FIN 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in finance.

FIN 300
FOUNDATIONS OF FINANCE
Undergraduate
This course provides a broad overview and introduces students to the logic, principles, institutions, and terminology of finance. The course is designed to familiarize students with the tools necessary for making sound financial decisions and provide a basic understanding of how finance relates to other business disciplines.

ACC 101, ECO 105 and MAT 137 are prerequisites for this class. MAT 137 may also be taken as a co-requisite.

FMS 401
ASYLUM AND REFUGEE LAW AND POLICY
Graduate

FMS 402
PRO-SEMINAR IN THE HISTORY OF FORCED MIGRATION
Graduate
This introductory course covers the history of forced migration from the two world wars to contemporary waves of displaced people who flee as a result of environmental destruction, climate change, civil and military conflict. The course will also cover the evolution of global legal instruments that address different forms of displacement. The course ends with a look at protracted displacement and internal displacement.

FMS 403
HUMAN RIGHTS LAW
Graduate
This course specifically examines the legal instruments in place to help displaced people that arise not out of national or international multilateral law, but out of the principle of human rights; the principle that by virtue of being human, we deserve basic protection. The course will look at the historical evolution of this principle to legal principle, its challenges, and the ways in which it is being deployed to help displaced persons, internally and internationally.

FMS 404
INTERNATIONAL CONFLICT MANAGEMENT
Graduate
The course focuses on theoretical foundations and practical implications of diplomacy, negotiations, meditation and peace building to solve and prevent conflicts. It offers reflective practices and concrete directions for creating constructive solutions to interpersonal, and inter-group, and international conflict.
FMS 405  
PUBLIC HEALTH AND FORCED MIGRATION  
Graduate  
This course is an overview of key public health issues for populations undergoing forced migration. The course emphasizes contextual factors relevant to the physical and psychosocial challenges faced by displaced populations. Using a community public health approach, the course will address: the challenges of health promotion; health care access and delivery; the everyday contexts that affect health; strategies for conducting public health research; and interventions for addressing health outcomes. Cross-listed with MPH 553.

FMS 406  
ELECTIVE I  
Graduate  
This course is a chosen elective in an area allied to forced migration studies. The course will be chosen in consultation with the director of the program or with an advisor.

FMS 410  
INDEPENDENT STUDY  
Graduate  
Students can register multiple times for this course number for independent studies with different subject headings.

FMS 411  
RESEARCH METHODS FOR PUBLIC SERVICE  
Graduate  
This course introduces students to the principles underlying scientific research and how these principles apply to policy design and evaluation. Students learn about research ethics, causality, sampling (both random and purposive), and collecting data through surveys, interviews, focus groups, and observation. Students learn applied research, including needs assessment, program theory and logic models, and process, outcomes, and impact evaluations. Cross listed with MPS 583.

FMS 413  
MANAGEMENT OF INTERNATIONAL NGOs  
Graduate  
This course examines management skills and trends of international nongovernmental organizations. Through specific case studies in the fields of international public service, developments and emergency, students learn current techniques to effectively manage projects, relations and operations of international non-governmental programs and development projects. Cross-listed with MPS 611.

FMS 414  
OPEN ELECTIVE  
Graduate  
This course is a chosen elective in an area allied to forced migration studies. The course will be chosen in consultation with the director of the program or with an advisor. It can be taken multiple times.

FMS 417  
NONPROFIT FINANCIAL ADMINISTRATION  
Graduate  
This course explores key issues in operations budgeting and capital budgeting. Specific skill sets include cash flow analysis, variance analysis, present value techniques, interpreting financial statements, and evaluating financial performance. Cross-listed with MPS 515.

FMS 450  
INTERNSHIP I  
Graduate  
Students will spend at least 150 hours a) doing an internship at a local refugee-related organization, b) working at the Asylum clinic at DePaul University's Law School or c) participating in DePaul University's Law School's Berlin study abroad program. These experiences will encourage them to ground their theoretical knowledge in the practice of working with refugee organizations and refugee populations.

Status as an FMS student is a prerequisite for this course.
FMS 490  
INTERNSHIP II  
Graduate

Students will work a further 150 hours at an organization in a more hands-on capacity. They can also consult with their adviser if, in exceptional circumstances, they would like to change their organization. In either case, they will consult with the Director or with their adviser.

GAM 200  
PLAY  
Undergraduate  
Exploring the concept of "play" from a variety of disciplinary perspectives including sociology, anthropology, psychology, literary and theater studies and the arts, this course discusses "play" as a central force in cultural, social, artistic and personal development. It intends to raise awareness for the ways in which "play" can promote creativity, mental and emotional health, problem solving as well as personal and social change. It analyzes the role of "play" as an element of negotiation and reconciliation between disparate forces within the individual and with others.

GAM 201  
HISTORY OF VI DEOGAMES  
Undergraduate  
This course provides an overview of the history of modern interactive entertainment starting with the early developments of the late 1940s up until the present day. The course covers five longitudinal perspectives, or themes. For each theme students will become familiar with notable game titles, events, people, technologies, game mechanics and genres.

GAM 205  
EVOLUTION OF GAMES  
Undergraduate  
This lecture course introduces students to the evolving forms, uses, and design of games. Topics covered include the relationship between game design and play, the role of games in fueling the technological imagination, the changing contexts in which games are designed and played (art, social impact, health, education), and the rise of the independent games sector. Students will produce weekly written responses to course material, lead a seminar discussion in small teams, and produce a final written or multimedia paper.

GAM 206  
HISTORY OF GAMES  
Undergraduate  
From "The Royal Game of Ur" (2500+ BCE) to "World of Warcraft" (2004), games have been a constant in human history. The forms of games, their experiential qualities, and their cultural significance have varied enormously from era to era and place to place. This class will examine particular games and game genres in their historical context using a case study format. We will focus on "indoor" games, those of chance and skill, as opposed to physical games and sports. The examples will be chosen (i) to have global scope and historic diversity, (ii) to relate to games that students will find familiar, and (iii) to raise particular issues in historical interpretation, the use of primary sources and changing concepts of leisure activity.

GAM 208  
VIRTUAL WORLDS AND ONLINE COMMUNITIES  
Undergraduate  
Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cybertecture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging. PREREQUISITE(S) WRD 104  

WRD 104 is a prerequisite for this class.
GAME DESIGN FOR NON-MAJORS
Undergraduate
This course approaches the study of computer games from three angles: first, as examples of media that can be analyzed and critiqued for their thematic elements, formal structure, plot and interactive appreciation; second, as complex software artifacts subject to technological constraints and the product of a labor-intensive design and implementation process; and three as a cultural artifact with behaviors and associations comparable in import to other popular art forms. Students will study the principles of game design and use them both to analyze existing games and to develop their own original game ideas. Students will also learn about the process of game development, starting from the game's narrative concept and moving to consideration of a game's components: the representation of the player, of artifacts, the virtual world that contains them and the interaction between them and the player.

FUNDAMENTALS OF GAME DESIGN
Undergraduate
This course provides students a practical foundation in game design with a focus on concept development, design decomposition, and prototyping. Using game design theory, analysis, physical prototyping, playtesting, and iteration students learn how to translate game ideas, themes, and metaphors into gameplay, game pitches, and design documents. Students will analyze and recognize play that exists in important games, stories, and other media.

ETHICS IN COMPUTER GAMES AND CINEMA
Undergraduate
Societies function based on normative ethics utilizing common sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded in games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact, particularly on children, will be discussed.

PRESENTATION AND COMMUNICATION
Undergraduate
GAM 229 focuses on effective written and oral communication for designers in the professional world and beyond. While covering the basics of writing various design documents from high concepts to production guidelines, and teaching various presentation formats and techniques, GAM 229 aims to raise students' awareness for the "human" aspects of becoming an effective communicator and offers experimental, creative solutions to communication problems, such as team or client issues. Based on psychology research, this course offers insights on what it takes to "hear others" and "be heard" and to create constructive, productive relationships. PREREQUISITE(S): None

INTRO TO GAME PRODUCTION
Undergraduate
Game development is a big business, and production teams can now exceed one hundred people. This course is an introduction to the production methods used in the game industry, and to the demanding role of the Producer on the game development team. Students will work to develop skills in team building, project presentation, organization, and dealing with people. Subjects covered include scheduling tools, collaborative software, project management, vendor relations, inter-departmental relations, and quality assurance. PREREQUISITE(S): GAM 245

HISTORY AND DESIGN OF ROLE-PLAYING GAMES
Undergraduate
Students learn the history of role-playing games and the process of world-building to collaboratively design and develop their own games that advance the genre. Topics include the psychological and social opportunities unique to the genre, as well as its history from table-top, to live-action and massively multi-player. Class time consists of lectures, workdays, workshops, playtests, and critiques. PREREQUISITE(S): GAM 224 or GAM 226

GAM 224 or GAM 226 is a prerequisite for this class.
GAM 240
PLAYGRAMMING
Undergraduate
This workshop introduces computer programming to artists and game designers. Programming is an art, but before students can create masterpieces they first need to explore, play, and sketch with code. Students learn basic concepts and techniques of computation and apply these to craft gameplay experiences, improvisational experiments, and software toys. Students will author code from scratch and remix code to complete their weekly projects. No prior programming experience or knowledge is required. PREREQUISITE(S): None

GAM 244
GAME DEVELOPMENT I
Undergraduate
This course provides students additional theory and practice with an emphasis on game design and storytelling for games. Students continue learning about game development processes and techniques and how to apply advanced game design principles to create components of a 2D game.

GAM 245
GAME DEVELOPMENT II
Undergraduate
In this course students will develop skills in game design and development through the creation of a 2D digital game designed from a set of client based restrictions. Emphasis will be placed on teamwork and development pipelines for the design and creation of assets and systems. Students will use a combination of prototyping, storyboarding, user stories, character breakdowns, system breakdowns and flowcharts in the design portion of the game. We will be using Gamemaker Studio as the engine to develop and implement the game. The goals of all design done in this course will focus around designing for the needs of a client; solving problems identified by the client; and providing transparency via reports and milestone deliverables. PREREQUISITE(S): GAM 226 and (GAM 244 or CSC 241 or CSC 243)

GAM 250
GAME SOUND DESIGN I
Undergraduate
This course is an introduction to the principles of digital audio and the methods employed to create, edit, and deliver sound for video games. The course examines the place of sound in video games, both artistic and technological. The course will cover the basics of sound in the physical and digital realm, sound effects editing, and sound effects delivery. Lectures, discussions, and videos will be used to examine the art and the process of adding sound to video games. Students will learn to edit sound assignments with Pro Tools and other current technologies.

GAM 312
PLAYTESTING
Undergraduate
In this course, students will learn how to identify design goals, form hypothesis about their designs, develop good research and interview questions, plan and conduct playtests, as well as how to evaluate playtest data so it can inform design iterations and help to make better games. PREREQUISITE(S): GAM 226

GAM 315
GAME SOUND DESIGN 2
Undergraduate
This course expands on topics covered in GAM 250. Students will further their knowledge of recording techniques for voiceover, sound effects, and music; editing voiceover and music; and mixing. The course will also introduce audio implementation using Unity. Coursework will utilize the recording studio extensively for in-class and out-of-class work. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound design for video games. PREREQUISITE(S): GAM 250
GAM 316  
**SCORING FOR GAMES**  
*Undergraduate*

Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances video games. The course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score for their own video game as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied. **PREREQUISITE(S): GAM 250**

GAM 250 is a prerequisite for this class.

GAM 317  
**GAME SOUND DESIGN AND SCORING STUDIO**  
*Undergraduate*

This course is intended to provide practical experience in audio production for video games, as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. It will build on the background and skills acquired in Game Sound Design 1 and Game Sound Design 2. Students will study the sound designs of different genres of video games, and then complete five projects in which they will be creating the sound designs for games of those genres. A key element of this course will be in-class discussions and critiques of students' work, both to sharpen their sound designing and critical listening skills. **PREREQUISITE(S): GAM 316**

GAM 325  
**APPLIED 3D GEOMETRY**  
*Undergraduate*

Review of mathematical foundation and techniques needed for the development of 3D graphics and game systems. This class will provide the foundation in linear algebra and 3D geometry required for implementing common tasks in 3D graphics and game systems. Topics include: vectors, matrices, transforms, coordinate changes, projections, intersection. **PREREQUISITE(S): CSC 301**

CSC 301 is a prerequisite for this class.

GAM 326  
**GAMES WITH A PURPOSE PRE-PRODUCTION**  
*Undergraduate*

This course introduces students to the growing field of Games With A Purpose (GWAP) and its manifold application areas such as health, education, social and personal change, activism, journalism, politics and advertising. After laying the theoretical foundation of games as expressive and persuasive media with transformational power, and establishing a framework for the design and assessment of GWAPs, the course focuses on the conceptualization, prototyping, playtesting and evaluation of concrete, client-based projects for purposes beyond entertainment. Instructor Permission Required. **PREREQUISITE(S): GAM 392 or GAM 362**

GAM 392 or GAM 362 is a prerequisite for this class.

GAM 329  
**PHYSICAL PROTOTYPING FOR GAMES**  
*Undergraduate*

This course will approach the study of Game Design with a focus on breaking designs into manageable elements and prototyping those elements in order to refine play. Students will learn how to develop game ideas and game systems with a focus on play procedures, rules, and designing for various types of possible players. Prototyping will involve various real world media in addition to paper write-ups and layouts. Students will engage in brainstorming exercises, develop game ideas and systems, and review and repurpose existing game mechanics. This course will help students find the balance between hard (planned logical) design and soft (more organic/emergent) design in order to develop compelling gameplay. **PREREQUISITE(S): GAM 224 or GAM 226**

GAM 226 or GAM 224 is a prerequisite for this course.
GAM 330
ADVANCED GAME PRODUCTION
Undergraduate
This course builds on the fundamentals covered in earlier courses (GAM230 or IS372/ECT372) by providing a practical, hands-on context in which students can learn the tools and techniques game producers use to manage and organize assets, workflows, tasks, bugs, resources, and personnel. In this course, students combine classroom lectures and lab time to learn production theory, tools, and techniques fundamental to successful game development. Through this experience, students learn the skills and knowledge needed to have an immediate, positive impact on game development. Topics include: the process to refine ideas for game concepts, gameplay, and narrative; quality assurance of subjective elements including gameplay and art; design and art outsourcing pipelines; and feedback strategies and community management. PREREQUISITE(S): GAM 230 or IS 372 or ECT 372

GAM 330 or IS 372 or ECT 372 is a prerequisite for this class

GAM 333
THE BUSINESS OF GAMES
Undergraduate
This course gives an introduction to the business aspects of the game development industry, including development, publishing, distribution and marketing. Subjects covered include game development contracts, milestone-based development, management techniques, marketing, customer and community support, personnel, budgeting, outsourcing, pipelines, and external partnerships. PREREQUISITE(S): GAM 229

GAM 229 is a prerequisite for this class.

GAM 334
THE BUSINESS OF INDIE GAMES
Undergraduate
This class will explore how to successfully run an indie game company using an arsenal of best practices. Topics include how to write a game design document for marketability and a business plan for an indie studio, as well as how to build and maintain relationships with the media. Students will also gain an understanding of how indie games fit into the game industry as a whole. PREREQUISITE(S): GAM 229

GAM 229 is a prerequisite for this class.

GAM 340
PRACTICAL SCRIPTING FOR GAMES
Undergraduate
This workshop introduces game scripting to artists and game designers. A game script is a short list of commands that control something in a game, such as how a character moves, or an enemy’s behavior. Students will learn to read, modify, and author scripts that generate and affect a variety of game elements over the course of weekly projects. PREREQUISITE(S): GAM 240 or CSC 241 or CSC 243

GAM 240 or CSC 241 or CSC 243 is a prerequisite for this class.

GAM 341
INTRODUCTION TO LEVEL DESIGN
Undergraduate
Level design is the art of creating believable environments, stages and missions for video games. This course explores topics including architecture, flow, pacing and puzzles. Using a 3D level editor, students will investigate technical design issues including the construction, texturing, lighting and scripting of modern game levels. The roles, duties and challenges of the level designer will also be discussed. PREREQUISITE(S): GAM 245

GAM 245 is a prerequisite for this class.

GAM 342
ADVANCED LEVEL DESIGN
Undergraduate
This class builds on topics covered in earlier courses, with a focus on creating believable worlds for videogames. This course emphasizes designing large exterior environments, advanced mission scripting, and integrated storytelling. Using a 3D level editor and formal level design process, students create fun, polished, memorable virtual worlds. PREREQUISITE(S): GAM 341 or GAM 392

GAM 341 or GAM 392 is a prerequisite for this class.
GAM 350
PHYSICS FOR GAME DEVELOPERS
Undergraduate
The course concentrates on Newton's Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics. PREREQUISITE(S): GAM 372 or (SE 350 and CSC 361)

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

GAM 351
EXPRESSIVE AUDIO SCRIPTING IN GAMES
Undergraduate
This workshop is for game designers, sound designers and programmers to learn how to creatively use audio in game engines. Students develop skills to effectively shape and manipulate game audio to achieve intended dramatic experiences. Topics include key terms and techniques, industry trends in game audio implementation, and how to advance the medium of games through audio. Students listen and critique each other's work, learning to assess game audio in terms of narrative, aesthetics and quality.

GAM 352
TOOL PROGRAMMING FOR GAME DEVELOPMENT
Undergraduate
This course focuses on the parsing and conditioning of game related assets for real-time game engines. Topics include the content pipeline, processing or standard file formats using modern API, integration of external tools, run-time file format design, command line and graphical user interfaces. PREREQUISITE(S): GAM 372 or (SE 350 and CSC 361)

GAM 372 or (SE 350 and CSC 361) are prerequisites for this class.

GAM 353
SOLO GAME DEVELOPMENT PROJECT
Undergraduate
Students independently create a complete short video game serving as its designer, programmer, and artist. The project is structured around a compressed development cycle that supports an appropriately scoped, polished game. From brainstorming an innovative concept to rapidly prototyping and iterating on gameplay, the course focuses on core gameplay loops and game feel. A survey of noteworthy games developed by single authors in short timeframes provides students with references to draw from. PREREQUISITE(S): GAM 340 and GAM 341

GAM 340 and GAM 341 are prerequisites for this class.

GAM 354
MAKING DEEP GAMES
Undergraduate
This workshop investigates the process of designing games about the human condition. It specifically focuses on the potential of games to tackle profound and abstract ideas (e.g. loyalty, dignity, courage and trust) by way of metaphor and analogy. Assignments will explore metaphorical games, games for persuasion and games for self-expression. Special emphasis is placed on the analysis of personal experiences and how they can be translated systematically into game designs that generate non-typical gameplay content. PREREQUISITE(S): GAM 226 or GAM 224

GAM 226 or GAM 224 is a prerequisite for this course

GAM 355
ADVANCED GAME DESIGN
Undergraduate
This is a studio course in which students work in teams to design and develop slices of polished small-scale gameplay experiences. The focus is on developing team-based creative and technical processes to produce innovative, engaging, and playable games. Teams will iteratively design and develop two distinct gameplay experiences or "vertical slices." Each slice will demonstrate an understanding of the role of game mechanics, game art, audio, and technology platform in creating a cohesive and compelling gameplay. PREREQUISITE(S): (GAM 340 and GAM 341) or GAM 355

(GAM 340 and GAM 341) or GAM 355 is a prerequisite for this class.
GAM 368
AUGMENTED REALITY GAME DESIGN AND DEVELOPMENT
Undergraduate
In this workshop students cultivate the skills to design, program and develop augmented reality (AR) games. Students learn about the unique affordances and design opportunities inherent to the platform. Based on the studio model, each student adopts a role on the development team, such as programmer, designer, and artist, and each is responsible for contributing professional work consistently each week. Because the platform of AR games presents unique challenges to developers (players often feel disoriented or over-tasked) teams first create a dozen AR toys, and build up the most promising experiences into games. Class time consists of lectures, workshops, workdays, playtests, critiques, and class discussions. PREREQUISITE(S): GAM 245

GAM 369
VIRTUAL REALITY GAME DEVELOPMENT
Undergraduate
In this workshop students cultivate the skills to design, program, and develop VR (virtual reality) games. Students learn about the unique affordances and design opportunities inherent to the platform. Topics include the history of VR, VR art, as well as toy design and development. Students collaboratively develop cutting-edge VR toys and games using the studio model in which each student adopts a professional role on the team such as programmer, designer, and artist. Class time consists of lectures, workshops, workdays, playtests, critiques, and class discussions. PREREQUISITE(S): GAM 245

GAM 370
RENDERING AND GRAPHICS PROGRAMMING
Undergraduate
This programming class will present the rendering pipeline and basic shader creation. Students will create their own graphics package using a high-level graphics API such as Direct X. Topics covered include illumination techniques, Gouraud and Phong shading, antialiasing techniques, texture mapping, blending and environment mapping. PREREQUISITE(S): GAM 325 and CSC 361

GAM 372
OBJECT-ORIENTED GAME DEVELOPMENT
Undergraduate
Students will learn principles and techniques needed to build robust and efficient large scale game software systems. Principles of object-oriented modeling, design, implementation, and testing of large-scale game systems will be emphasized. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): CSC 361

GAM 374
GAME ENGINE PROGRAMMING I
Undergraduate
Students will develop a basic 3D game engine. The focus will be on the implementation challenges and interdependencies between systems such as asset management, rendering, simple collisions, input/output, alarms, etc. Emphasis will be placed on developing the skills needed for robust, efficient, and portable implementation. PREREQUISITE(S): GAM 372 and GAM 325

GAM 376
ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES
Undergraduate
Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, and script-driven game object behaviors. PREREQUISITE(S): GAM 372 or (SE 350 and CSC 361)

GAM 245 is a prerequisite for this class.
GAM 377
GAME ENGINE PROGRAMMING II
Undergraduate
This class is a continuation of GAM 374. Students develop more complex systems for their 3D game engines: improved collision systems, terrain generation, and particle systems. Other advanced engine services are discussed and students are expected to research and implement one such system: sounds management, lighting system, tiered/broad phase collision system, advanced camera manipulation, etc.
PREREQUISITE(S): GAM 374
GAM 374 is a prerequisite for this class.

GAM 378
STRATEGY GAMES PROGRAMMING
Undergraduate
Turn-based and real-time strategy games. Abstract strategy games such as chess, backgammon, and bridge. Game themes and presentation of fantasy, historical and futuristic gaming scenarios. Ethically responsible content and social impact of different cultures, ethnicities, genders on the game play and game audience will be addressed. Game-player resource management. Implementation of strategy engines, 2D presentation and isometric projection. PREREQUISITE(S): GAM 376
GAM 376 is a prerequisite for this class.

GAM 380
CONSOLE GAME DEVELOPMENT ENVIRONMENTS
Undergraduate
Specialized computers for games with high-end graphics and sound capabilities and other specialized input and output devices form one of the largest game markets. In this advanced programming course students will gain hands-on experience writing and porting code for game consoles. PREREQUISITE(S): CSC 393 and CSC 374.
CSC 393 and CSC 374 are prerequisites for this class.

GAM 382
SERIOUS GAMES
Undergraduate
Explores the role of computer games and simulations for education and training. Topics include: overview of the science of learning, analysis of games for different purposes and types of content, assessment of learning, and learning through game creation. Students will design, implement, and evaluate a serious game. Development of socially responsible and ethical behaviors will be a primary objective.
PREREQUISITES(S): GAM 245
GAM 245 is a prerequisite for this class.

GAM 386
GAME PROGRAMMING FOR MOBILE DEVICES
Undergraduate
In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multi-player game architecture. Such concepts as: building a custom game library, multi-player game programming, infrared, wireless and socket communication between devices will be discussed. PREREQUISITE(S): CSC 371
CSC 371 is a prerequisite for this class.

GAM 391
GAME PERFORMANCE OPTIMIZATION
Undergraduate
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374
GAM 392
GAME MODIFICATION WORKSHOP
Undergraduate
In this course, students will develop skills in game design and development through the construction of a “mod” of an existing game. Emphasis will be placed on the game development life cycle from concept through release, on productivity in a team environment, and on effective project management practices. PREREQUISITE(S): GAM 365 or GAM 372 or (ANI 344 and GAM 341)

GAM 365 or GAM 372 or (ANI 344 and GAM 341) are prerequisites for this class.

GAM 394
GAME DEVELOPMENT PROJECT I
Undergraduate
Students work in teams to design and develop a videogame that demonstrates their mastery of game design and development. Additionally, students will reflect on ethical decision making and professional ethics in the game industry. This course and its continuation, GAM 395, must be taken consecutively. PREREQUISITE(S): GAM 377 or GAM 392

GAM 377 or GAM 392 is a prerequisite for this class.

GAM 395
GAME DEVELOPMENT PROJECT II
Undergraduate
Continuation of GAM 394. PREREQUISITE(S): GAM 394

GAM 394 is a prerequisite for this class.

GAM 397
TOPICS IN GAME DESIGN
Undergraduate
Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information. Prerequisite(s): See syllabus

GAM 398
TOPICS IN GAME PROGRAMMING
Undergraduate
Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): See syllabus (variable credit)

GAM 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. PREREQUISITE(S): None (variable credit)

GAM 420
CREATIVE COMPUTATION
Graduate
Students are introduced to the affordances of computers and digital technology as a medium using foundational texts from the discipline of digital media while being introduced to programming. The course teaches students to discover how to effectively and creatively communicate their ideas using accessible coding environments and engines and challenges them to build playful, interactive applications.

GAM 424
GAME DESIGN WORKSHOP
Graduate
This course is an introduction to both the theory and practice of game design. Students will explore fundamental elements of game design and put these concepts to work in designing, prototyping, playtesting, and developing both physical and computer games. The course will cover formal elements of games, game dynamics, game narratives, and the dramatic components of games. Students will study the game design process including brainstorming, conceptualization, creation of design documentation, and play-testing. PREREQUISITE(S): none
GAM 425  
APPLIED 3D GEOMETRY  
Graduate  
Review of mathematical foundation and techniques needed for the development of 3D graphics and game systems. This class will provide the foundation in linear algebra and 3D geometry required for implementing common tasks in 3D graphics and game systems. Topics include: vectors, matrices, transforms, coordinate changes, projections, intersection, interpolation and random number generator. PREREQUISITE(S): CSC 403  

CSC 403 is a prerequisite for this class.

GAM 426  
GAME SOUND DESIGN 2  
Graduate  
Students will further their knowledge of recording techniques for voiceover, sound effects, and music; editing voiceover and music; and mixing. The course will also introduce audio implementation using Unity. Coursework will utilize the recording studio extensively for in-class and out-of-class work. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound designs for video games.

GAM 427  
SCORING FOR GAMES  
Graduate  
Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances video games. The course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score for their own video game as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied. PREREQUISITE(S): GAM 426

GAM 426 is a prerequisite for this course.

GAM 428  
GAME SOUND DESIGN AND SCORING STUDIO  
Graduate  
This course is intended to provide practical experience in audio production for video games, as well as to offer the opportunity to create quality materials to include in a demo reel or portfolio. It will build on the background and skills acquired in Game Sound Design 2. Students will study the sound designs of different genres of video games, and then complete five projects in which they will be creating the sound designs for games of those genres. A key element of this course will be in-class discussions and critiques of students' work, both to sharpen their sound designing and critical listening skills. PREREQUISITE(S): GAM 427

GAM 430  
ART GAMES BOOTCAMP  
Graduate  
Students learn to appreciate and advance games as an artistic medium in this bootcamp by making work that is avant-garde in its formal aesthetics or sociopolitical force. Every two weeks students rapidly develop and complete an art game that challenges the conventional wisdom of what games are, how and why we play them, and the role they perform in popular culture.

GAM 440  
GAMES WITH A PURPOSE BOOTCAMP  
Graduate  
This game design bootcamp focuses on the rapid yet deliberate creation of short games with a purpose beyond entertainment. Every two weeks, students are expected to deliver a completed game project that addresses a real-life issue, has a clear statement of intent and uses they specific properties of games as a medium to achieve its declared purpose.
GAM 450
PHYSICS FOR GAME DEVELOPERS
Graduate
The course concentrates on Newton's Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics. PREREQUISITE(S): CSC 461 and (SE 456 or SE 450)

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

GAM 451
EXPRESSIVE AUDIO SCRIPTING FOR GAMES
Graduate
This workshop is for game designers, sound designers and programmers to learn how to creatively use audio in game engines. Students develop skills to effectively shape and manipulate game audio to achieve intended dramatic experiences. Topics include key terms and techniques, industry trends in game audio implementation, and how to advance the medium of games through audio. Students listen and critique each other's work, learning to assess game audio in terms of narrative, aesthetics and quality. PREREQUISITE(S): None

GAM 453
TOOL PROGRAMMING FOR GAME DEVELOPMENT
Graduate
This course focuses on the parsing and conditioning of game related assets for real-time game engines. Topics include the content pipeline, processing or standard file formats using modern API, integration of external tools, run-time file format design, command line and graphical user interfaces. Adaptive real-time modification of data structures in game using managed languages (such as C#) reflection will be explored. PREREQUISITE(S): CSC 461 and (SE 456 or SE 450)

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

GAM 470
RENDERING AND GRAPHICS PROGRAMMING
Graduate
This programming class will present the rendering pipeline and basic shader creation. Students will create their own graphics package using a high-level graphics API such as Direct X. Performance issues will be considered as part of the API design. Topics covered include illumination techniques, Gouraud and Phong shading, antialiasing techniques, texture mapping, blending and environment mapping, reflection and hardware instancing. PREREQUISITE(S): GAM 425 and CSC 461

GAM 475
GAME ENGINE PROGRAMMING I
Graduate
This course designs and implements a custom real-time game engine. Developing real-time graphics systems to transform and render scene graphs using polygon primitives and hardware buffers. Architecting critical performance related operating system components such as Memory, File, Object and Math Systems. Designing large scale software architecture using Design Patterns, layers and libraries into one large project. PREREQUISITE(S): CSC 461 and (SE 456 or SE 450)

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.

GAM 476
ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES
Graduate
Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, and script-driven game object behaviors. PREREQUISITE(S): CSC 461 and (SE 456 or SE 450)

CSC 461 and (SE 456 or SE 450) are prerequisites for this class.
GAM 486
GAME PROGRAMMING FOR MOBILE DEVICES
Graduate
In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multiplayer game architecture. Such concepts as: building a custom game library, multiplayer game programming, infrared, wireless and socket communication between devices will be discussed. PREREQUISITE(S): CSC 471

CSC 471 is a prerequisite for this class.

GAM 491
GAME PERFORMANCE OPTIMIZATION
Graduate
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): CSC 400 and CSC 403 and CSC 407

GAM 499
TOPICS IN COMPUTER GAME DESIGN AND DEVELOPMENT
Graduate
Variable topics course in computer game design and development. May be repeated for credit. PREREQUISITE(S): Permission of instructor (variable credit)

GAM 520
GAME DESIGN PROSEMINAR
Graduate
In this foundational seminar course, students are exposed to significant written works that examine the medium of games in historical, cultural, and social contexts. Students analyze and interpret games in classroom discussions and written explorations that reveal the meaning and values of games as cultural artifacts. In doing so, they learn to situate their own critical practice within the history of the medium. PREREQUISITE(S): GAM 420

GAM 530
GAMES STUDIES PROSEMINAR
Graduate
This seminar class introduces students to a broad range of historical and current topics in game studies. It aims to support creative practice by expanding the theoretical foundation established in Game Design Proseminar with additional, deep insight into disciplines that relate to games, play, players, learning, activism, and art. PREREQUISITE(S): GAM 520

GAM 540
GAME DEVELOPMENT PRACTICUM
Graduate
This course introduces the creation of a term-long project in teams. In contrast to studio classes where students can work alone or with others and decide what games they want to create, the practicum requires students to make games about a specific topic or theme proposed by faculty. This can include a requirement of working with a client, involving subject matter experts in the design process, developing a site-specific art game installation, or working with a novel platform such as a wearable device. PREREQUISITE(S): GAM 430 and GAM 440

GAM 550
INCUBATION STUDIO
Graduate
Students situate their creative practice within historical, aesthetic, and social contexts. This includes an introspective analysis of why they want to design games. Students identify potential research areas or creative catalysts for their thesis projects, conducting research, critiquing and analyzing relevant work, technologies, and reference materials. The final course assignment is a thesis proposal outlining their project plans for Thesis Studio, which each student must get approved by their advisor before entering Thesis Studio. PREREQUISITE(S): GAM 530 and GAM 540
GAM 575
GAME ENGINE PROGRAMMING II
Graduate
This class continues to explore C/C++ game engine programming. This course focuses on 3D keyframe animation systems and 3D model asset conversion. Topics include design of an extensive Math library including Quaternion interpolation, view volume determination, exporting and conditioning of parent relative keyframe animation data, and run-time animation engine. Finally implementation of run-time data formats for vertex buffer objects will be developed for efficient rendering. PREREQUISITE(S): GAM 475

GAM 575 is a prerequisite for this class.

GAM 576
GAME ENGINE PROGRAMMING III
Graduate
This class continues to explore C/C++ game engine programming. This class focuses on advanced game engine issues such as tool development (skin data reduction, adaptive animation compression, model conversion), runtime coordination on CPU (scene graph, animation coordination, resource management) and GPU processing (vertex skinning, animation blending and model rendering). PREREQUISITE(S): GAM 575

GAM 576 is a prerequisite for this class.

GAM 594
GAMING AND ENTERTAINMENT TECHNOLOGY CAPSTONE
Graduate
This course gives students an opportunity to utilize knowledge obtained in this degree program in developing a computer game, from conceptualization, design, to implementation. Issues in project management and configuration management will also be addressed. This work will constitute a major part of the project portfolio that students have developed during their study. PREREQUISITE(S): Completion Of Foundation Courses.

GAM 597
TOPICS IN GAME DESIGN
Graduate
Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information. PREREQUISITE(S): See syllabus.

GAM 598
TOPICS IN GAME PROGRAMMING
Graduate
Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

GAM 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. PREREQUISITE(S): None (variable credit)

GAM 600
THESIS STUDIO
Graduate
Students demonstrate their abilities as professional contributing artists in the field of games through the completion of a thesis project that advances the medium of games historically, aesthetically, or socially. Students will be required to publically show their thesis work as well as defend it before an appointed committee of faculty knowledgeable in the field. PREREQUISITE(S): GAM 550
GAM 690
GAME DEVELOPMENT STUDIO I
Graduate
In this course and its continuation GAM 691, students will work in small teams to design and implement a computer game. The courses must be taken consecutively. PREREQUISITE: GAM 475

GAM 475 is a prerequisite for this class.

GAM 691
GAME DEVELOPMENT STUDIO II
Graduate
Continuation of GAM 690. PREREQUISITE: GAM 474 or SE 456 (variable credit)

GAM 474 or SE 456 are a prerequisite for this class.

GAM 695
MASTER'S GAME RESEARCH STUDY
Graduate
Students interested in a more in-depth study of a particular game area will register for this course and work with a faculty member (not necessarily their academic advisor) on a research project. The work involved may include system development, empirical studies, or theoretical work. Can be taken for up to 8 credit-hours. PREREQUISITE(S): GAM 575 and consent of research advisor

GD 101
CREATIVE STUDIO METHODS
Undergraduate
Creative Studio Methods is a required interdisciplinary foundation design course. It immerses new design students in a range of studio experiences as a means to introduce methods for approaching creative work. Short lectures or screenings present models, contexts, and inspiration for creative and critical design practices and provide students with, “courage by example.” In-class exercises emphasize inquiry, experimentation, unknowns, playful risk, invention, flexibility, and agility. Visual and conceptual artifacts and outcomes are generated through process and analyzed/considered through group discussion. PREREQUISITE(S): None

GD 104
DESIGN DRAWING PROCESS
Undergraduate
This course introduces students to drawing for the design process in print and media from initial concept development to sketches, presentation drawings and visualizations for graphic and interactive media. Topics include general arrangement as well as detailed and dimensional drawings providing essential preparation for classes in design and digital illustration software. PREREQUISITE(S): None

GD 105
INTRO TO VISUAL DESIGN
Undergraduate
Students study the principles of composition and color theory, and how these are affected by movement, duration and display. Vector and bitmap manipulation tools are explored.

GD 109
WEB DESIGN TOOLS WORKSHOP
Undergraduate
This course introduces students to the basic languages used to build the front-end components of the web. Students will learn the basic syntax of HTML and CSS; a simple vocabulary of HTML elements and attributes, and CSS properties and values; best practices for preparing content for the web; and basic code patterns useful in web design. PREREQUISITE(S): None (2 quarter hours)

DePaul University Autumn 2017-2018 Page 1528 of 2468
**GD 110**  
**WEB DESIGN**  
**Undergraduate**  
An introduction to design process and strategy for the web. Students will be introduced to layout and composition, typography, color, and navigation concerns specific to web design. Projects will be created using both visual design applications and hand-coding with HTML and CSS. The class will also introduce basic components of hypertext transfer protocol, and web site deployment. PREREQUISITE(S): GD 109 or HCI 201

GD 109 or HCI 201 is a prerequisite for this class

**GD 150**  
**ILLUSTRATOR WORKSHOP**  
**Undergraduate**  
This class will introduce students to the syntax, tools and methods of vector-based drawing using Adobe Illustrator. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

**GD 151**  
**PHOTOSHOP WORKSHOP**  
**Undergraduate**  
This class will introduce students to the syntax, tools and methods of raster-based graphics and image editing/manipulation by using Adobe Photoshop. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

**GD 152**  
**INDESIGN WORKSHOP**  
**Undergraduate**  
This class will cover fundamental typographic design and layout skills by using page layout software Adobe InDesign. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

**GD 153**  
**LETTERING WORKSHOP**  
**Undergraduate**  
This course is an exploration of lettering techniques, both analog and digital. Students will experiment with historical and conceptual approaches to hand lettering. Both the formal and communicative uses of lettering will be studies. (2 quarter hours)

**GD 154**  
**ADVANCED CSS WORKSHOP**  
**Undergraduate**  
A hands-on exploration of properties in the CSS3 specification. Students will explore advanced techniques such as pseudo-elements, complex shapes, pointer controls, keyframes and animation, and improved typographic controls. This class will also introduce techniques for device dependent styling. Previous experience with CSS and HTML is highly recommended. PREREQUISITE(S): None (2 quarter hours)

**GD 155**  
**HTML5 WORKSHOP**  
**Undergraduate**  
This is a hands-on course in developing web pages and content using HTML5. In this course students will learn to create and edit web pages, applications, and/or games with HTML5 using text editors. The course will include weekly mixtures of lessons and exercises. (2 quarter hours)

**GD 200**  
**GRAPHIC DESIGN I**  
**Undergraduate**  
This course introduces the world of graphic design in a social and historical context. The goals are to explore formal structures and research methods with emphasis on the role of analysis and conceptual thinking as the first tasks of the print and multi-media designer. The course includes basic instruction in typography, color, problem-solving in print and on screen. PREREQUISITE(S): GD 105, ART 105, ANI 105 or GPH 211.

GD 105 or ART 105 or ANI 105 or GPH 211 is a prerequisite for this class
GD 201
INTRODUCTION TO VISUAL DESIGN RESEARCH
Undergraduate
This course introduces students to research methods used in design creative and professional practice. Theories, strategies and practical frameworks are studied in the preparation and creation of design artifacts.

GD 210
DIGITAL ILLUSTRATION I
Undergraduate
Introduction to illustration development in image, line and photography, combining computer applications and hand-rendered approaches.
PREREQUISITE(S): GD 105 or ART 105 or ANI 105 or GPH 211
GD 105 or ART 105 or ANI 105 or GPH 211 is a prerequisite for this class

GD 211
INTERMEDIATE DIGITAL ILLUSTRATION
Undergraduate
Intermediate practice for illustration development in image, line and photography. Combining computer applications and hand-rendered approaches will be studied. PREREQUISITE(S): GD 105 or ANI 105 or ART 106
GD 105 or ANI 105 or ART 106 is a prerequisite for this class

GD 215
WEB DESIGN FOR COMMERCIAL PROJECTS
Undergraduate
This is a design-focused web class on intermediate concepts and techniques in the visual design, development and implementation of websites for commercial purposes. Students will use industry standard web design applications and some hand coding in HTML and CSS.
PREREQUISITE(S): ISM 210 and (GD 110 or IT 130 or HCI 201)
ISM 210 and (GD 110 or IT 130 or HCI 201) are prerequisites for this class

GD 216
WEB DESIGN FOR ARTISTS
Undergraduate
A design-focused web class that focuses on intermediate concepts and techniques in the visual design, development and implementation of websites for personal expression and artistic experimentation. Students will use industry standard design applications and some hand coding in HTML and CSS. PREREQUISITE(S): GD 110 or IT 130 or HCI 201 or ART 385
GD 110 or IT 130 or HCI 201 or ART 385 is a prerequisite for this class

GD 217
WEB INTERACTION WORKSHOP
Undergraduate
A hands-on introduction to integrating user activity into the visual language of web design. Students will learn fundamental skills necessary for basic interaction design, and will explore widely-adopted frameworks allowing them to capture events in the web browser, programmatically traverse a web page, and alter the design and content of a page based on the actions of the user. (2 quarter hours)

GD 220
HISTORY OF DESIGN I
Undergraduate
The history of graphic design is an evolution in aesthetics, technology, style and visual communication. The class will encompass a survey of the major movements in the field of print design, notable designers and design materials. The nature of changing methods, materials, technologies and values are examined in the context of the social and political realities that shape communication. The course will include the historical shift from print to multimedia design methodologies.
GD 221
TRENDS IN CONTEMPORARY GRAPHIC DESIGN
Undergraduate
World movements in design and contemporary practice in print, web and experiential design. GD 220 is recommended as preparation for this class.

GD 230
TYPOGRAPHY
Undergraduate
Study of the formal structures of letterforms and text. Exploration of typography to create and extend meaning, emphasizing the relationship between form and content. PREREQUISITE(S): GD 105 or ART 105 or ANI 105 or GPH 211

GD 231
TYPOGRAPHY IN MOTION
Undergraduate
Students explore different ways of transforming static form to moving, dynamic and dimensional form. Using both storytelling and abstraction, students will create typography sequences with intention, humor, and emotion. Students will work with appropriate software to create innovative and informative typographic design. PREREQUISITE(S): GD 230

GD 230 is a prerequisite for this class.

GD 250
DESIGN STUDIO FIELD TRIP
Undergraduate
This 2-credit workshop offers field trips to design studios, allied fields workplace visits and relevant museums and gallery exhibitions. Students will research and study design studios in the Chicago area and attend networking events. Appropriate for Graphic Design, Interactive Media, Communication, and all other students interested in design and allied fields. Students will write a reflective paper after each trip. Be aware that there will be travel time before and after the class. (2 quarter hours)

GD 260
MOTION GRAPHICS
Undergraduate
This course will introduce the student to effective communication using motion graphics, including its application in the areas of film titles, broadcast and commercial design, interactive media, and gaming. The combination of music, visuals and typography will be explored following the basic theories of kinetic composition and aesthetics. Students will study the history of the field, including the work of pioneers such as Norman McLaren, Saul Bass and Len Lye. PREREQUISITE(S): Sophomore Standing and one of the following: ANI 105, ANI 101, GD 105, ART 105, GPH 211, DC 205

Sophomore Standing and one of the following: ANI 105, ANI 101, GD 105, ART 105, GPH 211, DC 205 is a prerequisite for this class.

GD 270
SEMIOTICS AND VISUAL DESIGN
Undergraduate
Design and designed products can be interpreted as signs that are the result of human needs and desires. This course examines theoretical issues in how design of a message or product influences the user's decision to read it, use it or buy it. Semiotics theory examines these concepts as well as design value and criteria for evaluation in contemporary culture.

GD 300
GRAPHIC DESIGN II
Undergraduate
This course explores design problems in visual communication through word (text) and image (digital, photographic, collage, video) primarily based on the student's own research and writing. Historical word/image art models including dada, surrealism, futurism and contemporary communication and design art are studied as models for the generation of projects. This intermediate level course requires previous mastery of basic design concepts and typography as well as both hands-on and basic computer design skills. PREREQUISITE(S): GD 200 and GD 230

GD 200 and GD 230 are prerequisites for this class.
GD 315  
WEB DESIGN: ADVANCED PROJECTS  
Undergraduate  
This course will emphasize interactivity and professional presentation for advanced multimedia web sites for artistic and commercial projects. Advanced concepts and techniques in the visual design and implementation of web pages. Students will use industry standard web design applications and some hand coding in HTML and CSS.  PREREQUISITE(S): GD 215 or GD 216

GD 215 or GD 216 is a prerequisite for this class

GD 330  
ADVANCED TYPOGRAPHY  
Undergraduate  
Advanced investigation into typography and text for verbal and visual expression for both print and multimedia. PREREQUISITE(S): GD 230

GD 230 is a prerequisite for this class.

GD 331  
HISTORY AND PRACTICE: FILM TITLE DESIGN  
Undergraduate  
This course combines the history of film title design examining the likes of the notorious title sequences of such graphic designers as Saul Bass in creating the Hitchcock movies through Stephen Frankurt, Maurice Binder and Kyle Cooper's "Se7en." The study leads to the advanced practice of combining typography, graphics, and moving images to build professional projects for advertising design, web design, film design, game design and commercial ventures. PREREQUISITE(S): GD 230 and (ANI 260 or GD 231)

GD 230 and (ANI 260 or GD 231) are prerequisites for this class

GD 340  
PUBLICATION DESIGN  
Undergraduate  
Design of multiple page documents: magazines, catalogs, and annual reports. Emphasis placed on research methodology, conceptual approach and audience. Knowledge of computer applications and typography are assumed. PREREQUISITE(S): GD 200 and GD 230

GD 200 and GD 230 are prerequisites for this class.

GD 341  
BOOK MAKING AND BINDING WORKSHOP  
Undergraduate  
This is an introductory course covering the basic principles of hand bookbinding including theories of book structure, review of paper information and bookbinding materials. The class will be a mixture of demonstrations and practical exercises, and each student will produce a variety of books and structures. PREREQUISITE(S): GD 105 (2 quarter hours)

GD 105 is a prerequisite for this class.

GD 350  
PORTFOLIO WORKSHOP  
Undergraduate  
Students review previous course projects and prepare a final portfolio as well as their own design identity and a resume in preparation for job interviews and/or graduate school. Visiting design professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development. PREREQUISITE(S): GD 200 and GD 210 and GD 230 (2 quarter hours)

GD 200, GD 210 and GD 230 are prerequisites for this class.
GD 355
PACKAGING DESIGN
Undergraduate
This course defines the role of packaging in product identification, presentation, and production. Projects will introduce the process of designing the graphic and physical forms of packaging design. Students will create 3-dimensional, physical packages including 2-dimensional branding, graphic and photographic image development. The materials of production, and consideration of user and market inherent in all commercial projects are covered, including the client's needs and desires in the market place. PREREQUISITE(S): GD 200 and GD 230

GD 200 and GD 230 are prerequisites for this class.

GD 356
LOGO, BRANDING, AND VISUAL IDENTITY
Undergraduate
The course provides students with an understanding of methodologies and strategies used for logo development, branding, and visual identity. In this course, students will work on, in extended projects, exploring identity systems with various forms such as logo, stationary, packaging, signage, print and web design. PREREQUISITE(S): GD 200 and GD 230

GD 200 and GD 230 are prerequisites for this class.

GD 360
ADVERTISING DESIGN
Undergraduate
Explores the function and practice of design in advertising in both social and art historical contexts. This course engages practical real life projects as well as projects that explore cultural and artistic practices. PREREQUISITE(S): GD 200 and GD 230

GD 200 and GD 230 are prerequisites for this class.

GD 365
ADVANCED MOTION GRAPHICS
Undergraduate
This course builds on motion graphics fundamentals covered in ANI260 Motion Graphics. In Advanced Motion Graphics, students will work to develop a better understanding of how to develop a distinct visual style in both personal work and in work for clients. The course also focuses on gaining familiarity with contemporary styles and trends in professional motion graphics, and an awareness of Chicago-based motion graphics production. PREREQUISITE(S): ANI260

ANI 260 is a prerequisite for this class.

GD 380
DESIGN FOR CLIENT AND COMMUNITY
Undergraduate
This course enables students to work from start to finish on client-based graphic design and projects. Students establish working relationships as individuals and in teams that utilize their skills to effectively evaluate the communication needs of an organization or business, develop design solutions that fulfill those needs, and negotiate the process between designers and clients. Objectives of the course include: improving student's developing design skills to an advanced level, creating awareness of current design trends, supporting student's development of independent working habits, utilizing integration of both hand-skills and the computer as design tools, and completing professional projects after staged client feedback and revisions. PREREQUISITE(S): GD 200 and GD 230

GD 200 and GD 230 are prerequisites for this class.

GD 381
GRAPHIC DESIGN PORTFOLIO DEVELOPMENT
Undergraduate
This course provides the student with an opportunity to prepare themselves for the workplace. During the course, students will refine a body of design work and publish their portfolio in both print and web formats. Students will design and develop their own visual identity, resume, cover letter, and business cards in preparation for job interviews and/or graduate school. They will also spend the quarter researching potential employers and learn about each company, agency, and/or studio so that they can strategically tailor their application process. PREREQUISITE(S): GD 110 and GD 210 and GD 300

GD 110, GD 210 and GD 300 are prerequisites for this class.
GD 390
SPECIAL TOPICS IN GRAPHIC DESIGN
Undergraduate
Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information. Prerequisite(s): See syllabus

GD 394
CAPSTONE PROJECT I
Undergraduate
This two course sequence provides a Graphic Design-specific capstone experience for the student. The capstone course will connect the students' Graphic Design course work with the University courses s/he has taken through three components: student-generated design proposals, class/instructor discussions, and the actual creation/production of the student's proposal. The production piece is the primary focus of this course that takes place over two quarters. PREREQUISITE(S): GD 200 and Senior Standing

GD 200 and Senior Standing are prerequisites for this class.

GD 395
CAPSTONE PROJECT II
Undergraduate
This two course sequence provides a Graphic Design-specific capstone experience for the student. The capstone course will connect the student's Graphic Design course work with the University courses s/he has taken through three components: student-generated design proposals, class/instructor discussions, and the actual creation/production of the student's proposal. The production piece is the primary focus of this course that takes place over two quarters. PREREQUISITE(S): GD 394

GD 394 is a prerequisite for this class.

GD 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. Prerequisite(s): Instructor and dean approval.

GEO 101
ENVIRONMENTAL GEOGRAPHY
Undergraduate
An introduction to the history, scope, and breadth of environmental inquiry within Geography. The course will be divided between Physical Geography -- that is, the spatial aspects of the Geosystem including the Atmosphere, Hydrosphere, Lithosphere, and Biosphere, and geographical perspectives of and approaches to the Human-Environment, to include Hazards Geography, Resource Geography, Cultural and Political Ecology.

GEO 103
URBANIZATION
Undergraduate
The course explores the evolution of urban forms and structures in the United States from the perspective of geography. In addition to studying the historic emergence of the American urban system, the course covers processes and phenomena associated with the spatial organization of housing, transportation, commercial and industrial land-use planning, as well as urban poverty, local governance, and issues of race, gender and sexuality.

GEO 133
URBAN GEOGRAPHY - EXPERIENTIAL LEARNING
Undergraduate
The course provides an in depth analysis of a Chicago neighborhood, connecting this to wider U.S. trends in urbanization and urban development. Students conduct a research project, through archival study and field work.
GEO 141
GEOGRAPHIC INFORMATION SYSTEMS I: DIGITAL MAPPING
Undergraduate
An introductory-level course covering the fundamentals of GIS. Topics include GPS, remote sensing, data models (vector and raster), coordinate systems, and map design. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS. Cross-listed with PSC 201. Formerly GEO 241.

LSP 120 or HON 180 or (MAT 130 or above) or instructor permission is a prerequisite for this course.

GEO 172
CULTURAL GEOGRAPHY
Undergraduate
How do artists depict different locations? How do television portrayals of New York City compare and contrast between situation comedies and drama series? How do lyrics and music portray a sense of place and local identity? This course will analyze how places are represented and understood through arts, music and literature. Students will develop the theoretical skills to examine the cultural geography both of the United States and elsewhere.

GEO 200
SUSTAINABLE URBAN DEVELOPMENT
Undergraduate
This course focuses on the application and meaning of 'sustainability' to our discussion and understanding of cities, urban communities, and the urbanization process. The course conceptualizes sustainability as residing at the intersection of political, economic, social, and ecological thinking and examines its utility and flexibility towards urban form and function. The course pursues the topic of urban sustainability through the lenses of scale (e.g., local vs. global), justice (e.g., social vs. ecological), and diversity (e.g., cultural vs. biotic).

GEO 201
GEOPOLITICS
Undergraduate
A survey of theories of geopolitics and international relations, the course explores issues of international security and organization, regional integration, and nationalism, state formation and conflict. Historic geopolitical cases from Europe (Northern Ireland, EU, Balkans), the Middle East and North Africa, and the Russian realm, provide opportunities to assess theoretical approaches and profile the security and foreign policy concerns of the U.S.in the new millennium.

GEO 204
RELIGIOUS GEOGRAPHY
Undergraduate
Religion and geography are fundamentally intertwined. From the establishment of theocratic states that control territory, to the sprawl of US suburbia that has led to megachurches, the role of religion in shaping the earth's cultural landscape is undeniable. Religious beliefs shape geographies - there are places that, through faith, become sacred; elsewhere religious individuals and groups struggle to claim places in the name of their beliefs. This course will examine case studies from around the world to explore the intersection of geography and religion.

GEO 205
URBAN ENVIRONMENTAL JUSTICE
Undergraduate
A theoretical and applied investigation of the social, political, and economic processes influencing the spatial distribution of environmental amenities and harms across the U.S. urban landscape, with particular focus on urban structure and the role of environmental justice struggles in shaping urban policy and the urban landscape.

GEO 206
BOUNDARIES AND IDENTITIES
Undergraduate
A critical survey of the manner in which social, political, ethnic, gender and racial identities are being constructed by modernity and post-modernity. Cross-listed as INT 206 and PAX 206. Recommended for GEO majors when taught by Professor Nast.
GEO 210
ENVIRONMENTAL CONSERVATION
Undergraduate
This course explores society-environment relations in case studies drawn from around the world. The course focuses on forces destructive to habitat and biospheres, species loss, global warming, and the tension between “modernization” and environmental sustainability.

GEO 211
BIOGEOGRAPHY
Undergraduate
Biogeography is the study of the distribution of plants and animals on the earth's surface, and the historical and ecological factors and human activities responsible. It asks questions such as: Why were placental mammals absent from (pre-European) Australia, while marsupials were abundant? How are current plant species' distributions different from those of the past, and what implications does this have for their ability to respond to global changes? Why have islands sustained so many extinctions compared to mainlands? Why are there so many insect species in the tropics and so few at high latitudes? How are humans changing the distribution and abundances of plant and animals? This course explores these and other such questions. The goal is to understand biodiversity patterns and processes across earth, and how this knowledge can help maintain biological communities in human-dominated, 21st century landscapes.

GEO 215
INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY
Undergraduate
This course charts the political, social and economic transformation of the developing countries (Africa, Asia, Latin America, Caribbean, Pacific Islands) into a global economy dominated by the ‘developed' countries (North America, Europe and Japan). This process, termed ‘GLOBALIZATION,' results from the operation of the global market mechanism, the activities of Transnational Corporations (TNCs) and the programs of the International Financial Institutions (IFIs).

GEO 218
SPAIN AND PORTUGAL
Undergraduate
A geographical exploration of Spain and Portugal's history, culture, politics and society. This course focuses on critical periods, events, and socio-political forces that substantially influenced these countries and demonstrate their role as one of Europe's key links to Latin America and Africa.

GEO 220
OCEANOGRAPHY
Undergraduate
Develops the concepts of physical oceanography. Topics include the chemical and physical properties of seawater, the dynamics of ocean currents and circulations, the physics of water waves and tides, the interaction of the ocean with the atmosphere, the formation of coastlines, and the effects of pollution on the ocean. Cross-listed with PHY 220.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

GEO 225
WEATHER AND CLIMATE
Undergraduate
The dynamic atmospheric processes which control day-to-day weather and the longer term processes which determine prevailing climatic conditions are the two principal foci of this course. Special topics include weather systems, climate change, global warming, and human impacts on climate. Cross-listed with PHY 225.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

GEO 230
SUSTAINABLE URBAN TRANSPORTATION
Undergraduate
The course introduces transportation geography and explores the characteristics of sustainable transportation systems. From electric vehicles to new services like car and bike sharing, the course examines the role that transportation plays in environmental, social, and economic sustainability. Students will learn about current issues in urban transportation (both passenger and freight), and receive an introduction to tools and techniques used by transportation planners, e.g., Geographic Information Systems (GIS).
GEO 233
COMPARATIVE URBANISM
Undergraduate
An exploration of non-U.S. urban and planning traditions, through the urban morphological and comparative study of the foundation, and social-political forces that shaped cities such as Paris, St. Petersburg, Istanbul, Bombay-Mumbai, Hong Kong, and Mexico City.

GEO 240
HISTORY OF CARTOGRAPHY
Undergraduate
The course explores the history of mapmaking as a dimension and expression of the intellectual, scientific, technological, and political transformation of society. Focusing primarily on Europe and North America, the course covers the prevailing schools of thought and practitioners, and the structures and forces that shaped them. The course includes hands-on study of archival quality maps in DePaul's Special Collections and other regional institutions. Short field trip to the Newberry Library required.

GEO 242
GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS
Undergraduate
An intermediate-level course. Students conduct real-world GIS projects for community organizations in Chicagoland. Topics include data capture, manipulation, database design, data quality, and spatial analysis. Students will complete projects following best practices of GIS project management. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS.
GEO 141 or PSC 201 is a prerequisite for this class.

GEO 243
REMOTE SENSING
Undergraduate
An introduction to the fundamentals of remote sensing, the analysis of the earth through air or space borne sensors. Special topics include image interpretation, image processing, urban change analysis, environmental monitoring, and photogrammetry. Instruction is accomplished through lectures and hands-on lab exercises using ArcGIS Desktop. A comprehensive final project using techniques learned from your work completes the course.
GEO 141 (or PSC 201 or instructor permission) is a prerequisite for this course.

GEO 260
GLOBALIZATION AND RESOURCES
Undergraduate
An exploration of globalization and the politics and flow of natural resources between the developed and developing world, especially since World War II. Using case studies from around the world, the course introduces students to competing paradigms of environmental and resource destruction and to the complexities and contingencies of social and environmental change in the "new" global economy.

GEO 266
THE WORLD ECONOMY
Undergraduate
A study of the spatial effects of globalization. Topics include the geography of industrialization, spatial divisions of labor, global commodity chains, and industrial development in peripheral economies.

GEO 269
CULTURAL AND POLITICAL ECOLOGY
Undergraduate
The course introduces students to the theoretical foundations and evolution of critical Political Ecology and its assessment of environmental change and social vulnerability in the developing world. The course traces the history of the discipline to its early roots in geography, anthropology, and ecology and tracks its emergence as a theoretically sophisticated critique of the global spread of economic development and environmental policy.

GEO 299
THE NATURE OF GEOGRAPHY
Undergraduate
An exploration of the social construction of knowledge through the historic evolution of geographic thought.
GEO 300  
GEOGRAPHICAL INQUIRY  
Undergraduate  
An in depth exploration of modern debates within geography. Students prepare their own geographic research project and participate at a regional conference.

GEO 310  
GREEN INFRASTRUCTURE  
Undergraduate  
Green Infrastructure (GI) goes beyond the conventional conservation efforts of creating and maintaining national and state parks and wildlife refuges. Instead, GI promotes conservation that takes place at different spatial scales to create a network of open spaces out of existing open spaces and green corridors as well as offering strategies for constructing green spaces out of abandoned urban spaces.

GEO 315  
THE STATE AND ECONOMIC DEVELOPMENT  
Undergraduate  
In this course, we study the role of the state in economic growth. The first half of the course covers the historical background, theory and criticism of the role of the state, including the developmental state, in economic growth. The second half examines paired case studies from different emerging economies in the key moments of the incorporation of those states and their societies into the globalized economy compared to more recent assessments of their situations.

GEO 316  
THE EUROPEAN UNION  
Undergraduate  
An integration of political geographic and international relations perspectives on European integration: Special emphases on political philosophies and theories of integration, the geopolitics of block formation and enlargement, institutional structure, the evolution of policies, and the future directions of the European Union. Cross-listed with PSC 340 and IRE 106.

GEO 331  
CHICAGO: SPATIAL ANATOMY OF A METROPOLIS  
Undergraduate  
An advanced exploration of Chicago's urban geography, focusing in detail on topics such as historical geography, industrial change, community development, housing, architecture, transportation and Chicago's status as a "global city."

GEO 333  
URBAN PLANNING  
Undergraduate  
A seminar on the intellectual history and theories of urban planning and design, and their application in urban settings in the U.S. and abroad. Systematic study of case studies leads to the investigation of current urban planning issues in Chicago.

GEO 334  
URBAN/CITY DESIGN  
Undergraduate  
The course on urban/city design builds on the architecture-urban planning-urban design complex from a distinctly geographic perspective. The course critically interrogates what "good urban design" has meant at different times and geographical contexts. Starting with histories, theories, and practices of urban/city design, it traces interpretations of design that span the "ornamental" and the "machinic," to finish with "geodesign": the integration of geotechnology to landscape architecture, and regional and city design. The course concept rests on four thematic pillars: (1) A focus on three city design sub-areas: the town/ground plan (lots, street blocks, streets, and open spaces), the built environment (or "built fabric"), and building- and land-use. (2) A critical perspective on the relationship between urban/city design and urban development. (3) The challenges and solutions that the environment-society nexus represents for urban/city design. (4) The role of innovation and technology in transforming the relationship of humans to the material and informational/cybernetic city. The study of these four pillars draws upon urban/city design case studies from different periods and geographic contexts (urban/city design in the US and Chicago is one focus).
GEO 339
TOPICS IN ARCHITECTURE AND URBANISM
Undergraduate
Cities are changing dramatically as a result of the accelerated circulation of finance capital worldwide, the emergence of new information and data visualization technologies, the expansion of credit, the ceaseless retrenchment of population groups inside and around cities, and the emergence of new architectural and planning paradigms. The course explores and researches aspects of these transformative processes and their impacts on race, class, economic prosperity, and the contingencies of quality of urban life. A significant research and writing project is required in this specialist high-level course.

GEO 340
PLACES, HUMANITIES AND GEOGRAPHIC INFORMATION SYSTEMS
Undergraduate
In this course students will develop proficiency in handling spatial data for digital humanities using GIS. Students will learn concepts and techniques for geocoding, database management, cartographic visualization, and spatial analysis relevant to humanities subject. Students will be able to discern importance of places and spatial technologies in the Digital Humanities.

GEO 343
REMOTE SENSING II
Undergraduate
This course presents intermediate to advanced techniques in remote sensing, analysis of the earth through air or space borne sensors. Remote Sensing II provides 2nd level depth to some of the more advanced techniques of remote sensing and image interpretation. There is a special focus on urban/environmental applications of remote sensing, i.e. the detection, delineation, identification, and quantification of processes occurring in and around cities which affect the environment. Remote sensing technologies have, to an increasing extent, become integrated and deployed through geographic information systems (GIS) technology. Students learn to integrate techniques from this course to produce information products that are useful in the support of public and private decision-making. Techniques covered include advanced classification, georeferencing, LIDAR, and hyperspectral data analysis. The course will be taught through integrated hands-on activities, lectures and a comprehensive final project.

GEO 243 is a prerequisite for this course.

GEO 344
GEOGRAPHIC INFORMATION SYSTEMS III: SPATIAL ANALYSIS FOR SUSTAINABILITY
Undergraduate
An advanced-level course. Students conduct spatial analysis into sustainability issues of their interest. Students will learn techniques for suitability analysis, point pattern analysis, network analysis, and spatial interpolation with GIS. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS.

GEO 242 is a prerequisite for this class.

GEO 345
PROGRAMMING IN PYTHON FOR GIS
Undergraduate
Knowledge of a scripting language is a valuable skill for GIS analysts. Students will learn the basics of Python (a programming language), including script writing and implementation. By completing this course, students should be able to manipulate GIS data, automate GIS workflows, and develop customized GIS tools by writing script in Python in ArcGIS. The class is largely conducted through hands-on activities in a GIS laboratory. Formerly GEO 342.

GEO 242 is a prerequisite for this class.

GEO 346
HEALTH GIS
Undergraduate
Spatial data visualization and GIS applications are increasingly at the forefront of health data analysis. This course will examine health data using GIS and topics will be drawn from GIS applications that explore epidemiology, local and global health inequalities, the role of GIS in public health, and the use of GIS/GPS in health applications.

GEO 141 or PSC 201 is a prerequisite for this class.
GEO 347
WEB GIS AND SPATIAL DATA VISUALIZATION ON THE WEB
Undergraduate
This project-oriented course will enable students to independently develop Web-based Geographic Information Systems (GIS) applications. The course introduces current developments in Web GIS technologies, their applications, and advanced cartography skills. Students will learn how to use Web GIS mapping tools and how to publish web-enabled interactive maps using commercial internet map servers (e.g., ArcGIS Online or ArcGIS for Server) and other cloud-based technologies. Students will be introduced to Application Programming Interfaces (e.g., JavaScript API) and open source tools, and will develop customized Web GIS applications such as spatial data models. Cross-listed with GEO 447.

GEO 141 or PSC 201 is a prerequisite for this class.

GEO 350
WORLD OF WINE
Undergraduate
An analysis of the geographical factors that influence the global production and distribution of wine. Students must be 21 years of age or older.

GEO 351
GEOGRAPHY, FOOD AND JUSTICE
Undergraduate
While the need for food is universal, geographies of food production, distribution and consumption are anything but even. This leads to multiple issues of food injustice at a variety of scales. This course critically examines the contemporary global food system with the goal of providing students with skills and knowledge to engage in food justice activism. Students study the development of food systems and how inequalities have emerged in production, distribution and consumption. The course then explores food justice movements including the emergence of alternative food networks in the U.S and internationally. Assignments may engage students in local food projects and/or advocacy campaigns.

GEO 391
STATISTICAL DATA ANALYSIS FOR GIS
Undergraduate
This course covers statistical concepts and techniques that are applied to geographic problems. Topics include descriptive statistics and inferential statistics geared toward working with geographic data in GIS. Students will learn techniques for summarizing variables, testing difference of means, and relationships among variables through lectures and hands-on exercises using calculators, SPSS and ArcGIS.

GEO 141 or PSC 201 is a prerequisite for this class.

GEO 395
SEMINAR IN SELECTED TOPICS
Undergraduate
Upper-division seminar exploring selected geographical issues.

GEO 398
INTERNSHIP
Undergraduate
The course combines academic study with practical experience obtained through work in an extramural internship setting. The internship course requires academic output in the form of a research journal, paper, or other project.

GEO 399
INDEPENDENT STUDY
Undergraduate
Intensive study of a topic of special interest. Private conferences with instructor of supervised reading and research. Variable credit.

Junior or Senior standing and department consent are a prerequisite for this class.
GEO 440  
PLACES, HUMANITIES AND GEOGRAPHIC INFORMATION SYSTEMS  
Graduate  
In this course students will develop proficiency in handling spatial data for digital humanities using GIS. Students will learn concepts and techniques for geocoding, database management, cartographic visualization, and spatial analysis relevant to humanities subject. Students will be able to discern importance of places and spatial technologies in the Digital Humanities. Cross-listed with GEO 340.

GEO 441  
GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT  
Graduate  
This course will focus on applications of Geographic Information Systems (GIS) to community studies and community development. As an amalgam of information technologies (e.g. database management, Web 2.0) and earth measurement technologies (e.g. global positioning systems, remote sensing), GIS is rapidly entering the realm of community development. The course will explain how GIS works; enable students to learn techniques including mapping, spatial analysis, and data management; and provide students with the opportunity to apply GIS to community development. Cross-listed with MPS 552.

GEO 442  
GEOGRAPHICAL INFORMATION SYSTEMS (GIS) FOR SUSTAINABLE URBAN DEVELOPMENT  
Graduate  
This course will examine how GIS has been used to monitor, and evaluate efforts advancing sustainability in urban areas. Students will learn geospatial techniques in support of sustainable practices, including promoting energy efficiency, managing water resources, promoting sustainable options of transportation, improving access to local healthy foods, and responding to climate change. This is accomplished through hands-on lab activities and a case study conducted in collaboration with a non-profit organization engaged in promotion of sustainable practices in Chicago.

GEO 445  
PROGRAMMING IN PYTHON FOR GIS  
Graduate  
Knowledge of a scripting language is a valuable skill for GIS analysts. Students will learn the basics of Python (a programming language), including script writing and implementation. By completing this course, students should be able to manipulate GIS data, automate GIS work flows, and develop customized GIS tools by writing script in Python in ArcGIS. The class is largely conducted through hands-on activities in a GIS laboratory. Cross-listed with GEO 345.

GEO 446  
HEALTH GIS  
Graduate  
Spatial data visualization and GIS applications are increasingly at the forefront of health data analysis. This course will examine health data using GIS and topics will be drawn from GIS applications that explore epidemiology, local and global health inequalities, the role of GIS in public health, and the use of GIS/GPS in health applications.

GEO 447  
WEB GIS AND SPATIAL DATA VISUALIZATION ON THE WEB  
Graduate  
This project-oriented course will enable students to independently develop Web-based Geographic Information Systems (GIS) applications. The course introduces current developments in Web GIS technologies, their applications, and advanced cartography skills. Students will learn how to use Web GIS mapping tools and how to publish web-enabled interactive maps using commercial internet map servers (e.g., ArcGIS Online or ArcGIS for Server) and other cloud-based technologies. Students will be introduced to Application Programming Interfaces (e.g., JavaScript API) and open source tools, and will develop customized Web GIS applications such as spatial data models. Cross-listed with GEO 347.

GEO 441 is a prerequisite for this course.

GEO 440 or GEO 441 or successful completion of a GIS certificate or Instructor Permission is a prerequisite for this class.

GEO 445 is a prerequisite for this course.

GEO 441 is a prerequisite for this course.
GEO 491
STATISTICAL DATA ANALYSIS FOR GIS
Graduate
An overview of GIS research techniques in geography with a focus on a statistical approach. Students will get versed in quantitative reasoning by learning how statistical concepts and techniques are applied to geographic problems. Topics include research concepts, research design, descriptive statistics, and inferential statistics geared toward understanding geographic phenomena. Instruction is accomplished through lectures and hands-on exercises using calculators, SPSS and ArcGIS. Cross-listed with GEO 391.

GEO 440 or GEO 441 or instructor permission is a prerequisite for this class.

GEO 499
INDEPENDENT STUDY [GRADUATE]
Graduate
Intensive study of a topic of special interest. Private conferences with instructor of supervised reading and research. Variable credit. Instructor consent required.

GER 101
BASIC GERMAN I
Undergraduate
GER 101 is the first quarter of the first-year college German sequence. It introduces the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills--listening, reading, writing and speaking--while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary you learn to express themself meaningfully and to function in a German-speaking setting. To maximize each student's engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.

GER 101S
BASIC GERMAN I FOR SUMMER
Undergraduate
(Covers the equivalent of the GER 101 and the first half of GER 102.) The first half of beginning German. The basic elements of the German language, spoken as well as written, with due regard to the cultural context of German expression.

GER 102
BASIC GERMAN II
Undergraduate
GER 102 is the second quarter of the first-year college German sequence. It continues to introduce the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills--listening, reading, writing and speaking--while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary to express themselves meaningfully and to function in a German-speaking setting. To maximize each student's engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.

GER 103
BASIC GERMAN III
Undergraduate
GER 103 is the third quarter of the first-year college German sequence. It continues to introduce the students to the study of language and culture of German speaking countries. The course focuses on the development of all four critical language skills--listening, reading, writing and speaking--while also introducing aspects of German-speaking societies that differ from American society. In-class work will be devoted primarily to communication activities, so that students will be able to utilize the structures and vocabulary to express themselves meaningfully and to function in a German-speaking setting. To maximize each student's engagement with the language, students will be talking and listening to each other as much as to the instructor. At the end of the three-course sequence, students will be in command of the basic elements of German language and culture, and should be able to function with relative ease in German-speaking countries. Students will be able to comprehend and engage in basic conversations, write clearly and effectively in German, and read simple but genuine texts.
GER 103S
BASIC GERMAN II FOR SUMMER
Undergraduate
(Covers the equivalent of the second half of GER 102 and all of GER 103.) The second half of beginning German. Further work on the basic elements of the German language, spoken as well as written, with due regard to the cultural context of German expression.

GER 104
INTERMEDIATE GERMAN I
Undergraduate
This course is the first quarter of second-year college German, and emphasizes language as communication in real-life situations and as a means to immerse ourselves in the cultures of German-speaking countries. Though students will review and perfect their knowledge of German grammar throughout the year, they will focus on the perfection of the four language skills reading, writing, listening and speaking. Students will have ample opportunities to express themselves in German, acquire basic discussion strategies, and gain insight into many aspects of the contemporary cultures and societies of German-speaking countries. GER 103 or equivalent, including placement test or permission of instructor, is recommended.

GER 105
INTERMEDIATE GERMAN II
Undergraduate
This course is the second quarter of second-year college German, and emphasizes language as communication in real-life situations and as a means to immerse ourselves in the cultures of German-speaking countries. Though students will review and perfect their knowledge of German grammar throughout the year, they will focus on the perfection of the four language skills reading, writing, listening and speaking. Students will have ample opportunities to express themselves in German, acquire basic discussion strategies, and gain insight into many aspects of the contemporary cultures and societies of German-speaking countries. GER 104 or equivalent, including placement test or permission of instructor, is recommended.

GER 106
INTERMEDIATE GERMAN III
Undergraduate
This video-based course is designed to develop and expand skills in German and explore ideas, cultural topics and themes from the German-speaking world. Course activities will include: learning from authentic video clips and films; visiting (in textbook and video) various cities and regions in the German-speaking world, exploring the variety and the similarities; practicing skills in German by discussing cultural issues and authentic readings; interpreting graphics and charts on topics of German culture; structured listening and writing practice; reading literary and nonliterary texts of increasing difficulty; summarizing verbally and in writing what is read, heard, and learned; writing compositions and short texts of various types: researching a topic; preparing and presenting results to the class (oral and written). GER 105 or equivalent, including placement test or permission of instructor, is recommended.

GER 130
MOLILSAP STUDY ABROAD
Undergraduate
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

GER 197
SPECIAL TOPICS IN GERMAN
Undergraduate
See schedule for current offerings.

GER 198
STUDY ABROAD
Undergraduate
Variable credit.

GER 199
INDEPENDENT STUDY
Undergraduate
Variable credit.
GER 201
ADVANCED COMMUNICATION I
Undergraduate
The third year of German focuses on four primary linguistic skills: comprehension, reading, writing and speaking. Development in each of these areas is achieved through the introduction, consideration, and analysis of longer German stories, increasingly complex discussions of said texts, and the review, and hopefully ultimate mastery, of various vocabularies and advanced-level grammar. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 202
ADVANCED COMMUNICATION II
Undergraduate
The third year of German continues strengthening four primary linguistic skills: comprehension, reading, writing and speaking. The main goal is to achieve oral proficiency. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 203
ADVANCED COMMUNICATION III
Undergraduate
The third year of German continues strengthening four primary linguistic skills: comprehension, reading, writing and speaking. The main goal is oral proficiency. Ample time will be devoted to speaking and developing oral proficiency in class as well. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 277
FIN-DE-SIECLE VIENNA
Undergraduate
Fin-de-siecle Vienna (Vienna of the late-nineteenth and early-twentieth centuries) was a locus where geography, culture, and intellect intersected for a (historically speaking) fleeting moment of unparalleled productivity and creativity. In this urban space, figures such as Freud, Klimt, Schnitzler and Mahler mingled, discussed, and shaped the arts, philosophy, and sciences of the nascent twentieth century. This course will explore a number of the prominent players who were active in Vienna during this time, and will examine, through primary and secondary texts, and works of art, music and film, the lasting impact of their contributions on the development of thinking and innovation in the twentieth, and even twenty-first, centuries. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 297
SPECIAL TOPICS IN GERMAN
Undergraduate
See schedule for current offerings.

GER 298
STUDY ABROAD
Undergraduate
Variable credit.

GER 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

GER 301
INTRODUCTION TO GERMAN LITERATURE I : FROM ORIGINS TO 1600
Undergraduate
The modern understanding of the German nation has its origins in a number of tribes that emerged from southern Scandinavia and northern Germany before the Common Era. This course will trace the development of "Germany" (a term that was not commonly used until the 1500s) in the Medieval period and into the 16th century, when Martin Luther and his 95 Theses initiated the movement that would later be known as the Protestant Reformation. In the exploration of this history, and of the evolution of the German language, students will read representative works of literature which will question the category of literature altogether. GER 106 or equivalent, including placement test or permission of instructor, is recommended.
GER 302
INTRODUCTION TO GERMAN LITERATURE II: FROM 1600-1850
Undergraduate
Literature from 1600-1850. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 303
INTRODUCTION TO GERMAN LITERATURE III: FROM 1850 TO PRESENT
Undergraduate
Literature from 1850 to the present. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 304
GERMAN DRAMA
Undergraduate
This course is designed to familiarize students with some of the outstanding dramas written in German speaking countries during the last half century. Students will explore dramas that ignited hot public debates on account of their weighty topics, science and ethics, or science as power, more precisely, political power: "What do scientific discoverers do when they feel responsibility towards the world?" Towards the end of the 20th century, and with the rise of critical feminist thought, the fierce satirical drama of the Nobel Prize winning Austrian playwright Elfriede Jelinek on science, and the power games of gender garners attention. Her work and those of other artists will be explored. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 305
GERMAN PROSE
Undergraduate
Topics include: prose from 1600 to Goethe; from the Romantic to the Realistic periods; prose of the 20th century. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 306
THE NOVELLE
Undergraduate
From Goethe to Grass. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 307
GERMAN POETRY
Undergraduate
Instead of treating poems as potentially boring puzzles that can only be solved with some piece of arcane knowledge not available to average people, this course approaches the history of poems written in German by focusing on the various tools available to poets. What if sound (the sound of individual words but also the cumulative sound, including tone, which words make when put in a certain order) were more important than meaning or expression? What if lines, rather than sentences, made for a more reliable unit of composition? What if metaphor and simile actually created relationships between different things rather that those relationships existing prior to the poem? Students will be expected to experiment with these techniques themselves, and we will use our focus on those techniques as a constant that takes us through the periods comprising literary history in German-speaking countries. The variety of these periods, taken together, should serve to keep the subject matter lively. Even if the materials sacrifice depth for breadth, the course will reserve time for such luminaries as the Minnesingers, Holderlin, Goethe & Schiller, Trakl, Rilke, Brecht, Bachmann, and others, while touching on occasional oddballs like Heinz Herbeck and contemporaries such as Monika Rinck and Nora Gomringer. The aims of this course are to be better able to experience poems rather than decode them, and to situate them in their literary classification.

GER 308
GOETHE'S FAUST
Undergraduate
This course explores one of the great, canonical works of German literature, Goethe's peculiar and provocative interpretation of the legendary figure of Dr. Faustus. By spending an entire quarter with this one text, students have time to gain a thorough appreciation for its depth, complexity, and poetic excellence. Classroom discussions will focus in part on a close reading of the text in its various dimensions: characterization, motivation, plot-structure and plot-development, poetic form (meter and rhyme), and poetic imagery (metaphors, similes, etc.). Students will also examine the philosophical questions raised by Faust and Mephisto's rich and probing dialogues and also consider the larger cultural and historical significance of Goethe's Faust. GER 106 or equivalent, including placement test or permission of instructor, is recommended.
GER 309
GERMAN CIVILIZATION I
Undergraduate
The rise and fall of the "Holy Roman Empire": Social, intellectual and artistic background of Germany from its origins to 1871. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 310
GERMAN CIVILIZATION II
Undergraduate
Social, intellectual and artistic developments in Germany from unification in 1871 to reunification in 1990. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 311
GERMAN CIVILIZATION III
Undergraduate
"German Civilization III" examines the many facets of contemporary Germany and Austria. Students learn about current events via German-language popular culture, politics, the arts, and business, and engage with several media (internet, television, film, print) to understand the happenings of the German-speaking world in the present day. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 312
GERMAN INTELLECTUAL HISTORY
Undergraduate
This course is designed to introduce the student to some of the most powerful and influential German thinkers in Western civilization of the 19th and 20th century, whose names are synonymous with revolutionary thinking, and whose philosophies have deeply shaped the Weltanschauung of 20th century man. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 313
TURN OF THE CENTURY VIENNA
Undergraduate
A world center of modern art and thought: Freud, Wittgenstein, Klimt, Kokoschka, Kafka, Shoenberg. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 314
BERLIN AND THE GOLDEN TWENTIES
Undergraduate
Berlin in the 1920s was a place characterized by a number of contradictions: the legion suffering of returning soldiers after the First World War contrasted with the speed and frivolity of the modern metropolis; the final moments of the German monarchy and a burgeoning, albeit tenuous, republican government; and an ever-growing tension between liberalism, both political and personal, and an increasingly radical political Right. In many ways, the Berlin of these "Golden Twenties" is inseparable from the Weimar Republic. As the geographical and intellectual center for this new government, Berlin bore firsthand witness to the numerous political crises that marked this short, and ultimately doomed, political experiment between 1918 and 1933. Further, Weimar culture was defined by its staggering creative production in all fields -- art, theater, literature, philosophy, architecture, science, and technology -- and in turn, Berlin functioned as the setting for a multitude of intellectual meetings and intersections. This course will contextualize the Weimar Republic in postwar Europe, discuss the political crises that plagued Germany's young democracy, and explore some of the major cultural players in this great metropolis of the early twentieth century. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 315
LITERATURE AFTER 1945 (EAST AND WEST)
Undergraduate
Reconstruction of German literature and coming to terms with the past: "Gruppe 47", Grass, Boell, Enzensberger. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 316
LITERATURE OF THE WEIMAR YEARS
Undergraduate
Mann, Hesse, Kafka, Brecht. GER 106 or equivalent, including placement test or permission of instructor, is recommended.
GER 317
WOMEN WRITERS OF GERMAN EXPRESSION
Undergraduate
Studies in literature and social issues from all periods of German, Austrian and Swiss history. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 319
MULTICULTURAL CONTEMPORARY WRITERS
Undergraduate
Focus on the critical bicultural awareness of immigrant writers of German expression whose original language is not German. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 320
ADVANCED COMMERCIAL GERMAN
Undergraduate
This course will approach the concept of Geschäftsdéutsch on two levels: first with an examination of Germany, Austria, the European Union, and the German industry and economy, and second, with an exploration of the German professional world (i.e. the processes involved in searching, applying, and interviewing for an internship or employment in a German speaking country). Students will practice in class through role playing, skits, writing example letters, resumes, and CVs, etc. A number of guest speakers from the German business community in Chicago are possible. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 321
TRANSLATION
Undergraduate
The primary objective of this course is to immerse the student in the process of translation from German into English (and to a lesser extent from English into German) to successfully complete a variety of translation projects for professional, academic, artistic, or personal purposes, thus equipping the students with proficiency in translating at an advanced level. Through various translation assignments, students will be able to review German grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing in German while developing a sense of responsibility for the text translated. This course will present a survey of translation theory, particularly as it relates to Germany, and probe the usefulness of technology. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 329
THE GERMAN FILM
Undergraduate
The "German National Cinema" has changed nearly as much as the face of the German nation itself over the course of the twentieth century. Films made in the various "Germanies" in the past hundred years are a reflection of, and reaction to, the political, social, and artistic climates confronting German-speaking filmmakers. Students will investigate the motivations surrounding the production of certain historically significant films, as well as the messages that were conveyed to the contemporary audience through the cinema of the period. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 351
GERMAN PHONOLOGY AND PHONETICS
Undergraduate
An in-depth study of the language's sound system and intensive pronunciation practice. GER 106 or equivalent, including placement test or permission of instructor, is recommended.

GER 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in German. Students must have the equivalent of 106 or higher ability in German to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

GER 397
SPECIAL TOPICS IN GERMAN
Undergraduate
See schedule for current offerings.
The modern understanding of the German nation has its origins in a number of tribes that emerged from southern Scandinavia and northern Germany before the Common Era. It was not until the reign of Charlemagne in the eighth and early ninth centuries that the process of uniting most of the Germanic provinces was completed under the Carolingian Empire, which was later to be absorbed into the Holy Roman Empire. The course will trace these developments, as well as that of "Germany" (indeed a term that was not commonly used until the 1500s) in the Medieval period and into the 16th century, when Martin Luther and his 95 Theses initiated the movement that would later be known as the Protestant Reformation. Students will read representative works of literature that explore the traditions, attitudes, and mindsets of Germanic peoples in their respective eras.

Topics include: prose from 1600 to Goethe; from the Romantic to the Realistic periods; prose of the 20th century.
GER 408
GOETHE'S FAUST
Graduate
This course explores one of the great, canonical works of German literature, Goethe's peculiar and provocative interpretation of the legendary figure of Dr. Faustus. By spending an entire quarter with this one text, students have time to gain a thorough appreciation for its depth, complexity, and poetic excellence. Classroom discussions will focus in part on a close reading of the text in its various dimensions: characterization, motivation, plot-structure and plot-development, poetic form (meter and rhyme), and poetic imagery (metaphors, similes, etc.). Students will also examine the philosophical questions raised by Faust and Mephisto's rich and probing dialogues and also consider the larger cultural and historical significance of Goethe's Faust.

GER 409
GERMAN CIVILIZATION I
Graduate
The rise and fall of the "Holy Roman Empire": Social, intellectual and artistic background of Germany from its origins to 1871.

GER 410
GERMAN CIVILIZATION II
Graduate
Social, intellectual and artistic developments in Germany from unification in 1871 to reunification in 1990.

GER 411
GERMAN CIVILIZATION III
Graduate
Contemporary Germany. Cross-listed with GER 311.

GER 412
GERMAN INTELLECTUAL HISTORY
Graduate
This course is designed to introduce the student to some of the most powerful and influential German thinkers in Western civilization of the 19th and 20th century, whose names are synonymous with revolutionary thinking, and whose philosophies have deeply shaped the Weltanschauung of 20th century man.

GER 413
TURN OF THE CENTURY VIENNA
Graduate

GER 414
BERLIN AND THE GOLDEN TWENTIES
Graduate
Berlin in the 1920s was a place characterized by a number of contradictions: the legion suffering of returning soldiers after the First World War contrasted with the speed and frivolity of the modern metropolis; the final moments of the German monarchy and a burgeoning, albeit tenuous, republican government; and an ever-growing tension between liberalism, both political and personal, and an increasingly radical political Right. In many ways, the Berlin of these “Golden Twenties” is inseparable from the Weimar Republic. As the geographical and intellectual center for this new government, Berlin bore firsthand witness to the numerous political crises that marked this short, and ultimately doomed, political experiment between 1918 and 1933. Further, Weimar culture was defined by its staggering creative production in all fields -- art, theater, literature, philosophy, architecture, science, and technology -- and in turn, Berlin functioned as the setting for a multitude of intellectual meetings and intersections. This course will contextualize the Weimar Republic in postwar Europe, discuss the political crises that plagued Germany’s young democracy, and explore some of the major cultural players in this great metropolis of the early twentieth century.

GER 415
LITERATURE AFTER 1945 (EAST AND WEST)
Graduate
Reconstruction of German literature and coming to terms with the past: "Gruppe 47", Grass, Boell, Enzensberger.
GER 416  
LITERATURE OF THE WEIMAR YEARS  
Graduate  
Mann, Hesse, Kafka, Brecht.

GER 417  
WOMEN WRITERS OF GERMAN EXPRESSION  
Graduate  
Studies in literature and social issues from all periods of German, Austrian and Swiss history.

GER 419  
MULTICULTURAL CONTEMPORARY WRITERS  
Graduate  
Focus on the critical bicultural awareness of immigrant writers of German expression whose original language is not German.

GER 420  
ADVANCED COMMERCIAL GERMAN  
Graduate  
This course will approach the concept of Geschäftsdeutsch on two levels: first with an examination of Germany, Austria, the European Union, and the German industry and economy, and second, with an exploration of the German professional world (i.e. the processes involved in searching, applying, and interviewing for an internship or employment in a German speaking country). Students will practice through role playing, skits, writing example letters, resumes, and CVs, etc. A number of guest speakers from the German business community in Chicago are possible.

GER 421  
TRANSLATION  
Graduate  
The primary objective of this course is to immerse the student in the process of translation from German into English (and to a lesser extent from English into German) to successfully complete a variety of translation projects for professional, academic, artistic, or personal purposes, thus equipping the students with proficiency in translating at an advanced level. Through various translation assignments, students will be able to review German grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing in German while developing a sense of responsibility for the text translated. This course will present a survey of translation theory, particularly as it relates to Germany, and probe the usefulness of technology.

GER 429  
THE GERMAN FILM  
Graduate  
The “German National Cinema” has changed nearly as much as the face of the German nation itself over the course of the twentieth century. Films made in the various “Germanies” in the past hundred years are a reflection of, and reaction to, the political, social, and artistic climates confronting German-speaking filmmakers. Students will investigate the motivations surrounding the production of certain historically significant films, as well as the messages that were conveyed to the contemporary audience through the cinema of the period.

GER 451  
GERMAN PHONOLOGY AND PHONETICS  
Graduate  
An in-depth study of the language's sound system and intensive pronunciation practice. Cross listed with GER 351.

GER 496  
PRACTICUM IN GERMAN INSTRUCTION  
Graduate  
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.
GER 497
SPECIAL TOPICS IN GERMAN
Graduate
See schedule for current offerings.

GER 498
STUDY ABROAD
Graduate
Variable credit.

GER 499
INDEPENDENT STUDY
Graduate
Variable credit.

GPH 205
HISTORICAL FOUNDATIONS OF VISUAL TECHNOLOGY
Undergraduate
This course is a survey of the development, application and meaning of visual technologies in a wide range of world cultures from pre-history to the present. It traces the unique intersection of mathematics and physical culture that marks design science, as it has been realized in a variety of human societies. The course includes works of art that emphasize those mathematical and geometric elements that are antecedent to contemporary graphic technology.

GPH 211
PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS I
Undergraduate
An introduction to the visual, non-verbal principles incorporated in the effective presentation of on-screen environments. This course emphasizes the use of two-dimensional elements and their organization.

GPH 212
PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS II
Undergraduate
Further experience with the visual, non-verbal principles incorporated in effective presentation of on-screen environments. This course emphasizes the use of three-dimensional elements, spaces and their organization. PREREQUISITE(S): ART 105, GD 105, GPH 211 or HCI 402.

GPH 213
PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS III
Undergraduate
An introduction to the visual and communication principles for the structure and organization of time-based digital environments. Introduction to standard 2D animation software applications. PREREQUISITE(S): GPH 211 or GD 105 or equivalent

GPH 250
DIGITAL MODELING I
Undergraduate
Introduction to 3D object modeling with an emphasis on visual applications and prototype design. Students will work with basic spatial operations in surface modeling and CAD interfaces and will produce an original object from pattern with computer-aided manufacture. Prerequisite: GPH 212

GPH 255
HAND PROTOTYPING FOR GRAPHIC VISUALIZATION
Undergraduate
Paper prototyping techniques for pre-screen image design including form rendering, rapid visualization, descriptive geometry, and iconographic diagramming. Students will work from initial sketch versions through client presentation. PREREQUISITE(S): ART 106 and (GPH 211 or GD 105)
GPH 259
DESIGN GEOMETRY
Undergraduate
An historical and practical introduction to the visual applications of geometry. This CAD-based survey covers constructive geometry, surface symmetry, projective geometry, polyhedrons and spheroids through the discussion of historical precedents and practicum exercises.

GPH 269
GRAPHIC GEOMETRIES
Undergraduate
An historical and practical introduction to the visual applications of geometry. This CAD-based survey covers constructive geometry, surface symmetry, projective geometry, polyhedrons and spheroids through the discussion of historical precedents and practicum exercises.

Graduate standing is a prerequisite for this class.

GPH 279
SCIENCE AND DESIGN OF SUNDIALS
Undergraduate
This course explores ancient and early modern understanding of the cosmos and how this was successfully modeled into the sundial. About half of the course lectures are historical, while others explain the astronomy, geography and geometry used to design the dial. During lab sessions students design and create their own sundials.

GPH 321
COMPUTER GRAPHICS DEVELOPMENT I
Undergraduate
This course presents the fundamental mathematical foundations of graphics including an introduction to the basic geometric constructions of points, vectors, transformations, matrices and homogeneous coordinates. The course will explore applications of these mathematical techniques to rendering 3D scenes and lighting and shading surfaces in 3D. Advanced topics will include several key techniques from computational geometry such as the computation of object intersections and applications to rendering 3D scenes and object collisions. The focus of this course is on building the software from scratch rather than using a graphics application programming interface (API) so that students will gain a deeper understanding of the techniques they will be using in later courses through an API such as OpenGL or Direct3D. PREREQUISITE(S): CSC 300 or CSC 383 or CSC 393

CSC 300 or CSC 383 or CSC 393 is a prerequisite for this class.

GPH 325
SURVEY OF COMPUTER GRAPHICS
Undergraduate
(Formerly GPH 371) A survey of basic 3D techniques, including interaction of light and color. The relationship between visual effect and geometry. Visual effects of rendering, texturing and lighting algorithms. Procedurally based modeling and an introduction to procedural animation techniques. PREREQUISITE(S): CSC 212 or CSC 262 or ISM 330

GPH 329
COMPUTER GRAPHICS DEVELOPMENT II
Undergraduate
Basic graphics architecture. Coordinate systems. Three-dimensional representations and transformations. Simple visible-surface algorithms. Introduction to illumination. Gouraud and Phong shading. Antialiasing. Texture mapping and elements of animation. Students create a graphics package using a high-level graphics API such as OpenGL. PREREQUISITE(S): CSC 361 and (GAM 325 or GPH 321)

CSC 361 and (GAM 325 or GPH 321) are prerequisites for this class.

GPH 336
SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION
Undergraduate

GPH 329 or GAM 370 is a prerequisite for this class.
GPH 338
SURVEY OF 3-D ANIMATION
Undergraduate
(Formerly titled Computer Animation Survey). Use of a commercially-based animation package for the purpose of communicating a narrative or visual information. Animation of transformations, deformations, cameras, and lights. Forward / inverse kinematics for character rigging. Prerequisites: ANI 201 and either GPH 325 or GPH 250.

GPH 339
ADVANCED RENDERING TECHNIQUES
Undergraduate
An introduction to shading techniques for highly realistic computer generated imagery. Texturing basics. Design, acquisition and application of layered textures to produce realistic dirt and aged surfaces. Turntables. Basic illumination and reflectance models. Elements of procedural texturing for organic surface materials such as wood and marble. The course includes an introduction to an industry standard shading language that is a powerful prototyping tool for both offline and real-time rendering environments. Students work in teams to produce convincingly organic environments. PREREQUISITE(S): GPH 325 or GPH 321 or (ANI 339 and GPH 355)

GPH 340
PROCEDURAL SHADING
Undergraduate
Procedural pattern generation, creating patterns such as marble and wood with noise, moving beyond the Phong Illumination model. Gaussian distributions and the Ward anisotropic model, BRDFs. Non-photorealistic rendering techniques such as “toon” shading and painterly techniques. PREREQUISITE(S): GPH 339

GPH 341
ADVANCED LIGHTING TECHNIQUES
Undergraduate
Simple local models such as Phong, extensions to Phong (HDR1), ray-traced lighting and shadows, soft shadow generation using shadow maps, radiosity for producing ambient lighting and photon mapping for calculating realistic refracted light. Theory, lighting features supported, efficiency, and practical considerations for choosing the model in production. PREREQUISITE(S): GPH 339

GPH 345
DIGITAL SURFACE MODELING
Undergraduate
This course is an upper level exploration of digital modeling in NURBS environments. Students will learn to creatively apply analytic methods of form production and scenic presentation suitable for application to design and engineering, medical and forensic visualization, and testing. In general this course will prepare students for 3-D graphic applications outside of the entertainment industry while rounding out their modeling skills for that industry, too. PREREQUISITE(S): GPH 212 or GPH 259 or ANI 230.

GPH 346
SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION
Undergraduate
(Formerly CSC 346; Cross-listed with CSC 536) Parametric curves and surfaces. Continuity of curves and surfaces. Hermite, Bezier, B, and Catmull-Rom splines. Integer, adaptive and interactive generation of curves and surfaces. Surface subdivision. Quadric surfaces. Surface use in animations. PREREQUISITE(S): GPH 329 or GAM 370

GPH 348
RIGGING FOR ANIMATION
Undergraduate
Readying 3D characters and other models for animation. Skeleton chains, joint orientations, and degrees of freedom. IK solvers, including single chains, rotation and splines. Methods for computing weights for skinning body and face, including semi-automated approaches. Considerations for mechanical objects, animals and low-polygon models. PREREQUISITE(S): GPH 338 or ANI 201
GPH 350  
DIGITAL MODELING II  
Undergraduate  
Advanced experience in object modeling and prototype design. Students will work with more sophisticated form relationships, reverse engineering and textures, and will produce an original object from slicing with computer-aided manufacture. PREREQUISITE(S): GPH 250.

GPH 355  
3D SCRIPTING FOR ANIMATORS  
Undergraduate  
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. Prerequisites: ANI 230 or GPH 338.

GPH 358  
COMPUTER GRAPHICS AUTOMATION  
Undergraduate  
Covers the use of scripting and other automation techniques to generate computer graphics and animation. Emphasis on the benefits and differences of scripting languages compared to conventional graphics programming. Using commercially available scripting environments, students will generate rich, interesting graphics and animations that would not be possible with the conventional user interface. PREREQUISITE(S): ISM 330 or CSC 212 or CSC 262 or GPH 355 or CSC 242.

GPH 360  
MODELING SPACES  
Undergraduate  
The digital design and modeling of environmental spaces with attention to human use parameters. PREREQUISITE(S): GPH 250.

GPH 372  
PRINCIPLES OF COMPUTER ANIMATION  
Undergraduate  
(Formerly CSC 372) This course will cover a range of topics in introductory 3D Computer Animation. Topics covered will include key framing, interpolation, hierarchies, inverse kinematics, particle systems, and the basics of physically based simulation and modeling. PREREQUISITE(S): GPH329 or GAM 370

GPH 375  
ADVANCED GRAPHICS DEVELOPMENT  
Undergraduate  
(Formerly CSC 375) Survey of standards and current modular technology for 2D and 3D graphics software development. Use of software development toolkits to create “plug-ins” and other modularly organized functionality enhancements for selected commercially available graphics packages. PREREQUISITE(S): GPH 329 or permission of instructor.

GPH 380  
VISUALIZATION  
Undergraduate  
An in depth introduction to a wide range of visualization techniques focusing on medical and scientific applications. Introduction to programming using a visualization package, use of color for feature extraction and enhancement, false color mapping techniques, reconstruction techniques, iso surface generation, stream lines and ribbons, spatial set operations and projections of higher-dimensional data sets. Prerequisite(s): GPH 325

GPH 387  
FORENSIC ANIMATION  
Undergraduate  
Techniques and issues in forensic animation. Application of modeling and rendering to the recreation of time-based events for legal purposes. Survey of research and interview techniques. Demonstrative recreation and physically-based recreation. Issues of accuracy, verification, certification and ethics. Students research and recreate an event with forensic value. Possible project areas include motor vehicle incidents, aviation events, product liability, medicine, and trademark infringement. Prerequisites: GPH 338 or ANI 231
GPH 388
PRODUCTION PIPELINE TECHNIQUES
Undergraduate
An essential aspect of CGI is the skill to effectively manage data for an entire show, and to know how to monitor renders and image processes with the end result of assembling the finished animation. Students taking this course will gain hands-on experience in render queue management, automated file/image processing and manipulation, disk resource management, data archiving, conversion of outside vendor media and scripting tools to automatic common tasks and improve workflow. Students will work in teams to complete large-scale asset management and rendering projects. Prerequisites: CSC 212 or CSC 262

GPH 389
REAL-TIME GRAPHICS TECHNIQUES
Undergraduate
This course will cover the basic algorithms and techniques used in today's real-time graphics systems. Topics will include the following: an introduction to computational geometry including computation with polygonal meshes. Alternate scene representations for efficient geometry culling, including BSP trees and oct-trees. Bounding volume hierarchies, box-trees and R-trees, and application to geometry culling. Programmable graphics hardware and its applications to geometric deformations and surface rendering. PREREQUISITE(S): GPH 329 or GAM 370

GPH 329 or GAM 370 is a prerequisite for this class.

GPH 390
TOPICS IN GRAPHICS
Undergraduate
Description: May be repeated for credit. PREREQUISITE(S): Permission of Instructor

GPH 395
COMPUTER GRAPHICS SENIOR PROJECT
Undergraduate
A group project involving analysis, design, creation, implementation and testing of a large project such as an animation, an interactive multimedia presentation or a video game. Portfolio creation and critique. Discussion of strategies for graduate school and the job market. PREREQUISITE(S): GPH 338 or GPH 372.

GPH 399
INDEPENDENT STUDY
Undergraduate
Variable credit. PREREQUISITE(S): Consent of dean.

GPH 425
SURVEY OF COMPUTER GRAPHICS
Graduate
Expression of visual intent through geometry and procedure. A survey of basic 3D techniques, including interaction of light and color. Visual effects of rendering, texturing, and lighting algorithms. Procedural modeling techniques and an introduction to procedurally-based texturing and animation. PREREQUISITE(S): CSC 212 or CSC 262.

GPH 436
FUNDAMENTALS OF COMPUTER GRAPHICS
Graduate
An accelerated introduction to the graphics development environments and to graphical programming. Provides an in depth discussion of the basic mathematical language of computer graphics: vectors, transformations, homogeneous coordinates and their associated data structures. Advanced topics will include sampling theory and interpolation. Also provides a basic introduction to industry standards in graphics development, including specifying transformations and viewing parameters. PREREQUISITE(S): CSC 393 and MAT 150.

CSC 393 and MAT 150 are prerequisites for this class.
GPH 438  
**COMPUTER ANIMATION SURVEY**  
*Graduate*  
Survey of methods used in computer animation. This course uses commercially available software packages to teach techniques for animation and digital video production. The techniques covered include storyboarding, key frame animation, audio and video editing.  
PREREQUISITE(S): GPH 425 or GPH 469.  

GPH 425 (or GPH 469) is a prerequisite for this class.

---

GPH 448  
**COMPUTER GRAPHICS SCRIPTING**  
*Graduate*  
Covers the use of scripting to generate computer graphics and animation. Emphasis on the benefits and differences of scripting languages compared to conventional graphics programming. Using commercially available scripting environments, students will generate complex graphics and animations that would not be possible with the conventional user interface. PREREQUISITE(S): GPH 438.

---

GPH 450  
**DIGITAL MODELING I**  
*Graduate*  
Introduction to 3D object modeling with an emphasis on visual applications and prototype design. Students will work with basic spatial operations in surface modeling and CAD interfaces and will produce an original object from pattern with computer-aided manufacture.  
PREREQUISITE(S): HCI 470

---

GPH 469  
**COMPUTER GRAPHICS DEVELOPMENT**  
*Graduate*  
Basic graphics architecture. Coordinate systems. Three-dimensional representations and transformations. Simple visible-surface algorithms. Introduction to illumination, Gouraud and Phong shading, Antialiasing, Texture mapping and elements of animation. Students create a graphics package using a high-level graphics API such as OpenGL. PREREQUISITE(S): CSC 461 and (GAM 425 or GPH 436)

CSC 461 and (GAM 425 or GPH 436) are prerequisites for this class.

---

GPH 487  
**FORENSIC ANIMATION**  
*Graduate*  
Techniques and issues in forensic animation. Application of modeling and rendering to the recreation of time-based events for legal purposes. Survey of research and interview techniques. Demonstrative recreation and physically-based recreation. Issues of accuracy, verification, certification and ethics. Students research and recreate an event with forensic value. Possible project areas include motor vehicle incidents, aviation events, product liability, medicine, and trademark infringement.

---

GPH 536  
**SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION**  
*Graduate*  

GPH 469 or GAM 470 is a prerequisite for this class.

---

GPH 538  
**RIGGING FOR ANIMATION**  
*Graduate*  
Readying 3D characters and other models for animation. Skeleton chains, joint orientations, and degrees of freedom. IK solvers, including single chains, rotation and splines. Methods for computing weights for skinning body and face, including semi-automated approaches. Considerations for mechanical objects, animals and low-polygon models. PREREQUISITE(S): GPH 438
GPH 539
ADVANCED RENDERING TECHNIQUES
Graduate
An in-depth examination of texturing techniques for highly realistic computer generated imagery. Design and implementation of layered textures to produce realistic dirt and aged surfaces. Cost analysis of advanced illumination and reflectance models, including environment and shadow mapping, and ambient occlusion. Procedural texturing including pattern generation and the application of noise to produce organic surfaces. Shader development using an industry standard. Prototyping for both offline and real-time rendering environments. Students work in teams to produce convincingly organic environments. PREREQUISITE(S): GPH 425 or GPH 436 or (ANI 439 and GPH 355)

GPH 540
PROCEDURAL SHADING
Graduate
Procedural pattern generation, creating patterns such as marble and wood with noise. Moving beyond the Phong Illumination model: Gaussian distributions and the Ward anisotropic model, BRDFs. Non-photorealistic rendering techniques such as “toon” shading and painterly techniques. PREREQUISITE(S): GPH 539

GPH 541
ADVANCED LIGHTING TECHNIQUES
Graduate
Simple local models such as Phong, extensions to Phong (HDRI), ray-traced lighting and shadows, soft shadow generation using shadow maps, radiosity for producing ambient lighting and photon mapping for calculating realistic refracted light. Theory, lighting features supported, efficiency, and practical considerations for choosing the model in production. PREREQUISITE(S): GPH 539

GPH 560
MODELING SPACES
Graduate
The digital design and modeling of environmental spaces with attention to human use parameters. PREREQUISITE(S): any GPH 400-level course or consent of instructor.

GPH 565
DESIGNING FOR VISUALIZATION
Graduate
Sources of graphical integrity and sophistication. Data-Ink maximization. Data density. The use of color to enhance features in data sets and the communication of information. Effective use of space and time. Use of 3D techniques to display multi-dimensional data. The use of isosurfaces and volumetric techniques to display features of data sets. Students will use a programmable system to produce their visualizations and will learn how to use procedural techniques to express graphical intent. (Only one of GPH 570 and GPH 565 may be taken for credit) Prerequisite(s): GPH 448 and HCI 470

GPH 570
VISUALIZATION
Graduate
(Formerly CSC 570) Reconstruction techniques. Voxel classification and isosurface generation. Spatial set operations. Projections of higher-dimensional data sets. Data feature enhancement. False color mapping. Survey of applications in science, engineering and medicine. PREREQUISITE(S): GPH 469 or GAM 470

GPH 469 or GAM 470 is a prerequisite for this class.

GPH 572
PRINCIPLES OF COMPUTER ANIMATION
Graduate
(Formerly CSC 572) This course will cover a range of topics in introductory 3D Computer Animation. Topics covered will include key framing, interpolation, hierarchies, inverse kinematics, particle systems, and the basics of physically based simulation and modeling. PREREQUISITE(S): GPH 469.
GPH 575
ADVANCED GRAPHICS DEVELOPMENT
Graduate
Survey of standards and current modular technology for 2D and 3D graphics software development. Use of software development toolkits to create "plug-ins" and other modularly organized functionality enhancements for selected commercially available graphics packages.
PREREQUISITE(S): GPH 448 and (GPH 469 or GAM 470)

GPH 448 and (GPH 469 or GAM 470) are prerequisites for this class.

GPH 580
HARDWARE SHADING TECHNIQUES
Graduate
This class explores the current trends in programmable computer graphics hardware. Modern graphics processing units (GPU's) are becoming increasingly powerful and fully programmable parallel processing units. They make extremely sophisticated effects in computer graphics, such as shadows, displacement maps, skinning, motion blur, reflections and refractions, possible in real-time scenes. In addition these increasingly general programmable units are being used for far more general computing problems from traditional searching and sorting algorithms to computational problems in physics such as the diffusion equation and fluid flow. In this course we will explore the applications of hardware shading to computer graphics, including advanced lighting, shading and surface effects. As time allows, we will explore other applications such as physics and computer science. Prerequisites: GPH 469 or GAM 470

GPH 469 or GAM 470 is a prerequisite for this class.

GPH 595
TOPICS IN GRAPHICS
Graduate
May be repeated for credit. PREREQUISITE(S): Permission of instructor.

GRK 101
BASIC CLASSICAL GREEK I
Undergraduate
Basic Classical Greek 101 is the first ancient Greek reading course. It introduces students to the basics of the language of the ancient Athenians, Attic Greek, which includes the Greek alphabet, pronunciation and the beginnings of Greek grammar. Students will begin to develop reading and writing skills as they encounter small passages of ancient Greek text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of ancient Greek, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate ancient Greek as they proceed, learning rudiments of the language as well as cultural aspects of the ancient Greeks at varying epochs.

GRK 102
BASIC CLASSICAL GREEK II
Undergraduate
Basic Classical Greek 102 is the second ancient Greek reading course. It introduces students to the basics of the language of the ancient Athenians, Attic Greek, which includes the Greek alphabet, pronunciation and the beginnings of Greek grammar. Students will begin to develop reading and writing skills as they encounter small passages of ancient Greek text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of ancient Greek, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate ancient Greek as they proceed, learning rudiments of the language as well as cultural aspects of the ancient Greeks at varying epochs.

GRK 103
BASIC CLASSICAL GREEK III
Undergraduate
Basic Classical Greek 103 is the third ancient Greek reading course. It introduces students to the basics of the language of the ancient Athenians, Attic Greek, which includes the Greek alphabet, pronunciation and the beginnings of Greek grammar. Students will begin to develop reading and writing skills as they encounter small passages of ancient Greek text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of ancient Greek, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate ancient Greek as they proceed, learning rudiments of the language as well as cultural aspects of the ancient Greeks at varying epochs.
GRK 104
INTERMEDIATE CLASSICAL GREEK I
Undergraduate
Intermediate Ancient Greek is an introduction to ancient Greek poetry. This course will give students a review of grammar and forms along with reading exercises. Students concentrate on reading large sections of text in an effort to derive meaning and historical significance from the meter and the meaning of the ancient language. Continued drill on forms and reading for comprehension are the tools used by students. Students will be expected to read through passages of ancient Greek with relative dexterity, and they will begin to parse through the texts in class in order to inculcate the skills of navigating entire texts. Students begin to develop affinity for specific authors from the poetic tradition of the ancient Greeks. They shall have the opportunity to choose a specific work or poet in order to gain at least an introductory exposure to what may become their unique interest in the ancient world. This course emphasizes the completion of poems in order that the student becomes more comfortable with the ancient language. This course is a must for students of history, especially that of the western tradition, and it is imperative for the student interested in remaining capable of translating even the simplest ancient Greek passages. Greek 103 or equivalent, including placement test or permission of instructor, is recommended.

GRK 105
INTERMEDIATE CLASSICAL GREEK II
Undergraduate
Intermediate Ancient Greek is an introduction to ancient Greek poetry. This course will give students a review of grammar and forms along with reading exercises. Students concentrate on reading large sections of text in an effort to derive meaning and historical significance from the meter and the meaning of the ancient language. Continued drill on forms and reading for comprehension are the tools used by students. Students will be expected to read through passages of ancient Greek with relative dexterity, and they will begin to parse through the texts in class in order to inculcate the skills of navigating entire texts. GSB 400  
FOUNDATIONS OF QUANTITATIVE ANALYSIS  
Graduate  
This course provides basic instruction in mathematical and statistical methods as a foundation for GSB420 Applied Quantitative Analysis. This course will focus on strengthening algebra and calculus skills and provide a basic introduction to statistical methods.

GSB 420  
BUSINESS ANALYTICS TOOLS  
Graduate  
This course provides foundational quantitative analytical skills to address typical problems that arise in business. The course emphasizes a problem-oriented approach utilizing software applications such as Excel for data analyses. The topics covered in the course include relevant mathematical concepts such as algebra and probability theory/application as well as a strong focus on fundamental statistical tools such as hypothesis testing, regression analysis and forecasting.

GSB 595  
DEVELOPING SUSTAINABLE STRATEGIES: PRACTICUM  
Graduate  
This course is designed to integrate the concept of strategy development into the larger ecological economic context of serving market/society needs in a finite world. The goal of strategy in organizations has traditionally been defined as one of value maximization, from the shareholder perspective exclusively. But the role of strategy is to guide organizations in competitively defining and meeting market/society's needs. Sustainable strategies take into account multiple perspectives by engaging in practices - principally systems thinking - to pursue opportunities in meeting market/society's needs that are economically viable, socially just, and operate responsibly within the constraints of a finite ecology. Students will demonstrate the literacies required to develop sustainable strategies that take into account all facets of the business venture (marketing, finance, management; design, production and distribution/life cycle analysis.) One key question will shape the trajectory of the course: “How does one develop a competitive sustainable strategy to serve some market/society need?” Therefore, the focus of this course is for the student to select a need, determine the sustainable economic system to develop and deliver the product/service, and write and present the ‘business case.’ The student will also articulate the values and vision - personally and organizationally - driving the strategy.

GSB 599  
STRATEGIC ANALYSIS FOR COMPETING GLOBALLY  
Graduate  
This capstone course views the impact of contemporary issues on corporate strategy. Competitive, cultural, social and ethical issues are examined within the context of a global business environment. The course content emphasizes identifying strategic alternatives, developing corporate and business strategies, and understanding the role of functional activities and organizational processes from a strategic viewpoint. The process of the course involves team interaction, problem-solving, group decision-making, written reports and oral presentations.

ACC 500, GSB 420, MGT 500, (MGT 502 or MGT 504), (ECO 509 or ECO 502), (ACC 555 or ACC 554), ECO 555, FIN 555, (MGT 555 or MGT 554) and MKT 555 are prerequisites for this class.

GSB 600  
CANDIDACY CONTINUATION  
Graduate  
A non-credit registration that allows students to continue to use DePaul facilities such as the library, Career Development Center and the computer lab while not registered for credit-earning courses. (0 quarter hours)

GSB 631  
STRATEGIC FINANCIAL ANALYSIS  
Graduate  
This course is designed for all MBA students seeking to develop skills in strategic financial analysis. The course provides a deep, unabashed evaluation of corporate performance with a focus on traditional and cash-based measures, and strategic applications. Understanding the strengths and weaknesses of various types of financial analyses is a requirement for designing and developing business strategy, business execution systems, and understanding the performance of the company. Key managerial questions will be investigated in the course: When should a business grow? When is growth meaningless to investors? Why does an increase in net income, even over decades, still result in stock price drops? Why do companies report Return On Equity amidst abysmal stock returns? Why and when is stock price BAD for measuring managerial performance? Corporate managers today are plagued by these questions, leading them to believe in market irrationality, or simply "the market doesn't understand my company". The course will be driven by actual review and evaluation of company financial statements, using several types of practical financial analysis methods and tools. The course provides deep insights into the world of investment analysis, corporate performance measurement, and strategic planning. This course will be useful for MBA candidates destined for higher levels of corporate management, management consulting, investment banking, equity research, or money management.
GSB 640
PROBLEMS IN ETHICS: ISSUES IN BUSINESS
Graduate
A seminar in business ethics that centers on theoretical, practical and pedagogical issues. Cross-listed with PHL 640. Offered variably.

GSB 650
RELIGIOUS ETHICS AND ECONOMICS
Graduate
This course will examine the thinking of social scientists, philosophers and theologians on the impact of religious values and institutions, on the origin and development of American capitalism and its relevance to contemporary business ethics. Cross-listed with PHL 650 and MLS 442. Offered variably.

GSB 793
INTERNSHIP
Graduate
This is a unique opportunity in which knowledge gained in the classroom can be applied to an actual business environment. The intern will be immersed in a stimulating environment with a pool of established resources in industry or government.

GSB 798
SPECIAL TOPICS
Graduate
Content and format of this course is variable. An in-depth study of current issues. Subject matter will be indicated in class schedule.

GSB 799
INDEPENDENT STUDY
Graduate
Available for graduate students of demonstrated capability for intensive independent work in accountancy.

GSB 800
INTRODUCTION TO RESEARCH METHODS
Graduate
This course is designed to introduce incoming executive doctoral students to the fundamentals of research methods. The course will begin with an overview of why we do research, the scientific method and causal inference. Students will then learn about the different types of validity and threats to validity. Finally, students will get an overview of different empirical research methods, including surveys, experiments, and analysis of archival data and will discuss the validity trade-offs of these different research methods. (2 quarter hours)

GSB 801
DESIGNING AND CONDUCTING EMPIRICAL RESEARCH STUDIES
Graduate
This course is designed to teach doctoral students how to design and conduct empirical research studies. The first part of the course will focus on practical aspects of research, such as how to identify a problem, develop a good research question, develop a theory and perform a comprehensive literature review. The second part of the course will bring on topics discussed in the Introduction to Research Methods course and further explore the different empirical research methods available to answer business research questions. Specifically, students will learn how to design research studies using process simulations, case/field studies, interviews, focus groups and surveys, experiments, and time-series and cross-sectional archival data. Construct measurement will be emphasized throughout the course. Students will discuss research ethics, with a special emphasis on IRB training and how to ethically perform research using human participants. (6 quarter hours)

GSB 802
STATISTICS IN BUSINESS RESEARCH
Graduate
This course presents the basics of using statistics in solving business problems and applications. Students will study several statistical methodologies, such as t-tests, ANOVA, correlation and simple regression analysis. A strong emphasis will be placed on understanding differences between different types of variables, when to use them, how to read them and interpret them. The course focuses on the selection, application, and interpretation of statistical techniques and requires SPSS statistical software to analyze data. Special importance will be given to topics of ethics in empirical research, data analysis and presentation. (4 quarter hours)
GSB 803
APPLIED MULTIVARIATE STATISTICS
Graduate
This course equips students with the skills needed to analyze data for advanced research using selected statistical techniques such as factor analysis, discriminant analysis, cluster analysis, and structural equation modeling. It enables students to apply these statistical techniques to a variety of business areas and problems so students can gain an applications-guided understanding of the statistical theories presented. The class includes topics of model specification, significance determination, nonlinear transformations, residual analysis, normality assessment, and outlier analysis, plus more advanced topics including autocorrelation, multicollinearity, heteroscedasticity and extrapolation. Students will do individual and group projects both in labs and in take-home assignments. The course emphasizes the selection, application, and interpretation of statistical techniques and requires SPSS statistical software to analyze data. (5 quarter hours)

GSB 804
FORECASTING AND PREDICTION
Graduate
In this course, students will study a variety of advanced statistical techniques, such as time series analysis, conjoint analysis, choice models and market diffusion models. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, forecasting evaluation and diagnostics checking. Students will learn how to set up a conjoint experiment and apply it to setting prices and predicting sales. This course will also discuss approaches to modeling consumer choice behavior, such as logit and nested logit models, and study the relation between consumer choices and price, promotion, advertising, and product innovations and characteristics. All these techniques will be used as tools to predict product diffusion, market shares, and likelihood to purchase. Several datasets will be generated to help with analyzing real life prediction simulations. Students will also review and analyze significant academic publications presenting forecasting and predictive research projects. Learning these statistical methods will be assessed in individual and group exercises, simulation and predictive experiments. (3 quarter hours)

GSB 805
ANALYSIS OF BIG DATA
Graduate
Every day, businesses generate huge amounts of data, often referred to as “big data”. This course presents an overview of current methodologies to analyze big amounts of data. The focus is on planning the stages of the big data analysis and on developing presentation reports for upper management, investors and media. Students will learn how to use statistical methods for big data analytics, such as similarity search, decision trees, association rules, and text analytics. Application of the models will be presented in popular domains such as Web and social media analytics, text mining, community discovery, and health informatics. A part of the course is devoted to the public Cloud as a resource for big data analytics. Students will do a group project on a current business problem and show what statistic technique they used for analysis, how they performed the analysis and then make a final presentation of the results, using the Cloud. (3 quarter hours)

GSB 806
INSTITUTIONAL AND ACADEMIC RESEARCH DISSEMINATION
Graduate
With every project, analysis, business inquiry or research question, new knowledge is generated. In this course, students will discuss ways to create and disseminate this new knowledge both inside a business organization and outside, in the academic and trade media. Students will study how to develop a program of research to gather and create knowledge within various domains of theory and practice. Further, a special focus will be placed on how to position the results of empirical analyses and on how to write for a variety of publishing avenues, such as white papers, academic research journals, or trade publications. Students will be exposed to research on effective writing and will investigate the processes of disseminating the new knowledge for corporate approval and for research funding. (2 quarter hours)

GSB 820
LEADING ORGANIZATIONS THROUGH PEOPLE
Graduate
This seminar is designed to develop foundational knowledge of leadership and related but broader organizational behavior research. Students will draw heavily on primary social and organizational psychology theories including, but not limited to: implicit person, attribution, social comparison, social exchange, attention, pro-social motivation, expectancy, goal-setting, job characteristics, and role theories. Students will examine how these fundamental theories shape the context of people, groups and organizations through primary organizational behavior domains including individual differences, motivation, performance, commitment, organizational citizenship, organizational climate, culture and context, power and influence, organizational justice, leader effectiveness, top management team effectiveness, leadership assessment and development.
GSB 820-1
LEADING THROUGH PEOPLE
Graduate
This seminar is designed to develop foundational knowledge of leadership and related but broader organizational behavior research. Students will draw heavily on primary social and organizational psychology theories including, but not limited to: implicit person, attribution, social comparison, social exchange, attention, pro-social motivation, expectancy, goal-setting, job characteristics, and role theories. Students will examine how these fundamental theories shape the context of people, groups, and organizations through primary organizational behavior domains including individual differences, motivation, performance, commitment, organizational citizenship, organizational climate, culture, and context, power and influence, organizational justice, leader effectiveness, top management team effectiveness, leadership assessment and development. This is part one of a two-part class. (2 quarter hours)

GSB 820-2
LEADING THROUGH PEOPLE
Graduate
This seminar continues GSB 820-1 and is designed to develop foundational knowledge of leadership and related but broader organizational behavior research. Students will draw heavily on primary social and organizational psychology theories including, but not limited to: implicit person, attribution, social comparison, social exchange, attention, pro-social motivation, expectancy, goal-setting, job characteristics, and role theories. Students will examine how these fundamental theories shape the context of people, groups, and organizations through primary organizational behavior domains including individual differences, motivation, performance, commitment, organizational citizenship, organizational climate, culture, and context, power and influence, organizational justice, leader effectiveness, top management team effectiveness, leadership assessment and development. This is part two of a two-part class. (2 quarter hours)

GSB 821
INCENTIVES AND CONTRACTS
Graduate
The course addresses topics on organizational economics and explores the idea of whether organizations matter in terms of efficient allocation of resources within and between firms. Organizational economics involves the use of economic logic and methods to understand the existence, nature, design, and performance of organizations, especially managed ones. Most economic transactions occur not in markets but inside managed organizations, particularly business firms. Organizational economics seeks to understand the nature and workings of such organizations and their impact on economic performance. The main focus of the course is on transactions within firms adopting a thoroughly economic point of view using relevant economic theory to derive the underlying principles that are at work. As a result, many of the readings are drawn from other relevant fields that study resource allocation and other processes within firms such as Corporate Finance, Personnel Economics, Sociology, Management, Entrepreneurship, and Productivity. The course also explores governed transactions between firms such as contracts, hybrid governance structures (e.g., alliances, joint ventures, and networks, among others) and activities that change firms' boundaries (e.g., start-ups, spin-offs, and mergers among others). The material is organized as follows: Boundaries and Structure of the firm: Using Prices for Coordination and Motivation, Vertical Boundaries and Horizontal Scope; Contracting between firms: Cases on Integration and Contacts; Employment in Organizations: Pay for Performance, Job Assignment, Skill Development and Networks, Careers in Organizations and Employment Systems, Executives and Managerial Compensation; Decision-making in Organizations: Decision Processes, Authority and Power, Politics and Influence, Culture and Language, Social Relations and Leadership; Structures and processes in organizations: Models of Hierarchical Structure, Organizational Processes, Conglomerates and Corporate Strategy, Hybrids. (3 quarter hours)

GSB 822
MARKETING AND BUSINESS STRATEGY
Graduate
This course surveys major topics in the evolving field of marketing and explores marketing's role in business strategy across a range of markets and industries. The focus of this doctoral seminar is to provide a critical review of selected scholarly and practitioner literature with an emphasis on their practical applications to organizations today. The course is designed to help doctoral students become conversant in prominent classical and contemporary marketing literature, as well as to promote active discussions around major streams of marketing thought applied to current business challenges and opportunities. It also serves as a foundation course to prepare the student for further research and applied work in the areas of marketing and strategy.

GSB 823
LEADING ORGANIZATIONAL DEVELOPMENT AND CHANGE
Graduate
This seminar examines the conceptual underpinnings of organization development and provides exposure to contemporary literature on OD and change. Attention is given to OD practice and evidence-based interventions for managing planned change. Key topics explored include organization theory, foundations of planned organizational change, frames and models in organizational diagnosis, applying open-systems frames to diagnosis, designing major organizational interventions (including group, techno-structural, human process, and strategic interventions). Practical attention paid to managing change and institutionalization through consultation/contracting and organizational learning.
GSB 824
BEHAVIORAL DECISION THEORY
Graduate
The goal of this course is to introduce doctoral students to prior research studies in behavioral decision theory. The course will cover seminal papers in the judgment and decision making literature, including those on heuristics and biases, context effects, prospect theory, mental accounting, regression to the mean, pattern seeking, sunk costs, and escalation of commitment. As part of the heuristics and biases topic, students will learn about biases in forecasting and prediction, such as the planning fallacy. Students will be introduced to normative models of belief updating and descriptive evidence on departures from the normative models, such as base rate neglect, belief perseverance, and primacy/recency effects. Finally, the course will cover several topics in psychology that are particularly relevant to business doctoral students: attribution theory, common problems in group decision making (groupthink, social conformity, and social influence), and the development of expertise. (3 quarter hours)

GSB 825
BUSINESS ETHICS AND SOCIAL RESPONSIBILITY
Graduate
This course is designed to examine contemporary research on leader and organizational ethics as well as corporate social responsibility. Key topics include corporate social responsibility and stakeholder management, role of business in society, environmental sustainability, corporate governance, accounting and finance, technology and privacy, employer responsibilities and employee rights. (2 quarter hours)

GSB 826
SEMINARS ON CURRENT TOPICS IN BUSINESS I
Graduate
This annually repeating seminar series is designed to examine contemporary issues in business from a variety of disciplinary perspectives. Through these seminars, students will develop the ability to critically evaluate published business-related research, study current business problems, identify the theoretical models needed to research these problems and perform the necessary empirical analyses to offer solutions to the research problem and managerial insights for industry applications. Early in the program, the seminars serve the important function of highlighting open research questions and introducing students to research active faculty who might be selected as their dissertation chair. In the final half of the program, the seminar series serves the equally important function of keeping the students engaged in issues relevant to their own interests. Each seminar will vary in length, depending upon the duration required to cover the topic. In order to keep the seminar series topical, seminars will be rotated based upon their relevance to the current business environment and cohort interest.

GSB 827
SEMINARS ON CURRENT TOPICS IN BUSINESS II
Graduate
This annually repeating seminar series is designed to examine contemporary issues in business from a variety of disciplinary perspectives. Through these seminars, students will develop the ability to critically evaluate published business-related research, study current business problems, identify the theoretical models needed to research these problems and perform the necessary empirical analyses to offer solutions to the research problem and managerial insights for industry applications. Early in the program, the seminars serve the important function of highlighting open research questions and introducing students to research active faculty who might be selected as their dissertation chair. In the final half of the program, the seminar series serves the equally important function of keeping the students engaged in issues relevant to their own interests. Each seminar will vary in length, depending upon the duration required to cover the topic. In order to keep the seminar series topical, seminars will be rotated based upon their relevance to the current business environment and cohort interest.

GSB 828
SEMINARS ON CURRENT TOPICS IN BUSINESS III
Graduate
This annually repeating seminar series is designed to examine contemporary issues in business from a variety of disciplinary perspectives. Through these seminars, students will develop the ability to critically evaluate published business-related research, study current business problems, identify the theoretical models needed to research these problems and perform the necessary empirical analyses to offer solutions to the research problem and managerial insights for industry applications. Early in the program, the seminars serve the important function of highlighting open research questions and introducing students to research active faculty who might be selected as their dissertation chair. In the final half of the program, the seminar series serves the equally important function of keeping the students engaged in issues relevant to their own interests. Each seminar will vary in length, depending upon the duration required to cover the topic. In order to keep the seminar series topical, seminars will be rotated based upon their relevance to the current business environment and cohort interest.

GSB 840
GROUP RESEARCH LAB I
Graduate
(2 quarter hours)
GSB 841
GROUP RESEARCH LAB II
Graduate
(2 quarter hours)

GSB 842
DISSERTATION PROPOSAL LAB
Graduate
This research lab is designed to provide regular meetings with students’ dissertation chair in preparation of the dissertation proposal.

GSB 843-1
DISSERTATION LAB
Graduate
Dissertation lab designed to help students pursue their dissertation area of study. This is part one of a two part class. (6 quarter hours)

GSB 843-2
DISSERTATION LAB
Graduate
Dissertation lab designed to help students pursue their dissertation area of study. This is part two of a two part class. (8 quarter hours)

GSB 898
SPECIAL TOPICS IN RESEARCH METHODS: QUALITATIVE RESEARCH
Graduate
This special topics course is designed to equip doctoral students with major methods in qualitative research design with a focus on the practical execution of qualitative research. Major qualitative methods are examined including conducting interviews, observations, ethnography, netnography, focus groups, and mixed methods. In addition, the course reviews methods for analyzing and presenting qualitative data.

HAA 101
AFRICAN ART
Undergraduate
This course is based on a series of important issues in the study of African art, such as medium and color, portraiture, the artist and innovation, relationships with language, royal patronage, divination, gender, aesthetics, Othering, and authenticity. The course will explore each of these concepts through a variety of artistic traditions from the continent. In this manner, students will gain basic theoretical tools which will enable them to work with art from across Africa.

HAA 115
ASIAN ART
Undergraduate
An introduction to major developments of art and architecture across Asia including South Asia, Southeast Asia, the Himalayas, and East Asia. This course examines not only painting, sculpture, and architecture, but also gardens, ceramics, and prints. Special emphasis will be placed on religious arts of Buddhism and Hinduism, along with landscape and figural painting of China and Japan.

HAA 130
EUROPEAN ART
Undergraduate
This introductory-level course examines art historical methods and their application to a broad chronological survey of European art and architecture from pre-history to the twentieth century. Field trips to Chicago art institutions enhance the understanding of historical traditions and critical methods taught in class lectures and discussions.
HAA 145
ARTS OF THE AMERICAS
Undergraduate
What is distinctive about art created over time on the American continents? This class begins to answer this question by examining some of the principal developments in art history from the ancient indigenous cultures (particularly those of Meso- and South America), through the period of European colonialism (especially Spanish and English), to the modern art movements across the sovereign nations, including the United States and Canada. Since time permits only a sampling of artistic forms across time, lectures are often issue-oriented, with a focus on selected problems facing scholars. Periodic discussions allow students to weigh in on topics and offer their own critiques. This class argues that the distinctiveness of American visual forms springs from the heterogeneous cultural traditions that simultaneously divide and unify its inhabitants.

HAA 200
SPECIAL TOPICS ON THE ART INSTITUTE
Undergraduate
In coordination with the University's partnership with the Art Institute of Chicago, this Special Topics class exploits an invaluable resource in our own city, to teach students about one or more specific collections or exhibitions. The class also works to think holistically about the development of the museum itself within the context of Chicago's own social history. With an encyclopedic collection consisting of 11 distinct curatorial departments, the Art Institute is both museum and research institution, thus offering students the opportunity to explore ideas at a variety of important levels. Class lectures and activities will consider specific aspects of the museum's art and architecture, remaining flexible enough in its format to accommodate opportunities provided by any special exhibitions that may be on display during a given quarter. Meetings will take place primarily in the classroom, with intermittent visits to the museum, both during and outside of class time.

HAA 201
ANCIENT AFRICAN ART: PREHISTORIC TO THE EUROPEAN ENCOUNTER
Undergraduate
This course surveys a selection of artistic traditions from across the African continent beginning with the earliest attempts by humanity to visually represent complex thought until the Portuguese began trading along the coast of West Africa in the mid-fifteenth century. Emphasis is placed on demonstrating connectedness with a larger cultural environment, while also suggesting connections to future artistic traditions.

HAA 202
MODERN AFRICAN ART: EUROPEAN ENCOUNTER TO INDEPENDENCE
Undergraduate
This course surveys a selection of artistic traditions from across the African continent beginning with the arrival of the Portuguese along the coast of West Africa in the mid-fifteenth century until the age of African independence in the 1960s. While the impact of a European presence helps define the boundaries of this course, artistic response to that presence is but one theme. Interactions between African cultures and the impact of Islam are equally important considerations.

HAA 203
CONTEMPORARY AFRICAN ART: INDEPENDENCE TO THE PRESENT
Undergraduate
This course surveys African art from the age of African independence in the 1960s until the present day. The meaning of the term contemporary as it applies to African art is questioned in this course. The position of the artist between African artistic tradition and the global art market is also of vital importance.

HAA 215
CHINESE ART
Undergraduate
This is a chronological survey of premodern Chinese art from antiquity to the nineteenth century. Special attention is given to sculpture and painting, but architecture and ceramics are also covered. There is an emphasis on prehistoric bronze vessels, Buddhist sculpture, and landscape painting of the Song through Qing periods.

HAA 216
JAPANESE ART
Undergraduate
This is a chronological survey of premodern Japanese art, from the prehistoric era to the Meiji period (1868-1911). Topics covered include painting, sculpture, and architecture, as well as decorative arts, prints, and garden design. Special attention is given to Buddhist and Shinto religious arts, along with screen painting and woodblock prints.
HAA 217
ARTS OF INDIA AND THE HIMALAYAS
Undergraduate
This is a chronological survey of premodern arts of the subcontinent of South Asia and the Himalayas. We start with the Indus Valley Civilization and move through the nineteenth century, including Mughal arts. Special attention is given to the emergence of figural imagery in Buddhist and Hindu sculptural arts, and the development of religious architectural forms from early stupas and cave temples to later shrines.

HAA 218
ARTS OF THE SILK ROAD
Undergraduate
This course examines the visual history of the Silk Road, focusing on works of art and architecture created in Central Asia. We not only consider the prehistoric, ancient, and medieval arts of this region, but we also investigate the modern development of a romanticized notion of the Silk Road and the imperial interest in acquiring treasures from the Silk Road. Today we frequently hear about the legacy of the Silk Road in promoting multicultural exchange. However, the Silk Road has long been affected by the expansionist agendas of empires. From the time of Alexander the Great (356-323 BCE) through the period of Genghis Khan (1162-1227 CE) and onward, there have been military leaders who have led their armies into Silk Road lands seeking territory, riches, and glory.

HAA 219
JAPANESE FILM ARTS
Undergraduate
This course examines the development of cinema as an artistic form in Japan, from its inception in the early twentieth century to its explosion as an international phenomenon in recent decades. The Japanese cinematic experience is considered as visual expression that parallels key Japanese arts of handscroll painting and woodblock prints. We discuss such genres as samurai films, fantasy tales, monster movies, yakuza thrillers, and science fiction anime. Among the masterpieces studied are Ozu’s Tokyo Story, Kurosawa’s Rashomon, Itami’s Funeral, and Miyazaki’s Spirited Away. Issues addressed in relation to these films include artistic expression, technological progress, national identity, social unrest, and religious concern.

HAA 220
BUDDHIST ART
Undergraduate
This course explores the traditional visual culture of the Buddhist world, examining art as a reflection of religious belief and practice. The regions covered are South Asia, Southeast Asia, and East Asia. An emphasis is placed on painting, sculpture, and architecture made for or related to Buddhist practice.

HAA 222
ISLAMIC ART
Undergraduate
This course examines the visual culture of the Islamic world, selectively surveying some of the major artistic developments in regions of the world with a significant Muslim population. It will consider art and architecture as interplay between local culture and Islamic tradition. Topics covered will include the origins of Islamic visual culture in the Arabian Peninsula and the spread of Islamic art and religion across the Middle East. Local expressions of Islamic art may be explored in areas as diverse as North Africa, sub-Saharan Africa, Spain, Sicily, Iraq, Iran, India, and Central Asia. Special attention is paid to architecture, painting, and decorative arts.

HAA 230
ANCIENT MEDITERRANEAN ART
Undergraduate
This course explores the art of the ancient period (ca. 30,000 BCE - 330 CE) from a broad range of cultures and styles: from the Paleolithic cave paintings to the Roman Colosseum, from the pyramids of Egypt to the Parthenon in Greece. We consider how art, religion, urbanism, and writing profoundly affected the development of the ancient Mediterranean and Mesopotamian world. We analyze major stylistic trends and explore the relationship between art, culture, and religion. We also discuss the role of art in the hands of political leaders and the profound interconnectedness of ancient civilizations. Frequent discussions will analyze controversies in the study of ancient art and scrutinize topics such as gender, power, aesthetics, and authenticity.
HAA 231
EARLY MEDIEVAL ART
Undergraduate
This course treats the art of the early Medieval period, which spans the fourth to the eleventh centuries CE and includes Roman, Celtic, Gothic, Merovingian, Anglo-Saxon, Carolingian, Viking, and Ottonian cultures. In thinking about factors such as historical context, dynamics of production, and audience, we will come to understand the role of art and architecture in announcing power and extent of territory, staging public rituals, proclaiming social status, inspiring faith, and accommodating the dead.

HAA 232
LATE MEDIEVAL ART
Undergraduate
This course explores the art of the late Medieval period, which spans the eleventh to the fifteenth centuries CE in countries such as France, Germany, Italy, and England. In our study of the Romanesque and Gothic art and architecture, we will explore issues related to production, display, and function and, thereby, come to better understand a world marked by pilgrimage and the cult of relics, chivalry, pageantry, and conflict.

HAA 233
THE ART OF CRUSADING
Undergraduate
This course focuses on the Crusades. More specifically, it focuses on the world within which the Crusades were born and the Levantine kingdom built as a result of their initial success. Our study will depend on primary artistic, literary, and archaeological materials, as well as the secondary scholarship that has identified and interpreted these materials. Our understanding of this historical moment will be nuanced by the questions we ask of both. The payoff will be an appreciation for the religious, social, political, and artistic forces that defined the twelfth and thirteenth centuries in Europe and in the Mediterranean basin, leading as they did to such fascinating phenomena as pilgrimage, the cult of relics, chivalry, holy war, the rise of military orders, and the establishment of the Latin Kingdom of Jerusalem itself.

HAA 234
BYZANTINE ART
Undergraduate
This course explores the art of the Byzantine Empire from the founding of Constantinople in 330 CE to the fall of the city to the Ottomans in 1453. Lectures and readings focus primarily on how contemporaries understood and interacted with a diverse group of monuments and objects now classified as Byzantine art. Significant attention will be devoted to how works of art functioned in the service of imperial and ecclesiastical ideology. Discussions analyze how Byzantine art was appreciated and appropriated in both the medieval Mediterranean and in modern scholarship.

HAA 235
RUSSIA: MEDIEVAL MOMENTS, IMPERIAL DAYS & WHITE NIGHTS IN NOVGOROD & ST. PETERSBURG
Undergraduate
This study abroad program in Russia allows students the opportunity to explore Novgorod, the medieval trading emporium and center of Orthodox spirituality and the Russian imperial gem of St. Petersburg, while studying medieval art and the history of Imperial Russia. Both cities have been designated UNESCO World Heritage Sites and showcase the best of medieval and modern Russia by providing one of the world's richest ensembles of urban planning, art, architecture, and historical treasures.

HAA 236
NORTHERN RENAISSANCE ART
Undergraduate
This course features the most significant works of art, their artists and patrons, the social and economic aspects of artistic production, and the dominant cultural issues that flowed brilliantly in Northern Europe - above all, in France, the Netherlands, Bohemia, and German-speaking lands - between 1300 and 1600, that is, during the volatile period of the Renaissance and outbreak of the Protestant Reformation. And although Flemish oil painting offers the most evident legacy of the Northern Renaissance to the casual museum visitor, this course also introduces the most important outputs in printmaking; sculpture; and the industrial arts, as in tapestry weaving and the fabrication of luxury articles in metalwork.
HAA 237
ITALIAN RENAISSANCE ART
Undergraduate
This course concentrates on the architecture and pictorial arts that flourished on the Italian peninsula between ca. 1300 and 1600, although selected forays are undertaken into comparative European and Asian cultures. Its content focuses on the most significant works of art and architecture, including the technical arts; the key personalities, above all, the artists and their patrons; and a broad range of cultural and political issues that affected artistic thinking and production.

HAA 238
BAROQUE ART
Undergraduate
Starting in 1600, from the vantage point of the Counter-Reformation and the rise of modern European states, Baroque Art covers the principal works of art and architecture; artists and patrons; and a wide sweep of social, religious, and political, conditions that impacted cultural thinking and production in the seventeenth century. Attention is focused on the most prominent artistic centers in Italy, the Spanish Netherlands, England, Spain, the Dutch Republic, and France. The in-class lectures with discussion are accompanied by field work to the Baroque collections of the Art Institute of Chicago.

HAA 239
19TH CENTURY EUROPEAN ART
Undergraduate
Introductory survey of major moments and movements in nineteenth century European art, with some attention to U.S. developments, as warranted. The course analyzes major painters and sculptors of the early modern period and their influence in shaping cultural events, such as, for example, the Industrial Revolution.

HAA 240
ART FROM 1900-1945
Undergraduate
This course examines the major artists, movements, and issues at play in the visual arts of Europe from 1900 to the outbreak of World War II. Lectures and class discussions address how modern art, often oppositional and contradictory in nature, responds to, reflects, or builds on the effects of modernization (i.e. urbanization, industrialization, and global capitalism). Modern art objects will be read for both stylistic innovation and for connections to, and commentaries on, specific historical developments. Significant themes addressed include the character and history of the avant-garde, the relationship between high art and mass culture, the changing identities and aims of the modern artist, and the institutional basis of art production.

HAA 242
ART FROM 1945 - 1975
Undergraduate
This course considers the art and culture of Western Europe and the United States from World War II through the Vietnam War. Beginning with the period of high modernism, major art historical movements and highly distinct aesthetic practices will be examined in order to foreground the complex relations that exist between art making and speciﬁc socio-historical contexts. Topics to be addressed include the development of the arts after World War II, the role of art in a consumerist and spectacle-driven society, the dematerialization of the art object, and the shift from late modernist to postmodern sensibilities. Students will be introduced to a range of theoretical models which foreground structural and formal investigations, as well as issues of social and historical analysis.

HAA 243
MAYA ART AND ARCHITECTURE
Undergraduate
The "Classic Period" Maya (ca. 0-900 CE) are the source of modern interest for their graceful naturalism in a wide range of art forms and for their impressive architecture whose ruins today are found scattered across Southern Mexico, the Yucatan Peninsula, Guatemala, Belize, and Honduras. This class explores the political, social, economic and religious imperatives behind the soaring temples, intriguing ballcourts, stately public sculptures, delicately painted vases, complex manuscripts and much more. We will situate the art of the Maya relative to other Mesoamerican cultures, particularly those of the Olmec, Teotihuacan and Aztec, and with respect to the Spanish colonial invasion. Other themes include aesthetics, materiality, gender, interpretive methodologies, and the impact of hieroglyphics and calendrics on the study of Maya art.
HAA 244
ART OF MESOAMERICA
Undergraduate
This survey of art of the ancient Mesoamerica (ca. 1000 BCE - 1520 CE) focuses on the most artistically significant civilizations of Middle America and some of the difficulties encountered in studying them. Lectures explore visual traditions as diverse as the people they reflect; cultures to be covered include the Olmec, Maya, Teotihuacan, and Aztec. We consider the relationship between form and content, and the relationship between art and its social context, as much as we can understand it; however, especially because of the scarcity of primary source texts for the material, the class will also regularly raise questions of methodology in what is often identified as “pre-Columbian” scholarship.

HAA 245
ART OF THE ANDES
Undergraduate
This survey of art of the ancient Andes (ca. 1000 BCE - 1530 CE) focuses on the most artistically significant civilizations of South America and some of the difficulties encountered in studying them. Lectures explore visual traditions as diverse as the people they reflect; cultures to be covered include the Nazca, Moche, Tiahuanaco, Wari and Inca of Peru. We consider the relationship between form and content, and the relationship between art and its social context, as much as we can understand it; however, especially because of the scarcity of primary source texts for the material, the class will also regularly raise questions of methodology in what is often identified as “pre-Columbian” scholarship.

HAA 246
ART IN THE SPANISH AMERICAN EMPIRE
Undergraduate
This course offers a critical survey of the art of colonial Latin America (ca. 1520 - 1820), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the sixteenth century and Independence in the early nineteenth century, lectures will survey state-sanctioned arts of the Iberian colonizers, including the foundations of the Catholic Church across the ‘New World’ landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context.

HAA 247
MODERN LATIN AMERICAN ART
Undergraduate
This class is a survey of Latin American art created since the Wars of Independence which helped to create the modern nations in the nineteenth century (i.e. 1820s through the present). Lectures consider the struggle of artists to articulate newly sovereign identities through visual production, even as complicated relationships with Europe and increasingly, the United States, continue. Topics covered include Latin American modernism, surrealism, radical arts, and social realism, with a special consideration of post-revolutionary Mexican mural painting.

HAA 248
MEXICAN ART
Undergraduate
This survey situates the art of Greater Mexico in its rich historical context, from the territory on the eve of the Spanish Conquest to the early decades of the twenty-first century. From Aztec imperial art to colonial works, to efforts at nation-building through visual forms, the story of Mexican art is characterized by political and social change. Readings, lectures, and discussion will touch on critical issues of race, class, and gender, and take up themes such as miscegenation, indigenism, nationalism, and Mexico's place in the global art world. We will study famous works, such as the Aztec Calendar Stone, the Catholic image of the Virgin of Guadalupe, the post-revolutionary murals of Diego Rivera and the more intimate paintings of Frida Kahlo, but we will also consider less familiar art that has been equally important in the construction of Mexico and its identities.

HAA 260
AMERICAN ART
Undergraduate
This course examines American art (the British colonies and United States) from the colonial period to the mid-twentieth century. Works of art are examined both in relation to American social and cultural history and also as aesthetic objects. The overarching themes of the class include the "American-ness" of American art, the relationship between American and European art, the function and production of art, and the expanding definition of American expression through multicultural diversity.
HAA 263
HISTORY OF INTERIOR DESIGN
Undergraduate
A survey of the history of interior design as expressed in residential architecture, furniture, and the decorative arts from antiquity to the present. The aim of this class is to understand interiors and furnishings throughout history, considering their function, style, materials, and fabrication in relation to their cultures and to the built environment. To this end, students will learn to identify, analyze, and understand historic styles of interior design and furnishings within the larger context of the history of painting, sculpture, and architecture.

HAA 265
HISTORY OF PHOTOGRAPHY
Undergraduate
A survey of the major works, artists, and movements of photo history from photography’s invention to the present day. Emphasis is placed on the major artists, subjects, and technical applications of the medium, as well as on the modernity of photography and its unique aesthetic qualities. This course will also consider the myriad purposes and social contexts for photography and examine a wide range of techniques from the camera obscura to recent developments in printing. Actual photographs are studied in class, on campus, and in field trips to regional collections. The course involves major readings that ask students to consider the role of photography in relations to race, gender, and politics. Many of the photographers under consideration are American.

HAA 268
HISTORY OF FILM
Undergraduate
This course is a survey of the history of cinema and an introduction to the basic methods for analyzing films. Specifically, this course tracks the development of techniques for creating meaning using film within particular historical contexts and cinematic traditions such as narrative, documentary, and experimental film. We will focus on how meaning in film is conditioned by uses of camera, editing, lighting, mise-en-scene, sound, and acting as well as how these uses have been impacted by new technological developments in film production. Additionally, we will consider the significance of genre, the production system, and the impact of individual “auteurs” throughout the history of cinema.

HAA 273
ANIME AND MANGA
Undergraduate
This course examines the development of anime and manga in Japan from their inception to their explosion as international phenomena in recent decades. We consider anime and manga as forms of artistic expression that depend upon and parallel key Japanese visual forms of handscroll painting and woodblock prints. Students learn the ideas, ideals and values in Japanese cinematic and visual expression, and develop skills at analyzing anime and manga as artistic forms. The processes of drawing/creating anime and manga are considered; both form and content of anime and manga are discussed.

HAA 280
HISTORY OF PREMODERN ARCHITECTURE
Undergraduate
Social, economic, and political history of European and Mediterranean architecture, from Paleolithic times to the 1789 French Revolution. Topics include: classicism, the status and role of the architect, social struggle, patronage, and architectural technologies.

HAA 281
HISTORY OF MODERN ARCHITECTURE
Undergraduate
World architecture from the 1789 French Revolution to the present. Examines the influence of industrial, technological, political and social change in the development of modernist and post-modernist architecture.

HAA 288
COMPARATIVE URBANISM
Undergraduate
An investigation of the origins and bases of non-American urban traditions, through the study of the genesis, form, functions, and social-cultural forces that shaped cities such as Paris, St. Petersburg, Istanbul, Calcutta, and Mexico City. This course is based in the Geography Department and is the equivalent of 200-level History of Art and Architecture course.
HAA 291
EXPLORING MUSEUM PROFESSON AND PRACTICE: CHICAGO MUSEUMS AS CASE STUDY
Undergraduate
Museums rely upon the coordinated efforts of a wide range of professionals with experience drawn from various disciplines to assure their successful stewardship, operation, and sustainability. This course investigates the theories and practices of museums, examining the core functions within the museum profession, and the role of museums in contemporary society. Examining the Chicago museum community as a series of case studies, we will hear from representatives of Chicago's leading museums as we consider models of best practices and the challenges currently facing museums in today's cultural landscape.

HAA 297
SPECIAL TOPICS IN HISTORY OF ART & ARCHITECTURE
Undergraduate
Focused study on a specific topic from the history of world art.

HAA 299
INTRODUCTION TO ART HISTORICAL RESEARCH AND WRITING
Undergraduate
This required course is an introduction to research and writing in the field and focuses on one specific area of art history, as determined by the faculty member teaching. The faculty member will introduce the students to the methodological debates relevant to that research in the past and in the present. The focus of the course will introduce students to the theoretical language of art history and to work on the development of advanced critical thinking skills. This course prepares them for advanced research required at the 200- and 300-levels.

Declared major in History of Art and Architecture is a prerequisite for this class.

HAA 301
AFRICAN ARCHITECTURE
Undergraduate
This course examines a wide variety of issues pertinent to the study of architecture in Africa, highlighting above all else the diversity of traditions across the continent. Themes are defined at times by materials, technology, type, geographical region, culture, or specific architectural elements. Examples of subjects studied include: earthen mosques of Mali; subterranean residences in Burkina Faso; nomadic tents; impluvial and courtyard traditions of Nigeria and Senegal; mural painting in Burkina Faso, Nigeria, and South Africa; Ethiopian rock cut churches; imperialist exploitation of Great Zimbabwe's legacy; and coral architecture of the Swahili Coast.

HAA 302
AFRICAN ISLAM: ISLAMIC ART & ARCHITECTURE IN SUB-SAHARAN AFRICA
Undergraduate
Focused study of the impact of Islam on the artistic traditions of sub-Saharan Africa. Rather than necessarily replacing previous art forms, this course investigates in what circumstances preexisting visual culture might be integrated with the requirements and needs of Islam. This approach necessitates an understanding that neither Islam nor African art are monolithic entities, but rather their interactions represent a wide variety of negotiations across the continent. Likewise, this course will consider specific historical circumstances to which Islamic art in sub-Saharan Africa has responded in terms of form and content.

HAA 310
TOPICS IN ART AND ARCHAEOLGY
Undergraduate
This course addresses issues of archaeology relevant to the study of visual culture from the ancient to the contemporary world. This course is based in the Department of Anthropology and is the equivalent of a 300-level History of Art and Architecture course.

HAA 311
LATER JAPANESE PAINTINGS AND PRINTS
Undergraduate
This course examines two main pictorial forms of Japan from the seventeenth century to the early twentieth century (the Edo, Meiji, and Taisho periods). Special attention is given to large-scale painting on folding screens and sliding doors for major temples, castles, and palaces, as well as the development of ukiyo-e (pictures of the floating world) in woodblock prints. In addition, we consider the transformation of painting and prints in the late nineteenth century with the opening of Japan and the introduction of Western influences.
HAA 316
GODS AND MORTALS: THE ART OF THE ANCIENT GREEKS
Undergraduate
This course looks at the ancient Greek world, focusing on the events, traditions, and beliefs that culminated, on the one hand, in the birth of democracy and the defeat of Xerxes and, on the other hand, in the building of the Parthenon and the sculpting of the Nike of Samothrace. In so doing, we will come to understand above all the heavy burden placed on art and architecture at this time and in this place, charged as it was with soliciting the gods, establishing power, celebrating battles, ritualizing entertainment, and remembering the dead. And along the way we will challenge long held assumptions related to the meaning and function of ancient Greece's most fundamental artistic forms, techniques, and subjects.

HAA 320
ART AND POWER IN PAGAN AND EARLY CHRISTIAN ROME
Undergraduate
This class focuses on the art of the Roman Empire, an empire that began pagan and ended Christian. In practical terms, it will move from Augustus in the first century BCE to Justinian in the sixth century CE, with geographical coverage ranging from Jerusalem to (modern day) northern England. Our task will be to examine the artistic forms that came to identify this civilization via structures that dwarfed the natural world and figural likenesses that made the absent present to appreciate their efficacy. On the one hand, this examination will provide a deep and broad understanding of the role art plays in the building of empire; on the other, it will provide a vivid sense of art's part in maintaining the appearance of continuity despite radical change. Thus, we will watch as the artistic forms that once defined a pagan world are adopted enthusiastically by its Christian replacement, marking the subtle transformations that articulate new beliefs, facilitate new devotion, and charge spaces for new rituals.

HAA 325
OLD EMPIRES AND NEW GODS: CULTURAL CONFRONTATIONS IN LATE ANTIQUITY
Undergraduate
This course focuses on how a clash of cultures and the emergence of new religions impacted the arts of the eastern Mediterranean in late antiquity (300 to 700 CE). It explores interactions between the Byzantine and Sasanian empires, as well as the creation of local and religious identities through art. It also investigates how the diverse religious climate (Christianity, Judaism, Paganism, Zoroastrianism, Islam) contributed to visual expression in the region.

HAA 328
THE POWER OF PIETY: ICONS, RELICS, AND MIRACLES IN THE MEDIEVAL WORLD
Undergraduate
This course examines the intersection of personal devotion, public spirituality, and performance of faith in the medieval world. Probing a range of objects that give material expression to the desire for tangible links to the sacred and reminders of supernatural presence in the medieval world, the course analyzes miraculous objects that we now categorize as works of art. Objects under discussion include a category broadly defined as reliquaries, fragments of the True Cross, images "not made by human hands," and miraculous icons.

HAA 331
ART OF THE CRUSADES: CRUSADES AS MEDITERRANEAN EXCHANGE
Undergraduate
This course considers the Crusades from multiple perspectives (Byzantine, Latin, Muslim) and explore how politics, religion, and culture influenced the art of the medieval Mediterranean. The Crusades are analyzed in the broader context of pilgrimage, the search for the divine, and the desire to seize control of and purify holy sites. The course focuses on works of art created when the cultures of the Mediterranean came into both contact and conflict.

HAA 332
ROMANESQUE ART AND ARCHITECTURE
Undergraduate
Scholars in the nineteenth century designated Western European monuments, especially architecture and sculpture created between the eleventh and twelfth centuries, as "Roman-like" in character or "Romanesque," in order to acknowledge certain linkages they perceived between the characteristics of this era's architectural and visual language and that of the distant Roman past. Recent scholarship emphasizes not only large-scale works of art, architecture, and sculpture, crucial in an age of Pilgrimage and Crusades, but also small-scale works, such as illuminated manuscripts, metalwork, and coins and seals, as essential for an understanding of medieval visual culture. This class considers the broad spectrum of significant works of art produced during this period from shifting points of view, aesthetic or formalist toward function, agency, presentation and reception.
HAA 333
GOTHIC ART AND ARCHITECTURE
Undergraduate
This course examines the art, architecture, history, and culture of the so-called Gothic era (twelfth - fifteenth centuries), the age of the great European cathedrals. Reigning supreme in most of Europe in the thirteenth and fourteenth centuries, the Gothic style marks an era of unparalleled building activity and one of the most fertile and productive periods in the history of Western art. Special emphasis will be given to the aesthetic, structural, and spiritual aspects of cathedrals and other great churches and their contents, primarily in France and England, as reflections and embodiments of the sacred aspirations and devout character of the era. The artistic and architectural production (buildings, sculptures, illuminated manuscripts, paintings, sacred or liturgical objects, stained glass, etc.) of the period will be studied in its original context, with close attention paid to questions of social and political function, cultural meaning, and historical circumstance.

HAA 334
ENGLISH ART AND ARCHITECTURE
Undergraduate
This course considers painting, sculpture, and architecture in England from Stonehenge to the modern period. It explores national identity, the monarchy, contested notions of church and state, colonization, and the influence of art from other nations. Until a few decades ago, Britain oversaw the largest empire the world had ever known (America itself was a colony, and speaks the language of the British). The oldest continuous monarchy in the world also witnessed the birth of a parliamentary system of government. The Industrial Revolution was born there. Throughout its history, though, the arts have had a complex existence. Reformation iconoclasts destroyed churches and sacred art, and native masters such as Hogarth, Turner, and Barbara Hepworth, stand beside emigre artists such as Holbein, Rubens, Van Dyck, and Whistler.

HAA 335
MICHELANGELO
Undergraduate
This course examines the extraordinary life, times and creations of Michelangelo Buonarroti (1475-1564), one of the most significant figures in the history of Western art. Sculptor, painter, architect, and poet, Michelangelo lived during the Italian Renaissance, an age that witnessed a flourishing artistic, scientific, and humanistic culture. During a career that spanned over seven decades, Michelangelo created famous lasting masterpieces, including the Vatican Pieta, David, Moses, the Sistine Chapel ceiling, and the papal church of St. Peter's. Who is this irascible and solitary genius, this devout Catholic and fierce Republican Florentine, who cavorted and lived with popes and princes, and fashioned works that profoundly influenced Western civilization? How do his brilliant achievements define, express, and illuminate the time, place, and culture in which he lived? Drawing on a variety of primary and secondary sources, this course seeks to understand an eccentric artist whose dazzling aesthetic productivity left a lasting mark on the art of future generations up to the modern period.

HAA 340
PRINCIPAL THEMES IN 18TH-CENTURY ART
Undergraduate
This course is intended to enrich the student's understanding of a fascinating and cosmopolitan period that tends to slip through the cracks of traditional Art History, namely, the transition zone between the Late Baroque and the emergent modernism of the nineteenth century, which takes place just before and after the "Great Divide" of the French Revolution of 1789. Building from a platform of European traditions that flowered in the seventeenth century, the course material explores an impressive body of painting and printmaking, sculpture and industrial arts, and architecture and planning, that was produced from the British Isles to Imperial Russia, even, by way of addressing cross-disciplinary issues. For example, the class examines the diverse stylistic developments that start with the Rococo and Neoclassicism; artistic regionalism vis-a-vis internationalism; and the larger social and political arenas for which visual culture was produced in the Ages of Enlightenment and Revolution.

HAA 360
DUCHAMP AND DADAISM
Undergraduate
With Picasso and Matisse, Marcel Duchamp (1887-1968) was among the most important artists of the modern era. Certainly, no other artist influenced contemporary art so significantly, and this class will examine his art, biography, and influence. Another focus will be the cultural movement known as Dadaism (1916-24), a delirious anti-art movement begun in Zurich, Switzerland, during the absurd, bloody First World War. After contextualizing Dada in relation to modern art, we will examine its manifestations in various world centers. Along the way, we will encounter the works of many of its most important figures. Besides the inherent value of looking closely at the cultural moment of an important historical figure, the study of Dadaism has special relevance because of its timeless iconoclasm and spirit of creative experimentation. This class requires close readings of primary and secondary texts, as well as trips to area museums.
HAA 363
ART AND THE HOLOCAUST
Undergraduate
This course explores the relationship of art and architecture to the development of National Socialist Germany and Nazi policies of genocide towards the European Jews. It deals with artists that resisted the Nazi rise to power, those that supported it, and those that were persecuted by the new state. In addition, we will look at a wide range of art, architecture, and film produced from 1933-1945 which was mobilized as part of the radicalizing anti-Semitic policy. The central questions will be how does art intersect with one of the most criminal regimes in the modern period and what can we learn from an understanding of the political history of art during the period?

HAA 365
ART SINCE 1975
Undergraduate
This course addresses visual art production of a global context from the end of the Vietnam War to the present. Taking postmodernism as its starting point, the nature of contemporary art practice will be examined as it is redefined by new technologies and media, such as video, installation, performance, and digital art, and through an investigation of critical theoretical models. Traditional media, such as painting and sculpture, will also be assessed as a crucial part of this shifting terrain. Major themes considered include questions of identity and subject formation, the relationship between art and its audience, changing notions of artistic value, and the impact of globalization. Throughout, students will be exposed to the issues and ideas relevant to cultural production today, while simultaneously developing the visual and conceptual tools for critically analyzing contemporary art.

HAA 366
TOPICS ON WOMEN AND ART
Undergraduate
This class considers both the history of women artists and representations of women from cultures around the world, from prehistory to the contemporary era. In addition, it will introduce feminist methodologies that can be applied to specific case studies, such as problems of biography for women artists, depictions of sexual violence in art, performing gender in visual images, feminist activist collaborations, and gendered spaces (the museum, cyberspace, architecture, etc.) Topics may vary term to term, depending on the instructor’s area of expertise.

HAA 370
CONTemporary ArchiTECTURAL Theory AND PrACTICE
Undergraduate
Study of contemporary debates in architecture and urban planning. This course explores economic, social, and political aspects of architectural theory through a case study of a contemporary monument or city plan.

HAA 371
HISTORIC CATHOLIC CHURCH ARCHITECTURE OF CHICAGO
Undergraduate
This course covers a selection of the jewels among the city’s architecturally significant Catholic churches and related sites of interest that date up to ca. 1920. The course encourages us to think about the sacred buildings as extensions of the city’s history, while emphasizing the contributions of its various immigrant groups. By thus using architecture and architectural history as the armature of this course, the student is able to explore the fascinating interplays between art, history, religion, and society, and come to terms with what culture does and signifies in one’s own milieu.

HAA 373
KYOTO (WORLD CITIES)
Undergraduate
This course explores the art, architecture, and urban plan of Kyoto, the ancient capital of Japan. Kyoto became the seat of government and the home of the imperial court in 794 CE, and it continued to serve as the cultural and religious center of the land until the nineteenth century. This course considers major artistic developments as they relate to main sites in Kyoto, especially palaces, temples, and shrines. The eras covered extend from the Heian to the Meiji period.

HAA 375
MEXICO CITY (WORLD CITIES)
Undergraduate
From its origins as Tenochtitlan, the preordained capital of the Aztec Empire, through its identification as a "new Rome" dominated by the Spanish Crown in the Viceregal period, to its status as the largest metropolitan area in the Western Hemisphere (and the second largest in the world), Mexico City was born to impress the imagination. This class explores the development of the great city of Mexico in light of major historical events and cultural expressions. Discussions will focus especially on urban planning, key architecture, outdoor sculpture, and public spectacles over the centuries.
HAA 376
ROME (WORLD CITIES)
Undergraduate
Few cities in the world match Rome for its antiquity, imperial heritage, historic, religious and cultural importance, spectacular art and architecture, and rich urban landscape. Traditionally believed to have been founded by Romulus and Remus, descendants of Aeneas, in 753 BCE, and subsequently ruled by Etruscan kings; Rome's public buildings, communal baths, and fortifications suggest that Rome was urbanized as early as the sixth century BCE. After the expulsion of their Etruscan monarchs, Romans established the Republic, which evolved into the Roman Empire when Octavian, grand nephew of Julius Caesar, became Augustus, Rome's first emperor, princeps or first citizen. Along with subsequent emperors determined to turn Rome into a magnificent city worthy to be the capital of a great empire, Augustus used architecture and the built environment as massive symbols of power, authority, and legitimacy. The Catholic Church embraced this lesson when the imperial pagan capital became the capital of Western Christendom and the seat of the papacy. This class explores the city of Rome from its ancient origins through the seventeenth century and focuses on the major art and architectural developments that define this unique urban space.

HAA 378
HEAVENLY AND EARTHLY JERUSALEM (WORLD CITIES)
Undergraduate
This class focuses on the city of Jerusalem. The uniqueness of Jerusalem stems from its status as a sacred place in Judaism, Christianity, and Islam. In this class we will explore the physical city of Jerusalem with its monuments, contested holy sites, and changing architecture. We will also analyze representations of the imagined heavenly Jerusalem, for which many believers intensely yearned. The class will focus on Jerusalem from the second through the sixteenth centuries: from its destruction by Roman armies to its last pre-modern construction phase during the Ottoman period. We will discuss how different religious groups mapped meaning and marked holiness in the urban fabric of Jerusalem. This class will consider some of the following issues: art and architecture, politics, religion, urban planning, and patronage.

HAA 379
PARIS AND VICINITY TO CIRCA 1870 (WORLD CITIES)
Undergraduate
This course is designed to explore the arts and architecture, and urban planning of Paris and its vicinity, from the period of the Old Regime to ca. 1870. This span more or less coincides with the art historical periods from the Renaissance to early Impressionism. The course material weaves artistic works and projects into the greater cultural, political, and social fabric of the realm, and includes, among other outstanding personalities, the towering impact of Vincent de Paul, in order to expose the student to a variety of cross-disciplinary perspectives. Several class sessions are scheduled at the Art Institute of Chicago.

HAA 380
CHICAGO ARCHITECTURE AND URBANISM (WORLD CITIES)
Undergraduate
This course investigates contemporary historiographic debates and new archival evidence surrounding research on Chicago architecture and urbanism. In addition to participating in lectures and discussions, students also meet separately to discuss scholarly debates as well as their individual research proposals.

HAA 384
BERLIN: UNIFICATION/REUNIFICATION (WORLD CITIES)
Undergraduate
This course explores the influence of art and architecture on the development of Berlin from 1871 to the present. How major figures (from Bismarck to Kohl) and major events (from World Wars to the fall of the Berlin Wall) affected the city and its culture.

HAA 385
LONDON (WORLD CITIES)
Undergraduate
This course examines London as a nexus of English artistic and architectural activity and emphasizes the role of the monarchy, such art world institutions as patronage or the foundation of the Royal Academy, and the city's historic growth.

HAA 388
SPECIAL TOPICS IN GEOGRAPHY AND URBANISM
Undergraduate
This course covers a variety of topics that focus on the intersection between geography and the built and planned environment. Topics covered range from architectural problems to urban planning to the built environment in general as a social product. This course is based in the Geography Department and is the equivalent of a 300-level History of Art and Architecture course.
HAA 390
SENIOR CAPSTONE: ART HISTORICAL THEORY & METHODOLOGY
Undergraduate
An overview of theory and methods preparing advanced students for graduate work. The course addresses iconography, psychological theories, the image's relation to its documentation, feminist, and social history and other currently debated issues. Formerly HAA 399.

Declared major in History of Art and Architecture and (senior status required or juniors with instructor permission).

HAA 391
MUSEUM STUDIES
Undergraduate
This course examines the history and philosophy of museums and provides a framework to consider how the museum's role in society has changed over time. Compelling issues such as the museum's responsibility as a public institution and ethical considerations in collections acquisition and stewardship will be discussed. Case studies, guest lectures, and site visits to museums will inform history and theory by highlighting current museum practice and contemporary challenges in the museum field.

HAA 394
MUSEUM STUDIES INTERNSHIP
Undergraduate
This course is a unique opportunity for students to gain valuable training in the museum field and work closely with professional museum staff on meaningful projects. Students will be matched with museum sites in consultation with the instructor. In addition to internship responsibilities, students will produce a reflective journal and document their field work in a digital portfolio. This course is designed for History of Art and Architecture majors and Museum Studies minors. Students should contact the instructor once they have registered for the class (at least three weeks prior to the start of the quarter) to discuss museum site placement.

HAA 397
SPECIAL TOPICS/HISTORY OF ART & ARCHITECTURE
Undergraduate
Focused study on a specific topic from the history of world art.

HAA 398
INDEPENDENT STUDY
Undergraduate
Independent work in the student's field of study under faculty supervision. Available only to upper-level students with demonstrated capacity for self-motivated study.

HAA 400
CHICAGO ARCHITECTURE AND URBANISM
Graduate
Chicago Architecture And Urbanism.

HAA 401
GRADUATE TOPICS/HISTORY OF ART & ARCHITECTURE
Graduate
Graduate-level, intensively researched investigations into topics from the history of art and architecture taught by an instructor with a research specialty in that topic.

Graduate standing or department consent is a prerequisite for this class.

HAA 402
DIGITAL MAPPING AND ART HISTORY
Graduate
This course explores the questions raised by digital humanities in art history through a specific focus on the digital mapping of art historical questions. Students will focus on advanced discussions of digital mapping but also apply these theoretical and methodological concerns to art historical problems. We will use the Harvard WorldMap program which is a complement to the more advanced GIS work available in the Geography component of the certificate. WorldMap is a tool that has both pedagogical and analytic potential for art history. Students will address the big issues in digital mapping while constructing maps around such art historical subjects as modern architecture in Chicago, women artists in Chicago, muralism in Chicago, and other select topics.
HAA 495  
ADVANCED TOPICS/HISTORY OF ART & ARCHITECTURE  
Graduate  
Advanced Topics in History of Art and Architecture.

Graduate standing or department consent is a prerequisite for this class.

HC 101  
THE ART OF NEGOTIATION: REALIZING OPPORTUNITY  
Undergraduate  
When we hear the word "negotiations", most of us think about formal events between CEOs and Wall Street dealmakers. In reality, negotiations take place in every facet of our lives, both personally and professionally. Negotiation is the art and science of securing an agreement between two or more parties. This course will provide you with the tools for achieving their personal and professional goals by implementing effective negotiation strategies and techniques. You will learn different negotiation strategies and techniques, and will practically apply these techniques in mock negotiations with other students. This course will focus on the behavior leading to effective negotiations and how to analyze your own behavior in negotiations. (2-4 quarter hours)

HC 102  
HOLIDAY ECONOMICS  
Undergraduate  
Christmas makes the planet go round. While this might not be true on a religious level, the December holidays most certainly have an enormous impact on global economics. In this course, students and faculty will examine the demands of the US Christmas/Holiday rush and how these demands influence world wide production, consumption, and culture. International political and social issues will be discussed, and students will assess the effect of this American cultural phenomenon on the world's future global economies. Learners will also consider the nature of collaborative thinking and its influence on economic planning. (2 quarter hours)

HC 103  
MANAGING PERSONAL AND PROFESSIONAL TRANSITIONS  
Undergraduate  
Whether switching jobs or careers, leaving or returning to school, change brings both challenges and opportunities. Some people thrive on change while others struggle through such periods. Based on William Bridges' classic book Transitions, this class will show how to make successful transitions in personal as well as professional settings. (2 quarter hours)

HC 104  
UNDERSTANDING AND MANAGING EMPLOYEE RIGHTS  
Undergraduate  
Management has become increasingly complex as the employment relationship has evolved over the past several decades. With the proliferation of alternative work arrangements such as flextime and telecommuting combined with increased employee diversity, understanding the regulatory underpinnings of the employment relationship has become essential in managing employee rights in the workplace. This class will explore the cultural, historic, legislative, and judicial development of employee rights in the workplace, closely examine several of the core laws, discuss the consequences of noncompliance, and identify key compliance strategies that are essential to managers as well as to human resources professionals. (2 quarter hours)

HC 105  
ALL ABOUT ME: UNDERSTANDING ONESELF THROUGH JOURNALING  
Undergraduate  
The goal of this class is to teach students the elements of journal writing, allow them to acknowledge and react to personal experiences and enable them to think clearly about these experiences. Students will be engaged in individual as well as group activities to accomplish this goal. Journaling on a continued basis might help students reduce stress and improve social relationships as they write and analyze certain experiences in their lives. (2 quarter hours)
HC 106
LEADERSHIP AND MANAGEMENT IN A GLOBAL ENVIRONMENT
Undergraduate
Global systems, structures, and movements impact every aspect of life in Africa and in the Church. Effective leaders and managers are able to take a global perspective on their local work. This course will build the students' competencies in analyzing various aspects of globalization (e.g., economic and cultural globalization) and their impact on Africa. They will also examine how globalization will affect their future ministries. Each student will design and complete an independent learning project for their Focus Area in which they will create strategies to address some aspect of the impact of globalization on their future ministry. Through this course, therefore, students will develop and demonstrate their competence to analyze issues and problems from a global perspective and to create strategies to address the impact of globalization on ministry. (2 quarter hours)

HC 107
MANAGING EMOTIONS IN DIFFICULT TIMES
Undergraduate
Though we look forward to holidays and special occasions, they often present challenges in managing our emotions. The occasions for stress and disappointment, as well as peace and joy, abound, requiring us to practice self-awareness, self-management, and relationship management at home and at work. This course will introduce a framework of emotional intelligence and provide opportunities for participants to assess their emotional intelligence and improve it through reading, discussion, role-play, and film analysis. (2 quarter hours)

HC 108
BREATHEING WITH TWO LUNGS: AN INTRODUCTION TO THE EASTERN CATHOLIC CHURCHES
Undergraduate
In 1995 and 2001, John Paul II, stated that the Catholic Church needs to breathe with both lungs, East and West. What he meant by this was that it's time for those who belong to the Western/Roman Catholic church to become familiar with their Eastern Catholic brethren, so that by acknowledging and accepting them, the universal Catholic Church can be whole. In this course, students will learn about the three largest of fifteen Eastern Catholic churches, of both the Byzantine and non-Byzantine Catholic traditions: Ukrainian Catholic (European Byzantine), Melkite Catholic (Middle Eastern Byzantine) and Syro Malabar Catholic (non-Byzantine from India). Through videos, readings and class discussions, as well as three field trips (one to each of the above churches), students will learn about how the Christian church, which split in 1054, came to be reunited in the 16th and 17th centuries. By exploring and recognizing the similarities and differences of one catholic faith, students will conversely learn about the history, traditions and immigration of diverse communities. (2 quarter hours)

HC 109
BEAUTY, ATTRACTION AND THEIR IMPACT ON CULTURE AND BUSINESS
Undergraduate
Beautiful people are believed to gain multiple advantages in life, from better grades in school to favored treatment from employers and preferential judgment from police officers and juries. Evidence of beauty being revered and defied can be found as far back as biblical entries and up to modern day celebrities. But the importance of beauty to the survival and success of the human race has evolutionary significance that goes much further back. Our brains are pre-wired to appreciate beauty and in the over 35 million years humans have inhabited the earth it is only in the last 10,000 years or less than 1% of our civilized time that we have learned to adorn, fear and dissect its power. What is it about human existence that makes beauty so important? Why do we care about it so much? And how has it impacted our culture? This course will go into depth about human nature, subconscious evaluations of what we all are attracted to, and why self-confidence gained is more important and influential than the physical. Methods of accentuating our most endearing assets from ancient Greek, Roman and Egyptian times including Cleopatra and Nefertiti to modern day celebrities and plastic surgery will be reviewed. Additionally, examples of how the science of beauty can be translated, sold and used in modern business marketing strategies in an ethical and effective manner will be discussed. Specific tools, tactics and formulas for appealing to one's sense of beauty will be explored. Students enrolling in this course can expect to be shocked at times and entertained, but will complete the course with a better understanding of the science of beauty, human nature and its role in business. (2-4 quarter hours)

HC 110
CULTURALLY COMPETENT PARENTING EDUCATION AND SUPPORT
Undergraduate
Students will explore all that is involved in being culturally sensitive in their relationships with parents of diverse backgrounds. This includes a consideration of the different belief systems, values and goals parents and professionals working with them in different cultural contexts bring to parenting and/or parenting education and family support. Students will have an opportunity not only to inquire and reflect on what cultural competence involves (including e.g. gender, race, ethnicity, class, religion, immigrant status, etc.) but will also reflect on their own cultural standpoint. (2-4 quarter hours)
HC 112  
MAKING SALES AND SELLING SIMPLE  
Undergraduate  
It's obvious: making the sale requires advanced skills and abilities. What's not obvious is how to acquire those skills and to apply them successfully in business. This course builds on your business knowledge by looking at the "why and how" of professional selling, specifically prospecting, qualifying, presenting, handling objections, closing, and follow-up. The goal of the course is multifold: to appreciate the professional selling literature; to link theory with practice through the selling process; and to allow application to both personal and professional settings. This course accomplishes these goals through both in-class and out-of-class work that combines fun exercises supplemented by lecture, discussion, role-play, and even an assignment that requires the student to shop. (2-4 quarter hours)

HC 113  
MIDWINTER RITUALS  
Undergraduate  
This course uses methods of comparative religion and cultural anthropology to explore the specific manifestation of religious, ethnic and family traditions during the winter season of the northern hemisphere. The similarities between the winter celebrations of Christmas, Hanukkah, Hogmanay, Diwali, Soyal, Las Posadas, Zagmuk, Loi Krathong, Santa Lucia's Day, Saturnalia, Yule and (more recently) Kwanzaa have been noted by scholars and laypersons alike. In some way, all these ritually based festivals relate to the common astronomical fact of the winter solstice - the shortest day and longest night of the year and the slow "return of the light" to the world. Can only be taken for one competence. (2-4 quarter hours)

HC 115  
SEX DISCRIMINATION AT WORK  
Undergraduate  
This one competency course will examine workforce segregation by sex in the 20th and 21st centuries. We will examine society's view of women as workers, leaders and entrepreneurs, as well as the opportunities and barriers faced by them as they participate in what was once a "men only" culture. Students will draw on their own experiences to understand the current business culture as it pertains to each sex. We will identify and compare obstacles facing women and men in the work force due to sex, especially at the top levels of leadership. Students will study several business people who have overcome these barriers, and risen to success. The final assignment will be a research paper and presentation requiring students to research a business person or entrepreneur and document his/her claim of sex discrimination and argue this discrimination either from the position of the employee or the organization, addressing the concepts learned throughout the class. Students will critique the presentations and provide feedback to each presenter. (2-4 quarter hours)

HC 116  
PSYCHOLOGY OF MALE DEVELOPMENT  
Undergraduate  
This course focuses on the development of boys from infancy through adulthood within socio-cultural context. We therefore address in addition to gender, the impact of race, ethnicity, class and related issues of societal/governmental failures when it comes to non-voting children. We cover why boys have more trouble at school, more problems with anger, and more incarcerations than girls or boys of higher social class, but our focus will be on their capacities and how those in power can help them thrive rather than present obstacles in their path from birth onwards. In my work in Chicago schools from Englewood to Rogers Park, I found young boys and teens very capable of caring and empathy but not reinforced by adults to develop these skills. This course suggests ways to change that and help teachers, parents and society not stereotype boys or give up on them so early in life. We will focus on how boys can develop fully as men of character and care, who can succeed in relationships, as parents, at work and in their community. We will learn of advocacy work to convince society to improve the conditions in which boys live. We draw upon the work of the Search Institute, the book "The Men They Will Become" by Eli Newberger (free online) and other current research. We will view workshops including feminist Judith Jordan's "Raising Competent and Connected Boys" and learn of local and national efforts to support young boys development. (2-4 quarter hours)

HC 117  
MINDFUL LEADERSHIP  
Undergraduate  
Mindfulness meditation practices reduce stress and enhance our most fundamental, innate capabilities for leadership excellence. Mindfulness meditation practices are simple, powerful ways of regulating, investigating, and expanding our awareness of our experience. They are rooted in Buddhist traditions and are now being widely reinterpreted in secular ways by neuroscientists, psychologists, philosophers and others. These practices teach leaders how to more profoundly connect to oneself, others and the larger community and to more skillfully initiate or guide change. Students will maintain a daily mindfulness meditation practice for the duration of the course. (2-4 quarter hours)
HC 118
MAKING SOCIAL CHANGE: THE LEGACY OF THE 1960'S
Undergraduate
In the first twenty years following World War II, Americans participated in the democratic process and in civil society in record numbers. They participated in public meetings, belonged to labor unions, joined churches, and formed professional societies. These civic structures and habits of involvement empowered citizens to believe they could make a difference in their communities and laid the groundwork for some of the major social movements of the second half of the 20th Century. Civil rights, second-wave feminism, gay rights, and Latino rights all have their roots in the 1960s and continued their work over the following decades. In this class, we will explore civic engagement through the lens of our recent history. We will look at how these movements developed and analyze how they achieved their goals. We will take lessons from our predecessors and apply them to our own efforts to make a contribution to the lives of people in our local, national or global communities. (2-4 quarter hours)

HC 119
DIVORCE AND ITS LEGAL IMPLICATIONS
Undergraduate
As divorce rates in the U.S. continue to rise yearly, an increasing number of individuals are affected by divorce in some aspect of their lives. This course will give students a general overview of family law. In our discussions, we will explore issues such as domestic violence, child custody, and the “best interest of the child” standard in determining their effect on the divorce process. We will also discuss the financial and emotional implications surrounding the dissolution of a marriage and the role that these factors play in the divorce process. We will then explore the idea of divorce reform and whether this might be a solution to the increasing rate of divorces in the U.S. More specifically, students will be asked to analyze several of the proposed reforms in light of their new understanding of family law and determine if they believe that reform is the appropriate answer to this complex issue. (2-4 quarter hours)

HC 121
THE US ROLE IN A CHANGING WORLD
Undergraduate
The Post-Cold War international structure, shifting economic alliances and power, and the emergence of nationalistic movements throughout the world are among the issues confronting the United States at the beginning of the 21st Century. This course will examine America's strategic role in this changing world environment and the attitudes that underlie American foreign policy decisions and will help students reflect on the global changes, assess national priorities, and decide for themselves the role the United States should play in the world today. (2-4 quarter hours)

HC 127
MANAGING PERSONAL CHANGE
Undergraduate
The primary purpose of this seminar is to provide participants with a forum through which a greater awareness regarding the multiple dimensions of change may be developed. Specific emphasis will be placed on dynamics of personal change and methods of analyzing factors that impact personal change. Students will learn about the distinctions between personal change, transitions and transformations. Ongoing self-assessment regarding change and opportunities for students to engage in self-reflection will be a key component of this course. (2-4 quarter hours)

HC 128
WOMEN AND SEXUALITY IN ISLAM
Undergraduate
This course emphasizes the issues of women and sexuality in the Islamic cultures and demonstrates the diversity of women's lives in Muslim societies. In the course we will confront the following questions: Are the intense conflicts on women's sexual rights in the Islamic countries based on Islamic laws or the combination of political, economical and social inequalities? What is the Islamic view of love, eroticism and sexuality? Are women the instrument of power as the hunters and men the passive victims, or “women are created of and for the men”? (2-4 quarter hours)

HC 129
THE EMOTIONALLY INTELLIGENT LEADER
Undergraduate
Because of the roles they play in influencing the lives of individuals and organizations, leaders bear a greater obligation to manage themselves and their relationships with insight and sensitivity. This course will examine the attributes of effective leaders in various settings and how they have drawn on skills of emotional intelligence to support their success. In addition, participants will identify their leadership qualities and strategies for developing them at work and beyond. Course readings and activities are drawn primarily from texts by Richard Boyatzis and colleagues that illuminate the relationship between emotional intelligence and leadership. The course is designed to address (1) the theory and practice of leadership and (2) the attributes and aspirations of course participants in their roles as leaders. Beyond the close examination of the Boyatzis leadership model, other primary models of leadership will be reviewed. Course activities will include discussion, presentations by participant leaders, film excerpts, and exercises. (2-4 quarter hours)
HC 130
PARENTS AND TEACHERS TOGETHER: CREATING THE SCHOOLS OUR CHILDREN DESERVE
Undergraduate
This course provides an opportunity for students to reflect on and answer some of the following questions: Why do parents and teachers both feel frustrated and powerless to meet the needs of today's students? In this class we will consider the power inequities inherent in schools today. With fewer and fewer people who vote having school age children, parents and teachers feel they have little voice in how national and local resources are allocated to education. We will focus not only on present problems in schools, but on reviewing innovative initiatives and models around the country that give a louder voice to teachers and parents on behalf of children. While many people blame children's problems on parents and/or teachers few look at the system/society in which they function: teachers telling parents how to be involved in school without considering their backgrounds, culture, etc. and school administrators telling teachers what to do and the government telling administrators what to do. This course will give students an opportunity to think about current school problems within a power framework and then design constructive ways to empower parents and teachers to be more effective in creating "schools our children deserve." (2-4 quarter hours)

HC 131
THE CHURCH AND SOCIAL JUSTICE
Undergraduate
Recognizing the impact of religious teaching and religious organizations in the development of individual and social moral values, this course seeks to look at the role of religious organizations, primarily Christian, and how they influence or shape individual and community social values. The course will also look at the interplay of culture and religion and how different cultural and social positions shape religious faith and social action. This includes a discussion of the impact of race, gender, class, and sexual orientation and how they are shaped and defined by one's religious beliefs. The course will look at the role of the leadership development in the church via its activities, role models, and teachings on personal and communal responsibility. It will also look historically at the points of conflict where religious institutions have mobilized to take opposing position on political and social issues such as in Civil Rights or Housing issues. The course will also look at the role of the church in the local community as a resource and as a catalyst for social services, social justice, political advocacy, and community economic development. The class will provide an exploration of various Christian denominations and how their view of their roles and work in the city and in the communities has changed over time. Students will also examine current day communities and churches and compare their historical roles with what they are doing today. They will discuss what churches are doing at the congregational level and ways that institutions are partnering with other religious, interfaith, government, or nonprofit agencies to address community social and economic needs. (2-4 quarter hours)

HC 132
THE MIDDLE EAST: MAYHEM OR MISUNDERSTOOD?
Undergraduate
Is there any American who does not want to know more about the Middle East? This class will provide a geopolitical overview of the seeds which sprouted into the current situation in the Middle East. Learners will study religion, government, and Muslim culture. Along with a concentration on the history and cultural traditions of the area, students will examine how the need for oil has shaped United States foreign policy toward the region. In this course, students will consider facts and issues related to this fascinating locale from a variety of perspectives. (2-4 quarter hours)

HC 133
CIVIL WAR AND CIVIL RIGHTS: A COMPLEX LEGACY
Undergraduate
Both in obvious and subtle ways, the Civil War has shaped the America that we live in today. Our images of "north" and "south," our race relationships, and our sense of a national identity have their roots in the Civil War and its aftermath. This course is designed to explore the historical and social dimensions of the War through readings, discussion, videos, and conversations with guest speakers. We will delve beneath the conventional beliefs and superficial information about the War to appreciate its complexity and its presence in our lives. Among the key issues we will address are (1) the ongoing debate regarding states' rights (2) the impact of southern regionalism on American culture (3) contemporary civil rights and their links to the past. (2-4 quarter hours)

HC 134
GLOBAL EDUCATION AND WORK
Undergraduate
Globalization has become a constant topic in the news. We can no longer content ourselves with our town, state, region, or even with our own nation. We need to think big. International politics and economies are merging. How will we compare to other nations in terms of educational preparation and workplace skill? In this course, students will examine ideas regarding the nature, philosophy, history, and purposes of education, and of education for work in the United States. Furthermore, students will compare our thoughts on these issues to those of other nations, our partners for the future. Students will consider the ethical implications of educational programs and philosophies, and will discuss the ramifications of the developing close relationship between education and the workplace. (2-4 quarter hours)
HC 135
TOOLS FOR TOMORROW’S LEADERS
Undergraduate
Effective leadership in the 21st century requires knowledge of a variety of concepts and practices. Theories and principles from past and present leaders influence how leaders of tomorrow will succeed. Business, political, and religious settings require solid leaders with great awareness of knowledge and practices that have created proven results. These settings require perspectives that will contribute to the success of the organization. Aspiring leaders draw inspiration from lessons learned in the past; these leaders then need to translate those lessons into solid contemporary practices for their organization. This course provides a critical analysis of historic writers and thinkers. Examining leadership situations from these early writings, students will compare and contrast contemporary leadership approaches. Through discussion, reflection, and exercises students will uncover relationships and insights to their current leadership practices and situations. A variety of knowledge and ideas focused on acting ethically, thinking independently, listening closely, taking responsibility, and finding balance are among the tools that students will develop in this course. Close reading of Plato, Sophocles, Aristotle and Aeschylus will allow students to bring the works of these early thinkers to their current leadership situations. (2-4 quarter hours)

HC 136
UNDERSTANDING TERRORISM AND SOCIAL VIOLENCE
Undergraduate
This intense course will examine the psychological, philosophical and ecological roots of hatred and social violence. We will explore the possible negative impacts of exposure to violence on children, adolescents and adults. Course content will center around such questions as: “What are the cognitive roots of prejudice and social violence?” and, “Is violence really human nature?” (2-4 quarter hours)

HC 137
A LIVING MOVEMENT: TOWARD A WORLD OF PEACE, SOLIDARITY AND JUSTICE
Undergraduate
How can we make sense of the enormous changes taking place in our world? From the Egyptian victory to overthrow a dictator to the struggle of Wisconsin union members, non-violent actions are spurring more peace, solidarity and justice. How do we take part in building a movement of peace, solidarity and justice? Join the Living Movement course and travel to Memphis, TN for a joint conference of the Peace and Justice Studies Association and the Gandhi-King Conference. Over 1,000 people will attend to share stories from the front lines of the struggles for peace and justice and listen to evidence from scholars on the victories of non-violent action. Meet national leaders and network with activists from all over the country. Space limited so register early. Besides DePaul registration, additional expenses include: hotel for 2 nights, food, travel, conference registration. See peacejusticestudies.org or gandhi/king.org for more information. (2-4 quarter hours)

HC 138
THE JUVENILE COURT SYSTEM: IS THERE A FUTURE FOR OUR CHILDREN?
Undergraduate
Recently the juvenile court system celebrated its 100th anniversary. This affords us an opportunity to examine the strengths and weaknesses of this special court and to identify the opportunities for improvements and needed changes. The court's legal decisions about children's lives are extremely important because of their profound life-long consequences for individual children and because of the impact these decisions have on society in general. This course will study the juvenile court system since its inception in 1899. We will see how crime has changed, not so much in numbers, but in the degree of violence due to guns, drugs and gangs. We will also study how the change in family structure has affected crime. We will study one method of change in our efforts to effectively address how certain changes in the present system could lead to a more effective and just system. We will employ small learning teams to explore the material presented in class. (2-4 quarter hours)

HC 139
UNDERSTANDING WAR: CAUSES AND CONSEQUENCES
Undergraduate
The First World War (the “Great War”) produced profound effects on world culture and continues to influence our ideas and actions with respect to military matters. The swift advance of technology during this time provided the world with a new and constantly-shifting array of weaponry, including the first biological weapons, use of aircraft and bombing, and systematic genocide. All of these weapons are still present in the contemporary arena of warfare and we can understand them only by knowing their origins. In this course, we will examine this horrific shaping effect of war by studying its literature, scholarship and documents, as well as selected films and field trip(s). Since aviation and the use of air tactics played a crucial role near the end of the Great War, we will particularly emphasize this phenomenon. (2-4 quarter hours)
HC 140
PUERTO RICO AND CUBA: DIVERGENT POLITICAL TRAJECTORIES
Undergraduate
Despite their geographic proximity, Puerto Rico and Cuba have taken different political paths. In this course, we will examine the economic and political history of these two countries starting from when the United States took possession of these two Islands in 1898 to the present. We will address questions such as: What led to U.S. involvement? Why did Cuba gain "nominal independence" after 1898 while Puerto Rico remained under tighter U.S. control? What led to the Cuban revolution? What is the current state of Communist Cuba? The history of these two countries will also provide an avenue for exploring the impact of the Cold War on the Caribbean. We will conclude by examining the migration and immigration of Puerto Ricans and Cubans to the United States. Lectures, class discussions, videos as well as presentations by guest speakers will be the primary means of exploring these issues. Students will develop a structured learning journal and complete a small project that explores one of the course themes. (2-4 quarter hours)

HC 141
COACHING FOR PERSONAL DEVELOPMENT AND PROFESSIONAL EFFECTIVENESS
Undergraduate
Effective coaching has long been recognized as a key element of success in the world of sports. More recently, a new breed of coaches has emerged to help people transform their personal and professional lives. In this course, we will explore the theories, concepts, and techniques of personal life and business coaching. Students will learn about the history of coaching, its uses in personal and professional development and practical applications. Working individually, in pairs, and in small groups, students will practice coaching skills and keep a detailed learning journal. This course will be highly experiential and collaborative in nature. Students will learn concepts of coaching for personal development and professional effectiveness. (2-4 quarter hours)

HC 142
EXPLORING EDUCATION
Undergraduate
This course will focus on educational opportunities for students considering a career change or exploring career opportunities in the fields of Policy, Administration and Teaching at the Elementary, High School or Junior College level. We will discuss the history of American education, its aims, purposes, contemporary issues and opportunities, as well as requirements for teacher certification, and alternative certification processes. Students will learn how to use the SNL program to meet Illinois General Education requirements leading to Teacher Certification. Class requirements include discussion, selected readings, a short writing assignment and a guest speaker. Student outcomes will include a thorough knowledge of the processes involved in Teacher Certification, examination of their short term and life-long learning goals and an understanding of innovations in education today. This course is designed for students to explore and understand education today and how this knowledge leads to personal goals, improved understanding of education as an institution and how this knowledge can impact their choices in education for themselves and family. (2-4 quarter hours)

HC 143
AMERICAN WARS: ILLUSIONS AND REALITIES
Undergraduate
This course will examine the myths and realities of American wars from a number of different perspectives, and will evaluate the means by which misconceptions about war enhance or threaten American values. Specific areas of study will include the benefits and risks of foreign intervention, the impact of war on aggressor and victim, the role of the media, environmental effects, and rationalizations for and against war. The emphasis for each study area will be the contrast between generally accepted beliefs and the consensus of reputable, diverse sources. Readings from pro- and anti-war and centrist sources will be considered. Students in this course will be required to participate through selected readings, brief reports on those readings, and class discussions. Each student will choose a specific topic of interest for individualized study, which will entail research and writing, a multimedia class presentation, and an effort to publish the work on one of a number of selected websites. (2-4 quarter hours)

HC 144
DEMOCRACY IN EVERYDAY LIFE
Undergraduate
This course will provide students with an understanding of democratic environments, the criteria to define them, and how this knowledge could be applied to everyday situations in the private sphere and the workplace. The course offers a wide range of activities like critical reading and discussion of topics, analysis of cases, simulation of democratic and non-democratic environments and problem solving of real life issues. The ideas of others serve as common course content presented in the material assigned to this course. Students are asked to participate actively and critically, using their own experience as a field of analysis and reflection. Active participation should foster the idea that the course itself could serve as a model of a democratic teaching and learning environment. In this way the course will foster democratic behavior and values. (2-4 quarter hours)
EXPLORING PERSONAL AND ACADEMIC RESILIENCE
Undergraduate
The course presents a variety of readings, experiential exercises and projects designed to enhance the students understanding of the risk and protective factors that contribute to resilience. Resilience theory looks at managing risk by employing the necessary protective factors. In this course students will continue to build on this dialogue by exploring theories of personal resilience while developing resilience in other areas such as academia, work, etc. (2-4 quarter hours) Additional Questions to be explored: What are protective factors? How are they developed? Do they change at different developmental stages? Adults are constantly evolving and as we change, do we become more resilient?

HOW FAMILIES COMMUNICATE
Undergraduate
This course provides students with the opportunity to apply a wide range of theories about family communication to an experience common to all-family life. Through this course, students will gain an understanding of how communication functions to develop, maintain, enrich, or limit family relationships across a wide range of family structures and cultural backgrounds. Among the family relationship issues considered in this course are patterns of intimacy, power, decision-making, roles, rituals and conflict. Factors involved in forming family patterns (e.g. gender, ethnicity, family diversity and family stories) will also be covered. (2-4 quarter hours)

AMERICAN CULTURE IN 2010
Undergraduate
Is there an American cultural identity that is distinct, or is the notion of "American culture" obsolete? There are more than 100 scholarly definitions of culture and most agree that culture depends on shared beliefs, values, and symbols and provides a means for people to both adapt to and manage the world within which they live. In an increasingly diverse United States, what beliefs and values do its inhabitants share? Have these attributes changed significantly in the past several years so that "American culture" is being redefined? This course will examine the ways that American Culture is perceived and shaped by its inhabitants and how changes in technology, global relationships, and immigration challenge us to clarify it for ourselves and others. (2-4 quarter hours)

COLLABORATIVE LEARNING: PRINCIPLES AND PRACTICES
Undergraduate
In this class, we will explore and develop the skills, values and knowledge that contribute to collaborative learning. Today perhaps more than any other time in human history we are aware that no one is an island. At the individual, organizational and societal levels, we are all interconnected and interdependent. We can only meet our goals and address our problems at any of those levels if we work at them with one another. Therefore, as never before, we need to learn how to learn together. Collaborative learning is the process of two or more people helping each other to deepen and expand their shared understanding of the challenges and opportunities they face. It involves stimulating new insights in one another, and helping each other make changes in our assumptions, beliefs and behaviors. We will read and discuss a book on theory and skills of helping others to learn. We will practice skills each week with each other via telephone. We will also participate in informal online discussions. Each week, a formal reflection will be submitted. (2-4 quarter hours)

TEAMS AND TEAMWORK
Undergraduate
It's obvious: teams outperform individuals. What's not obvious is how to make teams work. This course takes a look at the "why" and "how" of teams: specifically looking at team building, communication, leadership, behaviors, conflict management, decision-making, diversity, and problem-solving. The goal of the course is multifold: to help students understand team dynamics, to become better team members through experience, to be better able to manage teams, and to apply team theory to actual practice in their personal and professional lives. This course accomplishes these goals through a combination of fun team exercises (each session) supplemented by lecture, discussion, video cases, and role-play. (2-4 quarter hours)

DESIGNING, IMPLEMENTING AND PLANNING FOR CHANGE
Undergraduate
Business success is no longer about management and control. Success requires leadership that knows how to leverage information that is important to a company's sustainable future. Participants in this course will learn how to maximize a company's value to all stakeholders by tapping its intellectual capital (workforce, community, stockholders, board members, unions, customers) by engaging people in sharing their knowledge and wisdom. (2-4 quarter hours)
HC 151
COACHING AND LIFE SKILLS
Undergraduate
Good coaches, like good managers, parents, and friends, work to bring out the best in other people and help them develop their full potential. This course will provide a setting for students to experience and explore the role and skills of the coach in contributing to the development of other people. By looking through the lens of youth sports, participants in the course will learn that coaches communicate well, build genuine relationships, value process as well as product, and convince others that they are important and have much to contribute to their team and community. The course is highly experiential and collaborative in nature and will enable students to develop communication, teamwork and human development skills that will support their roles across a variety of settings. In addition, students will be eligible at the end of the course for coaching certification through the American Sport Effectiveness Program (ASEP). (2-4 quarter hours)

HC 152
PROJECT MANAGEMENT: TOOLS AND TECHNIQUES
Undergraduate
This course seeks to fulfill the following learning goals: project definition and task organization, project risk management, project task estimation and schedules, and potential cultural issues when working with project members from other cultures. (2-4 quarter hours)

HC 153
VIOLENCE IN AMERICA: AN HISTORICAL AND CONTEMPORARY PERSPECTIVE
Undergraduate
This course compares violence in America from the second half of the nineteenth century to contemporary time. A variety of topics will be covered including: political violence and assassinations, labor strife, urban unrest, and organized crime. Hollywood and media images of violence affecting youth and individuals, violence as a form of social control, and implications of violence will also be covered. Class discussion will focus on the causes of violence in American society. Do groups condone violence when they perceive themselves as outsiders? Have groups resorted to violence attempting to force change in society? Is there a nineteenth century old west gunfight mentality existing in contemporary society? Does American violence compare to contemporary Western Europe? The coursework will include lecture, assigned readings, class discussion, and written assignments. Student papers will be on topics approved by the instructor. (2-4 quarter hours)

HC 154
RACE AND ETHNIC RELATIONS
Undergraduate
How do we understand and heal the wounds of racism? How do we build bridges that allow diversity to flourish in the United States? What are the connections among forms of racism such as ethnic cleansing and "pacification programs"? In this course, we will explore the roots of racism, look at the changes brought about by the civil rights movement, and examine ongoing work aimed at bridging the gaps caused by racism. Students will study a variety of topics through discussion, readings, films, debate, guest panels, and field excursions. (2-4 quarter hours)

HC 156
BEHAVIOR, HEALTH, AND AGING
Undergraduate
This course is a broad introduction to the aging process in a society that values productivity, youth and independence and attempts to defy normal aging at all costs. It will explore the influence of medicine and technology as it relates to aging, examining the role of health care as to prolonging human life vs. allowing for a good death. It is a continuing survey of the human being through the periods of late adulthood and old age. Through exercises, projects, and group activities, students will learn to explore the personality, behavior and physical changes in aging. It examines the interrelationship between physical and psychological factors of adapting to illness and health maintenance activities. Topics include the physiological and psychological aspects of aging, behavioral influences, prevention and management of chronic illness, bereavement, death, and related adjustment issues. (2-4 quarter hours)

HC 157
ECONOMICS FOR DECISION-MAKING
Undergraduate
The purpose of this course is to provide the modern consumer living in a global economy fueled by unabated technological progress with basic tools to understand the path which has led to today's remarkable prosperity. The focus is on enabling consumers to make decisions throughout the life-cycle. Basic economic methodology will be presented, along with defining moments which, from the Industrial Revolution to the expansion of globalization, have shaped both economic theory and economic policy. Standard topics such as scarcity, opportunity costs, the law of diminishing returns, the law of comparative advantage, the mechanism of the price system, the laws of demand and supply, the workings of money and banking, the impact of fiscal politics, etc., will be considered, with in mind the idea that economics can offer a significant contribution in the process of making practical financial and consumer decisions. (2-4 quarter hours)
HC 158
ETHICS AND LAW OF INTERNET PRIVACY
Undergraduate
Online privacy has become a highly charged and complicated area of the law and our culture, because the Internet is changing and expanding our economy in ways unimaginable five years ago. The Internet's incredible functionality and convenience has rapidly made it the primary communication, information, and shopping tool for millions of Americans. Most of us, however, underestimate the extent to which we compromise our digital DNA with these transactions. Recently, some states have attempted to draft legislation responding to the issue of online privacy. Legislation advocates envision that these represent limitations on the collection and dissemination of personal information acquired by Internet web sites. Others have promoted the adoption of federal online privacy standards. Will the adoption of new laws and regulations impede the Internet growth? Or, is the Internet the final frontier of unregulated and freely accessible information, products, and services? Students in the class will grapple with these and other important questions on the legal limits of privacy. (2-4 quarter hours)

HC 159
MAIZE AND MIDWESTERN CULTURE
Undergraduate
In this course, students will learn the role maize has played in the cultural, economic and scientific development of Midwestern Society. An overview of the impact of maize on ancient American and modern world cultures will also be examined. Students will learn how maize developed from a wild indigenous plant in the Americas to become one of the world's great sources of food, chemicals, religious belief and social practices. More locally, students will learn how corn is currently farmed in the northern Illinois area, how Midwestern family farmers finance, grow and sustain great crops of grain. Students will examine the practices and results of economic corn markets and the role these play in the success of Illinois corn farms. Methods of continuing domestication of maize by selective breeding and more recently by genetic engineering, and the impact of these practices on the crop and on society will be examined. Finally, students will explore the many ways corn products are converted into chemicals for a variety of uses, and will analyze their benefits and costs. (2-4 quarter hours)

HC 160
FACILITATION SKILLS FOR ORGANIZATIONAL LEARNING
Undergraduate
Good facilitators know that really connecting with other people is the secret to powerful and effective meetings and training. In this course, we will examine the nature of engagement and the skills and strategies that facilitators use to involve other people meaningfully in these events. Specific topics will include: matching facilitation skills to event purpose and context, creating learning environments conducive to facilitation, application of a variety of facilitation skills in small and large group settings, using technology to complement facilitation. Class sessions will be devoted to examining and critiquing facilitation scenarios, practicing facilitation skills, and applying principles and strategies of facilitation to class participants' real life situations. (2-4 quarter hours)

HC 161
THE SUCCESSFUL ENTREPRENEUR: FINDING YOUR NICHE
Undergraduate
Today, to be a successful entrepreneur, in addition to knowing what's hot in the marketplace, you need to know yourself. This course will help you discover the skills and gifts of personality you possess that will maximize your possibilities for success as an entrepreneur in today's global environment. Utilizing a variety of measurement techniques, you will discover your own personal work style preferences, what tends to drive you, what energizes you and what builds your self-esteem. You will explore which type of business opportunities might be right for you, learn your own decision making style and in what work environment you function best. Based on this knowledge, you will create your own mission statement. Then in collaboration with other students, you will learn how to integrate this information with the various tasks required in getting a new enterprise off the ground. This includes: (1) identifying a specific service or product that meets a need in the global community, (2) creating successful marketing strategies; and (3) devising methods of developing the product or service you created. (2-4 quarter hours)

HC 162
MANAGEMENT THEORIES EXAMINED
Undergraduate
Throughout history, theoretical approaches to managing people and programs have filtered into and influenced daily life. Some of these theories, such as the works of Machiavelli, take the form of great literature. Others come to us via the more mundane world of Dilbert cartoons. In any form, ideas about human interaction and productivity continue to shape our consciousness. In this course, students and faculty will examine a variety of documents related to management, and will examine them from philosophical, social, and business perspectives. (2-4 quarter hours)
HC 163
CHINA: VOICES OF A SOCIAL REVOLUTION
Undergraduate
The greatest migration of people in the history of the world is occurring right now, in China. Hundreds of millions of people, whose families have lived in rural China for thousands of years, are moving to rapidly urbanizing cities. This course analyzes, through the voices of the Chinese people, the dramatic impact of this social and economic revolution upon families and individuals. Through lecture/discussions, videos, readings, on-line discussion boards and independent research, students will have the opportunity to form their own viewpoints as to the impact of globalization upon one of the oldest civilizations on earth. (2-4 quarter hours)

HC 164
ROLES AND RESPONSIBILITIES OF ORGANIZATIONAL LEADERS
Undergraduate
This course surveys a variety of leadership structures prevalent in dynamic contemporary organizations. Students in this one-competence course will investigate theories of active leadership, analyze organizational case studies involving effective leadership positions and experientially assess the usefulness and validity of conceptual models of leadership in the day-to-day world of viable organization management. (2-4 quarter hours)

HC 165
CHINA: MONEY, POWER AND THE 21ST CENTURY
Undergraduate
The greatest migration of people in the history of the world is occurring right now, in China. Hundreds of millions of people, whose families have lived in rural China for thousands of years, are moving to rapidly urbanizing cities. This course analyzes, through the voices of the Chinese people, the dramatic impact of this social and economic revolution upon families and individuals. These changes are having a worldwide impact upon economics, trade and the new world order. Through lecture/discussions, videos, readings, on-line discussion boards and independent research, students will have the opportunity to form their own viewpoints as to the impact of globalization upon one of the oldest civilizations on earth. (2-4 quarter hours)

HC 166
GLOBAL FUTURES: OIL, WATER, WAR, AND PEACE
Undergraduate
Who determines who owns the oil, water, and other resources on the planet? What are the root causes of many of the wars in the Middle East, Africa, and South America? How do we, as the world's superpower, respond to these global issues? This course examines the fight for resources and connects these issues to questions of war and the new upsurge of non-violent action across the globe. Guest speakers, videos, and other experiential learning will enhance these readings. (2-4 quarter hours)

HC 168
JAMAICA: WHO TALKS TO WHOM IN SCHOOLS AND CAFES?
Undergraduate
Through onsite visits to schools and public places in Kingston, Mandeville, and Ocho Rios, Jamaica, participants in this course will study intercultural communication by observing verbal and non-verbal interactions in various contexts. Participants will examine communication dynamics in informal settings, such as cafes, plazas, and music venues, and in the formal setting of schools and universities. Using concepts from assigned readings, participants will analyze how different socio-cultural factors interact to shape individuals and interaction patterns in urban and rural Jamaica, as well as in the United States. Prior to departure, participants will work collaboratively to develop culturally sensitive observation criteria for evaluating and comparing communication and interactions. On-site they will dialogue about the observations and interpretations with University partners from the host country. This course, though ideal for educators wishing to understand the role of language and culture in different settings among multicultural groups, also provides a background for those interested in sociolinguistics, intercultural dynamic and multiculturalism abroad and at home. Individual projects due upon return from the study abroad will further allow students in other fields to explore communications in their particular setting. (2-6 quarter hours)

HC 169
CROSSING BOUNDARIES: UNDERSTANDING SELF AND "OTHER"
Undergraduate
This semi-structured Externship is designed to enhance students' understanding of themselves as individuals, as life-long learners and as members of the larger human community. Students will identify the internal and external 'boundaries' they have with regards to experiential learning. Experiential or service based learning will be implemented to enable students to 'cross boundaries' into new and unfamiliar territories. (2-4 quarter hours)
**HC 170**

**CONVERSATIONS IN COMMUNITY**

Undergraduate

Community life and our role in it has drastically changed over the years. Opportunities in global communication, for example, have made it possible for our communities to stretch across the ocean. Social media has an impact on many facets of life. At the same time, fewer people know their next door neighbors and face to face conversations are less essential. Throughout this course, you will identify your community, analyze community and have conversations with those in your community. You will identify and explore how you fit in to that community, why your community matters, and your contribution to community. You will analyze this information as a way to learn about the world around you in ways that you perhaps would not have discovered without these conversations. You will learn more about who you are, the value of your contribution to community, and the challenges and opportunities that come along with this (2-4 quarter hours).

**HC 171**

**ORGANIZATIONAL CULTURE IN ACTION**

Undergraduate

What is organizational culture? Culture is the way things are done in the organization, a system of shared symbols and a variable that focuses on causality. In this course, you will examine what organizational culture is and how knowledge of culture provides a way for gathering information to help leaders/managers improve organizational performances. This course provides a hands-on approach to learning to "read" organizational cultures and using that cultural knowledge in symbolic management, training, organizational change, building effective teams, supporting diversity, and unleashing creativity. In terms of cultural analysis, through this course, you will be introduced to qualitative research methods, field observation, interviewing, qualitative surveys, content analysis, and other methods of textual analysis. The textbook is an applied workbook to supplement and apply organizational theory. It answers two central questions: How to understand the intangible culture that is so important to working in an organization, and how to use this cultural information. Finally, you will have a chance to transform theories into practice. (2-4 quarter hours).

**HC 172**

**HUMAN RIGHTS AT HOME AND ABROAD**

Undergraduate

This class is largely about the international human rights movement and how it has the potential to alter our thinking about social justice and the rights movement in the United States. In this class, we will ask ourselves the following questions: which rights should be protected by every society? Can there be universal human rights? Should developing countries be held to the same standard as developed nations? What are the major areas of concern internationally and how do these compare with human rights concerns in the United States? Are human rights for the individual incompatible with those for the collective or can the two co-exist? In this context, we will review the U.N. Declaration of Human Rights and other important treaties, NGO commentaries, and first person accounts of the international and domestic human rights movements. Students are encouraged to integrate their interests in both domestic and international human rights issues into the class discussion. (2-4 quarter hours).

**HC 173**

**HUMAN RIGHTS IN BUSINESS AND SOCIETY**

Undergraduate

Students study the history of human rights development as they emerged from religious belief, philosophical visions of natural law, social structures and legal systems. Students will also examine opposition to human rights over the centuries when rights threatened traditional patterns of authority, prejudices, vested interests, customs and claims of national sovereignty. Study then shifts to recent human rights documents beginning with the Universal Declaration of Human Rights in 1948. The racism convention is studied as the case study with focus on its application and lack thereof in the U.S. and Chicago. Students then apply knowledge from the case study to examine human rights work performed by a local NGO, by a local company or by their community. The course concludes with current human rights advances in corporations, governments and NGOs. (2-4 quarter hours).

**HC 174**

**CIVIL LIBERTIES IN EVERYDAY LIFE**

Undergraduate

This course is designed to expose students to the history, context and implications for American society of the Constitution and Amendments, more commonly known as the Bill of Rights. We will learn about the founders who created the Constitution, and also explore landmark court cases concerning historically significant issues such as privacy, right to bear arms, freedom of religion, abortion, and the right to die. We will discuss how this supreme law of our land impacts our daily lives and decisions. (2-4 quarter hours).
HC 175
HOME AND IDENTITY
Undergraduate
This course brings a unique multidisciplinary and multicultural approach to address the interconnection of diverse experiences with the meaning of home and identity. It shows you that the meaning of home can be incredibly varied and lets you explore the multiple facets of home as well as being away from it. You will learn that home is a volatile mix of yearning and loss, of being at home or searching for it, and that this very mix is the framework in which one's identity evolves. The course will be based on lectures, discussions, film, exercises and guest speakers who will share their experiences with the class. (2-4 quarter hours)

HC 176
PEOPLE, PROCESS AND ORGANIZATIONAL DEVELOPMENT
Undergraduate
Healthy, successful organizations, like healthy, successful people, continue to grow and develop across the life span. This course will examine ways organizations can design processes and cultivate human potential to ensure that they renew themselves and remain ready to embrace opportunity and respond to change. Participants will work with case studies and scenarios from their own work contexts to develop competence. (2-4 quarter hours)

HC 177
PRACTICAL CONSULTING: THEORY, SKILLS AND APPLICATION
Undergraduate
If you were to look for the definition of "consultant," chances are good that it would suggest that a consultant is an individual who provides professional services. What does this mean? To whom does one provide professional services? What kind of services? In this course, students will learn the definition of consultant, the various models and theories behind the profession, as well as the practical skills necessary to engage in a consulting relationship. Students will work individually and collaboratively in practicing how to "contract," gather data, diagnose, give feedback and close the consulting relationship, all while learning the theories and underlying assumptions behind consulting, no matter what type of "professional service" you are providing or for whom. By the end of this course you will have gained a greater understanding of organizational life, collaborative learning, and yourself as a professional service provider, and will be able to not only practice but also be a consumer of consulting services. (2-4 quarter hours)

HC 178
GENDER AT WORK
Undergraduate
From the days of hunters and gatherers our world has been organized by gender expectations. While these gender roles have evolved over time, women and men today still struggle to meet these expectations and they have largely defined who we are for centuries. We have more choices and freedom to renegotiate and transcend these roles now than at any other time in history, and yet they still impact every aspect of our lives. This course will explore how gender can influence communication patterns, leadership styles, negotiation skills, conflict styles, work/life balance expectations, relationships and a multitude of other aspects of our life at work and at home. Students will demonstrate the competencies through class participation, group projects, journal entries and other assignments that will allow them to apply course readings, films, and discussion to their own personal experience. (2-4 quarter hours)

HC 179
ECONOMIC INEQUALITY: THE ROLE AND RESPONSIBILITY OF BUSINESS
Undergraduate
This course will examine the role of corporations in the growth of economic inequality in the United States and the world. Inequality changes in the U.S. and various other countries will be correlated with the economic, political, educational, geographical, and historical trends that may have affected incomes and standards of living since the beginning of the 20th century. Likely causes relevant to corporate strategies, especially over the past quarter-century, will be investigated, and possible solutions will be considered. (2-4 quarter hours)

HC 180
MEANINGFUL WORK MEANINGFUL LIFE
Undergraduate
Our lives and our work are inextricably linked - regardless of how we define work. "Work" may be defined as a paid job, volunteer activities, family and home occupations, educational ventures or other productive endeavors. In addition, over time our lives and work activities inevitably change, develop and take on meaning and relevance in ways that are not always intentional or foreseeable. These changes can and do influence our identity and how we "do" our work. In this course we will explore some elements of social psychology and how and why we derive identity and meaning from the varieties of work in which we are engaged. The genesis of learning in this course will be an examination of stages of development of individuals, workers in diverse settings and organizations. From these origins we will explore how we make and derive meaning from all of these sources of identity. (2-4 quarter hours)
HC 181  
**LAW FOR EVERYDAY USE**  
**Undergraduate**  
Our system is founded on the belief that everyone is entitled to participate in the process of government. Free and open access to the judicial system is fundamental to American democracy, yet, as our system of law grows more complex by the day, we find ourselves more and more reliant on lawyers. This course is designed to provide students with the basic skills to understand and navigate the system in the areas of law that are pertinent to our everyday lives. Various substantive areas of law including, but not limited to, marriage and divorce, work-related laws, real estate, health care rights, estate planning, immigration, juvenile law, and finance will be examined with emphasis placed on topics according to class preference and interest. (2-4 quarter hours)

HC 182  
**HUMAN RIGHTS AROUND THE WORLD AND IN CHICAGO**  
**Undergraduate**  
This course begins with a study of the evolution of human rights from religious belief and includes the opposition to human rights when they threaten traditional authority, vested interests, etc. Major human rights conventions will be studied and the Convention against All Forms of Racial Discrimination (ICERD) is utilized as the case study for current human rights work. Students will study how this convention to eliminate racial discrimination is being implemented in the US and in Chicago today, explore how NGOs are working for human rights, and assess how corporations are implementing human rights within their workforce. (2-4 quarter hours)

HC 183  
**BEAUTY POLITICS IN CULTURAL CONTEXT**  
**Undergraduate**  
How can we celebrate our different skin tones, body sizes, hair textures, and cultures, and yet still acknowledge our similarities? How can hair/body stories help us to better understand each other and ourselves? Are hair and body stories cultural legacies or scholarship? This course exposes students to the complex ways the body is portrayed, (mis)understood, and celebrated worldwide and will focus on constructions of Black hair and the Black body in media of the 20th and 21st century. The course combines readings, personal anecdotes, media (including movies, videos, advertisements, music, poems, and online media), and applied research about the body and its extremities (such as hair). Here we will also analyze the body and its performance of sexualities and identities in the context of the production of culture and social relation. A critique of the readings and media representations will afford students the opportunity to explore alternatives to conventional materialist, consumerist, and constructed binary approaches to the body. By exploring their own hair/body stories students encounter dynamic resolutions and celebrations at the individual level. (2-4 quarter hours)

HC 184  
**VIOLENCE AGAINST WOMEN: A HUMAN RIGHTS VIOLATION**  
**Undergraduate**  
This course will introduce students to issues of violence against women from cross cultural perspectives and will explore how this social problem relates to human rights violation. The course will define violence against women and the different forms of abuse used against women. This intense course will focus on evaluating these forms of abuse in diverse cultures including India, Saudi Arabia, and the United States, as well as immigrant and minority communities in the U.S. This analysis will examine how social institutions in each of these cultures either contribute to the violence against women or address this issue. Through class discussion, lectures, readings and guest speakers, the various ways in which women are abused will be evaluated and discussed in an effort to introduce students to patterns of abuse from a global perspective. (2-4 quarter hours)

HC 186  
**STUDIES IN GHANA: HISTORY, CULTURE AND SPIRITUALITY**  
**Undergraduate**  
This course has been designed to be dynamic and lively, purposefully engaging with learners in direct experience and focused reflection in order to increase knowledge, develop skills and clarify values. The rich cultures of Ghana provide much of the “text” of this travel course. From visiting Ghana's National Museum, to observing kente cloth being woven or women pounding fufu, or meeting with spiritual and educational leaders, course participants will be exposed to multiple layers and multiple levels of West African culture. Everyday experiences, such as shopping in the open air markets, become lessons on human interaction that are rooted in a particular worldview. Learners will be challenged to consider the footprint left by the simple decision of paying a particular price or buying from a particular vendor. They will come to understand that culture goes beyond the surface expressions, such as clothing, food, dance, to the deeper levels, such as the cosmology of the people. Their beginning examination of Ghanaian cultures can lead to further examination of their own personal, family, community and national cultures. (2-6 quarter hours)
HC 187
LATINA LIFE STORIES
Undergraduate
This class will explore the diversity of the U.S. Latina experience through themes of migration, home and place, paid work, caring work, education, gender, and race. Through life stories and fictional works, students will examine what it is like to be a migrant or immigrant; to live in more than one culture, as a bicultural and multicultural, bilingual or multilingual person; to negotiate responsibility and desire, as a woman, mother, daughter, partner, to name and live one's sexuality; to be a provider, a caregiver, an activist and a professional. Students will also be encouraged to draw connections between their own experiences and those of the women about whom they are studying. The course will conclude by exploring how Latina women are building new political, theoretical, economic, artistic, and spiritual pathways toward wholeness. Students demonstrate competence through participation in class discussion, and activities, as well as by writing essays based on readings. Students will also have the option of writing about their own life history as well as of researching the life stories of Latina women not covered in the class. (2-4 quarter hours)

HC 188
UNDERSTANDING INTERNATIONAL RELATIONS
Undergraduate
Two major puzzles sit at the core of world politics: Why do nations fight, and why do they cooperate? One popular theory views conflict as a normal state in international affairs, presenting its supporters with the task of explaining why so much cooperation exists. Another popular perspective characterizes cooperation as the norm, posing a dilemma for its supporters to account for the violence in world affairs. Understanding cause and effect in a complex world is a difficult challenge. This course provides an introduction to the systematic study of major issues in international relations. Some themes recur throughout the course: power, motivation and choice, nation-states, anarchy, sovereignty, interdependence, and political and economic market failure. We will systematically explore the players, their goals, the constraints within which players operate, the interactions between players, and the strategies they pursue. Part I introduces general theories for explaining international relations. Part II addresses domestic sources of foreign policy. Part III asks why and under what conditions wars occur, while Part IV explores how values and culture affect international relations, focusing on the causes of terrorism. (2-4 quarter hours)

HC 189
LATINO CHI CAGO
Undergraduate
In this course, we will learn about the concepts of race, class and gender and how these intersect to shape Chicago Latinos' experiences. While we will learn about the inequities that Latinos have experienced, we will also explore this community's struggle for social justice and its efforts to create a voice for itself in Chicago. We will conclude this course by exploring how Latinos/as are building new political, theoretical, economic, artistic, and spiritual pathways toward wholeness and justice. For example, we will explore some of the cultural and political projects of this community and the many groups that comprise it. We will learn about these themes and address questions through readings, class lectures and discussions, guest lectures, documentary films and field trips. Field trips to Latino Chicago communities such as Pilsen and Humboldt Park will take place during class time.

HC 190
LAW IN AMERICA: ITS HISTORY AND RELEVANCE IN TODAY'S WORLD
Undergraduate
This course is designed to enhance students' awareness of how critical American law is for their personal, professional, and community life. The purpose is to help students achieve a better grasp of current realities through understanding of the history, the structure, and inherent problems of the American legal system. The course will discuss the role of lawyers and the public in the legal process (e.g. the role of civil rights groups and lobbyists in forming laws). It will begin with the colonial underpinnings and the essentially Western and British foundations of the American legal institutions. There will be some discussion of alternative legal systems. It will then review the American Constitution, the nature of a federal system, and specific topics in American law. These topics will include the basic rights in our system, and the law as it has evolved in dealing with race (“the strange career of Jim Crow”), speech (free and otherwise), labor (its rough course), criminality and its outcomes, religion (how religious is the law), and business regulation (how much can we trust antitrust). The course will be relevant for students interested in the law as a career, the law in the workplace, the law in not-for-profit settings, and those generally interested in the law in business contexts, as well as those seeking to understand the role of the law in our social and cultural context. We will use one major textbook, as well as selected readings on topics. Students will be asked to bring their own experiences with the American legal system into our discussions and to share their perspectives of the various topics. (2-4 quarter hours)

HC 191
AMERICAN PRESIDENTS
Undergraduate
This course will trace the development of the American Presidency by concentrating on the lives of some of the leaders who have been elected to the Presidency over the past two centuries. We will seek to find out their histories, what motivated them, what ideals they held sacred, what programs they proposed, how they reacted to crisis, how they protected and improved the nation during times of war and peace. We will examine the key issues and problems that confronted these Presidents and shaped the history of our nation. Students will read different biographies of two Presidents, and individually report their findings to the class for discussion and comparison. (2-4 quarter hours)
HC 192
HOW, WHAT AND WHY WE EAT: THE ART, SCIENCE AND PSYCHOLOGY OF FOOD
Undergraduate
We have many connections to food. Food sustains us but it has meaning that extends far beyond basic nutrition. Eating is an individual pleasure and comfort, a tool for creating and sustaining social bonds, and a way to express one's cultural identity. Food is tied to many aspects of life including culture, politics, agriculture and the environment. Americans have become disconnected from both the production of our food and from the joy of eating it and suffer from food related health problems such as diabetes, obesity and eating disorders. In this class we will explore the myriad of food-related habits and choices, that determine how what and why we eat. This experiential class moves beyond specific dietary guidelines by presenting concepts and skills that will help you reframe your connections with food. We will explore the multiple dimensions of food and eating from an individual, community and national level. We will explore the true meaning of nourishment. Topics include: identifying personal eating styles, mindful eating exercises, the slow food movement, locating Chicago food deserts, a field trip to a popular Chicago organic garden/restaurant, guest speaker from a Chicago restaurant mural artist, examining types of hunger and nourishment, and issues involving food and ritual, food and story, food and psychology, food and art. We will combine art, film clips, lectures, field trip, research, and mindful eating skills. (2-4 quarter hours)

HC 193
THE AFRICAN AMERICAN FAMILY
Undergraduate
This course will explore key questions regarding the development of the African American family within the context of institutionalized oppressive forces endemic to American society. During the course we will survey several theories that have been prominently used to characterize the African American family's development and their efficacy as tools in this endeavor. We will also use genealogical research methods to understand the dynamics of family development. Students will conduct research into their own family's history by using oral history techniques and will learn how to document and reconstruct kinship ties as far back as class time and records will allow. Through this process, students will gain a broader understanding of the African American family as it has evolved in response to the stressor imposed upon it throughout American history. Furthermore, learners will consider issues related to the construction of American society, the role of African Americans in it, and the ways in which these issues influence African Americans in all aspects of their relationship to the larger society. Each student will be expected to turn in a final research report based on readings and research. The final research report will consist of a family tree and a discussion of family development based upon the ideas presented in the course discussions and the readings. (2-4 quarter hours)

HC 194
GENTRIFICATION AND COMMUNITY ENGAGEMENT
Undergraduate
This course will offer students an overview of gentrification and an opportunity to read and discuss critical issues of gentrification, such as housing and schools in low-income communities and racialized urban development, in a social justice framework. To gain a deeper understanding of those issues, students will conduct research on gentrification in Chicago neighborhoods in small groups. Based on the group research, each student will engage in civic action by writing a letter to a local politician. (2 hours)

HC 195
GRANDPARENTING: AN INTERGENERATIONAL DEVELOPMENTAL PROCESS
Undergraduate
In this course, we will explore how generations of a family interact with one another, how these relationships affect the different generations, and how cultural factors and public policy influence the interactions. We will explore intergenerational relationships from the perspective of developmental psychology, public policy, finances, public health, cross cultural studies, literature and the arts. At the same time as more grandparents are becoming the primary caretaker for their grandchildren and the number of great-grandparents is at a record high, the traditional roles of each generation are undergoing great change. Some of the questions to be addressed through concise lectures, readings, group projects, interviews, and individual projects are: How can intergenerational interactions stimulate development throughout the life span? How can the nurturing across generations be balanced with the independence of the individual? What are the implications for workplace policies, public policy, and community health? How do different cultures respond to intergenerational interactions? How do the arts (literature, fine arts, music, and cinema) reflect the value of intergenerational relationships? How can what we learn from this inquiry help us understand our own relationships across generations? (2-4 quarter hours)

HC 196
ECONOMICS BY EXAMPLE
Undergraduate
This course utilizes a novel pedagogical approach to introduce concepts and theories that form the core of the principles of economics. Instead of relying on graphs and mathematics, 'Economics by Example' follows the text by the same name to frame hot topics such as globalization, outsourcing, immigration, environmental policy, big-box retailing, and internet piracy in a way that provides an inviting and accessible understanding of economic theory. The same refreshing treatment is given to more traditional topics such as efficiency, the maximization principle, the concepts of tradeoffs and incentives, and consumer choice in the context of the market mechanism. The learning experience is based on the analysis and discussion of real-life applications that show students the pervasive impact of economics on everyday life while familiarizing them with important concepts. (2-4 quarter hours)
HC 198
JUVENILE JUSTICE: IS IT WORKING?
Undergraduate
This course will explore juvenile justice through a sociological lens that encompasses legal, ethical, institutional, racial, gender and economic perspectives. The course will address the foundation and origin of the juvenile justice system in Illinois and its role as pioneer in juvenile justice throughout the United States. We will examine the various entities responsible for the implementation of juvenile justice including the challenges and obstacles encountered in pursuit of intervention and prevention of juvenile delinquency. A network of professionals dedicated to working with and supporting juveniles involved in the system will speak to how the key institutions interact, combat and collaborate with each other and the impact those dynamics have on the juveniles, their families and communities. The methodologies and efficacy of responses to delinquency such as punishment, incarceration, rehabilitation, substance treatment and re-entry will also be considered. The class will take on such questions as what contributes to juvenile delinquency, how is juvenile delinquency defined, how does it differ amongst communities, how did we get here and what does the future of juvenile delinquency look like in Illinois? (2-4 quarter hours)

HC 199
MANIFESTATIONS OF BELIEF: RELIGION VS. THE CONSTITUTION DURING THE HOLIDAYS
Undergraduate
The United States Constitution guarantees freedom of religion to its citizens. What is freedom of religion? How is this basic right interpreted? How far can the individual citizen go in demonstrating religious belief? When do the rights of the many supercede the rights of the few? These questions have been particularly prickly over the last few years when objections to the recitations by school children of the Pledge of Allegiance, and the display of religiously oriented holiday decorations have made national news. Where do you fall on these issues? Is it okay for New York City to have a big Christmas tree in Rockefeller Center? Do you mind if your neighborhood church displays a creche on its front lawn? What about the town hall? In this course, students will examine holiday displays around town and assess their relation to freedom of expression and freedom of religion. Students will also consider the nature of free societies, their relationship to community values, and the ways in which difference is valued, or not valued, in contemporary American culture. (2-4 quarter hours)

HC 201
NEGOTIATING CONTRACTS: STRATEGIC, LEGAL, ETHICAL, AND MODERN TECHNOLOGY CONSIDERATIONS
Undergraduate
In this course, we will examine the processes of managing perceptions and communicating. We will delve into the realm of analyzing our world as we perceive it and the art of entering into the realm of another's perception. We will utilize "four agreements" as a method of managing our perceptions and the perceptions of others, and as an approach for communication. In learning to communicate with others we will utilize a technique called "matching." We will examine the development of contract law. We will cover the basics of contract formation: offer, acceptance and consideration. We will identify which contracts are required to be in writing. We will examine the remedies available when a contract is breached. We will review various examples of contracts to evaluate the practical application of what we learned. (2-4 quarter hours)

HC 202
MANAGING A CONSULTING PRACTICE
Undergraduate
This course presents the fundamentals of management as applied to the consulting profession. It introduces consulting in the following disciplines: strategic management, information technology, financial management, marketing and distribution, E-Commerce, operational management, human resources, knowledge management, change process management, production and performance improvement, total quality management, companies in transition, small business development and the public sector. This course is divided into five parts: (1) Management Consulting in Perspective; (2) The Consulting Process; (3) Consulting in Various Areas of Management; (4) Managing a Consulting Firm and (5) Developing Consultants and the Consulting Profession. Students will closely examine the consulting industry by looking at associated costs and fees, barriers to entry, implementation of projects, assignment management, action planning, marketing, quality management, how to expand internationally, the issues facing international expansion and how to structure a consulting firm. A total of 20 cases including Harvard and Stanford cases will be reviewed which will provide a broad range of topics and critical thinking pertinent to current management consulting. These cases will illustrate major practice areas of consulting and afford new insights into change processes and other management issues facing consulting firms. (2-4 quarter hours)

HC 203
LIVING AND WORKING IN A GLOBAL ENVIRONMENT
Undergraduate
This course will address dilemmas and opportunities that individuals may encounter as they work or study in multicultural and global environments. The purpose of this course is to increase the effectiveness of individuals in identifying, understanding and managing cultural differences in the workplace as well as outside of it. A variety of learning methods will be used, including lectures, readings, case studies, videotapes, critical incidents, and small group research and presentation. Guest speakers will be invited to share their experiences with the class. (2-4 quarter hours)
HC 204
CULTURE AND GENDER
Undergraduate
In this course, students will gain knowledge about how culture and gender are defined; how we view men and women and our assumptions and expectations of them; and how our cultural make-up influences these assumptions and expectations. Finally, students will consider the roles culture and gender have played and their importance in their own lives thus far. (2-4 quarter hours)

HC 205
NONPROFIT MANAGEMENT
Undergraduate
This course will explore the American approach to the management of nonprofit organizations. Topics will range from issues of leadership to those of operational implementation. Basic concepts, research and theories on nonprofit organizational behavior will be introduced to assist students in learning principles and techniques for developing and managing financial and human resources. The contrasting roles of staff, volunteers, managers and trustees will be examined to develop an understanding of how, in the American system of nonprofit management, each contributes to framing and achieving a nonprofit organization's mission. (2-4 quarter hours)

HC 206
US CITIES: BANNED IN BOSTON
Undergraduate
Boston is ambiguous. It is a world class city from a cultural and educational perspective, but diminutive when considering the standards set by New York or Los Angeles. It is rich and expensive, but poor in economic growth and population. It is the go-to place for American history, but is also eclipsed by more famous locales such as Ellis Island and Washington DC. It has an ocean at its front door, but then so does Honolulu, where the weather is generally better! No matter where you were born, if you live in America, you have been influenced by Boston and its tumultuous history. John and Abigail Adams, Alexander Graham Bell, Oliver Wendell Holmes, and John Kennedy lived for a time in Boston, as did Emily Dickenson, Robert Frost, Ben Affleck, Malcolm X, and Aerosmith. The list of famous Bostonians is quite long, indeed. What makes Boston and Bostonians tick? What does “banned in Boston” mean? Who were the Cabots and the Lodges anyway? In this travel course centered on this most pivotal of US Cities, learners will walk the freedom trail, visit Boston’s most famous art collections, and its equally famous North End. Issues such as Boston’s immigrant populations, its fame as a seat of American higher education, its connection to events in American history, and its economic output will be discussed. (2-6 quarter hours)

HC 207
MEDIASMART-UNDERSTANDING AND DEMYSTIFYING AMERICAN MEDIA
Undergraduate
This course will focus on the principles of media literacy, with a secondary emphasis on media’s effects on society, culture and the individual. We will learn how to analyze, evaluate and create messages in a variety of media channels (television, newspapers, magazines, internet, radio, etc.) and formats (news, entertainment, advertising, etc.). We will learn about the business of media, its role in a democracy and how it represents gender, race, social class and sexual orientation. We will read books and articles; view television programming; examine newspaper and magazine articles; analyze websites. Students will “deconstruct” media in order to better understand how messages are constructed and designed to influence their attitudes, beliefs and behaviors. The course is designed as an interactive learning experience, where students and the instructor learn from one another. Students will leave the course more savvy about American media and the thousands of messages that are communicated to them everyday. (2-4 quarter hours)

HC 208
THE HEART OF THE ENTREPRENEUR
Undergraduate
Entrepreneurs are an integral part of a thriving economy yet the aspects of successful entrepreneurship remain a mystery. This course takes a detailed look at the characteristics of successful and unsuccessful entrepreneurs, enabling the students to acquire a personal understanding of what it takes to start a new business venture. This course is interesting, fun and rewarding especially for those interested in starting their own business. Ed Paulson is a Silicon Valley insider, successful entrepreneur and published business book author. (2-4 quarter hours)

HC 209
USING FINANCIAL INFORMATION
Undergraduate
This course introduces the student to the principles of financial theory and the world of finance. The course covers several concepts and surveys the roles of relevant institutions. In the conceptual part, students will learn about financial instruments and techniques used in financial decision making (time value of money, cost of capital, capital structure). In the survey of relevant institutions’ roles, the students will form a basis for understanding causes and effects in the changing global environment. The interrelationships between decisions of business, financial institutions and individuals will become evident, enabling the student to better understand current events in finance. (2-4 quarter hours)
HC 210
MANAGING ADULT LEARNING IN THE WORKPLACE
Undergraduate
Are you often called upon to share your knowledge by co-workers? Does the On-the-Job Training of a new hire fall upon your shoulders? Do you sometimes wish you knew how to manage teaching adults in your personal life? Or, would you like to explore educating adults as a career? (2-4 quarter hours) In this course, we explore how adults learn and examine corresponding models of facilitating adult learning, suitable for a variety of settings. We base our exploration on the premise that most adults enter formal or non-formal learning experiences to create change in their skills, behavior, knowledge level, or attitudes. Whether you are currently working in HRD, are an adult education practitioner, handle training situations, or simply want to know more about teaching adults, this course will offer you an overview of the field and an opportunity to inquire into your particular interest within that field.

HC 211
ENGAGING A LOCAL NONPROFIT TO SOLVE A GLOBAL PROBLEM
Undergraduate
Global Problem, Local Solution. This phrase has been overused by many a community organization addressing a wide variety of issues including health crises, global warming, fair labor issues, sustainable agriculture, illiteracy, water sanitation, education reform, overpopulation, access to technology, poverty, food waste, trafficking, and much more. What does it actually mean to implement a local solution to a global problem? To fully understand the attempt to affect global social change at a community level, students will meaningfully involve themselves in a local nonprofit with a minimum of ten hours of field service experience in a six week period. Through nonprofit engagement, readings, writings, classroom discussions, classroom presentations, guest speakers and more, students will explore a range of topics from the fundamentals and design of nonprofit organizations to their regulation and abuse. They will learn how to measure the effectiveness of a nonprofit as well as design a nonprofit to effect a change they find important. And they will explore what meaning charity has in their own lives. And why the dating metaphor? Dating is an excellent metaphor for just about everything in life. The way this metaphor applies to nonprofits is? Join us, and you’ll learn how. It promises to be an engaging experience. (2-4 quarter hours)

HC 212
GLOBAL LEADERSHIP
Undergraduate
Leading global and domestic organizations requires understanding, appreciating and managing the impact of culture and the interplay of cultural patterns in everyday interactions. To be successful, leaders must be able to interpret complex cultural contexts and develop intercultural competence, not only in themselves but in the people they lead and the other organizations they work with. Developing intercultural competence is an ongoing endeavor that requires stretching one’s thinking to adopt new cultural perspectives regarding others’ values, attitudes and behaviors. But it is not an end in itself: intercultural competence is the basis for successful social interactions and business communications, which are especially important in today’s “flat” world. “Global Leadership at Home and Abroad” will explore the demand for and ways to develop this distinct skill set among leaders so they can establish communities and initiate change across diverse groups of stakeholders. (2-4 quarter hours)

HC 213
GLOBAL BUSINESS, TECHNOLOGY AND THE UNITED NATIONS
Undergraduate
SNL students will study global business issues with Ambassador Kamal via video conferencing from New York City and hold discussions with students and professors in Mexico City and Guadalajara also via video conferencing. Several SNL students outside of Chicago can connect via Scopia desktop video conferencing to the Chicago classroom, New York and the universities in Mexico to participate in each Thursday class. This is not Distance Education. Discussions will focus on global business and technology issues U.S. and Mexican companies face today and global perspectives. SNL students will work on teams with students in Mexico City and Guadalajara on a climate change project via video conferencing and D2L. Instructors: Pat Szczesba at SNL and Ambassador Kamal in New York. Students and professors at University Panamericana Mexico City and Guadalajara. (2-4 hours)

HC 214
SOCIETY AND THE FAMILY, PLOTTING THE FUTURE
Undergraduate
In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, Single parents, and Blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1960s. In this course, learners will pursue the following questions: What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality and religion? Is the two parent family necessary? What role do grandparents and great-grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future? (2-4 quarter hours)
HC 215
EMOTIONAL INTELLIGENCE IN THE WORKPLACE
Undergraduate
How do individual emotional traits support, or detract from, leadership behaviors in today’s ever-changing organizations? We learn to identify and strengthen core traits of emotional intelligence at work, and to collaborate intelligently and effectively with others to meet the high standards of organizational improvement. Special focus on theories of active leadership and their relevance to an emotionally-positive workplace culture. (2-6 hours)

HC 216
LAW AND CHANGING FAMILY DYNAMICS
Undergraduate
This course explores the factors that influence families as they navigate the many transformations and adjustments resulting from parents redefining their relationship. Such changes in the parenting relationship often find these families "bumping up" to the legal system in pursuit of direction, closure and stability. The consequences and outcomes of being involved in the legal system can be complicated and complex, often times resulting in ongoing physical, emotional, and financial distress. The struggle to find ways to redefine the relationship within societal expectations and mores, ensuring the well-being and best interests of the children and finding effective and respectful ways to co-parent has proven extremely tricky for many families. Factors including economics, family system structure, sexual orientation, marital status, mental health, and domestic violence, as well as the emotional, physical, behavioral and learning needs of the children will be examined to better understand why some families are able to effectively problem solve and make decisions to meet the needs and resources of their respective family. As we consider the numerous elements that contribute to how the post-traditional family manages, we will investigate approaches that help families break down barriers, recognize destructive influences and patterns, and provide opportunities to build a durable family structure that ensures children feel loved, cared for, and safe. (2-4 quarter hours)

HC 217
HIP HOP AND THE POLITICS OF DIFFERENCE
Undergraduate
This course is a study of gender and contemporary popular culture. Few can deny the influence hip hop exerts; however, what began as party music in the late 1970s has matured into a global cultural enterprise. Embedded in this enterprise is evidence of an emerging political discourse that upends the compulsory scripts ascribed to black masculinity. Hip hop puts forward a set of sophisticated counter-narratives that repurpose the anger borne out of the systematic alienation of black men from attaining the full promise of American masculinity. The course will investigate the ways commercial hip hop facilitates the (re)production and dissemination of black American masculinity post-1965. Students will examine the sociohistorical and socioeconomic conditions from which rap emerges and continues to derive inspiration. Students will be guided through a careful reading of Judith Butler's Performatives Acts and will use the work to wrestle with the ways commercial hip hop's consensual relationship with global capital complicates the project of black humanity fomenting a politics of difference. (2-4 quarter hours)

HC 218
URBAN HEALTH CARE
Undergraduate
This course will examine the health issues of people who live in large metropolitan areas generally, with a specific concentration on the treatment of the mentally ill. We will also look at the political economy of urban health care delivery. Many cities like Chicago are experiencing an increase in the numbers of individuals diagnosed with mild, moderate and/or serious Mental Illness. Often these individuals are dually diagnosed with Substance Abuse, TB and/or HIV/ AIDS. This increase brings with it the exacerbation of social pathologies such as violence and homelessness. At the same time, the health care providers are consolidating, and many community treatment facilities have closed, putting additional strain on the public health care system. We will discuss the response of several large cities to these challenges and the relative influence of their own urban economics upon that response. Each class will be devoted to discussion and analysis of specific topics. The topics will be indicated in advance for each class. The course will be conducted primarily in a seminar format, which requires that each student come to class prepared to participate in the discussion. (2-4 quarter hours)

HC 219
THE FIGHT FOR HUMAN RIGHTS: ONE WOMAN'S CRUSADE
Undergraduate
Helen Prejean is a leading human rights activist in the United States. For the past 30 years, she has helped shape conversation about equal treatment for all within the criminal justice system, especially persons of color and the materially poor. Dead Man Walking, the eyewitness account of her experience accompanying condemned prisoners to execution, has had a major influence on discussion of violence, poverty, civil rights, criminal law, and social justice. In this course, we use her work and interact with her personally to study power inequities across race and class lines that perpetuate injustice and examine her strategies for reform. (2-4 quarter hours)
HC 220
WORLD RELIGIONS & INTERFAITH DIALOGUE
Undergraduate
This course is an introduction to world religions and interfaith dialogue in theory and in practice. It has three broad themes moving from the general to the specific: 1) a comparative study of the five, historical religions - Hinduism, Buddhism, Judaism, Christianity and Islam; 2) a survey of interfaith dialogue: its history, objectives and methods; and 3) an exploration of the interfaith movement in Chicago beginning with the Parliament of World’s Religions in 1893 and ending with a close look at the practice of “interspiritual dialogue” pioneered by the late Brother Wayne Teasdale. (2-4 quarter hours)

HC 221
PUBLIC SPEAKING: HOW TO CHANGE YOUR LIFE
Undergraduate
Public speaking is the #1 fear in humans. Mastery of this skill is critical to one's professional and personal advancement. Being able to confidently, effectively and enthusiastically deliver your thoughts and ideas to a group of individuals is a skill that separates leaders from followers. We will explore creative ways to significantly enhance our comfort level speaking effectively in front of groups. In an open, friendly, fun, enthusiastic and supportive environment, participants will be introduced to a variety of methods to become much more confident with public speaking. Since fear of speaking is the most significant roadblock to giving effective presentations, this will be a focus of the class. We learned to feel this fear from our conditioning, which gave us disempowering values, beliefs and thoughts about this activity. These values, beliefs and thoughts, which we subconsciously inherited and adopted as our own, are likewise responsible for everything else that is or is not working in our lives. Understanding this power of our minds and our ability to implement new, more empowering values, beliefs and thoughts, is critical to creating the life we desire. This public speaking course will use Personal Development as the instrument to improve our ability to speak in front of a group as well as identify shortcomings in our personal and/or professional lives and develop a plan for empowerment to make significant changes in these areas. Student will have an opportunity to speak at each class as there will be 3 short prepared speeches and impromptu speaking during other sessions. (2-4 quarter hours)

HC 222
FACILITATIVE DIALOGUE
Undergraduate
Verbal communication is an essential component in virtually every aspect of our interpersonal lives. The focus of this course is to study those situations and settings where we need to facilitate appropriate dialogue in order to arrive at a solution in the face of potentially emotional volatility. As examples, these conversations can include: confronting an uncooperative coworker, assessing alleged wrongdoing by a student, addressing resistance in a patient, or meeting the needs of a disgruntled customer. In these situations, our own behavioral and verbal actions are important determinants in the direction, duration, and consequences of the interaction. Given the potential for us to be verbally accosted, hostilely confronted, and/or be inappropriately blamed, we often have to manage our own emotions in addition to trying to engage in facilitative dialogue. Students will examine the processes involved in emotionally volatile situations including how our emotional and physiological state work in these situations. Students will learn a framework to more effectively manage the situation in order to arrive at an acceptable outcome. This course is appropriate for those in human resources, patient- and service-oriented industries, counseling, education, leadership development, and other settings where facilitative dialogue is necessary. (2-4 quarter hours)

HC 223
MONEY, FINANCE, AND CRISSES
Undergraduate
Money has become such an integral part of our everyday life that we take its everyday use, whether physically or electronically, for granted. Yet the reach of money goes far beyond what we experience. Money is much more involved in the inner workings of the economy through the interaction of financial markets (bond markets, stock markets, foreign exchange markets, etc.) and financial institutions (banks, mutual funds, insurance companies, pension funds, etc.). Financial markets and institutions everywhere, and particularly in the U.S., influence the trillions of dollars that flow daily worldwide. Their impact on the welfare of nations and on the capacity of the economy to produce goods and services becomes evident when one looks at the Great Recession, which started in 2008. The goal of this course is to provide a working understanding of many issues through the study of money, banking, and financial markets. (2-4 quarter hours)

HC 224
CREATING ADVERTISING
Undergraduate
The average American is bombarded with at least 6,000 advertising messages a day. While highly controversial, advertising is key to our consumerist and capitalist society. This course will focus on the basic principles of advertising, including media, creative development and production; the history of advertising; and the uses of marketing research to develop an advertising campaign. Students will read books and articles and view videos on advertising. They will be asked to write 2-3 short analyses of their reading assignments, and use the advertising encountered in everyday life for a series of 2-3 analytical assignments. There will also be a short paper on the advertising topic of their choice. The class will work in teams to develop an advertising campaign that will be presented during the last day of class. Outside speakers currently in the advertising profession will be invited to the class. (2-4 quarter hours)
HC 225
DEVELOPING AND APPLYING EFFECTIVE LEADERSHIP SKILLS
Undergraduate
This course is designed to explore the research, practices, purposes and scope of leadership as a tool to develop leadership skills that will influence and inspire others. Both individual and organizational aspects will be presented and will include such areas as behaviors, ethics, communication, cultures and current practices. Emphasis will be on application of leadership theories and skill building through self-assessment exercises and case studies. (2-4 quarter hours)

HC 226
CITY SHAPERS
Undergraduate
Chicago has been a city of “characters.” This course will examine the lives of people who have made specific contributions to Chicago and its history as entrepreneurs, politicians, social reformers, artists, builders, and spiritual leaders. Key economic, political, and social developments in Chicago’s history will form the overall framework for the study of individual contributions. When appropriate, comparisons will be made with individuals who shaped other urban centers. Students will gain a working knowledge of Chicago’s history and culture in this course, and an appreciation of the men and women who shaped the city. (2-4 quarter hours)

HC 227
FROM WORKSPACE TO PLAYSPACE
Undergraduate
Transformative learning is one of the most active new areas of adult learning practice and research. This type of learning centers on adults’ experiences of significant shifts in their perspectives, ways of making meaning, and self-concepts as they engage in new learning and sometimes disorienting life experiences. It also includes the development of new capacities and positive changes that lead to increased freedom, flexibility, and confidence. This course is for anyone who is interested in being more mindful of transformative learning opportunities in their own life, and who wants to learn to make space for transformative learning in a range of educational and organizational settings in the role of educator, trainer, facilitator or manager. This is a highly participatory course where students will learn key theories of transformative learning as they reflect on their own learning experiences, and those of their learning colleagues. In addition to their own experiential learning and reflection, students will collaboratively develop strategies to guide such learning in their own work and practice settings. (2-4 quarter hours)

HC 228
WOMEN IN CHINA: IMAGES AND ROLES
Undergraduate
Through the introduction of images and roles of Chinese women in the past and present, this course will examine the evolving position of women in the Chinese society, the challenges that they still face, and the impact of globalization and economic developments on them today. Still photos, paintings, videos, and films will be used. (2-4 quarter hours)

HC 229
CIVIL RIGHTS: A MODERN APPROACH
Undergraduate
What exactly are civil rights? Where do these rights come from and how does modern society deal with them? This course will deal with constitutional protections and safeguards currently called “Civil Rights”. We will explore the role of government in these civil rights and how that role has evolved. Students will analyze various court decisions, current events and their own experiences in order to examine the relationship between government agencies (such as police and fire departments and boards of education) and citizens. The focus of this course will be on how modern society should handle civil rights issues which involve race, gender, disability, education, employment and privacy in the 21st Century. (2-4 quarter hours)

HC 230
FAMILY LIFE: MILLENNIALS IN CHICAGO
Undergraduate
Millennials are individuals born between the years 1980 and 2000. They were born post gender revolution, post the sexual freedom movement, post the rise of the divorce rates. However, they are projected to be the largest generation in the US and a high percentage are choosing Chicago as home. A recent Redfin examination of where Millennials are living found 14 Chicago land zip codes highly populated by Millennials (McClister, 2014). In this course we will highlight the evolution of their family life and its impact as we seek to answer the following questions. Who are they? What is their status? What is their approach to family and family life? What are their priorities? Are they marrying later? Are they having fewer children? How do they define family values? Why are they migrating to Chicago? What impact do these migration trends have on their family life? Millennials are children of baby boomers and beyond thus their approach to family life has been questioned in the scholarship. In this course we will take a Psycho-Social approach to unpack some of these burning questions and develop a grounded sense of family life for this generation.
HC 231
ORGANIZATIONAL PROBLEM SOLVING
Undergraduate
This course will integrate theories of organizations at different levels of analysis (micro/intra- and interpersonal, and macro/organizational), and a problem-solving process that managers and executives can use to identify and resolve organizational problems. Students will work through multiple cases of organizational problems at all levels in small groups and the entire class. They will learn to apply a 4-step process to diagnose and resolve organizational problems: 1) identify the problem; 2) diagnose root causes using the "Five Whys" technique; 3) identify possible solutions; 4) evaluate solutions and choose optimal one(s), taking into consideration likelihood of success and difficulty of implementation. Students will apply basic theories of Organizational Behavior (OB), including individual (motivation, satisfaction); interpersonal (group processes) and organizational (structure, process) to the situations. (2-4 quarter hours)

HC 232
LEADERSHIP ACROSS THE GLOBE
Undergraduate
What makes a good leader? Are leaders influenced and formed by time and place or are great business, humanitarian and political leaders born to their destiny? What characterizes a good leader in our interconnected world and what leadership lessons can we learn from the past? Globalization has become the buzzword of the early 21st century. To some, it is a curse manifested in economic outsourcing, destruction of the rain forest, exploitation of low-wage workers by multi-national corporations, human rights violations, and environmental degradation. Proponents, however, would argue that globalization, a phenomenon that has been going on since recorded history, has produced great benefits to many around the world. Why has a word that has been in our English vocabulary for little more than the past 40 years recently become such a polarizing term, often a focal point of hostile passions that have erupted in violent protests? What exactly is globalization? Where did it come from and who led us here? Why is it seemingly everywhere? What do we need to learn and do to thrive as citizens and leaders in the global community? These are just a few of the questions we will address in Contextual Leadership. Students in this course will examine the phenomenon of globalization, the special challenges that globalization poses to each of us, and identify and demonstrate the lessons you have learned that are relevant to the creation of your own leadership development plan. (2-4 quarter hours)

HC 233
THE HOUSE CHICAGO BUILT
Undergraduate
When most people think of Chicago and music, Blues is the style that often comes to mind. However, since the late 1970s Chicago has also been recognized worldwide as the birthplace of House music. This Discover New Learning course will explore how what is known as House music was primarily created in Chicago's black gay community by such legendary DJs as Frankie Knuckles and grew to become one of the most popular and influential international music styles of the last four decades. The course will engage students in exploring how the intersections of race, sexuality, and culture merged to create this style of music. Likewise, it will explore how these same factors have impacted the way the music is perceived in its birthplace. Additionally, the course will explore how House music parties expanded from safe spaces for black gay and straight youth to public spaces that ultimately influenced public policy such as Chicago's Public Place of Amusement license. Course content will include readings, active discussions, writings, videos, recordings, guest speakers, and maybe even a little dancing. Visits to Chicago locations that have been instrumental in the creation and persistence of House music will also be included. (2-4 quarter hours)

HC 234
SOUTH AFRICA AND THE QUEST FOR CHANGE: 25 YEARS AND COUNTING
Undergraduate
In 1990, sociopolitical forces in South Africa began formally dismantling the structure of racial segregation known as "apartheid" that had been in force since 1948. In 1994, the first bi-racial democratic elections were held, bringing the African National Congress (ANC) to power and Nelson Mandela to the presidency. Since then, the Republic of South Africa has faced considerable challenges on various fronts, which required careful calibration of the new governance system: providing social and economic equality for all races and groups; maintaining the country's economic strength while fostering social justice; and battling the largest HIV/AIDS epidemic in the world. Additionally, over the years, the ANC has seen challenges to its power both within its own ranks and from other parties and groups, a situation likely to intensify with the recent death of Mandela, its most prominent historical leader. This course seeks to give students a thorough grounding in the recent history of South Africa, with particular emphasis on the evolution of its Constitution, on the features that have made it one of the most advanced economies in the whole Africa, and on the country's struggles with the HIV/AIDS epidemic. Students will visit relevant sites and programs and interact with experienced professionals in these 3 domains in both Johannesburg and surrounding areas (Pretoria and Soweto), and Cape Town. Sites include the Apartheid Museum, the Constitutional Court, and Gold Reef City in Johannesburg, the Union Building in Pretoria, Soweto Township, and Robben Island and the District Six Museum in Cape Town. Side trips are also planned to a game reserve and other areas of natural beauty near these two cities. (2-6 quarter hours)
HC 235
CHILD, FAMILY AND COMMUNITY RELATIONS
Undergraduate
This course addresses the work of caring for children from a variety of perspectives. It is designed for students currently employed or planning to work in childcare settings, and for those who want to learn more about the social, cultural, and economic dimensions of (paid or unpaid) caring work. We will therefore examine how cultural differences influence child-raising patterns, and how positive and productive working relationships with families within the context of the urban community need to take these differences into consideration. We will also discuss the many different skills and responsibilities that comprise all types of caring work, and examine why caring work receives very little public or corporate support. We will identify the values and ethical beliefs that would make it a shared social responsibility, and that would productively acknowledge the interdependence of state policies, markets, communities, and families. (2-4 quarter hours)

HC 236
US BUSINESS AND THE POLITICS OF TRADE
Undergraduate
Understanding the relationship between U.S. business and government in the creation and execution of trade policy is more important than ever. In a period of intense economic change, financial instability and changing power structures, we should have a greater appreciation for how interest group politics affect decision-making in the United States and abroad and how policy choices are made. With the rise of emerging markets such as Brazil, Russia, India and China (BRIC), the United States and Europe no longer fully control global institutions like the World Trade Organization. The traditional key players in the international marketplace - and the businesses originating in those countries - must adapt to new challenges, opportunities and commercial flows in order to ensure successful global business. In this class, we will examine why individuals and countries engage in international trade and what are the benefits and challenges created by import and export flows. We will determine how business and government in the United States have interacted over time to create policy and adapt to changing economic realities. We will look at the challenges U.S. businesses have confronted in marketing products and investment abroad. And we will explore the programs and policies the U.S. government has adopted to address those overseas challenges, taking into consideration the priorities and ideologies of a range of domestic and overseas stakeholders. We will compare the U.S. public-private partnership model and interplay with those of selected foreign countries. (2-4 quarter hours)

HC 237
EFFECTIVE INTERPERSONAL COMMUNICATION IN THE WORKPLACE
Undergraduate
This course will help students identify important dimensions of interpersonal behavior and the shapes that two-person relationships can take. Major causes of unhealthy relationships will be examined. And ways interpersonal participants can act to improve the health of their relationships will be considered. Specifically, this course will examine the role of perception in communication, the uses and misuses of language, nonverbal communication, the dynamics of interpersonal communication, and the management of conflict. The course will be a mix of theory and practice. Major concepts relating to interpersonal communication will be explained by tying them to concrete examples. (2-4 quarter hours)

HC 238
LATIN AMERICA IN A GLOBALIZED WORLD
Undergraduate
Where is Latin America as a region headed? This course will begin with an historical overview of the Latin American continent focusing on class structure, racial/cultural dominance, economic development, church-state relationships, and the role of the military in government. Students will investigate how Latin American countries are negotiating the challenges of globalization in four areas: technology, trade, migration and culture. They will assess the extent to which their institutions and international alliances facilitate or hinder individual countries to meet these challenges for the benefit of their people and their society. (2-4 quarter hours)

HC 239
BUSINESS, TECHNOLOGY AND OUR GLOBAL FUTURE
Undergraduate
Students will study the latest changes in the fields of intercultural communication and leadership development in today's global corporations, including reading interviews from some of the world's leaders in manufacturing, energy, telecommunications, and health care from 26 countries. This course combines hard science with cutting-edge organizational research-based case studies in today's trans-cultural global corporations. Students study key behaviors needed today to be successful in a global corporation, including cultural self-awareness, frameshifting, inviting the unknown, third-way solutions, etc. Students will also study how "disruptive technologies", mobile internet, automation of knowledge work, cloud technology, next generation genomics, 3D printing, advanced materials, and renewable energy are changing and will continue to revolutionize global corporations. This course concludes with an analysis of the effects of social justice and corporate social responsibility on today's global corporations. (2-4 quarter hours)
HC 240  
SOCIALLY ENGAGED SPIRITUALITY  
Undergraduate  
Transformative ministry requires that ministers develop and sustain a holistic spiritual practice that is personally meaningful. An effective personal spirituality deepens one's engagement in society and collaboration with others. In this course students will explore holistic models of spirituality for personal and social transformation. They will develop the skills necessary for collaborative ministry and for cooperation with others for the sake of integral human development. Through this course, therefore, students will develop and demonstrate their competence to explore a model of spiritual development and apply it to oneself or others and to learn collaboratively and examine the skills, knowledge, and values that contribute to such learning. (2-4 quarter hours)

HC 241  
MINDFUL EATING, CONSCIOUS LIVING  
Undergraduate  
Obesity, eating disorders, and a range of psychological distress and dissatisfaction related to physical appearance and body image are approaching epidemic proportions in our culture. Despite having more knowledge and easily accessible information about how to eat, what to eat, and when to eat, the problem is not going away. While the greatest impact of these problems is on the individual, they also affect family members, friends, co-workers, and our society at large. The obsessive search for perfection has spawned a plethora of new products and procedures in the fields of medicine, pharmaceuticals, nutrition, holistic healing, cosmetics, fitness, and food marketing, which inundate and overwhelm consumers who are eager for quick fixes at any cost. At a time when medical costs are sky-rocketing, our society is losing the battle with obesity, the number one (and most controllable) underlying cause of costly and life-threatening illnesses. The first part of this course will examine the role cultural beliefs, norms and social institutions play in this ever-increasing problem. Specifically, we will study how marketing, mass media and the advertising industry influence our beliefs and behavior and undermine our ability to make thoughtful conscious choices in general, but particularly when it comes to food choices and eating behavior. The second half of this course will be devoted to studying and utilizing mindfulness practices (meditation, imagery, relaxation, mindful eating, etc.) specifically designed to enhance awareness, provide insight, and transform our beliefs, attitudes and relationship with food. Becoming fully conscious of the decisions and choices we make about food and eating opens the door to conscious living in all areas of our lives. (2-4 quarter hours)

HC 242  
ACTING UP - USING THEATER & TECHNOLOGY FOR SOCIAL CHANGE  
Undergraduate  
Theater and political protest. Media activists and anti-globalization. Online Flash movies for sustainable development. Hip Hop and voter registration. These are just a few of the ways art and social change are coming together. Technologists, artists and activists are blending their approaches, strategies and tools in a creative stew for progressive social change. This class will examine how social change activists are using theater and technology to achieve their change agendas. (2-4 quarter hours)

HC 243  
EMPLOYMENT LAW: POLICY CONSIDERATIONS IN RESOLUTION OF CONTEMPORARY WORKPLACE DISPUTES  
Undergraduate  
This course will examine how legislatures and courts have sought to address conflicts and issues arising out of employment relationships. Simulations and written exercises that place you at various times in the role of lawyer, judge, mediator and litigant will help to explain in practical terms how current law surrounding the employment relationship was constructed, and how it evolves. Throughout the course, you will not only learn some of the terminology and "black letter" law involved in labor and employment matters, but also will critically examine the policy reasons that support why our legal system treats the issues as it does. Are there rules and procedures that need to change? What kind of new rules might society create, and what intended and unintended consequences would those new rules have? Topics to be addressed in this course will include: at will employment vs. contractual and statutory rights-based employment systems; recruitment, applications and interviewing; sexual harassment and gender discrimination; race discrimination and "reverse" discrimination; discrimination based on religious affiliation, age and disability; workplace bullying and employee privacy. (2-4 quarter hours)

HC 244  
FACILITATING ORGANIZATIONAL CHANGE  
Undergraduate  
The changing capabilities of today's companies rest in the quality and competence of all employees. Effecting change from a holistic perspective requires change agents get to the root cause of problems and consider cross-functional and interdisciplinary approaches to solving business problems. The emerging demand for effective management raises several questions: What is it that we do well or should do better? How can we be more responsive to market needs? How can we do things right the first time? How can a holistic approach to change allow more effectiveness in addressing business challenges. Through readings, case studies, lectures, discussion, guest speakers, group projects and written assignments, students will examine holistic approaches to change, assessing organizations and their external environments, manager's roles, and the implications of diversity and technology. (2-4 quarter hours)
HC 245
COMMUNITY-BASED, FAITH-BASED AND NON-GOVERNMENTAL ORGANIZATIONS
Undergraduate
During their professional ministries, students will work with or for many different types of community-based, faith-based, non-governmental and international organizations. The more students understand about how such organizations are structured and function, the more effectively they will be able to collaborate with them and carry out their own ministries. In this course, students explore different models for organizing, managing, and leading such organizations. They will examine topics related to mission, governance, accountability, and resource development. They will investigate particular opportunities and challenges that such organizations face in Africa today. Through this course, therefore, students will develop and demonstrate their competence to identify an organizational problem and design a plan for change based on an understanding of change theories or models and to use two or more organizational theories in the analysis of one's experiences in an organization. (2-4 quarter hours)

HC 246
LANGUAGE AND LANDSCAPE
Undergraduate
This class explores questions about language and its interconnection with the world; how language shapes culture; how intercultural misunderstandings occur; how languages and unique environments have changed through immigration, migration, colonization, and globalization. In the first part of the class, we will examine living languages, as well as some of the world's threatened and dying languages, which, if trends continue, will likely decline from 6,000 still spoken today to approximately 500 by the end of the 21st century. We will examine how language shapes our understanding of the world, and how this can vary as a result of landscape. We will explore how language interacts with landscapes in the evolution of unique and varied worldviews. In the second part of the class, we will widen our scope and consider the changes in the landscape and our linguistic understanding of the landscape. (2-4 quarter hours)

HC 247
APPLYING ECONOMICS: A PRACTICAL APPROACH
Undergraduate
This applied economic course is tailored for non-economics-major students, those interested neither in becoming theorists nor in dealing with the concepts, graphs and complex math found in the typical economics course. The material to be covered caters to students who are concerned citizens and active participants in the economy, and want to achieve a better grasp of problems facing society today. This class is not an exercise in abstract ideation. It is a course in economic issues, without graphical and mathematical models. Students will learn how to use fun tools from game theory to analyze some of society's most puzzling problems, such as pollution, health care, the depletion of natural resources, how the pursuit of individual goals can lead to poor collective outcomes, and also the challenges of monetary and fiscal policy, economic growth, inflation, unemployment, income inequality, etc. Students will learn by doing, through hands-on experiments and practical exercises. (2-4 quarter hours)

HC 248
THE TRIPLE AXIS: RACE, GENDER, AND CLASS IN THE UNITED STATES.
Undergraduate
We will explore how issues of race, gender, and class have intersected in struggles for equality in the United States. Our exploration will range from the struggle for racial equality to the struggle for gender equality. Stereotypical thinking, cultural and class labels, and unexamined assumptions often play a pivotal role in the power relationships that have characterized these struggles. We will look at social, political, economic, and cultural factors that have influenced our behavior and contributed to our self-perceptions and our views of others. (2-4 quarter hours)

HC 249
NONPROFITS: A GUIDE TO A MULTIBILLION DOLLAR BUSINESS
Undergraduate
In the wake of the East Asian Tsunami, Hurricane Katrina and cuts in federal programs, the nonprofit sector has increasingly played a significant role at the local, national and worldwide level. A multi-billion industry, nonprofits provide essential services in many forms including education, enhancement of the arts and social welfare programs. This course explores the role of nonprofits in the US, the practical methods nonprofits employ and the differences in working in and managing a nonprofit organization from a for-profit venture. Using hands-on case studies and learning from nonprofit managers, students will demonstrate competencies through class participation, each student will have the opportunity to create a nonprofit business plan and examine emerging issues in nonprofit management. (2-4 quarter hours)
HC 250

OCCUPATIONAL ANALYSIS & CHANGING LABOR MARKETS

Undergraduate

What are the elements of modern occupations, and how do they shape the development of emerging labor and educational markets? Knowing the past and present contours of contemporary work roles is crucial to judging the future shape and stability of labor and occupational markets. Students in this course learn the basic tenets of occupational analysis: The identification of work roles, their organizational or institutional function, and the potential each holds to generate or resolve conflict. We examine key current and emerging labor market conditions as a context for changing occupational and education norms and indicators. Students apply theoretical knowledge to the contemporary conditions of at least one labor market sector, analyzing selected qualities of its occupational base.

HC 251

GLOBAL PERSPECTIVES ON WOMEN'S HEALTH: A MULTIDISCIPLINARY APPROACH

Undergraduate

Why are the risks and outcomes for breast cancer in the U.S. different for women from different racial and ethnic backgrounds? What are the factors influencing the infant mortality rate in poor countries? Do you differ from factors in the U.S? What factors contribute to high maternal mortality in poor countries? How does women's work influence their health in Viet Nam or India? Is domestic violence primarily a problem in wealthy nations? These kinds of questions have complex, and not always complete answers, and they represent the kind of inquiry undertaken in this course. We will examine health issues for women in various locations around the world, and the underlying factors contributing to these problems. By doing so, we further our understanding of how biological factors interact with behavioral, social and environmental factors to shape our experience of health, how this is related to development, and the need for social action. Learning experiences will include presentations/discussions, readings, cooperative group activities, and reflective writing. (2-4 quarter hours)

HC 252

TOPICS IN AFRI CAN-AMERICAN HISTORY: CULTURE, PROTEST AND THE MEDIA

Undergraduate

This course will cover various topics in primarily 20th century American History from an African-American perspective. Students will be asked to participate in course discussions and read from selected articles and books in three broad areas that include the impact of African-American literature and art on American culture, resistance, protest, and strategies for political and economic change, and the historical interplay between African-Americans and the US media. Course readings will be supplemented by videos and recordings and one field experience. (2-4 quarter hours)

HC 253

FAMILY LIFE: THE PAST, PRESENT AND FUTURE OF FAMILIES

Undergraduate

In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, Single parents, and Blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1950s. (2-4 quarter hours) What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality and religion? Is the two parent family necessary? What role do grandparents and great grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future? How do these changes impact individuals in society? Competences: H4, H3X, A3A, FX.

HC 254

THE CONSTITUTION: THAT DELICATE BALANCE

Undergraduate

This course examines the U.S. Constitution as the institutional framework of our government, with primary focus on the separation of powers and checks and balances provided to prevent one branch of government from dominating our government. The constitutional tensions created by this system of government are illustrated by the Watergate and Iran-Contra scandals and by a study of the war-making powers of the Executive and Legislative branches. Students will learn through the use of lectures, student research presentations, assigned readings, and the viewing of a series of videotapes dealing with course topics. (2-4 quarter hours)

HC 255

DIMENSIONS AND IMPACTS OF CULTURAL DIVERSITY

Undergraduate

This course offers the opportunity to question the meaning of individual and group differences, and to assess and diagnose related social problems while investigating ways to address and, hopefully, consider solutions for them. Students will review critical issues such as those of social power, privilege, and aggressions impacting diversity. Students will develop and apply leadership skills along with multicultural competences in career development as well as counseling and advocacy in difficult social situations. They will have the opportunity to share their experience or knowledge in one or more key areas of diversity. The emphasis is also on assessing the implications of one's cultural origination, gender issues, sexual orientation and more. Students will gain and demonstrate the competences through classroom projects and activities, weekly written assignments, and discussions. (2-4 quarter hours)
HC 256  
FUNDRAISING FOR NONPROFITS  
Undergraduate  
This course will provide students with an overview of the core concepts and skills involved in creating a not-for-profit organization's development program. This will include discussions on how one develops, implements and assesses a strategic fundraising plan. The purpose of this course is to help students: Increase knowledge of the ethics and philosophies of fundraising; Gain information regarding the methods utilized to raise funds for not-for-profit organizations; and, develop an understanding of how to manage the nonprofit fundraising process. Field trips and guest speakers will provide opportunities for students to meet people active in grant writing and grant making. Each student will write a funding proposal during the course. (2-4 quarter hours)

HC 257  
PARTICIPATION AND DEMOCRACY IN AMERICA  
Undergraduate  
Why don't more Americans vote? How do education, income, and age impact voting trends? Why are some Americans more interested in politics than others? How is inequality reflected in other forms of political participation, such as donating money? Do recent trends in voter ID laws help to safeguard the democratic process, or restrict it? In summary, how democratic or representative are American elections? The course begins with some famous arguments about why participation matters. Trends in voter turnout then become the primary object of study, but we also consider other forms of participation including writing members of Congress, attending political meetings and contributing money. We explore recent discoveries in behavioral psychology that are changing the strategies of modern campaigns. After taking this course, you will understand the fundamental role of participation in democracy. (2-4 quarter hours)

HC 258  
MULTICULTURALISM AT SCHOOL: WHAT YOUR CHILDREN LEARN ABOUT WORLD CULTURE  
Undergraduate  
Possible topics include: 1) The difference between traditions and values; 2) How schools handle multiculturalism; 3) How kids grasp "difference;" and 4) Defining the dominant culture and discussing how it handles new, or minority values. (2-4 quarter hours)

HC 259  
CHICAGO POLITICS: IT "AIN'T BEAN BAG!"  
Undergraduate  
This course will introduce students to Chicago's political institutions: City Hall, the city's system of 50 wards, its current aldermen and women, its city council, its mayor, its elections, and its raucous history of scandals and reform movements. Students also will explore the history and exploits of some of Chicago's most memorable mayors and political "bosses" from Long John Wentworth, who guided the city during the civil war; Carter Harrison I, who presided over the 1893 Columbian Exposition; Big Bill Thompson, who encouraged and protected bootleggers; Anton Cermak who stood as a "reformer" against the mob, only to be assassinated; Ed Kelly who rebuilt the Democratic "machine" during the 1930s Depression and 1940s War Years, and built the subways; "Boss" Richard J. Daley, who directed Chicago's post-war building and highway boom that made Chicago into a national urban "model"; Jane Byrne, the city's first and only female mayor, who beat the "machine" of which she was once a prominent member; Harold Washington, Chicago's first and only African-American mayor, who brought a sense of racial justice to the city after decades of discrimination; Richard M. Daley, whose public works and "education reform" agenda elevated Chicago to "world-class" city status; to Chicago's newest mayor. (2-4 quarter hours)

HC 260  
THE CHRONIC ILLNESS EXPERIENCE: PERSONAL, MEDICAL AND PUBLIC PERSPECTIVES  
Undergraduate  
Through readings, observation and analysis, interviews, and reflection, students examine the internal experience of chronic illness as well as the challenges patients with chronic illness face in the workplace, the community, and within institutional health care settings. Students are asked to examine ethical issues involving class, socioeconomics, and social justice as they pertain to biological understanding of chronic illness, and are also asked to evaluate organizational and community responses to chronic illness in an effort to promote respect and tolerance for patients with chronic illness. (2-4 quarter hours)
The 2016 Presidential Election is upon us. Its significance will be far reaching both in the United States and around the world. Students in this course will examine the process of democracy and its significance and importance to their lives and their futures. The course content will review the history of elections and political campaigns in the United States and abroad. The role and impact of the media in the decision making process will be evaluated. Campaign financing, interest groups, voting methodologies and the final stages of the 2016 Presidential Election will be analyzed. This is a hybrid course that will meet five times in the classroom with the remainder of the sessions being flexible online. (2-4 quarter hours)

DePaul University Autumn 2017-2018 Page 1607 of 2468
HC 267 WORKPLACE LAW: HARASSMENT, DISCRIMINATION AND CIVIL RIGHTS
Undergraduate
This course focuses on laws affecting relationships between employers and employees and within the workplace. Students will study the historical and societal aspects of laws on harassment and discrimination within the workplace, with particular focus on the Civil Rights Act and various other legislation regulating harassment and discrimination in the workplace. Students will analyze the case law, the legislation and the legal systems that have evolved to combat social injustice in the workplace and will learn “best methods” for preventing and resolving harassing and discriminatory practices in the workplace. (2-4 quarter hours)

HC 268 CULTURE AND POLITICS OF CAREWORK
Undergraduate
In this class we will discuss the different meanings of carework, how our society values it, and how such valuing results in unjust or exploitative labor conditions. We will examine how the responsibilities regarding carework are unevenly distributed over different social populations, and how gender, race, nationality, or immigration status influence the valuing of carework and related labor conditions. By imagining a society that values carework, and that is founded on an ethic of care and justice we will also look at different forms of political or civic engagement. In particular, we will examine the different strategies and objectives of political movements, labor advocacy groups, and people working on policy changes. Class meetings will be taught in the form of a learning circle where we practice principles of restorative justice and engage in collaborative learning processes. (2-4 quarter hours)

HC 269 PARENTS: PARTNERS IN EDUCATION
Undergraduate
What's up with schools? The statistics speak for themselves: Fully one half of big city high school students do not graduate. For a good number of those who do finish high school, their reading and math skills are well below grade level. They are not prepared for college; nor are they prepared for the work world. Teachers have also come under a great deal of scrutiny and criticism. Students are tested and evaluated, but how is the work of teachers assessed? Parents, for the most part, have been ignored. In this course, students will consider the current state of the US K through 12 education system, and will confront the three elements of student success: learners, teachers, and parents. This is a service learning course. Students will work with schools to learn how parents might contribute, and why they have become silent partners in the educational process. Students in this course will employ interviewing and questionnaires to research questions in educational success. (2-4 quarter hours)

HC 270 VIOLENCE: A GLOBAL PERSPECTIVE
Undergraduate
To successfully reduce and prevent violence requires both a global and local understanding of its conditions, costs and causes, focusing on those most at risk: children, women, and minorities. The globalization of violence will increasingly require local prevention efforts to be interconnected with national and global effects. This course will prepare students to understand both how particular social factors relate to perpetrators/victims of violence, and the roles of social institutions. Each class will include computer-generated audio-visual presentations, student presentations, and discussions. (2-4 quarter hours)

HC 271 WOMEN'S PSYCHOSOCIAL DEVELOPMENT
Undergraduate
This course focuses on how adult women change, grow, and develop in light of psychological and social-cultural forces that interact in their lives. We consider how core concepts such as self-in-relationship, transition and change, and ways of knowing play out in various aspects of women's lives. In exploring different pathways of development for women, we will draw on the life themes of students in the course as well as on theories and models that help identify unique patterns of women's psychological development (alternatives to male-based theories of adult development). This interactive course emphasizes group discussion and guided reflection. (2-4 quarter hours)

HC 272 MODERN AFRICAN HISTORY
Undergraduate
This Bridge course provides a great opportunity to study Modern Africa. It is a study designed to provide a clear and objective understanding about Africa's recent political past: the coming and growth of European colonialism and its impact on Africa's political, economic, cultural, and social development. It covers the partition of Africa, Africa's early resistance against foreign occupation and the independence movement. This course will examine the post-colonial nature of governance, civil wars, human rights abuses, refugee-ism, politics of international aid and Africa's role in global political events and US foreign policy on Africa. (2-4 quarter hours)
We are surrounded by organizations of varying size and purpose. The workplace from large corporations to small-entrepreneurial companies, non-profit organizations, the spiritual community, and academic institutions all provide ample opportunities for failure in communication, effective management, and a thriving workforce. This course identifies the various strategies, tactics, and solutions that have been successfully employed to understand and resolve organizational problems at the levels of both theory and practice. Each of the solutions offers a particular perspective on organizational life with a focus on organizational structures, human relationships, political processes, and organizational symbols. (2-4 quarter hours)

**HC 274**
**THE BILL OF RIGHTS IN CONTEMPORARY LIFE AND WORK**
**Undergraduate**
This course will be organized around a series of central questions: What is a law? Who has the authority to make one? What are the various sources of law? What is or should be the relationship between law, ethics and morality, between law and religion? What is the difference between legislative law and constitutional law? What are the legal, historical, philosophical and political sources of American constitutional law? What sort of society did the Framers of the Bill of Rights have in mind and are their ideas still applicable in 21st century America? How does the Bill of Rights fit into our constitutional framework and what rights does it guarantee? What is the relationship between the states and the federal government in guaranteeing those rights? What is the relationship between our legal system and our political system generally? What criteria do judges use to interpret laws? How does our own legal system differ from those of other countries and cultures? Are there any universal rights worth protecting? What role does (or should) science play in upholding our rights under the Bill of Rights? Possible areas to be covered are freedom of speech, religion, establishment of church and state, the right to privacy, the 4th, 5th and 6th Amendments protections for criminal defendants and the death penalty. (2-4 quarter hours)

**HC 275**
**AMERICA IN BLACK AND WHITE: BUILDING BRIDGES**
**Undergraduate**
In this course, we will explore the historical, economic, and political roots of racism globally and nationally. In addition, we will look at the changes brought about by the civil rights movement and ongoing work in the nation and in Chicago aimed at bridging the gaps caused by racism. We will also explore both black and white novelists, poets, commentators, and scholars such as Ralph Ellison, Adrienne Rich, Paul Laurence Dunbar, Cornell West, Peggy Macintosh, bell hooks, Gwendolyn Brooks, and others. Through discussion, readings, films, debates, guest panels, and field excursions, students will study a variety of topics. Because the course will focus not only on analysis but on building bridges, the instructors hope to enroll an ethnically and racially diverse class membership. (2-4 quarter hours)

**HC 276**
**DECISION MAKING AND LEADERSHIP IN SMALL GROUP COMMUNICATION**
**Undergraduate**
Small groups exist in organizations for many reasons. Some are formally created, permanent bodies for information sharing, decision making and problem solving. Others are ad hoc groups organized to deal with specific issues. Employees often form their own informal groups to share information. Regardless or origin, all groups exhibit similar patterns of behavior and encounter similar problems. With proper training, groups can accomplish far more than any individual members on their own. This course will examine how communication develops and is sustained within small groups, the dimensions of group character, and the effects of group character on communication. We will use a mix of theory and practice to analyze case studies, participate in group decision-making exercises and review the required text. (2-4 quarter hours)

**HC 277**
**CRIME & VIOLENCE: LAW ENFORCEMENT IN AMERICA**
**Undergraduate**
This course examines the stresses and complexities in the planning and implementation of law enforcement in America today. Students will consider the purposes of legal standards and will engage in critique of contemporary systems and issues. In addition, care will be taken to better understand the myths and realities of criminal behavior today, the role of incarceration, and the toll on society and law enforcement officers as well. The goal of this course is to assist students in building bridges of understanding in today's highly charged socio-political world characterized and fueled by competing standards and goals, and to consider their roles in the development of a just society. (2-4 quarter hours)
HC 278
SOCIOLOGY OF HUMAN RELATIONS
Undergraduate
This team-taught course is about race relations in America and around the world. We will engage in productive and thorough discussion of the socio-economic, political, cultural and psychological aspects of human relations, with special attention to the existing relationships between the dominant and minority groups in America. Each class session will focus on a particular institutional base for discussion: political systems, extremist groups, communities, religions, families, schools, to name a few, using readings, film, guest speakers, and current events to bear on the issues raised. (2-4 quarter hours)

HC 279
INTERNATIONAL PROJECT MANAGEMENT: BEST PRACTICES
Undergraduate
This course is designed to increase your knowledge of the concepts and strategies of project management through the introduction and discussion of factors specific to the international environment. Topics will include cross-cultural collaboration, coaching across borders, global communication, global project leadership and integration of traditional project management techniques with global dimensions and issues. The format will include opportunities for class discussion and application of principles, lessons learned and best practices. (2-4 quarter hours)

HC 280
CHILD, FAMILY AND COMMUNITY RELATIONS
Undergraduate
This course will address the work of raising children from a variety of perspectives. It will examine how cultural differences influence certain child-raising patterns, and how they relate to or may come in conflict with established social rules and regulations. Practical ways of establishing and maintaining positive and productive working relationships between child care workers and families will also be addressed, and what kind of community resources are available within an urban setting. This course will also discuss the many skills and responsibilities which comprise the (paid or unpaid) work of raising children or "motherwork." Although motherwork is of vital importance to society, as "typical women's work" it receives little public or corporate support. The values and ethical beliefs associated with motherwork, and what they mean in terms of individual experiences and social support will therefore also be examined. Validating individual experience, expanding knowledge, and developing critical and analytical abilities are some of the objectives of this course. We will achieve these objectives by discussing and critically analyzing readings, by evaluating our own experience in light of the course material, and by engaging in dialogue and conversation with each other. Participation, the keeping of a learning journal, doing the readings, and writing a final 5-6 page essay per competence are the main requirements of this course. (2-4 quarter hours)

HC 281
CULTURE AND POLITICS OF THE 1960'S
Undergraduate
The period from the late 1950s to the early 1970s represents a turning point in "the American century." Opinions differ though on the meaning of the sixties. Was it a period of cultural renaissance, moral decay, civil war, or something else entirely? This course attempts to assess the significance of the 1960s by looking at some key movements in culture and politics, including the civil rights movement, Vietnam war, and hippie counterculture. We will read essays and excerpts from King, Carmichael, Wolfe, Mailer, McLuhan, Sontag and others to track the emergence of new social critiques focusing on the corporate state, patriarchy and the mass media. Through lecture, discussions, and films, students will study a significant individual or movement and demonstrate their expertise through a paper or presentation. (2-4 quarter hours)

HC 283
GLOBAL PERSPECTIVES BALANCING WORK & FAMILY
Undergraduate
How have people balanced the demands of work and family? What role has politics played in this history? This course develops students' understanding of issues in the history of gender, family, and work through historical and contemporary accounts from Europe and the United States. We will take a close look at issues such as the gender division of labor, child labor, government policies on maternity, social and political movements. Course materials include historical documents, lectures, films, and varied readings. Assignments will include essays, reflection journals, discussion, and a research project on work-life balance. (2-4 quarter hours)

HC 284
EXPERIENCING SUSTAINABLE SOCIETIES THROUGH THE UNITED NATIONS AND IN GERMANY
Undergraduate
This program takes students to the United Nations three-day conference for NGOs "Sustainable Societies: Responsive Citizens" in Bonn, Germany and then the group will travel to Berlin, the capital of Germany and a major center for environmental innovation. More than 2,000 people representing some 500 NGOs from more than 100 countries are expected to attend the Sustainable Societies conference. Students will attend lectures and dialog with world experts in sustainability from governments, United Nations agencies and NGOs. By exploring Berlin through guided walking and bus tours, meetings with government experts and visiting historical institutions, students will gain insights into Berlin's leading efforts in creating a sustainable city. (2-4 quarter hours)
HC 285
WOMEN’S VOICES IN PEACEMAKING
Undergraduate
Across the planet, as forces for war, terrorism, empire, and ecological destruction have gained more strength, there has also been an upsurge in the spiritual, cultural, political, and social leadership of women for peace and justice in response. For example, in just the last 20 years, there has been a demographic shift in the United States of gender majority attending law schools and seminaries. Women’s voices from Ireland to India, from Peru to South Africa are shaping a new vision for the future that take into account class, race, gender. What is the impact of women's collective role on our future here and internationally? This course examines a variety of women’s voices of the personal and political, of the spiritual and the social, and explores the possibilities of a new and emerging power dynamic for women. We will read the excerpts and works from current and past women leaders in peacemaking, such as Dorothy Day, Barbara Epstein, bell hooks, Dr. Helen Caldicott, Arundhati Roy, Mary Daly, Pema Chodron, Barbara Eck, Marilyn French, Maread Corrigan Maguire and others; hear guest lectures from women active in practicing peace locally and globally; and experiment with tools designed to develop interpersonal and community peacemaking. (2-4 quarter hours)

HC 286
PSYCHOLOGY FOR MANAGERS
Undergraduate
This course reviews theories and tools of psychology as applied to work environments, including group interaction, productivity, communication issues, motivation, as well as the impact of individual and organizational dysfunction and pathology. (2-4 quarter hours)

HC 287
DEVELOPING COMMUNICATION COMPETENCE IN CROSS-CULTURAL SETTINGS
Undergraduate
This course is designed to acquaint students with the unique elements of communication present in cross-cultural transactions and to aid students in navigating successfully through these interactions. Over the course of the semester, students will learn to be self-reflexive about their experiences as members of a society in which diverse work teams, international travel, transnational work environments, the Internet, and widespread immigration of groups and individuals are part of contemporary reality. We will examine traditional elements of the communication model (sender, receiver, message, feedback, context) in terms of cultural, social, and psychocultural influences. To this end, students will explore cultural values, perception, nonverbal communication, high and low context communication, individualism, collectivism, challenges of diverse organizations and work teams, protocol and negotiation across cultures, barriers to effective cross-cultural communication (the "isms"), culture shock and mindfulness. Students completing this course will acquire practical skills to apply in reducing anxiety and uncertainty in cross-cultural interactions and, importantly, students will learn to recognize ethnocentrism and rise above it in the creation of community.

HC 288
UNDERSTANDING HUMAN RESOURCE AND DEVELOPMENT
Undergraduate
This course in Human Resource and Development will address careers that improve human performance in organizations. Human Resource Development provides the framework for helping employees develop their personal and organizational skills, knowledge and abilities. Participants will learn how to analyze the performance needs of organizations, helping to facilitate change through interventions that increase competencies, communication and motivation. Course content will include the design and delivery of instruction that provides performance support for adults, and they will learn how to assess and evaluate the impact of performance interventions. Other topics covered will be individual development, employee training, career development, performance management and development, coaching and mentoring, and organizational development. (2-4 quarter hours)

HC 289
PSYCHOLOGY FROM AN AFRICAN-CENTERED PERSPECTIVE
Undergraduate
This course utilizes an African-centered theoretical framework to examine salient themes pertinent to the psychology of people of African descent, including child development, family functioning, identity, education, racial oppression, spirituality, and healing. It takes an historical and topical approach to foster greater understanding about the course content. Through this examination, the learner will become more knowledgeable about the psychological experiences of people of African descent, the role of history and culture in human development, and the subjectivity of research in the social and natural sciences. They will also reflect on the relevance of the course material to their personal lives. (2-4 quarter hours)
HC 290
THE DISABLED IN THE COMMUNITY
Undergraduate
In this course the student will define and analyze disabled populations in several categories including, physical disabilities, learning/cognitive disabilities and emotional/mental disabilities. Social and Behavioral disabilities including Addictions, HIV/AIDS, and Domestic Violence will be considered for review. The basis for consideration of these populations is to assess effect(s) that the disability has on the ability of said persons to acquire and maintain productivity in the community and to determine what interventions and services those persons need to be healthy and empowered to the greatest extent possible. Initial class sessions will consist of descriptions of disabilities within several categories, role play and evaluations of selected case studies and a (CIP) Community Integration Plan for these cases. (2-4 quarter hours)

HC 291
PARTNERSHIP POWER: HOW TO BE A HUMAN BEING
Undergraduate
This course is about learning the tools, values, structures, inspiration and scientific basis for partnership and integrating them into our lives. In our personal and planetary lives we face many crises. Today many important thinkers believe we have reached a bifurcation point for human evolution: Do we continue down paths of destruction or do we take hold of ourselves with cooperation and peace? This course offers collaborative ways to examine the joys, skills, values, and knowledge of partnership development. Being a human being with good partnership skills can be productive and fun! We will explore the Cultural Transformation Theory put forward by macrohistorian and social scientist Riane Eisler, to compare the dominator and partnership paradigms in several aspects of our lives - self, family, work, national community, international relations, nature, and spiritual reality. Using the Partnership/Domination template in theory and practice, we will investigate the concepts, functions, and expressions of cultures based on cooperation and peace versus those based on control and violence on a continuum. We will look at the dominator aspects of gender, color, ethnic origin and sexual orientation and other cultural oppressions and compare with the partnership model. This course provides a way to understand the large transformations taking place on our planet and in our lives.

HC 292
LANGUAGE AND LANDSCAPE
Undergraduate
In this course we will investigate the significance of physical landscape to human imagination and language. It is frequently assumed that human minds somehow exist "above" the physical universe, but our perspective unifies the two. Through written course materials and assignments, some lecture and intensive classroom discussion, we will go beyond the dualism of classical philosophy to a more grounded view of cultural creation, seeing art, myth, and survival itself as products of place. Students will work with the idea that cultural artifacts are communicating a relationship to the land, and our coursework helps us determine its precise nature. (2-4 quarter hours)

HC 293
LAW AND THE WORKPLACE
Undergraduate
This course will examine the interrelationships between our economy, business and the practice of law. It will also examine contemporary legal issues in the world of work. Students will examine the structures of the legal community and the impact it has on how business is conducted, and on the economic system in which we live and work. Through readings, discussion, and group projects, students will investigate the interfaces of law, with an emphasis on torts and employment law, as well as current issues which have evolved as the practice of law has become a big business itself. Students will develop and evaluate plans individually or through group interaction for applying new insights to affecting change in their own working environments. (2-4 quarter hours)

HC 295
UNDERSTANDING THE "HUMAN" IN HUMAN RESOURCES
Undergraduate
Human Resource professionals hold a diverse set of responsibilities, some of which are designed to respond to the human needs of employees. Addressing these in the context of the work environment requires an understanding of human behavior, insight into the effects of social issues on the workplace, knowledge of mechanisms and resources for problem resolution, and effective communication skills. Students will participate in group exercises and discussions designed to help develop and practice strategies for problem resolution based on increased self-awareness and empowerment. A primary textbook and related readings as well as two field assignments, self-reflective journaling, and a final integrative paper are required. Course assignments are designed to support integration and application of new skills and knowledge. (2-4 quarter hours)
HC 296
LESSONS OF HISTORY
Undergraduate
Does history ever repeat itself? What lessons has our past taught us in planning for the future? This course will focus on an examination of the social, economic, and environmental changes that occurred in America during selected decades of the 20th century. Students will compare and contrast the 1920s with 1960s and 1930s with 1950s looking for major events, trends, and policies that repeated themselves in the subsequent generation, as well as fundamental political and economic structures. Students will share their findings and learn techniques for integrating information to form a basis for rational forecasting of future trends. (2-4 quarter hours)

HC 297
GLOBAL STUDY OF SEX AND OPPRESSION
Undergraduate
This course is designed to expose the learner to the history, context and problems within the sex industry (prostitution, pornography, exotic dancing) as it exists throughout many countries of the world. Our foundation for discussion needs to be based in theory, of which we will discuss: functionalism, interactionism and conflict perspective and how each defines the sex industry. Next, we will explore the various definitions, levels of social acceptability (necessity) and the importance of laws that have defined this industry and our perceptions. Furthermore, we will discuss the religious, socio-cultural issues that allow for certain elements of sex work to flourish in places such as Bangkok, Thailand, the United States, and various parts of Europe. Also, we will discuss the legal acceptability of certain sex work activities within the countries discussed. Within our discussions / research of the sex industry, we will attempt to formulate answers to the controversial issue of legalization versus discrimination. (2-4 quarter hours)

HC 298
CONNECTING WITH AFRICA: CULTURAL AND SOCIAL ISSUES IN EAST AFRICA
Undergraduate
This travel course will introduce students to two East African countries where they will have the opportunity to study issues of cultural, economic, social, and political interest as they manifest themselves in Kenya and Tanzania in comparison to the USA. Intensive study in Chicago and onsite in Kenya and Tanzania will give students a unique opportunity to reflect on and then compare and contrast what goes on in their own country and in these two East African countries.

HC 299
ASSESSING AND MANAGING CONFLICT
Undergraduate
Our usual method for presenting, analyzing, and resolving conflicts has centered around legalistic argument; the goal being to discover the "right" answer and suppress the "wrong" ones. However, the multiple worldviews operating in the world today make such an approach to conflict less viable. Reflecting this reality, ways of communicating about and resolving conflict have arisen that go beyond enforcement of rules or legal determinations of right and wrong. In this course, we will look at various methods for handling conflict and consider how we might apply them to personal, work, community and literary conflicts through lecture, small group work, role playing, reading, various written projects, and discussion. (2-4 quarter hours)

HC 300
GLOBALIZATION AND PROFESSIONAL PRACTICE
Undergraduate
For decades scholars have observed a growing body of evidence and employers a growing body of experience of significant changes in the way that international business is conducted. These changes in the business world, brought on largely by globalization, present new challenges. These challenges require staff with specific skills related to global competence in order for the business to remain competitive. The goal of this course is to help students to cultivate and/or refine the skills and capabilities necessary to succeed in today's global work environment. Organized around four learning units and one major project, the class will provide each student with extensive content and resources; it will also provide a forum for assessing the competences necessary to attain success in a global workplace and a method for honing those skills each student needs to cultivate. (2-4 quarter hours)

HC 302
ACTIVE CITIZENS: MAKING A DIFFERENCE IN THE COMMUNITY, WORKPLACE WORLD
Undergraduate
Americans are known for active participation in organizations that strengthen our communities. We coach our kid's sports teams, take meals to members of our congregations, work for candidates that we believe in and join marches to support or oppose government action. With all these activities, we engage with other members of our community and workplace to make it better for ourselves and our families and to promote social justice. In this class, we will develop the knowledge and practice skills that enhance civic engagement. (2-4 quarter hours)
HC 313
IMPLEMENTING EFFECTIVE TRAINING IN ORGANIZATIONS
Undergraduate
Everyone has had the delightful experience of learning by accident, of being surprised at insights and skills that emerge from experience. But accidental learning can be time-consuming and costly to organizations and individuals who have specific learning goals to meet. Engaging and effective learning in organizational settings is most often the product of systematic analysis and planning. This course will introduce a detailed protocol for designing training experiences in a variety of adult training settings. The five stage protocol (Analysis, Design, Development, Implementation, Evaluation) provides a context for students to address the following questions: Who is the audience and what is the training context? What is to be learned and why? What methods are best suited to the learning outcomes? What resources are available and appropriate to the learning outcomes and methods? At the end, students will be able to distinguish training design from development and implementation; describe characteristics of adult learners and their implications for training; define desired learning outcomes based on training context and audience; determine teaching/learning methods suited to particular training situations; and, identify and describe resources to support achieving learning outcomes. Students may register for only one competence. (2-4 quarter hours)

HC 314
AGE OF DICTATORS: TOTALITARIANISM IN THE INTER-WAR PERIOD
Undergraduate
This course will examine the age of dictators in the inter-war period by focusing on the principal individuals, institutions and societies involved. Root causes of totalitarianism will be developed, as well as an understanding of its impact, effectiveness, and relationship to democratic societies. Students will be stimulated to contemplate ethical and religious aspects of the despots' rule, and will comprehend the period within the larger framework of 20th century history. (2-4 quarter hours)

HC 315
RACE, PLACE AND SPACE: ENVIRONMENTAL JUSTICE IN THE TWENTIETH CENTURY
Undergraduate
This course will provide a survey of historical and contemporary forces (social, cultural, technological, scientific and economic) which have led to the global emergence of environmental inequalities in societies during the last century. This course will also show how the environmental ethics of a society (national and international) as well as their notions of who belongs to the larger body politic have contributed to environmental inequalities in national and international geographic spaces. This course is an excellent elective for business, education, religion, sociology/anthropology and science/engineering focus area who seek to understand the foundations and ramifications of human ethics, values and culture on decisions and policies which impact the global environment (or ecosystems). (2-4 quarter hours)

HC 317
METHODS OF DISCIPLINE FOR TODAY'S CHILDREN
Undergraduate
In today's world, a lack of discipline can cause children to become non-productive members of society. Raising children from a loving and caring perspective is more challenging today than it seems to have been in the past. The complexities of this world require different approaches to behavior modification. In their struggle with raising children, parents need to know a variety of methods and models that can be used to help children develop a strong personal self-esteem and to learn that discipline is best when it is made from choices and personal decisions that the child can control. This course will help students compare two models of effective behavioral modification that can be used in the home to help parents in one of the most complicated aspects of child development. Students will be responsible for implementing strategies we discuss in class as well as finding other available methods.

HC 318
FACING HISTORY AND OURSELVES
Undergraduate
History often ignores the story of how the common person participated in its making in favor of the heroes and the outstanding individuals. The origins and evolution of the Third Reich offer a source for examining the subtleties and texture of change, as well as the background which leads to the major events that mark our history. The lessons of this period address eternal questions of human behavioral tendencies toward its culmination: the pressuring of peers, the need to belong, and inhumanity. Through discussion, films, and readings, students will trace how individuals are shaped by social, political, and economic forces.

HC 319
ETHICAL CHOICES IN A GLOBAL COMMUNITY
Undergraduate
This course will introduce ethical dilemmas which can only be resolved with an understanding of the many perspectives of the stakeholders. Dilemma paradigms and resolution principles will be explored suggesting frameworks for making choices. Students will work individually and in groups to explore a wide range of ethical dilemmas. Students will demonstrate mastery of the competencies with a portfolio and oral presentation of an investigation into an ethical dilemma with global ramifications. This project will require the student to examine the ethical issue from several perspectives, conduct research from a variety of sources, compare and analyze the results, and finally commit to a substantiated approach to the dilemma. (2-4 quarter hours)
HC 320
THE POWER OF PERSUASION
Undergraduate
This course is intended to provide students with a thorough understanding of how persuasion and persuasive techniques are used in the communication process of relationships, in the family, and in the world of work. Students will study the art of persuasion by analyzing the text of selected American figures and their speeches, and learn to recognize the skill sets of sending and receiving persuasive messages. Moreover, students will study the approaches, ethics, and symbols of persuasion, by exploring the great speakers and what they were trying to accomplish through language, culture, power, and knowledge. Studying the texts will also strengthen and empower the students' strategic approaches to persuasion, both verbal and nonverbal. (2-4 quarter hours)

HC 321
THE CONTEMPORARY AMERICAN FAMILY: UNRAVELING THE MYTH
Undergraduate
This course examines the societal forces shaping aspects of stable and changing family relations, both nuclear and constructed, in the United States. The course will focus on social-structural factors affecting union formation and dissolution (traditional marriage, the gay marriage debate, cohabitation, and divorce); parenting (traditional and "queer"); the gendered division of paid work, caring work, responsibility and authority; and the role of the state in supporting families. To better appreciate the depth of contemporary changes in U.S. families, we will begin the semester with an examination of colonial and 19th-century American family life. We will pay particular attention to diverse patterns of family structure and family relationships by social class, race-ethnicity, age, gender and sexuality. We will engage with these topics in a variety of ways, including student presentations, lectures and class discussion, readings, and in-class videos. (2-4 quarter hours)

HC 322
HUMAN SEXUALITY
Undergraduate
Institutions such as the State, the Courts, Religion, Marriage and Family, the military, and the industrial complex(es) have used and often misappropriated human sexuality as a means of hegemony, power and control. With the use of readings, film, discussion, and lecture, this course will present variant sexualities while deconstructing and demystifying many of the long-held traditional values, ideals and customs that many in society accept as the norm. (2-4 quarter hours)

HC 323
THE POLITICAL ECONOMY OF THE GLOBAL VILLAGE
Undergraduate
The concentration of great wealth in some countries and grinding poverty in others may be the biggest challenge facing humanity in the new century. This course will explore issues of global inequality by comparing the political and economic systems in the US, Europe, and low-income countries. Our discussions will center on the history and culture of these nations to provide a framework for understanding differences in the way each has developed technologically and socially. Theories on politics, economic programs and foreign investment will be analyzed for insights on the paths taken by successful nations and barriers facing others. (2-4 quarter hours)

HC 324
DEVELOPING VIRTUAL COMMUNITY
Undergraduate
This course is designed to engage information placed on or derived from the World Wide Web from the perspectives of a variety of ethical and legal frameworks. The issues of access and expression within the context of a free society will be considered from a variety of perspectives, e.g., the religious right, the ACLU, ordinary parents, workers in a corporate world, as citizens of the United States, as members of a global society, etc. The course will not so much focus on the answers as it will raise the questions and acknowledge the tensions. (2-4 quarter hours)

HC 325
CITY HALLS, MALLS, AND THE MEDIA
Undergraduate
Decisions are made about the communities in which we live and work on a daily basis. Understanding how these decisions are made can empower citizens to make a difference in their everyday lives. This course will analyze the relationships among government, the media and the business community in the decision-making process. First hand information will be provided through interaction with elected officials in visits to Chicago and suburban council meetings. (2-4 quarter hours)
HC 326
CONTEMPORARY NATIVE AMERICAN/AMERICAN INDIAN ISSUES
Undergraduate
Native Americans are part of our history and heritage, yet many Americans have little knowledge beyond stereotypes. While invisible to the mainstream, Native American cultures are surviving, striving, and in some cases, thriving as we enter the new millennium. This course will explore the complex issues facing Native Americans today through discussion, film, readings, and Native American news media to enable students to gain a cross-cultural perspective. Students will choose an area of focus on this subject and conduct independent research to present to their classmates. (2-4 quarter hours)

HC 327
EXPERIENTAL PSYCHOLOGY: RELATIONSHIPS BETWEEN THINKING AND FEELING
Undergraduate
Personality, temperament and past experiences all contribute to the way we relate to ourselves and to the world around us. In order to experience life more fully, to manage relationships and make life decisions, we need to be aware of how these influences have affected us, then develop new options for living. Students will become familiar with liberation psychology, which integrates principles and strategies from several schools of traditional psychological thought. Emphasis is on acquiring tools for creating an identity and understanding the context from which these tools were developed. Education methods will include group interaction and experiential exercises to guide participants in developing deeper self-awareness, acceptance of self and others. Self-disclosure by participants will be welcome, but is not required for a successful learning experience. (2-4 quarter hours)

HCD 421
DESIGN AND HUMAN EXPERIENCE
Graduate
This foundational course focuses on understanding the design process and how users, communities, and society are impacted by technology. This course will cover a breadth of technologies such as educational technologies, health systems, social tools, games, etc. An interdisciplinary course that draws from the fields of computer science, psychology, sociology, and economics, students will reflect on the social, political, and economic context and impact of technology use locally and globally. PREREQUISITE(S): None

HCD 450
THEORIES AND FRAMEWORKS IN HUMAN-CENTERED DESIGN
Graduate
This course will survey the diversity of theories in human-centered approaches to technology design; e.g. rhetoric, distributed cognition, and activity theory. PREREQUISITE(S): None

HCD 510
RESEARCH METHODS AND PRACTICE OF SCHOLARSHIP
Graduate
This course provides students with in-depth knowledge of how to conduct a qualitative research study. Specifically, students will learn various approaches to conducting research including: ethnography, grounded theory, actor-network theory, and discourse analysis. Furthermore, students will learn how to propose a research study as well as how to effectively communicate research scholarship. PREREQUISITE(S): None

HCD 525
MEDIA THEORY PROSEM I NAR
Graduate
This course explores the key traditions of disciplinary and theoretical inquiry that contribute to the study of Digital Media, including media theory, literary-critical theory, visual culture and the cultural studies of media, communications theory, and performance studies. Students will examine key texts in each of these areas and explore their application to representative digital artifacts. PREREQUISITE(S): None

HCD 590
ADVANCED TOPICS IN HUMAN CENTERED DESIGN
Graduate
HCD topic varies with offering. Contact instructor for more information. PREREQUISITE(S): Completion of the HCD core courses or consent of the instructor. May be repeated for credit.
HCD 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit.
PREREQUISITE(S): None  (variable credit)

HCD 601
HISTORY OF TECHNOLOGY AND SOCIETY SEMINAR
Graduate
This course will provide a foundational understanding of the historical relationship between technologies and humans with particular focus on how technological innovations have impacted shifts in how humans work, communicate, and learn. PREREQUISITE(S): None

HCD 699
RESEARCH
Graduate
Research course supervised by an instructor. Independent Study Form required. Variable credit. Can be repeated for credit.  (variable credit)

HCD 701
CANDIDACY DISSERTATION RESEARCH
Graduate
Non-credit. Students admitted to candidacy for the doctoral degree who have completed all course and dissertation registration requirements and who are regularly using the facilities of the University for study and research are required to be registered each quarter of the academic year until the dissertation and final examination have been completed. PREREQUISITE(S): Admission to Candidacy. Independent Study form required. (variable credit)

HCI 201
MULTIMEDIA AND THE WORLD WIDE WEB
Undergraduate
An introduction to the World Wide Web and web development for non-technical majors. Students will create web pages using a WYSIWYG editor. Students will evaluate web sites using a variety of analytical and empirical methods. Students will conduct technology-related experiments following the principles of the scientific method and use technology to analyze their results. Topics include web-based technology, creating content for distribution on the web, and design principles for web sites. Students will develop an appreciation for the connections among science, mathematics, and technology in modern society, as well as for the principles guiding advances in science and technology. PREREQUISITE(S): NONE.

HCI 302
FOUNDATIONS OF DIGITAL DESIGN
Undergraduate
Shape, line on two-dimensional surfaces. Color. Composition rules as they apply to digitally created documents. Digital manipulation of two-dimensional images. Use of commercially available draw and paint tools to create two-dimensional designs. PREREQUISITE(S): None

HCI 402
FOUNDATIONS OF DIGITAL DESIGN
Graduate
Shape, line on two-dimensional surfaces. Color. Composition rules as they apply to digitally created documents. Digital manipulation of two-dimensional images. Use of commercially available draw and paint tools to create two-dimensional designs. PREREQUISITE(S): None

HCI 406
WEB SITE DESIGN FOR HCI
Graduate
Web design introduced in a user-centered context. Application of visual design principles and common design patterns for web sites and mobile interfaces. Page markup using HTML and CSS addressing responsive web design, accessibility, and search engine optimization. PREREQUISITE(S): None
HCI 421
DESIGNING FOR CONTENT MANAGEMENT SYSTEMS
Graduate
Design and development of Web sites using common database-driven content management systems (CMSs) and publishing tools such as those used to manage blogs, community portals, and other content-heavy websites. Discussions of how familiarity with CMS tools assists the role of the user experience designer. Visual design and theme customization using prior knowledge of CSS. Taxonomy systems, installation of add-on modules, and user management using today's widely used systems. PREREQUISITE(S): HCI 406

HCI 406 is a prerequisite for this class.

HCI 422
MULTIMEDIA
Graduate
Multimedia interface design. Underlying technological issues including synchronization and coordination of multiple media, file formats for images, animations, sound and text. Hypertext. Information organization. Survey of multimedia authoring software. Topics in long distance multimedia (World Wide Web). Students will critique existing applications and create several multimedia applications. PREREQUISITE(S): HCI 440 or consent of the instructor.

HCI 440 or consent of the instructor.

HCI 430
PROTOTYPING AND IMPLEMENTATION
Graduate
Overview of prototyping methods ranging from low-fidelity to interactive script-based prototypes. Analysis of prototyping tools and their relative advantages. Projects include prototype development over multiple iterations using a variety of strategies. PREREQUISITE(S): IT 411. Students must have completed or be concurrently enrolled in HCI 440 or HCI 441 to register for this course.

IT 411 is a prerequisite for this class. Students must have completed or be concurrently enrolled in HCI 440 or HCI 441.

HCI 440
INTRODUCTION TO USER-CENTERED DESIGN
Graduate
The user-interface development process. Introduction to methods for practicing user-centered design including user and task analysis, user interface design principles and testing using low-fidelity prototypes. Students may not receive credit for this course and HCI 441. PREREQUISITE(S): None

HCI 441
INTRODUCTION TO USER-CENTERED DEVELOPMENT
Graduate
Overview of the user-centered design (UCD) process with an additional emphasis on user interface development. Coverage of UCD process includes effective, low-cost methods for user research, interaction design and evaluation. User interface development involves application of front-end development languages (HTML and JavaScript) and frameworks (jQuery). This course is offered to students with programming experience as an alternative to IT 411 and HCI 440. Students may not receive credit for this course and HCI 440. PREREQUISITE(S): CSC 403

CSC 403 is a prerequisite for this class.

HCI 445
INQUIRY METHODS AND USE ANALYSIS
Graduate
This course provides students with the skills necessary to acquire and organize user information for the purpose of developing task and systems analyses. Topics covered include survey construction and administration, structured observation, interviewing, and participatory design. Students learn to evaluate and organize user information toward making analysis and design decisions. Human communication and presentation skills are developed. PREREQUISITE(S): IT 403 and (HCI 440 or HCI 441)

IT 403 and (HCI 440 or HCI 441) are prerequisites for this class.
HCI 450
FOUNDATIONS OF HUMAN-COMPUTER INTERACTION
Graduate
Application of engineering and psychological theory to the design of computer systems. Overview of applicable research methods and research on perception, cognition, errors, and screen design. Attention will be given to creating and applying guidelines derived from research. PREREQUISITE(S): IT 403

IT 403 is a prerequisite for this class.

HCI 454
INTERACTION DESIGN AND INFORMATION ARCHITECTURE
Graduate
Information architecture and interactive page design. Perception and use of menus, labels and user controls. Structuring information for navigation and presentation. Selecting and placing user controls for optimizing task flow on pages and across pages. Creating wire frames and using content managers. PREREQUISITE(S): HCI 406 and (HCI 440 or HCI 441)

HCI 406 and (HCI 440 or HCI 441) are prerequisites for this class.

HCI 460
USABILITY EVALUATION METHODS
Graduate
Survey of evaluation methods that can be applied to user interfaces. Methods include expert inspections, walkthroughs, usability testing and analytical approaches. Students evaluate existing systems by applying some of these methods. PREREQUISITE(S): IT 403 and (HCI 440 or HCI 441)

IT 403 and (HCI 440 or HCI 441) are prerequisites for this class.

HCI 470
DIGITAL DESIGN
Graduate
Focus on the visual aspects of interfaces for information and communication technologies (ICTs). Evaluate, critique and create ICT interfaces using design principles. Learn to choose color, type, layout and imagery to create aesthetic and usable ICT interfaces. Introduction to information visualization. Applying course concepts, students create and develop their own web-based portfolio. PREREQUISITE(S): HCI 402 and HCI 406

HCI 402 and HCI 406 are prerequisites for this class.

HCI 411
ACCESSIBILITY AND DESIGN FOR DIVERSE USERS
Graduate
Methods and principles for designing interactive technologies for diverse users, including children, elderly, and people with disabilities and alternative skills. Analysis of how current technologies address diverse user needs and considerations about how technologies might be improved to better meet diverse user needs. Class projects include a web accessibility evaluation based on current w3 standards and an in-depth research project in which students ideate a new technology or evaluate an existing technology in which they work directly with people who have disabilities. PREREQUISITE(S): HCI 445 (HCI 460 recommended)

HCI 445 is a prerequisite for this class. HCI 460 is recommended.

HCI 512
INFORMATION VISUALIZATION AND INFOGRAPHICS
Graduate
Communicating information through visualizations. Students learn how to choose effective means to visualize data for (a) their intended audience(s) and (b) for the message they intend to communicate. Students practice creating and evaluating visualizations using a variety of tools and methods. PREREQUISITE(S): IT 403 and HCI 470

IT 403 and HCI 470 are prerequisites for this class.
**HCI 513**  
**DESIGN/STRATEGIES FOR INTERNET COMMERCE**  
**Graduate**

(Cross-listed with ECT 555) An integrated study of design, technical, and strategic issues for Internet commerce. Web analysis, design and publishing. Visual, textual and content organization, response time, usability testing. Authorizing tools and administering web server. Internet database servicing. Internet service providers and pricing. Digital cash and encryption. Impact on the value chain, intermediation, and market structure. Strategies for mass customization, interactive marketing, and support for collaborative work. **PREREQUISITE(S):** IS 422 or HCI 430

IS 422 or HCI 430 is a prerequisite for this class.

**HCI 514**  
**GLOBAL USER RESEARCH**  
**Graduate**

Theories and approaches for conducting HCI research and creating digital media for international audiences. Varied topics include (a) cultural models and global differences that influence design of digital artifacts (b) approaches to conducting usability and other types of user research and (c) information communication and technologies for development (ICT4D). **PREREQUISITE(S):** HCI 445 and HCI 460

HCI 445 and HCI 460 are prerequisites for this class.

**HCI 515**  
**DESIGN ETHNOGRAPHY**  
**Graduate**

This discussion course focuses on topics related to ethnographic methods such as activity theory, value sensitive design, online ethnography and reflexivity. Students will conduct participatory observations, interviews, and diary studies (all methods designed to engage with users “in the wild”) and translate the results from those studies into design implications. In this service learning course, students will work with community partners to conduct ethnographic studies and design a tool for the organization based on the results from the formative study. **PREREQUISITE(S):** HCI 445 and HCI 454 and HCI 430

HCI 445 and HCI 454 and HCI 430 are prerequisites for this class.

**HCI 520**  
**LEARNER-CENTERED DESIGN**  
**Graduate**

Design and evaluation of technology-based learning systems. Theories and models of human perception and cognition as they apply to learning, instruction and training. Application of established principles for analyzing and designing learning systems. Projects include evaluating existing learning systems and the creation of a learning system. **PREREQUISITE(S):** IT 403 and (HCI 440 or HCI 441) and HCI 450

IT 403 and (HCI 440 or HCI 441) and HCI 450 are prerequisites for this class.

**HCI 522**  
**UX STRATEGY AND WEB ANALYTICS**  
**Graduate**

In this course, students examine how to align user experience (UX) approaches with business strategy. Topics include: (a) examining how business and UX strategies are aligned; (b) translation of business goals into measurable metrics; and (c) assessing metrics using services such as Google Analytics. **Prerequisite(s):** HCI 460

HCI 460 is the prerequisite for this class.

**HCI 530**  
**MOBILE DESIGN**  
**Graduate**

Theoretical and practical issues for designing mobile devices. Design strategy, patterns and research within a mobile context. Students will learn to create useful, usable and enjoyable experiences that consider the unique capabilities and constraints of mobile platforms. Project deliverables includes wireframes for diverse platforms such as responsive mobile web, iOS, and Android native apps. **PREREQUISITE(S):** HCI 454

HCI 454 is a prerequisite for this class.
HCI 553
SOCIAL INTERACTION DESIGN
Graduate
UX principles and strategies for designing social apps and web sites. Analysis and use of interaction patterns for organizing, sharing, and discussing content. Application of theories relating to social networks, privacy and social capital. Students apply user-centered processes to the design of a social app. PREREQUISITE(S): HCI 454

HCI 454 is a prerequisite for this class.

HCI 580
USER EXPERIENCE DESIGN PRACTICUM
Graduate
Working with clients, students choose and practice appropriate methods learned in the HCI foundational courses to address business goals and user needs. Course coverage includes best practices for consulting, effective communication with clients and coworkers, understanding business and organizational needs, and setting realistic goals and expectations. Prerequisites: HCI 445 and HCI 454

HCI 445 and HCI 454 are prerequisites for this class

HCI 590
TOPICS IN HUMAN-COMPUTER INTERACTION
Graduate
Specific topics selected by the instructor. Topic varies with each offering. Contact instructor for more information. Prerequisite(s): See syllabus or consent of the instructor

HCI 594
HUMAN-COMPUTER INTERACTION CAPSTONE
Graduate
HCI 594 provides an opportunity for students to apply all of the skills they have learned on one comprehensive project. Multidisciplinary teams design, evaluate, and implement a user interface intensive project. Students prepare written documents describing their activities and present the final results to the class. PREREQUISITE(S): Completion of the HCI core courses or consent of the instructor.

Completion of the HCI core course or consent of the instructor is a prerequisite for this course.

HCI 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Prerequisite(s): Consent of the instructor

HCI 690
RESEARCH SEMINAR
Graduate
PREREQUISITE(S): Instructor consent required. (variable credit)

HIT 421
HEALTH INFORMATICS
Graduate
This course provides an overview of fundamental concepts of information management including the information that healthcare organizations generate and use, the importance of data quality, and external factors that impact healthcare data management. The curriculum will also examine information systems (i.e., the arrangement and interaction of information, processes, people, and technology) as well as system standards and security issues. Finally, special consideration will be given to management, responsibilities and challenges in aligning information technology (IT) planning with an organization's strategic planning as a means to create competitive advantage. Prerequisite(s): Status as a Health Informatics student is a prerequisite for this class.

Status as Health Informatics student is a prerequisite for this class
HIT 422  
SYSTEM DESIGN FOR HEALTH CARE  
Graduate  
Course focus is on systems design for health care that enhances quality of patient care and satisfaction, staff efficiency, and improving patient outcomes. Specific topics include: database design; interface and dialogue design in the context of workflow; usability and human factors; report design; system implementation; and system maintenance. PREREQUISITE(S): None

HIT 430  
ELECTRONIC HEALTH RECORDS  
Graduate  
Comprehensive overview of principles and practices of Electronic Health Records (EHR) management, including data standards and integration, interoperability and information exchange models, data security, and privacy.

HIT 440  
HEALTH INFORMATION EXCHANGE AND NETWORKING  
Graduate  
Course discusses electronic health information systems and their design, implementation and application including information security, privacy and integrity, data exchange standards, basic principles of telecommunications and infrastructure security, and discussion of challenges of adopting HIE systems.

HIT 451  
ACCOUNTING AND FINANCIAL MANAGEMENT IN HEALTHCARE  
Graduate  
This course is intended to prepare the student to effectively interact with accounting and financial management staff and participate in various aspects of financial control and planning. The curriculum provides an historical perspective of financial management in healthcare, identifying trends in the industry and the forces that influence the financing of healthcare organizations. Financial statements, the interpretation and analysis of financial reports, and topics such as cost-benefit analysis, budgeting, and capital management will also be addressed. Consideration will be given to the cost effectiveness and financial future of healthcare organizations. Prerequisite(s): Status as a Health Informatics student is a prerequisite for this class.

HIT 511  
HEALTHCARE MANAGEMENT IN NON-HOSPITAL SETTINGS  
Graduate  
While the hospital is the centerpiece of the healthcare system, so much healthcare is delivered outside this setting. Students will be introduced to many healthcare services outside the traditional setting of the hospital and gain knowledge of the operations of such healthcare settings. The course will be divided into four parts: Traditional care, Diagnosing, Acute-Care Treatment, and Chronic Care and within each area students will explore the basic settings such as outpatient clinics and surgical centers, pharmacies, outpatient laboratories, chiropractic centers, and adult day care, and hospice care. Prerequisite(s): Status as a Health Informatics student is a prerequisite for this class.

HIT 515  
HEALTHCARE LAW  
Graduate  
This course reviews the American legal system as the context within which to consider contemporary medico-legal issues. The courses intent is to provide a legal framework where healthcare management issues can be explored in collaboration with legal counsel. The curriculum addresses such topics as: professional liability, corporate entity risk considerations, and relevant legislative activities reshaping the healthcare industry and tort reform initiatives. Case studies will augment the legal theories presented in the course. Prerequisite(s): Status as a Health Informatics student is a prerequisite for this class.

HLTH 120  
EXPLORING THE HEALTH SCIENCES  
Undergraduate  
This course explores the growing and complicated landscape of the health professions. Students will explore a board range of careers available to people interested in the health of communities and individuals, helping them to identify their own skills, interests, and values. Designed for students in all majors who are interested in exploring a professional interest in health sciences, this course will include aspects of self-assessment and career exploration, health industry research, and connecting with individuals in the field. (2 quarter hours)
HLTH 140
MEDICAL TERMINOLOGY
Undergraduate
This course introduces the student to the specialized vocabulary of the Health Care environment. Terminology used in medical professions will be learned with an emphasis on understanding word roots and building vocabulary. Through studying each system of the body, terminology will be associated with specific anatomy, physiology, functions and minimal pathology of the human body. (2 quarter hours)

HLTH 150
DISCOVERING DISEASE: SMALL POX, HIV, AND ZIKA
Undergraduate
This course will introduce students to science as a way of knowing through the examination of three viral diseases: Small Pox, HIV/AIDS and the Zika virus. In each case we will start by examining early understandings of the illness and then build towards a general biological theory of disease. Specifically, we will study the key observations that were made, and the evidence that was gathered in order to construct a theory of these three diseases that could then be translated into medical treatments. Special attention will be paid to the significant missteps that occurred as scientists struggled to understand the nature of these diseases. A key assumption of this course is that the dead ends and wrong turns encountered during the scientific process are a crucial component of scientific discovery. Each section will conclude with an overview of the most current scientific knowledge of the disease, including current treatments and prevalence levels around the world.

HLTH 194
HUMAN PATHOGENS AND DEFENSE
Undergraduate
This course will introduce students to the diverse microorganisms that cause significant disease within the human population. The biological basis of infectious disease will be explored with a focus on the mechanisms of viral and bacterial infection and spread. The principles behind tools used combat infection will be examined, including antiseptics, antibiotics/antivirals, and vaccination. The course also will profile how the human microbiome promotes health. The course is not appropriate for students who have taken BIO 210.

A grade of C- or higher in BIO 191 is a prerequisite for this class.

HLTH 195
HUMAN FORM AND FUNCTION
Undergraduate
This course provides a foundation for studying biological functioning of the human organism. Students will explore the basic principles of chemistry, cellular and molecular biology, and human genetics. In addition, we will examine the integral relationship between form and function that has evolved into the human body, with particular attention paid to the investigation of tissue organization, the biology of movement, and critical organ systems (nervous, endocrine, cardiovascular, and urinary). Related topics in human health and disease will also be discussed.

A grade of C- or higher in BIO 191 is a prerequisite for this class.

HLTH 201
INTRODUCTION TO HEALTH SCIENCE
Undergraduate
This course introduces students to the B.S. in Health Sciences undergraduate program. The course aims to introduce students to the range of disciplines (biological, sociological, psychological, and political) found within the health sciences, and how each contributes to our understandings of human health and illness. This will allow the students to better understand the nature of health care delivery and the methods that will best improve the health status of both individuals and the population.

HLTH 202
HEALTH RESEARCH LITERACY
Undergraduate
The purpose of this course is to provide students the methodology and skills required for literacy in health, and to comprehend the results of health sciences research. In this course students seeking careers in the health sciences will go beyond the health literacy level suggested for the general public in preparation for professional practice in clinical, policy, administrative, and basic science fields.

HLTH 201 is a prerequisite for this class.
HLTH 210
INTRODUCTION TO PUBLIC HEALTH
Undergraduate
This course is designed to lay out the concepts, principles, and case outcomes of public health practice. It considers community health data source, classical intervention approaches, and the planning and evaluation of community health interventions.

HLTH 201 and 202 are a prerequisite for this class.

HLTH 229
ETHICS FOR HEALTH SCIENCES
Undergraduate
This course provides an introduction to the ethical and moral theories that frame our response to fundamental issues in the health sciences. Moral philosophers, such as Aristotle, Thomas Aquinas and Immanuel Kant, all pose questions about the nature of right and wrong, and what is meant by a good life. The first part of the course examines the work of these philosophers and then uses them in order to think through specific topics, including: confidentiality, informed consent and end of life decision-making; health care disparities and health care reform; and global health ethics. Students who have taken REL 229 Medicine, Ethics, and Society, or PHL 229 Biomedical Ethics should not enroll in this course.

HLTH 230
FUNDAMENTALS OF HEALTH EDUCATION
Undergraduate
This course provides health education majors with a foundational understanding of the professional health education field. Students will examine health education's role in planning, implementing, and evaluating the behavioral health challenges that affect the wellbeing of individuals and communities. Students will learn and then practice designing and delivering a wide range of health education activities, grounded in behavioral change theories, in a variety of settings and to diverse audiences. Finally, students will critically examine these issues through a variety of academic experiences, including academic service in a community setting, in order to identify and apply health education practices and principles that contribute to health promotion and disease prevention.

HLTH 236
GAY MEN'S HEALTH MATTERS
Undergraduate
The purpose of this course is to introduce students to health issues relevant to gay men. We will explore the effects of minority status, heterosexism, and homophobia on gay men's health, including but not limited to STD/HIV/AIDS, substance use and mental health. Students will review epidemiological data, theoretical frameworks, and community-based health promotion approaches in order to gain a broad perspective on risk and resilience factors, health indicators, and strategies for self-care applicable to gay men's health.

HLTH 250
HEALTH CARE POLICY IN THE UNITED STATES
Undergraduate
This course provides students with an overview of health policy creation and describes the history of healthcare policy in the United States. Students will explore the delivery and finance of health care as well as analyze health care law and regulation. Students will gain an understanding of how political and economic policy is used to mitigate disease and illness in varied environments and how policy affects the delivery of health care and public health services.

HLTH 201 or department permission is a prerequisite for this class.

HLTH 301
INTEGRATED HUMAN ANATOMY AND PHYSIOLOGY-A
Undergraduate
This course explores the fundamental principles of human anatomy and physiology that specifically relate to the sensation and perception of environmental stimuli, as well as the response to such challenges. In this context, broad consideration will be given to the body's various modes of cellular and tissue communication, with special emphasis on the interplay between the integumentary, skeletomuscular, nervous, and endocrine systems. In addition, the integrated approach will provide a strong foundation for the serial investigation of relevant topics relating to human health and disease, and clinical intervention.

BIO 193 and (CHE 134 or CHE 138) are a prerequisite for this class.
HLTH 302
INTEGRATED HUMAN ANATOMY AND PHYSIOLOGY-B
Undergraduate
This course explores the fundamental principles of human anatomy and physiology that specifically relate to the dynamic integration of critical organ systems. With the cardiovascular system as a starting point, students will investigate the complex orchestration of homeostatic mechanisms regulated by the respiratory, digestive, urinary, and reproductive systems. As with HLTH 301, the integrated approach will provide a strong foundation for the serial investigation of relevant topics relating to human health and disease, and clinical intervention.

BIO 193 and (CHE 134 or CHE 138) are a prerequisite for this class.

HLTH 310
FUNDAMENTALS OF EPIDEMIOLOGY
Undergraduate
Epidemiology is generally considered to be the basic science of disease prevention. It encompasses the study of the distribution and determinants of health-related conditions in specified populations, and the application of this study to control health problems. This course will introduce students to methods employed by epidemiologists to collect data about the health of populations, to use epidemiologic data to generate and test hypotheses about the relationships between exposure and disease or other health conditions, and to use epidemiologic data that informs interventions and public policy that will address health problems and prevent their recurrence.

LSP 121 or a statistics course (PSY 240, SOC 279, MAT 242, or BIO 206) is a prerequisite for this class.

HLTH 315
MATERNAL AND CHILD HEALTH
Undergraduate
This course provides an overview of maternal and child health issues and trends that impact the health needs of women, children, and families. The course will involve a historical and current examination of the principles, programs, policies, and practices related to maternal and child health populations.

HLTH 210 is a prerequisite for this class.

HLTH 320
MOLECULAR VIROLOGY
Undergraduate
This lecture/seminar course is designed for students interested in the molecular details of virus replication and the interactions between viruses and host cells. Virus families that cause human disease are highlighted, however this course does not focus on the clinical aspects of virus infection and treatment. Students will review primary research articles and participate in group analyses of these works. Successful completion of BIO 250 Cell Biology is recommended prior to enrollment.

BIO 210 or BIO 250 is a prerequisite for this class.

HLTH 329
HEALTH HUMANITIES
Undergraduate
The humanities and arts provide a unique insight into the human condition, suffering, personhood, and our relationship to medical and health technology. Through these practices, one can develop skills of observation, analysis, empathy and self-reflection, all of which are necessary for the provision of humane health care. In this course, students will explore health and medicine through the lenses of the humanities (literature, philosophy, ethics, history) and the arts (literature, theater, film, and visual arts).

Status as a junior and WRD 103 and 104 (or HON 100 and HON 101) are prerequisites for this class.

HLTH 330
HEALTH LEADERSHIP
Undergraduate
Health Leadership will prepare students for health leadership in diverse health care settings such as hospitals, public health departments, and community-based agencies. Students will identify and examine their own leadership skills, learn ways to build upon those skills for application in current and future career leadership roles, and gain new knowledge about health leadership trends and practice. The course will integrate lectures, multi-media, case studies, discussions, and reinforcing activities to develop and strengthen health leadership skills.

HLTH 210 is a prerequisite for this class.
HLTH 335
COMMUNITY HEALTH ASSESSMENT
Undergraduate
This course covers a range of community assessment processes focusing on health indicators within communities in Chicago. Students will be introduced to multiple data sources and methods. Implications of assessments will be framed within community health assessment requirements under the Affordable Care Act (ACA), as well as broader community needs and resources.

HLTH 210 is a prerequisite for this class.

HLTH 336
PROGRAM EVALUATION
Undergraduate
This course will introduce students to methods in program evaluation, including process evaluation, monitoring of outputs and outcomes, impact assessment, and cost analysis. Students will gain practical experience in the design of conceptual frameworks, development of indicators, development of an evaluation plan to measure impact. Students will learn how this information can be used to improve program management and effectiveness. The course will cover experimental, quasi-experimental, and non-experimental study designs, and consider the strengths and limitations of each.

HLTH 335 is a prerequisite for this class.

HLTH 339
BIOETHICS IN SOCIETY CAPSTONE SEMINAR
Undergraduate
This seminar is an interdisciplinary study of the function of bioethics in society. As a discipline and as a profession, bioethics stands as a distinctive barometer of our evolving and shifting conceptions not only of health and well-being, but of the world, society, and even ourselves. The seminar explores the history of bioethics, bioethics as a clinical practice, and the various questions that arise at this crossroad from health science, medical humanities, religious studies, sociological, and philosophical perspectives.

PHL 229 or HLTH 229 or REL 229 is a prerequisite for this class.

HLTH 341
DEATH AND DYING
Undergraduate
As the only species that is aware of its own mortality, this course examines the human experience of death and dying as a biological, medical, legal, social, and cultural process throughout time. Students will learn about the biological breakdown of the body, hospice & palliative care, advance care planning, funerary and mourning practices, disposal of the human body, and beliefs of what happens after death.

Junior Standing or above is a prerequisite for this class.

HLTH 350
HEALTH SCIENCES CAPSTONE
Undergraduate
The Senior Capstone will bring students from both concentrations in the Health Sciences major together in an opportunity to share biomedical and psycho-social perspectives in an examination of current health issues.

HLTH 210 and status as a senior Health Sciences major are prerequisites for this class.

HLTH 379
PEER ADVISING IN HEALTH SCIENCES
Undergraduate
Peer Advising in Health Sciences is a course designed to connect our successful senior students with the broader population of Health Sciences majors, while providing Peer Advisors with an introduction to advising skills including active listening, providing open-minded guidance and support, interpreting university policies and guidelines, managing confidential information, and effective time management. (2 quarter hours)

HLTH 380
TOPICS IN HEALTH SCIENCES
Undergraduate
Upper level course focused on a specific topic in Health Sciences that involves reading of primary literature and discussion.
HLTH 399
INDEPENDENT STUDY
Undergraduate
INDEPENDENT STUDY (1 quarter hour)

A Health Science major is a prerequisite for this class.

HON 100
RHETORIC AND CRITICAL INQUIRY
Undergraduate

This course covers the fundamentals of research and leads students through a sequence of writing assignments which require them to take positions and persuade audiences about issues of public concern. Students will create effective academic discourse, develop critical thinking skills, explore issues of form and style, and examine arguments. HON 100 is required for all Honors students. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 101
WORLD LITERATURE
Undergraduate

Honors 101 focuses on the way writers use language to construct their worlds. Reading, writing, and informed discussion are at the heart of this course, which uses texts from a range of cultures and historical periods to explore how literary works represent issues of human importance.

Membership in the University Honors Program is a prerequisite for this class.

HON 102
HISTORY IN GLOBAL CONTEXTS
Undergraduate

With the goal of enhancing historical literacy and critical thinking, this course invites students to explore how the interdisciplinary tools of historical inquiry aid them in their encounter with the multicultural past through study of a particular society or societies. Students discover how historians extract meaning from primary and secondary sources while exploring the problems and issues involved in analyzing and using a variety of sources. Topics of this course vary and are set by the faculty. Each section of HON 102 will be subtitled to indicate its topic; please see the schedule for current offerings.

Membership in the University Honors Program is a prerequisite for this class.

HON 104
RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
Undergraduate

This course focuses on the collective construction of cultural reality and examines people's confrontation with the sacred as a formative instrument in this process. The overriding concern of Honors 104 is with the meaning and function of culture as a system or world that we inhabit. This world with its distinctive concepts of ultimacy, time, space, cosmos, and life passages is created and enacted through myths, narratives, and ritual performances. Students will develop analytical skills necessary to apply theoretical explanations and interpretations to the process of constructing cultural reality. All sections of the course will involve a field experience in which students enter the world of a community which is not part of their own experience.

Membership in the University Honors Program is a prerequisite for this class.

HON 105
PHILOSOPHICAL INQUIRY
Undergraduate

Providing an introduction to philosophy as a mode of inquiry, this course explores, from a variety of perspectives, the questions central to the human condition, placing philosophical positions within the context of human values. Students will address the themes of knowledge, action, and human identity, considering how one thinks critically about such questions and what it means to inquire about the human condition in a rational manner. Readings will be drawn from both primary philosophical texts and relevant material from other disciplines.

Membership in the University Honors Program is a prerequisite for this class.
HON 110
HONORS DISCOVER CHICAGO
Undergraduate
Honors Discover Chicago courses acquaint first-year honors students with the metropolitan community, its neighborhoods, cultures, people, institutions, organizations and issues. Students will also learn about university life and resources and will become acquainted with the honors scholarly community. The course begins with Immersion Week, one week prior to the official start of the autumn quarter, then continues through the first eight weeks of the quarter. Learning in HON 110 is accomplished through a variety of means including first-hand observation, reflection, discussion, writing, site visits, and encounters with Chicagoans both in the classroom and on excursions. Students will select a particular Honors Discover course from available offerings. Students with credit for HON 110 cannot receive credit for HON 111.

Membership in the University Honors Program is a prerequisite for this class.

HON 111
HONORS EXPLORE CHICAGO
Undergraduate
Honors Explore Chicago courses acquaint first-year honors students with the metropolitan community, its neighborhoods, cultures, people, institutions, organizations and issues. Students will also learn about university life and resources and will become acquainted with the honors scholarly community. Learning in HON 111 is accomplished through a variety of means including first-hand observation, reflection, discussion, writing, site visits, and encounters with Chicagoans both in the classroom and on excursions. Students will select a particular Honors Explore course from the available offerings. Students with credit for HON 111 cannot receive credit for HON 110.

Membership in the University Honors Program is a prerequisite for this class.

HON 180
DATA ANALYSIS AND STATISTICS
Undergraduate
Using real-world data and open-ended investigations from a variety of disciplines, students apply quantitative and statistical reasoning skills to focus on outcomes of analysis. Students will explore the nature and description of data, probability theory, sampling, variability, estimation, analysis of correlation, hypothesis testing, and experiment design to become critical users of quantitative information. Open only to students in the University Honors Program.

Membership in the University Honors Program and (LSP 120 or MAT 130 or placement by test) are prerequisites for this class.

HON 201
STATES, MARKETS, AND SOCIETIES
Undergraduate
This course focuses on the organization of economic, political and social relationships within the global system, including analysis of how these relationships affect the distribution of power, resources, well-being and cultural capital in different societies. It covers such topics as phases in the growth of global trade and investment; the role of economic incentives; the historical and conceptual relationship between markets; social stratification, culture, and forms of popular participation; and the development challenges posed by international inequality and social marginality.

Membership in the University Honors Program and Sophomore standing or above is a prerequisite for this class.

HON 205
INTERDISCIPLINARY ARTS
Undergraduate
This course offers interdisciplinary study of two or more art forms in a particular historical period, looking at relations among the arts and between art and its cultural contexts. Students will develop a critical vocabulary for the analysis of works in the visual arts, theater, music, literature, or other art forms. Work in the course will be interdisciplinary and will include readings, classroom exercises, visits to relevant performances or exhibits, and papers. Variable topics; please see the schedule for current offerings.

Membership in the University Honors Program and Sophomore standing or above is a prerequisite for this class.
HON 207
TOPICS IN COGNITIVE STUDIES
Undergraduate
Working under the assumption that processes of human thinking can be understood in formal and symbolic ways, this course is designed to introduce students to the interdisciplinary field of cognitive science by constructing and evaluating theories of how we perceive, speak, reason, and learn. Only open to students in the University Honors Program.

(HON 180 or MAT 135 or MAT 140 or MAT 150 or MAT 242 or PSY 240 or IT 223 or LSP 120 or LSP 121 or SOC 279 or BIO 206), membership in the University Honors Program and Sophomore standing or above is a prerequisite for this class.

HON 225
HONORS LAB SCIENCE TOPICS
Undergraduate
Students in Honors 225 will investigate a particular scientific topic or issue using readings, discussions, papers, and laboratory work. In the process of investigation they will learn about the nature and processes of science and will be able to describe and explain their work in writing; some projects may be done in teams. All sections of Honors 225 include a laboratory component. Please see the Schedule of Classes for current offerings.

HON 180 (or MAT 135 or MAT 140 or MAT 150 or MAT 242 or PSY 240 or IT 223 or LSP 120) and membership in the University Honors Program are prerequisites for this class.

HON 300
HONORS RESEARCH SEMINAR
Undergraduate
This course, offered occasionally, invites students to enhance their skills in conducting research on issues of interest. May be taken in preparation for HON 395 Honors Senior Thesis. Please see the schedule for current offerings. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 301
HONORS JUNIOR SEMINAR IN MULTICULTURALISM
Undergraduate
This seminar asks students to conduct research on complex issues related to multiculturalism. Topics may cover various dimensions of identity including issues of race and ethnicity, class, gender, language, religion, sexual orientation, disability and nationality. Students are encouraged to develop a critical perspective about the meaning of multiculturalism and to understand the historical and/or contemporary manifestations of inequality. All students prepare research projects and participate in seminar discussions. Variable topics; please see the schedule for current offerings. This course meets the university's requirement in multiculturalism and the Honors Program Junior Seminar requirement.

Membership in the University Honors Program and Junior standing or above is a prerequisite for this class.

HON 350
HONORS SENIOR SEMINAR
Undergraduate
This course, which meets the capstone requirement for the University Honors Program, is designed to engage students in a discussion of meaning and values, and to foster skills in interdisciplinary research and writing. In a seminar setting, students explore a designated topic, develop related projects, and pursue work in an area defined by the Honors faculty member who designed the particular course. Seminars will be offered in broad interdisciplinary areas, allowing seniors to choose from diverse topics. Please see the schedule for current offerings. Only open to students in the University Honors Program.

HON 301 and status as a senior in the University Honors program is a prerequisite for this class.
HON 351
HONORS SENIOR SEMINAR IN SERVICE LEARNING
Undergraduate
This course, which meets the capstone requirement for the University Honors Program, is designed to foster skills in interdisciplinary research and writing. The course also brings students into the community to explore theories of service and the relationship between altruism and activism. Outside of class, students will devote a minimum of three hours each week to service work at one of the sites offered through the course, prompting them to consider the role that service will play in their lives after DePaul. This course also meets the university's Experiential Learning requirement for students who have not yet fulfilled this requirement. Only open to students in the University Honors Program.

HON 395
HONORS SENIOR THESIS
Undergraduate
Honors students are encouraged to undertake a senior thesis, an independent interdisciplinary research project proposed by the student and carried out under the supervision of a faculty advisor. Students electing to complete a senior thesis must submit an application signed by a faculty director and a two-page project description to the Honors Program Director by the eighth week of the quarter prior to that in which the project will be done. Completion of the thesis project meets the capstone requirement for the Honors Program. Open only to students in the University Honors Program.

HON 397
HONORS STUDY TOUR I
Undergraduate
Study tours with faculty leaders. Research, reflection, and writing on site-specific topics and issues. Variable topics. See the Schedule for current offerings. Open only to students in the University Honors Program.

HON 398
HONORS STUDY TOUR II
Undergraduate
A continuation of Honors 397. See the Schedule for current offerings.

HON 399
HONORS INDEPENDENT STUDY
Undergraduate
Independent Study
Membership in the University Honors Program is a prerequisite for this class.

HSP 1
HOSPITALITY BUSINESS ETIQUETTE
Undergraduate
Learning appropriate behavior as an industry professional in a social or dining environment is a skill important to successful business interaction. Instructional sessions are used to convey expected behaviors in professional settings, culminating in a formal business event where students can practice learned skills. (0 quarter hours)

HSP 100
INTRODUCTION TO HOSPITALITY
Undergraduate
This course takes a survey perspective in introducing students to the global hospitality industry, its associations, organizations and businesses. This course provides an overview of the historical evolution and development of modern, lodging, food & beverage, private club, meetings & events, and other hospitality related industries. Current and future career opportunities are explored.

DePaul University Autumn 2017-2018
HSP 101
INTRODUCTION TO GLOBAL TOURISM
Undergraduate
This course takes a cross-disciplinary approach to examine the many facets of tourism. Specific analysis of world travel destinations, customs and traditions, visitor attractions, political, religious and other cultural differences as these relate to the tourism industry will be introduced. This course evaluates tourism globally while identifying economic, socio-cultural, and environmental impacts on host destinations from the perspectives of the local communities as well as the traveler. The basic dimensions of sustainability, civic engagement, ethics, service and the historical perspective that are integral to the tourism industry will be covered from a social science perspective, in order to provide students with the kind of practical knowledge that can be applied in many fields of study. This course is intended for non-Business students and cannot be counted toward a major or minor in Hospitality Leadership.

HSP 201
HOSPITALITY SERVICE & EXPERIENCE MANAGEMENT
Undergraduate
The concepts of service, service delivery and service recovery in different cultural and geographic contexts are explored, including the full range from limited service through deluxe, the intentional decisions of management about what and how much service to offer, the quality of service, delivering service for rather than to someone, and how to transform a service event into a repeatable, memorable experience. (2 quarter hours)

HSP 202
HOSPITALITY BUSINESS OPERATIONS
Undergraduate
This course details key hospitality industry organizations and their business structures. Exploring the operations specific to hotels, restaurants, private clubs and the meeting & events segments will be the focus of this course. Current issues, trends and technologies within hospitality business operations specific to these segments will be evaluated and detailed. (2 quarter hours)

HSP 203
HOSPITALITY LEADERSHIP & SELF DEVELOPMENT
Undergraduate
The primary goal of the course is to move students towards the development and understanding of the foundations of leadership, differentiating leadership from management, and emphasizing the core traits and other personal qualities required of successful hospitality leaders. The course further focuses on the importance of a leader's character, values and professionalism as the basis for ethical decision-making in an organizational context. (2 quarter hours)

HSP 204
HOSPITALITY LEADERSHIP & TEAMS
Undergraduate
The successful delivery of hospitality products and services is often a result of interdisciplinary teams working together. In this course, students will explore the composition and functionality of hospitality teams, how guest and operational problems are identified and solved through group interaction and dynamics, and how team performance is assessed through guest satisfaction. (2 quarter hours)

HSP 205
HOSPITALITY REVENUE, SALES & MARKETING
Undergraduate
This course introduces the basics of revenue management, sales, and marketing. Discussions and course work include these concepts and the role each internal measurement metric plays in the overall success of the hospitality organization. Additional topics include external metric measurements, benchmarking, and marketing strategies.

HSP 206
HOSPITALITY RATIO & FINANCIAL ANALYSIS
Undergraduate
The unique qualities of financial management relative to all segments of the hospitality industry are explored in this course. The four primary areas of focus include: (a) foundations of profit and loss statements, (b) analysis of labor and inventory management reports, (c) planning and budgeting processes, and (d) evaluating balance sheets, including franchising and other industry fees.
HSP 207
HOSPITALITY LAW, ETHICS & RISK
Undergraduate
Legal and ethical concepts in the hospitality industry are explored, including the structure of the American legal system, contract law, discrimination, product and property liability, and torts. Laws specific to the hospitality industry are introduced. Ethical perspectives are identified and applied to hospitality operations. Administrative law and government regulation of hospitality is also discussed.

HSP 250
CAREER MANAGEMENT FOR HOSPITALITY PROFESSIONALS
Undergraduate
This course is designed to explore and manage the professional expectations, career realities, and opportunities of your hospitality major. Students will participate in hands-on resume building activities, practice interviews, and apply research and evaluation skills to execute job search and career management strategies. Students will learn about Career Center resources and internship opportunities as ways to prepare for successful job searches and to maximize their potential for long-term professional growth. (2 quarter hours)

HSP 301
SERVICE LEADERSHIP SPEAKER SERIES I
Undergraduate
Industry professionals will address service leadership and current issues in hospitality and tourism. Speakers will address the role of leadership in the creation and delivery of service. This course should be completed during a student's junior year. (1 quarter hour)

HSP 302
SERVICE LEADERSHIP SPEAKER SERIES II
Undergraduate
Industry professionals will address service leadership and current issues in hospitality and tourism. Speakers will address the role of leadership in the creation and delivery of service. This course should be completed during a student's senior year. (1 quarter hour)

HSP 303
HOSPITALITY INTERNSHIP I
Undergraduate
This course is a supervised and structured industry learning experience. It is designed for students to concurrently obtain practical experience and course credit through a formal internship in a functional department within hospitality operations. Site is to be chosen in collaboration with faculty. Students must win acceptance through an interview with a hospitality professional who will supervise the practicum. Potential sites could include one of Chicago's many hotels, private clubs, convention centers, tourism offices, airports, airlines, spas or restaurants. Students are required to work a minimum of 50 hours needed for completion over a 10-week quarter. (2 quarter hours)

HSP 304
HOSPITALITY INTERNSHIP II
Undergraduate
This course is a supervised and structured industry experience. It is designed for students to concurrently obtain practical experience and course credit through a formal internship in a functional department within hospitality operations. This course reflects the importance of providing additional real-world job experience within a unique sector other than that experienced from the student's completion of their first internship. This course is designed to advance and contrast students experiences within both practica. Site is to be chosen in collaboration with faculty. Students must win acceptance through an interview with a hospitality professional who will supervise the practicum. Potential sites could include one of Chicago's many hotels, clubs, convention centers, tourism offices, airports, airlines, spas and restaurants. Students are required to work a minimum of 50 hours needed for completion over a 10-week quarter. (2 quarter hours)

HSP 303 is a corequisite for this class.

HSP 320
PRIVATE CLUB MANAGEMENT
Undergraduate
This course explores the management of, and leadership roles within, private city, country, and athletic clubs. Topics include: the general manager function; organizational structure of clubs; the role of the board of directors; membership requirements; equity and non-equity clubs; tax-exempt clubs and nontax-exempt clubs; duties and leadership responsibilities of department heads in private clubs; governmental regulations; the future of clubs; and the relationship of private clubs to the hospitality industry.

HSP 100 and HSP 202 are prerequisites for this class.
HSP 321
FOOD PRODUCTION MANAGEMENT
Undergraduate
This laboratory-based course is an introduction to the basic principles of food production. Topics include culinary terminology, theory and application of food preparation techniques, food product identification and fabrication. (2 quarter hours)

ServSafe Manager Certification and a declared Club Management Concentration is a prerequisite for this class.

HSP 322
QUANTITY FOODSERVICE MANAGEMENT
Undergraduate
Analysis of factors affecting quantity food production and service in the foodservice industry, emphasizing adherence to food quality and service, ethical evaluation of food products and commercial equipment, planning and coordinating food production activities for large groups, and the impact of operations upon environmental sustainability. (2 quarter hours)

HSP 321, ServSafe Manager milestone and a declared Club Management concentration is a prerequisite for this class.

HSP 323
ADVANCED PRIVATE CLUB MANAGEMENT
Undergraduate
An in-depth, international, comprehensive study and analysis of the senior club manager's role in operating a successful private club. Focused on advanced methods and issues including: career planning, club bylaws and rules, legal and ethical concerns, facility design and management, special enterprises within the club, break even and financial analysis, club feasibility and marketing, research interests, membership services, CCM certification and promotion/public relations. Case studies and a comparison of international approaches to managing clubs will be used to augment lectures and discussions.

HSP 320 is a prerequisite for this class.

HSP 330
FOODSERVICE MANAGEMENT
Undergraduate
This course is designed to introduce the major components of food and beverage service management and to differentiate those components from management in other hospitality segments. The course focuses on management procedures, service styles and safety in food service operations. The course examines the basics of several types of restaurants, including independents and chains. Catering operations will also be addressed.

HSP 100 and HSP 202 are prerequisites for this class.

HSP 331
FOODSERVICE PURCHASING
Undergraduate
Details the standards of quality as applied to food, supplies and related products used in the foods industry. Provides methods and criteria for recognizing quality, evaluating, specifying, purchasing and inspecting these products. The use of technology in the purchasing component of the foodservice industry is detailed.

HSP 332
BEVERAGE MANAGEMENT
Undergraduate
This course is an overview of the commercial beverage industry. Emphasis is on management's role and responsibility in operating a facility serving alcoholic beverages. Principles and practices regarding the production, selection, purchasing, storage and service of beverage alcohol in the hospitality industry are detailed.

HSP 333
INTERNATIONAL WINE EDUCATION & MANAGEMENT
Undergraduate
The purpose of this course is to introduce students to wine management best practices in the hospitality industry. The course introduces students to the regional grape varietals and wine making styles around the globe along with the science that underlies practical wine production issues. The course focuses on multiple aspects of the wine service process, including understanding wine styles and products, judging quality, service techniques, creating food and wine pairings, developing sales and marketing promotions, and determining cost and pricing decision-making. Students must be legal drinking age by start of course.
HSP 340
LODGING PROPERTY MANAGEMENT
Undergraduate
Practices and systems utilized in the operational management of the hotel, including front office, reservations, uniform service, and
housekeeping areas. Coordination with F&B, catering, sales & marketing, and other departments are explored. Computer systems used as
property management systems are introduced and discussed.

HSP 340 is a prerequisite for this class.

HSP 341
RESORT & SPA MANAGEMENT
Undergraduate
The range of resort and spa operations are explored and analyzed. Key topics unique to these geographic and programmatic settings are
discussed, including issues in guest relations, the design of programs and amenities, the role of golf courses, tennis facilities, swimming pools
and water sports, spas, the impact of operations upon environmental sustainability, and the importance of conference/meeting events in the
resort industry.

HSP 342
TIME SHARE MANAGEMENT
Undergraduate
The course focus is upon the concepts of timeshare management. Topics include historical background, development process, market
analysis, exchange systems, ownership and calendar issues, ethical obligations, budgeting, and customer relations.

HSP 343
CASINO MANAGEMENT
Undergraduate
Expore the history and development of gaming, casino operations including slots, table games, sports and Internet betting, credit and casino
accounting, casino hotels and casino foodservice, and the marketing of the core gaming products. A central focus will be on current trends as
well as the primary management and financial elements unique to operating a casino.

HSP 350
EVENT PLANNING
Undergraduate
This course focuses on the fundamentals and core issues of event and meeting management. Development of time-lines, checklists and
request for proposals are covered. The course emphasizes planning, budgeting, marketing, public relations, food and beverage and contract
and lease negotiations.

HSP 350 is a prerequisite for this class.

HSP 351
EVENT TOURISM
Undergraduate
Provides a comprehensive coverage of worldwide tourism destinations, examining the basic principles of underlying the development of
tourist demand, supply and transportation, together with a broad survey of world tourism by generating regions and by destination regions.
The convention and visitors bureau (CVB) or local governmental tourism agency is discussed as an integral part of destination marketing and
addresses its place and importance in the local hospitality industry and larger, general business community. Issues explored include
organizational structure, financing, ethical decision-making, numerous audiences, impact upon environmental sustainability, and its sales and
service missions.

HSP 352
EVENT PRODUCTION
Undergraduate
This course examines the production and execution of special events. It is designed to help hospitality leadership students learn the theories of
event management with exposure to actual events and event planners. The student will learn how to formulate event strategies for
destinations. The course will focus on planning, developing, managing, and implementing all types of events, such as entertainment events,
corporate events, cultural events, sporting events and festivals.

HSP 350 is a prerequisite for this class.
HSP 353
EVENT SALES, SERVICE & PROMOTION
Undergraduate
The course focuses on the modes and methods of sales and promotion used in booking conventions and trade shows, including identifying sponsors marketing to attendees, exhibitors and other participants. The course also looks at the division of administrative responsibility in operations. Students will explore organizing, arranging and operating conventions, trade shows and expositions.

HSP 355
ADVANCED EVENT MANAGEMENT
Undergraduate
This course introduces advanced management and decision making specific to the events industry. Analysis of current issues and future trends in meeting, exhibition and event management and their impact on other sectors within the hospitality industry will be explored.

HSP 350 is a prerequisite for this class.

HSP 362
REVENUE, PRICING & DISTRIBUTION
Undergraduate
The principles and practices involved in hotel revenue maximization, pricing strategies, and distribution channels are the focus of this course. Topics will include definitions, roles and strategies as they relate to revenue, pricing and distribution. Additional discussion of inventory control and performance analysis will also be part of the class.

HSP 206 is a prerequisite for this class.

HSP 372
BRANDING & CUSTOMER LOYALTY
Undergraduate
Learn to identify branding strategies and the role branding plays in customer loyalty. As a focus, customer relationship management is explored. Topics include current trends and changes in the perceptions of branding and loyalty, as well as understanding customer demands, expectations and needs.

HSP 386
HOSPITALITY ACCOUNTING I: REVENUES & EXPENSES
Undergraduate
The application of accounting principles as utilized in the hospitality industry is explored. The purpose of this class is to advance the hospitality student's knowledge of accounting concepts related to the income statement using the hospitality industry version of the Uniform System of Accounts. The class increases the student's understanding of the importance of revenue recognition, expense classification, and matching of revenue and expenses for operational analysis purposes. Students will study payroll accounting, withholding and tax reporting requirements and regulations specific to the hospitality industry along with labor variances and their relevance to understanding operations and performance versus budgets.

A grade of C- or better in ACC 102 is a prerequisite for this class.

HSP 398
SPECIAL TOPICS IN HOSPITALITY
Undergraduate
Special Topics. Content and format of this course are variable. An in-depth study of current issues in hospitality. Subject matter and prerequisites will be indicated in class schedule.

HSP 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in Hospitality Leadership. (variable credit)
HSP 502
MANAGING THE GUEST/EMPLOYEE EXPERIENCE
Graduate
This course is designed to examine highly developed principles of the guest experience, the guest/employee interface, and the role employee development and service delivery plays within the hospitality industry. Leadership of various hospitality service operations will be studied in the context of realms of experience and guest quality assurance. Experience realms will be grounded in the constructs of unique hospitality experiences that engage guests in an inherently personal way. Topics will include: customer care and loyalty programs, creativity and innovation, employee skill development, service operation strategies, product design, capturing guest identity, and customer co-creation.

HSP 503
ADVANCED HOSPITALITY LEADERSHIP AND PERFORMANCE
Graduate
The goal of this course is to examine advanced hospitality leadership practices within the various industry segments. Leadership principles and hospitality management approaches will be examined through the lens of financial and human capital performance. Topics include: critical decision-making, hospitality team dynamics and service performance, financial feasibility in operational delivery, brand and marketplace competency, ethics and values.

HSP 505
SERVICE TECHNOLOGY & INNOVATION IN THE HOSPITALITY ENVIRONMENT
Graduate
This course examines the interaction and interdependency of hospitality technology and service systems in the context of service leadership, innovation and multi-media. Students will apply contemporary theory surrounding technology utilization in hospitality service systems including: human capital productivity and infrastructure hierarchy, network based service systems, efficiency and effectiveness information processing, enhanced client interfacing and user generated content issues and opportunities.

HSP 506
HOSPITALITY STRATEGY & OPERATIONAL PERFORMANCE
Graduate
The goal of this course is to evaluate, construct and apply innovative hospitality strategies and then implement models of supporting service systems within hospitality organizations. The course will enable students to analyze service systems through the lens of competitive strategy and service orientated product positioning along with operational system architecture. Topics include: hospitality strategy, competitive analysis, systems thinking, service product life-cycle evolution and development, hospitality organizational structure and service systems, integrated hospitality operational diagnostics, and operational performance metrics.

HSP 550
NON-PROFIT EVENTS MANAGEMENT
Graduate
Non-Profit event management is evolving into a complex and dynamic discipline within the hospitality industry. This course examines the nature and structural components of event management within the non-profit sector. The course design will incorporate event conceptualization and evaluation techniques unique to the non-profit hospitality product delivery. Topics will include: market segmentation, strategic analysis for event planning, financial literacy, managerial and operational logistics, governmental and non-governmental advocacy, sponsorship development and fundraising, contract execution and administration.

MGT 500 is a prerequisite for this class.

HSP 551
NON-PROFIT FOODSERVICE MANAGEMENT
Graduate
Non-profit hospitality foodservice encompasses a broad array of institutions, associations and organizations on a local, regional and national level. This advanced course in non-profit foodservice management examines the leadership requirements associated with National philanthropic and local grass-roots community organizations including soup kitchens, meals on wheels programs, emergency shelters, community alliances, and food pantries. Topics include: menu development and nutritional elements of non-profit foodservice operations, licensing and inspection requirements, food handling and OSHA work safety guidelines, food sourcing and distribution, national and local initiatives programming, and developing marketing networks/partners.

MGT 500 and (MGT 502 or MGT 504) are prerequisites for this class.
HSP 561
REVENUE MANAGEMENT
Graduate
This course explores revenue management within the hospitality industry from a comprehensive perspective as it pertains to the importance of generating business revenues and contributions to the overall service-firm financial performance. The evolution of revenue management principles and practices within the hospitality sector has advanced in both sophistication and complexity, increasing the need for enhanced development of human capital, investments in data analytics, and systems integrated approaches to successful revenue generation. Topics include: Data mining and predictive analytics, inventory and price management, consumer behavior, social media and e-commerce, and demand based forecasting. Simulation software is used in this course to apply the principles of revenue management to practical situations.

HSP 562
HOSPITALITY DISTRIBUTION CHANNELS
Graduate
This course examines advanced principles and applied hospitality revenue management strategies associated with service distribution channels. Topics include an introduction to the global distribution networks, branding perspectives and channel management, corporate reservations systems, travel intermediary relationships, advanced pricing theory-price parity, product marketing and content consistency, search engine optimization, competitive positioning and analysis, systems processing, human capital resources and organizational processes.

HSP 563
HOSPITALITY DATA ANALYSIS & FINANCIAL METRICS
Graduate
This course provides a comprehensive perspective of various hospitality financial performance constructs and key industry operating performance benchmarks. Students will be indoctrinated to hospitality industry financial metrics and the critical nature of linking financial analysis with decision-making in order to achieve organizational profitability objectives. Topics include: interpretation of financial statements, operating control systems, budgeting-forecasting synthesis, operational leadership techniques and operations flow-through, flex staffing and productivity, and capital-facility maintenance.

HSP 793 is a prerequisite for this class.

HSP 561
PRACTICUM IN APPLIED HOSPITALITY LEADERSHIP
Graduate
Experiential learning plays an important role in applying academic knowledge to real-world business challenges and opportunities. This practicum in applied hospitality leadership engages students in a practical, experiential, multidisciplinary approach to learning, which fosters development of personal and professional skills. Under the direction of the course faculty, students assume the role of researchers/advisors to key Chicago hospitality organizations that seek guidance on business strategy or challenging operational issues. Projects might include: leadership assessments service-process improvements, service innovation, event planning, club management and others. Students work closely with sponsoring organizations and supervising faculty to identify the scope of the projects, collect information and conduct analysis, and then report findings and/or recommendations. Major outcomes include an oral presentation to faculty and a written report for management.

HSP 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. An in-depth study of current issues in hospitality. Subject matter will be indicated in class schedule. Offered variably.

HSP 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in hospitality.
**HSP 208**  
MANAGING PEOPLE & THE CHICAGO UNION ENVIRONMENT  
Undergraduate  
The unique qualities of human resources management relative to all segments of the hospitality industry are explored in this class. The five major areas of focus include: (a) recruitment and selection (b) training and career development (c) turnover and retention (d) recognition and performance management and (e) labor relations within the hospitality industry. Specific attention is paid to approaches used by unions to organize as well as methods used by management to combat labor organization.

HSP 100 is a prerequisite for this class.

---

**HST 111**  
THE WORLD TO C.1500  
Undergraduate  
This course will examine the phenomenon of civilization as experienced by West Asian, South Asian, East Asian, African, European, and Pre-Columbian American societies to 1500 A.D. Formerly HST 218.

---

**HST 112**  
THE WORLD, C.1500-1914  
Undergraduate  
For most of human history, people lived in groups whose cultures, faiths, economies and politics scarcely affected, or were even known to, other peoples. Then, beginning in the 13th Century C.E., this began to change. Slowly at first, and then ever-faster, all of the world's peoples became part of a single world civilization, whether they liked it or not. By about 1914, there was only one world civilization, with local variants. How and why did this happen? Who benefitted, and who did not, from this momentous change? This course seeks to answer these questions as we look at the world's civilizations and at the forces and events that drove them together.

---

**HST 113**  
THE WORLD, 1900-PRESENT  
Undergraduate  
More change -- political, economic, social, technological -- occurred in the 20th Century than in all the previous years of human history combined. The world at end of the century, in 2001, was nothing like the world that our great-great-grandparents were born into just 100 years before. And, unlike previous eras, what happened on one place impacted everyone everywhere on earth. Why and how did such vast changes occur, and why did they happen so quickly? These are some of the themes that History 113 will address.

---

**HST 121**  
LATIN AMERICA TO C. 1765: PRE-COLUMBIAN SOCIETIES AND THE COLONIAL PERIOD  
Undergraduate  
A survey of Latin American history that offers a continental approach to the colonial period. Special attention is given to Native American societies before 1492, to the Spanish conquest of Mexico and Peru, to the trade in African slaves (Spanish and Portuguese colonies), and to issues of race, class, and gender during the colonial period.

---

**HST 122**  
LATIN AMERICA, 1765-1914  
Undergraduate  
One of the main goals of this course is for students to determine whether the long 19th century was an era of revolution and social change or a continuation of colonial institutions and policies. To address this broad question, the course focuses on the Bourbon Reforms, the Wars of Independence, the problems associated with nation building, and the neo-colonial order. Through the analysis of some individual countries (for example Mexico, Argentina, and Brazil) students will study key issues like slavery, the "India question," race relations, class formation, social inequalities, authoritarianism, Church-State relations, liberalism, subaltern resistance, and North-South relations.

---

**HST 123**  
LATIN AMERICA, 1914-2010  
Undergraduate  
This is an introductory course designed to provide students with a basic and general knowledge of Latin American history from the 1910s to the present. The course highlights the challenges and failures the new republics faced. Due to the diverse historical experiences, cultures, and economic and political systems, the course will focus on the main social, political, and economic issues that shaped Latin America during the 20th century (democracy, social revolution, social justice, political violence, and repression).
HST 131
AFRICA TO 1800
Undergraduate
A study of African history from earliest times, concentrating on the political, social and religious aspects of major African states and empires. Formerly HST 227.

HST 132
AFRICA, 1750-1900
Undergraduate
The Age of Conquest. The origins of Afro-European relations and the political, economic and military causes of the European partition and occupation of the continent. Formerly HST 228.

HST 133
AFRICA, 1900-PRESENT
Undergraduate
The workings of the colonial system, the rise and course of independence movements, and the history of individual African states since independence. Formerly HST 229.

HST 141
THE MUSLIM WORLD, C. 600 CE TO 1100
Undergraduate
Foundation of First Global Civilization (600-1100). A study of the emergence of Islam and the growth of the Islamic community from the time of the Prophet Muhammad until the end of the eleventh century. Formerly HST 223.

HST 142
THE MUSLIM WORLD, 1000-1500
Undergraduate
Sultans, Khans and Shaykhs: Medieval Islamic History (1000-1500). A survey of Muslim history from the decline of the Arab caliphate to the rise of the great gunpowder empires, addressing themes of political expansion, military slavery, devastation brought about by the twin plagues of the Mongols and the Black Death, and the growth of Islamic mysticism. Formerly HST 224.

HST 143
THE MUSLIM WORLD, 1400-1920
Undergraduate
Great Empires (1400-1920). Examines the social, cultural and economic histories of the Ottoman-Turkish, Safavid Iranian and Mughal-Indian empires which dominated the Muslim world in the crucial centuries between the end of the Mongol empire and the advent of European dominance. Formerly HST 225.

HST 151
INDIA TO 900 - FROM THE STONE AGE TO THE GOLDEN AGE
Undergraduate
The course follows the development of the history of the region from the earliest phases of human settlement, the first civilization in the Indus valley, and the formation of the Mauryan and Gupta empires. It will analyze the growth of different state structures from tribal/lineage based state to these great empires. It incorporates the rise of regional states and the growing importance of trade to linking South Asia with the West. It will also examine the development of different religious traditions from Vedic Brahmanism to Buddhism to Jainism and the very early days of Islam in the region. The central question of this course will be how to contextualize the relationship between structures like family, law, caste, community, state and the tumultuous changes in the subcontinent over this long period. Formerly HST 256.

HST 152
INDIA FROM 900-1750 - SULTANS, MUGHALS, AND ISLAMIC EMPIRES
Undergraduate
The course begins with the transformation of society from the 'ancient' to the 'medieval', and compares this to developments in Europe in the feudal age. It then incorporates specific political, social, and cultural developments in South Asia that came about with the establishment of powerful Islamic states in a region where Muslims were a minority. These issues will inform the analysis of the Ghaznavid and Ghurid invasions, the Delhi Sultanate, the Vijayanagara empire and the Mughal empire. The course will end with the Marathas and the decline of the Mughal empire, and the rising influence of the British. The central themes concern how the state, economy, culture, and society developed in the period when Islam became firmly embedded in South Asia.
HST 153
INDIA FROM 1700-1950 - RISE AND FALL OF THE BRITISH RAJ
Undergraduate
The course begins with the decline of the Mughal Empire, and then moves to examine the British empire, the nationalist movement and finally to independence and partition in 1947. The central questions of this course continue to be relevant in the post-colonial period: how we understand the distinctive form of modernity that has developed in South Asia. Taking a comparative approach as often as possible, the course examines the fundamental ways that Britain was as transformed by the development of its empire as was colonial India. The course constantly deconstructs easy binaries of self and others/ East and West by examining the differences within Indian and British society. Formerly HST 257.

HST 161
EAST ASIA TO C. 1200
Undergraduate
Outlines the history of the region (China, Korea and Japan) during the period of antiquity. Follows the development and the formation of dynastic rule in China and Korea and the imperial institution in Japan. Assesses the extent of the role of ancient Chinese philosophy, language, and statecraft in establishing a coherent region we now call "East Asia."

HST 162
EAST ASIA c. 1200 TO 1800
Undergraduate
 Begins with the transition of East Asia (China, Korea and Japan) from ancient to medieval society and compares it to developments in Europe during the feudal age. Explores the political, economic and cultural relations between the various states in the region as a whole as well as the specific local developments of state and society during this period. Examines the arrival of the first Europeans, traders and then Jesuit and Catholic missionaries, and the resulting radical social realignment within each society stemming from this encounter with the 'outside.'

HST 163
EAST ASIA, c.1800-PRESENT
Undergraduate
 Begins with the reshaping of East Asian relations from the late 18th century following the realignment of the region after the expulsion of European Catholic missionaries. Follows the radical shift in the relations between these countries as they all sought to respond to the imperial challenges that the West imposed. Explores the central role of Japan and its effort to build an empire in and beyond East Asia from the late 19th century through its defeat in World War II and the lasting historical legacy of that history in the region.

HST 171
EUROPE, 400-1400
Undergraduate
The important components of European society during the Middle Ages, including rulers, knights, and peasants, churchmen and nuns, urban merchants, intellectuals, and artisans. Who were these Medieval people, what differentiated them, how did they interact with each other, and how and why did these interactions change over time? Formerly HST 210.

HST 172
EUROPE, 1348-1789
Undergraduate
The development of new European ideologies in a time of heightened political and social conflict, from the rebirth of ancient culture in Renaissance Italy, to the religious debates of the Protestant Reformation; from the theories of absolute monarchy to the early revolutionary ideologies of the Enlightenment. Formerly HST 211.

HST 173
EUROPE, 1789-PRESENT
Undergraduate
A survey of European history from 1789 to the present. Formerly HST 217.

HST 181
UNITED STATES TO 1800
Undergraduate
A survey of the major social, political, economic and cultural themes in U.S. history from the earliest European settlements to the aftermath of the Revolution. Formerly HST 280.
HST 182  
UNITED STATES, 1800-1900  
Undergraduate  
A survey of the major social, political, economic and cultural themes in U.S. history from the aftermath of the Revolution to the Spanish-American War. Formerly HST 281.

HST 183  
UNITED STATES, 1900-PRESENT  
Undergraduate  
A survey of the major social, political, economic and cultural themes in U.S. history from the Progressive era to the present. Formerly HST 282.

HST 185  
INTRODUCTION TO AMERICAN SOCIAL HISTORY AND CULTURE  
Undergraduate  
This course will provide an overview of American History designed to provide a one-quarter overview of American history and culture. It will provide an overview of the central themes of American History from the colonial period to the present with a focus on social, popular, and cultural history. Cross-listed with AMS 200.

HST 200  
MEXICO AFTER INDEPENDENCE  
Undergraduate  
This course covers the history of Mexico from 1821 to the present. It will examine the difficulties of nation-building during the 19th Century, the Mexican Revolution (1910-1940), and the success and failure of the "Mexican Miracle."

HST 202  
JEWISH EXPERIENCES IN THE AMERICAS (16TH TO 20TH CENTURIES)  
Undergraduate  
This course will address Jewish History in the American continent from 1492 until the mid-twentieth century. It will cover both colonial and national periods and address different regions within the Americas, including the Caribbean. The course will examine general questions that concern the Jewish experience(s), focusing on one or two examples in every class meeting.

HST 204  
FILM AND LATIN AMERICAN HISTORY  
Undergraduate  
An inquiry into the way film portrays historical events in Latin America.

HST 206  
MEXICO: FROM THE OLMECS TO INDEPENDENCE  
Undergraduate  
This course surveys the history of Mexico from the rise of the Olmec Civilization to Mexican Independence in 1821. It will examine the rise, fall, and continuities of Mesoamerican civilizations, the Spanish conquest, and the creation of the colonial order.

HST 208  
IMPERIAL RUSSIA  
Undergraduate  
This course examines political, economic, social, and cultural developments in Russia from the time of Peter the Great in the early 18th century to the collapse of tsarism in 1917. Topics include Westernization and resistance during the reigns of Peter the Great and Catherine the Great; reform and reaction under Alexander I and Nicholas I; Alexander II and the great reforms of the 1860's; industrialization and the transformation of Russian society in the second half of the nineteenth century; the rise of radicalism and emergence of revolutionary movements; and the revolutions of 1905 and February 1917.
HST 209
THE RISE AND FALL OF THE SOVIET UNION
Undergraduate
This course examines major political, social, economic, and cultural developments in twentieth-century Russia from the collapse of tsarist rule through the fall of communism. Topics include the rise of Bolshevism and the October Revolution; the Civil War and allied intervention; the period of NEP and “revolutionary dreaming”; Stalin and Stalinism; the Great Patriotic War; Khrushchev and the “thaw”; Brezhnev and “developed socialism”; and the rise and fall of Mikhail Gorbachev.

HST 212
MEDIEVAL AND RENAISSANCE WOMEN
Undergraduate
Gender roles and ideologies in pre-modern and early modern Europe, from ancient Mediterranean and Germanic women to high Medieval ladies, nuns, serfs, and city women, from early feminism to the restrictions and opportunities brought by the Renaissance and Reformation. Emphasis on primary sources, especially women's writings.

HST 213
MEDIEVAL MYSTICS IN EUROPE: 1000-1600 AD
Undergraduate
The evolution over time of theories and experiences of human union with God, and of varied Christian spiritual paths and practices, as described in mystical literature, saints' lives, religious art, and music. Emphasis on the monastic, urban, and courtly institutional contexts of the documents. Cross-listed as CTH 228.

HST 214
EASTERN EUROPE TO 1699
Undergraduate
A survey of the area's settlements by Slavic and non-Slavic peoples, the establishment of medieval states, the East European Renaissance and Reformation, the struggle of Cross and Crescent, and the growth of Habsburg and Ottoman power.

HST 215
EASTERN EUROPE: 1699 TO 1914
Undergraduate
A survey of the East European Enlightenment and absolutism, the Polish Partitions, and the effects of revolutionary ideas on multinational empires.

HST 216
EASTERN EUROPE: 1914-PRESENT
Undergraduate
A survey of World War I and its effects in Eastern Europe; the rise of nation-states; the destruction of traditional agrarian societies; the impact of World War II; and the establishment and decline of Communist regimes.

HST 217
THE VIKINGS: MEDIEVAL AMBASSADORS OF TERROR, TRADE AND MULTI CULTURALISM
Undergraduate
An introduction to the history of the Vikings, from early Viking society in Scandinavia to the 'Norseman' Invasion of England in 1066. This course pays particular attention to what the Vikings had to say about themselves as well as to their interaction with other peoples, from North America to the Holy Roman and Byzantine Empires to the Muslim world.

HST 218
CATHOLIC EXPERIENCE I
Undergraduate
This course is an introduction to the history of the Catholic Church and the evolution of Christian thought and practices, from the early Church to the thirteenth century. The course will include not only institutional history but also ecclesiastical, cultural, and social history of Catholicism in relation to foundational theological and spiritual texts written in this period. Main topics: The Early Church; Councils and Heresies; Missions in Northern Europe; Charlemagne, Carolingians and a new Roman Empire; Monasticism; Eastern Orthodoxy; Christianity and Islam (the Age of the Crusades); the Mystical Tradition; the Investiture Controversy. Cross-listed with CTH 220.
HST 219  
CATHOLIC EXPERIENCE II  
Undergraduate  
This course provides an overview of the history of Catholicism and its interactions with institutional, political, and social history from 1200 to the French Revolution. The main topics of the class are the origin of the Universities and Scholasticism; Mendicant Orders and their impact on the Medieval Society; the Challenges to Papal Monarchy; Humanism and Erasmus; the impact of the Age of the Reformation; the Council of Trent; the geographic discoveries and the New Worlds; the Enlightenment and the Scientific Revolution; the Catholic Church and the French Revolution. Cross-listed with CTH 221.

HST 220  
CATHOLIC EXPERIENCE III  
Undergraduate  
This course will offer a survey of the political, cultural and intellectual history of the Catholic Church from 1789 through the early twenty-first century. It will include discussions of the Catholic Church in relation to the French Revolution; the Catholic Church and the formation of modern nation-states (including, inter alia, the unification of Italy and the German Kulturkampf); the relation between the Church and Liberalism; intellectual movements like theological Modernism and ressourcement theology; the First Vatican Council; the Church, Fascism and Communism; the Second Vatican Council; the Emergence of a Global Church, Latin American Liberation Theology, and more. Cross-listed with CTH 222.

HST 221  
EARLY RUSSIA  
Undergraduate  
This course examines political, economic, social, and cultural developments in Russia from the emergence of the Kievan state in the ninth century to the reign of Peter the Great in the early eighteenth century. Topics include the rise and fall of Kiev; the Mongol invasion and rule by the "Golden Horde;" the rise of Moscow and unification of Great Russia; the consolidation of tsarist authority and the reign of Ivan the Terrible; the Time of Troubles; and the early Romanov dynasty.

HST 222  
MODERN GERMANY, 1870-PRESENT  
Undergraduate  
Following the path from Germany's unification in the late 19th century via two world wars, the country's division in the course of the Cold War, and ultimately the country's reunification at the close of the 20th century, one of the goals of this course is to introduce students to the major cornerstones of modern German history. Another objective, however, aims at using these events in the exploration of shifting ideas about what it has meant to be German, exploring what factors determined inclusion in or exclusion from the German community.

HST 226  
ISLAM AND THE WEST: A SURVEY OF ORIENTALISM  
Undergraduate  
From "heresy" to "the Green Threat," this course studies the changing perceptions of Islam and the Islamic world held by those in "Western" societies from the time of the Crusades down to the contemporary era.

HST 232  
CULTURE AND POLITICS IN IMPERIAL CHINA  
Undergraduate  
Examines the history of Chinese civilization from the early Shang kingship through the development of the Chinese Empire (221 B.C. - A.D. 1911). We will focus on systematic changes in political, economic, and social structures in China and the intellectual and cultural forms that each configuration produced. Topics include the growth of the Chinese empire, Chinese forms of Buddhism, and the development of Chinese philosophy, scholarship and literature.

HST 233  
THE RISE OF MODERN CHINA  
Undergraduate  
Examines the history of Chinese civilization from the 18th century to the present. We will survey the height of the authority of the Qing Imperial government, its dissolution in the 19th century, and the creation of a revolutionary China in the 20th century. Topics include the Opium War and China's foreign relations, the introduction of Westernized technology and education, and the rise of Communism under the leadership of Mao Zedong. Also considers the ways in which our contemporary understanding of China is formed by recent developments in the media - Chinese news and film.
HST 235
EUROPEAN EXPANSION: AGE OF DISCOVERY
Undergraduate
A survey of the political, intellectual and scientific roots of the expansion of Europe and of the main voyages of discovery between 1400 and 1825.

HST 236
EUROPEAN EXPANSION: AGE OF EMPIRE
Undergraduate
The creation of European empires between the 18th and 20th centuries seems somehow inevitable. In fact, it was anything but. Barely 60 years ago, those empires were thought to be nearly immortal, but they vanished in less than twenty years. How did this unexpected rise and equally unexpected fall happen? What was the impact of these events on the world we live in today? These are some of the themes that History 236 addresses. We will study history, economics, technology, culture and war, and we will look both at the lives of the people who created these empires and the lives of those who brought them down. Through this, we will understand why Europe and the world are what they are today.

HST 237
HISTORY OF THE CITY OF ROME
Undergraduate
Topics in the history of urban Rome from antiquity through the modern age.

HST 239
WOMEN IN MODERN EUROPE, 1800-PRESENT
Undergraduate
This course will explore the diversity of women's and girls' experiences across Europe as they negotiate between public and private spheres, daily life and great events, Europe and the world. Themes may include industrialization, suffrage, imperialism, "new women," fascism, and communism.

HST 240
HISTORY OF CHICAGO
Undergraduate
A history of the founding and development of Chicago from a frontier village to a major industrial, commercial and cultural center. This course will focus on the changing lives of ordinary Chicagoans.

HST 241
WORLD REFUGEE CRISIS
Undergraduate
This is a survey of global refugee crisis and internal displacement between 1945 and the present. The course will focus on the following issues and challenges: human rights, definitions and causes of crisis, internal/external displacements, 'environmental' refugees, protection and integration, refugee children, and conflict resolutions in post-war societies.

HST 243
HISTORY OF THE CATHOLIC CHURCH IN THE U.S.
Undergraduate
This course traces the development of the Catholic Church from a missionary enterprise to the position of a major social, political, and economic institution. The course will examine the manner in which the hierarchical institution of the Catholic Church has related to the liberal ideal of American democracy.

HST 246
AFRICAN-AMERICAN HISTORY TO 1800
Undergraduate
This course primarily focuses on the colonial era with an emphasis on topics such as the construction of race and gender, the Black Atlantic, the emergence of African diasporic cultures in the Americas, slavery, black political thought, resistance, and the Revolutionary War. Cross Listed with ABD 256.
HST 247
AFRICAN-AMERICAN HISTORY, 1800-1900
Undergraduate
The African experience in America is expansive, beginning in the colonial era and lasting through the present day. This course will focus on a portion of that history—that spanning the 19th century. The course is organized thematically, with an emphasis on topics such as resistance, the construction of race, slavery and the law, gender and slavery, the nature of antebellum free black life, abolition, the Civil War, and Reconstruction. Cross Listed with ABD 257.

HST 248
AFRICAN-AMERICAN HISTORY, 1900 TO PRESENT
Undergraduate
The African experience in America is expansive, beginning in the colonial era and lasting through the present day. This course will focus on only a portion of that history—1900 to the present. This course is organized thematically with an emphasis on topics such as migration, urbanization, segregation, 20th century constructions of blackness, arts & culture, African Americans and the World Wars, black political thought, freedom movements, and criminalization. Cross Listed with ABD 258.

HST 249
ORIGINS OF THE FIRST WORLD WAR, 1871-1917
Undergraduate
Examines the development of the European (and Great Power imperial) state system after the unification of Germany; the formation (and global implications) of the pre-war alliance structure; the political and social movements of nationalism, imperialism, and militarism; the naval race; and the July Crisis of 1914.

HST 250
ORIGINS OF THE SECOND WORLD WAR, 1914 - 1941
Undergraduate
Examines the European (and world) state system in the aftermath of the First World War and the Russian Revolution; the attempts to forge a new international equilibrium at the Paris Peace Conference and after; the rise of Hitler and Nazism; appeasement; the immediate origins of the Second World War in Europe; and the rise of militarism and advent of war in East Asia.

HST 251
ORIGINS OF THE COLD WAR, 1917 - 1953
Undergraduate
Examines the rise of the United States as a world power; the diplomatic significance of the Russian Revolution; the wartime alliance between Great Britain, the United States and the Soviet Union; the collapse of the international order in the aftermath of the Second World War; and the advent of the Cold War.

HST 252
Undergraduate
The origins, nature and progress of the Cold War from the end of World War II until the collapse of the Soviet Union.

HST 253
HISTORY OF THE MODERN OLYMPICS
Undergraduate
This course will examine the Modern Olympics: the oldest and most inclusive institutionalized effort to engender international exchange and perpetuate peacefulness through athletic excellence. Relying on a mix of primary and secondary sources, the course will touch on an array of important issues, including globalization, race relations, gender issues, the rise of popular culture, and terrorism.

HST 254
AMERICAN URBAN HISTORY
Undergraduate
An overview, examining American urban life from the early days of the colonial seaport, through the rise of the smoky industrial center, to today's troubled “dual city” of the rich and the poor. Throughout the course, we will focus on how urbanization affected the lives of the diverse peoples who experienced it. We will also explore the ways in which city life contributed to changes in American culture, and to a greater acceptance of social and cultural diversity.
HST 255
THE HISTORY OF THE FIRST WORLD WAR
Undergraduate
The Great War created the modern world. This course will discuss the major theatres of the war, the range of combatants, the effect of the war on homefronts and civil societies, changes to military technologies, and consequences of the war. This course will provide an introduction to the Great War and its ramifications for students unfamiliar with it.

HST 256
AXIS AND ALLIES: THE SECOND WORLD WAR
Undergraduate
The second world war was the most destructive conflict in world history. Its scope was global and its impact was felt by millions people throughout the world. This course will examine the nature of the wartime experience for the combatants and civilians, how the war was waged by different societies and their governments, and the impact of the conflict on the post-war world.

HST 258
WOMEN IN HISTORY
Undergraduate
A comparative study of women's social, cultural, political, economic roles over time in three parts of the world.

HST 259
HISTORY OF WESTERN SCIENCE
Undergraduate
A survey of scientific thought and discovery from the ancient Greeks to the early 20th century.

HST 260
LESBIAN AND GAY AMERICAN HISTORY, COLONIAL TO 1970
Undergraduate
This course surveys LGBTQ (lesbian, gay, bisexual, transgender, and queer) history in America from the colonial era to the Stonewall Riots. Through primary and secondary source readings and class discussion we will examine how understandings of same-sex sex and sexuality have been constructed in the past. Special attention is paid to readings that draw revealing connections between same-sex sexuality and race, class, and gender.

HST 261
CATHOLICISM IN WORLD HISTORY I: JESUS TO 1500
Undergraduate
A study of the development of the Catholic Church from the time of Jesus to the Renaissance. Religious movements, piety and art as well as theology and ecclesiastical history will be examined. Cross-listed as REL 213 and CTH 205.

HST 262
CATHOLICISM IN WORLD HISTORY II: 1500 - PRESENT
Undergraduate
A study of the development of Catholicism since 1500 exploring the Catholic Reformation, Catholicism's encounter with the Enlightenment, the missionary movement and the Catholic Church in the United States. Cross-listed as REL 214 and CTH 206.

HST 263
JAPAN TO C. 1200
Undergraduate
Follows the formation of a unified state in central Japan during the 5th and 6th centuries. Considers the influence of Korean immigrants and Chinese philosophy and statecraft on the unification of Japan in early antiquity. Explores rise of Japan's aristocratic court culture in Nara and Kyoto as well as powerful Buddhist institutions and the emergence of the warrior class in Eastern Japan. Formerly HST 230.
HST 264
JAPAN c.1200 - 1800
Undergraduate
Follows the emergence of the warrior class and the system of dual political authority until the 14th century, with the imperial court in Kyoto and the samurai elite in Kamakura. Continues with an examination of the early modern processes of urbanization and the growth of a monetary economy, changes in social organization, major cultural innovations, and religious/intellectual movements.

HST 265
JAPAN, c. 1800-PRESENT
Undergraduate
Follows the radical transformation of Japanese politics, society, and economy with the commercialization of the countryside, the weakening of samurai rule, and increased, often hostile, contact with Western imperialist nations. Explores expansion of Japan as an imperialist nation from the middle of the 19th century and the lasting legacy of that expansion in the region. Explores WWII and postwar political, economic, social changes in contemporary Japan.

HST 266
IRELAND, 1450 - 1800, CONQUEST, COLONIZATION & REBELLION
Undergraduate
This course offers a survey of Irish history from the end of the middle ages to the union of Ireland and Great Britain in 1800. It traces the ways in which Ireland was brought under great English (later British) control through processes of agreement, conquest and colonization; and the ways in which various groups within Ireland sought to resist such developments.

HST 268
IRELAND, 1800-PRESENT
Undergraduate
Survey of Irish history from 1800 to 2000. Examines the course of Irish history from the Act of Union (creating the United Kingdom), through the struggles and reforms of the 19th century (Catholic Emancipation, the Famine and Irish diaspora, Fenianism, Land Reform and Home Rule), to the creation of the modern nation-state of the 20th century (the Easter Rising, partition and civil war, the role of Eamon deValera, the Republic, and the Troubles). Topics include the contributions of Irish culture and its influence in Europe and the world.

HST 269
MUSEUMS, MATERIAL CULTURE AND MEMORY: INTRODUCTION TO PUBLIC HISTORY
Undergraduate
How is the past remembered in public venues like museums? How do history museums shape how we understand past? How do historians use material culture (objects like coins or folk art) to interpret the past for the public? Public history refers to history that you find in public spaces-- outside of the pages of academic journals, and beyond university walls. We encounter examples of public history through exhibits, performances, walking tours, visits to historic sites, the world wide web, etc. This course familiarizes you with examples of public history, and trains you to critically analyze and thoughtfully engage with public historical interpretations.

HST 270
U.S. HISTORICAL LANDSCAPE
Undergraduate
The course considers how the American landscape has been shaped by native occupants, and later, by agricultural settlement and industrial development. A key theme is how culture has shaped the physical world we inhabit, from 1500 to circa 1950.

HST 271
OLD REGIME AND REVOLUTIONARY FRANCE
Undergraduate
This course provides students with a firm foundation in the history of early modern France, ca. 1500-1800, including major developments of the period and an understanding of the relationship between the French revolution and the period that preceded it. Topics will include (among others) the rise of absolutist monarchy, the Enlightenment, French colonialism, pre-revolutionary social and economic conditions, and the French Revolution.
HST 272
FASCISM AND COUNTER REVOLUTION
Undergraduate
What is Fascism? How and why did this early 20th century political movement and ideology that openly preached racial hatred, genocide, and the necessity of war attract so many millions of followers all over the world? What exactly did Fascists believe? These are some of the issues that this course addresses. We will explore the development of fascism during the 1920s and 1930s both as a philosophy and as a form of political action. The course examines Fascism's opponents -- socialism and democracy -- and looks at how supporters of these ideologies responded to the Fascist challenge. And we will consider what the possible responses to Fascism are, and whether or not Fascism still exists, even in the United States.

HST 273
HISTORY OF SEXUALITY IN EUROPE
Undergraduate
This course will explore key ideas, practices and patterns across multiple European societies from the French Revolution until the present. Key topics may include demographics, identities, sexology, and sexual consumerism.

HST 274
INTELLIGENCE IN 20TH CENTURY
Undergraduate
A study of intelligence gathering and analysis in the twentieth century (and beyond). This course will address the role intelligence played in the politics, diplomacy, and strategy of the leading world powers. Special consideration will be given to the eras of the two world wars, the cold war, and the emerging nations in the post-war period. The course is comparative in nature and will examine the intelligence communities of the United States, the European powers, the Soviet Union, Japan, China, and Israel.

HST 275
SEX IN AMERICA, PURITANS TO VICTORIANS
Undergraduate
This course surveys the history of three centuries of American ideas about sex and sexuality. By focusing on sexual variation from the era of colonial settlement through the end of the nineteenth century, this course will challenge conventional interpretations of sex in early America.

HST 276
SEX IN AMERICA, LATE VICTORIANS TO PRESENT
Undergraduate
This course will provide an overview of the history of American sexuality from the late 19th century through the present. The course will draw from social and cultural history, the history of medicine and psychology, legal and political history, literature, mass media, and gender studies in order to understand the creation of modern sexual identities.

HST 277
WAR AND PEACE IN THE MODERN AGE
Undergraduate
A survey of military history from 1648 to the present with emphasis on the relationship between armed forces and the societies that create them, the impact of technology on warfare, and efforts to limit deadly conflict.

HST 278
HISTORY OF AMERICAN RELIGION
Undergraduate
A survey of major religious traditions, movements, and themes in American history from the colonial period to the present, including the relationship between religious values and beliefs and other aspects of American culture.

HST 279
WESTWARD EXPANSION IN U.S.
Undergraduate
This course examines the competition among Native American nations, European empires, and the emerging governments of the United States and Mexico to control the North American region from roughly the Appalachian Mountains to the Pacific Ocean from approximately 1775 to 1890. The class will examine environmental changes, military campaigns, trade links, settlement patterns, and government policies.
HST 280
HISTORY OF US NATIONAL PARKS
Undergraduate
At its core, this course examines the intersection of American history and the natural world, following a classic definition of environmental history as the interaction between humans and the environment in the past. Specifically, this course examines the historical development of America's national parks, analyzing how a truly American idea of national parks as idealized nature—what Wallace Stegner once called "America's best idea"—led to preservation efforts all over the country and throughout time. In addition to studying the historical development of national parks, this course will also use national parks as lens for studying important themes in American history. Like microhistory, national park history allows historians to "ask large questions in small places." This course asks large questions in green places. This course examines some important themes in American history, including: assessing the idea of American exceptionalism (including nationalism and imperialism, but also American anxiety), changing definitions of economic progress, the rise of federal political power, the development of identity (including American identity, gender, ethnic, race, etc), and American conceptions of the environmental world. Cross-listed with ENV 165.

HST 281
IDEAS OF NATURE IN US HISTORY
Undergraduate
This course scrutinizes different conceptions of nature throughout a broad span of Western history, and includes an examination of diverse ideas that include pre-contact Native American conceptions of their environments, colonial-era attitudes toward the dwindling resources of Europe and the vast potential of the North American continent, 19th century movements such as Romanticism, Transcendentalism, acclimatization, conservation, and preservation, and 20th century ideas concerning wilderness preservation, Deep Ecology, and restoration. At heart, this course is designed as an intellectual history of nature. This class concentrates on the ideas of seminal thinkers concerned with the natural world, and examine how these men and women impacted history through their beliefs and philosophies, through their written works, through art, and through modern media such as film and television. Cross-listed with ENV 160.

HST 283
ASIAN-AMERICAN IMMIGRATION AND HISTORY, 1840-1965
Undergraduate
This course surveys Asian American history from the early nineteenth century to 1965. It explores the changing experiences of Asian immigrants and their citizen descendants in the United States within the larger context of immigration and race relations in American history. The course deals with the following broad themes: causes and processes of migration, responses from American society, and experience of immigration.

HST 284
HISTORY OF EDUCATION IN THE UNITED STATES
Undergraduate
Thematic study of the educational developments in U.S. History

HST 285
ANCIENT ROME: AUGUSTUS TO CONSTANTINE
Undergraduate
This course examines the history of the Roman Empire from its beginnings under Augustus (27 BCE-14 CE) to its reorganization under Diocletian (284-305 CE) and Constantine (306-337 CE). Both textual and archaeological sources will be used to understand political, economic, and social developments.

HST 288
WOMEN IN UNITED STATES HISTORY
Undergraduate
The history of women's work, family, and political lives in America.

HST 290
ANCIENT EGYPT
Undergraduate
This course traces the developments of Egyptian civilization from its earliest beginnings to the Arab/Muslim conquest. Emphasis will be on assessing material culture with students being introduced to techniques of Egyptian archaeology and papyrology.
HST 291
THE FERTILE CRESCENT: MESOPOTAMIA AND BEYOND
Undergraduate
Analyzes the early civilizations in the Fertile Crescent through an examination of material culture. Attention will also be given to the archaeology and archaeological methods of the Near East including Jericho and Catalhoyuk.

HST 292
HISTORY OF ENGLAND TO 1688
Undergraduate
A survey of cultural, social, economic, and constitutional developments in England from the Norman Conquest to the Glorious Revolution.

HST 293
HISTORY OF BRITAIN SINCE 1688
Undergraduate
History of Britain Since 1688. special emphasis on the continued evolution of the constitution, the industrial revolution, imperialism, and Britain's changing role in Europe.

HST 294
ANCIENT GREECE
Undergraduate
Traces the development of Greek civilization through an examination of material culture. Emphasis will be on the major monuments and artifacts of the Greek world from prehistory to the Classical Age. Students will also be introduced to techniques and methods of classical archaeology.

HST 295
AMERICAN HISTORY AND FILM/TV
Undergraduate
This course examines American History and popular media. Depending on the instructor, it may focus on how American History has been depicted in popular media or it may emphasize the history and development of popular media. Contact instructor for syllabus.

HST 296
ANCIENT ROME: ORIGINS TO THE END OF THE REPUBLIC
Undergraduate
This course traces the development of Rome from a small settlement on the banks of the Tiber in the eighth century BCE to a Mediterranean power in the first century BCE. Both textual and archaeological sources will be used to understand political, economic, and social institutions of the Archaic and Republican periods.

HST 297
IMPERIAL SPAIN, 1469-1808
Undergraduate
Analysis of Spain and Spanish empire between 1468-1808. During this period, Spain united and became a leading global power with enormous consequences for Western and world history. Emphasis on the political, economic, socio-cultural history of Iberian society.

HST 298
INTRODUCTION TO HISTORICAL SOURCES AND METHODS
Undergraduate
This is the first of two introductory core courses required of all history majors, history minors, and education majors with a concentration in history. In this course, students will learn the varied ways in which scholars interpret the past, focusing particularly on the evidence and arguments used by historians in their work. To that end, students will learn about the varieties of primary sources (textual, material, oral) as well as the varied methods historians use to analyze such evidence. In addition, students will practice analyzing primary source evidence in oral and written presentations, learn how to use the library for historical research, and how to discern scholarly arguments in secondary sources.

(WRD 103 and WRD 104) or HON 100 or HON 101 is a prerequisite for this course.
HST 299  
CRAFT OF HISTORY  
Undergraduate  
This course is the second of two introductory core courses required of all history majors, history minors, and education majors with a concentration in history. In this class, students will bring to bear the skills in historical sources and methods learned in HST 298 to complete a substantial independent research project. To that end, students will learn how to identify a historical question or problem about which to conduct research; how to find, obtain, and evaluate primary source evidence to research; how to build a secondary source bibliography using reference works, monographs, and scholarly journal articles; and develop and execute a coherent plan for writing and revising a substantial research paper (of at least 10 pages in length) based on an integrated use of both primary and secondary sources.  
A grade of C- or above in HST 298 is a prerequisite for this course.

HST 301  
U.S. LABOR HISTORY  
Undergraduate  
This course will explore the history of American labor from 1877 to the present. We will particularly focus upon the work of recent American labor historians who examine such themes as the relationship between ethnicity, race, gender, and class; how and why work has changed; the role of unions, families, churches and other working-class institutions in workers’ lives; the relationship between working-class cultures and mass cultures; and how capitalism, the state, and workers themselves have shaped class relations.  
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 302  
MAPS IN HISTORY AND CULTURE  
Undergraduate  
Examines maps in multiple cultures and the relationship of these to local geographies and perception of place.  
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 303  
TOPICS IN LATIN AMERICAN HISTORY  
Undergraduate  
Topics in Latin American History  
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 306  
COLONIAL LATIN AMERICA: POWER & DEVELOPMENT OF A MULTI-RACIAL SOCIETY  
Undergraduate  
The multicultural origins of colonial rule in the Americas from the 15th to the early 19th century.  
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 308  
EUROPE FROM CONFLICT TO CONSENSUS  
Undergraduate  
The course will examine the emergence of a European identity during the second half of the twentieth century. Special attention will be given to the evolution of the European Union and NATO as representative institutions.  
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 310  
INTER-AMERICAN AFFAIRS  
Undergraduate  
A mostly twentieth-century survey of political relationships between the United States and Latin American nations, emphasizing dependency and interdependence theories.  
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 311
THE HISTORY OF THE CARIBBEAN: FROM COLUMBUS TO CASTRO
Undergraduate
The history of the Caribbean from colonial times to the present, with special emphasis on the factors that give each nation its particular character.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 312
LATINOS IN THE UNITED STATES
Undergraduate
A survey of the history, politics, and culture of the major Latino groups in the United States: Mexicans, Puerto Ricans, Cubans, Dominicans, and Central Americans. Traces the history of these groups from the 19th century to the present by analyzing their impact on the United States.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 313
THE OLD SOUTH
Undergraduate
Considers the history of the southern states before the Civil War, focusing especially on the growth of southern slavery, the development of African-American culture, the socio-economic features of a slave society, as well as the distinctive political and ideological contours of the region.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 314
THE CUBAN REVOLUTION
Undergraduate
General analysis of the impact of the Cuban Revolution on Cuban society and the international political arena. The historical background of the revolution as well as its accomplishments and shortcomings will be emphasized.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 316
GOD, SELF, AND SOCIETY IN MEDIEVAL CULTURE
Undergraduate
The roots of Western thought in medieval education, literature, philosophy, and science. The interactions between high theology, mysticism, and popular culture. History and autobiography.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 317
INDIVIDUAL AND SOCIETY IN RENAISSANCE ITALY
Undergraduate
The flowering of culture, humanism and the arts in fourteenth- and fifteenth-century Italy. Renaissance politics, patronage and diplomacy. Religion and the Papacy.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 318
THE AGE OF REFORMATIONS
Undergraduate
Late medieval religion and society; the Reformations of Luther and Calvin, and the Catholic reform movements. Nationalism and the state in sixteenth-century Europe. The expanding world.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 319
IMMIGRANT AMERICA
Undergraduate
An overview of the ethnic experience in American society, how ethnic diversity has shaped America as America has re-shaped the lives of immigrants.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 320
TOPICS IN WORLD HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 321
TOPICS IN AFRICAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 322
TOPICS IN ASIAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 323
THE CULTURES OF EARLY CHRISTIANITY
Undergraduate
Late antique and early medieval intellectual history in social context.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 324
COLONIAL LATIN AMERICA: AGE OF CONQUEST, 15TH - 17TH CENTURIES
Undergraduate
This course examines the complexities of the Age of Conquest and focuses on the historical experience of Indigenous societies during the early colonial period. Special attention is given to the social and economic structures of Indigenous societies before 1492, the Spanish exploration and conquest, the presence of Indigenous allies and their role in the dynamics of conquest/colonization, the demographic catastrophe that followed the conquest, and the social, cultural, and economic characteristics of early colonial societies.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 328
ENGLISH CONSTITUTIONAL HISTORY
Undergraduate
A study of Anglo-Saxon institutions; feudalism after the Norman conquest; growth of the common law; foundations of Parliament and the development of central administrative systems.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 329
SPECIAL TOPICS IN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 330
TOPICS IN EUROPEAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 331
THE NATION AND NATIONALISM IN EUROPE
Undergraduate
Examines the emergence of nations and nationalism in modern Europe as well as nationalists' use and abuse of history.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 332
FRENCH REVOLUTION AND NAPOLEON
Undergraduate
Analyzes the demise of the Old Regime, rise and fall of revolutionary idealism, and the emergence of Napoleon.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 333
VICTORIAN ENGLAND
Undergraduate
A detailed study of selected political, social, economic and cultural themes in 19th century England.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 334
BRITAIN IN THE TWENTIETH CENTURY
Undergraduate
An in-depth look at selected themes in recent British history including the economic and imperial decline of Great Britain.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 335
THE AGE OF ENLIGHTENMENT IN EUROPE
Undergraduate
Analyzes European society and culture in the late 17th and 18th centuries and the intellectual movements that grew out of this historical context, which is frequently considered the cradle of modern Western history and thought.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 337
REVOLUTION AND NATIONALISM IN IRELAND, 1798 - 1923
Undergraduate
This course traces the evolution of Irish nationalism from the United Irishmen Revolt (1798) through the creation of the Irish Free State (1921) and the end of the Civil War (1923). It explores agrarian violence, parliamentary politics and armed revolt, focusing on how these combined to produce Irish independence.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 338
THE GREAT WAR, 1914 - 1918
Undergraduate
By using a variety of perspectives--social, cultural, intellectual, political--this course will examine and re-examine the ways that the First World War shaped and affected the modern world. After examining the broader causes of the war, the course will work outward from the battlefields to the home fronts, to the empires, and throughout the post-war world. Although this course focuses on European history, instructors may also examine its global context.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 339
HISTORY FROM PICTURES: VISUAL CULTURE IN EAST ASIAN HISTORY
Undergraduate
How do historians use paintings, woodblock prints, lithographs, photographs, postcards, and other visual artifacts in understanding the past? How do visual objects differ from conventional documents as sources of historical evidence? In this course, we will investigate the methodological approaches to writing history using visual artifacts as primary source material. In particular, we will consider the impact of these issues on the writing of East Asian history.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 340
CULTURE AND GENDER IN JAPAN
Undergraduate
Examines gender and society in early modern and modern Japanese history [c.1600-present].

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 341
PEASANTS IN MODERN EUROPEAN HISTORY
Undergraduate
An analysis of the significance and ultimate disappearance of the peasantry, formerly the numerically dominant group in European society, emphasizing both its social history and the methods needed to study the non-literate.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 342
TOPICS IN AFRI CAN-AMERICAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 343
CRIME AND PUNISHMENT
Undergraduate
What kinds of crimes were committed in the past? And how did societies punish the criminal? We will examine the changes in crimes and punishments from the eighteenth through the twentieth centuries in Europe, particularly the United Kingdom and her colonies. We will explore the ways that the developing state conceptualized and treated criminality and the consequences of state discipline on criminality.

A grade of C- or above in HST 298 is a prerequisite for this course.

HST 346
AFRI CAN-AMERICAN INTELLECTUAL HISTORY
Undergraduate
African-American contributions in the areas of philosophy, theology, politics, literature, and art from 1619 to the present.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 349
THE HOLOCAUST
Undergraduate
This course places the Shoah, the Holocaust of European Jewry, at the center of a broader discussion of anti-Semitism, the rise of Nazism, the conduct of World War II, and the persecution and murder of other groups designated as outsiders or as enemies of the Nazi regime. Close attention is given to interpreting the behavior and experiences of perpetrators, victims, bystanders, and resisters, to the role of the churches, and to the politics of post-Holocaust legal proceedings and the complex work of memory and representation.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 352
MEDIEVAL INDIA
Undergraduate
Examines the social, cultural and political histories of South Asia from prehistoric times to the waning of the Mughal Empire.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 353
MODERN INDIA AND PAKISTAN
Undergraduate
Examines the modern history of India, giving special attention to India as a prototype of economic and political change in the Third World.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 354
U.S. WOMEN'S HISTORY
Undergraduate
The purpose of this course is to introduce students to the history of women's work, family, and political lives in America. This intensive reading and discussion course is also designed to provide a detailed overview of recent historical literature and historiographic interpretations in American Women's history.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 355
GANDHI AND THE WORLD
Undergraduate
This course is a political and intellectual history of the individual, his times, and his legacy. The course is designed around a thorough analysis of Gandhi's own writing, significant critiques, and his world legacy.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 359
SOCIETY AND CULTURE IN THE LATE SOVIET ERA
Undergraduate
This seminar focuses on the society and culture of the USSR in the late Soviet period (i.e., from Stalin's death in 1953 to Gorbachev's resignation in 1991). It emphasizes themes such as: evolving notions of the individual in a collective society; tensions between emerging national (ethnic) and supranational (Soviet) identities; attitudes toward science and technology; city and countryside; consumption and consumerism; popular culture and celebrity, work and leisure, religion and orthodoxy; memory and commemoration; sexuality, gender roles, youth culture, and more.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 360
DOING DIGITAL HISTORY
Undergraduate
This course introduces students to the rapidly expanding world of digital history. Students taking the course will enhance their understanding of the conceptual, theoretical, and ethical issues involved in doing digital history, and learn to use digital tools while working individually and collaboratively on digital history projects.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 361
TOPICS IN ISLAMIC HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 362
ATLANTIC HISTORY, 1492-1825
Undergraduate
An examination of intercontinental exchanges and cross-cultural links across the Atlantic ocean that both separated and united the Western Hemisphere, Europe, and Africa in the pre-industrial era.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 363
MODERN BALKANS (EUROPE)
Undergraduate
The establishment of national states, the social transformation from peasant to industrial societies, and the effects of war and revolution in southeastern Europe since the late 18th century.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 364
PALESTINE UNDER THE BRITISH MANDATE
Undergraduate
This course examines the foundation and evolution of the British Mandate of Palestine from 1914 to 1948 in its British imperial, Middle Eastern, and world historical contexts. Students will engage primary and secondary sources associated with controverted issues, including Zionism, creation of the Mandate, immigration, and inter-communal conflict.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 365
THE CRUSADES
Undergraduate
Addresses the European Crusades to the Holy Land from a World Historical Perspective.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 366
THE MODERN MIDDLE EAST AND NORTH AFRICA
Undergraduate
The history of the region since 1800. Topics covered include the end of Ottoman Empire, the impact of European Imperialism and the renewal of Islam.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 367
US-MEXICAN BORDERLANDS
Undergraduate
This course examines the history of the U.S.-Mexican borderlands from its creation in 1848 to the present. What makes the U.S.-Mexican borderlands so unique and volatile is that it is one of the few regions in the world where two nations that so distinct in economic formations, political systems, and cultural values come into permanent contact. The course will focus on key issues that have historically shaped the borderlands such as violence, contraband, migrations, race and income inequality.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 368
SOCIAL MOVEMENTS IN LATIN AMERICA
Undergraduate
This course examines how Native Americans, slaves, peasants, and other subaltern people actively resisted their subservient status in Latin America. It will cover a variety of protest movements, from "pre-modern" (such as millenarian movements, slave rebellions, urban riots, and "race" wars) to "modern" (such as social revolutions).
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 369
REVOLUTIONS IN LATIN AMERICA
Undergraduate
This course surveys, analyzes, and compares a series of revolutionary movements, conflicts, and regimes in 20th Century Latin America.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 370
AMERICAN COLONIAL HISTORY
Undergraduate
The European's first contact, exploration, and settlement of the Eastern seaboard, with discussion of significant political, economic, and social consequences.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 371
THE AMERICAN REVOLUTION
Undergraduate
The establishment of American independence, adoption of the Constitution; the first years of the republic considered in analytical detail.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 372
ANTEBELLUM AMERICA
Undergraduate
This course treats the significant social, political, economic, and cultural developments shaping America and Americans during the first fifty years of the nineteenth century.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 373
THE CIVIL WAR ERA
Undergraduate
This course examines the primary causes, events, and outcomes of the American Civil War, 1861-1865. Topics and themes include the sectional differences and similarities between the North and the South from 1820 until secession, including the role of slavery in fostering those sectional differences; the political crises that led to secession; aspects of military strategy and major military events of the war, including guerrilla warfare; the leading political figures of the period; the nature of life on the homefront; the impact of the war on slavery and the contributions of slaves and free blacks to the war; the role of gender and race in shaping the experience of the war; and dissent and disloyalty in both the Confederacy and the Union.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 374
EMERGENCE OF MODERN AMERICA, 1877-1914
Undergraduate
New cultural patterns, political party battles, growth of big business and organized labor, women's suffrage movement, Populism and the Progressive Era.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 375
THE GREAT DEPRESSION AND THE NEW DEAL ERA
Undergraduate
A consideration of World War I, the Twenties, the Great Depression, and the New Deal.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 376
THE UNITED STATES SINCE 1940
Undergraduate
Significant developments in American life during the period after World War II.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 377
HISTORY OF POVERTY IN THE UNITED STATES
Undergraduate
The class will examine changes in the underclass, in perceptions of the poor, and in the remedies used to address poverty in the United States from the late eighteenth to the early twenty-first centuries.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 378
THE AMERICAN WEST IN THE 20TH CENTURY
Undergraduate
This course explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental changes, urbanization, political and social movements, immigration, and cultural formation.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 379
RECONSTRUCTION AND THE RISE OF JIM CROW
Undergraduate
This course covers the history and culture of the post-Civil War United States, particularly the political epoch called Reconstruction and the establishment of the subsequent system of racial apartheid in the South commonly referred to as Jim Crow (approximately 1863-1930). Topics and themes include the major political, legal, and economic changes that occurred during the Reconstruction period; African American political and social leadership during Reconstruction; the role of Civil War veterans in the United States; the role of gender and race in establishing new legal and cultural norms under Jim Crow; the central role played by violence, particularly lynching and extralegal terrorism, in creating and maintaining segregation; and the establishment of debt peonage and convict leasing as white-controlled systems of labor control.
A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 380
GENDER, TECHNOLOGY AND CULTURE IN 20TH CENTURY AMERICA
Undergraduate
Why are cars and computers "masculine," but telephones and typewriters "feminine"? How did technological artifacts and systems constitute, mediate, and reproduce gender identities and relations? The course raises questions about the relationship between gender and technology, examining how everyday technologies defined and redefined the workplace, home, and personal identity.
HST 299 or instructor consent is a prerequisite for this course.
HST 382
CHICAGO HISTORY MUSEUM EXPERIENCE
Undergraduate
Experience history in Chicago. The course is taught by a Chicago History Museum (CHM) curator/archivist and takes place at the CHM. Expect group work and field trips. Students develop skills and knowledge relevant to public history careers, and will gain a firm conceptual understanding of public history historiography, and of how the Chicago History Museum does public history. Students apply this knowledge to class discussions, assignments, and actual museum projects.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 383
BORDERLANDS AND FRONTIERS IN AMERICA
Undergraduate
Consideration of the changing conceptions of frontiers in American history with attention to the development of historical borderlands communities.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 384
TOPICS IN AMERICAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 385
UNITED STATES CONSTITUTIONAL HISTORY TO 1865
Undergraduate
Examines the English colonial charters, the constitutional aspects of the American Revolution and the federal Constitution; explores ratification issues, judicial power, the concepts of the Federal system, separation of powers, Foreign Affairs and national security as defined in the U.S. Constitution with reference to major Supreme Court decisions in these areas.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 386
UNITED STATES CONSTITUTIONAL HISTORY SINCE 1865
Undergraduate
Problems of civil liberties, rights of accused, privacy and constitutional issues and controversies arising during and after World War II, including the major decisions of the Warren court, Burger court and Rehnquist court.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 387
TOPICS IN RUSSIAN HISTORY
Undergraduate
Each time this course is taught, it will examine in depth a specific problem, issue, theme, or moment in Russian history as described in the course subtitle. Possible offerings include: "Mass Culture in the Soviet Union and Post-Soviet Russia," "Stalin and Stalinism," "Crime and Criminality in Russia," "The Russian Revolution," "Gender and Sexuality in Russia," and "The Rise and Fall of the New Soviet Man."

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 388
THE COURT AND THE U.S. BILL OF RIGHTS
Undergraduate
An examination of historical, philosophical, and legal developments related to the Bill of Rights in the U.S. Constitution. The course will also examine how the Bill of Rights has been affected by Supreme Court appointments, court decisions, and constitutional amendments.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 389  
TOPICS IN PUBLIC HISTORY  
Undergraduate  
Public history is a field of history that requires its practitioners to use the skills and methods of academic history with an eye towards connecting the public with that history. This seminar focuses on the skills, methods, sources and themes that are relevant to historians whose work takes them outside of the classroom. Theme of the seminar will vary with instructors. Some off-campus fieldtrips may be required. 

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 390  
CAPSTONE IN HISTORICAL RESEARCH AND WRITING  
Undergraduate  
The History Capstone in Historical research and Writing allows students to engage in deep and sustained historical research and writing, with multiple opportunities for instructor feedback and student revision. It is also an excellent way for students to experience firsthand the linkages between broad reading in a given field and subsequent primary-source based research in that field. Every autumn and winter quarter, certain 300-level course offerings will be designated as Capstone-linked classes. Students ready to take this course can choose among the offerings as suits their interests.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 391  
DOING LOCAL AND COMMUNITY HISTORY  
Undergraduate  
Collaborative learning groups will work with community partners in order to produce a tangible end-of-quarter public history project whose audience will be the greater Chicago community. This course carries a junior year experiential learning credit.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 392  
PUBLIC HISTORY INTERNSHIP  
Undergraduate  
History students have interned with the South Hampton Historical Museum (in Long Island, NY), the Chicago History Museum, the Evanston History Center, the Frances Willard House Museum and Memorial Archives, the National Public Housing Museum, the Peggy Notebaert Nature Museum, Lake County Historical Museum, and a host of other archives, and historical organizations. In addition to evaluations from a site supervisor, a faculty member evaluates students’ reflective writing that draws connections between relevant public historical readings and field experience. The Public History Concentration Director would be happy to discuss possible internship opportunities with interested students (at least a quarter in advance), and to assist in matching student interests to public history venues. Note: internship placement is incumbent upon the student.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 394  
AFRICAN-AMERICAN URBAN HISTORY  
Undergraduate  
Examination of the African American experience in American cities: from slave era, to the migration, to the present.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 395  
ISSUES IN NON-U.S. LEGAL HISTORY  
Undergraduate  
Designed to develop in the prelaw student analytical and adversarial skills useful in the practice of law, and to confront controversial issues dealing with values of the lawyer and the citizen.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.

HST 396  
ORAL HISTORY PROJECT  
Undergraduate  
An introduction to the techniques of oral history with particular emphasis on public history.

A C- or better in HST 199 (or HST 298) or instructor consent is a prerequisite for this course.
HST 398  
STUDY TOUR  
Undergraduate  
An in-depth, on-site overview of the historical, political, social and economic reality of a foreign country. Credit variable.

HST 399  
INDEPENDENT STUDY  
Undergraduate  
Majors only. Credit variable.  
Junior standing or above is a prerequisite for this class.

HST 421  
THE HISTORICAL DISCIPLINE  
Graduate  
This course introduces students to the fundamental concerns and skills necessary for the study of history at the graduate level. It does this by providing a "history of history," giving students an overview of the growth and development of the academic discipline of history, by addressing issues of methodology, historiography and historical philosophy, and by providing students with an awareness of current concerns, controversies, and debates in the discipline. Restricted to students in the MA in History program.  
Status as an MA in History student is a prerequisite for this class.

HST 422  
SEMINAR IN PRIMARY SOURCE ANALYSIS  
Graduate  
This course builds upon HST 421. It focuses on issues raised by the analysis of historical evidence, and exposes students to the many practical and theoretical tools by which historians construct historical knowledge out of this "raw" material. The course will include study of primary sources, methods of analysis and authentication, and ways in which different kinds of sources are integrated into coherent historical narratives.  
Variable topics. Consult course schedule for current listings.

HST 431  
COLLOQUIUM IN AMERICAN HISTORY  
Graduate  
Variable topics. Consult course schedule for current listings.

HST 432  
COLLOQUIUM IN LATIN AMERICAN HISTORY  
Graduate  
Variable topics. Consult course schedule for current listings.

HST 433  
COLLOQUIUM IN AFRICAN HISTORY  
Graduate  
Variable topics. Consult course schedule for current listings.

HST 434  
COLLOQUIUM IN ASIAN HISTORY  
Graduate  
Variable topics. Consult course schedule for current listings.

HST 435  
COLLOQUIUM IN EUROPEAN HISTORY  
Graduate  
Variable topics. Consult course schedule for current listings.
HST 436
COLLOQUIUM IN ISLAMIC HISTORY
Graduate
Variable topics. Consult course schedule for current listings.

HST 437
COLLOQUIUM IN WORLD HISTORY
Graduate
Variable topics. Consult course schedule for current listings.

HST 438
COLLOQUIUM: SPECIAL TOPICS IN HISTORY
Graduate
Variable topics. Consult course schedule for current listings.

HST 489
GRADUATE CAPSTONE
Graduate
This is an intensive seminar in which students are asked to analyze a number of important works of scholarship drawn from the breadth and complexity of the historical discipline. The course allows students to synthesize the many skills they have learned in their earlier classes, notably the ability to read and assess historical monographs. They will thereby demonstrate their competence in analyzing historical arguments, their knowledge of both historiography and historical content, and their proficiency in understanding the variety of primary sources and methods of interpreting them.

HST 492
GRADUATE INTERNSHIP
Graduate
Internship.

HST 497
INDEPENDENT STUDY
Graduate
Independent Study

HST 499
THESIS RESEARCH
Graduate
Between four and eight hours credit to be determined by the department.

HST 500
CANDIDACY CONTINUATION
Graduate
Required of all students who are not registered for regular courses but who occasionally utilize University facilities during completion of course requirements and/or research. Non-credit.

HST 501
CANDIDACY MAINTENANCE
Graduate
This zero-credit hour course is for MA in History students who are not actively working on their theses or final projects, but who wish to maintain university status. Candidacy Maintenance does not allow borrowing or deferment of loans, but does grant student access to DePaul resources such as labs, libraries and the gym.
Because of the increasing degree of health consciousness in our society, individuals not only interact more frequently with health care providers, but health care organizations play more active roles in their surrounding communities. In addition, health care cultures are changing. Health care organizations play active social and political roles when responding to national health issues or crises. Hence, it is important that we, as consumers of health care, understand the communication challenges that are inherent within health care organizations, and how those can impact the effectiveness of our communication as a participant in health care contexts.

Status as a Health Communication student or Health Informatics student or Public Health student or department consent is a prerequisite for this class.

This course focuses on health care methodologies relevant to health care administration, including a cross-section of both qualitative and quantitative methodologies; designing questionnaires and surveys; the analysis and presentation of survey data; interviewing strategies; and the analysis and presentation of qualitative data. Students will also be provided with skilled technical writing assignments geared toward providing an understanding of how to most effectively present data within the contexts of reports, visuals for meeting or memoranda.

Status as a Health Communication student or department consent is a prerequisite for this class.

The U.S. Department of Health and Human Services recognizes the role of communication in addressing health disparities. Health literacy (the process of obtaining, processing and understanding basic health information), for example, differs widely across cultural and other demographic identity markers. This course examines the role of communication in health literacy, health disparities, and cultural differences in approaches to health. (Previously HTHC 517 Health Care Literacy).

Status as a Health Communication student or department consent is a prerequisite for this class.

Health care practitioners must acquire management consulting skills necessary to identify areas in need of change within health care organizations. Problem identification, data collection, intervention and implementation phases of assessment and intervention are taught from the perspective of the health care organization. The course probes common management problems in health care, internal working relationship challenges as well as organizational structure issues that arise.

Status as a Health Communication student or department consent is a prerequisite for this class.

This course will focus on the use of communication strategies to inform and influence individual and community decisions regarding health in the following contexts: the multidimensional nature of health communication; understanding empirical research in health communication; behavioral theories in health communication; rhetorical theories in health communication; legal and ethical concerns in health communication; the communication of risk and uncertainty; and the design of health campaigns.

Status as a Health Communication student or department consent is a prerequisite for this class.
The course, Family and Health Communication, addresses health-related issues that families may experience, while situating them within a theoretical context. Using theories such as Family Systems Theory and Communication Privacy Management Theory, this course will take a Lifespan Approach to better understand family health issues. Some of the topics that will be covered in this course may include care giving responsibilities, long-term disease, disability, addiction, psychological disruption, sexual health, and end of life issues as affects the family system. Cultural and social norms, in addition to public and health policies are also addressed, as they provide insight into the larger scope of understanding family and health communication, as ultimately, the health of family members impact the functioning of the family system.

Status as a Health Communication student or department consent is a prerequisite for this class.

Topics will include: Gay, Lesbian and Transgender Health Care Issues, Patient Advocacy, Communication and Constraint, Multicultural Communication in Health Care Contexts and Advance Care Planning

Status as a Health Communication student or department consent is a prerequisite for this class.

Modern organizations are increasingly interested in shifting their organizational structures towards the goal of creating self-managed work teams. Much of the health care delivery system is already structured formally or informally around the team concept, whether these be surgery teams, consulting office staff, or other health and wellness delivery personnel. Therefore, those pursuing a career in health care greatly benefits from knowledge and experience with two interdependent aspects of group dynamics: decision-making under conditions of uncertainty, and the philosophy and practice of developing groups into self-managed teams. This course will combine a lecture/discussion with a teamwork intensive action learning component towards the goal of making the student competent to either create or optimize the results of self-managed work teams in their own organization (if called upon to do so), or to understand and thrive in this work mode without stress.

Status as a Health Communication student or department consent is a prerequisite for this class.

Focusing on the performance and narrative paradigms of communication studies, the course will survey uses of performance and narrative methods to consider health communication relationships. Narrative and narrative performance are sites of health communication issues for marginalized populations, difficult conversations, and alternate means of reporting. For example, narrative and narrative performance are increasingly being used as part of medical curriculum, as a means to train health care professionals to understand the experiences of their patients, encourage deep listening, and foster different professional-patient relations. For cancer, HIV/AIDS, and other patients, performance becomes a means of speaking into mainstream and dominant discourses of health and to actively shape discourses from their own subjectivities. This increases the visibility of health care experiences in their gendered, sexualized, and racialized dimensions. Finally, narrative and narrative performance offers an additional means of visibility in catalyzing change in public, legislative, scholarly and relational arenas.

Status as a Health Communication student or department consent is a prerequisite for this class.

Beginning with foundational theories and principles of social construction, the course examines cases illustrating socially-constructed features of healthcare. We discuss (a) medicine as a gendered and hierarchical institution, (2) specialized languages used to describe/construct specific illnesses (e.g. anorexia and obesity, addiction, depression, HIV/AIDS), and (3) how constructed realities become internalized through primary and secondary socialization within the family, through media, and through encounters with the health care system.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
HTHC 592
INDEPENDENT STUDY
Graduate
Students will be guided in the development of a special project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member.

Status as a Graduate Health Communication student and Director consent is a prerequisite for this class.

HTHC 599
RESEARCH THESIS
Graduate
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.

Status as a Graduate Health Communication student and Director consent is a prerequisite for this class.

HTHC 601
ACTIVE DEGREE COMPLETION
Graduate
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans. (0 credit hours)

Status as a Graduate Health Communication student is a prerequisite for this class

HTHC 602
CANDIDACY CONTINUATION
Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans. (0 credit hours)

Status as a Graduate Health Communication student is a prerequisite for this class.

IB 500
GLOBAL ECONOMY
Graduate
This course is designed to be an introduction to the economic environment in which businesses operate. With the increasing interdependence of national economies and the growing role of global enterprises, the understanding of international economic issues is vital to decision-makers. The material covered will include both socio-cultural aspects and economic and financial dimensions of global business. Students should obtain a grasp of the basic theory as well as a knowledge of the major current issues in the global economy. (FORMERLY ECO 556)

IB 505
GEOPOLITICAL AND CULTURAL ISSUES IN INTERNATIONAL BUSINESS
Graduate
Analysis of major geographical and cultural conditions in those countries most involved in U.S. foreign trade. Guest lectures, comprehensive maps and pertinent media presentations supplement weekly class discussion.
IB 520
INTERNATIONAL TRADE THEORY AND POLICY
Graduate
Modern theories of international trade: classical theory of comparative advantage, factor proportions theory, factor price equalization, application of welfare economics to international trade, including regional economic integration, commercial policy and tariff problems.

FIN 555 is a prerequisite for this class.

IB 521
INTERNATIONAL MACROECONOMICS
Graduate
This course analyzes traditional macroeconomic issues in a framework that explicitly allows for international trade and capital flows. Topics covered include exchange rate and balance of payments determination, the impact of international trade and capital mobility on domestic monetary and fiscal policy, fixed vs. floating exchange rate systems, exchange rate overshooting and other topics. Cross-listed as ECO 558.

ECO 509 is a prerequisite for this class.

IB 525
ECONOMICS OF DEVELOPING COUNTRIES
Graduate
This course reviews models of economic development and some of the key issues in economic development including agricultural and rural development, population, economic growth, the role of government, health, education, income distribution, trade regime and policy, international capital flows and the environment, international trade and foreign resource flows. The course integrates country studies of selected developing economies and regions, cross-country statistical studies and theoretical tools drawn from the fields of microeconomics, macroeconomics, and international trade.

FIN 555 is a prerequisite for this class.

IB 526
COMPARATIVE ECONOMIC SYSTEMS
Graduate
A study of the contrasting theories of socialism and capitalism.

FIN 555 is a prerequisite for this class.

IB 530
INTERNATIONAL FINANCE
Graduate
International Finance integrates the financial activities, institutions, and multinationals of the global finance arena. In addition to extending the tools of financial analysis to an international setting, the course studies the strategies available to a multinational because of operations in multiple countries. Topics include foreign currency and political risk, capital budgeting in a multinational setting, and cash flow management between countries.

FIN 555 is a prerequisite for this class.

IB 540
INTERNATIONAL MANAGEMENT
Graduate
The objective of this course is to develop clear awareness of the international business operations, practices and environment. It provides the concepts, methods and tools necessary to face the global challenges in international management. The objective is met through lectures, classroom discussions, library assignments and research work. Students will learn the effective use of the international business references. By the end of the course, they are expected to have developed a high level of competency in acquiring, understanding, analyzing and synthesizing international management information from international business directories, databases and CD-ROMs.
IB 545
AREA STUDIES IN INTERNATIONAL MANAGEMENT
Graduate
In-depth analysis of the economic and cultural aspects of doing business in a particular region, e.g. Western Europe, Middle East, Japan, etc. The course focuses on the region’s business relations with the United States, its trade and management practices and the successful conduct of business negotiations. The area under consideration will vary from quarter to quarter in order to cover regions of particular interest to our students and the business community of Chicago.

IB 550
INTERNATIONAL MARKETING
Graduate
The differences between markets and distribution systems in various countries are explored. By emphasizing the social and economic factors causing these differences a sound understanding of and empathy with different international marketing problems are developed. Analyses are made of the organization of trade channels in various cultures, of typical government policies towards international trade in countries at different stages of development, and of international marketing research, advertising, and exporting. Offered Variably.

MKT 555 is a prerequisite for this class.

IB 560
GLOBAL STRATEGIC FINANCIAL ANALYSIS
Graduate
This course concentrates on each student's own career goals by focusing on cases of well-known financial successes and failures in the global business world. It enables students to become intelligent users (readers) of financial reporting in a global environment. Students will learn to identify key relationships in the statements to strategy of high performance companies and to make critical judgments underlying the elements and valuations in the financial statements. Students will study integrated reporting, corporate governance, and sustainability accounting. The course is a useful elective for MSA, MACC and MBA programs.

ACC 500, or equivalent, is a prerequisite for this course.

IB 750
INTERNATIONAL BUSINESS SEMINAR I
Graduate
Off-campus seminar, usually one to three weeks, providing exposure to international business cultures. IB 755 is a co-requisite for this class.

IB 755
INTERNATIONAL BUSINESS SEMINAR II
Graduate
Some of the International Business Seminars are offered for eight rather than four credits. Students are ordinarily required to complete an in-depth research paper in an international business area approved by the director of the seminar. Information gathered during the seminars with business and governmental organizations must be incorporated into the research paper. IB 750 is a co-requisite for this class.

IB 798
SPECIAL TOPICS
Graduate
Content and format of the course are variable. An in-depth study of current issues. Subject mater will be indicated in class schedule. Offered Variably.

IB 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in international business.

ICE 100
INTRODUCTION TO THE PROFESSION I
Undergraduate
Introduction to chemical engineering and engineering productivity software. Communication skills development, technical reporting and presentation, engineering ethics, and a variety of topics are discussed.
ICE 202  
**MATERIAL AND ENERGY BALANCES**  
Undergraduate  
Material and energy balances for engineering systems subjected to chemical and physical transformations. Calculations on industrial processes. CSC 224/225 or equivalent; MAT 149/152/162 and CHE 113 or CHE 131 recommended. (Taught at IIT as CHE 202)

ICE 239  
**MATHEMATICAL AND COMPUTATIONAL METHODS**  
Undergraduate  
Utilization of numeric and analytic methods to find solutions to a variety of chemical engineering problems. Emphasis placed on development of computer code, and interpretation of results. Topics covered include systems of algebraic equations, initial value differential equations, and boundary value differential equations. Taught at the Illinois Institute of Technology as CHE 239.

ICE 296  
**INTRODUCTION TO IPRO**  
Undergraduate  
Introduction to process design. Principles and techniques in effective team work. Performance of selected design tasks in project groups integrated with ICE 496. Practice with process design software. First part of the ICE 296 - ICE 496 project package. Only chemical engineering students should register for this course. ICE 101, ICE 202, or consent recommended. (Taught at IIT as IPRO 296)

ICE 301  
**FLUID MECHANICS AND HEAT-TRANSFER OPERATIONS**  
Undergraduate  
Flow of fluids and heat transfer. Fundamentals of fluid flow and heat transfer design equations as applied to selected unit operations. ICE 202 and ICE 252 recommended. COREQUISITE(S): ICE 343, MAT 260. Taught at IIT as CHE 301.

ICE 302  
**MASS-TRANSFER OPERATIONS**  
Undergraduate  
Mass transfer in stagewise and continuous contacting equipment. Mass transfer design equations as applied to selected unit operations. Unsteady state operations in mass transfer equipment. (Taught at Illinois Institute of Technology as CHE 302) ICE 301 recommended.

ICE 317  
**CHEMICAL ENGINEERING LABORATORY I**  
Undergraduate  
Laboratory work in the unit operations of chemical engineering, fluid flow, heat transfer, and other selected topics. (Taught at Illinois Institute of Technology as CHE 317) ICE 301 recommended.

ICE 320  
**TRANSPORTATION PHENOMENA**  
Undergraduate  
The equations of change in different coordinate systems (mass, momentum, and energy transport). Velocity distribution in laminar and turbulent flow. Formulation and analytical solutions to the problems of viscous flow, molecular diffusion, heat condition and convection. (Taught at Illinois Institute of Technology as CHE 406) ICE 301, ICE 302 & ICE 252 recommended.

ICE 322  
**CHEMICAL ENGINEERING LABORATORY II**  
Undergraduate  
Laboratory work in distillation, humidification, drying, gas absorption, filtration, and other areas. (Taught at Illinois Institute of Technology as CHE 418)

ICE 324  
**CHEMICAL REACTION ENGINEERING**  
Undergraduate  
Introduction to the fundamentals of chemical kinetics. The design, comparison, and economic evaluation of chemical reactors. Emphasis on homogeneous systems. Taught at Illinois Institute of Technology as CHE 423. ICE 302, ICE 351 and ICE 326 recommended.
ICE 326
PROCESS MODELING AND SYSTEM THEORY
Undergraduate

ICE 328
PROCESS CONTROL
Undergraduate
Dynamic process models, stability assessment, feedback and feedforward control strategies, design and tuning of closed-loop controllers, time domain and frequency domain design and performance assessment methods. Multivariable systems, interaction, multi-loop control. Software for process simulation and controller design. (Taught at Illinois Institute of Technology as CHE 435) ICE 302 and ICE 326 recommended.

ICE 330
NUMERICAL AND DATA ANALYSIS
Undergraduate
Utilization of numerical methods to find solutions to a variety of chemical engineering problems. Emphasis placed on problem formulation, development of computer code, and interpretation of results. Techniques covered include: systems of algebraic equations, linear regression, and statistics. Numerical differentiation and integration, solution of ordinary and partial differential equations. (Taught at Illinois Institute of Technology as CHE 439)

ICE 332
CHEMICAL PROCESS THERMODYNAMICS
Undergraduate
Second law analysis of cooling, separation, combustion, and other chemical processes. Chemical reaction equilibrium and processing applications. ICE 351 recommended.

ICE 334
CHEMICAL PROCESS DESIGN
Undergraduate
Introduction to design techniques and economic aspects of chemical processes. The technical and economic aspects of equipment selection and design, alternative methods of operation. (Taught at Illinois Institute of Technology as CHE 494) ICE 302, ICE 351 and ICE 326 recommended.

ICE 351
CHEMICAL ENGINEERING THERMODYNAMICS
Undergraduate
Laws of thermodynamics and their application to chemical engineering operations.(Taught at IIT as CHE 351) ICE 343 recommended.

ICE 383
ELECTRIC AND ELECTRONIC CIRCUITS
Undergraduate

ICE 397
INTERPROFESSIONAL PROJECT
Undergraduate
Interprofessional projects allow students to learn teamwork, leadership and project management skills, while working in multidisciplinary teams on projects involving technical, ethical, environmental, economic, public policy and legal issues. IPRO project teams are typically comprised of 6-10 students from sophomore through graduate level from all disciplines that can broadly contribute to a project effort. While every effort will be made to accommodate students' first choices, it may be necessary to balance students across all projects that will be scheduled for the semester or to consolidate students into fewer projects to meet minimum team requirements. Specific rules about selection of IPRO projects may apply in certain degree programs. Some projects may carry Humanities or Social Sciences credit. Students must consult the lead faculty member for the project and their faculty advisor before registering for a project. (Taught at Illinois Institute of Technology as IPRO 397)
ICS 200
INTRODUCTION TO BUSINESS
Undergraduate
This course is designed for non-Commerce majors who want a minor in business. The course will help the student develop an understanding of the role of the major functional areas of business, as well as ethical considerations, the globalization of business and the role of entrepreneurship. Considerations will be given to the possible career opportunities in each of the functional areas studied.

Undergraduate Business students (COMM, UNCOM, GPCOM) are restricted from registering for this class.

ICS 201
PERSONAL FINANCIAL DECISION MAKING
Undergraduate
Students will be exposed to a wide variety of money-related topics, with an aim to familiarize the participants with everyday financial issues.

ICS 350
INTERNATIONAL BUSINESS SEMINAR
Undergraduate
This foreign study course is meant to introduce the student to the world of international life and business as it is today. The course provides students the opportunity to visit and study foreign commercial enterprises on-site. Additional emphasis is placed on understanding overseas cultures, self-reference criteria, and the fact that people around the world can maintain/develop hopes and dreams within their own lifestyle even though it may differ from others’. Most courses in this group will count for liberal studies credit as an experiential learning course. See the Director of the Driehaus Center for International Business or the College of Commerce undergraduate office for additional information. Registration with the Driehaus Center is required. International Business Seminars may not be taken Pass/Fail.

ICS 392
SENIOR SEMINAR
Undergraduate
A variety of senior capstone seminars are offered every term. These seminars focus on specific content areas reflecting a wide range of non-business issues that are relevant to business in contemporary society. The learning experience enables students to see the world differently through reflections and interactions, encourages them to develop a broader perspective on how and where business fits in society, and prepares them to communicate and express that perspective orally and in writing.

Senior standing is a prerequisite for this class.

ICS 394
ENTREPRENEURSHIP STRATEGY
Undergraduate
This course is an overview of strategic management applied to entrepreneurial enterprises. General business management problems integrating marketing, accounting, finance and management functions are analyzed from the perspective of the CEO or entrepreneur concerned with start-up and planning of a new venture. The case method is used in this course and real "live" cases may be analyzed. The entrepreneurial process is investigated, including entrepreneurial characteristics, trends in the small business sector of the global economy, start-up and growth strategies and nurturing creativity in organizations. Focus is placed on either a consulting project with a small business or community organization, which may require time outside of class for the project, or on case studies.

(FIN 290 or FIN 310), MGT 300, MKT 310 and senior standing are a prerequisite for this class.

ICS 395
MANAGEMENT STRATEGY
Undergraduate
Management strategy is a course which synthesizes the functional business activities into a general management perspective of the business enterprise. This course presents a conceptual framework for understanding the operation of the firm within the global business environment. Corporate strategy is examined from the perspective of: strategic choice, the link between strategy and organization, and the management of strategic change. Examples will be drawn from service, manufacturing, and not-for-profit organizations. The course emphasizes the use of group decision-making, self-directed work teams, and formal group reports and presentations.

MGT 300, MKT 310 and FIN 310 are a prerequisite for this class.
Hospitality strategy is a capstone course designed to expose students to a strategic perspective on issues that concern the firm as a whole. This viewpoint is integrative in that it draws on concepts from the functional disciplines (i.e. Marketing, Finance, Accounting, Operations) in the diagnosis, analysis and resolution of complex business situations. Students will read, discuss and apply a body of theory and techniques from the field of strategic management. The course emphasizes the development of practical problem solving skills. Corporate strategy is examined from the perspective of: strategic choice, the link between strategy and organization, and the management of strategic change. Examples will be drawn from various hospitality operations around the world. The course emphasizes the use of group decision-making, self-directed work teams, and formal group reports and presentations.

FIN 310, MGT 300, MKT 310 and Senior standing are a prerequisite for this class.

Special Topics. Content and format of this course is variable. Subject matter will be listed in the university class schedule. These courses will be used for a variety of course content and delivery methods including the Foreign Study Seminar Series.

Available to students of demonstrated capability for intensive work in interdisciplinary studies. (variable credit)

Junior standing with at least 88 cumulative units is a prerequisite for this class.

Independent study in an area that does not lead directly into the thesis or capstone. Students may also register for this course on a topic indirectly related to their thesis or capstone if they will subsequently take IDS 498, in which the student directly prepares to write the Integrating Project/Thesis. The MALS and IDS Program requires that students taking independent studies follow a specified format of meeting frequency, activities, and scholarly production. This format is available on the program web site or from the MALS and IDS office. Registration is by permission of the Director of the MALS and IDS Program and the instructor of the independent study.

Independent study undertaken as preparation for thesis or practicum capstone options. This course is optional preparation for IDS 499, Capstone. The MALS and IDS Program requires that students taking this course follow a specified format of meeting frequency, that they produce a review of literature related to their thesis or practicum, an annotated bibliography, and the required Formal Proposal for the thesis or practicum. Registration is by permission of the Director of the MALS and IDS Program and the permission of the instructor who serves as the thesis or practicum director.

Capstone for students doing a thesis, practicum or enhanced portfolio essay. Students may register for this course after the Formal Proposal for the thesis or practicum, or the Enhanced Portfolio Essay Proposal, has been approved. Students are normally expected to complete their capstone projects within the quarter in which they take this course. This course carries four hours of credit. Registration is by permission of the Director of the MALS and IDS Program and the permission of the instructor who serves as the student's capstone director.

Students register for this course during periods when they are not registered for courses but wish to have access to university facilities. Ordinarily students will not use this course once they have been admitted to candidacy during the thesis or capstone.
IDS 502
CANDIDACY CONTINUATION
Graduate
Students who have completed ISP 499 Thesis/Capstone may register for this course in order to have continued access to university facilities. Students may register for this course no more than three times.

IIT 105
INTRODUCTION TO COMPUTER PROGRAMMING I
Undergraduate
Introduces the use of high-level programming language (C/C++) as a problem-solving tool including basic data structures and algorithms, structured programming techniques, and software documentation. Designed for students who have had little or no prior experience with computer programming. (Taught at Illinois Institute of Technology as CS 105.) (3 quarter hours)

IIT 115
ENGINEERING GRAPHICS AND DESIGN
Undergraduate
Basic traditional and computer-based techniques and applications, multiview sketching, orthographic projection, isometric and oblique pictorials, sectioning, auxiliary views, principles of descriptive geometry, dimensioning, detail drawings, introduction to design and computer-aided drafting and design (CAD). (Taught at Illinois Institute of Technology as EG 105.) (3 quarter hours)

IIT 200
INTRODUCTION TO C++ PROGRAMMING
Undergraduate
Problem-solving and program design using C++. Introduces a variety of programming techniques, algorithms, and basic data structures-including an introduction to object-oriented programming. (Taught at Illinois Institute of Technology as CS 200). (4.5 quarter hours)

IIT 201
MECHANICS OF SOLIDS I
Undergraduate
Free body diagrams. Equilibrium of a particle, a system of particles, and a rigid body. Distributed forces, centroids, centers of gravity, and moments of inertia. Analysis of structures. Friction. Internal loads in bars, shafts and beams. Stress and strain in axially loaded members. (Taught at Illinois Institute of Technology as MMAE 201.) (4.5 quarter hours)

IIT 202
MECHANICS OF SOLIDS II
Undergraduate
Stress and strain relations, mechanical properties. Axially loaded members. Torsion of circular shafts. Plane stress and strain, Mohr's circle, stress transformation. Elementary bending theory, normal and shear stresses in beams, beam deflection. Combined loading. (Taught at Illinois Institute of Technology as MMAE 202.) (4.5 quarter hours)

IIT 203
INTRODUCTION TO MECHANICS
Undergraduate

IIT 210
CIRCUIT ANALYSIS I
Undergraduate
Ohm's Law, Kirchoff's Laws, and network element voltage-current relations. Application of mesh and nodal analysis to circuits. Dependent sources, operational amplifier circuits, superposition, Thevenin's and Norton's Theorems, maximum power transfer theorem. Transient circuit analysis for RC, RL, and RLC circuits. Introduction to Laplace Transforms. Concurrent registration in ECE 212 and ECE 218 is strongly encouraged. (Taught at Illinois Institute of Technology as ECE 211. Updated Dec 2015 to reflect change to 3.0 semester hr at IIT) (4.5 quarter hours)
IIT 211  
MATERIALS SCIENCE  
Undergraduate  
The scientific principles determining the structure of metallic, polymeric, ceramic semiconductor and composite materials; electronic structure, atomic bonding, atomic structure, microstructure and macrostructure. The basic principles of structure-property relationships in the context of chemical, mechanical, and physical properties of materials. (Taught at Illinois Institute of Technology as MS 201.) (4.5 quarter hours)

IIT 212  
ANALOG AND DIGITAL LABORATORY  
Undergraduate  
Basic experiments with analog and digital circuits; familiarization with test and measurement equipment; combinational digital circuits; familiarization with latches, flip-flops, and shift registers; operational amplifiers; and transient effects in first-order and second-order analog circuits; PSpice software applications. (Taught at Illinois Institute of Technology as ECE 212) (1.5 quarter hours)

IIT 213  
CIRCUIT ANALYSIS II  
Undergraduate  
Circuit Analysis II  Sinusoidal excitation and phasors. AC steady-state circuit analysis using phasors. Complex frequency, network functions, pole-zero analysis, frequency response, and resonance. Two-port networks, transformers, mutual inductance, AC steady-state power, RMS values, introduction to three-phase systems and Fourier series. Concurrent registration in ECE 214 is strongly encouraged. (Taught at Illinois Institute of Technology as ECE 213) (6 quarter hours)

IIT 214  
ANALOG & DIGITAL LAB II  
Undergraduate  
Design-oriented experiments including counters, finite state machines, sequential logic design, impedances in AC steady-state, resonant circuits, two-port networks, and filters. A final project incorporating concepts from analog and digital circuit design will be required. (Taught at Illinois Institute of Technology as ECE 214) (1.5 quarter hours)

IIT 218  
DIGITAL SYSTEMS  
Undergraduate  
Number systems and conversions, binary codes, and Boolean algebra. Switching devices, discrete and integrated digital circuits, analysis and design of combinational logic circuits. Karnaugh maps and minimization techniques. Counters and registers. Analysis and design of synchronous sequential circuits. (Taught at IIT as ECE 218) Was previously 4.5 hr, changed to 6.0 hr in August 2015 to reflect change in IIT. (6 quarter hours)

IIT 232  
DESIGN FOR INNOVATION  
Undergraduate  
Product design and development including engineering design, good versus bad design, human-centered design, sketch models and prototyping, material selection, sustainable product development, product tear down, and product architecture. Global topics encompassing intellectual property, innovative thinking, global competitiveness, business economics, and managing product development (Taught at IIT as MMAE 232). (4.5 quarter hours)

IIT 242  
DIGITAL COMPUTERS & COMPUTING  
Undergraduate  
Basic concepts in computer architecture, organization, and programming, including: integer and floating point number representations, memory organization, computer processor operation (the fetch/execute cycle), and computer instruction sets. Programming in machine language and assembly language with an emphasis on practical problems. Brief survey of different computer architectures. (Taught at Illinois Institute of Technology as ECE 242) (4.5 quarter hours)
IIT 252
INTRODUCTION TO DIFFERENTIAL EQUATIONS
Undergraduate
Linear differential equations of order one. Linear differential equations of higher order. Series solutions of linear DE. Laplace transforms and their use in solving linear DE. Introduction to matrices. Systems of linear differential equations. (Taught at Illinois Institute of Technology as MATH 252) (6 quarter hours)

IIT 271
ENGINEERING MATERIALS AND DESIGN
Undergraduate
Mechanical behavior of metals, polymers, ceramics and composites, laboratory testing methods including tension, torsion, hardness, impact, toughness, fatigue and creep. Evaluation of structural performance in terms of material processing, service conditions and design. (Taught at Illinois Institute of Technology as MMAE 271.) (4.5 quarter hours)

IIT 300
INSTRUMENTATION LAB
Undergraduate
Basic electronic skills for scientific research. Electrical measurements, basic circuit analysis, diode and transistor circuits. Transistor and integrated amplifiers, filters, and power circuits. Basics of digital circuits, including Boolean algebra and design of logic circuits. (Taught at Illinois Institute of Technology as PHYS 300) (4.5 quarter hours)

IIT 301
COMMUNICATION ELECTRONICS
Undergraduate
Radio frequency AM, FM, and PM transmitter and receiver principles. Design of mixers, oscillators, impedance matching networks, filters, phase-locked loops, tuned amplifiers, power amplifiers, and crystal circuits. Nonlinear effects, intermodulation distortion, and noise. Transmitter and receiver design specification. Credit will be given for either ECE 401 or ECE 409, but not for both. (Taught at IIT as ECE 401) (4.5 quarter hours)

IIT 302
ADVANCED MECHANICS OF SOLIDS
Undergraduate

IIT 304
MECHANICS OF AEROSTRUCTURES
Undergraduate
Loads on aircraft, and flight envelope. Stress, strain and constitutive relations. Torsion of open, closed and multi-cell tubes. Energy methods. Castigliano's theorems. Structural instability. (Taught at Illinois Institute of Technology as MMAE 304) (4.5 quarter hours)

IIT 305
DYNAMICS
Undergraduate
Kinematics of particles. Kinetics of particles: Newton's laws of motion, energy; momentum. Systems of particles. Kinematics of rigid bodies. Plane motion of rigid bodies: forces and accelerations, energy, momentum. (Taught at Illinois Institute of Technology as MMAE 305.) (4.5 quarter hours)

IIT 306
MECHANICS OF SOLIDS AND DESIGN
Undergraduate
IIT 307
ELECTRODYNAMICS
Undergraduate

IIT 308
SIGNALS AND SYSTEMS
Undergraduate
Time and frequency domain representation of continuous and discrete time signals. Introduction to sampling and sampling theorem. Time and frequency domain analysis of continuous and discrete linear systems. Fourier series convolution, transfer functions. Fourier transforms, Laplace transforms, and Z-transforms. (Taught at Illinois Institute of Technology as ECE 308) (4.5 quarter hours)

IIT 310
FLUID MECHANICS WITH LABORATORY
Undergraduate
Basic properties of fluids in motion. Lagrangian and Eulerian viewpoints, material derivative, streamlines, etc. Continuity, energy and linear and angular momentum equations in integral and differential forms. Integration of equations for one-dimensional flows and application to problems. Incompressible viscous flow; Navier-Stokes equations, parallel flow, pipe flow, and the Moody diagram. Introduction to laminar and turbulent boundary layers and free surface flows. Lab Component: Introduction to measurements of fluid properties and basic features of fluid flows; flow through pipes and channels, flow-induced forces on bodies; First Law of Thermodynamics; six laboratory experiments in small groups supplemented by demonstrations and films. (Taught at Illinois Institute of Technology as MMAE 310.) (4.5 quarter hours)

IIT 311
COMPRESSIBLE FLOW
Undergraduate
Regimes of compressible perfect-gas flow. Steady, quasi one-dimensional flow in passages. Effects of heat addition and friction in ducts. Design of nozzles, diffusers and wind tunnels. Simple waves and shocks in unsteady duct flow. Steady two-dimensional supersonic flow including oblique shocks and Prandtl-Meyer expansions. (Taught at Illinois Institute of Technology as MMAE 311) (4.5 quarter hours)

IIT 312
AERODYNAMICS OF AEROSPACE VEHICLES
Undergraduate
Analysis of aerodynamic lift and drag forces on bodies. Potential flow calculation of lift on two-dimensional bodies: numerical solutions; source and vortex panels. Boundary layers and drag calculations. Aerodynamic characteristics of airfoils; the finite wing. (Taught at Illinois Institute of Technology as MMAE 312) (4.5 quarter hours)

IIT 313
ENGINEERING ELECTRONICS
Undergraduate
Physics of semiconductor devices. Diode operation and circuit applications. Regulated power supplies. Bipolar and field-effect transistor operating principles. Biasing techniques and stabilization. Linear equivalent circuit analysis of bipolar and field-effect transistor amplifiers. Laboratory experiments reinforce concepts. (Taught at Illinois Institute of Technology as ECE 311) (6 quarter hours)

IIT 314
ELECTRONIC CIRCUITS
Undergraduate
Analysis and design of amplifier circuits. Frequency response of transistor amplifiers. Feedback amplifiers. Operational amplifiers: internal structure, characteristics and applications. Stability and compensation. Laboratory experiments reinforce concepts. (Taught at Illinois Institute of Technology as ECE 312) (6 quarter hours)
Basic properties of fluids in motion. Lagrangian and Eulerian viewpoints, materials derivative, streamlines, etc. Continuity, energy, and linear and angular momentum equations in integral and differential forms. Integration of equations for one-dimensional forms and application to problems. Incompressible viscous flow; Navier-Stokes equations, parallel flow, pipe flow, and the Moody diagram. Introduction to laminar and turbulent boundary layers and free surface flows (Taught at IIT as MMAE 313). (4.5 quarter hours)

Fundamentals of electric motor drives are studied. Applications of semiconductor switching circuits to adjustable speed drives, robotic, and traction are explored. Selection of motor drives, calculating the ratings, speed control, position control, starting, and braking are also covered. Simulation mini-projects and lab experiments are based on the lectures given. (Taught at Illinois Institute of Technology as ECE 412.) (6 quarter hours)

Emphasis on the physical, data link, and medium access layers of the OSI architecture. Different general techniques for networking tasks, such as error control, flow control, multiplexing, switching, routing, signaling, congestion control, traffic control, scheduling will be covered along with their experimentation and implementation in a laboratory. (Taught at Illinois Institute of Technology as ECE 407) (6 quarter hours)

Emphasis on the physical, data link and medium access layers of the OSI architecture. Different general techniques for networking tasks, such as error control, flow control, multiplexing, switching, routing, signaling, congestion control, traffic control, scheduling will be covered. (Taught at Illinois Institute of Technology as ECE 408.) (4.5 quarter hours)

Principles of electromechanical energy conversion. Fundamentals of the operation of transformers, synchronous machines, induction machines, and fractional horsepower machines. Introduction to power network models and per-unit calculations. Gauss-Siedel load flow. Lossless economic dispatch. Symmetrical three-phase faults. Laboratory considers operation, analysis and performance of motors and generators. The laboratory experiments also involve use of PC-based interactive graphical software for load flow, economic dispatch, and fault analysis. (Taught at Illinois Institute of Technology as ECE 319) (6 quarter hours)

Introduction to thermodynamics including properties of matter: First Law of Thermodynamics; and its use in analyzing open and closed systems; limitations of the Second Law of thermodynamics; entropy. (Taught at Illinois Institute of Technology as MMAE 320.) (4.5 quarter hours)

IIT 322
HEAT AND TRANSFER
Undergraduate

IIT 323
MICROWAVE CIRCUITS AND SYSTEMS WITH LABORATORY
Undergraduate
Maxwell's equations, waves in free space, metallic and dielectric waveguides, microstrips, microwave cavity resonators and components, ultra-high frequency generation and amplification. Analysis and design of microwave circuits and systems. (Taught at IIT as ECE 423) (6 quarter hours)

IIT 324
HEAT AND MASS TRANSFER
Undergraduate
Basic laws of transport phenomena, including: steady-state heat conduction; multi-dimensional and transient conduction; forced internal and external convection; natural convection; heat exchanger design and analysis; fundamental concepts of radiation; shape factors and network analysis; diffusive and convective mass transfer; phase change, condensation and boiling. (Taught at Illinois Institute of Technology as MMAE 323.) (4.5 quarter hours)

IIT 325
ANALYSIS AND DESIGN OF INTEGRATED CIRCUITS
Undergraduate
Contemporary analog and digital integrated circuit analysis and design techniques. Bipolar, CMOS and BiCMOS IC fabrication technologies, IC Devices and Modeling, Analog ICs including multiple-transistor amplifiers, biasing circuits, active loads, reference circuits, output buffers; their frequency response, stability and feedback consideration. Digital ICs covering inverters, combinational logic gates, high-performance logic gates, sequential logics, memory and array structures. Team design projects. (Taught at IIT as ECE 425) (4.5 quarter hours)

IIT 329
INTRODUCTION TO VLSI DESIGN
Undergraduate
Processing, fabrication, and design of Very Large Scale Integration (VLSI) circuits. MOS transistor theory, VLSI processing, circuit layout, layout design rules, layout analysis, and performance estimation. The use of computer-aided design (CAD) tools for layout design, system design in VLSI, and application-specific integrated circuits (ASICs). In the laboratory, students create, analyze, and simulate a number of circuit layouts as design projects, culminating in a term design project. (Taught at IIT as ECE 429) (6 quarter hours)

IIT 330
ENGINEERING MEASUREMENTS
Undergraduate
Introduction to applications of measurement instrumentation and design of engineering experiments. Generalized characteristics of sensors and measurements systems. Signal conditioning and computer-based data acquisition and analysis. Measurement of motion, force, strain, torque, shaft power, pressure, sound, flow, temperature and heat flux. Design of experiments proposals. Team-based projects addressing application of engineering measurements to a variety of engineering problems. Effective communication of experimental results. (Taught at Illinois Institute of Technology as MMAE 430.) (6 quarter hours)

IIT 331
POWER ELECTRONICS
Undergraduate
Power electronic circuits and switching devices such as power transistors, MOSFET's, SCR's, GTO's, IGBT's and UJT's are studied. Their applications in AC/DC DC/DC, DC/AC and AC/AC converters as well as switching power supplies are explained. Simulation mini-projects and lab experiments emphasize power electronic circuit analysis, design and control. (Taught at Illinois Institute of Technology as ECE 411.) (6 quarter hours)
IIT 332
DESIGN OF MECHANICAL SYSTEMS
Undergraduate
Small-group design projects drawn from industry. (Taught at Illinois Institute of Technology as MMAE 432) (4.5 quarter hours)

IIT 333
DESIGN OF THERMAL SYSTEM
Undergraduate
Application of principles of fluid mechanics, heat transfer, and thermodynamics to design of components of engineering systems. Examples are drawn from power generation, environmental control, air and ground transportation, and industrial processes, as well as other industries. Groups of students work on projects for integration of these components and design of thermal systems. (Taught at Illinois Institute of Technology as MMAE 433) (4.5 quarter hours)

IIT 334
MATRIX ALGEBRA AND COMPLEX VARIABLES
Undergraduate
Vectors and matrices; matrix operations, transpose, rank, inverse; determinants; solution of linear systems; eigenvalues and eigenvectors. The complex plane; analytic functions; contour integrals; Laurent series expansions; singularities and residues. (Taught at Illinois Institute of Technology as MATH 333) (4.5 quarter hours)

IIT 335
DESIGN OF MACHINE ELEMENTS
Undergraduate
Students will gain an understanding of the basic elements used in machine design. These include the characteristics of gears, bearings, shafts, keys, couplings, fasteners, springs, electric motors, brakes and clutches, and flexible elements. Students will also learn mechanism types, linkage analysis, and kinematic synthesis. (Taught at Illinois Institute of Technology as MMAE 332.) (4.5 quarter hours)

IIT 336
DESIGN OF AEROSPACE VEHICLES I
Undergraduate
The focus of this course is on applications ranging from commercial to military and from manpowered to high-speed to long-duration aircraft. Students will examine aircraft design including aerodynamic, structural and powerplant characteristics to achieve performance goals. The quarter project is a collaborative effort in which small design groups complete the preliminary design cycle of an aircraft to achieve specific design requirements. (Taught at Illinois Institute of Technology as MMAE 436) (4.5 quarter hours)

IIT 337
DIGITAL SIGNAL PROCESSING I
Undergraduate
Discrete-time system analysis, discrete convolution and correlation, Z transforms. Realization and frequency response of discrete-time systems, properties of analog filters, IIR filter design, FIR filter design. Discrete Fourier Transforms. Applications of digital signal processing. (Taught at IIT as ECE 436-with lab, or ECE 437-without lab.) (4.5 quarter hours)

IIT 338
CONTROL SYSTEMS
Undergraduate
Signal-flow graphs and block diagrams. Types of feedback control. Steady-state tracking error. Stability and Routh Hurwitz criterion. Transient response and time domain design via root locus methods. Frequency domain analysis and design using Bode and Nyquist methods. Introduction to state-variable descriptions. Credit will be given for either ECE 438 or ECE 434, but not for both. (Taught at IIT as ECE 438) (4.5 quarter hours)

IIT 339
DESIGN OF AEROSPACE VEHICLES II
Undergraduate
Spacecraft systems design including mission analysis and astrodynamics, launch vehicle requirements, attitude determination and control, propulsion, structural design, power systems thermal management, and telecommunications. Semester-long project is focused on the integration of multiple systems into a coherent spacecraft design to achieve specific mission requirements. (Taught at IIT as MMAE 437). (4.5 quarter hours)
The goals of this course are to give the student an understanding of the physical and operational principles behind important electronic devices such as transistors and solar cells. Semiconductor electron and hole concentrations, carrier transport, and carrier generation and recombination are discussed. P-N junction operation and its application to diodes, solar cells, and LEDs are developed. The field-effect transistor (FET) and bipolar junction transistor (BJT) are then discussed and their terminal operation developed. Application of transistors to bipolar and CMOS analog and digital circuits is introduced. (Taught at Illinois Institute of Technology as ECE 430.) (4.5 quarter hours)

IIT 341
SPACECRAFT AND AIRCRAFT DYNAMICS
Undergraduate
Kinematics and dynamics of particles, systems of particles, and rigid bodies; translating and rotating reference frames; Euler angles. Aircraft longitudinal and lateral static stability; aircraft equations of motion. Spacecraft orbital dynamics; two-body problem classical orbital elements; orbital maneuvers. (Taught at Illinois Institute of Technology as MMAE 441) (4.5 quarter hours)

IIT 342
SPACECRAFT DYNAMICS
Undergraduate
Orbital mechanics: two-body problem, Kepler's equation, classical orbital elements, and introduction to orbit perturbations. Spacecraft mission analysis: orbital maneuvers and station keeping, earth orbiting, lunar, and interplanetary missions, introduction to orbit determination. Spacecraft attitude dynamics: three-dimensional kinematics and dynamics of spacecraft, rotating reference frames and orientation angles, and spacecraft equations of motion. Spacecraft attitude stability and control: dual-spin platforms, momentum wheels, control-moment gyros, gravity gradient stabilization, introduction to spacecraft attitude determination and control. (Taught at Illinois Institute of Technology as MMAE 411) (4.5 quarter hours)

IIT 343
SYSTEMS ANALYSIS AND CONTROL
Undergraduate

IIT 344
MICROCOMPUTERS
Undergraduate
Microprocessors and stored program controllers. Memories. Standard and special interfaces. Hardware design. Software development. Interrupt systems. Hardware and software design tools. System design and troubleshooting. Emphasis on examples (Taught at IIT as ECE 441). (6 quarter hours)

IIT 345
COMPUTER-AIDED DESIGN
Undergraduate

IIT 346
ADVANCED LOGIC DESIGN
Undergraduate
Design and implementation of complex digital systems under practical design constraints. Timing and electrical considerations in combinational and sequential logic design. Digital system design using Algorithmic State Machine (ASM) diagrams. Design with modern logic families and programmable logic. Design-oriented laboratory stressing the use of programmable logic devices (Taught at IIT as ECE 446). (6 quarter hours)
Basic skills for engineering research are taught, which include: analog electronic circuit analysis; fundamentals of digital data acquisition; measurements of pressure, temperature, flow rate, heat transfer, and static forces and moments; and statistical date analysis. (Taught at Illinois Institute of Technology as MMAE 319.) (6 quarter hours)

Taught at IIT as MMAE 450. (4.5 quarter hours)

Analysis and performance of various jet and rocket propulsive devices. Foundations of propulsion theory. Design and analysis of inlets, compressors, combustion chambers, and other elements of propulsive devices. Emphasis is placed on mobile power plants for aerospace applications. (Taught at Illinois Institute of Technology as MMAE 452) (4.5 quarter hours)

Anatomy of the cardiovascular system. Scaling principles. Lumped parameter, one-dimensional linear and nonlinear wave propagation, and three-dimensional modeling techniques applied to simulate blood flow in the cardiovascular system. Steady and pulsatile flow in rigid and elastic tubes. Form and function of blood, blood vessels, and the heart from an engineering perspective. Sensing, feedback, and control of the circulation. Possible project using custom software to run blood flow simulations (Taught at IIT as MMAE 455). (4.5 quarter hours)

Discrete-time system analysis, discrete convolution and correlation, Z-transforms. Realization and frequency response of discrete-time systems, properties of analog filters, IIR filter design, FIR filter design. Discrete Fourier Transforms. Applications of digital signal processing. (Taught at Illinois Institute of Technology as ECE 436.) (6 quarter hours)

The use of object-oriented programming to develop computer simulations of engineering problems. Programming with the C++ language in a UNIX environment. OOP concepts including classes, inheritance, and polymorphism. Programming with classes, inheritance, and polymorphism. Programming with class libraries. Event-driven simulation techniques in an object-oriented environment. Programming projects will include the development of a simulator for an engineering application. (Taught at Illinois Institute of Technology as ECE 449.) (4.5 quarter hours)

Launch vehicle design including a system engineering, pay- load mission definition, propulsion and staging, structural design, trajectory analysis and guidance, launch window considerations, navigation and attitude determination, booster re-entry, range safety, and reliability. Semester-long project is focused on the integration of multiple systems into a coherent launch vehicle design to achieve specific mission requirements. (Taught at Illinois Institute of Technology as MMAE 412.) (4.5 quarter hours)

Spacecraft systems design including real world mission analysis and orbit design, launch vehicle requirements, attitude determination and control, propulsion, structural design, power systems thermal management, and telecommunications. Semester-long project is focused on the integration of multiple systems into a coherent spacecraft design to achieve specific mission requirements. (Taught at Illinois Institute of Technology as MMAE 413.) (4.5 quarter hours)
IIT 364
PROBABILITY AND STATISTICS FOR ELECTRICAL AND COMPUTER ENGINEERS
Undergraduate
This course focuses on the introductory treatment of probability theory including: axioms of probability, discrete and continuous random variables, random vectors, marginal, joint, conditional and cumulative probability distributions, moment generating functions, expectations, and correlations. Also covered are sums of random variables, central limit theorem, sample means, and parameter estimation. Furthermore, random processes and random signals are covered. Examples and applications are drawn from problems of importance to electrical and computer engineers. (Taught at Illinois Institute of Technology as MATH 374.) (4.5 quarter hours)

IIT 365
AEROSPACE LABORATORY I
Undergraduate
Basic skills for engineering research are taught, which include: analog electronic circuit analysis, fundamentals of digital data acquisition, measurements of pressure, temperature, flow rate, heat transfer, and static forces and moments; statistical data analysis. (Taught at Illinois Institute of Technology as MMAE 315.) (6 quarter hours)

IIT 366
AEROSPACE LABORATORY II
Undergraduate
Advanced skills for engineering research are taught, which include experiments with digital electronic circuit analysis, dynamic data acquisition techniques, fundamentals of fluid power system design, GPS and inertial guidance systems, air-breathing propulsion, and fly-by-wire control. (Taught at Illinois Institute of Technology as MMAE 415.) (6 quarter hours)

IIT 369
MECHANICAL LABORATORY II
Undergraduate
Laboratory testing methods including solid mechanics: tension, torsion, hardness, impact, toughness, fatigue and creep; heat and mass transfer: conduction, fins, convection, radiation, diffusion; vibrations and control. Design of experiments. (Taught at Illinois Institute of Technology as MMAE 419.) (6 quarter hours)

IIT 371
ENGINEERING MATERIALS AND DESIGN
Undergraduate
Mechanical behavior of metals, polymers, ceramics and composites, laboratory testing methods including tension, torsion, hardness, impact, toughness, fatigue and creep. Evaluation of structural performance in terms of material processing, service conditions and design. (Taught at Illinois Institute of Technology as MMAE 371) (4.5 quarter hours)

IIT 372
HEALTH PHYSICS
Undergraduate
This course covers topics in Radiation Physics, including general aspects of radioactivity, radioactive series decay, alpha particle energies, beta decays, electron capture, gamma ray emission, interaction of radiation with matter, two-particle collisions, elastic scattering, interaction of heavy charged particles with matter, Coulomb force interactions, radiative stopping power, collision stopping power for heavy charged particles, interaction of light charged particles with matter, and bremsstrahlung radiation (Taught at IIT as PHYS 571) (4.5 quarter hours)

IIT 373
HEALTH PHYSICS II
Undergraduate
Continuation of the basic health physics sequence, including neutron production and interaction with matter; methods of radiation detection; radiation dosimetry; chemical and biological effects of radiation; radiation protection standards; shielding; dosimetric models; accelerator, reactor and medical health physics. (Taught at IIT as PHYS 572) (4.5 quarter hours)
IIT 374
PROBABILITY AND STATISTICS
Undergraduate
Elementary probability theory including discrete and continuous distributions, sampling, estimation, confidence intervals, hypothesis testing, and linear regression. Credit not granted for both MATH 474 and MATH 475. (Taught at Illinois Institute of Technology as MATH 474) (4.5 quarter hours)

IIT 375
AEROSPACE MATERIALS LAB
Undergraduate
Taught at IIT as MMAE 372. (4.5 quarter hours)

IIT 378
POWER SYSTEMS ANALYSIS
Undergraduate
Transmission systems analysis and design. Large scale network analysis using Newton-Raphson load flow. Unsymmetrical short-circuit studies. Detailed consideration of the swing equation and the equal-area criterion for power system stability studies. (Taught at Illinois Institute of Technology as ECE 418.) (4.5 quarter hours)

IIT 379
POWER SYSTEMS ANALYSIS WITH LABORATORY
Undergraduate
Transmission systems analysis and design. Large scale network analysis using Newton-Raphson load flow. Unsymmetrical short-circuit studies. Detailed consideration of the swing equation and the equal-area criterion for power system stability studies. Use of commercial power system analysis tool to enhance understanding in the laboratory. (Taught at Illinois Institute of Technology as ECE 419.) (6 quarter hours)

IIT 380
ANALYTICAL METHODS IN POWER SYSTEMS
Undergraduate
Fundamentals of power systems operation and planning. Economic operation of power systems with consideration of transmission losses. Design of reliable power systems, power systems security analysis, optimal scheduling of power generation, estimation of power system state. (Taught at Illinois Institute of Technology as ECE 420.) (4.5 quarter hours)

IIT 385
MANUFACTURING PROCESSES
Undergraduate
Principles of material forming and removal processes and equipment. Force and power requirements, surface integrity, final properties and dimensional accuracy as influenced by material properties and process variables. Design for manufacturing. Factors influencing choice of manufacturing process. (Taught at Illinois Institute of Technology as MMAE 485.) (4.5 quarter hours)

IIT 386
COMPUTER ORGANIZATION AND DESIGN
Undergraduate
This course covers basic concepts and state-of-the-art developments in computer architecture: computer technology, performance measures, instruction set design, computer arithmetic, controller and datapath design, memory systems, pipelining, array processing, parallel processing, multiprocessing, abstract analysis models, input-output systems, relationship between computer design and application requirements, and cost/performance trade-offs. Students will complete a project implementing a version of multiple-cycle processor. Credit will be given for either ECE 485 or CS 470, but not both (Taught at IIT as ECE 485). (4.5 quarter hours)

IIT 387
IIT ELECTIVE
Undergraduate
Elective courses taken at IIT with permission of advisor. (variable credit)
IIT 391
IIT CO-OP
Undergraduate
The student will participate in on-site or off-site activity (including, but not limited to, production or research activity). The student will be responsible for, e.g., designing, testing and deploying hardware or software, and may be involved in production level issues. Typically, this position will be a coop at some institution designated by IIT. (variable credit)

IIT 397
INTER-PROFESSIONAL PROJECT
Undergraduate
Interprofessional projects allow students to learn teamwork, leadership and project management skills while working in multidisciplinary teams on projects involving technical, ethical, environmental, economic, public policy and legal issues. IPRO project teams are typically comprised of six to ten students from sophomore through graduate level and from all disciplines, who can broadly contribute to a project effort. While every effort will be made to accommodate students’ first choices, it may be necessary to balance students across all projects scheduled for the semester or to consolidate students into fewer projects to meet minimum team requirements. Specific rules about selection of IPRO projects may apply in certain degree programs. Some projects may carry humanities or social sciences credit. Students must consult the lead faculty member for the project and their faculty adviser before registering for a project. (Taught at Illinois Institute of Technology as IPRO 497; formerly IPRO 397) (4.5 quarter hours)

IIT 398
INTER-PROFESSIONAL PROJECT
Undergraduate
Interprofessional projects allow students to learn teamwork, leadership and project management skills while working in multidisciplinary teams on projects involving technical, ethical, environmental, economic, public policy and legal issues. IPRO project teams are typically comprised of six to ten students from sophomore through graduate level and from all disciplines, who can broadly contribute to a project effort. While every effort will be made to accommodate students’ first choices, it may be necessary to balance students across all projects scheduled for the semester or to consolidate students into fewer projects to meet minimum team requirements. Specific rules about selection of IPRO projects may apply in certain degree programs. Some projects may carry humanities or social sciences credit. Students must consult the lead faculty member for the project and their faculty adviser before registering for a project. (Taught at Illinois Institute of Technology as IPRO 497) (4.5 quarter hours)

ILL 200
ILLUSTRATION FOUNDATIONS
Undergraduate
This course will focus on improving the basic skills needed for creating concept art and storyboards for animation and games. Areas of focus include practical perspective, technical rendering, observational drawing and color theory. These skills will be applied in basic prototyping projects. PREREQUISITE(S): GD 105 or ANI 105

ILL 206
HISTORY OF COMICS
Undergraduate
This course will cover the history of the art form collectively known as "comics" --mechanically reproduced graphic storytelling--which includes comic strips, comic books, graphic novels, Japanese manga and online comics. Students will be introduced to the evolution of the art form from 18th century precursors, to late 19th century newspaper pages, to the 20th century comic book, through today's sophisticated graphic novels. The course will devote considerable time to comics of other cultures, with special emphasis on Japan and Europe. It will also examine the relationship of comics to culture at large, and the struggle of underground and alternative comic artists to explore adult subjects such as politics and gender.

ILL 210
DIGITAL ILLUSTRATION I
Undergraduate
Introduction to illustration development in image, line and photography, combining computer applications and hand-rendered approaches. PREREQUISITE(S): GD 105, ART 105, ANI 105 or GPH 211

ILL 211
INTERMEDIATE DIGITAL ILLUSTRATION
Undergraduate
Intermediate practice for illustration development in image, line and photography, combining computer applications and hand-rendered approaches, will be studied. PREREQUISITE(S): GD 105 or ANI 105 or ART 106
ILL 220  
MAKING COMICS  
Undergraduate  
This course introduces students to the components of graphic narrative, including superhero and alternative comics, comic strips, manga, and graphic novels. Students will learn fundamental materials and techniques, including penciling and inking, digital painting and coloring, and publishing, and create their own graphic narratives. The course will also provide an overview of the history of comics and graphic storytelling, and their relation and importance to the art of animation. PREREQUISITE(S): ART 106

IM 208  
VIRTUAL WORLDS AND ONLINE COMMUNITIES  
Undergraduate  
Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cyberculture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging. PREREQUISITE(S) WRD 104

IM 210  
INTRODUCTION TO HUMAN-COMPUTER INTERACTION  
Undergraduate  
This course familiarizes students with the user interface development process, including user and task analysis, interaction design, prototyping and evaluation. Students study human perception, cognition and motor abilities as they relate to the design of interactive systems. In a series of projects, students design and revise prototypes as they apply a user-centered design process. Emphasized topics include user profiles, information architecture and usability testing. Students provide written analysis of their research and process. PREREQUISITE(S): None

IM 220  
INTERACTIVE MEDIA I  
Undergraduate  
This course applies interactive media principles for a variety of contexts with a goal of exploring relative merits among common interaction paradigms. Based on assessed needs and intended functionality, students create working prototypes that demonstrate a range of design patterns, particularly those with a high level of interactivity such as rich internet applications, games, and visual simulations. Emphasis is given to visual design principles and aesthetics for creating interesting and engaging interactive experiences. PREREQUISITE(S): ANI 105

IM 222  
INFORMATION VISUALIZATION  
Undergraduate  
This course discusses the basic problems and techniques of visualizing quantitative and qualitative data. Topics include: perception, types of information, representation of univariate and multivariate data and relational information, analysis of representations, presentation, and dynamic and interactive visualizations. Students will create visualizations using graphical software PREREQUISITES: LSP 120

IM 230  
SCRIPTING FOR INTERACTIVE MEDIA  
Undergraduate  
This course is an introduction to Object-Oriented programming using Flash ActionScript. Subjects covered include variables, loops, conditionals, event handling, and classes, and how they are used to create real-world interactive web applications and animations. PREREQUISITE(S): None

IM 315  
THEORY AND PERCEPTION OF COLOR  
Undergraduate  
(Formerly HCI 315) A problem-based course introducing additive and subtractive colors systems and their technology. It explores the perceptual phenomena of color relationships and their applications in digital environments. PREREQUISITE(S): IM 210 and (GPH 211 or GD 105)
IM 320
INTERACTIVE MEDIA II
Undergraduate
This course will use complex interactive web projects to challenge students to solve real-world problems. Students will build upon the organizational and analytical strategies learned in IM I while expanding their knowledge of Flash subjects such as site integration, utilizing remote data and manipulating video. PREREQUISITE(S): IM 220 Interactive Media I

IM 330
ADVANCED SCRIPTING FOR INTERACTIVE MEDIA
Undergraduate
This course builds on the Flash ActionScript programming skill learned in Scripting for Interactive Media. Students will focus on designing, coding and debugging complex applications. PREREQUISITE(S): IM 230 Scripting for Interactive Media

IM 332
USER-CENTERED WEB DEVELOPMENT
Undergraduate
(Formerly HCI 332) Analysis, design, and development of interactive web sites. Advanced application of HTML and style sheets for user-centered design. Survey of client-side technologies for interactive Web use. PREREQUISITES: IT 130.

IM 360
USER-CENTERED EVALUATION
Undergraduate
(Formerly HCI 360) Overview of user research and usability evaluation methods. User research includes interviews, profiles and scenarios. Usability evaluation methods include expert inspections and usability testing. PREREQUISITE(S): IM 210.

IM 394
HUMAN-COMPUTER INTERACTION CAPSTONE COURSE
Undergraduate
(Formerly HCI 394) Provides an opportunity for students to apply all of the skills they have learned on one comprehensive project. Multi-disciplinary teams design, evaluate, and implement a user interface intensive project. Students prepare written documents describing their activities and present the final results to the class. (PREREQUISTE(S):Senior standing).

IN 110
LIVING AND WORKING IN A GLOBAL ENVIRONMENT
Undergraduate
This course will address dilemmas and opportunities that individuals may encounter as they work or study in multicultural and global environments. The purpose of this course is to increase the effectiveness of individuals in identifying, understanding and managing cultural differences in the workplace as well as outside of it. A variety of learning methods will be used, including lectures, readings, case studies, videotapes, critical incidents, and small group research and presentation. Guest speakers will be invited to share their experiences with the class. (2 quarter hours)

IN 117
ART IN CHICAGO
Undergraduate
This course centers on two distinctive but very different resources for art studies in Chicago: the Terra Museum of American Art and the Museum of Contemporary Art (MCA). The Terra Museum focuses mainly on 19th and 20th century American art, especially the luminous landscapes of American Impressionists. The MCA concentrates on the last 50 years in art, from surrealism through pop art, earth art, video art, and new developments reaching all the way up to today. Both museums are expanding, presenting students with opportunities to take part in museum tours, talks, publications, and lecture series. (2 quarter hours)

LL 250 is a prerequisite for this class.
IN 200
GUIDED INDEPENDENT STUDY: ADVANCED
Undergraduate
Guided Independent Study: Advanced (2 quarter hours)

LL 250 is a prerequisite for this class.

IN 203
WRITING AND EDITING THE SNL NEWSLETTER
Undergraduate
Working on a newsletter gives students the opportunity to learn and demonstrate communications competence that can have real value in the world of work. Students have the opportunity to plan, write, edit, and produce an issue of a newsletter on a subject of their choice. After registering, students should contact the instructor for an initial individual meeting. (2 quarter hours)

LL 250 is a prerequisite for this class.

IN 205
CREATIVE WRITING: INTRODUCTION TO POETRY
Undergraduate
Poetry is one of the most ancient and common forms of verbal expression. In this course, you will read selections from the works of eight poets whose work has greatly influenced 20th century American poetry (six from the course text, two of your own choosing, with approval of instructor). You will then create, for each poet, a poem modeled upon his or her work. Most will be free verse; specific instructions on theme and approach will be given. You will also keep a journal exploring your poetic efforts. Course requires access to email. (2 quarter hours)

IN 207
CREATIVE WRITING: FORMS OF POETRY
Undergraduate
Although much contemporary poetry is written in unrhymed free verse, there are many other options available to the aspiring poet. In this internet-based course, you will select six traditional poetic forms from more than ten possibilities; forms include the sonnet, villanelle, ballad, rhymed free verse, charm, haiku/tanka, pantoum and others. You will examine several excellent examples of the poetic form, then write your own poem in that form. (2 quarter hours)

IN 221
STORYTELLING IN A DIGITAL WORLD
Undergraduate
Students analyze examples of digital storytelling on the web and discuss the role digital forms of storytelling and their technologies play in historical, social, political, educational, professional, and personal change and memory. Students explore storytelling first through oral discussion and writing and then through use of image, audio, and/or video. They will learn the creative and technical processes of digital storytelling, which involves planning, story development, audio/visual/textual design, editing, and presentation on the web. This course does not require prior knowledge of audio/visual/video/web editing software or html.

LL 250 is a prerequisite for this class.

IN 230
ANIMALS AND CONTEMPORARY LIFE
Undergraduate
This is a Service Learning, Externship. Students will pursue literature on the historical connections between animals and humans, and will review philosophies concerning treatment of animals. Students will also be exposed to current issues in animal welfare, including a volunteer experience in an animal shelter. In this course, faculty will provide a framework for assessing the roles and condition of animals, particularly domestic animals, in our culture. Assigned readings range from Peter Singer's noted work on animal experimentation Animal Liberation to excerpts from Black Elk Speaks, a Native American treatise on hierarchy and respect for life in American aboriginal culture. Students will pursue their own interests through further readings and commentary.
IN 231
EXPLORING CHICAGO POLITICS
Undergraduate
This Faculty Designed Independent Study (FDIS) will introduce SNL students to Chicago's political institutions: City Hall, the city's system of 50 wards, its current aldermen, its city council, its mayor, its elections, hot issues, and its raucous history of scandals and reform movements. Additionally, students will examine contemporary political/social issues which come before the current Mayor and City Council during the Quarter.

LL 250 is a prerequisite for this class.

IN 233
THE ETHNIC MUSEUMS OF CHICAGO: CULTURAL HISTORIES
Undergraduate
This course offers students opportunities to explore, compare and utilize some of the fascinating ethnic museums of Chicago devoted to Polish, Irish, Jewish, Mexican and African-American culture. Students will visit the DuSable Museum of African American History, the Mexican Fine Arts Center, the Polish Museum of America and the Spertus Museum of Judaica and be encouraged to take advantage of their talks, classes, special exhibits, workshops, community events.

LL 250 is a prerequisite for this class.

IN 236
FICTIONAL WORLDS AND THEIR CREATORS: GEOGRAPHY AND FANTASY
Undergraduate
Some writers create fantasy worlds which feel so real and are such complete places that they can be mapped. Writers like Conan Doyle, J.R.R. Tolkien, Edgar Rice Burroughs and C.S. Lewis create imaginary geographies that compel reader belief. In this course, students will choose a fictional world and its creator for study. Study will involve analysis of literature and evaluation of the relationship between imagination and literary art that can also relate to basic cartographic concepts. An initial in-person meeting with the instructor is required.

LL 250 is a prerequisite for this class.

IN 238
THE JUVENILE COURT SYSTEM
Undergraduate
The text in this course provides background and content needed to understand and engage in discussion regarding the Juvenile Court in Illinois. It provides us with an opportunity to examine the strengths and weaknesses of this special court. Topics included in the study are 1) the history of the court, 2) how race has shaped the workings of the court, 3) the part politics has played over the 100+ years of the court, 4) how the court’s legal decisions determine the long term consequences on the lives of juveniles and society in general, 5) the difference between the juvenile court and the adult court, 6) how the court handles dependent children, 7) what is offered by the court for disabled children, and 8) the advantages and disadvantages of being tried in juvenile court rather than in the adult court.

LL 250 is a prerequisite for this class.

IN 239
SCIENCE/WRITING
Undergraduate
Observation is the beginning of science. It is also the beginning of the process of writing. This online course is designed to encourage you to observe the natural world and write clearly about it. Thus you will be simultaneously strengthening your observational skills and your expressive skills. You will observe a single natural setting over the course of a quarter, writing short prose pieces that follow specific guidelines. At least one of these pieces will be posted on the class website for those outside the class to read, thus providing you with an experience of online publication. Internet access and familiarity are required prior to the beginning of class.
IN 243
POST-TRAUMATIC SLAVE SYNDROME AND ITS AFFECTS
Undergraduate
This FDIS seeks to inform students about the nature of trauma, and the impact of post-traumatic slave syndrome (PTSS) on African-American life and culture. In the context of this course, both of these phenomena are associated with 250 years of U.S. chattel slavery, followed by decades of de jure and de facto racial discrimination. It is a subject that has historical, psychological and sociological implications and thus is a must for students pursuing undergraduate and/or graduate work in these areas. With this primary goal in mind, students will be asked to review one of two texts on the subject, Joy DeGruy-Leary's Post Traumatic Slave Syndrome: America's Legacy of Enduring Inquiry and Healing or Thom Burrell's Brainwashed: Challenging the Myth of Black Inferiority, along with selected readings where appropriate.

LL 250 is a prerequisite for this class.

IN 249
NEW YORK: AN HISTORICAL OVERVIEW
Undergraduate
This Faculty Designed Independent Study (FDIS) encourages students to study the history of one of our nation's oldest and most vibrant cities: New York City, including its five boroughs: Manhattan, the Bronx, Brooklyn, Staten Island, and Queens. The readings associated with the course provide a skeletal history of the city's nearly four hundred years. Students are then asked to read a series of articles that elaborate on key historical events and/or eras, i.e. the city's role in the American Revolution, the Great Depression, the impact of deindustrialization and suburbanization, and development of art and culture across different epochs, among other areas. Students are finally asked to supplement readings and a major homework assignment with a five-page paper that mirrors the spirit of their competence. The collection of readings and video presentations offer a fascinating, insightful, and fun look at one of the most interesting and intriguing American metropolises.

IN 250
YOU, YOUR WORK AND THE WORLD
Undergraduate
This course is for students who wish to integrate work and learning. Students will learn career planning skills, explore the organizations in which they work, gain an understanding of how they contribute to their organizations, and discuss societal and world issues, as they affect their workplaces.

IN 251
VALUES-BASED LEADERSHIP: MAKING A DIFFERENCE WHILE MAKING A PROFIT
Undergraduate
The primary focus is to examine and apply the values, goals and operating methods of visionary leaders who have successfully pursued financial rewards for themselves and their organizations, while also achieving, through their actions, broader social goals. The results of the examination will be applied at the students' internship sites, where students will demonstrate a range of leadership skills, including an analysis of basic management issues and recommendations for improvements. In addition to working at least 100 hours at an internship site, the course will consist of four class meetings and ongoing Blackboard discussions.

IN 252
CREATIVITY AS A CHANGE AGENT IN THE WORKPLACE
Undergraduate
The class will examine the process of creativity as it might work to revolutionize an industry or force it into failure. Students will examine creative innovations related to the following: invention, leadership, advertising and marketing, teaming concepts and collaboration, and the drive behind entrepreneurship. This experiential learning course is designed to focus the student's attention on the creative process as it relates to the observable workplace, reflective practice, and the application of theories and ideas.

IN 253
PUBLIC SERVICE CAREERS
Undergraduate
This course will provide an opportunity to students to familiarize themselves with career opportunities in the public service sector by focusing on (a) the types of problems that public service organizations attempt to address; (b) the different strategies used by different types of public service organizations; and (c) the range of available public service jobs. The course will promote the life-long process of integrating work and learning, enable students to view their internship within a broad perspective, assist career decision-making, promote individual success through on-the-job experience, and provide students with valuable networking opportunities - all with a focus on public service careers.
IN 254
CORPORATE SOCIAL RESPONSIBILITY
Undergraduate
Corporate Social Responsibility analyzes the mutually dependent relationship between businesses and society, focusing on how organizations can contribute their resources, expertise, and innovations to the benefit of our local, national, and global communities. By examining their own internship experiences, along with real world case studies, research, and commentary, students will examine the critical decision-making processes organizations address as they balance competitive advantages against the weight of social progress. Students are expected to wrestle with the variable issues confronting corporate social responsibility in relation to their own fields of interest. Throughout the course, students will analyze how their current workplaces determine a competitive edge while staying attentive to the social, public, and environmental consequences of their actions.

IN 261
THE PARENT ROLE
Undergraduate
What does society expect of parents? How have theorists and researchers defined who the parent is and what the parental role involves? How do these descriptions change as children grow? How do parents communicate and nurture their infants and young children? How do their communication skills change as children become older? What attitudes, information and skills do parents need to have to fulfill their role? Students draw from their readings, videos and exercises, to answer these questions. They follow the parent role as it evolves as children grow. Students learn alternative methods of relating to children and discuss the pros and cons of each. They work out ways of dealing with common childhood situations, using a process for dealing with any parenting issue. Students are encouraged to reflect on and discuss their own parenting experiences as a child and, if relevant, as a parent.

LL 300 is a prerequisite for this class.

IN 264
VOICES AND VISIONS: A TELEVISION COURSE IN MODERN POETRY
Undergraduate
Students will use the PBS series "Voices & Visions" as an introduction to the lives and writing of several American poets from Walt Whitman to Sylvia Plath. They will concentrate further on the writings of at least one poet and learn to appreciate and interpret that work, gaining insight into the poet's vision, techniques, and message.

LL 250 is a prerequisite for this class.

IN 265
ENVIRONMENTAL DISRUPTION AND INFECTIOUS DISEASE
Undergraduate
Infectious diseases are the leading cause of death worldwide with more people dying of these diseases than from cancer and heart disease combined. Not surprisingly, it is the developing countries that are most affected. What may be surprising is even in the U.S. contagious diseases rank third as a leading cause of death. And what is even more surprising is that even as we continue to develop new vaccines and antibiotics, deaths from infectious diseases are actually increasing in this country (by 58% between 1980 and 1992). Why? Microbes, such as viruses and bacteria, can replicate in a matter of days (or even minutes) and can change genetically much faster than human cells. With their rapid reproduction and their mutability, microbes have the ability to adapt to almost any type of external conditions. This affords them an evolutionary advantage during periods of massive environmental fluctuations (such as the present). Because environmental disruptions tip the balance in favor of microbes, current radical physical and social changes (such as population growth, urbanization, deforestation, reduction of biological diversity, climactic changes, etc.) contribute to the increase in infectious diseases. Students will examine connections between environmental disruptions (particularly those induced by human activities) and the emergence and reemergence of infectious diseases.
*Prerequisite: either a course in environmental science or in microbiology.

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.

IN 266
WOMEN'S ISSUES
Undergraduate
This advanced level independent research experience provides individual students the opportunity to explore issues of interest concerning women in greater depth. Completion of Research Seminar is required. Students may design any kind of research project suitable for an advanced-level competence; such projects may include library research, surveys, interviews, or on the job projects related to women's issues. Upon registration, students should submit a brief description of the proposed research area to the instructor. Students may select a topic from the list provided in the syllabus or propose their own topic. The instructor will then contact them for an initial conversation and initiate development of a learning contract. Interaction during the quarter may be in person, email, and/or phone. This FDIS may be taken for one or two competencies.

LL 300 is a prerequisite for this class.
IN 270
WRITERS IN 1920'S AMERICA
Undergraduate
The 1920's was a marvelous decade of social change and artistic growth. H.L. Mencken and George Jean Nathan were significant literary critics. Sinclair Lewis, Willa Cather, F. Scott Fitzgerald, Ernest Hemmingway were major novelists. The New Yorker, and the Algonquin Circle (sometimes known as the "Vicious Circle"), with Dorothy Parker and the humorist Robert Benchley, enlivened the literary scene. This class will explore the American literary experience of the 1920's, and share skills of literary and historical interpretation.
LL 250 is a prerequisite for this class.

IN 271
STYLES AND MEANING IN JAZZ HISTORY
Undergraduate
Jazz is a unique American art form which draws on a variety of influences, the skill and creativity of the individual artist, and, in many instances, the collective imagination of a group of performers. This course will explore both the individual styles within jazz as well as the role this art has played in the transmission of culture and the expression of values. Through directed listening, reading, and consultation with the instructor, students will develop the ability to recognize forms and distinctions among both various styles and performers in the jazz idiom.
LL 250 is a prerequisite for this class.

IN 273
NATURE/ NURTURE: FROM GENES TO PHENOTYPE
Undergraduate
One of the themes of contemporary investigation in biology, medicine, psychology, and other inquiries into "human nature" has been the attempts to answer the question "is it nature or nurture" that guides our destiny. Students will develop a basic understanding of hereditary mechanisms and work to gain an appreciation / facility with the various ways in which genes and environment interact.

IN 276
MARKETING APPLICATIONS IN CONTEMPORARY SOCIETIES
Undergraduate
Marketing has applications to profit as well as non-profit organizations and to services, ideas and individuals, not just products. Through this independent study, students will gain an understanding of the marketing process and the key marketing strategies of product planning, promotion, pricing, and distribution.
LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.

IN 279
THE POWER OF GREAT WRITING
Undergraduate
A simple lawsuit in Montgomery, Alabama in 1960, raised America's awareness of the importance of a free and responsible press in a democracy. In Make No Law, Pulitzer prize winning journalist, Anthony Lewis, presents the complex story of how a great newspaper-The New York Times-almost lost its capacity to cover the civil rights movement effectively and forever sacrificed the power of independent criticism of government. He also raises the question of how an undisciplined press can trample the rights of individual citizens.

IN 280
CIVIL RIGHTS AND THE FIRST AMENDMENT
Undergraduate
What is the relationship between a free press and a free society? And what role do the courts play, particularly the Supreme Court, in balancing society's interest in criticizing its government against other interests, such as an individual's right to protect herself from slander or libel? How does a case make its way through the courts in the first place? And what is the proper constitutional relationship between the states and the federal government? Using Anthony Lewis' Make No Law as a starting point, this Court will attempt to explore these questions as they arose in the context of the Civil Rights movement and the groundbreaking case of New York Times v. Sullivan.
IN 281
GENDER IMPLICATIONS OF LEISURE
Undergraduate
Play, leisure, fun, sport, game, hobby, relaxation, and free time all conjure up activities for most people. Yet many people today complain that they have no time or energy for play. One factor that influences leisure is gender. Socialization patterns, biological aspects, and culture often determine activities that males and females select as leisure pursuits. This course will explore these issues and related ones as well as assist the learner in discovering her/his own desires and patterns in the arena of leisure.

IN 299
BLUES AND CHICAGO
Undergraduate
The blues are a feeling, a form, and a rich history that has influenced music from jazz to pop to the Rolling Stones. This course studies the blues with particular attention to Chicago's role in the music. Muddy Waters, Willie Dixon, and Buddy Guy are among the figures included along with readings, CDs, tapes, and visits to both a blues museum and a live blues performance.

LL 250 is a prerequisite for this class.

IN 300
INNOVATIVE STRATEGIES FOR FACILITATING ADULT LEARNING
Undergraduate
This FDIS includes a highly interactive two-day Adult Learning Innovation Institute in which participants will learn strategies to engage and motivate adult learners in their educational and training settings. Session facilitators will demonstrate learner-centered instruction and teach participants how to keep adults focused and attentive even through multiple hours of a training or course using a variety of innovative strategies. Day One sets the context by engaging participants in an interactive discussion about adult learners. Participants will then experience how instruction designed for multiple intelligences enhances the ability to learn. Finally, using a provided planning tool, participants develop a 20-minute presentation that includes techniques to keep an audience engaged. Day Two presents how instructor expectations can influence academic performance. Participants also explore how a learner's self-images influence behavior and how both the learning environment and messages from peers and instructors can reinforce positive images and transform negative ones. Finally, using a provided planning tool, participants develop a structured conversation designed to help learners develop critical thinking skills through reflection and decision. Regardless of experience level, each participant will increase his/her repertoire of strategies for facilitating learning for use in his/her practice. The facilitators will provide follow-up feedback in the Follow up Session and also offer a 30 minute coaching to support continued competence development in innovative facilitation strategies in the participants' work with adult learners.

IN 307
ADVANCED ELECTIVE SEMINAR
Undergraduate
Advanced Elective Seminar is designed to permit students to explore a topic as a group integrating various methods of inquiry and satisfy the Advanced Elective competencies: E1, E2. A specific topic, assessment and evaluation criteria as well as learning activities will be articulated by the instructor for a particular section of the course. Prerequisite: Successful completion of Research Seminar is required to register.

LL 300 is a prerequisite for this class.

IN 330
HISTORY, SCIENCE AND PSYCHOLOGY OF HUMAN-ANIMAL RELATIONSHIPS
Undergraduate
This Advanced Elective (Faculty Designed Independent Seminar) course explores our relationships with animals from many perspectives. Animals have shared our history since the beginning of time and their many roles have been as our food, transportation, hunting partners, pests, pets, entertainers—and more recently, our partners in therapy. Students will examine the ways in which our views of animals are impacted by our culture, religion and social status. Through the recent scientific research on animal intelligence and behavior and writings of contemporary psychologists, ethologists and animal theologists, we will seek answers to questions such as, "How do animals think and feel?", "How do animals assist humans in therapy?" We will have a minimum of 2 on-campus meetings (non-local students can join via technology), conduct field studies and independent research and utilize multimedia sources.

LL 300 is a prerequisite for this class.
IN 345
EXTERNSHIP: ANIMALS AND CONTEMPORARY LIFE
Undergraduate
Students will pursue literature on the historical connections between animals and humans, and will review philosophies concerning treatment of animals. Students will also be exposed to current issues in animal welfare, including a volunteer experience in an animal shelter. Faculty will provide a framework for assessing the roles and condition of animals, particularly domestic animals, in our culture. Assigned readings range from Peter Singer's noted work on animal experimentation Animal Liberation to excerpts from Black Elk Speaks, a Native American treatise on hierarchy and respect for life in American aboriginal culture. Students will pursue their own interests through further readings and commentary.

LL 250 is a prerequisite for this class.

IN 346
NATURE - NURTURE: IT'S ABOUT THE HYPHEN!
Undergraduate
One of the themes of contemporary investigations in biology, medicine, psychology, and other inquiries into "human nature" has been the attempts to answer the question "is it nature or nurture" that guides our destiny. This question has both stimulated and restricted our understanding of ourselves and the living world around us. The question has also been reformulated in important ways to provide more helpful though often more complex "answers" and avenues to approach the pursuit of understanding ourselves. Learning Experience: The development of the E-1 and E-2 competences through this independent study is based first on learning to assess the role of environment on health using a framework that puts environmental factors in relation to non-environmental factors (e.g., biology) and secondly, on taking the perspectives of this competence into ways that the question 'what is human nature?' may be explored. Overall, hopefully this study will provide a means of analysis that is generalizable to many areas of interest and concern. There will be several steps - activities - of the study designed to progressively develop your facility with these ideas. You will develop this facility through research activities in pursuit of various questions that will require the use of library and internet database searches, your own observations, and assigned readings. You will develop a basic understanding of hereditary mechanisms and work with several examples to gain an appreciation for and facility with the various ways in which we are coming to understand how genes and environment interact. Most of what there is to be understood about these interactions lies ahead of us and so this study will offer a basis for both future understanding and the application of the competence to lives today. Because of the extent that you will be tracking down sources and gathering information, completion of Research Seminar is a prerequisite.

LL 300 is a prerequisite for this class.

IN 350
NAVIGATING THE CHANGING WORKPLACE
Undergraduate
Students will be given opportunities to study workplace change, as well as diversity, ethics and leadership issues. Students will also develop networking skills and become aware of career opportunities in the Chicago community. The course is designed to equip students to navigate the changing workplace successfully and make informed career and work life decisions. Students are required to work at least 100 hours, while enrolled in the course.

IN 351
ONE BOOK/ONE CHICAGO
Undergraduate
Every fall and spring the city of Chicago announces its One Book-One Chicago reading selection. In this FDIS, you'll be able to join in the fun of exploration of the book and its many topics, which may be approached from a variety of disciplinary stances (literary, historical, sociological, religious, political, medical, scientific, etc.). You'll be able to explore thematic issues raised by the selected book and you will attend at least two Chicago events associated with the book-readings, panel discussions, library round tables, lectures, and the like. You'll have the opportunity to sharpen your research skills by reading critical articles related to the particular lenses you apply to the thematic issues in the book.

IN 352
EYES ON THE PRIZE: A TELEVISION HISTORY OF THE AMERICAN CIVIL RIGHTS MOVEMENT
Undergraduate
The American Civil Rights Movement was one of the most profound social movements in U.S. history. It significantly altered the nation's social structure and self-understanding and liberated a people from disenfranchisement. This course looks at the high points along the road to social justice for African-Americans and the associated changes that resulted in the legal, social, economic, and political systems of the land. Students will trace key developments from the 1954 Supreme Court ruling that integrated schools to our current racial situation by watching the award-winning PBS series and reading a significant book on the topic.

LL 250 is a prerequisite for this class.
ENCOUNTERING THE NEW AGE
Undergraduate
We are living in a time when many of our most fundamental principles about ourselves and the world around us are being broadly challenged. The goal of this independent study is to explore this shift in outlook, or paradigm, the "new age." The specific focus of study will be shaped by the competence being developed and the interests of the student. Readings, a paper focusing on one area in which the emerging paradigm is having significant effect, and structured journal-keeping will be assigned. Three meetings are required with the instructor; if desired, more can be scheduled.

CHICAGO ART AND LITERATURE
Undergraduate
Chicago's creative experiences in public art, architecture, and literature have introduced original and significant forms and design theories. Students will explore the factors and forms which have influenced the individuals, events, and movements of Chicago's major artistic expressions. Students will gain an overall appreciation of Chicago's visual, functional, and literary contributions, while exploring in detail a particular artistic expression and forces influencing its design, presentation and reception.

LL 250 is a prerequisite for this class.

PLANNING DESIGN AND DEVELOPMENT
Undergraduate
Chicago and some of its older communities have benefited from enlightened planning, layout, and design. Following a review of planning examples, principles and design theory, students will select a current planning activity or design development strategy and will detail plan goals, objectives and anticipated results. Students will identify opportunities for public involvement in the planning process to gain greater insight into public decision-making and the power of individual initiative.

LL 250 is a prerequisite for this class.

LEISURE: A MATTER OF LIFE AND DEPTH
Undergraduate
Play, leisure, fun, sport, game, hobby, relaxation, and free time all conjure up activities for most people. Yet many people today complain that they have no time or energy for play. One factor that influences leisure is gender. Socialization patterns, biological aspects, and culture often determine activities that males and females select as leisure pursuits. This course will explore these issues and related ones as well as assist the learner in discovering her/his own desires and patterns in the arena of leisure.

CO-OP REFLECTION: ENSURE YOUR CAREER SUCCESS
Undergraduate
Students will put learning into practice by reflecting on their Co-op or long-term internship. Students will acquire access to and knowledge of the organizations, problems and conditions in which they are working; observe how societal and world issues surrounding leadership, social responsibility and spirituality affect their workplaces, all while preparing for a career in your field of interest. The course will be taught using a variety of guest speakers, group discussion, new media, and other interactive resources.

PSYCHOLOGY OF SEX AND GENDER
Undergraduate
The text in this course provides the background and context needed to engage in informed discussions on male/female differences and similarities. It provides information on the theories of sex differences and current research examining those theories. Topics explored include: 1) gender differences in social behavior and experience, 2) biology and environment—the process of becoming a male or female, 3) cognitive abilities, 4) sexual orientations, 5) hormonal and reproductive connections, 6) mental and physical health issues including stress change and adaptation, 7) sex and gender role development in childhood, 8) attachment intimacy and power, 9) economics, politics and power, 10) issues in the workplace, and 11) justice, equity and social change. Depending on the chosen competency students will decide on their area of special focus and design an individualized learning project. Such projects might include gender issues in fetal development, gender issues in the workplace, in personal relationships or in how children are treated in school.

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.
IN 368  
LEARNING HISTORY AT THE MUSEUM  
Undergraduate  
This course encourages students to examine and think critically about how historical knowledge is constructed and presented. Museums, the subject of this course, are an excellent place to conduct such investigations. The political nature of museums beckons us to think and study even more about how information is transmitted in what, as we learn, is a very significant educative arena. Our journey begins with some quotes regarding museums, which are culled from one of the required readings by art historian Brian Wallis.

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.

IN 369  
SPIRITUALITIES OF WORK  
Undergraduate  
For some people, “work” refers to one's job, the means of one's livelihood. Others use the word to describe volunteer work, housework, or other productive activities. Some people associate "work" with drudgery and compulsion, while others think of the word in terms of productivity and stimulation. And, for some people, "spirituality" is what they do when they no longer practice religion. Others remain committed to a religious tradition, but consider spirituality to be their particular expression of that tradition. Although there are various definitions of spirituality, most include an understanding of how individuals and groups try to find meaning and integrity in their lives. Spiritualities usually involve certain beliefs and assumptions, as well as practices intended to accomplish specific goals. In this independent study, you will consider some approaches to spirituality and will then apply them to your own experience of work. In your reflection on and writing about work, you will pay particular attention to characteristics of modern life such as the emphasis on efficiency and scientific reason, technological advances, workplace specialization, and the pursuit of health and well-being. Competences A-3-B, H-3-F, F-X. Faculty: Kevin Buckley

IN 370  
COMPARATIVE THEOLOGY  
Undergraduate  
To give a meaning to meaninglessness is the endless quest of religion. Students will study two religions, neither their own belief system, according to a structured paradigm. This paradigm will include vision, explanation, laws, beliefs, and rituals. The diverse activities of the study will include, primarily, research and reflection with opportunities for site visits, interviews, and other information gathering activities. Students will study Islam and Hinduism or Christian Science and The Church of Jesus Christ of the Latter Day Saints (Mormons).

IN 372  
DISRUPTING THE LIFE CYCLE: READING THE EMERGING STORY OF CANCER  
Undergraduate  
In 1851, Rudolf Virchow published a book called Cellular Pathology that changed the course of biology and medicine -- he theorized that the cell is the fundamental unit of life and that each cell comes from another cell, through a process of division. Disease and good health, he said, both originate with the cell. His ideas pointed the way for an increasingly detailed picture of how this fundamental unit of life works -- a picture that is taking us deeper into the inner workings of the cell's biology. At the center of this picture lies a portion of nature's universe for maintaining the continuity of life... and controlling the process of cell division -- DNA and the world of genetics. And more recently, Virchow's insight has been borne out again. The drive to overcome cancer has led to the remarkable understanding that cancer is a disruption of the normal and orderly cycle of the cell's replication and division... a cycle that is controlled by genes. The essential idea of this study is to help you develop an understanding of genetics as a biological system through the lens of how cancer and genetics intersect. From an appreciation for and facility with "thinking genetically" to assess factors --- both biological and environmental -- that contribute to health and the development of cancer, you should be able to better "read" and understand advances in understanding and treating cancer that are emerging almost daily.

IN 376  
GENDERED RELATIONSHIPS AT WORK  
Undergraduate  
This course will pay special attention to sex and gender issues in relationships at work. It will be studied in context so interactions between other factors (e.g. age, ethnicity, etc.) will be considered. Today in the name of equality we are inclined to deny that gender influences interactions between men and women. Researchers find that gender still has an impact on how men and women relate and suggest not talking about this can result in suspicion, mistrust, false assumptions, misunderstandings and frustration. In this class we will look at theories of gendered communication patterns and assess whether they are at play in our own places of employment. Some of the areas of study are: The double standard of expression, sports talk/family talk, sexist remarks, self-promotion, inclusion in decision-making and the use of humor. Students will read about all areas and then decide to focus their study activities either on researching one in more depth, observing behavior at their own setting in light of all areas, interviewing colleagues about the topics, etc. All students will then submit a paper integrating what they have learned through investigation, experience and reflection on this important issue. They will also make recommendations for creating more equitable environments in their own work settings.

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.
IN 377
EINSTEIN'S WAYS OF KNOWING
Undergraduate
While reading Walter Isaacson's 2007 biography, Einstein: His Life and Universe, students will: Explore how Albert Einstein learned and compare those methods to their own; Explain the external and internal factors affecting Einstein's work and, again, compare them to similar factors in their lives; and, Examine the concept of moral and immoral knowledge in both Einstein's life and their own. Students will participate in cumulative chapter discussions (via Blackboard) that result in a final project addressing each of the described issues. The default project is an essay/short paper, but students are encouraged to consider other options (e.g. concept map, PowerPoint presentation) and discuss with the instructor.

INT 150
GLOBAL CONNECTIONS
Undergraduate
This course is intended for non-majors who are looking to add an international perspectives course to their study. It looks at the relationships between people living across the globe. Formerly INT 300.

INT 200
INTRODUCTION TO MACROECONOMICS IN AN INTERNATIONAL CONTEXT
Undergraduate
INT 200 serves as a bridge between economics and political economy. The course acquaints students with the standard theories of international trade and international monetary systems and introduces them to the interdisciplinary approaches that distinguish political economy from economics.

ECO 106 is a prerequisite for this class.

INT 201
THE EVOLUTION OF THE MODERN NATION STATE
Undergraduate
This course focuses on the complex relationship between race, gender, ethnicity and nationality and explores how this relationship shapes the evolution of the modern state. The historical consolidation of the nation state and the development of national institutions are analyzed, using examples from both 19th- and 20th-century Europe and the contemporary Third World. This course is the first in the required three-course sequence. For that reason, it is open to declared majors and minors only. Other students may take the course on a space-available basis, with the permission of the director.

Sophomore standing or above and status as an International Studies major or minor is a prerequisite for this class.

INT 202
INTERNATIONAL CONFLICT AND COOPERATION
Undergraduate
This course analyzes the nature of power in the international arena, conflicts that emerge among nations, and processes through which conflict may be resolved. It includes a critical perspective on realism and the other mainstream theories of international relations.

INT 201 and status as an International Studies major or minor is a prerequisite for this class.

INT 203
INTERNATIONAL MOVEMENTS IN THE 20TH AND 21ST CENTURIES
Undergraduate
This course evaluates the major social movements that have shaped international developments in the 20th and 21st centuries. Includes discussions of the varieties of socialism, race, colonization and decolonization of the Third World.

INT 201, INT 202 and status as an International Studies major or minor is a prerequisite for this class.
INT 204
CULTURAL ANALYSIS
Undergraduate
This course asks students to examine economic and cultural practices together so as to see the complicated ways in which such practices intersect and/or give rise to one another. Drawing on a variety of materialist perspectives, students study the economic and cultural instrumentality that different family structures and constructions of sexuality, gender, and race have held across time and place and how and why such structures have changed. Students also analyze the cultural logic of disposability in capitalism, both in terms of garbage-generation and the generation of surplus populations.

INT 205
INTERNATIONAL POLITICAL ECONOMY
Undergraduate
Topics discussed include the theory of comparative advantage, trade, immigration, alternatives to neoclassical trade theory, the third world debt crisis of the 1980s and 1990s, global financial institutions, and recurrent financial crises.

INT 200 is a prerequisite for this class.

INT 206
IDENTITIES AND BOUNDARIES
Undergraduate
This course explores how identity formation is shaped by cultural, historical, and political construction of barriers, borders, and boundaries, and how such formations are intertwined with ethnicity, race, nationality, gender and class.

INT 301
SENIOR SEMINAR
Undergraduate
This course combines formal class work and independent research. Students conduct and present competent original academic research on a relevant and novel question of their choosing. Seminar topics vary, but projects typically require comparative research conducted in the student's target language.

Senior standing and declared International Studies major or minor are prerequisites for this course.

INT 302
CRITICAL SOCIAL THEORY
Undergraduate
All systems of knowledge are constituted through and in turn help constitute relations of power. This course introduces students to social theory as a reflexive practice that is aware of the power-infused conditions of its own production. Students who take this course should be able to examine the society around them with critical awareness, interrogate the naturalization of social knowledge, and become aware of the conditions through which knowledge, expertise, and transformative social practices are reflexively produced. Cross-listed with INT 401.

Admission to International Studies BA/MA program or permission of instructor is a prerequisite for this class.

INT 303
INTERNATIONAL LAW
Undergraduate
This course offers students the opportunity to engage in an examination of recent developments in international treaties, legal process and international organization. Topics may include refugees, trade law, criminal law and the establishment of the international criminal court, international labor law, environmental law, theories of international law, human rights and the relationship between international law and local economic development. Cross-listed with INT 410.

INT 304
MIGRATION AND FORCED MIGRATION
Undergraduate
This course examines the integral role that different processes of mobility play in shaping today's world: emigration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations. Cross-listed with INT 404.
INT 305
CULTURE AND INEQUALITY
Undergraduate
This course interrogates the concept of culture by showing the dynamic ways in which inequalities define and shape it. Students examine theories of culture and different approaches to studying culture to understand the relationship between the construction of cultural difference and social inequalities. Cross-listed with INT 405.

INT 306
GLOBAL EMPIRES
Undergraduate
In this course, students gain an acquaintance with theories of imperialism and post-colonial theory through historically situated studies. ‘Power’ serves as the generative concept for this course, to be understood as emergent at multi-scalar levels. Cross-listed with INT 406.

INT 307
RACE, SEX, AND DIFFERENCE
Undergraduate
Power circulates through systems of social hierarchies. Such hierarchies are the material basis through which difference is defined. This course examines theories of class, race, and sex to show how difference operates. Cross-listed with INT 407.

INT 308
NATURE, SOCIETY AND POWER
Undergraduate
This course is an interdisciplinary exploration of environmental issues pertinent to international studies. The reproduction of human societies occurs in a symbiotic relationship with the natural world, yet in the modern era nature has come to be increasingly conceptualized as a resource. This course explores the repercussions of this instrumental separation of nature from culture and society. Our conceptions of nature range from the physical environment to the human body; and the course explores a range of related political, economic, ecological, and socio-cultural issues from theoretical, comparative, and practical perspectives. Issues explored include those of environmental justice and social and political equity, and questions such as who defines what constitutes environmental issues, who is included or excluded from environmental concerns, and who benefits or is harmed by environmental changes occurring as a result of social interventions. Cross-listed with INT 408.

INT 309
CRITICAL DEVELOPMENT THEORY
Undergraduate
The uneven integration of the world economy has been shaped by a succession of policies and theories of development, modernization, and globalization. This course investigates how these theories and policies have contributed to centrally organizing concepts such as poverty, inequality, growth, and progress, which have been instrumental in ordering contemporary societies. Cross-listed with INT 409.

INT 310
TOPICS IN AFRICAN STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of selected regions within the African continent. (See schedule for current offerings).

INT 312
THE ISRAELI-PALESTINIAN CONFLICT: PROSPECTS FOR PEACE
Undergraduate
Lasting peace between Israelis and Palestinians can only be constructed with a clear, open, and critical understanding of the conflict's historical grounding. After a brief review of the connection of Jews and Arabs to the land of Israel/Palestine prior to the late 19th century, the course will study the rise of modern Jewish nationalism (Zionism) and its conflict with Palestinian nationalism covering the end of the Ottoman Empire, World War I promises to Jews and Arabs, the British Mandate of Palestine, the 1947 UN Partition Vote and subsequent 1948 War and the development of a wider Arab-Israeli conflict that has increasingly played out on the world stage with the Israeli-Palestinian Conflict at its center. The interaction or lack thereof between Jews and Arabs in Israel/Palestine over the past century as well as wider issues involving the Arab and Islamic world and the Diaspora Jewish community will be explored for their impact on this conflict. Efforts at conflict resolution will be examined through exposure to diverse points of view. The course seeks to synthesize an examination of religion, nationalism, and ethnic identity in order to gain some insight into the many dimensions of this conflict as well as the possibility of a peaceful resolution.
INT 313
TERRORISM, THEIRS AND OURS
Undergraduate
Today, the 'War on Terror' referred to US wars in Afghanistan, Iraq, and other locations across the world but before 1969, 'terror' referred primarily to violence at home, bombings, hijackings, assassinations, etc. Many nationalist leaders and freedom fighters even referred to themselves as terrorists. From the appearance of 'terror' as a political term during the French Revolution, this course traces "terror" in the context the forms of political violence deployed by states. After a decade and half of fighting, is "terrorism" defeated? Osama Bin Laden is dead but U.S. forces are still deployed all over the globe, the Guantanamo Bay prison still open, and "enhanced interrogation" continues. Post-Ba'athist Iraq has collapsed into a Shia rump state, a Kurdish de-facto state, and Sunni terror state. How did we arrive at this nightmare scenario? How did terrorism become a common tactic of the most disempowered people in the world? Why do states turn to torture, assassination and other forms of political violence? What do these forms of political violence tell us about the relationship between the state and violence? What does this mean for the future of direction of social change and dynamics of global conflict? This course provides perspective on these questions through an in-depth study of French and Russian Revolutions, the Cold War, and current War on Terror.

INT 314
SUREVILLANCE AND DIGITAL LABOR
Undergraduate
Did you use a cell phone, ATM, or computer today? Did you update your Facebook status? Send off a text or tweet? If you did, someone was watching. Every day in our mundane activities we leave trails of information that are gathered up by private data brokers, advertisers, police officers and intelligence professionals. This data has increasingly come to reshape our lives, the way we sustain ourselves (i.e. work) and the way we enjoy our "off-time." The course locates our digitally mediated lives in a larger global division of digital labor that extends from the mining conflict minerals to sweatshop conditions in Chinese factories to the seemingly glamorous world of Google's software engineers. It considers the historic evolution of the advertising industry and the way information technology has reshaped housework. The course closes with a critical assessment of global labor and various proposals to ensure decent life for the workers of the world. In all, we explore the lives of our digital doppelganger, asses the struggles of digital workers, and try to find needed perspective on surveillance in the contemporary world.

INT 315
SUREVILLANCE AND THE STATE
Undergraduate
Surveillance is a longstanding feature of political life. Historically and today, surveillance is one of the central means of governing. After all, institutionalized political authority "the state" cannot govern without systematized, orderly knowledge. The census, taxation, licenses, passports, and the endless forms and reporting requirements of state bureaucracies are all forms of administrative surveillance. They stand alongside the work operations of military, police, and intelligence agencies as integral legibility practices that make governing possible. In this class, we try to understand the role of surveillance in political life. We ask the following questions: What is surveillance? Can we trace the cultural and historical roots of surveillance which today underlies the foundation of the modern state? What form does surveillance take in different situations and contexts? How does the emerging imperative of security shape the use of surveillance? How is the practice of surveillance related to scientific and technological developments? How is it changing our social life, our notions of private and public, our conceptions of public spaces, and our very understanding of the self? How can social theory inform our understanding of these developments?

INT 316
THE SOCIAL AND POLITICAL LIFE OF OIL
Undergraduate
Since the industrial revolution hydrocarbons have reshaped every aspect of human, social, and planetary life. This course is a critical and interdisciplinary examination of the wide-ranging impact of petroleum and its derivatives on the contemporary social relations of power, as well as on nature-society/human-environment interactions.

INT 317
READING MARX'S CAPITAL
Undergraduate
This course is a close reading of volume 1 of Karl Marx's major work, Capital, a key text in contemporary social and political economic thought. Capital is a highly challenging, but ultimately rewarding text. Students are required to engage the text rigorously, and to work individually and in groups. The class format is a combination of lectures, seminar discussions, and oral presentations by students.

INT 318
SOCIETY, POLITICS AND CULTURE IN THE MIDDLE EAST
Undergraduate
This course will examine the formations of the historical and contemporary social relations of power in the Middle East by questioning the prevalent stereotypes of the region. The main focus will be on the critical investigation of relations of gender, the complexities of state formations, and the dynamics of the contemporary social counter-movements. The latter range from cosmopolitan popular uprisings (Green Movement in Iran, the Arab Spring), to ideological Islamist formations (ISIS, Muslim Brotherhood, etc.).
INT 319
REVOLUTIONS AND PEASANT REBELLIONS
Undergraduate
This course focuses on theories on the international, national, regional, and local factors contributing to the weakening of states that result in revolutions, civil wars, and peasant rebellions. Case studies include revolutions in France, Russia, China, Mexico, Cuba, Nicaragua, and Iran. Contemporary social movements and insurrections are analyzed based on the theories of the course. Cross-listed with SOC 358 and LST 358.

INT 320
TOPICS IN MIDDLE EASTERN STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of selected regions within the Middle East. (See schedule for current offerings).

INT 321
TOPICS IN SOUTH ASIAN STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of selected regions within South Asia. (See schedule for current offerings).

INT 322
THE EUROPEAN FINANCIAL CRISIS
Undergraduate
This course deals with the international political economy analysis of the origin, the development, and the future of the European Union. It includes papers and chapters of books of renowned economists like Paul Krugman, Roger Bootle, and Martin Wolf. Besides including general economic, political and social issues, it also comprehends case studies of individual countries.
INT 205 or ECO 106 is a prerequisite for this class.

INT 323
PUBLIC INTERNATIONAL LAW: PEACE, CONFLICT AND HUMAN RIGHTS
Undergraduate
This course is an introduction to public international law, with an emphasis on the law of conflict and human rights. Students learn about the sources and functions of public international law—the law between and among nation states—and how this kind horizontal system of legal regulation deals with enforcement. The course presents the idea of transnational legal processes and authority that operate across levels, scales and institutions to constrain or shape state action and identity. We look at how the United States and other countries incorporate international law into their domestic legal systems. Contemporary topics covered may include, for example, cases from international criminal law, cyber war, torture or drones. The course then turns to human rights and humanitarian law, areas of law that seem potentially most in conflict with concepts of state sovereignty. We study the history and theory of human rights and the doctrine of responsibility to protect (a form of international executive authority) as well as recent cases in which human rights and humanitarian law have played large or determinative roles.

INT 324
INTERNATIONAL ECONOMIC LAW FROM COLONIALISM TO GLOBALIZATION
Undergraduate
This course is an introduction to international economic law. Students study the international legal framework regulating states, international financial institutions and firms in their market, development, investment, trade and public sector economic interactions and functions. We look at global economic structuring as a longer term project with roots in colonialism and Euro-American modernity. We examine attempts by formerly colonized countries to rewrite the rules of international economic law in the 1970s and how, more recently, human rights have served as a means by which to challenge entrenched power and wealth in the international system. Cases studied in the course may include, for example, litigation over transnational corporate responsibility for environmental destruction, contests over intellectual property rights in medicines versus human rights to health and access to such medicines, and an ethnographic account of the difficult process by which human rights have been translated into the culture of an organization such as the World Bank.
INT 325
LAW OF INTERNATIONAL ORGANIZATIONS, NGOS AND GLOBAL GOVERNANCE
Undergraduate
This course is an introduction to the law and function of intergovernmental and non-governmental organizations. We seek to understand global governance as a system by which power and authority may flow through international organizations that exist either above (intergovernmental) or below (nongovernmental) the level of states. Students will study the law and function of international courts and tribunals, including both global and regional bodies, as well as the ways civil society organizations (e.g., human rights NGOs) shape global justice outcomes. We examine how governance occurs through various rule of law and democracy promotion projects and how humanitarianism itself may become a form of governance. Students confront the paradox of institutionalizing (and professionalizing) global social justice demands through close study of recent cases involving NGO advocacy and/or by participating in the work of an internationally oriented service or social justice NGO.

INT 326
GENDER AND INTERNATIONAL STUDIES
Undergraduate
This course traces shifts in a feminist imaginary from its second wave to its contemporary complex iteration that encompasses ideas that students bring to class with them. Students will develop a literacy in the critique and evaluation of older sets of feminist questions and in a highly current engagement with similar questions.

INT 327
POSTCOLONIALISM AND INTERNATIONAL STUDIES
Undergraduate
This course introduces students to studies of colonialism and postcolonialism that exist within International Relations (IR). The course materials will take a critical approach to concepts often taken for granted in studying international politics. This course introduces students to the main threads of this scholarly challenge and its attendant concepts -- Other, alterity, subalternity, subjectivity, knowledge, discourse, and power.

INT 328
CULTURE AND POWER
Undergraduate
This course focuses on questions of culture and inequality and the contemporary application of social theory. Through close readings of empirically rich texts, students will evaluate the relationship between culture and various forms of inequality.

INT 329
GEOGRAPHY, FOOD AND JUSTICE
Undergraduate
While the need for food is universal, geographies of food production, distribution and consumption are anything but even. This leads to multiple issues of food injustice at a variety of scales. This course critically examines the contemporary global food system with the goal of providing students with skills and knowledge to engage in food justice activism. Students study the development of food systems and how inequalities have emerged in production, distribution and consumption. The course then explores food justice movements including the emergence of alternative food networks in the U.S and internationally. Assignments may engage students in local food projects and/or advocacy campaigns. Cross-listed with GEO 351 and PAX 351.

INT 330
TOPICS IN EAST ASIAN STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of selected regions within East Asia. (See schedule for current offerings).

INT 333
THE PSYCHE AND GEOPOLITICAL ECONOMY
Undergraduate
This course adds another layer of analytical complexity to our understanding of the world, namely, the "psychical unconscious" or psyche--the terrain of subjective irrationality. Using analytical tools that plumb the psyche, this course examines how identity formations of gender, sexuality, race, and person, are tied to unconscious anxieties which are also mediated by external demands and conditions. In so doing, we complicate international studies, allowing us to see how our own identity formation is tied to the vicissitudes of the world and how we are called into it.
INT 336  
TOPICS IN AUSTRALASIAN STUDIES  
Undergraduate  
Topics in the social, political, and economic institutions, and the cultural history of selected regions within Australia, New Zealand, New Guinea, and the neighboring islands of the Pacific Ocean. (See schedule for current offerings).

INT 340  
TOPICS IN EUROPEAN STUDIES  
Undergraduate  
Topics in the social, political, and economic institutions, and the cultural history of selected regions within Europe. (See schedule for current offerings).

INT 349  
WORLD ECONOMY: STATES, MARKETS, AND LABOUR  
Undergraduate  
This course introduces students to competing economic and political frameworks that analyze the interaction of states, markets and societies. The overall theme of the course is the spread of capitalism and the tandem disembedding of economic relations from social relations beginning with the Industrial Revolution in the 18th century through to the early 21st century. Cross-listed with GEO 266.

INT 350  
TOPICS IN LATIN AMERICAN AND CARIBBEAN STUDIES  
Undergraduate  
Topics in the social, political, and economic institutions, and the cultural history of selected regions within Latin America and the Caribbean. (See schedule for current offerings).

INT 352  
INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY  
Undergraduate  
This course charts the economic transformation in the Third World /Global South. The first third of the course examines theories of development and underdevelopment before moving on to a critique of the concept of development as a modernist paradigm using a postcolonial framework. The rest of the course examines the restructuring of the agricultural, manufacturing and service sectors, including the financial sector, in non-Western countries. Students are recommended but not required to take INT 349 before this course. Cross-listed with GEO 215.

INT 353  
THE STATE AND ECONOMIC GROWTH IN EAST ASIA  
Undergraduate  
This course focused on the role of the state in economic growth. The first half of the course studies the historical background, theory and criticism of the role of the state, including the developmental state, in economic growth. The second half examines paired case studies from different East Asian countries in the key moments of the incorporation of those states and their societies into the globalized economy compared to more recent assessments of their situations. Student projects are NOT restricted to East Asia. Students are recommended but not required to take INT 349 and INT 352 first. Cross-listed with GEO 315.

INT 360  
TOPICS IN DEVELOPMENT STUDIES  
Undergraduate  
Topics in the problem of endemic poverty in the Third World and the various forms of public action designed to alleviate poverty. (See schedule for current offerings).

INT 362  
LANGUAGE AND THE POLITICS OF TERROR  
Undergraduate  
Politics is, among other things, the arena in which human bodies are broken. This course will concern itself with the breaking of human bodies through torture, genocide, war and poverty. Throughout, a focus will be maintained on the interface between bodies and language, on how bodies placed under extremes of pain and degradation lose their capacity for speech, and how language reaches its intrinsic limits in trying to represent bodies in pain.
INT 364
TOPICS IN INTERNATIONAL POLITICAL ECONOMY
Undergraduate
Topics in international trade, international finance, and international macroeconomics with attention to political context. (See schedule for current offerings).

INT 365
TOPICS IN WAR AND PEACE
Undergraduate
Topics in war, internal and ethnic conflict, terrorism, peace, and the construction of security. (See schedule for current offerings).

INT 366
TOPICS IN INTERNATIONAL LAW
Undergraduate
Topics in international law, human rights, and other legal topics. (See schedule for current offerings).

INT 368
TOPICS IN GLOBAL CULTURE
Undergraduate
Topics in global cultural studies. (See schedule for current offerings).

INT 371
INTERNATIONAL ENVIRONMENTAL POLITICS
Undergraduate
This course examines the international processes by which scientific knowledge concerning environmental change and degradation is translated into action on the parts of individuals, groups, states, and global institutions. We look at the political, legal, economic and cultural structures that reproduce the global propensity to disrupt or degrade the environment and that likewise prevent amelioration.

INT 374
TOPICS IN INTERNATIONAL ORGANIZATIONS
Undergraduate
Topics in organizations such as the United Nations, the Organization of American States, the World Trade Organization, the European Union, and similar organizations or trading blocs and their associated policy issues. (See schedule for current offerings).

INT 382
INTERNSHIP RESIDENCY
Undergraduate
Used to register credit hours for both Chicago-based and off-campus residencies to complete internship agreements and approved independent research proposals. 2-8 credit hours.

INT 388
SPECIAL TOPICS IN INTERNATIONAL STUDIES
Undergraduate
Courses on topics in international studies not otherwise classifiable. (See schedule for current offerings).

INT 389
INTERNATIONAL SOCIAL ENGAGEMENT
Undergraduate
The course provides 20-25 hours of service learning opportunities for students in organizations that are pursuing local activities based on international missions or globally-informed policies. The course meetings focus on student experiences and a discussion of state, sub-state, and non-state organizational structures in the international context.
INT 391
TOPICS IN SOUTHEAST ASIAN STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of selected regions within Southeast Asia. (See schedule for current offerings).

INT 392
TOPICS IN CENTRAL ASIAN STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of selected regions within Central Asia. (See schedule for current offerings).

INT 394
TOPICS IN MARITIME STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of regions defined by maritime areas rather than land masses. (See schedule for current offerings).

INT 395
TOPICS IN GENDER, SEXUALITY, AND REPRODUCTION
Undergraduate
Topics in gender, sexuality, and reproduction taken in its broadest sense. (See schedule for current offerings).

INT 396
TOPICS IN GLOBAL URBANISM
Undergraduate
Topics in cities and urban life in global, international, or comparative perspectives. (See schedule for current offerings).

INT 397
TOPICS IN ARCTIC AND ANTARCTIC STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of the polar regions. (See schedule for current offerings).

INT 398
TOPICS IN NORTH AMERICAN STUDIES
Undergraduate
Topics in the social, political, and economic institutions, and the cultural history of selected regions within North America. (See schedule for current offerings).

INT 399
INDEPENDENT STUDY
Undergraduate
Student-designed course incorporating reading and research conducted under faculty supervision. Variable credit hours.

INT 401
CRITICAL SOCIAL THEORY
Graduate
All systems of knowledge are constituted through and in turn help constitute relations of power. This course introduces students to social theory as a reflexive practice that is aware of the power-infused conditions of its own production. Students who take this course should be able to examine the society around them with critical awareness, interrogate the naturalization of social knowledge, and become aware of the conditions through which knowledge, expertise, and transformative social practices are reflexively produced.

Status as a Graduate International Studies student is a prerequisite for this course.
INT 402
INTERNATIONAL POLITICAL ECONOMY
Graduate
This course examines the historical development of the contemporary international political economy. The principle channels of interaction between states, economies, and international organizations are examined: trade and investment, diffusion of technology, institutional borrowing and adaptation, the workings of the international financial system, articulations of notions of equality and mobility. In the process, students also become familiar with a range of theoretical perspectives of IPE.

INT 403
ADVANCED TOPICS IN INTERNATIONAL POLITICAL ECONOMY
Graduate
This advanced course builds on INT 402 by applying contemporary theories of political economy to topics that reflect current concerns.

INT 404
MIGRATION AND FORCED MIGRATION
Graduate
This course examines the integral role that different processes of mobility play in shaping today's world: emigration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations.

INT 405
CULTURE AND INEQUALITY
Graduate
This course interrogates the concept of culture by showing the dynamic ways in which inequalities define and shape it. Students examine theories of culture and different approaches to studying culture to understand the relationship between the construction of cultural difference and social inequalities.

INT 406
GLOBAL EMPIRES
Graduate
In this course, students gain an acquaintance with theories of imperialism and post-colonial theory through historically situated studies. ‘Power’ serves as the generative concept for this course, to be understood as emergent at multi-scalar levels.

INT 407
RACE, SEX AND DIFFERENCE
Graduate
Power circulates through systems of social hierarchies. Such hierarchies are the material basis through which difference is defined. This course examines theories of class, race, and sex to show how difference operates.

INT 408
NATURE, SOCIETY, AND POWER
Graduate
This course is an interdisciplinary exploration of environmental issues pertinent to international studies. The reproduction of human societies occurs in a symbiotic relationship with the natural world, yet in the modern era nature has come to be increasingly conceptualized as a resource. This course explores the repercussions of this instrumental separation of nature from culture and society. Our conceptions of nature range from the physical environment to the human body; and the course explores a range of related political, economic, ecological, and socio-cultural issues from theoretical, comparative, and practical perspectives. Issues explored include those of environmental justice and social and political equity, and questions such as who defines what constitutes environmental issues, who is included or excluded from environmental concerns, and who benefits or is harmed by environmental changes occurring as a result of social interventions.
INT 409
CRITICAL DEVELOPMENT THEORY
Graduate
The uneven integration of the world economy has been shaped by a succession of policies and theories of development, modernization, and globalization. This course investigates how these theories and policies have contributed to centrally organizing concepts such as poverty, inequality, growth, and progress, which have been instrumental in ordering contemporary societies.

INT 410
INTERNATIONAL LAW
Graduate
This course offers students the opportunity to engage in an examination of recent developments in international treaties, legal process and international organization. Topics may include refugees, trade law, criminal law and the establishment of the international criminal court, international labor law, environmental law, theories of international law, human rights and the relationship between international law and local economic development.

INT 430
LAW AND ECONOMICS IN CUBA
Graduate
This course will introduce the Cuban legal, political, and economic system. Students will study major legal and regulatory issues in key sectors of the Cuban economy.

INT 490
SPECIAL TOPICS IN INTERNATIONAL STUDIES
Graduate
Special courses will be offered as students and faculty identify selected topics of common interest. This number is also used for students taking 300-level courses in the undergraduate International Studies program. In this case, students must have the approval of their thesis advisor and the director of the International Studies program before registering for the course.

INT 500
TOPICS IN GLOBAL CULTURAL ANALYSIS
Graduate
Provides students writing theses in the area of global culture with opportunities to read contemporary works in the field, including the fragmentation of identity, postcolonial historiography, and transnationalism. Students develop analytical skills that can be applied to their projects. The seminar is offered in the Spring of the first year; the course focuses on different topics under different instructors.

INT 502
TOPICS IN INTERNATIONAL POLITICAL ECONOMY
Graduate
Provides students writing theses in the area of international political economy with opportunities to read contemporary works in the field, including growth theories, capital and labor flows, and transformation of regimes. Students develop analytical skills that can be applied to their projects. The seminar is offered in the Spring of the first year; the course focuses on different topics under different instructors.

INT 504
TOPICS IN INTERNATIONAL LAW
Graduate
Course offers students the opportunity to engage in an examination of recent developments in international treaties, legal process and international organization. Topics have included refugees, trade law, criminal law and the establishment of the international criminal court, international labor law, environmental law, theories of international law, human rights and the relationship between international law and local economic development. Students work on the international law and institutional aspects of their theses.

INT 512
THE ISRAELI-PALESTINIAN CONFLICT: PROSPECTS FOR PEACE
Graduate
This course will examine the interactions between Jews and Arabs in Israel/Palestine over the past century as well as wider issues involving the Arab and Islamic world. Students will synthesize an examination of religion, nationalism, and ethnic identity in order to gain some insight into the many dimensions of this conflict as well as the possibility of a peaceful resolution.
INT 513
TERRORISM, THEIRS AND OURS
Graduate
This course traces the concept of ‘terror’ as it is applied to different forms of political violence deployed by states, individuals, and oppressed peoples in both historical and contemporary situations. Students will investigate the relationship between the state and violence and the future of dynamics of global conflict.

INT 514
SURVEILLANCE AND DIGITAL LABOR
Graduate
Did you use a cell phone, ATM, or computer today? Did you update your Facebook status? Send off a text or tweet? If you did, someone was watching. Every day in our mundane activities we leave trails of information that are gathered up by private data brokers, advertisers, police officers and intelligence professionals. This data has increasingly come to reshape our lives, the way we sustain ourselves (i.e. work) and the way we enjoy our “off-time.” The course locates our digitally mediated lives in a larger global division of digital labor that extends from the mining conflict minerals to sweatshop conditions in Chinese factories to the seemingly glamorous world of Google's software engineers. It considers the historic evolution of the advertising industry and the way information technology has reshaped housework. The course closes with a critical assessment of global labor and various proposals to ensure decent life for the workers of the world. In all, we explore the lives of our digital dopplegangers, asses the struggles of digital workers, and try to find needed perspective on surveillance in the contemporary world.

INT 515
SURVEILLANCE AND THE STATE
Graduate
This course examines the role of surveillance in social and political life. Historically and today, surveillance is one of the central means of governing. Students will examine the cultural and historical roots of surveillance, the relationship between surveillance and security, and how different forms of surveillance are practiced in specific political and cultural contexts.

INT 516
THE SOCIAL AND POLITICAL LIFE OF OIL
Graduate
Since the industrial revolution hydrocarbons have reshaped every aspect of human, social, and planetary life. This course is a critical and interdisciplinary examination of the wide-ranging impact of petroleum and its derivatives on the contemporary social relations of power, as well as on nature-society/human-environment interactions.

INT 517
READING MARX'S CAPITAL
Graduate
This course is a close reading of volume 1 of Karl Marx's major work, Capital, a key text in contemporary social and political economic thought. Capital is a highly challenging, but ultimately rewarding text. Students are required to engage the text rigorously, and to work individually and in groups. The class format is a combination of lectures, seminar discussions, and oral presentations by students.

INT 518
SOCIETY, POLITICS AND CULTURE IN THE MIDDLE EAST
Graduate
This course will examine the formations of the historical and contemporary social relations of power in the Middle East. The main focus will be on the critical investigation of relations of gender, the complexities of state formations, and the dynamics of the contemporary social counter-movements.

INT 522
THE EUROPEAN FINANCIAL CRISIS
Graduate
This course deals with the international political economy analysis of the origin, the development, and the future of the European Union. It includes papers and chapters of books of renowned economists like Paul Krugman, Roger Bootle, and Martin Wolf. Besides including general economic, political and social issues, it also comprehends case studies of individual countries.

INT 205 or INT 402 or INT 403 or ECO 106 is a prerequisite for this class.
INT 523
PUBLIC INTERNATIONAL LAW: PEACE, CONFLICT AND HUMAN RIGHTS
Graduate
This course is an introduction to public international law, with an emphasis on the law of conflict and human rights. Students learn about the sources and functions of public international law--the law between and among nation states--and how this kind horizontal system of legal regulation deals with enforcement. The course presents the idea of transnational legal processes and authority that operate across levels, scales and institutions to constrain or shape state action and identity.

INT 524
INTERNATIONAL ECONOMIC LAW FROM COLONIALISM TO GLOBALIZATION
Graduate
This course is an introduction to international economic law. Students study the international legal framework regulating states, international financial institutions and firms in their market, development, investment, trade and public sector economic interactions and functions. This course pays particular attention to the roots of global economic structuring in colonialism and how that history shapes the ways in which formerly colonized countries engage with international economic law.

INT 525
LAW OF INTERNATIONAL ORGANIZATIONS, NGOS AND GLOBAL GOVERNANCE
Graduate
This course is an introduction to the law and function of intergovernmental and non-governmental organizations. We seek to understand global governance as a system by which power and authority may flow through international organizations that exist either above (intergovernmental) or below (nongovernmental) the level of states. Students will study the law and function of international courts and tribunals, including both global and regional bodies, as well as the ways civil society organizations shape global justice outcomes.

INT 526
GENDER AND INTERNATIONAL STUDIES
Graduate
This course traces shifts in a feminist imaginary from its second wave to its contemporary complex iteration that encompasses ideas that students bring to class with them. Students will develop a literacy in the critique and evaluation of older sets of feminist questions and in a highly current engagement with similar questions.

INT 527
POSTCOLONIALISM AND INTERNATIONAL STUDIES
Graduate
This course introduces students to studies of colonialism and postcolonialism that exist within International Relations (IR). The course materials will take a critical approach to concepts often taken for granted in studying international politics. This course introduces students to the main threads of this scholarly challenge and its attendant concepts -- Other, alterity, subalternity, subjectivity, knowledge, discourse, and power.

INT 528
CULTURE AND POWER
Graduate
This course focuses on questions of culture and inequality by closely reading an empirically rich piece of work that examines the relationship between the two. Students will read Pierre Bourdieu's Distinction alongside David Swartz's 'handbook' as well as their own selection of supplemental readings (from Appendix 1). This seminar course evaluates questions of the relation between culture and various forms of inequality and aims to assess the ways in which Bourdieu's thinking is contemporarily applicable. As Bourdieu offers a starting point for a reflexive method, students will have the opportunity to learn a form of 'method' (or approach) to critical social analysis. The readings will expand students' command of the complex theoretical language that can be indispensable in developing complex interdisciplinary analyses of international politics. By the end of the course, students will have a solid grasp of Bourdieu's contribution to Social Theory, and arguments regarding the intersection between culture and inequality.
GEOGRAPHY, FOOD AND JUSTICE
Graduate
While the need for food is universal, geographies of food production, distribution and consumption are anything but even. This leads to multiple issues of food injustice at a variety of scales. This course critically examines the contemporary global food system with the goal of providing students with skills and knowledge to engage in food justice activism. Students study the development of food systems and how inequalities have emerged in production, distribution and consumption. The course then explores food justice movements including the emergence of alternative food networks in the U.S and internationally. Assignments may engage students in local food projects and/or advocacy campaigns.

THE PSYCHE AND GEOPOLITICAL ECONOMY
Graduate
This course adds another layer of analytical complexity to our understanding of the world, namely, the "psychical unconscious" or psyche—the terrain of subjective irrationality. Using analytical tools that plumb the psyche, this course examines how identity formations of gender, sexuality, race, and person, are tied to unconscious anxieties which are also mediated by external demands and conditions. In so doing, we complicate international studies, allowing us to see how our own identity formation is tied to the vicissitudes of the world and how we are called into it. Cross-listed with INT 333.

MIGRATION AND INTERNATIONAL SECURITY
Graduate
This course will take an interdisciplinary approach to studying forced migration and its implications for international security. The course will consider security of refugees and internally displaced persons in their countries of origin, on their journey, and at their destinations. It will also consider security concerns and challenges of host nations, regional bodies, and the international community.

LANGUAGE AND THE POLITICS OF TERROR
Graduate
Politics is, among other things, the arena in which human bodies are broken. This course will concern itself with the breaking of human bodies through torture, genocide, war and poverty. Throughout, a focus will be maintained on the interface between bodies and language, on how bodies placed under extremes of pain and degradation lose their capacity for speech, and how language reaches its intrinsic limits in trying to represent bodies in pain.

FIELD RESEARCH IN INTERNATIONAL STUDIES
Graduate
Supervised independent research aimed at acquiring primary data for the thesis.

INTERNATIONAL ENVIRONMENTAL POLITICS
Graduate
This course examines the international processes by which scientific knowledge concerning environmental change and degradation is translated into action on the parts of individuals, groups, states, and global institutions. We look at the political, legal, economic and cultural structures that reproduce the global propensity to disrupt or degrade the environment and that likewise prevent amelioration.

INTERNSHIP RESIDENCY
Graduate
Used to register credit hours for both Chicago-based and off-campus residencies to complete internship agreements and approved independent research proposals. 2-8 credit hours.

INTERNATIONAL SOCIAL ENGAGEMENT
Graduate
The course provides 20-25 hours of service learning opportunities for students in organizations that are pursuing local activities based on international missions or globally-informed policies. The course meetings focus on student experiences and a discussion of state, sub-state, and non-state organizational structures in the international context.
**INT 590**  
**RESEARCH METHODS: EXTENDED CASE STUDY**  
**Graduate**  
This course gives students a foundation in the techniques and theories involved in the extended case study research method.  

INT 401 is a prerequisite for this course.

**INT 591**  
**THESIS RESEARCH I**  
**Graduate**  
Students will take this course as an independent study with a thesis advisor, during which they will write and defend their thesis proposal.  

INT 590 is a prerequisite for this class.

**INT 592**  
**THESIS RESEARCH II: THESIS WRITING**  
**Graduate**  
Students will take this course as an independent study with a thesis advisor, during which they will write and defend their thesis.  

INT 401 is a prerequisite for this course.

**INT 599**  
**INDEPENDENT STUDY**  
**Graduate**  
Student-designed course incorporating reading and research conducted under faculty supervision. Variable credit hours.

**INT 601**  
**CANDIDACY CONTINUATION**  
**Graduate**  
Students who must take extra time to complete the requirements for the first or second year must enroll in candidacy continuation or must apply for readmission to the program.

**INT 699**  
**CANDIDACY MAINTENANCE**  
**Graduate**  
Placeholder course for students NOT actively working on their thesis. This course is meant only to maintain university student status, it will not give the student full- or part-time student status and will not permit deferment of student loans.

**INTC 304**  
**MULTICULTURAL COMMUNICATION IN THE U.S.A.**  
**Undergraduate**  
An examination of communication within and between linguistic communities in the United States. Focus will be on the relations between language use and social institutions such as the family, the community, the media, and the educational system. (Formerly CMN 304)

**INTC 398**  
**STUDY ABROAD**  
**Undergraduate**

**IPD 344**  
**MODERN INFORMATION TECHNOLOGY PROGRAM**  
**Undergraduate**  
An 11-week program providing instruction in coding and a hands-on overview of key topics in modern computing and business applications.
IPD 345
TECHNOLOGY AND INNOVATION
Undergraduate
A 10-week program designed to be a comprehensive study of the disciplines involved in the practical management of technology and innovation.

IPD 346
DATA SCIENCE FOR BUSINESS PROGRAM
Undergraduate
A ten-week certificate program covering data science and Big Data principles and techniques to support business decision-making. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 347
BIG DATA USING HADOOP PROGRAM
Undergraduate
An 11-week certificate program covering the Apache Hadoop framework and how it fits with Big Data. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 350
IOS DEVELOPER PROGRAM
Undergraduate
A ten week intensive certificate program covering the core issues of developing mobile applications for the iOS operating system with a focus on business applications. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll. (10 quarter hours)

IPD 351
BIG DATA AND NOSQL PROGRAM
Undergraduate
An 11-week certificate program covering popular NoSQL databases and how they fit with Big Data. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 352
IPV6 PROGRAM
Undergraduate
A ten-week online certificate program providing comprehensive coverage of IPv6 technologies and strategies for transitioning enterprise networks to IPv6. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 353
CLOUD COMPUTING WITH AMAZON WEB SERVICES PROGRAM
Undergraduate
A 5-week program in cloud computing using the Amazon Web Services platform

IPD 354
CLOUD COMPUTING INFRASTRUCTURE AND OPERATIONS PROGRAM
Undergraduate
A 6-week program in the architectures, infrastructure, and operations of Cloud Computing (2.5 quarter hours)

IPD 355
CLOUD COMPUTING TECHNOLOGIES PROGRAM
Undergraduate
An 11-week certificate program in the principles, methods, and technologies of Cloud Computing. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.
IPD 356
WEB DEVELOPMENT WITH JAVASCRIPT AND HTML5 PROGRAM
Undergraduate
An eight-week in-depth certificate program focused on user-centered Web development. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 357
WIRELESS LAN SECURITY PROGRAM
Undergraduate
An 8-week program covering the latest solutions to wireless LAN security issues. (3 quarter hours)

IPD 358
SHAREPOINT DEVELOPER PROGRAM
Undergraduate
A 10-week program covering Microsoft SharePoint development. (10 quarter hours)

IPD 359
WEB DEVELOPMENT WITH PYTHON PROGRAM
Undergraduate
A five-week certificate program covering Web development with the Python programming language. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll. (2.5 quarter hours)

IPD 360
SQL SERVER BUSINESS INTELLIGENCE PROGRAM
Undergraduate
An 11-week in-depth certificate program covering database administration using Microsoft SQL Server. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 363
SQL SERVER DATABASE ADMINISTRATION PROGRAM
Undergraduate
An 11-week in-depth certificate program covering database administration using Microsoft SQL Server. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll. (6 quarter hours)

IPD 364
JAVA WEB DEVELOPMENT PROGRAM
Undergraduate
A eight-week comprehensive certificate program covering open-source, lightweight Java enterprise Web development using POJOs (Plain Old Java Objects). This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll. (6 quarter hours)

IPD 365
RUBY ON RAILS PROGRAM
Undergraduate
A eight-week in-depth certificate program covering Web development using Ruby on Rails. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll. (6 quarter hours)

IPD 366
JAVA WEB SERVICES PROGRAM
Undergraduate
A seven-week certificate program covering service-oriented architecture and the development of Web services using Java. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.
IPD 370
ADVANCED SQL PROGRAM
Undergraduate
A two-week certificate program covering advanced SQL. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll. (1.5 quarter hours)

IPD 380
IT PROJECT MANAGEMENT PROGRAM
Undergraduate
A 10-week comprehensive program covering best practices in IT project management (8 quarter hours)

IPD 382
JAVA DEVELOPER PROGRAM
Undergraduate
A ten-week comprehensive certificate program covering object-oriented applications development using Java for programmers. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll. (10 quarter hours)

IPD 389
.NET WEB DEVELOPER PROGRAM
Undergraduate
A ten-week comprehensive certificate program covering .NET technologies. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll. (10 quarter hours)

IPD 447
BIG DATA USING HADOOP PROGRAM
Graduate
A 11-week certificate program covering the Apache Hadoop framework and how it fits with Big Data. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 451
BIG DATA AND NOSQL PROGRAM
Graduate
A 11-week certificate program covering popular NoSQL databases and how they fit with Big Data. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 452
IPV6 PROGRAM
Graduate
A ten-week online certificate program providing comprehensive coverage of IPv6 technologies and strategies for transitioning enterprise networks to IPv6. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 460
SQL SERVER BUSINESS INTELLIGENCE PROGRAM
Graduate
An 11-week in-depth certificate program covering Microsoft SQL Server analysis services, integration services, and reporting services. This program requires a separate application for admission and $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.

IPD 463
SQL SERVER DATABASE ADMINISTRATION PROGRAM
Graduate
An 11-week certificate program covering database administration using Microsoft SQL Server. This program requires a separate application for admission and a $40 application fee. Please visit IPD.CDM.DEPAUL.EDU for information on how to enroll.
**IPD 500**
**TASTE OF COMPUTING PROFESSIONAL DEVELOPMENT**
**Graduate**
The goals of this course are to: work collaboratively with peers to implement an inquiry-based curriculum in computer science; prepare to teach culturally-relevant foundational computing knowledge with concrete instructional strategies; and, develop a community of practice in the classroom with an interdisciplinary approach to problem-solving. (variable credit)

**IRE 100**
**INTRODUCTION TO IRISH STUDIES**
**Undergraduate**
This course introduces students to the interdisciplinary field of Irish Studies and helps prepare them for further study and/or participation in study abroad programs in Ireland. This course will explore a diverse range of topics including: the history, culture and politics of Ireland; the role of religion, historically and in the present day; Irish mythology and literature; the Irish Diaspora; and Ireland's role in the global political economy.

**IRE 101**
**IRELAND, 1450 - 1800, CONQUEST, COLONIZATION & REBELLION**
**Undergraduate**
This course offers a survey of Irish history from the end of the middle ages to the union of Ireland and Great Britain in 1800. It traces the ways in which Ireland was brought under great English (later British) control through processes of agreement, conquest and colonization; and the ways in which various groups within Ireland sought to resist such developments. Cross-listed as HST 266 & CTH 288.

**IRE 102**
**HISTORY OF IRELAND FROM 1800 TO THE PRESENT**
**Undergraduate**
Survey of Irish history from 1800 to 2000. Examines the course of Irish history from the Act of Union (creating the United Kingdom), through the struggles and reforms of the 19th century (Catholic Emancipation, the Famine and Irish diaspora, Fenianism, Land Reform and Home Rule), to the creation of the modern nation-state of the 20th century (the Easter Rising, partition and civil war, the role of Eamon deValera, the Republic, and the Troubles). Topics include the contributions of Irish culture and its influence in Europe and the world. Cross-listed as HST 268 and CTH 289.

**IRE 103**
**IRELAND: RELIGION AND THE CONTEMPORARY "TROUBLES"**
**Undergraduate**
An examination of the role of two Christian denominations (Protestant and Roman Catholic) in the more recent "Troubles" in the north of Ireland. Attempts to discover the contributions of religious differences in fueling and resolving the animosities between the Unionist and Nationalist sides; studies the social-historical dimension of the troubles and the Protestant and Catholic religious activities and official responses to them. Cross-listed as CTH 274.

**IRE 104**
**THE EARTH'S CULTURAL LANDSCAPE**
**Undergraduate**
A survey of the global patterns and processes which create our world's cultures. Several cultural realms such as language, religion, folk and popular culture, ethnicity, and the built environment serve as foci for a deepened understanding of the world and its people. Cross-listed as GEO 170.

**IRE 105**
**GEOPOLITICS**
**Undergraduate**
A survey of theories of international relations and geopolitics, the course explores the security dilemmas and types of collective action that mold international affairs in the Post-Cold War era. Cases from Western Europe, the Balkans, the Middle East and the Trans-Caucasus region provide opportunities to assess theoretical approaches and profile the United States' security landscape for the new millennium. Cross-listed as GEO 201.
IRE 106
THE EUROPEAN UNION
Undergraduate
An interdisciplinary study of European integration following WWII, with special emphases on the political philosophy, the geopolitical basis for the block's formation, the institutional structure, the evolution of policies, and the future development of the European Union. The course nurtures research and presentation skills through simulations of the European Commission and Council. Cross-listed as GEO 316 and PSC 340.

IRE 107
RELIGIOUS GEOGRAPHY
Undergraduate
Religion and geography are fundamentally intertwined. From the establishment of theocratic states that control territory, to the sprawl of US suburbia that has led to megachurches, the role of religion in shaping the earth's cultural landscape is undeniable. Religious beliefs shape geographies - there are places that, through faith, become sacred; elsewhere religious individuals and groups struggle to claim places in the name of their beliefs. This course will examine case studies from around the world to explore the intersection of geography and religion. Cross-listed as GEO 204.

IRE 201
TOPICS IN IRISH STUDIES
Undergraduate
See schedule for current offerings  Cross-listed as ENG 357.

IRE 202
MODERN IRISH LITERATURE
Undergraduate
This course provides an introduction to Irish literature, including some poems in the Irish language with English translations on facing pages, written from the Literary Revival to the late twentieth century. It emphasizes the transitions from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers. Cross-listed as ENG 355.

IRE 203
CONTEMPORARY IRISH LITERATURE
Undergraduate
This course is an introduction to the vibrancy of contemporary Irish literature. It explores the ways in which literature addresses issues such as new patterns of living, communal tension, and women's experience.

IRE 204
IRISH LITERATURE AND FILM
Undergraduate
In this course, students seek to examine the thematic structure of recent works of the Irish cinema in light of a selection of writings from major authors. Our study will begin with the writings of the Irish Revival and move on to contemporary fiction so as to establish an artistic base from which to investigate recent interpretations and adaptations of these materials. Then, after addressing the fundamental question "what is an Irish Film (The Quiet Man);" we will go on to a topical analysis of works dealing with central issues in the Irish cinema: politics (Michael Collins, The Wind That Shakes The Barley, The Crying Game, In the Name of the Father); urban life (The Commitments, Intermission); dystopia (Adam & Paul, The Butcher Boy), alienation, and other topics as appropriate.

IRE 249
GENDER AND POLITICS IN IRELAND
Undergraduate
This course examines the often paradoxical impact of political change and social relations on women in Ireland. Political change has at times afforded women leadership opportunities; social relations have been, especially during periods of colonial rule and the ascendancy of the Church, intensely patriarchal. The course pays particular attention to the way in which, historically and today, categories of gender have been constructed and intersect with or otherwise affect politics and social relations in the Republic of Ireland or the six counties that remain part of the United Kingdom. Cross-listed with WGS 249.
IRE 301
NINETEENTH CENTURY IRISH LITERATURE
Undergraduate
This course focuses on some of the important works of nineteenth-century Irish literature. It sees them as engaging with the often traumatic political and social changes of their time. Cross-listed as ENG 346.

A literature course is a prerequisite for this course.

IRE 302
THE IRISH REVIVAL
Undergraduate
The course invites a study of the cultural ferment of the decades from the 1890's to the 1920's in Ireland. Particular attention will be given to an introduction to the work of canonical writers such as Yeats and Joyce who emerged from it. Cross-listed as ENG 354.

IRE 303
REVOLUTION AND NATIONALISM IN IRELAND
Undergraduate
From the eighteenth to the twenty-first century Irish history has been defined by the emergence of national consciousness. This emerging consciousness has been expressed through violent rebellion against British rule and participation in British politics. This course traces the course of revolution and nationalism in Ireland from 1798 to 1923. This course traces the evolution of Irish nationalism and examines the historical literature of this subject. Key themes include: agrarian unrest, parliamentary politics, ideological revolution and the interaction of these forces to achieve independence.

IRE 379
INDEPENDENT STUDY
Undergraduate
Intensive study of a topic of special interest which is relevant to Irish Studies, normally in one of the curricular areas in which Irish Studies is taught in the minor, and usually with a faculty member who teaches in the Irish Studies program. An independent study typically involves private conferences with an instructor and supervised reading, research and writing. Written permission of the supervising faculty member and of the program director is necessary before registration.

IRE 398
INTERNSHIP
Undergraduate
The course combines academic study with practical experience obtained through work in an extramural internship setting or on campus that relates to Ireland or Irish-America. The internship course requires academic output in the form of a research journal, paper, or other project.

IS 201
INTRODUCTION TO INFORMATION SYSTEMS
Undergraduate
This course demonstrates how information is used by organizations to conduct business and solve problems. This course presents information systems principles and demonstrates how they form an integral part of modern organizations. Topics include systems concepts; organizational processes; technological aspects of information systems; the Internet; IT security and ethical issues; database management; and systems development life cycle. In addition, students familiarize themselves with the DePaul computing environment and demonstrate competency at navigating that environment. PREREQUISITE(S): none

IS 208
INFORMATION TECHNOLOGY, ECONOMY AND SOCIETY
Undergraduate
Introduction to emerging information technologies and their impact on modern society. This course discusses the latest technologies used in the evolving IT environment and how these technologies are changing the modern world. Emphasis is placed on investigating issues using a variety of sources, case studies, and writing. PREREQUISITE(S): None
IS 215  
ANALYSIS AND DESIGN TECHNIQUES  
Undergraduate  
This course presents a structured approach to analysis and design of an information system for a business. The systems development life cycle will be defined and described. Process descriptions, user and task analysis for interface development, prototyping, data flow and entity relationship diagramming will be presented. Case studies that promote critical-thinking skills provide the context for these techniques. Formerly IT 215. PREREQUISITE(S): none

IS 280  
COMMUNICATION FOR THE GLOBAL IT PROFESSIONAL  
Undergraduate  
Development of professional communication and collaboration skills for the global IT workplace. Students cultivate proficiency with traditional in-person and electronic communications, modeling the conflict resolution, personal initiative, and personal presentation behaviors necessary for career advancement. Students become comfortable users of virtual communication and collaboration toolsets such as VoIP, collaborative editors, web presentation software, virtual team portals, and virtual scheduling tools. PREREQUISITE(S): WRD 104. For students required to take LSP 120, it is also a prerequisite.

IS 324  
ENTERPRISE ARCHITECTURE  
Undergraduate  
This course explores the characteristics, selection, implementation and management of enterprise architecture frameworks, focusing primarily on the evaluation and planning of information systems from a top-down perspective. Major topics include enterprise architecture, Web 2.0, Enterprise 2.0, social media and networking, software as a service, content management systems, cloud computing, and portals; each is studied in terms of its characteristics and potential applications within an organization. PREREQUISITE(S): IS 215

IS 331  
FUNDAMENTALS OF DIGITAL PRODUCT MANAGEMENT  
Undergraduate  
This course focuses on the creation and management of intangible technology products and services throughout the entire product management lifecycle. The benefits of the product management process along with the role of the Product Manager throughout the digital product lifecycle, main tasks, key reports and relationships, and the relationship between product management and product marketing will be examined. PREREQUISITE(S): None

IS 344  
IT AUDITING  
Undergraduate  
Management and boards continue to recognize the importance of effectively managing information technology (IT) assets - to meet business objectives and to thoughtfully manage IT related business risks. This course examines the key principles related to auditing information technology processes and related controls and is designed to meet the ever increasing needs of IT audit and IT governance professionals. In addition, this course aids in the preparation for the Certified Information Systems Auditor (CISA) exam. PREREQUISITE(S): None

IS 356  
BUSINESS INTELLIGENCE SYSTEMS  
Undergraduate  
Survey of emerging technologies used for decision support, collaborative decision support, knowledge management, and virtual team support in modern organizations. The course will critically examine how organizations may leverage these technologies toward competitive advantage. Students will gain hands on experience with SaaS collaboration and decision making tools. PREREQUISITE(S): IS 201 and IT 240
IS 360
SYSTEMS FOR CLOUD COMPUTING AND BIG DATA
Undergraduate
This course surveys the basic system characteristics of cloud-based business applications and large-scale, non-traditional data management technologies such as Hadoop and NoSQL. Key concepts, benefits and challenges, domains of managerial applications are discussed. Students understand firsthand the features of cloud and big data technologies through lab sessions. Students will work within a project team following the principles of project management to analyze the needs of a firm, to propose the functionality of a cloud-based data management application, and to present a detailed implementation plan for the system with its cost-benefit analysis. PREREQUISITE(S): IT 240

IT 240 is a prerequisite for this class.

IS 370
IT APPLICATIONS IN BUSINESS
Undergraduate
An exploration of applications of Information Technology within business and non-profit organizations, with emphasis upon the following topics: ways managers, work groups, and organizations acquire and use information; typical business applications and their deployment in organizations; and information flows within common business systems. Additional topics include the role and structure of supply chains, IT support for Web-enabled enterprises, and global considerations for information system design. Coverage also includes standards for software acquisition, including evaluation of commercial software products. An introduction to the major principles of decision support and expert systems, business intelligence, and knowledge management, as well as risk, security, and disaster recovery within an organizational setting are also covered. PREREQUISITE(S): IS 215 or IS 201

IS 371
INTRODUCTION TO IT SYSTEM MANAGEMENT
Undergraduate
This course focuses on implementation and post-implementation support for information systems. Topics include testing, deployment, user training, help desk, software upgrades, and staffing for support teams. Case studies and team projects. PREREQUISITE(S): IS 215

IS 215 is the prerequisite for this class

IS 372
SOFTWARE PROJECT MANAGEMENT
Undergraduate
An introduction to the concept and techniques of project management for a broad range of systems, including Web-based application development. Topics include resource management, organizational factors, project manager responsibilities, team building, and risk management. Tools and techniques for project estimating and scheduling will be presented. Case study and group projects. PREREQUISITE(S): IS 215

IS 215 is the prerequisite for this class

IS 373
INTRODUCTION TO ENTERPRISE SYSTEMS
Undergraduate
A course on technical and management aspects of enterprise systems. It incorporates hands-on experience on enterprise resource planning (ERP) systems. Topics include: characteristics and selection of ERP systems, ERP implementation, customer relationship management (CRM), supply chain management (SCM), ERP systems administration, cloud computing and ERP, and enterprise integration with ERP. PREREQUISITE(S): IS 215

IS 215 is the prerequisite for this class

IS 375
OBJECT-ORIENTED ANALYSIS AND DESIGN
Undergraduate
This course focuses on object-oriented modeling techniques for analysis and design. Emphasis will be on the creation of well-designed, robust and maintainable software systems. UML (Unified Modeling Language) will be examined for modeling the system. Case studies will promote critical-thinking skills as well as provide the foundation for a student project that incorporates the skills attained throughout the quarter. PREREQUISITE(S): IS 215

IS 215 is the prerequisite for this class
**IS 376**

**INFORMATION SYSTEMS PROJECT**  
*Undergraduate*

This senior project course requires students to apply prior learning in project management and systems development lifecycle by developing a complete system from business case, analysis, and design, through implementation strategies. Team project, documentation, presentation, the use of development as well as project management tools will be emphasized. *PREREQUISITE(S): IS 372*

IS 372 is the prerequisite for this class

---

**IS 379**  

**VIRTUAL SOFTWARE TEAMS**  
*Undergraduate*

Fundamentals of software development in a virtual environment (if possible with students from different countries). Using an open source development environment; working across time, language, and culture; effective use of collaborative tools. *PREREQUISITE(S): IS 215 or program development experience*

---

**IS 380**  

**ESSENTIALS OF TECHNOLOGY ENTREPRENEURSHIP**  
*Undergraduate*

Introduction to the entrepreneurial process within technology intensive ventures. Roles of entrepreneurs and their start-up teams. Suitable business models and strategies. Legal issues and intellectual property. Financial issues and venture resources. Role of the customer and entrepreneurial marketing. Course will include group case studies of technology entrepreneurial ventures. Students will work in teams to develop a marketing plan and a business plan for a technology-intensive entrepreneurial venture of their choice. Course requires a prior foundational understanding of IT as is typically developed by the start of junior year.

---

**IS 382**  

**INTRODUCTION TO LEGAL ISSUES IN INFORMATION TECHNOLOGY**  
*Undergraduate*

Introduction to the legal standards to which people and organizations are held under laws and regulations that concern computing and information technology. Topics include government and laws, business regulations, healthcare regulations, education regulations, data breach reporting and notification, privacy laws, laws of search and seizure, freedom of speech and association, defamation, cyber crimes, contracts, and intellectual property. *PREREQUISITE(S): None*

---

**IS 396**  

**TOPICS IN INFORMATION SYSTEMS**  
*Undergraduate*

Specific topics will be selected by the instructor and will vary with each quarter. See syllabus.

---

**IS 398**  

**INTRODUCTION TO IS MANAGEMENT SEMINAR**  
*Undergraduate*

This one-credit seminar examines the concepts of information and technology management and career options in this field. Students will assess their own interests and skill requirements for various careers. They will also analyze the impacts of IS trends and emerging technologies on their career choices. All new IS master's students are required to take this seminar as the first course. *PREREQUISITE(S): None (1 quarter hour)*

Status as a Graduate student in the Information Systems Prerequisite Phase is a prerequisite for this class.

---

**IS 399**  

**INDEPENDENT STUDY**  
*Undergraduate*

Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. *Prerequisite(s): None*
IS 400
INTRODUCTION TO IS MANAGEMENT SEMINAR
Graduate
This one-credit seminar examines the concepts of information and technology management and career options in this field. Students will assess their own interests and skill requirements for various careers. They will also analyze the impacts of IS trends and emerging technologies on their career choices. All new IS master's students are required to take this seminar as the first course. PREREQUISITE(S): None (1 quarter hour)

IS 421
SYSTEMS ANALYSIS
Graduate
Course focus is on both traditional and object oriented systems analysis, with an emphasis upon developing competency in a wide range of modeling techniques. Specific topics include: overview of the software development environment and project management; project selection, initiation, and planning; determining requirements; process modeling, including DFDs and use cases; logic modeling, including decision tables, sequence diagrams, and activity diagrams; Introduction to Entity-Relationship Diagrams. PREREQUISITE(S): None

IS 422
SYSTEM DESIGN, IMPLEMENTATION, AND MAINTENANCE
Graduate
Course focus is on both traditional and object oriented systems design. Specific topics include: database design, including logical and physical design; Entity-Relationship diagrams, class diagrams, form and report design; interface and dialogue design; design specifications, including structure charts and prototypes; designing for LANs and distributed systems, as well as the Internet; system implementation, including parallel and phased implementation, testing, documentation, and user training; system maintenance, including types of maintenance, controlling and coordinating maintenance requests, and configuration management. Course ends with a multi-week case study applying the principles from both this course and IS 421, Systems Analysis. PREREQUISITE(S): IS 421 and CSC 451

IS 430
FUNDAMENTALS OF IT PROJECT MANAGEMENT
Graduate
This course concentrates on monitoring, managing and controlling assets and resources on a single IT project. Topics covered are risk management; procurement and contract management; time and cost estimating; controlling and tracking techniques; quality assurance; testing and audit. Students will use common project management software for resource allocation and balancing. PREREQUISITE(S): None

IS 431
DIGITAL PRODUCT MANAGEMENT
Graduate
This course focuses on the central role of the Product Manager in creating and sustaining compelling products and services throughout the product lifecycle. Special emphasis is placed on the creation and management of intangible technology products and services throughout the entire product management lifecycle. Product managers act as the focal point for value creation within their organizations leading cross functional product activities from the conception of an idea to the ultimate product retirement. PREREQUISITE(S): None

IS 433
INFORMATION SECURITY MANAGEMENT
Graduate
Managing information assets and the security function. Emphasis on managing security-related risk, as well as the process of developing, implementing, and maintaining organizational policies, standards, procedures, and guidelines as they relate to security. Role of the CISO. Identifying and evaluating information assets, threats, and vulnerabilities. Quantitative and qualitative risk analysis, risk mitigation, residual risk, and risk resolution, as they relate to information security. Incident response. Consideration of the role and implementation of security controls during the process of analysis, design, and development. The application of policy development principles to security risk management. Introduction to compliance, as well as the CISSP domains. PREREQUISITE(S): None
IS 435

ORGANIZATIONAL MODELING

Graduate

The course explores contemporary approaches to analyzing and modeling organizational problems, processes, workflow, users and data. The emphasis is on the initial stages of analysis where the root cause of problems are identified, formulated and modeled. Students will acquire an array of modeling skills and be able to prescribe the proper modeling approach based on a variety of organizational and contextual factors. Business process modeling, management and metrics will be covered. Object-oriented and user-centered approaches will be introduced. PREREQUISITE(S): IS 421 or SE 430

IS 440

COLLABORATIVE TECHNOLOGIES FOR LEADING PROJECTS

Graduate

Study of the process of virtual teaming with emphasis on facilitation of different time project activities and facilitation of same time meetings. Students will learn how small group psychology and group communication theories inform specific behaviors in the design and leadership of meetings. Several meeting types including information briefing, focus group, document writing, decision making, requirements gathering, and teaching/training will be explored. In addition, the course surveys current collaboration technologies and discusses how to select among those technologies usability and fit to purpose of a meeting agenda. DL students may be required to schedule same time sessions with the instructor and other DL students; see current quarter syllabus for more information on this point. PREREQUISITE(S): None

IS 444

IT AUDITING

Graduate

Management and boards continue to recognize the importance of effectively managing information technology (IT) assets - to meet business objectives and to thoughtfully manage IT related business risks. This course examines the key principles related to auditing information technology processes and related controls and is designed to meet the ever increasing needs of IT audit and IT governance professionals. In addition, this course aids in the preparation for the Certified Information Systems Auditor (CISA) exam. PREREQUISITE(S): None

IS 452

BIG DATA & THE INTERNET OF THINGS (IoT)

Graduate

This course surveys system design concepts, techniques, and algorithms in Machine to Machine (M2M), Internet of Things (IoT), and Internet of Everything (IoE). Topics covered include system architecture for big data, sensors and embedded technologies, IoT architecture, consumer vs. industrial IoT, wearable and mobile systems, tracking systems, IoT and big data analytics, market dynamics and entrepreneurial opportunities. Special emphasis is placed on identifying best practices in using big data and IoT through case studies and hands-on exercises. PREREQUISITE(S): None

IS 455

ELECTRONIC BUSINESS

Graduate

An introduction to electronic business. The topics include business models, technologies, business and social impact of e-business. It explores the tools, skills, business and social implications of emerging electronic business. In addition to acquiring basic skills for identifying electronic business opportunities and creating a presence in the online marketplace, the student reexamines fundamental processes of business as they are performed in cyberspace in contrast to the marketplace. This helps them understand changes as the cyberspace grows increasingly important in the global economy. PREREQUISITE(S): None. For Kellstadt students or students pursuing the MS in Business Information Technology only.

Status as a MS-Business Information Technology student or Kellstadt student is a prerequisite for this class.

IS 456

KNOWLEDGE MANAGEMENT SYSTEMS

Graduate

Survey of emerging technologies supporting organizational knowledge processes including capture, codification, structure, storage, dissemination and reuse. The course will critically examine how organizations may leverage these technologies toward competitive advantage. Students will experiment with contemporary knowledge management (KM) tools. Some theoretical perspectives on knowledge management (KM) and organizational learning (OL) will be introduced. PREREQUISITE(S): None
**IS 467**  
**FUNDAMENTALS OF DATA SCIENCE**  
**Graduate**  
An introduction to the Knowledge Discovery Technologies covering all stages of a data mining process: domain understanding, data collection and selection, data cleaning and transformation, dimensionality reduction, pattern discovery, evaluation, and knowledge extraction. The course provides a comprehensive overview of data mining techniques used to realize these stages, including traditional statistical analysis and machine learning techniques. Students will analyze large datasets and develop modeling solutions to support decision making in various domains such as healthcare, finance, security, marketing, customer relationship management (CRM), and multimedia. PREREQUISITE(S): IT 403 or CSC 423

IT 403 (or CSC 423) is a prerequisite for this class.

**IS 482**  
**LEGAL RESPONSIBILITIES IN INFORMATION TECHNOLOGY**  
**Graduate**  
This course examines the legal standards to which people and organizations are held under laws and regulations that concern computing and information technology. This course is a complement to CNS 477, which focuses on governance policies and business costs. Topics include government and laws, business regulations, healthcare regulations, education regulations, data breach reporting and notification, privacy laws, laws of search and seizure, freedom of speech and association, defamation, cyber crimes, contracts, and intellectual property. PREREQUISITE(S): None

**IS 483**  
**INFORMATION SERVICES AND OPERATIONS**  
**Graduate**  
This course focuses on the operational aspects of information systems in organizations by examining the concepts, tools and techniques available to IS professionals responsible for the delivery of IT services. Topics include the organization of the IT services; the procurement of hardware, software and vendor services; operation of data centers, help desks and user training, the development and use of RFPs (Request for Proposals) and SLAs (Service Level Agreements), the integration of services and operations with application development project needs, and the role of capital and operating budgets. PREREQUISITE(S): Completion of five or more SoC MS level courses is required.

Completion of five or more School of Computing MS level courses is required.

**IS 485**  
**REQUIREMENTS ELICITATION, ANALYSIS, AND SPECIFICATION**  
**Graduate**  
This course focuses on the concepts and skills needed to elicit, analyze, specify, and manage requirements for a software or systems level project. Students will learn to identify and work with stakeholders through conducting a variety of requirements gathering techniques including interviewing, surveying, ethnography, and Joint Application Design (JAD) sessions, to identify and analyze requirements conflicts and negotiate solutions, to model requirements and specify them in unambiguous ways, and to manage requirements throughout the software lifecycle using change controls, traceability, and impact analysis techniques. The requirements process will be examined in both traditional and agile environments. Current topics such as requirements for product lines or distributed development teams will also be explored as time permits. A student may not take both SE 482 and IS 485 for credit toward a degree. PREREQUISITE(S): IS 422 or IS 430 or PM 430.

IS 422 or IS 430 or PM 430 are prerequisites for this class

**IS 488**  
**INFORMATION TECHNOLOGY LEADERSHIP**  
**Graduate**  
Managing people ethically and effectively by applying a broad range of creative approaches to individual and team leadership within an Information Technology context. Leadership methods studied include trait-based, skills-based, situational, contingency theory, path-goal theory, leader-member exchange theory, transformational, psychodynamic, and authentic leadership, as well as team leadership and the international, cultural, and ethical dimensions of leadership. Students assess their leadership styles and design individualized development plans to strengthen existing skills and expand IT leadership capabilities by incorporating additional leadership dimensions. PREREQUISITE(S): IS 430 OR PM 430 OR SE 477

IS 430 or PM 430 or SE 477 is a prerequisite for this class
IS 505
BUSINESS CONTINUITY/DISASTER RECOVERY THEORIES AND STRATEGIES
Graduate
This course focuses on the knowledge necessary for an organization to prepare for a variety of major disruptions (floods, earthquakes, terrorist attacks, etc.). The goal is survival of the organization and its daily workflow despite major disruption. Students learn to analyze and prioritize risks and determine criticality ratings that are used to determine survival strategies. Students also learn how to organize employees to respond to a major disruption and how to document recovery plans. Course content includes coverage of current industry trends, as well as planning for the survival of Information Technology functions within an organization.

IS 506
BUSINESS CONTINUITY/DISASTER RECOVERY MANAGEMENT AND TACTICS
Graduate
The course prepares students to lead an organization's business continuity and disaster recovery plans. Students learn the methodology needed to organize this function within an organization, evaluate an organization's business continuity and disaster recovery program according to established industry standards, and conduct a variety of quick-recovery drills. Students also focus upon industry-related human resources issues, crisis communications, and policies and procedures for setting up a command center. Course content includes coverage of current industry trends, as well as managing the survival of Information Technology functions within an organization. PREREQUISITE(S): IS 505

IS 505 is the prerequisite for this class

IS 511
SOCIAL ISSUES OF COMPUTING
Graduate
This course aims to provide a broad survey of the individual, organizational, and cultural impacts of computers and to stimulate reflection upon the social and ethical issues provoked by current and projected uses of computers. Some topics include an in-depth look at computers as they relate to workplaces, communities, public policy, legal issues, education, privacy, and moral values. PREREQUISITE(S): NONE.

IS 535
INFORMATION TECHNOLOGY INVESTMENT FINANCIAL ANALYSIS
Graduate
This course focuses on the application of financial analysis and decision-making approaches to aid information technology investment decisions at the operational, project, tactical and strategic levels. Students will learn how to apply a variety of financial methods -- breakeven analysis, present value analysis, profitability index, and return on investment to various IT investment decisions. The course will also address cost benefit analysis, outsourcing, balanced scorecard, and multi-factor scoring, benchmarking, and IT investment portfolio methods. These techniques will prepare students to manage capital budgets, acquisition of system and application software, hardware, personnel, and professional services at project and system levels as well as enterprise investment portfolio. PREREQUISITE(S): SE 477 or IS 565 or ACCT 500 or IS 430 or PM 430 or ECT 455

SE 477 or IS 565 or ACC 500 or IS 430 or PM 430 or ECT 455 is a prerequisite for this class.

IS 536
ENTERPRISE CLOUD COMPUTING
Graduate
Cloud concepts, architecture, and service management, with particular emphasis upon identifying and analyzing potential business applications of cloud computing. Students will conduct feasibility studies, detailing the advantages and disadvantages of implementing a cloud computing platform for specific applications, with particular emphasis upon financial considerations, business benefits, and security risks. Students will develop the ability to evaluate alternatives and effectively argue in favor of their choices within the cloud computing knowledge domain. They will be able to define, apply, and defend the need for standards and best practices. Students will work within a project team following the principles of project management to design, build, and implement cloud applications.

IS 540
GLOBAL INFORMATION TECHNOLOGY
Graduate
A study of the hardware, software, and techniques for using virtual information technologies to support teams working in a distributed, virtual, or global environments. Topics include software survey and evaluation, software deployment within organizational and trans-organizational contexts, trans-national vendor relationships, trans-border data flow, geographically dispersed software development, and integration of diverse technologies. PREREQUISITE(S): Completion of five or more SoC MS level courses is required.

Completion of five or more School of Computing MS level courses is required.
IS 549
DATA WAREHOUSING
Graduate
Introduction to data warehousing and the foundations of understanding the issues involved in building a successful data warehouse. Data warehouse development methodology and issues surrounding the planning of the data warehouse. Data quality and metadata in the data warehouse. Analysis, transformation and loading of data into a data warehouse. Development of the data architecture and physical design. Implementation and administration of the data warehouse. PREREQUISITE(S): CSC 451 or CSC 453 or CSC 455

CSC 451 or CSC 453 or CSC 455 is a prerequisite for this class.

IS 550
ENTERPRISE DATA MANAGEMENT
Graduate
This course focuses on the technical concepts and managerial knowledge needed to define, integrate and govern centralized and distributed data for a wide range of application systems used at large, multinational corporations. Topics include data repository, data life cycle, DAMA-DMBOK, data stewardship, data asset valuation, enterprise data architecture, data modeling with meta-data, data security standards, master data, and data quality management. PREREQUISITE(S): CSC 451 or CSC 453 or CSC 455

CSC 451 or CSC 453 or CSC 455 is a prerequisite for this class.

IS 556
ENTERPRISE PROJECT MANAGEMENT
Graduate
This course covers how an enterprise coordinates and effectively manages all its IT projects and programs through program management and the IT program management office. Students will learn the role of the IT program management office in establishing and maintaining the project and program infrastructure and in assisting project managers, program managers, and the executive steering committee. Students will analyze the role of program management in coordinating the delivery of expected program benefits, in managing stakeholder expectations, and in establishing program governance. PREREQUISITE(S): IS 430 or PM 430

IS 430 or PM 430 is a prerequisite for this class.

IS 560
ENTERPRISE SYSTEMS
Graduate
An introduction to enterprise systems for data and process integration, including ERP systems. Topics include the requirements of enterprise systems, application architecture, tools, and functionality of leading enterprise systems, life cycle and methodologies for systems integration, selection, and implementation strategies. Also addressed are emerging trends for enterprise systems and relationship among component systems. PREREQUISITE(S): Advanced Standing

IS 565
IT OUTSOURCING
Graduate
The course focuses on how organizations can use leverage of scale as a source for cost reduction; leverage of expertise for improved superior IT performance; leverage of access (e.g. location) to develop new strategies. Other topics covered include different types of sourcing strategies, sourcing maturity levels and best practices. PREREQUISITE(S): Completion of five or more SoC MS level courses is required

Completion of five or more School of Computing MS level courses is required.

IS 570
ENTERPRISE SYSTEM IMPLEMENTATION
Graduate
Formerly IS 450. This course is targeted towards information systems professionals who are involved in the planning and implementation of large scale, cross-functional enterprise systems. Students will examine the characteristics of technology efforts that change and transform the way people perform their tasks and how the new technology structures the flows of information and decision making using workflow modeling methods. Through case studies and exercises students gain insights into the elements of successful implementations leading to the preparation of a change management plan. Emphasis is placed on developing mechanisms for communicating and training all affected agents. PREREQUISITE(S): IS 430 or PM 430 or completion of five or more other SoC MS level courses should contact the course instructor or an advisor.

IS 430 or PM 430 or completion of five or more other SoC MS level courses is a prerequisite for this class; contact instructor or advisor.
IS 574  
BUSINESS INTELLIGENCE  
Graduate

Introduction to the concepts of business intelligence (BI) as components and functionality of information systems. How business problems can be solved effectively by using operational data to create data warehouses, and then applying data mining tools and analytics to gain new insights into organizational operations. Detailed discussion of the analysis, design and implementation of systems for BI, including: data management systems, decision support systems, group support systems, knowledge engineering, expert systems, and Web 2.0 tools. Case studies of application software, web tools, success and limitation as well as technical and social issues. (PREREQUISITE(S): (SE 430 or IS 435 or PM 430 or MIS 674) and CS C451

(SE 430 or IS 435 or PM 430 or MIS 674) and CSC 451 are the prerequisites for this class

IS 577  
INFORMATION SYSTEMS POLICIES AND STRATEGIES  
Graduate

This capstone course emphasizes the planning and management of information technologies and related resources at the corporate level. Topics covered include assessment of information technologies, tracking emerging technologies and trends, managing portfolio resources and matching them to business needs, technology transfer, end-user computing, outsourcing, theoretical models, strategic applications and strategic IT planning. Students are encouraged to take this course toward the end of their study. PREREQUISITE(S): Completion of ten or more SoC MS level courses is required.

IS 578  
INFORMATION TECHNOLOGY CONSULTING  
Graduate

This course is for the IT professional. The emphasis is on examining the models, techniques, and skill development for providing effective IT consulting services. The course examines the structure of IT consulting markets; leading IT consulting practices: models and approaches for providing internal IT consulting services; sourcing strategies, evaluation of RFPs and response process contract formulation, client relations and project management; knowledge management and collaboration and IT strategies. PREREQUISITE(S): Completion of foundation or core phase.

IS 579  
VIRTUAL SOFTWARE TEAMS MANAGEMENT  
Graduate

Application of project management principles, tools, and techniques to a virtual software development project; management of virtual software teams; planning, executing the plan, monitoring and controlling the development process. Work with project office (PMO) to set templates for reporting and common processes and standards; set milestones and their deliverables; establish communication medium for the virtual team. PREREQUISTED(S): PM 430 or IS 430

IS 430 or PM 430 is a prerequisite for this class

IS 580  
TECHNOLOGY ENTREPRENEURSHIP  
Graduate

In-depth examination of the entrepreneurial process within technology intensive ventures. Roles of entrepreneurs and their start-up teams. Suitable business models and strategies. Legal issues and intellectual property. Financial issues and venture resources. Role of the customer and entrepreneurial marketing. Students will analyze and present case studies of technology entrepreneurial ventures. Students will develop a marketing plan and a business plan for a technology-intensive entrepreneurial venture of their choice. PREREQUISITE(S): Completion of the foundation phase.

IS 590  
INFORMATION SYSTEMS RESEARCH METHODS  
Graduate

Introduction of information systems (IS) research methods and theories. The course is taught as a seminar course. Both quantitative and qualitative methods are discussed. PREREQUISITES: CSC 424 or CSC 428

CSC 424 or CSC 428 are prerequisites for this class
IS 596
TOPICS IN INFORMATION SYSTEMS
Graduate
Specific topics will be selected by the instructor and will vary with each quarter. See syllabus.

IS 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. Prerequisite(s): None

IS 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. Students may register for this course no more than twice. (PREREQUISITE(S): Consent of advisor). (variable credit)

IS 696
MASTER'S PROJECT
Graduate
Four credit hours. Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. (PREREQUISITE(S): Consent of advisor).

IS 698
MASTER'S THESIS
Graduate
Two credit hours. Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. Independent study form required. (PREREQUISITE(S): Consent of advisor). (2 quarter hours)

ISM 101
FOUNDATIONS OF INTERACTIVE & SOCIAL MEDIA
Undergraduate
This course approaches the study of Interactive and Social Media through the analysis of interactive media artifacts (e.g. games, apps, websites, etc.) in order to develop a shared language for what are common components of all interactive artifacts. Students will also examine how delivery platforms (e.g. smart phone, tablet, interactive kiosk, desktop, phone) constrain and afford different interactivity. Students will conduct weekly product analysis along with a final project where they inventory and analyze all of the interactive artifacts they use in a 48 hour period. PREREQUISITE(S): none.

ISM 208
VIRTUAL WORLDS AND ONLINE COMMUNITIES
Undergraduate
Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cyberculture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging. PREREQUISITE(S) WRD 104

WRD 104 is a prerequisite for this class.
ISM 210  
**INTRODUCTION TO HUMAN-COMPUTER INTERACTION**  
*Undergraduate*

This course familiarizes students with the user interface development process, including user and task analysis, interaction design, prototyping and evaluation. Students study human perception, cognition and motor abilities as they relate to the design of interactive systems. In a series of projects, students design and revise prototypes as they apply a user-centered design process. Emphasized topics include user profiles, information architecture and usability testing. Students provide written analysis of their research and process. Formerly IM 210.  
PREREQUISITE(S): None

ISM 220  
**INTERACTIVE DESIGN & PROTOTYPING**  
*Undergraduate*

This course applies interactive media principles for a variety of contexts with a goal of exploring relative merits among common interaction paradigms. Based on assessed needs and intended functionality, students create working prototypes that demonstrate a range of design patterns, particularly those with a high level of interactivity such as rich internet applications, games, and visual simulations. Emphasis is given to visual design principles and aesthetics for creating interesting and engaging interactive experiences. Formerly IM 220.  
PREREQUISITE(S): ISM 210 or GD 200

ISM 210 or GD 200 is the prerequisite for this class

ISM 222  
**INFORMATION VISUALIZATION**  
*Undergraduate*

This course discusses the basic problems and techniques of visualizing quantitative and qualitative data. Topics include: perception, types of information, representation of univariate and multivariate data and relational information, analysis of representations, presentation, and dynamic and interactive visualizations. Students will create visualizations using graphical software. PREREQUISITES: LSP 120

LSP 120 is a prerequisite for this class.

ISM 225  
**WEB 2.0 BUILDING BLOCKS**  
*Undergraduate*

This seminar course will provide students with a foundation in understanding the key computational infrastructures upon which today's social applications are built (e.g. social networks, cookies, cloud computing, media streaming, APIs, location-based awareness). Students will examine popular web 2.0 sites/apps and analyze for the inclusion of building blocks in order to understand how these building blocks facilitate the user experiences deemed essential for web 2.0 apps. Prerequisite(s): none

ISM 270  
**USER-CENTERED WEB DESIGN**  
*Undergraduate*

Prerequisites: IT 130 or HCI 201

IT 130 or HCI 201 is a prerequisite for this class

ISM 320  
**ADVANCED PRINCIPLES OF INTERACTIVITY**  
*Undergraduate*

This course will use complex interactive web projects to challenge students to solve real-world problems. Students will build upon the organizational and analytical strategies learned in ISM while expanding their knowledge of Flash subjects such as site integration, utilizing remote data and manipulating video. PREREQUISITE(S): ISM 220 or GD 215 or GD 216

ISM 220 or GD 215 or GD 216 are the prerequisites for this class

ISM 236  
**INTERACTIVE MEDIA SCRIPTING FOR PROGRAMMERS**  
*Undergraduate*

Object-oriented programming in ActionScript for students who already know how to program. Students will design, code and test interactive media using standard and custom designed classes. PREREQUISITE(S): Experience in at least one high-level programming language.
ISM 360
USER-CENTERED EVALUATION
Undergraduate
Overview of user research and usability evaluation methods. User research includes interviews, profiles and scenarios. Usability evaluation methods include expert inspections and usability testing. PREREQUISITE(S): ISM 210.
ISM 210 is the prerequisite for this class

ISM 390
TOPICS IN INTERACTIVE AND SOCIAL MEDIA
Undergraduate
Specific topics will be selected by the instructor and may vary with each quarter. PREREQUISITE(S): For specific prerequisites, see syllabus or consult with course instructor.

ISM 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit.
PREREQUISITE(S): None. (variable credit)

ISP 100
THE NATURE OF SCIENCE
Undergraduate
The Nature Of Science  (Cross-listed As PHY 100)

ISP 220
INTERACTIONS OF SCIENCE & TECHNOLOGY
Undergraduate
INTERACTIONS OF SCIENCE & TECHNOLOGY

ISP 245
LIFE IN THE UNIVERSE
Undergraduate
Life In The Universe

ISP 300
SELECTED SEMINAR TOPICS
Undergraduate
Offered each quarter, the topics of the junior seminar vary. Each offering, however, builds upon concepts introduced in a previous core course and involves a research project. Cross-listed as HON 300. Variable credit.

ISP 330
PEER EDUCATION SERVICE LEADERS I
Undergraduate
This course is designed to prepare service immersion trip leaders and to promote their development as socially responsible leaders. The focus is on foundational theory and developing transferable life skills related to reflective theory and practice, Vincentian concepts of service, and peer education. Students must speak with their advisor to learn how this course may be applied to help satisfy their JYEL requirement.

ISP 331
PEER EDUCATION SERVICE LEADERS II
Undergraduate
Students will apply the theories and practices learned in ISP 330 to their service immersion groups. Through experiential, interactive, academic and reflective activities students will continue reflection on Vincentian service and their leadership roles. Students must speak with their advisor to learn how this course may be applied to help satisfy their JYEL requirement.
ISP 390
SPECIAL TOPICS
Undergraduate
Variable credit.

ISP 392
INTERNSHIP
Undergraduate
Internship

ISP 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

IT 130
INTRODUCTORY COMPUTING FOR THE WEB
Undergraduate
An introduction to the Internet, the World Wide Web, and web development for students with a strong interest in technology. Students will create interactive web pages by writing HTML and CSS and by programming in JavaScript. Topics include the origins of the web, the roles and operations of web browsers and web servers, interacting with web applications through forms, and using style sheets to separate document structure and document formatting. PREREQUISITE(S): NONE.

IT 200
PUTTING YOUR MAJOR TO WORK
Undergraduate
This two credit course is designed to complement the student’s major field of study. Students will explore connections between their academic course of study and internship and career opportunities. Students will refine their skills in networking, interviewing, developing a personal brand and utilization of social media tools. (2 quarter hours)

IT 201
INTRODUCTION TO INFORMATION SYSTEMS
Undergraduate
(Formerly IS 201 Introduction to Information Systems) This course demonstrates how information is used by organizations to conduct business and solve problems. This course presents information systems principles and demonstrates how they form an integral part of modern organizations. Topics include systems concepts; organizational processes; technological aspects of information systems; the Internet; IT security and ethical issues; database management; and systems development life cycle. In addition, students familiarize themselves with the DePaul computing environment and demonstrate competency at navigating that environment. PREREQUISITE(S): none

IT 202
CODING FOR AUDIO AND VIDEO
Undergraduate
This course serves as an introduction to programming for students interested in studying audio and sound design for the visual image. Students will learn the importance of coding in audio and video applications, how to create and edit scripts, and how to integrate computer programmers into the workflow. PREREQUISITE(S): LSP 121 or MAT 130

IT 211
INTRODUCTION TO APPLIED PROGRAMMING
Undergraduate
Introduction to application development and problem solving. Basic programming constructs including control structures, I/O functions and object-based programming. Projects include small-scale applications using web-services, file processing, databases and application software. PREREQUISITE(S): IT 130

IT 130 is the prerequisite for this class.
IT 212
APPLIED OO PROGRAMMING
Undergraduate
Introduction to Object-Oriented Programming. Students will use object-oriented programming to integrate systems and applications on multiple platforms, developing and understanding basic distributed applications and how they communicate. PREREQUISITE(S): IT 211
IT 211 is the prerequisite for this class.

IT 215
ANALYSIS AND DESIGN TECHNIQUES
Undergraduate
(Formerly IS 315) This course presents a structured approach to analysis and design of an information system for a business. The systems development life cycle will be defined and described. Process descriptions, user and task analysis for interface development, prototyping, data flow and entity relationship diagramming will be presented. Case studies that promote critical-thinking skills provide the context for these techniques. PREREQUISITE(S): none

IT 223
DATA ANALYSIS
Undergraduate
(FORMERLY CSC 323) Application of statistical concepts and techniques to a variety of problems in IT areas and other disciplines, using a statistical package for simple data analysis. Course topics include descriptive statistics, elementary probability rules, sampling, distributions, confidence intervals, correlation, regression and hypothesis testing. PREREQUISITE(S): MAT 130 or placement
MAT 130 or above or equivalent or Mathematics Diagnostic test placement into MAT 140 is the prerequisite for this class.

IT 228
ETHICS IN COMPUTER GAMES AND CINEMA
Undergraduate
Societies function based on normative ethics utilizing common sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded in games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact particularly on children will be discussed.

IT 231
WEB DEVELOPMENT I
Undergraduate
Introduction to framework-based web development. Students create interactive, dynamic web sites using a common web architecture and object-based database access. Programming for web development includes control structures, objects, functions, and use of composite data types. Prerequisite: IT 130
IT 130 is a prerequisite for this class

IT 232
WEB DEVELOPMENT II
Undergraduate
Intermediate framework-based web development. Students design and develop web applications supporting social-networking, content-sharing and functionality for business and organizational needs. Web concepts include AJAX, server-side caching, security threats. Application of object-oriented concepts. PREREQUISITE(S): IT 231 and IT 211
IT 231 and IT 211 are prerequisites for this class.
IT 236
USER INTERFACE DEVELOPMENT
Undergraduate
The focus of the course is to build interfaces to simple programs. The course will cover interface controls, event handling, and the use of built-in and/or pre-written controls. The course will cover simple database access through a Database control and possibly access to WebServices such as Google. Good visual design principles will be emphasized throughout the course. PREREQUISITE(S): IT 130
IT 130 is a prerequisite for this class.

IT 238
INTERACTIVE WEB SCRIPTING
Undergraduate
Advanced scripting with javascript and the Document-Object Model (DOM) for creating web pages. Object-oriented principles applied to user interfaces and event handling. Application of Ajax. Use of libraries such as jQuery. PREREQUISITE(S): IT 130
IT 130 is a prerequisite for this class.

IT 240
INTRODUCTION TO DATABASES
Undergraduate
This course will introduce students to the design, implementation and use of desktop databases. Major topics include: modeling using ER diagrams, creating and maintaining a database using a PC-based application, composing and using queries in Structured Query Language, creating and customizing forms and reports, and integrating databases with other sources of data and applications. PREREQUISITE(S): NONE

IT 251
INTRODUCTION TO MOBILE APPS
Undergraduate
This class will introduce students to the world of mobile application design using an open source cross-platform programming language. HTML5-based web application frameworks, API, functional UI, CSS3, cloud services. PREREQUISITE(S): IT 130
IT 130 is a prerequisite for this class.

IT 263
APPLIED NETWORKS AND SECURITY
Undergraduate
This course introduces the networking and security technologies required to build and maintain a home or small-office network. Networking topics will include client/server application software configuration, network connectivity (cabling, switch and router configuration), basic IP addressing, network address translation and options for public Internet access services. Security topics will include typical threats and responses, firewalls, host hardening, password management and virtual private network (VPNs). The course has a lab component where students apply wired and wireless technologies to design and administer a small network with various applications. PREREQUISITE(S): none

IT 278
COMMUNITY-BASED TECHNOLOGY PROJECTS
Undergraduate
Project development in cooperation with a community service organization. Students will assess urban community Web needs, develop and implement a Web solution. PREREQUISITE(S): ISM 220 or IS 215 or IT 232
ISM 220 or IM 220 or IS 215 or IT 232 is a prerequisite for this class.

IT 300
RESEARCH EXPERIENCE
Undergraduate
This course involves the exploration of a research topic under the supervision of a research advisor. PREREQUISITE(S): Consent of dean. (variable credit)
IT 313
ADVANCED APPLICATION DEVELOPMENT
Undergraduate
Development of complex applications through the use of APIs. Appropriate selection of common data structures (hash tables, trees, stacks, queues, networks) and design patterns for use in API development. PREREQUISITE(S): IT 212

IT 212 is a prerequisite for this class

IT 320
CONTENT MANAGEMENT SYSTEMS
Undergraduate
Design and use of Content Management Systems (CMSs) to manage unstructured digital media throughout the enterprise, simplify the publication of Web content, and locate and link content at any level of an organization. Discussion will focus on key users, their roles and responsibilities, collaborative workflow, and versioning. Students will become familiar with available CMSs, design a database-driven Website focusing on separation of the content's semantic layer from its layout, and implement a system using a variety of open-source software. Prerequisite(s): CSC 241 or IT 211 or IT 231 or IT 238 or CSC 243.

CSC 241 or IT 211 or IT 231 or IT 238 or CSC 243 is a prerequisite for this class.

IT 330
USER INTERFACE DEVELOPMENT FOR INTERACTIVE SYSTEMS
Undergraduate
Graphical user interface development for web and desktop applications. Event-driven user controls. Development involves use of a visual integrated development environment (IDE). Prerequisite: IT 232

IT 232 is the prerequisite for this class

IT 338
WEB DEVELOPMENT FRAMEWORKS
Undergraduate
Survey of advanced web development frameworks with emphasis on MV* architectures and front-end frameworks that support responsive web interfaces. Students develop web applications using a variety of code libraries such as Backbone on the client side and node.js on the server side. Students also research additional frameworks and report on their relative advantages. PREREQUISITE(S): IT 238

IT 238 is a prerequisite for this class.

IT 373
SYSTEM CONCEPTS
Undergraduate
Overview of concurrency, memory management and file system concepts for operating systems, and web servers. Application of concepts to system administration. Case studies of common operating systems. Web server operations. Virtualization. PREREQUISITE(S): IT 313 or CSC 300

IT 313 or CSC 300 is a prerequisite for this class.

IT 390
TOPICS IN INFORMATION TECHNOLOGY
Undergraduate
Advanced study focusing on a specific area of information technology each quarter. May be repeated for credit. PREREQUISITE(S): None
IT 394
SOFTWARE PROJECTS FOR COMMUNITY CLIENTS I
Undergraduate
This is the first course in a two-quarter sequence (winter/spring) for CDM students that satisfies both the Senior Year Capstone requirement and the Junior Year Experiential Learning requirement. The second quarter will be IT 395. You will earn four quarter hours of credit for each quarter for a total of eight quarter hours of credit. You must complete both quarters to receive any credit. We work with a community service organization, chosen with help of the Steans Center for Community-based Service Learning. As a community-based service learning course, students will have the opportunity to assess urban community needs in technology, and use problem-solving methods and strategies to make a substantial difference in an inner-city community group, usually by developing an application or a web site. PREREQUISITE(S): IT 320 or CSC 355 or CSC 360

IT 395
SOFTWARE PROJECTS FOR COMMUNITY CLIENTS II
Undergraduate
This is the continuation of IT 394. IT 394 and IT 395 must be taken as a sequence in two consecutive quarters. PREREQUISITE(S): IT 394

IT 398
TOPICS IN GLOBAL INFORMATION TECHNOLOGY
Undergraduate
This course focuses on current topics in the information and communications technologies that together support the "networked world." Sample topics are global software development and deployment, global data and information management, and cross-cultural project management for information systems. The course may be offered for variable credit hours (2, 4, 8, 16, and 32). (variable credit)

IT 403
STATISTICS AND DATA ANALYSIS
Graduate
Introduction to univariate data analysis methods. Descriptive statistics and data visualization methods. Overview of sampling techniques for data collection, and introduction to statistical inference methods for decision making including simple linear regression, estimation procedures using confidence intervals and hypothesis testing. PREREQUISITE(S): None

IT 411
SCRIPTING FOR INTERACTIVE SYSTEMS
Graduate
Introductory scripting for developing interactive web pages. Overview of HTML and CSS. Elementary programming concepts using JavaScript for learning control structures, functions, arrays, and object use. User interface development concepts include event handling and use of JavaScript libraries such as jQuery. Review of web clients, servers and architecture. PREREQUISITE(S): None

IT 432
WEB ARCHITECTURE
Graduate
Overview of Web application development for non-programmers. Hands-on exposure to the Model, View, Controller (MVC) framework using a common web framework. Topics include HTML/CSS, data modeling, authentication, AJAX and security issues. Students create and modify dynamic web sites. PREREQUISITE(S): IT 411

IT 590
TOPICS IN INFORMATION TECHNOLOGY
Graduate
Advanced study focusing on a specific area of information technology each quarter. May be repeated for credit. PREREQUISITE(S): Instructor consent required
IT 599
TOPICS IN GLOBAL INFORMATION TECHNOLOGY
Graduate
Course Description: This course focuses on current topics in the information and communications technologies that together support the “networked world”. Samples topics are global software development and deployment, global data and information management, and cross-cultural project management for information systems. The course may be offered for variable (1 to 4) credit hours. PREREQUISITE(S): None

IT 698
MASTER’S THESIS
Graduate
(2 credit hours) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. PREREQUISITE(S): Consent of advisor. (2 quarter hours)

ITA 101
BASIC ITALIAN I
Undergraduate
This course is an introduction to the language and culture of Italy, the first in the three-quarter beginning Italian sequence. Focus is on the development of reading, writing, speaking, and listening skills and the study of Italian culture through language. Class activity will consist mainly of interactive oral exercises based on material in the textbook, online, and from other sources. The course aims to provide students with basic functional skills in Italian. Italian 101 focuses on introducing and talking about oneself (interests, occupation, leisure activities, likes, dislikes), ordering in a cafe and restaurant, addressing others formally or informally, and everyday life. By the end of the beginning Italian sequence, students should be able to engage in basic conversation on a variety of topics, write simple paragraphs, and read passages in contemporary Italian.

ITA 101S
BASIC ITALIAN I FOR SUMMER
Undergraduate
(Covers the equivalent of the ITL 101 and the first half of ITL 102.) The first half of beginning Italian. Further work on the basic elements of the Italian language, spoken as well as written, with due regard to the cultural context of Italian expression.

ITA 102
BASIC ITALIAN II
Undergraduate
This course is an introduction to the language and culture of Italy, the second in the three-quarter beginning Italian sequence. Focus is on the development of reading, writing, speaking, and listening skills and the study of Italian culture through language. Class activity will consist mainly of interactive oral exercises based on material in the textbook, online, and from other sources. The course aims to provide students with basic functional skills in Italian. Italian 102 focuses on talking about social network (e.g. family, friends, colleagues), food and dishes, lifestyle and daily routine, planning and managing a trip, communicating past events or activities. By the end of the beginning Italian sequence, students should be able to engage in basic conversation on a variety of topics, write simple paragraphs, and read passages in contemporary Italian.

ITA 103
BASIC ITALIAN III
Undergraduate
This course is an introduction to the language and culture of Italy, the third in the three-quarter beginning Italian sequence. Focus is on the development of reading, writing, speaking, and listening skills and the study of Italian culture through language. Class activity will consist mainly of interactive oral exercises based on material in the textbook, online, and from other sources. The course aims to provide students with basic functional skills in Italian. Italian 103 focuses on describing one’s personality and appearance (for example one’s physical traits and fashion style), carrying out a survey and talking and asking about future events, renting an apartment, talking about animals, understanding Italian social habits, traditions, diversity. By the end of the beginning Italian sequence, students should be able to engage in basic conversation on a variety of topics, write simple paragraphs, and read passages in contemporary Italian.

ITA 103S
BASIC ITALIAN II FOR SUMMER
Undergraduate
(Covers the equivalent of the second half of ITL 102 and all of ITL 103.) The second half of beginning Italian. Further work on the basic elements of the Italian language, spoken as well as written, with due regard to the cultural context of Italian expression.
ITA 104
INTERMEDIATE ITALIAN I
Undergraduate
This course is the first quarter of the second-year sequence in Italian language and culture. It gives students the opportunity to expand and improve the four basic language skills (speaking, understanding, reading, writing) while exploring Italian culture through study of the language. Class activity will consist mainly of interactive oral exercises based on material in the textbook, online, and other sources. By the end of the intermediate Italian sequence, students should be able to engage in conversation with native speakers on a variety of everyday topics, communicate in writing through social media, formal correspondence, and short compositions and understand a variety of authentic Italian texts. ITA 103 or equivalent, including placement test or permission of instructor, is recommended.

ITA 105
INTERMEDIATE ITALIAN II
Undergraduate
This second is the first quarter of the second-year sequence in Italian language and culture. It gives students the opportunity to expand and improve the four basic language skills (speaking, understanding, reading, writing) while exploring Italian culture through study of the language. Class activity will consist mainly of interactive oral exercises based on material in the textbook, online, and other sources. By the end of the intermediate Italian sequence, students should be able to engage in conversation with native speakers on a variety of everyday topics, communicate in writing through social media, formal correspondence, and short compositions and understand a variety of authentic Italian texts. ITA 104 or equivalent, including placement test or permission of instructor, is recommended.

ITA 106
INTERMEDIATE ITALIAN III
Undergraduate
This course is the third quarter of the second-year sequence in Italian language and culture. It gives students the opportunity to expand and improve the four basic language skills (speaking, understanding, reading, writing) while exploring Italian culture through study of the language. Class activity will consist mainly of interactive oral exercises based on material in the textbook, online, and other sources. By the end of the intermediate Italian sequence, students should be able to engage in conversation with native speakers on a variety of everyday topics, communicate in writing through social media, formal correspondence, and short compositions and understand a variety of authentic Italian texts. ITA 105 or equivalent, including placement test or permission of instructor, is recommended.

ITA 130
MOLILSAP STUDY ABROAD
Undergraduate
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

ITA 197
SPECIAL TOPICS IN ITALIAN
Undergraduate
See schedule for current offerings.

ITA 198

ITA 199
INDEPENDENT STUDY
Undergraduate
Variable credit.
ITA 201
ADVANCED COMMUNICATION I
Undergraduate
This course is designed for students of Italian language and culture at the advanced level who wish to secure their knowledge of Italian structure, expand their vocabulary and cultural literacy, and work on their writing skills. The 200-level sequence creates opportunities for students who already have significant background in Italian to make progress in all four areas of language acquisition (reading, understanding, writing and speaking). This quarter will focus on Italian geography and regional culture. Students will gain a familiarity with the physical and political map of Italy, as well as selected topics in cultural geography, Italian history and current events. Students will also review Italian grammar as students work on their language skills through class discussion and targeted assignments. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 202
ADVANCED COMMUNICATION II
Undergraduate
This course is designed for students of Italian language and culture at the advanced level who wish to secure their knowledge of Italian structure, expand their vocabulary and cultural literacy, and work on their writing skills. The 200-level sequence creates opportunities for students who already have significant background in Italian to make progress in all four areas of language acquisition (reading, understanding, writing and speaking). This quarter will focus on Italian culture and society through history. Students will also review Italian grammar as students work on their language skills through class discussion and targeted assignments. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 203
ADVANCED COMMUNICATION III
Undergraduate
This course is designed for students of Italian language and culture at the advanced level who wish to secure their knowledge of Italian structure, expand their vocabulary and cultural literacy, and work on their oral and writing skills. The 200-level sequence creates opportunities for students who already have significant background in Italian to make progress in all four areas of language acquisition (reading, understanding, writing and speaking). This quarter students will focus on topics in Italian history, literature, and culture from Fascism to the present. Students will also review Italian grammar as they work on their language skills through class discussion and targeted assignments. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 301
ORIGINS OF ITALIAN LITERATURE: THE MIDDLE AGES
Undergraduate
This course will introduce students to the major developments in Italian literature from its origins to Dante's Vita nuova. Topics will include: the origins of Italian poetry in the courtly tradition; medieval popular song and verse; the Sicilian school and the court of Frederick II; northern Italian didactic and spiritual literature; Tuscan lyric and the "dolce stil novo." As students familiarize themselves with the historical, philosophical and religious context of medieval writers, they will also learn about poetic verse forms and techniques of close literary analysis. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.
ITALIAN CIVILIZATION I: THE MIDDLE AGES AND RENAISSANCE
Undergraduate
This course introduces students to medieval and Renaissance Italy, from about the year 1000 through 1600. Students will discover the social and political history and the art and literature of this critical period of Western civilization. They will follow the emergence of the vernacular; the development of the medieval court and city, the era of Dante and Giotto, the rise of Humanism and the Renaissance with towering figures such as Machiavelli, Leonardo, and Michelangelo, and study the figures of the courtier, historian, politician, artist, and letterato in the High Renaissance. By reading medieval and Renaissance texts in the original, students will expand their understanding of language as a process in constant change. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITALIAN CIVILIZATION II: TOWARDS UNIFICATION: ROMANTICS, REVOLUTIONARIES, AND REALISTS
Undergraduate
This course presents an overview of Nineteenth Century Italian prose and poetry. In Italian 305, students will explore themes and cultural realities in the literary works we read. Students will also hone our skills at interpreting works of literature and read some of the great masterpieces of Italian literature. In class, in-depth analyses of texts will be emphasized. By the end of the quarter, students should have a firm understanding of the different nature of poetry and prose as forms of expressions, know the major writers of the nineteenth century, and be able to explain the texts read in class not only as works of literature but as cultural "artifacts" of a particular period of Italian history. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

FUTURISM AND BEYOND: TWENTIETH CENTURY WRITERS AND CULTURE
Undergraduate
This course presents an overview of Twentieth Century Italian prose and theater. In Italian 306, students will explore themes and cultural realities in the literary works read. Students will also hone skills at interpreting works of literature. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

DANTE'S INFERNO: THE WORLD OF THE CONDEMNED
Undergraduate
The primary goal of Italian 307 is to provide students with an understanding of and appreciation for Dante's Inferno. Students will learn techniques of close literary analysis. They will learn about classical and medieval history, philosophy, theology and poetry. They will become acquainted with the extraordinary cultural and political reality of fourteenth-century Florence and Dante's life. Above all, they will have ample time and space to consider Dante's amazing poem. Advanced Italian students will have the opportunity to develop their written and spoken Italian while learning to read Dante's beautiful verses in the original. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.
ITA 308
DANTE'S PURGATORY AND PARADISE: THE REALM OF SALVATION
Undergraduate
This course is a continuation of Italian 307. Italian 308 provides students with an understanding of and appreciation for Dante's Purgatorio and Paradiso. Students will learn techniques of close literary analysis. They will learn about classical and medieval history, philosophy, theology and poetry. They will become acquainted with the extraordinary cultural and political reality of fourteenth-century Florence and Dante's life. Above all, they will have ample time and space to consider Dante's amazing poem. Advanced Italian students will have the opportunity to develop their written and spoken Italian while learning to read Dante's beautiful verses in the original. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 309
THE ITALIAN NOVEL
Undergraduate
This course approaches the tradition of the Italian novel. Topics may range from the long prose fiction of the late Middle Ages to the contemporary novel through a multidisciplinary perspective. The course may also analyze specific genres such as the historical novel, the coming-of-age novel, the detective story, the noir. The close reading and discussion of primary sources, a basic overview of the history of the Italian novel, several reading comprehension and creative writing assignments, will guide understanding and appreciation of the work of classics such as Boccaccio, Sacchetti, Bandello, Basile, Cellini, Affieri, Foscolo, Casanova, Manzoni, Nievo, Verga, Serao, Svevo, and Salgari as well as more recent masters such as Moravia, Deledda, Calvino, Gadda, Primo Levi, Ginzburg, Morante, and Eco, and the new voices of the late twentieth and twenty-first centuries. The course will also address the linguistic, stylistic, social, and ideological issues raised by the writers. Ultimately this class will provide a deep understanding of Italian culture through the novel and offer ample time to use, expand, and refine Italian language skills. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 310
PETRARCA AND BOCCACCIO
Undergraduate
This course will introduce students to the life and works of two towering figures of fourteenth-century Italian literature, Francesco Petrarca and Giovanni Boccaccio. The class will focus on select close reading of these authors' major works, the Canzoniere and the Decameron. Students will place these works within the broader context of fourteenth-century social and economic history. Students will also learn techniques of poetic and narrative analysis. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 311
ITALIAN POETRY
Undergraduate
This course approaches the tradition of Italian poetry. Topics vary from the Middle Ages to the present through a multidisciplinary perspective. The close reading and discussion of primary sources, a basic overview of the history of Italian poetry, several reading comprehension and creative writing assignments, and a poetry reading will guide students' understanding and appreciation of the work of classics such as Dante, Petrarch, Sannazaro, Bembo, Stampa, Leopardi, D'Annunzio, Pascoli, as well as more recent masters such as Pasolini, Montale, Saba, Valduga, Zanzotto, and new voices of the late twentieth and twenty-first centuries. The course will also address the linguistic, stylistic, social, and ideological issues raised by the poets. Ultimately this class will provide a deep understanding of Italian culture through poetry and give a unique chance to use, expand, and refine Italian language skills. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 312
ITALIAN DRAMA
Undergraduate
This course approaches the tradition of Italian drama. Topics may range from the Middle Ages to the present through a multidisciplinary perspective. The close reading and discussion of primary sources, a basic overview of the history of Italian drama, several reading comprehension and creative writing assignments, and a staged reading will guide understanding and appreciation of masterpieces such as Goldoni's La locandiera and Pirandello's Sei personaggi in cerca d'autore as well as less widely known but equally fascinating and powerful pieces such as Jacopone da Todì's medieval lauda Donna de Paradiso, cardinal Bibbiena's Renaissance comedy La calandria, and Raffaella Battaglini's postmodern play Conversazione per passare la notte. The course will also address the linguistic, stylistic, social, and ideological issues raised by the playwrights. Ultimately this class will provide a deep understanding of Italian culture through drama and give a unique chance to use, expand, and refine Italian language skills. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.
ITA 317
ITALIAN WOMEN WRITERS
Undergraduate
This course will explore the rich history of women writers in Italian from the Middle Ages to the present. As students follow the changing social, political, and ideological obstacles that women overcame in writing, they will discover the rich history of Italian women letter writers, poets, journalists, essayists, novelists, philosophers, scholars, translators, and literary critics. The course will introduce their diverse biographies and linguistic and stylistic talent in voicing their beliefs, concerns, and values through writing in a variety of genres and disciplines. Major figures include Caterina da Siena, Vittoria Colonna, Gaspara Stampa, Moderata Fonte, Sibilla Aleramo, Anna Banti, Liala, Alba De Cespedes, Antonia Pozzi, Amelia Rosselli, Natalia Ginzburg, Liliana Cavani, Adriana Cavarero, Dacia Maraini, and Elena Ferrante. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 318
CONTEMPORARY MULTICULTURAL WRITERS IN ITALIAN
Undergraduate
In this course students will explore the rich landscape of multicultural writers in Italian after 1990. The course will begin with a survey of the recent history of migration in Italy from a variety of countries in Africa, Asia, Eastern Europe, South America and the Middle East and place it in the context of global migration. Students will then delve into a linguistic, stylistic, and thematic analysis of the works of writers such as Pap Khouma, Tahar Lamri, Igiaba Scego, Laila Wadia, Gabriella Kuruviila, Cristina Ali-Farah, Amara Lakhou, Ron Kubati, Anilda Ibrahimi, and Gabriella Ghermandi. Their novels and short stories will provide an opportunity to reflect on the construction of identity and otherness in a multicultural society, and experiences of exile, displacement, and racism. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 319
CILS EXAMINATION PREPARATION COURSE
Undergraduate
The CILS Preparation is a rigorous and intensive preparatory course for the B2 Certification of Italian as a Foreign Language (CILS). The B2 level officially attests non-native speakers' high intermediate competency in Italian. Therefore, students should already be at the intermediate/advanced level when they enroll in the course. The CILS is awarded by the Universita per Stranieri in Siena and is recognized by the Italian Government. The course will be conducted as a workshop. Students will review all the grammar elements required for this level, perform listening and reading comprehension activities, and refine writing and oral skills. The CILS Exams are scheduled twice a year, at the beginning of June and December. The exam lasts about four hours and requires a separate registration and fee. DePaul University is an official testing site for the exam, and one of the few sites outside of Italy to offer CILS preparatory courses. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 320
ITALIAN FOR BUSINESS
Undergraduate
Italian for business presupposes good knowledge of Italian grammatical structures upon which to build. The course focuses on acquiring business vocabulary, skills for dealing with Italian business partners, and comprehending specialized business journals and reports. An overview of Italy's role of the European Union and the Eurozone are integral to the course. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 321
TRANSLATION
Undergraduate
The main objective of this course is to introduce students to some fundamental principles of translation and to allow them to acquire techniques for translating a variety of texts from Italian to English and, to a more limited extent, from English to Italian. Through intensive work in the two languages, students will improve their overall Italian language skills, learn about the challenges and rewards involved in translation, and begin to prepare themselves for advanced or professional translation work. Students will learn to take responsibility for their final work product on both individual and group projects. Students will also review Italian verb forms, study the history and theory of translation, and work with online and computer translation tools. There will be a wide variety of texts at different levels of difficulty and diverse content: academic and philosophical prose, journalism, advertising, commercial Italian, recipes and cooking shows, literary and poetic texts, opera libretti and pop music. This course will also provide students ample opportunity to practice their spoken Italian and conversation skills. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 329
ITALIAN CINEMA
Undergraduate
This course presents an overview of Italian film, highlighting the most important directors and films. We shall not only examine the works as films, that is particular semiotic systems, but also as particular cultural products. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.
ITA 332
ITALIAN CIVILIZATION II: EARLY MODERN ITALY
Undergraduate
This course presents an overview of Baroque, Enlightenment and Pre-Risorgimento civilization and culture. Students will explore literature, but also art, architecture, science, politics and other areas of civilization as they relate to the artistic world. Primary sources may include Tommaso Campanella's utopia The City of the Sun; the scientific treatises of Galilei, Torricelli, and Redi; the sculptures of Bernini and Canova; Metastasio's libretti; Cesare Beccaria's treatise On Crimes and Punishments, Goldoni and Alfieri's autobiographies. By the end of the quarter, students will have a firm understanding of this period, know the major figures of these centuries, and will be able to discuss the texts and images in class as cultural "artifacts" of a particular period of Italian history. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 340
ITALIAN CIVILIZATION III: MODERN AND CONTEMPORARY ITALY
Undergraduate
This course presents an overview of the artistic, social, economic and political developments of Modern Italy from industrialization and unification through the fascist era to contemporary society. Students should gain an understanding of Italian culture during this exciting period. They will also improve their Italian language skills, particularly reading academic texts and writing shorter papers. This course will introduce students to Italy in the twentieth century. By the end of the quarter, students should understand how Italy developed as a nation in the late nineteenth and twentieth centuries, how it became an industrial power, how and why fascism became a force, and how Italy developed as a modern nation after World War II. Students shall study these developments in art, in society, in the business world, and through media. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 351
HISTORY OF THE ITALIAN LANGUAGE
Undergraduate
When was the origin of Italian language? Why did Dante, Machiavelli, and Galileo turn to the emergent vernacular when most writers, historians and philosophers still used Latin? Why did Goldoni and Alfieri write in French in the 18th century? How did the language of Italian cuisine, opera, sport, and fashion contribute to shape an Italian identity? Why are written and spoken Italian so different? Is there anything such as an Italian language or should one rather talk about Italian languages (italiani regionali, italiano popolare, italiano standard, dialetti)? In this course students will respond to these and other compelling questions on Italian language. After a general overview of the history of Italian language from the ninth to the twenty-first century, students will focus on its changes in some crucial areas of Italian culture and society. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 352
ITALIAN LANGUAGE IN THE SOCIETY OF COMMUNICATION
Undergraduate
This course addresses the changes in Italian language usage since the 1980s in a variety of contexts. Students will discuss the impact of the internet, mobile phones, videogames, and social media on Italian language and style in a variety of communicative contexts and become familiar with the linguistic usage in recent politics, commercials, comics, fiction, and TV shows. A variety of critical and theoretical readings will help students reflect on the relation between language, culture, and technology. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 353
ITALIAN PHONOLOGY AND PHONETICS
Undergraduate
This course is an introduction to Italian phonetics and phonology. After studying the basic principles of general linguistics students will learn the terminology of articulatory phonetics through a systematic analysis of Italian vowels and consonants. They will learn how Italian sounds are produced, described, and transcribed using the characters of the International Phonetic Alphabet (IPA). They will also develop an understanding of the distinction between phonemes and allophones as applied to contemporary spoken Italian, and learn about some regional variants of spoken Italian and the evolution of Italian from Latin. Along with the theoretical component of the course, students will also have ample opportunity in class and working online to practice their spoken Italian and improve their pronunciation by reducing or eliminating their accent. ITA 106 or equivalent, including placement test or permission of instructor, is recommended.

ITA 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Italian. Students must have the equivalent of 106 or higher ability in Italian to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

ITA 401
ORIGINS OF ITALIAN LITERATURE
Graduate
This course will introduce students to the major developments in Italian literature from its origins to Dante's Vita nuova. Topics will include: the origins of Italian poetry in the courtly tradition; medieval popular song and verse; the Sicilian school and the court of Frederick II; northern Italian didactic and spiritual literature; Tuscan lyric and the "dolce stil nuovo." As students familiarize themselves with the historical, philosophical and religious context of medieval writers, they will also learn about poetic verse forms and techniques of close literary analysis.

ITA 402
WRITING THE SELF IN THE ITALIAN RENAISSANCE
Graduate
During the Renaissance the questions raised by human experience in the world came to the forefront of intellectual and artistic inquiry. Starting in the fifteenth and more prominently in the sixteenth centuries, Italian writers and artists developed new concepts of subjectivity and agency and looked at human identity as something made rather than found. This course explores how sixteenth century Italian intellectuals and artists experimented and reflected on fashioning their selves through speaking, writing, self-portraiture, clothing and other practices. Readings include selections of comedies, love and epic poems, letters, autobiographies, how-to manuals, political treatises and memoirs by Niccolo Machiavelli, Baldassarre Castiglione, Gaspara Stampa, Moderata Fonte, Lodovico Ariosto, Torquato Tasso, and others.

ITA 403
LITERATURE OF THE SEICENTO & SETTECENTO
Graduate
Should literature primarily educate or entertain? Should it follow the model of ancient masters or explore experimentation and novelty? Should scientific prose be simple or adorned? What is the role of human reason, imagination, and divine Providence in shaping history? Does each language have a specific genius? Should an autobiography be simply accurate or imaginative? These are just a few of the compelling questions raised by Italian poets, writers, historians, politicians, philosophers, and scientists of the seventeenth and eighteenth centuries. Readings from this course will include works from these disciplines, and selections from literary masterpieces such as Emanuele Tesauro's treatise Il cannocchiale aristotelico, Galileo Galilei's Dialogo sopra i due massimi sistemi del mondo, Giovan Battista Marino's poem Adone, Giambattista Vico's Principi di scienza nuova, Carlo Goldoni's comedy La locandiera, Giuseppe Parini's poem Il giorno and Vittorio Alfieri's autobiographical Vita.

ITA 404
ITALIAN CIVILIZATION I
Graduate
This course introduces students to medieval and Renaissance Italy, from about the year 1000 through 1600. Students will discover the social and political history and the art and literature of this critical period of Western civilization. They will follow the emergence of the vernacular; the development of the medieval court and city, the era of Dante and Giotto, the rise of Humanism and the Renaissance with towering figures such as Machiavelli, Leonardo, and Michelangelo, and study the figures of the courtier, historian, politician, artist, and letterato in the High Renaissance. By reading medieval and Renaissance texts in the original, students will expand their understanding of language as a process in constant change.
**ITA 405**  
**TOWARDS UNIFICATION: ROMANTICS, REVOLUTIONARIES AND REALISTS**  
*Graduate*

This course presents an overview of Nineteenth Century Italian prose and poetry. In Italian 405, students will explore themes and cultural realities in the literary works we read. Students will also hone our skills at interpreting works of literature and read some of the great masterpieces of Italian literature. In class, in-depth analisi testuali will be emphasized. By the end of the quarter, students should have a firm understanding of the different natures of poetry and prose as forms of expressions, know the major writers of the nineteenth century, and be able to explain the texts read in class not only as works of literature but as cultural “artifacts” of a particular period of Italian history.

**ITA 406**  
**FUTURISM AND BEYOND: LITERATURE OF THE NOVECENTO**  
*Graduate*

This course presents an overview of Twentieth Century Italian prose and theater. In Italian 406, students will explore themes and cultural realities in the literary works read. Students will also hone skills at interpreting works of literature.

**ITA 407**  
**DANTE'S INFERNO: THE WORLD OF THE CONDEMNED**  
*Graduate*

The primary goal of Italian 407 is to provide students with an understanding of and appreciation for Dante's Inferno. Students will learn techniques of close literary analysis. They will learn about classical and medieval history, philosophy, theology and poetry. They will become acquainted with the extraordinary cultural and political reality of fourteenth-century Florence and Dante's life. Above all, they will have ample time and space to consider Dante's amazing poem. Advanced Italian students will have the opportunity to develop their written and spoken Italian while learning to read Dante's beautiful verses in the original.

**ITA 408**  
**DANTE'S PURGATORY AND PARADISO: THE REALM OF SALVATION**  
*Graduate*

This course is a continuation of Italian 407. Italian 408 provides students with an understanding of and appreciation for Dante's Purgatorio and Paradiso. Students will learn techniques of close literary analysis. They will learn about classical and medieval history, philosophy, theology and poetry. They will become acquainted with the extraordinary cultural and political reality of fourteenth-century Florence and Dante's life. Above all, they will have ample time and space to consider Dante's amazing poem. Advanced Italian students will have the opportunity to develop their written and spoken Italian while learning to read Dante's beautiful verses in the original.

**ITA 409**  
**THE ITALIAN NOVEL**  
*Graduate*

This course approaches the tradition of the Italian novel. Topics may range from the long prose fiction of the late Middle Ages to the contemporary novel through a multidisciplinary perspective. The course may also analyze specific genres such as the historical novel, the coming-of-age novel, the detective story, the noir. The close reading and discussion of primary sources, a basic overview of the history of the Italian novel, several reading comprehension and creative writing assignments, will guide understanding and appreciation of the work of classics such as Boccaccio, Sacchetti, Bandello, Basile, Cellini, Alfieri, Foscolo, Casanova, Manzoni, Nievo, Verga, Serao, Svevo, and Salgari as well as more recent masters such as Moravia, Deledda, Calvino, Gadda, Primo Levi, Ginzburg, Morante, and Eco, and the new voices of the late twentieth and twenty-first centuries. The course also address the linguistic, stylistic, social, and ideological issues raised by the writers. Ultimately this class will provide a deep understanding of Italian culture through the novel and offer ample time to use, expand, and refine Italian language skills.

**ITA 410**  
**PETRARCA AND BOCCACCIO**  
*Graduate*

This course will introduce students to the life and works of two towering figures of fourteenth-century Italian literature, Francesco Petrarca and Giovanni Boccaccio. The class will focus on select close reading of these authors' major works, the Canzoniere and the Decameron. Students will place these works within the broader context of fourteenth-century social and economic history. Students will also learn techniques of poetic and narrative analysis.
ITA 411
ITALIAN POETRY
Graduate
This course approaches the tradition of Italian poetry. Topics vary from the Middle Ages to the present through a multidisciplinary perspective. The close reading and discussion of primary sources, a basic overview of the history of Italian poetry, several reading comprehension and creative writing assignments, and a poetry reading will guide students' understanding and appreciation of the work of classics such as Dante, Petrarch, Sannazaro, Bembo, Stampa, Leopardi, D'Annunzio, Pascoli, as well as more recent masters such as Pasolini, Montale, Saba, Valduga, Zanzotto, and new voices of the late twentieth and twenty-first centuries. The course will also address the linguistic, stylistic, social, and ideological issues raised by the poets. Ultimately this class will provide a deep understanding of Italian culture through poetry and give a unique chance to use, expand, and refine Italian language skills.

ITA 412
ITALIAN DRAMA
Graduate
This course approaches the tradition of Italian drama. Topics may range from the Middle Ages to the present through a multidisciplinary perspective. The close reading and discussion of primary sources, a basic overview of the history of Italian drama, several reading comprehension and creative writing assignments, and a staged reading will guide understanding and appreciation of masterpieces such as Goldoni's La locandiera and Pirandello's Sei personaggi in cerca d'autore as well as less widely known but equally fascinating and powerful pieces such as Jacopone da Todi's medieval lauda Donna de Paradiso, cardinal Bibbiena's Renaissance comedy La calandria, and Raffaella Battaglini's postmodern play Conversazione per passare la notte. The course will also address the linguistic, stylistic, social, and ideological issues raised by the playwrights. Ultimately this class will provide a deep understanding of Italian culture through drama and give a unique chance to use, expand, and refine Italian language skills.

ITA 417
ITALIAN WOMEN WRITERS
Graduate
This course will explore the rich history of women writers in Italian from the Middle Ages to the present. As students follow the changing social, political, and ideological obstacles that women overcame in writing, they will discover the rich history of Italian women letter writers, poets, journalists, essayists, novelists, philosophers, scholars, translators, and literary critics. The course will introduce their diverse biographies and linguistic and stylistic talent in voicing their beliefs, concerns, and values through writing in a variety of genres and disciplines. Major figures include Caterina da Siena, Vittoria Colonna, Gaspara Stampa, Moderata Fonte, Sibilla Aleramo, Anna Banti, Liala, Alba De Cespedes, Antonia Pozzi, Amelia Rosselli, Natalia Ginzburg, Liliana Cavani, Adriana Cavarero, Dacia Maraini, and Elena Ferrante.

ITA 418
CONTEMPORARY MULTICULTURAL WRITERS IN ITALIAN
Graduate
In this course students will explore the rich landscape of multicultural writers in Italian after 1990. The course will begin with a survey of the recent history of migration in Italy from a variety of countries in Africa, Asia, Eastern Europe, South America and the Middle East and place it in the context of global migration. Students will then delve into a linguistic, stylistic, and thematic analysis of the works of writers such as Pap Khouma, Tahar Lamri, Igiaba Scego, Laila Wadia, Gabriella Kuruvilla, Cristina Ali-Farah, Amara Lakhous, Ron Kubati, Anilda Ibrahim, and Gabriella Ghermandi. Their novels and short stories will provide an opportunity to reflect on the construction of identity and otherness in a multicultural society, and experiences of exile, displacement, and racism.

ITA 419
CILS EXAMINATION PREPARATION COURSE
Graduate
The CILS Preparation is a rigorous and intensive preparatory course for the B2 Certification of Italian as a Foreign Language (CILS). The B2 level officially attests non-native speakers' high intermediate competency in Italian. Therefore, students should already be at the intermediate/advanced level when they enroll in the course. The CILS is awarded by the Universita per Stranieri in Siena and is recognized by the Italian Government. The course will be conducted as a workshop. Students will review all the grammar elements required for this level, perform listening and reading comprehension activities, and refine writing and oral skills. The CILS Exams are scheduled twice a year, at the beginning of June and December. The exam lasts about four hours and requires a separate registration and fee. DePaul University is an official testing site for the exam, and one of the few sites outside of Italy to offer CILS preparatory courses.

ITA 420
ITALIAN FOR BUSINESS
Graduate
Italian for business presupposes good knowledge of Italian grammatical structures upon which to build. The course focuses on acquiring business vocabulary, skills for dealing with Italian business partners, and comprehending specialized business journals and reports. An overview of Italy's role of the European Union and the Eurozone are integral to the course.
ITA 421
TRANSLATION
Graduate
The main objective of this course is to introduce students to some fundamental principles of translation and to allow them to acquire techniques for translating a variety of texts from Italian to English and, to a more limited extent, from English to Italian. Through intensive work in the two languages, students will improve their overall Italian language skills, learn about the challenges and rewards involved in translation, and begin to prepare themselves for advanced or professional translation work. Students will learn to take responsibility for their final work product on both individual and group projects. Students will also review Italian verb forms, study the history and theory of translation, and work with online and computer translation tools. There will be a wide variety of texts at different levels of difficulty and diverse content: academic and philosophical prose, journalism, advertising, commercial Italian, recipes and cooking shows, literary and poetic texts, opera libretti and pop music. This course will also provide students ample opportunity to practice their spoken Italian and conversation skills.

ITA 429
ITALIAN FILM
Graduate
This course presents an overview of Italian film, highlighting the most important directors and films. Students shall not only examine the works as films, that is particular semiotic systems, but also as particular cultural products.

ITA 432
ITALIAN CIVILIZATION II
Graduate
This course presents an overview of Baroque, Enlightenment and Pre-Risorgimento civilization and culture. Students will explore literature, but also art, architecture, science, politics and other areas of civilization as they relate to the artistic world. Primary sources may include Tommaso Campanella's utopia The City of the Sun; the scientific treatises of Galilei, Torricelli, and Redi; the sculptures of Bernini and Canova; Metastasio's libretti; Cesare Beccaria's treatise On Crimes and Punishments, Goldoni and Alfieri's autobiographies. By the end of the quarter, students will have a firm understanding of this period, know the major figures of these centuries, and will be able to discuss the texts and images in class as cultural "artifacts" of a particular period of Italian history.

ITA 440
ITALIAN CIVILIZATION III
Graduate
This course presents an overview of the artistic, social, economic and political developments of Modern Italy from industrialization and unification through the fascist era to contemporary society. Students should gain an understanding of Italian culture during this exciting period. They will also improve their Italian language skills, particularly reading academic texts and writing shorter papers. This course will introduce students to Italy in the twentieth century. By the end of the quarter, students should understand how Italy developed as a nation in the late nineteenth and twentieth centuries, how it became an industrial power, how and why fascism became a force, and how Italy developed as a modern nation after World War II. Students shall study these developments in art, in society, in the business world, and through media.

ITA 451
HISTORY OF THE ITALIAN LANGUAGE
Graduate
When was the origin of Italian language? Why did Dante, Machiavelli, and Galileo turn to the emergent vernacular when most writers, historians and philosophers still used Latin? Why did Goldoni and Alfieri write in French in the 18th century? How did the language of Italian cuisine, opera, sport, and fashion contribute to shape an Italian identity? Why are written and spoken Italian so different? Is there anything such as an Italian language or should one rather talk about Italian languages (italiani regionali, italiano popolare, italiano standard, dialetti)? In this course students will respond to these and other compelling questions on Italian language. After a general overview of the history of Italian language from the ninth to the twenty-first century, students will focus on its changes in some crucial areas of Italian culture and society.

ITA 452
ITALIAN LANGUAGE IN THE SOCIETY OF COMMUNICATION
Graduate
This course addresses the changes in Italian language usage since the 1980s in a variety of contexts. Students will discuss the impact of the internet, mobile phones, videogames, and social media on Italian language and style in a variety of communicative contexts and become familiar with the linguistic usage in recent politics, commercials, comics, fiction, and TV shows. A variety of critical and theoretical readings will help students reflect on the relation between language, culture, and technology.
ITA 453
ITALIAN PHONOLOGY AND PHONETICS
Graduate
This course is an introduction to Italian phonetics and phonology. After studying the basic principles of general linguistics students will learn the terminology of articulatory phonetics through a systematic analysis of Italian vowels and consonants. They will learn how Italian sounds are produced, described, and transcribed using the characters of the International Phonetic Alphabet (IPA). They will also develop an understanding of the distinction between phonemes and allophones as applied to contemporary spoken Italian, and learn about some regional variants of spoken Italian and the evolution of Italian from Latin. Along with the theoretical component of the course, students will also have ample opportunity in class and working online to practice their spoken Italian and improve their pronunciation by reducing or eliminating their accent.

ITA 496
PRACTICUM IN ITALIAN INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable. See schedule for current offerings. Variable credit.

ITA 497

IWS 116
THE ISLAMIC EXPERIENCE
Undergraduate
This course will introduce students to the religion of Islam through its sources, practices, and presence in the contemporary world. In this introduction we will briefly explore the Qur'an, the Prophet Muhammad, hadith, law, ritual and practices, sectarian movements, and issues among Muslim women. The course will also look at some of the issues facing Muslims at the present time. Cross-listed as REL 116.

IWS 117
INTRODUCTION TO SUFISM
Undergraduate
This course will look at the history of Sufism (Islamic Mysticism). The course will look at the roots of Sufism and its early advocates, the medieval articulation and formalization of the tradition, to its renaissance in the modern period and its use as a 'moderating' tool. Students by the end of the course will also have a firm grounding in the terms and concepts that govern Sufism. Formerly IWS 277.

IWS 141
THE MUSLIM WORLD, 600 - 1100
Undergraduate
Foundation of First Global Civilization (600-1100). A study of the emergence of Islam and the growth of the Islamic community from the time of the Prophet Muhammad until the end of the eleventh century. Cross-listed with HST 141.
IWS 142
THE MUSLIM WORLD, 1000-1500
Undergraduate
Sultans, Khans and Shaykhs: Medieval Islamic History (1000-1500). A survey of Muslim history from the decline of the Arab caliphate to the rise of the great gunpowder empires, addressing themes of political expansion, military slavery, devastation brought about by the twin plagues of the Mongols and the Black Death, and the growth of Islamic mysticism. Cross-listed with HST 142.

IWS 143
THE MUSLIM WORLD, 1400-1920
Undergraduate
Great Empires (1400-1920). Examines the social, cultural and economic histories of the Ottoman-Turkish, Safavid Iranian and Mughal-Indian empires which dominated the Muslim world in the crucial centuries between the end of the Mongol empire and the advent of European dominance. Cross-listed with HST 143.

IWS 191
ISLAMIC WORLD STUDIES I
Undergraduate
This introductory course is to familiarize students with the study of Islam by introducing them to the central texts - the Qur'an, Hadith literature (reports of the actions and sayings of the Prophet Muhammad), and Sira (the biography of the Prophet).

IWS 192
ISLAMIC WORLD STUDIES II
Undergraduate
This course introduces students to the myriad disciplines of Islamic Studies. Students will become familiar with areas of studies such as; Islamic law, history, theology, philosophy, political science, economics, bell arts, etc.

IWS 215
MUSLIMS IN AMERICAN FICTION AND FILM
Undergraduate
This course will analyze the portrayal of Islam and Muslims by American fiction writers, documentary and screenwriters. Students will use normal analytical categories as they read popular mystery thrillers, romance novels, watch documentaries and review major movies. Formerly IWS 300.

IWS 217
MUSLIM CULTURES IN GLOBAL CONTEXT
Undergraduate
A study of Islam's developments in various global contexts, including Arabian beginnings, the Middle East, Central, Eastern and Western Europe, China, the former Soviet States and South Africa, with a focus on the impacts that these cultures and Islam have had on each other. Cross-listed as REL 217.

IWS 224
ISLAMIC LAW (SHARIAH) AND AMERICAN CULTURE
Undergraduate
An intensive study of the many dimensions of religious liberties in a pluralist society. Explores the language of constitutional and political discourse generally, and the ways in which language affects an understanding of the First Amendment. Includes case studies on particular religious communities and their encounters with American law. Formerly IWS 324. Cross-listed as REL 324.

IWS 230
ISLAMIC FINANCE
Undergraduate
This course is a comprehensive introduction to Islamic finance, from its religious and legal origins and principles to its most advanced forms. This course focuses on the underlying principles of Islamic finance through a study of its scriptural and jurisprudential origins and reviews most of its products such as Mud'raba, Mush'raka, Mur'baha, Project finance, Suk'k, Tak'ful, I'jara and equity mutual funds etc. The course also examines today's Islamic finance industry with a closer look at the structure and governance of contemporary Islamic financial institutions and international regulatory bodies.
IWS 240
SPECIAL TOPICS IN ISLAMIC WORLD STUDIES
Undergraduate
Topics vary each term. (May be taken more than once).

IWS 251
ISLAMIC ART
Undergraduate
An examination of the origins of Islamic culture in Arabia and the spread of Islamic art and religion across the Middle East, North Africa, Spain, Sicily, Iran, India, and Central Asia; emphasizes the meaning of religious imagery. Cross-listed with HAA 222.

IWS 263
RELIGION AND POLITICS IN THE MIDDLE EAST
Undergraduate
An exploration of Judaism, Christianity and Islam as they develop and interact in the Middle East, historically and in terms of contemporary religious and political issues. Includes a study of personal narratives of people from Jewish, Christian and Muslim communities. Cross-listed as REL 263.

IWS 265
REFORM MOVEMENTS WITHIN ISLAM
Undergraduate
This course will deal with the idea of "reform" within Islamic political movements in the modern period. The course will analyze various Islamic reform movements such as the Wahhabis, the Muslim Brotherhood, the Modernists, the Traditionalists, seeking a pattern in these movements. Cross-listed as REL 265.

IWS 266
MUSLIM CULTURES IN NORTH AMERICA
Undergraduate
An examination of the story of Islam in the United States in three historical periods: antebellum America, the first half of the 20th century, and the latter half of the 20th century. Explores Muslim slave life; the possibilities of retentions of Islam in slave culture; the religious, social/economic, and political life of Muslims at the beginning of the 20th century; the emergence of Islamic thought in the U.S. through an overview of the works of Ismail as-Faruqi, Seyyed Hossein Nasr and Fazlur Rahman. Cross listed as REL 266.

IWS 270
ISLAMIC ETHICS
Undergraduate
Ethics is concerned with the character, customs, principles or standards of human conduct. Ethics is also concerned with the norms of human conduct. Islam is considered an essentially ethical religion meaning that it is fundamentally concerned with establishing the norms of human conduct in a relationship with God. Islamic conceptions of ethics/morality derive directly from the Qur'an. The lives of Muslims should ideally reflect the spiritual characteristics preferred by the Qur'an. In Islam there is no real distinction between being religious and ethical. In this course students will explore the ethical world of Muslims through glimpses of Islamic thought on pluralism, politics, abortion, war, euthanasia, and social justice.

IWS 271
THE QUR'AN AND ITS INTERPRETERS
Undergraduate
A study of the origin, transmission, and interpretation of the Qur'an. Cross listed as REL 271.

IWS 272
GENDER AND SEXUALITY IN MUSLIM CULTURES
Undergraduate
Explores historical and contemporary trends in writing on Muslim women along modern and contemporary narratives on gender and sexuality in Muslim majority and minority cultures. Cross-listed as REL 272 and ABD 272.
IWS 278
APPROACHES TO THE HADITH
Undergraduate
This course will introduce students to the hadith (the tradition of the Prophet Muhammad). The course will look at the historical development of the collection, study, and criticism of the hadith. Students will learn the utilization of the hadith in the establishment of Muslim religious practices, law, political and cultural norms. Students will become familiar with the technical terms that are utilized by the scholars of hadith. Students will also come to understand the modern debates about hadith study and hadith utility (or lack there of) in the modern world.

IWS 285
ISLAM'S ENCOUNTER WITH OTHER RELIGIONS AND NON-RELIGIOUS TRADITIONS
Undergraduate
A study of Islam's central texts regarding other religious traditions and how commentators discuss them, and the way in which Muslims have interacted with other religious and non-religious traditions.

IWS 295
SECTARIAN MOVEMENTS WITHIN ISLAM
Undergraduate
This course will look at the various sects within Islam such as Shi'ism, Kharjism, etc. The course will also look at theological sects such as the Mu'tazilites. The course will be concerned with the history, the beliefs, and the present circumstances (if they still exist today) of these sects. Cross listed as REL 295.

IWS 310
INTERNATIONAL ONLINE DIALOGUE
Undergraduate
This course is designed to run in conjunction with SollyaConnect, a virtual classroom experience for IWS majors and minors. Students will engage in live conversations with other students in various universities in the U.S. and the Middle East on issues directly related to regional conflicts. Students begin in last weeks of winter quarter and continue throughout Spring Quarter, registering for course in Spring. Laboratory work which is virtual classroom is coupled with classwork in a real class setting.

IWS 315
ISLAM IN WEST AFRICA
Undergraduate
This course is designed to provide the students with an understanding of the situation of Islam and Muslim societies in West Africa from c. the 8th century C.E. to the present. It will examine the ways in which Islam shaped but was also shaped by African cultures and how changes in the wider Muslim world have affected African Muslims. The course will examine processes of Islamization and the emergence of local Muslim cultures, contemporary issues, and will expose students to the diversity of Islam in Africa. At the same time, the course will focus on current issues in contemporary West African Islam, and aims at providing students with skills to assess issues common to West African Muslim societies, such as dynamics of religious reform, Islam and the state, Islam and socio-economic developments, and questions related to ethnic and religious identities.

IWS 330
ISLAMIC LAW, ITS HISTORY AND MODERN APPLICATIONS
Undergraduate
This course is a brief introduction to Islamic Law and its history including case studies of its modern applications. Students will trace the history of Islamic legal theory from its beginnings until the modern period. The focus is on the early formation of theory-its major themes and arguments along with the variety of doctrines that contribute to it. Students will examine how the socio-religious realities interface with the production of legal discourse as they build on previous coursework on modern reformers and the sources of law. This course will also explore the ongoing conversations over religious faith as the basis of a legal system. Last, we transition to the contemporary period through case studies where we will consider how the case connects with or departs from these larger debates and the different contemporary methodologies and arguments used.

IWS 340
SPECIAL TOPICS IN ISLAMIC WORLD STUDIES
Undergraduate
See schedule for current offerings.
IWS 390  
**THEORIES AND METHODS IN ISLAMIC STUDIES**  
*Undergraduate*

This course examines the methodologies and theories that have shaped the field of Islamic Studies from its foundation in Europe through the present day. Students will become familiar with the different theories with regards to Islamic origins and the methodological approaches that are at the foundation of these theories. Students will also learn about the interplay between power and scholarship and its effects on the production of knowledge. Doing the above students will learn the mechanics of research in the field.

IWS 191 and IWS 192 are prerequisites for this course.

IWS 395  
**SENIOR CAPSTONE SEMINAR**  
*Undergraduate*

This is a seminar for Islamic World Studies majors. It is both an opportunity to reflect on what has been gained from studies and experiences in Islamic studies and an opportunity to strengthen those experiences with direct contact with Muslim communities in Chicago and overseas through the Soliya Program. Students will meet with leaders and members of Chicago's Muslim communities and through Soliya meet with their peers in universities here and abroad. Soliya, through a partnership with the United Nations Alliance of civilizations aims to reduce tensions across cultural divides. This aspect of the course will be integrated throughout with the assistance of Jennifer Von Diehle, Assistant director for International Collaborations at DePaul.

IWS 399  
**INDEPENDENT STUDY**  
*Undergraduate*

Independent study designed for majors.

JOUR 245  
**NEWS EDITING**  
*Undergraduate*

This course introduces students to editing and publishing procedures, including proofreading, copyediting and layout for different types of publications, including newsletters, brochures, periodicals and books. Skills in grammar, punctuation, style, organization, design and headline writing are emphasized along with the editor's role in the ethics of the profession, including questions of libel. Students will understand the editor's central role in the newsroom and the flow of a story from a reporter to the public.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 275  
**INTRODUCTION TO JOURNALISM**  
*Undergraduate*

An introduction to the field of journalism. Instruction and practice in writing and reporting news stories. Students will learn the skills needed to become better communicators and to understand the news in the world around them.

JOUR 276  
**PHOTOJOURNALISM**  
*Undergraduate*

Introduction to the theoretical and technical foundations of photography with exploration of the medium's aesthetic, documentary and narrative purposes. Cross-listed as ART 377.

JOUR 278  
**NEWS REPORTING**  
*Undergraduate*

This course is designed to go beyond the inverted pyramid of basic news writing and focus on some of the sophisticated newsgathering techniques used by journalists. Story generation techniques will be examined along with interviewing techniques. The course will also explore how databases and documents can enhance a story, including the use of surveys, field experiments and participant observation.

JOUR 275 is a prerequisite for this class.
JOUR 279  
**FEATURE WRITING**  
Undergraduate  
This practicum develops the observational and narrative skills essential to writing feature stories in a variety of journalistic contexts. Students will learn the story telling techniques that emphasize human interest, description and the details of a subject. Instruction will include illustrated lectures, class discussions, writing exercises and critiques.  
JOUR 275 and 278 are prerequisites for this course.

JOUR 280  
**INTRODUCTION TO ONLINE REPORTING AND PRODUCTION**  
Undergraduate  
This course introduces students to the principles and practices of online journalism. Students learn both conceptual and technical skills in multimedia reporting. Although the course provides groundwork in using digital tools to produce online content, the focus is on journalism. As much as possible, assignments will allow students to grasp online journalism concepts and apply them to real-world scenarios. This class uses Chicago as a testing ground for innovative reporting ideas.  
JOUR 275 and 278 are prerequisites for this course.

JOUR 290  
**JOURNALISM WORKSHOP (VARIABLE TOPICS)**  
Undergraduate  
This course allows students to sample a range of hands on, practical offerings in journalism that can enhance their knowledge and expertise. Workshop topics can include video camera basics, non-linear editing with Final Cut Pro, news print design (including InDesign, Photoshop, Illustrator), and online editing tools (including Word Press). Students may take a maximum of 4 credit hours of JOUR 290 in the major, and a total of 8 credit hours. (2 quarter hours)

JOUR 301  
**REPORTING FOR 14 EAST MAGAZINE**  
Undergraduate  
Students gain hands-on experience reporting, writing and producing multimedia stories and other storytelling elements for the College of Communication’s 14 East Magazine. (http://fourteeneastmag.com) Students may take the course twice for credit.  
JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 302  
**BUSINESS WRITING AND REPORTING**  
Undergraduate  
Students develop skills for responsibly researching, reporting, writing, and editing business and financial news. Topics including reporting with data; ethical responsibilities of business journalists; and the unique opportunities available to the digital reporters of business and financial news.  
JOUR 275 and 278 are prerequisites for this course.

JOUR 303  
**ENTREPRENEURIAL JOURNALISM**  
Undergraduate  
This course focuses on entrepreneurship and innovation in digital journalism and related digital media endeavors. The impact of digital technologies on the news industry is examined with special attention to changes in business and distribution models and the ways people consume and produce news. Students learn the basics of the business of digital journalism, including the financing digital start-ups and strategies for bringing digital media products or services to market.  
JOUR 275 is a prerequisite for this course.
JOUR 304
INTRO TO DATA JOURNALISM
Undergraduate
This course introduces techniques for more effective use of statistics and data in journalism and related mass communications professions. Students learn how to acquire, interpret and present data in multimedia formats, including skills in spreadsheet and data analysis for issues such as business, economics, entertainment, health care, science, politics, government and sports. Other emphases include public opinion polling, surveys, data visualization, and discussion of the legal and ethical issues that arise from reporting with data and numbers.

JOUR 275 is a prerequisite for this course.

JOUR 309
SPORTS TALK & MULTIMEDIA
Undergraduate
Students learn best practices for careers related to sports talk through hands-on experience with audio, social media and related multimedia news content.

JOUR 310
COMPARATIVE MEDIA SYSTEMS OR GLOBAL JOURNALISM
Undergraduate
This course is an introduction to major issues, concepts, and theories of international media and global journalism. It surveys the world's news systems, determinants of international news, development communication, communication and international relations, media responsibilities in international conflicts, communication technology, and the globalization of media.

JOUR 317
EXPERIENTIAL LEARNING
Undergraduate
Students learn advanced reporting techniques while developing projects under the direction of a faculty supervisor. This course is designed to take learning out of the classroom and enables students to develop portfolio pieces while gaining critical real world experiences in reporting.

JOUR 330
WRITING FOR BROADCAST
Undergraduate
This course introduces students to the writing and formatting requirements of broadcast journalists. Part of this instruction is to give students an understanding of how writing for broadcast differs from writing for print and the awareness it takes to write copy that supports and strengthens the visuals that viewers will be watching. Strong writing is the backbone of broadcast journalism, and this course gives students a firm foundation in the writing skills that produce broadcast stories worth watching.

JOUR 275 and 278 are prerequisites for this course.

JOUR 343
JOURNALISM AND THE AMERICAN EXPERIENCE
Undergraduate
This seminar analyzes the current condition of American print, broadcast and online journalism in light of their historic past. Journalism's social responsibilities and its functioning as a business are examined across major periods of American history—the colonial and revolutionary press, the early Republican and penny press, the Civil War press and the press of industrializing America, the rise of the tabloid press, and the role of the press in reporting the development of the United States as a world power during World War II and in its aftermath—will be captured.

JOUR 350
RADIO NEWS
Undergraduate
Nowhere has the rise of new technologies had a greater impact than in radio reporting. This course gives students opportunities to stream their stories through field and studio productions that connect listeners within communities and around the world. Students will be trained in writing for the ear, and the unique local and international possibilities of radio reporting.

JOUR 275 and JOUR 278 are prerequisites for this course.
JOUR 355
NEWSCAST PRODUCING
Undergraduate
This class teaches the basics of television newscast production. This includes creating newscast rundowns, pacing the program, incorporating headlines and teases, slotting in weather and sports, and creating a logical and interesting order of stories. Newscast producers are in heavy demand in television news. This course provides the basics needed for working in that capacity.

JOUR 330 is a prerequisite for this class.

JOUR 360
POLITICAL COMMUNICATION
Undergraduate
This course examines the political communication process, including the press, public opinion, civic life, elections, public policy, civic institutions, and other elements of democratic decision-making. Students study how journalists, politicians, citizens, and political strategists construct, transmit, and understand political messages at all levels of government, including how news, advertising, and entertainment media contribute to the shaping of political perceptions, emotions, and behaviors in a variety of circumstances domestically and internationally. Topics covered include how the political communication is affected by different forms of government and press systems; ownership and regulation economics of journalism; the sociological processes of the news industry; the psychological and sociological effects of news; and technological forces and shifting news consumption patterns.

JOUR 361
JOURNALISM LAW AND ETHICS
Undergraduate
This course examines legal and ethical issues in journalism with a focus on the First Amendment and the rights and responsibilities of the news media. Students will learn the constitutional rights of all citizens regarding censorship, defamation, privacy, intellectual property, and commercial speech, and will study how technological developments are challenging the courts with how to apply the law to digital media. Those legal aspects are considered in relation to case studies that chronicle journalists' ethical responsibilities, including protecting sources, balancing professional duties and personal values, sharing and using social media content, and avoiding deceptive reporting practices.

JOUR 362
THE PRESS AND THE PRESIDENCY
Undergraduate
This seminar describes the current and historic relationship between the mass media and the American presidency, focusing on the connections between press coverage to agenda-setting and public opinion in presidential campaigns. Students will analyze conditions in which press-presidential relations are cooperative or adversarial, including the market forces that have shaped that relationship and the news values that have reinforced it.

JOUR 364
INVESTIGATIVE REPORTING
Undergraduate
The course will include discussions and reporting projects that will analyze how investigative story ideas are developed; how decisions are made in the selection and development of investigative stories; how public records and other sources of information are obtained and used in investigative reporting; ethical dilemmas; and the impact of investigative journalism on public opinion and policy, with a particular focus on issues of race, diversity, and urban affairs.

JOUR 275 and 278 are prerequisites for this course.

JOUR 365
TELEVISION NEWS I
Undergraduate
This is a course in electronic newsgathering. Student teams will shoot and edit stand up news packages. To do this, students will learn the basic elements in developing a broadcast news story--from originating the story idea, researching it, illustrating it, doing interviews, and then packaging the story for air.

JOUR 275 and JOUR 330 are a prerequisite for this class.
JOUR 366
MAGAZINE REPORTING
Undergraduate
The digital world of reporting and editing has created unparalleled opportunities to reach specific readers with targeted stories. This course introduces students to the opportunities of magazine writing and the strategies used by magazine writers. Writing assignments will strengthen a student's grasp of the resources available to modern magazine writers and the techniques of research and interviewing that are the basis of skilled storytelling.

JOUR 275 and JOUR 278 are a prerequisite for this class.

JOUR 367
INTERNATIONAL REPORTING
Undergraduate
This course is designed as a workshop to introduce students to the practice of international reporting. It provides students with the background, knowledge and techniques needed to cover world affairs. Discussion topics include reporting strategies, challenges and opportunities for foreign correspondence in the light of globalization and technological change. Students are expected to develop cross-cultural sensitivity and critical thinking about international news. As much as possible, the course links global issues to the local community.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 368
SPORTS REPORTING
Undergraduate
Sports reporting is a go-to destination for online, print, and broadcast consumers of sports information. This course gives students an understanding of the social and cultural significance of sports. It trains them to look for themes and details that go beyond the simple score of a contest to the symbolic importance of athletics in the post-modern experience. Students will complete the course with a new appreciation for what makes for strong sports reporting and what accounts for its unique hold on the popular imagination.

JOUR 275 and JOUR 278 are a prerequisite for this class.

JOUR 370
MULTIMEDIA NEWS PRODUCTION
Undergraduate
This advanced course builds on what students learned in Introduction to Online Reporting and Production. The emphasis is on developing a story package that utilizes interactivity and multimedia features to engage the online audience. The class is designed to simulate the workflow in digital newsrooms. Students are expected to develop and manage content for a class project, thereby gaining hands-on learning of the process of multimedia news production.

JOUR 280 is a prerequisite for this class.

JOUR 371
ADVANCED REPORTING I
Undergraduate
Advanced Reporting I combines classroom instruction with hands-on field experience producing professional-quality broadcast reporting. Students select a single topic for the class and participate in the initial research, production, scripting and editing. Some stories may take longer than one quarter to complete, therefore a two-quarter commitment is required. In addition students must have a working knowledge of government at the local, state and federal level. Students will be required to file Freedom of Information Act requests and track campaign contributions. The class is open to a limited number of underclass and graduate students who will need to make application for the class at the Center for Journalism, Integrity and Excellence.

JOUR 275 and JOUR 278 and instructor permission are prerequisites for this class.
JOUR 372
ADVANCED REPORTING II
Undergraduate
Advanced Reporting II is a continuation of the project work started in JOUR 371 and combines classroom instruction with hands-on field experience broadcast reporting. Students continue reporting work on their topics including research, production, scripting and editing. Projects reach completion in the second of the two-course sequence. As in JOUR 371, students must have a working knowledge of government at the local, state and federal level. Students will be required to file Freedom of Information Act requests and track campaign contributions. The class is open to a limited number of underclass and graduate students who will need to make application for the class at the Center for Journalism, Integrity and Excellence.

JOUR 275, JOUR 278, JOUR 371 and instructor consent are prerequisites for this class.

JOUR 374
COMMUNITY JOURNALISM
Undergraduate
Students will examine the work of major news chains that have begun experimenting with local coverage patterns that are informed by community leaders and community organizations identifying what matters in their community. Supporters of this approach claim it is the future for news organizations attempting to fulfill their social responsibility. Critics claim it undermines the independence of the press.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 375
LONG FORM JOURNALISM
Undergraduate
This is a project-based television reporting class that emphasizes longer form magazine and documentary journalism. Students will examine and apply story telling methods used in television news magazine programs and documentaries. The course will cover story arcs, character development, timelines, and other form techniques. Students will be in the field producing TV news magazine and mini-documentary reports.

JOUR 365 or instructor permission is a prerequisite for this class.

JOUR 376
TOPICS IN JOURNALISM
Undergraduate
Focuses on a specific topic related to the field of journalism. See schedule for description of current topic.

JOUR 377
SPECIAL TOPICS IN JOURNALISM
Undergraduate
Focuses on a specific topic related to the field of journalism. Included might be such topics as sports reporting, Chicago journalism, tabloid journalism, and Front Page news. See schedule for description of current topic.

JOUR 275 and 278 are prerequisites for this course.

JOUR 380
REPORTING FOR GOOD DAY DEPAUL
Undergraduate
This course will give students extensive experience doing on-air reporting for the DePaul student television news program, "Good Day DePaul." Reporters will cover breaking news stories, features, and serious enterprise stories. Students must have experience shooting in the field and editing in Final Cut Pro, either through previous television news courses at DePaul, or from other work. Students will be permitted to take this course in two different quarters.

JOUR 365 and 278 are prerequisites for this class.
JOUR 385
TELEVISION NEWS II
Undergraduate
Television News II builds on the knowledge students have gained in our introductory Television News class in producing news packages for broadcast. Students will develop longer format feature pieces that combine skills in writing, reporting, shooting, narration, editing, and producing. The best of this work should serve as portfolio pieces for students considering careers in broadcasting and related industries. TV News I and Writing for Broadcast are prerequisites for taking this course.

JOUR 365 or instructor permission is a prerequisite for this class.

JOUR 390
WRITING FOR THE DEPAULIA
Undergraduate
This course is designed for the serious journalism student who wants on-deadline experience writing for The DePaulia newspaper and website. Students will cover beats of interest to the DePaul community throughout the quarter and also will receive assignments from DePaulia editors. Stories and beats can be as varied as campus news, sports, the arts or news in the Lincoln Park and South Loop communities. Students may repeat the course once for credit. Not available for DePaulia editors.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 393
JOURNALISM PRACTICUM
Undergraduate
Structured and supervised student participation in collegiate debating, radio production or group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours. (2 quarter hours)

JOUR 399
INDEPENDENT STUDY
Undergraduate
JOUR 501
THE SOCIAL RESPONSIBILITY OF JOURNALISM
Graduate
This course introduces students to the historic development of social responsibility theory and its continuing role in defining the obligations of journalists in creating an informed citizenry as a critical part of the democratic process. The course analyzes the ongoing tension between journalistic responsibility and the obligations of news organizations to turn profits for their shareholders and the constitutional imprimatur of journalism to offer the information that makes self-governance possible.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 502
NEWS NOW: JOURNALISM IN THE INFORMATION AGE
Graduate
This course offers students a culmination of their journalism graduate experience through reflection and reinforcement of key concepts and skills in writing, cross-platform reporting, media history, ethics, and new frontiers in journalism. Students work with the instructor to customize a reporting or research project on a topic of their interest that reflects their professional development. Through experimentation on a project-based learning experience, students demonstrate their understanding of the process of handling, presenting and evaluating the news of the day as well as the social responsibility of journalists.

Status as a graduate Journalism student with at least 24 credits is a prerequisite for this class.

JOUR 503
REPORTING FOR CONVERGED NEWSROOMS
Graduate
This course is designed to equip journalists with the techniques needed in assembling and producing stories that can be published and distributed across integrated media platforms. Students will learn to write and edit reports for online media in ways that add value to stories and encourage readers to drill down into these news narratives for information worth knowing. Students will develop an understanding of how newsgathering practices are evolving through digital media and the role of teamwork in disseminating these stories to an informed citizenry.

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 504
MULTIMEDIA NEWS PRODUCTION
Graduate
This advanced course builds on what students learned in basic online journalism classes. The emphasis is on producing a story package that utilizes interactivity and multimedia features to engage the online audience. The class is designed to simulate the workflow in digital newsrooms. Students are expected to develop and manage content for a class project, thereby gaining hands-on learning of the process of multimedia news production. (Formerly Backpack Reporting)

JOUR 503 and status as a Graduate Journalism student are a prerequisite for this course.

JOUR 505
TELEVISION NEWS REPORTING
Graduate
This course will teach students how to be responsible broadcast news reporters, anchors, producers, and editors, who bring added value to stories in today’s converged newsroom environment. Students will learn all aspects of the news gathering and distribution process from story conception to the research, interviewing, reporting, writing, shooting, editing, and producing that goes into a successful, must-see story.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 506
NEWSCAST PRODUCING
Graduate
This course will teach the skills necessary to become a television newscast producer, one of the most important jobs in a news department. Students will learn which stories should go into a newscast, how much time to give those stories, and what order the stories should run in during the program. They will also learn about some of the key elements of a newscast: headlines, teases, transitions into sports and weather, and end pieces. Finally, the course will cover many of the ethical and philosophical issues a producer will face on a daily basis.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 507
VISUAL COMMUNICATION
Graduate
This course gives students a theoretical and practical grounding in the digital world of photo-journalism. Students will be introduced to the wide array of tools available to reporters in illustrating content from their stories on the web. This includes the hardware and software packages now available in digital story-telling and how citizens use the information in interpreting the news of the day.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 509
JOURNALISM LAW AND ETHICS
Graduate
This course examines the philosophical roots of the First Amendment and how free speech jurisprudence impacts the journalism profession. Students will learn how legal and moral issues arise when newsgathering and free speech conflict with other constitutional and common law rights, and how developments in technology and economics are creating new challenges for journalists and the courts.

JOUR 510
SPORTS REPORTING
Graduate
This course gives students an historic understanding of the role of the sports writer and sports section and the impact the online universe is having on sports writing and reporting. Students will learn the values of modern sports editors and the techniques used by modern sports writers. Students will learn the perspective and context that makes good sports writing truly exceptional.

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 511
ARTS & ENTERTAINMENT REPORTING
Graduate

Arts and Entertainment reporting is among the most widely read, but often is the most poorly executed aspect of a publication or broadcast. Students taking this course will develop a critical appreciation for the role of arts and entertainment reporting in the history of the press and its current role in creating a culture that appreciates and understands the arts and their profound contribution to human understanding.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 512
BUSINESS WRITING AND REPORTING
Graduate

This course will help students better understand the critical role that business and finance reporting plays in the United States and the world economy. Students will develop the techniques that are necessary in responsibly researching, reporting, writing, and editing business and financial news. Segments of the course will be devoted to the history of the discipline, the ethical responsibilities of the business press, and the unique opportunities now available to the digital reporter of business and financial news.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 513
POLITICAL REPORTING
Graduate

This course analyzes what is distinctive about Chicago reporting. Students will be introduced to the rich tradition and history of reporting in this city, and the central role this work has played in the development of urban reporting nationwide. To do this, students will take a close look at the institutions, people, neighborhoods, decision-makers and events that impact Chicago residents in their everyday lives. The emphasis will be on localizing our approach to stories through a beat system that will allow students to regularly report on important areas of municipal life.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 514
OPINION AND COLUMN WRITING
Graduate

Students will learn what makes for extraordinary opinion and column writing with an emphasis on strong reporting that enables writers to assemble arguments based on the firm foundation of fact. Also examined will be the new ways in which digital delivery systems both empower and threaten the free flow of ideas within and across interest communities.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 515
SPECIAL TOPICS IN JOURNALISM
Graduate

Topics have included Advanced Reporting; The Chicago Olympics; The Press and The Presidency; Reporting Campaign 2008; and From Franklin to the Internet: A History of American Journalism. Students pursuing the Sports Journalism concentration can use the following courses: Reporting the Olympics, Sports Blogging, and Sports Universe as special topics courses to count towards the concentration.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 517
EXPERIENTIAL LEARNING IN JOURNALISM
Graduate

Students learn advanced reporting techniques while developing projects under the direction of a faculty supervisor. This course is designed to take learning out of the classroom and enables students to develop portfolio pieces while gaining critical real world experiences in reporting.

Instructor Permission Required.

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 518
WRITING AND REPORTING
Graduate
This course teaches foundational journalistic skills in writing and reporting for those students coming into the program without significant previous course work or professional experience in journalism.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 519
INTERNATIONAL REPORTING
Graduate
This course is designed as a workshop to introduce students to the practice of international reporting. It provides students with the background, knowledge and techniques needed to cover world affairs. Discussion topics include reporting strategies, challenges and opportunities for foreign correspondence in the light of globalization and technological change. Students are expected to develop cross-cultural sensitivity and critical thinking about international news. As much as possible, the course links global issues to the local community.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 520
DATA JOURNALISM
Graduate
Data Journalism explores methods and practices in news reporting with the tools of social science. Students will learn how to collect, verify, manage, analyze, interpret and present data, including skills used in database management, data analysis software and data visualization. This class focuses on finding newsworthy stories hidden behind numbers and writing data-driven reports. Students will learn best practices and pitfalls involved in data-based reporting.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 521
SPORTS PRODUCING
Graduate
This course will focus on producing sports content for broadcast with an emphasis in television production. Students will learn to write and produce compelling stories through the lens of sports, including coverage of DePaul athletics. The best of this work will be featured on DePaul's broadcast and online outlets as well as the university's athletics website. Instructor permission required for this course. Students must have a working knowledge of television production equipment.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 522
MULTI-PLATFORM NEWS EDITING
Graduate
This course introduces students to editing and publishing procedures, including proofreading, copy editing and headline writing for various publications, including newspapers and online media. Skills are emphasized in AP style, grammar, usage, punctuation, story organization, brevity, basic layout, photo editing, cutline writing, news judgment, ethics and print/online headline writing. In addition to editing basics, students learn industry-standard InDesign software to lay out print news pages.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 523
ONLINE SPORTS REPORTING
Graduate
Students will report, write, edit and produce online stories about sports issues, features and other topics. Skills are emphasized in game coverage, sports blogging, building a sports community on Twitter, shooting and editing video, recording and editing audio, and building basic web pages in HTML. The course also will explore ethical and legal issues pertaining to video and audio usage rights, athlete branding and other topics in the multimedia sports journalism culture.

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 524
WRITING FOR THE DEPAULIA
Graduate
This course is designed for the serious Journalism student who wants on-deadline experience writing for The DePaulia newspaper and website. Students will cover stories from each section of the paper (news, features, entertainment, opinion and sports) throughout the quarter. Some assignments will come from DePaulia editors, but students are expected to come up with their own ideas. Stories can be as varied as campus news or news in the Lincoln Park and South Loop communities. Supplementing stories with photos and video is expected.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 525
URBAN AFFAIRS REPORTING
Graduate
There are stories hidden in plain sight throughout the city, and this course will cover how to find and cover those stories from the ground up. Urban Affairs Reporting will focus on the stories that happen beyond City Hall, in neighborhoods and communities, among individuals and groups - stories that influence and are influenced by government, business, and other powerful institutions. The course will help students improve their ability to develop sources, find story ideas, and thereby cover critical urban issues with greater depth, originality, and excitement. Students will learn how to report these often fascinating stories across a variety of print and online platforms.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 526
POLITICAL COMMUNICATION
Graduate
This course examines how political communication and related media affect public opinion, civic life, elections, and public policy, and the impact of these communication dynamics on civic institutions and democratic decision-making. Students will study how journalists, elected officials, citizens, and political strategists construct, use, and understand political messages, including how news, advertising, and entertainment media contribute to the shaping of political perceptions, emotions, and behaviors in a variety of circumstances domestically and internationally.

JOUR 527
LIFESTYLE REPORTING
Graduate
This course will give students the tools to write Lifestyle stories and to think creatively. Assignments will include human-interest stories, health, fitness, design, fashion, food, leisure and social issues. The class will concentrate on the tools reporters need to create this kind of work, from good quotes to relevant sourcing.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 528
REPORTING FOR GOOD DAY DEPAUL
Graduate
This course will give students extensive experience doing on-air reporting for the DePaul student television news program, "Good Day DePaul." Reporters will cover breaking news stories, features, and serious enterprise stories. Students must have experience shooting in the field and editing in Final Cut Pro, either through previous television news courses at DePaul, or from other work.

JOUR 505 and status as a Graduate Journalism student are prerequisites for this class.

JOUR 529
ONLINE NEWS BUREAU
Graduate
This course offers first-hand experience on a digital newsroom. Students should already have a grasp of basic online journalism skills through earlier classes or practical experience. The emphasis of the course is on producing high-quality stories both in terms of content and in terms of presentation. Throughout the quarter, students will work as multimedia producers, editors and reporters to create content for thewiredloop.info, a platform for news experimentation.

JOUR 503 and status as a Graduate Journalism student are a prerequisite for this course.
The radio news business has been radically altered through the rise of new media. This course analyzes that transformation. The move of radio news to the web has greatly increased opportunities for local and community-based reporting. Radio News helps students acquire the skill sets they’ll need to do socially responsible work in this new and challenging environment. This course prepares students for careers in radio news and documentary by training them in the audio platforms and news narratives that have made radio one of the strongest of personalized, niche media in the digital landscape.

Status as a Graduate Journalism student is a prerequisite for this class.

Journalism by Numbers introduces students to techniques for using numbers, data, statistics, and quantitative reasoning to improve their reporting. Students learn how to interpret data for reporting on issues such as business, economics, health care, science, politics, and sports. Other topics include public opinion polling, statistical analysis software, and discussion of the legal and ethical issues that arise from data analysis and data reporting.

Status as a Graduate Journalism student is a prerequisite for this class.

This course analyzes the historic competition between candidates, the media, and presidential campaigns. It examines how public understanding of political issues, public policy, and the candidates is created. We'll drill down into conditions that lead to a cooperative or adversarial press in campaign reporting and how the public perceives the political process and the role of the press in forming public opinion in presidential campaigns and during presidencies.

Status as a Graduate Journalism student is a prerequisite for this class.

This course focuses on developing skills in obtaining, interpreting and reporting using public records available from the government. Students will complete hands-on assignments on how to acquire public records, including law enforcement and court documents; how to file FOIA requests and appeals, and other legal remedies for obtaining publicly available information; and how to decipher government records and spreadsheets for use in documents-driven reporting. By sharpening skills on access and use of public records for journalism, the course better equips students to fulfill the watchdog role of the press. (Formerly PUBLIC RECORDS REPORTING)

Status as a Graduate Journalism student is a prerequisite for this class.

This course is a practicum designed to prepare visual journalists for the skills they'll need in a rapidly changing profession. Students will learn about the strategic use of photographs in digital storytelling, including the role of photographs in multimedia production. Students will also understand the ethical obligations faced by today's photojournalist.

Status as a Graduate Journalism student is a prerequisite for this class.

The course enables students in journalism to learn on air and production skills in news, public affairs, and sports programming. This experiential learning class enables students to work at our award-winning student radio operation, where participants host shows, cover DePaul sports, and develop long format news, interviews, and public affairs programming.

Status as a Graduate Journalism student is a prerequisite for this class.
**JOUR 536**  
**SPORTS BLOGGING**  
**Graduate**  
Blogging has become an essential component of all sports coverage, and this course will provide the skills to excel in this growing area of journalism. Students will learn about news tracking, news aggregation, the fundamentals of blog posts, social media and multimedia in blogging, live blogging, and being part of an online community. By building blogs they’ll have an opportunity to brand themselves as sports journalists and learn how to become an authoritative voice in a particular area of sports.

Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 537**  
**FROM FRANKLIN TO THE INTERNET: A HISTORY OF AMERICAN JOURNALISM**  
**Graduate**  
This course analyzes the impact journalism has had and is having on the country and the impact technologies have had on journalism. We examine the stories journalism tells, how it tells them, and the difference it makes in American society, culture, and politics.

Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 538**  
**MASS COMMUNICATION IN THE DIGITAL AGE**  
**Graduate**  
This course examines the rise of the information age through the development of new media platforms and the changing impact media are having in creating community and shaping citizenship and American life as journalism, radio, television, film, advertising, and public relations transition from analog to digital eras.

Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 539**  
**CURRENT ISSUES IN THE JOURNALISM INDUSTRY**  
**Graduate**  
This course probes all aspects of the journalism industry and media business, including issues of funding models, revenue, editorial, marketing, advertising, and distribution. (formerly THE FUTURE OF AD-SUPPORTED MEDIA)

Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 540**  
**THE INTERNET, TECHNOLOGY, AND POLITICS**  
**Graduate**  
This course explores the evolving relationships that reside at the intersection of the internet and politics. Some of the themes covered in the course include the ways in which politicians and organizations use the internet and new media and how this is changing the relationship between governments and citizens. (Cross-listed with PSC 315 Internet, Technology and Politics)

Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 541**  
**MASS MEDIA & AMERICAN POLITICS**  
**Graduate**  
This course explores the role of the media in American politics and the impact it has on government, policymaking, campaigning, and most importantly, the general public. The course has three major sections: an analysis of the news media as a political and economic institution; an examination of the ways in which political actors try to shape the messages transmitted through the media; and an investigation of the effects media have on citizens. (Cross-listed with PSC 321 Mass Media and American Politics)

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 542
SOCIAL MEDIA AND THE NEWS
Graduate
This course blends the theory and practice of social media within the context of journalism and social trends in mobile information consumption and participatory culture. Students will analyze and apply a range of social and mobile media tools to news reporting. The course will cover emerging theory on social media, including: the networked society and networked gatekeeping, spreadability, social network analysis and power laws, citizen journalism, best practices for content curation, as well as verification of social content. Students will apply theory to develop and implement a professional social media strategy, maintain a blog and a final community-based reporting group project.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 543
LONG FORM REPORTING
Graduate
This is a project-based television reporting class that emphasizes longer form magazine and documentary journalism. Students will examine and apply story telling methods used in television news magazine programs and documentaries. The course will cover story arcs, character development, timelines, and other form techniques. Students will be in the field producing TV news magazine and mini-documentary reports.

JOUR 505 and status as a Graduate Journalism student are prerequisites for this class.

JOUR 544
ENTREPRENEURIAL JOURNALISM
Graduate
This course focuses on entrepreneurship and innovation in digital media. The impact of digital technologies on the news industry is examined with attention to changes in business and distribution models. Students gain a better understanding how to turn ideas into sustainable plans for new socially responsible start-up businesses, including the basics of digital news finances and strategies for bringing products or services to market. Students get hands-on experience with social media monitoring software, web analytics, and other tools for engaging audiences.

JOUR 548
ADVANCED GRADUATE REPORTING FOR GOOD DAY DePAUL
Graduate
This course will allow graduate students to take a second quarter of Reporting for Good Day DePaul. It will provide enhanced work in reporting, writing and video production. It will also provide additional instruction in interview lighting, graphics, and high-end sound techniques. On the research side, it will include a paper on issues in television journalism.

JOUR 528 and status as a Graduate Journalism student are prerequisites for this class.

JOUR 551
ADVANCED REPORTING I
Graduate
Advanced Reporting I combines classroom instruction with hands-on field experience producing professional-quality broadcast reporting. Students select a single topic for the class and participate in the initial research, production, scripting and editing. Some stories may take longer than one quarter to complete, therefore a two-quarter commitment is required. Graduate students will function as senior producers and editors helping oversee the initial research, production, scripting and editing of a story selected by the class. In addition students must have a working knowledge of government at the local, state and federal level. Students will be required to file Freedom of Information Act requests and track campaign contributions. The class is open to a limited number of underclass and graduate students who will need to make application for the class at the Center for Journalism, Integrity and Excellence.

Status as a JOUR graduate student and instructor permission are prerequisites for this class.
**JOUR 552**  
**ADVANCED REPORTING II**  
**Graduate**  
Advanced Reporting II is a continuation of the project work started in JOUR 551 and combines classroom instruction with hands-on field experience producing broadcast reporting. Graduate students function as senior producers and editors helping oversee the initial research, production, scripting and editing of a story selected by the class. Students continue reporting work on their topics including research, production, scripting and editing. Projects reach completion in the second of the two-course sequence. As in JOUR 551, students must have a working knowledge of government at the local, state and federal level. Students will be required to file Freedom of Information Act requests and track campaign contributions. The class is open to a limited number of underclass and graduate students who will need to make application for the class at the Center for Journalism, Integrity and Excellence. JOUR 551 and status as a Graduate Journalism student are prerequisites for this class.

**JOUR 588**  
**REPORTING FOR 14 EAST MAGAZINE**  
**Graduate**  
Students gain hands-on experience reporting, writing and producing multimedia stories and other storytelling elements for the College of Communication's 14 East Magazine (http://fourteeneastmag.com)

**JOUR 590**  
**JOURNALISM WORKSHOP**  
**Graduate**  
This course allows students to sample a range of hands on, practical offerings in journalism that can enhance their knowledge and expertise. Workshop topics can include video camera basics, non-linear editing with Final Cut Pro and news page layout and design. PLEASE NOTE THAT THIS IS A 2-CREDIT COURSE. Students can take this course a maximum of two times for a total of 4 credits. (2 quarter hours) Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 592**  
**INDEPENDENT STUDY**  
**Graduate**  
Students will be guided in the development of a special project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member. Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 602**  
**CANDIDACY CONTINUATION**  
**Graduate**  
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans. (0 credit hours) Status as a Graduate Journalism student is a prerequisite for this class.

**JPN 101**  
**BASIC JAPANESE I**  
**Undergraduate**  
Listening to, speaking, reading and writing Japanese in a cultural context for the beginning student.

**JPN 101S**  
**BASIC JAPANESE I FOR SUMMER**  
**Undergraduate**  
(Listening to, speaking, reading, and writing Japanese in a cultural context for the beginning student. (Covers the equivalent of JPN 101 and the first half of JPN 102.) The first half of beginning Japanese. Listening to, speaking, reading, and writing Japanese in a cultural context for the beginning student.)
JPN 102  
BASIC JAPANESE II  
Undergraduate  
Continued emphasis on the four skills in culturally-authentic situations.

JPN 103  
BASIC JAPANESE III  
Undergraduate  
Further work on the basic elements of the Japanese language, spoken as well as written, with due regard to the cultural context of Japanese expression.

JPN 103S  
BASIC JAPANESE III FOR SUMMER  
Undergraduate  
(Covers the equivalent of the second half of JPN 102 and all of JPN 103.) The second half of beginning Japanese. Further work on the basic elements of the Japanese language, spoken as well as written, with due regard to the cultural context of Japanese expression.

JPN 104  
INTERMEDIATE JAPANESE I  
Undergraduate  
Intensive practice in the use of Japanese through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. JPN 103 or equivalent, including placement test or permission of instructor, is recommended.

JPN 105  
INTERMEDIATE JAPANESE II  
Undergraduate  
Continuing practice in spoken and written Japanese and further development of reading and listening abilities in an authentic cultural context. JPN 104 or equivalent, including placement test or permission of instructor, is recommended.

JPN 106  
INTERMEDIATE JAPANESE III  
Undergraduate  
Developing more fluency in speaking, understanding, reading, and writing Japanese with a concomitant heightened awareness of the cultural dimensions of the Japanese language. JPN 105 or equivalent, including placement test or permission of instructor, is recommended.

JPN 110  
INTENSIVE BASIC JAPANESE I  
Undergraduate  
An intensive introduction to reading, writing, and speaking Japanese in a cultural context for the beginning student. For participants in the DAAAO Program.

JPN 111  
INTENSIVE BASIC JAPANESE II  
Undergraduate  
An intensive introduction to reading, writing, and speaking Japanese in a cultural context for the beginning student; continues JPN 110. For participants in the DAAAO Program.

JPN 130  
MOLILSAP STUDY ABROAD  
Undergraduate  
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

JPN 301
ADVANCED JAPANESE IV
Undergraduate
The focus of this course is the development of advanced skills in reading, writing, speaking and listening, especially "critical reading/thinking skills" in Japanese by questioning the views given in the textbook and discussing issues from different perspectives. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.
JPN 302
ADVANCED JAPANESE V
Undergraduate
The focus of this course is the development of advanced skills in reading, writing, speaking and listening, especially "critical reading/thinking skills" in Japanese by questioning the views given in the textbook and discussing issues from different perspectives. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.

JPN 303
ADVANCED JAPANESE VI
Undergraduate
The focus of this course is the development of advanced skills in reading, writing, speaking and listening, especially "critical reading/thinking skills" in Japanese by questioning the views given in the textbook and discussing issues from different perspectives. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.

JPN 304
CONTEMPORARY JAPANESE LITERATURE
Undergraduate
Readings from Tanizaki, Kawabata, Mishima, or other contemporary authors from the Showa era to the present. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.

JPN 310
JAPANESE CULTURE
Undergraduate
Discussion of selected cultural topics from different periods with appropriate collateral readings. Formerly Japanese 302. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.

JPN 311
ADVANCED DISCUSSION AND READING I
Undergraduate
Expanding the knowledge of vocabulary and kanji characters through discussions of current issues in the news and in newspapers and academic writing exercises. Formerly Japanese 300. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.

JPN 312
ADVANCED DISCUSSION AND READING II
Undergraduate
Developing the formal and academic oral fluency and writing skills through authentic aural and written materials through debates and discussions of current cultural and political issues. Formerly Japanese 301. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.

JPN 313
ADVANCED DISCUSSION AND READING III
Undergraduate
Focus on the formal expressions and interactions in business and academic settings and extensive reading of authentic materials on modern Japan with an emphasis on essay-writing activities. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.

JPN 320
ADVANCED COMMERCIAL JAPANESE
Undergraduate
Advanced preparation for the use of Japanese in the business world. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.
JPN 330
INTRODUCTION TO JAPANESE LINGUISTICS
Undergraduate
Study of a wide range of topics including Japanese language analysis, dialectal variations, and the history of the Japanese language. Data collection on oral and written texts with related class discussions. JPN 106 or equivalent, including placement test or permission of instructor, is recommended.

JPN 342
ADVANCED HIGH JAPANESE I
Undergraduate
JPN 342 is one of the Advanced High Japanese courses designed for advanced high Japanese learners. The course focuses on a special topic of Japan, and the Japanese language is used as a communication and thinking tool for reading, discussion and other activities. Students are expected to think about topics and issues “critically” and “creatively,” i.e., beyond comprehension of given information. Class discussion is conducted exclusively in Japanese, and resources (i.e., books, articles, newspapers, films, etc.) are mainly in Japanese although English translations or publications may be used as learning aids or supplementary materials if necessary. All assignments and term papers are written and submitted in Japanese (exception may apply for a native speaker of Japanese). JPN 300 or equivalent, including placement test or permission of instructor, is recommended.

JPN 343
ADVANCED HIGH JAPANESE II
Undergraduate
The goal of this course is to understand the history of Japanese Americans during pre- and post-war periods, and relevant social issues in today's Japanese and American societies (e.g., immigration, discrimination, etc.), in order to understand our role in today's global society and to make proposals for peace and human justice. JPN 300 or equivalent, including placement test or permission of instructor, is recommended.

JPN 344
ADVANCED HIGH JAPANESE III
Undergraduate
Translation Practicum serves as the final installment for both the advanced and the advanced high courses in Japanese. The main goal is to produce a translation of a Japanese text into English by the end of the quarter. In order to achieve this goal, each student will select a Japanese text, translate it into English, and revise it in consultation with her/his peers. Students may also choose to translate from English to Japanese. JPN 300 or equivalent, including placement test or permission of instructor, is recommended.

JPN 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Japanese. Students must have the equivalent of 106 or higher ability in Japanese to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

JPN 430
INTRODUCTION TO JAPANESE LINGUISTICS
Graduate
Study of a wide range of topics including Japanese language analysis, dialectal variations, and the history of the Japanese language. Data collection on oral and written texts with related class discussions.

JPN 442
ADVANCED HIGH JAPANESE I
Graduate
JPN 442 is one of the Advanced High Japanese courses designed for advanced high Japanese learners who have completed Advanced Japanese courses (JPN 401-403) or have equivalent or higher proficiency in Japanese. The course focuses on a special topic of Japan, and the Japanese language is used as a communication and thinking tool for reading, discussion and other activities. Students are expected to think about topics and issues "critically" and "creatively," i.e., beyond comprehension of given information. Class discussion is conducted exclusively in Japanese, and resources (i.e., books, articles, newspapers, films, etc.) are mainly in Japanese although English translations or publications may be used as learning aids or supplementary materials if necessary. All assignments and term papers are written and submitted in Japanese (exception may apply for a native speaker of Japanese).

JPN 443
ADVANCED HIGH JAPANESE II
Graduate
The goal of this course is to understand the history of Japanese Americans during pre- and post-war periods, and relevant social issues in today's Japanese and American societies (e.g., immigration, discrimination, etc.), in order to understand our role in today's global society and to make proposals for peace and human justice.

JPN 444
ADVANCED HIGH JAPANESE III
Graduate
Translation Practicum serves as the final installment for both the advanced and the advanced high courses in Japanese this year. The main goal is to produce a translation of a Japanese text into English by the end of the quarter. In order to achieve this goal, each student will select a Japanese text, translate it into English, and revise it in consultation with her/his peers. Students may also choose to translate from English to Japanese.

JPN 496
PRACTICUM IN JAPANESE INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

JZZ 1
JAZZ ENSEMBLE
Undergraduate
Study, rehearsal, and performance of jazz literature with focus on music for large jazz ensembles; emphasis on current performance styles, and new arrangements and compositions. Placement audition required. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 2
JAZZ CHAMBER ENSEMBLE
Undergraduate
Study, rehearsal, and performance of literature for jazz chamber groups. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 200
JAZZ ENSEMBLE
Undergraduate
Study, rehearsal, and performance of jazz literature with focus on music for large jazz ensembles; emphasis on current performance styles, and new arrangements and compositions. Placement audition required. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 201
JAZZ CHAMBER ENSEMBLE
Undergraduate
Study, rehearsal, and performance of literature for jazz chamber groups. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 215
JAZZ JUNIOR RECITAL
Undergraduate
A full 45 minute, public recital performance of solo and/or chamber repertoire to be completed in the Junior year. Students must be registered for applied lessons during the quarter the recital is presented. (0 quarter hours)

JZZ 317, JZZ 318, JZZ 319, JZZ 320, JZZ 321, JZZ 322, JZZ 323, or JZZ 324 is a co-requisite for this class.

JZZ 300
ESSENTIALS OF JAZZ I
Undergraduate
Basic and advanced chord constructions in written and keyboard applications. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 301
ESSENTIALS OF JAZZ II
Undergraduate
Harmonizing melodies by the use of advanced harmonies and techniques of modern chord substitutions. Developing the ability to “play by ear.” (2 quarter hours)

JZZ 300 is a prerequisite for this class.
JZZ 302
ESSENTIALS OF JAZZ III
Undergraduate
Improvisation with particular emphasis on the blues arranging and accompanying techniques; a survey of recent trends in popular music. (2 quarter hours)

JZZ 301 is a prerequisite for this class.

JZZ 303
JAZZ HISTORY AND STYLE
Undergraduate
An intensive study of the periods of jazz, major performers and composers, trends, influences, stylistic features and related materials. (2 quarter hours)

Status as a Jazz Studies student is a prerequisite for this class.

JZZ 304
JAZZ ARRANGING AND COMPOSITION I
Undergraduate
Arranging and orchestration techniques for the small jazz ensemble (1-4 horns plus rhythm section). (2 quarter hours)

JZZ 302 is a prerequisite for this class.

JZZ 305
JAZZ ARRANGING AND COMPOSITION II
Undergraduate
Arranging and orchestration techniques for the large jazz ensemble (5 or more horns plus rhythm section, up to and including the traditional 12-piece big band). (2 quarter hours)

JZZ 304 is a prerequisite for this class.

JZZ 306
JAZZ ARRANGING AND COMPOSITION III
Undergraduate
Jazz composition techniques with a special emphasis on the leadsheet (melody and chord symbols). (2 quarter hours)

JZZ 305 is a prerequisite for this class.

JZZ 308
JAZZ IMPROVISATION I
Undergraduate
Techniques of jazz improvisation with an emphasis on basic chord construction and melodic line development.

JZZ 302 is a prerequisite for this class.

JZZ 309
JAZZ IMPROVISATION II
Undergraduate
Techniques of jazz improvisation with an emphasis on basic chord construction and melodic line development. (2 quarter hours)

JZZ 308 is a prerequisite for this class.

JZZ 310
JAZZ IMPROVISATION III
Undergraduate
Techniques of jazz improvisation with an emphasis on basic chord construction and melodic line development. (2 quarter hours)

JZZ 309 is a prerequisite for this class.
JZZ 314

JAZZ PEDAGOGY
Undergraduate
A study of the methods of teaching jazz improvisation arranging, composition, conducting and rhythm section techniques. Can serve as an elective for music education majors. (2 quarter hours)

Status as a Jazz Studies student is a prerequisite for this class.

JZZ 315

JAZZ SENIOR RECITAL
Undergraduate
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed in the Senior year. Students must be registered for applied lessons during the quarter the recital is presented. (0 quarter hours)

JZZ 317, JZZ 318, JZZ 319, JZZ 320, JZZ 321, JZZ 322, JZZ 323, or JZZ 324 is a co-requisite for this class.

JZZ 316

APPLIED JAZZ COMPOSITION
Undergraduate
Private instruction exploring advanced techniques and methods of jazz composition and arranging. (2 quarter hours)

JZZ 306 is a prerequisite for this class.

JZZ 317

APPLIED JAZZ IMPROVISATION
Undergraduate
Applied instruction in jazz style and improvisation. (2 quarter hours)

Status as a Jazz Studies student is a prerequisite for this class.

JZZ 318

JAZZ GUITAR
Undergraduate
Advanced individual instruction in jazz guitar at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 319

JAZZ PERCUSSION
Undergraduate
Advanced individual instruction in jazz percussion at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 320

JAZZ PIANO
Undergraduate
Advanced individual instruction in jazz piano at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.
JZZ 321
JAZZ SAXOPHONE
Undergraduate
Advanced individual instruction in jazz saxophone at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 322
JAZZ STRING BASS
Undergraduate
Advanced individual instruction in jazz string bass at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 323
JAZZ TROMBONE
Undergraduate
Advanced individual instruction in jazz trombone at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 324
JAZZ TRUMPET
Undergraduate
Advanced individual instruction in jazz trumpet at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 325
JAZZ RHYTHM SECTION TECHNIQUES
Undergraduate
This course will provide students with information and performance techniques associated with instruments typically orchestrated to form a jazz rhythm section in jazz chamber or large ensemble settings. Specific topics will include individual instrument roles, performance styles and tempos, and classic rhythm section analysis. (2 quarter hours)

JZZ 335
JAZZ HISTORY
Undergraduate
This course is concerned with the study of jazz history and the styles which contributed to the evolution of jazz. Topics include bebop period, swing era, the cool school, and hard bop periods. Significant recordings, musicians, and musical styles will be examined.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 398
INDEPENDENT STUDY
Undergraduate
An in-depth study of a musicianship topic under the supervision of a faculty member. (Departmental permission required). (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.
JZZ 400
JAZZ ENSEMBLE
Graduate
Study, rehearsal, and performance of jazz literature with focus on music for large jazz ensembles; emphasis on current performance styles, and new arrangements and compositions. Placement audition required. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

JZZ 401
JAZZ CHAMBER ENSEMBLE
Graduate
Study, rehearsal and performance of literature for jazz chamber groups. Placement audition required. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

JZZ 402
ADVANCED JAZZ COMPOSITION I
Graduate
Composition of works for jazz chamber groups and big bands, but with special emphasis on the leadsheet (melody and chords).

Status as a Graduate Music student is a prerequisite for this class.

JZZ 403
ADVANCED JAZZ ARRANGING AND ORCHESTRATION
Graduate
Discovery, analysis, and implementation of advanced arranging, orchestral, and compositional techniques for the large jazz ensemble (big band).

Status as a Graduate Music student is a prerequisite for this class.

JZZ 404
ADVANCED JAZZ COMPOSITION II
Graduate
Advanced topics in jazz composition. Composing for jazz chamber groups and big bands, but with special emphasis on the leadsheet (melody and chords).

JZZ 402 is a prerequisite for this class.

JZZ 405
JAZZ HISTORY
Graduate
Graduate level study of jazz history and the styles which contributed to the evolution of jazz. Topics include bebop period, swing era, the cool school, and hard bop periods. Significant recordings, musicians, and musical styles will be examined.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 406
JAZZ STYLE AND ANALYSIS
Graduate
Students will demonstrate a theoretical and aural understanding of the process of jazz improvisation, including song forms and structures, chord/scale relationships, and chord notation and phrasing. Select recordings of solo jazz improvisations will be analyzed, transcribed, and performed, supplemented by historical biographies of the recording artists.

Status as a Graduate Music student is a prerequisite for this class.
JZZ 407
JAZZ GRADUATE RECITAL
Graduate
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed during the graduate residence. Students must be registered for applied lessons during the quarter the recital is presented. (0 quarter hours)

Completion of one of the following courses is a prerequisite for this class: JZZ 412, 413, 414, 415, 416, 417, 418, or 419.

JZZ 408
JAZZ ENSEMBLE
Graduate
Study, rehearsal, and performance of jazz literature with focus on music for large jazz ensembles; emphasis on current performance styles, and new arrangements and compositions. Placement audition required. (0 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

JZZ 409
APPLIED JAZZ COMPOSITION
Graduate
Private instruction exploring advanced techniques and methods of jazz composition and arranging. (2 quarter hours)

Status as a Graduate Jazz Studies student is a prerequisite for this class.

JZZ 410
JAZZ COMPOSITION FINAL PROJECT
Graduate
Completion of a 7-10 minute original composition for standard jazz ensemble instrumentation. (0 quarter hours)

JZZ 404 is a prerequisite for this class.

JZZ 411
JAZZ PEDAGOGY
Graduate
A study of the methods of teaching jazz improvisation arranging, composition, conducting and rhythm section techniques. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

JZZ 412
APPLIED JAZZ IMPROVISATION
Graduate
Applied instruction in jazz style and improvisation. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

JZZ 413
JAZZ GUITAR
Graduate
Advanced individual instruction in jazz guitar at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 414
JAZZ PERCUSSION
Graduate
Advanced individual instruction in jazz percussion at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.
JZZ 415  
JAZZ PIANO  
Graduate  
Advanced individual instruction in jazz piano at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 416  
JAZZ SAXOPHONE  
Graduate  
Advanced individual instruction in jazz saxophone at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 417  
JAZZ STRING BASS  
Graduate  
Advanced individual instruction in jazz string bass at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 418  
JAZZ TROMBONE  
Graduate  
Advanced individual instruction in jazz trombone at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 419  
JAZZ TRUMPET  
Graduate  
Advanced individual instruction in jazz trumpet at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 425  
JAZZ RHYTHM SECTION TECHNIQUES  
Graduate  
This course will provide students with information and performance techniques associated with instruments typically orchestrated to form a jazz rhythm section in jazz chamber or large ensemble settings. Specific topics will include individual instrument roles, performance styles and tempos, and classic rhythm section analysis. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

JZZ 450  
JAZZ CHAMBER ENSEMBLE  
Graduate  
Study, rehearsal, and performance of literature for jazz chamber groups. (0 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.
JZZ 460
TOPICS IN JAZZ STUDIES
Graduate
In depth investigation of a topic in jazz studies. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

JZZ 498
INDEPENDENT STUDY
Graduate
An in-depth study of a musicianship topic under the supervision of a faculty member. (Departmental permission required). (variable credit)
Status as a Graduate Music student is a prerequisite for this class.

LAT 101
BASIC LATIN I
Undergraduate
Basic Latin is the first Latin reading course. It introduces students to the basics of the language of the Romans, which includes the Latin alphabet, pronunciation and the beginnings of Latin grammar. Students will begin to develop reading and writing skills as they encounter small passages of Latin text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of Latin, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate Latin as they proceed, learning rudiments of the language as well as cultural aspects of the Romans at varying epochs.

LAT 102
BASIC LATIN II
Undergraduate
Basic Latin is the first Latin reading course. It introduces students to the basics of the language of the Romans, which includes the Latin alphabet, pronunciation and the beginnings of Latin grammar. Students will begin to develop reading and writing skills as they encounter small passages of Latin text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of Latin, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate Latin as they proceed, learning rudiments of the language as well as cultural aspects of the Romans at varying epochs.

LAT 103
BASIC LATIN III
Undergraduate
Basic Latin is the first Latin reading course. It introduces students to the basics of the language of the Romans, which includes the Latin alphabet, pronunciation and the beginnings of Latin grammar. Students will begin to develop reading and writing skills as they encounter small passages of Latin text, the standard method for learning this ancient tongue being partly memorization and partly language immersion. Students will be expected to read through small passages of Latin, but not without assistance. This course focuses primarily on syntax, grammar and memorization of paradigms, yet students also translate Latin as they proceed, learning rudiments of the language as well as cultural aspects of the Romans at varying epochs.

LAT 113
LATIN FOR READING IV: INTRODUCTION TO LATIN POETRY
Undergraduate
Latin 113 is an introduction to Latin poetry. This course will give students a review of grammar and forms along with reading exercises. Students concentrate on reading large sections of text in an effort to derive meaning and historical significance from the meter and the meaning of Golden age Latin. Continued drill on forms and reading for comprehension are the tools used by students. Students will be expected to read through passages of Latin with relative dexterity, and they will begin to parse through the texts in class in order to inculcate the skills of navigating entire narratives. Students begin to develop an affinity for specific authors from the poetic tradition of the Romans. LAT 113 emphasizes the completion of poems, or the completion of a larger work in order that the student becomes more comfortable with the ancient language. This course is a must for students of history, especially that of the western tradition, and it is imperative for the student interested in remaining capable of translating even the simplest Latin passages. Latin 103 or equivalent, including placement test or permission of instructor, is recommended.
LAT 114
LATIN FOR READING V: INTRODUCTION TO LATIN PROSE
Undergraduate
Latin 114 is an introduction to Latin prose. This course will give students a review of grammar and forms along with reading exercises. Students concentrate on reading large sections of text in an effort to derive meaning and historical significance. Continued drill on forms and reading for comprehension are the tools used by students. Students will be expected to read through passages of Latin with relative dexterity, and they will begin to parse through the texts in class in order to inculcate the skills of navigating entire narratives. Students begin to develop an affinity for specific authors from the poetic tradition of the Romans. Latin 103 or equivalent, including placement test or permission of instructor, is recommended.

LAT 115
LATIN FOR READING VI: LATIN PROSE COMPOSITION
Undergraduate
Latin 115 is the continuation of Latin prose with some Latin composition. Students concentrate on reading large sections of text in an effort to derive meaning and historical significance. Continued drill on forms and reading for comprehension are the tools used by students. Students will be expected to read through passages of Latin with relative dexterity, and they will begin to parse through the texts in class in order to inculcate the skills of navigating entire narratives. Students begin to develop an affinity for specific authors from the poetic tradition of the Romans. The active skill of composition doubly reinforces translating abilities. Latin 103 or equivalent, including placement test or permission of instructor, is recommended.

LAW 102
BUSINESS ORGANIZATIONS
Professional
Provides a basic introduction to the modern American business corporation. Major subject areas covered include the steps required for organizing a corporation, the nature of the corporate entity concept, control and management of the corporation, fiduciary duties of directors and controlling shareholders and an introduction to federal securities law and partnership and agency law. (variable credit)

LAW 105
CONTRACTS
Professional
Required for JD. Covers offer and acceptance, consideration, remedies, third party beneficiaries, conditions, anticipatory breach, impossibility and frustration, the Statute of Frauds, discharge and illegality. Common law principles and applicable portions of the Uniform Commercial Code are studied. (4 semester hours)
LAW 112
LEGAL ANALYSIS RESEARCH AND COMMUNICATION I
Professional
Designed to develop the first-year student's professional writing skills by involving students in a structured analysis of effective and ineffective legal writing, as well as applying the principles and methods of legal analysis to specific writing tasks. Lectures on research tools and their uses are also provided. Students learn and practice legal citation form. (2 semester hours)

LAW 114
LEGAL ANALYSIS RESEARCH AND COMMUNICATIONS TEACHING ASSISTANTS
Professional
LARC TAs will work with LARC instructors to ensure a productive learning environment for students. TAs will work with one instructor for the two-semester LARC course. TAs attend LARC class, hold office hours and conferences with students, conduct research, mark ungraded assignments and perform other related tasks. TAs meet as a group, from time to time, with the LARC Director to ensure consistent delivery of information and advice to students. Permission required. (variable credit)

LAW 115
LEGAL ANALYSIS RESEARCH AND COMMUNICATION III
Professional
Builds on the analysis, research, and communication skills established in LAW 112 and 119. Focuses on appellate brief writing and oral advocacy skills. (3 semester hours)

LAW 119
LEGAL ANALYSIS RESEARCH AND COMMUNICATIONS II
Professional
Builds on the analysis, research, and communication skills acquired in LAW 112. Lectures on legal research techniques and strategies are also provided. (3 semester hours)

LAW 120
CIVIL PROCEDURE
Professional
Required for J.D. A basic survey of the fundamental principles which control the allocation and use of judicial power in the American legal system. The principle areas of inquiry include subject matter jurisdiction, personal jurisdiction, phases of a law suit, problems of diversity jurisdiction and former adjudication. (4 semester hours)

LAW 130
PREPARING FOR PRACTICE I
Professional
Required of all first-year students in the first semester. In this non-credit pass/fail course, you gain basic insight into the variety of legal practice areas, learn more about your strengths and blind spots and their impact on your career, and master the basic job search skills including resume and cover letter drafting, interviewing and networking. With your career advisor, you will develop an individualized career plan. You will have the opportunity to practice your skills in interactive sessions. (0 semester hours)

LAW 131
PREPARING FOR PRACTICE II
Professional
Building on the knowledge you gained in Preparing for Practice I, you will gain a more in-depth understanding of the legal market, particularly the business of law practice, the ethics of law practice, and professional communication with senior attorneys. You will learn time management skills and the professional approach to social media. You will have further opportunities to interact with attorneys at networking events. (0 semester hours)
LAW 140
CONSTITUTIONAL LAW
Professional
Required for JD students. This course analyzes the judicial process in constitutional law cases, focusing primarily upon the decisions of the United States Supreme Court. Emphasis is given to the nature of judicial review, the distribution of governmental power in our federal system, and the Fourteenth Amendment. Topics include the separation of powers, the federal and state commerce authority, implied fundamental rights, and equal protection of law. (4 semester hours)

LAW 160
PROPERTY
Professional
Required for JD. Basic concepts of the law of property are covered through a survey of the holding of wealth and transactions in the family and commercial context, with the attendant public policy limitations on owner control. Specific topics include: concepts of ownership and possession; the divisibility of title; present and future interests; bailments; the landlord-tenant relation; interests in the land of another; recording; gifts; contracts of sale; land financing; public and private control of land use. (4 semester hours)

LAW 170
TORT LAW
Professional
Required for JD. Provides an introduction to the basic theories underlying the American common law system of compensation for injuries to person and property. The major topics covered are intentional torts, negligence, strict liability and damages. (4 semester hours)

LAW 200
NON-PROFIT ORGANIZATIONS
Professional
Focuses on the unique characteristics of non-profit organizations and their similarities to and differences from for-profit corporations with particular attention to the role and purposes on non-profit organizations. (3 semester hours)

LAW 201
ILLINOIS CIVIL PROCEDURE
Professional
An analysis of the Illinois Civil Practice Act and the rules of the Illinois Supreme Court which apply to litigation, emphasizing the Circuit Court of Cook County. (3 semester hours)

LAW 202
EMPLOYMENT DISCRIMINATION
Professional
This course covers the most important Federal laws dealing with discrimination in employment and emphasizes Title VII of the Civil Rights Act of 1964. The course is designed to develop an understanding and recognition of racism and sexism in the context of employment. (3 semester hours)

LAW 140 is a prerequisite for this class.

LAW 204
LAW REVIEW
Professional
Members of the editorial board must enroll for credit. Students perform editorial tasks assigned by the editor-in-chief. Evaluation is pass/fail. Can be taken for a maximum of 2 semesters. Instructor's permission required. (Variable credits)

Status as a JD student is a prerequisite for this class.

LAW 206
SEXUAL ORIENTATION AND THE LAW
Professional
An examination of the legal issues raised by sexual orientation. Beginning with prosecution of sodomy and legal discrimination, including exclusion from military service, and anti-civil rights initiatives. The struggle for gay and lesbian rights will be examined in the context of employment, schools, and domestic relations. (3 semester hours)
LAW 208
HUMAN RIGHTS PRACTICUM: CHIAPAS
Professional
A seven-week program during spring semester concluding with ten days of travel to Chiapas, Mexico, in which students learn about and meet with human rights and indigenous leaders and explore Mexican politics, legal environment, history, and culture, as well as the inter-American legal system, all within a human rights framework. Spanish speakers can additionally apply for a summer-long internship to begin after participation in the practicum.

LAW 210
FEDERAL INCOME TAXATION
Professional
Required for Certificate in Taxation unless student takes LAW 212. Provides a study of tax law as it relates to the individual. Emphasis is placed on statutory materials, regulations, rulings and judicial decisions. Special consideration is given to the concept of gross income, adjusted gross income, deductions and gains. (3 semester hours)

LAW 212
FEDERAL INCOME TAXATION AND FEDERAL POLICY
Professional
Required for Certificate in Taxation unless student takes LAW 210. Examines the economic and government policy context out of which tax laws arise, and ethical issues in tax practice, as well as substantive tax law. Designed for those who have never studied taxation. Examines how Congress uses its revenue power to shape the economy as a whole and to implement its philosophy of taxation. (4 semester hours)

LAW 213
DOMESTIC VIOLENCE PRACTICUM
Professional
This course will examine the criminal system response to domestic violence, focusing on the transformation of laws and institutions to address a problem historically conceptualized as “private.” Topics will include: barriers to victim cooperation and law enforcement; law and policies governing mandatory arrest and prosecution; marital rape; battering during pregnancy; battered women who kill; expert testimony on battered woman syndrome; child protection concerns; evidentiary issues arising in domestic violence trials; anti-stalking legislation; civil/criminal protective order practice; and recent US Supreme Court decisions impacting domestic violence. Course includes regularly scheduled participation in the DePaul Law Student Project at the Domestic Violence Court. (3 semester hours)

LAW 217
JOURNAL FOR SOCIAL JUSTICE
Professional
The Journal for Social Justice will address areas of public interest. Members of the editorial board must enroll in this course for credit. Students enrolled are expected to perform editorial tasks. Evaluation of student work is pass/fail. (Variable credits)

LAW 218
TAXATION OF STRUCTURED REAL ESTATE TRANSACTIONS
Professional
This course will provide an introductory overview of the primary tax considerations involved in structured real estate transactions, including: an analysis of the effect of income taxes on real estate transactions; a comparison of the various structures used for the ownership and development of real estate; a review of section 1031 like-kind exchange driven real estate syndications; alternative financing techniques such as sale-leaseback transactions; REIT; and inbound and outbound real estate investments. (3 semester hours)

LAW 210 or LAW 212 is a prerequisite for this class.

LAW 220
ADVANCED CIVIL PROCEDURE
Professional
This course will explore topics beyond the introductory civil procedure course including class actions, mass torts, multi-party litigation and other problems associated with complex litigation. (3 semester hours)
LAW 221
INTERNATIONAL LAW OF WEAPONS CONTROL
Professional
This course focuses on the development and implementation of international law governing the use of weapons. It provides a broad overview of the role of weapons controls in international humanitarian law and the law of armed conflict. Topics include nuclear weapons proliferation; the use and threat of chemical weapons; bioterrorism; and international weapons trafficking. Students will gain an appreciation of how the challenge of controlling weapons fits within and has helped design broad currents of international law. The course's objective is to enrich students' perspective on the operation of international law generally. (3 semester hours)

LAW 222
DERIVATIVES FOR ATTORNEYS
Professional
Derivatives are one of the fastest growing yet least understood vehicles in the financial industry. This two-day, one-credit seminar is a comprehensive introduction to derivative products and the application of derivative tools and skills needed to value and understand equities, equity options, futures and options on futures. Upon completing the course each student will have the ability to analyze and interpret options strategies; complete transactions involving various underlying commodities, equity, agricultural, interest rate and ETFs; understand why individuals and business use derivatives as a means of reducing risk; and understand the role regulators play in the derivatives industry. This course will provide an understanding of complex financial instruments and bring this knowledge to a practical level. (1 semester hour)

LAW 223
JOURNAL OF WOMEN GENDER & THE LAW
Professional
The Journal of Women, Gender & the Law is a student-run publication committed to advancing, domestically and internationally, the legal rights of women and those implicating the role of gender. (2 semester hours)

LAW 224
ASP TA
Professional
ASP Teaching Assistants work with the Director of Academic Support to provide academic assistance to first-year law students. ASP teaching assistants: (1) conduct weekly, scheduled office hours in the ASP office; (2) assist in at least four of 23 ASP workshops throughout the semester (offering supplemental comments, answering student questions, and occasionally giving mini-presentations); (3) meet with and assist the Director in presenting workshops; (4) are available to answer student questions via email or in individual conferences outside their regular office hours. To obtain two credits, in addition to the foregoing duties, the TA prepares and schedules one to two 90-minute open Q&A sessions for 1Ls on subjects in which the TA excelled. Permission required. (variable credit)

LAW 225
ADVANCED ISSUES IN REAL ESTATE TRANSACTIONS
Professional
This course will cover advanced residential and commercial real estate theory and practice. Special emphasis will be placed on legal and business issues affecting building design and construction; condominium development and conversion; property management; distressed sales, loans, and workouts; negotiation of sales and leases in a difficult market; green leases and construction; and advanced tax saving devices, such as preservation through conservation easements and section 1031 Exchanges of real estate property. (3 semester hours)

LAW 226
TRADE SECRET LAW
Professional
This course will examine the law of trade secrets as well as the theories and policies underlying trade secret law. (2 semester hours)

LAW 227
CHILDREN'S HUMAN RIGHTS UNDER INTERNATIONAL LAW
Professional
This course investigates children's rights as they exist under the current international human rights law regime. The course is centered around the United Nations Convention on the Rights of the Child (CRC) and the rights enshrined within the treaty. Specific human rights violations to be addressed include: the use of child soldiers, children in the detention system and trafficking of children. (3 semester hours)
LAW 230
UNITED STATES FOREIGN RELATIONS LAW
Professional
This course will provide an overview of the extensive body of law that regulates the authority of the federal government in the areas of foreign affairs and the making of foreign policy. This body of law includes the US Constitution, congressional statutes, key executive orders, federal court decisions, and applicable rules deriving from treaties and customary international law. The course examines in detail the interaction of the Constitution with the foreign policy powers of the Congress and the President, and the ways in which doctrines of the separation of powers have shaped the allotment of legal authority among the three branches of government in US foreign relations. (3 semester hours)

LAW 231
COMMERCIAL LAW SURVEY
Professional
This course provides a survey of the Uniform Commercial Code, with emphasis on the provisions dealing with sales, payment systems and negotiable instruments. It principally addresses UCC Articles 1-4 as well as related federal regulations and other materials. This course does not cover Secured Transactions, which are discussed in a separate course. If you have already taken both Sales and Commercial Paper you may not take this course. (4 semester hours)

LAW 232
CATHOLIC SOCIAL JUSTICE & THE LAW
Professional
This course introduces students to the foundation and structure of Catholic Social Teachings and asks: how (if at all) is this relevant to American legal theory, practice and public discourse? Topics considered will include, among others: economic justice, natural law, religious freedom, death penalty, war, abortion and gay marriage. At the conclusion, students will have a greater knowledge and understanding of the Catholic social ethical system and increased abilities to communicate, apply and critique other theories and institutions of social justice. (3 semester hours)

LAW 234
INTERNATIONAL AIRCRAFT FINANCING LAW
Professional
This course will examine the law of transnational aircraft financing arrangements, with an emphasis on those characteristics that are unique to the aircraft market and distinct from the material covered in general sales and secured transactions courses. The course will cover a broad range of securitization and leasing options, and the government’s role in aircraft financing, including subsidization and export credit agencies. (3 semester hours)

LAW 235
UNMANNED AIRCRAFT SYSTEMS
Professional
This course will cover a broad range of topics relating to domestic and international operations of remotely piloted aircraft, including the procedural issues that arise from the creation of a new body of federal regulations, a comparative analysis of domestic and international substantive matters (civil liability and government liability), domestic and international regulatory systems, investigation and enforcement process, a comparison of domestic and international export controls, national security and trade law, and examination of multinational issues arising out of the relationship between aviation and maritime law. It will also examine the Federal Tort Claims Act, the government’s obligation to provide Air Traffic Control services, aircraft and pilot certification, inspection, and operational authorizations. Finally, the course will examine the issue of personal privacy, the influence of the First and Fourth Amendments, nuisance laws, and the controversial topic of targeted killings by the government’s deployment of weaponized drones and the implications of the Geneva Convention. (3 semester hours)

LAW 236
JOURNAL OF SPORTS LAW AND CONTEMPORARY PROBLEMS
Professional
The Journal of Sports Law and Contemporary Problems will address issues regarding athletes, student-athletes and the overall climate in professional and amateur sports. The Journal will delve into matters of sports and culture, sports and society, sports and academics and sports and the law.
LAW 243
BUSINESS FUNDAMENTALS FOR LAWYERS
Professional
This course is designed to provide students with an overview of business concepts. Topics will include analyzing corporate financial statements; corporate valuation; debt and equity instruments; capital markets; basics of real estate finance and development; start-ups; and managing business deals. The goal is to help students communicate effectively with business clients, understand the business model, and function effectively in a business environment. The course is designed for students with little or no business background. Students who have taken more than one accounting course are ineligible to enroll in the course. (2 semester hours)

LAW 246
PATENT & TRADEMARK SEARCHING
Professional
This course will be a one-semester, six session course that will cover the technical aspects of in-depth searching on open Web sources for sufficient background information in anticipation of filing for patent and trademark protection. (1 semester hour)

LAW 247
PUBLIC INTERNATIONAL AVIATION LAW & POLICY
Professional
This course will explore the laws, regulations, and policy choices affecting the complex world of global air transport. The course will consider topics relating to aviation safety and security, capital investment, labor relations, airport ownership and operations, economic regulation. Assessment will be by a take home final examination. (3 semester hours)

LAW 248
PRIVATE INTERNATIONAL AVIATION LAW
Professional
This course will examine the international legal regime that governs air carrier liability and the unification of private international aviation law through the adoption of international conventions. The course will review liabilities of air carriers toward passengers and shippers under the Warsaw Convention and the Montreal Convention, and will examine the basic framework of the Rome Convention on third-party surface liability, and two treaties promulgated to replace the Rome Convention: the Unlawful Interference Convention and the Ground Damage Convention. Manufacturers' liability will also be reviewed, as well the international regime for aircraft financing established by the Cape Town Convention/Aircraft Protocol. (3 semester hours)

LAW 250
SENIOR RESEARCH SEMINAR
Professional
Senior Research Seminars are discussion-based, writing-intensive courses offered on a variety of different specialized subjects each semester. Students are expected to engage in original writing and research on a topic relating to the course and to produce a major written product or products. Students will receive individualized feedback from the instructor. Enrollment is limited to 20 students.

LAW 252
BAR PASSAGE STRATEGIES
Professional
This course will address techniques for answering questions on bar examinations, which differ significantly from law school finals. Students will practice writing answers for each bar exam component (essay, multiple choice and performance) and receive feedback in writing and in individual conferences. (2 semester hours)

LAW 253
MULTISTATE PERFORMANCE TEST STRATEGIES
Professional
MPT Strategies focuses on developing skills needed for The Multistate Performance Test, the document-drafting component of the bar exam. Students will learn to develop a systematic strategy for tackling the MPT and perfect it through practice. Skills include processing the task memo, Library, and File and drafting the document responsive to the task, efficiently and under time pressure.

LAW 112 and LAW 119 are prerequisites for this class.
LAW 258
WOMEN’S HUMAN RIGHTS UNDER INTERNATIONAL LAW
Professional
This course investigates women's rights as they exist within the current international human rights law regime. The course is centered around the Convention on the Elimination of all Forms of Discrimination Against Women (CEDAW) and the rights enshrined within the treaty. Specific human rights violations to be addressed include violence against women, human trafficking, forced marriage, and female genital mutilation. (3 semester hours)

LAW 260
INTERNATIONAL LAW THESIS
Professional
The Thesis is an independent research project on a topic of international law and/or policy under the supervision of a full-time faculty member. The student must produce an in-depth paper of publishable quality, 55-90 pages in length.

LAW 263
FIDUCIARY LAW
Professional
This course provides an introduction to fiduciary law, including core principles as they relate to the law of agency, partnerships, corporations, trusts, guardianships and professional relationships. On the public law side, topics covered will include the law governing public guardianships, public administration of private property, public administration of natural resources, and fiduciary obligations toward First-Nations. Topics will also include questions related to fiduciary status, the distinctive remedies prominent in fiduciary law, and the characteristic duties owed by fiduciaries toward their beneficiaries. (3 semester hours)

LAW 271
TRADEMARK & UNFAIR COMPETITION LAW
Professional
This course will be a substantive and procedural discussion of the creation and enforcement of trademark rights and the rights conferred by statutory and common law under the general rubric of unfair competition law. Topics may include trademark law (including dilution), misappropriation of trade values and trade secrets, regulation of false and deceptive advertising, interference with contracts and trade relations and the right of publicity. (3 semester hours)

LAW 277
GUN VIOLENCE-LEGAL ISSUES
Professional
This course explores how law attempts to curtail gun violence. The purpose is to train students to practice in domains that are relevant to gun violence, including criminal law and public health. The course will span topics from gun control and the Second Amendment, to civil and criminal liability of gun sellers, to stanching the illicit trafficking of weapons both domestically and internationally, and finally to consideration of United Nations diplomatic efforts to stanch the flow of weapons. What connects all these issues is a focus on how to take guns out of violence and thereby render violence considerably less lethal. (3 semester hours)

LAW 280
INVESTMENT COMPANY REGULATION
Professional
This course will explore the numerous debates and controversies associated with the investment company industry. It will begin by examining the interplay among the multiple pieces of legislation that regulate these structures, such as the Investment Company Act, Investment Advisers Act and the Dodd-Frank Act. It will then investigate political, economic and regulatory compliance issues that arise with respect to both registered and exempt investment companies. The course will incorporate various practical components to introduce students to the basic duties of investment company lawyers in organizing and advising investment companies and their advisers. (3 semester hours)

LAW 286
INTERNATIONAL HUMAN RIGHTS LAW PRACTICUM
Professional
This course is a full year course which provides students with an opportunity to experience the complex and varied approaches to human rights legal advocacy in an international setting. Students will be placed on a project focused on an ongoing human rights violation. Students will work closely with grassroots human rights organizations, international NGOs and U.N. human rights experts and relevant treaty bodies. Students will be expected to devote approximately 10 hours per week to the International Human Rights Law Practicum in addition to time spent in the classroom. (2 semester hours)
LAW 287
ADVANCED INTERNATIONAL HUMAN RIGHTS LAW PRACTICUM
Professional
This course provides students an opportunity to experience the complex and varied approaches to human rights legal advocacy in an international setting. Students will be placed on a project focused on an ongoing human rights violation. Students will work closely with grassroots human rights organizations, international NGOs and United Nations human rights experts and relevant treaty bodies. This course is only open to students who have completed the International Human Rights Law Practicum.

LAW 286 is a prerequisite for this class.

LAW 290
ANATOMY OF A DEAL: FROM INCEPTION TO CLOSING
Professional
This course will provide law students with skills they will need as entry-level transactional lawyers. The focus will be on how to perform due diligence and how to draft resolutions, corporate documents, various closing documents and third-party opinion letters. Students will also study sample agreements that appear in many different types of deals, including commitment papers, indemnities, guaranties, escrows, pledge agreements, and security agreements. (2 semester hours)

LAW 102 and LAW 105 are a prerequisite for this class.

LAW 297
CUSTOMS LAW
Professional
Students will learn the laws and regulations implemented and enforced by U.S. Customs and Border Protection including the determination and collection of customs duties through tariff classification, valuation, and special duty programs. Other areas to be covered are country of origin rules, special classes of merchandise (e.g., art and antiquities, intellectual property, and endangered species), and litigating customs matters. This course provides a useful grounding for anyone interested in corporate compliance or administrative law, as well as for students pursing certificates in intellectual property law, international law, or art and museum law. (3 semester hours)

LAW 298
GENERAL TEACHING ASSISTANT
Professional
A teaching assistant works with a course instructor to provide academic assistance to law students. Teaching assistants may be asked to conduct office hours, meet with and assist the instructor in various tasks, including conducting supplemental research and preparing handouts and other materials for the course, answer student questions via email or in individual conferences, and assist with review sessions or other activities as needed. The number of credit hours allotted will depend on the number of hours of work per week anticipated, as follows: 1 credit hour will be allotted for teaching assistants who will work between 3 and 4 hours per week; 2 credit hours will be allotted for teaching assistants who will work more than 4 hours per week. Permission required. (variable credit)

LAW 300
CORPORATE FINANCE
Professional
Provides a basic analysis of corporate capital structures, dividends and retained earnings, federal policies promoting disclosure and prohibiting fraud, mergers, and acquisitions. (3 semester hours)

LAW 102 is a prerequisite for this class.

LAW 301
SPECIAL TOPICS IN LAW
Professional
This course is a "mini-course" which is taught either one hour a day for two weeks each year or once a week for 5 weeks. The topic changes. (variable credit)

LAW 303
BUSINESS AND COMMERCIAL LAW JOURNAL
Professional
Members of the editorial board must enroll in this course for credit. Students enrolled are expected to perform editorial tasks assigned by the editor-in-chief. Evaluation of student work is pass/fail. (3 semester hours)
LAW 304
SALES
Professional
A survey of the law of sales (principally Article Two of the Uniform Commercial Code) and related Uniform Commercial Code provisions. Emphasis is placed on core concepts, including warranty, buyer and seller remedies and risk of loss. (3 semester hours)

LAW 305
SECURED TRANSACTIONS
Professional
Covers the law of personal property security (principally Articles Nine and Seven of the Uniform Commercial Code) and consumer financing arrangements. Emphasis is given to transactional planning of consumer, equipment, inventory, accounts and warehouse financing arrangements, and the priorities of conflicting legal interests. Provisions of the Federal Consumer Credit Code, usury laws and the Fair Credit Reporting Act are discussed. (3 semester hours)

LAW 307
FACT INVESTIGATIONS
Professional
The general purpose is to learn strategies and methods for effective pretrial fact investigation applicable to a range of legal fields. Topics covered will include the ethics of investigation, organizing information and evidence, formulating an investigative plan, conducting interviews and interview techniques, database/public records research, using the Freedom of Information Act, conducting financial investigations, eyewitness testimony and the science of memory, credibility assessment, expert testimony, analyzing law enforcement reports, internet and social media investigations, employment discrimination investigations, and personal injury investigations. (3 semester hours)

LAW 308
WILLS AND TRUSTS
Professional
A study of trusts, wills and fiduciary administration, including laws of succession, will revocation, trust powers and problems of testamentary and inter vivos gratuitous transfers. (3 semester hours)

LAW 309
ILLINOIS EVIDENCE
Professional
Illinois Evidence is designed to prepare students to practice law in the Illinois courts. The course will cover the Illinois Supreme Court Rules of Evidence, statutory evidence rules, and common law evidence principles, pointing out distinct differences between Illinois evidence law and the Federal Rules of Evidence as applied to civil and criminal proceedings. (2 semester hours)

LAW 312
TRIAL ADVOCACY II
Professional
Covers advanced exercises in the mechanics of trial and trial preparation. Students develop case plans and proof analyses consistent with the theory of the case. During the trial of several simulated cases including a jury trial, students address such complex trial problems as: evidence retrieval in complex litigation, examination of medical and forensic expert witnesses, argument of motions during trial impeachment and instructions conferences. Students conduct detailed witness preparation exercises and voir dire. There is review of litigation technology and use of videotaping of student performances. (3 semester hours)

LAW 410 and LAW 450 are a prerequisite for this class.

LAW 313
JUVENILE JUSTICE
Professional
This course will cover the legal processes for dealing with juvenile crimes and status offenses. (3 semester hours)
LAW 316
AVIATION PRODUCTS LIABILITY
This course focuses on a broad range of topics in domestic and international complex air crash litigation, including jurisdictional and choice of law issues, a comparative analysis of domestic and international substantive matters including strict liability and government liability, the accident investigative process, punitive damages, and transnational issues addressing the relationship between aviation and admiralty/maritime law. It will also examine the Federal Tort Claims Act, the government's role in air traffic control and aircraft inspection, and the General Aviation Revitalization Act. (3 semester hours)

LAW 317
SECURITIES FRAUD
Examines litigation of securities fraud by private plaintiffs including shareholder class actions. Also reviews the role of SEC enforcement actions and criminal liability as a means to address this issue. Topics will include Sec. 10(b) of the Securities Exchange Act and Rule 10b-5; proxy fraud; tender offer fraud; and the impact of the Sarbanes Oxley Act. (3 semester hours)

LAW 319
LITIGATION STRATEGY: PRE-TRIAL, CRIMINAL
Offers comprehensive treatment of the key problems encountered in the pretrial stages of the criminal case, including fact investigation, motions to suppress evidence, plea negotiations, preliminary hearings, arraignment, and pretrial conferences. Students conduct simulated pretrial motions, client interviews, fact investigations, counseling, negotiating and settlement sessions. Simulated depositions and motions are argued, as well as simulated pretrial conferences conducted during class. (3 semester hours)

LAW 321
ADOPTION LAW
This course will explore issues related to adoption law. The course content will include the historical background of the American law of adoption, adoption procedure, parental consent to adoption, voluntary and involuntary termination of parental rights, choosing adoptive families, the Indian Child Welfare Act, race and sexual orientation issues in adoption, international and interstate adoption, and wrongful adoptions. (3 semester hours)

LAW 322
INTRODUCTION TO AMERICAN LAW AND LEGAL SYSTEMS
This course introduces students to the foundations of American law and legal practice. Students will study the structures and composition of American government institutions, the methods of legal reasoning and argument in a common law system, and the culture of legal practice. Students will also receive introductions to various areas of American legal practice, including business and commercial law, civil and criminal procedure, and administrative law. Enrollment is limited to students in the LLM and MJ programs.

LAW 323
CHILD PROTECTION: ABUSE & NEGLECT
This course deals with the legal processes for dealing with child abuse and neglect. (3 semester hours)

LAW 327
PRISON LAW
This course serves as an introduction to prison law and prisoner rights law. The course explores prison management issues, the Prison Litigation Reform Act and the application of the First and Eighth Amendments to prisons. Students will also visit a prison as part of the course. (3 semester hours)
LAW 328
DATA BREACH NOTIFICATION LAWS
Professional
This course introduces students to state and federal data breach notification laws and the policies and procedures surrounding those laws. Students will learn about the requirements placed on corporations and other institutions to notify customers in case of breach. They will become familiar with the process for providing notice. The course is especially useful for students interested in corporate law, health law, intellectual property, and in matters of technology, privacy and data security in the legal sphere. (2 semester hours)

LAW 333
MUSIC LAW
Professional
This course deals with issues relating to the organization and operation of the music industry. The course covers the principal statutes governing the industry and considers issues relating to the interests of both artists and recording companies. (3 semester hours)

LAW 335
PRIVACY LAW
Professional
This course introduces and surveys the legal framework pertaining to privacy in the United States, including constitutional, statutory and common law, as it applies to various sectors of society. Topics include privacy and the media, health privacy, privacy of electronic communications, privacy and national security, and privacy in relationships and decision making. (3 semester hours)

LAW 336
JOURNAL OF ART TECHNOLOGY & INTELLECTUAL PROPERTY EDITORIAL BOARD
Professional
Members of the editorial board must enroll in this course for credit. Students enrolled are expected to perform editorial tasks assigned by the editor-in-chief and are expected to supervise the student writing staff. Pass/fail only. (2 semester hours)

LAW 337
BIOTECHNOLOGY PATENT STRATEGIES FOR THE NEW MILLENNIUM
Professional
Designed for students with an interest in the biotechnology aspect of patent law. Covers enablement, utility, claim drafting, means plus function language, obviousness, and the patentability of nucleic acid sequence and expressed sequence stages. (3 semester hours)

LAW 338
INTELLECTUAL PROPERTY FOR CORPORATE TRANSACTIONAL LAWYERS
Professional
For students interested primarily in a corporate practice. Focuses on issues a corporate practitioner should be aware of regarding transactions involving the transfer of intellectual property assets or technology, such as the sale and licensing of intellectual property generally, licensing software, Internet law, advertising clearance and litigation. (3 semester hours)

LAW 341
INTERNET LAW
Professional
This course provides a survey of selected topics in the rapidly evolving area of law applied to cyberspace and the internet. The course touches upon numerous areas of substantive law such as intellectual property, torts, jurisdiction, and privacy and the First Amendment, explores how courts have applied the law to the internet, and raises the important policy questions underlying the application of law to this new medium. (3 semester hours)

LAW 344
COPYRIGHT LAW
Professional
This course will provide an in-depth study of the theory and application of copyright law. Subjects include copyright history and theory, the Digital Millennium Copyright Act, renewal and reversion, ownership issues, and a study of the interface between the economic aspects of copyright and the personal interests of authors. (3 semester hours)
LAW 345  
LEGAL CLINIC SUMMER  
Professional  
Students work in one of the clinic modules under the supervision of a clinical attorney concentrating on real life problems with real clients and organizations. Instructor's permission required. (3 semester hours)

LAW 347  
COMPARATIVE CONSTITUTIONALISM  
Professional  
The course explores the key principles of constitutionalism (such as separation of powers, limited government, the rule of law, independence of the judiciary, judicial review and legal protection for human rights) in comparative perspective and takes up the following questions: How is it that some constitutional systems manage successfully to respect these principles while others do not? Why is it that some systems, despite paper guarantees of constitutionalism, are more susceptible to military coups than others, with serious consequences for human rights? Even in countries such as the US, Canada and the UK, do the constitutional arrangements always live up to their best intentions, notably when presented with threats to national security? What is the relevance of and need of international institutions in protecting constitutionalism? (3 semester hours)

LAW 348  
MERGERS AND ACQUISITIONS  
Professional  
Aspects of business entities involved in a merger, consolidation, acquisition and other forms of combination. Examines business, financial, personal and real property, employment relations, labor, taxation, and environmental issues. Also analyzes the tax consequences of the particular form of combination. (3 semester hours)

LAW 349  
INTERNATIONAL TRADE LAW  
Professional  
An introduction to the regulatory structure of global economic relations, focusing on the theoretical and substantive foundations of multilateral systems such as the IMF, GATT, NAFTA and the European common market. The course also analyzes the legal and constitutional framework for the treatment of international trade questions in the US, the European Union and Japan, and explores how this framework accommodates selected issues of global trade policy. (3 semester hours)

LAW 356  
DISPUTE RESOLUTION  
Professional  
Gives students the means to evaluate critically dispute resolution processes as a basis for counseling clients in the selection of and participation in a process appropriate for the resolution of a particular dispute. Students, who are divided into teams, alternate the roles of attorney and client, attempt to resolve a complex civil case utilizing three dispute resolution processes: pre-trial conference, medication and arbitration. Each team works with two associates from a financial consulting or an accounting firm who are their expert witnesses to prepare for and participate in these processes. Lawyers, professional mediators and professional arbitrators act as the neutrals in the three processes. From year to year, different substantive areas are the focus of the problem, and Intellectual Property is one of the problems. (3 semester hours)

LAW 357  
ENTERTAINMENT LAW  
Professional  
Focuses on various aspects of entertainment law practice including performance contracts, managers and agents, recording and publishing agreements and music licensing. (3 semester hours)
LAW 358
EMPLOYEE BENEFITS
Professional
The law of employee benefits affects almost every employer and employee in the country and is at the heart of an ongoing national debate about how best to structure and deliver retirement and healthcare benefits. This course provides a broad survey of the legal framework and public policies underlying retirement, health and welfare, and executive compensation benefit plans, specifically incorporating the Employee Retirement Income Security Act of 1974 (ERISA), the Internal Revenue Code, and the Patient Protection and Affordable Care Act. The course will be helpful not only for students interested in pursuing a career in employee benefits law, but also for students interested in general corporate law, ERISA and employment law litigation, tax law, investment fund management, and public policy issues more generally. (3 semester hours)

LAW 359
EMPLOYMENT LAW
Professional
Examines issues in workplaces that are not governed by collective bargaining, such as hiring, wrongful termination, workplace privacy and defamation, protection against harassment, employees’ legal obligations to employers. (3 semester hours)

LAW 363
RESTORATIVE JUSTICE
Professional
A skills-based course designed to introduce students to restorative justice theory and practice in the context of family law and family dynamics. During the course, the students will gain exposure to, and experience with, the circle process, a form of dialogue that brings people together to discuss difficult or complicated issues in a respectful and meaningful manner. Through simulations and hands-on practice, the students will also experience facilitating (keeping) a circle to help prepare them to co-facilitate circle processes for families referred by the Parentage and Child Support Court in the future. (3 semester hours)

LAW 367
ANIMAL LAW
Professional
This course will offer a comprehensive examination of the rights afforded to animals as well as a look at the application and enforcement of those rights. Topics will include a history of animal rights, legislation, case law, ethics, lobbying and a discussion of issues confronting major lobbying and activist organizations. Constitutional, land use planning, international and environmental law issues will also be presented. The course will be taught through lecture and extensive class discussion including case and regulation analysis. (3 semester hours)

LAW 369
LITIGATION LAB
Professional
The course is a practicum in which students will work with practitioners on actual cases, under the supervision of the instructor. The Lab is designed to expose and involve students in the planning and development of various aspects of litigation practice in sophisticated cases. (3 semester hours)

LAW 410 is a prerequisite for this class.

LAW 372
ELECTION LAW
Professional
This course will explore the intersection of law and the political process. Topics covered may include campaign finance law, redistricting, racial and partisan gerrymandering, ballot access laws, the Voting Rights Act of 1965, modern barriers to voting, and the regulation of political parties. (3 semester hours)

LAW 374
HEALTH LAW COLLOQUIUM (CHICAGO)
Professional
DePaul and Loyola law schools jointly sponsor the Chicago Health Law Colloquium. Nationally renowned health law scholars come to Chicago to present and discuss their current research projects before a select group of students and faculty. Enrolled students from the two participating schools read and discuss the draft articles, write brief reaction papers commenting on the drafts, and then the scholars present their work to the students. The discussions are focused on helping the scholars to refine and improve their articles. A strong foundation in health law is expected. (1 semester hour)
LAW 376
POLICING SPECIAL POPULATIONS
Professional
This course reviews the law and policy considerations relating to policing certain special segments of the population. Specifically, the course introduces the unique legal issues relating to policing juveniles, individuals with mental health issues or disabilities, and parties in domestic violence cases. The course will provide greater understanding of best practices for investigating, interviewing, and processing these populations and will draw on case studies relating to policing these groups.

Status as a Master of Jurisprudence student is a prerequisite for this class.

LAW 377
POLICING IN THE 21ST CENTURY: LAW, COMPLIANCE AND TECHNOLOGY
Professional
This course reviews current developments in law, compliance, and technology and their impact on modern-day policing. Students will examine constitutional requirements, relevant federal and state statutes and procedures, and best practices that seek to regulate police conduct. This will include a discussion of the rise of investigative and compliance-oriented technologies and the use of specific Department of Justice procedures and related federal civil litigation actions. Students will also explore the potential impact of psychology of policing studies and community-based initiatives.

Status as a Master of Jurisprudence student is a prerequisite for this class.

LAW 380
THE BUSINESS OF LAWYERING
Professional
This course will address topics bearing on the business aspects of the practice of law including the economics of practice, establishing an office, client development, hiring support staff, affiliating with other lawyers, etc. It will be taught in Los Angeles, California over spring break. Students will be responsible for their own transportation and housing. (1 semester hour)

LAW 381
FINANCIAL ASPECTS OF DIVORCE
Professional
This course provides students with an in-depth understanding of the most important financial considerations encountered in the divorce process. The course will cover substantive family law topics as well as issues in corporate and partnership law, federal taxation, and bankruptcy. Students will learn to recognize and address issues in both negotiation and litigation settings, with a focus on practical application of knowledge.

LAW 509 is a prerequisite for this course.

LAW 388
INTERNATIONAL AVIATION LAW MOOT COURT
Professional
The International Air Law Moot Court is organized by the Sarin Memorial Legal Aid Foundation from India and the International Institute of Air and Space Law of Leiden University in the Netherlands (IALI). IALI has contributed to the competition by drafting the legal case used in the competition. The competition will take place in March. (3 semester hours)

LAW 390
POST-CONFLICT JUSTICE
Professional
This class will investigate international law mechanisms for assisting post-conflict communities in restoring justice, renewing peace and transitioning to a stable democratic state in the wake of war or armed conflict. Topics covered include the law’s treatment of war crimes, genocide and crimes against humanity; the operations of the International Criminal Court and other international and national adjudicatory bodies; and the development of international humanitarian law. (variable credit)

LAW 402
ANTITRUST
Professional
Studies the basic federal antitrust statutes which proscribe monopolization, conspiracies to restrain trade, and mergers that unduly tend to concentrate markets. This course also entails a working knowledge of American economic history, familiarity with simple rules of applied microeconomics, and a grasp of strategic commercial behavior. (3 semester hours)
LAW 407
CONFLICT OF LAWS
Professional
Studies the major methodologies and frameworks for the resolution of choice of law problems and jurisdictional conflicts within the federal system. (3 semester hours)

LAW 408
ESTATE AND GIFT TAXATION
Professional
Deals with the effect of federal estate and gift taxes on transfers made during life and at death. All relevant sections of the Internal Revenue Code are studied in detail. (3 semester hours)

LAW 409
ESTATE PLANNING
Professional
Concerned with planning for the transfer of property to younger generations and to charities. Focuses on the techniques for reducing income, estate and gift taxation. (3 semester hours)

LAW 210 or LAW 212 is a prerequisite for this class.

LAW 410
EVIDENCE
Professional
A survey of the rules governing the presentation, admission and exclusion of facts in civil and criminal judicial proceedings, including rules of competency, relevancy, privilege and hearsay. (3 semester hours)

LAW 411
GUIDED RESEARCH
Professional
Students who have earned at least a 2.0 GPA after the completion of at least 31 credit hours may engage in assigned research under the direction and supervision of a full-time faculty member. Graded pass/fail. (variable credit)

LAW 412
FEDERAL COURTS
Professional
Studies the problems, conflicts and accommodations in jurisdiction, procedure and review peculiar to the dual system of federal and state courts. (3 semester hours)

LAW 140 is a prerequisite for this class.

LAW 415
BANKRUPTCY
Professional
A survey of the Federal Bankruptcy Code, including the trustee's power of avoidance, Chapter 13, debtor's right to discharge, federal tax liens and priorities. (3 semester hours)

LAW 417
LABOR LAW
Professional
This course addresses the common law and federal statutes applicable to private sector labor-management relations with an emphasis on organizational matters and negotiations. The course contains the following aspects: statutory interpretation, policy concerns, appropriate practical strategies for both labor and management, social issues and values, ethical issues, advocacy skills, administrative law, critical analysis of decisions, remedies and the relationship of federal labor law to other laws. (3 semester hours)
LAW 419  
LI TIGATION STRATEGY: PRE-TRIAL, CIVIL  
Professional  
Offers a comprehensive treatment of the key problems encountered in the pretrial stages of civil litigation, including drafting of the complaint, case planning, interrogatories and other written discovery and pretrial orders. Students conduct simulated pretrial motions, client interviews, fact investigations, counseling, negotiating, and settlement sessions. Simulated depositions and motions argument, as well as simulated pretrial conferences, are conducted during class session. (variable credit)  
LAW 410 is a prerequisite for this class.

LAW 420  
REAL ESTATE TRANSACTIONS  
Professional  
Explores the basic concepts and documents involved in the inter vivos transfer, financing, development and use of real property. Topics covered include brokers' agreements, condominiums, title assurance, land trusts and closings. (3 semester hours)  
LAW 160 is a prerequisite for this class.

LAW 422  
INTERNATIONAL LAW  
Professional  
Covers the general principles of international relations, including such topics as what is a state, the elements of state responsibility, jurisdiction and nationality, the Law of War, the United Nations and certain international organizations. (3 semester hours)

LAW 423  
REMEDIES  
Professional  
Studies the interplay and choice of remedies (legal and equitable) available in the principal types of contract and tort actions. Damages, the object of an award in contract and in tort, limitations on recovery, the elements of damages, specific performance of contracts, specific relief in tort, injunctions and the specific limitations on their availability, restitution, constructive trusts and equitable liens are included. (3 semester hours)

LAW 427  
APPELLATE TECHNIQUE  
Professional  
Teaches both substantive law relating to appellate practice as well as skills training in appellate advocacy, focusing on: the ability to effectively analyze legal problems, efficiently perform legal research, collect and sort facts, write effectively and orally communicate effectively and persuasively. (2 semester hours)

LAW 428  
INDEPENDENT STUDY  
Professional  
Students who have earned at least a 3.0 GPA after completion of at least 40 credits may undertake independent study under the supervision of a full-time faculty member. The student must produce an in depth research paper of publishable quality on a topic not substantially covered by a currently offered course. Fulfills the Seminar requirements. Instructor's permission required. (3 semester hours)

LAW 429  
LEGAL CLINIC I  
Professional  
Students work in one of the clinic modules under the supervision of a clinical attorney concentrating on real life problems with real clients and organizations. Instructor's permission required. (variable credit)
LAW 432
SECURITIES REGULATION
Professional
Deals with federal and state regulation of the distribution and transaction of investment securities. Problems related to the nature and extent of investor protection under securities legislation are studied. (3 semester hours)

LAW 102 is a prerequisite for this class.

LAW 436
JOURNAL OF HEALTH CARE LAW EDITORIAL BOARD
Professional
If a student is selected to be an editor of the Journal, the student may enroll for two units of credit per semester up to a total of six units of credit. A student is expected to work for four semesters on the publication, but may enroll for credit in any three of the four semesters in which he or she works on the Journal. Pass/fail only. (2 semester hours)

LAW 438
MEDIATION
Professional
Designed for students who seek to understand the application of the zealous representation standard within the mediation process. The course provides students with a basis to evaluate critically when and how to represent clients in mediation. They experience the mediation process through classroom simulations as mediators, attorneys and clients. Through simulated teaching methodology, students focus on effective advocacy in mediation. (3 semester hours)

LAW 441
SPORTS LAW
Professional
A study of the application of various legal doctrines to a broad range of sports-related activities. The course focuses upon many of the legal issues arising in professional sports, including the impact of the antitrust and labor laws and representation of the professional athlete. (3 semester hours)

LAW 444
ENVIRONMENTAL LAW
Professional
A survey of federal and state remedies for the protection of the environment. (3 semester hours)

LAW 447
PATENT LAW
Professional
This course is designed for two types of students: (1) those who intend to practice in the area of patent law specifically; and (2) those who plan to enter into a generalized intellectual property practice. Students explore concepts and selected problems in patent law and examine the impact of policy considerations on patent statutes and jurisdictions. The course covers all substantive aspects of patent law, including patentable subject matter; patent disclosure requirements; patentability requirements; infringement - both literal and under the doctrine of equivalents; defenses; and remedies. (3 semester hours)

LAW 448
INTERNATIONAL BUSINESS TRANSACTIONS
Professional
Examines the foreign law aspects of establishing American business abroad, including international investment and finance relations, and problems posed by treaty, convention and trade practice between the United States and foreign countries. (3 semester hours)

LAW 102 is a prerequisite for this class.
**LAW 449**

**PREDATORY LENDING**

Professional

This course will examine the origins and dimensions of predatory lending, defined as mortgage loan origination fraud and foreclosure rescue fraud. Emphasis will be given to the development of the sub-prime mortgage market, facets of predatory lending and various methods to curb it. This course will include background lectures and discussion, case study and analysis, and written and oral advocacy exercises related to actual cases. (3 semester hours)

**LAW 450**

**TRIAL ADVOCACY I**

Professional

Examines fundamental trial techniques. Students are expected to perform simulated courtroom exercises in voir dire, opening statements, direct and cross-examination, introduction of exhibits, closing arguments, objections and trial motions. Students are also required to prepare trial books and exhibits and to participate in a simulated bench trial. (3 semester hours)

LAW 410 is a prerequisite for this class.

**LAW 453**

**COMMERCIAL ARBITRATION**

Professional

This course is designed to teach students the necessary skills to become effective advocates in the commercial arbitration process. Students develop arbitration skills through role-play exercises, including actual advocacy in simulated arbitrations. Additionally, the course teaches the jurisprudence of commercial arbitration, the evolution of the case law in the field and where arbitration fits within the spectrum of dispute resolution processes. The course also teaches students to critically evaluate the ethical and professional issues in the field of arbitration. (3 semester hours)

**LAW 454**

**INTERNATIONAL INTELLECTUAL PROPERTY**

Professional

Examines the growing importance of intellectual property in the international context. Covers the scope of protection granted trademarks, copyrights and patents in foreign jurisdictions so that effective comparisons can be made between foreign and domestic law. Explores the scope and substance of international treaties. Strategies for obtaining cost effective intellectual property protection in the global economy will be examined. (3 semester hours)

LAW 271, LAW 344, LAW 447 or LAW 489 is a prerequisite for this class.

**LAW 455**

**LEGAL DRAFTING**

Professional

Legal drafting courses on various topics give students an opportunity to hone their research and writing skills on an advanced legal. Students may take one course per semester. All courses are limited enrollment. (3 semester hours)

**LAW 460**

**BUSINESS PLANNING**

Professional

Combines advanced work in business organizations, securities law and federal taxation in the context of business planning and counseling. (3 semester hours)

LAW 210 or LAW 212 is a prerequisite for this class.

**LAW 462**

**INSURANCE LAW**

Professional

Cross listed course for Public Services program. Provides a comprehensive overview of the basic principles of insurance law, including: a review of how the business of insurance has developed to meet contemporary business and consumer needs; the significance of insurance in modern business; and the importance of insurance and insurance law in the practice of law. Reviews the ways in which legislators, regulators and the courts have intervened in the operations of the insurance marketplace; the purposes of such interventions, and whether such purposes have been served. (3 semester hours)
LAW 469
LITIGATION STRATEGY: INTELLECTUAL PROPERTY
Professional
Explores trial advocacy strategies with a focus on intellectual property. Students will develop basic trial advocacy skills in the context of problems exploring the different intellectual property regimes. (3 semester hours)

LAW 470
ADVANCED PATENT LAW
Professional
Required for a Certificate in Intellectual Property with a Patent Specialty. Provides a more practical perspective and application of the doctrines covered in the basic Patent Law course. Among the topics covered are patent searches, claim drafting, re-examination and reissue considerations, design patents, international patents, and licensing. (3 semester hours)

LAW 475 is a prerequisite for this class.

LAW 475
NEGOTIATIONS
Professional
Analyzes and uses problem solving to explore the use of negotiation techniques in the legal setting. (3 semester hours)

LAW 477
FIRST AMENDMENT FREEDOM OF SPEECH
Professional
This is an advanced constitutional course focusing upon First Amendment Freedom of Speech. Topics that will be covered include: the history and philosophy of freedom of speech; speech that incites action; fighting words; libel; obscenity and sexually explicit speech; commercial speech; content-based and content-neutral regulations of speech; vagueness and overbreadth; prior restraints upon speech; freedom of association; the right not to speak; campaign contributions as speech; freedom of association; freedom of the press; and the broadcast media. (3 semester hours)

LAW 479
LAW OF THE EUROPEAN UNION
Professional
This course will cover the institutions and the highlights of the substantive law of the European Community, the largest single trading bloc in the world. (3 semester hours)

LAW 481
LEGAL PROFESSION
Professional
Required for all JD students. Explores the role of the legal profession in American society. Legal education, admission to the bar, organization of the practicing bar, discipline, unauthorized practice, group legal services and other current problems are discussed. (3 semester hours)

LAW 482
INTERNATIONAL PROTECTION OF HUMAN RIGHTS I
Professional
Surveys and analyzes the legal aspects of protecting human rights through international action. Relevant treaties, conventions and international practices are discussed. (3 semester hours)

LAW 487
HOUSING LAW
Professional
An examination of local and federal laws and policies aimed at creating and preserving housing, low-income and affordable housing, both rental and owner-occupied. Includes consideration of housing-related litigation and issues related to subsidized housing, landlord-tenant court, fair housing, and predatory mortgage lending. (3 semester hours)
An analysis of the various legal devices by which private individuals and the public attempt to control the use of land resources. Such topics as private covenants, zoning, the master plan, eminent domain, urban rehabilitation and subdivision controls are explored. (3 semester hours)

LAW 490
STATE CONSTITUTIONAL LAW
Professional
This course examines state court decisions from around the country to illustrate the array of state constitutional issues occurring in modern American law. State constitutions are a source of rights independent of the Federal Constitution and frequently are applied by state courts to grant more expansive protection for individual rights than the Federal Constitution affords. Moreover, state constitutional law, like its federal counterpart, is not limited to issues involving individual rights. Course coverage may include equality, due process of law, criminal procedure, property rights, religion, freedom of speech, school funding, the right to a remedy, the structure of state government, judicial power, and amendment processes. (3 semester hours)

LAW 493
CONSTITUTIONAL LAW: FIRST AMENDMENT RELIGION CLAUSES
Professional
This course explores religious freedom in America under the First Amendment. The focus of the course is on the constitutional doctrines relating to the Free Exercise Clause and the Establishment Clause of the First Amendment, as well as the underlying assumptions and conflicts that have animated First Amendment constitutional argument over time. In addition, the course proposes to examine the extent to which religious interest groups have influence and control the development of religion clause jurisprudence. (3 semester hours)

LAW 495
MEDIA LAW
Professional
Focuses on media law that affects journalism regulation of the media business. Topics include media and first amendment theory; prior restraint, regulation of media business, obscenity, commercial speech, private actions against the media, defamation, privacy and copyright, news-gathering, subpoenas and searches, access to information, and access to judicial proceedings, and broadcasting (content regulation and cable and new technology). (3 semester hours)

LAW 497
CONSUMER PROTECTION
Professional
Surveys the common law and state and federal statutes which protect consumers in various aspects of sales and credit transactions. The course begins with inducements (advertising and marketing techniques), explores financing the deal (credit regulation), substantive contract terms (unconscionability, warranties, and interest rates) and post-transaction problems (debt collection). (3 semester hours)

LAW 498
EDUCATION LAW & POLICY
Professional
Designed to explore some of the principal legal problems arising out of the American educational system. The right to an education, the rights and duties of teachers, and the responsibilities of students and academic freedom are some of the issues discussed. (3 semester hours)
LAW 499
STATE AND LOCAL TAXATION
Professional
Studies the legal problems arising from the imposition of a variety of state and local taxes: real and personal property taxes; franchise; excise; individual and corporate income; sales; use. (3 semester hours)

LAW 501
RACE, RACISM AND UNITED STATES LAW
Professional
Examines the judiciary's approach to racial discrimination from the Colonial period through the Brown v. Board of Education case in 1954. Includes an analysis of the post-Brown status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in affecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Americans, and Chicanos. Through an integrated analysis of the groups' legal histories, the class will foster a comprehensive understanding of race and racism as foundational elements in United States law. (3 semester hours)

LAW 503
CIVIL RIGHTS
Professional
Analyzes selected topics in the civil rights field, with emphasis on the reconstruction amendments to the Constitution and equal protection. Statutory issues will be discussed. Different topics will be chosen for in-depth treatment, such as voting rights, housing, criminal justice administration and education. (3 semester hours)

LAW 506
CRIMINAL LAW
Professional
Required for J.D. students. Provides a survey of the substantive law of crimes and defenses. This course includes a study of specific crimes, elements of criminal liability, and the purposes of punishment. (3 semester hours)

LAW 507
FEDERAL CRIMINAL LAW
Professional
Examines criminal enforcement resources, the Racketeer Influenced and Corrupt Organizations (RICO) statute, mail fraud, drug enforcement, criminal tax issues, criminal civil rights, obstruction of justice, fugitive felons and other aspects of federal criminal system. (3 semester hours)

LAW 508
ADMINISTRATIVE LAW
Professional
Reviews the powers and procedures of federal, state and local administrative bodies as they affect private parties, including administrative jurisdiction, adjudication, rulemaking, methods of decision, rules of evidence and judicial review. (3 semester hours)

LAW 509
FAMILY LAW
Professional
Provides an introduction to the creation and governance of family relationships, including such topics as marriage, divorce, adoption, neglect, conciliation, parentage proceedings, child custody problems, domestic violence, duty to support and property rights vis-a-vis members of the family unit. (3 semester hours)

LAW 513
INTERNATIONAL CRIMINAL LAW
Professional
Covers problems of public control of criminal activity that cross international boundaries, such as extradition, air piracy, and control of drug traffic. (3 semester hours)
LAW 514
LEGAL CLINIC II
Professional
Students work in one of the clinic modules under the supervision of a clinical attorney concentrating on real life problems with real clients and organizations. Instructor's permission required. (variable credit)

LAW 516
IMMIGRATION LAW AND POLICY
Professional
This course gives students an understanding of the complexities of U.S. immigration law and policy. Topics of discussion include: sources of immigration power; role of the federal courts; methods of admission, including family and employment immigration; grounds of removal; and the acquisition of citizenship. (3 semester hours)

LAW 517
ASYLUM AND REFUGEE LAW AND POLICY
Professional

LAW 518
CRIMINAL PROCEDURE I: INVESTIGATION
Professional
This course provides an overview of the constitutional requirements that affect law enforcement investigative practices and procedures. The course typically includes discussion of searches and seizures, arrests, interrogations and confessions, and the right to counsel. (3 semester hours)

LAW 521
LEGISLATION AND STATUTORY INTERPRETATION
Professional
Surveys the legislative process to lay the groundwork for careful study of the theory and practice of statutory interpretation by courts. Interpretive doctrines, theories and cases will be analyzed in light of their relationship to the intent of the legislature which passed the statute. The course aims to teach students to read statutes closely and to make persuasive arguments for particular statutory interpretations. (3 semester hours)

LAW 523
MISSION-BASED LAWYERING: LEGAL PRACTICE IN THE NON-PROFIT SECTOR
Professional
This is a course focused on preparing law students for eventual work in the non-profit sector as 1) practicing lawyers 2) lawyer-managers and 3) lawyer-board members. The course will provide an initial overview of the law of non-profit organizations, after which the course will take a multi-disciplinary approach to analyzing the legal aspects of working for, or with, non-profit public interest law organizations. (3 semester hours)

LAW 524
FIELD PLACEMENT
Professional
This program is designed to give upper level students practical experience in an externship with a public agency, non-profit organization, member of the judiciary, or for-profit organization, such as a private law firm or in-house counsel for a corporation. Upper level students who have at least 28 credit hours and a GPA of 2.0 may apply to participate. Participants are accepted on a case by case basis. Externships are unpaid. No student can receive more than 3 credit hours per semester and no more than 9 credit hours toward their JD degree if 3 of those credits are earned during a summer placement. Otherwise, students are limited to 6 credit hours total. A placement for 3 credit hours is expected to complete 180 hours of work whereas 120 hours of work is expected for a 2 credit hour placement. (variable credit)

LAW 529
CHILDREN & THE LAW
Professional
(3 semester hours)
LAW 533
PATENT LAW MOOT COURT
Professional
Students will be required to write both an appellee and an appellant brief on a topic related to patent law. Competitions are based on an advanced problem-oriented study in patent law. Selected students must register for the course. Instructor's permission required. (3 semester hours)

LAW 535
ART AND THE LAW
Professional
Focuses on situations concerning legal issues and the arts. Includes the international regimes for copyright protection, comparison of different national copyright systems, and definition and treatment of artists’ (moral) rights in their works. Ethical and legal aspects of international trade in art objects and antiquities, national and international attempts to control such trade, and issues involved in protection of cultural property and cultural resource management, as well as conflicts of law in the recovery of stolen art works. (3 semester hours)

LAW 536
NATIONAL MOOT COURT COMPETITION
Professional
Students who are selected for one of the National Moot Court Teams must register for the course. The competitions are an advanced problem-oriented study of appellate brief writing and oral advocacy. Graded pass/fail. This is a permission required course. (variable credit)

LAW 537
INTERNATIONAL MOOT COURT COMPETITION
Professional
Students who are selected for the International Moot Court Team must register for the course. The competitions are an advanced problem-oriented study of appellate brief writing and oral advocacy. (3 semester hours)

LAW 544
FAMILY LAW AND THE JEWISH TRADITION
Professional
This course will examine the primary issues of Jewish Law affecting women, particularly as they pertain to family law. Among the topics that will be highlighted are marriage, divorce, sexual relations, and child rearing responsibilities. The course will involve an examination of both the classical Jewish law texts on these topics (in English) as well as a discussion of more current positions on the issues covered. Students need not have any background or religious affiliation to take this class. (3 semester hours)

LAW 546
POVERTY LAW
Professional
Provides an overview of poverty law and the legal problems encountered by the poor in our society. The course considers legislative and administrative representation as methods of poverty advocacy, as well as the current trend away from constitutional litigation and toward state responsibility. It considers the legal developments in poverty law including housing, education, family and public benefits. (3 semester hours)

LAW 548
ADVANCED MEDIATION: AS MEDIATOR
Professional
This course builds on the skills learned through the simulated experiences of the basic Mediation course. The course includes three components: specialized training, class sessions and the mediation of small claims cases referred by judges in the Circuit Court of Cook County, Illinois. Students will serve as the Mediator under the supervision of the Center for Conflict Resolution. (3 semester hours)

LAW 438 is a prerequisite for this class.

LAW 551
FOREIGN EXCHANGE: VIENNA, AUSTRIA
Professional
Students enrolled in the DePaul University/Vienna University of Economics and Business (WU) program enroll in Vienna University of Economics and Business law courses under this number for one semester. The exact content depends upon the course in which the student is enrolled. Maximum of 13 credits per semester.
LAW 553
STUDY ABROAD: BERLIN, GERMANY
Professional
This program on Law & Critical Social Justice offers students direct experience working with leading European Union non-governmental organizations on intersectional human rights. It provides an opportunity to consider the development of international law in light of Berlin's significant twentieth century history. (variable credit)

LAW 555
ADVANCED LEGAL RESEARCH
Professional
This course is intended to strengthen student research and legal analysis skills. The course will build upon students' knowledge of source materials, introducing new sources and techniques of research and how best to apply this knowledge to specific legal problems. Also, the cost effectiveness and relative advantages of manual versus electronic research will be explored. All students must have working Lexis and Westlaw passwords and active e-mail accounts. (3 semester hours)

LAW 556
INTRODUCTION TO LEGAL WRITING AND RESEARCH
Professional
This course introduces non-JD students to sources of law, the nature of precedent, legal research, common law and statutory analysis, and the basics of legal writing. Enrollment is limited to students in the LLM and MJ programs. (3 semester hours)

Status as a Master of Laws (LLM) or Master of Jurisprudence (MJ) student is a prerequisite for this class.

LAW 557
CRIMINAL PROCEDURE II: ADJUDICATION
Professional
This course provides an overview of the constitutional constraints on the criminal justice adjudicative process. The course typically includes discussion of the right to counsel and to assistance of counsel, rights relating to pretrial procedures, plea-bargaining, jury trial and jury selection, rights relating to trial, double jeopardy, sentencing, appeals, and habeas corpus. Because distinct and separate issues are covered, Criminal Procedure I: Investigation is not a prerequisite to taking this course though taking them in sequence is encouraged. (3 semester hours)

LAW 559
FOREIGN EXCHANGE: MADRID, SPAIN
Professional
Students enrolled in the DePaul University/Universidad Pontificia Comillas International and European Business Law (MIEBL) program enroll in Universidad Pontificia Comillas law courses under this number. The exact content depends upon the course in which the student is enrolled. Maximum of 15 credits per semester. (variable credit)

LAW 561
COMMUNITY ECONOMIC DEVELOPMENT
Professional
This public interest law course will focus on strategies for developing low-income communities and engage these strategies and organizational forms to change lives. (3 semester hours)

LAW 562
CRIMINAL PROCEDURES FOR POLICE PROFESSIONS
Professional
This course provides an overview of the constitutional requirements that affect law enforcement investigative practices and procedures and the constitutional constraints on the criminal justice adjudicative process. The course is intended to increase the law enforcement professional's knowledge and critical analysis of constitutional due process, equal protection and the criminal justice process. It is organized around the question of how to strike the proper balance between the protection of individual rights and liberties and the interest in the detection, prevention and punishment of crime.
LAW 570
ELECTRONIC DISCOVERY
Professional
This course will provide an in-depth treatment of both the legal and technical aspects of electronic discovery and provide the student with a detailed grounding in the law and application of electronic discovery principles to civil and criminal litigation. The class meets for nine weeks. (2 semester hours)

LAW 580
FOREIGN EXCHANGE: DUBLIN, IRELAND
Professional
Students enrolled in the DePaul University/University College Dublin Cooperative enroll in University College Dublin law courses under this number. The exact content depends upon the course in which the student is enrolled. Maximum of 12 credits per semester.

LAW 583
STUDY ABROAD: MADRID, SPAIN
Professional
This program focuses on European human rights law and European business and commercial law. Director permission required. (variable credit)

LAW 585
STUDY ABROAD: HEREDIA, COSTA RICA
Professional
The program links basic principles of international law with an overview of the Inter-American Human Rights System and with special focus on how human rights ideas, advocacy, and activist strategies have transformed Latin American society and politics. The program facilitates student engagement with important regional human rights advocates and includes visits to key institutions such as the Inter-American Court of Human Rights. (variable credit)

LAW 586
CONSTITUTIONAL TORTS & SECTION 1983
Professional
This course provides an in-depth study of 42 USC sec. 1983, the most widely used statute for protecting civil rights and redressing violations of the constitution. Among the topics covered are the elements and defenses to a cause of action, municipal liability, absolute and qualified immunity for public officials, state action, monetary relief, injunctive remedies, causation, choice of forum, and attorney's fee shifting. (3 semester hours)

LAW 410 is a prerequisite for this class.

LAW 588
STUDY ABROAD: BUENOS AIRES, ARGENTINA
Professional
Legal Dimensions of Doing Business in Latin America introduces students to the basic framework of Latin American law and legal systems, as well as to the key principles of international business law necessary for advising clients doing business in the region. Director permission required. (3 semester hours)

LAW 593
STUDY ABROAD: HAVANA, CUBA
Professional
The course will provide an introduction to Cuba, the evolving Cuban legal system, and the Cuban legal and economic framework regulating foreign investment, trade, and international business transactions. Students will have the opportunity to visit various sites, including law firms, commercial entities, and government offices, to increase their understanding of law and business in Cuba. (2 semester hours)

LAW 595
FOREIGN EXCHANGE: NIJMEGEN, NETHERLANDS
Professional
Students enrolled in the DePaul University/Radboud Universiteit Nijmegen enroll in law courses under this number. The exact content depends upon the course in which the student is enrolled. Maximum of 12 credits per semester. (3 semester hours)
LAW 600  
CORPORATE TAXATION  
Professional  
Required for Certificate in Taxation. Addresses basic tax considerations in the formation, operation and liquidation of corporations. Among the areas covered are the organization of corporations, Subchapter S corporations, property and stock dividends, 306 stock, stock redemptions, liquidations, collapsible corporations, corporate divisions and corporate reorganizations. (3 semester hours)  
LAW 210 or LAW 212 is a prerequisite for this class.

LAW 604  
TAX EXEMPT ORGANIZATIONS  
Professional  
Covers qualification as section 501(c) charitable organizations, rules governing conduct of commercial and political activities of charities, unrelated business income and private foundations. (3 semester hours)

LAW 608  
INTERNATIONAL TAXATION  
Professional  
An introduction to the taxation of income of U.S. citizens, residents and corporations from foreign sources and the income of foreign residents and non-residents from U.S. sources. Topics may include sources of income rules, foreign tax treaties and a survey of the tax treatment of U.S. investments made offshore. (3 semester hours)  
LAW 210 or LAW 212 is a prerequisite for this class.

LAW 620  
PARTNERSHIP TAXATION  
Professional  
Required for LLM in Taxation students. Covers the tax consequences of the formation, operation and liquidation of partnerships, including tax shelters, passive loss rules and newly emerging uses of partnerships. (3 semester hours)  
LAW 210 or LAW 212 is a prerequisite for this class.

LAW 702  
ELDER LAW  
Professional  
Cross-listed course for Public Services program. Deals with the new specialty of elder law. Considering today's demographics, many attorneys will require a knowledge of the unique problems of the aging population. Through statutes, cases and research, students will understand the lawyer's role in counseling the elderly, assess the legal needs of an elderly client and provide counsel as to the available options. (3 semester hours)

LAW 706  
HEALTH POLICY AND THE LAW  
Professional  
Cross-listed course for MBA Health Care Management and Public Services programs. Designed to introduce students to a broad variety of policy issues affecting health care and briefly touch on economics, sociology, antitrust, tort law, administrative law and important questions of national health policy.

LAW 707  
RISK MANAGEMENT AND PATIENT SAFETY  
Professional  
This course offers an overview of basic concepts and principles in risk management and patient safety. Students are introduced to the theories, strategies and tactics of risk management and the roles and responsibilities of professionals working in these disciplines. Topics covered include claims management and disclosure, risk financing, medical and criminal liability in health care management, informed consent, and advances in patient safety. (2 semester hours)
LAW 712
THE PRACTICE OF HEALTH CARE LAW
Professional
This simulation course provides students with substantial experience representing and advising hypothetical clients in various health care settings. Students will gain a concrete understanding of the different types of modern health care entities and providers, the legal issues that they face on a frequent basis, and the relevant governing laws. Students will practice providing advice to hypothetical health care clients and will develop skills in conflict resolution. Students will learn how to draft relevant legal documents, policies, and other deliverables that are common in the health law field.

LAW 714
BIOETHICS & THE LAW
Professional
This course is a survey class, examining issues ranging from drug regulation, clinical trials, assisted reproductive technology, telemedicine, and stem cell development/regulation to the commercialization of the human body. (3 semester hours)

LAW 715
MASTERS ESSAY
Professional
This is a research paper of publishable quality dealing with current subject matter. Students are expected to refine their subject into a topic which can be managed under the supervision of a faculty member. This course is open to LL.M. students only. (variable credit)

LAW 716
DISABILITY LAW
Professional
This course surveys American law as it relates to people with disabilities. Primary focus is on discrimination in employment, government services, public accommodations run by private entities, and housing. The course will also cover topics such as the law of guardianship and income support programs. International perspectives will be included. (3 semester hours)

LAW 718
HEALTH CARE DELIVERY SYSTEMS
Professional
Discusses managed care and other health insurance mechanisms as a means for payment or financing of health care services. An effort will be made to determine the extent to which the developments in this area are an adequate response to the demand for health care reform. Particular attention will be given to legislative responses to managed care in the areas of protection of insureds, limits on treatment or payment, and restrictions on physicians. (3 semester hours)

LAW 719
HEALTH CARE: FRAUD AND ABUSE
Professional
This course will afford the opportunity to study the now-fundamental compliance issues in health care law: anti-kickback/fraud and abuse statues and regulations. The focus will address certain regulations of substantive law as the Federal Government continues to promulgate regulation for the health care industry and as those regulations become more complex, and many regulations stem from similar sources. (3 semester hours)

LAW 720
ANTITRUST ISSUES IN HEALTH CARE
Professional
A foundation in antitrust law and current health care applications. Offers information on the counseling process in complex factual and legal contexts; explores approaches to dealing with government antitrust enforcers and their operation methods and uses examples of complex litigation. (3 semester hours)

LAW 724
MEDICAL MALPRACTICE SURVEY
Professional
Cross-listed course for Public Service program. A survey of medical malpractice law and medical negligence, with emphasis on medical malpractice in Illinois. Topics discussed include evolution of medical malpractice, theories and causes of action, including but not limited to parties, negligence, battery, informed consent, respondeat superior, apparent agency, res ipsa loquitur, hospital corporate negligence, negligent infliction of emotional distress, proximate cause and statute of limitations. (3 semester hours)
LAW 727
HEALTH CARE COMPLIANCE AND REGULATIONS
Professional
This course provides an overview of the common law, statutory and regulatory law impacting the health care industry and will be taught with a focus on compliance. Among subjects covered are: corporate organizations, tax exemption, Medicare, antitrust, fraud and abuse, physician recruitment, integrated delivery systems, corporate compliance, and HIPAA. (3 semester hours)

LAW 728
FOOD AND DRUG LAW
Professional
Cross-listed course for Public Services program. Deals with the development of regulations of food, drug, biologics and blood products, medical devices and cosmetics. Emphasis will be placed on Federal Drug Administration (FDA) enforcement, with some attention to state statutes. FDA practices and procedures are examined in detail. Special attention is given to regulations of human drugs and medical devices. (3 semester hours)

LE 101
INTRODUCTION TO LABOR LEADERSHIP I
Undergraduate
Offers the following courses: Union Writing (6 weeks); Grievance Education (5 weeks) (0 quarter hours)

LE 102
INTRODUCTION TO LABOR LEADERSHIP II
Undergraduate
Topics Covered: Fundamentals of speech; making a speech; labor law research paper; labor law: private sector; union administration; labor law: public sector; parliamentary procedure; how to run a union meeting; class presentation/role play. (0 quarter hours)

LE 201
ADVANCED LABOR LEADERSHIP
Undergraduate
Offers the following courses: Public Speaking, Labor Law and Parliamentary Procedure (11 weeks); Skills for Organizing (6 weeks); Economics for Unions (5 weeks); Labor History (6 weeks); Collective Bargaining and Labor Management Cooperation Theories/Interest-Based Bargaining (15 weeks); Arbitration (6 weeks) (0 quarter hours)

LE 202
ADVANCED LABOR LEADERSHIP II
Undergraduate
Topics covered: Labor in Colonial America; legal issues for unions; the developing labor law; who will organize the unorganized? African Americans: slavery and post-slavery; the Knights of Labor and the American Federation of Labor; the Haymarket incident; the Pullman Strike; Eugene V. Debs and the American Railway Union; warfare in the mine fields; the Textile Strikes of 1909 and 1910; the Triangle Shirtwaist fire; the Homestead Steel Strike; the Progressive Era; the I.W.W.; the Roaring 20's; A. Philip Randolph and the Sleeping Car Porters; agitation and unionization in the 1930's; the Great Depression; NIRA section 7 and the Wagner Act; the CIO; African Americans, women and minorities in the post-war labor movement; labor unions and the Civil Rights Movement. Additional topics covered: Legal rights of Workers under OSHA; the right to refuse dangerous work; what is an MSDS Sheet and how to read it; OSHA 200 logs; labels and placards; health and safety through Collective Bargaining; what is a chemical exposure? Health and safety resources for workers; setting up an internal organizing structure around health and safety issues; monitoring health and safety through union committees; what role has labor played in politics—national, state, and local? The changing role of labor in politics; local politicians/state politicians voting records; how to build a targeted campaign; the role of the AFL-CIO in politics. (0 quarter hours)

LE 203
UNIONS AT WORK I
Undergraduate
Course Components: History, overview and introduction to collective bargaining within the context of power relationships between labor and management (employers), and of power as a tool to negotiate between different or opposing social and economic interests. Specifics include researching the employer; costing out the contract; developing a mobilization structure; preparing for a contract campaign; preparing demands and contract language; dynamics of bargaining and power; collective bargaining simulation; analysis and alternatives to strike; how to get the contract ratified; overview of labor management cooperation; participation and collective bargaining; how to use interest-based bargaining. (0 quarter hours)
LE 204
INTRODUCTION TO LABOR LEADERSHIP IN SPANISH FOR SPANISH SPEAKERS
Undergraduate
This is a course in workers' rights; on the job site, in the union, legal, health and safety, and organizing. (0 quarter hours)

LE 205
HUMAN RESOURCES ESSENTIALS I: HEALTH AND WELFARE PLAN BASICS
Undergraduate
Four class sessions, class objectives: 1. To gain an understanding of the basic principles of plan design, costing and administration 2. To apply this understanding to evaluate proposals for alternative plan designs or revisions to existing plans by comparing design features costs and administrative implications. (0 quarter hours)

LE 206
PUBLIC SECTOR LABOR LAW
Undergraduate
The course will examine the two public sector labor laws in Illinois- the Educational Labor Relations Act and the Illinois Labor Relations Act. Class 1- The history of collective bargaining in the public sector in Illinois; Class 2- Comparing the two labor acts; Class 3- Organizing under the labor acts; Class 4 and 5 Filing Unfair Labor Practice Charges under the labor acts; Class 6- Student papers analyzing important decisions under the labor acts. (0 quarter hours)

LE 207
ADVANCED COLLECTIVE BARGAINING
Undergraduate
This class will teach students how to use excel spread sheets to cost out collective bargaining contracts, make economic presentations in negotiations. Students will also engage in mock negotiations. Prerequisite- Basic Collective Bargaining Class or negotiations experience. All students must have a lap top computer for the class. (0 quarter hours)

LE 208
LABOR LAWS FOR LABOR LEADERS
Undergraduate
This five week class will teach students the basics of several labor laws including Family Medical Leave Act, Occupational Health and Safety Act, Title VII of the 1964 Civil Rights Act, and the American Disability Act. Two classes will be taught on the 1964 Civil Rights Act, one on Sexual Harassment in the work place and one on racial, ethnic and age discrimination. (0 quarter hours)

LE 209
HEALTH CARE STRATEGIES
Undergraduate
Topics to be covered are the health care reform and how the new law impacts health care plans, public employee health care changes, how to use your plan most efficiently, educating employees on health care and the use of in-house clinics.(0 quarter hours)

LE 210
PREPARING FOR NEGOTIATIONS
Undergraduate
This five week course will emphasize drafting contract language: how to use cross-out and underlining and fall-back language. There will specific exercises on writing contract language on subcontracting, definition of grievance, zipper clause, management rights and wrongs. (0 quarter hours)

LE 211
TOUR OF HAYMARKET
Undergraduate
The tour includes the Haymarket sculpture, the court house, the Altgeld statue and the cemetery where the martyrs are buried. (0 quarter hours)
LGQ 150
INTRODUCTION TO LESBIAN, GAY, BISEXUAL, TRANSGENDER, QUEER STUDIES [SSMW]
Undergraduate
This course will focus on defining this emerging field while giving students some perspective on the history and diversity of LGBTQ communities. It will also help prepare students for study in the various fields covered by the electives required for the minor. The course will be taught by faculty from a variety of disciplines and thus undoubtedly shift emphases somewhat with every offering. Topics will include: introduction to and definition of LGBTQ Studies as a field; historical roots of LGBTQ communities in the US and elsewhere; theoretical models of sexuality and gender; contemporary issues in LGBTQ politics and culture.

LGQ 213
INTRODUCTION TO LGBT PSYCHOLOGY
Undergraduate
The purpose of this course is to introduce you to psychological and social issues relevant to lesbian, gay, bisexual, and transgender (LGBT) individuals and communities. You will be exposed to a variety of key psychological concepts including: heterosexism/homophobia, identity development, “coming out,” relationships, families, youth, religion/spirituality, reparative/conversion therapy, diversity, and advocacy. Learning goals for this course include increasing one's understanding of the LGBT community and some of the unique experiences and issues that are experienced by many, but not all, members of the LGBT community. I identify and analyze pertinent psychological concepts relevant to LGBT communities. In addition, this course will provide you with learning experiences that you can use to evaluate your own limitations and strengths in terms of cultural sensitivity in regards to working with LGBT communities, thus improving your competence in working effectively with the LGBT community if you choose to at a later point in life. Cross-listed with PSY 213.

LGQ 236
GAY MEN'S HEALTH MATTERS
Undergraduate
The purpose of this course is to introduce students to health issues relevant to gay men. We will explore effects of minority status, heterosexism and homophobia on gay men's health, including but not limited to STD/HIV/AIDS, substance use and mental health. Students will review epidemiological data, theoretical frameworks, and community-based health promotion approaches in order to gain a broad perspective on risk and resilience factors, health indicators, and strategies for self-care applicable to gay men's health.

LGQ 250
LGQ FRENCH HISTORY: OLD REGIME TO THE PRESENT
Undergraduate
This course studies male and female same-sex affection in France roughly from the Enlightenment through the early twenty-first century. It examines the representations of homosexuality over more than two centuries taking into account a variety of often contradictory images that have been current in French society, representations that range, among males, from the diabolical criminal of the nineteenth century Romantics to today's trend-setting (and all too domesticated) gay male, and, among females, from elegant salon figures to contemporary feminist militants. Special attention is focused on the history of homosexuality since WWII because the French gay and lesbian community's progress since that time is impressive and particularly rich in its implications for the American civil rights struggle. Additional readings from French writers on homosexual themes compliment most of the readings from the textbooks.

LGQ 280
LGBTQ LITERATURE FROM THE ANCIENT WORLD TO THE RENAISSANCE
Undergraduate
This course looks at constructions of queer desire in texts of the Western tradition from ancient Judea, Greece, and Rome through the European Middle Ages and into the English Renaissance. We will also learn to perform “queer readings” on texts that may not at first glance seem all that queer. The course will range across many linguistic and cultural traditions. We will read non-English texts in translation, but we may consult the originals in class and certainly knowledge of an ancient tongue or modern Romance language will be useful (but not required—don’t worry!). As the title implies, the course will proceed historically, but we will be returning throughout to some basic questions: in what sorts of contexts do we find queer resistance to heteronormative assumptions? do some literary genres seem more hospitable than others to representations of queer desire? how do representations of sexuality relate to larger notions of gender and social class? how do the constructions of queer desire we find here differ from modern lesbian and gay identities? This is a great opportunity to think about queer identity while reading and discussing some amazing texts.
LGQ 282
INTRODUCTION TO LGBTQ LITERATURE
Undergraduate
This course is an introduction to LGBTQ literature. It can count as an elective for the LGBTQ Studies minor at DePaul and is approved in the Arts and Literature domain of the Liberal Studies Program. We will use the word "queer" as it has been deployed in recent academic and activist discourse to talk about people whose sexual and/or gender identity does not conform to mainstream definitions. Most of the texts we will read this quarter are interested in various forms of same-sex desire, female-female and male-male, but at the same time we will consider the ways in which sexual identity always implicates gender identity. We will be interested in a number of closely inter-related questions: how can we define "queer literature" and is there a tradition, or history, of queer letters? what are its main characteristics and shared themes? does a writer who identifies as queer automatically produce a queer text? can a straight woman or man write a queer book? how do our primary concerns (sexual/gender identity) intersect with other modes of personal identity such as race and social class?

LGQ 319
QUEER PIONEERS: CULTURE, GENDER, AND POLITICAL ACTIVISM
Undergraduate
This course examines some of the historical roots and contemporary realities of lesbian and gay politics in the United States through the biographies of pioneering individuals whose lives and work shaped an ongoing struggle for civil rights and social justice. Conventional wisdom holds that the modern lesbian and gay movement was born in 1969 with the Stonewall riots in New York City, although recent scholarship traces the movement's roots to the mid-nineteenth and early twentieth centuries. More than thirty years after what began at Stonewall as an angry and disorganized appeal for basic human dignity, lesbians and gays have today begun to enter the mainstream of U.S. politics. Within this context, the biographies of individuals who, as activists and artists, rose to challenge the conventions of culture, gender, and political exclusion will be studied in-depth to both illuminate the politics of social movement and suggest how these diverse individuals and experiences may influence present and future efforts for cultural and political change. This course fulfills an elective in the WMS, AMS, or PSC majors, an elective in the LGQ minor.

LGQ 332
CREATING CHANGE: CONTEMPORARY GLBT POLITICS
Undergraduate
This course explores the historical roots and contemporary realities of gay, lesbian, bisexual and transgendered (GLBT) politics, nationally and internationally. GLBT groups and individuals are gaining political recognition, challenging institutions, and creating change by asserting claims to rights and protections under law. Such issues as hate crimes, marriage, AIDS, and ballot initiatives over non-discrimination law and policy have entered the political mainstream since the 1970's. This course examines the GLBT movement, its political and social strategies, conflicts and issues, and the political roles played by its members as participants in political culture. Cross-listed with WGS 332 & PSC 312.

LGQ 338
SEXUAL JUSTICE: LESBIANS, GAYS AND THE LAW
Undergraduate
This course examines the historical and contemporary relationships between lesbians, gays, and the law in the U.S., focusing on the intersections of power, sexuality, and identity with issues of sexuality-based discrimination. It focuses on case law, along with social science and legal literature, seeking out a diversity of voices and experiences. Primary emphasis will be on cases that have come before the U.S. Supreme Court since the mid-1950's, with particular attention paid to how groups and individuals have reached out to the court system for redress of injustice and how these groups and individuals have exercised or failed to exercise power within the legal process. The U.S. legal system has reflected a complex set of social and institutional arrangements with regard to sexuality. This course explores the evolution and current construction of these arrangements, how power is allocated and adjudicated, and how law may be used to resist and dismantle pervasive discrimination. Cross-listed with WGS 338.

LGQ 362
INTRODUCTION TO TRANSGENDER STUDIES
Undergraduate
This class explores the interplay of political, social, economic and aesthetic factors in feminist autobiography from a transnational perspective. We examine the ways that women's autobiography is being used to write themselves into history. Story is integral in the process of healing and building solidarity and coalitions for gender based organizing. Further, autobiography creates a space for the "alter-history" to be told: the absence of testimony and experience is created for others to gain hope, strength, and deeper understanding of others and themselves. Various forms and critiques of feminist autobiographies are explored, and how each impacts the political possibilities for readers. Cross-listed with WGS 362.
LGQ 388
QUEER THEORY: AN INTRODUCTION
Undergraduate

This course will look at some of the central texts of queer theory, tracing its ambivalent relationship to the "normal" ideals of mainstream culture. We will begin by discussing current issues of normativity as it relates to gay and lesbian assimilation. We will then look at theories of embodiment, sexual identity, and power, consider the relationship of gender to sexuality, and finally, look at surgical sex reassignment and debates around the politics of intersex and transgender identity. Requirements: class presentation, several short response papers, longer final paper. The authors we will be reading include Michel Foucault, Judith Butler, Eve Sedgwick, Audre Lorde, Sigmund Freud, Anne Fausto-Sterling, and Michael Warner. Topics will include historicizing queerness, butch/femme, the politics of camp, and the transgender and intersex movements. Cross-listed with WGS 388.

LGQ 397
SPECIAL TOPICS IN LGBTQ STUDIES
Undergraduate

See course schedule for current offerings.

LGQ 399
INDEPENDENT STUDY
Undergraduate

Variable credit.

LL 60
PROFICIENCY EXAMINATION FEE ASSESSMENT
Undergraduate

Proficiency Examination Fee Assessment (0 quarter hours)

LL 102
LEARNING ASSESSMENT SEMINAR
Undergraduate

Learning Assessment Seminar is the first of the required courses in the Lifelong Learning Area and designed to help students make educational decisions in the context of their educational and personal goals, become well-versed in SNL's philosophy and competence framework, and make concrete plans for completion of their degree. (2 quarter hours)

LL 103
INDEPENDENT LEARNING SEMINAR
Undergraduate

Students will analyze prior experience and identify ways it applies to requirements for competence. Through this process, they will develop the ability to report learning that advances them as SNL students and also applies to their continuing career progress. Students will complete the course able to present for credit prior or current independent learning. This course satisfies a residency requirement. Competence: L1 (2 quarter hours)

LL 125
SOCIAL MEDIA FOR SOCIAL CHANGE
Undergraduate

Can we change the world with Social Media? Others already have. Let's see what's been done and take action for our own communities. #SMSCSnITrending topics on Twitter and other social media sites might seem short lived, but the effectiveness of movements like the Arab Spring, Occupy Wall Street and Black Lives Matters illustrate how social media can be used to raise social consciousness and enact social change. Activists, politicians, and concerned individuals increasingly utilize social media tools to facilitate social and political change. In this class, we will explore contemporary civic engagement as it happens on social media. We will look at how social media facilitates messages and organization of different social movements. We will analyze how these movements have been effective and how they have been ineffective. Ultimately, we will design and implement a social media plan to raise social awareness for a social issue emerging from our own communities (2 quarter hours)
LL 140  
WRITING WORKSHOP  
Undergraduate  
The Writing Workshop will help students be more confident, efficient, and effective writers through individualized support from a writing instructor. Each student will choose at least one academic writing project to draft in the course and will work with the instructor to accomplish this goal using a structured writing process. If it fits in their plan, students may use the Writing Workshop to work on papers for competence in other courses or through the ILP process. Depending on the competence(s) chosen, the student will complete writing assignments in the field of arts and ideas, human community, scientific world, or the student's focus area. (2 quarter hours)

LL 145  
INTENSIVE COLLEGE WRITING  
Undergraduate  
This course is held over two consecutive quarters, and requires two separate registrations. It is designed for students who need substantial enhancement of their writing skills before progressing further in the program. The course will review the fundamentals of college level writing with the goal of students being able to write clearly and fluently. (2 quarter hours)

LL 146  
INTENSIVE COLLEGE WRITING II  
Undergraduate  
This course will meet over two quarters, and requires two separate registrations. For the first quarter, register for the course titled, Intensive College Writing, for two credit hours. Next quarter, you must register again for the continuation of this course titled, Intensive College Writing II with the same instructor. This continuation of the course equals four credit hours. At the conclusion of the second quarter, the competence will be awarded.

LL 152  
CRITICAL THINKING TRUMAN BRIDGE  
Undergraduate  
In this course, students are introduced to the basic concepts behind the skills of effective listening, dynamic thinking, and persuasive argumentation and have an opportunity to practice these skills within an active and experiential context. Through peer and small group activities, problem-based exercises, and self-evaluation skills, students will develop effective habits of thinking that can be employed in subsequent learning experiences.

LL 153  
ACADEMIC WRITING/WRITING TOGETHER: A COMMUNITY APPROACH TO ACADEMIC WRITING AND PERSONAL NARRATIVE  
Undergraduate  
For the required L4 competence, you will study the meanings and implications of literacy; read and respond to scholarly works; and learn the strategies of academic writing that will allow you to be successful at SNL. You will explore literacy by sharing, responding to, and editing your own and others' writing during guided in-class writing workshops. For the additional competence, you will study and apply this writing group process to an out-of-class project.

LL 156  
ACADEMIC WRITING FOR ADULTS: BRIDGE  
Undergraduate  
In this course students will focus on developing writing, critical reading and analysis skills. Students will review and practice the essentials of good writing by building on their particular strengths and improving areas of difficulty. Students will receive individual feedback and guidance from faculty on grammar, idea development, organization, using sources to formulate arguments, and students will learn to give feedback on writing to one another. This course will give students the opportunity to practice several types of writing including journals, essays and research papers. In this class, students will have the opportunity to practice each of these assignments while improving control over the mechanics and process of writing. Particular emphasis will be given to the process of revision as students learn to refine and develop their writing. The class assumes a basic understanding of English grammar and composition.

LL 160  
ACADEMIC WRITING  
Undergraduate  
This is a five-week, two-credit course that satisfies the L4 competence and meets every other week in an SNL Learning Cluster.
This Bridge course deals with the methods, principles, and practice of college writing, while giving students an opportunity to write papers that address specific cultural issues, many of which may relate to students' professional aspirations.

**LL 170**  
**ACADEMIC WRITING FOR ADULTS AND CRITICAL THINKING**  
**Undergraduate**

Academic Writing for Adults and Critical Thinking are required courses at the School for New Learning. In Academic Writing, SNL students focus on writing skills associated with effective performance in a variety of settings. Meanwhile, the Critical Thinking competence and course aims to a) make students aware of their own thinking processes; b) help them develop those processes; and c) help them bring those processes to bear on college-level intellectual activity. In the blend of these two competencies, particular emphasis will be placed on how we do this through writing. Instructors will emphasize skills and strategies of critical thinking and reading as well as practice in the recognition, construction and evaluation of arguments from a thought-perspective and written-perspective that are inherently intertwined. No matter which competence students take, students in this course will learn to identify assumptions, connect assertions to evidence, state generalizations, analyze arguments and bring multiple perspectives to bear on complex issues through a writing practice that will build on particular strengths and improve on areas of difficulty. Students can expect to receive much individual feedback and guidance from the instructors; students will also learn to give feedback on writing to one another.

**LL 200**  
**INDEPENDENT STUDY: LIFELONG LEARNING**  
**Undergraduate**

Independent Study: Lifelong Learning

LL 250 is a prerequisite for this class.

**LL 201**  
**DISCOVER NEW LEARNING**  
**Undergraduate**

In this introductory theme-based course, students will use a variety of focused, active and engaging learning experiences as a basis for deriving meaning from experience. Depending on the theme or subject matter of the course, these learning experiences might include textual analysis, musical or theatrical presentations, films, visits to Chicago-area museums or other institutions, guest speakers, community service or hands-on scientific work. In each case, the learning experiences will serve as a foundation for asking critical questions, analysis, reflection and meaning-making. The class will also familiarize students with the necessary skills and habits as well as available resources to help them become academically successful.

**LL 202**  
**EXPERIENTIAL LEARNING**  
**Undergraduate**

In the Experiential Learning course, students will further engage in the processes they began in LL103 Exploring Learning of surfacing what they already know from prior experience and transforming their experiences into learning. They will connect their learning to relevant competencies in the BAIFA framework. Students will think through how to augment their evidence of learning to meet college-level expectations. They will choose from among various means and formats to demonstrate their achievement of competency. The main deliverable for this course will be preparation and submission of at least one Independent Learning Project (ILP) that is based on prior experience. Also, students will identify ILPs for future submission and/or explore other ways to incorporate their prior learning experiences into their SNL program. Prerequisite: Completion of LL103 Exploring Learning. (2 credit hours)

**LL 205**  
**QUANTITATIVE REASONING**  
**Undergraduate**

This course provides an introduction to various topics in quantitative reasoning that most adults will be exposed to throughout their university coursework, their careers, and their daily lives, and how to more effectively handle these topics. It covers different approaches to problem solving, how numbers are used in the real world, how to manage your personal finances, basic concepts in statistics and how they are applied in everyday settings and, finally, how money and populations grow and decay. Scientific calculators and the Excel spreadsheet program will be used as tools for exploring algebraic and statistical concepts. Excel spreadsheets and charts are used extensively to illustrate graphically how to display, analyze and interpret data. Using mathematical models to understand real-world phenomena and to make predictions is an important component of the course. Access to a PC and the Internet is required. Quantitative reasoning will be a large part of the class discussion.
LL 206
QUANTITATIVE REASONING AND FINANCIAL ACCOUNTING
Undergraduate
Students will often be called upon to deal with quantitative information in their academic studies, their daily lives and their ministries. This course will build their capacities to understand how numbers are used in the professional life and to apply different quantitative approaches to problem solving. The course will examine financial matters in particular and develop students' capacities to account for the financial resources of a community, congregation or organization. Through this course, therefore, students will develop and demonstrate their competence to use mathematical symbols, concepts, and methods to describe and solve problems.

LL 210
RAISING CHILDREN IN THE 21ST CENTURY
Undergraduate
This course examines the changing life challenges faced by children and adolescents, eg, parent-child, school work, dating, leisure time, drugs, etc, over recent past decades. However, this historical context mainly provides a framework for engaging the significant challenges children and adolescents face today. This includes home, school, and society. This course will then turn to how adults relate to their own children and devise strategies that help them develop a positive environment where the child can develop and achieve a sense of self-dependency and social contribution.

LL 240
PUBLIC SAFETY & DEFINING PROFESSIONAL IDENTITY
Undergraduate
In this professional seminar, students use the tools of experiential learning and competence-based skill-articulation to investigate the degree concentration area: Public Safety & Security Management. Learning focuses on the assessment of each student’s professional experience within the context of the degree concentration. Preparation for professional growth and development, and an assessment of relevant occupational areas are key aspects of the course. (6 hours)

LL 250
FOUNDATIONS OF ADULT LEARNING: DEVELOPING PERSONAL, PROFESSIONAL AND EDUCATIONAL GOALS
Undergraduate
In this required course, students use structured reflection and analysis to assess themselves as learners, write learning goals, do preliminary research in their focus area, meet with their mentor, establish an academic committee and plan the remainder of their undergraduate program. They master the notion of competence and identify ways of achieving it through prior and future learning. The course includes organizing a portfolio that will be an ongoing resource to support and document students' accomplishment of their learning goals. Students should take this course early in their program so they have a clear pathway to graduation. This course satisfies a residency requirement. This course satisfies two competencies: L2 (Foundations) and F1 (Focus Area Planning).

Status as an Undergraduate School for New Learning student is a prerequisite for this class.

LL 260
WRITING FOR COMPETENCE
Undergraduate
In this course, students will learn writing skills that are widely applicable and will help them improve their writing to excel in SNL's writing-intensive curriculum. Students learn strategies for combining experience with analysis and reflection in writing, managing the writing process, working effectively with sources, and writing persuasively. Students also practice using writing as a tool for exploring as well as communicating their ideas. Particular emphasis will be given to the process of revision as they learn to write to demonstrate competence, develop their ideas, refine their writing, and give feedback to others. The course assumes a basic understanding of English grammar. Note that SNL does not accept transfer courses for the L4 competence; however, students who feel their writing is particularly strong and have examples of their writing should consider taking the L4 Proficiency Exam to satisfy the L4 Competence. To ensure success in SNL's writing intensive program, complete at least one core SNL writing course (LL 140 Writing Workshop or LL 260 Writing for Competence) or the L4 Writing Portfolio Proficiency Exam within your first three terms at SNL.

LL 261
WRITING TO COMPETENCE: WRITING IN THE PROFESSIONS
Undergraduate
In this course, we will focus particular attention on writing to excel in SNL's writing-intensive curriculum. You will learn strategies for combining experience with analysis and reflection in writing, managing the writing process, working effectively with sources, and writing persuasively in academic contexts. Those who take the course for one additional competence will complete additional work online that covers the rhetorical theory and practice necessary for writing and designing effective documents in professional contexts, such as business letters, manuals, and memos, and compare to academic writing.

A writing placement test is a prerequisite for this class.
Although Jane Austen's *Pride and Prejudice* was published over 200 years ago, it is still popular today. In this course, we will read *Pride and Prejudice* and discuss Austen's presentation of social customs, her use of dramatic conflicts and her creation of characters and relationships. SNL students focus on writing skills associated with effective performance in a variety of settings. Students will review and practice the essentials of good writing by building on their particular strengths and improving areas of difficulty. In addition to receiving individual feedback and guidance from the instructor, students learn to give feedback on writing to one another.

A writing placement test is a prerequisite for this class.

**LL 265
WRITING FOR COMPETENCE AND CRITICAL THINKING**

*Undergraduate*

Writing for Competence and Critical Thinking are required courses at the School for New Learning. In Writing for Competence, SNL students focus on writing skills associated with effective performance in a variety of settings. Meanwhile, the Critical Thinking competence and course aims to a) make students aware of their own thinking processes; b) help them develop those processes; and c) help them bring those processes to bear on college-level intellectual activity. In the blend of these two competencies, particular emphasis will be placed on how we do this through writing. We will emphasize skills and strategies of critical thinking and reading as well as practice in the recognition, construction and evaluation of arguments from a thought-perspective and written-perspective that are inherently intertwined. Students in this course will learn to identify assumptions, connect assertions to evidence, state generalizations, analyze arguments and bring multiple perspectives to bear on complex issues through a writing practice that will build on particular strengths and improve on areas of difficulty. Students can expect to receive much individual feedback and guidance from the instructor; students will also learn to give feedback on writing to one another. This course carries eight tuition credit hours. (4-8 hours)

**LL 267
WRITING TO COMPETENCE: CHICAGO DISTURBANCES AND DISASTERS**

*Undergraduate*

Students will focus on writing to excel in SNL's writing-intensive curriculum and managing the writing process while learning and writing about Chicago disturbances and disasters throughout history. While many people know about the sinking of the Titanic, not everyone knows about the Eastland disaster. This ship was scheduled to take people across Lake Michigan to Indiana for a picnic; however, it never left the Chicago River. When the ship rolled over on its side, 800 Western Electric employees lost their lives. While the Chicago Fire is famous, another fire changed school fire safety regulations. A mistaken address contributed to the devastating fire at Our Lady of the Angels School where 92 children and 3 nuns died. Learn what caused the 1919 Chicago Race Riots, the Pullman Strike and other disturbances and disasters that have changed Chicago's history.

A writing placement test is a prerequisite for this class.

**LL 268
WRITING FOR COMPETENCE/CRIME, PUNISHMENT AND THE CITY**

*Undergraduate*

For almost 150 years, Dostoevsky's *Crime and Punishment* has been recognized as an important work of world literature. At its core, this novel asks questions that are still relevant today. Some of these questions include: -How can families survive in an urban environment? -How do people justify violence and neglect? -Should we allow a person's mental state to influence their punishment? Of course, these questions only represent a starting place for our investigations of this novel. All students will examine how society and the city shape the behavior of individuals in a series of essays written in a variety of writing genres. Students who take the class for the A4 competence will supplement this exploration of the novel with their personal experience and ideas developed by thinkers like Lev Tolstoy, Michel Foucault and Martin Buber. The skills you learn in this class are widely applicable and will help you improve your business and other writing. However, we will focus particular attention on writing to excel in SNL's writing-intensive curriculum. You will learn strategies for combining experience with analysis and reflection in writing, managing the writing process, working effectively with sources, and writing persuasively. You will also practice using writing as a tool for exploring as well as communicating your ideas. Particular emphasis will be given to the process of revision as you learn to write to demonstrate competence, develop your ideas, refine your writing, and give feedback to others. The course assumes a basic understanding of English grammar. It carries four tuition credit hours. Note that SNL does not accept transfer courses for the L4 competence; however, students who feel their writing is particularly strong and can provide examples should consider taking the L4 Proficiency Exam to satisfy the L4 Competence.
In this course, students are introduced to the basic concepts behind the skills of effective listening, dynamic thinking, and persuasive argumentation and have an opportunity to practice these skills within an active and experiential context. Through peer and small group activities, problem-based exercises, and self-evaluation skills, students will develop effective habits of thinking that can be employed in subsequent learning experiences.

Follow the Drinking Gourd and Steal Away to Jesus are but two songs that resonate deep within the American experience. Many have come to know them as spirituals, sorrow songs created and first sung by African Americans that remind us of an over two centuries old period in our history when American slavery was legal and people of African descent were enslaved with purpose for profit. But these songs were also signals to freedom, carefully created and strategically communicated, as enslaved laborers risked their lives enroute on the Underground Railroad so that they could live in freedom. This course will draw from Chicago area resources to explore multiple ways of knowing about the African American experience through this moment in time. In addition to our engagement with texts from multiple sources within the liberal arts, discussions, writing, and presentations, field trips and other participatory learning activities may also illuminate the topic and enhance our learning about this American experience.

Late in the 19th century, an English magazine ran a series of articles highlighting passages of prose and verse selected by leading authors of the time. This series provides a clear view of the opinions of this group of writers and provides an opportunity for us to make a comprehensive study of their perspective. Each student will research, edit, write and help create a class project that produces a monograph, a book, on this subject.

Research writing allows writers to present credible and persuasive evidence and ideas to a variety of audiences. Research writing includes finding sources, evaluating their credibility, and smoothly integrating them into academic and non-academic texts. This process can lead writers to strengthen, expand, challenge, and/or change their beliefs based on their findings. Freshman composition classes do not satisfy this competency, although knowledge of academic essay structure, writing process, and mechanics of Standard English is essential to demonstrating the L8 competency. Students will produce both academic and non-academic texts. Academic texts will include an annotated bibliography and a literature review using APA or MLA style. Non-academic texts might include a multi-modal blog that analyzes research on school reform for a specific neighborhood or a series of persuasive memos that make research-based suggestions for productivity improvements for a specific employer. Students demonstrate this competency in the course, LL 290 Research Writing. Completion of Research Writing is a prerequisite for L9 Research Methods. Prerequisite: Demonstration of L4 Rhetoric and Composition competence. (4 credit hours)

Research Seminar is a required course in research design. The course advances the development and application of critical thinking skills while exploring methods of formal inquiry as preparation for academic and lifelong research. Research Seminar is taught under a general theme selected by the instructor or alternatively as an open topic format. A research proposal is the primary document produced and assessed in Research Seminar. This course satisfies a residency requirement. (6 credit hours)

LL 250 and (LL 260 or LL 153 or LL 264 or LL 157 or LL 104) and (LL 270 or DCM 310 or LL 105) are a prerequisite for this class.

Externship is a required course in which SNL students design and execute an independent study project, guided by their academic committees, which engages them in learning under new conditions and in reflecting on the methods of independent learning used. Externship is offered in two modes: as a service learning course or as a course completed individually with your faculty mentor. To register for Externship as a service learning course, use Campus Connect. This course satisfies a residency requirement. (LL 260 or LL 153 or LL 264 or LL 157 or LL 104) and (LL 270 or DCM 310 or LL 105) are a prerequisite for this class.
LL 303
MAJOR PIECE OF WORK
Undergraduate
This required course is a problem-solving experience which represents the culmination of an SNL student's learning in a specific area. Students, guided by their academic committee, design and execute an independent project which demonstrates the integration of theory and practice, and the ability to pursue and document avenues of inquiry with excellence. * Successful completion of Major Seminar is required before registration. (2-6 quarter hours)

LL 304
FINAL EVALUATION AND SUMMIT SEMINAR
Undergraduate
This required course is the final requirement completed by SNL students to earn their degree. Primary purposes are to 1) bring appropriate and reflective closure on the SNL experience; 2) enable students to celebrate and share their work with others who have accomplished goals and projects; and, 3) reflect upon the overall SNL experience, its developmental effect, its contribution to lifelong learning, and the transferable skills, attitudes, etc. that were developed as a result of the SNL experience.

LL 315
ADV ELECT SEMINAR: UTOPIA, MILLENNIUM, & APOCALYPSE: VISIONS OF HUMAN DESTINY FROM BIBLE TO HOLLYWOOD
Undergraduate
Though usually associated with a sub-culture of palm readers, ouija boards, tarot cards, and crystal balls, predicting the future is a lot more than just a parlor trick or confidence game. In fact it is a serious imaginative and intellectual activity that has engaged the talents of many of the world's greatest writers, thinkers, and filmmakers. In this course students will review and analyze a selection of representative works of "futurology" and visionary imagination both old and new - from the apocalyptic prophesies of the Bible to the end-of-the-world scenarios typical of Hollywood sci-fi. While viewing or reading these works, students will also compare and evaluate various theories of world history as they seek to answer the question: Is it actually possible - by combining imagination, reason, and established methods and principles of scientific history - to predict the future course of civilization? Course materials will include the novel Brave New World by Aldous Huxley as well as films by Kubrick and Spielberg.

LL 350
CAPSTONE SEMINAR
Undergraduate
Capstone Seminar is designed to permit students to explore a topic as a group integrating various methods of inquiry. Specific assessment and evaluation criteria as well as learning activities will be articulated by the instructor for a particular section of the course.

LL 390
SUMMIT SEMINAR
Undergraduate
This required course is the final requirement completed by SNL students to earn their degree. Primary purposes are to 1) bring appropriate and reflective closure on the SNL experience; 2) enable students to celebrate and share their work with others who have accomplished goals and projects; and, 3) reflect upon the overall SNL experience, its developmental effect, its contribution to lifelong learning, and the transferable skills, attitudes, etc. that were developed as a result of the SNL experience. This course satisfies a residency requirement. (FA 303 or FA 304) and LL 302 are corequisites for this class.

LLS 410
PERSONAL EFFECTIVENESS
Graduate
This domain includes the physical, cognitive and spiritual dimensions of personal development and performance. Central questions include: Who am I and what should I become? What habits of mind, attitude, and behavior might I improve upon? How can I construct personal meaning and inform future actions from my experiences? Embedded in these questions are the core concepts of learning and change, choice and consequence, identity, and various dimensions of self. Seminar sections in this domain might include such topics as awareness, agency, emotional intelligence, mindfulness, motivation, reflection, resilience, self-discipline, etc.
LLS 420
INTERPERSONAL EFFECTIVENESS
Graduate
This domain includes the ability to both communicate effectively and understand the meaning of others’ communications. To develop interpersonal effectiveness, one must overcome the barriers that result from differences in culture, race, ethnicity, gender, age, disability, and socio-economic status. Interpersonal effectiveness requires self-awareness, cultural competence, and skills in active listening, building trust, dialogue, collaboration, and conflict resolution. Central questions include: How can we improve interpersonal relationships in both personal and professional domains? How can we make decisions and solve problems together? What are the dynamics of and processes for collaboration? How do we understand and use the human/computer interface as tool to enhance communication? Seminar sections in this domain might include such topics as intercultural communication, valuing human similarities and differences, interpersonal communication, 21st century human-computer interfaces and interactions, etc.

LLS 430
ORGANIZATIONAL EFFECTIVENESS
Graduate
This domain includes the larger systemic contexts within which individuals function. As the world grows increasingly complex and interconnected, the ability to understand and navigate people-in-groups (organizational, societal, and global) becomes increasingly critical. In this domain, students broaden and deepen their capacity to make a difference at ever-widening levels of system. Central questions include: How do we engage as organizational resources, community participants, members of society and global citizens? How do we get along? How do we get work done? How do we both fit-in and remain unique? Seminar sections in this domain might include such topics as project management, leadership, organizational culture, career management, performance improvement, context scanning, global citizenship, trend analysis, cross-cultural agility, future visioning, etc.

LLS 440
VALUES EFFECTIVENESS
Graduate
This domain includes the ability to recognize and analyze one’s values and those of others in order to find effective ways to translate beliefs into effective action. When individuals expand awareness of their own choices and recognize the choices of others, they can live their own lives more effectively and successfully mediate conflicts with others. Central questions include: What should I do in this situation? Why did he/she/they decide to do things that way when it seems so clearly wrong to me? Seminar sections in this domain might address topics such as ethical reasoning, decision-making, values-clarification, priority setting, courage in action, etc.

LLS 450
INQUIRY EFFECTIVENESS
Graduate
This domain includes methods and processes of systematic inquiry regardless of domain. Adults must be able to engage in self-directed inquiry in order to understand and act effectively in their personal, professional, social, and civic lives. In this domain, students learn methods for systematically and strategically exploring questions, problems, ideas, and experiences. Central questions include: How do I formulate viable questions? What information do I need to understand a problem and what is the best way to obtain it? What are different ways to analyze an idea? How can I make sense of what I have experienced? Seminar sections in this domain might address topics such as strategies and methods for generating and utilizing primary research, gathering and managing information, analyzing and presenting data, pursuing targeted methods of inquiry, etc. (2 quarter hours)

LSE 201
DIVERSE VALUES AND VOICES IN EDUCATION
Undergraduate
This course explores the interaction of societies and their education efforts/designs within a multicultural context. Case studies are used to examine various cultural groups within their own environment, the interactions of people from different cultures, and various cultural phenomena. Educational experiences leading persons from a monocultural perspective to a more multicultural perspective are explored. Students are asked to consider culture as learned behavior/perspective. They will explore their own cultural experiences/development and those of others. The goal is a realization of culture as a respected framework within the context of education. This course satisfies the self, society, & modern world requirement.
LSE 210
MULTICULTURALISM AND EDUCATION
Undergraduate
This course will engage students in an examination of issues of diversity and multiculturalism within educational contexts in the United States. It includes an investigation of the historical and experiential perspectives of different cultural groups as well as an analysis of issues of access, inequality, power, and the distribution of resources. Students should gain an understanding of individual, group, inter-group, and intra-group perspectives, behaviors, and socialization practices regarding identity, relationships, values, ways of knowing, and world views. The central objective of the course is the development of a critical perspective regarding the meaning of multiculturalism and the significance of its role in educational settings.

LSE 254
THE POLITICS OF EDUCATION
Undergraduate
This course examines school and other educational sites as political institutions. It explores the ways in which the goals, the content taught, and the organization of educational institutions are shaped by relations of power and by political trends in society. It also explores schools and classrooms as political terrains in their own right in which issues of power are contested along lines of race, class, ethnicity, gender, language, sexual orientation, and other forms of difference. The course considers ways in which schools may reproduce or contest the existing social order. The dynamic interplay of political context and the internal politics of schools will be studied theoretically and through specific issues such as language and immigration policy, affirmative action, educational vouchers, textbook selection, and educational reform movements. This course satisfies the self, society, & modern world requirement.

LSE 255
INTERNATIONAL STUDIES IN EDUCATION
Undergraduate
This course focuses on a variety of key educational issues in countries or regions outside of the United States. Through a comparative approach, possible issues that will be examined include: aims and purposes of education and schooling; economic, political, social and cultural contexts of educational policies and practices; similarities and differences in organization and structure of educational systems; equity and social justice; relationships between home, community and educational institutions; education, development, and issues of social change; and dynamics at the global level that affect education in local environments. This course satisfies the self, society, & modern world requirement.

LSE 258
EDUCATION AND SOCIAL JUSTICE
Undergraduate
This course is designed to examine education within a philosophical framework which focuses upon the relatively great potential of education as an agent for social justice and change. Through the examination of current issues and concerns, students are expected to engage in critical analysis, reflect upon theoretical frameworks, examine public policies and values, and consider ways in which schools and educators can promote the development of social justice. The course will focus on one or several of the following topics: gender, ethnicity, language and culture, and social class and economic opportunity. Attention will be given to the issues of institutional responses to differences, equity, access and outcomes. This course satisfies the Self, Society, & Modern World requirement.

LSE 300
EDUCATION AND LITERATURE
Undergraduate
This course is designed to engage students in critical reflection, commentary, and evaluation of literature, informed by theoretical as well as aesthetic considerations. Literary works will be interpreted and analyzed regarding interactions between form and content, as well as effects of authors' treatment of material upon the construction of meaning. Primary goals are the enhancement of understanding, appreciation and enjoyment of literature. Social and cultural dimensions of literature will also be addressed within the context of examining educational issues such as: what it means to become educated in culturally diverse contexts; construction of identity; the development of values and world views; the individual in relationship to community and/or society; and relationships among artistic works, human experiences and education. This course satisfies the arts and literature requirement.

LSE 310
CONTEMPORARY ISSUES IN EDUCATION
Undergraduate
This is a variable topics course which examines the way current, significant issues affect, and are affected by education. Each quarter the course will focus on a contemporary problem or question with broad social, political, or cultural implications and will examine it from a multicultural perspective. Examples of topics are: homelessness, immigration and public education, privatization and corporate involvement in schools, youth culture and education, or the use and misuse of measures of achievement and ability. The course will explore the topic from multiple perspectives and draw on multiple disciplines. This course satisfies the Social, Cultural, and Behavioral Inquiry requirement.
LSE 354
CULTURE, CONTEXT AND LEARNING
Undergraduate
This course is based on the premise that learning is situated in the context of dynamic interpersonal relationships through which critical thinking may be fostered and ideas challenged. Students will examine the intellectual, emotional, and intrapsychic processes by which knowledge is constructed and shaped by cultural meanings which validate particular forms of thought and structures of knowledge. Various theories of learning will be discussed as they inform educational practices and their underlying assumptions will be examined. In addition, this course will engage the cultural nature of all human activity, cognitive processes, and bodies of knowledge. Attention will be given to their historical role of race and class as they determine what bodies of knowledge and processes of learning are validated within the dominant culture. Students will engage in self-reflective experiences, theoretical analyses, and community based activities to examine the various meanings constructed as people learn within social and cultural contexts. This course satisfies the self, society, & modern world requirement.

LSE 362
IDENTITY AND EDUCATION
Undergraduate
This variable topics course will focus on how individuals and groups take on identities and how education and schooling affect the process. It will use multiple perspectives and a variety of contexts (such as family, community, nation, and international communities) to analyze how notions of self are developed, forged, and named and how these notions change over time. It will also examine how identities are constructed in relationship to issues such as ethnicity, class, gender, sexual orientation, language, religion, culture, age, and ability and their interconnections in the lived experience of individuals and groups. This course satisfies the self, society, & modern world requirement.

LSE 380
PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
Undergraduate
This course is a critical inquiry to major philosophical writings in education. This course satisfies the philosophical inquiry requirement. PREREQUISITE(S): PHL 100; SCU 207 highly recommended.

LSE 404
CHILD REARING ACROSS CULTURES
Graduate
Study of child-rearing practices, the effects of culture on cognitive development and the implications for teaching strategies for the child whose first language is not English.

LSE 420
COMPARATIVE EDUCATION
Graduate
This course is devoted to the study of historical and contemporary issues related to comparative education—with an emphasis upon early childhood, elementary, and secondary levels. Through a comparative study of educational public policy, we will examine assumptions about the aims and purposes of education and schooling in terms of economic, political and social dimensions. Major topics and issues addressed will include the following: examining what it means to be educated; examining similarities and differences in the ways developed and developing countries educate children and youth; the organization and structure of educational institutions; disconcerting implicit and explicit values in different approaches to teaching and learning; relationships between schools and communities; education and the issues of change and social justice.

LSE 430
EDUCATION AND SOCIAL JUSTICE
Graduate
A variable-topics course designed to examine education within a philosophical framework which focuses upon the relatively great potential of education as an agent for social justice and change. Through the examination of current issues and concerns, students are expected to engage in critical analysis, reflect upon theoretical frameworks, examine public policies and values, and consider ways in which schools and educators can promote the development of social justice. Each time the course is offered it will focus on one of the following topics: gender; ethnicity; language and culture; or social class and economic opportunity. For each topic, attention will be given to the issues of institutional responses to differences, equity, access and outcomes. (CROSS-LISTED with LSE 258)
**LSE 438 GENDER AND EDUCATION**  
*Graduate*

A variable-topics course designed to actively engage students in examination of the literature and issues related to gender and education. Curriculum, teaching and learning, achievement, and the organization structure and culture of schools are among the key concerns. Gender will be addressed as it intersects with other forms of inequality and difference: race, ethnicity, class, etc. Each time the course is offered it will focus on a particular topic, but for each topic attention will be given to issues about institutional responses to inequality and differences.

**LSE 450 DYNAMICS OF AFRICAN-AMERICAN CULTURE**  
*Graduate*

This course is intended for those interested in cultural and human relations in order that they may examine the contributions of the black person to American Culture; gain a functional understanding of the social, economic and political development of the black person on America itself. (Cross-listed with SOC 490).

**LSE 460 INTERNATIONAL STUDIES IN EDUCATION**  
*Graduate*

This variable-topics course will focus upon educational issues in a particular country or region outside of the United States. Through comparative study, a number of issues will be addressed: aims and purposes of education and schooling; economic, political, social and cultural contexts of educational policies; similarities and differences in organization and structure of educational systems; relationships between home, community and educational institutions; education, development and issues of social change.

**LSE 461 INTERNATIONAL STUDIES IN TEACHING AND LEARNING**  
*Graduate*

This variable-topics course will focus upon aspects of curriculum, teaching and learning in a particular country or region outside of the United States. It requires work in the chosen country or region under the guidance of teachers familiar with its educational practices. The course will examine how curriculum is organized, developed and implemented in classrooms and schools with concentration on particular subjects or levels. From a comparative perspective, particular attention will be paid to the values and assumptions underlying curriculum and teaching.

**LSE 462 INTERNATIONAL FIELD EXPERIENCES IN EDUCATION**  
*Graduate*

Through clinical experience outside of the United States, students will observe, participate in and reflect upon teaching and learning in cultural settings that differ from their own. This field experience abroad provides an opportunity to develop an understanding of what it means to be educated in the context of another society or culture. The intent of this experience is to add more global perspective to one’s own professional knowledge and practice. (2 credit hours)

**LSI 96 FIELD EXPERIENCE FOR DUAL CERTIFICATION**  
*Graduate*

Required of all Dual Certification students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses. A total of 200 hours are required. (0 credit hours)

**LSI 300 INTRO TO SPECIAL EDUCATION I: EXCEPTIONALITY & LEARNING**  
*Undergraduate*

This course explores exceptionality, its theories, research, and foundations as well as processes of learning as they are rooted in the domain of special education. Focus will be on typical and atypical growth from pregnancy through age 21 including cognitive, physical, emotional, linguistic, social, and sensory areas and the impact of disability on learning. An introduction to the field of special education and an overview of the categories of disability will also be provided. The course addresses the psychology of the exceptional child including the learning disabled.
LSI 301
INTRO TO SPECIAL EDUCATION II - FOUNDATIONS AND CHARACTERISTICS
Undergraduate
This course introduces the theoretical, historical, and legal foundations of special education as well as models for assessment, placement, and instruction. The course also focuses on the psychology, characteristics and learning needs of the various types of behavioral, emotional, physical and cognitive and learning disabilities. The course addresses the identification of the exceptional child including without limitation the learning disabled.
LSI 300 is a prerequisite for this course.

LSI 302
INSTRUCTION AND DIFFERENTIATION IN SPECIAL EDUCATION: CONTENT AREA
Undergraduate
This course provides an introduction to teaching exceptional students with mild, moderate and severe disabilities and includes state learning standards, curriculum, assessment, planning, instruction in the content areas, and accommodations for diverse students with disabilities in a variety of settings. Candidates learn to use research and assessment data to guide planning and differentiate instruction in the content areas. Applied activities will focus on teaching science to students with disabilities K-12. The course addresses the methods of instruction for the exceptional child including without limitation the learning disabled.

LSI 303
CLASSROOM AND BEHAVIOR MANAGEMENT IN SPECIAL EDUCATION
Undergraduate
This course covers theoretical approaches to and associated strategies for classroom and behavior management, the development of supportive learning environments to maximize motivation, attention, and engagement for exceptional learners in a variety of educational settings. Candidates learn to use assessment data to understand behavior and guide selection and application of principles of social-emotional learning and classroom/behavior in culturally and linguistically diverse classrooms. Attention will be given to the Illinois Social/Emotional Learning Standards. Candidates are introduced to functional behavioral assessment (FBA) and behavior intervention plans (BIP), as well as how to monitor growth and development in targeted areas. Strategies to increase the individual's self-awareness, self-management, self-control, self-reliance, and self-esteem and decrease self-injurious behaviors are considered.
Advanced Teacher Candidate Standing is a prerequisite for this class.

LSI 310
TEACHING MATHEMATICS TO EXCEPTIONAL STUDENTS
Undergraduate
This course provides the theoretical, content, and pedagogical foundations for teaching mathematics to diverse exceptional learners across all grade levels. Candidates review and deepen their own knowledge of basic math content with emphasis on number, number systems, operations, fractions, decimals, percent and measurement. They learn how to develop exceptional students' abilities to think and reason as well as build computation and problem-solving skills. Attention is given to Illinois Common Core standards and how to support exceptional students when introducing new concepts and correct misconceptions. The course covers informal assessment/progress monitoring, using assessment data to plan instruction and match instruction to exceptional student needs, and organizing instruction for exceptional learners in whole-class, small-group, and individual settings.

LSI 311
TEACHING MATHEMATICS FIELD EXPERIENCE LAB
Undergraduate
In this Lab, taken with LSI 310, candidates provide math instruction to diverse, at-risk and exceptional students in the lower grades, and use informal assessments and progress monitoring to guide instructional practices and differentiation for exceptional students. Supervision, coaching, and mentoring in implementing effective instructional strategies is provided by program faculty. The Lab introduces the concept of documenting impact on student learning. This experience is offered in an on-campus facility that serves diverse at-risk learners and students with disabilities. (2 credit hours)
LSI 310 is a prerequisite for this class.
LSI 312
TEACHING MATHEMATICS TO EXCEPTIONAL STUDENTS II: INSTRUCTION
Undergraduate
In this course candidates continue to learn/review mathematics content along with pedagogical content skills for exceptional learners across all grade levels with an emphasis on algebra and geometry. The course emphasizes identifying individual exceptional needs, strategies, curriculum, and connecting classroom assessment to instruction for exceptional, diverse, and at-risk math learners. Attention is given to Illinois Common Core standards. Candidates practice connecting math knowledge to other disciplines and incorporating reading and writing into math instruction. The course provides a comprehensive model for effective instruction for exceptional learners that includes informal assessment to determine student needs, flexible grouping, skilled content delivery, progress-monitoring, and technology to support learning.

LSI 313
TEACHING MATHEMATICS LAB II
Undergraduate
In this Lab, taken with LSI 312, candidates provide math instruction to diverse, at-risk and exceptional students in the lower grades, and use informal assessments and progress monitoring to guide instructional practices and differentiation for exceptional students. Supervision, coaching, and mentoring in implementing effective instructional strategies is provided by program faculty. The Lab introduces the concept of documenting impact on student learning. This experience is offered in an on-campus facility that serves diverse at-risk learners and students with mild-moderate disabilities. (1 credit hour)

LSI 314
TEACHING LITERACY TO EXCEPTIONAL STUDENTS
Undergraduate
This course covers the theoretical and historical foundations of literacy instruction for diverse, at-risk, and exceptional learners from PK-21. Topics include the theoretical and historical foundations of literacy instruction, oral language development as it relates to literacy, and foundational constructs of reading (i.e., phonological awareness, phonics, fluency, vocabulary, and comprehension). Strategies and methods for addressing the needs of middle and high school students with literacy deficits will also be addressed. Emphasis will be placed on understanding literacy development PK-12, utilizing the Common Core standards, analyzing and applying research-based instructional practices, and using assessment to guide instruction to meet the need of diverse literacy learners (at-risk and with disabilities). The course also examines informal assessments to determine student progress in reading, spelling, and writing. This course includes 10 hours of field experience.

LSI 315
TEACHING LITERACY FIELD EXPERIENCE LAB
Undergraduate
In this Lab, taken with LSI 329, candidates provide reading and writing instruction to exceptional students and use informal assessments and progress monitoring to guide instructional practices and differentiation. Supervision, coaching, and mentoring in implementing effective instructional strategies for exceptional students are provided by program faculty. The course develops the concept of documenting impact on student learning. This experience is offered in an on-campus facility that serves at-risk literacy learners and students with disabilities. (2 credit hours)

LSI 314 and Advanced Teacher Candidate Standing are prerequisites for this course.

LSI 316
TEACHING LITERACY TO EXCEPTIONAL STUDENTS II: INSTRUCTION
Undergraduate
This course focuses on literacy development for diverse, at-risk, and exceptional, learners in third grade and higher, including those with mild-moderate disabilities. Differences in reading abilities will be examined in light of providing appropriate, effective, and meaningful literacy instruction. Philosophical approaches, theoretical models, assessment measures, and practical implications for working with exceptional readers will be analyzed. Attention will be given to the literacy learning process, Common Core standards, the interaction of reading and learning in the content areas, and the connections between reading and writing in the upper grades. The course continues the examination of informal assessment to determine monitor exceptional student progress in reading, spelling, and writing. Uses of technology in literacy learning will also be examined.

LSI 317
TEACHING LITERACY LAB II
Undergraduate
In this Lab, taken with LSI 316, candidates provide reading and writing instruction to exceptional students in the upper grades and use informal assessments and progress monitoring to guide instructional practices and differentiation. Supervision, coaching, and mentoring in implementing effective instructional strategies for exceptional students are provided by program faculty. The course develops the concept of documenting impact on student learning. This experience is offered in an on-campus facility that serves at-risk literacy learners and students with mild-moderate disabilities. (1 credit hour)
LSI 320
COLLABORATION AND SPECIAL EDUCATION
Undergraduate
This course covers theoretical models as well as ethical and practical strategies for collaborating with professionals and paraprofessionals in schools and communities as well as students with disabilities and their families. Candidates consider models of co-teaching and of Response-to-Intervention and learn strategies for effective collaboration with general education teachers and training of paraprofessionals. Candidates also consider the dynamics of families and of schools and how to plan for and initiate family involvement to maximize the learning experience of the student with disabilities. Attention is given to interpersonal communication strategies and how to use communication strategies to foster collaboration.

LSI 324, LSI 325 and Advanced Teacher Candidate Standing are prerequisites for this class.

LSI 321
FORMAL ASSESSMENT IN SPECIAL EDUCATION
Undergraduate
This course considers the theoretical, legal, ethical, and technical aspects of formal assessment in special education as well as models of nondiscriminatory assessment in the context of the requirements of special education law. Candidates gain knowledge of a variety of formal assessments including their purposes, characteristics, and limitations. They learn how to select, adapt, administer, score, interpret, and communicate the results of class-wide and individual assessments. Attention is given to collaborative assessment and educational planning based on assessment results, particularly the development IEP goals, objectives, and recommendation for instruction.

Advanced Teacher Candidate Standing is a prerequisite for this class.

LSI 322
TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES I: ACADEMICS, LIFE SKILLS, & TRANSITION
Undergraduate
This course provides the theoretical and practical basis for teaching academic and life skills to students with more significant disabilities as well as the theoretical and practical aspects of educational transitions for students with disabilities. Candidates will learn how to align curriculum with state learning goals as well as strategies for teaching academic skills to the greatest possible extent while keeping goals high but attainable so that learners can succeed. Candidates will also learn how to balance teaching of academics with independent living skills, participation in community activities, personal safety, health, and relationship skills, self-management, and decision-making. Candidates learn outcomes-based special education planning for early transitions, transitions between educational levels, and transition to work or higher education. This course includes 10 hours of field experience.

LSI 321 and Advanced Teacher Candidate Standing are prerequisites for this course.

LSI 323
TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES II: COMMUNICATION & SOCIAL SKILLS
Undergraduate
This course offers strategies for assessing and teaching oral language and communication skills to students with more significant disabilities, including ways to increase communication and generalize across settings. Candidates learn how to employ technology to aid communication, including selection and use of augmentive and alternative communication (AAC) devices. Equal attention is given to the theoretical and developmental aspects of behavior and social skills as well as curriculum and strategies for teaching social skills. Training and support of paraprofessionals related to communication and social skills are also covered.

LSI 322 and Advanced Teacher Candidate Standing are prerequisites for this course.

LSI 324
PRACTICUM I: INCLUSION SETTING
Undergraduate
One school morning per week for 10 weeks of supervised practicum (30 hours total). In this course, candidates are introduced to teaching in a general education inclusion classroom. Candidates will interact with students and will plan and conduct small-group and large-group instruction in collaboration with the cooperating teacher. Taken in conjunction with LSI 325 Topics in Special Education. Faculty advisors and the Director of Student Teaching, working in conjunction with individual students, will determine appropriate practicum placements. (2 credit hours)

LSI 302, LSI 303, LSI 314 & Advanced Teacher Candidate Standing are prerequisites for this class.
**LSI 325**
**TOPICS IN SPECIAL EDUCATION**
Undergraduate
This course will cover professional and ethical standards in special education and other variable topics such as inclusion, technology, managing a resource room, bullying, transition, Common Core Standards, and tiers of instruction in Response to Intervention. In addition, the course functions as a seminar for LSI 324 Practicum Experience I and provides support as candidates participate in practicum experiences. The course continues to develop skills for documenting impact on student learning, improving practice, developing a personal philosophy of special education, and planning for professional growth. COREQUISITE: LSI 324. (2 credit hours)

Advanced Teacher Candidate Standing is a prerequisite for this class.

**LSI 326**
**TRANSITIONAL AND VOCATIONAL PLANNING**
Undergraduate
This course examines the theoretical and practical aspects of educational transitions for students with disabilities. Processes of human change will be considered as well as the importance of networking and collaboration among families, educators, other service providers to facilitate transitions. The course focuses on outcomes-based special education planning for early transitions, transitions between educational levels, and transition to work or higher education. The course includes prioritizing social, vocational and community living goals, IEP transition requirements, and writing transition plans. Attention will be given to vocational assessment, planning, and curricula.

**LSI 327**
**PRACTICUM II: SELF-CONTAINED SETTING**
Undergraduate
One school morning per week for 10 weeks of supervised practicum (40 hours total). In this course, candidates are introduced to teaching in a self-contained, special education classroom. Candidates will interact with students and will plan and conduct small-group and large-group instruction in collaboration with the cooperating teacher. Taken in conjunction with LSI 328 Contemporary Issues in Special Education. Faculty advisors and the Director of Student Teaching, working in conjunction with individual students, will determine appropriate practicum placements. (2 credit hours)

LSI 322 and LSI 323 and Advanced Teacher Candidate Standing are prerequisites for this course.

**LSI 328**
**CONTEMPORARY ISSUES IN SPECIAL EDUCATION**
Undergraduate
This course will review professional and ethical standards in special education and address timely or controversial issues in special education instruction such as new developments in technology, updates in special education legislation, assessment and identification of learning disabilities, high-stakes testing in No Child Left Behind, progress monitoring in RTI, and new developments in alternative assessments. In addition, this course functions as a seminar for LSI 327 Practicum Experience II and provides support as candidates continue their practicum experience. The course continues to develop skills for documenting impact on student learning, improving practice, developing a personal philosophy of special education, and planning for professional growth. COREQUISITE: LSI 327. (2 credit hours)

Advanced Teacher Candidate Standing is a prerequisite for this class.

**LSI 329**
**TEACHING LITERACY IN THE CONTENT AREAS**
Undergraduate
This course addresses the integration of reading, writing, and oral language into the content areas (with a focus on English/language arts and history/social studies). Candidates learn to assess the reading needs of students in content area courses and to design, select, modify, and evaluate a wide range of materials for the content areas. The course goes beyond teaching a set of isolated generic reading comprehension skills and provides strategies that can be applied across content areas to prepare diverse, at-risk, and exceptional students to read, write, talk, and think critically about complex texts, and to develop positive literacy identities. Attention is given to incorporating Common Core standards and IEP goals into instruction.

LSI 314 and Advanced Teacher Candidate Standing are prerequisites for this course.
LSI 346  
STRATEGIES FOR MAINSTREAMING AND INCLUSION  
Undergraduate  
Focus will be on the practical problems related to the integration of exceptional children and youth into regular classrooms. Identification, characteristics, programs, curricular variations, and techniques for securing maximum development of students with a variety of special needs with emphasis on learning disabilities. The course also covers historical background, as well as current legal and service provision issues, including mainstreaming and inclusion.

Advanced Teacher Candidate Standing or an Exercise Science or World Language Education major and Junior Standing are prerequisites for this class.

LSI 383  
STUDENT TEACHING SEMINAR  
Undergraduate  
This seminar course provides support for candidates as they begin their student teaching experience. In addition to and in conjunction with student teaching, candidates will complete a project designed to document their ability to impact student learning based on teaching.

Advanced Teacher Candidate Standing is a prerequisite for this class.

LSI 384  
CAPSTONE IN SPECIAL EDUCATION  
Undergraduate  
Designed primarily as a culminating and integrating experience, this course uses a seminar approach to support candidates during student teaching and to help them clarify and reflect upon the relationship of concepts of their major with those in the liberal studies program. Candidates will make connections between their own theoretical and professional orientations, their liberal studies education, and the Urban Professional Multicultural Model.

Advanced Teacher Candidate Standing is a prerequisite for this class.

LSI 385  
STUDENT TEACHING IN SPECIAL EDUCATION: ELEMENTARY  
Undergraduate  
Five school days per week in supervised teaching experience for 8 weeks. Candidates will also attend a student teaching seminar (LSI 383 or LSI 384). Faculty advisors and the Director of Student Teaching, working in conjunction with individual students, will determine appropriate student teaching placements. (8 credit hours)

Advanced Teacher Candidate Standing is a prerequisite for this class.

LSI 386  
STUDENT TEACHING IN SPECIAL EDUCATION: SECONDARY  
Undergraduate  
Five school days per week in supervised teaching experience for 8 weeks. Candidates will also attend a student teaching capstone seminar (LSI 383 or LSI 384). Faculty advisors and the Director of Student Teaching, working in conjunction with individual students, will determine appropriate student teaching placements. (12 credit hours)

Advanced Teacher Candidate Standing is a prerequisite for this class.

LSI 387  
FOUNDATIONS OF LITERACY AND SPECIAL EDUCATION FOR THE MIDDLE GRADES  
Undergraduate  
Introduction to disabilities and the historical and legal foundations of special education. This course will prepare candidates to address the emotional, social, psychological, and cognitive needs of students with disabilities, with a particular emphasis on addressing the needs of students with reading and learning disabilities at the middle school level, including developmental and remedial instruction and support.

***This course counts toward Reading Teacher endorsement. Co-requisites for this course are MGE 321 and MGE 331. In this course, students will:1. Discuss the historical and legal foundations of special education2. Identify the characteristics of students with disabilities, with an emphasis on high incidence disabilities3. Demonstrate understanding of the foundational skills that underlie reading and comprehension4. Learn strategies for working with struggling readers, with and without disabilities, at the middle school level, including development and remedial instruction and support

MGE 300, MGE 301 and Junior standing are prerequisites for this class.
LSI 402
INSTRUCTION AND DIFFERENTIATION IN SPECIAL EDUCATION
Graduate
This course provides an introduction to teaching exceptional students with mild, moderate and severe disabilities and includes state learning standards, curriculum, assessment, planning, instruction in the content areas, accommodations, grouping, and technology for diverse students with disabilities in a variety of settings. Candidates learn to use research and assessment data to guide planning and differentiate instruction in the content areas. Applied activities will focus on teaching science and social studies to student with disabilities K-12.

Status as a Graduate Education student is a prerequisite for this class.

LSI 403
CLASSROOM AND BEHAVIOR MANAGEMENT IN SPECIAL EDUCATION
Graduate
This course covers theoretical approaches to and associated strategies for classroom and behavior management, the development of supportive learning environments to maximize motivation, attention, and engagement for exceptional learners in a variety of educational settings. Candidates learn to use assessment data to understand behavior and guide selection and application of principles of social-emotional learning and classroom/behavior in culturally and linguistically diverse classrooms. Candidates are introduced to social/emotional learning standards, functional behavioral assessment (FBA) and behavior intervention plans (BIP), as well as how to monitor growth and development in targeted areas. Strategies to increase the individual's self-awareness, management, control, reliance, and esteem and decrease self-injurious behaviors are considered.

Status as a Graduate Education student is a prerequisite for this class.

LSI 405
TEACHING LITERACY TO EXCEPTIONAL LEARNERS
Graduate
This course focuses on understanding literacy development in general, and for diverse, at-risk, and exceptional learners with mild-moderate disabilities, specifically. Differences in reading abilities will be examined in light of providing appropriate, effective, and meaningful literacy instruction. Philosophical approaches, theoretical models, assessment measures, and strategies and techniques for working with exceptional learners will be analyzed. Attention will be given to the literacy learning process, including the interaction between language, reading, and writing abilities. An overview of informal assessments that can be used to monitor exceptional student progress in reading, spelling, and writing will be provided and the uses of technology in literacy learning examined.

Status as a Graduate Education student is a prerequisite for this class.

LSI 409
TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES
Graduate
This course offers strategies for assessing and teaching academic, life, communication, and social skills to students with more significant disabilities, including transition and vocational planning. Candidates will learn how to align curriculum with state learning standards and how to balance the teaching of academics with independent living skills, participation in community activities, and personal safety and health. Candidates will learn to manage physical and health concerns as well as learn how to employ technology to aid communication, including selection and use of augmentive and alternative communication (AAC) devices. In addition, candidates will train support staff in each of these areas.

Status as a Graduate Education student is a prerequisite for this class.

LSI 410
TEACHING MATHEMATICS TO EXCEPTIONAL LEARNERS
Graduate
This course provides the theoretical, content, and pedagogical knowledge and skills for teaching mathematics through problem solving across all grade levels to diverse exceptional learners. Candidates review and deepen their own knowledge of basic math content with emphasis on number, number systems, operations, fractions, decimals, percent and measurement, algebra and geometry. They learn how to develop exceptional students' abilities to think and reason as well as build computation and problem-solving skills. Attention is given to Illinois Common Core standards and how to support exceptional students when introducing new concepts and correcting misconceptions. The course provides a comprehensive model for effective instruction for exceptional learners that include using assessment data to plan instruction and match instruction to exceptional student needs, flexible grouping, skilled content delivery, progress monitoring, and technology to support learning.

Status as a Graduate Education student is a prerequisite for this class.
LSI 416  
PRACTICUM IN SPECIAL EDUCATION I  
Graduate  
In this field-based course, candidates are introduced to teaching exceptional students. Candidates will interact with students and collaborate with teachers in applying content from core courses to activities associated with providing special education services to students in schools (e.g., reviewing goals included in Individual Education Programs (IEPs), writing measurable goals and objectives, planning large group, small group, and individual instructional sessions). Faculty advisors and the Director of Field Experience and Student Teaching, working in conjunction with individual students, will determine appropriate practicum placements. (2 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

LSI 417  
PRACTICUM IN SPECIAL EDUCATION II  
Graduate  
In this field-based course, candidates are introduced to teaching in a general education inclusion classroom. Candidates will interact with students and will plan and conduct small-group and large-group instruction in collaboration with the cooperating teacher. Faculty advisors and the Director of Field Experience and Student Teaching, working in conjunction with individual students, will determine appropriate practicum placements. (2 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

LSI 418  
PRACTICUM IN SPECIAL EDUCATION III  
Graduate  
In this field-based course, candidates are introduced to teaching in a self-contained, special education classroom. Candidates will interact with students and will plan and conduct small-group and large-group instruction in collaboration with the cooperating teacher. Faculty advisors and the Director of Field Experience and Student Teaching, working in conjunction with individual students, will determine appropriate practicum placements. (2 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

LSI 419  
TEACHING LITERACY LAB  
Graduate  
In this course, candidates provide literacy (i.e., language, reading, spelling, writing) instruction to exceptional students and use informal assessments and progress monitoring to guide instructional practices and differentiation. Supervision, coaching, and mentoring in implementing effective instructional strategies for exceptional students is provided by program faculty. The course develops the concept of documenting impact on student learning. This experience is offered in an on-campus facility that serves at-risk literacy learners and students with mild-moderate disabilities. (2 credit hours)

Status as a Graduate Education student is a prerequisite for this class.

LSI 421  
FORMAL ASSESSMENT IN SPECIAL EDUCATION  
Graduate  
This course considers the theoretical, legal, ethical, and technical aspects of formal assessment in special education as well as models of nondiscriminatory assessment in the context of the requirements of special education law. Candidates gain knowledge of a variety of formal assessments including their purposes, characteristics, and limitations. They learn how to select, adapt, administer, score, interpret, and communicate the results of class-wide and individual assessments. Attention is given to collaborative assessment and educational planning based on assessment results, particularly the development Individual Education Program (IEP) goals, objectives, and recommendation for instruction.

Status as a Graduate Education student is a prerequisite for this class.
LSI 430
INTRODUCTION TO READING ASSESSMENT
Graduate
This course introduces students to the foundational concepts of reading assessment, with an emphasis on the multiple roles of assessment in today's schools: to evaluate, to classify, and to guide instruction. Students will be introduced to formal and informal measures of reading achievement and development, and will have scaffolded opportunities to administer, interpret, and use results for instructional planning. Additional topics to be covered include characteristics of informal and formal assessment (e.g., test construction, reliability and validity, and non-discriminatory testing), and the roles of assessment in the diagnosis and identification of reading disabilities. Students will be introduced to case report writing to deepen their understanding of reading difficulties as well as to clearly communicate assessment findings to a variety of individuals, including parents.

Status as a Graduate Education student is a prerequisite for this class.

LSI 431
FOUNDATIONS OF LITERACY: ASSESSMENT AND INSTRUCTION I
Graduate
This course focuses on understanding the foundations of literacy across the grade span, with a particular emphasis on the development of reading abilities among emergent and developing learners (preschool through 3rd grade). The history of theoretical models is explored in relation to current educational policies and practices. Topics include understanding the developmental process, utilizing a variety of informal assessments, and selecting research-based instructional practices. A strong emphasis is placed on designing standards-based lesson plans and the integration of narrative and expository texts to meet the unique needs of individual children, including those with identified disabilities and/or who exhibit learning challenges.

Status as a Graduate Education student is a prerequisite for this class.

LSI 432
DEVELOPING LITERACY: ASSESSMENT AND INSTRUCTION II
Graduate
This course focuses on the development of literacy across the grade span, with a particular emphasis on the development of written language abilities among students at the intermediate and secondary levels (4th-12th grade). Topics include understanding the developmental process, utilizing a variety of formal and informal assessments, and selecting research-based instructional practices. A strong emphasis is placed on designing standards-based lesson plans to meet the unique needs of individual students. Strategies for providing differentiated instruction and interventions for students who require remediation of foundational skills, including those with identified disabilities and/or who exhibit learning challenges, are also explored.

LSI 431 and status as an Advanced Masters Education student are a prerequisite for this class.

LSI 433
ASSESSMENT AND DIAGNOSTIC TEACHING OF READING
Graduate
This course is designed to give the student an understanding of the characteristics of children with reading difficulties, the process of diagnostic evaluation, test interpretation and report writing, and strategies for intervention. It is also designed to give practical experience with selected tests used to identify specific reading needs. Emphasis will be given to the use of case study material to analyze and interpret assessment data, write assessment results, and develop instructional recommendations.

LSI 430 and status as an Advanced Masters Education student are a prerequisite for this class.

LSI 434
LITERATURE FOR SUCCESSFUL AND STRUGGLING READERS
Graduate
This course will familiarize students with different genres of quality children's literature and how to select and use books that are appropriate and meaningful for children and youth with and without reading disabilities. Students will discuss, analyze, and critique literary elements (author's style of writing, character development, setting, mood, and theme), determine estimated readability levels, and engage in reader response activities that promote critical discussion and a personal interaction with text. Students will become familiar with authors, illustrators, and books that represent diverse cultures, races, ethnic and ability groups, and develop meaningful literature extensions that support various curricular areas, develop literacy skills, and promote an enjoyment of reading.

Status as an Education student in the LSI program is a prerequisite for this class.
LSI 435
LITERACY PROGRAMS: CURRICULUM AND COLLABORATION
Graduate
This course will prepare students to assume a leadership role within a school or district in selecting, implementing, and evaluating literacy instructional programs. Students will be supported in using educational research to inform decision-making and identifying effective methods and curriculum, particularly for students with identified disabilities and/or those who exhibit learning challenges. Approaches to collaborating with relevant stakeholders (e.g., administrators, teachers, school-based professionals, parents, and community members) and advocating for curricular change will also be explored.

Status as a Graduate Education student is a prerequisite for this class.

LSI 437
LEADERSHIP AND PROFESSIONAL DEVELOPMENT IN LITERACY
Graduate
In this course, an emphasis will be placed on developing the necessary skills to support school-based professionals in the effective implementation of literacy instruction and assessment. Applying models of professional development and coaching, students will identify a variety of resources to design professional development activities that include modeling, scaffolding, evaluation, and reflection. Aspects of change theory and its application to creating school-wide professional development plans will also be examined.

LSI 431, LSI 432, and LSI 543 or LSI 544 (or equivalent) and status as a Graduate Education student are prerequisites for this class.

LSI 438
LITERATURE-BASED AND CONTENT AREA LITERACY INSTRUCTION
Graduate
This course addresses the integration of reading, writing, and oral language into the content areas. Candidates learn to assess the reading needs of students in content area courses and to design, select, modify, and evaluate a wide range of materials for the content areas. Attention is given to the characteristics of engaging, quality literature and well-structured, accessible expository texts, as well as applying these qualities to select books to engage K-12 students of a variety of backgrounds and skill levels. The course goes beyond teaching a set of isolated generic reading comprehension skills and provides explicit, research-based instructional strategies that can be applied across content areas to prepare students to read, write, talk, and think critically about complex texts, as well as to develop positive literacy identities and motivation to read.

LSI 440
SURVEY OF EXCEPTIONAL LEARNERS: PSYCHOLOGY AND EDUCATION
Graduate
A survey of exceptional learners and characteristics of students with both high- and low-incidence disabilities, with consideration of placements appropriate for children with such disabilities. Emphasis on historical, theoretical, practical and legal implications and issues. The course also addresses the importance of developing and maintaining collaborative relationships with parents and professionals in order to maximize the academic, social, and emotional benefits of all learners.

LSI 442
SURVEY AND CHARACTERISTICS OF THE EXCEPTIONAL LEARNER
Graduate
A survey of exceptional learners and characteristics of students with both high and low incidence disabilities, with consideration of alternative placements appropriate for children with various disabilities including the learning disabled. Emphasis on historical, theoretical, practical and legal implications and issues, as well as on the roles of special education professionals, including consultation and collaboration, in inclusion of exceptional learners.

LSI 443
PSYCHOLOGICAL TESTS AND METHODS IN DIAGNOSIS
Graduate
Principles of measurement and test construction including an evaluation of standardized test instruments. Principles of broad-based assessment involving case history, criterion-referenced tests and informal assessment. Emphasis on understanding the strengths and limitations of a wide variety of assessment instruments.
LSI 446
PSYCHOLOGY AND EDUCATION OF THE EXCEPTIONAL CHILD
Graduate
Identification, characteristics, programs, schools, curricular variations, techniques for securing maximal development. Includes historical background, current legal and service provision issues including mainstreaming and inclusion.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

LSI 456
ADVANCED ISSUES AND STRATEGIES IN SPECIAL EDUCATION
Graduate
This course will examine current trends, issues, and strategies in the field of special education. This is an advanced course that will consider topics related to inclusion, overrepresentation, and transition services such as modifying curriculum, positive behavioral supports, collaboration and co-teaching, teacher scheduling, student scheduling, behavioral and academic data collection within general education classrooms, communication with families, developing and implementing IEP’s, and managing paraprofessionals. Prerequisite: LSI 442 or LSI 446 or equivalent.

LSI 457
SEMINAR AND RESEARCH IN SPECIAL EDUCATION
Graduate
This course examines current research in special education including topics such as the social construction of special education; the assumptions of deficit vs. difference models of educational services; the overrepresentation of students of color and students from lower socioeconomic status backgrounds in special education; placement settings, inclusion, and service delivery models; and issues related to the short and long-term effects of special education on the lives of students with disabilities. Students select and pursue a topic of research interest and complete a professional portfolio. (Prerequisites: LSI 458, LSI 467, LSI 468, LSI 469).

LSI 458
TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES I
Graduate
Introduction to the theoretical and practical approaches to instruction for students with high incidence disabilities across ages and levels of severity. Emphasis on developing an understanding of supportive learning environments, classroom and behavior management; developing collaborative practices with multiple service providers and families to meet the needs of diverse learners with high incidence disabilities. Strategies and materials for improving the social, emotional, and academic adjustment and functioning of students with high incidence disabilities are examined. Includes teaching social and emotional curricula; developing and implementing functional behavioral assessment; and monitoring growth and development in targeted areas. Strategies to increase the individual's self awareness, self-management, self control, self reliance, and self esteem are considered.

(LSI 440 and Learning Behavior Specialist 1) or (LSI 442 and Dual Certification) is a prerequisite for this class.

LSI 461
COLLABORATIVE PRACTICE AND SPECIAL EDUCATION
Graduate
The purpose of this course is to develop pre-service teachers' understanding of the importance of developing and maintaining collaborative relationships with parents and professionals in educational environments. Students will develop an understanding of professional and legal responsibilities, networks, organizations, and services available for students with disabilities and their families. Students will also examine various educational models for working collaboratively with teachers, parents, and support personnel in classrooms and schools. Students will articulate a personal philosophy and strategies for working collaboratively with families, teachers, paraprofessionals, and other professionals within educational environments.

LSI 462
INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH DISABILITIES I: ACCESSING GENERAL EDUCATION CURRICULUM
Graduate
This course focuses general theories of learning, instructional modifications, accommodations, grouping strategies, technology, and assessments used for helping to provide students with disabilities access to general education curricula. Course topics will focus on the effectiveness of these strategies for working with students with mild, moderate, and severe disabilities. Students will begin to articulate a personal philosophy and approaches designed to enhance the educational experiences of children and youth with disabilities and they will begin to examine the relationship between schooling and long term outcomes.
LSI 465
INDUCTION INTO THE FIELD OF EDUCATION
Graduate
Designed primarily as a culminating course experience at the graduate level, this course utilizes a seminar approach to help students clarify their understanding of issues related to special education, general education, and teaching in urban schools. All students will prepare a portfolio based on their experiences within the graduate program. These portfolios will contain evidence of each student’s development during the program and students will make connections between their own theoretical, philosophical, and professional orientations and the Urban Professional Multicultural Model.

LSI 467
TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES II
Graduate
Continued study of the theoretical and practical approaches to instruction for students with high incidence disabilities across ages and levels of severity. Translation of diagnostic information into teaching strategies and development of an instructional plan (IEP) including transition needs. Emphasis on understanding theoretical models of literacy, literacy development, instructional strategies, and adjusting literacy instruction to meet the needs of diverse learners. Principles of diagnostic teaching will be discussed. Specific teaching techniques and materials will be reviewed, including appropriate uses of technology.

(LSI 440 and Learning Behavior Specialist 1) or (LSI 442 and Dual Certification) is a prerequisite for this class.

LSI 468
TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES I
Graduate
Introduction to the theoretical and practical approaches to instruction of children with low incidence disabilities including functional assessment and instructional strategies, curricular options and adaptations, as well as levels of participation and accommodation in the general curriculum. Emphasis will be placed on understanding theoretical models of language development and communication, instructional strategies for language and communication, and adjusting language instruction to meet the needs of diverse learners. Candidates will explore individualized planning (IEPs), transition needs, integration of related services into the instructional program, and strategies and materials for improving the social, emotional, and academic functioning of diverse students with low-incidence disabilities.

(LSI 440 and Learning Behavior Specialist 1) or (LSI 442 and Dual Certification) is a prerequisite for this class.

LSI 469
TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES II
Graduate
Continued study of the theoretical and practical approaches to instruction for diverse students with low incidence disabilities. Focuses on addressing the intellectual, educational, physical, motor, health, social, and transitional needs of diverse students with more severe low incidence disabilities. Examination of etiological factors, growth, development, and long-term outcomes. Developing collaborative efforts with family and multiple care and service providers is addressed. Provides strategies to facilitate maintenance and generalization of both academic and non-academic skills across learning environments. Includes experiences with assistive technology, community-based instruction, and designing and implementing a functional curriculum when needed.

(LSI 440 and Learning Behavior Specialist 1) or (LSI 442 and Dual Certification) is a prerequisite for this class.

LSI 470
STUDENT TEACHING IN SPECIAL EDUCATION
Graduate
Five school days per week in supervised teaching experience for 12-weeks. Candidates will also attend a student teaching seminar (LSI 471) one day per week where they will discuss special education topics related to this experience. Faculty advisors and the Director of Student Teaching, working in conjunction with individual students, will determine appropriate student teaching placements. (6 credit hours)

Status as a Graduate Education student and LSI 440, 402, 403, 409, 410, 421, 416, 417, 418, 419 (or equivalent) are prerequisites for this class
LSI 471
STUDENT TEACHING IN SPECIAL EDUCATION SEMINAR
Graduate
This seminar course provides support for candidates as they begin their student teaching experience. In addition and in conjunction with student teaching, candidates will complete a project designed to document a candidate’s ability to impact student learning based on three to five days of teaching (edTPA).

Status as a Graduate Education student and LSI 440, 402, 403, 409, 410, 421, 416, 417, 418, 419 (or equivalent) are prerequisites for this class.

LSI 475
METHODS OF TEACHING EARLY CHILDHOOD STUDENTS WITH LOW INCIDENCE DISABILITIES
Graduate
This course will focus on examining the developmental and learning characteristics of young children with low incident disabilities. In specific, this course will focus on educating early childhood students with Autism Spectrum Disorders and those with Intellectual Disabilities. One of the primary goals of this course is to understand the learning needs of these children, and examine and evaluate various educational and therapeutic methods of working with them. A major part of this course will be devoted to characteristics associated with and interventions for children with Autism Spectrum Disorders.

LSI 476
SPECIAL EDUCATION CURRICULUM AND STRATEGIES FOR EARLY CHILDHOOD: HIGH INCIDENCE DISABILITIES
Graduate
Study of the theoretical and practical approaches to instruction for young children with high incidence disabilities. Emphasis placed on the development of supportive learning environments, using special curricular and behavioral management strategies for all early childhood settings; application of collaborative practices with multiple service providers and families to meet the needs of diverse learners with high incidence disabilities. Strategies and materials for improving the social, emotional, and academic adjustment and functioning of young children with high incidence disabilities are examined. Includes teaching social and emotional curricula; implementing functional behavioral assessment; and monitoring growth and development in targeted areas. Strategies to increase the young child are self-awareness, self-management, self control, self reliance, and self esteem are considered. Application of diagnostic information into teaching strategies and implementation of an instructional plan (IEP) is a central tenet of the course. (Pre-requisite: SCG 404 and T&L 427) 25 clock hours for Level II Experience.

LSI 487
FOUNDATIONS OF LITERACY AND SPECIAL EDUCATION FOR THE MIDDLE GRADERS
Graduate
Introduction to disabilities and the historical and legal foundations of special education. This course will prepare candidates to address the emotional, social, psychological, and cognitive needs of students with disabilities, with a particular emphasis on addressing the needs of students with reading and learning disabilities at the middle school level, including developmental and remedial instruction and support.

***This course counts toward Reading Teacher endorsement. Co-requisites for this course are MGE 421 and MGE 431. In this course, students will:1. Discuss the historical and legal foundations of special education 2. Identify the characteristics of students with disabilities, with an emphasis on high incidence disabilities 3. Demonstrate understanding of the foundational skills that underlie reading and comprehension 4. Learn strategies for working with struggling readers, with and without disabilities, at the middle school level, including development and remedial instruction and support

MGE 401 is a prerequisite for this class.

LSI 542
PRACTICUM IN LITERACY ASSESSMENT
Graduate
This practicum course provides students with an opportunity to apply theory to practice in assessing and teaching struggling literacy learners. Under the supervision of program faculty, students are responsible for completing a comprehensive assessment battery with a struggling literacy learner, interpreting results across assessments, developing and implementing an instructional plan, writing a case report, and discussing results with family members and/or other stakeholders.

LSI 430 and status as an Advanced Masters Education student are a prerequisite for this class.
LSI 543
PRACTICUM IN LITERACY INSTRUCTION AND ASSESSMENT
Graduate
This practicum course provides students with an opportunity to apply theory to practice in teaching struggling literacy learners. Under the supervision of program faculty, students are responsible for developing, implementing, and evaluating an individual learning plan for a client(s) that includes ongoing assessment of learning objectives. Students write a case report, summarizing outcomes of instructional sessions, to communicate progress towards goals to a variety of individuals, including parents.

LSI 431 and status as an Advanced Masters Education student are a prerequisite for this class.

LSI 544
PRACTICUM IN LITERACY INSTRUCTION, ASSESSMENT, AND COLLABORATION
Graduate
This practicum course provides students with an opportunity to apply theory to practice in teaching struggling literacy learners. Under the supervision of program faculty, students are responsible for developing, implementing, and evaluating an individual learning plan for a client(s) that includes ongoing assessment of learning objectives. Students write a case report, summarizing outcomes of instructional sessions, to communicate progress towards goals to a variety of individuals, including parents. Collaboration with peers for professional growth, which involves providing feedback on each other's practices, is also emphasized.

LSI 431 and status as an Advanced Masters Education student are a prerequisite for this class.

LSI 548
INDEPENDENT STUDY IN READING AND OTHER LEARNING DISABILITIES
Graduate
REREQUISITE(S): Permission of instructor, department chair and associate dean. (2 credit hours)

LSI 549
THESIS RESEARCH IN SPECIALIZED INSTRUCTION
Graduate
A Master of Arts candidate conducts original research, writes a thesis, and presents an oral defense before a committee of faculty members. PREREQUISTE(S): SCG 410 and approved thesis proposal.

LSI 552
PRACTICUM EXPERIENCE WITH HIGH INCIDENCE DISABILITIES
Graduate
Six weeks of supervised field experience in a cooperating school working with students with high incidence disabilities, together with structured opportunities for feedback and discussion of issues and problems encountered.

LSI 440, LSI 458 and LSI 467 are a prerequisite for this class.

LSI 553
PRACTICUM EXPERIENCE WITH LOW INCIDENCE DISABILITIES
Graduate
Six weeks of supervised field experience in a cooperating school working with low incidence disabilities, together with structured opportunities for feedback and discussion of issues and problems encountered.

LSI 585
STUDENT TEACHING AND SEMINAR IN SPECIAL EDUCATION-ELEMENTARY EDUCATION
Graduate
Five school days per week in supervised teaching experience for a full academic quarter. Students will also attend a student teaching seminar one day per week where they will discuss issues related to this experience. Faculty advisors and the Director of Student Teaching, working in conjunction with individual students, will determine appropriate student teaching placements. Permission required. (8 credit hours)
LSI 597
EARLY CHILDHOOD EDUCATION SPECIAL EDUCATION PRACTICUM
Graduate
Supervised teaching in a cooperating school serving young children with disabilities for three hundred clock hours; arranged in collaboration
with supervising faculty member and the Field Experience Office. Candidates will reflect upon their teaching experiences with young children
with disabilities; collaborate with colleagues and instructor to identify alternative strategies for problematic situations. Application and
approval required. Open only to DePaul students.

LSI 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments
for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

LSI 606
REVIEW OF LITERATURE
Graduate
This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance
life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., reviewing and
synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching data bases. In other words,
students will need to be able to ask and answer such questions as "What is known about? What are major issues and themes?" (0 credit
hours)

LSI 607
INTEGRATIVE PAPER
Graduate
Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it
relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of
a theory, or conversely, developing/refining a theory based on investigations made in the field. In other words, as graduates encounter new
theories and practices they will need to be able to investigate and evaluate them, asking and answering questions about "How theories work."
(0 credit hours)

LSI 608
CAPSTONE IN SPECIALIZED INSTRUCTION
Graduate
Culminating experience(s) that help(s) students acquire the qualities of professionalism and leadership needed to play a significant role in
one's professional education community. Students are expected to situate and understand educational issues in a larger context; keep current
in and be able to organize and present a body of research on an education-related question; connect research with practical, professional
activity; demonstrate mastery of a sub-field of a discipline; write in a format that meets accepted scholarly criteria and participate in an
ongoing professional conversation. A final product such as master's paper(s), comprehensive exam, or collection of professional work
products is required. (0 credit hours)

LSI 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for
their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required.
Registration limited to three terms. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.
LSP 110
**DISCOVER CHICAGO**
*Undergraduate*
Discover Chicago courses acquaint first-year students with the metropolitan community, its neighborhoods, cultures, people, institutions, organizations, and issues. Students also learn about university life, resources, and strategies for academic success. Learning is accomplished through a variety of means including first-hand observation, active participation, personal discovery, reflection, discussion, and encounters with Chicagoans both in the classroom and on excursions. The course begins with Immersion Week one week prior to the official start of the Autumn Quarter, then continues through the first eight weeks of the quarter. Students select from a variety of Chicago-related topics. First-year students must register to take either LSP 110 (Discover Chicago) or LSP 111 (Explore Chicago) during their first quarter at DePaul. Students will receive credit for only one section of Chicago Quarter (Discover or Explore). Courses are offered during the Autumn Quarter and are available to first-year students only. Formerly ISP 103. (Honors students take HON 110.)

LSP 111
**EXPLORE CHICAGO**
*Undergraduate*
Explore Chicago courses acquaint first-year students with the metropolitan community, its neighborhoods, cultures, people, institutions, organizations, and issues. Students also learn about university life, resources, and strategies for academic success. Learning is accomplished through a variety of means including first-hand observation, active participation, personal discovery, reflection, discussion, and encounters with Chicagoans both in the classroom and on excursions. Students select from a variety of Chicago-related topics. First-year students must register to take either LSP 110 (Discover Chicago) or LSP 111 (Explore Chicago) during their first quarter at DePaul. Students will receive credit for only one section of Chicago Quarter (Discover or Explore). Courses are offered during the Autumn Quarter and are available to first-year students only; limited additional sections are offered later in the year. Formerly ISP 102. (Honors students take HON 111.)

LSP 112
**FOCAL POINT SEMINAR**
*Undergraduate*
Focal Point Seminars provide first-year students with the opportunity to learn how to closely examine a single topic, such as a significant person, place, event, text, idea, or issue. Students discover the complexity of a subject by studying it from the perspectives of multiple disciplines and different fields of inquiry, and by reading and writing extensively about it. Because the class is a seminar, students also debate the topic through lively class discussions. Students select from a variety of topics. Students will receive credit for only one section of LSP 112. Courses are offered during the Winter and Spring Quarters and are intended for first-year students.

WRD 103 or HON 100 is a prerequisite for this class.

LSP 120
**QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I**
*Undergraduate*
This course provides a mathematical foundation for students to become confident and critical users of quantitative information of all kinds: numerical, graphical, and verbal. Students analyze data from a wide variety of fields, making and critiquing quantitative arguments. Mathematical topics include proportional reasoning and rates, the making and interpretation of graphs, linear and exponential models, logarithms, and finance. The course is taught in a hands-on laboratory environment where students are introduced to computer tools for data analysis and presentation. PREREQUISITE(S): MAT 100, MAT 101, or demonstrating readiness via the math placement test taken at matriculation. As an alternative to taking LSP 120, this requirement can be met by passing a separate LSP 120 Proficiency Exam (see qrc.depaul.edu). A student whose major requires calculus is exempt from this requirement. Formerly ISP 120.

LSP 121 or MAT 100 or MAT 101 or placement by test is a prerequisite for this class.

LSP 121
**QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II**
*Undergraduate*
This course provides more advanced mathematical and computational methods in the analysis and interpretation of quantitative information. Topics include databases, descriptive statistics, measures of association and their interpretation, elementary probability theory, and an introduction to algorithms and computer programming. The course is taught in a hands-on laboratory environment where students are introduced to advanced computer tools for data analysis, including databases and a professional statistical software package. PREREQUISITE(S): LSP 120 or a passing score on the LSP 120 Proficiency Exam. As an alternative to taking LSP 121, this requirement can be met by passing a separate LSP 121 Proficiency Exam (see qrc.depaul.edu). A student whose major requires calculus is exempt from this requirement. Formerly ISP 121.

LSP 120 or (MAT 147 or above) is a prerequisite for this class.
LSP 199
INDEPENDENT STUDY
Undergraduate
Permission of instructor and of First-Year Program Director required before registration.

LSP 200
SEMINAR ON MULTICULTURALISM IN THE UNITED STATES
Undergraduate
This course provides the opportunity for students to learn about some dimension of multiculturalism relevant to the United States, as considered in the context of the global community. Multiculturalism includes questions of ethnicity, race, class, gender, language, religion, and sexual orientation. Courses pay attention to the history of multiculturalism; examine the experiences and perspectives of at least three distinct cultural groups; develop a critical perspective about meanings of multiculturalism; and investigate the historical roots of inequalities related to differences in class, ethnicity, gender, age, language, religion, ability, and sexual orientation. Topics of seminars vary and students select a course that interests them. Students can complete only one course numbered LSP 200. Formerly ISP 200.

At least Sophomore Standing is a prerequisite for this course.

LSP 201
TRANSFER CAREER SEMINAR
Undergraduate
This course, exclusively for transfer students, considers career preparation in the context of the college of Liberal Arts and Social Sciences. Students will be made aware of LAS's academic, institutional and co-curricular resources as they pertain to future career success. Discussion and reading will center on values and skills learned in liberal arts education and their applicability in the wider world. This course also provides a space for students to share their experience as transfer students. As such, a transfer student mentor contributes to this class.

LSP 320
PEER EDUCATION THEORY AND PRACTICE
Undergraduate
This course is designed to introduce students to the principles and practices of how to mentor first-year students into the academic, intellectual and social life of the University. The course also prepares students to serve, if selected, as peer educators for incoming students in the upcoming autumn quarter. Formerly ISP 320.

LSP 321
PEER EDUCATION THEORY AND PRACTICE II
Undergraduate
This course is designed to support students chosen to serve as peer educators with the principles and practices of how to mentor first-year students into the academic, intellectual and social life of the University. Formerly ISP 321.

LST 113
LATINO RELIGIOUS EXPERIENCE IN THE UNITED STATES
Undergraduate
An examination of the diverse nature of Latino religion, from its indigenous roots to its institutional forms, within the social and political context of American culture. Cross-listed with REL 113. Formerly LST 290.

LST 121
LATIN AMERICA TO C. 1765: PRE-COLUMBIAN SOCIETIES AND THE COLONIAL PERIOD
Undergraduate
A survey of Latin American history that offers a continental approach to the colonial period. Special attention is given to Native American societies before 1492, to the Spanish conquest of Mexico and Peru, to the trade in African slaves (Spanish and Portuguese colonies), and to issues of race, class, and gender during the colonial period. Cross-listed with HST 121.
LST 122
LATIN AMERICA, 1765-1914: THE LONG 19TH CENTURY
Undergraduate
One of the main goals of this course is for students to determine whether the long 19th century was an era of revolution and social change or a continuation of colonial institutions and policies. To address this broad question, the course focuses on the Bourbon Reforms, the Wars of Independence, the problems associated with nation building, and the neo-colonial order. Through the analysis of some individual countries (for example Mexico, Argentina, and Brazil) students will study key issues like slavery, the "India question," race relations, class formation, social inequalities, authoritarianism, Church-State relations, liberalism, subaltern resistance, and North-South relations. Cross-listed with HST 122.

LST 123
LATIN AMERICA, 1914-2010
Undergraduate
This is an introductory course designed to provide students with a basic and general knowledge of Latin American history from the 1910s to the present. The course highlights the challenges and failures the new republics faced. Due to the diverse historical experiences, cultures, and economic and political systems, the course will focus on the main social, political, and economic issues that shaped Latin America during the 20th century (democracy, social revolution, social justice, political violence, and repression). Cross-listed with HST 123.

LST 145
ARTS OF THE AMERICAS
Undergraduate
This is an introduction to major developments in art from the ancient indigenous cultures of the Americas (especially those of Meso- and South America), through the period of European colonialism (especially Spanish and English), to the modern art movements across the newly sovereign nations, including the United States and Canada. The broad chronology and geography necessitates a sampling of artistic forms across times, with issue-oriented lectures and occasional discussion. Cross-listed as HAA 145.

LST 200
FOUNDING MYTHS AND CULTURAL CONQUEST IN LATIN AMERICA
Undergraduate
This course challenges students to connect the cataclysmic formation of the Latin Americas from the cultures of Europe, Africa, and the Native (indigenous) peoples with the processes that inform our modern world. Colonialism, social stratification and forms of conflict and rebellion all played pivotal roles in the formation of Latin America from origins to the 18th century. The history and culture of the region is presented from many perspectives and across many disciplines.

LST 201
STRUGGLE AND RESISTANCE IN LATIN AMERICA
Undergraduate
Latin America is more than a geographical reality. This interdisciplinary course asks how Latin America has been forged through local and global struggles for economic sovereignty, political self-determination, social and cultural identities in the 19th, 20th, and 21st centuries. Students will be introduced to the histories of economic dependence after the dawn of political independence, the intertwined dynamics of U.S. interventionism and Latin American resistance, the making of indigenous movements, as well as the interrelated issues of gender, race, and sexuality.

LST 202
CONSTRUCTING LATINO COMMUNITIES
Undergraduate
This course is an interdisciplinary introduction to Latino Studies. It explores the socio-historical background of the major Latino groups in the United States, and the economic, political, and cultural factors that converge to shape Latino group identity. This course examines contemporary issues affecting Latinos including the evolution of Latino ethnicity, immigration, transnationalism and the formation of Latino communities, activism, and media representations of Latinos.

LST 203
MEDIA AND CULTURAL STUDIES ACROSS THE AMERICAS
Undergraduate
LST 203 is an introduction to media and cultural studies with a specific focus on cultural transactions in the American hemisphere, particularly as they reflect the relationship of the U.S. to Latin America, Central America, Mexico, and the Caribbean. This course studies the history of national and cultural identities and social struggle, especially with regard to a north/south relationship, imperialism, revolution and social change, tourism, globalization, postcolonialism and the construction of gender, sexuality, race, and ethnicity. Students examine how relationships across the Americas have been depicted in popular culture and the social and political meanings of these representations.
LST 204
**FILM AND LATIN AMERICAN HISTORY**
Undergraduate
An inquiry into the way film portrays historical events in Latin America. Cross-listed with HST 204.

LST 205
**MEXICO AFTER INDEPENDENCE**
Undergraduate
This survey covers the history of Mexico from 1821 to the present. It will examine the difficulties of nation-building during the 19th Century, the Mexican Revolution (1910-1940), and the success and failure of the "Mexican Miracle." Cross-listed with HST 200.

LST 206
**MEXICO: FROM THE OLMECS TO INDEPENDENCE**
Undergraduate
This course surveys the history of Mexico from the rise of the Olmec Civilization to Mexican Independence in 1821. It will examine the rise, fall, and continuities of Mesoamerican civilizations, the Spanish conquest, and the creation of the colonial order. Cross-listed with HST 206.

LST 207
**AFRO-CARIBBEAN AND AFRO-LATIN AMERICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS**
Undergraduate
This course introduces students to the study of peoples of African descent in the Caribbean and Latin America through lenses of history, politics, and culture. Students will learn how racial identities are constructed and interpreted in the Americas and the ways these identities have shaped Latin American and Caribbean cultures, politics, and societies. This course will explore broad patterns, changes, and continuities in the history of the African Diaspora in the hemisphere through an analysis of various topics such as conquest, colonization, slavery, independence struggles, nation-building, imperialism, neo-colonialism, revolution, violence, social movements, and inter-American relations. Cross-listed with ABD 206.

LST 217
**WORK IN A GLOBALIZED WORLD**
Undergraduate
The purpose of this course is to make a direct connection between the needs and strategies of individuals, companies, industries, and nations regarding work, and how they interact to create specific work environments and work outcomes for individuals in a globalized world. The course emphasizes how globalization, by creating an international labor market and an environment of competition between nations to attract jobs, has deeply transformed the work experience of individuals and the quantity and quality of jobs available in the United States, Latin America, Asia, and the rest of the world. Cross-listed with SOC 217.

LST 218
**SPAIN AND PORTUGAL**
Undergraduate
A geographical exploration of Spain and Portugal’s history, culture, politics and society. This course focuses on critical periods, events, and socio-political forces that substantially influenced these countries and demonstrate their role as one of Europe’s key links to Latin America and Africa. Cross listed with GEO 218.

LST 243
**MAYA ART AND ARCHITECTURE**
Undergraduate
The "Classic Period" Maya (circa 0-900CE) are the source of modern interest for their graceful naturalism in a wide range of art forms and for their impressive architecture whose ruins today are found scattered across Southern Mexico, the Yucatan Peninsula, Guatemala, Belize, and Honduras. This class will explore the political, social, economic and religious imperatives behind the soaring temples, intriguing ballcourts, stately public sculptures, delicately painted vases, complex manuscripts and much more. We will situate the art of the Maya relative to other Mesoamerican cultures, particularly those of the Olmec, Teotihuacan and Aztec, and with respect to the Spanish colonial invasion. Other themes include aesthetics, materiality, gender, interpretive methodologies, and the impact of hieroglyphics and calendrics on the study of Maya art. Cross listed with HAA 243.
LST 244
ART OF MESOAMERICA
Undergraduate
This survey of art of the ancient Mesoamerica (circa 1000BC-1520AD) focuses on the most artistically significant civilizations of Middle America and some of the difficulties encountered in studying them. Lectures explore visual traditions as diverse as the people they reflect; cultures to be covered include the Olmec, Maya, Teotihuacan, and Aztec. We consider the relationship between form and content, and the relationship between art and its social context, as much as we can understand it; however, especially because of the scarcity of primary source texts for the material, the class will also regularly raise questions of methodology in what is often identified as "pre-Columbian" scholarship. Cross-listed with HAA 244.

LST 245
ART OF THE ANDES
Undergraduate
This survey of art of the ancient Andes (circa 1000BC-1530AD) focuses on the most artistically significant civilizations of South America and some of the difficulties encountered in studying them. Lectures explore visual traditions as diverse as the people they reflect; cultures to be covered include the Nazca, Moche, Tiahuanaco, Wari and Inca of Peru. We consider the relationship between form and content, and the relationship between art and its social context, as much as we can understand it; however, especially because of the scarcity of primary source texts for the material, the class will also regularly raise questions of methodology in what is often identified as "pre-Columbian" scholarship. Cross-listed with HAA 245.

LST 246
ART IN THE SPANISH AMERICAN EMPIRE
Undergraduate
This course offers a critical survey of the art of colonial Latin America (circa 1520s-1820s), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the 16th century and Independence in the early 19th century, lectures will survey state-sanctioned arts of the Iberian colonizers, including the foundations of the Catholic Church across the "New World" landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context. Cross-listed with HAA 246 and CTH 250. Formerly LST 248.

LST 247
ART OF THE ANCIENT AMERICAS
Undergraduate
This class surveys the art of the ancient Americas (circa 1000 BCE-1520 AD), with a focus on the most artistically significant civilizations of Mesoamerica and South America, and some of the difficulties encountered in studying them. Lectures will explore visual traditions as diverse as the people they reflect; cultures to be covered include the Olmec, Maya and Aztec of Mesoamerica, and the Moche and Inca of Peru. Since most of these cultures did not use the written word, the class will also regularly raise questions of methodology in pre-Columbian scholarship.

LST 249
MODERN LATIN AMERICAN ART
Undergraduate
This lecture class is a survey of Latin American art created since the Wars of Independence which helped to create the modern nations in the 19th century (i.e. 1820s through the present). Lectures consider the struggle of artists to articulate newly sovereign identities through visual production, even as complicated relationships with Europe and increasingly, the United States, continue. Topics covered include Latin American modernism, surrealism, radical arts, and social realism, with a special consideration of post-revolutionary Mexican mural painting. Cross-listed with HAA 247.

LST 252
LATIN AMERICAN POLITICS
Undergraduate
An examination of the history of Latin America and the major institutions, social sectors, and actors that shape the political life of the region. The course focuses on the development of revolutionary regimes and movements as well as military regimes and their demise during the transition to democracy. Cross-listed with PSC 252.
LST 268
MEXICAN ART
Undergraduate
This survey situates the art of Greater Mexico in its rich historical context, from the territory on the eve of the Spanish Conquest to the early decades of the 21st century. From Aztec imperial art to colonial works, to efforts at nation-building through visual forms, the story of Mexican art is characterized by political and social change. Readings, lectures and discussion will touch on critical issues of race, class and gender, and take up themes such as miscegenation, indigenism, nationalism, and Mexico's place in the global art world. We will study famous works, such as the Aztec Calendar Stone, the Catholic image of the Virgin of Guadalupe, the post-revolutionary murals of Diego Rivera and the more intimate paintings of Frida Kahlo, but we will also consider less familiar art that has been equally important in the construction of Mexico and its identities. Cross-listed with HAA 248.

LST 285
AFRO-HISPANIC LITERATURE IN TRANSLATION
Undergraduate
In this 200-level course in literature (for credit in the Arts and Literature learning domain of the Liberal Studies Program), we will seek to determine what distinguishes the Afro-Hispanic novel, short story, drama or poetry from other works in these genres. We will read works that have been translated into English from their original Spanish versions and analyze how the use of language, imagery and narrative voice reflect the experience of people of African descent in the Spanish-speaking world as seen (or heard) in the text and context of these works. In addition, we will explore how race, class, politics and culture interact and find expression in Afro-Hispanic literature. Cross-listed with ABD 285.

LST 290
LATINO/A LIBERATION TRADITIONS
Undergraduate
What does liberation mean in the context of the Americas today? How have people of Latin American descent -- both in Latin America and the United States -- connected conceptions of liberation to related ideas of liberty and freedom, as well as to notions of political revolution, cultural identity, and prophetic forms of religious faith? This course examines how these questions have been theorized across the Latino/a Americas, especially as they relate to questions of religion. Topics include liberation philosophy, critical pedagogy, prophetic religion, cultural praxis, Latina feminism, and decolonial thought. Cross-listed with REL 290.

LST 291
LOOKING FOR GOD IN LATIN AMERICA
Undergraduate
An examination of religious traditions such as Catholicism, indigenous religions, and Protestantism in Latin America, with special focus on how these traditions have been transplanted and reshaped upon entry into varied Latino communities in the United States. Historical analyses of the Latin American roots of these traditions will provide contextualization for the ongoing examination of transnational religious cultures in the U.S. Cross-listed with REL 291.

LST 297
IMPERIAL SPAIN, 1469-1808
Undergraduate
Analysis of Spain and Spanish empire between 1468-1808. During this period, Spain united and became a leading global power with enormous consequences for Western and world history. Emphasis on the political, economic, socio-cultural history of Iberian society. Cross-listed with HST 297.

LST 300
SPECIAL TOPICS IN LATIN AMERICAN STUDIES
Undergraduate
SPECIAL TOPICS IN LATIN AMERICAN STUDIES
LST 303  
**BORDER MATTERS: LITERATURE & CULTURE IN THE LATINO/A BORDERLANDS**  
*Undergraduate*  
In this course we will study the values and dynamic that is promoted in different Latino communities in the United States. In order to give context to the present situation of Latinos in the U.S. we will study some of the social issues in the countries of origin which have resulted in immigration and their encounter with borderlands. The notion of a Latina and Latino cultural "borderlands" has proven a ubiquitous and powerful conceptual paradigm in recent years, organizing distinct ethnic groups (Cuban American, Mexican American, Central American, Puerto Rican, etc.) according to the rubrics of pan-ethnic identity labels (Hispanic, Latina/Latino, etc.) and transnational geographies (Latin America, the Americas, etc.). This course will examine a wide range of Latino/a literary expressions produced in the Latina/Latino borderlands, particularly in areas of cultural contact and conflict. While the most obvious focus will be the Texas-Mexico border region, including ongoing efforts to establish the public meaning of the Alamo, additional borderlands, literal and figurative, will be considered. The Latina and Latino borderlands have also inspired critics and theorists to imagine postmodern, post national subject formations, in which questions of ethnicity, gender, and sexuality are shifted from the margins to the center of critical discourse. We will therefor investigate the use and limits of recent 'border theory'.

LST 305  
**LATINO COMMUNITIES AND SOCIAL ENGAGEMENT**  
*Undergraduate*  
In-depth, critical examination of different Latino communities. Topics include: Mexican-American Community, Puerto Rican Community and Cuban-American Communities.

LST 306  
**LATINO COMMUNITIES IN CHICAGO**  
*Undergraduate*  
This course studies Latino Communities, focusing on their cultural and historical constructions from a community based learning experience.

LST 307  
**GROWING UP LATINO/LATINA IN THE U.S.**  
*Undergraduate*  
A critical as well as a community based examination of the experiences of growing up as a Latino/Latina person in the United States.

LST 308  
**MOTHERHOOD IN LATINO COMMUNITIES**  
*Undergraduate*  
This is an intellectual, as well as a community based exploration of motherhood in Latino communities and the theories of motherhood in feminist criticism throughout Latin America. Other topics: fatherhood, the extended family and the community as family.

LST 309  
**SOCIAL ENGAGEMENT AND LATINO FAMILIES**  
*Undergraduate*  
Social Engagement And Latino Families

LST 310  
**SPECIAL TOPICS: LATINOS IN THE U.S.**  
*Undergraduate*  
SPECIAL TOPICS: LATINOS IN THE U.S.

LST 311  
**CONTEMPORARY ISSUES AND SOCIAL ENGAGEMENT**  
*Undergraduate*  
Contemporary Issues And Social Engagement
LST 312
LATINA/O SEXUALITIES
Undergraduate
In this course the construction of sexuality as experienced by Latina/as will be examined through the analysis of recent interdisciplinary scholarship, literary selections and other popular cultural forms. We consider how gender and sexuality are constructed, enacted, represented, and communicated in a range of Latino/a communities and subcultures. Our analysis of readings/films/music will allow us to understand the changing and contested meanings of gender and sexuality within Latino/a culture.

LST 321
GLOBALIZATION IN THE AMERICAS
Undergraduate
In this course, we examine the processes of globalization in the Americas. The world seems to be a smaller place--accessible through the internet and global markets--and national borders seem to be more porous than ever before. Various agents--corporations, people, political organizers and organizations--are able to work on a global scale. Many critics argue that globalization has created a larger division between the wealthy and the poor. How has globalization affected the way we live our lives? In this course, we discuss the many debates around globalization and the political situation in Latin America, North America, and the Caribbean as well as the global justice movements that address inequity and injustice. You will become familiar with these debates and their histories, particularly with the growing anti-globalization position taken by many political leaders in Latin America. In this course, you will take a position regarding this contemporary political arena and become well-acquainted with various trends, policies, and activist movements around globalization. You will analyze your place in this political arena and determine how you will negotiate your position. We discuss the impact of various international organizations and trade agreements, from IMF, the World Trade Organization, the UN, the Organization of American States, NAFTA, and the Free Trade Area of the Americas. We will analyze the protest movements in Cancun and Seattle. We look at the increasing tourist apartheid in different parts of the Americas, particularly in the Caribbean. We discuss the impact and organization of international activism from anti-globalization movements to global justice movements. We will discuss and debate strategies for resistance. We access many of these issues through cultural productions (film, tv, advertisements, etc) that address the difficult dilemmas of neo-liberalism (rule of the market).

LST 322
MEXICAN CINEMA
Undergraduate
In this course we analyze the history and practice of a national cinema in relation to government film policy, filmmaking practices and programs, intellectual and cultural context, and national and popular concerns. We study various facets of Mexican cinema from conceptions of race/gender/sexuality, major figures of cinema, and the current conditions of Mexican Cinema. We will explore Mexican Cinema in relation to other film industries of the Americas, especially in relation to the United States and Hollywood and to the oppositional political practices of the New Latin American cinema of the sixties and seventies.

LST 330
LATINOS IN EDUCATION
Undergraduate
This course examines historical and current issues related to the education of Latinos in the US that range from PK-12 to higher education. The course explores the sociolinguistic, historical, sociocultural, legal and political contexts that shape the educational experiences of Latinos in the US, paying particular attention to policy and the current state of affairs in the education of Latinos. The Latino Diaspora will also be explored.

LST 336
EXPERIENCING MEXICAN ART
Undergraduate
The history of Mexican art in the Modern era. Some sections of this course will engage students in studio problems that address specific issues in the history of Mexican culture.

LST 338
COLONIAL LATIN AMERICAN ART
Undergraduate
This course will survey painting, sculpture, architecture, and the decorative arts in the Americas from contact with Europe up through independence movements of the 19th century. Special attention will be given to the intersection of artistic production with broad social, economic and political trends.
LST 348
INDIGENOUS POLITICAL STRUGGLES
Undergraduate
This course explores the struggles for social justice and the right to have rights by indigenous peoples. It emphasizes contemporary cases and the cultural contexts in which indigenous political strategies have developed and transformed. It uses historical data to understand the issues faced by indigenous peoples. Students conduct research on indigenous struggles and their connections to other social movements at the local, national, and international levels.

LST 358
REVOLUTIONS AND PEASANT REBELLIONS
Undergraduate
Analyzes the most important revolutions and peasant rebellions of the twentieth century as well as the most relevant cases from previous periods, such as the French Revolution. Cross-listed with SOC 358 and INT 319.

LST 375
MEXICO CITY (WORLD CITIES)
Undergraduate
From its origins as Tenochtitlan, the preordained capital of the Aztec Empire, through its identification as a "new Rome" dominated by the Spanish Crown in the Viceregal period, to its status as the largest metropolitan area in the Western Hemisphere (and the second largest in the world), Mexico City was born to impress the imagination. This class explores the development of the great city of Mexico in light of major historical events and cultural expressions. Discussions will focus especially on urban planning, key architecture, outdoor sculpture, and public spectacles over the centuries. Cross-listed with HAA 375.

LST 389
LATIN AMERICAN PHILOSOPHY
Undergraduate
What does it mean to speak of Latin American philosophy? What is the difference between merely doing philosophy in Latin America and doing Latin American philosophy? These are issues that some thinkers in Latin America grapple with. This course will explore the history and nature of Latin American philosophy. Moreover, we shall examine some of the reasons why, in sharp contrast to the European and Anglo-American philosophical traditions, questions of the very existence of an autochthonous Latin American philosophical tradition are heatedly debated both in Latin America and beyond. Cross-listed with PHL 389.

LST 390
SENIOR SEMINAR
Undergraduate
A capstone course that integrates the student's prior course work and experiences by allowing the student to define a final culminating project. The seminar functions as a coordinated independent study course with extensive participation of Latin American and Latino Studies Program faculty.

LST 392
INTERNSHIP
Undergraduate
INTERNSHIP

LST 394
THESIS
Undergraduate
THESIS

LST 395
TRAVEL/STUDY
Undergraduate
TRAVEL/STUDY
MAT 94
BASIC ALGEBRA
Undergraduate
The objective of this course is to increase the students' competence in working with ordinary arithmetic, using a large variety of practical problems and situations from basic sciences as motivation. Formerly WRC 104.

MAT 95
INTRODUCTORY ALGEBRA
Undergraduate
An introduction to functions, linear equations, linear inequalities, absolute values, systems of linear equations, exponents, and polynomials. Formerly WRC 204.

MAT 100
INTRODUCTION TO QUANTITATIVE REASONING
Undergraduate
An introduction to the algebra needed for quantitative reasoning with a focus on functions and modeling. This course emphasizes the applications of elementary algebra and the use of functions to model and analyze real-world situations. Topics include functions from graphical, tabular, and symbolic points of view and models using linear, quadratic, power, exponential, and logarithmic functions. Graphing technology is used extensively. This course is prerequisite to LSP 120 and is intended for students continuing on to LSP 120. This course is not recommended for students whose plan of study includes calculus.

MAT 101
INTERMEDIATE ALGEBRA
Undergraduate
Functions, factoring, rational expressions, roots, radicals, quadratic equations, quadratic inequalities. Course meets for an additional 1 hour lab session each week for enrichment and problem solving.

MAT 110
FOUNDATIONS OF MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS I
Undergraduate
This course gives students a deeper understanding of the foundations of elementary mathematics. Topics include problem solving, number systems, the decimal system, the number line, rounding, fractions, percentages, addition and subtraction.

MAT 111
FOUNDATIONS OF MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS II
Undergraduate
This course gives students a deeper understanding of the foundations of elementary mathematics. Topics include problem solving, fractions, percentages, addition, subtraction, multiplication, and division.

MAT 094 or placement is a prerequisite for this course.
MAT 112
GAMBLING AND GAMES, PROBABILITY AND STATISTICS
Undergraduate
Students with very little mathematical background and little or no computing background will be given a brief introduction to the use of Microsoft Excel for mathematical purposes. This will be followed by a brief discussion of chance, gambling, and probability. Several popular games (such as lotteries, roulette, craps, and poker) will be considered both from a theoretical point of view and by means of very simple computer simulation. At the end, we will discuss briefly topics from game theory such as zero-sum games and game with cooperation.

MAT 094 or placement is a prerequisite for this course.

MAT 115
MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS III
Undergraduate
Continuation of Math 110-111.

MAT 111 is a prerequisite for this class.

MAT 130
PRECALCULUS
Undergraduate
Functions and their graphs, exponential and logarithmic functions, inverse functions, polynomial and rational functions.

MAT 101 or placement by test is a prerequisite for this class.

MAT 131
TRIGONOMETRY
Undergraduate
Trigonometric functions, inverse trigonometric functions, trigonometric identities, laws of sines and cosines, polar coordinates and complex plane.

MAT 130 or equivalents or placement by test is a prerequisite for this class.

MAT 135
BUSINESS CALCULUS I
Undergraduate
Differential calculus of one or more variables with business applications.

A grade of C- or better in MAT 130 (or equivalent) is a prerequisite for this class.

MAT 136
BUSINESS CALCULUS II
Undergraduate
Integral calculus, matrix algebra, and probability theory with business applications.

A grade of C- or better in MAT 135 (or equivalent) is a prerequisite for this class.

MAT 137
BUSINESS STATISTICS
Undergraduate
Basic concepts of statistics and applications; data analysis with the use of Excel; theoretical distributions; sampling distributions; problems of estimation; hypothesis testing; problems of sampling; linear regression and correlation.

A grade of C- or better in MAT 130 (or equivalent) is a prerequisite for this class.
MAT 140
DISCRETE MATHEMATICS I
Undergraduate
Combinatorics, graph theory, propositional logic, singly-quantified statements, operational knowledge of set theory, functions, number systems, methods of direct and indirect proof.

MAT 130 or above or equivalents or placement by test is a prerequisite for this class.

MAT 141
DISCRETE MATHEMATICS II
Undergraduate
Methods of direct and indirect proof, set theoretic proofs, sequences, mathematical induction, recursion, multiply-quantified statements, relations and functions, complexity.

MAT 140 is a prerequisite for this class.

MAT 147
CALCULUS WITH INTEGRATED PRECALCULUS I
Undergraduate
Limits, continuity, the derivative, rules of differentiation, derivatives of trigonometric and logarithmic functions and their inverses, and applications, with precalculus review included for each topic. The full MAT 147-8-9 sequence covers all the material of MAT 150-1-2 plus additional precalculus material. (6 quarter hours)

MAT 130 or equivalents or placement by test is a prerequisite for this course.

MAT 148
CALCULUS WITH INTEGRATED PRECALCULUS II
Undergraduate
Extrema, curve sketching, related rates, definite and indefinite integrals, applications of the integral, with precalculus review included for each topic. (6 quarter hours)

MAT 147 (or MAT 150 or MAT 155 or MAT 160 or MAT 170) is a prerequisite for this class.

MAT 149
CALCULUS WITH INTEGRATED PRECALCULUS III
Undergraduate
Techniques of integration, L'Hopital's rule, improper integrals, Taylor polynomials, series and sequences, first-order differential equations, with precalculus review included for each topic. (6 quarter hours)

MAT 148 (or MAT 151 or MAT 161 or MAT 171) is a prerequisite for this class.

MAT 150
CALCULUS I
Undergraduate
Limits, continuity, the derivative, rules of differentiation, derivatives of trigonometric and logarithmic functions and their inverses, applications of the derivative, extrema, curve sketching, and optimization. This course meets for an additional 1-hour lab session each week for enrichment and problem solving.

MAT 131 or placement by test is a prerequisite for this course.

MAT 151
CALCULUS II
Undergraduate
Definite and indefinite integrals, the Fundamental Theorem of Calculus, applications of the integral, techniques of integration. This course meets for an additional 1-hour lab session each week for enrichment and problem solving.

MAT 150 or MAT 155 or MAT 160 or MAT 170 is a prerequisite for this class.
MAT 152
CALCULUS III
Undergraduate
L'Hopital's rule, improper integrals, sequences and series, Taylor polynomials. This course meets for an additional 1-hour lab session each week for enrichment and problem solving.

MAT 151 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 155
SUMMER CALCULUS I
Undergraduate
Limits, continuity, the derivative, rules of differentiation, derivatives of trigonometric and logarithmic functions and their inverses, applications of the derivative, extrema, curve sketching, and optimization. Definite and indefinite integrals, the Fundamental Theorem of Calculus, applications of the integral. (6 quarter hours)

MAT 131 or placement by Mathematics Diagnostic Test is a prerequisite for this class.

MAT 156
SUMMER CALCULUS II
Undergraduate
Further applications of the integral, techniques of integration. L'Hopital's rule, improper integrals, sequences and series, Taylor polynomials. (6 quarter hours)

MAT 148 or MAT 151 or MAT 155 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 160
CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I
Undergraduate
Limits, continuity, the derivative, rules of differentiation, derivatives of trigonometric and logarithmic functions and their inverses, applications of the derivative, extrema, curve sketching, and optimization. This course meets for an additional 1.5-hour lab session each week for enrichment and problem solving. (5 quarter hours)

MAT 131 or placement by test is a prerequisite for this class.

MAT 161
CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS II
Undergraduate
Definite and indefinite integrals, the Fundamental Theorem of Calculus, applications of the integral, techniques of integration. This course meets for an additional 1.5-hour lab session each week for enrichment and problem solving. (5 quarter hours)

MAT 150 or MAT 155 or MAT 160 or MAT 170 is a prerequisite for this class.

MAT 162
CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS III
Undergraduate
L'Hopital's rule, improper integrals, sequences and series, Taylor polynomials. This course meets for an additional 1.5-hour lab session each week for enrichment and problem solving. (5 quarter hours)

MAT 151 or MAT 161 or MAT 171 is a prerequisite for this class.
MAT 170
CALCULUS FOR LIFE SCIENCES I
Undergraduate
The course covers the following topics using examples from the sciences: Functions as models, logarithmic scale graphing, exponential growth and decay, difference equations and limits of sequences, geometric series, functions and limits, trigonometric functions and their limits, continuity, limits at infinity, the derivative, differentiation rules, derivatives of trigonometric and exponential functions, related rates, derivatives of inverse and logarithm functions. Course meets for an additional lab session each week during which time students will work on applied mathematics projects based on the topics covered in the course. Students majoring in the sciences should consult with their major department to decide between the 160 and 170 sequences. (5 quarter hours)

MAT 131 or placement by test is a prerequisite for this class.

MAT 171
CALCULUS FOR LIFE SCIENCES II
Undergraduate
The course covers the following topics using examples from the sciences: Applications of the derivative including approximation and local linearity, differentials, extrema and the Mean Value Theorem, monotonicity and concavity, extrema, inflection points, graphing, L'Hospital's Rule, optimization, and the Newton-Raphson method, antiderivatives, the definite integral, Riemann sums, the Fundamental Theorem of Calculus, area, cumulative change, average value of a function, and techniques of integration: substitution rule and integration by parts. Course meets for an additional lab session each week during which time students will work on applied mathematics projects based on the topics covered in the course. Course meets for an additional lab session each week during which time students will work on applied mathematics projects based on the topics covered in the course. (5 quarter hours)

MAT 150 or MAT 155 or MAT 160 or MAT 170 is a prerequisite for this class.

MAT 172
CALCULUS III WITH DIFFERENTIAL EQUATIONS
Undergraduate
This course is designed for students in the life sciences and covers some topics from MAT 152, differential equations and an introduction to the Calculus of functions of several variables. Specific topics are as follows. Numerical integration, partial fraction expansions, Taylor approximations of a function, differential equations, separation of variables, slope fields, Euler's existence theorem, polygonal approximations to solutions of differential equations, the logistic equation and allometric growth models, equilibria of differential equations and their stability, applications of stability theory, functions of several variables, partial derivatives, directional derivative and the gradient.Course meets for an additional lab session each week during which time students will work on applied mathematics projects based on the topics covered in the course. (5 quarter hours)

MAT 151 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 207
HISTORY OF PROBABILITY AND STATISTICS
Undergraduate
History Of Probability And Statistics

MAT 215
INTRODUCTION TO MATHEMATICAL REASONING
Undergraduate
An introduction to basic concepts and techniques used in higher mathematics courses: set theory, equivalence relations, functions, cardinality, techniques of proof in mathematics. The emphasis is on problem solving and proof construction by students. The department recommends that students take this course no later than the spring quarter of the sophomore year.

MAT 149 or MAT 152 or MAT 156 or MAT 162 or MAT 172 is a prerequisite for this class.

MAT 220
LINEAR ALGEBRA WITH APPLICATIONS
Undergraduate
(Primarily for non-mathematics majors.) Systems of linear equations, matrices and matrix algebra, determinants, diagonalization and matrix factorization with MATLAB/Maple, with applications to linear programming and graph theory.

MAT 141 or MAT 148 or MAT 151 or MAT 155 or MAT 161 or MAT 171 is a prerequisite for this class.
MAT 242
ELEMENTS OF STATISTICS
Undergraduate
Descriptive statistics, elements of probability, the binomial and normal probability models; large and small sample hypothesis testing, correlation and regression analysis. Use of computer packages. This course does not count toward mathematics major credit. Cross-listed with SOC 279.

(MAT 095 and MAT 100) or MAT 101 or placement are prerequisites for this class.

MAT 260
MULTIVARIABLE CALCULUS I
Undergraduate
Vectors, dot and cross products, parameterizations of lines and planes in space, functions of several independent variables, partial derivatives, tangent planes and linear approximations, the chain rule, directional derivatives and the gradient vector, extreme values, Lagrange multipliers, double integrals and their applications.

MAT 149 or MAT 152 or MAT 156 or MAT 162 or MAT 172 is a prerequisite for this class.

MAT 261
MULTIVARIABLE CALCULUS II
Undergraduate
Surface areas, triple integrals, vector functions and space curves, derivatives of vector functions, arc length and curvature, vector fields, line integrals, Green's Theorem, parametric surfaces, surface integrals, curl and divergence, Stokes's Theorem, the Divergence Theorem.

MAT 260 is a prerequisite for this class.

MAT 262
LINEAR ALGEBRA
Undergraduate
Systems of linear equations and matrices; vectors in n-space; vector spaces: linear combinations, linear independence, basis; linear transformations, change of basis, eigenvalues and eigenvectors.

MAT 260 is a prerequisite for this class.

MAT 301
HISTORY OF MATHEMATICS
Undergraduate
History of mathematics with problem solving.

A grade of C-minus or better in MAT 215 or MAT 141, or instructor permission is a prerequisite for this class.

MAT 302
COMBINATORICS
Undergraduate
Methods of counting and enumeration of mathematical structures. Topics include generating functions, recurrence relations, inclusion relations, and graphical methods.

A grade of C-minus or better in MAT 215 or MAT 141, or instructor permission is a prerequisite for this class.

MAT 303
THEORY OF NUMBERS
Undergraduate
A study of properties of integers: divisibility; Euclid's Algorithm; congruences and modular arithmetic; Euler's Theorem; Diophantine equations; distribution of primes; RSA cryptography.

A grade of C-minus or better in MAT 215 or MAT 141, or instructor permission is a prerequisite for this class.
MAT 304
DIFFERENTIAL EQUATIONS
Undergraduate
Linear equations, systems with constant coefficients, series solutions, Laplace transforms, and applications. Formerly MAT 338.
MAT 260 is a prerequisite for this class.

MAT 309
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Undergraduate
SE 364 is a prerequisite for this class.

MAT 310
ABSTRACT ALGEBRA I
Undergraduate
The first quarter of a 3-quarter sequence. Topics in the sequence include the integers; abstract groups, rings, and fields; polynomial rings; isomorphism theorems; extension fields; and an introduction to Galois theory. MAT 303 is highly recommended.
MAT 262 and (a C-minus or better in MAT 215 or MAT 141), or instructor permission is a prerequisite for this class.

MAT 311
ABSTRACT ALGEBRA II
Undergraduate
A continuation of topics from MAT 310: Groups, rings, fields, polynomial rings, isomorphism theorems, extension fields, and an introduction to Galois theory.
A grade of C-minus or better in MAT 310 or instructor permission is a prerequisite for this class.

MAT 312
ABSTRACT ALGEBRA III
Undergraduate
A continuation of topics from MAT 311: Groups, rings, fields, polynomial rings, isomorphism theorems, extension fields, and an introduction to Galois theory.
A grade of C-minus or better in MAT 311 or instructor permission is a prerequisite for this class.

MAT 320
GEOMETRY I
Undergraduate
Incidence and separation properties of planes; congruences; the parallel postulate; area theory; ruler and compass construction.
A grade of C-minus or better in MAT 215 or MAT 141, or instructor permission is a prerequisite for this class.

MAT 321
GEOMETRY II
Undergraduate
Introduction to solid geometry and non-euclidean geometry (hyperbolic and spherical models); other special topics.

MAT 323
DATA ANALYSIS AND STATISTICAL SOFTWARE I
Undergraduate
Computing with a statistical package. Introduction to data analysis, elementary statistical inference, regression and correlation. This course does not count toward mathematics major credit. (CROSS-LISTED AS CSC 323)
MAT 130 or placement by test is a prerequisite for this class.
MAT 324
DATA ANALYSIS & STATISTICAL SOFTWARE II
Undergraduate
Advanced features and applications of the statistical package used in 323. (CROSS-LISTED WITH CSC 324)

MAT 326
SAMPLE SURVEY METHODS
Undergraduate
MAT 349 or MAT 353 is a prerequisite for this class.

MAT 328
DESIGN OF EXPERIMENTS
Undergraduate
Linear models and quadratic forms. Single, two and several-factor experiments, incomplete designs, confounding and fractional factorial experiments. Response surfaces and partially balanced incomplete block designs.
MAT 349 or MAT 353 is a prerequisite for this class.

MAT 330
METHODS OF COMPUTATION AND THEORETICAL PHYSICS I
Undergraduate
Computational and theoretical methods in ordinary differential equations, complex numbers, systems of equations, phase plane analysis, and bifurcations. Applications to damped, driven oscillators, and to electronics.

MAT 331
METHODS OF COMPUTATION AND THEORETICAL PHYSICS II
Undergraduate
Computational and theoretical methods in ordinary differential equations, complex numbers, systems of equations, phase plane analysis, and bifurcations. Applications to damped, driven oscillators, and to electronics.
MAT 261 is a prerequisite for this class.

MAT 335
REAL ANALYSIS I
Undergraduate
Real number system, completeness, supremum, and infimum, sequences and their limits, lim inf, lim sup, limits of functions, continuity.
(MAT 149 or MAT 152 or MAT 156 or MAT 162) and (a grade of C-minus or better in MAT 141 or MAT 215) is a prerequisite for this class.

MAT 336
REAL ANALYSIS II
Undergraduate
Properties of continuous functions, uniform continuity, sequences of functions, differentiation, integration. To follow 335 in the Winter Quarter.

MAT 337
COMPLEX ANALYSIS
Undergraduate
Complex functions; complex differentiation and integration; series and sequences of complex functions.
MAT 215, MAT 261 and MAT 335 (or instructor permission) are prerequisites or this class.
MAT 340
TOPOLOGY
Undergraduate
An introduction to point-set topology: metric spaces, topological spaces, continuity, connectedness, and compactness.

Grades of C- or above in MAT 215 (or MAT 141) and MAT 335 or instructor permission are prerequisites for this class.

MAT 341
STATISTICAL METHODS USING SAS
Undergraduate

Successful completion of the programming course required as part of the Math Core Curriculum or instructor permission is a prerequisite for this class.

MAT 342
ELEMENTS OF STATISTICS II
Undergraduate
Multiple regression, correlation, analysis of variance, time series, and sampling. Course content and emphases will vary with students' needs and backgrounds.

MAT 137 (or MAT 323 or MAT 348) is a prerequisite for this class.

MAT 343
BUSINESS STATISTICS II
Undergraduate
Multiple regression, correlation, analysis of variance, time series and sampling. Statistical theory applied to business. Use of statistical computing packages. Course content will vary with the needs and desires of individual students.  (FORMERLY BMS 342)

A grade of C-minus or better in MAT 137 or instructor permission is a prerequisite for this class.

MAT 348
APPLIED STATISTICAL METHODS
Undergraduate
Introduction to statistical software (which will be used throughout the course). Descriptive statistics; elementary probability theory; discrete and continuous probability models; principles of statistical inference; Simple linear regression and correlation analysis.

MAT 148 or MAT 151 or MAT 155 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 349
APPLIED STATISTICAL METHODS II
Undergraduate
A continuation of Mathematics 348. Multiple regression; analysis of frequency data, ANOVA and some experimental designs; nonparametric inference and time series analysis. Use of statistical software.

A grade of C-minus or better in MAT 348 or instructor permission is a prerequisite for this class.

MAT 351
PROBABILITY AND STATISTICS I
Undergraduate
Probability spaces, combinatorial probability methods, discrete and continuous random variables and distributions, moment generating functions, development and applications of the classical discrete and continuous distributions.

MAT 260 is a prerequisite for this class.
MAT 352
PROBABILITY AND STATISTICS II
Undergraduate
Joint probability distributions and correlation; law of large numbers and the central limit theorem; sampling distributions and theory of estimation.

A grade of C-minus or better in MAT 351 or instructor permission is a prerequisite for this class.

MAT 353
PROBABILITY AND STATISTICS III
Undergraduate
Principles of hypothesis testing; most powerful tests and likelihood ratio tests; linear regression; one-way analysis of variance; categorical data analysis, nonparametric statistics.

A grade of C-minus or better in MAT 352 or instructor permission is a prerequisite for this class.

MAT 354
MULTIVARIATE STATISTICS
Undergraduate
The multivariate normal distribution. Hypothesis tests on means and variances including the multivariate linear model. Classification using the linear discriminant function. Principal components and factor analysis. PREREQUISITE(S): MAT 353 and 262, or consent of instructor.
(CROSS-LISTED WITH MAT 454)

MAT 262 and MAT 353 are a prerequisite for this class.

MAT 355
STOCHASTIC PROCESSES
Undergraduate

MAT 353 is a prerequisite for this class.

MAT 356
APPLIED REGRESSION ANALYSIS
Undergraduate
Simple linear, multiple, polynomial and general regression models. Selection of best regression equation and examination of residuals for homoscedasticity and other diagnostics. Use of statistical software. Cross-listed with MAT 456.

MAT 262 and MAT 353 are a prerequisite for this class.

MAT 357
NONPARAMETRIC STATISTICS
Undergraduate

MAT 349 or MAT 353 is a prerequisite for this class.

MAT 358
APPLIED TIME SERIES AND FORECASTING
Undergraduate
Development of the Box-Jenkins methodology for the identification, estimation, and fitting of ARIMA, and transfer-function stochastic models for the purpose of analyzing and forecasting stationary, non-stationary, and seasonal time series data. The course emphasizes practical time-series data analysis using computer packages and includes applications to economic, business, and industrial forecasting. Cross-listed with MAT 512.

MAT 341 and MAT 353 are a prerequisite for this class.
MAT 359  
SIMULATION MODELS AND MONTE CARLO METHOD  
Undergraduate  
Techniques of computer simulation of the classical univariate and multivariate probability distribution models, and such random processes as random walk, Markov chains, and queues. Cross-listed with MAT 459.

MAT 341 and MAT 353 are a prerequisite for this class.

MAT 361  
THEORY OF INTEREST  
Undergraduate  
Theory and applications of compound interest to annuities, amortization schedules, sinking funds, bonds, and yield rates.

MAT 149 (or MAT 152 or MAT 156 or MAT 162) is a prerequisite for this class.

MAT 362  
LIFE CONTINGENCIES I  
Undergraduate  
Basic Contingencies: The theory and applications of contingency mathematics in life and health insurance, annuities, and pensions from both a probabilistic and a deterministic viewpoint. Topics include survival distribution and life tables, life insurance, and life annuities.

A grade of C-minus or better in MAT 361 or instructor permission is a prerequisite and MAT 352 is a corequisite for this class.

MAT 363  
LIFE CONTINGENCIES II  
Undergraduate  
Advanced Contingencies: A continuation of Mathematics 362. Topics include net premiums, net premiums reserves, multiple life functions, multiple decrement models, and valuation theory for pension plans.

A grade of C- or above in MAT 352 and MAT 362 or instructor permission is a prerequisite for this class.

MAT 364  
STOCHASTIC RISK MODELS  
Undergraduate  
Distributional quantities, distribution properties and classification, frequency and severity models, aggregate loss and ruin models. Cross-listed with MAT 464.

MAT 353 is a prerequisite for this class.

MAT 365  
STOCHASTIC SURVIVAL MODELS  
Undergraduate  
Construction of parametric and nonparametric models, model validation and selection, credibility theory, simulation techniques. Cross-listed with MAT 465.

MAT 353 is a prerequisite for this class.

MAT 366  
MATHEMATICAL DEMOGRAPHY  
Undergraduate  
Introduction to demography: mortality table construction and methods of population and demographic analysis.

MAT 353 is a prerequisite for this class.
MAT 367
CREDIBILITY THEORY
Undergraduate
Credibility theory and loss distributions with applications to casualty insurance classification and finance. Cross-Listed as MAT 467.
MAT 352 is a prerequisite for this class.

MAT 368
MATHEMATICS FOR FINANCE
Undergraduate
The course covers the mathematics of financial derivatives, investment strategies, arbitrage, put-call parity, binomial models for European options and interest rates, Black-Scholes formula, hedging, lognormal models for asset prices, exotic options, valuation using Monte-Carlo, and embedded options in annuity products.
MAT 260 and (MAT 220 or MAT 262) and (MAT 349 or MAT 353) are prerequisites for this class.

MAT 370
ADVANCED LINEAR ALGEBRA
Undergraduate
Vector spaces, basis and dimension; matrix representation of linear transformations and change of basis; diagonalization of linear operators; inner product spaces; diagonalization of symmetric linear operators, principal-axis theorem, and applications. Cross-listed MAT 470.
MAT 262 and (a grade of C-minus or better in MAT 215 or MAT 141) or instructor permission is a prerequisite for this class.

MAT 372
LOGIC AND SET THEORY
Undergraduate
Topics in axiomatic set theory, formal logic, and computability theory.
A grade of C-minus or better in MAT 215 or MAT 141, or instructor permission is a prerequisite for this class.

MAT 381
FOURIER ANALYSIS AND SPECIAL FUNCTIONS
Undergraduate
The course covers the basic principles of discrete and continuous Fourier analysis and some of its applications currently used in scientific modeling. Students will use the computer to implement the computational algorithms developed in the course. Some of the topics covered will include Fourier transforms and their application to signal and image processing, discrete Fourier series, the fast Fourier transform algorithm and applications to digital filtering, and the Radon transforms and its applications to tomography.
MAT 262 is a prerequisite for this class.

MAT 384
MATHEMATICAL MODELING
Undergraduate
Modeling of real world problems using mathematical methods. Includes a theory of modeling and a study of specific models, selected from deterministic, stochastic, continuous, and discrete models. Cross-listed with MAT 484.
MAT 262 is a prerequisite for this class.

MAT 385
NUMERICAL ANALYSIS I
Undergraduate
MAT 262 and a programming course required as part of the Math Core Curriculum or consent of the instructor are prerequisites for this class.
MAT 386
NUMERICAL ANALYSIS II
Undergraduate
Theory and algorithms for efficient computation, including the Fast Fourier transform, numerical solution of non-linear systems of equations. Minimization of functions of several variables. Sparse systems of equations and corresponding eigenvalue problems. (CROSS-LISTED WITH MAT 486 & CSC 386/486)

A grade of C-minus or better in MAT 385 or instructor permission is a prerequisite for this class.

MAT 387
OPERATIONS RESEARCH I: LINEAR PROGRAMMING
Undergraduate
The Linear Programming problem and its dual; the simplex method; transportation and warehouse problems; computer algorithms and applications to various fields. (CROSS-LISTED AS MAT 487)

MAT 262 and any introductory programming course are prerequisites for this class.

MAT 388
OPERATIONS RESEARCH II: OPTIMIZATION THEORY
Undergraduate
Integer programming; non-linear programming; dynamic programming; queuing theory; game theory. Student should take an introductory computer programming course prior to taking this course. (CROSS-LISTED AS MAT 488)

MAT 260 and MAT 262 are prerequisites for this class.

MAT 389
OPERATIONS RESEARCH III
Undergraduate
Advanced Topics.

A grade of C-minus or better in MAT 388 or instructor permission is a prerequisite for this class.

MAT 390
MATHEMATICS READING AND RESEARCH
Undergraduate
The course provides students with a hands-on experience about research in mathematical sciences. Students attend seminars and research colloquia, and actively participate at discussions about the topics presented. Students reflect on the connections between various areas of modern mathematics, the challenges of structuring and solving problems, and the personal experience of doing mathematics. As a final project, each student prepares and presents a mathematical expository paper describing a current area of research, emphasizing its relevance to mathematics in general and its connections to real world problems. This course may be used to satisfy the junior-year experiential learning (JYEL) requirement.

MAT 391
STUDIES IN DEMOGRAPHY
Undergraduate
The course introduces students to the study by statistical methods of human populations in terms of type of data sources, population composition, growth, fertility, mortality, morbidity, health, migration, and urbanization. In addition, the course has a major component that emphasizes the study of current characteristics of the populations of developing countries in comparison with some developed countries including the United States of America. Students are required to present and submit a research project with comparative analysis of demographic statistics obtained on several developing and developed countries.

MAT 395
TOPICS IN MATHEMATICS
Undergraduate
Consult course schedule for current offerings. Course may be repeated for credit when title and content change. Variable credit allowed.
MAT 396
SENIOR THESIS RESEARCH
Undergraduate
A thesis option is available to mathematics majors who wish to pursue an extended independent project related to a theoretical or applied focus of the program. Students would work under the guidance of a faculty mentor. A total of 4 credits must be completed over the one or two quarters prior to the thesis submission. Interested students are strongly encouraged to enroll in MAT 390 during their junior year. (2 quarter hours)

MAT 397
MATHEMATICAL PEDAGOGY: THEORY & PRACTICE
Undergraduate
Introduction to current theories and practices in college mathematics instruction; helps undergraduate mathematics majors develop a deeper understanding of fundamental mathematical concepts and an awareness of how people learn mathematical ideas, and prepares them to work as consultants in mathematics instruction. Mathematical tutoring practicum is required. Four credit hour course offered over a two quarter span during the autumn and winter quarters only. See instructor for further information. This course may be used to satisfy the junior experiential learning requirement, but it does not count toward mathematics major or minor credit. Cross-listed with MAT 697.

MAT 398
SENIOR CAPSTONE SEMINAR
Undergraduate
Topics vary from year to year. This course does not count toward the mathematical major or minor credit.

MAT 215 (or MAT 140 and 141) and MAT 262, or instructor permission are prerequisites for this class.

MAT 399
INDEPENDENT STUDY
Undergraduate
(variable credit)

MAT 400
APPLIED ABSTRACT ALGEBRA I
Graduate
Applied Abstract Algebra I

MAT 401
APPLIED ABSTRACT ALGEBRA II
Graduate
Applied Abstract Algebra II

MAT 400 is a prerequisite for this class.

MAT 421
BASIC BIOSTATISTICS
Graduate
This course includes both data analysis and experimental design, up to and including survival analysis such as used in the analysis of clinical trials. The course will be supplemented by standard topics with application areas relevant to drug development, including pharmacokinetics, clinical trials, bioequivalence, and pharmacoepidemiology.

MAT 453 or instructor consent is a prerequisite for this class.

MAT 424
ADVANCED BIOSTATISTICS
Graduate
The overall objective is the development of statistical literacy and skills in the analysis of biological and medical data including: generalized linear models, analysis of repeated measures, log-linear models, clinical trials and computer applications.

MAT 421 is a prerequisite for this class.
MAT 425
SURVIVAL ANALYSIS
Graduate
Basic quantities and models in survival analysis, types of censoring and truncation data, estimation for various survival models, nonparametric estimation of hazard and survival functions, comparing survival times between different groups, the proportional hazard and accelerated lifetime models for regression analysis with failure-time data and model checking methods. Appropriate background is one semester of applied statistics or equivalent.

MAT 434
TOPOLOGY
Graduate
An introduction to point-set topology: metric spaces, topological spaces, continuity, connectedness, and compactness.

ECO 435 or MAT 335 or equivalents is a prerequisite for this class.

MAT 435
MEASURE THEORY
Graduate
This is a course in Lebesque integration; the study of measure spaces and measurable functions; the basic theorems of Lebesque integration; Egoroff's theorem, the monotone limit theorem, the Lebesgue dominated convergence theorem; an introduction to Lp spaces, Holder's inequality, Minkowski's inequality; Fubini's theorem.

MAT 336 or MAT 434 is a prerequisite for this course.

MAT 436
FUNCTIONAL ANALYSIS
Graduate
This course is an introduction to the basic theory of functional analysis. Students will study normed, Banach, and Hilbert Spaces and the theory of bounded linear functionals and operators acting on them. The contraction mapping and the fixed point theorem are also studied with applications to sequence and function spaces.

MAT 434 and (MAT 370 or MAT 470) is a prerequisite for this class.

MAT 437
COMPLEX ANALYSIS
Graduate
Course topics: Complex functions; complex differentiation and integration; series and sequences of complex functions. Cross-listed with MAT 337.

MAT 261 and MAT 335 is a prerequisite for this class.

MAT 441
APPLIED STATISTICS I
Graduate
Parametric and non-parametric statistical inferential methods for the univariate and bivariate situations using SAS. Specific topics include classical and exploratory graphical & numerical methods of data descriptions; inference about means, medians, and associations including analysis of variance and linear regression. Data analytic projects are an integral part of the course.

MAT 442
APPLIED STATISTICS II
Graduate
A continuation of MAT 441. Repeated measures design, association, analysis of covariance, and multivariate relationships. Diagnostics and model building. Methods of categorical data analysis. Logistical regression and log-linear models. Data analytical projects using SAS are an integral part of the course.

MAT 441 is a prerequisite for this class.
MAT 443
APPLIED STATISTICS III
Graduate
A continuation of MAT 442. The course material generalizes univariate methods of inference to multivariate situations using SAS. Specific topics include canonical correlation, discriminate analysis, principal component analysis, factor analysis, and multivariate analysis of variance. Emphasis in the course is on data analytic projects.

MAT 442 is a prerequisite for this class.

MAT 448
STATISTICAL METHODS USING SAS
Graduate

MAT 449
STATISTICAL DATA MANAGEMENT
Graduate
Students learn data organization and structures, design of statistical databases, statistical software analysis, basic structure of relational databases, SAS Macros, R functions, complex SQL statements, and advanced data manipulation techniques. Appropriate background is one semester of applied statistics or equivalent.

MAT 448 is a prerequisite for this class.

MAT 450
ADVANCED STATISTICAL COMPUTING
Graduate
Advanced statistical computing methods used in modern scientific investigation. Topics include data management, random number generation, resampling methods, numerical optimization, Markov Chain Monte Carlo, smoothing methods, data mining: clustering and classification.

MAT 441 and MAT 451 are prerequisites for this class.

MAT 451
PROBABILITY AND STATISTICS I
Graduate
The course covers elements of probability theory; distributions of random variables and linear functions of random variables; moment generating functions; and discrete and continuous probability models.

MAT 260 is a corequisite for this class.

MAT 452
PROBABILITY AND STATISTICS II
Graduate

MAT 451 is a prerequisite for this class and MAT 261 is a corequisite for this class.

MAT 453
PROBABILITY AND STATISTICS III
Graduate
A continuation of MAT 452. More on hypothesis testing, most powerful, uniformly most powerful, and likelihood ratio tests. Introduction to the analysis of variance; linear regression; categorical data analysis, and nonparametric methods of inference.

MAT 452 is a prerequisite for this class.
MAT 454
MULTIVARIATE STATISTICS
Graduate
The multivariate normal distribution. The general linear model. Multivariate regression and analysis of variance; discriminant analysis; principal component and factor analysis; applications and use of statistical software. Cross-listed with MAT 354.

MAT 453 is a prerequisite for this class.

MAT 455
STOCHASTIC PROCESSES
Graduate

MAT 453 is a prerequisite for this class.

MAT 456
APPLIED REGRESSION ANALYSIS
Graduate
Simple linear, multiple, polynomial and general linear regression models. Model diagnostics; Model selection and Validation. Cross-listed with MAT 356.

MAT 453 is a prerequisite for this class.

MAT 457
NONPARAMETRIC STATISTICS
Graduate
Inference concerning location and scale parameters, goodness of fit tests, association analysis and tests of randomness using distribution free procedures. Bootstrap techniques. Smoothing methodologies. Cross-listed with MAT 357.

MAT 453 is a prerequisite for this class.

MAT 458
STATISTICAL QUALITY CONTROL
Graduate
History; Deming guide to quality; graphical techniques of process control; Schewhart’s control charts for means, ranges, standard deviations, individual measurements, and attributes; process capabilities and statistical tolerance; cumulative-sum charts. Product liability; acceptance sampling; product and process design; applications and case studies.

MAT 459
SIMULATION MODELS AND MONTE CARLO METHOD
Graduate
Techniques of computer simulation of the classical univariate and multivariate probability models, and such random processes as random walks, Markov chains, and queues. Cross-listed with MAT 359.

MAT 453 is a prerequisite for this class.

MAT 460
TOPICS IN STATISTICS
Graduate
One of the following topics: Clinical trials; Reliability and life testing; Categorical data analysis; Bootstrapping; Data Mining; Response Surface Methodology; Meta analysis; Survival Models.

MAT 453 or instructor consent is a prerequisite for this class.
MAT 461
ACTUARIAL SCIENCE I: THEORY OF INTEREST
Graduate
Theory of Interest: Theory and application of compound interest to annuities, amortization schedules, sinking funds, bonds, and yield rates. Cross-listed as MAT 361.

MAT 461 is a prerequisite for this class and MAT 451 is a corequisite for this class.

MAT 462
ACTUARIAL SCIENCE II: BASIC CONTINGENCIES
Graduate
Basic Contingencies: The theory and applications of contingency mathematics in life and health insurance annuities and pensions, from both a probabilistic and a deterministic viewpoint. Topics include survival distribution and life tables, life insurance and life annuities. Cross-listed as MAT 362.

MAT 461 is a prerequisite for this class and MAT 452 is a corequisite for this class.

MAT 463
ACTUARIAL SCIENCE III: ADVANCED CONTINGENCIES
Graduate
Advanced Contingencies: A continuation of MAT 462. Topics include net premiums, net premium reserves, multiple life functions, multiple decrement models, and valuation theory for pension plans. Cross-listed with MAT 363.

MAT 462 is a prerequisite for this class.

MAT 464
STOCHASTIC RISK MODELS
Graduate
Introduction to risk theory and applications. Economics of insurance, individual risk models for short-term and single-term, collective risk models over an extended period, and applications. Cross-listed with MAT 364.

MAT 465 is a prerequisite for this class.

MAT 465
STOCHASTIC SURVIVAL MODELS
Graduate
Mathematical methods for population analysis and survival models. Cross-listed with MAT 365.

MAT 463 is a prerequisite for this class.

MAT 466
MATHEMATICAL DEMOGRAPHY
Graduate
Introduction to demography, mortality table construction and methods of population and demographic analysis.

MAT 465 is a prerequisite for this class.

MAT 467
CREDIBILITY THEORY
Graduate
Credibility theory and loss distributions with applications to casualty insurance classification and ratemaking.

MAT 462 is a prerequisite for this class.
MAT 468
MATHEMATICS FOR FINANCE
Graduate
The course covers the mathematics of financial derivatives, investment strategies, arbitrage, put-call parity, binomial models for European options and interest rates, Black-Scholes formula, hedging, lognormal models for asset prices, exotic options, valuation using Monte-Carlo, and embedded options in annuity products. Cross-listed with MAT 368. MAT 451 is a co-requisite for this course.

MAT 469
STOCHASTIC CALCULUS
Graduate
The course introduces students to the mathematical tools and techniques used in modern Financial Theory. Topics include Brownian motion and Itô's lemma, stochastic integrals, stochastic differential equations, jump processes, applications to option pricing and interest rate models.

MAT 455 and MAT 468 are prerequisites for this course.

MAT 470
ADVANCED LINEAR ALGEBRA
Graduate
Vector spaces, basis and dimension; matrix representation of linear transformations and change of basis; diagonalization of linear operators; inner product spaces; diagonalization of symmetric linear operators, principal-axis theorem, and applications. Cross-listed as MAT 370.

MAT 262 and (MAT 141 or MAT 215) are a prerequisite for this class.

MAT 471
GROUP THEORY
Graduate
Course topics: Classes of groups; actions of groups on sets; Sylow theorems; decomposition of groups; structure of finite abelian groups.

MAT 472
FIELDS AND GALOIS THEORY
Graduate
Course topics: Commutative rings and fields; irreducible polynomials and field extensions, adjunction of roots, algebraic extensions, splitting and normal fields, cyclic extensions, the Galois group, and the Fundamental theorem of Galois theory. Cross-listed with MAT 312.

(MAT 311 or MAT 473) and MAT 471 are prerequisites for this course.

MAT 473
RINGS AND MODULES
Graduate
Course topics: Rings and Algebras; classes of unique factorization domains; modules and principal isomorphism theorems, classes of modules, decomposition of finitely generated modules; Jordan and rational canonical form of a matrix.

MAT 311 or MAT 471 is a prerequisite for this class.

MAT 481
FOURIER ANALYSIS AND SPECIAL FUNCTIONS
Graduate
The course covers the basic principles of discrete and continuous Fourier analysis and its applications. Some of the topics covered are Fourier series, discrete Fourier transforms, fast Fourier transforms, and Fourier transforms.

MAT 262 is a prerequisite for this class.
MAT 482
PARTIAL DIFFERENTIAL EQUATIONS
Graduate
Introduction to partial differential equations and their applications. Topics include separation of variables; the heat, wave and Laplace equations; boundary-value problems; Fourier series. Some time will be spent on physical applications and non-homogeneous or time-dependent boundary conditions.

MAT 261 and MAT 304 are prerequisites for this class.

MAT 484
MATHEMATICAL MODELING
Graduate
Modeling of real world problems using mathematical methods. Includes a theory of modeling and a study of specific models, selected from deterministic stochastic, continuous and discrete models. Cross-listed as MAT 384.

MAT 262 is a prerequisite for this class.

MAT 485
NUMERICAL ANALYSIS I
Graduate
Use of a digital computer for numerical computation. Error analysis, Gaussian elimination and Gauss-Seidel method, solutions of linear and nonlinear equations, function evaluation, cubic splines, approximation of integrals and derivatives, Monte Carlo methods. Cross-listed with MAT 385. MAT 262 and (MAT 149 or MAT 152 or MAT 156 or MAT 162 or MAT 172), and a programming course required as part of the Math Core Curriculum or consent of instructor are prerequisites for this class.

MAT 486
NUMERICAL ANALYSIS II
Graduate

MAT 485 is a prerequisite for this class.

MAT 487
OPERATIONS RESEARCH I: LINEAR PROGRAMMING
Graduate
The linear programming problem and its dual; the simplex method; transportation and warehouse problems; computer algorithms and applications to various fields. Cross-listed with MAT 387. MAT 262 and (any introductory programming course) are prerequisites for this course.

MAT 488
OPERATIONS RESEARCH II: OPTIMIZATION THEORY
Graduate
Integer programming; nonlinear programming; dynamic programming. Cross-listed as MAT 388.

MAT 487 is a prerequisite for this class.

MAT 489
QUEUING THEORY WITH APPLICATIONS
Graduate
Discrete and continuous-time Markov chain models, Queuing systems, and topics from renewal and reliability theory.

MAT 453 is a prerequisite for this class.
MAT 491
DATA MINING
Graduate
This course will provide students with methodologies of mining varied data and discovering knowledge from data. Students will learn classification, regularized regression, smooth spline, neural network, decision tree, SVM, PCA and clustering. The lectures will be complemented with hands-on experience with data mining software R to allow students develop some practical skills.

MAT 452 and MAT 456 are prerequisites for this class.

MAT 494
GRAPH THEORY
Graduate
This course studies graph theory and its applications. Topics include trees, Eulerian circuits, Hamiltonian cycles, matchings, graph coloring problems, random graphs, and random walks on graphs.

MAT 262 is a prerequisite for this class.

MAT 495
DYNAMIC PROGRAMMING
Graduate

MAT 496
GAME THEORY
Graduate
The minimax theorem for two-person, zero-sum games. Two-person general-sum games and noncooperative person games; Nash equilibrium.

MAT 498
PROBLEM SOLVING IN MATHEMATICS
Graduate
Course topics: problem solving in various topics from GRE Subject examination in Mathematics. Consult course schedule for current offerings. Course may be repeated for credit when title and content change. (2 quarter hours)

MAT 512
APPLIED TIME SERIES AND FORECASTING
Graduate
Development of the Box-Jenkins methodology for the identification, estimation and fitting of ARIMA, and transfer-function stochastic models for the purpose of analyzing and forecasting stationary, non-stationary, and seasonal time series data. The course emphasizes practical time series data analysis, using computer packages and includes applications to economic, business and industrial forecasting.

MAT 341 or MAT 348 or MAT 453 is a prerequisite for this class.

MAT 515
FINANCIAL MODELING
Graduate
The course expounds on probabilistic methods used in risk-based capital allocation and risk management. Topics include Gaussian and Non-Gaussian modeling, including modeling of volatility and correlations, copulas, Extreme Value Theory, VaR, TVaR and applications to portfolio allocation and stress testing.

MAT 456 and MAT 512 are prerequisites for this course.
**MAT 526**  
**SAMPLING THEORY AND METHODS**  
**Graduate**  

MAT 453 is a prerequisite for this class.

**MAT 528**  
**DESIGN AND ANALYSIS OF EXPERIMENTS**  
**Graduate**  
Single-factor fixed, random and mixed designs with and without restrictions on randomizations, including randomized block designs, Latin & Graeco-Latin squares. Factorial and fractional factorial experiments. Nested and split-plot designs. Confounding and response surface methodology.

MAT 453 is a prerequisite for this class.

**MAT 595**  
**GRADUATE THESIS RESEARCH**  
**Graduate**  
A thesis option is available to graduate students who wish to pursue an extended independent project. Students would work under the guidance of a faculty mentor. Course may be repeated for credit. (2 quarter hours)

**MAT 596**  
**ADVANCED TOPICS IN ALGEBRA**  
**Graduate**  
Consult course schedule for current offerings. Course may be repeated for credit when title and content change.

**MAT 597**  
**ADVANCED TOPICS IN ANALYSIS**  
**Graduate**  
Consult course schedule for current offerings. Course may be repeated for credit when title and content change.

**MAT 598**  
**ADVANCED PROBLEM SOLVING IN ALGEBRA AND ANALYSIS**  
**Graduate**  
Course topics: problem solving in various topics in Algebra and Analysis. Consult course schedule for current offerings. Course may be repeated for credit when title and content change. (2 quarter hours)

**MAT 599**  
**INDEPENDENT STUDY**  
**Graduate**  
Offered by arrangement. Approval by department chair required. (variable credit)

**MAT 600**  
**EXPERIMENTATION, CONJECTURE, AND REASONING WITH NUMBERS**  
**Graduate**  
This course will focus on furthering the participants' number sense together with providing them with opportunities to: 1) Use and discuss the roles of experimentation, conjecture, and logical reasoning in developing mathematical understanding; 2) Appreciate the value of algebraic notation in problem solving by comparing solutions done both with and without algebra; 3) Engage in mathematical speaking and writing with discussion of (a) how to evaluate accurate vs. inaccurate statements, (b) what level of detail is appropriate in an answer given the point of the problem, (c) what ways of presenting solutions are suitable for various audiences; 4) Discuss the distinction between "how" a mathematical strategy works and "why" it works, and articulate the pedagogical value of knowing the "why."
MAT 605
GEOMETRY FOR MIDDLE SCHOOL TEACHERS
Graduate
An introduction to geometry designed to engage students in the construction, description, and analysis of geometric objects, including three-dimensional objects. These activities will be used to generate questions and hypotheses that will lead to more abstract concepts and general arguments. Emphasis throughout will be on informal reasoning, experimental methods, inductive as well as deductive arguments, local organization, and the development of mathematical thinking. Appropriate technology will be used to explore hypotheses and support mathematical reasoning. Topics will include: polyhedra, and their nets, cross sections, and projections; triangles, quadrilaterals, and polygons; congruence and similarity; the Pythagorean theorem; perimeter, area, and volume; circles and spheres, symmetry and transformations; and tessellations. The course will also include discussion and reflection on learning mathematics.

MAT 608
INVESTIGATING HIGH SCHOOL MATHEMATICS
Graduate
Drawing on high school mathematics content, students will identify and explore the mathematical themes that might form the content of a 12th grade capstone course. In the process, they will reflect on and discuss the major issues encountered when learning the mathematical concepts that form the basis of high school mathematics, identify ways to collaborate in order to improve mathematics learning, and identify ways in which they can take leadership roles in mathematics teaching and learning.

MAT 609
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Graduate
Theories, methods, materials and techniques for teaching and learning mathematics in secondary and upper elementary schools. This course is required for students seeking secondary math certification.

MAT 610
CALCULUS I
Graduate
A review of topics from precalculus using algebraic, numerical, and graphical perspectives including linear functions, exponential functions, logarithms, polynomials, and trigonometric functions. An introduction to limits, continuity, the derivative, and basic properties of real numbers.

MAT 611
CALCULUS II
Graduate
A continuation of Math 610. The derivative and its applications, including optimization and related rates. Introduction to integration and numerical algorithms using graphing calculators. Offered every Winter.
MAT 610 is a prerequisite for this class.

MAT 612
CALCULUS III
Graduate
A continuation of Math 611. Techniques of symbolic and numerical integration with geometric applications. Sequences, series, and power series. Offered every Spring.
MAT 611 is a prerequisite for this class.

MAT 618
TOPICS IN CALCULUS AND DIFFERENTIAL EQUATIONS
Graduate
Taylor series and Taylor's theorem, parametric equations, separable differential equations, slope fields, Euler's method. Offered every Summer.
MAT 612 is a prerequisite for this class.
MAT 620  
**GEOMETRY**  
**Graduate**  
Axiom systems, types of reasoning used in proofs, Euclidean geometry results with concentration on triangles and circles, introduction to non-Euclidean geometry, and introduction to geometry classroom software. Offered every other winter.

MAT 660 is a prerequisite for this course.

MAT 621  
**TRANSITION TO ALGEBRA FOR MIDDLE SCHOOL TEACHERS**  
**Graduate**  
In this course, teachers will begin the study of algebra as a generalization of number and operation, building on their new understanding of those topics from previous courses. Careful attention to reasoning about the use of variables and understanding the logic behind solving equations and inequalities will aid in the transition to a full treatment of high school algebra. Teachers will be introduced to high quality resources that will help them create effective algebraic learning environments for their students.

MAT 600, MMT 401 and MAT 605 are a prerequisite for this class.

MAT 622  
**ALGEBRA FOR MIDDLE SCHOOL TEACHERS I**  
**Graduate**  
This course is the first of a 3-quarter sequence designed in part to prepare elementary and middle grade teachers to teach an algebra class to qualified 8th grade students in their schools. It is based on a vision of mathematics instruction throughout the grades that continuously builds students' algebraic skills and thinking. This first course in the sequence emphasizes problem-solving as an entry point into algebra for mathematics learners. Students see algebra as an active process for solving problems and as arising naturally as a way to generalize the laws of arithmetic, analyze patterns, and describe relationships in tables, graphs, and equations. In addition, students review and examine foundational concepts in algebra (variables, equations, relations, graphs, slopes of lines, and equations of lines) and are introduced to research on the development of algebraic thinking in middle grade students.

MAT 623  
**ALGEBRA FOR MIDDLE SCHOOL TEACHERS II**  
**Graduate**  
The second course in the algebra sequence builds on the first and maintains emphases on problem-solving, deeper understanding of the central concepts of beginning algebra, and awareness of difficulties students have when encountering the subject for the first time. Topics include systems of linear equations, solving linear inequalities and systems of inequalities, absolute values equations and inequalities, and quadratic functions.

MAT 624  
**FUNCTIONS AND MODELING**  
**Graduate**  
Advanced concepts in beginning algebra provide a basis for a deeper treatment of the relationship between functions and data, and lay the groundwork for the development of polynomial, exponential, and logarithmic models. The course will integrate the use of technology such as graphing calculators and spreadsheets.

MAT 631  
**HISTORY OF MATHEMATICS THROUGH PROBLEM SOLVING**  
**Graduate**  
Topics include the development of calculus, probability theory, number theory, non-Euclidean geometry, and set theory. Offered every Winter.

MAT 620 and MAT 670 are co-requisites for this class.

MAT 632  
**HISTORY AND CULTURAL FOUNDATIONS OF MATHEMATICS**  
**Graduate**  
This course is a cross-cultural survey of the history of mathematics, with emphasis placed on the development of concepts encountered by students in elementary and middle school. The course will also serve as a capstone for the program in that it will include references to content from all the earlier courses and will explicitly ask teachers to make connections across the middle school mathematics curriculum. The students will complete a small group research project in which they choose a mathematical concept from the program and use it as a focal point to study the development of mathematical ideas across time and across cultures.
MAT 640
MULTIVARIABLE CALCULUS I
Graduate
Functions of several variables, vectors, dot products and cross products, partial differentiation, directional derivatives, optimization, Lagrange multipliers, polar and spherical coordinates. Use of software packages to illustrate three dimensional objects. Offered Fall 2017 and every Summer as of 2018.

MAT 618 is a co-requisite for this class.

MAT 641
MULTIVARIABLE CALCULUS WITH LINEAR ALGEBRA FOR MATHEMATICS TEACHERS
Graduate
Multiple integration, line and surface integrals, change of variable in multiple integration, Green's and Stokes' theorems. An introduction to matrices, determinants, linear transformations, and eigenvalues.

MAT 640 and MAT 671 are a prerequisite for this class.

MAT 642
MULTIVARIABLE CALCULUS II
Graduate
Double and iterated integrals, area by double integrals, triple integrals, triple integrals in cylindrical and spherical coordinates, change of variable in multiple integration, line and surface integrals, theorems of Green, Stokes, and Gauss. Offered Winter 2018 and every Fall as of 2018.

MAT 640 is a prerequisite for this class.

MAT 643
IDEAS OF CALCULUS IN THE MIDDLE SCHOOL CURRICULUM
Graduate
The course will introduce students to the "big ideas" of Calculus including limits, derivatives, and integrals. The course will emphasize how the mathematics in the middle school curriculum can lay a foundation for the study of continuous mathematics and to the role that Calculus plays in the sciences. In particular, direct connections to the topics of this course and the middle school curriculum will be made by studying activities from curriculum materials currently used in CPS that are relevant to the topics of Calculus. Trigonometry from the perspective of the middle school classroom will be used as the launching point for introducing the major ideas of the course. The course will also give the students the opportunity to understand the interplay between the concepts and tools they learned in the MMT 415-417 sequence and Calculus.

MAT 644
DIFFERENTIAL EQUATIONS
Graduate
This course will continue the study of differential equations (DEs) begun in MAT 618. Topics include solutions and applications of linear DEs, second order DEs with constant coefficients; linear systems: eigenvalues and eigenvectors of matrices, phase portraits and explicit solutions; nonlinear planar systems: linearization and stability analysis. Offered every other Spring as of 2018.

MAT 618 and MAT 672 is a prerequisite for this class.

MAT 649
DATA ANALYSIS AND PROBABILITY
Graduate
This course covers the fundamental concepts of probability that are part of the middle school curriculum and recent research findings on student learning of probability and classroom implications of this research. In addition, it covers the principles of graphically displaying, collecting and analyzing data with and without the use of technology. Topics will include measures of central tendency and dispersion, graphical representations of data (histograms, boxplots, bar charts, pie charts, and line graphs), and the design of experiments and simulations.
MAT 650
PROBABILITY & STATISTICS FOR MATHEMATICS TEACHERS I
Graduate
Combinatorics, sets, probability, random variables, distribution and density functions, multiple integration, standard probability laws, jointly distributed random variables. Use of graphing calculators, applets, and software packages to illustrate concepts. Offered every Winter.

MAT 640 and MAT 660 are prerequisites for this course.

MAT 651
PROBABILITY & STATISTICS FOR MATHEMATICS TEACHERS II
Graduate
Central limit theorem, point and interval estimation of parameters, hypothesis testing, least squares and regression. Offered every Spring.

MAT 650 is a prerequisite for this class.

MAT 660
DISCRETE MATHEMATICS
Graduate
Logic and techniques of proof, mathematical induction, sets and functions, relations, introduction to number theory and combinatorics. Offered every Fall.

MAT 665
DISCRETE STRUCTURES WITH A TRANSITION TO HIGHER MATHEMATICS
Graduate
A transition to advanced courses having a greater emphasis on proof and abstraction. Techniques of proof, logic, sets and functions, number theory, recursive sequences, mathematical induction, and an introduction to combinatorics.

MAT 670
ABSTRACT ALGEBRA I
Graduate
Examines the integers, prime numbers, the Euclidean algorithm, the uniqueness of prime factorization, equivalence relations, rational numbers, real numbers, and complex numbers. Provides examples of groups, rings, and fields and also covers the Fundamental Theorem of Algebra and roots of polynomials of small degree. Offered every other Winter as of 2018.

MAT 660 is a prerequisite for this course.

MAT 671
ABSTRACT ALGEBRA II
Graduate
Examines modular arithmetic, the irreducibility of polynomials over different fields, criteria for solvability by radicals, rational values of trigonometric functions, difference functions, partial fraction decomposition, and geometric constructions with ruler and compass. Along with Math 670, this course provides the theoretical foundation for many topics covered in high school mathematics courses. Offered every other Spring as of 2018.

MAT 670 is a prerequisite for this class.

MAT 672
LINEAR ALGEBRA
Graduate
Vector spaces, linear combinations, spanning sets, linear independence, basis, dimension, systems of linear equations, matrices, linear transformation, eigenvalues and eigenvectors. Offered every other Spring as of 2019.

MAT 660 is a prerequisite for this course.
MAT 680
REAL ANALYSIS
Graduate
Construction and properties of the real numbers. Proofs of essential results from calculus such as the intermediate value theorem, extreme value theorem, mean value theorem, existence of the Riemann integral, and Taylor's theorem. Offered every Fall.

MAT 618 and MAT 660 are a prerequisite for this class.

MAT 699
TOPICS IN MATHEMATICS FOR TEACHERS
Graduate
Diverse topics in mathematical modeling or mathematical appreciation germane to the secondary school classroom.

MAT 360
GENERALIZED LINEAR MODELS
Undergraduate
Applications of generalized linear models. Topics include generalized linear models for non-normal continuous response, models for binary and multinomial response data, models for count data, and analysis of variance and covariance. The class of generalized linear models contains the models most commonly used in statistical practice.

MAT 350
BAYESIAN STATISTICS
Undergraduate
Comparison of Bayesian and frequentist methods, conditional probability, Bayes theorem, conjugate distributions, computational methods, hands-on Bayesian data analysis using appropriate software, interpretation and presentation of analysis results. Students will learn to use software packages including OpenBUGS. The free software program R will be utilized for data analysis.

MAT 349 (or MAT 351) is a prerequisite for this class.

MCS 207
HISTORY OF CINEMA I, 1890-1945
Undergraduate
This course examines the history of cinema as one of the most influential cultural forms of the 20th Century. We will study the aesthetic and technological developments of cinema during its first 50 years, as well as examine the social and economic factors shaping its history. Initially influenced by other art forms (theater, literature, painting) filmmaking quickly acquired its own formal system, language, and traditions. We will trace the changing styles, techniques, content, and methods of filmmaking as an art form, as popular culture, and as an industry. We will consider how cinema is bound to its social context via audience relations, economics, technology, and ideology. The limited scope of this course will cover primarily feature-length, narratives films as the dominant mode of filmmaking, although we will also look at the development of documentary and experimental filmmaking. The class will consist of lectures, screenings, and discussions.

MCS 208
HISTORY OF CINEMA II, 1945-1975
Undergraduate
This course covers the continued rise and development of cinema from 1945 to 1975. The course will have a dual focus, looking simultaneously at both the American studio system and international cinemas. The lectures, screenings, and discussions place equal emphasis on charting the development of cinematic techniques as well as examining the growth of specific national cinemas. In addition, the course surveys international stylistic trends in narrative, documentary, and avant-garde film. Students will acquire a broad understanding of the institutional, social, technological, and aesthetic forces that have shaped the development of cinema during the mid-twentieth century.

MCS 209
HISTORY OF CINEMA III, 1975-PRESENT
Undergraduate
This final course in the film history sequence is designed to introduce students to a sense of modern film history and the multiple permutations of cinema around the modern film history and the multiple permutations of cinema around the globe. It presents film history from a global perspective, concentrating primarily on the development of new national and transnational cinemas. The course continues to chart the development of the American studios since the mid-1970s while examining the effects of media consolidation and convergence. Moreover, the course seeks to examine how global cinemas have reacted to and dealt with the formal influence and economic domination of Hollywood filmmaking on international audiences. Class lectures, screenings, and discussions will consider how cinema has changed from a primarily national phenomenon to a transnational form of communication in the 21st century.
MCS 231
INTRODUCTION TO DOCUMENTARY STUDIES
Undergraduate
This course examines the rise and growth of documentary forms, including audio, film, television, photography, literary journalism and ethnography. Students will study representative works from each documentary approach and learn to analyze the techniques of observation and representation at use in these pieces. Students will become familiar with major theoretical constructions of documentary and be able to use these analytical tools to critique documentary forms. Lab for film viewing required.

MCS 251
SPACES OF CINEMA IN ROME
Undergraduate
This course examines the history and heritage of Italian cinema through an analysis of critically acclaimed films produced in Rome. Topics of focus include the comparison of Italian and Hollywood constructions of historical settings, and the cinematic organization of visual space. The course features visits to the Roman sites where films examined in the course were produced. The course's goal is the development of an understanding of filmmakers' artistic choices and the expectations that they set up for their audiences through setting. Offered in conjunction with the Rome Film Studies Program.

MCS 252
CONTEMPORARY ITALIAN CULTURE THROUGH FILM
Undergraduate
This course provides an exploration of contemporary Italian culture through the medium of cinema. The course examines how cinema addresses complex social and political concerns in Italy. Topics and themes include health care; the transformation of the structure of the family; immigration and emigration; the perennial problem of organized crime; and the difficulties faced by the younger generations in their attempt to integrate into society. Italian film industry professionals and cultural historians will provide context and perspective on contemporary social issues facing Italy. Offered in conjunction with the Rome Film Studies Program.

MCS 260
INTRODUCTION TO TRANSMEDIA STORYTELLING
Undergraduate
Transmedia storytelling, or the distribution of narrative content across multiple technologies and media, is rapidly becoming a common trend in contemporary media making. Whether it's television series sharing content with video games, films' narratives continued (or begun) in graphic novels, or media systems in which no one medium takes precedence in telling the story, transmediation can take many forms. This class will introduce the concept of transmedia from a media studies viewpoint, will examine transmedia's history, contemporary usage, and creation, and will have students work together to construct a transmediated narrative.

MCS 271
MEDIA AND CULTURAL STUDIES
Undergraduate
This course provides students with a theoretical and methodological background in the interdisciplinary field of cultural studies, which considers media and culture as sites for the construction and contestation of race, class, gender, ethnicity, sexuality and nation. The course provides a foundation in critical cultural studies, ideology critique, critical race and gender studies, transnational media studies and active audience studies. Formerly Introduction to Radio, Television and Film.

MCS 273
STORYTELLING & STYLE IN CINEMA
Undergraduate
Course covers basic concepts and terminology of film and video as forms of art and mass culture. This course covers the aesthetic elements that constitute film and video texts: plot structures, sets, costumes and makeup, acting, lighting, cinematography, editing, and sound. By performing extensive textual analyses, students learn how the interaction of these elements produces meaning. Students also gain basics of how these concepts are practiced in film production. After mastering the aesthetic concepts, students also examine their use in three different modes of film: fiction, documentary, and the avant-garde. (Formerly Film/Video Analysis)
MCS 275
COMICS STUDIES
Undergraduate

Comics are a rich, vibrant medium whose history predates that of movies, television and radio. While many cultural critics have viewed comics as simplistic and childish over the years, the combination of text and images that comics offers literary and artistic possibilities not found in any other medium. This course examines the medium of comics by exploring its history and theory, along with issues of representation, form, aesthetics, genre, biography and autobiography. Along the way, we will engage with such themes as heroism, trauma, identity and youth, among others. Students will read scholarly work on the medium of comics, as well as a wide range of comic books, comic strips, graphic novels and webcomics.

MCS 286
RADIO PRACTICUM
Undergraduate

Students who already actively participate at DePaul's radio station have the opportunity, depending on the station's needs, to produce on-air announcements, specialized broadcasts (weather, sports, University-based topics), newscasts, and assist station managers with their day-to-day responsibilities for MCS credit. In addition to working at the radio station, students must successfully complete a short research project on an approved topic. (1 quarter hour)

MCS 290
MEDIA & CINEMA STUDIES WORKSHOP (VARIABLE TOPICS)
Undergraduate

This course allows students to sample a range of hands on, practical offerings in media and cinema studies that can enhance their knowledge and expertise. Two types of workshop classes are offered: research and production. Examples of Research Workshop topics can include film criticism, Survey Design, and Academic Writing Bootcamp. Examples of Production Workshop topics include non-linear editing with Final Cut Pro, Multimedia Design, and Video Camera Basics. Students may take a maximum of 4 credit hours of MCS 290 in the major, and a total of 8 credit hours. (2 quarter hours)

MCS 331
TOPICS IN DOCUMENTARY STUDIES
Undergraduate

A rotating topics course that could focus on specific historical era or specific group of texts or documentarians from across film, television, audio, writing, and photography. Courses like Feminism & Documentary, and Political Documentary fit under this heading.

MCS 339
RADIO BROADCASTING
Undergraduate

The overall objectives of this course are to familiarize students with the history and practices of commercial and college radio broadcasting and to afford students hands-on broadcasting opportunities at our state-of-the-art radio station. Numerous topics and challenges facing modern radio stations will be discussed, including deregulation, copyright law, and decency standards. It is expected that upon successful completion of this course that students will be prepared for advanced broadcasting and production courses and radio and television internships.

MCS 341
TOPICS IN RADIO STUDIES
Undergraduate

Subjects rotate among several historical and conceptual topics, such as Rock Radio, Talk Radio, Gender and Radio, Radio and American Culture, etc. Students will have the opportunity to build upon the foundations of radio that are explored in other radio courses. Radio topics courses are considered advanced study in the subject area; therefore, students are encouraged to complete MCS 339 or MCS 342 prior to taking a radio topics course.

MCS 342
HISTORY OF TELEVISION & RADIO
Undergraduate

A history of radio, television, and cable that engages with elements such as programming, economics, industrial structures, audiences, government and industry policies, and social effects. The course includes viewing, analysis, and criticism of a wide variety of American programming.
MCS 343  
MEDIA ETHICS  
Undergraduate  
Entertainment and social media dominate popular culture today in a way that begins to completely define American culture. In what ways do entertainment media impact society? As creators of media, what special responsibilities do we have? And as creators of entertainment media how can we use these ethical theories in our daily practice? This course will examine the underlying ethical theories used when we try to arrive at ethical judgments about right and wrong. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. The issue of balancing individual creativity vs. cultural impact, particularly on children, will be addressed. The course will culminate with the formulation of elements of an ethical code of conduct for every electronic (social) media, television professional and movie creator.

MCS 344  
THE SEXUAL REVOLUTION: HOLLYWOOD IN THE 1960s  
Undergraduate  
The late 1960s are often described as a time of “Sexual Revolution” in America, with loosening standards and attitudes about sex and sexual practices. But was this period as “liberated” as it has appeared to be? Who was liberated by these new attitudes, and from what? How do attitudes about sexuality in the 1960s compare to our attitudes now? This course uses the study of American cultural history to examine perspectives of sexuality in the 1960s, and it focuses upon the films that Hollywood produced to represent this “new” sexuality. In the process, the course examines shifting definitions of gender and sexuality with which American culture was contending during this revolutionary time.

MCS 348  
TOPICS IN FILM GENRE  
Undergraduate  
This course offers an historical examination of film genres, with a varying focus on one particular genre: film noir, musicals, melodrama, detective/gangster film, science fiction film, comedy, Western, animation, youth films. The course explores the relationship of genres to general social histories. Lab for film viewing required.

MCS 349  
TOPICS IN FILM STUDIES  
Undergraduate  
Examination of a particular era of film history or national cinema, film movements, or moments in social history and their relationship to film production. Topics currently in rotation include Film Sound Studies, American Films of the 1970s, War and Film, feminist film, Psychoanalysis and Cinema, etc. Lab for film viewing required.

MCS 350  
TOPICS IN GLOBAL CINEMA  
Undergraduate  
This course is designed as a critical study of global filmmakers and the issues surrounding cinema and its transnational circulation. The class will examine specific aspects of the growth and evolution of cinema and look at points of contact between different cultural discourses, national cinematic styles, genres, and reception. Artistic, social, political, and industrial issues will be examined to provide different models of cinematic creation and consumption. Recent topics have included Latin American Cinemas, Asian Cinemas, Transnational Cinema, New German Cinema, History of French Film, Contemporary Global Directors, etc. Lab for film viewing required.

MCS 351  
TOPICS IN TELEVISION STUDIES  
Undergraduate  
This course offers advanced study of television as a unique audio-visual culture with its own history and styles. This course presumes basic knowledge of television terms and methods of media analysis. Studies of a selected aspect of television history, television criticism, or national television are offered regularly. Recent topics have included Global Television, Reality TV, American TV of the 1950s, Television News, etc.

MCS 352  
TOPICS IN NEW MEDIA  
Undergraduate  
This course examines the effects of new and/or digital media on interpersonal communication, media industries, and/ or media culture. Depending on the specific focus of this variable elective course, it might focus on economic, social, political, or aesthetic implications of new media, including the Internet, interactive games, and other new media technologies and applications.
MCS 353
TOPICS IN MEDIA STUDIES
Undergraduate
This is a rotating topics class for subjects that encompass a number of different media, including radio, television, film. Possible topics may include: Media and Politics, Contemporary News Media, Reception Studies, Popular Culture Studies, etc.

MCS 355
SEX IN THE BOX: U.S. TELEVISION, SEX, AND SEXUALITY
Undergraduate
This course will examine the continued negotiation of sex and sexuality on American television. Whether through their structuring absence, head-on attendance, or mere subtle implication, sex and sexuality have been omnipresent within the medium since its proliferation in the late 1940s. Through lenses of TV, social history, and gender/sexuality criticism, this course will examine various ways in which sexual issues such as the marriage bed, female sexual agency, GLBT visibility, teen sex, and rape have made their ways onto and been pushed off of the small screen. It will also interrogate how these broad categories interact with TV's assumed social role, contemporary and historical notions of American values, and TV regulation.

MCS 358
TOPICS IN COMICS STUDIES
Undergraduate
This is a rotating topics class for subjects pertaining to the study of the comics in media including comic books, graphic novels, webcomics, and other forms of sequential art and graphic narrative.

MCS 359
TOPICS IN CULT STUDIES
Undergraduate
This course offers rotating topics focused on "cult" media and subcultural audiences, that is, aspects of culture that are separate from, or differentiate themselves from, the mainstream, or that present new ways of examining consumers and the emotional resonance of various media products on contemporary audiences. Topics will focus on such aspects as genre films and television, audience analysis, affect, and cult products. The purpose of this course is to understand how audiences and media producers design media texts to confront and challenge contemporary ideologies, to offer alternatives to the mainstream, and to engineer deliberate affective reactions in audiences.

MCS 360
B-MOVIES
Undergraduate
This course will explore the role of the B-movie in film history: from its origins in the 1930s, through its evolution in the 1950s and all the way up to the modern critical application of the "B" label to a variety of different film genres, styles and budgets. Students will examine the place of the B's within the overall contexts of both mainstream Hollywood cinema and low-budget filmmaking in general. Specific focus will be placed on issues of economic mode of production and how this impacts a film's aesthetics, as well as theories of cultural distinction regarding the notion of "film trash" such as camp theory and cultism. A variety of films will be screened in class. Please take into consideration when choosing this course that we will screen films that may at times contain highly lurid, violent and/or sexual imagery.

MCS 361
FANDOM & PARTICIPATORY CULTURE
Undergraduate
This course introduces students to the world of media fandom. Fans are people who hold an emotional attachment to media texts. By investigating the types of media texts people connect to, as well as the work fans do in their community, students encounter new ways of participating with media. Students not only examine fans as cultural "producers," who make media just as much as they consume it, but also examine media from the point of view of a fan. This course also looks at how participating in fandom can aid the development of diversity and positive social change.

MCS 362
COLOR TV: BLACKNESS IN AMERICAN TV
Undergraduate
Throughout the history of US television African American performers have been part of America's small screen entertainment. From the earliest days of Amos and Andy to 1970s Black sitcoms such as Good Times and That's My Mama and the 80s runaway hit The Cosby Show to contemporary network hits, black lives, stories, and performances have helped to paint an often skewed picture of America. This class will explore the position of Blackness and African American performers, creators, and executives throughout the history of American television.
MCS 363
TOPICS IN FAN STUDIES
Undergraduate
This course offers a rotating series of topics all focused on a particular type of fandom, fan object, or fan practice. Fans are viewers who hold an emotional attachment to what they experience; fans often act on that emotional attachment. This course explores different facets of the fan experience in detail. Studies of selected topics could include: specific media fandoms (Trekkers, Potterheads, Gleeks, etc.), sports fandom, celebrity culture, fans in social media, specific fan practices (social activism, material work, fan vidding), or the influence of fandom in the contemporary media environment, etc.

MCS 364
MONSTERS IN POPULAR CULTURE
Undergraduate
In this course, students will examine monsters, spooks, scares, and--above all--fear. Through informed viewing of television, film, radio, literature, and graphic novels, we will explore the evolution of some of the most well-known monsters, including vampires, zombies, and aliens, as well as less-known varieties, like the Golem, the cyborg, and even the human being. Screenings will be paired with discussion and class activities. The concept of the monster itself will be interrogated, and we will explore how the monster reflects humanity's fears as well as its desires. This is the one class that proves college is scary as hell.

MCS 365
HORROR FILMS
Undergraduate
Why do we willingly subject ourselves to films that seek to scare, shock and disgust us? What compels us to watch films with ghastly imagery, gory special effects and gruesome murders? Are horror film fans merely uncultured sadists who revel in watching others suffer on screen? Are there cathartic pleasures to be had in horror films that are actually beneficial to society? This course examines the horror film genre from a variety of perspectives - from the cultural implications of why certain images frighten us, to the technological factors involved in special effects advancements, to the moral panics arising from both 1930s monster movies and modern “torture-porn” cinema. We will trace the horror genre back to its roots in the silent film adaptations of such gothic novels as Frankenstein and Dr. Jekyll & Mr. Hyde, through the classical era of the 1930s/1940s and the Universal monster movies, into the new era of the 1970s (from big-budget and Oscar winning films like The Exorcist and The Omen, to the low-budget auteurist horror efforts like The Texas Chainsaw Massacre and Last House on the Left), and into the modern era of slashers, stalkers, remakes and reboots. [NOTE: This course will regularly examine films with extremely gory imagery that may be offensive and unpleasant to some students (...and if that's you, then you're definitely taking the wrong course!). To quote the beginning of Frankenstein (1931): "We think it will thrill you. It may shock you. It might even horrify you. So, if any of you do not care to subject your nerves to such a strain, now's your chance to...well, we warned you!"]

MCS 366
COMMUNICATION, TECHNOLOGY AND SOCIETY
Undergraduate
Survey of a variety of contemporary and historical issues related to the introduction and diffusion of communication technologies in society. Especially examines how new technologies, particularly the Internet, are transforming the communication landscape. Emphasis on issues of intellectual property, surveillance, privacy, regulation, message construction, and access will be central to this course.

MCS 369
TIME TRAVEL ON TELEVISION
Undergraduate
This class examines the common narrative device of "time travel" as it has been shown on television. We will look at the history of time travel on television, how time travel becomes a narrative device, and at the generic components of time travel narratives. Through careful readings of television episodes, we will study the influence of technology, politics, identity, the body and mediation on representations of time travel. Further, we shall examine these texts not just as glimpses of possible futures, but also as cultural critiques of issues in the present. Through screenings, daily written responses, and a final project, students will have the opportunity to explore the intricate nature of narratives about time travel.
MCS 370
ADAPTATION: MOVIES/TV/NOVELS/COMICS/TOYS/VIDEO GAMES
Undergraduate
This course looks at adaptation as a cross-media phenomenon, which we will trace back to the origins of the film medium in the late nineteenth century. The desire to experience familiar stories and characters in different media forms transcends generations. Film critic Margaret Farrand Thorp wrote in 1939 of the "widespread human eagerness to experience the same story in as many media as possible." This impulse has only grown in recent years with the increasingly vital role of franchises in an era of media convergence, whereby narratives become replayed, extended and/or intertwined across films, television programs, video games, comic books and other forms. The course will begin with the traditional adaptive process of turning novels into film, the theoretical concerns surrounding fidelity and medium-specificity, and the critical debates to do with adaptation and authenticity. We will look at the classical era of Hollywood in the 1930s through 1950s, followed by comparisons of graphic novels to their film versions. The more problematic process of adapting such properties as board games, toy lines and video games is explored in later weeks, as are the implications for the adaptive process created by the prolific nature of digital special effects. We will go beyond narrative and aesthetic analysis in many weeks to consider the industrial implications of adaptations, as well as what media theory can offer us in studying how and why texts are adapted from one medium to another.

MCS 373
AUDIO DOCUMENTARY
Undergraduate
This course uses hands-on projects so that students can explore the steps in the process of creating an audio documentary. Through practical application students consider questions that surround the interpretation of cultural experience. Additionally, students analyze a variety of approaches to audio documentary in an effort to understand better this significant form of storytelling.

MCS 375
LATINO/A TELEVISION AND MEDIA
Undergraduate
Drawing from Latin American and U.S. television studies, this course explores the political, industrial and cultural dynamics that shape televisual representations in Latin American television and/or Spanish language Television in the US. More specifically, Spanish-language television and media will be examined from interdisciplinary frameworks, which include the cultural analysis of televisual modes, national and international regulations of media production and distribution, histories of production, and ethnographies of viewing.

MCS 376
LATIN AMERICAN CINEMA
Undergraduate
This course examines the production, distribution and impact of cinema in the Latin American context. Transnational relations with other industries, such as Hollywood and the European film context will be considered. We will investigate how social, economic and political forces have shaped or are presently influencing and transforming national cinemas. Questions of identity and cultural difference, particularly in relation to immigration, diasporas, transnationalism, youth culture, class, gender, sexuality, race and ethnicity are central to the discussions. We will consider the diversity of styles and topics that are now redefining the cinema of the region.

MCS 378
SEINFELD
Undergraduate
When Seinfeld aired on NBC in 1989, it was panned as “sophomoric talk radio” and “mildly amusing." Even comedian Roseanne Barr, whose sitcom ran contemporaneously with Seinfeld, found the show about four Manhattanites rather pretentious: "They think they're doing Samuel Beckett instead of a sitcom," she asserted. However, by the end of its run (1998), Seinfeld was praised as "an authentic American comedy of manners" and "the defining sitcom of our age." This term, we will explore the series from its early shaky period-when its own studio executives considered it "too New York, too Jewish"-to its news-making series finale. We will also look at the show's extraordinary and profitable afterlife via syndication, Curb your Enthusiasm (2000-), Jerry Seinfeld's web series(2012-), and Twitter accounts like @SeinfeldToday. Finally, so that students will understand that Seinfeld-like all media texts-is a product of the time period (and industry) in which it was created, we will place the series in its historical and cultural contexts; for the same reason, students will be introduced to several critical and theoretical perspectives to the show.
For more than 15 years, filmmakers Spike Lee and Quentin Tarantino have feuded publicly over the use of the N-word in Tarantino's films. "Quentin is infatuated with that word," Lee complains. "What does he want to be made-an honorary black man?" Without missing a beat, Tarantino strikes back: "As a writer, I demand the right to write any character in the world that I want to write. And to say that I can't do that because I'm white [...] is racist." Based on such exchanges, it might seem odd to pair Lee and Tarantino in a college film course. But actually, the ongoing animosity between the directors only serves to draw them closer, and the two have more in common than perhaps they will admit (even Netflix and Amazon Prime couple the directors' films for their users). With that in mind, we will juxtapose nine feature-length works of Lee and Tarantino, considering specifically the directors' auteur statuses, depiction of heists, attraction to the abject, and (re)visions of genres and gender. Further, on their own, students will explore works by Tarantino and Lee not screened in-class so that they may deepen their understanding of the directors' styles, intents, politics, etc.

This course is to familiarize students with a wide range of disciplines (film, art history, philosophy, psychology, etc.) and how these ideas both inflected the development of classical film theories as well as the evolution of cinema. Moreover, the scope of the course seeks to examine the overall process whereby theoretical discourse develops historically.

This course will provide an in-depth exploration of how filmmakers create various types of meaning through film form and style. Methods of analysis will include semiotics (the analysis of signs and symbols that produce meaning), genre studies, and celebrity studies. We will pay specific attention to how meaning emerges from in-vogue or director-specific stylistic choices (for example, Spike Lee's dolly shot, bullet time post-Matrix, and the popularity of still photography in film of the late 1960s) and new technologies that emerge at various times (for example, special effects that allow for the production of different images, and advances in control over layered sound that change aural impact).

This course will record, edit, and produce various dynamic audio pieces including podcasts, documentaries, commercials, and more. Though most pre-production work will be done at the studios of Radio DePaul, it may be possible for some students to complete their productions in a DePaul lab or at home. While experience is not required, an affinity for sound-only entertainment and information content will benefit students.

This course is a rotating topic course in areas of media production and may include classes such as Podcasting, Advanced Radio Production, Advanced Audio Documentary, Radio News, Multimedia Production, etc.

This course will serve as a foundation for students in theories of film, television, and new media. An engagement with areas such as formal analysis, television and film spectatorship, authorship, television flow, and media specificity will provide both a brief historical framework for these disciplines, as well as a survey of major texts. Readings will include scholars/theorists such as Sergei Eisenstein, David Bordwell, Laura Mulvey, Horace Newcomb, Raymond Williams, Nick Browne, and Henry Jenkins. Formerly MCS 501 Introduction to Media Studies.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.
MCS 502
MEDIA AND CULTURAL STUDIES
Graduate
This course provides students with a theoretical and methodological background in the interdisciplinary field of cultural studies, which considers media and culture as sites for the construction and contestation of race, class, gender, ethnicity, sexuality and nation. The course provides a foundation in critical cultural studies, ideology critique, critical race and gender studies, transnational media studies and active audience studies.

Status as a College of Communication Graduate Student or MFA Cinema student or Experience Design student or department consent is a prerequisite to this class.

MCS 504
HISTORIOGRAPHY AND RESEARCH
Graduate
This course will offer critical perspectives and methods to film and media history and research. Areas of exploration will include how popular history and academic historiography interact, the way certain subjects and facts are emphasized over others, the different forms used to represent historical knowledge, and questions of history and memory. In addition to the assumptions, methods, and purposes of film/media histories, the course will also ask crucial questions regarding the nature of inquiry and the status of data and evidence. Students will learn how to address a specific research question through a variety of methodologies in a cogent and comprehensive manner. Students will also develop competency in writing a research proposal and using research tools such as Endnote and online journal databases.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

MCS 520
TOPICS IN MEDIA STUDIES
Graduate
This is a seminar that focuses on a particular area of media studies including, but not limited to, topics such as the contemporary media industries, kids media culture, television studies, music cultures, digital divide, race and media, celebrity culture, radio studies, war and media, gender and media, global television, new media studies and sexuality and media. Students may take this seminar repeatedly in different topic areas.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

MCS 521
TOPICS IN CINEMA STUDIES
Graduate
This is a seminar-level course that provides in-depth examinations of Cinema Studies topics. Topics vary from quarter to quarter and may include studies of film genres, film authorship, national cinemas, global cinema, gender in cinema, animation, film theory, early cinema, film aesthetics, race and representation, film sound studies, or other rotating topics.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

MCS 522
TOPICS IN CINEMA/ MEDIA HISTORY
Graduate
Examination of a particular era of film history or national cinema, film movements, or moments in social history and their relationship to film production. Topics currently in rotation include American Films of the 1970s, Latin American Cinema, War and Film, New German Cinema, feminist film, etc. Examination of a particular era or forms of television/media from a historical perspective. Topics could include but are not limited to: History of American Broadcasting, International Broadcasting Structures, Television Outside the Box, Public and Community Broadcasting, genre-specific histories, etc.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
MCS 523
TOPICS IN GLOBAL FILM & MEDIA
Graduate
This course surveys a number of frameworks for understanding the global dynamics that constitute particular media cultures around the world. We will examine historical perspectives and debates concerning the processes of globalization and the media's constitutive role in impacting our conceptions of space and time across local, national and transnational terrains. Students will interrogate how the actions of nation states, civil society and transnational corporations impact media industries and ask how media representations are contested across registers of nation, region, citizenship, class, religion, labor, gender, Diaspora, race, migration and ethnicity.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

MCS 530
NEW MEDIA AND CULTURE
Graduate
This seminar considers the cultural ramifications of new media in shaping life experience and opportunity. As interactive digital media technologies expand opportunities for social networking, text and instant messaging, file sharing, collaborative authoring, blogging, podcasting and mobile communication, this seminar asks how these new technologies impact identity formation, creative participation and concepts of public culture. Issues of concern include race, gender, class, sexuality, cultural citizenship, fandom, subcultures and democratic participation.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

MCS 533
LATIN AMERICAN CINEMA/MEDIA
Graduate
This seminar examines the production, distribution and impact of cinema and media in the Latin American context. We will view a range of works from major and minor industries and investigate how social, economic and political forces have shaped or are presently influencing and transforming national cinemas and their industries. Questions of identity and cultural difference, particularly in relation to immigration, diasporas, transnationalism, youth culture, class, gender, sexuality, race and ethnicity are central to the discussions. We will consider the diversity of styles and topics as much as the discursive and theoretical frameworks that in the past defined, or those that are now redefining, the cinema and media of the region.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

MCS 534
DOCUMENTARY STUDIES
Graduate
This course examines the rise and growth of documentary forms, including audio, film, television, photography, and literary journalism. Students will study representative works from each documentary approach and learn to analyze the techniques of observation and representation at use in these pieces. Students will become familiar with the social, aesthetic, and historical discourses of documentary and understand major theoretical and critical approaches of analyzing documentary forms. Students will become aware of the convergent and divergent qualities that are features of qualitative research, journalism, and documentary practice. Students will learn how documentary functions as a witness to personal and public histories.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

MCS 541
AUDIO DOCUMENTARY
Graduate
This course uses hands-on projects so that students can explore the steps in the process of creating an audio documentary. Through practical application students consider questions that surround the interpretation of cultural experience. Additionally, students analyze a variety of approaches to audio documentary in an effort to understand better this significant form of storytelling.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.
MCS 542
TOPICS IN PRODUCTION
Graduate
This is a seminar that focuses on a particular area of media production including, but not limited to, topics such as comedy writing, documentary production, and screenwriting. Students may take this seminar repeatedly in different topic areas. PREREQUISITE(S): Status as a Graduate Media and Cinema Studies student or professor approval is a prerequisite for this class.
Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

MCS 544
TOPICS IN DOCUMENTARY STUDIES
Graduate
A rotating topics course that could focus upon a specific historical era-specific group of texts or documentarians across film, television, audio, writing, and photography.
Status as a Communication and Media (MA) or Documentary (MFA) student is a prerequisite for this class.

MCS 550
FANDOM AND ACTIVE AUDIENCES
Graduate
Fans, people who hold an emotional attachment to a particular object, have been the object of academic study for twenty years; yet, the study of audiences and reader/viewer-ship has a much longer and more detailed history that goes back hundreds of years. Why this fascination with the way people interpret and react to media? What is it about fans, audiences, or readers that holds such interest for academics? This course will explore the relationship between fans, academics, and cultural studies. Through an examination of the way fans and active audiences are studied, we can better understand our media, our texts, and our selves.
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

MCS 575
DIGITAL MEDIA ETHICS
Graduate
This course provides students with the necessary background to investigate legal and ethical issues in digital technology and culture. Additionally, students practice digital literacy as an application of these ethical issues. This class offers topics including, but not limited to copyright, authorship, attribution, civics, vernacular creativity, Free Speech, filesharing, piracy, libel, access, participation, modes of control, net neutrality, etc., in order for students will come away with a sense of the ethical issues within today's culture.
Status as a College of Communication Graduate Student or CDM Digital Communication and Media Arts student or department consent is a prerequisite to this class.

MCS 590
MEDIA & CINEMA STUDIES WORKSHOP (VARIABLE TOPICS)
Graduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (2 quarter hours)
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

MCS 592
INDEPENDENT STUDY
Graduate
This is a 4-credit hour course reserved for independent coursework and specialization under the supervision of a faculty member. Students can propose to take this class after completing six 4-hour courses in the MCS program. Enrollment in this course requires the proposal of a student-designed syllabus that is approved by both the supervising professor and College of Communication administration. See website for Independent Study proposal form. PREREQUISITE(S): Status as a Graduate Media and Cinema Studies student is a prerequisite for this class. The student must have completed six 4-hour graduate courses prior to taking this course. Approval required.
Status as a Graduate Media and Cinema Studies student and Director consent is a prerequisite for this class.
## MCS 599
### RESEARCH THESIS
#### Graduate
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged and loan deferment is available. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll.

Status as a Graduate Media and Cinema Studies student and Director consent is a prerequisite for this class.

## MCS 601
### ACTIVE DEGREE COMPLETION
#### Graduate
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans. (0 credit hours)

Status as a Graduate Media and Cinema Studies student is a prerequisite for this class.

## MCS 602
### CANDIDACY CONTINUATION
#### Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans. (0 credit hours)

Status as a Graduate Media and Cinema Studies student is a prerequisite for this class.

## MED 95
### CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH
#### Undergraduate
Required of all music education students. Observations and participation experience with children and youth in a school or agency. This course is a prerequisite for student teaching and related professional courses. This course serves as a pre-requisite for MED 392. (0 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

## MED 101
### BRASS I
#### Undergraduate
Trumpet and french horn. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

## MED 102
### BRASS II
#### Undergraduate
Trombone, euphonium and tuba. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.
MED 103
WOODWINDS I
Undergraduate
Clarinet and saxophone. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

MED 104
WOODWINDS II
Undergraduate
Oboe and bassoon. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

MED 105
STRINGS I
Undergraduate
Violin and viola. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

MED 106
STRINGS II
Undergraduate
Cello and string bass. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

MED 107
PERCUSSION I
Undergraduate
This course focuses on the fundamentals of instrumental percussion performance, pedagogy, and other related information. Open only to School of Music students. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

MED 108
PERCUSSION II
Undergraduate
This course focuses on the continued study of instrumental percussion performance, pedagogy, and other related information. Open only to School of Music students. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

MED 109
WOODWINDS III
Undergraduate
Flute. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.
MED 121
CLASS GUITAR
Undergraduate
This course focuses on the fundamentals of guitar performance and pedagogy. Students learn how to teach group guitar classes and accompany classroom teaching. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MED 196
CLASS VOICE
Undergraduate
A developmental approach to singing that emphasizes a healthy approach to the child's singing voice, as well as the development of the participants' vocal skills. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MED 200
MUSIC EDUCATION LAB ENSEMBLE
Undergraduate
This course is designed to provide music education majors with experience singing and playing secondary and tertiary instruments in a student-led lab ensemble. The participants will also explore literature appropriate for 6-12 grade choral, wind, and string ensembles. Music education majors who have completed the conducting courses or are currently taking Conducting for the Music Educator will serve as conductors for the Lab Ensemble; music education majors who are currently in the methods mix may take this class as a music education elective and will serve as instrumentalists and singers in the ensemble. This class may be taken for two quarters (freshman, sophomore, or senior year) as a one-credit music education elective (2 total quarter hours). The third year the class would be taken as the lab component of the Conducting for the Music Educator class. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MED 201
CLASSROOM INSTRUMENTS
Undergraduate
The purpose of this course is to provide students with the opportunities to develop basic skills using instruments and sound sources appropriate for use in general music (K-8) classroom settings. This course will focus on: at least one voice of recorder, body percussion, barred Orff instruments, unpitched percussion, and drums. The skills and knowledge students attain from the course experience will better prepare them to play and teach these instruments to children in school settings and beyond. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MED 202
COMPOSITION IN THE K-12 CLASSROOM
Undergraduate
Composition is one of the nine National Standards for Music Education and has become an important topic in public school music curricula. The purpose of this course is to introduce music education students to the use of composition in the music classroom form Kindergarten through 12th grade. We will explore composition as a process and a product, examine the historical roots of composition in schools, and work on building the necessary tools and techniques to be successful music educators who lead students through the process of composition. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MED 203
FOUNDATIONS OF MUSIC TEACHING AND LEARNING I
Undergraduate
This course will focus on the development of culturally response practice in music classrooms and rehearsals. Culture will be studied from the perspective of language, race, ethnicity, religion, and sexual identity and related to the k-12 music context. This course is designed to address recent curricular requirements established by the Illinois State Board of Education. (2 quarter hours)

MED 306 is a prerequisite for this class.
MED 204
FOUNDATIONS OF MUSIC TEACHING AND LEARNING II
Undergraduate
This course will introduce music education students to the use of data driven measures in the k-12 music classroom. Students will learn how to read research, apply research findings to instructional design, assess students, write rubrics, and revise curricula based on formative and summative assessments. This course is in response to the Illinois State Board of Education requirements for new teacher licensure. (2 quarter hours)

MED 300 is a prerequisite for this class.

MED 300
ELEMENTARY & MIDDLE SCHOOL INSTRUMENTAL METHODS & LAB
Undergraduate
This course will serve to introduce students to the practical and philosophical aspects of teaching instrumental music at the elementary and middle school levels. Topics included will be: philosophies of teaching; comprehensive musicianship through performance (CMP); organization and administration of the instrumental music program; planning and curriculum; assessment; evaluation and measurement of teaching and learning; instructional and source materials; methods and techniques of instruction; observation of teaching situations. Students will review method books and literature, develop lesson and rehearsal plans, create assessments, and conduct visiting ensembles. (2 quarter hours)

A petition to major is a prerequisite for this class.

MED 301
SECONDARY INSTRUMENTAL METHODS AND LAB
Undergraduate
The purpose of this course is to prepare students for secondary levels of instrumental music instruction. Primary goals include administrative responsibilities, teaching techniques, use of appropriate classroom materials (including repertoire selection), and appropriate means of student evaluation. (2 quarter hours)

MED 300 is a prerequisite for this class.

MED 303
ELEMENTARY VOCAL-GENERAL METHODS & LAB
Undergraduate
This course is designed to introduce music education students to the world of the elementary general music classroom. Students will develop the skills and fundamental knowledge to function effectively in this environment. Course content includes readings, practical experiences in the field, peer teaching, self-evaluation, and work using a digital portfolio platform. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 304
MIDDLE SCHOOL VOCAL METHODS AND LAB
Undergraduate
The course is designed to prepare music education majors to teach music in a middle school/junior high school setting. Students will learn how to design a vocal music program, including both general music and chorus. More specifically, the course will address 1) the adolescent personality, middle school philosophy, and emerging musical knowledge and skills, 2) choral music repertoire, the changing voice, and rehearsal techniques, and 3) general music curriculum and assessment, classroom management, and the use of technology for middle schools. As part of the course, students will be required to observe and interact with middle school general music classrooms and choruses. This course is required for all vocal music education majors. (2 quarter hours)

A petition to major is a prerequisite for this class.

MED 305
SECONDARY VOCAL METHODS AND LAB
Undergraduate
This course is designed to introduce music students to music education in k-12 settings. Students will learn about the different contexts where music is taught, learning modalities and applications in music classrooms, classroom management, and state and national standards for the arts. Course content will include readings, observations, and peer teaching. (2 quarter hours)

MED 304 is a prerequisite for this class.
MED 306
INTRODUCTION TO MUSIC EDUCATION
Undergraduate
This course is designed to introduce music students to music education in k-12 settings. Students will learn about the different contexts where music is taught, learning modalities and applications in music classrooms, classroom management, and state and national standards for the arts. Course content will include readings, observations, and peer teaching. (2 quarter hours)

Status as a Music student is a prerequisite for this class.

MED 307
ORCHESTRAL LITERATURE
Undergraduate
This course will provide students with a practical introduction to the various types of string and full orchestra literature available at the elementary, middle, and high school levels. Topics will include music source information, comprehensive musicianship in practice, score listening, score study and evaluation, source materials, grading of educational literature and copyright law. (2 quarter hours)

A petition to major is a prerequisite for this class.

MED 308
ACCOMPANYING FOR THE MUSIC EDUCATOR
Undergraduate
The objectives of this course are to help students further develop practical keyboard facility and keyboard musicianship skills, reinforce musical and theoretical concepts presented in Musicianship classes, improve facility of reading piano music, establish keys of pieces by preparing scales, arpeggios, and chord progressions, and combine all of the above in teaching more effectively and confidently with good piano accompaniment for classroom/choral teaching. (2 quarter hours)

A petition to major is a prerequisite for this class.

MED 309
AFRICAN DRUMMING FOR THE MUSIC EDUCATOR
Undergraduate
This course is designed to introduce music education students to the basics of African Drumming and how to incorporate this genre into the k-12 music classroom. Students will learn to drum, sing, and dance within this genre. They will also write lesson/unit plans that demonstrate their understanding of how to incorporate African Drumming in the music classroom. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 310
MUSIC EDUCATION FOR THE EXCEPTIONAL CHILD
Undergraduate
A survey course highlighting special education mandates that affect music educators, including profiles of giftedness and various areas of disability. Alternative teaching strategies and classroom management techniques are also addressed. Teaching observations are a required component of this course.

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 311
MARCHING BAND TECHNIQUES
Undergraduate
Basic marching techniques and movements, selection and use of music, design and charting of shows using digital medium. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.
MED 313
CHORAL LITERATURE
Undergraduate
This course will provide students with a practical introduction to the various types of choral literature available for elementary, middle school and high school vocal ensembles. Topics will include music source information, listening, octavo study and evaluation, and the development of the students' personal musicianship through ear training. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 316
LITERATURE FOR WIND ORGANIZATIONS
Undergraduate
A general survey of literature will be undertaken as well as specific projects related to school groups, wind chamber and ensemble organizations, and concert bands. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 325
TECHNOLOGY FOR MUSIC EDUCATORS
Undergraduate
This course will acquaint the music education major with a variety of music technology hardware and software applications, which may be used effectively for instruction in the music classroom and studio. Developing lesson plans and projects are required components of this course. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 340
CONDUCTING FOR THE MUSIC EDUCATOR
Undergraduate
This course will equip the music educator with the preliminary abilities to teach from the podium (i.e. in a performance ensemble setting). It will provide a sequential and methodical approach to the knowledge, skills, and attitudes that are necessary for effective and efficient teaching in the performing ensemble classroom. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 360
TOPICS IN MUSIC EDUCATION
Undergraduate
Concentrated study of a selected area of music education. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 365
INTRODUCTION TO KODALY
Undergraduate
This course will cover the philosophy and basic teaching tools promoted by Zoltan Kodaly. Participants will finish with an abundance of new songs, games, activities and techniques that will energize, organize, and perhaps transform their teaching. Daily schedule will include pedagogy, musicianship, folk music materials, and special topics such as instruments in the classroom and classical music connections for elementary students. (2 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.
Using high quality traditional folk music as the initial core musical material, Kodaly-inspired musician educators engage their students in joyful, sequential, developmentally-appropriate, child-centered, interactive, sound-based instruction. During an intensive two-week summer workshop, the Level I Kodaly Certification program introduces the Kodaly approach in a three-part program: musicianship, Kodaly pedagogy, and folk music and materials. (3 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

Continued intensive study of materials, techniques, and pedagogy for sequential skill and curriculum development in beginning level concepts and elements for developing dictation and sight-reading skills; repertoire for singing, moving, and listening. Folk music materials and analysis; continuation of personal retrieval system. Modes, diatony, simple functional harmony; Conducting. Chorus. (3 quarter hours)

Status as a Music Education student and MED 380 or completion of Kodaly Level I at another accredited program is a prerequisite for this class.

Continued intensive study of materials, techniques, and pedagogy for sequential skill and curriculum development in intermediate level concepts and elements for developing dictation and sight-reading skills; repertoire for singing, moving, and listening. Folk music materials and analysis; continuation of personal retrieval system. Modes, diatony, simple functional harmony; Musicianship, Kodaly Pedagogy, Folk Music and materials, and Chorus. (3 quarter hours)

Status as a Music Education student and MED 381 or Kodaly Level II at another accredited institution is a prerequisite for this class.

Introduction to Orff-Schulwerk through the process of integrating rhythm and movement, speech and song, rhythm instruments, Orff instruments, and soprano recorder for creative music-making with children in pre-school, elementary grades, and those with special needs; emphasis on materials in major and minor pentatonic scales. (3 quarter hours)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

Continuation of all aspects of the Schulwerk process; emphasis on a variety of materials, vocal, instrumental, and improvisational techniques for children in the middle and upper elementary grades; introduction of alto recorder; experience with dorian, aeolian, phrygian modes, major and minor tonalities. (3 quarter hours)

Status as a Music Education student and MED 386 or completion of Orff Level I at another accredited institution is a prerequisite for this class.

Advanced course leading to certificate in Orff-Schulwerk; additional exploration of Schulwerk materials found in volumes 35 and techniques of contemporary music; further development of skills in arranging rhythmic, speech, movement, and melodic materials for a variety of educational settings; recorder ensemble, lesson planning, and teaching opportunities. (3 quarter hours)

Status as a Music Education student and MED 390 or completion of Orff Level II at another accredited institution is a prerequisite for this class.
MED 392
STUDENT TEACHING
Undergraduate
A variety of supervised and directed experiences in the teaching of music in elementary and secondary schools. The teaching in schools is supplemented with conferences, evaluations, and seminars. COREQUISITE(S): MED 393. (6 quarter hours)

MED 390, MED 303, MED 306, MED 310, MED 095 and status as a Music Education major is a prerequisite for this class.

MED 393
STUDENT TEACHING SEMINAR
Undergraduate
A seminar meeting will be held every week for the purpose of sharing experiences and discussing challenges. In addition, important certification and graduation requirements will be covered. School of Music faculty will host these meetings. COREQUISITE(S): MED 392. (0 quarter hours)

MED 390, MED 303, MED 306, MED 310, MED 095 and status as a Music Education major is a prerequisite for this class.

MED 398
INDEPENDENT STUDY
Undergraduate
An in-depth study of a music education topic under the supervision of a faculty member. (Departmental permission required). (1 quarter hour)

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 400
CULTURALLY RESPONSIVE MUSIC EDUCATION: EXPLORING CONCEPTS, THEORIES, AND PRACTICE IN K-12 CLASSROOMS
Graduate
The American classroom has been changing radically over the past two decades. Currently, one in nine children is the child of an immigrant, with most immigrants coming from Latin America and Asian countries. The changing demographic of American schools is in stark contrast to the face of the teaching profession, which is predominantly white and female. The purpose of this course is to introduce music educators to the concepts and theories that ground culturally responsive pedagogy, and to provide a framework for adaptation of this pedagogy into the music classroom.

Status as a Graduate Music Education student is a prerequisite for this class.

MED 401
SEMINAR IN MUSIC EDUCATION I: PHILOSOPHY OF MUSIC EDUCATION
Graduate
The courses are designed 1) to develop a philosophical and historical perspective of music education; 2) to study the psychology of music; 3) to study topics in curriculum design; 4) to encourage study and research in areas of student interest and need; and 5) to study contemporary issues in music education that can have significant impact on classroom teaching.

Status as a Graduate Music Education student is a prerequisite for this class.

MED 402
SEMINAR IN MUSIC EDUCATION II: PSYCHOLOGY OF MUSIC TEACHING & LEARNING
Graduate
The courses are designed 1) to develop a philosophical and historical perspective of music education; 2) to study the psychology of music; 3) to study topics in curriculum design; 4) to encourage study and research in areas of student interest and need; and 5) to study contemporary issues in music education that can have significant impact on classroom teaching.

Status as a Graduate Music Education student is a prerequisite for this class.
MED 403
SEMINAR IN MUSIC EDUCATION III: CURRICULUM DEVELOPMENT IN MUSIC EDUCATION
Graduate
The courses are designed 1) to develop a philosophical and historical perspective of music education; 2) to study the psychology of music; 3) to study topics in curriculum design; 4) to encourage study and research in areas of student interest and need; and 5) to study contemporary issues in music education that can have significant impact on classroom teaching.

MED 402 is a prerequisite for this class.

MED 404
HISTORY OF MUSIC EDUCATION IN THE UNITED STATES
Graduate
This class will provide graduate music education majors with the opportunity to develop historical frameworks for their understanding of the teaching profession. Students will gain a perspective of music education history, in order to better understand the present and future. Students will be expected to question the nature and value of music, in order to gain a sense of purpose in your teaching. Throughout the quarter, historical issues will be addressed in relation to the practice of teaching. (2 quarter hours)

Status as a Graduate Music Education student is a prerequisite for this class.

MED 405
ACCOMPANYING FOR THE MUSIC EDUCATOR
Graduate
The objectives of this course are to help students further develop practical keyboard facility and keyboard musicianship skills, reinforce musical and theoretical concepts presented in Musicianship classes, improve facility of reading piano music, establish keys of pieces by preparing scales, arpeggios, and chord progressions, and combine all of the above in teaching more effectively and confidently with good piano accompaniment for classroom/choral teaching. (2 quarter hours)

Status as a Graduate Music Education student is a prerequisite for this class.

MED 406
ORCHESTRAL LITERATURE
Graduate
This course will provide students with a practical introduction to the various types of string and full orchestra literature available at the elementary, middle, and high school levels. Topics will include music source information, comprehensive musicianship in practice, score listening, score study and evaluation, source materials, grading of educational literature and copyright law. (2 quarter hours)

Status as a Graduate Music Education student is a prerequisite for this class.

MED 409
AFRICAN DRUMMING FOR THE MUSIC EDUCATOR
Graduate
This course is designed to introduce music education students to the basics of African Drumming and how to incorporate this genre into the k-12 music classroom. Students will learn to drum, sing, and dance within this genre. They will also write lesson/unit plans that demonstrate their understanding of how to incorporate African Drumming in the music classroom. (2 quarter hours)

Status as a Graduate Music Education student is a prerequisite for this class.

MED 410
MUSIC EDUCATION FOR THE EXCEPTIONAL CHILD
Graduate
A survey course highlighting special education mandates that affect music educators, including profiles of giftedness and various areas of disability. Alternative teaching strategies and classroom management techniques are also addressed.

Status as a Graduate Music Education student is a prerequisite for this class.
MED 411  
**MARCHING BAND TECHNIQUES**  
Graduate  
Basic marching techniques and movements, selection and use of music, design and charting of shows using digital medium. (2 quarter hours)  
Status as a Graduate Music Education student is a prerequisite for this class.

MED 413  
**CHORAL LITERATURE**  
Graduate  
This course will provide students with a practical introduction to the various types of choral literature available for elementary, middle school and high school vocal ensembles. Topics will include music source information, listening, octavo study and evaluation, and the development of the students' personal musicianship through ear training. (2 quarter hours)  
Status as a Graduate Music Education student is a prerequisite for this class.

MED 425  
**TECHNOLOGY FOR MUSIC EDUCATORS**  
Graduate  
This course will acquaint the music education major with a variety of music technology hardware and software applications, which may be used effectively for instruction in the music classroom and studio. Developing lesson plans and projects are required components of this course. (2 quarter hours)  
Status as a Graduate Music Education student is a prerequisite for this class.

MED 480  
**KODALY: LEVEL I**  
Graduate  
Using high quality traditional folk music as the initial core musical material, Kodaly-inspired musician educators engage their students in joyful, sequential, developmentally-appropriate, child-centered, interactive, sound-based instruction. During an intensive two-week summer workshop, the Level I Kodaly Certification program introduces the Kodaly approach in a three-part program: musicianship, Kodaly pedagogy, and folk music and materials. (3 quarter hours)  
Status as a graduate Music Education student or non-degree graduate music student is a prerequisite for this class.

MED 481  
**KODALY: LEVEL II**  
Graduate  
Continued intensive study of materials, techniques, and pedagogy for sequential skill and curriculum development in beginning level concepts and elements for developing dictation and sight-reading skills; repertoire for singing, moving, and listening. Folk music materials and analysis; continuation of personal retrieval system. Modes, diatony, simple functional harmony; Conducting. Chorus. (3 quarter hours)  
Status as a graduate Music Education student or non-degree graduate music student is a prerequisite for this class.

MED 483  
**KODALY: LEVEL III**  
Graduate  
Continued intensive study of materials, techniques, and pedagogy for sequential skill and curriculum development in intermediate level concepts and elements for developing dictation and sight-reading skills; repertoire for singing, moving, and listening. Folk music materials and analysis; continuation of personal retrieval system. Modes, diatony, simple functional harmony; Musicianship, Kodaly Pedagogy, Folk Music and materials, and Chorus. (3 quarter hours)  
Status as a graduate Music Education student or non-degree graduate music student is a prerequisite for this class.
MED 486
ORFF: LEVEL I
Graduate
Introduction to Orff-Schulwerk through the process of integrating rhythm and movement, speech and song, rhythm instruments, Orff instruments, and soprano recorder for creative music-making with children in pre-school, elementary grades, and those with special needs; emphasis on materials in major and minor pentatonic scales. (3 quarter hours)

Status as a graduate Music Education student or non-degree graduate music student is a prerequisite for this class.

MED 490
ORFF: LEVEL II
Graduate
Continuation of all aspects of the Schulwerk process; emphasis on a variety of materials, vocal, instrumental, and improvisational techniques for children in the middle and upper elementary grades; introduction of alto recorder; experience with dorian, aeolian, phrygian modes, major and minor tonalities. (3 quarter hours)

Status as a graduate Music Education student or non-degree graduate music student is a prerequisite for this class.

MED 491
ORFF: LEVEL III
Graduate
Advanced course leading to certificate in Orff-Schulwerk; additional exploration of Schulwerk materials found in volumes 35 and techniques of contemporary music; further development of skills in arranging rhythmic, speech, movement, and melodic materials for a variety of educational settings; recorder ensemble, lesson planning, and teaching opportunities. (3 quarter hours)

Status as a graduate Music Education student or non-degree graduate music student is a prerequisite for this class.

MED 492
TECHNIQUES OF RESEARCH IN MUSIC EDUCATION
Graduate
This course will examine the basic questions, issues and theoretical frameworks central to the purpose, conceptualization, conduct, writing, reading, and the use of educational research as a means for informing educational theory, practice and policy.

Status as a Graduate Music Education student is a prerequisite for this class.

MED 498
MASTERS CANDIDATE RESEARCH
Graduate
(2 quarter hours)

Status as a Graduate Music Education student is a prerequisite for this class.

MED 499
INDEPENDENT STUDY
Graduate
An in-depth study of a music education topic under the supervision of a faculty member. (Departmental permission required). (2 quarter hours)

Status as a Graduate Music Education student is a prerequisite for this class.

MEN 1
WIND SYMPHONY
Undergraduate
The Wind Symphony is an ensemble designed to prepare wind and percussion students for careers as performers, teachers, and other careers in music. The goal is to achieve a high level of musicianship through repertoire selected by the instructor and rehearsal/performance preparation demonstrated by the individual members of the ensemble. While setting a high performance expectation, a productive and meaningful music-making environment will also be fostered. All MEN courses are repeatable courses. Placement audition required. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.
MEN 2  
ENSEMBLE 20+  
Undergraduate  
Study, interpretation, rehearsal and performance of living composers’ music and 20th century masterpieces, with focus on music for mixed ensembles of 8-25 players; acquisition of interpretive skills and instrumental techniques necessary for playing contemporary music. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 23  
CONCERT CHOIR  
Undergraduate  
Rehearsal and performance of choral works from a variety of styles and historical periods. An audition is required before the first rehearsal of the quarter. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 30  
CONCERT ORCHESTRA  
Undergraduate  
Study, rehearsal, and performance of masterpieces of the smaller orchestra repertoire, both traditional and contemporary; acquisition of a high level of musicianship as well as professional skills needed for orchestra playing, with emphasis on interpretative, listening, and blending abilities. Placement audition required. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 31  
SYMPHONY ORCHESTRA  
Undergraduate  
Study, rehearsal, and performance of masterpieces of the orchestral repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra. Placement Audition Required. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 37  
WIND ENSEMBLE  
Undergraduate  
Study, rehearsal, and performance of masterpieces of wind literature, both traditional and contemporary, with focus on music for ensembles of 8-30 players; acquisition of necessary musical and professional skills for playing in such an ensemble. All MEN courses are repeatable courses. Placement audition required. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 41  
CHAMBER MUSIC  
Undergraduate  
A practical application of chamber music performance techniques for advanced instrumentalists and vocalists. Activities include coaching sessions, class participation, and public performances. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 47  
CHAMBER CHOIR  
Undergraduate  
An advanced choral ensemble of selected voices. Audition required. All MEN courses are repeatable courses. (0 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.
MEN 101
WIND SYMPHONY
Undergraduate
The Wind Symphony is an ensemble designed to prepare wind and percussion students for careers as performers, teachers, and other careers in music. The goal is to achieve a high level of musicianship through repertoire selected by the instructor and rehearsal/performance preparation demonstrated by the individual members of the ensemble. While setting a high performance expectation, a productive and meaningful music-making environment will also be fostered. All of the MEN courses are repeatable courses. Placement audition required. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 123
CONCERT CHOIR
Undergraduate
Rehearsal and performance of choral works from a variety of styles and historical periods. Open to all DePaul undergraduates by audition. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 130
CONCERT ORCHESTRA
Undergraduate
Study, rehearsal, and performance of masterpieces of the smaller orchestra repertoire, both traditional and contemporary; acquisition of a high level of musicianship as well as professional skills needed for orchestra playing, with emphasis on interpretative, listening, and blending abilities. Placement audition required. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 131
SYMPHONY ORCHESTRA
Undergraduate
Study, rehearsal, and performance of masterpieces of the orchestral repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra. All of the MEN courses are repeatable courses. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 221
WIND ENSEMBLE
Undergraduate
Study, rehearsal, and performance of masterpieces of wind literature, both traditional and contemporary, with focus on music for ensembles of 8-30 players; acquisition of necessary musical and professional skills for playing in such an ensemble. All of the MEN courses are repeatable courses. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 231
CHAMBER CHOIR
Undergraduate
An advanced choral ensemble of selected voices. All of the MEN courses are repeatable courses. Open to all DePaul undergraduates by audition. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 241
CHAMBER MUSIC
Undergraduate
A practical application of chamber music performance techniques for advanced instrumentalists and vocalists. Activities include coaching sessions, class participation, and public performances. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.
MEN 300
AFRICAN MUSIC ENSEMBLE
Undergraduate
Students will learn musical techniques and repertory from cultures of Africa and the African diaspora. Course activities may include instrumental techniques, singing, and dancing. No prior experience with African music necessary. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

MEN 301
ENSEMBLE 20+
Undergraduate
Study, interpretation, rehearsal and performance of living composers' music and 20th century masterpieces, with focus on music for mixed ensembles of 8-25 players; acquisition of interpretive skills and instrumental techniques necessary for playing contemporary music. (1 quarter hour)
Status as an Undergraduate Music student is a prerequisite for this class.

MEN 400
ENSEMBLE 20+
Graduate
Study, interpretation, rehearsal and performance of living composers' music and 20th century masterpieces, with focus on music for mixed ensembles of 8-25 players; acquisition of interpretive skills and instrumental techniques necessary for playing contemporary music. (0 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

MEN 401
WIND SYMPHONY
Graduate
The Wind Symphony is an ensemble designed to prepare wind and percussion students for careers as performers, teachers, and other careers in music. The goal is to achieve a high level of musicianship through repertoire selected by the instructor and rehearsal/performance preparation demonstrated by the individual members of the ensemble. While setting a high performance expectation, a productive and meaningful music-making environment will also be fostered. All MEN courses are repeatable courses. Placement audition required. (1 quarter hour)
Status as a Graduate Music student is a prerequisite for this class.

MEN 402
WIND SYMPHONY
Graduate
The Wind Symphony is an ensemble designed to prepare wind and percussion students for careers as performers, teachers, and other careers in music. The goal is to achieve a high level of musicianship through repertoire selected by the instructor and rehearsal/performance preparation demonstrated by the individual members of the ensemble. While setting a high performance expectation, a productive and meaningful music-making environment will also be fostered. All MEN courses are repeatable courses. Placement audition required. (0 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

MEN 406
CONCERT CHOIR
Graduate
Rehearsal and performance of choral works from a variety of styles and historical periods. All MEN courses are repeatable courses. Open to graduate students only. Audition required. (0 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.
MEN 407
SYMPHONY ORCHESTRA
Graduate
Study, rehearsal, and performance of masterpieces of the orchestral repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra. Placement Audition Required. (0 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

MEN 408
WIND ENSEMBLE
Graduate
Study, rehearsal, and performance of masterpieces of wind literature, both traditional and contemporary, with focus on music for ensembles of 8-30 players; acquisition of necessary musical and professional skills for playing in such an ensemble. All MEN courses are repeatable courses. (0 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

MEN 409
CHAMBER CHOIR
Graduate
An advanced choral ensemble of selected voices. Placement audition required. All MEN courses are repeatable courses. Open to graduate students only. Audition required. (0 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

MEN 410
CHAMBER MUSIC
Graduate
A practical application of chamber music performance techniques for advanced instrumentalists and vocalists. Activities include coaching sessions, class participation, and public performances. (0 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

MEN 411
ENSEMBLE 20+
Graduate
Study, interpretation, rehearsal and performance of living composers' music and 20th century masterpieces, with focus on music for mixed ensembles of 8-25 players; acquisition of interpretive skills and instrumental techniques necessary for playing contemporary music. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

MEN 412
CONCERT ORCHESTRA
Graduate
Study, rehearsal, and performance of masterpieces of the smaller orchestra repertoire, both traditional and contemporary; acquisition of a high level of musicianship as well as professional skills needed for orchestra playing, with emphasis on interpretative, listening, and blending abilities. Placement audition required. (0 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

MEN 414
AFRICAN MUSIC ENSEMBLE
Graduate
Students will learn musical techniques and repertory from cultures of Africa and the African diaspora. Course activities may include instrumental techniques, singing, and dancing. No prior experience with African music necessary. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.
MEN 423
CONCERT CHOIR
Graduate
Rehearsal and performance of choral works from a variety of styles and historical periods. An audition is required before the first rehearsal of the quarter. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

MEN 430
CONCERT ORCHESTRA
Graduate
Study, rehearsal, and performance of masterpieces of the smaller orchestra repertoire, both traditional and contemporary; acquisition of a high level of musicianship as well as professional skills needed for orchestra playing, with emphasis on interpretative, listening, and blending abilities. Placement audition required. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

MEN 431
SYMPHONY ORCHESTRA
Graduate
Study, rehearsal, and performance of masterpieces of the orchestral repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra. All MEN courses are repeatable courses. Placement audition required. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

MEN 437
WIND ENSEMBLE
Graduate
Study, rehearsal, and performance of masterpieces of wind literature, both traditional and contemporary, with focus on music for ensembles of 8-30 players; acquisition of necessary musical and professional skills for playing in such an ensemble. All MEN courses are repeatable courses. Placement audition required. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

MEN 441
CHAMBER MUSIC
Graduate
A practical application of chamber music performance techniques for advanced instrumentalists and vocalists. Activities include coaching sessions, class participation, and public performances. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

MEN 447
CHAMBER CHOIR
Graduate
An advanced choral ensemble of selected voices. All MEN courses are repeatable courses. Placement audition required. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

MEN 498
INDEPENDENT STUDY
Graduate
An in-depth study of a music ensemble topic under the supervision of a faculty member. (Departmental permission required). (variable credit)

Status as a Graduate Music student is a prerequisite for this class.
MGE 300
INTRODUCTION TO MIDDLE GRADES EDUCATION
Undergraduate
This course is an introduction to critical, creative, and reflective middle grades teaching practice. Students in this course examine goals and theories of middle grades education and inquire into the meaning and practice of fostering equitable, intellectually rich, socially just, and compassionate learning environments for diverse middle grades youth. Students are introduced to learning about young adolescents in the context of instruction in the four main subject areas. ***The course meets in the afternoon and integrates community and/or after school field experience with young adolescents into coursework. Co-requisite for this course is SCU 335. In this course, students will:1. Examine and critique goals and theories of middle grades education.2. Examine the meaning and practice of fostering equitable, intellectually rich, socially just, compassionate learning environments for middle grades youth.3. Explore and articulate practices that support young adolescents' learning in middle grades classrooms.4. Recognize the importance of, articulate the meaning of, and begin to practice critical, creative, reflective teaching practice.5. Create instructional plans that reflect clearly articulated purposes and understanding of young adolescents. Jnior standing is a prerequisite for this class.

MGE 301
LITERACY IN THE MIDDLE GRADES CONTENT AREAS I
Undergraduate
This course introduces students to theories of literacy and multiple literacies in the context of teaching language arts, mathematics, science, and social studies. Students will be introduced to content area literacy practices for middle grades learners, including writing instruction strategies and processes, reading comprehension strategy instruction, including vocabulary and textbook comprehension strategies, role of talk in instruction, integration of group and whole class discussion of text, issues of motivation and engagement in literacy learning, and differentiated instruction for English Language learners, students experiencing difficulty or those in need of additional challenge. ***This course counts toward Reading Teacher endorsement. Co-requisites for this course are BBE 350 and MGE 311. In this course students will:1. Examine theoretical and philosophical bases for content area literacy instruction2. Experience, study, and evaluate instructional strategies, materials, and assessment tools designed to improve students' reading and writing in the content areas;3. Identify how to integrate speaking, reading, writing and listening for increased learning of content and for fostering critical thinking);4. Develop strategies for instructing students whose first language is not English, those experiencing difficulties, and those in need of additional challenge.

MGE 311
SUPERVISED FIELD EXPERIENCE
Undergraduate
This course is a supervised, 25 hour, Level 1 field experience that provides students opportunities to apply the course content of MGE 301 and BBE 350. Co-requisites for this course are MGE 301 and BBE 350. (1 credit hour) In this course, students will:1. Implement and reflect on lesson plans relevant to middle grades learners from diverse backgrounds.2. Observe, analyze, and discuss expert middle grades teachers' instructional practices.

MGE 321
THE WHOLE CHILD: CONCEPTIONS OF HEALTHY YOUNG ADOLESCENCE
Undergraduate
This course introduces varying conceptions of healthy young adolescence, taking into account physical health and development, social and emotional health, mental health, and the contextual factors that shape healthy adolescence. Co-requisites for this course are LSI 387 and MGE 331. In this course, students will:1. Articulate diverse theories of what it means to be "healthy" throughout young adolescence2. Develop instructional plans that consider the diverse interpretations of a healthy young adolescence3. Create classroom environments that are sensitive to the health of young adolescents4. Communicate, model, and engage young adolescents in the habits of mind necessary for healthy young adolescence.

MGE 331
SUPERVISED FIELD EXPERIENCE
Undergraduate
This course is a supervised, 25 hour, Level 1 field experience that provides students opportunities to apply the course content of MGE 321 and LSI 387. Co-requisites for this course are MGE 321 and LSI 387. (1 credit hour) In this course, students will:1. Implement and reflect on lesson plans relevant to middle grades learners from diverse backgrounds.2. Observe, analyze, and discuss expert middle grades teachers' instructional practices.

MGE 300 and Junior standing are prerequisites for this class.
MGE 341  
CURRICULAR LITERACY IN THE MIDDLE GRADES CONTENT AREAS II  
Undergraduate  
This course provides teacher candidates with theories and practical strategies for becoming critical consumers and evaluators of middle grades curriculum in the context of each of the four main content areas (mathematics, language arts, science, and social studies) as well as helping their students become critical consumers of the texts in their lives. The course includes discussion of technological literacy and critical media literacy for both teachers and their students. ***This course counts toward Reading Teacher endorsement. Co-requisites for this course are CSL 377, MGE 351 and MGE 361.In this course, students will:1. Examine and identify the range of curricular resources available for middle grades teaching in the content areas.2. Critically evaluate curricular resources for middle grades teaching.3. Apply critical literacy strategies to middle grades lesson planning in their content areas. 

Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 351  
ASSESSMENT PRACTICES IN THE MIDDLE GRADES  
Undergraduate  
In keeping with middle grades philosophy, this course emphasizes authentic assessment of learning, which involves learner reflection guided by teachers to promote self-empowered learning. Also featured in this course are the principles for using standardized test data and data based teaching, best grading protocols, formal and informal assessment, portfolio development, and principles for reporting to all stakeholders’ students, families, school administrators and the community. This course will also emphasize ways of involving students and parents in assessment processes, how to observe and assess students individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system. Co-requisites for this course are MGE 341, CSL 377 and MGE 361.In this course, students will:1. Identify how formal and informal assessment practices are used to plan, evaluate, and strengthen instruction and support continuous intellectual, social, emotional, and physical development of each middle grade student.2. Describe and evaluate the utility and application of different assessment tools and practices.3. Identify how assessment data can be gathered, interpreted, understood, and communicated to all stakeholders.4. Identify how assessment becomes an essential and integral part of teaching and learning. 

Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 361  
SUPERVISED FIELD EXPERIENCE  
Undergraduate  
This course is a supervised, 25 hour, Level 2 field experience that provides students opportunities to apply the course content of MGE 341 and CSL 387. ***Ideally, this field experience will take place in the same classroom and/or school as the student teaching placement, to facilitate continuity for students and schools. Co-requisites for this course are MGE 341, CSL 377 and MGE 351.In this course, students will:1. Implement and reflect on lesson plans relevant to middle grades learners from diverse backgrounds.2. Observe, analyze, and discuss expert middle grades teachers' instructional practices. 

Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 371  
THE TEACHING OF MATHEMATICS IN THE MIDDLE GRADES  
Undergraduate  
Addresses theoretical principles and practices for teaching mathematics at the middle grades. The course focuses on inquiry oriented, innovative mathematics teaching with young adolescents and includes application of the Common Core standards in Mathematics. Co-requisite for this course is MGE 381.In this course students will:1. Analyze best practices for teaching mathematics in the middle grades.2. Assess mathematics teaching practices for their use in meeting the diverse needs of middle grad students.3. Appraise curricular materials, including instructional strategies, materials, and assessments, which are designed to foster students' engagement in mathematical practice and discourse.4. Use the mathematics teaching practices that promote middle grade students' engagement in and understanding of mathematical concepts, processes, and habits of mind. 

MGE 341, MGE 351 and Advanced Teacher Candidate Standing are prerequisites for this class.
MGE 372
THE TEACHING OF LANGUAGE ARTS IN THE MIDDLE GRADES
Undergraduate
This course is designed to prepare candidates to teach in middle grades reading, language arts, and English classrooms. This course addresses theoretical principles and practices for teaching language arts/literacy at the middle level, including the teaching of reading, writing, speaking, and listening. The course focuses on inquiry oriented, innovative language arts/literacy teaching and includes application of the Common Core standards in Language Arts. Students will have opportunities to develop, implement, and reflect on activities and lessons that demonstrate an understanding of differentiated instructional practices in the language arts and an awareness of sociocultural theories of learning and content pedagogical knowledge. Emphasis is placed on the complex nature of literacy addressing issues such as learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Co-requisite for this course is MGE 381. In this course the students will: 1. Examine and articulate defensible purposes for teaching reading and writing to students in the middle grades. 2. Explore how to meet the needs of diverse populations of students, including English language learners, those with special needs, and those in need of additional challenge. 3. Integrate theory, research, and practice toward the goals of developing students' abilities to read and write fluently and fostering students' enjoyment of reading and writing. 4. Experience, study, and evaluate instructional strategies, materials, and assessment tools designed to improve students' reading and writing in language arts.

MGE 373, MGE 351 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 373
THE TEACHING OF SOCIAL STUDIES IN THE MIDDLE GRADES
Undergraduate
In this course, candidates examine the nature and purpose of social studies curriculum and teaching practices in the middle grades. The course focuses on developing thoughtful, informed responses to central questions about the purposes of social studies teaching, the social studies content that is meaningful for young adolescents, and instructional strategies that both align with the core purposes and support and engage all students in learning social studies. All of these central questions are considered in relation to content and practices that are relevant and engaging to diverse middle grades learners and that focus on a vision of equitable, intellectually challenging social studies teaching - a conception of teaching that promotes all students' engagement and intellectual development. Co-requisite for this course is MGE 381. In this course the students will: 1. Examine and articulate defensible purposes for teaching social studies in a diverse, democratic society. 2. Examine and analyze effective methods for teaching social studies to students in the middle grades. 3. Experience, study, and evaluate instructional strategies, materials, and assessment tools designed to facilitate students' learning in social studies. 4. Practice developing curricular materials and instruction that promotes all students' engagement and intellectual development through social studies learning.

MGE 341, MGE 351 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 374
THE TEACHING OF SCIENCE IN THE MIDDLE GRADES
Undergraduate
This course offers a comprehensive view of the theoretical principles and practices used in the teaching and learning of science at the middle level. Integrating coursework and fieldwork is designed to offer pre-service teachers experience in the implementation of meaningful science-learning experiences through the use of inquiry processes applicable to diverse populations of students and classroom environments. The course focuses on the development of meaningful habits of inquiry and encourages collaborative effort and reflective praxis in teaching to the unique developmental stage of middle school students. Co-requisite for this course is MGE 381. In this course the students will: 1. Analyze best practices for teaching science to students in the middle grades. 2. Assess science teaching practices for their use in meeting the diverse needs of middle grade students. 3. Appraise curricular materials, including their instructional strategies, materials, and assessments, which are designed to foster students' engagement in the practices of science. 4. Use the science teaching practices that promote middle grade students engagement in and understanding of science concepts, processes, and habits of mind.

MGE 341, MGE 351 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 372
SUPERVISED FIELD EXPERIENCE
Undergraduate
This course is a supervised, 25 hour, Level 2 field experience that provides students opportunities to apply the course content of MGE 371-4. Ideally, this field experience will take place in the same classroom and/or school as the student teaching placement, to facilitate continuity for students and schools. Co-requisite for this course is MGE 371, or MGE 372, or MGE 373, or MGE 374. (1 credit hour) In this course, students will: 1. Implement and reflect on lesson plans relevant to middle grades learners from diverse backgrounds. 2. Observe, analyze, and discuss expert middle grades teachers' instructional practices.

MGE 341, MGE 351 and Advanced Teacher Candidate Standing are prerequisites for this class.
MGE 390
STUDENT TEACHING
Undergraduate
A ten-week Level 3 field experience in a middle grades classroom in one or both of the teacher candidate's content areas. Teacher-candidates are responsible for developing, implementing, and evaluating a program of study, as well as all for other aspects of teaching, for at least three distinct classrooms (in one or both of their content areas). Co-requisite for this course is MGE 391. Student teaching application and approval required. (10 credit hours) In this course, students will: 1. Implement and reflect on lesson plans and curricular units relevant to middle grades learners from diverse backgrounds. 2. Observe, analyze, and discuss expert middle grades teachers' instructional practices. 3. Engage in professional activity relating to a career in teaching.

MGE 391
STUDENT TEACHING SEMINAR
Undergraduate
Provides teacher candidates a context for reflecting on their student-teaching experience in relation to their previous coursework. Co-requisite for this course is MGE 390. (2 credit hours) In this course, students will: 1. Critically reflect upon, discuss, and revise instructional practices to improve middle grades teaching.

MGE 400
INTRODUCTION TO MIDDLE GRADES EDUCATION
Graduate
This course is an introduction to critical, creative, and reflective middle grades teaching practice. Students in this course examine goals and theories of middle grades education and inquire into the meaning and practice of fostering equitable, intellectually rich, socially just, and compassionate learning environments for diverse middle grades youth. Students are introduced to learning about young adolescents in the context of instruction in the four main subject areas. ***The course meets in the afternoon and integrates community and/or after school field experience with young adolescents into coursework. Co-requisite for this course is SCG 435. In this course, students will: 1. Examine and critique goals and theories of middle grades education. 2. Examine the meaning and practice of fostering equitable, intellectually rich, socially just, compassionate learning environments for middle grades youth. 3. Explore and articulate practices that support young adolescents' learning in middle grades classrooms. 4. Recognize the importance of, articulate the meaning of, and begin to practice critical, creative, reflective teaching practice. 5. Create instructional plans that reflect clearly articulated purposes and understanding of young adolescents.

MGE 401
LITERACY IN THE MIDDLE GRADES CONTENT AREAS I
Graduate
This course introduces students to theories of literacy and multiple literacies in the context of teaching language arts, mathematics, science, and social studies. Students will be introduced to content area literacy practices for middle grades learners, including writing instruction strategies and processes, reading comprehension strategy instruction, including vocabulary and textbook comprehension strategies, role of talk in instruction, integration of group and whole class discussion of text, issues of motivation and engagement in literacy learning, and differentiated instruction for English Language learners, students experiencing difficulty or those in need of additional challenge. ***This course counts toward Reading Teacher endorsement. Co-requisites for this course are BBE 450 and MGE 411. In this course students will: 1. Examine theoretical and philosophical bases for content area literacy instruction. 2. Experience, study, and evaluate instructional strategies, materials, and assessment tools designed to improve students' reading and writing in the content areas; 3. Identify how to integrate speaking, reading, writing and listening for increased learning of content and for fostering critical thinking; 4. Develop strategies for instructing students whose first language is not English, those experiencing difficulties, and those in need of additional challenge.

MGE 400 is a prerequisite for this class.

MGE 411
SUPERVISED FIELD EXPERIENCE
Graduate
This course is a supervised, 25 hour, Level 1 field experience that provides students opportunities to apply the course content of MGE 401 and BBE 450. Co-requisites for this course are BBE 450 and MGE 401. (1 credit hour) In this course, students will: 1. Implement and reflect on lesson plans relevant to middle grades learners from diverse backgrounds. 2. Observe, analyze, and discuss expert middle grades teachers' instructional practices.

MGE 400 is a prerequisite for this class.
MGE 421
THE WHOLE CHILD: CONCEPTIONS OF HEALTHY YOUNG ADOLESCENCE
Graduate
This course introduces varying conceptions of healthy young adolescence, taking into account physical health and development, social and emotional health, mental health, and the contextual factors that shape healthy adolescence. Co-requisites for this course are LSI 487 and MGE 431. In this course, students will:
1. Articulate diverse theories of what it means to be "healthy" throughout young adolescence
2. Develop instructional plans that consider the diverse interpretations of a healthy young adolescence
3. Create classroom environments that are sensitive to the health of young adolescents
4. Communicate, model, and engage young adolescents in the habits of mind necessary for healthy young adolescence.

MGE 401 is a prerequisite for this class.

MGE 431
SUPERVISED FIELD EXPERIENCE
Graduate
This course is a supervised, 25 hour, Level 1 field experience that provides students opportunities to apply the course content of MGE 421 and LSI 487. Co-requisites for this course are MGE 421 and LSI 487. In this course, students will:
1. Implement and reflect on lesson plans relevant to middle grades learners from diverse backgrounds
2. Observe, analyze, and discuss expert middle grades teachers' instructional practices.

MGE 401 is a prerequisite for this class.

MGE 441
CURRICULAR LITERACY IN THE MIDDLE GRADES CONTENT AREAS II
Graduate
This course provides teacher candidates with theories and practical strategies for becoming critical consumers and evaluators of middle grades curriculum in the context of each of the four main content areas (mathematics, language arts, science, and social studies) as well as helping their students become critical consumers of the texts in their lives. The course includes discussion of technological literacy and critical media literacy for both teachers and their students. ***This course counts toward Reading Teacher endorsement. Co-requisites for this course are CSL 477, MGE 451 and MGE 461. In this course, students will:
1. Examine and identify the range of curricular resources available for middle grades teaching in the content areas
2. Critically evaluate curricular resources for middle grades teaching
3. Apply critical literacy strategies to middle grades lesson planning in their content areas.

MGE 421 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 451
ASSESSMENT PRACTICES IN THE MIDDLE GRADES
Graduate
In keeping with middle grades philosophy, this course emphasizes authentic assessment of learning, which involves learner reflection guided by teachers to promote self empowered learning. Also featured in this course are the principles for using standardized test data and data based teaching, best grading protocols, formal and informal assessment, portfolio development, and principles for reporting to all stakeholders' students, families, school administrators and the community. This course will also emphasize ways of involving students and parents in assessment processes, how to observe and assess students individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system. Co-requisites for this course are MGE 441, CSL 477 and MGE 461. In this course students will:
1. Identify how formal and informal assessment practices are used to plan, evaluate, and strengthen instruction and support continuous intellectual, social, emotional, and physical development of each middle grade student
2. Describe and evaluate the utility and application of different assessment tools and practices
3. Identify how assessment data can be gathered, interpreted, understood, and communicated to all stakeholders
4. Identify how assessment becomes an essential and integral part of teaching and learning.

MGE 421 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 461
SUPERVISED FIELD EXPERIENCE
Graduate
This course is a supervised, 25 hour, Level 2 field experience that provides students opportunities to apply the course content of MGE 441, MGE 451, and CSL 477. ***Ideally, this field experience will take place in the same classroom and/or school as the student teaching placement, to facilitate continuity for students and schools. Co-requisites for this course are MGE 441, CSL 477 and MGE 451. In this course, students will:
1. Implement and reflect on lesson plans relevant to middle grades learners from diverse backgrounds
2. Observe, analyze, and discuss expert middle grades teachers' instructional practices.

MGE 421 and Advanced Teacher Candidate Standing are prerequisites for this class.
MGE 471
THE TEACHING OF MATHEMATICS IN THE MIDDLE GRADES
Graduate
Addresses theoretical principles and practices for teaching mathematics at the middle level. The course focuses on inquiry oriented, innovative mathematics teaching with young adolescents and includes application of the Common Core standards in Mathematics. Co-requisite for this course is MGE 481. In this course students will: 1. Analyze best practices for teaching mathematics in the middle grades. 2. Assess mathematics teaching practices for their use in meeting the diverse needs of middle grade students. 3. Appraise curricular materials, including instructional strategies, materials, and assessments, which are designed to foster students' engagement in mathematical practice and discourse. 4. Use the mathematics teaching practices that promote middle grade students' engagement in and understanding of mathematical concepts, processes, and habits of mind.

MGE 441, MGE 451 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 472
THE TEACHING OF LANGUAGE ARTS IN THE MIDDLE GRADES
Graduate
This course is designed to prepare candidates to teach in middle grades reading, language arts, and English classrooms. This course addresses theoretical principles and practices for teaching language arts/literacy at the middle level, including the teaching of reading, writing, speaking, and listening. The course focuses on inquiry oriented, innovative language arts/literacy teaching and includes application of the Common Core standards in Language Arts. Students will have opportunities to develop, implement, and reflect on activities and lessons that demonstrate an understanding of differentiated instructional practices in the language arts and an awareness of sociocultural theories of learning and content pedagogical knowledge. Emphasis is placed on the complex nature of literacy addressing issues such as learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Co-requisite for this course is MGE 481. In this course the students will: 1. Examine and analyze effective methods for teaching reading and writing to students in the middle grades. 2. Explore how to meet the needs of diverse populations of students, including English language learners, those with special needs, and those in need of additional challenge. 3. Integrate theory, research, and practice toward the goals of developing students' abilities to read and write fluently and fostering students' enjoyment of reading and writing. 4. Experience, study, and evaluate instructional strategies, materials, and assessment tools designed to improve students' reading and writing in language arts.

MGE 441, MGE 451 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 473
THE TEACHING OF SOCIAL STUDIES IN THE MIDDLE GRADES
Graduate
In this course, candidates examine the nature and purpose of social studies curriculum and teaching practices in the middle grades. The course focuses on developing thoughtful, informed responses to central questions about the purposes of social studies teaching, the social studies content that is meaningful for young adolescents, and instructional strategies that both align with the core purposes and support and engage all students in learning social studies. All of these central questions are considered in relation to content and practices that are relevant and engaging to diverse middle grades learners and that focus on a vision of equitable, intellectually challenging social studies teaching - a conception of teaching that promotes all students' engagement and intellectual development. Co-requisite for this course is MGE 481. In this course the students will: 1. Examine and articulate defensible purposes for teaching social studies in a diverse, democratic society. 2. Examine and analyze effective methods for teaching social studies to students in the middle grades. 3. Experience, study, and evaluate instructional strategies, materials, and assessment tools designed to facilitate students' learning in social studies. 4. Practice developing curricular materials and instruction that promotes all students' engagement and intellectual development through social studies learning.

MGE 441, MGE 451 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 474
THE TEACHING OF SCIENCE IN THE MIDDLE GRADES
Graduate
This course offers a comprehensive view of the theoretical principles and practices used in the teaching and learning of science at the middle level. Integrating coursework and fieldwork is designed to offer pre-service teachers experience in the implementation of meaningful science-learning experiences through the use of inquiry processes applicable to diverse populations of students and classroom environments. The course focuses on the development of meaningful habits of inquiry and encourages collaborative effort and reflective praxis in teaching to the unique developmental stage of middle school students. Co-requisite for this course is MGE 481. In this course the students will: 1. Analyze best practices for teaching science to students in the middle grades. 2. Assess science teaching practices for their use in meeting the diverse needs of middle grade students. 3. Appraise curricular materials, including their instructional strategies, materials, and assessments, which are designed to foster students' engagement in the practices of science. 4. Use the science teaching practices that promote middle grade students' engagement in and understanding of science concepts, processes, and habits of mind.

MGE 441, MGE 451 and Advanced Teacher Candidate Standing are prerequisites for this class.
MGE 481
SUPERVISED FIELD EXPERIENCE
Graduate
This course is a supervised, 25 hour, Level 2 field experience that provides students opportunities to apply the course content of MGE 471-4. **Ideally, this field experience will take place in the same classroom and/or school as the student teaching placement, to facilitate continuity for students and schools. Co-requisite for this course is MGE 471, or MGE 472, or MGE 473, or MGE 474. (1 credit hour)**In this course, students will:1. Implement and reflect on lesson plans relevant to middle grades learners from diverse backgrounds.2. Observe, analyze, and discuss expert middle grades teachers' instructional practices.

MGE 441, MGE 451 and Advanced Teacher Candidate Standing are prerequisites for this class.

MGE 590
STUDENT TEACHING
Graduate
A ten-week Level 3 field experience in a middle grades classroom in one or both of the teacher candidate's content areas. Teacher-candidates are responsible for developing, implementing, and evaluating a program of study, as well as all for other aspects of teaching, for at least three distinct classrooms (in one or both of their content areas). Co-requisite for this course is MGE 591. Student teaching application and approval required. (6 credit hours)**In this course, students will:1. Implement and reflect on lesson plans and curricular units relevant to middle grades learners from diverse backgrounds.2. Observe, analyze, and discuss expert middle grades teachers' instructional practices.3. Engage in professional activity relating to a career in teaching**

MGE 591
STUDENT TEACHING SEMINAR
Graduate
Provides teacher candidates a context for reflecting on their student-teaching experience in relation to their previous coursework. Co-requisite for this course is MGE 590. (2 credit hours)**In this course, students will:1. Critically reflect upon, discuss, and revise instructional practices to improve middle grades teaching.**

MGT 228
BUSINESS, ETHICS, AND SOCIETY
Undergraduate
This course will examine the nature and purpose of economic life and contemporary commerce as understood from the perspective of religious and secular communities, as well as the ethical implications that flow from the various worldviews. Sections of the course critically examine the thought of different religious traditions on specific business-related issues, placing a variety of religious discourses into direct conversation with secular voices regarding ethical business conduct. Cross-listed as REL 228.

WRD 103 or HON 100 or HON 101 is a prerequisite for this class.

MGT 248
BUSINESS ETHICS
Undergraduate
An examination of various ethical and moral issues arising in contemporary business and its activities which affect our society and the world. Cross-listed with PHL 248.

MGT 250
CAREER MANAGEMENT SKILLS
Undergraduate
This course helps students develop their careers. Students review their skills and interests as they relate to relevant occupations. They acquire career-enhancing skills in job search, career research, goal setting, and action planning. Students create resumes and cover letters, and they enhance their interviewing and networking skills. Through guided exercises and activities, students assess their current career activities and explore appropriate adjustments. This course is designed for students who have declared (or intend to declare) majors in Management or Business Administration. (2 quarter hours)
MGT 300
PRINCIPLES OF MANAGEMENT
Undergraduate
Effective application of managerial techniques and concepts to continually improve an organization's competitive position in the marketplace. Topics include management processes, values and attitudes, ethics and diversity, the global environment of management, strategic planning, organizational structures, motivation, leadership, teams, human resources, organizational control, organizational communications, and career management.

MGT 301
PRINCIPLES OF OPERATIONS MANAGEMENT
Undergraduate
Operations management focuses on the effective application of managerial techniques and concepts related to the delivery of services, manufacturing, and supply chain processes. Topics may include operations strategy, forecasting, project management, quality management, supply chain management, facility location and layout, productivity, inventory management, and scheduling.

ACC 101, ACC 102, ECO 105 and (MAT137 or equivalent) are a prerequisite for this class.

MGT 302
ORGANIZATIONAL BEHAVIOR
Undergraduate
This course focuses on the nature and consequences of human behavior in organizations. The prediction, explanation and management of individual and group behavior in the organization is dependent upon an understanding of the concepts of organizational behavior. Classroom experiences will focus on both understanding and practicing these concepts. Topics cover both the individual level - e.g., perception, attitudes, motivation - and the group level - e.g., leadership, group dynamics, communication, power and politics, and decision making.

MGT 300 is a prerequisite for this class.

MGT 307
HUMAN RESOURCES MANAGEMENT
Undergraduate
Concepts, theories, principles and techniques of personnel administration. Job analysis, employment law, recruitment, selection, training and development, employee motivation and performance appraisal, compensation, employee benefit programs, grievances, and labor relations.

Junior standing with at least 88 cumulative units is a prerequisite for this class.

MGT 315
MANAGEMENT SCIENCE
Undergraduate
Management science involves the use of quantitative models to support decisions faced by managers. Topics include model formulation, linear, non-linear and integer programming, transportation, transshipment and assignment formulations, network flow, decision analysis, and multicriteria decision making. Spreadsheet and other software packages will be used to model, solve, and analyze these problems.

MGT 301 is a prerequisite for this class.

MGT 320
TRAINING AND CAREER DEVELOPMENT
Undergraduate
A study of the training and management development practices of organizations. Emphasis is placed on the identification of training needs, program design, choice of training methods, and the evaluation of results. The practices and legislation affecting promotion of employees are also discussed.

MGT 307 or (declared HSP Leadership specialization and HSP 382) is a prerequisite for this class.
MGT 322
THE MANAGEMENT & MEASUREMENT OF QUALITY
Undergraduate
The theory and application of the concepts, principles and tools of modern quality control and management in manufacturing and service organizations. Specific topic areas include product design, process control, vendor selection and certification, quality information systems, quality costs, customer contact, and TQM philosophies and techniques.

MGT 301 is a prerequisite for this class.

MGT 323
SUPPLY CHAIN MANAGEMENT
Undergraduate
Analysis of the purchasing function, including sourcing, buying methods, vendor analysis, and contract execution. Organization and management of the supply chain with emphasis on intra- and inter-company relationships, especially with logistics and general management.

MGT 301 is a prerequisite for this class.

MGT 325
SUSTAINABLE MANAGEMENT
Undergraduate
This course discusses and analyzes the concept of sustainability within a business and management setting. It will analyze the complex relationship between business and the environment and it will explore the nature of business in today’s global context where addressing environmental and social issues is becoming increasingly important. Furthermore, it aims to discuss how the talents of business might be used to solve the world’s environmental and social problems. Rather than focusing on a ‘doom and gloom’ approach, the course aims to emphasize the solutions towards a sustainable economy.

MGT 330
RECRUITMENT AND SELECTION
Undergraduate
An examination of the recruiting and selection process used by organizations in the public and private sectors. A select group of tests will be discussed and used by the student for familiarization. EEO, Affirmative Action, and other legislation affecting recruiting and selection of employees will be discussed.

MGT 307 or (declared HSP Leadership specialization and HSP 382) is a prerequisite for this class.

MGT 335
COMPENSATION & BENEFITS
Undergraduate
The course has two major goals. The first is to learn how to design a pay system that is efficient, legally compliant, and fair/ethical. This is done through such topics as pay strategy, job descriptions, job evaluation, pay surveys, pay structures, pay increases, and legal compliance. The second goal is to learn how to design a benefits plan that supports company objectives and values. This is done through such topics as legal compliance, retirement plans, health insurance plans, social security, workers’ compensation, and work-life benefits.

MGT 307 or (declared HSP Leadership specialization and HSP 382) is a prerequisite for this class.

MGT 340
LEADERSHIP IN SPORTS: LESSONS FOR COACHING IN THE WORKPLACE
Undergraduate
A framework of leadership and coaching is utilized to critically examine the effectiveness of several sports' coaches and their leadership/coaching styles, as they motivate players to achieve their maximum level of performance. Lessons from leading sports' coaches are then applied to the workplace, where managers motivate employees to perform to their potential. The course also highlights the importance of unique situations in both the sports and workplace arenas. Major topics to be covered include roles of coaches and players, skills of coaching, coaching teams, and "flow" in sports and organizations.
MGT 341
BEHIND THE SCENES WITH CHICAGO SPORTS ORGANIZATIONS
Undergraduate
This unique course gives students an insider's perspective on the business side of Chicago's professional sports teams, college athletic programs, sports agencies and companies. Students will participate in "behind the scenes" tours of sports organizations and venues to gain first hand insights into the sports business landscape of Chicago. A wide range of sports management disciplines will be explored including sales, marketing, sponsorship, event management, hospitality, philanthropy, and business operations.

Junior standing with at least 88 cumulative units is a prerequisite for this class.

MGT 345
SERVICE SECTOR MANAGEMENT
Undergraduate
The intangible nature of services creates special challenges for the management of service organizations. These challenges are considered through examples drawn from various service industries - e.g., banking, transportation, hotel/restaurant, and retail - and from internal service functions such as personnel, information processing and production planning. Discussion, exercises, and assignments focus on the nature of service organizations, decisions faced in the management of services and tools available to facilitate effective and efficient service delivery. Topics covered include the service economy, service concept, design of service delivery systems, staffing delivery systems, capacity management, quality control, and service strategy.

MGT 301 is a prerequisite for this class.

MGT 347
HEALTH CARE MANAGEMENT
Undergraduate
This course will focus on the complexities of health service delivery to diverse populations using performance improvement, quality management, innovation, and entrepreneurship frameworks. This course presents an overview of the business of health. Students will develop skills in competitive analysis and the ability to apply those skills in the specialized analysis of opportunities in producer (e.g., biopharmaceutical, medical device, health information technology), purchaser (e.g. insurance, government), and provider (e.g. hospitals, nursing homes, physician) organizations. The course is organized around a number of readings, cases, presentations, and a required project.

MGT 301 is a prerequisite for this class.

MGT 354
GLOBAL HUMAN RESOURCE MANAGEMENT
Undergraduate
Concepts, theories, principles and techniques for effectively managing a workforce globally. The focus is on effective strategies relating to human resource strategy, staffing, development, performance management, remuneration management, legal/regulatory compliance, and employee/labor relations in geographically dispersed and culturally diverse organizations. The purpose of the course is to help students understand the issues related to effectively managing a workforce in a global organization and how human resource strategies and programs can enable the workforce to contribute to organizational success.

MGT 300 is a prerequisite for this class.

MGT 355
NEGOTIATIONS
Undergraduate
This course relies upon experiential learning to enhance students' ability to get what they want through the negotiation process. It is a 'skill building' course designed to help each student become more persuasive --- both personally and professionally. The course makes use of lecture, class discussion, various 'street negotiation' assignments, and a major bargaining exercise. It enables students to compete effectively in future negotiations.

MGT 300 is a prerequisite for this class.

MGT 356
INTRODUCTION TO SPORTS MANAGEMENT
Undergraduate
Students will examine the major issues facing sport managers in a variety of sport organization settings. Through the lens of organizational theory and behavior, areas explored include professional, Olympic, collegiate, and youth sport. Other areas of focus will include sponsorship, technology, legal issues, and emerging issues through course projects and case studies. Students will be exposed to various disciplines/careers through guest lecturers in the sports industry and/or on-site experiences.

MGT 300 is a prerequisite for this class.
This course is designed to develop students' knowledge and the skills needed to face the challenges of globalization. It provides participants with the global perspective required to expand their intercultural communication competencies and conduct business internationally. The subjects scheduled are diverse in nature and scope. They cover many fields of knowledge such as the multi-national company's environment, culture, strategy, and organization, as well as the role of managers in today's global business. The course topics and assignments are intended to enrich participants' professional and personal lives.

MGT 360
LEADERSHIP
Undergraduate
Leadership is a social influence process, the success of which is dependent upon certain skills (e.g. communication, conflict resolution) and situational factors (e.g. task characteristics, organizational structure). This course applies traditional and contemporary leadership theory to the development of individual leadership skills. Classroom experiences focus on understanding and practicing skills associated with effective leadership.

MGT 300 is a prerequisite for this class.

MGT 361
ORGANIZATIONAL DEVELOPMENT
Undergraduate
Students will examine the techniques of organizational design and development with emphasis on the methods of planned change to ensure improved effectiveness of organizations in a changing external environment. This course fosters the development of the skills necessary during all phases of the OD change process - from diagnosis, to interventions, through evaluating change. Current topics covered include models of change, diagnosing the need for change, analyzing data, resistance and readiness for change, and interventions. Values and ethics of organizational development are also emphasized. Course targets all change agents for organizations, including leaders and managers, aspiring leaders and managers, team leaders and project managers, and internal and external consultants. Learning methods include case analyses, experiential exercises, assessments, and teamwork on a change project.

MGT 300 is a prerequisite for this class.

MGT 370
BUSINESS PLAN DEVELOPMENT
Undergraduate
A business plan is an important strategic tool required to help establish the direction of an enterprise and attract capital required to run the business. It incorporates and integrates the functional areas of business and puts into practice many of the concepts and theories acquired in other classes. It describes the overall business venture, the product or service, the customers, the competition, the marketing, the legal structure, the operations, the human resources plan, the break-even analysis, the financing and all those things that are required to run a business. It helps to identify many unanticipated factors and reality-tests critical assumptions, thereby creating a roadmap for a successful enterprise. Students are encouraged to identify a business opportunity and develop their own business plan.

MGT 301 is a prerequisite for this class.

MGT 373
CREATIVITY & ENTREPRENEURSHIP
Undergraduate
This course will provide an overview of the opportunity recognition and evaluation process by examining how people, the industry, and the social environment interact to identify, create and shape entrepreneurial opportunities. The focus of this course is on creativity and innovation within an entrepreneurial context. Students learn creative tools and applications to assist in designing new business ideas and ventures.

MGT 300 is a prerequisite for this class.

MGT 374
ENTREPRENEURSHIP LAW
Undergraduate
This course is designed to explore legal issues which an entrepreneur will face when starting up his or her business. For example, should a person set up her start-up venture as a sole proprietorship, partnership, corporation, or limited liability company? This course follows the development of a successful start-up all the way to the IPO.

BLW 201 is a prerequisite for this class.
MGT 393
INTERNSHIP AND MANAGEMENT CONSULTING PROGRAM
Undergraduate
Students encounter real work experience improving linkages between classroom efforts and the business world.

Junior standing with at least 88 cumulative units is a prerequisite for this class.

MGT 398
SPECIAL TOPICS
Undergraduate
Content and format of this course are variable. An in-depth study of current issues in management. Subject matter and prerequisites will be indicated in class schedule.

Junior standing with at least 88 cumulative units is a prerequisite for this class.

MGT 399
INDEPENDENT STUDY
Undergraduate
Available to students with demonstrated capability for intensive independent work in management. (Variable credit)

Junior standing with at least 88 cumulative units is a prerequisite for this class.

MGT 455
ESSENTIALS OF OPERATIONS MANAGEMENT
Graduate
This course covers topics that are applicable to a wide variety of project and operations management techniques. Project management topics include project organization, qualifications and roles of the project manager, project leadership, team building, and the management of conflict and stress in projects. Operations management topics include operations strategy, forecasting, capacity management, quality management, supply chain management, facility location and layout, productivity, inventory management, and scheduling.

Status as a graduate accountancy student is a prerequisite for this class.

MGT 500
MANAGING FOR EFFECTIVE AND ETHICAL ORGANIZATIONAL BEHAVIOR
Graduate
Students will critically examine ethical and creative methods to solve problems related to managing individuals and teams. Students utilize feedback from a developmental assessment center assessing their managerial and interpersonal skills. Personal development plans are created and skills developed throughout the course. Skill development domains include perception, attribution, motivation, learning leadership, communication, team development, managing change and conflict, decision-making, power and politics, and business ethics.

Reserved for Kellstadt students or CDM students in select programs.

MGT 501
STRATEGIC SUPPLY CHAIN MANAGEMENT
Graduate
This course examines how operations-related strategic decisions can lead to improved market and competitive performance. We view the supply chain (of products or services) from a strategic point of view. The design of an expedient logistics system is critically linked to the key decisions and objectives of a responsive and efficient supply chain (forecasting, aggregate planning, inventory management, matching supply with demand, transportation, location, and information). We cover those topics with cases, spreadsheets and simulations to illustrate and help understand how logistical decisions impact the performance of the firm as well as the entire supply chain.

MGT 502
OPERATIONS MANAGEMENT
Graduate
At its core, business is about providing a superior product or service. This course analyzes the processes used to deliver products in the marketplace. World class firms have demonstrated that effective operations management can be a potent competitive weapon. This course addresses the key operations and logistical issues in service and manufacturing operations, which have strategic as well as tactical implications. Both quantitative and qualitative techniques and principles used by leading organizations are examined.

GSB 420 is a prerequisite for this class.
MGT 504
FUNDAMENTAL OPERATIONS MANAGEMENT
Graduate
Fundamental Operations Management provides an introduction to the basic and pragmatic issues faced by operations managers. Major practices in operations management, such as operations strategy selection, process improvement, inventory management, project management, and quality issues are covered to help students understand the role of operations management in an organization and between organizations (supply chain). More specifically, the course educates students in strategic thinking (operations strategy selection, supply chain management), doing (inventory management, project management, quality management), and feeling (ethical issues in cross-border supply chains, lean production, continuous improvement). (2 quarter hours)

MGT 506
DECISION MAKING FOR MANAGERS
Graduate
This course addresses Simon's three-phase problem-solving model. Students learn how to improve problem diagnosis through statistical and logical tools, creatively generate alternative solutions, and make effective decisions through decision analysis and by building decision support models. Students will use a various spreadsheet applications to aid in the decision-making process.

MGT 501 or MGT 502 or MGT 504 is a prerequisite for this class.

MGT 507
GLOBAL SOURCING AND PROCUREMENT
Graduate
This course introduces the issues and processes in sourcing raw materials and parts, such as supplier selection, supplier management, and other strategic issues. It explores the central concepts of organizational procurement, global sourcing, and interfaces of these to the other areas of an organization. The course takes a strategic approach to explaining sourcing and procurement for sustainable long term success of the organization.

MGT 501 or MGT 502 or MGT 504 is a prerequisite for this class.

MGT 508
QUALITY MANAGEMENT SYSTEMS
Graduate
A successful approach to improving organizations involves aligning customer requirements to processes and employee performance. To do this organizations apply approaches such as Lean, Six Sigma, and other quality tools. This course will focus on Lean, Six Sigma and the DMAIC approach to improve quality in organizations.

MGT 509
PRODUCTION AND INVENTORY MANAGEMENT
Graduate
This course aims to develop a better understanding of production, operations, inventory, and supply-chain management problems, and provide foundations for deterministic and stochastic models/methods needed to solve these problems. Students in this course will learn production and inventory control models such as lot-sizing, dispatching, scheduling, releasing, and material requirements planning.

MGT 501 or MGT 502 or MGT 504 is a prerequisite for this class.

MGT 510
TECHNOLOGY, QUALITY & HEALTH INFORMATICS
Graduate
This course is designed to provide an overview of health technology, informatics and quality. There will be an emphasis on the real world interaction between medicine and technology and the role of informatics and quality. The course will provide practical and up-to-date examples of emerging technologies. Throughout the course, students will discuss such topics as patient informatics, evidence-based medicine, clinical practice guidelines, disease management, quality management, pay for performance, patient safety, applicable regulatory guidelines, and the implications of both the public and private sector involvement in health insurance and healthcare informatics.
MGT 511
TRANSPORTATION AND LOGISTICS
Graduate
This course is focused on understanding capacity development, multi-modal transport, freight consolidation, network alignment, and synchronization. It develops the principles, practices, and tools required to address major issues and tradeoffs in domestic and international transportation including key financial and performance indicators for transportation and design of supply chains to minimize transportation and distribution costs.

MGT 501 or MGT 502 or MGT 504 is a prerequisite for this class.

MGT 514
BEHIND THE SCENES WITH CHICAGO SPORTS ORGANIZATIONS
Graduate
This unique course gives students an insider's perspective on the business side of Chicago's professional sports teams, college athletic programs, sports agencies and companies. Students will participate in behind the scenes tours of sports organizations and venues to gain first hand insights into the sports business landscape of Chicago. Students will meet with senior team executives and DePaul graduates at these organizations to explore different management styles and business strategies, hear case histories, and learn about different career paths and opportunities. A wide range of sports management disciplines will be explored including sales, marketing, sponsorship, event management, hospitality, philanthropy, and business operations.

MGT 515
SUSTAINABLE MANAGEMENT
Graduate
This course discusses and analyzes the concept of sustainability within a business and management setting. It will analyze the complex relationship between business and the environment and it will explore the nature of business in today's global context where addressing environmental and social issues is becoming increasingly important. Furthermore, it aims to discuss how the talents of business might be used to solve the world's environmental and social problems. Rather than focusing on a 'doom and gloom' approach, the course aims to emphasize the solutions towards a sustainable economy.

MGT 519
SPORTS MANAGEMENT
Graduate
Students will examine the major issues facing sport managers in a variety of sport organization settings through course projects and case studies. Through the lens of organizational theory and behavior, areas explored include professional, Olympic, collegiate, and youth sport. Other areas of focus will include community and fitness centers, sponsorship, technology, legal issues, and emerging issues. Students will be exposed to various disciplines/careers through guest lecturers in the sports industry and learn current management issues from industry experts.

MGT 521
MANAGEMENT OF FAST GROWING FIRMS
Graduate
Alternative growth strategies for companies in the second stage of their life cycle are examined. After initial start-up, a unique set of problems and constraints confront the firm limiting its growth. Expansion of product lines and services, new market development, redefinition of organizations, financial resource allocation, second stage financing using a case study approach, and going public are some issues that are covered. Proposed revisions are critically evaluated.

MGT 500 and ACC 500 are prerequisites for this class.

MGT 523
RECRUITMENT AND SELECTION
Graduate
An advanced study of current recruitment and selection practices of organizations both public and private. Emphasis is placed on common tests that are used and an examination of these tests for applicability in specific situations. Legislation related to EEO and Affirmative Action programs are discussed.

MGT 554 or MGT 555 is a prerequisite for this class.
MGT 524
LEADERSHIP COACHING IN SPORTS AND ORGANIZATIONS
Graduate
The effectiveness of several sports coaches and their leadership styles are examined as they work with players to raise the performance of their teams. Lessons from prominent sports coaches are translated to the traditional workplace arena, where managers coach employees to perform to their full potential and coordinate with their coworkers. Major topics covered include the roles of coaches and players, the skills and development of coaching, coaching teams, coaching styles, coaching conversations, and flow in sports and organizations. Learning methods include case analyses, experiential exercises, teamwork, and field trips.

MGT 525
TRAINING AND CAREER DEVELOPMENT
Graduate
An intensive study of personnel training and development in contemporary organizations. Emphasis is placed upon the identification of training needs, program design, choice of training methods, and evaluation of results. Classroom activities focus on application with students designing and presenting training seminars.

MGT 526
COMPENSATION AND BENEFITS
Graduate
The course addresses the total rewards available in an organization. The first goal is to learn how to design a pay system that is efficient, legally compliant, and fair/ethical. This is done through such topics as pay strategy, internal pay alignment, external competitiveness, pay for performance, and legal compliance. The second goal is to learn how to design a benefits plan that supports company objectives. This is done through such topics as retirement plans, health insurance plans, and legally required benefits. The third goal is to learn about work-life programs.

MGT 529
LIFE AND CAREER COACHING
Graduate
This course is designed to develop your life and career skills to meet the challenges associated with changing careers and changing jobs. Topics include: enhancing your self-esteem, balancing life and career, tapping interests, aptitudes and values, self-marketing, resumes and interviews, and strategic career planning to achieve life and career goals.

MGT 530
LEADERSHIP IN ORGANIZATIONS
Graduate
Theoretical frameworks, and models of leadership, provide a foundation for the understanding of effective leadership at all levels in organizations. A major focus of the course is the development of each participant’s leadership capabilities. Examples of organizational leaders are critically examined and depicted as powerful role models. Current leadership topics covered include values and ethics, power and empowerment, management style, shared team leadership, organizational culture, and communication for change, thus providing analysis on individual, group, and organizational levels. Learning methods include case analyses, assessment and reflection opportunities, experiential exercises, coaching, and teamwork to further the development of effective leadership.

MGT 535
CHANGE MANAGEMENT AND CONSULTING
Graduate
Techniques of change management and consulting with emphasis on the methods of planned change to ensure improved effectiveness of organizations in a changing external environment. Course targets all change agents for organizations, including leaders, managers, team leaders, and internal and external consultants. Fosters the development of competencies necessary during all phases of the change process - from diagnosis, to interventions, through evaluation of change. Learning methods employed, including case studies, experiential exercises, assessments, and teamwork, develop an understanding of interactive change processes on organizational, group, and individual levels. Major topics covered include types and models of change, diagnosing the need for change, analyzing data, resistance and readiness for change, and other activities necessary to lead and manage effective change efforts.
MGT 545
MANAGING SERVICE OPERATIONS
Graduate
This course provides an examination of operating activities in service industries. Emphasis is on the principles of design, operation, and control of service delivery systems. Lectures, cases, and assignments focus on such topics as delivery system design, client interfaces, operations control, capacity management, and quality control.

MGT 550
ORGANIZATIONAL DIVERSITY
Graduate
Organizational diversity is the application of economic, social, and behavioral sciences to aligning the talents of the organization with the ever changing demands and preferences of the marketplace. Leading and managing organizational diversity requires tolerating ambiguity, comfort with differences, and creating a climate that values and fully leverages the talent of all types of workers.

MGT 551
GLOBAL WORKFORCE MANAGEMENT
Graduate
Concepts, theories, principles, and techniques for effectively managing a workforce in a global organization. Focus on HR strategy, staffing, development, performance management, remuneration management, legal/regulatory compliance, and employee labor relations.

MGT 552
MANAGING CULTURAL DIFFERENCES FOR GLOBAL SUCCESS
Graduate
The "Managing Cultural Differences for Global Success" course is designed to guide and coach participants on how to work and communicate effectively with people from different cultures. The course provides a hands-on approach for developing cross-cultural competency. Comparative cultural models will explain how concepts such as culture, values, time, power, mindsets, and thinking patterns differ in the world. We will illustrate with real-life cases pertaining to doing business in Europe, Asia, and the Americas.

MGT 554
MANAGING HUMAN CAPITAL
Graduate
Managing Human Capital addresses the role of human capital in business strategy and competitive advantage, high performance work practices, and metrics of HR effectiveness. Topics covered include: Legal Context of Human Capital Management;, Recruitment and Selection (- recruitment sources and tactics),; Employee Development and Performance Management;, Total Rewards (pay and benefit systems),; and Employee Relations. Issues of ethics and employee rights are integrated across the above six topics. (2 quarter hours)

MGT 555
STRATEGIC MANAGEMENT OF HUMAN RESOURCES
Graduate
This course will help students understand how the management of people is influenced by the social, ethical, and legal environment; by diversity in the workplace; by the organizational culture; and by the business strategy. Students will learn how to effectively perform the following HR activities: selecting employees, developing people, evaluations and rewarding performance, and motivating employees.

MGT 556
ETHICS AND LEADERSHIP
Graduate
This course encompasses meetings with executives and senior leaders in the Chicago community. These meetings allow students the exciting and rare opportunity to engage in personalized, in-depth conversations with leaders in government, CEOs and senior executives from for-profit corporations, and directors of nonprofit organizations. Students learn first-hand from the experiences of these extraordinary success stories so that they can glean the critical elements necessary for successful and ethical leadership. Sessions will involve briefings on key issues facing the leaders, analysis of risk assessment and management, and critical review of leadership decision-making. The course is designed to serve both those students who are interested in leading their own entrepreneurial ventures, as well as those who seek leadership roles in larger corporations or other organizations.
MGT 557
INTERNATIONAL MANAGEMENT
Graduate
The object of this course is to develop clear awareness of the international business operations, practices and environment. It provides the concepts, methods, and tools necessary to face the global challenges in international management. The objective is met through lectures, classroom discussions, library assignments, and research work. Students will learn the effective use of the international business references. By the end of the course, they are expected to have developed a high level of competency in acquiring, understanding, analyzing, and synthesizing international management information from international business directories, databases, and other sources.

MGT 559
HEALTH SECTOR MANAGEMENT
Graduate
This graduate level, hands-on course will discuss the evolution and current trends in the delivery and financing of health goods and services in the biotechnology, pharmaceutical, medical device, and health services delivery industries within the health sector. This course will equip students with the ability to use managerial epidemiology as a decision-making tool in marketing and operations in the health sector. Ultimately, this course will enable students to apply Michael Porter's Five Forces Model to analyze and manage the various industries within the health sector. This course will use lectures, role plays, simulations, and the case method.

MGT 562
RESOLVING CONFLICT IN ORGANIZATIONS
Graduate
Comprehensive study and skill building exercises devoted to the development of skills necessary for managers to resolve and manage conflict within their organizations. For illustrative purposes, discussions and exercises will be in the context of employment disputes, discrimination disputes, and labor-management disputes. However, the skills attained in the course may be successfully used to resolve any type of conflict. Included will be a discussion of various dispute resolution methodologies including the mediation, arbitration, and investigation of asserted conflicts, real or perceived, as well as the design of dispute resolution processes and related issues of organizational fairness, justice, and ethics.

MGT 563
NEGOTIATION SKILLS
Graduate
This nontraditional course relies predominantly upon experiential learning to enhance students' ability to get what they want through negotiation. It is a skill-building course designed to help each individual student become persuasive, both personally and professionally. The course makes use of lecture, class discussion, various stress negotiation assignments, and a major bargaining exercise. It builds upon failures as well as successes, enabling students to identify their own individual negotiations style. Students completing the course will have developed the ability to compete successfully in future negotiation situations at all levels and to refine the tools and techniques they learned during the quarter.

MGT 564
STREETS OF CHICAGO: HEALTHCARE MANAGEMENT
Graduate
This graduate level course will equip management, marketing, finance, and accounting students with the knowledge necessary to apply their specific expertise into one of the fastest growing sectors of the global economy. Upon completing this course, students will be exposed to not only the latest theories, techniques, and best practices but also some of the key players in Chicago's health insurance, biotechnology, pharmaceutical, hospital, and group practice industries.

MGT 565
EMPLOYMENT LAW
Graduate
The purpose of the course is to identify how a supervisor or firm owner is legally regulated in connection with the management of her or his workforce, as well as the management implications of the regulation. In this way, the student will learn of the legal ramifications of human resource management decisions. Topics which will be addressed include discrimination on the basis of age, gender, race, religion, disability and national origin, sexual harassment, drug and other forms of testing, regulation of hiring and firing decisions, privacy rights and regulation of off-work conduct. Class activities may also focus on understanding bias and prejudice in managerial decision-making.

MGT 554 or MGT 555 is a prerequisite for this class.
MGT 566
HEALTH INSURANCE & BENEFITS
Graduate
This course is a primer on healthcare insurance and benefits programs in the United States. Emphasis will be placed on employer group plans through which most American gain access to the healthcare delivery system and receive assistance with the cost of their medical expenses. We will survey the demand for healthcare, the regulatory environment, and the predominant public and private sector health insurance programs. The challenges and perspectives of providers, insurers, and employers will be discussed, as will important ethical considerations. The course will also review benefit programs typically provided through employers with an emphasis on group medical plans, including plan types, design, effectiveness, and the development of premium rates. It will conclude with discussions of the latest healthcare reform developments and trends defining the future of the healthcare system.

MGT 570
ENTREPRENEURSHIP AND NEW VENTURE MANAGEMENT
Graduate
The focus of the course is on new venture initiation and the preparation of a business plan that can be used to generate financing and to begin operations in a new business enterprise. It examines the critical factors involved in the conception, initiation, and development of new business ventures. Topics covered include the identification of characteristics of prospective entrepreneurs, identifying innovations, market potential analysis for new products or services, acquiring seed capital, obtaining venture capital for growth or purchase of an existing business and organization and operation of the new business. Each student is required to develop a business plan which will be presented to the class. Students wishing to start, develop, acquire, sell, or merge a business are encouraged to do so.

MGT 571
FINANCING NEW VENTURES
Graduate
This course will focus on identifying, examining and evaluating various sources of original and growth capital. Emphasis will be on legal, financial and tax issues related to capital formation as well as specific problems experienced by the small-to-medium-sized firms undergoing rapid growth. Topics discussed will include financing startups, financial planning and strategy, going public, selling out and bankruptcy. A formal proposal for capital acquisition developed through field research will be required of each student. Cross-listed with FIN 571.

MGT 572
CORPORATE VENTURES AND MANAGEMENT
Graduate
The focus of this course is on how corporations develop new ventures. It critically examines the circumstances that make it possible for employees to contribute their venture ideas to the corporate objectives and describes techniques that stimulate such ideas. Although the primary focus will be on the employee and how the individual can be entrepreneurial within a corporate structure, the course also examines how the corporation can systematically encourage innovation. Case studies of corporate ventures projects will be reviewed. MGT 500 and ACC 500 are prerequisites for this class.

MGT 573
CREATIVITY & INNOVATION IN BUSINESS
Graduate
This course explores the nature and role of creativity in organizations. Theories and modes of creative thinking, and the link between creativity and innovation are presented. The course format is largely experiential, with emphasis on group and individual exercises, techniques, simulations and cases, through which students will investigate the creative process in a variety of organizational settings. The role of managers and team members in nurturing and sustaining a creative enterprise is discussed. The course is designed to open students to the creativity within themselves and organizations, and to the tools with which creativity can be managed to promote innovation and enhance organizational effectiveness as well as satisfaction and quality of work life.

MGT 584
CONSULTING SKILLS
Graduate
This course focuses on developing knowledge and skills required to effectively engage in human capital consultation. Students will be introduced to the full range of consultation activities including, but not limited to: client contracting and proposal writing, problem diagnosis, data collection and analysis, client feedback, intervention design, and evaluation. Further attention is given to issues related to consultation models, client readiness, boundaries of expertise and ethics. The course places a strong emphasis on practice and will require student teams to engage in consultation to a non-profit organization during the quarter. This course is relevant to those who are interested in external management consulting careers or whose future job interest includes internal consulting to staff or management such as human resources or organization development professionals. Students are advised to complete at least 16 -hours of Kellstadt coursework before registering for this course.
Developing executive coaching competencies for "managers as coach" is the keynote of this course. Grounded in positive psychology and the science of human flourishing, participants will identify and apply strengths-based interventions to promote organizational effectiveness, career success, and life fulfillment. Students will learn and deploy the GROW model of coaching, motivational interviewing, solution-focused coaching, mindfulness, and goal-focused approaches to help people achieve change. Participants will also enhance their own ability to create presence, build trust, manage self-awareness, listen, ask powerful questions, design actions, and manage accountability. Working from a place of purpose and intention, course participants will harness competitive advantage, explore finding flow, managing stress, maintaining optimism, and creating balance in work, health, and family.

The ability to manage technological innovation has become an increasingly essential requirement for business people regardless of functional specialty. The objective of this course is to explore ways to create environments that are conducive to technological innovation. Throughout the course students examine practices, models, and approaches that established, as well as new, organizations employ to promote innovative practice, technological change, and new technologies. The following topics will be covered: the innovation process, managing technical people, the impact of organizational design on innovation, knowledge management, cross-functional teams, and exploiting new technologies. Students will research new technologies and discuss potential business applications and issues associated with those technologies.

This course explores principles and applications of value generation in social entrepreneurial settings. Participants will learn how entrepreneurial ventures go beyond traditional non-profit and for-profit realms to generate different kinds of value with a distinct social enterprise approach that transcends both frontiers. The course surveys concepts from traditional entrepreneurship in the context of social sector environments and emphasizes topics such as fee-based revenue, multiple denominations of value, and social impact. Joint contributions from graduate students in the College of Business and the School for Public Service deepen the exploration of the full social enterprise realm. The course experience revolves around student-led team consulting projects with several mission-driven ventures in Chicago.

This course covers management techniques that are applicable to a wide variety of project types including new product development, business start-ups, marketing campaigns, facility relocations, construction, research programs, and special events. Emphasis is on scheduling, budgeting, and control including the selection and application of project management software. Other topics include project organization, qualifications and roles of the project manager, project leadership, team building, and the management of conflict and stress in projects.

This is a unique opportunity in which interns gain and develop managerial skills, providing a link to mastering the dynamics of running a business. This hands-on experience allows the intern to apply his or her skill/wisdom to the work place and provides invaluable knowledge that is crucial for future advancement. While building an impressive resume for further job opportunities, the intern will be immersed in a stimulating environment with a pool of established resources. In addition, networking opportunities avail themselves to build future relationships. (Variable credit)

Content and format of this course are variable. An in-depth study of current issues in management.

Available to graduate students with demonstrated capability for intensive independent work in management. Requires Chair's permission.
MGT 518  
EMERGING ETHICAL ISSUES & TECHNOLOGY IN SUPPLY CHAIN MANAGEMENT  
Graduate  
This seminar is designed to familiarize students with the current issues and technology developments in supply chain management. Students will learn about changing legal, regulatory, and compliance-related issues, such as conflict minerals, ethical sourcing, and counterfeit products. This seminar also introduces students to the latest business technology to support logistics and supply chain systems. Topics of discussion are updated quarterly to follow industry-related developments.

MGT 501 or MGT 502 or MGT 504 is a prerequisite for this class.

MGT 520  
HUMANITARIAN SUPPLY CHAIN  
Graduate  
Natural disasters, disease outbreaks, and other humanitarian crises are inherently unpredictable and often occur far removed from the roads, ports, and infrastructure needed to mount an effective response. This course explores the difference between commercial and humanitarian supply chains, the design characteristics required to support a rapid response, and the other challenges of effectively delivering humanitarian relief.

MGT 569  
LEGAL ASPECTS OF ENTREPRENEURSHIP  
Graduate  
This course explores the basic legal issues an entrepreneur encounters when starting a business. Typical topics include the legal ramifications of decisions related to incorporation, capital financing, human resource management (e.g., recruitment, compensation, and termination), contracts, and product defects. The primary objective of the course is to raise awareness of potential legal pitfalls and prepare new entrepreneurs to better manage their exposure to risk through insurance, carefully-worded contracts, and a better understanding of when to seek professional legal advice.

MIS 140  
MANAGEMENT INFORMATION SYSTEMS  
Undergraduate  
This is an introductory course in MIS. It emphasizes the use of information technology to support business operations and management, including the use of spreadsheets to analyze and represent data. Topics include strategic uses of IT, databases, data warehouse, decision support and artificial intelligence, e-commerce, systems development, IT infrastructure, network security, social, ethical and legal considerations. Formerly MIS 340.

MIS 350  
BUSINESS SYSTEMS ANALYSIS  
Undergraduate  
This course focuses on the planning, analysis, and requirements specification phases of systems development life cycle. It covers business modeling, process management, requirements gathering and other topics used by business analysts and consultants. Topics include planning and analysis techniques, the system development life cycle (SDLC), data flow diagrams, data gathering, network diagrams, Gantt charts, business process reengineering, joint application design, use case diagrams, flow charts, decision trees, decision tables, and structured English.

MIS 360  
SYSTEMS ANALYSIS AND DESIGN  
Undergraduate  
This course prepares students to pursue careers in systems analysis and design. It emphasizes object-oriented systems analysis and design techniques using UML. Students learn about activity, use-case, class, sequence, state chart, and other UML diagrams used by systems analysts. The course covers all phases of the SDLC. Students work in project groups to solve a real-world problem.

IT 130 and an intended or declared MIS, IT, IS or E-Business major are a prerequisite for this class.
**MIS 362**  
**INFORMATION SYSTEMS PROJECT MANAGEMENT**  
Undergraduate  
The course prepares students to become project managers. It covers IS project management concepts, techniques, tools, project issues, roles and responsibilities of project leaders. Topics include, but not limited to, resource allocation, scheduling, budgeting, monitoring, controlling, use of Gantt charts, precedence analysis, PERT, and CPM. Students use Microsoft Project.

(An MIS major or E-Business Major and MIS 360) or (an MIS minor and MIS 350) are a prerequisite for this class.

**MIS 366**  
**INTERNET TECHNOLOGIES IN BUSINESS**  
Undergraduate  
The course will be an introduction to internet technologies with particular focus on World Wide Web and e-business applications. Topics include internet technology application framework, attributes of e-business applications, client and server side processing, web servers, Java, J2EE and Microsoft’s .NET, accessing enterprise data, HTTP security, certificates and CA, XML and e-business integration, latency and workload management, and wireless access. Students will work in groups and will be required to do one design proposal and make one presentation using Visio.

IT 130 is a prerequisite for this class.

**MIS 370**  
**DATABASE MANAGEMENT SYSTEMS DESIGN AND DEVELOPMENT**  
Undergraduate  
This course is designed to prepare students to pursue careers in database management. It covers topics such as entity relationship modeling, normalization, SQL, database design principles, data warehousing, transaction management, and database administration. Students will complete assignments and a group term project using Microsoft SQL Server.

MIS 140 is a prerequisite for this class.

**MIS 398**  
**SPECIAL TOPICS**  
Undergraduate  
Special Topics

**MIS 399**  
**INDEPENDENT STUDY**  
Undergraduate  
Independent Study is available to students of demonstrated capability for intensive independent work in management information systems. (variable credit)

**MIS 555**  
**MANAGEMENT OF INFORMATION TECHNOLOGY**  
Graduate  
This course focuses on the management and use of information technology (IT). As the use of IT in society grows, particularly in business, our graduates are likely to become responsible for managing some technology resources and to participate in IT planning and development projects as founders, sponsors, team members, managers of development or end-user developers. Students should become effective users and evaluators of information, IT, and information services. The course explores a number of IT-related topics such as the strategic role of IT, IT planning and architecture, building the telecommunication highway system, management issues in systems development, the expanding universe of computing, group support systems, intelligent systems, electronic document management, and managing the human side of systems.

**MIS 673**  
**DATA MANAGEMENT**  
Graduate  
Data has been recognized as an important corporate resource and databases have evolved into a central component of business information systems. Topics include semantic data modeling using entity-relationship and object models; data structuring with normalization; relational database design, implementation and manipulation with SQL (Structured query language); and some evolving technologies such as data warehousing, on-line analytical processing, object-oriented databases, and data visualization. Hands-on exercises include the use of a relational database system with SQL and data modeling CASE (computer-aided software engineering) tools.
MIS 674
SYSTEMS ANALYSIS AND DESIGN
Graduate
The focus of this course is on the early phases of information systems development starting with requirements analysis and specification. Alternative systems development methodologies including conventional structured approaches are reviewed but the emphasis is on distributed processing together with object-oriented analysis and design, rapid application development and prototyping, the use of CASE (computer aided software engineering) tools and GUI (graphical user interface) design with event-driven computing.

MIS 683
INFORMATION TECHNOLOGY STRATEGY AND ARCHITECTURE
Graduate
This course focuses on key aspects of formulating a business-driven information technology (IT) strategic plan and an enabling technology architecture to optimize enterprise value-chain functions, and improve shareholder value. Students will explore opportunities on how to leverage IT, of their own firm, for competitive advantage and growth. The course will include lectures, case study, project presentation, and discussion of current developments in IT industry. Class discussion will be centered around the importance of the alignment of business and technology, and the critical role IT has on optimizing mission-critical business processes. Key course topics include: Business Strategy Alignment, Strategic Analysis, IT Strategic Planning Framework, IT Strategy Tools & Methods, Baseline Assessment (applications, data, infrastructure, TCO, organization), IT Effectiveness Review, Applications Portfolio Strategy, Data Management Strategy, Technology Infrastructure Strategy (hosted, cloud/SaaS, and on-premise), Spend/TCO, Investment Plan, and Organization Strategy.

MIS 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. It involves an in-depth study of current issues in information systems and technology. Subject matter constantly changes and will be indicated in class schedule.

MIS 799
INDEPENDENT STUDY
Graduate
Available for graduate students of demonstrated capability for intensive independent work in information systems.

MKT 202
QUANTITATIVE METHODS IN MARKETING
Undergraduate
This course explores quantitative techniques commonly used in business to aid in marketing decision making. It explores the concepts which underlie techniques and provides skills to understand and manipulate data using Excel. Statistics that are frequently used in marketing are taught. This course should be taken as soon as you decide to pursue a major or minor in Marketing.

MKT 250
NAVIGATING MARKETING CAREERS
Undergraduate
The course is designed to provide an understanding of the various marketing career options available for early-career marketing professionals. Based on a deep understanding of individual strengths and weaknesses, this course will help students to find the marketing role that leverages their strengths. Additionally, this course prepares students to create and manage a successful marketing job-search campaign. Elements of the campaign include resume development for marketing roles, cover letters, developing and using networking skills, interview preparation, managing interview anxiety, salary negotiation, etc. (0 quarter hours)

MKT 301
PRINCIPLES OF MARKETING
Undergraduate
Marketing 301 introduces basic marketing terminology and the relationships between and among these terms relevant to the creation and implementation of basic marketing strategy. The course content also focuses upon the controllable and uncontrollable variables which have bearing on the success or failure of marketing programs. The course also provides students with opportunities to demonstrate their ability to connect concepts discussed in the text and those same concepts appearing in academic and practitioner publications and popular business periodicals.
MKT 305
**INTRODUCTION TO MARKETING RESEARCH**
*Undergraduate*
This course focuses on how to match research design (exploration, surveys, observation and experiments) with an organization's marketing problems. You will learn how to: design questionnaires, collect and analyze survey data, prepare and conduct focus groups and design experiments. Some knowledge of statistics required.

(MKT 202 or FIN 202 or MGT 202) and MKT 301 are a prerequisite for this class.

MKT 310
**CONSUMER BEHAVIOR**
*Undergraduate*
An analysis of the environmental, social and psychological factors that influence an individual's consumer decisions. Specific areas studies will be consumer motivation, attitudes, learning and decision processes, as well as lifestyles, reference groups, communication and cultural influences.

MKT 301 is a prerequisite for this class.

MKT 315
**STRATEGIC TOOLS FOR MARKETERS**
*Undergraduate*
This course provides depth of knowledge to understand and apply important and relevant concepts in marketing such as market demand forecast, product positioning, pricing, marketing performance assessment, and product design. The course covers several hands-on tools that are frequently used by marketers and business-people to generate deep customer insight to aid decision-making in the above-mentioned areas.

MKT 202, MKT 301 and MKT 310 are a prerequisite for this class.

MKT 320
**PRINCIPLES OF ADVERTISING**
*Undergraduate*
Development of an understanding of the principles, processes, and methods employed in advertising and sales promotion of products and services directed toward consumers and business. Discussion will involve understanding the behavior of the target audience, developing advertising, budgeting for advertising, creating the message and media strategy, and measuring the effectiveness of the advertising program.

MKT 321
**SOCIAL MEDIA MARKETING**
*Undergraduate*
In this course students gain a better understanding of what social media is and how businesses and individuals are using it to build awareness, increase visibility, and engage in conversations with their customers. Students also gain an understanding of the various benefits of social media, and insight into the relatively low cost and high scalability.

MKT 301 is a prerequisite for this class.

MKT 340
**MARKETING ACROSS CULTURES: A CULTURAL PERSPECTIVE ON MULTICULTURAL MARKETS**
*Undergraduate*
The course is designed to challenge students to think critically about culture and international marketing, with an emphasis and perspective on multicultural markets. The course is structured to examine cross-cultural and intercultural approaches that intertwine with the international business environment and the impact that both have on the marketing of goods and services.

MKT 310 is a prerequisite for this class.
**MKT 352**  
**NEW PRODUCT DEVELOPMENT**  
*Undergraduate*  
An introduction to the various types of new products and services, and to the new product management process used by many firms to increase the likelihood of success while minimizing financial risk. Students will learn about new product conceptualization, development, and launch stages of the process, and be introduced to some of the tools and techniques employed in each.  

MKT 310 is a prerequisite for this class.

**MKT 356**  
**MARKETING ANALYSIS AND PLANNING**  
*Undergraduate*  
The first course of the IME sequence addresses marketing information gathering, analysis and planning. Students will learn how to conduct secondary research at the company and industry level for analysis of a firm's competitive situation. This analysis will be drawn from real-time cases from sponsoring Chicago-area companies. Emphasis is placed on teamwork and effective communication in oral and written presentation. Students will learn to analyze a firm's industry and competition as well as how to identify a target market and position a product. Milestones will include the preparation and presentation of the situation analysis elements of a marketing plan, as well as a presentation to the client company.  

Offered every Autumn.  
(8 quarter hours)  
Acceptance into the IME program is a prerequisite for this class.

**MKT 357**  
**MANAGEMENT OF MARKETING**  
*Undergraduate*  
The second course in the IME sequence acquaints the student with the knowledge and skills necessary for the management of marketing activities including marketing plan preparation and tactical decision-making in changing situations.  

(1) Students will build upon the situation analysis and presentation skills acquired in the IME Level I, by developing skills necessary to prepare and present a marketing plan.  

(2) Tactical managerial decisions to be addressed include product/service management, competitive pricing decisions, distribution, and promotion decisions as faced by the manager of marketing activities in the day-to-day life of the firm. Students will learn to develop sales forecasts and budgets and apply control and analysis techniques to evaluate marketing operations. Course milestones will include market plan development and presentation to internal as well as external groups, and the presentation of analysis and recommendations to address the day-to-day management of marketing operations.  

Students will work in teams to address a marketing problem provided by a sponsoring Chicago-based company. This problem will require students to use available secondary data to analyze the current market situation and analyze and interpret primary data necessary to make decisions.  

Offered every Winter.  
(8 quarter hours)  
Acceptance into the IME program is a prerequisite for this class.

**MKT 358**  
**MARKETING IN A GLOBAL ENVIRONMENT**  
*Undergraduate*  
This final course in the IME sequence provides a strategic perspective for marketing management in a global environment. The course will address company organization, industry structure, firm's competitiveness, marketing activities, and market-entry strategies. Course milestones will address the issues and decisions normally associated with international market expansion. The course is a hands-on learning experience for the student/team through the introduction and interaction with a Chicago-based company currently involved in international business.  

Offered every Spring.  
Acceptance into the IME program is a prerequisite for this class.

**MKT 359**  
**ADVANCED MARKETING MANAGEMENT**  
*Undergraduate*  
This course will familiarize students with the role of the marketing manager in charting the direction of a business, and formulating strategies to create or sustain competitive advantage. It provides knowledge and skills to help students identify, analyze, and address marketing problems and opportunities, and enable them to make effective business decisions.  

MKT 301 is a prerequisite for this class.
MKT 360
INTERNATIONAL MARKETING
Undergraduate
The course is designed to provide students with an understanding of international marketing within a global framework. The course focuses on marketing concepts, theories, and principles applicable to international marketing management. The course is structured to examine the environmental factors (political, economic, cultural, and demographics) that drive host-country governments' goals and objectives that affect firms and industries operating in developed and emerging markets of the world. Emphasis is placed on marketing strategies to emerging economies in different regions of the world and to how to start, develop and become a truly global marketing force today.

MKT 310 is a prerequisite for this class.

MKT 376
EFFECTIVE BUSINESS COMMUNICATION
Undergraduate
This fast-paced class teaches participants the essential corporate communication skills needed for leadership success. Modern business practices and psychology form the foundation of this professional workshop-style course. Skills taught include: Business presentations, email and brief writing, business and social networking, designing effective PowerPoint presentations, persuasion strategies, managing conflict with authority, controlling anxiety and managing shyness. Activities take place in the classroom and via distance learning.

MKT 377
SALES FUNDAMENTALS
Undergraduate
In the current business environment, companies are focusing their efforts on recruiting well-trained and refined sales professionals to generate substantial revenue. This course is designed to expose students to the energy, decorum, techniques and methods of superior selling sought after by companies. Coursework examines networking techniques and ways to identify high-potential opportunities. Students are given the opportunity to implement learned techniques through real world selling.

MKT 301 is a prerequisite for this class.

MKT 378
SALES STRATEGY & TECHNOLOGY
Undergraduate
The key to the development of superior customer sales strategy is detailed intelligence. This course investigates sources of customer data, the state of data management technology and the contribution that current and accurate customer information can make in establishing sales strategy. Upon completion of this course, students have acquired significant skill in using a number of technologies to support the development of sales strategy.

MKT 301 is a prerequisite for this class.

MKT 380
SCIENCE OF RETAILING
Undergraduate
In this course students are introduced to a variety of retail business models. Students will learn about collaboration between channel partners, the data that drives the retail industry, and the value of a career in retail management. They will also learn the importance of a consumer centric focus to drive the category and store management process. This course provides students with the perspective that often leads to securing summer internships with our category management partners. (This is the first of three courses in Category Management which will prepare you for significant employment opportunities)

MKT 301 is a prerequisite for this class.

MKT 381
BUILDING FINANCIAL RELATIONSHIPS
Undergraduate
Students learn the basic financial products and services that help clients achieve their financial goals and will gain a basic understanding of financial planning. More importantly, students learn how to identify prospects, uncover client financial needs, help clients achieve their financial goals and build the trusted relationships that lead to turning a prospect into a customer and a customer into a lifelong client. The course includes guest speakers, role playing, presentations and the development of a personal financial plan for each student.

MKT 377 is a prerequisite for this class.
MKT 382
PRINCIPLES OF CATEGORY MANAGEMENT
Undergraduate
In this course students will learn the principles that govern category management. Our business partners, such as Walmart, Walgreens, 7-Eleven, Pepsi, Red Bull, Miller Coors and many others, provide students with challenging business environments in which to learn. Our students develop work ready skills while identifying business opportunities for our partners. While collaborating in the category management process our students gain significant exposure to our business partners usually leading to employment opportunities. (This is the second of three courses in the Category Management Track which will prepare you for significant employment opportunities)

MKT 301 is a prerequisite for this class.

MKT 383
ANALYTICAL SALES
Undergraduate
The Analytical Sales course is a strategic sales course which emphasizes the psychology of selling in complex selling situations, identifying the decision maker among multiple contacts, quantifying the value proposition to the customer, and presenting a compelling sales proposal. Business activities are focused on identifying customer needs and values (tangible, intangible, behavioral) and delivering products and services to increase customer profit margins, cash flow, or the efficiency of the customer’s business. Goals are achieved by use of mathematical analytical techniques, understanding of emotional drivers, and utilization of behavioral influence techniques in a research based selling model.

MKT 301 is a prerequisite for this class.

MKT 384
CASES IN CATEGORY MANAGEMENT
Undergraduate
In this course students hone their category management skill while solving a relevant business problem confronting the Center for Sales Leadership's corporate partners. This course affords our students with an opportunity to demonstrate what they have learned in their coursework and internships in our corporate partners, all of whom are looking for category management talent. The development of these case solutions provides students with interaction with partner employees, and ultimately a unique perspective about a career in category management. This is the third class in the Category Management Track and represents a unique learning experience for both our students and our business partners.

MKT 380 and MKT 382 are prerequisites for this class.

MKT 385
INSIDE SALES
Undergraduate
This course in professional selling introduces students to the dynamics of inside sales through the lens of professional and collegiate sports. The essentials of effective selling are reinforced through experiential learning projects (varies by quarter) with leading Chicago sports and business organizations, providing students up to four weeks of practical, hands-on selling experiences. Past sales projects have been with the Chicago Blackhawks, White Sox, and Wolves. Course topics include understanding the sales process, handling objections, finding solutions, building customer relationships, utilizing improv/adaptive selling approaches, leveraging sales technology, and understanding the context of different sales in the sports as well as business environments. Space is limited each quarter, instructor permission required.

MKT 301 is a prerequisite for this class.

MKT 386
SOCIAL IMPACT SALES
Undergraduate
The ability to understand and conduct business in a socially responsible manner in today's economy is not only desirable, but mandatory in an increasingly competitive environment. Further, some non-profits seek to solve a social problem by using traditional business methods, including the selling of goods or services. This course engages a non-profit to provide them with a long term sales strategy. Students develop a sales and marketing plan that ultimately benefits a social good. This plan is evaluated by for and non-profit executives, as well as, DePaul Faculty.

MKT 301 is a prerequisite for this class.
MKT 390
SERVICE MARKETING
Undergraduate
Services comprise two thirds of U.S. Gross Domestic Product. This course will explore the identifying characteristics of service marketing as compared and contrasted with product marketing. The conceptual differences in marketing of intangibles vs. tangible offerings to the market will be emphasized. The course will consist of lecture, discussion, readings and cases.

MKT 393
MARKETING INTERNSHIP
Undergraduate
Marketing Internships give students an opportunity to look at a work situation through the eyes of a professional marketer and to study an organization's marketing operations first-hand. The course is an excellent way to examine your career path, build your portfolio, and enhance your network. Course meetings will take place during the 2nd and 5th weeks of the quarter. The internship experience must be a minimum of ten hours/week for the full ten weeks of the quarter. The Marketing Internship office can work with you to help you find a placement, or, you can secure an internship on your own and apply to enroll in the course during the quarter in which you are interning. The position must be approved by the Internship Coordinator and enrolling in MKT 393 requires the approval of the faculty member. IME Marketing majors are required to complete one quarter of internship credit or the equivalent. International students may use MKT 393 for CPT credit. The work MUST be done during the time that the student is receiving credit. MKT 393 fulfills the Junior Year Experiential Learning requirement.

MKT 395
INTERACTIVE/INTERNET MARKETING
Undergraduate
The course provides an introduction to Interactive/Internet marketing methods and high-level insight into the technology challenges of interactive marketing. Business to Consumer examples and strategies will be explored in a variety of vertical markets (e.g. financial services, technology, retail, catalog, manufacturing, health care, hospitality and entertainment). Integration with other marketing channels will be discussed. Global, privacy (including legislation challenges) and ethical issues will be introduced. Format will include lecture, guest speakers from the industry, Web browsing, quizzes, analysis and strong emphasis on discussion. A web integrated marketing strategy paper will be developed incorporating all concepts and experiences.

MKT 398
SPECIAL TOPICS
Undergraduate
Content and format of these courses are variable. An in-depth study of current issues in marketing. Subject matter will be indicated in class schedule. The Marketing department offers special topics in a variety of areas. Students may take more than one special topics course as an elective.

MKT 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in marketing. (variable credit)

MKT 525
MARKET RESEARCH
Graduate
This course provides an overview of the nature of marketing research and its role in decision-making with the organization. Specifically the students will concentrate their efforts on understanding the process of research design and implementation. Offered every quarter.

GSB 420 and MKT 555 are prerequisites for this class.

MKT 526
ADVANCED MARKET RESEARCH
Graduate
Those students interested in more extensive marketing research experience should enroll in this course. The student will begin with a data set and work closely with the instructor in performing multivariate data analysis and developing a format for presentation of results.

MKT 525 is a prerequisite for this class.
**MKT 528**
**QUALITATIVE RESEARCH**
**Graduate**
Qualitative Research Methods will explore non-survey and non-experimental techniques useful in researching issues with marketing implications. Lectures and reading assignments will be punctuated with experimental exercises, videotapes, and student presentations. Topics will include question design, content analysis, and unstructured or simple observation. Projective techniques and other indirect methods, in-depth/in-person interviews, and focus group sessions. Offered variably.

MKT 525 and MKT 545 are prerequisites for this class.

**MKT 529**
**PRECISION MARKETING**
**Graduate**
The ever increasing amount of data about consumers and transactions allows marketers to better understand who their customers are and what they are buying. This course explores a wide variety of data sources and how they are used in marketing, with a special emphasis on segmentation, targeting and positioning. Offered winter quarter.

MKT 555 is a prerequisite for this class.

**MKT 530**
**CUSTOMER RELATIONSHIP MANAGEMENT**
**Graduate**
Students are introduced to a new strategy methodology, CRM, which is currently being adopted by many organizations in efforts to enhance their competitive advantage. Focus is placed on understanding how an enhanced customer relationship environment can differentiate an organization in a highly competitive marketplace. Both the business and consumer markets are examined in multiple vertical markets. New technology demonstrations and their impact will be discussed. Guest speakers provide current best-practice methods. Topics included: Case analysis and projects make up the course assignments.

MKT 555 is a prerequisite for this class.

**MKT 534**
**ANALYTICAL TOOLS FOR MARKETERS**
**Graduate**
This course seeks to provide an in-depth understanding of both qualitative and quantitative analytical tools that are of critical importance to marketers. These tools will help marketers avoid head-to-head competition, understand customer perceptions, understand customer preferences, develop accurate sales forecasts, and financially value marketing strategies. The course is designed to be "hands-on" in that students will develop understanding mainly through conducting application projects and presenting results. The course is also designed to be immediately applicable to marketers' current and future jobs.

MKT 555 is a prerequisite for this class.

**MKT 535**
**MARKETING STRATEGIES AND PLANNING**
**Graduate**
The basic elements of planning including the identification of the company's basic purpose and mission and their translation into specific objectives. Strategies to accomplish objectives are fused from marketing, financial, and manufacturing elements but emphasizing marketing elements. This course focuses on the contribution of marketing to the establishment of company policies, objectives, and marketing planning.

MKT 555 is a prerequisite for this class.

**MKT 536**
**PRICING STRATEGY**
**Graduate**
Managing pricing effectively affects a company's growth and profitability more directly and quickly than any other strategic decision. This course explores methods of analyzing pricing decisions, influencing customers' price perceptions, managing sales promotions and negotiations, and forecasting industry price trends. Pricing decisions for both new product introductions and mature product profit management are addressed. Students will discover best practices in pricing decision making at the industry, market, and transactional level.

MKT 555 is a prerequisite for this class.
MKT 537
NEW PRODUCT MANAGEMENT
Graduate
The course has four objectives: first, to familiarize participants with how firms manage the conceptualization, development and launch of new products and services; second, to develop a systematic process for new product development that matches the existing business context; third, to give participants knowledge of some useful and immediately applicable tools that will enable them to participate and lead a team that effectively translates a firm's strategy and customer needs into successful products and services; and finally, help participants understand the impact of company dynamics in affecting the new product development process.

MKT 525 is a prerequisite for this class.

MKT 540
STRATEGIC PLANNING: DEVELOPING SUSTAINABLE BUSINESS MODELS
Graduate
In today's hyper-competitive business environment, firms find it increasingly difficult to generate sustainable revenue growth. This course uses an organic-growth, marketing-based, customer-driven approach for developing sustainable year-on-year revenue growth. Linkages are created between existing benefits-based customer segmentation strategies, changing customer needs, the choice of a firm's or a business unit's product/service-line positioning strategy, its chosen business model, and finally its performance. Topics covered include: - Outcomes-based segmentation- Price-performance curves- Market-leader positioning approaches- Business model visualization and representation- Dynamic positioning, product-line and business unit adaptation- Value migration and threats to sustainabilityBy the end of the course, students will know how to detect signals of change in customer needs and adapt their business models resulting in sustainability. This is a case-based course with a project deliverable due at the end of the course.

MKT 555 is a prerequisite for this class.

MKT 541
BRAND MANAGEMENT
Graduate
Brand management is an important component of both consumer and business marketing. The course addresses important branding decisions faced by an organization, particularly the role of brands in strategy. Learning objectives are (1) to increase understanding of the important issues in planning and evaluating brand strategies; (2) to provide the appropriate theories, models, and other tools to make better branding decisions; (3) to understand how marketing mix variables can affect brand equity over time; (4) to understand how to build and maintain brand equity; (5) to understand how to adapt brand strategies and tactics to optimize marketplace success.

MKT 555 is a prerequisite for this class.

MKT 542
BRAND CULTURE
Graduate
Brands are complex socio-cultural entities. They occupy a unique position in modern culture and consumers are increasingly playing a more prominent role in the legacies of brands. Despite these realities, the complex relationship between brands, consumers and culture has typically been ignored. This seminar class will explore the culture of brands, focusing on what consumers do with and to brands instead of what brands do to consumers. Readings will come from a variety of perspectives, including both practitioner and academic sources. Topics covered will include: Sociological aspects of consumers and their brands, brands and status systems, brand and consumption communities, and consumer created marketing content. This class is designed to give you an advantage in being the best brand manager. It will stress critical thinking, creativity, synthesis and application of the newest insights concerning brands. Students will emerge with a better understanding of how to engage in the practice of cultural branding.

MKT 555 is a prerequisite for this class.

MKT 545
CONSUMER BEHAVIOR
Graduate
Required for Marketing concentration. A review of the various theories, models, and techniques that attempt to explain consumer behavior. The course consists of lecture-discussions of behavioral theories, the empirical findings of contemporary research, and case studies designed to illustrate the salient issues involved in developing consumer-oriented marketing strategies.

MKT 555 is a prerequisite for this class.
The marketing of business goods and services to other businesses (B:B) is more significant in our economy than consumer marketing and is the key to the continued success and productivity of the U.S. economy. In this course, the principles and practices of inter-industry marketing will be explored by case analysis. The factors which must be considered before establishing marketing programs manufacturers, service industries and exporters will be examined. Examples will be drawn from varied industries, including equipment, electronics, computer systems, health care and others. New product introduction, distribution, and other marketing strategies will be emphasized.

MKT 555 is a prerequisite for this class.

Students are provided with an overview of the marketing process for consumer-oriented firms. Focus is placed on decision-making that aligns a firm's market offerings with the wants and needs of targeted segments of customers within a continuously changing environment. Written cases/projects are part of the course assignment.

MKT 557 is a prerequisite for this class.

The course is structured to examine culture from two dimensions: a cross-cultural view, which compares local culture customs across various national marketing environments; and an intercultural approach where the focus is to exam the interaction between foreign firms and a host-country culture. Learning objectives:- Students will gain an understanding of cultural variables from a global perspective.- Students will gain the ability to compare and analyze national cultural similarities and differences across national, regional and global environments.- Students will gain the ability to recognize and analyze the interaction in marketing approaches between people and business groups who have different national/cultural backgrounds.

MKT 555 is a prerequisite for this class.

Emerging markets are quite different from the developed economies of the world. Today, firms from the West look for new market opportunities outside of the advanced economies of the world. They realize that their traditional markets are oversaturated, overly competitive and rapidly aging. They recognize that future opportunities for long-term sustainable growth will be found in emerging markets.

MKT 555 is a prerequisite for this class.

A study of the theories and techniques applicable to the development of the promotional mix. Class consists of analysis and development of objectives, budgets, message design and media selection, and measuring the effectiveness of these for mass design and direct promotional vehicles.

MKT 545 and MKT 555 are prerequisites for this class.
MKT 576
EFFECTIVE BUSINESS COMMUNICATION
Graduate
This course is designed to expand the participant's communication skills through application of the principles of communication science and the psychology of persuasion in a contemporary business setting. Personal ethics and credibility are explored as important components of effective communication, both as individuals and as team members. Students are shown how to develop successful communication and message packaging strategies useful in a variety of communication venues including memos, meetings, briefings, interviews and individual and team presentations. Oral presentations and written communication techniques are explored including use of visuals, computer graphics, and layout techniques. The mechanisms of Speech Apprehension (stage fright) are presented as well as techniques for management and reduction of this common, debilitating phenomenon. Personal ethics and credibility are explored as important components of effective communication.

MKT 577
LEADING BUSINESS DEVELOPMENT
Graduate
This is a course designed for managers or future team leaders seeking to maximize their resources to achieve sound business results for their organizations and customers. Utilizing current practices, processes, and proven in-market techniques, students will learn to create and maintain a customer team that achieves results with the internal as well as external customer. Emphasis will be placed on: Team Leadership Skills, Profiling and Segmenting Customers, Managing Team Performance, Developing Business Plans and Relationships, internally and externally.

MKT 578
SALES STRATEGY & TECHNOLOGY
Graduate
Students taking this course will be provided with a comprehensive understanding of sales strategy and an appreciation of sales technology used today to optimally organize and deploy sales resources. At the heart of this course is an introduction to the principles of customer relationship marketing and customer acquisition programming. Students will learn via lecture, text, guest lectures, exposure to the latest technological tools and current case study. This course will benefit participants by providing a true perspective as to what role sales plays today and will play in the future of customer-centric organizations.

MKT 555 is a prerequisite for this class.

MKT 582
CATEGORY MANAGEMENT
Graduate
Category management is the practice of managing a group of products as one entity, or category to maximize the return for a particular retailer, as it relates to shelf inventory, shelf position, consumer shopping patterns and promotion. The course provides the analytical framework necessary to conduct a category review and make strategic recommendations to both manufacturers and retailers. The Department of Marketing partners with a number of major consumer packaged goods (CPG) manufacturers and retailers who provide data for analysis. In addition to working on real data, students learn how to use advanced software such as Nielsen's Category Business Planner, Homescan, InfiNet and Spaceman.

MKT 555 is a prerequisite for this class.

MKT 583
MONETIZING MARKETING STRATEGY
Graduate
The goal of every business strategy is to create profitable customers by delivering superior value. The way in which that strategy is monetized in the implementation process is critical to the success of the venture. The key focus of the course will be the development of useful processes and metrics through the marketing and selling activities to deliver customer and corporate value which will allow managers to monitor and measure individual corporate performance. Student learning will be assessed by a combination of class participation, weekly assignments, examinations, and team performance on final written proposals and presentations.

MKT 555 is a prerequisite for this class.
MKT 590
SERVICES MARKETING
Graduate
This course examines service organizations' distinctive approach to marketing strategy development and execution. Differences and similarities between the marketing of services and that of manufactured goods will be discussed. Other topics include measurement of quality and customer satisfaction, customer behavior and expectations, roles of service providers and customers, service competitive advantages, relationship management, overlap of service marketing with other organizational disciplines (e.g. H.R., operations, finance), organization design and value-chain impacts, outsourcing challenges and opportunities, global issues, macro environmental impacts, Business to Business and Business to Consumer examples and strategies in multiple vertical markets (e.g. financial services, technology, retail catalog, manufacturing, health care, hospitality and entertainment, automotive, government). Student groups will maintain service encounter journals which will be used as input to the group's analysis paper assignment. Two abbreviated exams will measure the student's grasp of service marketing concepts. Group case analysis work will reinforce the course concepts.

MKT 555 is a prerequisite for this class.

MKT 595
INTERNET AND INTERACTIVE MARKETING
Graduate
Explores the emerging business models, rules, tactics, and strategies associated with this medium. Integration with other channels and marketing operations is stressed. Classes are discussion-based, drawing on current applied readings and cases from a variety of industries in both the business-to-business and business-consumer markets.

MKT 555 is a prerequisite for this class.

MKT 793
MARKETING INTERNSHIP
Graduate
Internships provide an opportunity to obtain valuable professional experience and contacts in many areas of marketing e.g. advertising agencies, manufacturing, services, public relations agencies, and communications. The Department's internship coordinator will work with each student to obtain placement, if needed. Student will work for and study the marketing operations of the organization. Marketing internship may be taken, with approval of the coordinator, any quarter.

MKT 798
SPECIAL TOPICS
Graduate
Content and format of this course is variable. An in-depth study of current issues in marketing.

MKT 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in marketing.

MLS 401
VISIONS OF THE SELF
Graduate
A study of the differing visions of the self as presented in significant documents from the history of ideas. Materials selected from classic texts of literature, philosophy, theology, psychology and social science.

MLS 402
PERCEPTIONS OF REALITY
Graduate
A survey, beginning with ancient Greece and ending with the modern world, of models of universal order as developed by natural scientists and literary and visual artists.
MLS 403  
THE AMERICAN EXPERIENCE  
Graduate  
A chronological and thematic study of the location of self within American culture. Readings chosen to reflect both dominant and dissenting ideas at specific points of American history.

MLS 404  
THE CITY  
Graduate  
A topical examination of the urban experience using the methods and sources of both historians and social scientists. Topics include surveys of various images of the city, utopian and dystopian visions, and the uniqueness of the modern city.

MLS 405  
REPRESENTATIONS OF THE BODY  
Graduate  
This course will examine how the human body, which seems to be a natural, universal fact, is also a deeply cultural symbolic construction whose analysis yields insights into structures of power and consciousness.

MLS 406  
EXPLORING OTHER CULTURES  
Graduate  
Examination of the history, traditions, values and institutions that have shaped the lives of people in another culture. Analysis of the "terms of encounter," that is, the perspectives that students assume as they seek to encounter the "other." Variable topics.

MLS 407  
SELF,CULTURE AND SOCIETY IN CONTEMPORARY JAPAN  
Graduate  
Interdisciplinary examination of the political, economic and social order of contemporary Japan. Relationship of individuals and groups to the social order, as they create the reality of diversity and possibilities for change.

MLS 409  
ENVIRONMENT AND SOCIETY  
Graduate  
"Environment and Society" is a 400-level interdisciplinary core course on the environment. The course might include such topics as cultural diversity in time and place with regard to the human view of the natural world, various approaches to environmental ethics, philosophical and religious influence in conceptions of the earth as environment, the relationship between scientific measurement and the social constructions of the natural world, the science and politics of climate change, race and gender considerations in environmental politics, and environmental consciousness in literature and the arts. The instructor's own disciplinary interests will play a prominent role in the course construction, but the course will draw from the sciences, the social sciences and the humanities. As in all MLS courses, the instructor will use the course assignments to work with students on enhancing graduate-level intellectual skills through reflexive pedagogy.

MLS 419  
CHICAGO: THE 21ST CENTURY  
Graduate  
Chicago: Towards The 21st Century.

MLS 427  
TOPICS IN COMMUNICATION AND CULTURE  
Graduate  
Variable topics relating to cross-cultural communication, culture and media, cultural difference in communication, and communication issues in multiculturalism. Consult current course schedule for topic.
MLS 428
TOPICS IN ORGANIZATIONAL COMMUNICATION
Graduate
Variable topics relating to communication issues in organizational settings, including power, institutional culture and change, training, and multicultural factors. Consult current course schedule for topic.

MLS 440
FEMINIST THEORIES
Graduate
A discussion and assessment of the various theories concerning the place of women in society, including theories that have advocated a more positive role for and valuation of women than those of the dominant society. The course will take both an historical and a topical approach. Cross-listed as WGS 300 and WGS 400.

MLS 441
WOMEN ACROSS CULTURES
Graduate
A critical analysis of the roles of women in societies around the world, with special emphasis on economics, politics, and culture. Focus is on African, Asian and Latin American cultures and non-dominant groups within Western Societies. Topics vary each quarter.

MLS 442
ETHICS AND THE ECONOMY
Graduate
This course will present the thinking of social scientists, philosophers and theologians on the impact of religious values on the origin and development of American capitalism, and their possible relevance to contemporary discussions of business ethics. Cross-listed as GSB 650.

MLS 443
WORK, LEISURE AND THE QUALITY OF LIFE
Graduate
The course examines the nature and meaning of work and leisure in Western culture, and the relationship of work and leisure to contemporary issues associated with the concept "Quality of Life". Cross-listed as SOC 475.

MLS 445
GENDER AND COMMUNICATION
Graduate
A review of the differences in communication patterns between women and men. Topics covered include language and language usage differences, interaction patterns, and perceptions of the sexes generated through language and communication.

MLS 447
GENDER AND SOCIETY
Graduate
Attention to the growing literature and empirical research on changing patterns in economic, psychological and social outcomes for women and men. Consideration of various theories of gender differentiation and inequality.

MLS 448
WORK AND LEISURE IN THE FUTURE
Graduate
The latter half of the 20th century has seen great change in the meaning, form and value assigned to work and leisure in society. Many of these changes have come to be characterized as inevitable consequences of life in post-industrial society. This course: 1) seeks to identify the factors that are shaping the future of work and leisure and 2) will explore futuristic scenarios that challenge the position of "work as a central-life meaning."

MLS 449
TOPICS IN NON-FICTION WRITING
Graduate
Topics addressed in different versions of the course may include writing for magazines, science writing, travel writing, writing in humanities and social science research, etc. Consult current course schedule for topics.
MLS 450
CHICAGO: ARCHITECTURE & URBAN DEVELOPMENT
Graduate
A study of urban architecture in Chicago from 1833 to 1984, including the role of planning, the purpose of open space, the place of tradition, the impact of modern design theories and evaluation of contemporary developments.

MLS 451
TOPICS IN AMERICAN POLITICS
Graduate
Topics In American Politics

MLS 452
BUSINESS, SOCIETY AND SUSTAINABLE DEVELOPMENT
Graduate
A study of the basic ideas, aspirations and values which shape personal, social, cultural, economic and environmental systems. We will identify and critique the organizational systems serving society's needs today; specifically how they contribute to---or detract from-- the goals of Sustainable Development, and to identify points of intervention for systemic change.

MLS 453
POLITICS, MEDIA AND EVERYDAY LIFE
Graduate
An examination of various ways in which the mass media influence our perceptions of reality. Political, social and cultural implications of media processes are assessed. Cross-listed as PSC 321.

MLS 455
COMMUNITY AND THE CITY
Graduate
The course explores the possibilities for community life within urban settings. It emphasizes the development of network relations and cross-cutting ties.

MLS 456
THE USES OF AUTOBIOGRAPHY
Graduate
Study of selected autobiographical writings to serve as models for self-expression.

MLS 458
ISLAM AND THE WEST IN THE MODERN WORLD
Graduate
An examination of the economic, cultural and political interactions of Europe and the Islamic World.

MLS 459
WRITING IN THE PROFESSIONS
Graduate
Improves writing skills useful in semi- and non-technical professions; emphasis on style, tone, awareness of purpose and audience; effective memo, proposal and report design.

MLS 460
THE DILEMMA OF THE MODERN AGE
Graduate
The crisis of the individual's place in society is exposed through social sciences, philosophy, literature, art and music. The distinctive features of and responses to modern culture-individualism, alienation and depersonalization-are illuminated through multiple perspectives.
MLS 461
MODERN POETRY
Graduate

MLS 462
TOPICS IN BUSINESS ETHICS
Graduate
Seminar In Business Ethics. Cross-listed as PHL 640 and GSB 640.

MLS 463
NATIONALISM AND INTERNATIONAL CONFLICT
Graduate
This course will explore the social origins and development of national identities. How these identities have been manipulated to serve specific competitive interests in the past two hundred years will also be discussed. Cross-listed as PSC 342 & INT 365.

MLS 464
THE CULTURE OF AMERICAN CATHOLICS
Graduate
How has the unique experience of immigration shaped the American Catholic Church from the colonial period to the 21st century? How did the idea of "the Church" as an authoritative hierarchy come about in the mid-20th century, and how has that notion been challenged by immigrant communities, as well as artists and intellectuals? Drawing on the disciplines of history, sociology, anthropology, cultural theory, literature and the arts, this course looks at those who built the Church and those who challenged and changed it. Cross-listed as REL 384 and CTH 384.

MLS 467
SELECTED TOPICS ON WOMEN IN LITERATURE
Graduate
Topics vary; see schedule for current offering.

MLS 468
SELECTED TOPICS: WOMEN, SELF AND SOCIETY
Graduate
Topics vary; see schedule for current offerings.

MLS 473
TOPICS IN LITERATURE
Graduate
Topics addressed in different versions of the course may include various themes, movements and genres in British, American and World Literature. Consult current course schedule for topic.

MLS 474
WOMEN AND ART
Graduate
Examines the work of the most significant women artists from the Renaissance to the present. It will also investigate how women have been represented in Western art by both male and female artists. Cross-listed as HAA 366.

MLS 475
TOPICS IN CONTEMPORARY FILM
Graduate
An examination of recent films and their relation to broader tendencies in contemporary culture. Topics vary, see schedule for current offerings.
MLS 476
CHICAGO IN FICTION AND FILM
Graduate
This course examines novels and short stories written by Chicagoans during the 20th century. It also includes a few film adaptations of these works.

MLS 477
FEMINIST ETHICS
Graduate
Critiques of mainstream empirical and philosophical works and of Carol Gilligan's work on ethics will include discussions on the women's voice in morality, the nature of theories by women vs. men, the formation of plural positions concerning care versus justice, and alternative ethical stances. Cross-listed as WGS 310/410 and REL 322.

MLS 478
THE PSYCHOLOGY OF WOMEN
Graduate
A review of research and theory on women including sexist biases and methodology, feminist therapy, violence against women, and gender differences in the development of power and sexuality. Cross-listed as PSY 561 and WGS 470.

MLS 479
WRITING POETRY
Graduate
Writing Poetry. Cross-listed as ENG 493.

MLS 480
MAJOR AUTHORS
Graduate
An examination of major writers in the English and American literary traditions. Topics vary; see schedule for current offerings.

MLS 481
SPECIAL TOPICS IN ART HISTORY
Graduate
Explorations in the history of art from ancient Egyptians to contemporary art. Topics vary.

MLS 482
ECOLOGY, SPIRITUALITY AND ETHICS
Graduate
This course explores the ecological crisis from a religious/ethical perspective, examining the dangers posed for humanity and the planet. It considers the new cosmology developing from science, especially physics, and its dialogue with philosophy, myth and religion. Cross-listed as REL 320.

MLS 483
CULTURAL PERSPECTIVES ON HEALTH AND DISEASE
Graduate
A multidisciplinary examination of the cultural factor that help form notions of the well and sick states of the human body. Included will be such topics as the social/religious history of epidemics, healing in Western and non-Western medicine, etc. Sources will be drawn from the history of medicine, anthropological and sociological works, philosophy and literature. Cross-listed as REL 320.

MLS 484
ZEN MIND
Graduate
This course examines the philosophy, art, literature and religious practice of Zen Buddhism. It explores Zen's influence in both Japan and America. Cross-listed as REL 342.
MLS 485
INEQUALITY IN AMERICA
Graduate
This course examines the nature and extent of inequality in American society and explores various psychological, political, social and economic theories which attempt to explain the existence of this phenomenon. Cross-listed as PSC 324.

MLS 486
TOPICS IN POPULAR CULTURE
Graduate
Examines a specific dimension of popular culture using interdisciplinary theories and methods. Possible topics include Food in Film, The Ideology of Romance, or perhaps the popular culture of a decade like the 1950s or 1960s. Topics vary.

MLS 487
SPECIAL TOPICS IN HISTORY
Graduate
Topics vary.

MLS 488
TOPICS IN WORLD RELIGIONS
Graduate
Topics in World Religions

MLS 489
TOPICS IN SOCIOLOGY
Graduate
Various topics in the field of sociology.

MLS 490
SPECIAL TOPICS AND CONTROVERSIES
Graduate
Occasional offerings of particular contemporary relevance by visiting professors. Topics vary.

MLS 497
INDEPENDENT STUDY [NON-CAPSTONE]
Graduate
Independent study in an area that does not lead directly into the thesis or capstone. Students may also register for this course on a topic indirectly related to their thesis or capstone if they will subsequently take MLS 498, in which the student directly prepares to write the Integrating Project/Thesis. The MALS and IDS Program requires that students taking independent studies follow a specified format of meeting frequency, activities, and scholarly production. This format is available on the program web site or from the MALS and IDS office. Registration is by permission of the Director of the MALS and IDS Program and the instructor of the independent study.

MLS 498
INDEPENDENT STUDY
Graduate
Independent study undertaken as preparation for thesis or practicum capstone options. This course is optional preparation for MLS 499, Capstone. The MALS and IDS Program requires that students taking this course follow a specified format of meeting frequency, that they produce a review of literature related to their thesis or practicum, an annotated bibliography, and the required Formal Proposal for the thesis or practicum. Registration is by permission of the Director of the MALS and IDS Program and the permission of the instructor who serves as the thesis or practicum director.
MLS 499
CAPSTONE
Graduate
Capstone for students doing a thesis, practicum or enhanced portfolio essay. Students may register for this course after the Formal Proposal for the thesis or practicum, or the Enhanced Portfolio Essay Proposal, has been approved. Students are normally expected to complete their capstone projects within the quarter in which they take this course. This course carries four hours of credit. Registration is by permission of the Director of the MALS and IDS Program and the permission of the instructor who serves as the student's capstone director.

MLS 500
CAPSTONE
Graduate
A seminar offered occasionally to guide groups of students working on their capstone projects.

MLS 501
ACTIVE STATUS
Graduate
Students register for this course during periods when they are not registered for courses but wish to have access to university facilities. Ordinarily students will not use this course once they have been admitted to candidacy during the thesis or capstone.

MLS 502
CANDIDACY CONTINUATION
Graduate
Students who have completed MLS 499 Thesis/Capstone may register for this course in order to have continued access to university facilities. Students may register for this course no more than three times. Non-credit.

MMT 401
FOUNDATIONS OF MATHEMATICAL THINKING AND LEARNING IN THE MIDDLE SCHOOL
Graduate
This course is designed to help participants construct meaningful connections between being a learner of mathematics (i.e., a person who can solve problems, reason mathematically, communicate findings and thinking, and make connections) and being a teacher of mathematics (i.e., a person who can help others understand, use, and apply mathematical ideas). The course will begin the process (which will be continued throughout the remainder of the Master of Arts in Middle School mathematics Education program) of having students explore the interplay between narratives describing their own classroom experiences as well as literature and research about others' experiences in order to analyze the impact of developmental and interpersonal experiences on the learning and teaching of mathematics.

MMT 410
THE DEVELOPMENT OF MIDDLE SCHOOL MATHEMATICS LEARNERS
Graduate
Critical to the success of middle school mathematics learners, is their teachers' understanding of the multiple perspectives that research has taught us, as educators, about how people learn. In this course, participants will engage with the history and evolution of how the fields of educational psychology, cognitive science, applied developmental psychology, and mathematics education have contributed to a modern understanding of what constitutes effective practice for middle school mathematics teaching. Major theoretical positions and their seminal architects will be highlighted, examined and discussed. A particular emphasis will be put on each position's impact on curriculum development and classroom pedagogy for middle school mathematics.

MMT 420
TEACHING, LEARNING, AND ASSESSMENT OF MIDDLE SCHOOL MATHEMATICS
Graduate
This course will examine, in the context of classroom practice, the following themes: 1) How students can learn mathematics with conceptual understanding; 2) How to teach mathematics so that students learn with understanding; 3) How to assess students' mathematical knowledge to inform instruction and determine their growth; 4) The nature and content of innovative curriculum projects designed to teach mathematics for conceptual understanding.
MMT 430
APPLIED PROJECT IN MATHEMATICS EDUCATION
Graduate
This course will span the three quarters of the second academic year of the program and will be partnered with the three content-focused courses offered during the second year. Participants will be introduced to the field of educational inquiry through a study of various designs and methods of doing educational research. In addition, this course will help participants consider current issues in mathematics education in relationship to their own teaching and learning of mathematics and what it means to transfer the mathematics learned in other courses into one's practice as a math teacher. They will identify concrete changes they want to implement in their teaching during the years following their completion of the program based on the new content and ideas to which they have been exposed. As part of the course, the teachers will design an action research project during the first quarter, implement the project during the second quarter, and analyze the data during the third quarter.

MOL 197
SPECIAL TOPICS IN MODERN LANGUAGES
Undergraduate
See schedule for current offerings.

MOL 198
STUDY ABROAD
Undergraduate
Variable credit.

MOL 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

MOL 210
CLASSICAL MYTHOLOGY
Undergraduate
This course is an interdisciplinary blend of the classical traditions of myth, literature and philosophy, concentrating on myth. It endeavors to place Classical literature into its historical, social and cultural contexts. Students will learn significant myths and the names and functions of the most important characters in them. They will investigate how the ancients used traditional narratives and images to explore, explain and experiment with ideas about themselves and their surroundings in those contexts. Learning about how myth is variously interpreted (as for example by means of theories of myth-interpretation) as well as basic methods of literary criticism (e.g., analysis of language, content, structure, etc.), students will employ ways to identify, understand and interpret the different types of communication present in myth-literature. As they move chronologically through the ancient world students will observe how myths change to reflect differing individual and collective concerns, as well as the specific interests (and so the significant aspects of discourse) of authors and audiences as conditions change. Students will also learn about literary genres, including poetry, tragedy and prose, their properties and distinctions and discover how genres also reflect audiences and times. Students will read and evaluate modern views of myth in order to understand how myth is open to multiple interpretations and upon what sounder bases myth is to be interpreted. While analyzing myths' diversity in various forms of literature, students will come to comprehend what mythology meant to the ancients, as well as those facets and ingredients of myth that are universal, enduring, and meaningful today.
MOL 211
ANCIENT GREEK AND ROMAN EPI C
Undergraduate
This course centers upon the Homeric Iliad and Odyssey and Vergil's Aeneid and endeavors to place these epic poems into their historical, social, and cultural contexts. Students will learn the definition of epic as a literary genre and discover how this genre evolved to reflect audiences and times. They will learn the components of epic language, in particular, literary devices and structural features (e.g., formulas, nested stories, epic similes). They will be able to describe the plots of the three epics and know the main- and mid-level human characters, gods, and goddesses. They will be able to define and better understand the meanings of "hero" and "heroism." Students will be able to express mature appreciation for the epics as whole works. Learning how the epics are variously interpreted as well as basic methods of literary criticism (e.g., analysis of language, content, structure, etc.), students will employ these as ways to understand and interpret the poems. As they read, learn and evaluate modern views of the epics, students will also acquire better means to distinguish critically between views and interpretations. A strong emphasis in this class will be upon the vital connections between past and present, and how students can become more aware of and understand important lasting concepts such as heroism, leadership, self-definition, etc. Finally, students will relate these stories to modern story-telling in order to understand how the heroes of the ancient Greeks live with us today. In short, they will interpret what epic poetry offered ancient listeners and what it has to teach modern readers. The classical tradition is rich with meaning and significance, even to modern 21st century adults and this class will not only be an exploration of the culture and instruction of the ancient world through epic, but an investigation of what classic motifs remain with us today.

MOL 212
ANCIENT GREEK AND ROMAN TRAGEDY
Undergraduate
Classical Tragedy introduces students to the authors, social contexts and performances of ancient Greek drama. Students will learn how to interpret the "myths" presented on the ancient Greek stage and how to apply what they have learned to detect and to interpret the moral, social and political issues raised in them. They will learn the names, works and careers of the principal tragedians: Aeschylus, Sophocles, and Euripides. Students will learn to assess the formal and aesthetic properties of the works of different tragedians. Emphasis will be given to specifics of performance and to seeing a play in the "theater of the mind" as well as gaining command of relevant terminology, e.g., parados, peripeteia, mimesis, catharsis, etc. Students will learn to outline the plot, argument and key themes of each work clearly and will gain an understanding of the historical context and social conditions motivating each work. The main themes of Greek tragedy (e.g., power, gender, justice, violence etc.) invite comparison to themes of contemporary theater and film. Students will acquire an awareness of ancient Greek tragedy in its connection with our own theatrical and literary culture, and they will reflect upon the influence of Greek drama on modern stage and literature. They will be able to employ several concepts in the analysis of Classical Tragedy.

MOL 213
ANCIENT GREEK AND ROMAN COMEDY
Undergraduate
In this course students encounter selected landmarks of Greek and Roman satirical literature; they learn important theories of interpretation, theories of humor as well as secondary interpretative opinions about the works assigned. They will be engaged in the course material primarily through readings, lectures and discussions. Students also view or read whole or selected excerpts of modern visual or written literature that will supplement their primary and secondary readings. The roots of comedy extend deep into antiquity. This course, however, endeavors to train intelligent critics of modern satire. Students study authors ancient and modern in order to sharpen their critical abilities and to gain insight into Athens, Rome as well as the contemporary cultural milieu. Students are challenged to regard satire as a critical force. Students encounter comic dramatists with special interest in how the most serious material--war, death, injustice, suffering--is criticized in a way that they can enjoy. With the help of comic theorists students will explore the boundaries of the comic, the social and political function of comedy in different cultural contexts, and the varieties of humor: mad, cathartic, aggressive, destructive, defensive, celebratory etc. Students will confront a host of related issues such as the nature of tragic pleasure, the language and metaphors of humor, and the legal limits of satirical discourse.

MOL 214
THE CLASSICAL FEMININE
Undergraduate
This course attempts to recover the experiences of women in ancient Greece and Rome by examining literary texts and archaeological remains that concern them. Students will investigate women's roles in public and private life and gauge the changes in their situation and representation over time. Given that Greece and Rome are commonly credited as the foundations of Western society, students will frequently discuss the similarities and differences between ancient and contemporary attitudes toward sex and gender. The task is challenged by the paucity of sources that were produced by the women of antiquity themselves; often our view is said to be "filtered through a male lens."
MOL 215
ANCIENT SCIENCE AND ITS LANGUAGE
Undergraduate
Students will study ancient science, its proponents and its epochs, later concentrating on the language of science. Students will learn successive highlights of inquiry within scientific culture, beginning in prehistory and ancient Egypt. As they proceed from Egypt through the ancient Greek enlightenment and onto Roman science and its decline, students will learn the basics of how representative thinkers evaluated and altered "contemporary" understanding. Students will witness firsthand the ever-changing perspective of scientific knowledge and compare it with modern empirical methodology. They will acquire an ability to interpret varying viewpoints of "science" through an overview of changes of perception combined with selected readings from the works of ancient philosophers, physicists and physicians. Students will also learn the composition of scientific terminology; they will learn how to analyze, dissect and compose scientific terms based upon the Classical languages of ancient Greece and Rome.

MOL 243
JAPANESE POETRY IN TRANSLATION
Undergraduate
Survey of Japanese poetry in English translation, with selections of representative authors from the Classical and Modern periods.

MOL 244
CLASSICAL CHINESE I
Undergraduate
Classical Chinese is predominantly a literary language, which has played a linguistically and culturally unifying role among the many vernacular languages of China. Permission of instructor, some Mandarin Chinese preferred.

MOL 245
CLASSICAL CHINESE II
Undergraduate
Classical Chinese is predominantly a literary language, which has played a linguistically and culturally unifying role among the many vernacular languages of China. MOL 244 or equivalent recommended.

MOL 246
CLASSICAL CHINESE III
Undergraduate
Classical Chinese is predominantly a literary language, which has played a linguistically and culturally unifying role among the many vernacular languages of China. MOL 245 or equivalent recommended.

MOL 247
CHINA AND SOCIAL MEDIA
Undergraduate
This course is designed to discuss various China-related social issues reported on Chinese and American social media. Students are required to read select materials about China from both American social media and the translated version of Chinese social media and participate in active class discussions on the readings. The materials aim to help students understand how and why salient social issues in China are reported divergently on state-run as compared to unofficial social media in China as well as on social media based in China as compared to those based in the U.S. Students will learn to use the knowledge of Chinese philosophy, history, contemporary political and economic contexts, censorship and journalism to understand what shapes Chinese media reports.

MOL 248
CHINESE CALLIGRAPHY
Undergraduate
An introduction to the art of Chinese calligraphy. Hands-on practice as well as history and theory of the art. This course is open to students with no background in Chinese calligraphy, language, literature, or culture.

MOL 249
MODERN CHINESE LANGUAGE AND SOCIETY
Undergraduate
This course will explore facets of Modern China, with special attention to how language and culture intertwine.
MOL 250
CHINESE CINEMA -- A WINDOW ON CHINA
Undergraduate
This course studies Chinese cinema, the visualized artistic reflection of Chinese society, ideology, and culture from four perspectives: Historical, directorial, thematic, and artistic. It will cover the history of Chinese cinema, from the birth of the first Chinese film through the Silent Age, 1st Golden Age, 2nd Golden Age, Pre- and-Post-War Era, Pre- and-Post "Cultural Revolution" Period, and the Fifth Generation up to the emerging Sixth generation and beyond. Through substantial exposure and analysis of selected movie classics and subsequent classroom discussions, students will be well informed about the major developments and trends of each period in the history of Chinese cinema. Students will also explore the historical backgrounds, artistic characteristics, and key directors and stars of important Chinese movies as well as cinematic terminologies, the formation of Chinese cinematic theories, and innovative cinematic techniques.

MOL 260
EAT ITALY: THE HISTORY, CULTURE AND POLITICS OF ITALIAN FOOD
Undergraduate
In this course students will look at the modern and contemporary history of Italian food in Italy and the United States to explore and reflect on the material, symbolic, personal, and political implications of this global commodity. Through a variety of primary sources both textual and visual and multidisciplinary critical sources, students will discuss the symbolic and material forces that shaped food choices; the production, marketing, preparation, and consumption of meals; and the access to food from Italy's Unification to the present. Weekly topics will span from cinema's most memorable Italian meals to ethnographic studies of everyday meals in twenty-first century Italian families; from the success of Pellegrino Artusi's cookbook to the star system of Italian-American celebrity chefs to Italian-American culinary literature. The course will conclude with a small-group practicum in which students will document and reflect upon their own process in preparing and eating an Italian meal.

MOL 277
TURN OF THE CENTURY VIENNA
Undergraduate
This course will explore a number of the prominent players who were active in Vienna during the turn of the century, such as Sigmund Freud, Gustav Klimt, Arthur Schnitzler, Ludwig Wittgenstein, and Gustav Mahler. Students will examine, through primary and secondary texts, and works of art, music and film, the lasting impact of their contributions on the development of thinking and innovation in the twentieth, and indeed even twenty-first, centuries.

MOL 282
MODERN AFRICAN LITERATURE
Undergraduate
Themes and theories of postcolonial studies in relation to African culture, politics and literature. Evaluation of novels, criticism, and movies to provide an introduction to the complex, highly heterogeneous experience of modern African literature.

MOL 297
SPECIAL TOPICS IN MODERN LANGUAGES
Undergraduate
See schedule for current offerings.

MOL 298
STUDY ABROAD
Undergraduate
Variable credit.

MOL 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

MOL 300
PROFESSIONAL PRACTICUM
Undergraduate
Supervised experience in teaching, tutoring, interpreting, editing, writing or other professional exercises of language skills.
MOL 306
WARRIORS, WITCHES, FIREBIRDS AND VAMPIRES: INTRODUCTION TO RUSSIAN FOLKLORE
Undergraduate
This course will introduce students to the rich and dynamic body of Russian folk texts and belief. Course readings will include epic poems, skazki (fairy tales), ballads, legends, incantations, and elements of popular culture. Students will learn and apply contemporary theories of folklore and traditional folk belief. The course will touch on the role of Russian folklore themes in literature and film. Emphasis on primary source materials with supplemental theory and history. Discussions in English. Readings in English. Cross-listed with RUS 306.

MOL 307
TOPICS IN CHINESE LITERATURE
Undergraduate
This course provides an introduction to the history, art and interpretation of classical and modern Chinese literature. Since all readings are in English, students will also explore ways of inter-media re-writing of Chinese literature in the age of globalization.

MOL 308
TOPICS IN JAPANESE LITERATURE
Undergraduate
Variable topics. Taught in English. Consult schedule for current offering.

MOL 309
THE NOVELIST'S WORLD
Undergraduate
Variable topics.

MOL 310
JAPANESE CULTURE
Undergraduate
Japanese Culture is a cross-cultural and interdisciplinary exploration of Japanese culture, especially as regards cultural figures such as "geisha," "samurai," and "Hello Kitty." These figures intersect with various critical discourses on gender, sexuality, nationalism, exoticism, orientalism, modernity, tradition, art, and aesthetics. They have also generated both praise and criticism. These questions are not only specific to the cultural figures as listed above but also run deep in society. The course will also examine other historical and ideological constructions in Japan and the West, especially in the United States.

MOL 311
TOPICS IN FRENCH LITERATURE
Undergraduate
Masterpieces, themes and genres of French literature from its origins to the present day.

MOL 312
TOPICS IN GERMAN LITERATURE
Undergraduate
Masterpieces, themes and genres of German literature from its origins to the present day.

MOL 313
TOPICS IN ITALIAN LITERATURE
Undergraduate
Masterpieces, themes and genres of Italian literature from its origins to the present day.

MOL 314
TOPICS IN RUSSIAN LITERATURE
Undergraduate
Masterpieces, themes and genres of Russian literature from its origins to the present day.
MOL 315
TOPICS IN HISPANIC LITERATURE
Undergraduate
Masterpieces, themes and genres of Hispanic literature from its origins to the present day.

MOL 316
RUSSIAN NOVEL
Undergraduate
The course will allow students to read and analyze novels from important Russian authors such as Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, as well as others. Students will write essays and participate in individual and group projects in the format of Round-Table discussion. Cross-listed with RUS 316, CPL 319, and ENG 389. Formerly MOL 368.

MOL 317
RUSSIAN SHORT STORY
Undergraduate
The study of a representative selection of Russian short fiction concentrating on the great 19th-century masters such as Pushkin, Gogol, Turgenev, Tolstoy, Chekhov, Gorky, and Korolenko.

MOL 318
MASTERPIECES OF RUSSIAN LITERATURE
Undergraduate
This course will explore masterpieces of Russian literature from a variety of genres: plays, novels, short stories and poetry. Works by authors such as Tolstoy, Chekov, Dostoyevsky, Gogol, Nabokov, Pushkin, Turgenev, Akhmatova, Mayakovsky, Pasternak and Yevtushenko will be read within their historical context to provide a basis for literary appreciation and analysis.

MOL 319
WORLD OF THE CINEMA
Undergraduate
Critical analysis of cinematic development.

MOL 320
MODERN JAPANESE LITERATURE IN TRANSLATION
Undergraduate
In this course, students will examine literary and visual texts by intersecting them with the socio-historical contexts in which they were initially written and read. Most of the texts were originally written in Japanese. In what way can we learn about the history of Japan through works of fiction? How can we learn about fiction through the history of Japan? These are some of the questions this course will try to answer.

MOL 321
CLASSICAL JAPANESE LITERATURE IN TRANSLATION
Undergraduate
Classical Japanese literature, in English translation, from the earliest periods up to the Meiji era.

MOL 322
CULTURAL HISTORY OF PARIS
Undergraduate
A study of Paris from its origins in Roman times to the present day, this study abroad course is composed of readings (primary and secondary), lectures, and on-site visits that reveal the unfolding history of Paris.
This course surveys representations of same-sex sexuality in Japan from the 14th century to the present day. Students will explore the intersection of history, politics, art, and culture through historiography, literature, film, photography, music, cartoons, and animation, examining "traditional" male-male sexuality, the emergence in the modern era of texts reflecting female-female sexuality, as well as the formation of new consciousness throughout the 20th century and into the 21st. Students will look at critical issues for sexual minorities in Japan, including coming out and AIDS activism, paying particular attention to their potential relevance to sexual minorities and politics in the US.

Same topics as Spanish 322, but taught in English; not counted as part of a Spanish major or minor.

Various topics.

Readings and instruction in English; not counted as part of a Spanish major or minor. Cross-listed as LST 201.

The study of English translations of a variety of Latin American literary works that highlight key historical, political, social, and artistic trends in the region.

This is the first in a series of three hybrid courses in the Arabic Studies Program that examine Arab culture. The purpose of this course is to provide students with an overview of Arab culture and a clear understanding of its elements and historical events that shaped it. Emphasis will be placed on cultural aspects shared by all Arabs. The course will examine the general concept of culture, and study the elements that form Arab culture. It will also explore the impact of critical factors and events in Arab history from pre-Islamic to modern time on the evolvement of Arab culture as we know it today. Students will gain insight into the way Arabs think by examining Arabs' cultural practices, products, and perspectives. In addition to learning about Arabs and Arab culture, students will practice using technology to research, blog, discuss, and contribute to open-sources on topics related to Arab culture. Students will also have the opportunity to meet and interact with Arabs and the Chicago Arab heritage community.

This course is one of a series of three culture/media/literature courses strongly recommended for a major in Arabic Studies. It is also an elective course that can be taken by students at large. The purpose of the course is to introduce students to the Arab media--including newspapers, television, and the Internet--as a product of Arab culture. Students will examine Arab media to gain better understanding of its nature, role, content, and influence within emphasis on the context of Arab societies and the factors influencing their people such as politics, religion, technology, and Western influence. In addition to the assigned readings from the textbook and a variety of sources that represent various perspectives, a sample of products of Arab media including newspapers, TV programs, news, cartoons, and blogs will be examined to better understand Arab media. Furthermore, elements and factors that impact Arab media will be analyzed and discussed. The impact of the West on Arab media, and the future of Arab media will also be discussed.
MOL 342
MODERN ARABIC LITERATURE IN TRANSLATION
Undergraduate
This course is one of a series of three courses offered by the Arabic Studies program as part of the major and minor in Arabic Studies. It provides a survey of modern Arabic literature and focuses on various genres, including poetry, plays, short stories, and novels. Works by major Arab writers and poets representing various regions and content related to Arab culture are examined and analyzed to develop an appreciation for Arabic literature and a deeper understanding of Arab culture. This is a hybrid course. Students meet onsite one day a week for 2 hours and conduct work online to satisfy the course requirements. Specific assignments are provided each week through D2L and Ning social network for the online portion of the course.

MOL 349
TEACHING MODERN LANGUAGES
Undergraduate
The Teaching Modern Language course is specially designed for the teacher who is about to begin his/her career teaching foreign languages at the K-12 levels. This course is also designed for accomplished and experienced teachers who wish to receive new information on current theory and practice. The course has as an overall objective to provide learners with the theoretical and practical tools that will enable them to become critical and reflective foreign language practitioners.

MOL 350
METHODS OF TEACHING MODERN LANGUAGES IN THE ELEMENTARY SCHOOL
Undergraduate
Provides training in the theory and methods of teaching foreign languages in the elementary school (FLES). Designed for both pre-service and in-service teachers. Pre-service teachers include foreign language majors interested in elementary school teaching and elementary majors who are proficient in a foreign language and interested in teaching FLES. In-service teachers include elementary teachers proficient in a foreign language who are teaching or who are interested in teaching FLES and secondary trained teachers who are teaching or who are interested in teaching FLES. In order to meet the objectives of this course and subsequent methods courses, it is expected that all participants be able to demonstrate proficiency in English and a second language before enrolling.

MOL 354
THEORETICAL FOUNDATIONS/CURRENT RESEARCH SECOND/FOREIGN LANGUAGE ACQUISITION
Undergraduate
This course serves both as undergraduate and graduate-level introduction to the field of second language acquisition (SLA) research. As such, it will introduce students to the research methods, findings, and some of the theoretical discussions that have encompassed the last three decades of SLA research. The focus is on basic questions regarding the process of language learning, rather than on explicitly pedagogical issues. The most important goal of SLA research is to uncover and describe the processes that are potentially affected by instructional efforts. Thus, one of the goals of the course is to have students reflect and, if necessary, modify how they view the role of an instructor and a learner of a second language. The material can be used to inform learning a second language as much as it is instrumental in teaching a second language. The material in this course should encourage students to question assumptions and begin to formulate individual ideas about what goes on in classrooms, how students learn, and how this learning could inform teaching of a second language. A final goal is to introduce students to critical reading of research articles in the field, as a preparation for possible further study of SLA.

MOL 355
CONTEMPORARY CRITICISM
Undergraduate
An overview of contemporary criticism from Russian formalism to post-modernism. Cross-listed as CPL 355.

MOL 356
PSYCHOLINGUISTICS
Undergraduate
An overview of basic issues in experimental psycholinguistics by introducing various topics, such as speech perception/production, word recognition/memory, sentence processing, first- and second-language acquisition and the brain and languages. Cross-listed as PSY 393.

MOL 357
TEACHING CULTURE IN THE FOREIGN LANGUAGE CLASSROOM
Undergraduate
Pedagogical theory and practice in the integration of culture into the language classroom.
MOL 360
REALISM IN RUSSIAN DRAMA
Undergraduate
The course presents some of the greatest Russian plays of the 18th and 19th century. In the course, students will read original works in English translation by Von Vizin, Griboedov, Pushkin, Gogol, Lermontov, and Ostrovsky. Some critical works will be included. Students will read, analyze, and interpret the plays, comedies and dramas, both with respect to form and meaning.

MOL 361
RUSSIAN DRAMA
Undergraduate
Russian theater represents a high point of Russian cultural and literary production. In this course students will explore Russian plays by a selection of the most important authors. Readings may include Chekhov, Gorky, Bulgakov, Teffi and others. Some critical works will be included. The student will read, analyze and interpret the plays, comedies and dramas, both with respect to form and meaning. In the process they will develop greater insight into the social and multicultural issues of the time period in which the plays were written.

MOL 364
MODERN RUSSIAN AUTHORS
Undergraduate
This course explores works of the most influential Russian authors of the Modern period. Authors might include Anton Chekhov, Vladimir Nabokov, Mikhail Bulgakov, Evgeny Zamyatin, and more. Students will explore several genres, including poetry, novel, short, story, and plays. These authors and works will be studied in the context of their times.

MOL 369
RUSSIAN LITERATURE AND FILM
Undergraduate
Greatest Russian short stories, plays, and novels of the 19-20th century, as presented in film. Readings in English translation may include works by Tolstoy, Dostoevsky, Ostrovsky, Chekhov, and Pasternak.

MOL 380
COMMUNITY BASED SERVICE LEARNING
Undergraduate
Variable topics in theory and practice of service learning.

MOL 389
TOPICS IN COMPARATIVE LITERATURE
Undergraduate
Variable topics. Consult course schedule for current offering. Cross-listed as ENG 389.

MOL 392
INTERNSHIPS
Undergraduate
Variable credit.

MOL 396
CAPSTONE: LANGUAGE, LITERATURE, AND CULTURE
Undergraduate
This course addresses broad issues of human language that touch upon the concerns of all language majors. Topics include subjects such as: Languages as endangered species; The physiological/psychological benefits of bilingualism; and Oral language cultures. Topics are approached from a very broad perspective, namely linguistic, anthropological, literary and historical.

MOL 397
SPECIAL TOPICS IN MODERN LANGUAGES
Undergraduate
See schedule for current offerings.
MOL 398
STUDY ABROAD
Undergraduate
Variable credit.

MOL 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

MOL 400
PROFESSIONAL PRACTICUM
Graduate
Supervised experience in teaching, tutoring, interpreting, editing writing or other professional exercise of language skills.

MOL 401
PROFESSIONAL FOUNDATIONS
Graduate
In this course students will prepare a series of surveys/summaries of research literature and learning resources. They will identify one or more professional organizations such as MLA, CLA, ACTFL, CTFL, AATX, and others. Using their by-laws, publications, and recent conference programs, students will write a literature summary that identifies the major issues of concern to these organizations, and analyze their resources and professional standards related to research and practice in the students’ field of interest. Required for Modern Language MA students.

MOL 402
LANGUAGE, SELF AND SOCIETY
Graduate
This course offers students a theoretical and methodological introduction to the theory and methods of the study of language variation and change and its relationship to various social and individual factors (e.g. race, class, sex, ethnicity, identity, etc.). It introduces students to the concepts, theories, and methods used to analyze language and its role in the definition and construction of individual and group identity. Students will look specifically at how social and individual factors may influence linguistic structure and vice versa. The course will explore various theories of sociolinguistics, including the interaction between language and speakers’ membership in various groups, linguistic variation across groups, intergroup theory, dialectology, and discourse analysis, among others. Through the course readings students will consider and critically analyze the notions of the speech community and the individual, the existence (or not) of dialects, synchronic variation and diachronic change, the relationship between social factors and language, language policy and planning, language standardization, linguistic ethnography, and theories related to education and society. Bilingual phenomena such as code switching, language contact, and the creation of pidgins and creoles will also be examined. Topics may vary by quarter. This course is required for language MA students.

MOL 403
COMMUNITIES OF PRACTICE
Graduate
In this course, students will study Western and non-Western cultural texts that address a central theme (for example: “Citizenship,” “Freedom and Oppression,” “Globalization,” “Popular pedagogy”). Students will practice talking and writing about the ethical questions, inter-cultural conversations, and analytical methods common to the liberal arts tradition as they apply to their use of a language in a particular professional setting. Students explore the varied kinds of local and global communities in the contemporary world and place them in political, economic, and historic contexts to understand how they have transformed over time, with specific attention to the interaction of economic (i.e., work practice) and social ties (i.e., familial, religious, ethnic, linguistic) in forming and transforming local, national, international and global communities. The course will examine how various ethnic groups have used communities as a starting place to assimilate and make their adjustments to nations as well as maintain ties to the culture and heritage of their home country. Topics vary by quarter and some sections will include service learning opportunities. This course is required for language MA students.

MOL 410
JAPANESE CULTURE
Graduate
Japanese Culture is a cross-cultural and interdisciplinary exploration of Japanese culture, especially as regards cultural figures such as “geisha,” “samurai,” and “Hello Kitty.” These figures intersect with various critical discourses on gender, sexuality, nationalism, exoticism, orientalism, modernity, tradition, art, and aesthetics. They have also generated both praise and criticism. These questions are not only specific to the cultural figures as listed above but also run deep in society. The course will also examine other the historical and ideological constructions in Japan and the West, especially in the United States.
MOL 440
ARAB CULTURE
Graduate
This is the first in a series of three hybrid courses in the Arabic Studies Program that examine Arab culture. The purpose of this course is to provide students with an overview of Arab culture and a clear understanding of its elements and historical events that shaped it. Emphasis will be placed on cultural aspects shared by all Arabs. The course will examine the general concept of culture, and study the elements that form Arab culture. It will also explore the impact of critical factors and events in Arab history from pre-Islamic to modern time on the evolution of Arab culture as we know it today. Students will gain insight into the way Arabs think by examining Arabs' cultural practices, products, and perspectives. In addition to learning about Arabs and Arab culture, students will practice using technology to research, blog, discuss, and contribute to open-sources on topics related to Arab culture. Students will also have the opportunity to meet and interact with Arabs and the Chicago Arab heritage community.

MOL 441
MEDIA IN THE ARAB WORLD
Graduate
This course is one of a series of three culture/media/and literature courses strongly recommended for a major in Arabic Studies. It is also an elective course that can be taken by students at large. The purpose of the course is to introduce students to the Arab media--including newspapers, television, and the Internet--as a product of Arab culture. Students will examine Arab media to gain better understanding of its nature, role, content, and influence within emphasis on the context of Arab societies and the factors influencing their people such as politics, religion, technology, and Western influence. In addition to the assigned readings from the textbook and a variety of sources that represent various perspectives, a sample of products of Arab media including newspapers, TV programs, news, cartoons, and blogs will be examined to better understand Arab media. Furthermore, elements and factors that impact Arab media will be analyzed and discussed. The impact of the West on Arab media, and the future of Arab media will also be discussed.

MOL 442
MODERN ARABIC LITERATURE IN TRANSLATION
Graduate
This course is one of a series of three courses offered by the Arabic Studies program as part of the major and minor in Arabic Studies. It provides a survey of modern Arabic literature and focuses on various genre including poetry, plays, short stories, and novels. Work by major Arab writers and poets representing various regions and content related to Arab culture are examined and analyzed to develop an appreciation for Arabic literature and deeper understanding of Arab culture as portrayed in the major works of modern Arab poets and authors. This is a hybrid course. Students meet onsite one day a week for 2 hours and conduct work online to satisfy the course requirements. Specific assignments are provided each week through D2L and Ning social network for the online portion of the course.

MOL 449
TEACHING MODERN LANGUAGES
Graduate
The Teaching Modern Language course is specially designed for the teacher who is about to begin his/her career teaching foreign languages at the K-12 levels. This course is also designed for accomplished and experienced teachers who wish to receive new information on current theory and practice. The course has as an overall objective to provide learners with the theoretical and practical tools that will enable them to become critical and reflective foreign language practitioners.

MOL 450
METHODS OF TEACHING FOREIGN LANGUAGES IN THE ELEMENTARY SCHOOL
Graduate
Provides training in the theory and methods of teaching foreign languages in the elementary school (FLES). Designed for both pre-service and in-service teachers. Pre-service teachers include foreign language majors interested in elementary school teaching and elementary majors who are proficient in a foreign language and interested in teaching FLES. In-service teachers include elementary teachers proficient in a foreign language who are teaching or who are interested in teaching FLES and secondary trained teachers who are teaching or who are interested in teaching FLES. In order to meet the objectives of this course and subsequent methods courses, it is expected that all participants be able to demonstrate proficiency in English and a second language before enrolling.
MOL 454
THEORETICAL FOUNDATIONS/CURRENT RESEARCH SECOND/FOREIGN LANGUAGE ACQUISITION
Graduate
This course serves both as undergraduate and graduate-level introduction to the field of second language acquisition (SLA) research. As such, it will introduce students to the research methods, findings, and some of the theoretical discussions that have encompassed the last three decades of SLA research. The focus is on basic questions regarding the process of language learning, rather than on explicitly pedagogical issues. The most important goal of SLA research is to uncover and describe the processes that are potentially affected by instructional efforts. Thus, one of the goals of the course is to have students reflect and, if necessary, modify how they view the role of an instructor and a learner of a second language. The material can be used to inform learning a second language as much as it is instrumental in teaching a second language. The material in this course should encourage students to question assumptions and begin to formulate individual ideas about what goes on in classrooms, how we learn, and how this learning could inform our teaching of second language. A final goal is to introduce students to critical reading of research articles in the field, as a preparation for possible further study of SLA.

MOL 457
TEACHING CULTURE IN THE MODERN LANGUAGE CLASSROOM
Graduate
Pedagogical theory and practice in the integration of culture into the language classroom.

MOL 460
RUSSIAN DRAMA IN ENGLISH TRANSLATION I
Graduate
The course presents some of the greatest Russian plays of the 18th and 19th century. In the course, students will read original works in English translation by Von Vizin, Griboedov, Pushkin, Gogal, Lermontov, and Ostrovsky. Some critical works will be included. Students will read, analyze, and interpret the plays, comedies and dramas, both with respect to form and meaning.

MOL 461
RUSSIAN DRAMA IN TRANSLATION II: SOVIET ERA
Graduate
Russian theater of the 20th century appeared in parallel to realistic novels and contributed to the movement of realism in Russian literature. Russian theater of the 20th century, presented by such authors as Chekhov, Gorky, Bulgakov and Teffi, demonstrates tendencies from realism to avant-garde. Some critical works will be included. The student will read, analyze and interpret the plays, comedies and dramas, both with respect to form and meaning. In the process they will develop greater insight into the social and multicultural issues of the time.

MOL 464
RUSSIAN SHORT STORY IN ENGLISH TRANSLATION II: SOVIET ERA
Graduate
This course presents some of the greatest Russian short stories (1880 - 1930) in English translation. Students will read short stories in English translation by major Russian writers such as Chekhov, Kuprin, Bunin and Bulgakov. Students will analyze and interpret short stories of the 1880-1930 period, both with respect to form and meaning, and discuss some critical works.

MOL 468
RUSSIAN NOVEL IN ENGLISH TRANSLATION III: CONTEMPORARY
Graduate
Major Russian prose works of the late 20th century, read in English translation. Authors include Bulgakov, Platonov, Pristavkin, and Bitov.

MOL 496
MAMOL CAPSTONE
Graduate
As the required capstone course for the M.A. program in Modern Languages, MOL 496 requires students to reflect on their coursework and the materials that they have produced for their portfolios in order to articulate a coherent vision of their experience in the program. It encourages them to learn from each other's professional interests, builds community among them, and facilitates interactive learning. The course employs a seminar design that is intentionally flexible, and varies depending upon the participating students' goals and objectives. Class sessions will focus on the common issues and concerns that all students face as "language professionals." In addition, each student must select a representative work (the portfolio project), create an overview and commentary text on this work, and present the work to the class. Each student's portfolio and project (whether a thesis, internship, or creative work) will reflect his or her own intellectual interests and professional goals.
MOL 497
SPECIAL TOPICS IN MODERN LANGUAGES
Graduate
See schedule for current offerings.

MOL 498
STUDY ABROAD
Graduate
Variable credit.

MOL 499
INDEPENDENT STUDY
Graduate
Variable credit.

MPH 501
INTRODUCTION TO PUBLIC HEALTH
Graduate
This course introduces students to the basic tenets of public health, its focus on the prevention of disease and illness, and the promotion of the health and well-being of all people. The course provides a brief history of public health, an introduction to the five core disciplines of public health (epidemiology, biostatistics, environmental health, social and behavioral health, and health policy and management), and an overview of the field's core functions such as assessment, policy development, and assurance.

MPH 502
INTRODUCTION TO EPIDEMIOLOGY
Graduate
This course will focus on the theories and methods used in the field of epidemiology to study the occurrence, distribution and determinants of infectious and non-infectious diseases, other forms of illness (particularly those impacted by social and environmental forces), and injury in human populations. The focus will be on determining the impact, magnitude, and patterns of disease/illness/injury frequency so that causal agents can be identified and effective prevention, treatment and control measures can be designed and implemented. The course will explore variations of disease/illness/injury in relation to such factors as age, sex, race/ethnicity, occupational and social characteristics, place of residence, social inequality, susceptibility, exposure to specific agents, and other pertinent characteristics. Also of concern will be the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease.

MPH 503
INTRODUCTION TO ENVIRONMENTAL HEALTH
Graduate
Study of the environment factors that influence health. Topics include air and water pollution, global population and local community dynamics, toxicology, infectious and chemical agents, radiation, and management.

MPH 511
HEALTH AND BEHAVIOR THEORY
Graduate
This course will examine various theories and models that have been developed to identify the range of psychosocial factors that impact participation in both health-threatening and health-enhancing behaviors, and provide guidance for the modification of such behaviors. The theories and models will be explored from multidisciplinary perspectives and will be applied to an array of health issues. Practical applications of these theories to the development and implementations of theory-based public health interventions that can be applied with multiple populations (e.g., women, adolescents, elderly, people of color) within multiple settings (e.g., communities, schools, health care settings) at various levels of change (e.g., individual, community, social, policy) will also be explored. Cross-listed with PSY 511.
MPH 512
RESEARCH METHODS
Graduate
This course will provide a critical examination of the relative strengths and limitations of various research designs, data collection methods, and types of existing data. Students will develop an understanding of (a) the relative contributions of a mixed-methods approach to public health research, (b) basic issues related to the measurement of public health concepts, and (c) the relative strengths and limitations of various analytic approaches to studying public health problems. Students will familiarize themselves with peer-reviewed journals, how to search for material on specific topics, how to develop a critical reader's eye, and how to summarize and draw evidence-based conclusions from multiple studies.

MPH 513
PUBLIC HEALTH ADMINISTRATION
Graduate
This course considers the conceptual and theoretical foundation underlying managerial decision-making. The course introduces students to such basic managerial tools as basic accounting, cost-benefit analysis, budgeting, and marketing. Principles of strategic planning and forecasting are examined. The course goes on to examine the legal framework that governs public health practice, organizations, human resources, research activities, and community as well as individual patient intervention efforts.

MPH 515
PUBLIC HEALTH ETHICS AND POLICY
Graduate
This course is designed to analyze the ethical basis in which public health practice is grounded. It reviews concepts and ideas developed by a number of disciplines including philosophy, law, political science, and economics.

MPH 522
PROGRAM DEVELOPMENT AND GRANTWRITING
Graduate
This course is designed to provide students with the background and skills to develop and evaluate community public health programs in a variety of settings. Students will work individually and as members of teams to design measurable goals, objectives, action plans, timelines, and evaluation indicators of community-based public health programs. Application of methods to logic modeling, proposal writing, budget planning, project management, and data management will be examined throughout the course.

MPH 525
PROGRAM EVALUATION
Graduate
This course will provide students with a comprehensive theoretical, methodological and ethical foundation for conducting public health program evaluation. Students will experience the practice aspects of evaluation including communicating and negotiating with stakeholders, conducting an evaluability assessment, developing logic models and evaluation questions, identifying appropriate data collection methods, gathering reliable and valid evaluation data that are appropriate to the selected design and analysis methods, analyzing data, reporting evaluation results, and ensuring evaluation use. The instructor will facilitate a learning and skill-building environment, drawing on personal experiences and the expertise of others in the field.

MPH 530
SOCIAL EPIDEMIOLOGY
Graduate
