ELA T200
GRAMMAR FOR TOEFL WRITING
Continuing Education
An English-as-a-second-language course that reinforces and reviews the grammar skills necessary to excel on the Writing portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as in future academic pursuits.

ELA T201
TOEFL READING AND READING LAB
Continuing Education
An English-as-a-second-language course that prepares students for the Reading portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice reading strategies and the variety of reading skills tested on the TOEFL iBT. In addition, students expand their academic vocabulary and knowledge of word roots. Moreover, students get valuable exposure to the testing lab environment by doing practice computerized tests in this skill area.

ELA T202
TOEFL WRITING AND INTEGRATED SKILLS
Continuing Education
An English-as-a-second-language course that prepares students for the Writing and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the writing skills necessary to produce the high-quality essays required during the writing portion of the test. They also practice and learn the skills necessary to synthesis and summarize information in a written format, as required in the Integrated Skills portion of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional practice writing and integrated skills computerized tests in this skill area.

ELA T203
TOEFL SPEAKING AND INTEGRATED SKILLS
Continuing Education
An English-as-a-second-language course that prepares students for the Speaking and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the speaking skills and strategies which must be applied during the Integrated Skills portion of the test. Students also practice useful idioms that can be applied in both the listening and speaking portions of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional integrated skills computerized tests in this skill area.

ELA T204
TOEFL PRACTICE TESTS
Continuing Education
An English-as-a-second-language lab that allows students to apply the skills they have been learning and check their progress in a timed, self-testing environment.

ELA T205
TOEFL LISTENING AND LISTENING LAB
Continuing Education
An English-as-a-second-language course that prepares students for the listening portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as for future academic study. Students learn and practice the listening skills and strategies which must be applied during the listening portion of the test. Moreover, students get valuable exposure to the testing lab environment through computerized practice tests in this skill area.
ELA 100
**PRONUNCIATION WORKSHOP: A COURSE IN ACCENT REDUCTION**
Continuing Education
An English-as-a-second-language course designed to help students improve their pronunciation.

ELA 101
**TOEFL (TEST OF ENGLISH AS FOREIGN LANGUAGE) PREPARATION**
Continuing Education
An English-as-a-second-language course designed to help students prepare for the TOEFL (Test of English as a Foreign Language).

ELA 102
**GMAT/MBA (GRADUATE MANAGEMENT ADMISSIONS TEST/MASTERS IN BUSINESS ADMINISTRATION) PREPARATION**
Continuing Education
An English-as-a-second-language course designed to help students prepare for the GMAT (Graduate Management Admissions Test).

ELA 109
**VOCABULARY DEVELOPMENT FOR NON-NATIVE SPEAKERS OF ENGLISH**
Continuing Education
This class is designed to expand students' vocabulary by reinforcing ability to use vocabulary accurately, by use of new vocabulary-learning skills, and by acquisition of word decoding skills and strategies. Students will be introduced to approximately 25-40 new words per class. (Students in this class should have at least high intermediate proficiency in English.)

ELA 110
**TALKING BUSINESS**
Continuing Education
Talking Business is an intensive course for non-native English speakers preparing for business school or expanding their careers in the business world. The course will focus on improving students' vocabulary, knowledge of key concepts in business and economics, and listening and speaking skills related to those concepts. Each day, students will have the opportunity to read and listen to authentic materials as well as to engage in lively, informative discussion.

ELA 300
**ELA TOPICS**
Continuing Education
Special courses and workshops offered by the English Language Academy.

ELA 301
**SIT TESOL PROGRAM**
Continuing Education
A 130-hour TESOL/TEFL certificate course during which students learn how to teach English-as-a-Second-Language, including 36 hours of practice teaching with ESL students. Taught by the School for International Training at DePaul's English Language Academy.

ENG 120
**READING LITERATURE**
Undergraduate
Study of the elements and construction of literary texts, of the vocabulary of literary criticism, and of various literary modes and genres.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 130
**THEMES IN LITERATURE**
Undergraduate
Introduction to the study of literature through selected literary texts focused on a particular theme. Variable topics. May not be repeated.
WRD 103 or HON 100 is a prerequisite for this course.
**ENG 201**  
CREATIVE WRITING  
Undergraduate  
Experience in writing and analyzing poetry and short prose fiction. May not be taken pass/fail.  
WRD 104 or HON 100 is a prerequisite for this course.

**ENG 211**  
ENGLISH STUDIES: LANGUAGE AND STYLE  
Undergraduate  
An introduction to elements of the linguistic structure of English as they are employed to create stylistic effects in writing. The course aims at clarifying ways that language can affect audiences' perceptions and responses to writing.  
WRD 104 or HON 100 is a prerequisite for this course.

**ENG 218**  
READING AND WRITING FICTION  
Undergraduate  
An introduction to the art of fiction through analysis and criticism of fiction by established writers and through writing and revising the student's own stories.  
WRD 104 or HON 100 is a prerequisite for this course.

**ENG 219**  
READING AND WRITING POETRY  
Undergraduate  
An introduction to the art of poetry through analysis and criticism of poems by established poets and through writing and revising the student's own poems.  
WRD 104 or HON 100 is a prerequisite for this course.

**ENG 220**  
READING POETRY  
Undergraduate  
A comprehensive introduction to English and American poetry, poetic forms and meters, and the vocabulary of poetic study.  
WRD 103 or HON 100 is a prerequisite for this course.

**ENG 221**  
READING PROSE  
Undergraduate  
An introduction to close analytical reading of the fundamental prose genres that students will encounter in the English major, for example short stories, novels, folktales, literary nonfiction, and criticism. Students will study examples drawn from the history of prose as well as contemporary narrative.  
WRD 103 or HON 100 is a prerequisite for this course.

**ENG 227**  
STUDIES IN DRAMA  
Undergraduate  
Studies in Drama is an introduction to the appreciation and analysis of drama as a cultural form, with attention to both text and performance. Readings vary, including plays from different dramatic genres, historical periods, and cultures.  
WRD 103 or HON 100 is a prerequisite for this course.
ENG 228
INTRODUCING SHAKESPEARE
Undergraduate
Introduction to the basic structures and conventions of representative plays by William Shakespeare, emphasizing film and stage interpretations. May not be taken by students who have completed ENG 328, Shakespeare.

WRD 103 or HON 100 is a prerequisite for this course.

ENG 231
THE GOTHIC
Undergraduate
Introduction to Gothic narratives. Emphasis on characteristics of Gothic narratives and methods of interpreting the Gothic. Variable emphasis on particular genres or historical periods. (See schedule for current offerings.)

WRD 103 or HON 100 is a prerequisite for this course.

ENG 232
THE ROMANCE
Undergraduate
Introduction to the genre of the romance. Emphasis on characteristics of the genre in particular historical moments. Variable emphasis on particular historical periods or topics. (See schedule for current offerings.)

WRD 103 or HON 100 is a prerequisite for this course.

ENG 235
SCIENCE FICTION
Undergraduate
Introduction to science fiction as a literary genre. Variable topics, including history of the genre; multi-media adaptations; cyberpunk; global variants.

WRD 103 or HON 100 is a prerequisite for this course.

ENG 245
THE BRITISH NOVEL
Undergraduate
Introduction to the historical development, literary forms, and intellectual scope of the British novel from 1700 to the present. Key topics include the representation of gender, class, and empire.

WRD 103 or HON 100 is a prerequisite for this course.

ENG 265
THE AMERICAN NOVEL
Undergraduate
Studies in the American novel. Variable emphasis on the historical development, regional expression, multicultural scope, ethical engagement, and/or recurring thematic concerns of the genre.

WRD 103 or HON 100 is a prerequisite for this course.

ENG 272
LITERATURE AND IDENTITY
Undergraduate
Studies in the literary expression and representation of identity. This course is not repeatable.

WRD 103 or HON 100 is a prerequisite for this course.
ENG 273
GLOBAL ASIAN LITERATURE
Undergraduate
Introduction to selected authors, genres, and topics in Asian American or Asian diasporic literature from the mid-nineteenth century to the present. Variable emphasis on different groups, genres, or historical periods.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 275
LITERATURE AND FILM
Undergraduate
Introduction to the comparative study of literature and film. Emphasis on construction of narrative, development of character, point-of-view, and adaptation across genres and mediums. This course is not repeatable.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 280
WORLD LITERATURE TO 1500
Undergraduate
Introduction to selected examples of world literature to 1500, focusing on mythology, epic and drama.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 281
WORLD LITERATURE SINCE 1500
Undergraduate
Introduction to examples of world literature since 1500. Focuses primarily on explorations of self and the world in drama, poetry, and the novel from the Renaissance through the Modern eras.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 284
THE BIBLE AS LITERATURE
Undergraduate
Introduction to the major stories, genres (e.g., poems, parables, prophecies) and intra-textual echoes of the Bible.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 286
TOPICS IN POPULAR LITERATURE
Undergraduate
Studies in the forms and functions of popular fiction. Variable emphasis on particular genres, including mystery and detective fiction, fantasy, science fiction, romance, gothic. Variable topics. (See schedule for current offerings.) May be repeated on different topics.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 288
AUTOBIOGRAPHY AND BIOGRAPHY
Undergraduate
Introduction to the forms, functions, problems and purposes of life-writing.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 291
INTERMEDIATE FICTION WRITING
Undergraduate
Writing and analyzing short prose fiction. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.
ENG 292
INTERMEDIATE POETRY WRITING
Undergraduate
Writing and analyzing poems. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 300
COMPOSITION AND STYLE
Undergraduate
Advanced instruction in invention, arrangement, and style, toward developing clear and effective prose styles.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 307
ADVANCED FICTION WRITING
Undergraduate
Writing and analyzing short prose fiction, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 308
ADVANCED POETRY WRITING
Undergraduate
Writing and analyzing poems, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.

ENG 201 is a prerequisite for this class.

ENG 309
TOPICS IN WRITING
Undergraduate
See schedule for current offerings. This course is repeatable with different topics.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 310
ENGLISH LITERATURE TO 1500
Undergraduate
Survey of English literature from the beginnings to 1500.

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 311
CHAUCER
Undergraduate
A literature course is a prerequisite for this course.

ENG 319
TOPICS IN MEDIEVAL LITERATURE
Undergraduate
See schedule for current offerings

A literature course is a prerequisite for this course.
ENG 320  
**ENGLISH RENAISSANCE LITERATURE**  
*Undergraduate*  
Survey of English literature from 1500 to 1660.  

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 327  
**MILTON**  
*Undergraduate*  
A literature course is a prerequisite for this course.

ENG 328  
**SHAKESPEARE**  
*Undergraduate*  
Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 329  
**TOPICS IN RENAISSANCE LITERATURE**  
*Undergraduate*  
See schedule for current offerings.  

A literature course is a prerequisite for this course.

ENG 330  
**RESTORATION AND 18TH CENTURY LITERATURE**  
*Undergraduate*  
Survey of English literature from 1660 to 1780.  

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 339  
**TOPICS IN RESTORATION AND 18TH CENTURY ENGLISH LITERATURE**  
*Undergraduate*  
Selected authors, genres and topics in English literature, 1660 - 1780.  

A literature course is a prerequisite for this course.

ENG 340  
**NINETEENTH CENTURY ENGLISH LITERATURE**  
*Undergraduate*  
Survey of English literature from 1780 to 1900.  

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 346  
**NINETEENTH CENTURY IRISH LITERATURE**  
*Undergraduate*  
This course focuses on some of the important works of nineteenth-century Irish literature. It sees them as engaging with the often traumatic political and social changes of their time.  

A literature course is a prerequisite for this course.
ENG 349
TOPICS IN NINETEENTH CENTURY ENGLISH LITERATURE
Undergraduate
Selected authors, genres and topics in English literature, 1780 - 1900.

A literature course is a prerequisite for this course.

ENG 350
MODERN BRITISH LITERATURE
Undergraduate
Survey of English and Irish literature in the twentieth century.

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 354
THE IRISH REVIVAL
Undergraduate
The course invites a study of the cultural ferment of the decades from the 1890's to the 1920's in Ireland. Particular attention will be given to an introduction to the work of canonical writers such as Yeats and Joyce who emerged from it.

A literature course is a prerequisite for this course.

ENG 355
MODERN IRISH LITERATURE
Undergraduate
This course provides an introduction to Irish literature, including some poems in the Irish language with English translations on facing pages, written from the Literary Revival to the late twentieth century. It emphasizes the transitions from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

ENG 357
TOPICS IN IRISH STUDIES
Undergraduate
Selected authors, genres, and topics in Irish literature and culture.

A literature course is a prerequisite for this course.

ENG 359
TOPICS IN MODERN BRITISH LITERATURE
Undergraduate
Selected authors, genres, and topics in twentieth-century British literature.

A literature course is a prerequisite for this course.

ENG 360
AMERICAN LITERATURE TO 1830
Undergraduate
Survey of American literature from the beginnings to 1830.

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 361
AMERICAN LITERATURE 1830 TO 1865
Undergraduate
Survey of American literature from 1830 to 1865.

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.
ENG 362
AMERICAN LITERATURE FROM 1865 TO 1920
Undergraduate
Survey of American literature from 1865 to 1920.

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 363
AMERICAN LITERATURE SINCE 1920
Undergraduate
This survey focuses on twentieth- and twenty-first century American literary works, authors, and movements. Coverage will explore several genres, and expose students to the diversity of some major American literary movements and authors since high modernism.

ENG 364
AMERICAN GENRE STUDIES
Undergraduate
Studies in American drama, poetry, short story, or novel.

A literature course is a prerequisite for this course.

ENG 365
MODERN AMERICAN FICTION
Undergraduate
Major American writers of fiction in the twentieth century.

A literature course is a prerequisite for this course.

ENG 366
MODERN POETRY
Undergraduate
Twentieth-century English and American Poetry.

A literature course is a prerequisite for this course.

ENG 367
TOPICS IN AMERICAN STUDIES
Undergraduate
Selected authors, genres, and topics in American literature and culture.

A literature course is a prerequisite for this course.

ENG 369
TOPICS IN AMERICAN LITERATURE
Undergraduate
See schedule for current offerings. This course is repeatable with different topics.

A literature course is a prerequisite for this course.

ENG 370
HISTORY OF THE ENGLISH LANGUAGE
Undergraduate
Examination of the development of vocabulary and structure of English from its beginnings to contemporary British and American English usage.

WRD 104 or HON 100 is a prerequisite for this course.
ENG 371
AFRICAN-AMERICAN FICTION
Undergraduate
Selected novels and short fiction by twentieth-century African-American writers.

A literature course is a prerequisite for this course.

ENG 372
AFRICAN-AMERICAN POETRY AND DRAMA
Undergraduate
Survey of African-American poetry and drama from 1865 to the present.

A literature course is a prerequisite for this course.

ENG 373
MULTIETHNIC LITERATURE OF THE U.S.
Undergraduate
Readings in recent literature, primarily fiction, by American writers of various ethnic backgrounds, exploring the evolving concept of ethnicity in literature.

A literature course is a prerequisite for this course.

ENG 374
NATIVE AMERICAN LITERATURE
Undergraduate
Study of literature by Native-American writers with emphasis on twentieth-century works.

A literature course is a prerequisite for this course.

ENG 375
STUDIES IN SHORT FICTION
Undergraduate
The development of European, English, and American short fiction.

A literature course is a prerequisite for this course.

ENG 376
CREATIVE WRITING AND SOCIAL ENGAGEMENT
Undergraduate
Study and practice of creative writing in the contexts of community service.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 378
LITERATURE AND SOCIAL ENGAGEMENT
Undergraduate
Study of selected literary works in the contexts of community service. See schedule for current offerings. This course is not repeatable.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 379
TOPICS IN LITERATURE
Undergraduate
See schedule for current offerings.

A literature course is a prerequisite for this course.
ENG 380  
**MASTERPIECES OF WORLD LITERATURE**  
*Undergraduate*  
Selected works in translation. Alternating emphases: from Classical Antiquity to the Middle Ages, or from the Renaissance to the present.

A literature course is a prerequisite for this course.

ENG 381  
**LITERARY THEORY**  
*Undergraduate*  
Study of the major approaches to analyzing literature, including formalist, historicist, psychoanalytic, post-structuralist, and feminist readings.

Advanced Standing in English (ENG 220 and ENG 221) or instructor permission is a prerequisite for this course.

ENG 382  
**MAJOR AUTHORS**  
*Undergraduate*  
Study of one or two major writers. May be repeated on different authors. See schedule for current offerings.

A literature course is a prerequisite for this course.

ENG 383  
**WOMEN AND LITERATURE**  
*Undergraduate*  
Study of literature by women, with attention to the literary traditions of women's literature, historical and theoretical perspectives on women as writers and readers, and issues of feminist literary history and criticism.

A literature course is a prerequisite for this course.

ENG 386  
**POPULAR LITERATURE**  
*Undergraduate*  
Studies in selected forms of popular literature.

A literature course is a prerequisite for this course.

ENG 387  
**TOPICS IN CONTEMPORARY LITERATURE**  
*Undergraduate*  
This course focuses on selected late twentieth- and twenty-first century literary works, authors, and movements.

ENG 388  
**TOPICS IN TRANSATLANTIC LITERATURE**  
*Undergraduate*  
This course focuses on transatlantic or circum-atlantic literary production and consumption.

ENG 389  
**TOPICS IN COMPARATIVE LITERATURE**  
*Undergraduate*  
See schedule for current offerings.

WRD 104 or HON 100 is a prerequisite for this course.
ENG 390
SENIOR CAPSTONE SEMINAR
Undergraduate
Senior Seminar in Literature: a capstone course. See schedule for current offerings. This course is not repeatable.

Senior status and advanced standing in English are prerequisites for this course.

ENG 391
TEACHING ENGLISH
Undergraduate
Developing strategies for teaching composition, literature, and language skills to secondary-school students.

Advanced Standing in English (ENG 220 and ENG 221) is a prerequisite for this course.

ENG 392
INTERNSHIP
Undergraduate
Junior Standing or above is a prerequisite for this class.

ENG 397
NEWBERRY LIBRARY SEMINAR
Undergraduate
Newberry Library Seminar

ENG 398
LITERARY AND CULTURAL HERITAGE
Undergraduate
Study tours - locations, topics, fees, and credit vary.

ENG 399
INDEPENDENT STUDY
Undergraduate
Written permission of supervising faculty member and of department chairman required before registration.

ENG 400
STRUCTURE OF MODERN ENGLISH [FORMERLY ENG 416]
Graduate
A systematic outline of modern English from both traditional and contemporary linguistic perspectives. Examines descriptive grammars, word and phrase structure, syntax and semantics, and formal issues of style and rhetoric. Formerly ENG 416.

ENG 401
HISTORY OF THE ENGLISH LANGUAGE
Graduate
A systematic study of the nature, history and usage of the English language. The course traces the language from its origin to its present status in England and America.

ENG 402
HISTORY OF ENGLISH PROSE STYLE
Graduate
A survey of alternative theoretical approaches to the study of style, followed by intensive study of changes in the conventions of English prose from the Renaissance to the present.
ENG 407
LANGUAGE AND STYLE FOR WRITERS
Graduate
A comprehensive examination of structural elements and stylistic devices that experienced writers use across a number of creative and professional genres. Topics include components of style, sentence rhythm and prosody, diction choices, rhetorical punctuation, and the development of one's personal writing voice.

ENG 408
STYLISTICS
Graduate
Theory and practice in examining features of prose style, including linguistic, rhetorical and literary perspectives on style.

ENG 411
CHAUCER
Graduate
Chaucer's works in context of his milieu.

ENG 412
STUDIES IN ARTHURIAN LITERATURE
Graduate
Geoffrey of Monmouth, Wace, Layamon and Malory.

ENG 413
STUDIES IN MEDIEVAL LITERARY FORMS
Graduate
Alternating emphasis on poetic, narrative and dramatic genres of the 14th and 15th centuries.

ENG 419
TOPICS IN MEDIEVAL LITERATURE
Graduate
See schedule for current offering.

ENG 421
STUDIES IN ENGLISH RENAISSANCE PROSE
Graduate
Major prose works, including More's Utopia, Sidney's Apology for Poetry, Bacon's Essays, and Milton's Areopagitica.

ENG 422
STUDIES IN ENGLISH RENAISSANCE POETRY
Graduate
Alternating emphasis on the English epic, the 16th-century lyric, and the 17th-century lyric.

ENG 423
STUDIES IN ENGLISH RENAISSANCE DRAMA
Graduate
Tudor-Stuart drama, including works by Kyd, Marlowe, Jonson, Webster and Ford.

ENG 426
THE ESSAY: HISTORY, THEORY, PRACTICE (FORMERLY ENG 488)
Graduate
Explores the history of the essay as genre from the Renaissance to the present, compares and contrasts literary essays with those written in most school settings, and offers students the opportunity to write their own extended essays on personal and professional topics.
ENG 427  
MILTON  
Graduate  
Major poems and selected prose.

ENG 428  
STUDIES IN SHAKESPEARE  
Graduate  
Study of selected plays through various critical and scholarly perspectives.

ENG 429  
TOPICS IN RENAISSANCE LITERATURE  
Graduate  
See schedule for current offering.

ENG 431  
STUDIES IN THE EIGHTEENTH CENTURY NOVEL  
Graduate  
Representative English prose fiction, including Defoe, Richardson, Fielding, Sterne and the Gothic novel.

ENG 432  
STUDIES IN RESTORATION AND 18TH CENTURY DRAMA  
Graduate  
Studies in the comedy of manners, sentimental comedy, heroic drama, and bourgeois tragedy.

ENG 434  
STUDIES IN RESTORATION AND EIGHTEENTH CENTURY AUTHORS  
Graduate  
Alternating emphasis on, for example, Dryden, Pope, Swift, Johnson or other authors.

ENG 439  
TOPICS IN RESTORATION AND EIGHTEENTH CENTURY LITERATURE  
Graduate  
See schedule for current offerings.

ENG 441  
STUDIES IN ENGLISH ROMANTIC PROSE  
Graduate  
Major Romantic nonfiction prose writers, including Burke, Coleridge, Hazlitt, DeQuincey and Lamb.

ENG 442  
STUDIES IN ENGLISH ROMANTIC POETRY  
Graduate  
Alternating emphasis on major Romantic poets, including Blake, Wordsworth, Coleridge, Byron, Shelley and Keats.

ENG 443  
STUDIES IN VICTORIAN PROSE  
Graduate  
Major Victorian nonfiction prose writers, including Carlyle, Newman, Ruskin, Mill, Arnold and Pater.
ENG 444
STUDIES IN VICTORIAN POETRY
Graduate
Major Victorian poets, including Tennyson, Browning and Arnold.

ENG 445
STUDIES IN 19TH CENTURY BRITISH FICTION
Graduate
Alternating emphasis on major novelists including Dickens, Thackeray, the Brontes, Eliot, Trollope and Hardy.

ENG 446
NINETEENTH CENTURY IRI SH LITERATURE
Graduate
This course surveys a broad range of literature from nineteenth-century Ireland. It reads literature within the social and historical context of its day; in terms of the formation of individual, social and national identities; and within today's debate about Ireland's status at the time.

ENG 449
TOPICS IN 19TH CENTURY BRITISH LITERATURE
Graduate
See schedule for current offering.

ENG 451
STUDIES IN THE MODERN BRITISH NOVEL
Graduate
Alternating areas of emphasis, including Woolf, Joyce, Forster and Conrad.

ENG 452
STUDIES IN MODERN BRITISH POETRY
Graduate
Alternating areas of emphasis, including Yeats, Auden, Lawrence, Dylan Thomas, Eliot and Larkin.

ENG 453
STUDIES IN MODERN BRITISH DRAMA
Graduate
Representative British and Irish plays from World War I to contemporary times.

ENG 455
MODERN I RISH LITERATURE
Graduate
This course uses both historical and theoretical approaches to Irish literature written from the Literary Revival to the late twentieth century. It emphasizes the transition from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

ENG 456
CONTEMPORARY I RISH LITERATURE
Graduate
This course relates contemporary Irish literature to recent Irish history and to social and cultural change. It charts the ways in which patterns of individual, social and national identity have been challenged and renegotiated.

ENG 459
TOPICS IN MODERN BRITISH LITERATURE
Graduate
See schedule for current offering.
ENG 464
STUDIES IN AMERICAN AUTHORS
Graduate
Alternating emphasis on major writers, including Hawthorne, Melville, Poe, Whitman, Dickinson, Twain, Chopin, Crane, James, Wharton and Cather.

ENG 465
STUDIES IN THE MODERN AMERICAN NOVEL
Graduate
Alternating emphasis on major 20th-century writers, including Fitzgerald, Hemingway, Stein, Faulkner, Steinbeck, Porter, Penn Warren, Bellow, O'Connor, Oates and Morrison.

ENG 466
STUDIES IN MODERN AMERICAN POETRY
Graduate
Introduction to a wide range of twentieth-century American poetries, with alternating emphasis on modernists such as Frost, Eliot, Pound, Stevens, Williams, Moore, H.D., Hughes, and Rukeyser as well as more recent figures and trends.

ENG 467
STUDIES IN AMERICAN DRAMA
Graduate
American dramatists and dramatic movements.

ENG 469
TOPICS IN AMERICAN LITERATURE
Graduate
See schedule for current offering.

ENG 471
BIBLIOGRAPHY AND LITERARY RESEARCH
Graduate
Principles and methods of literary research.

ENG 472
STUDIES IN LITERARY CRITICISM
Graduate
Study of the theoretical foundations of literary criticism, exemplified by major texts from ancient Greece to the present.

ENG 473
TEACHING CREATIVE WRITING [FORMERLY ENG 485]
Graduate
Prepares English teachers to teach creative writing at the secondary and college undergraduate levels. Models the planning and directing of effective workshops in poetry and fiction writing. Formerly ENG 485.

ENG 474
TEACHING LITERATURE
Graduate
Prepares English teachers to teach literature at the secondary and college undergraduate levels. The course develops methods of teaching all literary genres, addresses problems in literacy, and focuses on the transactional nature of reading and writing.

ENG 475
TOPICS IN LITERATURE
Graduate
See schedule for current offering.
ENG 476
TOPICS IN GENRE AND FORM
Graduate
See schedule for current offerings. Formerly ENG 479.

ENG 477
TOPICS IN PUBLISHING
Graduate
See schedule for current offerings.

ENG 478
TOPICS IN TEACHING
Graduate
See schedule for current offerings.

ENG 484
WRITING WORKSHOP TOPICS
Graduate
See schedule for current offerings.

ENG 487
TRAVEL WRITING
Graduate
Writing travel essays: history and forms of the literary travel essay; writing about travel for the book and magazine market.

ENG 488
WRITING THE PERSONAL ESSAY
Graduate
Focuses on studying and writing creative nonfiction essays, with particular attention paid to voice, style, form and structure, narration and exposition, scene, and narrative distance.

ENG 489
SCREENWRITING
Graduate
An introduction to the craft of screenwriting. Covers principles of plot, dramatic conflict, characterization, dialogue, and screenplay form. Students develop short dramatic and documentary screenplays.

ENG 490
WRITING FOR MAGAZINES
Graduate
Covers the range of skills necessary for magazine writing. Discussion of the elements of style, humor, research, concept and imagery that characterize the literature of fact. Students investigate, compose and edit finished magazine articles to be submitted for publication.

ENG 491
SCIENCE WRITING
Graduate
An introduction to the creative career of science writing. Students research, write, and market articles on such subjects as astronomy, genetics, health, and technology for newspapers, magazines, e-zines, and innovative journals. No prior science background required.

ENG 492
WRITING FICTION
Graduate
A course in writing short stories. Emphasis is placed on class discussion of student writing.
ENG 493
WRITING POETRY
Graduate
A course in writing and reading poetry. Emphasis is placed on class discussion of student writing.

ENG 496
EDITING
Graduate
An introduction to editing principles and practices in professional and technical fields.

ENG 497
WRITING THE LITERATURE OF FACT
Graduate
An advanced course in reading and writing true-life stories in the nonfiction tradition exemplified by such writers as Dickens, Agee, McPhee, and Didion.

ENG 498
INDEPENDENT STUDY
Graduate
Independent Study

ENG 499
THESIS RESEARCH
Graduate
Thesis Research

ENG 500
INDEPENDENT STUDY
Graduate
Written permission of supervising faculty member and of the program director is necessary before registration. Variable credit.

ENG 501
THESIS RESEARCH
Graduate
Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

ENG 502
CANDIDACY CONTINUATION
Graduate
Non-credit. Required of all students who are not registered for regular courses but who occasionally utilize University facilities during completion of course requirements and/or research. $40.00 per quarter.

ENG 509
INTERNSHIP
Graduate
Internship

ENG 988
History Term Update Graduate
Graduate
ENV 101
INTRO TO ENVIRONMENTAL SCIENCE WITHOUT LAB
Undergraduate
ENV 101 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Students cannot receive credit for both ENV 101 and ENV 102.

ENV 102
INTRO TO ENVIRONMENTAL SCIENCE WITH LAB
Undergraduate
ENV 102 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Lab investigations further develop scientific and environmental understandings. Students cannot receive credit for both ENV 101 and ENV 102. Lab fee applies.

ENV 115
ENVIRONMENTAL GEOLOGY
Undergraduate
An examination of the earth's materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic resources and the geological aspects of waste disposal and pollution. The course includes a three-hour lab. Students cannot receive credit for both ENV 115 and ENV 116. Lab fee applies.

ENV 116
GEOLOGY OF THE ENVIRONMENT
Undergraduate
An examination of the earth's materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic aspects of waste disposal and pollution. Students cannot receive credit for both ENV 115 and ENV 116.

ENV 117
EARTH THROUGH TIME WITH LABORATORY
Undergraduate
A general introduction to the 4.6 billion-year geologic history of planet Earth. The course scientifically explores the history of the earth from its formation to present day, the origin and transformation of rocks, internal and external geologic processes and structures, evolution and extinction of organisms, and patterns of Earth's environmental conditions through time. The course includes a three-hour lab. Lab fee applies.

ENV 150
FOUNDATIONS OF ENVIRONMENTAL STUDIES
Undergraduate
The purpose of this course is to introduce students to environmental studies. It presents students with an overview of the intersections between ecology, the social sciences, and the humanities that inform our vision of the rigor and power of interdisciplinary environmental studies. It draws upon the natural sciences, communication, geography, religion, history, literature, art and design, and public policy to stress the interrelationships between human society and the natural world. Students will study the effects of the human use of the natural world and the interactions of culture, society, resources, and the environment. We will examine the social, political, and economic institutions that impact the environment. Particular attention will be paid to how the role of power and inequality contribute to environmental problems and how those problems in turn, impact certain groups more than others (e.g. citizens of undeveloped nations, people of color in urban areas).

ENV 151
INTRODUCTION TO SUSTAINABILITY
Undergraduate
This course provides an interdisciplinary introduction to sustainability and examines the essential interdependence between environmental, human, and economic systems. The class focuses on the theories and practices that respect the Earth's ecological limits so that these systems remain viable now and into the future. Students will explore the interrelated environmental, social, and economic problems that we currently face at the local, national, and global scale and the solutions that individuals, governments, and institutions are implementing in an effort to ensure a sustainable future.
In this course, students examine the role of the environment and natural resources in neoclassical, environmental and ecological economics. First, students study mechanisms for efficiently allocating scarce resources among specific alternative ends and take a brief foray into environmental economics and learn methods of resource/environmental valuation. We also discuss aspects of macroeconomics as it pertains to ecological economics. Students come away able to critically assess the benefits and drawbacks of these three ways that the economy incorporates the environment. It also encourages ethical reasoning as we discuss distribution of environmental benefits over generations and globally.

LSP 120 or MAT 130

This course is an introductory history of the ideas of nature that emerged over the last two and a half centuries in Europe and the United States. We examine how the conceptions, meanings, and values of nature today have been influenced by the Scientific and Industrial Revolutions, Romanticism, and evolutionary theory; notions of the sublime, the frontier, and wilderness; and the practices of conservation, preservation, and restoration. Also discussed are the ideological commitments of current environmentalisms, in particular sustainability.

The environmental issues that confront us are both global and local; they involve political, economic and ethical decision-making by governments, corporations and citizens. Students will explore and evaluate diverse approaches to a range of such issues, as well as the ways different thinkers and different cultures have envisioned the relationship between human beings and the natural world—all with a view to understanding their own relationships to the natural world, their own environmental ethics.

Issues in Environmental Design is an introductory course that will examine concepts, theories and practices across multiple scales of design, including architecture, landscape architecture and urban design. Students will discuss and evaluate the design decisions that compose our built environment with a focus on contemporary ideas of ecological sustainability. Examples of excellence will be explored through the examination of case studies. The underlying theme is the connection between culture and nature, and how we may reduce our negative impact on systems that support all life while building positive systems that support all life.

In this course students will engage issues central to the design of landscapes, examining the complex exchange between social perception, ecological function and physical form in landscape architecture. Students will evaluate the formal character of particular landscapes and how this expression contributes to the overall experience of a place. The literary perspective of the course will focus on the rich tradition of associations between landscape design and social ideologies. Students will be asked to apply concepts from the literature to landscapes from their own personal experience to understand how meaning is both deeply personal and culturally derived. Students will extend this interpretation to creating their own landscape design for transforming an existing site in Chicago.

This course focuses on the interactions between urban areas and the environment. It is a discussion of the physical setting of cities; the water, energy, air and waste disposal needs of urban areas; and the effects of urban areas on the air, water and land environment.
ENV 202  
RESOURCES, POPULATION, AND THE ENVIRONMENT  
Undergraduate  
A course on the relationship between the exploitation of the biological, mineral and energy resources of the earth to support an increasing population, and the environmental effects of this development. To provide an overview of the current debate on the relationship between the growing human population worldwide, the natural resources required to sustain this population, and the consequences of resource exploitation for managing environmental quality. We will integrate the ecological, economic, and policy factors involved in natural resource management.

ENV 204  
ENERGY AND THE ENVIRONMENT  
Undergraduate  
This course is designed to provide students with the scientific tools necessary to understand and critically evaluate both personal and policy decisions regarding the variety of options (e.g. fossil fuel, solar, wind, etc.) for energy generation and use. The course also focuses on the environmental impacts of all forms of energy, from the extraction of fossil fuels and mineral resources from the earth, to the generation, distribution and consumption of energy, and ultimately emission of fossil fuel combustion products, notably carbon dioxide and other heat trapping gasses, to the atmosphere. Course fee applies.

LSP 120 is a prerequisite for this class.

ENV 216  
EARTH SYSTEM SCIENCE  
Undergraduate  
This course focuses on three of the great spheres of the Earth (lithosphere, hydrosphere and atmosphere) and how they interact with the biosphere to create an integrated Earth system with an emphasis on how human activities impact important earth system cycles. Students should have a basic understanding of how living organisms interact with their physical environment. Laboratory activities provide experience with the tools and methodology of systems thinking. Lab fee applies.

ENV 217  
HUMAN IMPACTS ON THE ENVIRONMENT  
Undergraduate  
A science-based course that examines the interface between humans and the living and non-living environment, the consequences of these interactions, and options for mitigating environmental impacts.

ENV 216 is a prerequisite for this class.

ENV 230  
GLOBAL CLIMATE CHANGE  
Undergraduate  
This course introduces the student to the general principles of climate change and how it affects weather, agriculture, ocean levels, etc. In recent years, the problem of global climate change became one of the most important issues in science and politics. This course will cover topics like natural and human made climate changes, the handling of proxy data and data methods, and social behavior.

ENV 235  
ENVIRONMENTAL EDUCATION AND STEWARDSHIP  
Undergraduate  
This unique J EYL course is for junior level students with diverse majors interested in experiential learning within the field of environmental education. In partnership with the Chicago Academy of Sciences? Peggy Notebaert Nature Museum, students will not only gain valuable content knowledge on the region?s natural history, but also apply that knowledge via service learning in a museum setting. Enrolling in this course is an opportunity to witness and interact with the professionals, pedagogy, science, and practice of promoting environmental literacy.

ENV 240  
INTRODUCTION TO HORTICULTURE  
Undergraduate  
This course introduces the principles and core practices involved in the culture of plants. Topics include the uses of plants and horticultural practices throughout history; the botanical and horticultural classification of plants; plant structure and function, growth and regulation; environmental requirements for plant growth; genetic modification of plants; plant reproduction and propagation; and plant pests and diseases. The course also considers environmental issues in horticulture including xeriscaping, biodiversity and the use of native plants, water management and rain gardens and hydroponics and container gardens.
ENV 245
URBAN AND COMMUNITY AGRICULTURE
Undergraduate
This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, case-study approach, this course will explore issues such as food security, community gardening, farmers markets, the locavore food movement, entrepreneurial aspects of urban agriculture, methods of urban food production, and food consumption patterns. The course will meet in the classroom and on-site at the DePaul urban farm and greenhouses. In addition, students are expected to spend several hours each week outside of class time engaged in hands-on experience in urban farming at DePaul or at local sites arranged with the instructor.

ENV 250
APPLIED ECOLOGY
Undergraduate
An examination of how ecological principles are applied in order to understand and improve the relationship between humans and the natural environment. Cannot receive credit for both ENV 250 and BIO 215. Lab fee applies.

ENV 260
ENVIRONMENTAL DATA ANALYSIS
Undergraduate
This course provides an overview of the biometrical techniques employed in the analysis of environmental data. Topics include: handling of data, experimental designs, testing for differences between an experimental and a control group, testing for differences among many groups, and determining trends in data. Data from the environmental sciences is used throughout, and students are introduced to appropriate software for data analysis.

ENV 294
SECOND YEAR SEMINAR
Undergraduate
The purpose of this course is to advance ecological literacy. The seminar presents the study of the environmental to students in a philosophical, cultural, and historical context, and in addition makes them aware of some foundational ideas of the discipline through a selection of new and classic literature. 2 quarter hours.

ENV 300
PLANT IDENTIFICATION
Undergraduate
An in-depth overview of plant families and species in the Chicagoland area. Lectures will focus on morphology of plants, evolutionary relationships among plant families, and terminology of plant structures. Students will use botanical keys and manuals for the area to identify plants and will learn collection techniques. Plant species will be collected in their natural habitats during field trips. Lab fee applies.

ENV 310
ENVIRONMENTAL SOIL SCIENCE
Undergraduate
An examination of the physical, chemical, biological and engineering properties of soils, their genesis and classification, how they function as sites of waste disposal, and their role in global agricultural production. The course includes a three-hour lab and a mandatory Saturday field trip. Lab fee applies.

ENV 315
PLANT ECOLOGY
Undergraduate
This course focuses on how plants are affected by abiotic factors in the environment and interactions with other organisms. Goals are to improve students' abilities to understand research papers, present overviews of current research, design experiments, and analyze data. The course includes weekly labs with greenhouse experiments or field trips followed by data analysis. Topics include germination ecology, pollination biology, competition between plants, and effects of herbivory. Lab fee applies.

ENV 250 or BIO 215 or permission of instructor is a prerequisite for this class.
ENV 316  
CHEMISTRY OF EARTH SYSTEMS  
Undergraduate  
This class focuses on the impact of pollution on the Earth's ability to provide clean air, water and food for human consumption. The industrialization of the economy during the last 150 years has greatly increased the amount of waste that is sent into the four Earth spheres: the atmosphere, hydrosphere, lithosphere and biosphere. These emissions directly harm organisms and also cycle back to pollute essential ecosystem services provided by the Earth. This class will consider the source, transport, transformation and ultimate fate of pollution emitted into the air, water and solid Earth. Examples will include relatively simple cases (agricultural pesticides harming birds) and range to more complex interactions (depletion of stratospheric ozone by CFCs and the increase in harmful ultraviolet radiation). The laboratory component will be project based and some work can be completed outside of the assigned lab time. Lab fee applies  
ENV 216 and CHE 132 are a prerequisite for this class.

ENV 320  
CONSERVATION BIOLOGY  
Undergraduate  
Conservation biology is an interdisciplinary endeavor concerned with the protection and management of biodiversity. It employs insights from the biological sciences, from the theory and practice of natural resource management, as well as from the social sciences and humanities. The reach of the discipline is vast?ranging across all organismal groups and the landscapes and processes that sustain them?we will therefore restrict ourselves to a general overview and draw upon a series of case studies in Chicago area. Lab fee applies.  
BIO 215 is a prerequisite for this class.

ENV 322  
ECOSYSTEM ECOLOGY  
Undergraduate  
This course will introduce students to the conceptual and methodological tools of ecosystem ecology. The course will focus on understanding the fundamental structure and function of ecosystems but will also address very recent debates on the economic value of ecosystem services, the role of biological diversity in maintaining ecosystem processes, and the consequences of stressed and degraded ecosystems for human welfare. Finally, we assess the role of ecosystem ecology in designing sustainable restoration projects. The course includes a weekly lab.

ENV 340  
URBAN ECOLOGY  
Undergraduate  
In this course we examine the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more habitable?cleaner, healthier and more biodiverse. We will pay considerable attention to the ways in which ecology can be broadened by its encounter with disciplines that have historically paid more attention to the city?urban sociology, anthropology, economics, demography, architecture and planning. This course has a required lab; some Saturday field trips.  
BIO 215 or ENV 250 is a prerequisite for this class.

ENV 345  
URBAN AGRICULTURE  
Undergraduate  
This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, integrative, case-study approach, this course will explore issues such as food access, food security, food deserts, community gardening, farmers markets, locavore food movement, entrepreneurial aspects of urban agriculture, method of food production, community nutrition, and food consumption patterns. The course will meet both in the classroom and on-site at an urban farm, where students will work in all aspects of the farm as well as learn to organize communities in an effort to help them create food security and access to healthy food systems.

ENV 350  
ENVIRONMENTAL IMPACT ANALYSIS: CAPSTONE  
Undergraduate  
This course examines basic core concepts of and current issues in environmental science drawing on perspectives of the liberal studies curriculum, including reflectiveness, value consciousness, critical and creative thinking, and a multicultural perspective. Senior standing in Environmental Science or Environmental Studies
ENV 355  
INTRODUCTION TO ENVIRONMENTAL HEALTH  
Undergraduate  
Study of the environment factors that influence health. Topics include air and water pollution, global population and local community dynamics, toxicology, infectious and chemical agents, radiation, and management.

ENV 360  
RESEARCH METHODS  
Undergraduate  
ENV 360 is intended for junior year Environmental Science majors who are preparing for their senior research projects. Topics include nature and philosophy of science, experimental design, statistical analysis and scientific writing, focusing on common concerns and pitfalls of the environmental science researcher. Students develop a literature base and thesis proposal on a topic to be determined in the first weeks of the course.

ENV 361  
RESEARCH IN ENVIRONMENTAL SCIENCE  
Undergraduate  
ENV 361 is for students who are currently working with an ENV faculty mentor on a research project. Restricted to students majoring in Environmental Science or Environmental Studies; permission of instructor required.

ENV 360 is a prerequisite for this class.

ENV 362  
SENIOR THESIS  
Undergraduate  
ENV 362 is designed for Environmental Science students working on their senior thesis. 2 quarter credits.

ENV 360 is a prerequisite for this class.

ENV 390  
SPECIAL TOPICS IN ENVIRONMENTAL SCIENCE  
Undergraduate  
Variable topics.

Junior standing or above and an Environmental Science or Environmental Studies major are a prerequisite for this class.

ENV 397  
RESEARCH  
Undergraduate  
Variable credit. Permission of instructor and chair required.

ENV 398  
TRAVEL/STUDY  
Undergraduate  
Foreign and domestic study tours by special arrangement with sponsoring programs: Variable credit.

ENV 399  
INDEPENDENT STUDY  
Undergraduate  
Variable credit. Permission of instructor and chair required.

ENV 506  
EARTH RESOURCES AND HUMAN SOCIETY  
Graduate  
This course will provide an overview of the relationship between the growing human population worldwide, the natural resources required to sustain this population, and the consequences of resource exploitation for managing environmental quality. We will integrate the ecological, economic, and policy factors involved in natural resource management. For graduate students in sustainable management.
ENV 344
ENVIRONMENTAL JUSTICE AND ADVOCACY
Undergraduate
This course explores the roles of individuals and organizations in advocacy through the lens of environmental justice, particularly as power arrangements facilitate or impede consensus building. The course examines how legislation is written and how this process has impacted communities of color. Special attention is paid to advocacy techniques such as lobbying, movement-building, public education and litigation.

FA 105
ESSENTIALS OF COMPENSATION MANAGEMENT
Undergraduate
This course will examine the strategic use of compensation systems by management to attract, motivate, retain, and reward employee performance. This course will explore the factors of job analysis, job description, and job evaluation as the basis of compensation strategy offering students an opportunity to develop competencies in making equitable compensation decisions. Competences: H3B, FX. Faculty: Tyler Kahdeman

FA 110
ESSENTIALS OF TRAINING AND DEVELOPMENT
Undergraduate
This is a 5-week, 1-competence course on Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results. Students may focus on developing a training or development program for an F-X competence, or on their experience of training for an H-2-X competence. Competences: H2X, FX. Faculty: Beth Rubin

FA 111
SNL AND CAREER PATHWAYS
Undergraduate
Are you trying to decide on a career path, or want to change careers and are not sure in which direction to head? Career Pathways is a one-competence hybrid course designed to complement a student’s plan of study. It is an exploration of the academic, cognitive and interpersonal skills that a liberal arts education fosters, with an emphasis on the practical value of a liberal arts education in today’s workplace. Students will explore the career potential of their education, examine a variety of career pathways and determine the important role careers can play in contributing to society and the global workplace. During the course students will assess their personalities, interests and leveraging their skill set into a matching career. Under close examination, students will study their own individual skills, values and interests; learn how to manifest these skills, values and interests effectively; and begin to articulate possible career pathways which are mindful of society and workplace needs. Competences: FX and H3X. Can only be taken for one competence. Faculty: Donna Del Guidice

FA 112
EXPLORING SUCCESS TECHNIQUES FOR ENHANCING CAREER SKILLS
Undergraduate
This course will address challenges that individuals encounter as they seek to advance in the job market as well as the problems faced within the workplace. The purpose of the course is to refresh and increase your effectiveness and preparation as a job seeker in your chosen field. The course will cover areas such as resume and cover letter writing, interviewing techniques, and effective job searches. Meets first five weeks of the quarter. Competencies: H3X, FX. May only be taken for one competence. Faculty: Bernadine Thomas & Jennifer Weggeman

FA 121
F1 / EXPER LRNG EVAL: DESIGN A PLAN FOR DEVELOPMENT IN ONE'S FOCUS AREA
Undergraduate
This course satisfies a degree requirement in the Focus Area. Competence: F1 - Statement: Can design a plan in one's focus area based on an analysis of elements that comprise that area.

FA 122
FX / EXPERENTIAL LEARN NG EVALUATION: INDIVIDUAL FOCUS AREA ELECTIVE
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX - Individual Focus Area Elective

DePaul University Winter/Spring 2013 Page 1382 of 2244
In a professional or business setting, writing is not only a main means of communicating but also a tool for getting things done. It is through writing that an organization demonstrates its worth and achieves its goals. Anyone with good writing skills is at an advantage in the workplace. Unfortunately, when people lack good writing skills, their overall abilities and performance may be questioned. It is not surprising that many professionals, no matter how accomplished they are in their area of expertise, are anxious when they have to write. And, writing often becomes a point of contention when people on the job don't agree on whether a piece of writing is effective or how to go about improving it. Those who delegate responsibility for writing to others often feel frustrated that they end up having to do the work themselves - a situation that invariably leads to their employees feeling criticized and insecure in their job. Needless to say, the duplication of work effort, the loss of productivity, and the inevitable bad feelings undermine the work environment, often leading to individuals resigning or being dismissed. In fact, according to a recent survey of Fortune 500 executives, poor reading and writing skills is the most frequent reason for dismissal of first-year employees. Competences: L7, H3D, FX. Faculty: Michelle Greenberg
FA 134
ESSENTIALS OF MANAGING INTERNATIONAL RELATIONS - A CROSS-CULTURAL PERSPECTIVE
Undergraduate
This course will examine main subject areas in cross-cultural management and will bring together important research findings related to International Relations. As globalization shapes the role of managers, managers' responsibilities in the international business affairs become the norm rather than the exception, and as such, establishing and maintaining contacts with other cultures becomes commonplace. In this course you will examine cross-cultural management issues from a predominantly psychological perspective, as opposed to being country specific. Thus, the focus will be placed on interactions of people from different cultures in organizational settings. This approach helps you understand the effect of culture that can be applied to a wide variety of cross-cultural interactions in a number of organizational contexts. Students of organizational behavior, industrial and organizational psychology, and social psychology will find many of the topic areas familiar; however, the focus of this course is on application of these concepts to managing international affairs. Competences: H1C, H1E, FX. Faculty: Kumiko Watunuki

FA 135
PROPERTY: LAW, POLICY AND EVERYDAY IMPLICATIONS
Undergraduate
This course will examine how the American legal system defines and handles transactions and disputes related to real estate and personal property. Simulations and written exercises will help to explain in practical terms how law surrounding property issues was made, and how it evolves. Topics to be addressed in this course will include: finance & sale of real property, how the title system works, zoning and government taking by eminent domain, the intersection of civil rights and the U.S. Constitution with property law, landlord-tenant issues, and disputes related to personal property. Whether you are interested in learning about how law and public policy are made, or simply wish to know more about real-life issues that arise when you buy or sell a home or must default on a mortgage, this course will advance your understanding and arm you with useful information. Competences: H2A, FX, H1X. Faculty: Staff

FA 136
THE LANGUAGE AND LEADERSHIP OF ORGANIZATIONAL CHANGE
Undergraduate
This class would explore the impact of language on an individual's ability to learn and change him/herself as well as the human systems or organizations we are in. Using as a primary text "How the way we talk can change the way we work" by Robert Kegan and Lisa Laskow Lahey, students will examine the inclination not to change (or equilibrium) that is inherent in each individual and organization and how language impacts this. Students will also examine individual learning and bottom up change in the context of organizational learning and change. In addition to providing learning around the content of the class, students will work collaboratively in small groups to support each others' efforts thereby functioning as learning communities. Competences: L7, H3G, H2X, H3X. Faculty: Paula Bartholome

FA 137
WHO IS #1? TODAY'S SUPER POWERS
Undergraduate
History tells us that sooner or later, empires fall. There has been a good bit of activity on this front in the last few decades. It all makes you wonder: What is a super power? What influence to super powers exercise over our economic and social lives? Is the US a super power? How are Americans viewed across the globe? and...what about our ability to deal with economic and social equality right here at home? In this course, students will examine international economics, the effects of globalization on us and on the world, and the ways in which our lives might or might not be changed by our place in the global network. Students will look at these issues from the global perspective, and will also examine them from national and personal perspectives. Competences: H4, H5, FX. Faculty: JoAnn Gesiakowska

FA 195
CAPITALISM IN CRISIS
Undergraduate
The United States experienced an economic crisis in the fall of 2008 that nearly bankrupted the country. It could also have led to the collapse of democracy as we know it. When we study United States History, we tend to concentrate on political and social issues. Our historical education involves social movements and legislation, political parties and wars. The recent crisis has taught us that we must become literate in economics. What do we know about derivatives, bubbles, collateralization of debt, no doc loans, and open market operations? How do these things influence us? The recent debate and implementation of universal health care raises many ethical issues. Does every citizen have the right to health care? Is it the government's role to ensure that this happens? What economic rights does a citizen have? Should the government foster entitlement programs? How does the current US health care system compare with other industrialized nations' systems? In this course, students will study the major components of our economic system and will review its current stressors and weak points. Competences: FX, H4, A3C. Faculty: JoAnn Gesiakowska
FA 196
MANAGING A SUCCESSFUL BUSINESS
Undergraduate
The intent of business planning is to set the foundation for business success. More than one business has been put out of business when it experienced unplanned rapid growth. Students learn the financial and management aspects of business along with techniques for defining financial tracking methodologies that uncover and deal with potential problems at an early stage. Special emphasis is placed on merger and acquisition as a forward-looking method for creating new business opportunities and success. Students will work in groups to understand the detailed realities associated with being on the seller and buyer side of a business sale/purchase. Methods of post sale business integration are also discussed. It is strongly recommended but not required that students take “Starting a Successful Business” before taking this class. This class is represents the capstone class of the Entrepreneurship Series. Basic business planning and financial analysis skills along with an understanding of entrepreneurship fundamentals is assumed. Competences: H2X, FX, L7, A5. Faculty: Ed Paulson

FA 197
DEVELOPING SUPERVISORY SKILLS FOR THE 21ST CENTURY
Undergraduate
As we entered the 21st Century, a change is occurring with respect to the age and the make-up of the working population, which can have a significant impact upon the management of people. Furthermore, challenges facing American managers today are not only the profit/loss oriented business decision-making, but also improve their skills in working with people. Topics that will be covered not only prepare managers for change, but also guide and position them for the future. Workforce 2020, a sequel to Workforce 2000, offers the best ideas about what lies ahead and what Americans - collectively and individually, in large and small firms, in federal agencies and in small-town development commissions - should do to prepare for the journey to Workforce 2020. This course will examine how fundamental changes are altering the workforce of tomorrow and address the seemingly intractable issues and concerns managers face today and offer a new way of dealing with them. Competences: A4, H1I, H2C, FX, L7. Faculty: Kumiko Watanuki

FA 201
HELPING CHILDREN BE MORE SUCCESSFUL IN SCHOOL
Undergraduate
This course is designed to teach strategies to adults for helping children in school, regardless of age. We will explore the various ways people learn and discover techniques used to enhance learning. This course combines lecture, discussion, small group work, student presentation, and student participation in class discussion. Competencies: A3X, H3X, L7, FX. Faculty: Angeline Ross

FA 202
EMOTIONAL COMPETENCE FOR ADULTS
Undergraduate
We've all known people who were brilliant but ineffective because they couldn't manage themselves or learn to interact with others. It is nearly impossible to be successful at work or beyond without balancing thinking and feeling and developing skills in self-awareness, self-regulation, and interpersonal communication. This course will examine a framework of emotional competence and its application to a variety of settings, with special emphasis on abilities required to work effectively in teams. Readings will be drawn from emotional intelligence as it relates to the workplace, to parenting and public education, and to personal growth. In addition, film will be used to demonstrate these abilities and to inspire us to work toward our own development. Competencies: H2X, H3X, L7, FX. Faculty: Donna Younger

FA 203
MANAGING CAREER TRANSITIONS
Undergraduate
We live in times of dramatic change and unprecedented challenges and opportunities. Changing demographics, new technology, a global economy, and new demands on workers will bring sweeping change to the world of work of the 1990s and beyond. Through lecture, discussion, and small group research and presentation, students will develop an understanding of how the social, political, and economic trends impact society as well their individual area of specialization. Pre-1999 Competencies: WW-1, HC-H, HC-Q. BA-1999 Competencies: F-1, H-2-F, L-9. Faculty: Miriam Ben-Yoseph.

FA 204
CYBER ETHICS
Undergraduate
As with any communication tool, we use computers for good or for evil. We sell and buy, so we can steal; we can post our ideas so that anyone can see them, so we can build others up or tear them down, steal their work and call it ours. We can show pictures of family or friends, of products, of naked people engaged in lewd and obscene activities; we can invite people to our homes, find how to get there by map or directions, so we can proposition children and know where to find them. That we can do these things means we must struggle with the rights and privileges of individuals and groups in a free society where the law provides legal protections to free speech and past history mitigates against burning books and preventing assembly. This course opens the door on the questions this technology and easy access for most people. We find more questions than answers and we will leave this course with new insight into the tensions posed when living in a virtual community. See also. http://condor.depaul.edu/~jwillets/cyberethics/ Competencies: A3X, A4, H1X, FX Faculty: John Willets
**FA 205**  
**TEAMWORK FOR PERSONAL AND PROFESSIONAL DEVELOPMENT**  
**Undergraduate**  
Teamwork is a highly valued and often misunderstood means of getting something accomplished through a collective effort. It is the most complex competence in Goleman's emotional intelligence constellation because it relies on the personalities, histories, preferences, skills and other attributes of individuals who comprise the group. This hybrid course will explore the variety of skills and abilities of individuals that contribute to effective teamwork. The 6 in-class sessions will explore the learning dimension through a structured simulation and will discuss other approaches to teamwork based on readings from the text and readings drawn from the literature of organizational development and emotional intelligence. We will use Blackboard for discussion in between class sessions and to give teams a virtual place to meet and complete their work. Competences: A3X, H2X, L7, FX. Faculty: Donna Younger

**FA 206**  
**HUMAN RESOURCES CASE STUDIES**  
**Undergraduate**  
HR professionals will tell you that liking people is not a good reason to go into their field. In fact, it sometimes seems likely that HR decisions are made with anything but the human element in mind. Is business in general a field which fits into the human community or is it something which exists outside our social structures and social rules? In this course, students will examine a variety of examples of how people act at work, and how the vicissitudes of the workplace influence their lives. Competencies: A3D, H3B, H4, FX. Faculty: Jill Joachim

**FA 207**  
**BUSINESS DECISIONS: MONEY AND BANKING**  
**Undergraduate**  
In this course, students will learn that the Federal Reserve System, our national bank is a privately held corporation and not part of the national government. Who controls the Fed? How well do we understand the institution that influences so much of the average American's financial security as well as the American economy through interest rates? This course will explore the history of the Federal Reserve System and its historical effects on the American and global economic systems. The stock market waits anxiously for the latest Federal Reserve report. Small business owners and multi-national corporations are equally dependent on decisions made by this economic body. While many citizens are aware of the taxing and spending policies of government and fiscal policy, we comprehend very little about our central banking system and monetary policy. The purpose of this class is to aid learners in unraveling the mystery of the Fed. Competences: FX, H2X, S1X. Faculty: JoAnn Gesiakowska

**FA 208**  
**SUCCESSFUL SALES AND MARKETING MANAGEMENT FOR BUSINESS TODAY**  
**Undergraduate**  
Sales Management is one of the most important jobs in business today. It is the focal point for managing customer relations, and is critical for sustaining profitability and growth. It draws on a broad spectrum of skills and offers many desirable career paths for both entry level as well as experienced workers. Sales Management techniques are applicable in a wide variety of business settings, and the basic framework and details apply in all of them. The purpose of this course is to present a practical, contemporary framework for Sales Management. It starts with basic sales analysis techniques for determining company position in the market. From there it explores modern sales techniques for facilitating the customer's buying decision. It then covers the major Sales Management job functions, such as Territory Management and Sales Training. The course concludes with a discussion of leadership and psychological skills that make for Sales Management excellence. Students will learn Sales Management via course lectures, textbook reading, Internet searches and independent research at the company they work for. The class will be divided into teams whose Course Assignment is to apply the course material to a Sales Management Case Problem of their own choosing. Overall course grade will be determined by how well they do weekly homework assignments and how well their teams apply the course material to their Sales Management Case Problem. Competences: H-2-X, H-3-X, S-3-F, F-X. Faculty: Clifford Ratza

**FA 209**  
**CONSUMER INSIGHTS**  
**Undergraduate**  
In this course, students will explore the processes that consumers use to make decisions. Understanding of consumer segments is developed and applied to create communication strategies. Through coursework, students demonstrate an understanding of various topics including how market intelligence is collected, market segmentation, the impact of various cultural influences on behavior, elements of persuasive communication and development of consumer-oriented strategies. Cultural norms influence receptivity to marketing communication messages. In-depth consumer knowledge of a sub-cultural segment is learned and applied as students conduct market research. Based on analysis, students develop communication objectives, positioning statements and strategies for consumer communication. The role of mass media is examined in two distinct areas. Mass media influence cultural values by reinforcing norms for consumer needs and wants. Mass media are also important means for communication of targeted advertising messages. Students are placed in decision-making roles through exercises and case analyses. Strategic skills are developed through assessment of effective means for communication with consumers based on consumer insights. Competences: H1A, H2G, FX, A2X. Faculty: Halina Cowin
FA 211
DEVELOPMENT OF PRODUCTS AND SERVICES
Undergraduate
The design of new products and services that exceed customer expectations with quality is a key competitive advantage in today’s markets. The course will provide students with an overview of the Total Design Process Methodology, as well as an introduction to tools and techniques that enable the integration of marketing, design and other supply chain elements to develop successful projects. Students will apply the tools and ideas described in the course in the generation of a consumer product or service concept that will be developed throughout the term.
Competencies: H2C, S1E, FX. Faculty: Eduardo Bascaran

FA 212
CONFLICT, WORK PERFORMANCE, AND EMPOWERING EMPLOYEES
Undergraduate
The empowered employee is the successful employee. This course will provide students with real world techniques for creating high performing organizations. Effectively addressing inevitable workplace conflicts is an essential skill for any leader who wants the maximum productivity. Students will study proven interpersonal communication and negotiation concepts that can be used to create win/win solutions for any workplace conflict. The utilization of interest based conflict management and crucial conversation concepts will fundamentally alter the student’s perception of conflict. In turn, they will see conflict as an opportunity. This course will also provide learners with key leadership concepts that are essential for developing strong collaborative teams. Competences: L7, A3D, H3D, FX. Faculty: Joe Aceto

FA 214
ENTREPRENEURIAL ACCOUNTING
Undergraduate
Entrepreneurial Accounting is a thorough coverage of financial and management accounting topics in an economically challenging business environment. Clear principles and procedures are used to demonstrate the complete accounting cycle in any type of organization: For-Profit or Non-Profit. General purpose financial statements are prepared and examined from a fundamental understanding of how for-profit and non-profit businesses operate in a dynamic and changing business marketplace. Specifically, the reach of this course will be on a global environment that is characterized by a high degree of uncertainty. We will examine a variety of accounting challenges faced by business from an international perspective. This will have important implications on the way a company becomes more competitive and thus profitable. As such each of you will be assigned a company on day one of class to manage through a series of accounting dilemmas often both inside and outside our borders. As you acquire the requisite skills (throughout the term) to meet those challenges you’ll execute decisions that will change the management course of the company. It is through this individual decision making that you’ll learn what works and what doesn’t and why. This is not a static accounting course. Your decisions will have an impact on the direction of the company. We will also cover a series of topics that will enhance your understanding of financing techniques and options through detailed ratio-analysis. This will advance your ability to understand and seek creative financing for any ideas you might have in the future. This is essential if you have that entrepreneurial spark that just needs some financial backing and support to get started. As this is an accounting course we would expect some proficiency in basic quantitative/mathematical ability. You should also be able to use a calculator reasonably well. Competences: L7, H2X, H5, FX Faculty: Robert Cronberg

FA 217
NEW SOCIAL MEDIA MARKETING AND CULTURE
Undergraduate
This course discusses how digital media technology has changed marketing, examines the strategic use of digital and social media for business strategies on how to use platforms as Facebook, YouTube and Blogs. Student will learn how to integrate this new technologies in marketing campaigns to enhance branding and create product awareness. Students will be able to use new media applications and conduct a digital media analysis. This course is designed to learn how to use new media to create a marketing and communications strategy, not special technology skills such as HTML or programming are required but internet skills are necessary. Students are encouraged to use multimedia tools in the production of final work. Competences: A2D, H1X, S3A, FX. Faculty: Esther Quintero Guzman

FA 218
MARKET RESEARCH, CORPORATIONS, AND YOU
Undergraduate
In this class, students will learn fundamental market research concepts and methodologies; apply them to both the business world and their personal world; and become intelligent consumers who can more consciously navigate their relationship between those worlds. In doing so, students will also develop perspectives on market research processes and practices related to the field’s three guiding participants: researchers, who want to use the tools at their disposal to use and present information they can trust and support; businesses, which need to translate these findings into real-world decision making that helps sell consumer products and services; consumers, whose purchasing behavior and arguably much of their everyday existence is influenced significantly by market researchers and businesses intent on accessing their wallets. To gain these perspectives, students will learn and apply quantitative and qualitative research tools and methodologies used by businesses to identify, build, and leverage their relationships with consumers. Examples include secondary research assessment and synthesis; survey design; ethnography; and focus groups. Statistics and advanced math are not required for this course and will not be taught during the course. Building blocks for success include logical reasoning and critical thinking skills, a strong spirit of inquiry, inquisitiveness about human behavior, and analytical creativity. Competences: H2X, S2X, FX. Faculty: David Morris
FA 219  
NEGOTIATIONS FOR BUSINESS SUCCESS  
Undergraduate  
Negotiation techniques are applicable in a wide variety of personal or business settings, and the basic framework and details apply in all of them. The purpose of this course is to emphasize business negotiation and cover those practical and contemporary techniques that work. It starts with a basic framework for negotiation and its components. From there it explores negotiation from a global perspective. This has become increasingly important as a result of the rapidly developing world economy, offshore outsourcing and the power of multinational corporations. The topic is even more vital as business negotiations, particularly on the global front, can be expected to toughen in the wake of the economic crisis that emerged in 2008. The course concludes with a discussion of personal and psychological skills for persuading and influencing others.

FA 220  
DEVELOPING CONSULTING SKILLS  
Undergraduate  
This course will help students learn how to start and operate a consulting business enterprise. Materials will address consulting purposes, skills, and techniques. Through class discussions and exercises, readings and assignments, students will learn how to create, organize, and operate a consulting enterprise. Students will review detailed analyses of consulting proposals, contracting, client needs and expectations, needs analysis and evaluation, project planning, data collection and analysis, resistance, client relationships, change management, feedback, pricing, presentation and facilitation skills, and ethical considerations. Competencies: H1X, H3D, FX. Faculty: Thomas Nowak

FA 221  
ENTREPRENEURSHIP: FROM START-UP TO SUCCESS  
Undergraduate  
In this course, students learn the essential attributes of an entrepreneur and the stages one goes through in taking the seed of an idea and growing it into a successful business. But it also takes more than a good business plan and money to succeed - entrepreneurs must understand that all too often, the strengths that helped them be successful as a start-up become liabilities to overcome in order to take their business to the next level. This course provides practical insights into the differences between effective leadership and management by exploring the concepts of Emotional Intelligence in the workplace and how to identify and develop human capital - the lifeblood of every business. Competences: L7, H2C, H3D, FX. Faculty: Michael Shapiro

FA 223  
EVALUATING ACCOUNTING & FINANCE PRINCIPLES: A GLOBAL PERSPECTIVE  
Undergraduate  
This course introduces the basic principles and quantitative methods which embody the fields of finance and accounting. Moreover, the course demonstrates how the two disciplines complement each other to facilitate various types of sensitivity analyses in a global environment. The students will learn (1) the fundamental framework of accounting; (2), the criteria used for making finance decisions related to investing, forecasting& planning; and (3) the financial tools applied to evaluate the financial performance of a business. Additionally, students will be given an introduction to the international financial markets, the international flow of funds and exchange and interest rate determinations. We will also discuss the challenges behind recent plans to integrate International Financial Reporting Standards (IFRS) with U.S. GAAP (Generally Accepted Accounting Principles) and why it is such a hot topic among accounting professionals today. There is no accounting or finance background required for this course. Students should have an understanding of basic algebra and ratios. Competence: H2X, H5, S3D, FX. Faculty: E. Pete Lewis

FA 224  
CREATIVITY AND INNOVATION IN THE WORKPLACE  
Undergraduate  
This is a survey, review and analysis of creative problem solving techniques and approaches used in a variety of settings: corporate, small business, personal, etc.. The course should help students understand the importance of certain types of personal creative approaches and social interaction for product development and planning and other business activities. Students will reach a better appreciation of innovative thinking for themselves and for their companies’ functioning and existence. The students will obtain increased appreciation of group objectives and communication in their personal lives. The course will introduce basic techniques for idea generation to stimulate new and different approaches toward solutions to a variety of problems and opportunities. Each student will make a class presentation on a personally selected contemporary topic relating to the need for creative solutions. These and other student-suggested topics will be discussed in small groups. After witnessing each of the techniques of the weeks, students will analyze the viability and utility of these techniques in their own day-to-day applications. See also: http://www.depaul.edu/~ftobolsk/Creativity/ Pre-1999 Competencies: HC-5, AL-F, WW. BA-1999 Competencies: F-X, H-2-C, H-3-X. Faculty: Frank Tobolski
FA 226
FUTURE AMERICAN WORKPLACE
Undergraduate
This course will examine social, political and economic trends and their potential impacts society and individual lives. This course meets for five weeks during December Term. Through lecture, discussion, and small group work, and individual research and presentation, students will develop an understanding of how the social, political, and economic trends impact society as well as their individual World of Work area of specialization or Individual Focus Areas, and will apply those understandings to their own decision-making process. Pre-1999 Competence: WW-1. BA-1999 Competence: F-1.

FA 228
THE MARKETING MINDSET
Undergraduate
How customers are created and kept is the function of marketing. How marketing functions within an organization is the focus of this course. It is designed to give students an understanding of the marketing process that covers everything from advertising through warranties. Through simulation exercises, students will learn about the strategies available for marketing products and how a given strategy affects decisions. Students will also explore how advertisements have become a part of our popular arts, transmitting culture and values while creating cultural stereotypes and influencing our language. Competencies: H2X, S3X, FX. Faculty: Terry Mollan

FA 229
FINANCIAL MANAGEMENT
Undergraduate
Most people have heard about the Federal Reserve System, but few would be able to describe its structure, its purposes or the tools it uses to influence our economy. But it has a vast impact on every individual's economic health and wealth. Understanding the structure of the various investment markets, what causes them to move one way or the other, the individual types of investments and their tax implications is key to managing one's financial future. Pre-1999 Competencies: HC-F, WW. BA-1999 Competencies: H-2-X, F-X.

FA 230
ONLINE PROJECT MANAGEMENT
Undergraduate
In this online class, students will learn the fundamentals of creating and managing web-related projects. Topics will include website design, graphics, fonts, colors, links, frames, HTML, and Java. BA-1999 Competencies: E-2, F-X, H-2-C.

FA 231
PERSONAL FINANCIAL PLANNING
Undergraduate
This course will help students organize their financial lives by learning and implementing selected principles of accounting, finance, and management. The course will address value and risk determination by dealing specifically with the analysis of one's financial status, goal setting and planning, and decision making. Risk analysis, savings and investment principles, taxes, debt management, retirement, and estate considerations are areas which guide the financial management of individuals and businesses alike. Competencies: H3X, S1D, FX. Faculty: Thomas Nowak

FA 234
PROBLEMS IN MARKETING AND ADVERTISING
Undergraduate
In this course, students will examine the roles of marketing not only in the selling of products and ideas, but also as a vehicle for the dissemination of public information and socially relevant developments. Students will discuss how marketing might be viewed as a social institution and will analyze how advertising can change attitudes. Specific attention will be paid to television commercials and other forms of advertising. Competencies: H2X, FX.

FA 235
MANAGING ORGANIZATIONAL BEHAVIOR
Undergraduate
While no organization will ever achieve functional perfection (organizational nirvana), employees possessing an understanding of performance necessities will be empowered to make incremental, and possibly radical, change. This course is designed to give students a fundamental understanding of the organizational components, systems, and behaviors that must be in place to ensure optimal performance. Topics will include organizational vision, mission and structures; employee motivation; team behavior; and performance management. In addition, students will apply the tools introduced in the course to real or realistic situations. Competencies: H2C, H2D, H3G, FX.
FA 236
DIRECT MARKETING METHODS
Undergraduate
Direct marketing today is more than its traditional medium of direct mail - it encompasses a multiplicity of media from newspapers, magazines, T.V., to telemarketing, and now, the Internet. Insurance policies, magazine subscriptions, credit cards, everything from fruit to home computers are sold direct. Direct response advertising, unlike general advertising, calls for immediate action and produces measurable results. This course will provide an understanding of direct marketing concepts, methods and media. Actual direct response ads will be analyzed to identify effective promotional techniques. Students will learn the language of direct marketing and develop skills through in-class exercises and individual project work. This is a five week course for one competence. Competence: F-X, H-2-G Faculty: Pamela Wright

FA 237
CONFLICT MANAGEMENT, NEGOTIATION, AND CLIENT RELATIONSHIPS
Undergraduate
This course will introduce students to a variety of strategies for conflict management and negotiation. Students will engage in a number of hands-on activities to develop skills that will benefit them in and beyond the workplace. Competences: H-2-X, H-3-D, L-7, F-X. Faculty: Peter Forster

FA 238
CREATING A MARKET
Undergraduate
Marketing campaigns are being conducted by hospitals, churches, and the U.S. government. Marketing consultants help sell political candidates, public policies, even countries. And the professionals - lawyers, doctors, and dentists - are discovering marketing. You market yourself when you look for a job. Marketing is not just an activity restricted to corporations. It is all around us. Using marketing case studies, students will analyze various situations and make recommendations on appropriate marketing strategies. Each student will research a selected marketing topic of personal interest. Pre-1999 Competencies: WW, HC-D. BA-1999 Competencies: F-X, H-2-G. Faculty: Pamela Wright

FA 240
ORGANIZATIONAL DEVELOPMENT AND CHANGE
Undergraduate
One of the realities of the business world in which we find ourselves is the speed and frequency with which strategies, markets, products, programs, leadership, and even entire companies change. This course explores the field of organization development, the discipline that applies behavioral science knowledge and practices to help organizations achieve greater effectiveness through the change and development process. Using case studies, simulations, role plays, and individual work experiences, students will examine how and why organizations change and develop and the implications and consequences of various strategies and activities directed toward that effort. Topics include the nature of planned change, change management, transformational change, organization diagnosis, intervention design, and human process interventions. Students will also explore the relationship between organization and personal change and strategies and methods designed to effectively manage that relationship.

FA 243
GROUP DYNAMICS
Undergraduate
The purpose of this course is to understand the nature of groups, the ways in which small groups come together and behave, and the principles that govern the behavior of small groups. The class will combine experiential learning with reading and discussions about the theories of small group development and group dynamics. Course content will include: 1) the nature of small groups and group dynamics; 2) feedback and good interaction; 3) the process of group development, i.e. forming, storming, norming, performing, adjourning; 4) factors that interfere with optimal group performance; 5) leadership and leader effectiveness; 6) problem solving techniques. Teaching methods include "ice breaker" exercises, self-assessment forms, such as LEAD and FIRO B, some lecture, discussions and experiential learning. BA-1999 Competencies: H-3-D, H-3-E, H-1-X, L-7, FX Pre-1999 Competencies: HC-B, HC-H, HC-F, WW

FA 244
INTERVIEWING FOR EMPLOYEE POTENTIAL
Undergraduate
This course will introduce a method of using interviews to assess the characteristics of employees in order to make more strategic choices in selection, training and development. In addition to learning how to conduct behavioral interviews, participants will become familiar with the structure of competence models used to guide assessment. Students will work on gaining an understanding of the various applications of interview assessment and be able to apply one specific model of behavioral interviewing. You may only register for one competence. Pre-1999 Competencies: HC-F, WW. BA-1999 Competencies: F-X, H-3-X. Faculty: Donna Younger
FA 246
DIVERSITY IN THE WORKPLACE
Undergraduate
The purpose of this course is to heighten the students' awareness of diversity. This may take the form of critical self-assessment of one's knowledge of diversity and/or identifying prejudices, what they are and how they began. Through group discussions, analyzing case studies and lectures, students will be provided with opportunities to gain a deeper understanding of their own prejudices and to develop a rationale for valuing human differences in their respective lives. Competencies: H1A, H1B, H3B, L7. Faculty: Linzy Waters

FA 247
THINKING AND WRITING ABOUT WORK
Undergraduate
At work, we often learn how to use another language. That is, we learn to speak about technology, or about marketing, finance, or human resources with a specific vocabulary and referring to particular ideas. However, we also bring our own unique perspectives to the workplace. Our individual approaches to problem solving and to human relations at work define our contributions. In this course, students will use short story and journal writing to define and assess their contributions to the workplace. Students will produce written accounts of their lives at work. Students will assess their work not only for the clarity of the stories told, but also for elements which contribute to good writing. Looking at the literature of work will help students see their own work in the context of this literary genre. Competencies: A1E, A2X, A5, FX.

FA 248
HISTORY OF AMERICAN BUSINESS
Undergraduate
American business and the free enterprise system developed together with the nation itself. All three phenomena have their roots in the knowledge, skills and values that the earliest Europeans brought to this country. This course provides an overview of the relationship between American history and culture, the development of its central business system, and contemporary implications for business environments. Competencies: A4, A3D, FX, H1X. Faculty: Mary Lou Lockerby

FA 251
CORPORATE TRAINING DELIVERY: PLANNING AND EVALUATION
Undergraduate
In this course, students will delve deeply into corporate training programs, learning strategies for identifying specific training needs and ways to target training to appropriate organizational levels. This is especially important in firms undergoing significant structural change. Next, students gain knowledge of the way to create effective training programs to directly address organizational and role-based needs. The culmination of competence is the development of expertise in testing, assessing and evaluating training outcomes. Students work in groups, reviewing prize-winning video and web training programs. Competencies: A2C, H2C, H2X, FX.

FA 252
INTRODUCTION TO ORGANIZATIONAL LEARNING: PRINCIPLES AND PRACTICES
Undergraduate
This course provides an overview of the concept of organizational learning and an opportunity to gain hands-on experience with two communication practices related to it, collaborative learning and storytelling. The class will be highly experiential and focused on immediate application of learning. It will consist of in-class activities in groups of two and larger and will draw heavily on students' workplace experiences and environments. Collaborative learning results when two or more people help each other create or enhance their knowledge relative to specific challenges or opportunities. Its goal is to stimulate new insights and support changes in assumptions, beliefs and/or behaviors. The ancient oral tradition of storytelling is a powerful practice used in virtually all societies to pass on a tribe's culture, values, and the knowledge that permitted survival. It's no different in today's organizations. Stories can ground people in the organization's culture, capture and transmit knowledge and promote change. Competencies: L7, H2C, FX. Faculty: Paula Bartholome.

FA 253
CONTRACT LEARNING
Undergraduate
SNL courses are designed specifically to focus on the competencies of the SNL curriculum. Courses are competence-based, and revolve around particular content. Students who are interested in a specific content area might not always find these interests addressed through SNL courses. Furthermore, students, particularly those nearing the completion of the SNL BA degree, find that they have some competencies which are not addressed by SNL courses in the timeframe necessary. Contract Learning is designed to address the needs of these students. In this course, students can address a variety of competencies from the SNL competence framework, and can focus their work around content of their choice. By means of detailed and comprehensive contracts, learners will work with faculty to develop materials addressing their chosen competencies. Students will work with David Kolb's Learning Styles Inventory first introduced in the Learning Assessment Seminar, to revisit their preferred methods of discovering and absorbing information. In class discussions, learners will also analyze their topics, and their competencies to develop ways of expanding their knowledge and meeting the requirements of the competence statements. Faculty: Betta LoSardo
FA 254
HUMAN CAPITAL IN THE WORKPLACE: BUSINESS PERFORMANCE MEASURES
Undergraduate
This course explores the notion of human capital as it is used in today's business environments. In addition, it introduces students to the formal study of Human Performance Technology, the professional field devoted to improving individual and organizational performance. Through the exploration of cases, the review of relevant literature and exposure to workplace-like scenarios, participants learn about the optimization and proper measurement of business strategy and human capital investment. The work of leading authors in the field is studied, as well as the contexts in which students work to apply business-driven measures to improve performance in their organizations. This course is particularly helpful for students involved in human resource departments and other business functions that demand strategic alignment through performance measures and the creation and development of human capital. Competencies: S3F, H2C, FX. Faculty: Staff.

FA 256
DESIGNING TRAINING FOR ADULTS
Undergraduate
Everyone has had the delightful experience of learning by accident - of being surprised by insights and skills that emerge from experience. But accidental learning can be time consuming and therefore costly to organizations and individuals in organizations that have specific learning goals to meet. Engaging and effective learning in organizational settings is most often the product of systematic analysis and planning. This course will prepare participants to design and deliver training in a variety of adult learning settings. Principles of adult learning theory and best practices in adult learning will be examined to derive criteria for sponsoring learning experiences of adults. In addition, a five stage training design protocol (analysis, design, development implementation, evaluation) will provide a context for participants to address the following questions and understand their implications: 1) Who is the audience and what is the training context? 2) What is to be learned and why? 3) What methods are best suited to the target learning outcomes? 4) What resources are available and appropriate to the learning outcomes and methods? BA-1999 Competencies: H2X, H3G, FX. Pre-1999 Competencies: HCF, HCU, WW.

FA 259
INTERNATIONAL MARKETING
Undergraduate
This course concerns marketing in a global context. We will understand and examine the difficult problems facing many companies from U.S. and international perspectives. This course will introduce key concepts in marketing, and it will use a variety of frameworks to steer your way through many of today's critical marketing issues. Pre-1999 Competencies: HC-5, HC-H, HC-X. BA-1999 Competencies: L-7, H-2-C, H-5.

FA 260
ESSENTIALS OF PROJECT MANAGEMENT
Undergraduate
This 5-week course consists of 5 modules and provides an overview of the fundamentals of Project Management for non-Project Managers. It introduces the four phases of the project management process (Initiating, Planning, Managing and Closing), the role of the Project Manager, tools, techniques and deliverables associated with successful project management, & troubleshooting techniques. Competencies: H2X, FX. Faculty: Lynn Royster & Norene Trondsen

FA 262
CHANGING WORLDS OF WORK IN AN ECONOMIC DOWNTURN
Undergraduate
In an economic downturn, how do we navigate the changing worlds of work? This class will investigate current theories and models as well as offer students first hand experience observing and analyzing changes in the organization of work. We will approach issues concerning work from a number of perspectives--history, gender, technology, ethics, environmental, and global. As a way to explore the multiple issues related to the reorganization of work, ethics, culture, and technology, we will read texts, analyze websites, and view films to assist you in class assignments and projects toward fulfilling course competencies. You will also learn several qualitative research methods and approaches by becoming an apprentice and using them first hand. The culmination of our individual and collective work will be a public educational event, paralleling Trump's "Apprentice" show. First, each student will investigate and study issues of work/business by conducting an investigation of a workplace of your choice. Then, as a team, each group will then devise a vision, plan, marketing, and publicity educational campaign about one aspect of work reform. In our "Apprentice," no one will be fired! Competencies: H1F, H2C, H4, L7, FX. Faculty: Laura Davis

FA 267
TAKING CONTROL: MANAGING THROUGH EXPERIENCE
Undergraduate
The purpose of this course is to help students to develop skills in organization building--skills-skills that they can use to make good decisions in the business environment as well as in personal life. Students learn to take control of their own decision-making processes, rather than resorting to perceiving their experiences passively as the result of "chance" or luck. The course focuses upon the process of building an organization through human resources, but the skills taught and learned in the course are helpful to all members of the business community in their personal and professional lives. Pre-1999 Competencies: HC-5, HC-H, HC-T, WW. BA-1999 Competencies: L-7, H-2-C, H-3-F, F-X.
FA 268
HUMAN DIMENSIONS OF PROJECT MANAGEMENT
Undergraduate
An understanding and an ability to apply the basic disciplines of project management can boost your success in work and personal endeavors. Project management as a discipline provides the tools for accomplishing complex objectives - ones that may require different resources applied over extended periods of time. However, there is a danger of following a set of empty procedures, followed in hope that adherence to guide lines can substitutions for content expertise, common sense and an understanding of human motivation. There is considerable evidence that projects fail for human and organizational reasons, not mechanical or procedural ones. The key ingredient in project success is this personal dimension, and is the main theme for our course. We will use the mechanics of the project management process as the platform for exploring how to recognize and deal with the real underlying issues in managing projects - recognizing and managing people and organizational issues. Competencies: FX, H3D, S3F.

FA 269
ENTREPRENEURSHIP: HOW TO FIND AND FUND YOUR DREAM
Undergraduate
Did you know that 90% of new restaurants are doomed to fail? Have you always wanted to be your own boss? Are you presently conducting a small business from your garage that you'd like to make bigger and more profitable? Who makes a great entrepreneur? Are businesses easier to manage in the age of technology? In this course, Students will learn how to identify an appropriate small business for their talents and time restrictions. Learners will also consider methods of financing their dream work lives, and review the pitfalls awaiting new businesses in today's economic climate. Students need not have a business in mind, but must be willing to consider how they might go about putting together a plan for a successful venture. Ideas about the definition of business I modern society, of entrepreneurship, about the psychological make up of the successful small business owner, and about the long term view for small businesses will also be covered. Competences: FX, S3F, H2X, H3X Faculty: JoAnn Gesiakowska

FA 270
STARTING UP AND RUNNING YOUR OWN BUSINESS
Undergraduate
This course will help students learn how to start and operate an independent business enterprise. We will address entrepreneurship, defining your markets, accounting basics, business plans, financing, establishing the business, hiring employees, business equipment, software, and marketing. Through readings, discussion, and home assignments, students will learn how to increase the probability of reaching their business goals while minimizing risks and costs. By applying management, financial, and software concepts and practices, students will have the knowledge to start and run a new business. Competencies: F-X, H-1-X. Faculty: Thomas Nowak.

FA 274
APPLYING ORGANIZATIONAL BEHAVIOR TO TODAY'S BUSINESS ENVIRONMENT
Undergraduate
A conceptual and practical look at the discipline, nature and scope of organizational behavior and its importance in today's global and diverse business environment. This course is designed with a management focus that will offer knowledge of and applications, challenges and opportunities for diverse viewpoints, teamwork, group dynamics and problem solving in organizations in order to enhance and achieve productivity, performance and satisfaction in the workplace. Competences: A-3-D, H-2-C, H-4, L-7, F-X

FA 276
MANAGING AN INVESTMENT PORTFOLIO
Undergraduate
Most people are puzzled by the stock market and its gyrations. It's no wonder that these same people feel clueless when deciding how to invest their assets, such as IRAs and 401-Ks. They will often let a stockbroker decide what to invest in and assume that such a professional knows what's best. While this may be true, an investor should understand their broker's thought process behind the investments and feel empowered to discuss it with them. This course will discuss how some top money managers build diversified investment portfolios (past performance is no guarantee of future performance), as well as the Nobel Prize winning theory behind their decisions. This will not be a 'how to invest' type of course but rather a forum for ideas to consider. It will touch upon other important subjects that an informed investor should be aware of, such as: load vs. no-load mutual funds, active investment managers vs. passive indexes, the money management industry, behavioral finance, market efficiency and valuation techniques. This class is meant to be accessible to all students, so there are no prerequisites, only an interest in the subject. Knowledge of financial math or spreadsheets is not needed, though examples of both will be demonstrated in class. Competences: H1X, H2C, L7, FX. Faculty: James Bitautas
FA 278
HIGH PERFORMANCE WORK TEAMS
Undergraduate
Today’s business environment frequently requires groups of individuals to work together as a team, but usually without the training to understand what this really means. This course focuses on the skills needed to develop a business work group into a High Performance Team. It details the definition and requirements for good team development and concentrates on facilitation and negotiation techniques for team meetings, as well as on the communication and conflict resolution between team members. Since the purpose of most teams is to resolve problems, a scientific approach to problem-solving is also introduced. This is a highly interactive course which actively involves the students, encouraging the sharing of practical ideas and techniques. The course has sufficient flexibility to allow for the exploration and analysis of many typical team situations that are of interest to the students: what is discussed during class can be applied the next day at work. Competencies: F-X, H-3-D, H-2-D, L-7. Faculty: Jack Hartley

FA 279
WRITING FOR MANAGEMENT AND BUSINESS
Undergraduate
Developed to serve in the creation of compelling business communications designed to be clearly understood, this course instructs corporate writing that communicates with certainty and conviction. Every type of corporate writing is covered, ranging from resumes and cover letters, through business reports, to the creation of short and long proposals, good-news and bad-news letters, memorandums, direct requests, and other persuasive business expression. Special attention is paid to the technique of unearthing valid and reliable research supported with modern document design. Students who wish to specialize in one area of Business Writing may work with the instructor using WW or FX competencies. BA-1999 Competencies: L-7, A-Z-B, F-X. Pre-1999 Competencies: AL-A, HC-H, WW.

FA 281
BUSINESS WRITING
Undergraduate
Business Writing provides students with an opportunity to develop concise, articulate, and actionable written business documents. Students will learn to plan, organize and write effective business documents such as business letters, memoranda, e-mail, business reports, abstracts, executive summaries, cover letters, and resumes. In addition, students will learn to examine and write to a specific audience, to select the most effective wording and phrasing, to analyze and revise written works (either their own, or the work of others), to identify logical fallacies, and to write within a specific context, and to unearth valid and reliable research. Students who wish to specialize in one area of Business Writing may work with the instructor using the FX competence. Competencies: FX, H3X. Faculty: David Morris

FA 283
A CRISIS IN CREDIT: READING AND INTERPRETING FINANCIAL STATEMENTS
Undergraduate
The record collapses of first home builders, such as Levitt and Sons, WCI Communities, and Matrix Development Corp., then financial giants, Lehman, Fannie Mae, Freddie Mac, Wachovia, and Merrill Lynch begs the questions, how did we get here but more importantly how do we avoid repeating this "crisis" in the future. This course will examine these questions in light of corporate balance sheets and income statements. Students will learn to read and interpret financial statements. In addition to the technical details related to financial reporting, the course will examine the political and social implications of the U.S. Treasury addressing the problems of the housing and credit sectors. This will involve a historical review of the roles government and the private sector in the development of financial systems in the United States. Competences: H1X, H2X, S2X, FX. Faculty: David Morris

FA 286
THE ART OF THE INTERVIEW
Undergraduate
A great interview is a thing of beauty, much like a dance of words revealing the previously unknown and insightful. We live in an age where podcasts and the proliferation of audio news channels have made it easy for students of the art of the interview to analyze the process. This class will take advantage of that while visiting some venerable old style interviews as well. An interview is just a conversation with a purpose and in this class we will look at all kinds of interviews: entertainment, investigatory, forensic, structured and freeform, research, medical, diagnostic, job, group, etc. We will examine some venerable sources: The Proust Questionnaire, Chicago’s own Studs Terkel, and a variety of well-known current practitioners of the art (Larry King, Terry Gross and John Stewart come immediately to mind). The class will look at oral arguments before the US Supreme Court, which are just interviews by the members of the court with presenting legal counsel. We will also briefly evaluate the use of interrogation and torture to gather intelligence. Students should expect to perform, document and analyze a variety of simple interviews in this class: simple job interviews, interviews to gather family history, patterned and freeform interviews, questionnaires, etc. Students will also analyze the techniques used in a variety of interviews, using audio streamed recordings and transcripts. Competencies: FX, H2G, A1C, S3D. Faculty: Jill Joachim
The course will focus on the use of the Internet as a tool to expand one's knowledge through development of expanded networks, and will provide direction on becoming a more connected person in the local and world community. The course is for students with basic understanding of PCs and their components, only minimal experience with the information highway is required. We will focus on The Internet and World Wide Web and their basic components. Among other things we will review its history, see how it works, find out who owns it, how it is maintained, and the game rules for its use (ethics, courtesy). Pre-1999 Competencies: PW-3, HC-D, WW. Faculty: John Baker

E-mail has flooded the information highway allowing us to communicate on an immediate basis. But has this immediacy caused us to drop our guard so that our communications are not as effective? This course will give students a solid foundation in business writing so all communications - business-to-business, business-to-consumers, in-house memos to instant messages - can be clear and concise. Students will also review written etiquette and explore the impressions created by the spoken word compared with the written word. Competencies: H-2-G, S-3-F, F-X.

In this course, students will learn practical applications of the fundamentals for making financial and investment decisions. Students will work with cases and problems drawn from business experience. They will work with economic and philosophical theory, as well as economic data, and learn to understand such concepts as supply and demand, competition and monopoly, and the money supply. Students will become familiar with financial information, learn how to assess financial risks and rewards, and become conversant with the terms, symbols, and abbreviations that are used in current business publications. Competencies: H2F, H2X, FX. Faculty: Alan D. Cohen

This course reviews the process of creating, planning, developing and analyzing a business document. Students will learn how to structure, write and control such demanding projects to relate information, interpret data and recommend solutions to business problems. Students are expected to possess writing skills that enable concentration to be placed on developing a clear, concise and consistent writing style in complex and sophisticated documents. Class discussions will cover pros and cons of using certain document formats and what, in turn, makes them effective. Upon completion, students are expected to possess the necessary skills and confidence to develop sophisticated, highly professional business documents. Students who plan to complete Major Piece of Work in the WW domain may find these course skills very useful. Competencies: A-1-X, H-3-D, F-X. Faculty: Rick Paszkiet

One of the most sought-after business skills is public speaking ability. We all have equal access to high-technology; high-touch skills give us the competitive advantage. Through discussions, exercises and presentations, students will have many opportunities to build their skills in both casual and formal speech. Each student will prepare presentations in a variety of styles, including impromptu, persuasive and informative. Through regular feedback from the instructor and peers, students will build their presentation skills in organization, topic development, use of visuals and delivery. Students will be video-taped regularly so that they can chart their progress and participate in self-assessment. Pre-1999 Competencies: WW, HC-S, AL-9, AL-10, WW-9, WW-10. BA-1999 Competencies: F-X, H-3-E, E-1, E-2. Faculty: Allison Morgan; Mari Pat Varga; Pamela Meyer

This is an introductory course that assumes no previous experience on the student's part. The class seeks to familiarize you with some basic principles of effective and ethical public speaking, to give you experience in enacting those principles through practice, and to instill a sense of the importance of public communication in shaping our lives. Through class feedback and videotapes of your own speeches as well as critiques of other communicators, you will discover how personal style, appearance and body language impacts the message. BA-1999 Competencies: H2X, H3E, FX. Faculty: Gary Fox.
FA 294
DESIGNING BUSINESS STRATEGIES FOR B-WEB MODELS
Undergraduate
Thriving in the internet economy requires rapid adaptation, technological excellence and motivated personnel. Using a detailed case study, students will learn strategies for optimal organizational development in this new world economy. We will investigate its various historical bases, the elements of its uniqueness, and analyze several theoretical models of structure and process in organizational function. Learn how you can contribute to your own firm's stamina in the emerging marketplace of the future! BA-1999 Competencies: H2C, H2D, S3A, S3F, FX. Pre-1999 Competencies: HCF, PWF, WW. Faculty: Ed Paulson

FA 295
CONTEMPORARY LEGAL ISSUES
Undergraduate
This course will examine basic ideas in the practice of law. It will also examine contemporary legal issues in the world of work. Students will examine the structures of the legal community and the impact it has on how business is conducted, and on the economic system in which we live and work. Through readings, discussion, and group projects, students will investigate current issues which have evolved as the practice of law has become a big business itself. Students will develop and evaluate plans individually or through group interaction for applying new insights to effecting change in their own working environments. May be taken for only one competence. BA-1999 Competencies: H2X, FX. Pre-1999 Competencies: HCF, WW.

FA 296
INTRODUCTION TO FINANCIAL SYSTEMS
Undergraduate
Remember when things were simple? It was a long, long time ago. These days, issues in finance are complex to the point that many of us feel excluded. How can we make and use money if we don't understand how it works? How can we educate ourselves enough? In this course, students will examine how money works in contemporary society. Furthermore, students will discuss how developing technology has changed the flow and focus of money matters in our time. BA-1999 Competencies: S3F, FX, H5. Faculty: Joanne Gesiakowska

FA 297
COMMUNICATING IN A GLOBAL BUSINESS ENVIRONMENT
Undergraduate
Effective and efficient communication is a challenge in our own culture, but this is compounded when we face communicating in a culture other than our own. This course will begin by examining and practicing communication formats that are accepted in the Western world. Following this we will examine the historical background and sample presentations of leaders other than those from the United States and Europe. In addition, learners will have opportunity to format their own presentations using those of the world's great leaders as models. Learners will be encouraged to incorporate their own professional situation as a place to begin experimenting with their newly acquired knowledge. Competencies: A1X, H1A, H3E, H5, FX. Faculty: Rebecca Schwan.

FA 300
PROJECT MANAGEMENT
Undergraduate
Project Management is a business concept which has received a great deal of attention over the last few years. Business managers are discovering that the complexity of human and technological systems forces workers to organize, prepare, and monitor project development in a way which was not necessary in simpler times. In this course, students will discuss and discover methods of project organization and execution which will help them achieve efficacy and success in the workplace. This course will cover concepts in describing project goals, setting priorities, identifying needs, and designing realistic time lines. Students will learn how to execute successful projects from start to finish. Competencies: L7, H2X, S1D, FX. Faculty: Thomas Nowak

FA 303
ADVANCED PROJECT
Undergraduate
This required course is a problem-solving experience which represents the culmination of an SNL student's learning in a specific area. Students, guided by their academic committee, design and execute an independent project which demonstrates the integration of theory and practice, and the ability to pursue and document avenues of inquiry with excellence. * Successful completion of Research Seminar is required before registration. This carries six hours of academic credit. Competencies: F-11, F-12.

LL 300 is a prerequisite for this class.
FA 309  
STARTING A SUCCESSFUL BUSINESS  
Undergraduate  
In this class, you will learn evaluation techniques for determining the business feasibility of a new idea, methods of performing a market analysis with special focus on spotting marketing and demographic trends. You will learn the details associated with forming and managing a functional new business with the ultimate goal of this course being the writing of a 10-page business plan for a new product or service idea. It is strongly recommended but not required that you have taken “Understanding Financial Statements” if you do not already have an accounting or financial background. Competencies: H-1-X, H-2-C, F-X, S-2-D, Faculty: E. Paulson

FA 310  
WOMEN IN BUSINESS AND LEADERSHIP  
Undergraduate  
Women’s work is never done. Not only are women mothers and wives, but these days the expectation is that women will take on leadership roles outside the home as well. What makes a woman a leader? How did the workplace differ when women were not corporate leaders? Who are today’s prominent female leaders and how are they shaping our future? In this course, learners will study the lives and contributions of various important women from business, politics, and social action. Students will assess equality in management and leadership, the psychological make up of the woman leader, and the ways in which women’s contributions to leadership differ from men’s. Furthermore, the class will endeavor to define leadership, its consequences, and its personal ramifications. Students should expect to read extensively about the lives and characteristics of contemporary women who have surfaced in leadership roles. Learners will also identify women leaders in their own workplaces and communities and assess their involvement in the corporation and/or general public. Competencies: A3X, FX, H3X, H4. Faculty: Bridgette Mahan

FA 311  
BUILDING QUALITY INTO PROJECT MANAGEMENT  
Undergraduate  
Today’s business environment is time-based and cost-conscious with expectations for quality and excellence. An understanding of project management processes and developing the essential skills and tools can optimize time, cost and quality. This course will provide an introduction to the theories and concepts of project management and how those theories and concepts apply to today’s business practices. Competencies: H1X, H2X, S3F, FX. Faculty: Mary Lou Lockerby

FA 312  
FINANCIAL LITERACY  
Undergraduate  
The purpose of this class is to learn the language of business and the “grammar rules” required to apply this language to different scenarios and our own lives. We will discover who the audience for financial information is and develop the ability to see how financial activities affect and are relevant to this audience. This audience consists of investors, creditors, bankers, customers, employees and us. Our own ability to understand these concepts will be enhanced as we picture ourselves as users and preparers of this financial information. We will explore the topic of financial literacy both from the global and the personal perspective. Big corporations, small businesses and we the individual have something in common. All must ask the question: How do we control, organize and communicate financial situations and information in a way that is meaningful to us and that will help accomplish long term goals. Simply having money does not guarantee that we know how to manage it or that resources are being used effectively or appropriately to realize our goals. In this class, we will first establish a common framework and terminology for financial literacy and then explore questions such as “Why is financial planning important?”; “What are common budgeting systems and tools?”; “How can a budget or financial plan be used to help identify and achieve monetary goals?” “Why do such plans often fail?” By considering the economy, assessing our own individual financial situations, by applying financial concepts learned to real world situations, students should be able to apply skills learned within both a personal and global context. Competencies: FX, S1D, H1X, H2X. Faculty: Bridgette Mahan

FA 313  
PROCESS MANAGEMENT AND DESIGN  
Undergraduate  
From erecting an architectural monument to developing training materials to planning an international seminar, it's all process. Process Management and Design begins with an examination of the origins of work systems and process design, ranging from the principles of Frederick Taylor to the philosophies of Deming, Duran, and Cosby. The course of study then moves into an unfettered exploration of process within the context of organizations and leadership, as well as an experiential consideration of the manner in which process applies in non-traditional contexts. Class participants will learn to create, define, analyze and classify processes; develop and apply process measures, and determine customer and consumer needs and expectations. Other topics covered include process re-engineering, continuous process improvement, process benchmarking, and systems thinking. Class participants are encouraged to engage in this learning experience with fresh perspectives about process, and its potential meaning in unconventional settings. Competencies: L7, FX, S2X, H2X. Faculty: Gene McGinnis
**FA 314**
**THE BUSINESS OF RETAIL**
*Undergraduate*

The famous business theorist Peter Drucker has called American culture a unique combination of materialism and idealism. These qualities have combined to make America a consumer based society unlike any other culture. What is it about American stores and the American shopper makes both so unique? Super stores, the consolidation of regional stores into multinational conglomerates, online shopping, the emergence of an-ever-more savvy and demanding consumer, economic cycles, international monetary values and the demographics of American shoppers have combined to transform the experience of shopping in the last twenty years. How do stores entice consumers to buy? That question will be answered in this class. This class will look at a variety of store environments and will feature student-based discussion of weekly store visits. Using the science of shopping (as defined by Paco Underhill and others) the class will visit and evaluate, time and scheduling permitting, a wide range of retail options. Competences: FX, A5, A2X, L7. Faculty: Jill Joachim

---

**FA 315**
**CORPORATE COMMUNICATIONS: BEYOND THE BUZZWORDS OF BUSINESS**
*Undergraduate*

A successful business leader's actions are underscored by efficient and effective skills in communication. This course will position you to move forward with the respect of others and a heightened sense of self worth. We will focus on looking at communications in contemporary business contexts; determining your skill in presentation/platform applications, and ways to advance; and effectively demonstrating your increased understanding and application level. Competencies: H3D, H3E, H3X, A3C, A3X, A4, FX. Faculty: Bill Forsberg

---

**FA 316**
**MAKING BUDGETS: FINANCIAL AND ETHICAL INTERPRETATIONS**
*Undergraduate*

This course examines the process and responsibilities of the manager in the budget formation, interpretation and implementation process. Students will learn to read and interpret financial budgets and understand the practical and ethical implications that budget implementation has on managers and workers. The class consists of case studies with analytical problem solving, introductory lectures on basic financial concepts and theoretical frameworks. Students will develop and analyze financial budgets, participate in discussions of current ethical implications of budget implementations, and write reflective papers addressing their competencies. Competences: A-3-X, H-1-X, S-2-X, F-X. Faculty: Daniel Ryan

---

**FA 317**
**CAREER VS CALLING: LIFE IS ALL ABOUT THE HYPHEN**
*Undergraduate*

When we die, our tombstones record our birth date and our death date, with a hyphen in between. How we live our lives is represented by that hyphen. This course is intended to help students identify what they want their hyphen to represent and how that applies to their career and life choices. Special attention is given to methods of identifying personal calling and for achieving personal fulfillment goals. Students also examine the views of philosophers, spiritual leaders, and artists, both historical and contemporary. Students create their own mission statement for work and life. Required readings for the course are taken from Repacking Your Bags: How to Live Life with a New Sense of Purpose and Whistle While You Work: Heeding Your Life’s Calling by Richard J. Leider & David A. Shapiro and A primary objective of the course is to expose students to resources that can be used in their own self-discovery process. Multi-media activities include small and large group discussions and presentations, research, and report writing, video and audiotapes. Students are encouraged to use the Internet in their research. Competences: A-1-D, A-3-D, H-2-H, F-X. Faculty: Gregory L. Gilmore. Students are strongly advised to register for two competencies.

---

**FA 318**
**UNDERSTANDING FINANCIAL STATEMENTS**
*Undergraduate*

Business managers as well as investors must have a basic understanding of financial statements as not only a management tool but also as a way of communicating the financial and operational well-being of a company. This course teaches students the essential elements of financial statements, their interpretation and their impact on investors and society. This is a particularly important topic and skill in light of the recent corporate financial reporting scandals plaguing Wall Street and the nation. Phone: 630-960-3299; Email author@edpaulson.com. Competencies: A4, H2X, FX. Instructor: Ed Paulson
British royal advisor Benjamin Disraeli is reputed to have said the following about manipulation of public opinion: “there are three kinds of lies: lies, damn lies, and statistics.” Whether or not Disraeli actually said this, our relationship to the use of numbers in addressing public issues continues to be problematic. Reading the newspaper, perusing consumer reports, analyzing political data are all activities in which we engage on a daily basis. People who want to sway us, or to convince us, or to attract our dollars use statistics to help us make up our minds. How much do we know about how this kind of counting works? In this class, students will look at how numbers add up to give us reasons to be for or against ideas. This course will center on how to create, decode, and analyze statistics. Some knowledge of mathematics is essential to understanding statistics so prior completion of the Quantitative Reasoning course or it’s equivalent would be very beneficial to having success in this class. Competencies: H-3-G, S-2-X, S-3-X, F-X. Faculty: John Hemmerling

Investors range in age from newborn babies to centenarians. Population as a whole can be segmented according to various attributes, some of which have a decided influence on one's spending and investment proclivities. Identifying those attributes is essential in determining the appropriate types of investments for the individual investor. Understanding the role of the economic, interest rate, and inflation cycle are also critical to putting together an efficient, effective, and suitable investment portfolio. Prerequisite: Completion of Risk vs. Reward in Investing. Building on what was learned in the prerequisite class, we will examine the segments of the population and what causes them to make their investment decisions. We will then put together sample portfolios for hypothetical investors for different points in the economic cycle. This course can be taken for only one competence. BA-1999 Competencies: H1X, FX. Pre-1999 Competencies: WW. Faculty: Nancy Singer

As contemporary American business continues to move toward internet- and web-based communication, and with increasing demands on business managers to communicate key messages quickly and effectively, the ability to write clearly and effectively becomes an increasingly valuable skill. Business and Professional Writing offers students practical experience in developing cogent, concise and articulate written products. Students will learn to plan, organize and write effective business documents such as, business letters, memoranda, E-mail, business reports, abstracts, executive summaries, cover letters, and resumes. In addition, students will learn to examine and write to a specific audience, to select the most effective wording and phrasing, to analyze and revise written works (either their own, or the work of others), to identify logical fallacies, to write within a specific context, and to work collaboratively in creation and modification of business and professional written documents. BA-1999 Competencies: FX, H-3-X. Pre-1999 Competencies: WW, HCF. Faculty: Gene McGinnis

Business and trade between nations have never operated independently from the realm of politics and international relations. In the current era of globalization, however, each of these areas increasingly effect and shape the nature and direction of the other. Recognizing the ways in which political relationships, conflict and cooperation simultaneously define, promote, and complicate commercial opportunities is crucial to achieving future business success in the 21st century. In this class, students will analyze contemporary Sino-American relations from a cross-cultural perspective, with an emphasis on developing an understanding of how particular issues impact the business climate through the interplay of macroeconomics and geopolitics. Additionally, students in this class will identify and analyze those specific issues in contemporary Sino-American relations that have the greatest potential to impact the present and future operations of the IBA. BA-1999 Competencies: FX. Faculty: David Steiger

A successful new business often experiences tremendous revenue, personnel and financial growth. Ineffective management of this growth with all of its opportunities as well as pitfalls can put a successful business out of business. This course covers the areas of concern, shows methods of monitoring financial and operational information to highlight potential problem areas before they become major problems and then shows methods of effectively dealing with these challenges. Pre-1999 Competencies: HC-F, WW; BA-1999 Competencies: H-2-C, F-X. Faculty: Ed Paulson.
FA 324 INTERVIEWING FOR EMPLOYEE POTENTIAL  
Undergraduate  
What are the obligations of the workplace to the worker and vice versa? Does the individual worker matter more or does the organization? How can the organization honor both words in "human capital" and be fiscally responsible? The ways that organizations approach selection, hiring, and training express their answers to these questions, intended or not. This course will examine ways to assess the competence and potential of individuals and to create avenues for individual development in the context of organizational effectiveness. Participants will learn skills of behavioral interviewing, interpreting interview data, and developmental feedback and will devise strategies for the ethical use of assessment results. Competencies: H3G, A3C, FX. Faculty: Donna Younger

FA 325 CONNECTING THOUGHT AND BEHAVIOR IN THE WORKPLACE, THE COMMUNITY, AND IN YOUR PERSONAL LIFE  
Undergraduate  
This course introduces students to practical concepts of Cognitive Behavioral Psychology and offers them new perspectives on how to observe and understand the interaction between thoughts and behaviors in their daily lives. Students will evaluate the tendencies and correlations between what a person "thinks" and what that person "does" through observation and interpretation of their own experiences. A report will be generated for each competence that will include an analysis of the student's own cognitive behavioral tendencies and a plan for personal development. Competencies: H3A, H1I, S3X, FX, H2C. Faculty: Staff

FA 326 GENDER, SEX AND LATER LIFE  
Undergraduate  
This course will compare the aging experiences of men and women in later life and the relevancy to gender, gender roles to the aging process and ethnic, racial and cultural diversity differences. Although this course is sociological, we will examining the physiological/psychological differences and similarities between older adult men and women. Specific topics of analysis will include gender, politics and power, the gender gap in longevity, why aging women have a longer life expectancy than men, but experience more chronic illnesses and report less physical and mental well-being in advanced ages. With the baby boomers in their 40's and 50's and soon to be 60's, sexuality in the lives of older adults are being highly publicized. The release of the medication Viagra (sildenafil) is a vivid example of such publicity. Sexuality in older adults presents a markedly different set of challenges than those in young adults. This course will explore society's attitudes and myths about sexuality in later life, as well as presenting realistic information on ongoing research into the physiological and emotional changes affecting sexuality and intimacy. BA-1999 Competencies: H3F, FX. Pre-1999 Competencies: HCF, WW. Faculty: Patricia Whitney

FA 327 TECHNOQUES OF BUSINESS REPORT WRITING  
Undergraduate  
Most training programs are created as the result of a report, and reports also document the effect of the training on the trainees. Either way, the report is a legitimate component of all training programs. Learn the procedures used in creating detailed reports that can be implemented in your workplace. Examine the "voice" of a business report, and learn ways to turn reports into RFPs for further programs. A five-week, close examination of the steps involved in creating detailed reports for business is encountered in this class. This course can be taken for only one competence. BA-1999 Competencies: A2B, L7, FX, S2D, H2X. Pre-1999 Competencies: WW, HCH, ALA. Faculty: Will Johnston

FA 328 APPRECIATIVE INQUIRY, POSITIVE ACTION: UNDERSTANDING THE POWER OF STORY TELLING  
Undergraduate  
Traditional approaches to organizational change place the practitioner (manager, consultant, or other change agent) in the role of diagnostician or problem-solver. This approach is based on the concept that organizations are like machines. When they break down, the expert simply needs to find the source of the problem and repair it. Organizational developers have discovered that organizations rarely act so predictably as machines, and repairs led by experts rarely have lasting impact. In the early 1980's a new model for organizational development began to emerge in response to the frustration with traditional approaches. Appreciative Inquiry, founded by David Cooperrider and colleagues provides a new theoretical and practical approach to change that engages the positive energy of the organization. In this course, you will learn how Appreciative Inquiry evolved in the relatively new field of organizational development, understand its core concepts and learn how to use the process to unleash the power of positive change in your organization. This course is excellent for anyone working in a management, leadership, consulting or support role in an organization (or who aspires to). BA-1999 Competencies: H1I, H2C, A3D, A3F, FX. Faculty: Pamela Meyer
DEVELOPING AND MANAGING A MARKETING COMMUNICATIONS PROGRAM
Undergraduate
This course will provide the student with the understanding of the principles of marketing communication, the marking communication vehicles most commonly employed by corporations in America and Western Europe, and the situations in which each marketing communication vehicle may be most effectively used in an ethical manner. The students will learn both the principles of marketing communication and how to target a market demographically, geographically, and psychographically, to ensure that the marketing communication strategy developed and program executed are consistent with the "best in class" principles of marketing communications. Competencies: A3G, H2G, H3A, FX. Faculty: Terry Mollan.

FUNDAMENTALS OF GLOBAL MARKETING
Undergraduate
This course will help students to understand the basic concepts and practices necessary to market products and services in the global marketplace. The major outcomes of this learning experience will be: identifying activities, principles, and challenges of the marketing process, as applied domestically and internationally; understanding market segmentation, target marketing, and market research and their applications; applying the "4 Ps" of marketing - - product, price, promotion, and place/distribution - - to domestic and global business; and becoming familiar with key issues and international situations encountered when marketing products and services globally. Please note that this is a one-competence, five-week course. Pre-1999 competencies: HCF, WW; BA-1999 competencies: H5, FX.

COMMUNICATION, PRESENTATIONS, PUBLIC SPEAKING
Undergraduate
According to The Book of Lists, fear of speaking in public ranks ahead of fear of dying and disease. While it might not be this extreme for everyone, this course addresses "speaker-fear" and provides learners with both theory and practical experience in the art and science of getting their point across clearly. We will examine personal learning styles and social styles and also work on developing presentations and actually delivering the message. Ice breakers, difficult situations, pacing and diction, openings and closings, and other tools and techniques are explored. BA-1999 Competencies: H3E, H3X, FX, L7; Pre-1999 Competencies: HCF, HCH, HCS, WW. Faculty: Gene McGinnis

INVESTMENTS AND THE ECONOMY: A WELL-OILED MACHINE
Undergraduate
What words must we use to describe "our economy?" The attributes are so pervasive throughout our society, they tend to define and outline our daily lives. More than simply our investment decisions hinge on our economic outlook at any given point in time. Decisions regarding our choices for education, careers, specific jobs, spending and savings, retirement, even marriage and children are at least in part driven by our perceptions of the economy: where it's been and where it's going. So, just what is the "economy", and how do we determine where we are in the economic cycle? And then, what do we do with that information? In this class, we will review major economic theories and determine what factors were in play when the theories were conceived, and how each has been used in the 20th century (and thus far in the 21st) to structure investment decisions. We will determine the various economic variables, as well as tax consequences, and how they impact choices we make for our investment portfolios. This course can be taken for only one competence. BA-1999 Competencies: H1X, FX. Pre-1999 competencies: HCF, WW. Faculty: Nancy Singer.

SELF, WORK AND FAMILY: CHALLENGES AND CHOICES IN A CHANGING WORLD
Undergraduate
This course is designed for everyone who has experienced the challenge of managing a multi-faceted life in a rapidly changing world. It begins with an analysis of the definitions of "self," "work," and "family" across cultures, and examines recent research into generational theory to identify some of the psychological and historical antecedents of contemporary attitudes about these concepts. We then explore the dynamics among these concepts, including conflict, balance, integration, and boundary setting, paying particular attention to the impacts of technological change and the growing number of women in the workforce. Finally, we examine various models for adult development and engage in activities that allow for each student to articulate his or her personal priorities and to develop life and work strategies that enhance workplace performance, productivity, and personal fulfillment. Pre-1999 Competencies: WW, ALS, HCS, ALD, PWQ. BA-1999 Competencies: FX, H5, H3C, S3F. Faculty: Jean Knoll

FINDING BUSINESS IDEAS THAT WILL WIN
Undergraduate
Not all new ideas are good ones. This course teaches students evaluation techniques for determining the business feasibility of a new idea, with the ultimate goal being the writing of a feasibility study for a new product or service idea. This course can be taken for only one competence. BA-1999 Competencies: FX, H3X. Pre-1999 Competencies: WW, HCF. Faculty: Ed Paulson
FA 335
FREE TRADE, FREE MARKETS: THE WORLD TRADING BLOCKS
Undergraduate
This course addresses how large financial institutions organize and control the flow of international trade. In this course, students will study the organizational set up of NAFTA, The European Union, and the smaller Asian trade associations. The World Trade Organization will also be studied and analyzed. Students will explore the various roles of regional exchanges for larger trading blocks. This course will be helpful for all students working in or considering careers in finance, in commercial analysis, or in international business. Competencies: S3X, H5, H1C, H2A, FX Faculty: Joann Gesiakowska

FA 336
DESIGNING PROFESSIONAL TRAINING PROGRAMS
Undergraduate
Training is one thing; training that's really used is the thing. This course prepares the student to identify and select design elements that vary training rhythm in order to maintain interest. Next, the training program content -video clips, role-playing exercises, quizzes, and round-table discussion-fosters behavioral change in those being trained. This course can be taken for only one competence. BA-1999 Competencies: A2B, L7, FX, S2D, H2X. Pre-1999 Competencies: WW, HCH, ALA. Faculty: Will Johnston

FA 337
FOCUSING ON ASSESSMENT OF TRAINING NEEDS
Undergraduate
To put it simply: who needs training and why? Needs Assessment is the third key step in the creation of business training programs. It unearths areas for training and identifies groups who should receive it. A five-week, close examination to help recognize and prioritize essential information. This course can be taken for only one competence and meets the last five weeks of the quarter. BA-1999 Competencies: A2B, L7, FX, S2D, H2X. Pre-1999 Competencies: WW, HCH, ALA. Faculty: Will Johnston

FA 338
EVALUATION AND VALIDITY OF TRAINING RESULTS
Undergraduate
Discover how your training benefits both student and the company. Sophisticated evaluation techniques currently in use by the most respected training organizations are analyzed and tested in this class. In addition, we examine ways to support your own training designs with proof of their validity and reliability. This course can be taken for only one competence. BA-1999 Competencies: A2B, L7, FX, S2D, H2X. Pre-1999 Competencies: WW, HCH, ALA. Faculty: Will Johnston

FA 339
PROFESSIONAL BUSINESS WRITING
Undergraduate
This course develops writing skills used in a business setting. Effective writing skills are directly related to a person's ability to successfully maintain and grow in a career. And as our world continues to shrink globally, being able to produce clearly written communication across all cultures is a skill that is not only desirable but also essential. Through a process-oriented approach, you will learn to plan, investigate, organize, write, and revise successful business reports and correspondence. Emphasis is given to principles of effective professional writing, especially as they pertain to memos, letters, reports, proposals, e-mails and employment messages. You will also be introduced to collaborative writing and intercultural communications within a business context. Finally, you will learn to correctly use one of three different “styles” for documentation: AP (Associated Press), MLA (Modern Language Association) and APA (American Psychological Association). Competences: H2X, H3X, FX. Faculty: Staff

FA 340
IMPLEMENTING CORPORATE TRAINING PROGRAMS
Undergraduate
In this course, students will learn about the strategic process of effectively and efficiently implementing a corporate training program based on business drivers from design stages through measurement of results. This process includes defining requirements and success criteria, designing the process, implementing and powerfully communicating the program to the learners, and then understanding how to measure the success of the program. It is imperative to measure and report on the trends of the program and to understand why it is important. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation, communication, and measurement to ensure success in their future training program implementations. Competences : A2X. H2X, S3X, FX, L7. Faculty: Lori Neblung
FA 341
MANAGING THROUGH TRANSITION: CHANGE MANAGEMENT FOR FIRST-LINE LEADERS
Undergraduate
An examination of the initiation and management of change processes in today's corporate environment. Special emphasis is placed on managing the effects of organizational change on the work group. Students learn to introduce, implement, and drive change. Additionally, students will learn to recognize and overcome resistance to change. Classes will contain videos and leading edge management techniques. Please note that this is a one-competence, five week course. Pre-1999 competencies: HC5, WW; BA-1999 competencies: H2C, FX.

FA 342
MARKETING MOVIES IN TODAY'S HOLLYWOOD
Undergraduate
The course will study in depth the art and science of motion picture marketing for both the major studio films as well as the smaller independent films that are released today. Film marketing encompasses different areas of responsibility and expertise including advertising, publicity, promotion, market research and merchandising, and we will study how they all work together in bringing a movie into the marketplace. The course will examine how a marketing campaign is created, how strategies differ for studio and independent films, and how the movie trailer and poster are created, as well as the costs of advertising, the power of publicity, and the importance of finding the right hook and target audience for niche films. This course provides an inside look into the economic and power structures behind the scenes that help determine which movies are made, distributed and marketed to the public. Competencies: A5, H1C, H2X, FX. Faculty: David Sikich

FA 343
TEAM LEARNING THROUGH PROJECTS
Undergraduate
This course focuses on both theory and practice of how teams learn. Related to theory, participants will review the text of various authors who have written about team learning. Each participant reads the required text and reviews a second a book of their choice related to team learning. The participants then learn from each other the key points of the authors. In practice, participants immerse themselves in a project team that follows a sequence of problem solving steps from analysis through solutions. Competencies: L7 and FX (students may register for only one competence). Faculty: Karen Snyder

FA 344
UNDERSTANDING AND ADDRESSING CONFLICT AT WORK: A LEADER’S GUIDE
Undergraduate
In the workplace differences of opinion are an important source of change, innovation and creativity. Yet when differences are not dealt with effectively, they can grow into conflicts that shatter important working relationships and require precious resources to resolve. Leaders need to be adept at dealing with differences respectfully and creatively to maintain the interdependent relationships that are replacing command and control power structures in today's decentralized, fast-paced organizations. This five-week course will introduce the skills needed to address conflicts in a constructive way and provide an opportunity to practice them. It provides an overview of skills and techniques that help leaders identify and address workplace differences that can lead to conflict as well as help them resolve conflict productively when it occurs so that relationships are preserved. Students will be able to distinguish between the methods of addressing conflict including arbitration and mediation; will identify potential sources of conflict in their own workplace; use skills associated with conflict resolution to facilitate change in non-conflict situations; identify archetypal roles associated with conflict and the story framework associated with the conflict resolution process. Competences: A3X, FX, H3D. Faculty: Paula Bartholome

FA 345
THRIVING FROM BUSINESS SUCCESS
Undergraduate
Once an idea is proven feasible, time must be put into creating a business entity within which that idea can become a reality. This course teaches students the details associated with writing a business plan, forming and managing a functional business and creates a deeper appreciation for what goes into creating and running a business. This class can only be taken for one competence. Pre-1999 Competencies: HCF, WW. BA-1999 Competencies: H3X, FX. Faculty: Ed Paulson (www.edpaulson.com)
LEADING FROM WITHIN: TAPPING YOUR INTERNAL WISDOM
Undergraduate
Leadership begins within us. In order to be an effective leader, we need to have an awareness of how we create in the world. To affect transformation in our organizations, we need to understand the power we have to effect change. Additionally, any leader intending to be at the forefront of their industry needs to experience, apply and nurture their creativity and create an organizational environment that does the same for all company associates. This course looks at leadership as a process of understanding the internal building blocks of effective leadership, whether you are a sole-entrepreneur or the CEO of a fortune-100 firm. It enables students to experience and learn the skills/tools necessary for an innovative approach to leading. The format is largely experiential, with emphasis on exercises, techniques and readings through which the students will investigate the creative process and how it is integral to all aspects of the business. The course is designed to open students to the creativity within themselves and their organizations, and to the tools that promote innovation and enhanced organizational effectiveness. BA-1999 Competencies: A3X, H3F, H2C, FX. Pre-1999: WW, ALF, HCO, HCT. Faculty: Laurie LaMantia

WRITING PERSUASIVE BUSINESS PROPOSALS
Undergraduate
The first step in the creation of effective training programs for in-house or out-sourced clients, this course probes deeply into the art and craft of creating persuasive proposals. It may be a surprise to learn that proposals are written to an effective, sensible formula. Master it in a five-week, close-up examination. This course can be taken for only one competence and meets only the first five weeks of the quarter. Competencies: A2B, L7, FX, S2D, H2X. Faculty: Will Johnston

UNDERSTANDING ORGANIZATIONS AND OURSELVES
Undergraduate
Organizations play an enormous role in our personal, business and community development. At the same time organizations are shaping us, our participation in these organizations shapes their structure, values and behavior. In this course you will begin to understand the dynamic relationship between the individual and the organization, using your own experience as a starting point. This highly participatory seminar format course will give you many opportunities to learn from your own experience of organizations, and those of your colleagues. You will learn to frame your experience in terms of existing and emerging organization theory from the modernist and post-modernist perspective. While this course while be relevant to many, it will be particularly useful to those interested in working with, or influencing organizations, including business people, managers, human resource and organizational development practitioners, and those working in the non-profit sectors. Competencies: A3F, H1E, H2X, FX. Faculty: Pamela Meyer.

TRAINING, TEACHING AND TEAMS IN THE WORKPLACE
Undergraduate
What is workplace learning? Why do employers want to train employees instead of hiring people already skilled, and how is the teaching task accomplished? Is workplace learning different from classroom learning? Do people learn better in groups? Do people accomplish more in groups? Less? Who is the best workplace teacher? Why? In this course, students will address the many concepts and problems raised by the acquisition of skills and knowledge in the workplace. By examining texts, case studies, and experience will uncover theories and methods of teaching and will define productive workplace education. F-X: Can explain the role of training in the workplace. Competences: L-7, FX, H-1-B, H-3-A, H-3-B, H-3-D. Faculty: Bil Murray/ Dina Harris

EFFECTIVE COLLABORATION: SKILLS, STRUCTURE AND CULTURE
Undergraduate
Collaboration or working in teams is part of most 21st century workplaces. It is intended to be a way to tap into the creativity, problem-solving skills and diverse perspectives of today's organizations in an effort to be competitive through creating and sharing knowledge. Collaboration is encouraged in traditional settings “face-to-face” as well as virtually. What does it mean to collaborate effectively? What are the skills, structures/tools and organizational cultures that promote collaboration? During this class students will take a very hands-on approach to exploring these questions while practicing the individual skills that support collaborative work. They will also explore and discuss the types of organizational structures and organizational cultures that support effective collaborative work. Working in groups they will document their shared understanding of these concepts using a free tool for creating a knowledge model of their collaborative efforts. Competences: FX, L7, H3D
**FA 352**  
**BUSINESS ETHICS AND SOCIETY**  
**Undergraduate**  
In this class, we will explore major issues in business ethics related to labor, equal employment opportunity, worker safety and health, environmental quality, financial disclosure, and the role of government and free enterprise in preserving and enhancing our society and market operations. We will examine accepted business practices in light of human needs, justice, rights, and dignity. By exploring a variety of ethical frameworks and perspectives, we will consider the questions of whether or how moral imperatives and values work in the conduct of business. Competences: A3X, A4, FX, H2X. Faculty: Bridgette Mahan

**FA 353**  
**SYSTEMS CHANGE AND CHAOS THEORY**  
**Undergraduate**  
This course focuses on the phenomenon of organizational change. It examines the natural environment as an example of the ways chaos can be a healthy, and often necessary, aspect of an organization’s identity. As organizations continually reinvent themselves, chaos models are useful tools for assessing this change strategically. We address the following specific issues: (1) the complexities of inside, and outside, collaboration; (2) reinvention of the organizational relationship; (3) building a shared vision; (4) systems thinking; (5) Strategies for team-based learning and related leadership skills. Competences: L7, S2D, FX, H2C. Faculty: Team-taught: Tranita Jackson and Joseph Ritchie

**FA 355**  
**USING PERFORMANCE METRICS TO ANALYZE AND ENHANCE BUSINESS RESULTS**  
**Undergraduate**  
Business performance cannot be viewed in a vacuum. It must be viewed in terms of past performance, current results, and where performance levels need to be in order to achieve desired outcomes. This course will explore the use of performance metrics as a strategic tool to enhance business results. Without an accurate, quantitative assessment of what is being done from an actions to outcome perspective, it is difficult to set a course for positive change. Establishing a set of integrated performance metrics involves numerous business processes. In this context, the course will also examine mission statements, business plans, databases, the creation of key tasks, and the establishment of good employee relations through leadership initiatives. The importance that each of these elements has in the business process, as well as how they need to be integrated to produce optimum business results, will be discussed. Competences: H2C, H2D, FX. Faculty: Thomas Bottum

**FA 357**  
**INTERNATIONAL BUSINESS IN THE GLOBAL ECONOMY**  
**Undergraduate**  
The advances in communications technology have changed the global economy and have shaped communities throughout the world. The advent of the Internet, email systems, worldwide shipping capabilities and the pressure for profit production have contributed to the erosion of political and national lines in favor of international trade. Global trade agreements, the World Trade Organization, and the European Union illustrate the new era of cross-national trade taking precedence over tradition nationalistic interests. As the economy becomes more global, it becomes essential for all participants to understand emerging trends in order to thrive, sustain or survive. This course examines the resources used in international business and analyzes movements in the global economy. The process will include a study on how these economic changes effect global communities and redefine ethical systems. Students will learn to identify the underlying factors that move the global economy and what effects those movements have on various ethical, social and economic systems. New economies, economic processes and implementation, as well as political, social and ethical systems construct the global community of today. This globalization effects all in the workforce, regardless of level or perceptions. Each member of the global society should be able to recognize, adapt and interpret current trends in this new economy in order to make appropriate business, social and ethical decisions. This class consists of discussions focused on global systems, economic and ethic, introductory lectures on basic global economic concepts and theoretical frameworks. Students will participate in discussions of current events related to economic globalization and write reflective papers addressing their competencies. Competences: A4, H5, H1X, H1C, FX. Faculty: Daniel Ryan

**FA 359**  
**ETHICAL BUSINESS BEHAVIOR**  
**Undergraduate**  
Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations. Competences: A4, H2X, FX. Faculty: Staff
FA 360
UNDERSTANDING TRAINING AND DEVELOPMENT BASICS
Undergraduate
Both in a stable and unstable economy, employers are compelled to make the best use of their human resources. With globalization of business, widespread and ever changing use of technology, and the ever-increasing demand by employees for work/life stability, employers are seeking ways to keep talented individuals a part of their workforce. One way in which they go about doing this is through training and development. As a manager, supervisor or HR specialist, it is important to understand the basic principles of employee training. Whether you are the initiator or consumer of training instruction, this course will help you develop an awareness of opportunities and challenges in employee training such as assessment of needs, training objectives, needs priorities, training methods and evaluation. This course has been designed as an overview course, and it is not intended for students who have extensive training and development experience. May only be taken for one competence. Competencies: FX, H2C. Faculty: Christine Hayda

FA 361
TEAM BUILDING
Undergraduate
No matter what our expertise, discipline, or area of interest, we are and will continually become members of teams, work groups, task forces and committees in both our work and personal lives. What we once did in isolation, we now do with others. This awareness has required truly effective organizational leaders to examine, understand, and master the ways in which individuals interact in group and team settings. Team Building utilizes an experiential format to focus on a variety of concepts and practices associated with developing and managing effective teams. Different approaches to management, motivation and performance are addressed, along with barriers to effective team efforts. Participants will experience the roles of team member and team leader as they develop their understanding of the "whats" and "whys" of effective teams. Expected student outcomes include mastering the basic concepts, theories, and fundamental techniques in team development and maintenance, identifying current challenges and issues that exist in a variety of settings, including "virtual" teams, and identifying positive team management strategies and their application to those situations. Competencies: L7, H2F, H3D, FX. Faculty: Tony Colantoni

FA 362
CHICAGO: AN ENVIRONMENTAL HISTORY
Undergraduate
This course will explore the history of Chicago from an environmental perspective. From the city's first days, its geographic location amidst surrounding natural resources has been key to the city's development. In this class, we will trace the historical relationship between Chicago and its environs. We will examine the transition of Chicago from a rising industrial power to its position as a burgeoning green urban center. We will study environmental movements of the last century and a half, from early urban reformers to more modern efforts to clean up the city's air, water, and land resources. We will also consider issues of environmental justice, in terms of the distribution of living, working, and waste spaces. Finally, we will investigate contemporary environmental problems and solutions. Students will be expected to attend lectures, participate in class discussions, and research and present their findings on a current environmental issue in Chicago. Competencies: S3C, H4, H1H. Faculty: Chris Wonderlich

FA 363
ADVOCACY AND SELF-DETERMINATION
Undergraduate
Students will study the process of goal achievement from goal definition through development of a vision, review of resources and obstacles, strategic ordering of tasks and steps, effective communication and negotiation, and development of an action plan. They will consider current theory and engage in practical exercises that will require the application of this theory. They will produce a completed action plan for a defined personal goal. Competencies: A-3-D, A-3-X, H-3-X, L-7. Faculty: Lynn Royser and Norene Trondsen

FA 364
STATISTICS FOR MANAGERIAL DECISION, SOCIAL AND BEHAVIORAL SCIENCES
Undergraduate
This course introduces the fundamental concepts and methods of statistics with emphasis on real world applications to a wide variety of fields. Statistical methods constitute valuable analytical tools for decision and policy making in the twenty first century. The apprehension of such techniques should enable business managers, policy makers, educators, behavioral scientists, and other social scientists to reach an informed and well presented conclusion that is based on real-life tractable phenomena. The course begins with a survey of basic descriptive statistics, data sources, and data collection and presentation. It then covers elementary probability theory, sampling, estimation, hypothesis testing, and linear regression. Those statistics and characteristics will be easily computed using the Microsoft Excel, Minitab, or other software. The course focuses not on mathematical proofs of theorems, but rather on practical issues involved in the collection, treatment, and interpretations of historical data from a wide variety of areas of interest, including finance, economics, education, psychology, public opinion, demography, immigration, and data in the related fields using the techniques of statistical inference. More importantly, it is crucial to keep in mind throughout this course that the reliability of any decision or policy making based on historical data depends on well constructed statistical inference. You do not need to have previous knowledge of Minitab or other statistical software to take this class, however you are expected to be acquainted with Microsoft Excel. Competencies: S-2-X, H-2-E, F-X. Faculty: Samuel Koumkwa
**FA 365**
**THE LEADERSHIP EDGE**
**Undergraduate**
The course is designed to give students a practical understanding of the ways transformational leaders are having a lasting impact on a wide array of organizations ranging from major corporations, to nonprofits, to international institutions. In the process, students will learn leadership lessons that can contribute to their personal and professional growth and development. The principles of deep change can apply to people at every level of an organization regardless of its size. The class is interactive and will include case studies as well as movies portraying transformational leaders who have pursued the vision of deep change. Multi-media activities will include small and large group discussions and presentations, research, report writing and video and audio tape presentations. Students prepare a paper based on personal experience, class activities and independent research to demonstrate their understanding of the competency chosen. Competences: A-3-C, H-2-C, F-X, A-4
Faculty: Greg Gilmore

**FA 366**
**CULTURAL PERSPECTIVES ON THE GLOBAL ECONOMY**
**Undergraduate**
This course explores economic globalization from the perspective of the ethical and religious values of the world's major cultural traditions. For all their differences, the religious traditions of the world have one thing in common: the poverty, suffering and violence that afflict a tremendous number of people in our global economy. This course will explore how the world's religious and spiritual traditions can help us collaborate to reduce economic injustice and promote environmentally responsible development. In particular, we will focus on the unique perspective that Buddhism can bring to economics. The goal is to promote an intercultural dialogue that will help us learn collaboratively about some of the most important and practical issues of our day. Competences: H2A, A3A, A4, FX. Faculty: Michael Skelley

**FA 367**
**INTEGRATED MARKETING COMMUNICATIONS**
**Undergraduate**
This course introduces the concept of Integrated Marketing Communications (IMC) which is the approach that more and more marketing and communications professionals are using to face the challenges of the contemporary market place. An increased rate of advertising clutter in most traditional media, the rapid growth of the internet, a more product knowledgeable and demanding consumer with an increased variety of options to chose from, higher pressures from manufacturers to retail chains and a global economy are only a few characteristics of today's business environment. We will use real examples of companies and industries to analyze the concepts of advertising, sales promotion, direct marketing, interactive/internet marketing, public relations and personal selling and the most common techniques for understanding consumer behavior and create an effective promotional campaign that integrates some of these tools to target specific markets. Additional skills for the creation of visual layouts and global market penetration analysis will be developed for some students depending upon their selected competences. Competences: A2X, H2X, FX. Faculty: Staff

**FA 368**
**COMPASSIONATE BUSINESS: STRESS REDUCTION IN THE WORKFORCE**
**Undergraduate**
A system of spiritual growth; A system of stress relief. In the business world, the stress on a person's life and health has a direct impact on their productivity and creativity. Studies have shown that as stress increases in someone's life, their productivity at work goes down. The current state of humanity and technology has created a world with a new type of stress; the pace and speed of interaction has increased to a rate where a person has to deal with an influx of information and, often, interactions with hundreds of people per day via different technologies. In this course we will study another worldview in order to develop survival skills that reduce our stress. This different world view is the Yogic tradition from India called Kundalini Yoga. By taking this course, students will develop stress relief techniques and a sense of great purpose in their business lives. We will lower the stress level in our lives by participating in Kundalini Yoga stress reduction techniques from a video, weekly meditation exercises and textbooks. Through the course we will also develop Personal Goals (1 year, 5 year and 10 year), Value Statements based on self developed principals, personal mission statements, and a unique self care plan tailored to each student's individual temperament, to use during periods of stress. Students taking the course for H2X will create a volunteer project to promote a better quality of life for their colleagues. All students will be required if possible to attend one field trip; a regular Kundalini class. Competences: H2X, A3B, FX. Faculty: Dr. Japa Khalsa www.espanolaacupunture.net

**FA 369**
**HUMAN RELATIONS IN THE WORKPLACE**
**Undergraduate**
In this career analysis and development course, students examine the six key Human Resource functions with their accompanying principles, and then examine and practice key Human Relations skills and roles in order to develop their competence in understand how people perform in the workplace. Specifically, students will be involved in understanding the interrelated functions of: workforce planning, design of productive work systems, structure and process of labor law, development of flexible compensation/benefits programs, design of effective employee safety/security/health programs, and construction of intelligent information systems for the human resources environment. Students will witness and measure the practice of the key skills and roles including goal-setting, communicating, and negotiating. Students will also practice assessing performance, retention, and other human resource functions. Competences: FX, L7, H3X, S3X. Faculty: William Henning
FA 370
STRATEGIC APPROACHES TO PROJECT MANAGEMENT
Undergraduate
Project management can be broadly defined as planning, scheduling of non-routine tasks, and allocation of resources to complete a specific project deliverable within a given time period. Today, global economic competition, limited resources, tight deadlines, and the complexity of projects demand knowledge of systematic project management techniques and applications of project management tools. This course is designed to provide a general framework to assist you in developing fundamental project management skills and the application of strategic approaches to successful project management. Topics include concepts and techniques in developing a project plan, budgeting, cost management, and scheduling. Project scheduling topics will address scheduling techniques (PERT- Program Evaluation Review Technique and CPM- Critical Path Method), methods to assess risk, resource allocation, and project acceleration. Additional topics include project monitoring, control, evaluation, and project termination processes. To demonstrate a basic knowledge of project management concepts, individual project case studies for this course will build upon competencies and utilize basic project management tools. Competences: H3D, FX, S1X. Faculty: Paul Okamoto

FA 371
WORK AND THE MODERN SELF
Undergraduate
Our identities are shaped by the work that we do (and by the work that we do not have the opportunity to do). This course will address the impact of working and of the products of our work on our sense of self. For some people, "work" refers to one's job, the means of one's livelihood. Others use the word to describe volunteer work, housework, or other productive activities. Some people associate "work" with drudgery and compulsion, while others think of the word in terms of productivity and stimulation. We will consider work from the perspective of our needs and values, but also from the perspective of the needs of society. We will also consider the value that society assigns to different types of work (and the impact of that valuation on us and on various social groups). Other topics will include how work affects our family and social lives, how our private lives affect our experience of work, and the impact of technology on our work. Competences: A3D, H4, S3F, FX. Faculty: Kevin Buckley

FA 372
GENDER, MIGRATION AND THE NEW WORLD ORDER
Undergraduate
All over the world more and more women are migrating to different countries or parts of the world. The majority of these migrants are employed as "nannies, maids, and sex workers." The global restructuring of national or regional economies results in massive unemployment and the destruction of traditional sources of livelihood. Women therefore migrate to other countries or parts of the world in order to secure their own and their family members' livelihoods, and an array of national policies and institutions propagate, mediate, and benefit from the global free trade or domestic or sex workers. In this course we address these issues by asking to what extent the traditional gender-based values of the old world order remain intact in this new economy while crossing divisions based on class, racial-ethnic, geopolitical, or cultural differences. Migrant women's experiences, voices, and individual and collective acts of resistance or organization are center-staged in this course. Competences: H4, H5, A3C, A4, H1B, H2A. Faculty: Mechthild Hart

FA 373
IRELAND FROM THE INSIDE OUT
Undergraduate
The Irish can lay claim to shaping and exporting to the larger world the work of musicians Bono, U2, and the Cranberries, poet Seamus Heaney, novelist Roddy Doyle, screenwriter and director Neil Jordan (The Crying Game, Michael Collins) and the re-emergence of Celtic spirituality. All of this is an outgrowth of the tremendous social, economic and political changes occurring over the past twenty years in Ireland. This course examines the economic, social and political history of Ireland, as well as the forces shaping recent changes within the society. While the island's total size is only 52,341 m2 or approximately the size of Alabama with close to 4 million people living in the Republic of Ireland, it has been at the center of historic change and a crossroads for many shifts in European and world history. Students will demonstrate the competencies through class participation, field work, research and other assignments that will allow them to apply course readings, guest speakers, videos and discussion to their own interests. Competences: H5, H2X, H1X, A1X. Faculty: Rebecca Lindsay-Ryan.

FA 374
LITERATURE AND CINEMA AND THEIR IMPACT ON THE HUMAN EXPERIENCE
Undergraduate
How does literature and film transform the human experience? Through fiction, drama, and film from different cultures, in this course, students will explore how these art forms shape the individual, and have the ability to transform us mentally, emotionally and physically. Through international literature and films, this course will emphasize the study of different cultures, different views, different systems of thoughts and values. The goal of this course is to learn that in spite of differences, there is a universality and sameness in human’s emotions and needs. This course will focus on screening a variety of films, reading different forms of literature, and will require students to discuss and analyzing films and books. Competences: A1A, A5, H1X, H3X. Faculty: Ezzat Goushegir
FA 375
NARRATIVE FOR FREEDOM: THE LITERATURE OF AMERICAN ABOLITIONISM
Undergraduate
This course facilitates discussion and learning about a challenging subject in American history. Through literary writings from the Abolitionist Movement, we will study the oppressive nature of the American system of slavery as we read stories of resistance. Autobiographies are powerful sources--they animate life experiences and bring the past to life. The Narratives of slavery and freedom we will read in this class galvanized their 19th Century readers, as men and women bore witness to the violence and injustice they experienced under the slave system. They explicitly called upon the conscience of the nation--to abolish slavery and to live up to the ideals of freedom, equality, and democracy. In addition to rooting these Narratives in history, we will also explore how and why they were created, their rhetorical styles, as well as their place in black literary history. Competences: A1E, A5, H2H, H3G. Faculty: Anne Rapp

FA 376
PERSONAL MASTERY AND THE ORGANIZATION
Undergraduate
Peter Senge says, "Personal mastery goes beyond competence and skills...it means approaching one's life as a creative work, living life from a creative as opposed to a reactive viewpoint." This course starts with an introspective look into managing oneself, then moves into using tools to provide data on oneself and lastly, integrating the information into one's personal and professional life. Various personal development theories and models will be explored and used to build a Personal Development Plan. This course is for students who wish to engage in continual learning and self-reflection, and will provide an opportunity to identify ways for improving personal effectiveness, both at life and at work. Competences: A3X, H3X, FX. Faculty: Shawna Myers & Karmen Ehman

FA 377
A LIVING MOVEMENT: TOWARD A WORLD OF PEACE, SOLIDARITY AND JUSTICE
Undergraduate
How can we make sense of the enormous changes taking place in our world? From the Egyptian victory to overthrow a dictator to the struggle of Wisconsin union members, non-violent actions are spurring more peace, solidarity and justice. How do we take part in building a movement of peace, solidarity and justice? Join the Living Movement course and travel to Memphis, TN for the joint conference of the Peace and Justice Studies Association and the Gandhi-King Conference. Over 1,000 people will attend to share stories from the front lines of the struggles for peace and justice and listen to evidence from scholars on the victories of non-violent action. Meet national leaders and network with activists from all over the country. This is a one competence course: A3X, H1X, or H4. See peacejusticestudies.org or gandhi/king.org for more information. Faculty: Maureen Dolan. Please note this is a travel course with additional costs for conference registration, hotel, food, and travel.

FA 378
THE UNDERGROUND RAILROAD
Undergraduate
This course uses the geographic region of west central Illinois. Specifically, the course focuses on Jacksonville, the county seat of Morgan County, Illinois. The engaging learning questions are what does Jacksonville have to teach us about the Underground Railroad and why is that important? The activities of a developing nation coming to grips with the institution of slavery, manifest destiny, expansion and growth are the sources of present day identity. How these giant issues made an impact in a small town that was growing along with the rest of the nation serve as a metaphor for development of the west. Though we will deal with the real lives of real people and their experiences of daily life, we will also consider Jacksonville as an example for all those places that were equally active on the stage of national development and the pathway that led inevitably to the Civil War. We cannot consider all of the issues with which these early settlers contended, but we will focus our attention more narrowly and peer into the lives and times of these pioneers through the lens of "...our peculiar institution..." we know as slavery and the flight for freedom. We will consider the experiences associated with this flight from the perspectives of those who fled and those who helped the freedom seekers flee. We will consider a thirty-year time frame from 1830 to 1860 and we will inquire into the political, theological, educational, agricultural, and motivational traits and attitudes that brought people to this place and influenced their actions. We will draw connections between important personal values and why people came to this frontier of the national western boundary of the U.S. and how the institutions they built continue to transform our lives. Competences: L7, A1B, H4, H2A, H3G. Faculty: John Willets
FA 379
WAR PRESIDENTS/ PEACE PRESIDENTS
Undergraduate
Presidents of the United States have been analyzed from various perspectives over the years: as Federalists or Anti-Federalists; as Whigs, Democrats or Republicans; as activists or conservatives; as friendly to business or labor or consumers; as good campaigners or bad; as popular or unpopular; successful or unsuccessful, and so forth. This course will look at the history of the U.S. presidency through the lens of War and Peace. Presidents have been entrusted by the People with enormous powers, but none so solemn and vital as those of "Commander-in-Chief." During the nation’s 229 years, which Presidents have been primarily known for their roles as War Presidents? Which wars were "major" and which "minor"? Which wars were initiated by which Presidents? Which were wars in response to attacks on the United States? Which were wars initiated by Congress? Were all of these wars "just wars"? What is a "just War"? Does it matter whether or not it is just or just that we win? Which Presidents pursued diplomacy to avert war? Which Presidents were known for their dedication to Peace? Which were both? How did the various Presidents handle tough times of war or peace? How did they perform as leaders and react to public dissent or support? What was the impact of their decisions on the nation's well-being? What lessons can we learn from these histories? Each student will individually study one President from the 18th or 19th century during the first five weeks of class; and a 20th century President during the final five weeks, by reading from various biographical sources. Each week students will bring their reading and research results to share with the class, so we gain an even broader perspective. We also will follow the unfolding events of the current U.S. overseas wars and the actions of the current President of the United States, Congress and Press. Competences: A3C, H1X, H2X, H5. Faculty: R. Craig Sautter

FA 380
ARTISTIC EXPRESSION THROUGH DIGITAL PHOTOGRAPHY
Undergraduate
A photographer is someone who combines the compositional skills of an artist, the analytical mind of a scientist and the observational soul of a poet. In this introductory course you will become all three as you study traditional photographic composition and interpret the images you captured with your digital camera in the darkroom of Adobe PhotoShop. Competences: A1A, A2D, A5, S3X. Faculty: Michael Boruch

FA 381
CONFLICT AND COOPERATION AMONG NATIONS: BUILDING DEMOCRACY AND A FREE MARKET IN IRAQ
Undergraduate
This course is an introduction to international relations, the analysis of the actors, institutions, and events, which influence the processes of international politics, the market, and the development of strategy. The context of the course is based on the changes caused by 9-11 to international politics, markets, strategies, and the consequences of those changes. This course will use the effort to construct a democracy and a free market in Iraq as a case study to explore the larger changes occurring in the international system in the post 9-11 era. Every student will be expected to know the substance and controversies attendant to political, economic, and military developments in Iraq. Each of these areas is fundamentally critical in assessing whether building democracy in Iraq can succeed. A critical analysis of democracy in Iraq is a major goal of this course. Competences: H5, H1C, H2E, FX. Faculty: Dr. James Brask

FA 382
DESIGNING ORGANIZATIONS
Undergraduate
While examining theories of organization and organizational behavior students will: Explore the raison d'etre of modern organizations and how they evolve. Learn the core variables and processes that determine an organization's structure and capacity for achievement. Consider the accelerating and transformational changes in current organizational design including: Digital technology's impact on organizational form, from classic forms to distributed and virtual organizations; The shift from organizations being risk averse to taking risks to enhance innovation; Virtual work environments and shared offices; How emphasis on collaboration has changed the organizational landscape. Competences: A-3-X, H-1-F, H-2-F. Faculty: Staff

FA 383
CONTEMPORARY ETHICS
Undergraduate
This course briefly examines the ethical responses to problems in contemporary society. The main emphasis will be to establish basic competence in the comparison of systems of ethics in an effort to assist dialogue in our pluralistic world. The goal of this course is to assist students in making decisions in today's highly charged socio-political world characterized and fueled by competing ethical tenets, and to consider their roles in the development of a tolerant society. Competences: A1X, A3X, A4. Faculty: William Wassner

FA 384
THE ROLE OF GLOBAL BUSINESSES IN ERADICATING POVERTY
Undergraduate
In this course, students will explore globalization and the role of international businesses in creating jobs and making a profit as perhaps the best way to eradicate poverty in developing countries. We will also examine the role of the Millennium Development Goals (MDGs) in reducing poverty, promoting human rights, safeguarding the environment, and creating new global business partnerships. Course website: http://condor.depaul.edu/~pszczerb/global.html Competences: A3C, H1X, H2X, H3X. Faculty: Patricia Szczerba
FA 385
THE AMERICAN DREAM: MAKING IT OR NOT IN THE USA
Undergraduate
Throughout our country's history, our culture has embraced the notion of the Great American Dream. Rags-to-riches heroes have fascinated and inspired us; have shaped a cultural belief system which teaches that anyone can be anything in America if they demonstrate the talent, the intelligence, and the willingness to work hard for financial success. Critics of the American Dream argue that it is simply not possible for everyone to prosper through determination and hard work alone. Our continued belief in the American Dream, they suggest, blinds us to the structural factors that influence individual success or failure such as class privilege and institutional discrimination. In this class we will examine the American Dream in detail. How and why did it develop in our culture? How is it taught and shared by members of our culture? How does the American Dream compare to cultural messages regarding individual capabilities in other countries? Does our belief in the American Dream empower or restrict individual potential? Through an examination of interdisciplinary readings, film and television material, and lively in-class discussions, students in this course will critically examine the American Dream and its impact on our culture, and on individual life experience. Competences: A3G, H3G, H4. Faculty: Kathryn Mary Johnson

FA 386
EXPLORING THE NONPROFIT WORKPLACE
Undergraduate
Working in a non-profit organization can be a very rewarding experience. But how do you know what would be a good fit based on what you can offer? This exploratory course provides students with an overview of what ingredients make a non-profit successful. The lessons provide students with an understanding of how a social issue can be conceptualized into a program to form a non-profit organization. Students learn the basic operational components of an effective non-profit, explore best practices, determine how institutions impact social problems and evaluate their effectiveness. Students also reflect upon their own skills and abilities as they research or interact with non-profits to help guide them into an environment that matches their interests. The course is interactive and consists of a film, reflection, group and individual exercises, readings, discussion, research and writing. The final paper may consist of examining a social issue from an ethical perspective, analyzing the challenges faced by urban, suburban or rural settings, evaluating the effectiveness of how a social institution addresses a social problem or designing an individualized transition plan to volunteer or work in a non-profit organization. Students may also propose a competence and an idea for the final paper. Competencies: A3C, H1H, H2A, FX. Faculty: Maria L. Ugarte-Ramos

FA 387
AFRICAN-AMERICAN CULTURAL VALES, HISTORY, AND PERSPECTIVES
Undergraduate
This course is important for students who seek to gain a comprehensive understanding of African-American history in the United States. It will begin with discussions of African culture, the Atlantic Slave Trade, and early forms of slavery/indenturing. It will pay particular attention to the colonial and Revolutionary experience, delving into the mass exodus of Africans during the Revolutionary War, and African-American's role and position in the country's formative years. Enslavement, the Civil War and Reconstruction will follow as key areas of study. In every discussion, students will be asked to look for parallels between the contemporary and 18th and 19th century African-American experience and, where appropriate, to identify key social and cultural thinkers and leaders of the various historical periods. The primary texts for the course will be John Hope Franklin's From Slavery to Freedom, articles and readings written by scholars and important early African-American artists and intellectuals, and video presentations. It is offered for H-4, H-1-F, H-1-B, FX, and A-3-C. Faculty: Nancy Davis

FA 388
PUBLIC/COMMUNITY RELATIONS
Undergraduate
Public relations is a tool for promoting an activity, an event, a company, product, or person. Students will learn about the various contexts where public and community relations activities can be used to increase the public's awareness of the value and worth of a particular product, person, or activity. Case studies will be used to illustrate how public relations can enhance one's image and visibility, especially in the funding raising or marketing world. Students will learn: 1) the overall purpose of public and community relations, 2) its use as a strategic marketing/promotional tool, and 3) how to develop a public relations plan that can be implemented. They will also learn the importance of knowing their audience and appropriately communicating messages to different groups. They will also examine the role that media, as both a social institution and a technological tool, is used to communicate a wide range of messages and information. Competencies: L-7, H1A, H2G, FX. Instructor: Staff

FA 389
INTRODUCTION TO RESTORATIVE PEACEMAKING PRACTICES
Undergraduate
This course will provide an introduction to the emerging field of restorative justice. The purpose is to present an overview of the restorative justice philosophy, principles and practices, including victim offender mediation, conferencing and peacemaking circles. Competencies: A3F, H3D, L7, FX, H3G Faculty: Peter Newman and Elizabeth Vastine
FA 390
DIVERSITY: IN AND BEYOND THE WORK PLACE
Undergraduate
Diversity, Multiculturalism, Affirmative Action, Equal Opportunity Employer these are all words that have historical significance and power in today's workplace. This course will examine how the United States workplace has attempted to address diversity and what have been the challenges along the way. Other aspects of life in the United States such as families, schools, churches and neighborhoods have functioned with less of an effort to represent the pluralism of society. This course will explore these differences and evaluate the experiences of the individual, organizations, and institutions from a multitude of perspectives. Students will demonstrate the competencies through class participation, group projects, journal entries and other assignments that will allow them to apply course readings, films, and discussion to their own personal experience. Competences: FX, A1E, H1B, L7, S3X. Faculty: Elisabeth Lindsay-Ryan

FA 391
THE POLITICS AND HISTORY OF THE VIETNAM WAR
Undergraduate
The Vietnam War was the longest and, perhaps, the most controversial of American Wars. This course will briefly examine Vietnamese society and the First Indochina War as introduction to discussing the Second Indochina War. This course has four main objectives: 1.) to examine why and how the Second Indochina War was fought; 2.) to analyze the portrayal of the war in literature and film; 3.) to analyze what has been learned, and what should have been learned, from this war and 4.) examine how such lessons influence contemporary policy and perceptions, (i.e. the significance of the Vietnam War in assessing the wars in Iraq and Afghanistan, the effect of the war on the decision making calculus of the media, public, and politicians). Competences: H5, H1F, H2E, FX. Faculty: Dr. James J. Brask

FCH 101
BASIC FRENCH I
Undergraduate
Listening to, speaking, reading and writing French in a cultural context for the beginning student.

FCH 102
BASIC FRENCH II
Undergraduate
Continued emphasis on the four skills in culturally-authentic situations.

FCH 103
BASIC FRENCH III
Undergraduate
Completion of the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression.

FCH 104
INTERMEDIATE FRENCH I
Undergraduate
Intensive practice in the use of French through listening, speaking, reading, and writing, and continued enhancement of the cultural awareness intrinsic to those skills.

FCH 105
INTERMEDIATE FRENCH II
Undergraduate
More concentration on the four language skills in an authentic cultural context.

FCH 106
INTERMEDIATE FRENCH III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing French with a concomitant heightened awareness of the cultural dimensions of the French language.
FCH 197
SPECIAL TOPICS IN FRENCH
Undergraduate
See schedule for current offerings.

FCH 198
STUDY ABROAD
Undergraduate
Variable credit.

FCH 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

FCH 201
ADVANCED COMMUNICATION I
Undergraduate
Developing culturally appropriate speech and writing through the study of speech acts and written documents within the context of a systematic study and review of grammar.

FCH 202
ADVANCED COMMUNICATION II
Undergraduate
Focus on the differences between speech and writing with an emphasis on the latter as expressed in compositions, editing, and other writing activities.

FCH 203
ADVANCED COMMUNICATION III
Undergraduate
Developing a sophisticated spoken fluency using authentic oral texts as models for elaborated discourse. Written texts and writing exercises reinforce oral expression.

FCH 204
ADVANCED COMMUNICATION IV
Undergraduate
Continued refinement of advanced speaking skills by focusing on oral texts discussed in their sociocultural context. Backup support provided through written texts and exercises.

FCH 297
SPECIAL TOPICS IN FRENCH
Undergraduate
See schedule for current offerings.

FCH 298
STUDY ABROAD
Undergraduate
Variable credit.

FCH 299
INDEPENDENT STUDY
Undergraduate
Variable credit.
FCH 301
THE MIDDLE AGES
Undergraduate
Chansons de gestes, theatre, lyric poetry, chronicles.

FCH 302
SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE
Undergraduate
1600 to the end of the "Ancient Regime".

FCH 303
ROMANTICS, REALISTS, AND REBELS
Undergraduate
19th-century French literature.

FCH 304
FRENCH CIVILIZATION I
Undergraduate
Intellectual, political and social background from early times through the revolution.

FCH 305
RENAISSANCE
Undergraduate
LaPleiade, Rabelais, Montaigne, Marguerite de Navarre.

FCH 306
SEVENTEENTH-CENTURY FRANCE
Undergraduate
From the baroque through the classical period.

FCH 307
THE AGE OF ENLIGHTENMENT
Undergraduate
Contributions of 18th-century French thinkers.

FCH 308
THE ROMANTIC MOVEMENT
Undergraduate
Lamartine, Hugo, Vigny, Musset.

FCH 309
THE FRENCH NOVEL
Undergraduate
Topics include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel.

FCH 310
FRENCH DRAMA
Undergraduate
Topics include: classical drama; romantic drama; contemporary drama.
FCH 311  
FRENCH POETRY  
Undergraduate  
Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets.

FCH 312  
TWENTIETH CENTURY WRITERS  
Undergraduate  
Proust, Gide, Malraux, Camus, Sartre.

FCH 313  
THE SURREALIST REVOLUTION  
Undergraduate  
Nerval, Lautreamont, Breton, Aragon; Films of Man Ray and Bu?uel.

FCH 314  
CONTEMPORARY FRENCH WRITERS  
Undergraduate  

FCH 315  
CONTEMPORARY FRENCH CRITICISM  
Undergraduate  
Topics include: structuralist critics; feminist critics; post-modernist critics.

FCH 316  
FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN  
Undergraduate  
Classic and emerging writers of these regions.

FCH 317  
THE LITERATURE OF FRENCH CANADA  
Undergraduate  
Classic and contemporary French-Canadian writers.

FCH 319  
FRENCH/FRANCOPHONE WOMEN WRITERS  
Undergraduate  
Studies in literary, cultural and social issues.

FCH 320  
FRENCH FOR BUSINESS  
Undergraduate  
Advanced preparation for the use of French in the business world.

FCH 321  
TRANSLATION  
Undergraduate  
Fundamental principles of translation and acquisition of practical skills involved in translating original documents from French into English and from English into French in the areas of literature and other topics. Three years of college French recommended.
FCH 322
FRENCH GRAMMAR AND USAGE
Undergraduate
An examination of French grammar as a linguistic system and of notions of "standard" in written and spoken French. Recommended for future teachers and students interested in grammatical analysis.

FCH 323
TRANSLATION II
Undergraduate
Continues introduction to fundamental principles of translation and acquisition of techniques for translating a range of texts from French into English. Continuation of FCH 321.

FCH 324
TRANSLATION III
Undergraduate
Intensive practice of French-English translation. Continuation of FCH 323, with internship involving francophone companies or a free-lance translation project. Completes professional experience and portfolio for students seeking Minor in French Translation or a specialization in translation within their French Major.

FCH 326
FRENCH STYLISTICS
Undergraduate
An intensive writing course, providing rhetorical, linguistic, and literary analysis of varied styles of writing.

FCH 329
FRENCH CINEMA
Undergraduate
Topics in French film from its origins to the present day.

FCH 332
FRENCH CIVILIZATION II
Undergraduate
Intellectual, political and social background from the rise of Napoleon to the current time.

FCH 340
FRENCH CIVILIZATION III
Undergraduate
Contemporary France.

FCH 341
INTRODUCTION TO FRENCH LITERATURE I
Undergraduate
Survey of French literature from its beginnings through the 17th century. (Required of all majors). Taught in Autumn quarter every two years on a rotating basis with FCH 342.

FCH 342
INTRODUCTION TO FRENCH LITERATURE II
Undergraduate
Survey of French literature of the 18th and 19th centuries. (Required of all majors). Taught in Autumn quarter every two years on a rotating basis with FCH 341.
FCH 345
THE AFRICAN PRESENCE IN FRANCE
Undergraduate
A cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. Includes: Algeria, Morrocco, Tunisia, Senegal, Cameroun, Mali.

FCH 350
FRENCH PHONOLOGY AND PHONETICS
Undergraduate
An in-depth study of the language's sound system and intensive pronunciation practice. (Required of all majors).

FCH 397
SPECIAL TOPICS IN FRENCH
Undergraduate
See schedule for current offerings.

FCH 398
STUDY ABROAD
Undergraduate
Variable credit. Students participating in the Institute of European Studies will be allowed to count a total of three courses (semester program) or five courses (year program) towards their major or minor requirements.

FCH 399
INDEPENDENT STUDY
Undergraduate
Variable credit. Permission of chair and instructor required.

FCH 401
THE MIDDLE AGES
Graduate
Chansons de gestes, theatre, lyric poetry, chronicles. Cross-listed with FCH 301.

FCH 402
SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE
Graduate
1600 to the end of the "Ancient Regime". Cross-listed with FCH 302.

Graduate
Intellectual, political and social background from the rise of Napoleon to the current time.

FCH 440
FRENCH CIVILIZATION III
Graduate
Contemporary France. Cross-listed with FCH 340.

FCH 441
INTRODUCTION TO FRENCH LITERATURE I
Graduate
Survey of French literature from its beginnings through the 17th century.

FCH 442
INTRODUCTION TO FRENCH LITERATURE II
Graduate
Survey of French literature of the 18th and 19th centuries. Cross-listed with FCH 342.

FCH 445
THE AFRICAN PRESENCE IN FRANCE
Graduate
A cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. Includes: Algeria, Morrocco, Tunisia, Senegal, Cameroun, Mali. Cross-listed with FCH 345.

FCH 450
FRENCH PHONOLOGY AND PHONETICS
Graduate
An in-depth study of the language's sound system and intensive pronunciation practice. Advanced knowledge of French is highly recommended.

FCH 450
FRENCH PHONOLOGY AND PHONETICS
Graduate
An in-depth study of the language's sound system and intensive pronunciation practice.(Required of all majors). Cross-listed with FCH 350.

FCH 491
FRENCH FOR READING
Graduate
Intensive review of basics of French grammar, vocabulary and sentence structure, for reading knowledge of scholarly articles in French.

FCH 497
SPECIAL TOPICS IN FRENCH
Graduate
See schedule for current offerings.

FCH 498
STUDY ABROAD
Graduate
Variable credit. Permission required.
FIN 202
QUANTITATIVE REASONING
Undergraduate
This course is designed to provide the students with an overview of basic statistical tools of financial analysis. Is a course designed to familiarize the students with the design and application of spreadsheet models for the analysis of financial data and tests of hypotheses.
FIN 310 is a prerequisite for this class.

FIN 290
FINANCE FOR NON-BUSINESS MAJORS
Undergraduate
This course will provide to non-business majors a foundation in the concepts and basic tools used in finance and financial management of the business firm, including time value of money, risk and return, interest rates and how companies raise money and reward their investors. Students will be able to understand at a basic level the financial statements, ratios and performance measures and financial markets and institutions they are likely to encounter in a general business environment. Students will also learn how to analyze and make more effective the operations of the firm from a financial perspective.

FIN 310
INTRODUCTION TO FINANCE
Undergraduate
This course introduces students to the logic, principles, institutions, and terminology of finance. The goal of the course is to provide students with a basic understanding of the role of finance and its functions. It is designed to familiarize the students with tools necessary for making sound financial decisions, both at a personal level and at an enterprise level.
ACC 101, ACC 102, ECO 105, ECO 106 and (MAT 135, MAT 136 and MAT 137 or equivalents) are prerequisites for this class.

FIN 311
CORPORATE FINANCE
Undergraduate
The goal of the course is to provide students with the basic tools and theoretical background necessary to understand the corporate financial decision making process. Emphasis is on valuation principles with application to bonds, stocks, and capital budgeting as well as issues involving the capital structure, working capital, and dividend policy.
FIN 310 is a prerequisite for this class.

FIN 313
INVESTMENT BANKING
Undergraduate
This course is designed to provide students with a broad overview of investment banking, the structure of the industry, and analytical tools commonly used in the profession. Students who successfully complete the course will develop the skills necessary for an entry-level analyst position with an investment bank. Spreadsheet skills, valuation methods, company, deal and market analysis will be emphasized. The course will also foster the development of presentation and writing skills through group analysis and preparation of case studies.
FIN 310 is a prerequisite for this class.

FIN 320
MONEY AND BANKING
Undergraduate
Study of money and banking as a means to understanding how operations of our financial institutions affect functioning of our economic system and evaluation of monetary policies and goals.
FIN 310 is a prerequisite for this class.
FIN 323
COMMERCIAL BANKING
Undergraduate
The purpose of the course is to analyze the role of commercial banks in the financial system in order to understand the problems and issues confronting bankers now and in the future. The nature of the business of banking will be discussed with particular emphasis on bank mergers and acquisitions; competition from non-banking firms; understanding government policy and how that policy could influence the behavior of banks; measuring and evaluating bank performance; using asset and liability management techniques to gain a greater understanding of the risks that banks face and how they attempt to manage those risks.
FIN 320 is a prerequisite for this class.

FIN 330
INVESTMENTS: THEORY & PRACTICE
Undergraduate
Investment principles and problems. Development of the student's perception of risks and opportunities in investment instruments and markets; description of the markets and their operations; effects of current financial events upon the various markets.
FIN 202 and 320 are a prerequisite for this class.

FIN 333
FINANCIAL STATEMENTS ANALYSIS
Undergraduate
FIN 311 is a prerequisite for this class.

FIN 335
PORTFOLIO MANAGEMENT
Undergraduate
Theories and techniques to achieve superior selection and management of securities portfolios. Review and evaluation of significant literature. Problems of timing and strategies in response to changing economic and financial conditions.
FIN 330 is a prerequisite for this class.

FIN 340
INTERNATIONAL FINANCE
Undergraduate
The objectives of this course include: understanding the effect of political and economic factors on the financial decision-making of the firm, determining the major factors influencing currency value; analyzing and managing the spectrum of risks arising from a firm's international operations; and acquiring knowledge of the international financial system and the major players in that system.
FIN 320 is a prerequisite for this class.

FIN 350
REAL ESTATE ANALYSIS
Undergraduate
This course introduces essential institutional, legal, regulatory, and financial aspects of real estate in the U.S. economy and financial system. The course incorporates demographic data for real estate market analysis and includes an exercise in land use planning. PREREQUISITE(S): Junior standing
FIN 360
IPOs & VENTURE CAPITAL
Undergraduate

IPOs and Venture Capital will explore equity financing alternatives for private companies, including their final funding step as a private company - their initial public offering or IPO, when they go public. Although the course has some quantitative elements, the focus will typically be on the analytics - on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest and optimize incentives. The main emphasis is on the U.S., but fund-raising methods and options in other countries also will be covered. This course should be useful for those interested in investment banking, venture capital, private equity, or securities law, or those that hope to have a start-up of their own someday.

FIN 310 is a prerequisite for this class.

FIN 362
RISK MANAGEMENT
Undergraduate

Theories and techniques of risk management that employ statistical techniques which enhance risk decision-making. This course develops a framework of analysis that can be applied by corporate or investment risk managers.

FIN 320 is a prerequisite for this class.

FIN 363
DERIVATIVES: PRICING & APPLICATIONS
Undergraduate

This is an advanced course that focuses on the pricing models for the four derivative instruments: forwards, futures, options and swaps. The first part of the course is devoted to the two general classes of derivative pricing models: discrete time and continuous time, with each model's properties discussed in detail. These models are then applied to a range of realistic pricing situations which include swaps, exotic options and fixed income derivatives. The course concludes with a detailed examination of value at risk.

FIN 330 is a prerequisite for this class.

FIN 366
FINANCIAL MODELING
Undergraduate

This course will focus on the use of EXCEL in implementing financial theory to solve practical, real world problems in finance.

FIN 311 and FIN 330 are a prerequisite for this class.

FIN 380
CASES IN FINANCIAL DECISION MAKING
Undergraduate

This is the capstone course for students majoring in Finance. The course applies the case study methodology to hone the student's analytical skills with applied finance issues, as well as to further develop verbal and written communication skills, the ability to work effectively within teams, as well reasoned debate. This course will provide students the opportunity to apply and integrate the knowledge acquired in their previous finance courses.

FIN 311, FIN 330, FIN 363, and WRD 202 are a prerequisite for this class.

FIN 393
FINANCE INTERNSHIP
Undergraduate

An academically supervised working experience in a major financial institution. Registration in this program requires approval of the department internship director.

FIN 310 is a prerequisite for this class.
FIN 395
INVESTMENT SEMINAR
Undergraduate
Construction and management of an actual portfolio fund in a nine month seminar setting. Registration requires approval of the seminar director. By application.

FIN 320 and FIN 330 are a prerequisite for this class.

FIN 396
HONORS SEMINAR
Undergraduate
This is a required course for all Honors Students in Finance. It is conducted on a year-long basis (Fall, Winter & Spring) for the benefit of the students in the program. Participants are required to attend all events sponsored by the class conductor. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the seminar's conductor.

Status as an Honors Finance student is a prerequisite for this class.

FIN 398
SPECIAL TOPICS
Undergraduate
Content and format of this course are variable. An in-depth study of current issues in finance. Subject matter will be indicated in class schedule.

FIN 310 is a prerequisite for this class.

FIN 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in finance.

At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.

FIN 501
ETHICS IN FINANCIAL MARKETS
Graduate
This seminar course will examine both ethical issues and conflicts of interest that face financial decision makers in today's business world. The class will feature case studies and guest speakers as the key teaching tools, supplemented by short lectures and student simulations/exercises. Each class period will be devoted to a different context in which to consider topical issues. We will look at and discuss ethical issues facing financial services companies, corporates (both public and private), as well as not for profits. We will examine these issues, where applicable and relevant, from multiple perspectives: Board of Directors, Executive Management, Shareholders, Regulators, Suppliers and Customers, Competitors, Employees and Communities. Some of the discussion will purposefully consider the additional realities of differing culture and values in the international context.

FIN 523 is a prerequisite for this class.

FIN 510
ADVANCED MONETARY THEORY AND POLICY
Graduate
This course is designed to provide the analytical tools for a critical examination of monetary and fiscal policies together with their impact on economic activity in general, and on the commercial banking system in particular. Problems involving interest rates, the value of money and qualitative portfolio changes are examined in detail in the light of current theoretical contributions.

FIN 555 is a prerequisite for this class.
FIN 512
COMMERCIAL BANKING
Graduate
The purpose of the course is to analyze the role of commercial banks in the financial system. The present structure of banking will be studied with particular emphasis on the relationship between commercial banking practices and economic stabilization goals. Issues in bank asset management, liability management and capital adequacy will be presented. Finally, new dimensions in banking will be considered.
FIN 555 and GSB 420 are prerequisites for this class.

FIN 513
MONEY AND CAPITAL MARKETS
Graduate
This course is designed to study money, capital markets, and banking as a means to understanding how financial markets determine interest rates and why different assets earn different rates of returns; the economic functions of financial services firms (especially commercial banks); the role commercial banks play in financial markets and how their operations affect the functioning of our economic system; the role of regulation of financial services firms (including thrifts and commercial banks in influencing their behavior; and the role and function of central banks in the economy and how central banks actions interact with asset markets to affects the macro economy.
FIN 555 and GSB 420 are prerequisites for this class.

FIN 523
INVESTMENT ANALYSIS
Graduate
This course provides an overview of the investment environment for the institutional money manager. The market mechanism, market equilibrium, the relationship between risk and return and the valuation of various investment instruments are investigated.
FIN 555 and GSB 420 are prerequisites for this class.

FIN 524
FINANCIAL STATEMENT ANALYSIS
Graduate
This course develops financial analysis skills from the view of an outsider using a corporations publicly available financial statements. Techniques such as commonsizing, ration analysis, decomposition and the use of a comprehensive DuPont Model are used as a basis to teach analytical thought processes necessary to make projections for a company based on its financial statements. The use of spreadsheets as an analytical tool will be strongly emphasized.
FIN 555 and GSB 420 are prerequisites for this class.

FIN 525
PORTFOLIO MANAGEMENT
Graduate
This course analyzes contemporary theories and techniques of security selection and management available to the institution portfolio manager. Significant literature which emphasizes the role of the modern portfolio manager in achieving diversification and client investment goals is reviewed and evaluated.
FIN 523 is a prerequisite for this class.

FIN 526
ADVANCED TOPICS IN INVESTMENTS
Graduate
This course is designated to provide students with knowledge of alternative investments such as real estate, venture capital and hedge funds. This knowledge will help prepare students to pass the alternative investments sections of the CFA examinations.
FIN 523 is a prerequisite for this class.
FIN 528
ALTERNATIVE INVESTMENTS
Graduate
Alternative investments are the fastest growing sector of the financial industry, and probably the least understood, including by many market professionals. Although the range of sophistication in people associated with alternative investments varies, it is more and more common to use them in investment strategies, either as direct investments, through funds of funds or structured products. The purpose of this course is to give students a good understanding and workable knowledge of the techniques that should be part of the toolkit of anyone investing in, analyzing and/or advising private and institutional clients on the inclusion of alternative investments in their portfolios. Because this course is geared for students wishing to pursue careers in Wealth Management or related fields, it will largely be taught from a practitioner's point of view. Throughout the course we will pay special attention to capital market trends as they relate to the various investment vehicles we discuss. We will also turn our attention to corporate governance issues as they pertain to alternative investment strategies.

FIN 523 is a prerequisite for this class.

FIN 530
REAL ESTATE INVESTMENT AND FINANCE
Graduate
Analysis of real estate investment opportunities and the characteristics that distinguish them from other assets. Emphasis is upon forecasting cash flows and estimating risk. Case analysis is an integral part of the course technique. PREREQUISITE(S): FIN 555

FIN 555 and GSB 420 are prerequisites for this class.

FIN 551
PROBLEMS IN CORPORATE FINANCIAL POLICY
Graduate
Theoretical and practical tools in financial decision-making are discussed using cases studies. Covers investment analysis as this relates to the risk and timing of cash flows, capital structure and dividend policy.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 553
ADVANCED CORPORATE FINANCE
Graduate
The analytical methods and quantitative decision models applicable to special areas of corporate finance are examined and studied in this course. These topic areas could include current asset management, convertible bonds, warrants, lease financing, mergers and consolidations or other current financial issues.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 555
FINANCIAL MANAGEMENT
Graduate
A study of the major decision areas faced by the corporate financial manager and their relationship to the goals of the firm's owners. Specific topics include capital budgeting, capital structure and the cost of capital, dividend policy, and current asset management.

ACC 500 and (ECO 555 or equivalents) and GSB 420 are a prerequisite for this class.

FIN 557
INTERNATIONAL FINANCE
Graduate
International Finance integrates the financial activities, institutions, and multinationals of the global finance arena. In addition to extending the tools of financial analysis to an international setting, the course studies the strategies available to a multinational because of operations in a multiple of countries. Topics include foreign currency and political risk, capital budgeting in a multinational setting, and cash flow management between countries.

FIN 555 and GSB 420 are prerequisites for this class.
FIN 558
MERGERS AND ACQUISITIONS
Graduate
This course focuses on the pragmatic issues and relevant research studies on mergers, acquisitions and corporate restructuring. The field of mergers and acquisitions continues to experience dramatic growth. Although many companies pursue and expansionary strategy that include mergers and acquisitions, many others rely on corporate restructuring to become more efficient, such as spin-offs, equity, carve-outs and divestitures. This course will also cover leverage buyouts, merger strategy, employee stock ownership plans, antitakeover measures and valuations of businesses, including the valuation of privately held firms.

FIN 555 and (FIN 551 or FIN 553) are a prerequisite for this class.

FIN 559
SUSTAINABLE VALUE CREATION
Graduate
This course is designed to introduce the concept of sustainability to the process of value creation. The role of financial management has traditionally been defined as one of value maximization. A complex set of questions arises, however, as to whether such maximization is to be undertaken 'unconstrained' and from the perspective of the shareholders alone. For example, should the interests of others, including those of the customers, employees, society at large, the government, the environment, be regarded as constraints to such an endeavor? Some of the recent contributions to the field suggest that most assumptions of the traditionalists (those arguing that the only purpose of the firm is to serve the shareholders and maximize their wealth) do not hold in 'the real world.' Therefore, they conclude that it is necessary that all relevant interests be recognized and taken into account. However, the unanswered question is: 'how does one do this'? This course is designed to pave the way toward the answers to this question. Our goal therefore, is to develop the theoretical relationship that exists between finance and sustainability, and to explore the practical issues associated with its implementation. In plain language, we will learn how to make a business case for making investments in sustainable and socially responsible projects. More ambitiously, our objective will be to develop a framework for the evaluation of all long-term benefits and costs associated with a project.

FIN 562
RISK MANAGEMENT
Graduate
This course is designed as an introduction to derivative instruments; their characteristics, their pricing, the market's infrastructure, trading mechanics, and applications. The course introduces the binomial pricing model, the Black & Scholes continuous time pricing model, the associated properties i.e. "the Greeks." and forward pricing. The course examines the characteristics and market infrastructure for each of the four derivative instruments: forward, futures, options, and swaps. Then trading strategies and hedging applications for each of these instruments are discussed. The course concludes with an introduction to Value at Risk.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 564
RISK MANAGEMENT FOR INDIVIDUALS, FAMILIES AND ENTITIES
Graduate
This course develops an analytical framework that employs the tools and techniques for managing risks that affect total wealth throughout the lifetime of an investor or throughout an extended period defined by a family's or entity's objectives. The course starts with insurance markets and insurance products. After the discussion on insurance as a risk management tool, the discussion shifts to topics in financial risk management, including risk tolerance and asset allocation in a mean-variance framework. The remainder of the course adopts an integrative framework for managing other risk factors? such as those generated by uncertain earnings, mortality and longevity - that are not present in an institutional investment setting and discusses the role of financial risk management and insurance products for hedging those risk factors. At the level of the individual, the course views total wealth as a combination of financial assets and human capital and develops portfolio allocations and strategies for risk management accordingly. For families and entities, the focus is on asset-liability management as a tool for portfolio allocation and risk management.

FIN 528 is a prerequisite for this class.

FIN 570
WEALTH MANAGEMENT BOOT CAMP
Graduate
This zero credit course is designed to familiarize the student with the depth and breadth of topics covered throughout the curriculum. The overriding theme of this boot camp is two-fold: (1) to install and emphasize the importance of ethical conduct in a field best characterized by the element of trust. Entering students will receive a preview of the standards of practice and the importance of ethical conduct to their long-term success. (2) to provide the students a means of an in-depth evaluation of his/her decision to pursue the degree. The student will be provided the opportunity to evaluate suitability of the field and the degree for his/her future career goals. The course will be delivered over a Friday-Saturday period (9:00A.M. - 5:00P.M.) immediately prior to the start of the Fall and Spring quarters. It will be taught by the team of academic and industry directors of the program. Where appropriate, industry guest speakers will also be utilized.
FIN 571
FINANCING NEW VENTURES (CROSS-LISTED WITH MGT 571)
Graduate
This course will focus on identifying, examining and evaluating various sources of original and growth capital. Emphasis will be on legal, financial and tax issues related to capital formation as well as specific problems experienced by the small-to-medium-sized firm undergoing rapid growth. Topics discussed will include financing startups, financial planning and strategy, going public, selling out and bankruptcy. A formal proposal for capital acquisition developed through field research will be required of each student. Cross-listed with MGT 571.

FIN 572
FINANCIAL PLANNING, CAPSTONE I
Graduate
This course serves as a capstone course for the multifaceted task of providing wealth management services to high net worth families. Wealth management encompasses assessing the changing financial needs of a family over time, providing financial services to help them achieve their goals, assisting in the implementation of the plans, the monitoring of the changing environment and family circumstances, and the periodic review of the financial plan. The course will review the general principles of financial planning, address the need for wealth management services, the objectives of the planning process and the analysis of personal financial statements. In addition, the marketing of wealth management services will be woven into the course, since knowledge of the subject matter is most valuable when it can be applied to actual families. Development of a strategy, utilizing the tools and techniques for managing risk, requires the use of many different components, which must be considered on a consolidated basis. The basic components can be broken down into:1. General Principles of Financial Planning2. Insurance Planning and Risk Management3. Employee Benefits Planning4. Investment Planning5. Income Tax Planning6. Retirement Planning7. Estate Planning The course will emphasize the ethical and legal issues involved in maintaining and growing a wealth management services business. The course will be focused on a case study, in which financial plans, marketing plans, and revisions to those plans will be developed based on the changing needs of the family. Both written and oral presentations will be required. Can only be taken during the last quarter of study.

FIN 573
FINANCIAL PLANNING, CAPSTONE II
Graduate
This course serves as a capstone course for the multifaceted task of providing wealth management services to high net worth families. Wealth management encompasses assessing the changing financial needs of a family over time, providing financial services to help them achieve their goals, assisting in the implementation of the plans, the monitoring of the changing environment and family circumstances, and the periodic review of the financial plan. The course will review the general principles of financial planning, address the need for wealth management services, the objectives of the planning process and the analysis of personal financial statements. In addition, the marketing of wealth management services will be woven into the course, since knowledge of the subject matter is most valuable when it can be applied to actual families. Development of a strategy, utilizing the tools and techniques for managing risk, requires the use of many different components, which must be considered on a consolidated basis. The basic components can be broken down into:1. General Principles of Financial Planning2. Insurance Planning and Risk Management3. Employee Benefits Planning4. Investment Planning5. Income Tax Planning6. Retirement Planning7. Estate Planning The course will emphasize the ethical and legal issues involved in maintaining and growing a wealth management services business. The course will be focused on a case study, in which financial plans, marketing plans, and revisions to those plans will be developed based on the changing needs of the family. Both written and oral presentations will be required. Can only be taken during the last quarter of study.

FIN 581
THE PSYCHOLOGY OF FINANCIAL DECISION MAKING
Graduate
This course reviews current behavioral research on intuitive judgment, belief formation, risk attitudes, and emotion. The findings help to explain financial decisions made by individual investors, households and money managers. This course is a prerequisite for FIN 582 and FIN 583. It is especially useful for students who plan a career as financial advisors.

FIN 582
THE PSYCHOLOGY OF FINANCIAL MARKETS
Graduate
This course studies the behavior of world equity markets from a psychological perspective. Topics include equity portfolio management, investor sentiment, value and growth investing, market under- and overreaction to news and the quality of analysts' earnings forecasts and stock recommendations. Selected aspects of bond, derivative, and currency markets are also discussed.

FIN 555 is a prerequisite for this class.
FIN 583
BEHAVIORAL ASPECTS OF CORPORATE FINANCE
Graduate
This course asks how psychological, sociological and organizational forces shape the strategic investment, restructuring, and financing decisions made by top managers in corporations. Topics include capital budgeting, earnings management, investor relations, executive compensation and the role of corporate boards.

FIN 555 is a prerequisite for this class

FIN 595
INVESTMENT SEMINAR
Graduate
Construction and management of an actual portfolio fund in a nine month seminar setting. Registration requires approval of the seminar director based on applications due in the Spring quarter.

FIN 617
QUANTITATIVE METHODS
Graduate
A survey of mathematical and statistical techniques used in finance and representative applications.

ACC 500 and (ECO 555 or equivalents) and GSB 420 are a prerequisite for this class.

FIN 662
DERIVATIVES VALUATION
Graduate
This course is designed to be an advanced course that focuses on the pricing models for the four derivative instruments: forwards, futures, options and swaps. Fixed income modeling as it is related to swaps and caps also will be considered. The first part of the course is devoted to an in depth examination of the various pricing models: discrete, continuous time, as well as Monte Carlo simulation. Each model's properties are derived and discussed in detail. These models are then applied to a range of realistic pricing situations which include swaps, exotic options, credit derivatives and complex Value at Risk problems.

FIN 523 and FIN 555 are prerequisites for this class.

FIN 675
CASES IN INVESTMENTS AND FINANCIAL ENGINEERING
Graduate
This course primarily uses case studies to illustrate the application of concepts learned in Fin 523 (Investments Analysis) and in Fin 662 (Derivatives Valuation). The topics covered in the course include- the term structure of interest rates- portfolio management, asset pricing, and market efficiency- portfolio performance evaluation- option pricing-management of interest-rate risk, credit risk, foreign-exchange risk, and liquidity & basis risk with options, forwards, futures, and swaps- enterprise risk management The course will hone the student's analytical and writing skills through group analyses of case studies and preparation of (case) write-ups.

GSB 420, FIN 555, FIN 523, FIN 617 and FIN 662 are a prerequisite for this class.

FIN 793
INTERNSHIP
Graduate
Knowledge acquired in the classroom is applied in an actual business environment through varied theoretical and basic assignments under supervision in industry, government or public finance.

FIN 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. In-depth study of current issues in finance. Subject matter will be indicated in class schedule. Offered variably.
FIN 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in finance.

GAM 201
HISTORY OF VIDEOGAMES
Undergraduate
This course provides an overview of the history of modern interactive entertainment starting with the early developments of the late 1940s up until the present day. The course covers five longitudinal perspectives, or themes. For each theme students will become familiar with notable game titles, events, people, technologies, game mechanics and genres. PREREQUISITE(S): None

GAM 205
EVOLUTION OF GAMES
Undergraduate
This lecture course introduces students to the evolving forms, uses, and design of games. Topics covered include the relationship between game design and play, the role of games in fueling the technological imagination, the changing contexts in which game are designed and played (art, social impact, health, education), and the rise of the independent games sector. Students will produce weekly written responses to course material, lead a seminar discussion in small teams, and produce a final written or multimedia paper. PREREQUISITE(S): None
From "The Royal Game of Ur" (2500+ BCE) to "World of Warcraft" (2004), games have been a constant in human history. The forms of games, their experiential qualities, and their cultural significance have varied enormously from era to era and place to place. This class will examine particular games and game genres in their historical context using a case study format. We will focus on "indoor" games, those of chance and skill, as opposed to physical games and sports. The examples will be chosen (i) to have global scope and historic diversity, (ii) to relate to games that students will find familiar, and (iii) to raise particular issues in historical interpretation, the use of primary sources and changing concepts of leisure activity. PREQUISITE(S): NONE.

Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cyberculture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging. PREREQUISITE(S) WRD 104

This course approaches the study of computer games from three directions angles: first, as examples of media that can be analyzed and critiqued for their thematic elements, formal structure, plot and interactive appreciation; second, as complex software artifacts subject to technological constraints and the product of a labor-intensive design and implementation process; and three as a cultural artifact with behaviors and associations comparable in import to other popular art forms. Student will study the principles of game design and use them both to analyze existing games and to develop their own original game ideas. Students will also learn about the process of game development, starting from the game's narrative concept and moving to consideration of a game's components: the representation of the player, of artifacts, the virtual world that contains them and the interaction between them and the player. PREREQUISITE(S): NONE.

This course provides students a practical foundation in game design with a focus on concept development, design decomposition, and prototyping. Using game design theory, analysis, physical prototyping, playtesting, and iteration students learn how to translate game ideas, themes, and metaphors into gameplay, game pitches, and design documents. Students will analyze and recognize play that exists in important games, stories, and other media.

Societies function based on normative ethics utilizing commons sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment, in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact particularly on children will be discussed.

This lecture course focuses on effective communication throughout the development process from writing game design documents to playtesting reports and postmortems. Special attention will be paid to the critical and analytical components of design writing and the clarity of articulation. A further emphasis is put on the preparation and delivery of engaging presentations, particularly game pitches. PREREQUISITE(S): GAM 226 and WRD 104
GAM 230
INTRO TO GAME PRODUCTION
Undergraduate
Game development is a big business, and production teams can now exceed one hundred people. This course is an introduction to the production methods used in the game industry, and to the demanding role of the Producer on the game development team. Students will work to develop skills in team building, project presentation, organization, and dealing with people. Subjects covered include scheduling tools, collaborative software, project management, vendor relations, inter-departmental relations, and quality assurance. PREREQUISITE(S): none

GAM 240
PLAYGRAMMING
Undergraduate
This workshop introduces computer programming to artists and game designers. Programming is an art, but before students can create masterpieces they first need to explore, play, and sketch with code. Students learn basic concepts and techniques of computation and apply these to craft gameplay experiences, improvisational experiments, and software toys. Students will author code from scratch and remix code to complete their weekly projects. No prior programming experience or knowledge is required. PREREQUISITE(S): None

GAM 244
GAME DEVELOPMENT I
Undergraduate
This course provides students additional theory and practice with an emphasis on game design and storytelling for games. Students continue learning about game development processes and techniques and how to apply advanced game design principles to create components of a 2D game.

GAM 245
GAME DEVELOPMENT II
Undergraduate
This course emphasizes 3D game production. Students apply advanced 3D game design development principles to create deliverables for 3D games. Students will work with an existing game engine and content pipeline. The focus of the class will be on the creation and use of different types of content, key development issues, process management, and professional practices. PREREQUISITE(S): GAM 244

GAM 250
DIGITAL SOUND FOR COMPUTER GAMES
Undergraduate
Acquisition and computer representation of sound. Sound standards, lossy and lossless compression. Synthesis and processing of acoustic signals. Acquisitions of physical acoustic signals. Microphone geometries. Introduction to Foley editing. Game specific topics include: game audio design patterns, interactive processing pipeline for digital audio, music sequencers for games, sound APIs.

GAM 312
GAME UsABILITY AND PLAYTESTING
Undergraduate
The goal of game user research (GUR), which includes game usability and playtesting, is to collect unbiased game play data that will help design-development teams make better games. There are multiple GUR methods that work best at different points in the development cycle and it is the game user researcher's job to understand how and when to effectively use them. In this course students will learn a variety of methods for evaluating games, where in the development cycle they are applied, and perform common GUR evaluations including competitive reviews, heuristic evaluations, usability tests and playtesting. PREREQUISITE(S): GAM 244

GAM 329
PHYSICAL PROTOTYPING FOR GAMES
Undergraduate
This course will approach the study of Game Design with a focus on breaking designs into manageable elements and prototyping those elements in order to refine play. Students will learn how to develop game ideas and game systems with a focus on play procedures, rules, and designing for various types of possible players. Prototyping will involve various real world media in addition to paper write-ups and layouts. Students will engage in brainstorming exercises, develop game ideas and systems, and review and repurpose existing game mechanics. This course will help students find the balance between hard (planned logical) design and soft (more organic/emergent) design in order to develop compelling gameplay. PREREQUISITE(S): GAM 224
GAM 330
ADVANCED GAME PRODUCTION
Undergraduate
This course builds on the fundamentals covered in earlier courses (GAM230 or IS372/ECT372) by providing a practical, hands-on context in which students can learn the tools and techniques game producers use to manage and organize assets, workflows, tasks, bugs, resources, and personnel. In this course, students combine classroom lectures and lab time to learn production theory, tools, and techniques fundamental to successful game development. Through this experience, students learn the skills and knowledge needed to have an immediate, positive impact on game development. Topics include: the process to refine ideas for game concepts, gameplay, and narrative; quality assurance of subjective elements including gameplay and art; design and art outsourcing pipelines; and feedback strategies and community management. PREREQUISITE(S): GAM 230, IS 372 or ECT 372

GAM 333
THE BUSINESS OF GAMES
Undergraduate
This course gives an introduction to the business aspects of the game development industry, including development, publishing, distribution and marketing. Subjects covered include game development contracts, milestone-based development, management techniques, marketing, customer and community support, personnel, budgeting, outsourcing, pipelines, and external partnerships. PREREQUISITE(S): GAM 224 or GAM 226

GAM 340
PRACTICAL SCRIPTING FOR GAMES
Undergraduate
This workshop introduces game scripting to artists and game designers. A game script is a short list of commands that control something in a game, such as how a character moves, or an enemy's behavior. Students will learn to read, modify, and author scripts that generate and affect a variety of game elements over the course of weekly projects. PREREQUISITE(S): GAM 240 or CSC 241

GAM 341
INTRODUCTION TO LEVEL DESIGN
Undergraduate
Level design is the art of creating believable environments, stages and missions for video games. This course explores topics including architecture, flow, pacing and puzzles. Using a 3D level editor, students will investigate technical design issues including the construction, texturing, lighting and scripting of modern game levels. The roles, duties and challenges of the level designer will also be discussed. PREREQUISITE(S): (GAM 224 or GAM 226) and GAM 245

GAM 342
ADVANCED LEVEL DESIGN
Undergraduate
This class builds on topics covered in earlier courses, with a focus on creating believable worlds for videogames. This course emphasizes designing large exterior environments, advanced mission scripting, and integrated storytelling. Using a 3D level editor and formal level design process, students create fun, polished, memorable virtual worlds. PREREQUISITE(S): GAM 341 or GAM 392

GAM 350
PHYSICS FOR GAME DEVELOPERS
Undergraduate
The course concentrates on Newton's Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and MAT 150

GAM 353
TOOL PROGRAMMING FOR GAME DEVELOPMENT
Undergraduate
Today's games are built with large amounts of data. The stability, usability, efficiency, and flexibility of the tools that process game data plays an enabling and critical role in game development. Topics include the content pipeline, processing or standard file formats, integration of external tools, file format design, command line and graphical user interfaces, and procedural content generation. PREREQUISITE(S): CSC 373
GAM 362
MAKING DEEP GAMES
Undergraduate
This workshop investigates the process of designing games about the human condition. It specifically focuses on the potential of game to tackle profound and abstract ideas (e.g. loyalty, dignity, courage and trust) by ways of metaphor and analogy. Assignments will explore metaphorical games, games for persuasion and games for self-expression. Special emphasis is placed on the analysis of personal experiences and how they can be translated systematically into game designs that generate non-typical gameplay content. PREREQUISITE(S): GAM 226 or GAM 224

GAM 365
ADVANCED GAME DESIGN
Undergraduate
This is a studio course in which students work in teams to design and develop slices of polished small-scale gameplay experiences. The focus is on developing team-based creative and technical processes to produce innovative, engaging, and playable games. Teams will iteratively design and develop two distinct gameplay experiences or “vertical slices.” Each slice will demonstrate an understanding of the role of game mechanics, game art, audio, and technology platform in creating a cohesive and compelling gameplay. PREREQUISITE(S): GAM 341

GAM 372
OBJECT-ORIENTED GAME DEVELOPMENT
Undergraduate
Students will learn principles and techniques needed to build robust and efficient large scale game software systems. Principles of object-oriented modeling, design, implementation, and testing of large-scale game systems will be emphasized. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): CSC 393

GAM 374
FUNDAMENTALS OF GAME PROGRAMMING I
Undergraduate
Many computer games are based on physical interactions between game objects e.g. collisions, evasions, pursuit, etc. Design and implementation of these actions is not an easy problem. Concept and character development, storyboarding, prototyping, testing and implementation will be discussed. Students will gain hands on experience in game programming using a low level graphical library. PREREQUISITE(S): CSC 262 or CSC 309

GAM 376
ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES
Undergraduate
Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, script-driven game object behaviors. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

GAM 377
FUNDAMENTALS OF GAME PROGRAMMING II
Undergraduate
The class moves beyond the basics of game programming and into advanced programming, architecture, and integration techniques. Topics include working with a production-quality content pipeline, integration of external digital content creation tools, scalability, complex animations, shaders, environment construction, gameplay techniques, controllers, camera theory, and collisions. PREREQUISITE(S): GAM 374

GAM 378
STRATEGY GAMES PROGRAMMING
Undergraduate
Turn-based and real-time strategy games. Abstract strategy games such as chess, backgammon, and bridge. Game themes and presentation of fantasy, historical and futuristic gaming scenarios. Ethically responsible content and social impact of different cultures, ethnicities, genders on the game play and game audience will be addressed. Game-player resource management. Implementation of strategy engines, 2D presentation and isometric projection. PREREQUISITE(S): GAM 376
GAM 380
CONSOLE GAME DEVELOPMENT ENVIRONMENTS
Undergraduate
Specialized computers for games with high-end graphics and sound capabilities and other specialized input output devices form one of the largest game markets. In this advanced programming course students will gain hands-on experience writing and porting code for game consoles. PREREQUISITE(S): CSC 393 and CSC 374.

GAM 382
SERIOUS GAMES
Undergraduate
Explores the role of computer games and simulations for education and training. Topics include: overview of the science of learning, analysis of games for different purposes and types of content, assessment of learning, and learning through game creation. Students will design, implement, and evaluate a serious game. Development of socially responsible and ethical behaviors will be a primary objective. PREREQUISITES(S): GAM 245

GAM 385
INTRODUCTION TO GAME PROGRAMMING IN JAVA
Undergraduate
Java as a programming language is an important alternative to C++. Especially, games for wireless mobile devices are increasingly written in Java. This course discusses Java2 API and graphics development with Java 2D and 3D. Such topics like animation techniques and scene management, creating client server architectures will be implemented in the context of game programming. PREREQUISITE(S): GAM 374

GAM 386
GAME DEVELOPMENT FOR MOBILE DEVICES
Undergraduate
Mobile devices are becoming once of the most important hardware for game players. In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multiplayer game architecture. Such concepts as: building a custom game library, multiplayer game programming, infrared, wireless and socket communication between devices will be discussed. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

GAM 390
MULTIPLAYER GAME DEVELOPMENT
Undergraduate
Multiplayer games were made possible by the advances in networking technology, increases in processor speed and data storage. Today, the majority of successful game titles are equipped with a multiplayer capability. This technical course discusses the fundamental aspects of multiplayer game development such as: design techniques, architectures, client and server side implementation, databases. PREREQUISITE(S): GAM 374

GAM 391
GAME PERFORMANCE OPTIMIZATION
Undergraduate
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374

GAM 392
GAME MODIFICATION WORKSHOP
Undergraduate
In this course, students will develop skills in game design and development through the construction of a "mod" of an existing game. Emphasis will be placed on the game development life cycle from concept through release, on productivity in a team environment, and on effective project management practices. Prerequisite: GAM 245
GAM 394
GAME DEVELOPMENT PROJECT I
Undergraduate
Students work in teams to design and develop a videogame that demonstrates their mastery of game design and development. Additionally, students will reflect on ethical decision making and professional ethics in the game industry. This course and its continuation, GAM 395, must be taken consecutively. PREREQUISITE(S): GAM 374 (Senior standing)

GAM 395
GAME DEVELOPMENT PROJECT II
Undergraduate
Continuation of GAM 394. PREREQUISITE(S): GAM 394

GAM 398
TOPICS IN GAME PROGRAMMING
Undergraduate
Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): See syllabus

GAM 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. PREREQUISITE(S): None

GAM 424
GAME DESIGN WORKSHOP
Graduate
This course is an introduction to both the theory and practice of game design. Students will explore fundamental elements of game design and put these concepts to work in designing, prototyping, playtesting, and developing both physical and computer games. The course will cover formal elements of games, game dynamics, game narratives, and the dramatic components of games. Students will study the game design process including brainstorming, conceptualization, creation of design documentation, and play-testing. PREREQUISITE(S): none

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

GAM 450
PHYSICS FOR GAME DEVELOPERS
Graduate
The course concentrates on Newton’s Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics. PREREQUISITE(S): CSC 262 and MAT 150

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

GAM 453
TOOL PROGRAMMING FOR GAME DEVELOPMENT
Graduate
Today’s games are built with large amounts of data. The stability, usability, efficiency, and flexibility of the tools that process game data plays an enabling and critical role in game development. Topics include the content pipeline, processing or standard file formats, integration of external tools, file format design, command line and graphical user interfaces, and procedural content generation. PREREQUISITE(S): CSC 373

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
GAM 474
FUNDAMENTALS OF GAME PROGRAMMING I
Graduate
Many computer games are based on physical interactions between game objects e.g. collisions, evasions, pursuit, etc. Design and implementation of these actions is not an easy problem. Concept and character development, storyboarding, prototyping, testing and implementation will be discussed. Students will gain hands on experience in game programming using a low level graphical library. PREREQUISITE(S): CSC 262 or CSC 309

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

GAM 475
GAME ENGINE PROGRAMMING I
Graduate
Game engines provide an integrated programming platform for today's high performance games. This class explores C/C++ game engine programming, data structures, and practices. Topics include memory management, input devices, video rendering, file access, debugging, and application interface development. Prerequisite(s): (CSC 301 or CSC 383 or CSC 393) and CSC 374

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

GAM 476
ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES
Graduate
Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, script-driven game object behaviors. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

GAM 477
FUNDAMENTALS OF GAME PROGRAMMING II
Graduate
The class moves beyond the basics of game programming and into advanced programming, architecture, and integration techniques. Topics include working with a production-quality content pipeline, integration of external digital content creation tools, scalability, complex animations, shaders, environment construction, gameplay techniques, controllers, camera theory, and collisions. PREREQUISITE(S): GAM 474

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

GAM 486
GAME DEVELOPMENT FOR MOBILE DEVICES
Graduate
Mobile devices are becoming one of the most important hardware for game players. In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multiplayer game architecture. Such concepts as: building a custom game library, multiplayer game programming, infrared, wireless and socket communication between devices will be discussed. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

GAM 490
MULTIPLAYER GAME DEVELOPMENT
Graduate
Multiplayer games were made possible by the advances in networking technology, increases in processor speed and data storage. Today, the majority of successful game titles are equipped with a multiplayer capability. This technical course discusses the fundamental aspects of multiplayer game development such as: design techniques, architectures, client and server side implementation, databases. PREREQUISITE(S): GAM 474

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.
**GAM 491**
**GAME PERFORMANCE OPTIMIZATION**
**Graduate**
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

---

**GAM 499**
**TOPICS IN COMPUTER GAME DESIGN AND DEVELOPMENT**
**Graduate**
Variable topics course in computer game design and development. May be repeated for credit. PREREQUISITE(S): Permission of instructor

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

---

**GAM 575**
**GAME ENGINE PROGRAMMING II**
**Graduate**
This class continues to explore C/C++ game engine programming, data structures, and practices. Topics include audio, network access, threads and multi-processor systems, profiling, scripting, content libraries, animation, and a survey of gam engines. Prerequisite(s): GAM 475

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

---

**GAM 594**
**GAMING AND ENTERTAINMENT TECHNOLOGY CAPSTONE**
**Graduate**
This course gives students an opportunity to utilize knowledge obtained in this degree program in developing a computer game, from conceptualization, design, to implementation. Issues in project management and configuration management will also be addressed. This work will constitute a major part of the project portfolio that students have developed during their study. PREREQUISITE(S): Completion Of Foundation Courses.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

---

**GAM 597**
**TOPICS IN GAME DESIGN**
**Graduate**
Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): See syllabus

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

---

**GAM 598**
**TOPICS IN GAME PROGRAMMING**
**Graduate**
Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): See syllabus

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

---

**GAM 599**
**INDEPENDENT STUDY**
**Graduate**
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. PREREQUISITE(S): None

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
GAM 690
GAME DEVELOPMENT STUDIO I
Graduate
In this course and its continuation GAM 691, students will work in small teams to design and implement a computer game. The courses must be taken consecutively. PREREQUISITE: GAM 475 or SE 456

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GAM 691
GAME DEVELOPMENT STUDIO II
Graduate
Continuation of GAM 690. PREREQUISITE: GAM 690

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GAM 397
TOPICS IN GAME DESIGN
Undergraduate
Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): See syllabus

GD 105
INTRO TO VISUAL DESIGN
Undergraduate
This course introduces the basic concepts of design for time-based digital media. Students study the principles of composition and color theory, and how these are affected by movement, duration and display. Vector and bitmap manipulation tools are explored in relation to game design, video and Internet production. PREREQUISITE(S): None

GD 110
WEB DESIGN
Undergraduate
Students will use current industry standard design applications such as Photoshop and Illustrator, and beginning hand-coding in HTML, CSS for introductory web design. An introduction to visual design fundamentals will include composition, typography, web color, and digital imaging. Informational navigation, structure, front-end design, and implementation will be studied. PREREQUISITE(S): None

GD 150
ILLUSTRATOR WORKSHOP
Undergraduate
This class will introduce students to the syntax, tools and methods of vector-based drawing using Adobe Illustrator. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. PREREQUISITE(S): None

GD 151
PHOTOSHOP WORKSHOP
Undergraduate
This class will introduce students to the syntax, tools and methods of raster based graphics and image editing/manipulation by using Adobe Photoshop. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. PREREQUISITE(S): None

GD 152
INDESIGN WORKSHOP
Undergraduate
This class will cover fundamental typographic design and layout skills by using page layout software Adobe InDesign. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. PREREQUISITE(S): None
GD 153
TYPEFACE DESIGN WORKSHOP
Undergraduate
This is an introductory course covering principles of digital typeface design. Students will render a typeface design over the course of the class using an industry standard computer application such as Fontographer.

GD 200
GRAPHIC DESIGN I
Undergraduate
This course introduces the world of graphic design in a social and historical context. The goals are to explore formal structures and research methods with emphasis on the role of analysis and conceptual thinking as the first tasks of the print and multi-media designer. The course includes basic instruction in typography, color, problem-solving in print and on screen. PREREQUISITE(S): GD 105, ART 105, ANI 105 or GPH 211.

GD 210
DIGITAL ILLUSTRATION I
Undergraduate
Introduction to illustration development in image, line and photography, combining computer applications and hand-rendered approaches. PREREQUISITE(S): GD 105, ART 105, ANI 105 or GPH 211

GD 211
INTERMEDIATE DIGITAL ILLUSTRATION
Undergraduate
Intermediate practice for illustration development in image, line and photography, combining computer applications and hand-rendered approaches, will be studied. PREREQUISITE(S): GD 105 or ANI 105 or ART 106

GD 215
WEB DESIGN FOR COMMERCIAL PROJECTS
Undergraduate
This is a design-focused web class on intermediate concepts and techniques in the visual design, development and implementation of websites for commercial purposes. Students will use industry standard web design applications and some hand coding in HTML and CSS. PREREQUISITE(S): GD 110 or IT 130 or HCI 201 or AMD 385

GD 216
WEB DESIGN FOR ARTISTS
Undergraduate
A design-focused web class that focuses on intermediate concepts and techniques in the visual design, development and implementation of websites for personal expression and artistic experimentation. Students will use industry standard design applications and some hand coding in HTML and CSS. PREREQUISITE(S): GD 110 or IT 130 or HCI 201 or AMD 385

GD 220
HISTORY OF DESIGN I
Undergraduate
The history of graphic design is an evolution in aesthetics, technology, style and visual communication. The class will encompass a survey of the major movements in the field of print design, notable designers and design materials. The nature of changing methods, materials, technologies and values are examined in the context of the social and political realities that shape communication. The course will include the historical shift from print to multimedia design methodologies. PREREQUISITE(S): None

GD 221
HISTORY OF DESIGN II
Undergraduate
World movements in design and contemporary practice in print, web and experiential design. PREREQUISITE(S): None but GD 220 recommended
GD 230
TYPOGRAPHY
Undergraduate
Study of the formal structures of letterforms and text. Exploration of typography to create and extend meaning, emphasizing the relationship between form and content. PREREQUISITE(S): GD 105, ART 105, ANI 105 or GPH 211

GD 260
MOTION GRAPHICS
Undergraduate
This course will introduce the student to effective communication using motion graphics, including its application in the areas of film titles, broadcast and commercial design, interactive media, and gaming. The combination of music, visuals and typography will be explored following the basic theories of kinetic composition and aesthetics. Students will study the history of the field, including the work of pioneers such as Norman McLaren, Saul Bass and Len Lye. PREREQUISITE(S): Sophomore Standing and one of the following: ANI 105, ANI 101, GD 105, ART 105, GPH 211, DC 205

GD 270
SEMIOTICS AND VISUAL DESIGN
Undergraduate
Design and designed products can be interpreted as signs that are the result of human needs and desires. This course examines theoretical issues in how design of a message or product influences the user's decision to read it, use it or buy it. Semiotics theory examines these concepts as well as design value and criteria for evaluation in contemporary culture. PREREQUISITE(S): None

GD 300
GRAPHIC DESIGN II
Undergraduate
This course explores design problems in visual communication through word (text) and image (digital, photographic, collage, video) primarily based on the student's own research and writing. Historical word/image art models including dada, surrealism, futurism and contemporary communication and design art are studied as models for the generation of projects. This intermediate level course requires previous mastery of basic design concepts and typography as well as both hands-on and basic computer design skills. PREREQUISITE(S): GD 200 and GD 230

GD 310
WEB DESIGN: ADVANCED PROJECTS
Undergraduate
This course will emphasize interactivity and professional presentation for advanced multimedia web sites for artistic and commercial projects. Advanced concepts and techniques in the visual design and implementation of web pages. Students will use industry standard web design applications and some hand coding in HTML and CSS. PREREQUISITE(S): GD 215 or GD 216

GD 330
ADVANCED TYPOGRAPHY
Undergraduate
Advanced investigation into typography and text for verbal and visual expression for both print and multimedia. PREREQUISITE(S): GD 230

GD 340
PUBLICATION DESIGN
Undergraduate
Design of multiple page documents: magazines, catalogs, and annual reports. Emphasis placed on research methodology, conceptual approach and audience. Knowledge of computer applications and typography are assumed. PREREQUISITE(S): GD 200 and GD 230

GD 341
BOOK MAKING AND BINDING WORKSHOP
Undergraduate
This is an introductory course covering the basic principles of hand bookbinding including theories of book structure, review of paper information and bookbinding materials. The class will be a mixture of demonstrations and practical exercises, and each student will produce a variety of books and structures. PREREQUISITE(S): GD 105
GD 350
PORTFOLIO WORKSHOP
Undergraduate
Students review previous course projects and prepare a final portfolio as well as their own design identity and a resume in preparation for job interviews and/or graduate school. Visiting design professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development. PREREQUISITE(S): GD 200, GD 210 and GD 230

GD 360
ADVERTISING DESIGN
Undergraduate
Explores the function and practice of design in advertising in both social and art historical contexts. This course engages practical real life projects as well as projects that explore cultural and artistic practices. PREREQUISITE(S): GD 200 and GD 230

GD 365
ADVANCED MOTION GRAPHICS
Undergraduate
This course builds on motion graphics fundamentals covered in ANI260 Motion Graphics. In Advanced Motion Graphics, students will work to develop a better understanding of how to develop a distinct visual style in both personal work and in work for clients. The course also focuses on gaining familiarity with contemporary styles and trends in professional motion graphics, and an awareness of Chicago-based motion graphics production. PREREQUISITE(S): ANI260

GD 380
DESIGN FOR CLIENT AND COMMUNITY
Undergraduate
This course enables students to work from start to finish on client-based graphic design and projects. Students establish working relationships as individuals and in teams that utilize their skills to effectively evaluate the communication needs of an organization or business, develop design solutions that fulfill those needs, and negotiate the process between designers and clients. Objectives of the course include: improving student's developing design skills to an advanced level, creating awareness of current design trends, supporting student's development of independent working habits, utilizing integration of both hand-skills and the computer as design tools, and completing professional projects after staged client feedback and revisions. PREREQUISITE(S): GD 200 and GD 230

GD 394
CAPSTONE PROJECT I
Undergraduate
This two course sequence provide a Graphic Design-specific capstone experience for the student. The capstone course will connect the students' Graphic Design course work with the University courses s/he has taken through three components: student-generated design proposals, class/instructor discussions, and the actual creation/production of the student's proposal. The production piece is the primary focus of this course that takes place over two quarters. PREREQUISITE(S): GD 200 and GD 230

GD 395
CAPSTONE PROJECT II
Undergraduate
This two course sequence provide a Graphic Design-specific capstone experience for the student. The capstone course will connect the students' Graphic Design course work with the University courses s/he has taken through three components: student-generated design proposals, class/instructor discussions, and the actual creation/production of the student's proposal. The production piece is the primary focus of this course that takes place over two quarters. PREREQUISITE(S): GD 200 and GD 230

GD 399
INDEPENDENT STUDY
Undergraduate
Independent course of study supervised by an instructor based on an agreed upon proposal. Study form and consent of instructor required. Prerequisite: Consent of dean.
GEO 101
EARTH’S PHYSICAL LANDSCAPE: LITHOSPHERE, HYDROSPHERE, BIOSPHERE
Undergraduate
An introduction to the spatial aspects of the three related systems of the Lithosphere (solid earth), Hydrosphere (water), and Biosphere (living organisms).

GEO 103
URBANIZATION
Undergraduate
The course explores the evolution of urban forms and structures in the United States from the perspective of geography. In addition to studying the historic emergence of the American urban system, the course covers processes and phenomena associated with the spatial organization of housing, transportation, commercial and industrial land-use planning, as well as urban poverty, local governance, and interactions at the urban-rural fringe.

GEO 124
NORTH AMERICA
Undergraduate
The United States, Mexico, and Canada serve as the focus of this survey course. Special topics include pre-European North America, European ideology in the new world, "manifest destiny" and U.S. hegemony in the 20th century, and NAFTA.

GEO 133
URBAN GEOGRAPHY - EXPERIENTIAL LEARNING
Undergraduate
The course provides an in depth analysis of a Chicago neighborhood, connecting this to wider U.S. trends in urbanization and urban development. Students conduct a research project, through archival study and field work.

GEO 170
EARTH’S CULTURAL LANDSCAPE
Undergraduate
A survey of the global patterns and processes which create our world's cultures. Several cultural realms such as language, religion, folk and popular culture, ethnicity, and the built environment serve as foci for a deepened understanding of the world and its people.

GEO 172
CULTURAL GEOGRAPHY
Undergraduate
How do artists depict different locations? How do television portrayals of New York City compare and contrast between situation comedies and drama series? How do lyrics and music portray a sense of place and local identity? This course will analyze how places are represented and understood through arts, music and literature. Students will develop the theoretical skills to examine the cultural geography both of the United States and elsewhere.

GEO 200
SUSTAINABLE URBANISM
Undergraduate
This course focuses on the application and meaning of "sustainability" to our discussion and understanding of cities, urban communities, and the urbanization process. The course conceptualizes sustainability as residing at the intersection of political, economic, social, and ecological thinking and examines its utility and flexibility towards urban form and function. The course pursues the topic of urban sustainability through the lenses of scale (e.g., local vs. global), justice (e.g., social vs. ecological), and diversity (e.g., cultural vs. biotic).

GEO 201
GEOPOLITICS
Undergraduate
A survey of theories of geopolitics and international relations, the course explores issues of international security and organization, regional integration, and nationalism, state formation and conflict. Historic geopolitical cases from Europe (Northern Ireland, EU, Balkans), the Middle East and North Africa, and the Russian realm, provide opportunities to assess theoretical approaches and profile the security and foreign policy concerns of the U.S. in the new millennium.
RELIGIOUS GEOGRAPHY
Undergraduate
Religion and geography are fundamentally intertwined. From the establishment of theocratic states that control territory, to the sprawl of US suburbia that has led to megachurches, the role of religion in shaping the earth's cultural landscape is undeniable. Religious beliefs shape geographies - there are places that, through faith, become sacred; elsewhere religious individuals and groups struggle to claim places in the name of their beliefs. This course will examine case studies from around the world to explore the intersection of geography and religion.

JUSTICE, INEQUALITY AND THE URBAN ENVIRONMENT
Undergraduate
A theoretical and applied investigation of the social, political, and economic processes influencing the spatial distribution of environmental amenities and harms across the U.S. urban landscape, with particular focus on urban structure and the role of environmental justice struggles in shaping urban policy and the urban landscape. Formerly GEO 120.

BOUNDARIES AND IDENTITIES
Undergraduate
A critical survey of the manner in which social, political, ethnic, gender and racial identities are being constructed by modernity and post-modernity. Cross-listed as INT 206. Recommended for GEO majors when taught by Professor Nast.

ENVIRONMENTAL CONSERVATION
Undergraduate
This course explores society-environment relations in case studies drawn from around the world. The course focuses on forces destructive to habitat and biospheres, species loss, global warming, and the tension between “modernization” and environmental sustainability.

BIOGEOGRAPHY
Undergraduate
Biogeography is the study of the distribution of plants and animals on the earth's surface, and the historical and ecological factors and human activities responsible. It asks questions such as: Why were placental mammals absent from (pre-European) Australia, while marsupials were abundant? How are current plant species' distributions different from those of the past, and what implications does this have for their ability to respond to global changes? Why have islands sustained so many extinctions compared to mainlands? Why are there so many insect species in the tropics and so few at high latitudes? How do humans changing the distribution and abundances of plant and animals? This course explores these and other such questions. The goal is to understand biodiversity patterns and processes across earth, and how this knowledge can help maintain biological communities in human-dominated, 21st century landscapes.

INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY
Undergraduate
This course charts the political, social and economic transformation of the developing countries, (Africa, Asia, Latin America, Caribbean, Pacific Islands) into a global economy dominated by the 'developed' countries (North America, Europe and Japan). This process, termed 'GLOBALIZATION', results from the operation of the global market mechanism; the activities of Transnational Corporations (TNCs) and the programs of the International Financial Institutions (IFIs).

SPAIN AND PORTUGAL: THE IBERIAN IMPACT
Undergraduate
An historical-geographical analysis of the Iberian nations with an interdisciplinary focus on global geopolitics, trade, settlement, and cultural characteristics (art, architecture, language and literature, music and religion). This is the only course of its kind offered in U.S. universities. Formerly GEO 318
GEO 220
THE DYNAMIC OCEAN
Undergraduate
Develops the concepts of physical oceanography. Topics include the chemical and physical properties of seawater, the dynamics of ocean currents and circulations, the physics of water waves and tides, the interaction of the ocean with the atmosphere, the formation of coastlines, and the effects of pollution on the ocean. Cross-listed with PHY 220.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

GEO 225
WEATHER AND CLIMATE
Undergraduate
The dynamic atmospheric processes which control day-to-day weather and the longer term processes which determine prevailing climatic conditions are the two principal foci of this course. Special topics include weather systems, climate change, global warming, and human impacts on climate. Cross-listed with PHY 225.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

GEO 230
TRANSPORTATION GEOGRAPHY
Undergraduate
The course is an introduction to the subfield of transportation geography. Studying transportation and transportation-related phenomena from a spatial-analytic perspective, the course builds upon theories and methods of transportation geography. Systematic study of select case studies at the local and regional level provide opportunities for application of principles.

GEO 233
COMPARATIVE URBANISM
Undergraduate
An exploration of non-U.S. urban and planning traditions, through the comparative study of the foundation, morphological change and social-political forces that shaped cities such as Paris, St. Petersburg, Istanbul, Bombay-Mumbai, and Mexico City.

GEO 240
HISTORY OF CARTOGRAPHY
Undergraduate
The course explores the history of mapmaking as a dimension and expression of the intellectual, scientific, technological, and political transformation of society. Focusing primarily on Europe and North America, the course covers the prevailing schools of thought and practitioners, and the structures and forces that shaped them. The course includes hands-on study of archival quality maps in DePaul’s Special Collections. Short field trip to the Newberry Library required.

GEO 241
GEOGRAPHIC INFORMATION SYSTEMS I
Undergraduate
An introductory-level course covering the fundamentals of GIS. Topics include GPS, remote sensing, data models (vector and raster), coordinate systems, and map design. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS.

LSP 120 or HON 180 or (MAT 130 or above) or instructor permission is a prerequisite for this course.

GEO 242
GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS
Undergraduate
An intermediate-level course. Students conduct real-world GIS projects for community organizations in Chicagoland. Topics include data capture, manipulation, database design, data quality, and spatial analysis. Students will complete projects following best practices of GIS project management. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS.

GEO 241 is a prerequisite for this class.
GEO 243
REMOTE SENSING (FORMERLY GEO 343)
Undergraduate
An introduction to the fundamentals of remote sensing, the analysis of the earth through air or space borne sensors. Special topics include image interpretation, image processing, change analysis, environmental monitoring, and photogrammetry. Instruction is accomplished through lectures and hands-on lab exercises using IDRISI. A small lab fee will be charged.

LSP 120 or HON 180 or (MAT 130 or above) or instructor permission is a prerequisite for this course.

GEO 260
GLOBALIZATION AND RESOURCES
Undergraduate
An exploration of globalization and the politics and flow of natural resources between the developed and developing world, especially since World War II. Using case studies from around the world, the course introduces students to competing paradigms of environmental and resource destruction and to the complexities and contingencies of social and environmental change in the “new” global economy.

GEO 266
THE WORLD ECONOMY
Undergraduate
A study of the spatial organization of economic activities. Special topics include static and dynamic models of the space economy, the geography of industrialization, spatial divisions of labor, global commodity chains, and industrial development in peripheral economies. Formerly GEO 366.

GEO 269
POLITICAL ECOLOGY
Undergraduate
The course introduces students to the theoretical foundations and evolution of critical Political Ecology and its assessment of environmental change and social vulnerability in the developing world. The course traces the history of the discipline to its early roots in geography, anthropology, and ecology and tracks its emergence as a theoretically sophisticated critique of the global spread of economic development and environmental policy.

GEO 299
THE NATURE OF GEOGRAPHY
Undergraduate
An introduction to the epistemology of geographic thought, and the methodologies of the discipline of geography. Formerly GEO 100.

GEO 300
GEOGRAPHICAL INQUIRY
Undergraduate
Several perspectives on geographical questioning are presented in seminar format. Geographical researchers present their work with particular emphases on the relations between theoretical frameworks and methodological paradigms.

GEO 310
GREEN INFRASTRUCTURE
Undergraduate
Green Infrastructure (GI) goes beyond the conventional conservation efforts of creating and maintaining national and state parks and wildlife refuges. Instead, GI promotes conservation that takes place at different spatial scales to create a network of open spaces out of existing open spaces and green corridors as well as offering strategies for constructing green spaces out of abandoned urban spaces.

GEO 312
THE MIDDLE EAST AND NORTH AFRICA
Undergraduate
A basic survey of the physical, cultural, economic, and political geography of the countries of northern Africa and Western Asia. The course traces the human geographical impacts of Arabic, Turkish, and Persian civilizations, as well as the manner in which Islam, nationalism, statehood, and global politics are shaping the region today.
GEO 313
AFRICA: A CONTINENT IN TRANSITION
Undergraduate
A geographic survey of the fifty countries of Sub-Saharan Africa, with special emphasis on current aspects of their ethnic, economic, and geopolitical differences.

GEO 314
SOUTH AND SOUTHEAST ASIA
Undergraduate
Key characteristics of the physical, cultural, economic and political geography, and international relations of India, Pakistan, Thailand, the Philippines, and other countries in the region.

GEO 315
ASI A’S PACIFIC RIM
Undergraduate
A survey course focused upon key geographical factors contributing to the emergence of Japan as an international economic leader, and the rapid development of the People's Republic of China, Taiwan, Hong Kong, and South Korea, among others, as global economic players.

GEO 316
THE EUROPEAN UNION
Undergraduate
An integration of political geographic and international relations perspectives on European integration: Special emphases on political philosophies and theories of integration, the geopolitics of block formation and enlargement, institutional structure, the evolution of policies, and the future directions of the European Union. Cross-listed with PSC 340.

GEO 317
POST SOVIET EASTERN EUROPE AND THE RUSSIAN REALM
Undergraduate
A regional geographic survey of the Russian realm spanning the imperial, Soviet, and republican eras: Special emphases on the physical, political, cultural, and economic geographies of the vast Eurasian region dominated historically by Russia.

GEO 326
LATIN AMERICA AND THE CARIBBEAN
Undergraduate
An analysis of the social, environmental, cultural, economic, and political factors affecting this vast region.

GEO 327
SOUTH AMERICA
Undergraduate
An analysis of the physical, cultural, economic, and political factors affecting the geography of that continent's regions and countries.

GEO 331
CHICAGO: SPATIAL ANATOMY OF A METROPOLIS
Undergraduate
An advanced exploration of Chicago's urban geography, focusing in detail on topics such as historical geography, industrial change, community development, housing, architecture, transportation and Chicago's status as a "global city."

GEO 333
URBAN PLANNING
Undergraduate
A seminar on the intellectual history and theories of urban planning and design, and their application in urban settings in the U.S. and abroad. Systematic study of case studies leads to the investigation of current urban planning issues in Chicago.
GEO 339
TOPICS IN ARCHITECTURE AND URBANISM
Undergraduate

Major cities around the world are often identified with distinctive architecture. In many locations, different schools and periods of architectural design can be 'read' from examining the urban landscape. This course will examine the relationship between architecture and urbanism. As an upper level course, rather than a broad survey, the material will focus on a specific location or architectural style for the duration of the quarter, allowing students to learn in depth about how architecture and urbanism are interconnected.

GEO 343
REMOTE SENSING II
Undergraduate

This course presents intermediate to advanced techniques in remote sensing, analysis of the earth through air or space borne sensors. Remote sensing is defined as "the technique of obtaining information about objects through the analysis of data collected by special instruments that are not in physical contact with the objects of investigation" (Avery and Berlin 1992). In this course we will be concerned primarily with the uses and applications of data acquired by various electromagnetic sensors being operated from airborne and spaceborne platforms, i.e. aircraft and satellites. The purpose of Remote Sensing II is to provide 2nd level depth to some of the more advanced techniques of remote sensing and image interpretation, following on the introductory prerequisite GEO 243. In addition there will be a detailed survey of federal remote sensing projects (mainly from NASA) and the climate-centered focus on the earth system that these provide - in essence the most comprehensive source of evidence for climate research. There is a special focus on urban/environmental applications of remote sensing, i.e. the detection, delineation, identification, and quantification of processes occurring in and around cities which affect the environment. Remote sensing technologies have, to an increasing extent, become integrated and deployed through geographic information systems (GIS) technology. Students learn to integrate techniques from this course to produce information products that are useful in the support of public and private decision-making. ENVI - an advanced image processing application that is integrated with the ArcGIS desktop is the principal platform used for instruction in the course. Techniques covered include advanced classification, georeferencing, LIDAR, and hyperspectral data analysis. The course will be taught through integrated hands-on activities, lectures and a comprehensive final project.

GEO 243 is a prerequisite for this course.

GEO 344
GEOGRAPHIC INFORMATION SYSTEMS III: SPATIAL ANALYSIS FOR SUSTAINABILITY
Undergraduate

An advanced-level course. Students conduct spatial analysis of sustainability issues of their interests. Topics include geographic visualization, network analysis, spatial interpolation, and exploratory spatial data analysis. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS. PREREQUISITE(S): GEO 242 or consent of instructor. Formerly GEO 244.

GEO 242 is a prerequisite for this class.

GEO 350
WORLD OF WINE
Undergraduate

An analysis of the geographical factors that influence the global production and distribution of wine. Material fee required, payable on the first day of class. Students must be 21 years of age or older.

GEO 370
ADVANCED TOPICS IN CULTURAL GEOGRAPHY
Undergraduate

This course will engage with contemporary scholarly research in Cultural Geography. Each class will be centered around a seminar discussion of required readings, selected from recent scholarship. The instructor of this class will focus on areas of her or his own expertise, including geographies of landscape, feminist geography, geographies of race and ethnicity, geographies of nationalism and post-colonialism.

GEO 391
RESEARCH TECHNIQUES
Undergraduate

An overview of research techniques in geography with a focus on a statistical approach. Students will get versed in quantitative reasoning by learning how statistical concepts and techniques are applied to geographic problems. Topics include research concepts, research design, descriptive statistics, and inferential statistics geared toward understanding geographic phenomena. Instruction is accomplished through lectures and hands-on exercises using calculators, SPSS and ArcGIS. PRE-REQUISITE(S): GEO 241.

GEO 241 is a prerequisite for this class.
GEO 395
SEMINAR IN SELECTED TOPICS
Undergraduate
Upper-division seminar exploring selected geographical issues.

GEO 398
INTERNSHIP
Undergraduate
The course combines academic study with practical experience obtained through work in an extramural internship setting. The internship course requires academic output in the form of a research journal, paper, or other.

GEO 399
INDEPENDENT STUDY
Undergraduate
Intensive study of a topic of special interest. Private conferences with instructor of supervised reading and research. Variable credit. Junior or Senior standing and department consent are a prerequisite for this class.

GEO 441
GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT
Graduate
This course will focus on applications of Geographic Information Systems (GIS) to community studies and community development. As an amalgam of information technologies (e.g. database management, Web 2.0) and earth measurement technologies (e.g. global positioning systems, remote sensing), GIS is rapidly entering the realm of community development. The course will explain how GIS works; enable students to learn techniques including mapping, spatial analysis, and data management; and provide students with the opportunity to rethink community development through the use of geospatial information.

GEO 499
INDEPENDENT STUDY [GRADUATE]
Graduate
Intensive study of a topic of special interest. Private conferences with instructor of supervised reading and research. Variable credit. Instructor consent required.

GER 101
BASIC GERMAN I
Undergraduate
Listening to, speaking, reading and writing German in a cultural context for the beginning student.

GER 102
BASIC GERMAN II
Undergraduate
Continued emphasis on the four skills in culturally authentic situations.

GER 103
BASIC GERMAN III
Undergraduate
Completion of the basic elements of the German language, spoken as well as written, with due regard to the cultural context of German expression.

GER 104
INTERMEDIATE GERMAN I
Undergraduate
Intensive practice in the use of German through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills.
GER 105
INTERMEDIATE GERMAN II
Undergraduate
Continuing practice in spoken and written German and further development of reading and listening abilities in an authentic cultural context.

GER 106
INTERMEDIATE GERMAN III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing German with a concomitant heightened awareness of the cultural dimensions of the German language.

GER 197
SPECIAL TOPICS IN GERMAN
Undergraduate
See schedule for current offerings.

GER 198
STUDY ABROAD
Undergraduate
Variable credit.

GER 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

GER 201
ADVANCED COMMUNICATION I
Undergraduate
Developing culturally appropriate speech and writing through the study of speech acts and written documents within the context of a systematic study and review of grammar.

GER 202
ADVANCED COMMUNICATION II
Undergraduate
Focus on the differences between speech and writing with an emphasis on the latter as expressed in compositions, editing and other writing activities.

GER 203
ADVANCED COMMUNICATION III
Undergraduate
Developing a sophisticated spoken fluency using authentic oral texts as models for elaborated discourse. Written texts and writing exercises reinforce oral expression.

GER 277
FIN-DE-SI ECLE VIENNA
Undergraduate
Vienna of the late-nineteenth and early-twentieth centuries was a place where geography, culture, and intellect intersected. Figures such as Sigmund Freud, Gustav Klimt, Arthur Schnitzler, Ludwig Wittgenstein, and Gustav Mahler mingled, discussed, and shaped the arts, philosophy, and sciences of the nascent twentieth century.

GER 297
SPECIAL TOPICS IN GERMAN
Undergraduate
See schedule for current offerings.
GER 298
STUDY ABROAD
Undergraduate
Variable credit.

GER 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

GER 301
INTRODUCTION TO GERMAN LITERATURE I: FROM ORIGINS TO 1600
Undergraduate
From origins to 1600.

GER 302
INTRODUCTION TO GERMAN LITERATURE II: FROM 1600-1850
Undergraduate
From 1600-1850.

GER 303
INTRODUCTION TO GERMAN LITERATURE III: FROM 1850 TO PRESENT
Undergraduate
From 1850 to present.

GER 304
GERMAN DRAMA
Undergraduate
Topics include: the classical period; drama of the 19th century; drama of the 20th century.

GER 305
GERMAN PROSE
Undergraduate
Topics include: prose from 1600 to Goethe; from the Romantic to the Realistic periods; prose of the 20th century.

GER 306
THE NOVELLE
Undergraduate
From Goethe to Grass.

GER 307
GERMAN POETRY
Undergraduate
Topics include: from the Baroque to Holderin; from Romanticism to the present.

GER 308
GOETHE’S FAUST
Undergraduate
Part I and selected passages from Part II.
GER 309
GERMAN CIVILIZATION I
Undergraduate
The rise and fall of the "Holy Roman Empire": Social, intellectual and artistic background of Germany from its origins to 1871.

GER 310
GERMAN CIVILIZATION II
Undergraduate
Social, intellectual and artistic developments in Germany from unification in 1871 to reunification in 1990.

GER 311
GERMAN CIVILIZATION III
Undergraduate
Contemporary Germany.

GER 312
GERMAN INTELLECTUAL HISTORY
Undergraduate
Marx, Nietzsche, Freud; their decisive influence on the twentieth century.

GER 313
TURN OF THE CENTURY VIENNA
Undergraduate

GER 314
BERLIN AND THE GOLDEN TWENTIES
Undergraduate
Expressionist film, Bauhaus, Dada, Brecht, Thomas Mann.

GER 315
LITERATURE AFTER 1945 (EAST AND WEST)
Undergraduate
Reconstruction of German literature and coming to terms with the past: "Gruppe 47", Grass, Boell, Enzensberger.

GER 316
LITERATURE OF THE WEIMAR YEARS
Undergraduate
Mann, Hesse, Kafka, Brecht.

GER 317
WOMEN WRITERS OF GERMAN EXPRESSION
Undergraduate
Studies in literature and social issues from all periods of German, Austrian and Swiss history.

GER 319
MULTICULTURAL CONTEMPORARY WRITERS
Undergraduate
Focus on the critical bicultural awareness of immigrant writers of German expression whose original language is not German.
GER 320
ADVANCED COMMERCIAL GERMAN
Undergraduate
Advanced preparation for the use of German in the business world.

GER 321
TRANSLATION
Undergraduate
Fundamental principles of translation and acquisition of practical skills involved in translating original literary and other texts from German into English and vice versa. Three years of college German is recommended.

GER 329
THE GERMAN FILM
Undergraduate
Topics from all periods.

GER 351
GERMAN PHONOLOGY AND PHONETICS
Undergraduate
An in-depth study of the language's sound system and intensive pronunciation practice.

GER 397
SPECIAL TOPICS IN GERMAN
Undergraduate
See schedule for current offerings.

GER 398
STUDY ABROAD
Undergraduate
Variable credit.

GER 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

GER 401
INTRODUCTION TO GERMAN LITERATURE I: FROM ORIGINS TO 1600
Graduate
From origins to 1600. Cross-listed with GER 301.

GER 402
INTRODUCTION TO GERMAN LITERATURE II: FROM 1600 - 1850
Graduate
From 1600-1850. Cross-listed with GER 302.

GER 403
INTRODUCTION TO GERMAN LITERATURE III: FROM 1850 TO PRESENT
Graduate
From 1850 to present. Cross-listed with GER 303.
GER 404
GERMAN DRAMA
Graduate
Topics include: the classical period; drama of the 19th century; drama of the 20th century. Cross-listed with GER 304.

GER 405
GERMAN PROSE
Graduate
Topics include: prose from 1600 to Goethe; from the Romantic to the Realistic periods; prose of the 20th century. Cross-listed with GER 305.

GER 406
THE NOVELLE
Graduate
From Goethe to Grass. Cross-listed with GER 306.

GER 407
GERMAN POETRY
Graduate
Topics include: from the Baroque to Holderin; from Romanticism to the present. Cross-listed with GER 307.

GER 408
GOETHE'S FAUST
Graduate
Part I and selected passages from Part II. Cross-listed with GER 308.

GER 409
GERMAN CIVILIZATION I
Graduate
The rise and fall of the "Holy Roman Empire": Social, intellectual and artistic background of Germany from its origins to 1871. Cross-listed with GER 309.

GER 410
GERMAN CIVILIZATION II
Graduate
Social, intellectual and artistic developments in Germany from unification in 1871 to reunification in 1990. Cross-listed with GER 310.

GER 411
GERMAN CIVILIZATION III
Graduate
Contemporary Germany. Cross-listed with GER 311.

GER 412
GERMAN INTELLECTUAL HISTORY
Graduate

GER 413
TURN OF THE CENTURY VIENNA
Graduate
GER 414
BERLIN AND THE GOLDEN TWENTIES
Graduate
Expressionist film, Bauhaus, Dada, Brecht, Thomas Mann. Cross-listed with GER 314.

GER 415
LITERATURE AFTER 1945 (EAST AND WEST)
Graduate
Reconstruction of German literature and coming to terms with the past: "Gruppe 47", Grass, Boell, Enzensberger. Cross-listed with GER 315.

GER 416
LITERATURE OF THE WEIMAR YEARS
Graduate
Mann, Hesse, Kafka, Brecht. Cross-listed with GER 316.

GER 417
WOMEN WRITERS OF GERMAN EXPRESSION
Graduate
Studies in literature and social issues from all periods of German, Austrian and Swiss history. Cross-listed with GER 317.

GER 419
MULTICULTURAL CONTEMPORARY WRITERS
Graduate
Focus on the critical bicultural awareness of immigrant writers of German expression whose original language is not German. Cross-listed with GER 319.

GER 420
ADVANCED COMMERCIAL GERMAN
Graduate
Advanced preparation for the use of German in the business world. Cross-listed with GER 320.

GER 421
TRANSLATION
Graduate
Fundamental principles of translation and acquisition of practical skills involved in translating original literary and other texts from German into English and vice versa. Cross-listed with GER 321.

GER 429
THE GERMAN FILM
Graduate
Topics from all periods. Cross-listed with GER 329.

GER 451
GERMAN PHONOLOGY AND PHONETICS
Graduate
An in-depth study of the language's sound system and intensive pronunciation practice. Cross-listed with GER 351.

GER 497
SPECIAL TOPICS IN GERMAN
Graduate
See schedule for current offerings.
GER 498
STUDY ABROAD
Graduate
Variable credit. Permission required.

GER 499
INDEPENDENT STUDY
Graduate
Variable credit. Permission of chair and instructor required.

GPH 205
HISTORICAL FOUNDATIONS OF VISUAL TECHNOLOGY
Undergraduate
This course is a survey of the development, application and meaning of visual technologies in a wide range of world cultures from pre-history to the present. It traces the unique intersection of mathematics and physical culture that marks design science, as it has been realized in a variety of human societies. The course includes works of art that emphasize those mathematical and geometric elements that are antecedent to contemporary graphic technology.

GPH 211
PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS I
Undergraduate
An introduction to the visual, non-verbal principles incorporated in the effective presentation of on-screen environments. This course emphasizes the use of two-dimensional elements and their organization.

GPH 212
PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS II
Undergraduate
Further experience with the visual, non-verbal principles incorporated in effective presentation of on-screen environments. This course emphasizes the use of three-dimensional elements, spaces and their organization. PREREQUISITE(S): ART 105, GD 105, GPH 211 or HCI 402.

GPH 213
PERCEPTUAL PRINCIPLES FOR DIGITAL ENVIRONMENTS III
Undergraduate
An introduction to the visual and communication principles for the structure and organization of time-based digital environments. Introduction to standard 2D animation software applications. PREREQUISITE(S): GPH 211 or GD 105 or equivalent

GPH 250
DIGITAL MODELING I
Undergraduate
Introduction to 3D object modeling with an emphasis on visual applications and prototype design. Students will work with basic spatial operations in surface modeling and CAD interfaces and will produce an original object from pattern with computer-aided manufacture. Prerequisite: GPH 212

GPH 255
HAND PROTOTYPING FOR GRAPHIC VISUALIZATION
Undergraduate
Paper prototyping techniques for pre-screen image design including form rendering, rapid visualization, descriptive geometry, and iconographic diagramming. Students will work from initial sketch versions through client presentation. PREREQUISITE(S): ART 106 and (GPH 211 or GD 105)
GPH 259
DESIGN GEOMETRY
Undergraduate
(Cross-listed with ART 295) An historical and practical introduction to the visual applications of geometry. This CAD-based survey covers constructive geometry, surface symmetry, projective geometry, polyhedrons and spheroids through the discussion of historical precedents and practicum exercises.

GPH 269
GRAPHIC GEOMETRIES
Undergraduate
An historical and practical introduction to the visual applications of geometry. This CAD-based survey covers constructive geometry, surface symmetry, projective geometry, polyhedrons and spheroids through the discussion of historical precedents and practicum exercises.

Graduate standing is a prerequisite for this class.

GPH 321
COMPUTER GRAPHICS DEVELOPMENT I
Undergraduate
This course presents the fundamental mathematical foundations of graphics including an introduction to the basic geometric constructions of points, vectors, transformations, matrices and homogeneous coordinates. The course will explore applications of these mathematical techniques to rendering 3D scenes and lighting and shading surfaces in 3D. Advanced topics will include several key techniques from computational geometry such as the computation of object intersections and applications to rendering 3D scenes and object collisions. The focus of this course is on building the software from scratch rather than using a graphics application programming interface (API) so that students will gain a deeper understanding of the techniques they will be using in later courses through an API such as OpenGL or Direct3D.
PREREQUISITE(S): CSC 300 or CSC 383 or CSC 393

GPH 325
SURVEY OF COMPUTER GRAPHICS
Undergraduate
(Formerly GPH 371) A survey of basic 3D techniques, including interaction of light and color. The relationship between visual effect and geometry. Visual effects of rendering, texturing and lighting algorithms. Procedurally based modeling and an introduction to procedural animation techniques. PREREQUISITE(S): CSC 212 or CSC 262 or IM 330

GPH 329
COMPUTER GRAPHICS DEVELOPMENT II
Undergraduate
(Formerly CSC 329) Basic graphics architecture. Coordinate systems. Three-dimensional representations and transformations. Simple visible-surface algorithms. Introduction to illumination, Gouraud and Phong shading. Antialiasing, Texture mapping and elements of animation. Students create a graphics package using a high-level graphics API such as OpenGL. PREREQUISITE(S): GPH 321 or(CSC 393 and either MAT 220 or MAT 262)

GPH 336
SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION
Undergraduate

GPH 338
SURVEY OF 3-D ANIMATION
Undergraduate
(Formerly titled Computer Animation Survey). Use of a commercially-based animation package for the purpose of communicating a narrative or visual information. Animation of transformations, deformations, cameras, and lights. Forward / inverse kinematics for character rigging. Prerequisites: ANI 201 and either GPH 325 or GPH 250.
GPH 339
ADVANCED RENDERING TECHNIQUES
Undergraduate
An introduction to shading techniques for highly realistic computer generated imagery. Texturing basics. Design, acquisition and application of layered textures to produce realistic dirt and aged surfaces. Turntables. Basic illumination and reflectance models. Elements of procedural texturing for organic surface materials such as wood and marble. The course includes an introduction to an industry standard shading language that is a powerful prototyping tool for both offline and real-time rendering environments. Students work in teams to produce convincingly organic environments. PREREQUISITE(S): GPH 325 or GPH 321 or (ANI 339 and GPH 355)

GPH 340
PROCEDURAL SHADING
Undergraduate
Procedural pattern generation, creating patterns such as marble and wood with noise, moving beyond the Phong Illumination model. Gaussian distributions and the Ward anisotropic model, BRDFs. Non-photorealistic rendering techniques such as “toon” shading and painterly techniques. PREREQUISITE(S): GPH 339

GPH 341
ADVANCED LIGHTING TECHNIQUES
Undergraduate
Simple local models such as Phong, extensions to Phong (HDRI), ray-traced lighting and shadows, soft shadow generation using shadow maps, radiosity for producing ambient lighting and photon mapping for calculating realistic refracted light. Theory, lighting features supported, efficiency, and practical considerations for choosing the model in production. PREREQUISITE(S): GPH 339

GPH 345
DIGITAL SURFACE MODELING
Undergraduate
This course is an upper level exploration of digital modeling in NURBS environments. Students will learn to creatively apply analytic methods of form production and scenic presentation suitable for application to design and engineering, medical and forensic visualization, and testing. In general this course will prepare students for 3-D graphic applications outside of the entertainment industry while rounding out their modeling skills for that industry, too. PREREQUISITE(S): GPH 212 or GPH 259 or ANI 230.

GPH 346
SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION
Undergraduate

GPH 348
RIGGING FOR ANIMATION
Undergraduate
Preparing 3D characters and other models for animation. Skeleton chains, joint orientations, and degrees of freedom. IK solvers, including single chains, rotation and splines. Methods for computing weights for skinning body and face, including semi-automated approaches. Considerations for mechanical objects, animals and low-polygon models. PREREQUISITE(S): GPH 338 or ANI 201

GPH 350
DIGITAL MODELING II
Undergraduate
Advanced experience in object modeling and prototype design. Students will work with more sophisticated form relationships, reverse engineering and textures, and will produce an original object from slicing with computer-aided manufacture. PREREQUISITE(S): GPH 250.

GPH 355
3D SCRIPTING FOR ANIMATORS
Undergraduate
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. Prerequisites: ANI 230 or GPH 338
GPH 358
COMPUTER GRAPHICS AUTOMATION
Undergraduate
Covers the use of scripting and other automation techniques to generate computer graphics and animation. Emphasis on the benefits and differences of scripting languages compared to conventional graphics programming. Using commercially available scripting environments, students will generate rich, interesting graphics and animations that would not be possible with the conventional user interface.
PREREQUISITE(S): IM 330 or CSC 212 or CSC 262 or GPH 355 or CSC 242.

GPH 360
MODELING SPACES
Undergraduate
The digital design and modeling of environmental spaces with attention to human use parameters. PREREQUISITE(S): GPH 250.

GPH 372
PRINCIPLES OF COMPUTER ANIMATION
Undergraduate
(Formerly CSC 372) This course will cover a range of topics in introductory 3D Computer Animation. Topics covered will include key framing, interpolation, hierarchies, inverse kinematics, particle systems, and the basics of physically based simulation and modeling.
PREREQUISITE(S): GPH329.

GPH 374
COMPUTER GAMES
Undergraduate
(Formerly CSC 374) (Cross-listed with CSC 574) Concept and character development, storyboarding, prototyping, testing and implementation. Interaction techniques. Optimization of lighting and texturing. Discussion of relevant hardware and peripherals.
PREREQUISITE(S): GPH 329.

GPH 375
ADVANCED GRAPHICS DEVELOPMENT
Undergraduate
(Formerly CSC 375) Survey of standards and current modular technology for 2D and 3D graphics software development. Use of software development toolkits to create "plug-ins" and other modularly organized functionality enhancements for selected commercially available graphics packages. PREREQUISITE(S): GPH 329 or permission of instructor.

GPH 376
ARTIFICIAL INTELLIGENCE IN COMPUTER GAMES
Undergraduate
The course introduces Artificial Intelligence (AI) topics applied to computer games. No previous knowledge of AI will be assumed. The course concentrates of development of applications that guide game objects in 2D (3D) space. Basic AI architectures and techniques are introduced. Implementation of a game AI engine will be discussed. PREREQUISITE(S): GPH 374.

GPH 380
VISUALIZATION
Undergraduate
An in depth introduction to a wide range of visualization techniques focusing on medical and scientific applications. Introduction to programming using a visualization package, use of color for feature extraction and enhancement, false color mapping techniques, reconstruction techniques, iso surface generation, stream lines and ribbons, spatial set operations and projections of higher-dimensional data sets. Prerequisite(s): GPH 325

GPH 387
FORENSIC ANIMATION
Undergraduate
Techniques and issues in forensic animation. Application of modeling and rendering to the recreation of time-based events for legal purposes. Survey of research and interview techniques. Demonstrative recreation and physically-based recreation. Issues of accuracy, verification, certification and ethics. Students research and recreate an event with forensic value. Possible project areas include motor vehicle incidents, aviation events, product liability, medicine, and trademark infringement. Prerequisites: GPH 338 or ANI 231
GPH 388
PRODUCTION PIPELINE TECHNIQUES
Undergraduate
An essential aspect of CGI is the skill to effectively manage data for an entire show, and to know how to monitor renders and image processes with the end result of assembling the finished animation. Students taking this course will gain hands-on experience in render queue management, automated file/image processing and manipulation, disk resource management, data archiving, conversion of outside vendor media and scripting tools to automatic common tasks and improve workflow. Students will work in teams to complete large-scale asset management and rendering projects. Prerequisites: CSC 212 or CSC 262

GPH 389
REAL-TIME GRAPHICS TECHNIQUES
Undergraduate
This course will cover the basic algorithms and techniques used in today's real-time graphics systems. Topics will include the following: an introduction to computational geometry including computation with polygonal meshes. Alternate scene representations for efficient geometry culling, including BSP trees and oct-trees. Bounding volume hierarchies, box-trees and R-trees, and application to geometry culling. Programmable graphics hardware and its applications to geometric deformations and surface rendering. PREREQUISITE(S): GPH 329

GPH 390
TOPICS IN GRAPHICS
Undergraduate
Description: May be repeated for credit. PREREQUISITE(S): Permission of Instructor

GPH 395
COMPUTER GRAPHICS SENIOR PROJECT
Undergraduate
A group project involving analysis, design, creation, implementation and testing of a large project such as an animation, an interactive multimedia presentation or a video game. Portfolio creation and critique. Discussion of strategies for graduate school and the job market. PREREQUISITE(S): GPH 338 or GPH 372.

GPH 399
INDEPENDENT STUDY
Undergraduate
Variable credit. PREREQUISITE(S): Consent of dean.

GPH 425
SURVEY OF COMPUTER GRAPHICS
Graduate
Expression of visual intent through geometry and procedure. A survey of basic 3D techniques, including interaction of light and color. Visual effects of rendering, texturing, and lighting algorithms. Procedural modeling techniques and an introduction to procedurally-based texturing and animation. PREREQUISITE(S): CSC212 or CSC262.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 436
FUNDAMENTALS OF COMPUTER GRAPHICS
Graduate
An accelerated introduction to the graphics development environments and to graphical programming. Provides an in depth discussion of the basic mathematical language of computer graphics: vectors, transformations, homogeneous coordinates and their associated data structures. Advanced topics will include sampling theory and interpolation. Also provides a basic introduction to industry standards in graphics development, including specifying transformations and viewing parameters. PREREQUISITE(S): CSC 393 and MAT 150.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
GPH 438
COMPUTER ANIMATION SURVEY
Graduate
Survey of methods used in computer animation. This course uses commercially available software packages to teach techniques for animation and digital video production. The techniques covered include storyboarding, key frame animation, audio and video editing. PREREQUISITE(S): GPH 425 or GPH 469.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 448
COMPUTER GRAPHICS SCRIPTING
Graduate
Covers the use of scripting to generate computer graphics and animation. Emphasis on the benefits and differences of scripting languages compared to conventional graphics programming. Using commercially available scripting environments, students will generate complex graphics and animations that would not be possible with the conventional user interface. PREREQUISITE(S): GPH 438.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 450
DIGITAL MODELING I
Graduate
Introduction to 3D object modeling with an emphasis on visual applications and prototype design. Students will work with basic spatial operations in surface modeling and CAD interfaces and will produce an original object from pattern with computer-aided manufacture. Prerequisite: HCI 470.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 465
SURVEY OF VISUALIZATION APPLICATIONS
Graduate
An in-depth introduction to a wide range of visualization techniques focusing on medical and scientific and engineering applications. Introduction to programming using a visualization package, use of color for feature extraction and enhancement, false color mapping techniques, reconstruction techniques, isosurface generation, stream lines and ribbons, spatial set operations, volumetric techniques and projections of higher-dimensional datasets. PREREQUISITE(S): GPH 425 or Statistics (IT 223, CSC 423 or MAT 351)

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 469
COMPUTER GRAPHICS DEVELOPMENT
Graduate
Basic graphics architecture. Coordinate systems. Three-dimensional representations and transformations. Simple visible-surface algorithms. Introduction to illumination. Gouraud and Phong shading. Antialiasing. Texture mapping and elements of animation. Students create a graphics package using a high-level graphics API such as OpenGL. PREREQUISITE(S): GPH 436 or GPH 321

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 487
FORENSIC ANIMATION
Graduate
Techniques and issues in forensic animation. Application of modeling and rendering to the recreation of time-based events for legal purposes. Survey of research and interview techniques. Demonstrative recreation and physically-based recreation. Issues of accuracy, verification, certification and ethics. Students research and recreate an event with forensic value. Possible project areas include motor vehicle incidents, aviation events, product liability, medicine, and trademark infringement. Prerequisite: TBD

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
GPH 536
SMOOTH SURFACE MODELING FOR GRAPHICS AND ANIMATION
Graduate

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 538
RIGGING FOR ANIMATION
Graduate
Readying 3D characters and other models for animation. Skeleton chains, joint orientations, and degrees of freedom. IK solvers, including single chains, rotation and splines. Methods for computing weights for skinning body and face, including semi-automated approaches. Considerations for mechanical objects, animals and low-polygon models. PREREQUISITE(S): GPH 438

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 539
ADVANCED RENDERING TECHNIQUES
Graduate
An in-depth examination of texturing techniques for highly realistic computer generated imagery. Design and implementation of layered textures to produce realistic dirt and aged surfaces. Cost analysis of advanced illumination and reflectance models, including environment and shadow mapping, and ambient occlusion. Procedural texturing including pattern generation and the application of noise to produce organic surfaces. Shader development using an industry standard. Prototyping for both offline and real-time rendering environments. Students work in teams to produce convincingly organic environments. PREREQUISITE(S): GPH 425 or GPH 436 or (ANI 439 and GPH 355)

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 540
PROCEDURAL SHADING
Graduate
Procedural pattern generation, creating patterns such as marble and wood with noise. Moving beyond the Phong Illumination model: Gaussian distributions and the Ward anisotropic model, BRDFs. Non-photorealistic rendering techniques such as “toon” shading and painterly techniques. PREREQUISITE(S): GPH 539

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 541
ADVANCED LIGHTING TECHNIQUES
Graduate
Simple local models such as Phong, extensions to Phong (HDR), ray-traced lighting and shadows, soft shadow generation using shadow maps, radiosity for producing ambient lighting and photon mapping for calculating realistic refracted light. Theory, lighting features supported, efficiency, and practical considerations for choosing the model in production. PREREQUISITE(S): GPH 539

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 560
MODELING SPACES
Graduate
The digital design and modeling of environmental spaces with attention to human use parameters. PREREQUISITE(S): any GPH 400-level course or consent of instructor.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
GPH 565
DESIGNING FOR VISUALIZATION
Graduate

Sources of graphical integrity and sophistication. Data-Ink maximization. Data density. The use of color to enhance features in data sets and the communication of information. Effective use of space and time. Use of 3D techniques to display multi-dimensional data. The use of isosurfaces and volumetric techniques to display features of data sets. Students will use a programmable system to produce their visualizations and will learn how to use procedural techniques to express graphical intent. (Only one of GPH 570 and GPH 565 may be taken for credit) Prerequisites: GPH 448 and HCI 470

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 570
VISUALIZATION
Graduate

(Formerly CSC 570) Reconstruction techniques. Voxel classification and isosurface generation. Spatial set operations. Projections of higher-dimensional data sets. Data feature enhancement. False color mapping. Survey of applications in science, engineering and medicine. PREREQUISITE(S): GPH 469.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 572
PRINCIPLES OF COMPUTER ANIMATION
Graduate

(Formerly CSC 572) This course will cover a range of topics in introductory 3D Computer Animation. Topics covered will include key framing, interpolation, hierarchies, inverse kinematics, particle systems, and the basics of physically based simulation and modeling. PREREQUISITE(S): GPH 469.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 574
COMPUTER GAMES
Graduate

(Formerly CSC 574) Concept and character development, storyboarding, prototyping, testing and implementation. Interaction techniques. Optimization of lighting and texturing. Discussion of relevant hardware and peripherals. PREREQUISITE(S): GPH 469.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 575
ADVANCED GRAPHICS DEVELOPMENT
Graduate

Survey of standards and current modular technology for 2D and 3D graphics software development. Use of software development toolkits to create "plug-ins" and other modularly organized functionality enhancements for selected commercially available graphics packages. PREREQUISITE(S): GPH 448 and GPH 469.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

GPH 576
ARTIFICIAL INTELLIGENCE IN COMPUTER GAMES
Graduate

The course introduces Artificial Intelligence (AI) topics applied to computer games. No previous knowledge of AI will be assumed. The course concentrates of development of applications that guide game objects in 2D (3D) space. Basic AI architectures and techniques are introduced. Implementation of a game AI engine will be discussed. Prerequisites: GPH 469

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
This class explores the current trends in programmable computer graphics hardware. Modern graphics processing units (GPU's) are becoming increasingly powerful and fully programmable parallel processing units. They make extremely sophisticated effects in computer graphics, such as shadows, displacement maps, skinning, motion blur, reflections and refractions, possible in real-time scenes. In addition these increasingly general programmable units are being used for far more general computing problems from traditional searching and sorting algorithms to computational problems in physics such as the diffusion equation and fluid flow. In this course we will explore the applications of hardware shading to computer graphics, including advanced lighting, shading and surface effects. As time allows, we will explore other applications such as physics and computer science. Prerequisites: GPH 469

CDM graduate students in the Pre requisite Pha se are restricted from registering for this class.

May be repeated for credit. PREREQUISITE(S): Permission of instructor.

CDM graduate students in the Pre requisite Pha se are restricted from registering for this class.

Basic Classical Greek is the first Greek translation course. GRK 101 introduces students to the basics of the language of the Athenians, which includes the Greek alphabet, pronunciation, accentuation and the beginnings of Greek grammar.

Basic Classical Greek II is the second Greek translation course. GRK 102 is a continuation of the introduction to grammar with an emphasis on reading skills through vocabulary development and composition.

Basic Classical Greek III is the third Greek translation course. GRK 103 pays special attention to reading Greek texts in conjunction with composition and English translations for an appreciation of accurate rendering and structural divergence.

Intermediate Classical Greek I is the fourth Greek translation course. GRK 104 is a translation course for students who have completed GRK 101-102-103 (or the equivalent), concentrating on grammar and understanding how Greek grammar and idiom function. Students continue to expand their vocabulary skills. Student interest determines some of the content.

Intermediate Classical Greek II is the fifth Greek translation course. GRK 105 is a translation course for students who have completed GRK 101-102-103, concentrating on grammar and understanding how Greek grammar and idiom function. Students learn forms of irregular verbs. Student interest determines some of the content.
GRK 106
INTERMEDIATE CLASSICAL GREEK III
Undergraduate
Intermediate Classical Greek III is a translation course for students who have completed GRK 101-102-103, concentrating on grammar and understanding how Greek grammar and idiom function. Some composition accompanies translation. Student interest determines some of the content.

GSB 420  
APPLIED QUANTITATIVE ANALYSIS  
Graduate  
This course provides a comprehensive review of some basic mathematical and statistical methods and stresses their practical applications in business and economics. The course will equip the student with the quantitative skills required in the MBA program and will also provide a good foundation for addressing typical problems that arise in business. Additionally, the skills acquired in the course will also help the student prepare for the quantitative sections of professional exams, such as the CFA, the CPA and the CMA exams. This course will stress learning through applications/problem-solving using Excel and/or Minitab software for data analyses. However, the course must be analytical and theoretical to the extent that is necessary to develop a correct understanding of the topics presented. The topics covered in the course include relevant mathematical concepts: use of relevant functions and solving equations in unknowns, elementary calculus and graphing functions. It also focuses on relevant statistical concepts: probability theory, hypothesis testing, regression analysis and forecasting.

GSB 595  
DEVELOPING SUSTAINABLE STRATEGIES: PRACTICUM  
Graduate  
This course is designed to integrate the concept of strategy development into the larger ecological economic context of serving market/society needs in a finite world. The goal of strategy in organizations has traditionally been defined as one of value maximization, from the shareholder perspective exclusively. But the role of strategy is to guide organizations in competitively defining and meeting market/society's needs. Sustainable strategies take into account multiple perspectives by engaging in practices - principally systems thinking - to pursue opportunities in meeting market/society's needs that are economically viable, socially just, and operate responsibility within the constraints of a finite ecology. Students will demonstrate the literacies required to develop sustainable strategies that take into account all facets of the business venture (marketing, finance, management, design, production and distribution/life cycle analysis.) One key question will shape the trajectory of the course: ‘How does one develop a competitive sustainable strategy to serve some market/society need?’ Therefore, the focus of this course is for the student to select a need, determine the sustainable economic system to develop and deliver the product/service, and write and present the ‘business case.’ The student will also articulate the values and vision - personally and organizationally - driving the strategy.

GSB 599  
STRATEGIC ANALYSIS FOR COMPETING GLOBALLY  
Graduate  
This capstone course views the impact of contemporary issues on corporate strategy. Competitive, cultural, social and ethical issues are examined within the context of a global business environment. The course content emphasizes identifying strategic alternatives, developing corporate and business strategies, and understanding the role of functional activities and organizational processes from a strategic viewpoint. The process of the course involves team interaction, problem-solving, group decision-making, written reports and oral presentations.

ACC 500, GSB 420, MGT 500, MGT 502, ECO 509, ACC 555, ECO 555, FIN 555, MGT 555, MIS 555 and MKT 555 are a prerequisite for this class.

GSB 600  
CANDIDACY CONTINUATION  
Graduate  
A non-credit registration that allows students to continue to use DePaul facilities such as the library, Career Development Center and the computer lab while not registered for credit-earning courses.
This course is designed for all MBA students seeking to develop skills in strategic financial analysis. The course provides a deep, unabashed evaluation of corporate performance with a focus on traditional and cash-based measures, and strategic applications. Understanding the strengths and weaknesses of various types of financial analyses is a requirement for designing and developing business strategy, business execution systems, and understanding of the performance of the company. Key managerial questions will be investigated in the course: When should a business grow? When is growth meaningless to investors? Why does an increase in net income, even over decades, still result in stock price drops? Why do companies report record Return On Equity amidst abysmal stock returns? Why and when is stock price BAD for measuring managerial performance? Corporate managers today are plagued by these questions, leaving them to believe in market irrationality, or simply "the market doesn't understand my company". The course will be driven by actual review and evaluation of company financial statements, using of several types of practical financial analysis methods and tools. The course provides deep insights into the world of investment analysis, corporate performance measurement, and strategic planning. This course will be useful for MBA candidates destined for higher levels of corporate management, management consulting, investment banking, equity research, or money management. This seminar-driven course is co-designed and co-taught by Dr. Mark L. Frigo, Eichenbaum Foundation Distinguished Professor of Strategy and Leadership, Dr. Keith M. Howe, Scholl Professor of Finance, and Joel Litman, Executive in Residence in The Center for Strategy, Execution and Valuation in the Kellstadt Graduate School of Business and Vice-President in Equity Research at Credit Suisse First Boston.

A seminar in business ethics that centers on theoretical, practical and pedagogical issues. Cross-listed with PHL 640. Offered variably.

This course will examine the thinking of social scientists, philosophers and theologians on the impact of religious values and institutions, on the origin and development of American capitalism and its relevance to contemporary business ethics. Cross-listed with PHL 650 and MLS 442. Offered variably.

This is a unique opportunity in which knowledge gained in the classroom can be applied to an actual business environment. The intern will be immersed in a stimulating environment with a pool of established resources in industry or government.

Content and format of this course is variable. An in-depth study of current issues. Subject matter will be indicated in class schedule.

This introductory-level course surveys the arts of select cultures from west and central Africa. The course will focus on the arts of royalty as a means by which to introduce basic concepts and larger issues within the field. The arts of groups who borrow from royal iconography, such as diviners, religious cults, societies of elders, and others, will also be investigated. Themes pertinent throughout the course include issues of gender, colonialism, cultural interaction, and historical change in both visual art and the nature of kingship. Cross-listed with ABD 246. Formerly ART 246.

An introduction to major developments of art and architecture across Asia including South Asia, Southeast Asia, the Himalayas, and East Asia. This course examines not only painting, sculpture, and architecture, but also gardens, ceramics, and prints. Special emphasis will be placed on religious arts of Buddhism and Hinduism, along with landscape and figural painting of China and Japan. Formerly ART 242.
HAA 130
PRINCIPLES OF EUROPEAN ART (FORMERLY ART 102)
Undergraduate
An introduction to the art historical methods and their application to a broadly chronological and select survey of the European world from pre-history to the 20th century. Field trips to Chicago art institutions extend the visual traditions and critical methods taught in class lectures and discussions. Formerly ART 102.

HAA 145
PRINCIPLES OF THE ARTS OF THE AMERICAS
Undergraduate
What is distinctive about art created over time on the American continents? This class begins to answer the question by examining some of the principal developments in art history from the ancient indigenous cultures (particularly those of Meso- and South America), through the period of European colonialism (especially Spanish and English), to the modern art movements across the sovereign nations, including the United States and Canada. Since time permits only a sampling of artistic forms across time, lectures are often issue-oriented, with a focus on selected problems facing scholars. Periodic discussions allow students to weigh in on topics and offer their own critiques. This class argues that the distinctiveness of American visual forms springs from the heterogeneous cultural traditions that simultaneously divide and unify its inhabitants.

HAA 201
ANCIENT AFRICAN ART: PREHISTORIC TO THE EUROPEAN ENCOUNTER
Undergraduate
This course surveys a selection of artistic traditions from across the African continent beginning with the earliest attempts by humanity to visually represent complex thought until the Portuguese began trading along the coast of West Africa in the mid-fifteenth century. Emphasis is placed on demonstrating connectedness with a larger cultural environment, while also suggesting connections to future artistic traditions.

HAA 202
MODERN AFRICAN ART: EUROPEAN ENCOUNTER TO INDEPENDENCE
Undergraduate
This course surveys a selection of artistic traditions from across the African continent beginning with the arrival of the Portuguese along the coast of West Africa in the mid-fifteenth century until the age of African independence in the 1960s. While the impact of a European presence helps define the boundaries of this course, artistic response to that presence is but one theme. Interactions between African cultures and the impact of Islam are equally important considerations.

HAA 203
CONTEMPORARY AFRICAN ART: INDEPENDENCE TO THE PRESENT
Undergraduate
This course surveys African art from the age of African independence in the 1960s until the present day. The meaning of the term contemporary as it applies to African art is questioned in this course. The position of the artist between African artistic tradition and the global art market is also of vital importance.

HAA 215
CHINESE ART (FORMERLY ART 342)
Undergraduate
This is a chronological survey of premodern Chinese art from antiquity to the nineteenth century. Special attention is given to sculpture and painting, but architecture and ceramics are also covered. There is an emphasis on prehistoric bronze vessels, Buddhist sculpture, and landscape painting of the Song through Qing periods. Formerly ART 342.

HAA 216
JAPANESE ART (FORMERLY ART 343)
Undergraduate
This is a chronological survey of premodern Japanese art, from the prehistoric era to the Meiji period (1868-1911). Topics covered include painting, sculpture, and architecture, as well as decorative arts, prints, and garden design. Special attention is given to Buddhist and Shinto religious arts, along with screen painting and woodblock prints. Formerly ART 343.
HAA 217
ARTS OF INDIA AND THE HIMALAYAS
Undergraduate
This is a chronological survey of premodern arts of the subcontinent of South Asia and the Himalayas. We start with the Indus Valley Civilization and move through the nineteenth century, including Mughal arts. Special attention is given to the emergence of figural imagery in Buddhist and Hindu sculptural arts, and the development of religious architectural forms from early stupas and cave temples to later shrines.

HAA 218
ARTS OF THE SILK ROAD
Undergraduate
This course will examine the visual history of the Silk Road, focusing on works of art and architecture created in Central Asia. We not only consider the prehistoric, ancient and medieval arts of this region, but we also investigate the modern development of a romanticized notion of the Silk Road and the imperial interest in acquiring treasures from the Silk Road. Today we frequently hear about the legacy of the Silk Road in promoting multicultural exchange. However, the Silk Road has long been affected by the expansionist agendas of empires. From the time of Alexander the Great (356-323 B.C.E.) through the period of Genghis Khan (1162-1227) and on, there have been military leaders who have led their armies into Silk Road lands seeking territory, riches, and glory.

HAA 220
BUDDHIST ART (FORMERLY ART 250)
Undergraduate
This course explores the traditional visual culture of the Buddhist world, examining art as a reflection of religious belief and practice. The regions covered are South Asia, Southeast Asia, and East Asia. An emphasis is placed on painting, sculpture, and architecture made for or related to Buddhist practice. Formerly ART 250.

HAA 222
ISLAMIC ART (CROSS-LISTED WITH IWS 251, FORMERLY ART 251)
Undergraduate
This course examines the visual culture of the Islamic world, selectively surveying some of the major artistic developments in regions of the world with a significant Muslim population. It will consider art and architecture as interplay between local culture and Islamic tradition. Topics covered will include the origins of Islamic visual culture in the Arabian Peninsula and the spread of Islamic art and religion across the Middle East. Local expressions of Islamic art may be explored in areas as diverse as North Africa, sub-Saharan Africa, Spain, Sicily, Iraq, Iran, India, and Central Asia. Special attention is paid to architecture, painting, and decorative arts. Cross-listed with IWS 251. Formerly ART 251.

HAA 230
ANCIENT MEDITERRANEAN ART
Undergraduate
This course will explore the art of the ancient period (circa 30,000 B.C.E. - 330 C.E.) from a broad range of cultures and styles: from the Paleolithic cave paintings to the Roman Colosseum, from the pyramids of Egypt to the Parthenon in Greece. We will consider how art, religion, urbanism and writing profoundly affected the development of the ancient Mediterranean and Mesopotamian world. We will analyze major stylistic trends and explore the relationship between art, culture, and religion. We will also discuss the role of art in the hands of political leaders and the profound interconnectedness of ancient civilizations. Frequent discussions will analyze controversies in the study of ancient art and scrutinize topics such as gender, power, aesthetics and authenticity. Formerly ART 233.

HAA 231
EARLY MEDIEVAL ART (CROSS-LISTED W/ CTH 253, FORMERLY ART 240)
Undergraduate
This course explores the art of the Medieval period from a broad range of cultures: Early Christian, Byzantine, Islamic, Carolingian, and Ottonian. We will discuss major stylistic trends and explore the relationship between art, culture, and religion. Works of art will be evaluated in terms of their social functions in the societies that produced them and our analysis will incorporate the perspectives of both the producers (patrons, artists) and consumers of art. Cross-listed with CTH 253. Formerly ART 240.

HAA 232
LATE MEDIEVAL ART (CROSS-LISTED W/ CTH 254, FORMERLY ART 244)
Undergraduate
This course will explore the art of the late Medieval period from a broad range of cultures and styles: Byzantine, Romanesque, Gothic, and Islamic. We will discuss major stylistic trends and explore the relationship between art, culture, and religion. Works of art will be evaluated in terms of their social functions in the societies that produced them and our analysis will incorporate the perspectives of both the producers (patrons, artists) and consumers of art. Cross-listed with CTH 254. Formerly ART 244.
HAA 234  
**BYZANTINE ART**  
*Undergraduate*

This course will explore the art of the Byzantine Empire from the founding of Constantinople in A.D. 330 to the fall of the city to the Ottomans in 1453. Lectures and readings will primarily focus on how contemporaries understood and interacted with a diverse group of monuments and objects now classified as Byzantine art. Significant attention will be devoted to how works of art functioned in the service of imperial and ecclesiastical ideology. Discussions will analyze how Byzantine art was appreciated and appropriated in both the medieval Mediterranean and in modern scholarship.

HAA 235  
**RUSSIA: MEDIEVALMoments, Imperial Days & White Nights in Novgorod & St. Petersburg**  
*Undergraduate*

This study abroad program in Russia allows students the opportunity to explore Novgorod, the medieval trading emporium and center of Orthodox spirituality and the Russian imperial gem of St. Petersburg, while studying medieval art and the history of Imperial Russia. Both cities have been designated UNESCO World Heritage Sites and showcase the best of medieval and modern Russia by providing one of the world’s richest ensembles of urban planning, art, architecture, and historical treasures. (Foreign Study: can also be taken as HAA 397: Special Topics in Art History-Formerly ART 397)

HAA 236  
**NORTHERN RENAISSANCE ART (CROSS-LISTED W/ CTH 258, FORMERLY ART 232)**  
*Undergraduate*

This course features the most significant works of art, their artists & patrons, the social & economic aspects of artistic production, and the dominant cultural issues that flowed brilliantly in Northern Europe - above all, in France, the Netherlands, Bohemia, and German-speaking lands - between 1300 and 1600, that is, during the volatile period of the Renaissance & outbreak of the Protestant Reformation. And although Flemish oil painting offers the most evident legacy of the Northern Renaissance to the casual museum visitor, this course also introduces the most important outputs in printmaking; sculpture; and the industrial arts, as in tapestry weaving and the fabrication of luxury articles in metalwork. Cross-listed as CTH 258. Formerly ART 232.

HAA 237  
**ITALIAN RENAISSANCE ART (CROSS-LISTED W/ CTH 256, FORMERLY ART 241)**  
*Undergraduate*

This course concentrates on the architecture & pictorial arts that flourished on the Italian peninsula between ca. 1300 and 1600, although selected forays are undertaken into comparative European and Asian cultures. Its content focuses on the most significant works of art & architecture, including the technical arts; the key personalities, above all, the artists & their patrons; and a broad range of cultural & political issues that affected artistic thinking and production. Cross-listed with CTH 256. Formerly ART 241.

HAA 238  
**BAROQUE ART**  
*Undergraduate*

Starting in 1600, from the vantage point of the Counter-Reformation and the rise of modern European states, Baroque Art covers the principal works of art & architecture; artists and patrons; and a wide sweep of social, religious, and political, conditions that impacted cultural thinking and production in the 17th century. Attention is focused on the most prominent artistic centers in Italy, the Spanish Netherlands, England, Spain, the Dutch Republic, and France. The in-class lectures with discussion are accompanied by field work to the Baroque collections of the Art Institute of Chicago. Cross-listed with CTH 257. Formerly ART 237.

HAA 239  
**19TH CENTURY EUROPEAN ART**  
*Undergraduate*

Introductory survey of major moments and movements in 19th-century European art, with some attention to U.S. developments, as warranted. The course analyzes major painters and sculptors of the early modern period and their influence in shaping cultural events, such as, for example, the Industrial Revolution. Formerly ART 238.
HAA 240  
**ART FROM 1900-1945 (FORMERLY ART 239)**  
**Undergraduate**  
This course will examine the major artists, movements, and issues at play in the visual arts of Europe from 1900 to the outbreak of World War II. Lectures and class discussions will address how modern art, often oppositional and contradictory in nature, responds to, reflects, or builds on the effects of modernization (i.e. urbanization, industrialization, and global capitalism). Modern art objects will be read for both stylistic innovation and for connections to, and commentaries on, specific historical developments. Significant themes to be addressed include the character and history of the avant-garde, the relationship between high art and mass culture, the changing identities and aims of the modern artist, and the institutional basis of art production. Formerly ART 239.

HAA 242  
**ART FROM 1945 - 1975**  
**Undergraduate**  
This course will consider art and culture of Western Europe and the United States from World War through the Vietnam War. Beginning with the period of high modernism, major art historical movements and highly distinct aesthetic practices will be examined in order to foreground the complex relations that exist between art making and specific socio-historical contexts. Topics to be addressed include the development of the arts after World War II, the role of art in a consumerist and spectacle-driven society, the dematerialization of the art object, and the shift from late modernist to postmodern sensibilities. Students will be introduced to a range of theoretical models which foreground structural and formal investigations, as well as issues of social and historical analysis. Formerly ART 322/HAA 364.

HAA 245  
**ART OF THE ANCIENT AMERICAS (CROSS-LISTED W/ LST 247, FORMERLY ART 247)**  
**Undergraduate**  
This class surveys the art of the ancient Americas (circa 1000 BCE-1520 AD), with a focus on the most artistically significant civilizations of Mesoamerica and South America, and some of the difficulties encountered in studying them. Lectures will explore visual traditions as diverse as the people they reflect; cultures to be covered include the Olmec, Maya and Aztec of Mesoamerica, and the Moche and Inca of Peru. Since most of these cultures did not use the written word, the class will also regularly raise questions of methodology in pre-Columbian scholarship. Cross-listed with LST 247.

HAA 246  
**ART IN THE SPANISH AMERICAN EMPIRE (CROSS-LISTED WITH CTH 250 & LST 248, FORMERLY ART 248)**  
**Undergraduate**  
This course offers a critical survey of the art of colonial Latin America (circa 1520s-1820s), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the 16th century and Independence in the early 19th century, lectures will survey state-sanctioned arts of the Iberian colonizers, including the foundations of the Catholic Church across the ‘New World’ landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context. Cross-listed with CTH 250 and LST 248. Formerly ART 248.

HAA 247  
**MODERN LATIN AMERICAN ART (CROSS-LISTED W/ LST 249, FORMERLY ART 249)**  
**Undergraduate**  
This lecture class is a survey of Latin American art created since the Wars of Independence which helped to create the modern nations in the 19th century (i.e. 1820s through the present). Lectures consider the struggle of artists to articulate newly sovereign identities through visual production, even as complicated relationships with Europe and increasingly, the United States, continue. Topics covered include Latin American modernism, surrealism, radical arts, and social realism, with a special consideration of post-revolutionary Mexican mural painting. Cross-listed with LST 249. Formerly ART 249.

HAA 260  
**AMERICAN ART (FORMERLY ART 335)**  
**Undergraduate**  
This course examines American art (the British colonies and United States) from the colonial period to the mid-twentieth century. Works of art are examined both in relation to American social and cultural history and also as aesthetic objects. The overarching themes of the class include the “American-ness” of American art, the relationship between American and European art, the function and production of art, and the expanding definition of American expression through multicultural diversity. Formerly ART 335.
HAA 263
HISTORY OF DESIGN (FORMERLY ART 373)
Undergraduate
A survey of the history of modern design (1500-present) as expressed in graphic, industrial, and the decorative arts. The aim of this class is to understand why designed objects look the way they do considering their history, function, style, use, and materials. Of special interest will be design's relationship to culture, to art history, and to media. Students will learn to identify historic styles and the work of important designers and illustrators and to a certain extent, the history of material culture. Readings and the first-hand examination of objects lead toward a final research project. Formerly ART 373.

HAA 265
HISTORY OF PHOTOGRAPHY (FORMERLY ART 376)
Undergraduate
A survey of the major works, artists, and movements of photo history from photography's invention to the present day. Emphasis is placed on the major artists, subjects, and technical applications of the medium, as well as on the modernity of photography and its unique aesthetic qualities. This course will also consider the myriad purposes and social contexts for photography. The course examines a large range of techniques from the camera obscura to recent developments in printing. Actual photographs are studied in class, on campus, and in field trips to regional collections. The course involves major readings that ask students to consider the role of photography in relations to race, gender, and politics. Many of the photographs under consideration are American. Formerly ART 376.

HAA 277
HISTORY OF CINEMA I, 1890 - 1945 (CROSS-LISTED WITH MCS 207 & DC 207)
Undergraduate
This course examines the history of cinema as one of the most influential cultural forms of the 20th Century. We will study the aesthetic and technological developments of cinema during its first 50 years, as well as examine the social and economic factors shaping its history. Initially influenced by other art forms (theater, literature, painting) filmmaking quickly acquired its own formal system, language, and traditions. We will trace the changing styles, techniques, content, and methods of filmmaking as an art form, as popular culture, and as an industry. We will consider how cinema is bound to its social context via audience relations, economics, technology, and ideology. The limited scope of this course will cover primarily feature-length, narratives films as the dominant mode of filmmaking, although we will also look at the development of documentary and experimental filmmaking. The class will consist of lectures, screenings, and discussions. Cross-listed with MCS 207 & DC 207.

HAA 278
HISTORY OF CINEMA II, 1945 - 1975 (CROSS-LISTED WITH/ MCS 208 & DC 208)
Undergraduate
This course covers the continued rise and development of cinema from 1945 to 1975. The course will have a dual focus, looking simultaneously at both the American studio system and international cinemas. The lectures, screenings, and discussions place equal emphasis on charting the development of cinematic techniques as well as examining the growth of specific national cinemas. In addition, the course surveys international stylistic trends in narrative, documentary, and avant-garde film. Students will acquire a broad understanding of the institutional, social, technological, and aesthetic forces that have shaped the development of cinema during the mid-twentieth century. Lab for film viewing required. Cross-listed with MCS 208 and DC 208.

HAA 279
HISTORY OF CINEMA III, 1975 - PRESENT (CROSS-LISTED W/ MCS 209 & DC 209)
Undergraduate
This final course in the film history sequence is designed to introduce students to a sense of modern film history and the multiple permutations of cinema around the modern film history and the multiple permutations of cinema around the globe. It presents film history from a global perspective, concentrating primarily on the development of new national and transnational cinemas. The course continues to chart the development of the American studios since the mid-1970s while examining the effects of media consolidation and convergence. Moreover, the course seeks to examine how global cinemas have reacted to and dealt with the formal influence and economic domination of Hollywood filmmaking on international audiences. Class lectures, screenings, and discussions will consider how cinema has changed from a primarily national phenomenon to a transnational form of communication in the 21st century. Cross-listed with MCS 209 & DC 209.

HAA 280
HISTORY OF PREMODERN ARCHITECTURE (FORMERLY ART 370)
Undergraduate
Social, economic and political history of European and Mediterranean architecture, from Paleolithic times to the 1789 French Revolution. Topics include: classicism, the status and role of the architect, social struggle, patronage and architectural technologies. Formerly ART 370.
HAA 281
HISTORY OF MODERN ARCHITECTURE
Undergraduate
World architecture from the 1789 French Revolution to the present. Examines the influence of industrial, technological, political and social change in the development of modernist and post-modernist architecture. Formerly ART 371.

HAA 288
COMPARATIVE URBANISM (CROSS-LISTED W/ GEO 233, FORMERLY ART 362)
Undergraduate
An investigation of the origins and bases of non-American urban traditions, through the study of the genesis, form, functions, and social-cultural forces that shaped cities such as Paris, St. Petersburg, Istanbul, Calcutta, and Mexico City. This course is based in the Geography Department and is the equivalent of 200-level Art History course. Cross-listed with GEO 233. Formerly ART 362.

HAA 297
SPECIAL TOPICS IN HISTORY OF ART & ARCHITECTURE
Undergraduate
This class focuses study on a specific topic from the history of world art.

HAA 299
INTRODUCTION TO ART HISTORICAL RESEARCH AND WRITING
Undergraduate
The major must also take an introduction to research and writing in the field. This course will focus on one specific area of art history, as determined by the faculty member teaching. The faculty member will introduce the students to the methodological debates relevant to that research in the past and in the present. The focus of the course will be to introduce students to the theoretical language of art history and to work on the development of advanced critical thinking skills. This course prepares them for the advanced research work required at the 200- and 300-levels.

Declared major in History of Art and Architecture required.

HAA 301
AFRICAN ARCHITECTURE (FORMERLY ART 347)
Undergraduate
This course examines a wide variety of issues pertinent to the study of architecture in Africa, highlighting above all else the diversity of traditions across the continent. Weekly themes are defined at times by materials, technology, type, geographical region, culture, or specific architectural elements. Examples of subjects studied include: earthen mosques of Mali; subterranean residences in Burkina Faso; nomadic tents; impluvial and courtyard traditions of Nigeria and Senegal; mural painting in Burkina Faso, Nigeria, and South Africa; Ethiopian rock cut churches; imperialist exploitation of Great Zimbabwe's legacy; and coral architecture of the Swahili Coast. art history and related disciplines. Formerly ART 347.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 302
AFRICAN ISLAM: ISLAMIC ART & ARCHITECTURE IN SUB-SAHARAN AFRICA
Undergraduate
Focused study of the impact of Islam on the artistic traditions of sub-Saharan Africa. Rather than necessarily replacing previous art forms, this course investigates in what circumstances preexisting visual culture might be integrated with the requirements and needs of Islam. This approach necessitates an understanding that neither Islam nor African art are monolithic entities, but rather their interactions represent a wide variety of negotiations across the continent. Likewise, this course will consider specific historical circumstances to which Islamic art in sub-Saharan Africa has responded in terms of form and content.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 310
TOPICS IN ART AND ARCHAEOLOGY (FORMERLY ART 346)
Undergraduate
This course addresses issues of archaeology relevant to the study of visual culture from the ancient to the contemporary world. This course is based in the Department of Anthropology and is the equivalent of a 300-level Art History course. Formerly ART 346.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.
**HAA 311**
**LATER JAPANESE PAINTINGS AND PRINTS**
**Undergraduate**
This course examines two main pictorial forms of Japan from the seventeenth century to the early twentieth century (the Edo, Meiji, and Taisho periods). Special attention is given to large-scale painting on folding screens and sliding doors for major temples, castles, and palaces, as well as the development of ukiyo-e (pictures of the floating world) in woodblock prints. In addition, we consider the transformation of painting and prints in the late nineteenth century with the opening of Japan and the introduction of Western influences. Art history and related disciplines.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

**HAA 331**
**ART OF THE CRUSADES: CRUSADES AS MEDITERRANEAN EXCHANGE**
**Undergraduate**
This course will consider the Crusades from multiple perspectives (Byzantine, Latin, Muslim) and explore how politics, religion, and culture influenced the art of the medieval Mediterranean. The Crusades are analyzed in the broader context of pilgrimage, the search for the divine, and the desire to seize control of and purify holy sites. The course will focus on works of art created when the cultures of the Mediterranean came into both contact and conflict.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

**HAA 332**
**ROMANESQUE ART AND ARCHITECTURE**
**Undergraduate**
Scholars in the nineteenth century designated Western European monuments, especially architecture and sculpture, created between the eleventh and twelfth centuries, as "Roman-like" in character or "Romanesque," in order to acknowledge certain linkages they perceived between the characteristics of this era's architectural and visual language and that of the distant Roman past. Recent scholarship has emphasized not only large-scale works of art, architecture and sculpture, crucial in an age of Pilgrimage and Crusades, but also small-scale works, such as illuminated manuscripts, metalwork, and coins and seals, as essential for an understanding of medieval visual culture. This class considers the broad spectrum of significant works of art produced during this period from shifting points of view, aesthetic or formalist toward function, agency, presentation and reception.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

**HAA 333**
**GOTHIC ART AND ARCHITECTURE**
**Undergraduate**
This course examines the art, architecture, history and culture of the so-called Gothic era (12th-15th centuries), the age of the great European cathedrals. Reigning supreme in most of Europe in the 13th and 14th centuries, the Gothic style marks an era of unparalleled building activity and one of the most fertile and productive periods in the history of Western art. Special emphasis will be given to the aesthetic, structural, and spiritual aspects of cathedrals and other great churches and their contents, primarily in France and England, as reflections and embodiments of the sacred aspirations and devout character of the era. The artistic and architectural production (buildings, sculptures, illuminated manuscripts, paintings, sacred or liturgical objects, stained glass, etc.) of the period will be studied in its original context, with close attention paid to questions of social and political function, cultural meaning, and historical circumstance.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

**HAA 334**
**ENGLISH ART AND ARCHITECTURE (FORMERLY ART 365)**
**Undergraduate**
This course considers painting, sculpture and architecture in England from Stonehenge to the modern period. It explores national identity, the monarchy, contested notions of church and state, colonization, and the influence of other nations' art. Until a few decades ago, Britain oversaw the largest empire the world had ever known (America itself was a colony, and speaks the language of the British). The oldest continuous monarchy in the world also witnessed the birth of a parliamentary system of government. The Industrial Revolution was born there. Throughout its history, though, the arts have had a complex existence. Reformation iconoclasts destroyed churches and sacred art, and native masters such as Hogarth, Turner, and Barbara Hepworth, stand beside emigre artists such as Holbein, Rubens, Van Dyck, and Whistler. Critical reading and writing lead to a substantial final research project. Formerly ART 365.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.
HAA 335
MICHELANGELO (FORMERLY ART 308)
Undergraduate
This course examines the extraordinary life, times and creations of Michelangelo Buonarroti (1475-1564), one of the most significant figures in the history of Western art. Sculptor, painter, architect and poet, Michelangelo lived during the Italian Renaissance, an age that witnessed a flourishing artistic, scientific and humanistic culture. During a career that spanned over seven decades, Michelangelo created famous lasting masterpieces, including the Vatican Pieta, David, Moses, the Sistine Chapel ceiling, and the papal church of St. Peter's. Who is this irascible and solitary genius, this devout Catholic and fierce Republican Florentine, who cavorted and lived with popes and princes, and fashioned works that profoundly influenced Western civilization? How do his brilliant achievements define, express and illuminate the time, place and culture in which he lived? Drawing on a variety of primary and secondary sources, this course seeks to understand an eccentric artist whose dazzling aesthetic productivity left a lasting mark on the art of future generations up to the modern period. Formerly ART 308.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 340
PRINCIPAL THEMES IN 18TH-CENTURY ART (FORMERLY ART 352)
Undergraduate
This course is intended to enrich the student's understanding of a fascinating and cosmopolitan period that tends to slip through the cracks of traditional Art History - namely, the transition zone between the Late Baroque and the emergent modernism of the 19th century, which takes place just before and after the "Great Divide" of the French Revolution of 1789. Building from a platform of European traditions that flowered in the 17th century, the course material explores an impressive body of painting & printmaking, sculpture & industrial arts, and architecture & planning, that was produced from the British Isles to imperial Russia, even, by way of addressing cross-disciplinary issues, for example: the diverse stylistic developments that start with the Rococo & Neoclassicism; artistic regionalism vis-a-vis internationalism; and the larger social & political arenas for which visual culture was produced in the Ages of Enlightenment and Revolution. Formerly ART 352.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 360
DUCHAMP AND DADAISM
Undergraduate
With Picasso and Matisse, Marcel Duchamp (1887-1968) was among the most important artists of the modern era. Certainly, no other artist influenced contemporary art so significantly, and this class will examine his art, biography, and influence. Another focus will be the cultural movement known as Dadaism (1916-24), a delirious anti-art movement begun in Zurich, Switzerland, during the absurd, bloody First World War. After contextualizing Dada in relation to modern art, we will examine its manifestations in various world centers. Along the way, we will encounter the works of many of its most important figures. Besides the inherent value of looking closely at cultural moment of an important historical figure, the study of Dadaism has special relevance because of its timeless iconoclasm and spirit of creative experimentation. Close readings of primary and secondary texts, as well as trips to area museums, culminate in a significant research project.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 363
ART & THE HOLOCAUST (FORMERLY ART 356)
Undergraduate
This course explores the relationship of art and architecture to the development of National Socialist Germany and Nazi policies of genocide towards the European Jews. It deals with artists that resisted the Nazi rise to power, those that supported it, and those that were persecuted by the new state. In addition, we will look at a wide range of art, architecture and film produced from 1933-1945 which were mobilized as part of the radicalizing anti-Semitic policy. The central questions will be how does art intersect with one of the most criminal regimes in the modern period and what can we learn from an understanding of the political history of art during the period? The course will be lecture/discussion format and include a research paper. Formerly ART 356.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.
HAA 365
ART SINCE 1975
Undergraduate
This course will address visual art production of a global context from the end of the Vietnam War to the present. Taking postmodernism as its starting point, the nature of contemporary art practice will be examined as it is redefined by new technologies and media (such as video, installation, performance, and digital art), and through an investigation of critical theoretical models. Traditional media, such as painting and sculpture, will also be assessed as a crucial part of this shifting terrain. Major themes to be considered include questions of identity and subject formation, the relationship between art and its audience, changing notions of artistic value, and the impact of globalization. Throughout, students will be exposed to the issues and ideas relevant to cultural production today, while simultaneously developing the visual and conceptual tools for critically analyzing contemporary art.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 366
TOPICS ON WOMEN AND ART
Undergraduate
This class considers both the history of women artists and representations of women from cultures around the world, from prehistory to the contemporary era. In addition, it will introduce feminist methodologies that can be applied to specific case studies, such as problems of biography for women artists, depictions of sexual violence in art, performing gender in visual images, feminist activist collaborations and gendered spaces (the museum, cyberspace, architecture, etc.) Topics may vary term to term, depending on the instructor's area of expertise. Formerly ART 381.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 367
FEMINISM & VISUAL CULTURE
Undergraduate
This course addresses how gender is inscribed in visual culture, whether in “fine art” or popular representations. Students will be introduced to a broad range of feminist methodologies, such as Marxism, Post-Colonial, Queer and Transnational theories, as well as semiotics, in order to interrogate representations of gender and investigate strategies of intervention.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 370
CONTEMPORARY ARCHITECTURAL THEORY AND PRACTICE (FORMERLY ART 372)
Undergraduate
Study of contemporary debates in architecture and urban planning. The student explores economic, social and political aspects of architectural theory through a case study of a contemporary monument or city plan. Formerly ART 372.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 371
HISTORIC CATHOLIC CHURCH ARCHITECTURE OF CHICAGO (FORMERLY ART 374)
Undergraduate
This course covers a selection of the jewels among the city's architecturally significant Catholic churches and related sites of interest that date up to circa 1920. The class meets in a non-traditional time slot (in 3-hour afternoon sessions) in order to undertake the necessary field work, which is administered through the Catholic Studies Program and in partnership with CTH 201: Catholicism in Chicago. This approach encourages us to think about the sacred buildings as extensions of the city's history, while emphasizing the contributions of its various immigrant groups. By thus using architecture & architectural history as the armature of this course, the student is able to explore the fascinating interplays between art, history, religion & society, and come to terms with what culture does and signifies in one's own milieu. (Offered jointly with Catholic Studies). Formerly ART 374.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 373
KYOTO (WORLD CITIES)
Undergraduate
Explores the art, architecture, and urban plan of Kyoto, the ancient capital of Japan. Kyoto became the seat of government and the home of the imperial court in 794, and it continued to serve as the cultural and religious center of the land until the nineteenth century. This course considers major artistic developments as they relate to main sites in Kyoto, especially palaces, temples, and shrines. The eras covered extend from the Heian to the Meiji period. (Cities Minor)
HAA 375
MEXICO CITY
Undergraduate

From its origins as Tenochtitlan, the preordained capital of the Aztec Empire, through its identification as a "new Rome" dominated by the Spanish Crown in the Viceregal period, to its status as the largest metropolitan area in the Western Hemisphere (and the second largest in the world), Mexico City was born to impress the imagination. This class explores the development of the great city of Mexico in light of major historical events and cultural expressions. Discussions will focus especially on urban planning, key architecture, outdoor sculpture, and public spectacles over the centuries.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 376
ROME
Undergraduate

Few cities in the world match Rome for its antiquity, imperial heritage, historic, religious and cultural importance, spectacular art and architecture, and rich urban landscape. Traditionally believed to have been founded by Romulus and Remus, descendents of Aeneas, in 753 BCE, and subsequently ruled by Etruscan kings, Rome's public buildings, communal baths, and fortifications suggest that Rome was urbanized as early as the 6C BCE. After the expulsion of their Etruscan monarchs, Romans established the Republic, which evolved into the Roman Empire when Octavian, grand nephew of Julius Caesar, became Augustus, Rome's first emperor, princeps or first citizen. Along with subsequent emperors determined to turn Rome into a magnificent city worthy to be the capital of a great empire, Augustus used architecture and the built environment as massive symbols of power, authority, and legitimacy, a lesson in public education embraced by the Catholic Church when the imperial pagan capital became the capital of Western Christendom and the seat of the papacy. This class explores the city of Rome from its ancient origins through the 17th century and focuses on the major art and architectural developments that define this unique urban space.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 378
HEAVENLY AND EARTHLY JERUSALEM (WORLD CITIES)
Undergraduate

This class focuses on the city of Jerusalem. The uniqueness of Jerusalem stems from its status as a sacred place in Judaism, Christianity, and Islam. In this class we will explore the physical city of Jerusalem with its monuments, contested holy sites, and changing architecture. We will also analyze representations of the imagined heavenly Jerusalem, for which many believers intensely yearned. The class will focus on Jerusalem from the 2nd through the 16th centuries: from its destruction by Roman armies to its last pre-modern construction phase during the Ottoman period. We will discuss how different religious groups mapped meaning and marked holiness in the urban fabric of Jerusalem. This class will consider some of the following issues: art and architecture, politics, religion, urban planning, and patronage. (Cities Minor)

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 379
PARIS AND VICINITY TO CIRCA 1870 (WORLD CITIES) (FORMERLY ART 366)
Undergraduate

This course is designed to explore the arts & architecture, and urban planning of Paris & vicinity, from the period of the Old Regime to ca. 1870. This span more or less coincides with the art historical periods from the Renaissance to early Impressionism. The course material weaves artistic works and projects into the greater cultural, political, and social fabric of the realm --- and includes, among other outstanding personalities, the towering impact of Vincent de Paul --- in order to expose the student to a variety of cross-disciplinary perspectives. Several class sessions are scheduled at the Art Institute of Chicago. (Cities Minor) Formerly ART 366.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 380
CHICAGO ARCHITECTURE AND URBANISM (WORLD CITIES) (FORMERLY ART 339)
Undergraduate

This course investigates contemporary historiographic debates and new archival evidence surrounding research on Chicago architecture and urbanism. In addition to participating in lectures/discussions of HAA 380, students also meet separately to discuss scholarly debates as well as their individual research proposals, as appropriate for graduate level work. (Cities Minor) Formerly ART 339.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.
HAA 384
BERLIN: UNIFICATION/REUNIFICATION (WORLD CITIES) (FORMERLY ART 367)
Undergraduate
The influence of art and architecture on the development of Berlin from 1871 to the present. How major figures (from Bismarck to Kohl) and major events (from World Wars to the fall of the Berlin Wall) affected the city and its culture. (Cities Minor) Formerly ART 367.
100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 385
LONDON (WORLD CITIES) (FORMERLY HAA 368)
Undergraduate
Examines London as a nexus of English artistic and architectural activity and emphasizes the role of the monarchy, such art world institutions as patronage or the foundation of the Royal Academy, and the city's historic growth. (Cities Minor) Formerly ART 368.
100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 388
SPECIAL TOPICS IN GEOGRAPHY AND URBANISM (FORMERLY ART 349)
Undergraduate
This course covers a variety of topics that focus on the intersection between geography and the built and planned environment. Topics covered range from architectural problems to urban planning to the built environment in general as a social product. This course is based in the Geography Department and is the equivalent of a 300-level Art History course. Formerly ART 349.
100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 391
MUSEUM STUDIES (FORMERLY ART 382)
Undergraduate
Introduces art historians to the theory and practice of exhibition management and curatorial principles. Stresses organization, research, care and presentation of exhibitions through project-oriented study. Formerly ART 382.
100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 396
RESEARCH SEMINAR IN THE HISTORY OF ART & ARCHITECTURE (FORMERLY ART 398)
Undergraduate
Concentration on a specific area of art in order to investigate research problems and to learn advanced research skills. Formerly ART 398.
Junior or Senior standing and status as an Art, Media and Design major or Art minor are a prerequisite for this class.

HAA 397
SPECIAL TOPICS/HISTORY OF ART & ARCHITECTURE
Undergraduate
Focused study on a specific topic from the history of World art. Formerly ART 397.
100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

HAA 398
INDEPENDENT STUDY
Undergraduate
Independent work in the student's field of study under faculty supervision. Available only to upper-level students with demonstrated capacity for self-motivated study.
HAA 399
SENIOR CAPSTONE: ART HISTORICAL THEORY & METHODOLOGY
Undergraduate
An overview of theory and methods preparing advanced students for graduate work. The course addresses iconography, psychological theories, the image's relation to its documentation, feminist and social history and other currently debated issues.

Declared major in History of Art and Architecture and (senior status required or juniors with instructor permission).

HAA 400
CHICAGO ARCHITECTURE AND URBANISM (FORMERLY ART 400)
Graduate
Chicago Architecture And Urbanism. Formerly ART 400.

HAA 401
GRADUATE TOPICS/ HISTORY OF ART & ARCHITECTURE
Graduate
Graduate-level, intensively researched investigations into topics from the history of art and architecture taught by an instructor with a research specialty in that topic. Formerly ART 401.

Graduate standing or department consent is a prerequisite of this class.

HAA 495
ADVANCED TOPICS/ HISTORY OF ART & ARCHITECTURE (FORMERLY ART 495)
Graduate
Advanced Topics In the History of Art & Architecture. Formerly ART 495.

Graduate standing or department consent is a prerequisite for this class.

HC 101
FOUNDATIONS OF NEGOTIATIONS: REALIZING OPPORTUNITY
Undergraduate
Negotiation is the art and science of securing agreements between two or more interdependent parties. The purpose of this course is to understand the theory and processes of negotiation. The course will highlight the components of an effective negotiation and teach you to analyze your own behavior in negotiations. The course will provide you with an opportunity to examine your skills by participating in presentations, discussions, and assigned readings. Competences: FX, H-3-D. Instructor: Joe Ritchie

HC 102
HOLIDAY ECONOMICS
Undergraduate
Christmas makes the planet go round. While this might not be true on a religious level, the December holidays most certainly have an enormous impact on global economics. In this course, students and faculty will examine the demands of the US Christmas/Holiday rush and how these demands influence world wide production, consumption, and culture. International political and social issues will be discussed, and students will assess the effect of this American cultural phenomenon on the world's future global economies. Learners will also consider the nature of collaborative thinking and its influence on economic planning. Competences Offered: FX, H5, or L7. Faculty: JoAnn Gesiakowska

HC 103
MANAGING PERSONAL AND PROFESSIONAL TRANSITIONS
Undergraduate
Whether switching jobs or careers, leaving or returning to school, change brings both challenges and opportunities. Some people thrive on change while others struggle through such periods. Based on William Bridges’ classic book Transitions, this class will show how to make successful transitions in personal as well as professional settings. Competences: H1X, L7, H2C, FX (May be taken for two comps). Faculty: Miriam Ben-Yoseph
HC 104  
UNDERSTANDING AND MANAGING EMPLOYEE RIGHTS  
Undergraduate  
Management has become increasingly complex as the employment relationship has evolved over the past several decades. With the proliferation of alternative work arrangements such as flextime and telecommuting combined with increased employee diversity, understanding the regulatory underpinnings of the employment relationship has become essential in managing employee rights in the workplace. This class will explore the cultural, historic, legislative, and judicial development of employee rights in the workplace, closely examine several of the core laws, discuss the consequences of noncompliance, and identify key compliance strategies that are essential to managers as well as to human resources professionals. Competences: H4, H1X, H2X, FX. Faculty: Bob Breving & Gary Miller

HC 105  
ALL ABOUT ME: UNDERSTANDING ONESELF THROUGH JOURNALING  
Undergraduate  
It is said that keeping a journal can be good for your health. James W. Pennebaker, chair of the department of Psychology at the University of Texas, has discovered the link between expressive writing and health benefits. He states that "Research suggests that when people journal, improvements in physical and psychological health can be a result." The goal of this class is to teach students the elements of journal writing, allow them to acknowledge and react to personal experiences and enable them to think clearly about these experiences. Students will be engaged in individual as well as group activities to accomplish this goal. Journaling on a continued basis might help students reduce stress and improve social relationships as they write and analyze certain experiences in their lives. Competences: H3C, FX, A1X. Faculty: Tranita Jackson

HC 106  
LEADERSHIP AND MANAGEMENT IN A GLOBAL ENVIRONMENT  
Undergraduate  
Global systems, structures, and movements impact every aspect of life in Africa and in the Church. Effective leaders and managers are able to take a global perspective on their local work. This course will build the students' competencies in analyzing various aspects of globalization (e.g., economic and cultural globalization) and their impact on Africa. They will also examine how globalization will affect their future ministries. Each student will design and complete an independent learning project for their Focus Area in which they will create strategies to address some aspect of the impact of globalization on their future ministry. Through this course, therefore, students will develop and demonstrate their competence to analyze issues and problems from a global perspective and to create strategies to address the impact of globalization on ministry. (2 competencies) Competences: H5, FX

HC 107  
MANAGING EMOTIONS IN DIFFICULT TIMES  
Undergraduate  
Though we look forward to holidays and special occasions, they often present challenges in managing our emotions. The occasions for stress and disappointment, as well as peace and joy, abound, requiring us to practice self-awareness, self-management, and relationship management at home and at work. This course will introduce a framework of emotional intelligence and provide opportunities for participants to assess their emotional intelligence and improve it through reading, discussion, role-play, and film analysis. Competences: FX, H3X, H2X, A3X. Faculty: Donna Younger

HC 108  
BREATHING WITH TWO LUNGS: AN INTRODUCTION TO THE EASTERN CATHOLIC CHURCHES  
Undergraduate  
In 1995 and 2001, John Paul II, stated that the Catholic Church needs to breathe with both lungs; East and West. What he meant by this was that it's time for those who belong to the Western/Roman Catholic church to become familiar with their Eastern Catholic brethren, so that by acknowledging and accepting them, the universal Catholic Church can be whole. In this course, students will learn about the three of the largest of fifteen, Eastern Catholic churches, of both the Byzantine and non-Byzantine Catholic traditions; Ukrainian Catholic (European Byzantine), Melkite Catholic (Middle Eastern Byzantine) and Syro Malabar Catholic (non-Byzantine from India). Through videos, readings and class discussions, as well as three field trips (one to each of the above churches), students will learn about how the Christian church, which split in 1054, came to be reunited in the 16th and 17th centuries. By exploring and recognizing the similarities and differences of one catholic faith, students will conversely learn about the history, traditions and immigration of diverse communities. Can only be taken for one competence. A3E.H1B,H2E,H3I. Faculty: Christine Hayda
**HC 109**
**BEAUTY, ATTRACTION AND THEIR IMPACT ON CULTURE AND BUSINESS**
**Undergraduate**
Beautiful people are believed to gain multiple advantages in life, from better grades in school, favored treatment from employers and preferential judgment from police officers and juries. Evidence of beauty being revered and deified can be found as far back as biblical entries to modern day celebrities. But the importance that beauty plays to the survival and the success of the human race has evolutionary significance to much further back. Our brains are pre-wired to appreciate beauty and in the over 35 million years humans have inhabited the earth it is only in the last 10,000 years or less than 1% of our civilized time that we have learned to adorn, fear and dissect its power. What is it about human existence that makes beauty so important? Why do we care about it so much? And how has it impacted our culture? This course will go into depth about human nature, subconscious evaluations of what we all are attracted to and why self confidence gained is more impacting and influential than the physical. Methods of accentuating our most endearing assets from ancient Greek, Roman and Egyptian times including Cleopatra and Nefertiti to modern day celebrities and plastic surgery will be reviewed. Additionally, examples of how the science of beauty can be translated, sold and used in modern business marketing strategies in an ethical and effective manner will be discussed. Specific tools, tactics and formulas for appealing to our beauty senses will be explored. Students enrolling in this course can expect to be shocked at times, entertained but complete the course with a better understanding of science of beauty, human nature and its role in business. Competences: H2X, FX. Faculty: Steven Dayan.

**HC 110**
**CULTURALLY COMPETENT PARENTING EDUCATION AND SUPPORT**
**Undergraduate**
Students will explore all that is involved in being culturally sensitive in their relationships with parents of diverse backgrounds. This includes a consideration of the different belief systems, values and goals parents and professionals working with them in different cultural contexts bring to parenting and/or parenting education and family support. Students will have an opportunity not only to inquire and reflect on what cultural competence involves (including e.g. gender, race, ethnicity, class, religion, immigrant status, etc.) but will also reflect on their own cultural standpoint (2 credit hours-offered for 1 competence). Competencies: H1E, H3B or A3A. Faculty: Dana McDermott.

**HC 112**
**MAKING SALES AND SELLING SIMPL E**
**Undergraduate**
It’s obvious; making the sale requires advanced skills and abilities! What’s not obvious is how to acquire those skills and to apply them successfully in business! This course takes a look at building on your business knowledge by looking at the ?why? and how? of professional selling ? specifically looking at prospecting, qualifying, presenting, handling objections, AFTBing, closing, and follow-up. The goal of the course is multifold; to appreciate the professional selling literature, to link theory with practice through the selling process, and to allow application to both personal and professional settings. This course accomplishes these goals through both in-class and out-of-class work that combines fun exercises supplemented by lecture, discussion, role-play, and even an assignment that requires the student to shop! Competences: H2G, H3G, FX.

**HC 113**
**MIDWINTER RITUALS**
**Undergraduate**
This course uses methods of comparative religion and cultural anthropology to explore the specific manifestation of religious, ethnic and family traditions during the winter season of the northern hemisphere. The similarities between the winter celebrations of Christmas, Hanukkah, Hogmanay, Diwali, Soyal, Las Posadas, Zagmuk, Loi Krathong, Santa Lucia’s Day, Saturnalia, Yule and (more recently) Kwanzaa have been noted by scholars and laypersons alike. In some way, all these ritually based festivals relate to the common astronomical fact of the winter solstice - the shortest day and longest night of the year and the slow “return of the light” to the world. Can only be taken for one competence. Competencies:H1E, H2X, A3X. Faculty: Rebecca Armstrong.

**HC 119**
**DIVORCE AND ITS LEGAL IMPLICATIONS**
**Undergraduate**
As divorce rates in the U.S. continue to rise yearly, an increasing number of individuals are affected by divorce in some aspect of their lives. This course will give students a general overview of family law. In our discussions, we will explore issues such as domestic violence, child custody, and the “best interest of the child” standard in determining their effect on the divorce process. We will also discuss the financial and emotional implications surrounding the dissolution of a marriage and the role that these factors play in the divorce process. We will then explore the idea of divorce reform and whether this might be a solution to the increasing rate of divorces in the U.S. More specifically, students will be asked to analyze several of the proposed reforms in light of their new understanding of family law and determine if they believe that reform is the appropriate answer to this complex issue. Competencies: H-4, H-1-D, H-2-B, A-3-G. Faculty: Maria M. Mora.
THE US ROLE IN A CHANGING WORLD
Undergraduate

The Post-Cold War international structure, shifting economic alliances and power, and the emergence of nationalistic movements throughout the world are among the issues confronting the United States at the beginning of the 21st Century. This course will examine America's strategic role in this changing world environment and the attitudes that underlie American foreign policy decisions and will help students reflect on the global changes, assess national priorities, and decide for themselves the role the United States should play in the world today. Competences: H1X, H2E, H5, FX. Faculty: Kevin Kirberg

MANAGING PERSONAL CHANGE
Undergraduate

The primary purpose of this seminar is to provide participants with a forum through which a greater awareness regarding the multiple dimensions of change may be developed. Specific emphasis will be place on dynamics of personal change and methods of analyzing factors that impact personal change. Students will learn about the distinctions between personal change, transitions and transformations. Ongoing self-assessment regarding change and opportunities for students to engage in self-reflection will be a key component of this course. Competencies - A3X,H3C, FX. Linzy Water

WOMEN AND SEXUALITY IN ISLAM
Undergraduate

This course emphasizes the issues of women and sexuality in the Islamic cultures and demonstrates the diversity of women's lives in Muslim societies. In the course we will confront the following questions: Are the intense conflicts on women's sexual rights in the Islamic countries based on Islamic laws or the combination of political, economical and social inequalities? What is the Islamic view of love, eroticism and sexuality? Are women the instrument of power as the hunters and men the passive victims, or "women are created of and for the men"? Competencies: A1X, A3X, A5, H1X. Faculty: Ezzat Goushegir

THE EMOTIONALY INTELLIGENT LEADER
Undergraduate

Because of the roles they play in influencing the lives of individuals and organizations, leaders bear a greater obligation to manage themselves and their relationships with insight and sensitivity. This course will examine the attributes of effective leaders in various settings and how they have drawn on skills of emotional intelligence to support their success. In addition, participants will identify their leadership qualities and strategies for developing them at work and beyond. Course readings and activities are drawn primarily from texts by Richard Boyatzis and colleagues that illuminate the relationship between emotional intelligence and leadership. The course is designed to address (1) the theory and practice of leadership and (2) the attributes and aspirations of course participants in their roles as leaders. Beyond the close examination of the Boyatzis leadership model, other primary models of leadership will be reviewed. Course activities will include discussion, presentations by participant leaders, film excerpts, and exercises. Competences: A3X, H2X, H3X, FX. Faculty: Donna Younger

PARENTS AND TEACHERS TOGETHER: CREATING THE SCHOOLS OUR CHILDREN DESERVE
Undergraduate

This course provides an opportunity for students to reflect on and answer some of the following questions: Why do parents and teachers both feel frustrated and powerless to meet the needs of today's students? In this class we will consider the power inequities inherent in schools today. With fewer and fewer people who vote having school age children, parents and teachers feel they have little voice in how national and local resources are allocated to education. We will focus not only on present problems in schools, but on reviewing innovative initiatives and models around the country that give a louder voice to teachers and parents on behalf of children. While many people blame children's problems on parents and/or teachers few look at the system/society in which they function: teachers telling parents how to be involved in school without considering their backgrounds, culture, etc. and school administrators telling teachers what to do and the government telling administrators what to do. This course will give students an opportunity to think about current school problems within a power framework and then design constructive ways to empower parents and teachers to be more effective in creating "schools our children deserve." Competencies: H4, H3G, H2A, FX. Faculty: Dana McDermott
HC 131
THE CHURCH AND SOCIAL JUSTICE
Undergraduate
Recognizing the impact of religious teaching and religious organizations in the development of individual and social moral values, this course seeks to look at the role of religious organizations, primarily Christian, and how they influence or shape individual and community social values. The course will also look at the interplay of culture and religion and how different cultural and social positions shape religious faith and social action. This includes a discussion of the impact of race, gender, class, and sexual orientation and how they are shaped and defined by one's religious beliefs. The course will look at the role of the leadership development in the church via its activities, role models, and teachings on personal and communal responsibility. It will also look historically at the points of conflict where religious institutions have mobilized to take opposing position on political and social issues such as in Civil Rights or Housing issues. The course will also look at the role of the church in the local community as a resource and as a catalyst for social services, social justice, political advocacy, and community economic development. The class will provide an exploration of various Christian denominations and how their view of their roles and work in the city and in the communities has changed over time. Students will also examine current day communities and churches and compare their historical roles with what they are doing today. They will discuss what churches are doing at the congregational level and ways that institutions are partnering with other religious, interfaith, government, or nonprofit agencies to address community social and economic needs. Competencies: A3X, H4, H2X, H1X Faculty: Cynthia Milsap

HC 132
THE MIDDLE EAST: MAYHEM OR MISUNDERSTOOD?
Undergraduate
Is there any American who does not want to know more about the Middle East? This class will provide a geopolitical overview of the seeds which sprouted into the current situation in the Middle East. Learners will study religion, government, and Muslim culture. Along with a concentration on the history and cultural traditions of the area, students will examine how the need for oil has shaped United States foreign policy toward the region. In this course, students will consider facts and issues related to this fascinating locale from a variety of perspectives. Competencies: L7, FX, H5, H2X. Faculty: Joann Gesiakowska

HC 133
CIVIL WAR AND CIVIL RIGHTS: A COMPLEX LEGACY
Undergraduate
Both in obvious and subtle ways, the Civil War has shaped the America that we live in today. Our images of "north" and "south," our race relationships, and our sense of a national identity have their roots in the Civil War and its aftermath. This course is designed to explore the historical and social dimensions of the War through readings, discussion, videos, and conversations with guest speakers. We will delve beneath the conventional beliefs and superficial information about the War to appreciate its complexity and its presence in our lives. Among the key issues we will address are (1) the ongoing debate regarding states' rights (2) the impact of southern regionalism on American culture (3) contemporary civil rights and their links to the past. Competencies: H1E, H1F, H2A, H4. Faculty: Donna Younger.

HC 134
GLOBAL EDUCATION AND WORK
Undergraduate
Globalization has become a constant topic in the news. We can no longer content ourselves with our town, state, region, or even with our own nation. We need to think big. International politics and economies are merging. How will we compare to other nations in terms of educational preparation and workplace skill? In this course, students will examine ideas regarding the nature, philosophy, history, and purposes of education, and of education for work in the United States. Furthermore, students will compare our thoughts on these issues to those of other nations, our partners for the future. Students will consider the ethical implications of educational programs and philosophies, and will discuss the ramifications of the developing close relationship between education and the workplace. Competencies: A4, H5, FX, H1X, H2X. Faculty: Jean Richine

HC 135
TOOLS FOR TOMORROW'S LEADERS
Undergraduate
Effective leadership in the 21st century requires knowledge of a variety of concepts and practices. Theories and principles from past and present leaders influence how leaders of tomorrow will succeed. Business, political, and religious settings require solid leaders with great awareness of knowledge and practices that have created proven results. These settings require perspectives that will contribute to the success of the organization. Aspiring leaders draw inspiration from lessons learned in the past; these leaders then need to translate those lessons into solid contemporary practices for their organization. This course provides a critical analysis of historic writers and thinkers. Examining leadership situations from these early writings, students will compare and contrast contemporary leadership approaches. Through discussion, reflection, and exercises students will uncover relationships and insights to their current leadership practices and situations. A variety of knowledge and ideas focused on acting ethically, thinking independently, listening closely, taking responsibility, and finding balance are among the tools that students will develop in this course. Close reading of Plato, Sophocles, Aristotle and Aeschylus will allow students to bring the works of these early thinkers to their current leadership situations. Competencies: A1X, H1X, H3X, FX. Faculty: Lori Neblung
HC 136
UNDERSTANDING TERRORISM AND SOCIAL VIOLENCE
Undergraduate
The tragic events of September 11th 2001 have caused many people to seek answers and understanding as to why this type of violence occurs. This intense course will examine the psychological, philosophical and ecological roots of hatred and social violence. We will explore the possible negative impacts of exposure to violence on children, adolescents and adults. Course content will center around such questions as: "What are the cognitive roots of prejudice and social violence?" and, "Is violence really human nature?" BA-1999 Competencies: A3A, A3X, A4, A5, H5, S2C. Pre-1999 Competencies: ALF, HC4, PW5, WW, HC, AL, PW capstones. Faculty: A. Matamonasa

HC 137
A LIVING MOVEMENT: TOWARD A WORLD OF PEACE, SOLIDARITY AND JUSTICE
Undergraduate
How can we make sense of the enormous changes taking place in our world? From the Egyptian victory to overthrow a dictator to the struggle of Wisconsin union members, non-violent actions are spurring more peace, solidarity and justice. How do we take part in building a movement of peace, solidarity and justice? Join the Living Movement course and travel to Memphis, TN for a joint conference of the Peace and Justice Studies Association and the Gandhi-King Conference. Over 1,000 people will attend to share stories from the front lines of the struggles for peace and justice and listen to evidence from scholars on the victories of non-violent action. Meet national leaders and network with activists from all over the country. Space limited so register early. Besides DePaul registration, additional expenses include: hotel for 2 nights, food, travel, conference registration. See peacejusticestudies.org or gandhi/king.org for more information. This is a one competence course: A3X, H1X, or H4. Faculty: Maureen Dolan, mdolan1@depaul.edu

HC 138
THE JUVENILE COURT SYSTEM: IS THERE A FUTURE FOR OUR CHILDREN?
Undergraduate
Recently the juvenile court system celebrated its 100th anniversary. This affords us an opportunity to examine the strengths and weaknesses of this special court and to identify the opportunities for improvements and needed changes. The court's legal decisions about children's lives are extremely important because of their profound life-long consequences for individual children and because of the impact these decisions have on society in general. This course will study the juvenile court system since its inception in 1899. We will see how crime has changed, not so much in numbers, but in the degree of violence due to guns, drugs and gangs. We will also study how the change in family structure has affected crime. We will study one method of change in our efforts to effectively address how certain changes in the present system could lead to a more effective and just system. We will employ small learning teams to explore the material presented in class. Competencies: H1D, H2X, H4, L7. Faculty: Barbara Donnelly

HC 139
UNDERSTANDING WAR: CAUSES AND CONSEQUENCES
Undergraduate
The First World War (the "Great War") produced profound effects on world culture and continues to influence our ideas and actions with respect to military matters. The swift advance of technology during this time provided the world with a new and constantly-shifting array of weaponry, including the first biological weapons, use of aircraft and bombing, and systematic genocide. All of these weapons are still present in the contemporary arena of warfare and we can understand them only by knowing their origins. In this course, we will examine this horrific shaping effect of war by studying its literature, scholarship and documents, as well as selected films and field trip(s). Since aviation and the use of air tactics played a crucial role near the end of the Great War, we will particularly emphasize this phenomenon. Competencies: H5, S1E, S3A. Faculty: Daniel Christine.

HC 140
PUERTO RICO AND CUBA: DIVERGENT POLITICAL TRAJECTORIES
Undergraduate
Despite their geographic proximity, Puerto Rico and Cuba have taken different political paths. In this course, we will examine the economic and political history of these two countries starting from when the United States took possession of these two Islands in 1898 to the present. We will address questions such as: What led to U.S. involvement; why did Cuba gain "nominal independence" after 1898 while Puerto Rico remained under tighter U.S. control; What led to the Cuban revolution; What is the current state of Communist Cuba? The history of these two countries will also provide an avenue for exploring the impact of the Cold War on the Caribbean. We will conclude by examining the migration and immigration of Puerto Ricans and Cubans to the United States. Lectures, class discussions, videos as well as presentations by guest speakers will be the primary means of exploring these issues. Students will develop a structured learning journal and complete a small project that explores one of the course themes. BA-1999 Competencies: H1C, H1F, H2F, H4. Pre-1999 Competencies: HC2, HC3, HCG, HQC.
HC 141
COACHING FOR PERSONAL DEVELOPMENT AND PROFESSIONAL EFFECTIVENESS
Undergraduate
Effective coaching has long been recognized as a key element of success in the world of sports. More recently, a new breed of coaches has emerged to help people transform their personal and professional lives. In this course, we will explore the theories, concepts, and techniques of personal life and business coaching. Students will learn about the history of coaching, its uses in personal and professional development and practical applications. Working individually, in pairs, and in small groups, students will practice coaching skills and keep a detailed learning journal. This course will be highly experiential and collaborative in nature. Students will learn concepts of coaching for personal development and professional effectiveness. Competencies: H3X, FX, L7 Students may register for only one competency in this five week course. Faculty: Peggy St. John

HC 142
EXPLORING EDUCATION
Undergraduate
This course will focus on educational opportunities for students considering a career change or exploring career opportunities in the fields of Policy, Administration and Teaching at the Elementary, High School or Junior College level. We will discuss the history of American education, its aims, purposes, contemporary issues and opportunities, as well as requirements for teacher certification, and alternative certification processes. Students will learn how to use the SNL program to meet Illinois General Education requirements leading to Teacher Certification. Class requirements include discussion, selected readings, a short writing assignment and a guest speaker. Student outcomes will include a thorough knowledge of the processes involved in Teacher Certification, examination of their short term and life-long learning goals and an understanding of innovations in education today. This course is designed for students to explore and understand education today and how this knowledge leads to personal goals, improved understanding of education as an institution and how this knowledge can impact their choices in education for themselves and family. Competencies: H2A, H3X, FX.

HC 143
AMERICAN WARS: ILLUSIONS AND REALITIES
Undergraduate
This course will examine the myths and realities of American wars from a number of different perspectives, and will evaluate the means by which misconceptions about war enhance or threaten American values. Specific areas of study will include the benefits and risks of foreign intervention, the impact of war on aggressor and victim, the role of the media, environmental effects, and rationalizations for and against war. The emphasis for each study area will be the contrast between generally accepted beliefs and the consensus of reputable, diverse sources. Readings from pro- and anti-war and centrist sources will be considered. Students in this course will be required to participate through selected readings, brief reports on those readings, and class discussions. Each student will choose a specific topic of interest for individualized study, which will entail research and writing, a multimedia class presentation, and an effort to publish the work on one of a number of selected websites. Competences: A3C, H1F, H5, FX. Faculty: Paul Buchheit

HC 144
DEMOCRACY IN EVERYDAY LIFE
Undergraduate
Democracy may be described as a form of government in which the general public participates in decision making. But this is a rather abstract notion. Democracy is often used as a term to identify any admired system that is not patently a dictatorship. For a more profound understanding of democracy and democratic behavior, it is necessary to identify criteria, which define democratic environments such as equality, solidarity, positive human relationships, participation and commitment to each other. Furthermore, it is required to analyze these criteria critically and apply them to every day contexts and behavior. This course will provide students with an understanding of democratic environments, the criteria to define them, and how this knowledge could be applied to everyday situations in the private sphere and the workplace. The course offers a wide range of activities like critical reading and discussion of topics, analysis of cases, simulation of democratic and non-democratic environments and problem solving of real life issues. The ideas of others serve as common course content presented in the material assigned to this course. Students are asked to participate actively and critically, using their own experience as a field of analysis and reflection. Active participation should foster the idea that the course itself could serve as a model of a democratic teaching and learning environment. In this way the course will foster democratic behavior and values. Competencies: H4, H3G, FX.

HC 146
HOW FAMILIES COMMUNICATE
Undergraduate
This course provides students with the opportunity to apply a wide range of theories about family communication to an experience common to all-family life. Through this course, students will gain an understanding of how communication functions to develop, maintain, enrich, or limit family relationships across a wide range of family structures and cultural backgrounds. Among the family relationship issues considered in this course are patterns of intimacy, power, decision-making, roles, rituals and conflict. Factors involved in forming family patterns (e.g. gender, ethnicity, family diversity and family stories) will also be covered. Competencies: A-3-F, H-3-C, H-3-X, F-X. Faculty: Robert Mills
AMERICAN CULTURE IN 2010
Undergraduate
Is there an American cultural identity that is distinct, or is the notion of "American culture" obsolete? There are more than 100 scholarly definitions of culture and most agree that culture depends on shared beliefs, values, and symbols and provides a means for people to both adapt to and manage the world within which they live. In an increasingly diverse United States, what beliefs and values do its inhabitants share? Have these attributes changed significantly in the past several years so that "American culture" is being redefined? This course will examine the ways that American Culture is perceived and shaped by its inhabitants and how changes in technology, global relationships, and immigration challenge us to clarify it for ourselves and others. Competences: A3X, H1X, S3F, H4. Faculty: Donna Younger & Wendy Yanow

COLLABORATIVE LEARNING: PRINCIPLES AND PRACTICES
Undergraduate
In this class, we will explore and develop the skills, values and knowledge that contribute to collaborative learning. Today perhaps more than any other time in human history we are aware that no one is an island. At the individual, organizational and societal levels, we are all interconnected and interdependent. We can only meet our goals and address our problems at any of those levels if we work at them with one another. Therefore, as never before, we need to learn how to learn together. Collaborative learning is the process of two or more people helping each other to deepen and expand their shared understanding of the challenges and opportunities they face. It involves stimulating new insights in one another, and helping each other make changes in our assumptions, beliefs and behaviors. We will read and discuss a book on theory and skills of helping others to learn. We will practice skills each week with each other via telephone. We will also participate in informal online discussions. Each week, a formal reflection will be submitted. See http://condor.depaul.edu/~mskelley for more information. Competencies: L7, H2C, FX. Faculty: Staff

TEAMS AND TEAMWORK
Undergraduate
It's obvious; teams outperform individuals. What's not obvious is how to make teams work. This course takes a look at the "why" and "how" of teams: specifically looking at team building, communication, leadership, behaviors, conflict management, decision-making, diversity, and problem-solving. The goal of the course is multifold; to help students understand team dynamics, to become better team members through experience, to be better able to manage teams, and to apply team theory to actual practice in their personal and professional lives. This course accomplishes these goals through a combination of fun team exercises (each session) supplemented by lecture, discussion, video cases, and role-play. Competences: L7, H2D, FX. Faculty: Brian Hinrichs

DESIGNING, IMPLEMENTING AND PLANNING FOR CHANGE
Undergraduate
Business success is no longer about management and control. Success requires leadership that knows how to leverage information that is important to a company's sustainable future. Participants in this course will learn how to maximize a company's value to all stakeholders by tapping its intellectual capital (workforce, community, stockholders, board members, unions, customers) by engaging people in sharing their knowledge and wisdom. Students will learn how to set the stage for creation of a learning organization that successfully cycles key information. Pre-1999 Competencies: HC-5, HC-H, HC-N, HC-U. BA-1999 Competencies: L-7, H-1-I, H-2-C, H-3-G

COACHING AND LIFE SKILLS
Undergraduate
Good coaches... like good managers, parents, and friends... work to bring out the best in other people and help them develop their full potential. This course will provide a setting for students to experience and explore the role and skills of the coach in contributing to the development of other people. By looking through the lens of youth sports, participants in the course will learn that coaches communicate well; build genuine relationships; value process as well as product; and convince others that they are important and have much to contribute to their team and community. The course is highly experiential and collaborative in nature and will enable students to develop communication, teamwork and human development skills that will support their roles across a variety of settings. In addition, students will be eligible at the end of the course for coaching certification through the American Sport Effectiveness Program (ASEP). Competencies: FX, H3G, L-7, H2X.

PROJECT MANAGEMENT: TOOLS AND TECHNIQUES
Undergraduate
This course seeks the following learning goals: project definition and task organization, project risk management, project task estimation and schedules, and potential cultural issues when with working with project members from other cultures. Competences: H3D, H3B, FX. Faculty: David Lash
HC 153
VIOLENCE IN AMERICA: AN HISTORICAL AND CONTEMPORARY PERSPECTIVE
Undergraduate
This course compares violence in America from the second half of the nineteenth century to contemporary time. A variety of topics will be covered including: political violence and assassinations, labor strife, urban unrest, and organized crime. Hollywood and media images of violence affecting youth and individuals, violence as a form of social control, and implications of violence will also be covered. Class discussion will focus on the causes of violence in American society. Do groups condone violence when they perceive themselves as outsiders? Have groups resorted to violence attempting to force change in society? Is there a nineteenth century old west gunfight mentality existing in contemporary society? Does American violence compare to contemporary Western Europe? The coursework will include lecture, assigned readings, class discussion, and written assignments. Student papers will be on topics approved by the instructor. Pre-1999 Competencies: HCA, HCD, HCF, HCG. BA-1999 Competencies: H2A, H2G, H2X, H4.

HC 154
RACE AND ETHNIC RELATIONS
Undergraduate
How do we understand and heal the wounds of racism? How do we build bridges that allow diversity to flourish in the United States? What are the connections among forms of racism such as ethnic cleansing and “pacification programs”? In this course, we will explore the roots of racism, look at the changes brought about by the civil rights movement, and examine ongoing work aimed at bridging the gaps caused by racism. Students will study a variety of topics through discussion, readings, films, debate, guest panels, and field excursions. Competencies: A-3-C, H-2-A, H-4, H-5, F-X.

HC 156
BEHAVIOR, HEALTH, AND AGING
Undergraduate
This course is a broad introduction to the aging process in a society that values productivity, youth and independence and attempts to defy normal aging at all costs. It will explore the influence of medicine and technology as it relates to aging, examining the role of health care as to prolonging human life vs. allowing for a good death. It is a continuing survey of the human being through the periods of late adulthood and old age. Through exercises, projects, and group activities, students will learn to explore the personality, behavior and physical changes in aging. It examines the interrelationship between physical and psychological factors of adapting to illness and health maintenance activities. Topics include the physiological and psychological aspects of aging, behavioral influences, prevention and management of chronic illness, bereavement, death, and related adjustment issues. Pre-1999 Competencies: HC-A, HC-C, PW-5, PW-B, PW-F. BA-1999 Competencies: H-2-A, H-3-B, L-7, F-X, S-2-C, S-3-A.

HC 157
ECONOMICS FOR DECISION-MAKING
Undergraduate
The purpose of this course is to provide the modern consumer living in a global economy fueled by unabated technological progress with basic tools to understand the path which has led to today's remarkable prosperity. The focus is on enabling consumers to make decisions throughout the life-cycle. Basic economic methodology will be presented, along with defining moments which, from the Industrial Revolution to the expansion of globalization, have shaped both economic theory and economic policy. Standards topics, such as scarcity, opportunity costs, the law of diminishing returns, the law of comparative advantage, the mechanism of the price system, the laws of demand and supply, the workings of money and banking, the impact of fiscal, etc., will be considered, with in mind the idea that economics can offer a significant contribution in the process of making practical financial and consumer decisions. Competencies: H-1-C, H-2-E, H-5, F-X.

HC 158
ETHICS AND LAW OF INTERNET PRIVACY
Undergraduate
Online privacy has become a highly charged and complicated area of the law and our culture, because the Internet is changing and expanding our economy in ways unimaginable five years ago. The Internet's incredible functionality and convenience has rapidly made it the primary communication, information, and shopping tool for millions of Americans. Most of us, however, underestimate the extent to which we compromise our digital DNA with these transactions. Recently, some states have attempted to draft legislation responding to the issue of online privacy. Legislation advocates envision that these represent limitations on the collection and dissemination of personal information acquired by Internet web sites. Others have promoted the adoption of federal online privacy standards. Will the adoption of new laws and regulations impede the Internet growth? Or, is the Internet the final frontier of unregulated and freely accessible information, products, and services? Students in the class will grapple with these and other important questions on the legal limits of privacy. Competencies: A3C, A4, H1X, S1X, FX.
HC 159
MAIZE AND MIDWESTERN CULTURE
Undergraduate
In this course, students will learn the role maize has played in the cultural, economic and scientific development of Midwestern Society. An overview of the impact of maize on ancient American and modern world cultures will also be examined. Students will learn how maize developed from a wild indigenous plant in the Americas to become one of the world’s great sources of food, chemicals, religious belief and social practices. More locally, students will learn how corn is currently farmed in the northern Illinois area, how Midwestern family farmers finance, grow and sustain great crops of grain. Students will examine the practices and results of economic corn markets and the role these play in the success of Illinois corn farms. Methods of continuing domestication of maize by selective breeding and more recently by genetic engineering, and the impact of these practices on the crop and on society will be examined. Finally, students will explore the many ways corn products are converted into chemicals for a variety of uses, and will analyze their benefits and costs. Pre-1999 Competencies: HC-F, HC-G, PW-B, AL-E. BA-1999 Competencies: H-1-H, H-4, S-3-F, A-1-H.

HC 160
FACILITATION SKILLS FOR ORGANIZATIONAL LEARNING
Undergraduate
Good facilitators know that really connecting with other people is the secret to powerful and effective meetings and training. In this course, we will examine the nature of engagement and the skills and strategies that facilitators use to involve other people meaningfully in these events. Specific topics will include: matching facilitation skills to event purpose and context, creating learning environments conducive to facilitation, application of a variety of facilitation skills in small and large group settings, using technology to complement facilitation. Class sessions will be devoted to examining and critiquing facilitation scenarios, practicing facilitation skills, and applying principles and strategies of facilitation to class participants’ real life situations. Competences: H2X, H3X, L7, FX. Faculty: Donna Younger

HC 161
THE SUCCESSFUL ENTREPRENEUR: FINDING YOUR NICHE
Undergraduate
Today, to be a successful entrepreneur, in addition to knowing what’s hot in the marketplace, you need to know yourself. This course will help you discover what are the skills and gifts of personality you possess that will maximize your possibilities for success as an entrepreneur in today’s global environment. Utilizing a variety of measurement techniques, you will discover your own personal work-style preferences, what tends to drive you, what energizes you and what builds your self esteem. You will explore which type of business opportunities might be the right ones for you, learn your own decision making style and in what work environment you function best. Based on this knowledge, you will create your own mission statement. Then in collaboration with other students, you will learn how to integrate this information with the various tasks required in getting a new enterprise off the ground. This includes: (1) identifying a specific service or product that meets a need in the global community, (2) creating successful marketing strategies; and (3) devising methods of developing the product or service you created. Pre-1999 Competencies: AL-2, HC-H, HC-X, PW-A. BA1999 Competencies: A-5, H-5, L-7, S-2-D

HC 162
MANAGEMENT THEORIES EXAMINED
Undergraduate
Throughout history, theoretical approaches to managing people and programs have filtered into and influenced daily life. Some of these theories, such as the works of Machiavelli, take the form of great literature. Others come to us via the more mundane world of Dilbert cartoons. In any form, ideas about human interaction and productivity continue to shape our consciousness. In this course, students and faculty will examine a variety of documents related to management, and will examine them from philosophical, social, and business perspectives. Competences: A-3-X, H-2-X, H-3-X, F-X.

HC 163
CHINA: VOICES OF A SOCIAL REVOLUTION
Undergraduate
The greatest migration of people in the history of the world is occurring right now, in China. Hundreds of millions of people, whose families have lived in rural China for thousands of years, are moving to rapidly urbanizing cities. This course analyzes, through the voices of the Chinese people, the dramatic impact of this social and economic revolution upon families and individuals. Through lecture/discussions, videos, readings, on-line discussion boards and independent research, students will have the opportunity to form their own viewpoints as to the impact of globalization upon one of the oldest civilizations on earth. Competences: A3F, H1C, H5, H3I. Faculty: Mark Enenbach Can only be taken for one competence.
HC 164
ROLES AND RESPONSIBILITIES OF ORGANIZATIONAL LEADERS
Undergraduate
This course surveys a variety of leadership structures prevalent in dynamic contemporary organizations. Students in this one-competence course will investigate theories of active leadership, analyze organizational case studies involving effective leadership positions and experientially assess the usefulness and validity of conceptual models of leadership in the day-to-day world of viable organization management. Competencies: H-2-X, F-X.

HC 165
CHINA: MONEY, POWER AND THE 21ST CENTURY
Undergraduate
The greatest migration of people in the history of the world is occurring right now, in China. Hundreds of millions of people, whose families have lived in rural China for thousands of years, are moving to rapidly urbanizing cities. This course analyzes, through the voices of the Chinese people, the dramatic impact of this social and economic revolution upon families and individuals. These changes are having a worldwide impact upon economics, trade and the new world order. Through lecture/discussions, videos, readings, on-line discussion boards and independent research, students will have the opportunity to form their own viewpoints as to the impact of globalization upon one of the oldest civilizations on earth. Competences: H5, A3F, H1C, H1H. Faculty: Mark Enebach

HC 166
GLOBAL FUTURES: OIL, WATER, WAR, AND PEACE
Undergraduate
Who determines who owns the oil, water, and other resources on the planet? What are the root causes of many of the wars in the Middle East, Africa, and South America? How do we, as the world’s superpower, respond to these global issues? This course examines the fight for resources and connects these issues to questions of war and the new upsurge of non-violent action across the globe. We will read books and excerpts from these and other works: RESOURCE WARS: THE NEW LANDSCAPE OF GLOBAL CONFLICT, by Michael T. Klare; WATER WARS, by Diane Raines; DRUGS, OIL AND WAR IN AFGHANISTAN, COLOMBIA, AND INDOCHINA, by Peter Dale Scott; and POWER POLITICS, by Arundhati Roy. Guest speakers, videos, and other experiential learning will enhance these readings. Competencies: A-3-G, H-1-F, H-5, S-3-D. Faculty: Staff

HC 168
ITALY AND ESTONIA: WHO TALKS TO WHOM IN SCHOOLS AND CAFES?
Undergraduate
Through onsite visits to schools, piazzas, and cafes in Italy and Estonia, participants in this 2-week study abroad course will study cross-cultural communication by examining how language and interactions are used in various contexts in both countries. Participants will examine communication dynamics in informal settings, such as cafes and piazzas, and in the formal setting of schools and universities. Using concepts from assigned readings, participants will analyze how different socio-cultural factors interact to shape individuals and interaction patterns in both societies, as well as in the United States. A primary focus will be Estonian and Italian schools and universities, where participants will compare these organizational structures to those in the US and analyze the implications for cross-cultural communications among and between teachers and students. Prior to departure, participants will use interactive, online technology to engage in cross-cultural communication and to create criteria for evaluating and comparing communication; the dialog analyzing cross-cultural aspects of language in educational and public settings from a social and political context will continue upon arrival in the countries. In both countries, the selected universities conduct research on intercultural education and cultural dynamics among groups in multicultural societies. Estonia and Italy are substantially different culturally, and offer rich opportunities for comparison and analysis. This course, though ideal for educators wishing to understand the role of language and culture in different settings among multicultural groups, also provides a background for those interested in sociolinguistics, cross-cultural dynamics and multiculturalism abroad and at home. Suggested competences are: H1A, H2X, FX, H5, E1 & E2, L10, L11. Please contact course directors Gretchen Wilbur, gwilbur@depaul.edu or Nancy Morgan at nmorgan4@depaul.edu for more information.

HC 169
CROSSING BOUNDARIES: UNDERSTANDING SELF AND “OTHER”
Undergraduate
This semi-structured Externship is designed to enhance students’ understanding of themselves as individuals, as life-long learners and as members of the larger human community. Students will identify the internal and external ‘boundaries’ they have with regards to experiential learning. Experiential or service based learning will be implemented to enable students to ‘cross boundaries’ into new and unfamiliar territories. Pre-1999 Competencies: LL-7, and a pair of capstones. BA-1999 Competence: L-9.
HC 170
THE PSYCHOLOGY OF CYBERSPACE
Undergraduate
The primary focus of this course will be the examination of the cultural and psychological elements of cyberspace communication, with a specific focus on the internet. Students taking this course will be able to reflect on and engage in informed discourse regarding the cultural and psychological elements of the internet as well as gender specific differences in cyberspace behavior. Students should expect to use the internet themselves to gather information for this hybrid course. Competences: H2X, H3X, H1A, L7. Faculty: Michael McMillan

HC 171
ORGANIZATIONAL CULTURE IN ACTION
Undergraduate
What is organizational culture? Culture is the way things are done in the organization, and is a system of shared symbols and is a variable that focuses on causality. In this course, you will examine what organizational culture is and how knowledge of culture provides a way for gathering information to help leaders/managers improve organizational performances. This course provides a hands-on approach to learning to "read" organizational cultures and using that cultural knowledge in symbolic management, training, organizational change, building effective teams, supporting diversity, and unleashing creativity. In terms of cultural analysis, through this course, you will be introduced to qualitative research methods, field observation, interviewing, qualitative surveys, content analysis, and other methods of textual analysis. The textbook is an applied workbook to supplement and apply organizational theory. It answers two central questions: How to understand the intangible culture that is so important to working in an organization; and how to use this cultural information once understand it. Finally, you will have a chance to transform theories into practice. Competences: L7, H1B, A3X, H4, FX. Faculty: Kumiko Watanuki

HC 172
HUMAN RIGHTS AT HOME AND ABROAD
Undergraduate
This class is largely about the international human rights movement and how it has the potential to alter our thinking about social justice and the rights movement in the United States. In this class, we will ask ourselves the following questions: which rights should be protected by every society? Can there be universal human rights? Should developing countries be held to the same standard as developed nations? What are the major areas of concern internationally and how do these compare with human rights concerns in the United States? Are human rights for the individual incompatible with those for the collective or can the two co-exist? In this context, we will review the U.N. Declaration of Human Rights and other important treaties, NGO commentaries, and first person accounts of the international and domestic human rights movements. Students are encouraged to integrate their interests in both domestic and international human rights issues into the class discussion. BA-1999 Competencies: H4, H5, H1F, A3C. Pre-1999 Competencies: ALP,HCC, HCG, HCX  Faculty: Nancy Davis.

HC 173
HUMAN RIGHTS IN BUSINESS AND SOCIETY
Undergraduate
Students study the history of human rights development as they emerged from religious belief, philosophical visions of natural law, social structures and legal systems. Students will also examine opposition to human rights over the centuries when rights threatened traditional patterns of authority, prejudices, vested interests, customs and claims of national sovereignty. Study then shifts to recent human rights documents beginning with the Universal Declaration of Human Rights in 1948. The racism convention is studied as the case study with focus on its application and lack of in the U.S. and Chicago. Students then apply knowledge from the case study to examine human rights work performed by a local NGO, by a local company or by their community. The course concludes with current human rights advances in corporations, governments and NGOs. Competences: H5, H2B, FX. Faculty: Patricia Szczesna

HC 174
CIVIL LIBERTIES IN EVERYDAY LIFE
Undergraduate
This course is designed to expose students to the history, context and implications for American society of the Constitution and Amendments, more commonly known as the Bill of Rights. We will learn about the founders who created the Constitution, and also explore landmark court cases concerning historically significant issues such as privacy, right to bear arms, freedom of religion, abortion, and the right to die. We will discuss how this supreme law of our land impacts our daily lives and decisions. Pre-1999 Competencies: HC-C, HC-F, HC-G. BA-1999 Competencies: H-1-D, H-2-F, H-4
HC 175
HOME AND IDENTITY
Undergraduate
In Home and Identity we will explore the many natures and meanings of home; home as a place one is born to and sometimes forced to leave; home as a place one can journey toward or create; home as an abstract composite of memories, emotions and rituals. We will discuss the complex intersection of home and work and consider how estrangement, displacement and exile participate in the definition of one's identity. This course brings a unique multidisciplinary and multicultural approach to address the interconnection of diverse experiences with the meaning of home and identity. It shows you that the meaning of home can be incredibly varied and lets you explore the multiple facets of home as well as being away from it. You will learn that home is a volatile mix of yearning and loss, of being at home or searching for it, and that this very mix is the framework in which one's identity evolves. The course will be based on lectures, discussions, film, exercises and guest speakers who will share their experiences with the class. Competences: FX, H1X, H3X, H5, L7. Faculty: Miriam Ben-Yoseph. Can only be taken for one competence.

HC 176
PEOPLE, PROCESS AND ORGANIZATIONAL DEVELOPMENT
Undergraduate
Healthy, successful organizations, like healthy, successful people, continue to grow and develop across the life span. This course will examine ways organizations can design processes and cultivate human potential to ensure that they renew themselves and remain ready to embrace opportunity and respond to change. Participants will work with case studies and scenarios from their own work contexts to develop competence. Competences: FX, H2X, H3X, L7. Faculty: Donna Younger

HC 177
PRACTICAL CONSULTING: THEORY, SKILLS AND APPLICATION
Undergraduate
If you were to look for the definition of "consultant," chances are good that it would suggest that a consultant is an individual who provides professional services. What does this mean? To whom does one provide professional services? What kind of services? In this course, students will learn the definition of consultant, the various models and theories behind the profession, as well as the practical skills necessary to engage in a consulting relationship. Students will work individually and collaboratively in practicing how to "contract," gather data, diagnose, give feedback and close the consulting relationship, all while learning the theories and underlying assumption behind consulting, no matter what type of "professional service" you are providing or for whom. By the end of this course you will have gained a greater understanding of organizational life, collaborative learning, yourself as a professional service provider, and be able to not only practice, but be a consumer of consulting services. L7,H2X,H3X,FX

HC 178
GENDER AT WORK
Undergraduate
From the days of hunters and gatherers our world has been organized by gender expectations. While these gender roles have evolved over time, women and men today still struggle to meet these expectations and they have largely defined who we are for centuries. We have more choices and freedom to renegotiate and transcend these roles now than at any other time in history, and yet they still impact every aspect of our lives. This course will explore how gender can influence communication patterns, leadership styles, negotiation skills, conflict styles, work/life balance expectations, relationships and a multitude of other aspects of our life at work and at home. Students will demonstrate the competencies through class participation, group projects, journal entries and other assignments that will allow them to apply course readings, films, and discussion to their own personal experience. Competences: FX, H3B, H4, L7. Faculty: Elisabeth Lindsay-Ryan

HC 179
ECONOMIC INEQUALITY: THE ROLE AND RESPONSIBILITY OF BUSINESS
Undergraduate
This course will examine the role of corporations in the growth of economic inequality in the United States and the world. Inequality changes in the U.S. and various other countries will be correlated with the economic, political, educational, geographical, and historical trends that may have affected incomes and standards of living since the beginning of the 20th century. Likely causes relevant to corporate strategies, especially over the past quarter-century, will be investigated, and possible solutions will be considered. Competences: A3C, FX, H4, H5. Faculty: Paul Buchheit.
Our lives and our work are inextricably linked - regardless of how we define work. "Work" may be defined as a paid job, volunteer activities, family and home occupations, educational ventures or other productive endeavors. In addition, over time our lives and work activities inevitably change, develop and take on meaning and relevance in ways that are not always intentional or foreseeable. These changes can and do influence our identity and how we "do" our work. In this course we will explore some elements of social psychology and how and why we derive identity and meaning from the varieties of work in which we are engaged. The genesis of learning in this course will be an examination of stages of development of individuals, workers in diverse settings and organizations. From these origins we will explore how we make and derive meaning from all of these sources of identity. Competences: A3D, H2X, H3C, FX. Faculty: Peggy St. John and Christine Hayda

Our system is founded on the belief that everyone is entitled to participate in the process of government. Free and open access to the judicial system is fundamental to American democracy, yet, as our system of law grows more complex by the day, we find ourselves more and more reliant on lawyers. This course is designed to provide students with the basic skills to understand and navigate the system in the areas of law that are pertinent to our everyday lives. Various substantive areas of law including, but not limited to, marriage and divorce, work-related laws, real estate, health care rights, estate planning, immigration, juvenile law, and finance will be examined with emphasis placed on topics according to class preference and interest. Pre-1999 Competencies: HC-I, HC-K WW. BA-1999 Competencies: F-X, H-1-D, H-2-B.

This course begins with a study of the evolution of human rights from religious belief and includes the opposition to human rights when they threaten traditional authority, vested interests, etc. Major human rights conventions will be studied and the Convention against All Forms of Racial Discrimination (ICERD) is utilized as the case study for current human rights work. Students will study how this convention to eliminate racial discrimination is being implemented in the US and in Chicago today, explore how NGOs are working for human rights, and assess how corporations are implementing human rights within their workforce. Competencies: H5, H2B, FX written by student. Faculty: Patricia Szcerba

How can we celebrate our different skin tones, body sizes, hair textures, and cultures, and yet still acknowledge our similarities? How can hair/body stories help us better to understand each other and ourselves? Are hair and body stories cultural legacies or scholarship? This course exposes students to the complex ways the body is portrayed, (mis)understood, and celebrated worldwide and will focus on constructions of Black hair and the Black body in media of the 20th and 21st century. Ever wonder why we are still talking about ?good hair,? if Black people tan or what is up with that white girl/guy with dreads? The course combines readings, personal anecdotes, media (including movies, videos, advertisements, music, poems, and online media), and applied research about the body and its extremities (such as hair). Here we will also analyze the body and its performance of sexualities and identities in the context of the production of culture and social relation. A critique of the readings and media representations will afford students the opportunity to explore alternatives to conventional materialist, consumerist, and constructed binary approaches to the body. By exploring their own hair/body stories students encounter dynamic resolutions and celebrations at the individual level. Competencies: A1I, H2G, H3B, H4. Faculty: Regina Spellers-Sims

This course will introduce students to issues of violence against women from cross cultural perspectives and will explore how this social problem relates to human rights violation. The course will give the definition of what is violence against women and what are the different forms of abuse used against women. This intense course will focus on evaluating these forms of abuse in diverse cultures, include India, Saudi Arabia, and the United States, as well as immigrant and minority communities in the U.S. This analysis will examine how social institutions in each of these cultures either contributes to the violence against women or addresses this issue. Through class discussion, lectures, readings and guest speakers, the various ways in which women are abused will be evaluated and discussed in an effort to introduce students to patterns of abuse from a global perspective. Competences: H-2-A: H-5: H-1-X, A-3-X. Instructor: Lu Rocha
HC 186
STUDIES IN GHANA: HISTORY, CULTURE AND SPIRITUALITY
Undergraduate
This course has been designed to be dynamic and lively, purposefully engaging with learners in direct experience and focused reflection in order to increase knowledge, develop skills and clarify values. The rich cultures of Ghana provide much of the context of this travel course. From visiting Ghana’s National Museum, to observing kente cloth being woven or women pounding fufu, or meeting with spiritual and educational leaders, course participants will be exposed to multiple layers and multiple levels of West African culture. Everyday experiences, such as shopping in the open air markets, become lessons on human interaction that are rooted in a particular worldview. Learners will be challenged to consider the footprint left by the simple decision of paying a particular price or buying from a particular vendor. They will come to understand that culture goes beyond the surface expressions, such as clothing, food, dance, to the deeper levels, such as the cosmology of the people. Their beginning examination of Ghanaian cultures can lead to further examination of their own personal, family, community and national cultures. Spirituality is one of the central themes in this course because it is central in the lives of West Africans, and forms a backdrop from which to understand cultural values and practices. It also informs many of the traditional healing practices that we will learn about during the course. Again, as participants learn about Ghana, and its rich spiritual traditions, they will also learn more about themselves and the role of spirituality in their own lives. Suggested competences are: H3A, H1F, S3B, A3E, Externship; FX is negotiable for focus areas related to cultural studies, multiculturalism, diversity, etc. Please contact Faculty director, Denise Tolliver at dtollive@depaul.edu for more information.

HC 187
LATINA LIFE STORIES
Undergraduate
This class will explore the diversity of the U.S. Latina experience through themes of migration, home and place, paid work, caring work, education, gender, and race. Through life stories and fictional works, students will examine what it is like to be a migrant or immigrant; to live in more than one culture, as a bicultural and multicultural, bilingual or multilingual person; to negotiate responsibility and desire, as a woman, mother, daughter, partner, to name and live one's sexuality; to be a provider, a caregiver, an activist and a professional. Students will also be encouraged to draw connections between their own experiences and those of the women about whom they are studying. The course will conclude by exploring how Latina women are building new political, theoretical, economic, artistic, and spiritual pathways toward wholeness. Students demonstrate competence through participation in class discussion, and activities, as well as by writing essays based on readings. Students will also have the option of writing about their own life history as well as of researching the life stories of Latina women not covered in the class. Competencies: H2H, H3B, H4, A1D

HC 188
UNDERSTANDING INTERNATIONAL RELATIONS
Undergraduate
Two major puzzles sit at the core of world politics: Why do nations fight, and why do they cooperate? One popular theory views conflict as a normal state in international affairs, presenting its supporters with the task of explaining why so much cooperation exists. Another popular perspective characterizes cooperation as the norm, posing a dilemma for its supporters to account for the violence in world affairs. Understanding cause and effect in a complex world is a difficult challenge. This course provides an introduction to the systematic study of major issues in international relations. Some themes recur throughout the course: power, motivation and choice, nation-states, anarchy, sovereignty, interdependence, and political and economic market failure. We will systematically explore the players, their goals, the constraints within which players operate, the interactions between players, and the strategies they pursue. Part I introduces general theories for explaining international relations. Part II addresses domestic sources of foreign policy. Part III addresses asks why and under what conditions wars occur, while Part IV explores how values and culture affect international relations, focusing on the causes of terrorism. Competences: H1C, H2E, H5, FX. Faculty: Kevin Kirberg

HC 189
LATINO CHICAGO
Undergraduate
Chicago and the larger metropolitan area have long been destination points for many Latino immigrants. Today Latino Chicago is comprised of many diverse groups including Mexicans, Puerto Ricans, Cuban and Central and South Americans that have become a vital part of Chicago’s economic, political and cultural life. This class will explore these Latino’s diverse histories and experiences of migration, as well as their journey in establishing a sense of place and home in Chicago. We will also study the social, economic and political history of Latino Chicago as well as current issues relevant to the community, such as housing, education and health care. Some of the questions we will pursue in this course include, but are not limited to the following. 1) What are the historical roots of Latino migration to the U.S. and Chicago? 2) Have Latinos been able to maintain their culture and identity while living in Chicago? 3) How have Latinos fared with respect to issues concerning housing, education, employment and health? In this course, we will learn about the concepts of race, class and gender and how these intersect to shape Chicago Latinos’ experiences. While we will learn about the inequities that Latinos have experienced, we will also explore this community’s struggle for social justice and its efforts to create a voice for itself in Chicago. We will conclude this course by exploring how Latinos/as are building new political, theoretical, economic, artistic, and spiritual pathways toward wholeness and justice. For example, we will explore some of the cultural and political projects of this community and the many groups that comprise it. We will learn about these themes and address questions through readings, class lectures and discussions, guest lectures, documentary films and field trips. Field trips to Latino Chicago communities such as Pilsen and Humboldt Park will take place during class time. Competences: H1F, H4, H5, FX. Faculty: Lourdes Rocha
HC 190
LAW IN AMERICA: ITS HISTORY AND RELEVANCE IN TODAY'S WORLD
Undergraduate
This course is designed to enhance students' awareness of how critical American law is for their personal, professional, and community life. The purpose is to help students achieve a better grasp of current realities through understanding of the history, the structure, and inherent problems of the American legal system. The course will discuss the role of lawyers and the public in the legal process (e.g., the role of civil rights groups and lobbyists in forming laws). It will begin with the colonial underpinnings and the essentially Western and British foundations of the American legal institutions. There will be some discussion of alternative legal systems. It will then review the American Constitution, the nature of a federal system, and specific topics in American law. These topics will include the basic rights in our system, and the law as it has evolved in dealing with race (“the strange career of Jim Crow”), speech (free and otherwise), labor (its rough course), criminality and its outcomes, religion (how religious is the law), and business regulation (how much can we trust antitrust). If time permits, we may discuss tort law and some aspects of courtroom practice and procedure (the TV side of the law). The course will be relevant for students interested in the law as a career, the law in the workplace, the law in not-for-profit settings, and those generally interested in the law in business contexts, as well as those seeking to understand the role of the law in our social and cultural context. We will use one major textbook, as well as selected readings on topics. Students will be asked to bring their own experiences with the American legal system into our discussions and to share their perspectives of the various topics. Competencies: A3X, H1D, H4, FX. Faculty: Frederick Bates

HC 191
AMERICAN PRESIDENTS
Undergraduate
This course will trace the development of the American Presidency by concentrating on the lives of some of the leaders who have been elected to the Presidency over the past two centuries. We will seek to find out their histories, what motivated them, what ideals they held sacred, what programs they proposed, how they reacted to crisis, how they protected and improved the nation during times of war and peace. We will examine the key issues and problems that confronted these Presidents and shaped the history of our nation. Students will read different biographies of two Presidents, and individually report their findings to the class for discussion and comparison. We will also follow the unfolding events of the 2000 campaign. Competences: H4, H-1-F, H-2-F, H-2-G. Faculty: R. Craig Sautter

HC 192
HOW, WHAT AND WHY WE EAT: THE ART, SCIENCE AND PSYCHOLOGY OF FOOD
Undergraduate
We have many connections to food. Food sustains us but it has meaning that extends far beyond basic nutrition. Eating is an individual pleasure and comfort, a tool for creating and sustaining social bonds, and a way to express one's cultural identity. Food is tied to many aspects of life including culture, politics, agriculture and the environment. Americans have become disconnected from both the production of our food and from the joy of eating it and suffer from food related health problems such as diabetes, obesity and eating disorders. In this class we will explore the myriad of food-related habits and choices, that determine how what and why we eat. This experiential class moves beyond specific dietary guidelines by presenting concepts and skills that will help you reframe your connections with food. We will explore the multiple dimensions of food and eating from an individual, community and national level. We will explore the true meaning of nourishment. Topics include: identifying personal eating styles, mindful eating exercises, the slow food movement, locating Chicago food deserts, a field trip to a popular Chicago organic garden/restaurant, guest speaker from a Chicago restaurant mural artist, examining types of hunger and nourishment, and issues involving food and ritual, food and story, food and psychology, food and art. We will combine art, film clips, lectures, field trip, research, and mindful eating skills. Competences: A1F, H2G, H3F, S3B, FX (should have Faculty Mentor approval to register for this competence). Faculty: Joan Cantwell

HC 193
THE AFRICAN AMERICAN FAMILY
Undergraduate
This course will explore key questions regarding the development of the African American family within the context of institutionalized oppressive forces endemic to American society. During the course we will survey several theories that have been prominently used to characterize the African American family's development and their efficacy as tools in this endeavor. We will also use genealogical research methods to understand the dynamics of family development. Students will conduct research into their own family's history by using oral history techniques and will learn how to document and reconstruct kinship ties as far back as class time and records will allow. Through this process, students will gain a broader understanding of the African American family as it has evolved in response to the stressor imposed upon it throughout American history. Furthermore, learners will consider issues related to the construction of American society, the role of African Americans in it, and the ways in which these issues influence African Americans in all aspects of their relationship to the larger society. Each student will be expected to turn in a final research report based on readings and research. The final research report will consist of a family tree and a discussion of family development based upon the ideas presented in the course discussions and the readings. The text for this course is: A Place Called Home: An African American Guide to Genealogy and Historical Identity, by Dee Parmer Woodtor.
HC 194
ORGANIZATIONAL COMMUNICATION: PERSPECTIVES AND TRENDS
Undergraduate
The study of organizational communication can be important to you for it can improve your understanding or organizational life, provides you with an awareness of important communication skills in organizations, and perhaps starts you on a path to a career in the field. Organizational communication is a complex and continuous process through which organizational members create, maintain, and change the organization. Two important issues associated with this definition: First, it is important that all organizational members participate in this process, and second, shared meaning is not always achieved in organizational settings. Certainly, the process is mutual, and understandings are created, however, the interpretations created or derived from these interactions may not be mutual among all members of an organization. There are at least three different perspectives of organizational communication: traditional, interpretive, and critical. These perspectives differ in the ways that they study organizational communication and in the assumptions that they make about the nature of organizations. The traditionalism has evolved from an early form into a different contemporary form. Early traditionalism understands organizations as machines and regards communication as a machinelike process. Recent traditionalism sees organizations as living systems and communication as a dynamic, organismic process. Interpretivism and critical theory have developed as serious alternatives to the traditionalist study of organizations. Interpretivists are concerned with the symbolic processes through which organizational reality is socially constructed, and critical theorists are concerned with the relationship between structure and symbolic processes in the efforts to criticize oppression and the systematic distortion of organizational communication. Competences: L7, H1A, H3D, S3F, FX. Faculty: Kumiko Watanuki

HC 195
GRANDPARENTING: AN INTERGENERATIONAL DEVELOPMENTAL PROCESS
Undergraduate
In this course, we will explore how generations of a family interact with one another, how these relationships effect the different generations, and how cultural factors and public policy influence the interactions. We will explore intergenerational relationships from the perspective of developmental psychology, public policy, finances, public health, cross cultural studies, literature and the arts. At the same time as more grandparents are becoming the primary caretaker for their grandchildren and the number of great-grandparents is at a record high, the traditional roles of each generation is under great change. Some of the questions to be addressed through concise lectures, readings, group project, interviews, and individual project are: How can intergenerational interactions stimulate development throughout the life span? How can the nurturing across generations be balanced with the independence of the individual? What are the implications for workplace policies, public policy, and community health? How do different cultures respond to intergenerational interactions? How do the arts (literature, fine arts, music, and cinema) reflect the value of intergenerational relationships? How can we learn from this inquiry help us understand our own relationships across generations? Competences: A1X, H2X, H3X. Faculty: Roberta Liebler

HC 196
ECONOMICS BY EXAMPLE
Undergraduate
This course utilizes a novel pedagogical approach to introduce concepts and theories that form the core of the principles of economics. Instead of relying on graphs and mathematics, ‘Economics by Example’ follows the text by the same name to frame hot topics such as globalization, outsourcing, immigration, environmental policy, big-box retailing, and internet piracy in a way that provides an inviting and accessible understanding of economic theory. The same refreshing treatment is given to more traditional topics such as efficiency, the maximization principle, the concepts of tradeoffs and incentives, and consumer choice in the context of the market mechanism. The learning experience is based on the analysis and discussion of real-life applications that show students the pervasive impact of economics on everyday life while familiarizing them with important concepts. Competences: H1C, H5, S3C, FX. Faculty: Ludovic Comeau

HC 198
JUVENILE JUSTICE: IS IT WORKING?
Undergraduate
This course will explore juvenile justice through a sociological lens that encompasses legal, ethical, institutional, racial, gender and economic perspectives. The course will address the foundation and origin of the juvenile justice system in Illinois and its role as pioneer in juvenile justice throughout the United States. We will examine the various entities responsible for the implementation of juvenile justice including the challenges and obstacles encountered in pursuit of intervention and prevention of juvenile delinquency. A network of professionals dedicated to working with and supporting juveniles involved in the system will speak to how the key institutions interact, combat and collaborate with each other and the impact those dynamics have on the juveniles, their families and communities. The methodologies and efficacy of responses to delinquency such as punishment, incarceration, rehabilitation, substance treatment and re-entry will also be considered. The class will take on such questions as what contributes to juvenile delinquency, how is juvenile delinquency defined, how does it differ amongst communities, how did we get here and what does the future of juvenile delinquency look like in Illinois? Competences: H4, A3C, H1D, H2A
MANIFESTATIONS OF BELIEF: RELIGION VS. THE CONSTITUTION DURING THE HOLIDAYS

Undergraduate

The United States Constitution guarantees freedom of religion to its citizens. What is freedom of religion? How is this basic right interpreted? How far can the individual citizen go in demonstrating religious belief? When do the rights of the many supersede the rights of the few? These questions have been particularly prickly over the last few years when objections to the recitations by school children of the Pledge of Allegiance, and the display of religiously oriented holiday decorations have made national news. Where do you fall on these issues? Is it OK for New York City to have a big Xmas tree in Rockefeller Center? Do you mind if your neighborhood church displays a creche on its front lawn? What about the town hall? In this course, students will examine holiday displays around town and assess their relation to freedom expression and freedom of religion. Students will also consider the nature of free societies, their relationship to community values, and the ways in which difference is valued, or not valued, in contemporary American culture. Competences: H4, A1X, H2X, H3X. Faculty: Jean Richine

NEGOTIATING CONTRACTS WITH INTEGRITY

Undergraduate

In this course, we will examine the processes of managing perceptions and communicating. We will delve into the realm of analyzing our world as we perceive it and the art of entering into the realm of another's perception. We will utilize the four agreements as a method of managing our perceptions and the perceptions of others, and as an approach for communication. In learning to communicate with others we will utilize a technique called matching. We will examine the development of contract law. We will cover the basics of contract formation: offer, acceptance and consideration. We will identify which contracts require to be in writing. We will examine the remedies available when a contract is breached. We will review various examples of contracts to evaluate the practical application of what we learned. We will put our basic understanding of contract law and our acquired negotiation skills to use by participating in a contract negotiation as a final class project. Competences: A3X, H1D, H3D, FX. Faculty: Patricia Rocco

MANAGING A CONSULTING PRACTICE

Undergraduate

This course presents the fundamentals of management as applied to the consulting profession. It introduces consulting in the following disciplines: strategic management, information technology, financial management, marketing and distribution, E-Commerce, operational management, human resources, knowledge management, change process management, production and performance improvement, total quality management, companies in transition, small business development and the public sector. This course is divided into five parts: (1) Management Consulting in Perspective; (2) The Consulting Process; (3) Consulting in Various Areas of Management; (4) Managing a Consulting Firm and (5) Developing Consultants and the Consulting Profession. Students will closely examine the consulting industry by looking at associated costs and fees, barriers to entry, implementation of projects, assignment management, action planning, marketing, quality management, how to expand internationally, the issues facing international expansion and how to structure a consulting firm. A total of 20 cases including Harvard and Stanford cases will be reviewed which will provide a broad range of topics and critical thinking pertinent to current management consulting. These cases will illustrate major practice areas of consulting and afford new insights into change processes and other management issues facing consulting firms. Competences: H1X, H2C, H5, S3F, FX. Faculty: Elmer (Pete) Lewis

LIVING AND WORKING IN A GLOBAL ENVIRONMENT

Undergraduate

This course will address dilemmas and opportunities that individuals may encounter as they work or study in multicultural and global environments. The purpose of this course is to increase the effectiveness of individuals in identifying, understanding and managing cultural differences in the workplace as well as outside of it. A variety of learning methods will be used, including lectures, readings, case studies, videotapes, critical incidents, and small group research and presentation. Guest speakers will be invited to share their experiences with the class. Competencies: E1, E2, FX, H5. Faculty: Miriam Ben-Yoseph

LL 300 is a prerequisite for this class.
HC 204
CULTURE AND GENDER
Undergraduate
Oftentimes we make decisions without giving the process much thought. We often do not ask ourselves why we decided to do ?A? rather than ?B?? If we did, we would probably discover that culture and gender has a lot to do with the choices we make. Like an iceberg, nine-tenths of our culture is submerged from our conscious awareness. This hidden part of culture is made up of the forces that influence our understanding of the world, our place in it, our identity, our experiences and our values. The same can be said about gender. Culture and gender affects our family, the way it is structured; as well as social and political institutions such as schools and courts; the economic systems that govern the way we feed, clothe and care for our community and ourselves. Culture and gender informs our understanding of right and wrong, the way we understand power and how it is assigned, used and expressed. In this course students will gain knowledge on how culture and gender is defined; how we view men and women and our assumptions, expectations, of them; and explore how our cultural make up influences these assumptions and expectations. Finally, students will consider the role culture and gender has played in their own lives, as well as, the importance it has had thus far. Students will gain this knowledge about these themes through in-class activities, journaling, assigned group activities, readings, class lectures, guest presenters, documentary films and field trips (TBA). Competences: H4, H1B, A3X, FX. Faculty: Lu Rocha

HC 205
NONPROFIT MANAGEMENT
Undergraduate
Nonprofit organizations are central to American society, performing social tasks carried out in many other countries by religious and governmental institutions. Particularly in the last twenty years, the nonprofit sector in the U.S. economy has grown rapidly in size and significance. Today there are over 1,300,000 nonprofit organizations registered with the Internal Revenue Service; approximately 6.5 percent of the national income is generated by these entities; and, it is estimated that Americans annually provide 20.3 billion hours of volunteer time. Employment in the nonprofit sector has grown by 3.3 percent each year since 1977, reflecting the nation's confidence in, and reliance upon, these institutions. While the tradition of altruism has a long history in America, recent expansion dwarfs these past accomplishments. Notably, the burgeoning of these enterprises has been accompanied by increased scholarship and academic training in the field of nonprofit management. In 1990 there were 17 U. S. universities that offered 3 or more graduate courses in the management of nonprofits; by 1996 there were 76. This upsurge of interest in the study of philanthropy, voluntarism and not-for-profit activity has generated a wealth of quantitative and qualitative data, as well as enhanced attention to curriculum and training for those working in agencies. Drawing upon these materials, this course will explore the American approach to the management of nonprofit organizations. Topics will range from issues of leadership to those of operational implementation. Basic concepts, research and theories on nonprofit organizational behavior will be introduced to assist students in learning principles and techniques for developing and managing financial and human resources. The contrasting roles of staff, volunteers, managers and trustees will be examined to develop an understanding of how, in the American system of nonprofit management, each contributes to framing and achieving a nonprofit organization's mission. Competences: H1X, H2X, H3X, H5, FX. Faculty: Ellen Benjamin

HC 206
GROUP PROCESS AND FACILITATION SKILLS
Undergraduate
Whether we're good at it or not, and, whether we like it or not, we are fairly likely to live, work, and play with groups of people. How we live, work and play in and with them is one of the essential ingredients to satisfying and beneficial relationships. This course explores the field of group processes and dynamics - the study of how groups of people engage with one another and the impact that they have on productivity, effectiveness and personal satisfaction. Using case studies, simulations, role plays, and individual work, social, and familial experiences, we will examine the foundations of human interaction and the basic processes that drive and shape our behavior vis-a-vis others. We will also explore the impact that our behavior has on group effectiveness and solidarity, and design and practice with ways to increase group effectiveness and cohesion. Topics include the stages of group development; issues of inclusion, power, influence, control and openness; group decision making; managing differences within the group; leadership; enhanced group performance; group process interventions; and group facilitation. Competencies: H2D, H3D, L7, FX. Faculty: Anthony Colantoni

HC 207
MEDIASMART-UNDERSTANDING AND DEMYSTIFYING AMERICAN MEDIA
Undergraduate
This course will focus on the principles of media literacy, with a secondary emphasis on media's effects on society, culture and the individual. We will learn how to analyze, evaluate and create messages in a variety of media channels (television, newspapers, magazines, internet, radio, etc.) and formats (news, entertainment, advertising, etc.). We will learn about the business of media, its role in a democracy and how it represents gender, race, social class and sexual orientation. We will read books and articles; view television programming; examine newspaper and magazine articles; analyze websites. Students will “deconstruct” media in order to better understand how messages are constructed and designed to influence their attitudes, beliefs and behaviors. The course is designed as an interactive learning experience, where students and the instructor learn from one another. Students will leave the course more savvy about American media and the thousands of messages that are communicated to them everyday. Competences: FX, H2G, H4, A2X. Faculty: Dorothy Balabanos
HC 208
THE HEART OF THE ENTREPRENEUR
Undergraduate

Entrepreneurs are an integral part of a thriving economy yet the aspects of successful entrepreneurship remain a mystery. This course takes a detailed look at the characteristics of successful and unsuccessful entrepreneurs, enabling the students to acquire a personal understanding of what it takes to start a new business venture. This course is interesting, fun and rewarding especially for those interested in starting their own business. Ed Paulson is a Silicon Valley insider, successful entrepreneur and published business book author. Competencies: A-2-X, H-3-C, F-X. Faculty: Ed Paulson (www.edpaulson.com)

HC 209
USING FINANCIAL INFORMATION
Undergraduate

This course introduces the student to the principles of financial theory and the world of finance. The course covers several concepts and surveys the roles of relevant institutions. In the conceptual part, students will learn about financial instruments and techniques used in financial decision making (time value of money, cost of capital, capital structure). In the survey of relevant institutions’ roles, the students will form a basis for understanding causes and effects in the changing global environment. The interrelationships between decisions of business, financial institutions and individuals will become evident, enabling the student to better understand current events in finance. Competencies: H1C, H2X, H5, FX. Faculty: Ramiro Atristain

HC 210
PRINCIPLES OF MARKETING AND RELATION TO ORGANIZATIONAL LEADERSHIP
Undergraduate

This course will provide a better understanding of both the principles of marketing and the importance of organizational leadership in successfully executing a marketing program. We will learn both marketing principles and practical applications within a commercial organization. The main objective is to provide "non-marketers" with an overview of the marketing function, the construction and development of a marketing plan, and an understanding of how the marketing department must integrate itself within the organization. Additionally, we will gain a better understanding of organizational leadership and followership strategies for humanizing both the workplace and the marketing department. Pre-’99 Competencies: HC-F, WW. BA’99 Competencies: H-2-D, H-2-X, F-X. Faculty: Terry P. Mollan

HC 211
LIVELIHOOD, WORLD TRADE, AND FOOD SECURITY
Undergraduate

The creation of corporate wealth affects the livelihood and well-being of millions of people. In this course we examine what guides corporate decisions, and whether or how they are supported by political structures or institutions. We start out by developing a notion of social and individual welfare and discuss corresponding ways of living and working. Equipped with this perspective we analyze the values implicit in the global economy, and how it structures people's daily working and living. We examine what it means to work for one of the corporate giants, and how international trade organizations have created an invisible government that affects the sovereignty of nations and their citizens. In particular, we investigate how the agbiotech industry ties the power of genetic engineering to the mandates of a global financial system. The question whether we have the wisdom to play God and reshape the essence of life underlies our discussion of transgenic food production. This course requires substantial amounts of readings, three short response papers, and a presentation that is part of the final paper. Competencies: H4, H5, S3E, A4; students with a Work Studies Focus Area can also sign up for an FX (equivalent to F3, F4, or F5). Faculty: Mechthild Hart

HC 212
GLOBAL LEADERSHIP
Undergraduate

Leading global and domestic organizations requires understanding, appreciating and managing the impact of culture and the interplay of cultural patterns in everyday interactions. To be successful, leaders must be able to interpret complex cultural contexts and develop intercultural competence, not only in themselves but in the people they lead and the other organizations they work with. Developing intercultural competence is an ongoing endeavor that requires stretching one’s thinking to adopt new cultural perspectives regarding others’ values, attitudes and behaviors. But it is not an end in itself: intercultural competence is the basis for successful social interactions and business communications, which are especially important in today’s “flat” world. Global Leadership at Home and Abroad? will explore the demand for and ways to develop this distinct skill set among leaders so they can establish communities and initiate change across diverse groups of stakeholders. Competences: A3F, H1A, H5, FX.
HC 213
THE UNITED NATIONS AND INTERNATIONAL CORPORATIONS
Undergraduate
The United Nations and International Corporations. Video conferences with the United Nations and University Panamericana in Guadalajara, Mexico. In this course, SNL students will explore today’s major global business issues with experts at the United Nations and discuss these ideas with students at University Panamericana in Guadalajara, Mexico via video conferencing. Global business discussions will cover corporate responsibility, labor rights, human rights, the economic crisis in Europe and its impact on the U.S., global poverty and related issues. Competencies: H5, H1C, FX. Faculty: Pat Szcerba in the SNL classroom and Ambassador Kamal at the United Nations.

HC 214
SOCIAL AND THE FAMILIES, PLOTTING THE FUTURE
Undergraduate
In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, Single parents, and Blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1960s. In this course, learners will pursue the following questions: What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality and religion? Is the two parent family necessary? What role do grandparents and great-grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future? Competencies: H4, FX, A3A, H2F, H3B. Faculty: Kenya Jackson

HC 215
WHO’S LYING TO YOU NOW?
Undergraduate
The purpose of education, said the authors Neil Postman and Charles Weingartner (“Teaching as a Subversive Activity”) is to give students a built-in “crap detector.” Do you have one? And if you do, is it sounding shrilly night and day? This class will offer students several frameworks for critical thinking and media literacy. We’ll look at who is lying to you and where the lies are coming from. We’ll look at prominent sources of messages from the worlds of advertising, politics and public life. We’ll look at topics such as what is a “fact,” transparency on the Internet, who gets to be an “expert spokesperson,” and how to recognize your own biases and assumptions. It may be hip to be cynical, but too much cynicism corrodes democracy and keeps us from participating in our communal life. This class will use a variety of media, lecture and visits from real experts on the subject of fraud, messaging and propaganda. Competencies: A3C, H2A, H3X, FX. Faculty: Tom Tresser

HC 216
VOLUNTEERISM IN AMERICA
Undergraduate
The purpose of this course is to expose students to the historical and contemporary state of volunteerism in the United States. We will explore the scope of volunteer activity; the variety of roles fulfilled by volunteers in nonprofit organizations and, ways to effectively recruit, train and manage volunteers. Assignments and conversations will encourage students to examine the benefits and hazards of voluntary activity from the perspective of clients and organizations. A significant portion of the learning experience in this course will take place outside the classroom. Students should be prepared to engage in experiential learning and to examine their own perspectives on volunteerism.

HC 217
THE AMERICAN FOUNDING
Undergraduate
What ideas primarily influenced the framers of the Constitution in drafting the document they did? Where did those ideas come from? How did those ideas evolve during the revolutionary, constitutional and antebellum periods? This course will explore what the framers themselves might have had in mind in crafting the founding documents, examining both the ideas on human nature and government of their intellectual forebears, the ways in which the framers applied those ideas to their own specific problems in founding the American regime and the experience of the post-founding generation in wrestling with the solution the founders devised. Contemporary debates about interpreting the Constitution tend to focus on either what the document says (“strict construction”) or how it might best be interpreted or applied for contemporary purposes (the “living constitution”). Less frequently considered are the ideas, models and images the framers had in mind about human nature and the character of government itself when they set about the task of founding the new nation. This course will review the founding documents with these issues in mind. It will begin with a survey of the major philosophical influences in the 150 years before the founding period, with excerpts from the writings of such figures as Hobbes, Locke, Montesquieu and Blackstone. Next, it will consider the framers’ own writings during the early revolutionary period leading up to the Declaration of Independence and the drafting and adoption of the Constitution. Finally, it will look at the post-constitutional debates regarding federalism, the separation of powers and slavery. Throughout the course consideration will be given to how useful these ideas are for the contemporary interpretation of the Constitution. Competencies: A3G, H1C, H4, FX. Faculty: Robert Shapiro
HC 218
THE INSTITUTION OF URBAN HEALTH CARE
Undergraduate
This course will examine the health issues of people who live in large metropolitan areas generally, with a specific concentration on the treatment of the mentally ill. We will also look at the political economy of urban health care delivery. Many cities like Chicago are experiencing an increase in the numbers of individuals diagnosed with mild, moderate and/or serious Mental Illness. Often these individuals are dually diagnosed with Substance Abuse, TB and/or HIV/AIDS. This increase brings with it the exacerbation of social pathologies such as violence and homelessness. At the same time, the health care providers are consolidating, and many community treatment facilities have closed, putting additional strain on the public health care system. We will discuss the response of several large cities to these challenges and the relative influence of their own urban economics upon that response. Each class will be devoted to discussion and analysis of specific topics. The topics will be indicated in advance for each class. The course will be conducted primarily in a seminar format, which requires that each student come to class prepared to participate in the discussion. Competences: H-1-H, H-2-A, S-3-B, F-X. Faculty: Constance Williams

HC 219
DEAD MAN WALKING: AN AMERICAN STORY
Undergraduate
Dead Man Walking, the non-fiction account of Sister Helen Prejean's experience on Death Row, has had a major influence on discussion of violence, poverty, civil rights, criminal law, and social justice in the United States. Her first hand description of accompanying a condemned man to death inspired a film, an opera, and a play. Her written work and activism have impacted decisions by Pope John Paul II, numerous governors; senators; prosecuting and defense attorneys; and families of victims and prisoners. Sister Helen has formed organizations to assist victims of crime as well as the families of the condemned. In 2011 she donated her papers to the archives of the DePaul University library. This spring, as the archive opens its first display, she will be on campus for a week to meet with students to discuss her work. In this course, we will study her work and make opportunities to spend time with her as we think through questions her works raise. Students may elect to participate in a dramatic reading of the play. Competences: A1C, H1D, H4, FX. Faculty: Susanne Dumbleton

HC 220
WORLD RELIGIONS & INTERFAITH DIALOGUE
Undergraduate
This course is an introduction to world religions and interfaith dialogue in theory and in practice. It has three broad themes moving from the general to the specific: 1) a comparative study of the five, historical religions - Hinduism, Buddhism, Judaism, Christianity and Islam; 2) a survey of interfaith dialogue? its history, objectives and methods; and 3) an exploration of the interfaith movement in Chicago beginning with the Parliament of World Religions in 1893 and ending with a close look at the practice of Interspiritual dialogue? pioneered by the late Brother Wayne Teasdale. Competences: A3X, H3X, L7, H5. Faculty: Rebecca Armstrong

HC 221
FAMILY VALUES: PARENTING IN CULTURAL CONTEXT
Undergraduate
In this course participants will have an opportunity to think about their family values and goals for their children. Individuals will first reflect on how their own ethnicity, culture, gender, social class, etc. impacted their values and self development and identity. They then will collaborate with classmates to see if there is some consensus on shared or universal values. By listening to others value choices we better understand our own values and the challenges of putting our beliefs into practice. Participants can partner to help each other plan an interaction with someone with very different values e.g. talking to a fellow parent who believes in spanking. How can we do this in a respectful way? We will use Harriet Heath's book “Using your values” to answer that question and guide our journey. Competencies: H5, FX, L7, H3B, A3X. Faculty: Dana McDermott is a developmental psychologist and certified family life educator and a member of the SNL Resident Faculty.

HC 222
LANGUAGES AND CULTURES OF THE WORLD
Undergraduate
Language - culture touches many of the most vexing and intractable contemporary sociopolitical problems, and may very well be a pathway for solutions as well. Through selected discussions, presentations, and readings, students will confront the key issues involved in language - culture. The process will focus on self-discovery as the chief method of relating to and understanding the practical ramifications of a world with a variety of world views expressed through cultural and linguistic means. Students can expect to broaden their own horizons considerably as they participate in group discussions of contemporary issues and problems. Students will select and define a specific topic for research and present findings to the group. The linguistic - cultural skills acquired through group discussion, class interaction, and guided research will equip students for practical, empathetic living in the complex multi-cultural world of the 21st century. Pre-1999 Competencies: HC-1, HC-2, HC-X. BA-1999 Competencies: H-1-E, H-1-F, H-5. Faculty: Thomas Klocek

DePaul University Winter/Spring 2013 Page 1500 of 2244
HC 223
MONEY, FINANCE, AND CRISES
Undergraduate
Money has become such an integral part of our everyday life that we take its everyday use, whether physically or electronically, for granted. Yet the reach of money goes far beyond what we experience. Money is much more involved in the inner workings of the economy through the interaction of financial markets (bond markets, stock markets, foreign exchange markets, etc.) and financial institutions (banks, mutual funds, insurance companies, pension funds, etc.). Financial markets and institutions everywhere, and particularly in the U.S., influence the trillions of dollars that flow daily worldwide. Their impact on the welfare of nations and on the capacity of the economy to produce goods and services becomes evident when one looks at the Great Recession, which started in 2008. The goal of this course is to provide a working understanding of many issues through the study of money, banking, and financial markets. Competencies: H1X, H2X, H5, S3X, FX. Faculty: Ludovic Comeau, Jr.

HC 224
UNDERSTANDING AND CREATING ADVERTISING
Undergraduate
The average American is bombarded with at least 6,000 advertising messages a day. While highly controversial, advertising is key to our consumerist and capitalist society. This course will focus on the basic principles of advertising, including media, creative development and production; the history of advertising; and the uses of marketing research to develop an advertising campaign. Students will read books, articles and view videos on advertising. They will be asked to write 2-3 short analyses of their reading assignments, and use the advertising encountered in everyday life for a series of 2-3 analytical assignments. There will also be a short paper on the advertising topic of their choice. The class will work in teams to develop and advertising campaign that will be presented during the last day of class. Outside speakers currently in the advertising profession will be invited to the class. Competencies: L7, H1C, H2G, FX. Faculty: Dorothy J. Balabanos

HC 225
DEVELOPING AND APPLYING EFFECTIVE LEADERSHIP SKILLS
Undergraduate
This course is designed to explore the research, practices, purposes and scope of leadership as a tool to develop leadership skills that will influence and inspire others. Both individual and organizational aspects will be presented and will include such areas as behaviors, ethics, communication, cultures and current practices. Emphasis will be on application of leadership theories and skill building through self-assessment exercises and case studies. Competencies: A3X, H2F, H3X, FX. Faculty: Mary Lou Lockerby

HC 226
CITY SHAPERS
Undergraduate
Chicago has been a city of “characters.” This course will examine the lives of people who have made specific contributions to Chicago and its history as entrepreneurs, politicians, social reformers, artists, builders, and spiritual leaders. Key economic, political, and social developments in Chicago’s history will form the overall framework for the study of individual contributions. When appropriate, comparisons will be made with individuals who shaped other urban centers. Students will gain a working knowledge of Chicago’s history and culture in this course, and an appreciation of the men and women who shaped the city. Competencies: A-1-X, A-2-C, H-1-X, F-X. Faculty: Timothy Hill

HC 227
FROM WORKSPACE TO PLAYSPACE
Undergraduate
Transformative learning is one of the most active new areas of adult learning practice and research. This type of learning centers on adults’ experiences of significant shifts in their perspectives, ways of making meaning, and self-concepts as they engage in new learning and sometimes disorienting life experiences. It also includes the development of new capacities and positive changes that lead to increased freedom, flexibility, and confidence. This course is for anyone who is interested in being more mindful of transformative learning opportunities in their own life, and who wants to learn to make space for transformative learning in a range of educational and organizational settings in the role of educator, trainer, facilitator or manager. This is a highly participatory course where students will learn key theories of transformative learning as they reflect on their own learning experiences, and those of their learning colleagues. In addition to their own experiential learning and reflection, students will collaboratively develop strategies to guide such learning in their own work and practice settings. Competencies: A3A, H1I, H3G, FX. Faculty: Pamela Meyer

HC 228
PRESENTATION SKILLS FOR THE WORKPLACE
Undergraduate
This five week course will introduce students to presentation skills needed in the workplace. Students will discover the importance of speaker integrity, listening habits, and audience considerations. Through practice, students develop self-confidence and competence in the mechanics of preparing and researching, organizing, outlining, and finally, delivering the presentation. Students will choose to deliver an informational or persuasive presentation. Emphasis will be placed on group problem solving and leadership communication. You may only register for one competence. Pre-'99 Competencies: HC-S, WW. BA'99 Competencies: H-3-E, F-X. Faculty: Don McKay
HC 229
CIVIL RIGHTS: A MODERN APPROACH
Undergraduate
What exactly are civil rights? Where do these rights come from and how does modern society deal with them? This course will deal with constitutional protections and safeguards currently called “Civil Rights.” We will explore the role of government in these civil rights and how that role has evolved. Students will analyze various court decisions, current events and their own experiences in order to examine the relationship between government agencies (such as police and fire departments and boards of education) and citizens. The focus of this course will be on how modern society should handle civil rights issues which involve race, gender, disability, education, employment and privacy in the 21st Century. Competencies: A-1-D, H-1-F, H-2-A, F-X. Faculty: Geri Yanow

HC 230
MINISTERING IN A WORLD OF CONFLICT AND INJUSTICE
Undergraduate
The service of faith is inseparable from the promotion of justice. In this course, students will learn about social justice issues in contemporary Africa, with particular attention to various types of conflict. Each student will also identify a social justice issue that is associated with their future ministry. They will explore that issue and examine how their ministry might address it. Particular attention will be given to specific strategies that they can put into practice. Since the process of addressing fundamental social injustices is often a lengthy and complex one, the students will learn about long-range strategic planning and the organization and management of resources. Each student will design and complete an independent learning project in this course related to their Focus Area. Through this course, therefore, students will develop and demonstrate their competence to analyze power relations among racial, social, cultural, or economic groups in Africa and to create strategies that could address those issues in their ministry. Competences: H4, FX

HC 231
ORGANIZATIONAL PROBLEM SOLVING
Undergraduate
This course will integrate theories of organizations at different levels of analysis (micro/intra- and interpersonal, and macro/organizational), and a problem-solving process that managers and executives can use to identify and resolve organizational problems. Students will work through multiple cases of organizational problems at all levels in small groups and the entire class. They will learn to apply a 4-step process to diagnose and resolve organizational problems: 1) identify the problem; 2) diagnose root causes using the “Five Whys” technique; 3) identify possible solutions; 4) evaluate solutions and choose optimal one(s), taking into consideration likelihood of success and difficulty of implementation. Students will apply basic theories of Organizational Behavior (OB), including individual (motivation, satisfaction); interpersonal (group processes) and organizational (structure, process) to the situations. Competences: H2X, H3A, H5, FX. Faculty: Beth Rubin

HC 232
LEADERSHIP ACROSS THE GLOBE
Undergraduate
What makes a good leader? Are leaders influenced and formed by time and place or are great business, humanitarian and political leaders born to their destiny? What characterizes a good leader in our interconnected world and what leadership lessons can we learn from the past? Globalization has become the buzzword of the early 21st century. To some, it is a curse manifested in economic outsourcing, destruction of the rain forest, exploitation of low-wage workers by multi-national corporations, human rights violations, and environmental degradation. Proponents, however, would argue that globalization, a phenomenon that has been going on since recorded history, has produced great benefits to many around the world. Why has a word that has been in our English vocabulary for little more than the past 40 years recently become such a polarizing term, often a focal point of hostile passions that have erupted in violent protests? What exactly is globalization? Where did it come from and who led us here? Why is it seemingly everywhere? What do we need to learn and do to thrive as citizens and leaders in the global community? These are just a few of the questions we will address in Contextual Leadership. Students in this course will examine the phenomenon of globalization, the special challenges that globalization poses to each of us, and identify and demonstrate the lessons you have learned that are relevant to the creation of your own leadership development plan. Competences: FX, H5, H1X. Faculty: Greg Gilmore
HC 233
CHRISTIANITIES: ANCIENT, MODERN, GLOBAL
Undergraduate
A close reading of the New Testament reveals a diversity of beliefs and practices that developed when people of different cultures accepted the preaching of early Christian missionaries. The engagement of later Christian communities with an even greater variety of cultures has contributed to the spread of various ideas, practices, and institutions--religious and secular--to many parts of the world. Meanwhile, local and regional expressions of Christianity reflect the influence of the cultures with which they have interacted. This course will identify some of these varied expressions of Christianity and will explore the development of "modern" culture both as a consequence of, and a reaction to, the dominant role of Christian beliefs and practices in many European cultures. We will also consider the impact of the rejection of modern values by some believers, which has led to profound divisions within many Christian denominations. The course will investigate how Western Christianity may have contributed to the various cultural phenomena that are associated with globalization. At the same time, we will also address the criticisms of globalization by many Christians and communities of Christians throughout the world. Competences: A3X, H2X, H3G, H5. Faculty: Kevin Buckley

HC 234
GREAT MILITARY ENGAGEMENTS OF THE 19TH & 20TH CENTURIES: STRATEGIES, PERSPECTIVES & IMPLICATIONS
Undergraduate
This course covers and brings into focus the strategies, perspectives, and implications of key American military engagements of the nineteenth and twentieth centuries. The specific engagements covered are the Texas War for Independence, the Mexican-American War, the American Civil War, World War I, World War II, and the Korean War. Landmark battles from the above mentioned conflicts will also be covered. These battles include the Alamo, Veracruz, Gettysburg, Meuse-Argonne, Pearl Harbor, the Battle of the Atlantic, Midway, Ploesti, Leyte Gulf, and Inchon. These engagements will be discussed and analyzed in the context of their impact on the course of American and world history, as well as in relation to their political and social ramifications. The course also explores aspects of military thought and theory, along with strategic principles of warfare. Competences: H1F, H2E, H2X, H5. Faculty: Thomas Bottum

HC 235
CHILD, FAMILY AND COMMUNITY RELATIONS
Undergraduate
This course addresses the work of caring for children from a variety of perspectives. It is designed for students currently employed or planning to work in childcare settings, and for those who want to learn more about the social, cultural, and economic dimensions of (paid or unpaid) caring work. We will therefore examine how cultural differences influence child-raising patterns, and how positive and productive working relationships with families within the context of the urban community need to take these differences into consideration. We will also discuss the many different skills and responsibilities that comprise all types of caring work, and examine why caring work receives very little public or corporate support. We will identify the values and ethical beliefs that would make it a shared social responsibility, and that would productively acknowledge the interdependence of state policies, markets, communities, and families. Competencies: A3X, H2X, H3X, H4, FX. Faculty: Mechthild Hart

HC 236
US BUSINESS AND THE POLITICS OF TRADE
Undergraduate
Understanding the relationship between U.S. business and government in the creation and execution of trade policy is more important than ever. In a period of intense economic change, financial instability and changing power structures, we should have a greater appreciation for how interest group politics affect decision-making in the United States and abroad and how policy choices are made. With the rise of emerging markets such as Brazil, Russia, India and China (BRIC), the United States and Europe no longer fully control global institutions like the World Trade Organization. The traditional key players in the international marketplace - and the businesses originating in those countries - must adapt to new challenges, opportunities and commercial flows in order to ensure successful global business. In this class, we will examine why individuals and countries engage in international trade and what are the benefits and challenges created by import and export flows. We will determine how business and government in the United States have interacted over time to create policy and adapt to changing economic realities. We will look at the challenges U.S. businesses have confronted in marketing products and investment abroad. And we will explore the programs and policies the U.S. government has adopted to address those overseas challenges, taking into consideration the priorities and ideologies of a range of domestic and overseas stakeholders. We will compare the U.S. public-private partnership model and interplay with those of selected foreign countries. Competences: H5, H2X, A3X, FX. Faculty: Marian Barell
**HC 237**  
**EFFECTIVE INTERPERSONAL COMMUNICATION IN THE WORKPLACE**  
**Undergraduate**  
This course will help students identify important dimensions of interpersonal behavior and the shapes that two-person relationships can take. Major causes of unhealthy relationships will be examined. And ways interpersonal participants can act to improve the health of their relationships will be considered. Specifically, this course will examine the role of perception in communication, the uses and misuses of language, nonverbal communication, the dynamics of interpersonal communication, and the management of conflict. The course will be a mix of theory and practice. Major concepts relating to interpersonal communication will be explained by tying them to concrete examples. Along with the required test we will read selected material from psychiatrist Victor Frankl. Three short self-assessment quizzes, covering material from the text, will be given during the term.

**HC 238**  
**LATIN AMERICA IN A GLOBALIZED WORLD**  
**Undergraduate**  
Where is Latin America as a region headed? This course will begin with an historical overview of the Latin American continent focusing on class structure, racial/cultural dominance, economic development, church-state relationships, and the role of the military in government. Students will investigate how Latin American countries are negotiating the challenges of globalization in four areas: technology, trade, migration and culture. They will assess the extent to which their institutions and international alliances facilitate or hinder individual countries to meet these challenges for the benefit of their people and their society. Competences: A3F, H5, H1E, H2E. Faculty: Barbara Kraemer, OSF

**HC 239**  
**GLOBALIZATION: WINNERS, LOSERS AND SOCIAL JUSTICE**  
**Undergraduate**  
This course begins by exploring several definitions of globalization as a contemporary system that defines and names our current world. It then focuses on major beneficial and harmful affects of globalization in four areas: societies around the world, developing nations, the United States and social justice. Topics include the role of globalization in trade, culture, local economies and multinational corporations. Students will research and discuss the beneficial and harmful aspects of globalization and examine statistics, then formulate their own informed opinions. Each module is addressed during two weeks of BlackBoard discussions: in the first week of each theme, half the class presents the beneficial aspects of globalization and the other half presents the harmful aspects of globalization. In the second week's discussion on each theme, after students read arguments from the opposite perspective, they will express and support their own analysis. The course concludes with an analysis of the affect of social justice and corporate social responsibility on globalization. Competences: H5, H1C, FX. Faculty: Patricia Szczeresa

**HC 240**  
**SOCIALLY ENGAGED SPIRITUALITY**  
**Undergraduate**  
(*NOTE: This course will be required for alumni of the ISMM alumni of the ISMM diploma program.) Transformative ministry requires that ministers develop and sustain a holistic spiritual practice that is personally meaningful. An effective personal spirituality deepens one's engagement in society and collaboration with others. In this course students will explore holistic models of spirituality for personal and social transformation. They will develop the skills necessary for collaborative ministry and for cooperation with others for the sake of integral human development. Through this course, therefore, students will develop and demonstrate their competence to explore a model of spiritual development and apply it to oneself or others and to learn collaboratively and examine the skills, knowledge, and values that contribute to such learning. (2 competencies) L7, A3B

**HC 241**  
**MINDFUL EATING, CONSCIOUS LIVING**  
**Undergraduate**  
Obesity, eating disorders, and a range of psychological distress and dissatisfaction related to physical appearance and body image are approaching epidemic proportions in our culture. Despite having more knowledge and easily accessible information about how to eat, what to eat, and when to eat, the problem is not going away. While the greatest impact of these problems is on the individual, they also affect family members, friends, co-workers, and our society at large. The obsessive search for perfection has spawned a plethora of new products and procedures in the fields of medicine, pharmaceuticals, nutrition, holistic healing, cosmetics, fitness, and food marketing, which inundate and overwhelm consumers who are eager for quick fixes at any cost. At a time when medical costs are sky-rocketing, our society is losing the battle with obesity, the number one (and most controllable) underlying cause of costly and life-threatening illnesses. The first part of this course will examine the role cultural beliefs, norms and social institutions play in this ever-increasing problem. Specifically, we will study how marketing, mass media and the advertising industry influence our beliefs and behavior and undermine our ability to make thoughtful conscious choices in general, but particularly when it comes to food choices and eating behavior. The second half of this course will be devoted to studying and utilizing mindfulness practices (meditation, imagery, relaxation, mindful eating, etc.) specifically designed to enhance awareness, provide insight, and transform our beliefs, attitudes and relationship with food. Becoming fully conscious of the decisions and choices we make about food and eating opens the door to conscious living in all areas of our lives. Competences: H2G, H3X, A3X. Faculty: Carol Friedman
**HC 242**  
**ACTING UP - USING THEATER & TECHNOLOGY FOR SOCIAL CHANGE**  
Undergraduate  
Theater and political protest. Media activists and anti-globalization. Online Flash movies for sustainable development. Hip Hop and voter registration. These are just a few of the ways art and social change are coming together. Technologists, artists and activists are blending their approaches, strategies and tools in a creative stew for progressive social change. This class will examine how social change activists are using theater and technology to achieve their change agendas. The class will: (1) Give students a foundational understanding of the principles and practices of direct action organizing, (2) Expose students to innovative and non-traditional strategies and tactics for mobilizing for social change, (3) Investigate organizations who are engaged in creative social change, and (4) Give students experience in using online features such as YouTube, SlideShare, wikis and uploading tools. Proficiency in PowerPoint and ability to learn Internet-based tools required. Competences: A3X, H1I, H2X, FX. Faculty: Thomas Tresser

**HC 243**  
**STRESS MANAGEMENT AND BEYOND: WELLNESS AS A WAY OF LIFE**  
Undergraduate  
This course begins with an examination of the role stress plays in our lives, but is primarily focused on creating wellness in human systems. In addition to exploring causes and effects of stress, students will study the connection between stress (illness)/wellness and a variety of human needs, conditions, functions, faculties, behaviors, and modes of expression. The course provides students with the opportunity to assess their placement on the illness-wellness continuum and to investigate the beliefs, behaviors, and habits that prevent them from expressing their highest potential and realizing optimal health. Classes are highly experiential and designed to introduce students to a variety of practices and techniques for enhancing awareness, managing stress and increasing overall health and wellness. Competencies: H3F, S2A, S3B, S4, FX.

**HC 244**  
**FACILITATING ORGANIZATIONAL CHANGE**  
Undergraduate  
The changing capabilities of today's companies rest in the quality and competence of all employees. Effecting change from a holistic perspective requires change agents get to the root cause of problems and consider cross-functional and interdisciplinary approaches to solving business problems. The emerging demand for effective management raises several questions: What is it that we do well or should do better? How can we be more responsive to market needs? How can we do things right the first time? How can a holistic approach to change allow more effectiveness in addressing business challenges. Through readings, case studies, lectures, discussion, guest speakers, group projects and written assignments, students will examine holistic approaches to change, assessing organizations and their external environments, manager's roles, and the implications of diversity and technology. Pre-1999 Competencies: HC-5, HC-F, WW. BA-1999 Competencies: H-2-C, H-2-X, F-X. Faculty: Ulwyn L. J. Pierre

**HC 245**  
**COMMUNITY-BASED, FAITH-BASED AND NON-GOVERNMENTAL ORGANIZATIONS**  
Undergraduate  
(*NOTE: This course will be required for alumni of the ISRF diploma program.*) During their professional ministries, students will work with or for many different types of community-based, faith-based, non-governmental and international organizations. The more students understand about how such organizations are structured and function, the more effectively they will be able to collaborate with them and carry out their own ministries. In this course, students explore different models for organizing, managing, and leading such organizations. They will examine topics related to mission, governance, accountability, and resource development. They will investigate particular opportunities and challenges that such organizations face in Africa today. Through this course, therefore, students will develop and demonstrate their competence to identify an organizational problem and design a plan for change based on an understanding of change theories or models and to use two or more organizational theories in the analysis of one's experiences in an organization. (2 competencies) H2C, H2D.
HC 246
LANGUAGE AND LANDSCAPE
Undergraduate
What is language and how do we use it? How do our languages help shape our worldview? How does language construct our landscape and how we understand it, and, in turn, how does landscape influence language? Why do we forget? or lose? languages? What is lost when a language disappears? or ceases to be spoken? What are the relationships between globalization and language? How are language and thought connected? How does language contribute to power? How are names and things and power connected? What is natural? in the world? How much have migration, colonization, and globalization changed the landscapes of the world? Why do we have the gardens we have? This class explores questions about language and its interconnection with the world; how language shapes culture; how intercultural miscommunications occur; how landscapes and unique environments have changed through immigration, migration, colonization, and globalization. In the first part of the class, we will examine living languages, as well as some of the world’s threatened and dying languages, which, if trends continue, will likely decline from 6,000 still spoken today to approximately 500 by the end of the 21st century. We will examine how language shapes our understanding of the world, and how this can vary as a result of landscape. We will explore how language interacts with landscapes in the evolution of unique and varied worldviews. In the second part of the class, we will widen our scope and consider the changes in the landscape and our linguistic understanding of the landscape. Competencies: A1C, A5, H1A, H5, H1X. Can be taken for up to 3 competences. Faculty: Michael Reynolds.

HC 247
ALL THAT JAZZ
Undergraduate
George Gershwin said that jazz has contributed an enduring value to America in the sense that it has expressed ourselves. In this course, we have an opportunity to become familiar with the figures and genres associated with classic and current jazz. Class time will include listening to recorded examples from major currents in the history of jazz. Time will also be allotted for presentations concerning the present jazz scene in Chicago, as well as the future of jazz. Emphasis will be on the values expressed in this classic art form, and the perceptions and place of jazz today. Competencies: A5, A1X, H1X, H4. Faculty: Rebecca Schwan

HC 248
THE TRIPLE AXIS: RACE, GENDER, AND CLASS IN THE UNITED STATES.
Undergraduate
We will explore how issues of race, gender, and class have intersected in struggles for equality in the United States. Our exploration will range from the struggle for racial equality to the struggle for gender equality. Stereotypical thinking, cultural and class labels, and unexamined assumptions often play a pivotal role in the power relationships that have characterized these struggles. We will look at social, political, economic, and cultural factors that have influenced our behavior and contributed to our self-perceptions and our views of others.

HC 249
NONPROFITS: A GUIDE TO A MULTI BILLION DOLLAR BUSINESS
Undergraduate
In the wake of the East Asian Tsunami, Hurricane Katrina and cuts in federal programs, the nonprofit sector has increasingly played a significant role at the local, national and worldwide level. A multi-billion industry, nonprofits provide essential services in many forms including education, enhancement of the arts and social welfare programs. This course explores the role of nonprofits in the US, the practical methods nonprofits employ and the differences in working in and managing a nonprofit organization from a for-profit venture. Using hands-on case studies and learning from nonprofit managers, students will demonstrate competencies through class participation, each student will have the opportunity to create a nonprofit business plan and examine emerging issues in nonprofit management. Competencies: H1X, H2A, S3D, FX. Faculty: Rebecca Lindsay-Ryan

HC 250
OCCUPATIONAL ANALYSIS & CHANGING LABOR MARKETS
Undergraduate
What are the elements of modern occupations, and how do they shape the development of emerging labor and educational markets? Knowing the past and present contours of contemporary work roles is crucial to judging the future shape and stability of labor and occupational markets. Students in this course learn the basic tenets of occupational analysis: The identification of work roles, their organizational or institutional function, and the potential each holds to generate or resolve conflict. We examine key current and emerging labor market conditions as a context for changing occupational and education norms and indicators. Students apply theoretical knowledge to the contemporary conditions of at least one labor market sector, analyzing selected qualities of its occupational base. Competencies: H2X, H5, S3X, FX. Faculty: Corinne Benedetto
HC 251
GLOBAL PERSPECTIVES ON WOMEN’S HEALTH: A MULTIDISCIPLINARY APPROACH
Undergraduate
Why are the risks and outcomes for breast cancer in the U.S. different for women from different racial and ethnic backgrounds? What are the factors influencing the infant mortality rate in poor countries? Do you differ from factors in the U.S? What factors contribute to high maternal mortality in poor countries? How does women's work influence their health in Viet Nam or India? Is domestic violence primarily a problem in wealthy nations? These kinds of questions have complex, and not always complete answers, and they represent the kind of inquiry undertaken in this course. We will examine health issues for women in various locations around the world, and the underlying factors contributing to these problems. By doing so, we further our understanding of how biological factors interact with behavioral, social and environmental factors to shape our experience of health, how this is related to development, and the need for social action. Learning experiences will include presentations/discussions, readings, cooperative group activities, and reflective writing. Competencies: H-5, H-1-I, H-1-B, S-2-A. Faculty: Marjorie Altergott

HC 252
TOPICS IN AFRICAN-AMERICAN HISTORY: CULTURE, PROTEST AND THE MEDIA
Undergraduate
This course will cover various topics in primarily 20th century American History from an African-American perspective. Students will be asked to participate in course discussions and read from selected articles and books in three broad areas that include the impact of African-American literature and art on American culture, resistance, protest, and strategies for political and economic change, and the historical interplay between African-Americans and the US media. Course readings will be supplemented by videos and recordings and one field experience. The course is offered for the following competencies: H-4, H-1-X, A-3-X, H-2-G, FX. Faculty: Nancy Davis

HC 253
PRAIRIE INDEPENDENCE DAY
Undergraduate
In the 19th century, Chicago evolved from a largely uninhabited wilderness to an industrial and economic center of the United States. This class will examine this evolution from the perspective of evolving public celebration in the 1800’s. Independence Day (and its ritual cousins, Thanksgiving and New Year Days) was celebrated passionately by the non-indigenous settlers of Illinois. Emerging political institutions often sponsored events on these holidays to promote their political agendas. Religious and employment related groups did this as well. Local leadership often drove the organization of local festivals with fireworks, food, fraternity, pageants, games or parades and other activities. Such holidays served to allow the populace rest, let off steam, show off and indulge appetites. However, these same gatherings were ideal for the group discussion of current events and political issues. The class will trace the mutual influence of festivals and the development of Illinois in the 1800’s. A cornerstone of the class will be a visit to a public Living History Museum, where re-enactors live the life of the period examined. This one competence class will be held for three three-hour evening classes and one Saturday six-hour class. Competences: H4, H1F, H1X, H3G, H3X, A1G, A1X. Faculty: Jill Joachim

HC 254
THE CONSTITUTION: THAT DELICATE BALANCE
Undergraduate
This course examines the U.S. Constitution as the institutional framework of our government, with primary focus on the separation of powers and checks and balances provided to prevent one branch of government from dominating our government. The constitutional tensions created by this system of government are illustrated by the Watergate and Iran-Contra scandals and by a study of the war-making powers of the Executive and Legislative branches. Students will learn through the use of lectures, student research presentations, assigned readings, and the viewing of a series of videotapes dealing with course topics. Competencies: H-1-D, H-1-F, H-2-X, F-X. Faculty: Jack Moran.

HC 255
DIMENSIONS AND IMPACTS OF CULTURAL DIVERSITY
Undergraduate
This course offers the opportunity to question the meaning of individual and group differences, and to assess and diagnose related social problems while investigating ways to address and, hopefully, consider solutions for them. Students will review critical issues such as those of social power, privilege, and aggressions impacting diversity. Students will develop and apply leadership skills along with multicultural competences in career development as well as counseling and advocacy in difficult social situations. They will have the opportunity to share their experience or knowledge in one or more key areas of diversity. The emphasis is also on assessing the implications of one's cultural origination, gender issues, sexual orientation and more. Students will gain and demonstrate the competences through classroom projects and activities, weekly written assignments, and discussions. Competences: H1X, H3H, H4, H5, FX. Faculty: Joseph Janvier
HC 256
FUNDRAISING FOR NONPROFITS
Undergraduate
This course will provide students with an overview of the core concepts and skills involved in creating a not-for-profit organization's development program. This will include discussions on how one develops, implements and assesses a strategic fundraising plan. The purpose of this course is to help students: Increase knowledge of the ethics and philosophies of fundraising; Gain information regarding the methods utilized to raise funds for not-for-profit organizations; and, develop an understanding of how to manage the nonprofit fundraising process. Field trips and guest speakers will provide opportunities for students to meet people active in grant writing and grant making. Each student will write a funding proposal during the course. Competencies: H1X, H2X, H3X, FX. Faculty: Ellen Benjamin

HC 257
PARTICIPATION AND DEMOCRACY IN AMERICA
Undergraduate
This course studies a famous question of American democratic theory: why don't more Americans participate in the political process? Different forms of participation will be discussed, with a primary focus on voter turnout. We will investigate some famous proposed answers including individual scarce resources, social-psychological factors and legal-institutional barriers. Special attention will be paid to inequalities in participation and the ongoing 2008 elections. Students will have the option of participating in the latter as one of the course competencies. Competences: A3A, H3A, H4, S1A. Faculty: Zachary Cook

HC 258
MULTICULTURALISM AT SCHOOL: WHAT YOUR CHILDREN LEARN ABOUT WORLD CULTURE
Undergraduate
Possible topics include: 1) The difference between traditions and values; 2) How schools handle multiculturalism; 3) How kids grasp “difference,” and 4) Defining the dominant culture and discussing how it handles new, or minority values. Competences: H4, H1X, H3X, S2X. Faculty: Jean Richine

HC 259
CHICAGO POLITICS: IT “AIN’T BEAN BAG!”
Undergraduate
Forget the Cubs. Forget the Sox. Forget the Bears, the Bulls, the Blackhawks. Politics is Chicago’s number one spectator sport. That’s because politics in Chicago touches almost all aspects of city life from trash collection and parking to social services, taxes and cultural festivals. Chicago’s politicians are often flamboyant and entertaining, although sometimes corruptible figures. (Since 1972, 28 aldermen have gone to prison.) Chicago politicians both delight and enrage voters and are constant ?front page? news. This course will introduce Explore Chicago students to Chicago’s political institutions: City Hall, the city’s system of 50 wards, its current aldermen and women, its city council, its mayor, its elections, and its raucous history of scandals and reform movements. Students also will debate contemporary political/social issues which come before the Mayor and City Council during the Autumn Quarter. Students also will explore the history and exploits of some of Chicago’s most memorable mayors and political ?bosses? from Long John Wentworth, who guided the city during the civil war; Carter Harrison I, who presided over the 1893 Columbian Exposition; Big Bill Thompson, who encouraged and protected bootleggers; reformer Anton Cermak who stood as a ?reformer? against the mob, only to be assassinated; Ed Kelly who rebuilt the Democrat ?machine? during the 1930s Depression and 1940s War Years, and built the subways; ?Boss,? Richard J. Daley, who directed Chicago’s post-war building and highway boom that made Chicago into a national urban ?model;? Jane Byrne, the city’s first and only female mayor, who beat the ?machine? of which she was once a prominent member; Harold Washington, Chicago’s first and only African-American mayor, who brought a sense of racial justice to the city after decades of discrimination; Richard M. Daley, whose public works and ?education reform? agenda elevated Chicago to ?world-class? city status; to Chicago’s newest mayor, elected in the spring of 2011. Competences: A3X, H1C, H2F, H4 Faculty: R. Craig Sautter

HC 260
THE CHRONIC ILLNESS EXPERIENCE: PERSONAL, MEDICAL AND PUBLIC PERSPECTIVES
Undergraduate
Through readings, observation and analysis, interviews, and reflection, students examine the internal experience of chronic illness as well as the challenges patients with chronic illness face in the workplace, the community, and within institutional health care settings. Students are asked to examine ethical issues involving class, socioeconomics, and social justice as they pertain to biological understanding of chronic illness, and are also asked to evaluate organizational and community responses to chronic illness in an effort to promote respect and tolerance for patients with chronic illness. Competences: H4, H2B, FX, S3B. Faculty: Laurie Edwards & Lynn Royster
HC 261
THE JOURNEY OF LEADERSHIP THROUGH ANCIENT GREEK LITERATURE
Undergraduate
Leadership is a journey. Odysseus, a well respected leader in the ancient Greek literary world, portrays leadership in the Trojan War that can be used today. To read Homer's Odyssey as a high school student is to read an adventure story; to read it as an adult student is an opportunity to read it as a story of a personal journey of leadership. Reading ancient epic literature such as Homer's Odyssey in a leadership course allows the student to read through the lens of leadership, pulling contemporary lessons and ideas from this classic epic. This course provides an opportunity to read, reflect and discuss the many lessons that can be found in classic literature. A close reading of Homer's Odyssey, along with other articles on myth, archetypes, and leadership theories and practices, will allow the student to align their current leadership practices to ideas formed by Homer and expand their thinking in the arena of leadership. Reflecting on these readings, along with some structured journal exercises, will create alignment between what is often thought to be ?old? text, generating new ideas on how leadership lessons can be applied to contemporary issues. The student will be able to apply these ideas to various leadership roles at work, at home or in their communities. Competences: A1X, H1X, H3X, FX. Faculty: Lori Neblung

HC 262
INTRODUCTION TO ARCHITECTING SYSTEMS
Undergraduate
This course teaches general principles, approaches and ways of thinking about architecting and building complex systems such as buildings, computer systems, aircraft, telecommunications networks, development methods and similar systems. We will use a combination of lecture, discussion, storytelling, experiential simulation and student-driven inquiry. Competencies: A5, FX, H2C, H2X, A1C, A1X, S3F, S3X. Faculty: Daniel Starr

HC 263
CIVIL RIGHTS: FORCES AND COUNTER-FORCES SHAPING AMERICAN SOCIETY
Undergraduate
The civil rights movement of the 1960s resulted in a radical shift in the way American society defines itself. Almost forty years later, race and gender relations remain controversial legal and political concerns in our society. This course will explore the historical factors which led to the civil rights movement and analyze the landmark laws and court decisions that regulate our race, gender, and employment relations today. Team-taught by sociologist Pat Ryan and attorney Susan Alvarado, students will examine the social, legal and philosophic underpinnings of the federal anti-discrimination laws and the realities that shape our civic and business lives. Competencies: A-1-D, F-X, H-1-F, H-2-A, H-4. Faculty: Pat Ryan

HC 264
GLOBAL CAPITALISM: BENEFITS, CHALLENGES, AND DANGERS FOR THE 21ST CENTURY
Undergraduate
In this course, students will seek to understand global capitalism and explore how it developed and its impact on their careers and communities in the 21st century. We will begin by charting the historical development of capitalism from a local phenomenon in Renaissance Europe to today's multi-national corporations operating in a global marketplace. Topics for discussion will include the growing interdependence of national economies, how interdependence causes one nation's economic problems to affect others, and the problems inherent in attempting to regulate multi-national corporations. Finally, this course will compare the dangers of global capitalism with its opportunities within the context of social responsibility. Pre-1999 Competencies: HC-2, HC-3, HC-X, WW. BA-1999 Competencies: H-1-C, H-1-F, F-X, H-5. Faculty: David A. Steiger

HC 265
BLACK WOMEN IN THE CHURCH AND SOCIETY
Undergraduate
We will explore the religious, social, economic, and political history of African American women. This history will be analyzed within the context of the Black Christian Church and the role it plays in shaping the views of spirituality and leadership among African American women. Focus will be placed on the intersection between religious involvement, spiritual development, and social change. Students will discuss how these factors impact the African-American woman's perception of herself and how these perceptions influence her involvement in the fight for social justice. We will use readings, discussion, short papers, oral presentations, a take-home midterm exam and a research paper. Competencies: H4, H1F, H2A, H3B. Faculty: Cynthia R. Milsap
HC 266
ELECTION 2012: DEMOCRACY IN ACTION
Undergraduate
The 2012 Presidential Election is upon us. Its significance will be far reaching both in the United States and around the world. Students in this course will examine the process of democracy and its significance and importance to their lives and their futures. The 2012 Presidential Election will serve as the background for the practical application of concepts learned. A variety of learning strategies will be utilized including independent and group research, debates and video presentations. The course content will review the history of elections and political campaigns in the United States and abroad. The role and impact of the media in the decision making process will be evaluated. Campaign financing, interest groups and voting methodologies will be analyzed. A variety of learning strategies will be utilized including independent and group research, debates and video presentations. Competences: H1X, FX, H4, A1X. Can only be taken for one competence. Faculty: Mark Enenbach

HC 267
WORKPLACE LAW: HARASSMENT, DISCRIMINATION AND CIVIL RIGHTS
Undergraduate
This course focuses on laws affecting relationships between employers and employees and within the workplace. Students will study the historical and societal aspects of laws on harassment and discrimination within the workplace, with particular focus on the Civil Rights Act and various other legislation regulating harassment and discrimination in the workplace. Students will analyze the case law, the legislation and the legal systems that have evolved to combat social injustice in the workplace and will learn ?best methods? for preventing and resolving harassing and discriminatory practices in the workplace. Competences: FX, H4, H1D. Faculty: Jana Berger

HC 268
WOMEN'S WORK
Undergraduate
Feminist Carolyn Heilbrun says, "Each cycle of progress for women seems to end after a decade or two with precious little real advance toward equality. The complacency in women that a few steps induces drains the movement of its energy. Progress halts or is reversed." This course will test Heilburn's statement by asking students to study and discuss questions that particularly affect women, both personally and professionally. The course will chart women's progress, or lack of it as seen in the works of historians, sociologists, novelists, and journalists, both men and women. Each student will choose one subject area for intensive study and will present individual papers or cooperative panel reports to the class. All students will gain access to the sizable and significant body of literature concerning women's roles, rights, and achievements.

HC 269
PARENTS: PARTNERS IN EDUCATION
Undergraduate
What's up with schools? The statistics speak for themselves: Fully one half of big city high school students do not graduate. For a good number of those who do finish high school, their reading and math skills are well below grade level. They are not prepared for college; nor are they prepared for the work world. Teachers have also come under a great deal of scrutiny and criticism. Students are tested and evaluated, but how is the work of teachers assessed? Parents, for the most part, have been ignored. In this course, students will consider the current state of the US K through 12 education system, and will confront the three elements of student success: learners, teachers, and parents. This is a service learning course. Students will work with schools to learn how parents might contribute, and why they have become silent partners in the educational process. Students in this course will employ interviewing and questionnaires to research questions in educational success. Competences: H2H, H2B, H1X, A3C. Faculty: JoAnn Gesiakowska

HC 270
VIOLENCE: A GLOBAL PERSPECTIVE
Undergraduate
To successfully reduce and prevent violence requires both a global and local understanding of its conditions, costs and causes, focusing on those most at risk: children, women, and minorities. The globalization of violence will increasingly require local prevention efforts to be interconnected with national and global effects. This course will prepare students to understand both how particular social factors relate to perpetrators/victims of violence, and the roles of social institutions. Each class will include computer-generated audio-visual presentations, student presentations, and discussions.
HC 271
WOMEN'S PSYCHOSOCIAL DEVELOPMENT
Undergraduate
This course focuses on how adult women change, grow, and develop in light of psychological and social-cultural forces that interact in their lives. We consider how core concepts such as self-in-relationship, transition and change, and ways of knowing play out in various aspects of women's lives. In exploring different pathways of development for women, we will draw on the life themes of students in the course as well as on theories and models that help identify unique patterns of women's psychological development (alternatives to male-based theories of adult development). This interactive course emphasizes group discussion and guided reflection. Pre-1999 Competencies: AL-D, HC-4, HC-C. BA-1999 Competencies: H-3-A, H-3-B, H-3-C. Faculty: Catherine Marienau

HC 272
MODERN AFRICAN HISTORY
Undergraduate
Recently, the continent of Africa created a special attention and a rapidly growing interest among Americans and around the world. This course provides a great opportunity to study Modern Africa. It is a study designed to provide a clear and objective understanding about Africa's recent political past: the coming and growth of European colonialism and its impact on Africa's political, economic, cultural, and social development. It covers the partition of Africa, Africa's early resistance against foreign occupation and the independence movement. This course will examine the post-colonial nature of governance, civil wars, human rights abuses, refugee-ism, politics of international aid and Africa's role in global political events and US foreign policy on Africa. This course will briefly discuss the historical contributions of nationalist leaders like Jomo Kenyatta, Julius Nyerre, Kwame Nkrumah, Sedar Senghor, Ahmed Ben Bella, Nelson Mandela, Samora Machel, and Patrice Lumumba. It is a few weeks voyage of discovery and lifetime knowledge to treasure. Students will be actively involved in group projects and individual research assignments. In addition to required and suggested readings, students will learn from documentary films and guest speakers. Truman Bridge Course. Can be taken for up to 3 competences. Competencies: A1H, H1F, S2X, H5, H1C. Faculty: Anghesom Atsbaha

HC 273
REFRAMING ORGANIZATIONS
Undergraduate
We are surrounded by organizations of varying size and purpose. The workplace from large corporations to small-entrepreneurial companies, non-profit organizations, the spiritual community, and academic institutions all provide ample opportunities for failure in communication, effective management, and a thriving workforce. This course identifies the various strategies, tactics, and solutions that have been successfully employed to understand and resolve organizational problems at the levels of both theory and practice. Each of the solutions offers a particular perspective on organizational life with a focus on organizational structures, human relationships, political processes, and organizational symbols. Competences: H2C, A3D, FX, H3X. Faculty: Michael Shapiro

HC 274
THE BILL OF RIGHTS IN CONTEMPORARY LIFE AND WORK
Undergraduate
The Bill of Rights is that part of the Constitution that protects you from undue and unwarranted governmental regulation and interference. Learn how your rights of free speech, privacy and association in the workplace, on the street and in your home are secured by the first ten amendments to the U.S. Constitution. What does the government allow you to say and do in the presence of fellow workers? How safe is your home from police searches? Are there limits to whom you are allowed to associate with on a public street or even in the privacy of your own home? This course will deal with these and similar questions. Along the way, we will learn about the history and theory behind the adoption of the Constitution, how judges and lawyers interpret the Constitution, in particular the Bill of Rights, and what role the Constitution plays in the debate over the significant legal and social issues of our day, such as abortion, the death penalty, gay marriage, and physician-assisted suicide. We will read and discuss political theory, the Bill of Rights and actual court cases. Competencies: H-1-D, H-4, F-X, H-5. Faculty: Fred A. Welsch

HC 275
AMERICA IN BLACK AND WHITE: BUILDING BRIDGES
Undergraduate
In his 1997 Inauguration speech, President Clinton described racial division in the United States as a curse while affirming at the same time that our racial diversity is the wealth of this country. How do we as an ethnically and racially diverse country go about the business of understanding and healing the wounds of racism and building bridges that will allow the gift of diversity to flourish in the United States? Further, what are the connections among U.S. racism and other forms of racism such as ethnic cleansing and "pacification programs" aimed at indigenous people around the world? In this course, we will explore the historical, economic, and political roots of racism globally and nationally. In addition, we will look at the changes brought about by the civil rights movement and ongoing work in the nation and in Chicago aimed at bridging the gaps caused by racism. We will also explore both black and white novelists, poets, commentators, and scholars such as Ralph Ellison, Adrienne Rich, paul Laurence Dunber, Cornell West, Peggy Macintosh, bell hooks, Gwendolyn Brooks, and others. Through discussion, readings, films, debates, guest panels, and field excursions, students will study a variety of topics. Because the course will focus not only on analysis, but on building bridges, the instructors hope to enroll an ethnically and racially diverse class membership.
Small groups exist in organizations for many reasons. Some are formally created, permanent bodies for information sharing, decision making and problem solving. Others are ad hoc groups organized to deal with specific issues. Employees often form their own informal groups to share information. Regardless or origin, all groups exhibit similar patterns of behavior and encounter similar problems. With proper training, groups can accomplish far more than any individual members on their own. This course will examine how communication develops and is sustained within small groups, the dimensions of group character, and the effects of group character on communication. We will use a mix of theory and practice to analyze case studies, participate in group decision-making exercises and review the required text. Competencies: H-2-X, H-3-D, F-X. Faculty: Robert W. Mills

This course examines the stresses and complexities in the planning and implementation of law enforcement in America today. Students will consider the purposes of legal standards and will engage in critique of contemporary systems and issues. In addition, care will be taken to better understand the myths and realities of criminal behavior today, the role of incarceration, and the toll on society and law enforcement officers as well. The goal of this course is to assist students in building bridges of understanding in today's highly charged socio-political world characterized and fueled by competing standards and goals, and to consider their roles in the development of a just society. Competences: A4, H2X, H3X, S3X. Faculty: William Wassner

This team-taught course is about race relations in America and around the world. We will engage in productive and thorough discussion of the socio-economic, political, cultural and psychological aspects of human relations, with special attention to the existing relationships between the dominant and minority groups in America. Each class session will focus on a particular institutional base for discussion: political systems, extremist groups, communities, religions, families, schools, to name a few, using readings, film, guest speakers, and current events to bear on the issues raised. Competencies: F-X, H-2-A, A-3-C, H-4, H-5. Faculty: Anghesom Aatsbaha

This course is designed to increase your knowledge of the concepts and strategies of project management through the introduction and discussion of factors specific to the international environment. Topics will include cross-cultural collaboration, coaching across borders, global communication, global project leadership and integration of traditional project management techniques with global dimensions and issues. The format will include opportunities for class discussion and application of principles, lessons learned and best practices. Competences: H2X, H5, L7, FX. Faculty: Mary Lou Lockerby

This course will address the work of raising children from a variety of perspectives. It will examine how cultural differences influence certain child-raising patterns, and how they relate to or may come in conflict with established social rules and regulations. Practical ways of establishing and maintaining positive and productive working relationships between child care workers and families will also be addressed, and what kind of community resources are available within an urban setting. This course will also discuss the many skills and responsibilities which comprise the (paid or unpaid) work of raising children or "motherwork." Although motherwork is of vital importance to society, as "typical women's work" it receives little public or corporate support. The values and ethical beliefs associated with motherwork, and what they mean in terms of individual experiences and social support will therefore also be examined. Validating individual experience, expanding knowledge, and developing critical and analytical abilities are some of the objectives of this course. We will achieve these objectives by discussing and critically analyzing readings, by evaluating our own experience in light of the course material, and by engaging in dialogue and conversation with each other. Participation, the keeping of a learning journal, doing the readings, and writing a final 5-6 page essay per competence are the main requirements of this course. The first half of this course will be held at Truman College and the second half at DePaul's Loop Campus. You can register for a total of three competencies since this course runs for a semester. Pre-'99 Competencies: HC-A, HC-C, HC-F, AL-F. Faculty: Eileen Brittain; Mechthild Hart
HC 281
CULTURE AND POLITICS OF THE 1960'S
Undergraduate
The period from the late 1950s to the early 1970s represents a turning point in "the American century." Opinions differ through on the meaning of the sixties. Was it a period of cultural renaissance, moral decay, civil war, or something else entirely? This course attempts to assess the significance of the 1960s by looking at some key movements in culture and politics, including the civil rights movement, Vietnam war, hippie counterculture. We will read essays and excerpts from King, Carmichael, Wolfe, Mailer, McLuhan, Sontage and others to track the emergence of new social critiques focusing on the corporate state, patriarchy and the mass media. Through lecture, discussions, and films, students will study a significant individual or movement and demonstrate their expertise through a paper or presentation. Competencies: A-1-H, H-1-F, H-2-A, H-4. Faculty: John Kimsey

HC 283
GENDER, WORK AND FAMILY: EXPERIMENTS IN WORK-LIFE BALANCE
Undergraduate
How have people balanced the demands of work and family? What role has politics played in this history? This course develops students' understanding of issues in the history of gender, family, and work through historical and contemporary accounts from Europe and the United States. We will take a close look at issues such as the gender division of labor, child labor, government policies on maternity, social and political movements. Course materials include historical documents, lectures, films, and varied readings. Assignments will include essays, reflection journals, discussion, and a research project on work-life balance. Competences: H5, H2X, A1X. Faculty: Sara Kimble

HC 284
EXPERIENCING SUSTAINABLE SOCIETIES THROUGH THE UNITED NATIONS AND IN GERMANY
Undergraduate
This program takes students to the United Nations three-day conference for NGOs ? Sustainable Societies: Responsive Citizens ? in Bonn, Germany and then the group will travel to Berlin, the capital of Germany and a major center for environmental innovation. More than 2,000 people representing some 500 NGOs from more than 100 countries are expected to attend the Sustainable Societies conference. Students will attend lectures and dialog with world experts in sustainability from governments, United Nations agencies and NGOs. By exploring Berlin through guided walking and bus tours, meetings with government experts and visiting historical institutions, students will gain insights into Berlin?5 leading efforts in creating a sustainable city. This Fall Quarter course will begin with online readings and discussions and some on site lectures in the Summer Quarter 2011. After the travel to Germany, students will have two classroom follow-up sessions in September and conclude with peer and faculty edited assignments posted online. SNL students may choose from the following competences: H5, H2A, H2B, H3A, A1B, FX; advanced students have the option of taking this study abroad course for Externship and/or Advanced Electives (pre-requisite: Research Seminar and mentor approval), for a total of 3 or up to 4 (if Externship is 2) competencies. Please contact Faculty directors, Pat Szczerba at pszczerb@depaul.edu or Susan McGury, smcgury@depaul.edu for more information.

HC 285
WOMEN'S VOICES IN PEACEMAKING
Undergraduate
Across the planet, as forces for war, terrorism, empire, and ecological destruction have gained more strength, there has also been an upsurge in the spiritual, cultural, political, and social leadership of women for peace and justice in response. For example, in just the last 20 years, there has been a demographic shift in the United States of gender majority attending law schools and seminaries. Women's voices from Ireland to India, from Peru to South Africa are shaping a new vision for the future that take into account class, race, gender. What is the impact of women's collective role on our future here and internationally? This course examines a variety of women's voices of the personal and political, of the spiritual and the social, and explores the possibilities of a new and emerging power dynamic for women. We will read the excerpts and works from current and past women leaders in peacemaking, such as Dorothy Day, Barbara Epstein, bell hooks, Dr. Helen Caldicott, Arundhati Roy, Mary Daly, Pema Chodron, Barbara Eck, Marilyn French, Maread Corrigan Maguire and others; hear guest lectures from women active in practicing peace locally and globally; and experiment with tools designed to develop interpersonal and community peacemaking. Instructor: Maureen Dolan. Tuesdays, Loop Campus. Competencies Offered: A-1-B, H-1-B, H4, H-5.

HC 286
PSYCHOLOGY FOR MANAGERS
Undergraduate
This course reviews theories and tools of psychology as applied to work environments, including group interaction, productivity, communication issues, motivation, as well as the impact of individual and organizational dysfunction and pathology. Competencies: F-X, H-2-D, H-3-A, H-3-C. Faculty: Michael McMillan
HC 287
DEVELOPING COMMUNICATION COMPETENCE IN CROSS-CULTURAL SETTINGS
Undergraduate
This course is designed to acquaint students with the unique elements of communication present in cross-cultural transactions and to aid students in navigating successfully through these interactions. Over the course of the semester, students will learn to be self-reflexive about their experiences as members of a society in which diverse work teams, international travel, transnational work environments, the Internet, and widespread immigration of groups and individuals are part of contemporary reality. We will examine traditional elements of the communication model (sender, receiver, message, feedback, context) in terms of cultural, social, and psychocultural influences. To this end, students will explore cultural values, perception, nonverbal communication, high and low context communication, individualism, collectivism, challenges of diverse organizations and work teams, protocol and negotiation across cultures, barriers to effective cross-cultural communication (the "isms"), culture shock and mindfulness. Students completing this course will acquire practical skills to apply in reducing anxiety and uncertainty in cross-cultural interactions and, importantly, students will learn to recognize ethnocentrism and rise above it in the creation of community. Competencies: A3F, H1A, H5, H3X

HC 288
UNDERSTANDING HUMAN RESOURCE AND DEVELOPMENT
Undergraduate
This course in Human Resource and Development will address careers that improve human performance in organizations. Human Resource Development provides the framework for helping employees develop their personal and organizational skills, knowledge and abilities. Participants will learn how to analyze the performance needs of organizations, helping to facilitate change through interventions that increase competencies, communication and motivation. Course content will include the design and delivery of instruction that provides performance support for adults, and they will learn how to assess and evaluate the impact of performance interventions. Other topics covered will be individual development, employee training, career development, performance management and development, coaching and mentoring, and organizational development. Competences: H2X, H3X, H5, FX. Faculty: Melinda Orzoff

HC 289
PSYCHOLOGY FROM AN AFRICAN-CENTERED PERSPECTIVE
Undergraduate
The field of psychology has a legacy of viewing people who are different from the Eurocentric white male norm, e.g. people of African descent, as deficient and/or deficit. What if the behavior, attitudes, and thoughts of African-Americans were viewed from their own cultural perspective? How would they be understood? This course will utilize an African-centered framework to examine salient themes in psychology---identity, development, education, and therapy/healing---as they pertain to African-Americans. Students will become familiar with this theoretical perspective and its historical and contemporary scholars. Guest lecturers, readings and discussions, in-class exercises, a collaborative and associated individual project, and a learning journal will comprise the learning experience. Competencies: A-3-E, H-1-F, H-3-A, H-3-B. Faculty: Derise E. Tolliver

HC 290
THE DISABLED IN THE COMMUNITY
Undergraduate
In this course the student will define and analyze disabled populations in several categories including, physical disabilities, learning/cognitive disabilities and emotional/mental disabilities. Social and Behavioral disabilities including Addictions, HIV/AIDS, and Domestic Violence will be considered for review. The basis for consideration of these populations is to assess effect(s) that the disability has on the ability of said persons to acquire and maintain productivity in the community and to determine what interventions and services those persons need to be healthy and empowered to the greatest extent possible. Initial class sessions will consist of descriptions of disabilities within several categories, role play and evaluations of selected case studies and a (CIP) Community Integration Plan for these cases. A professional disability advocate will address the 6th class session. Class sessions 7 and 8 and 9 will consist of individual reports to be determined based on students' interests and competencies. All students will be required to produce a journal. 70% of the journal is prompted with a weekly worksheet and 30% is student customized. Occasionally the instructor will impose a (pseudo) disability on students for the purpose of enhancing empathy. Participation is voluntary. Competences: A3X, H4, FX, S3X. Faculty: Andrea Sanders
HC 291
PARTNERSHIP POWER: HOW TO BE A HUMAN BEING
Undergraduate
How can we contribute to a culture change from violence to non-violence? How can we partner better with family members, work colleagues, and as planetary citizens? How can we be at peace with ourselves and be active for positive social change? Where are partnerships working in the world? How have dominator practices affected our lives in gender, color, ethnic origin, sexual orientation or other types of oppression? How can partnership practices lead to fuller humanness? This course is about learning the tools, values, structures, inspiration and scientific basis for partnership and integrating them into our lives. In our personal and planetary lives we face many crises. Today many important thinkers believe we have reached a bifurcation point for human evolution? do we continue down paths of destruction or do we take hold of ourselves with cooperation and peace? This course offers collaborative ways to examine the joys, skills, values, and knowledge of partnership development. Being a human being with good partnership skills can be productive and fun! We will explore the Cultural Transformation Theory put forward by macrohistorian and social scientist, Riane Eisler, to compare the dominator and partnership paradigms in several aspects of our lives - self, family, work, national community, international relations, nature, and spiritual reality. Using the Partnership/Domination template in theory and practice, we will investigate the concepts, functions, and expressions of cultures based on cooperation and peace versus those based on control and violence on a continuum. We will look at the dominator aspects of gender, color, ethnic origin and sexual orientation and other cultural oppressions and compare with the partnership model. This course provides a way to understand the large transformations taking place on our planet and in our lives. Competences: L7, A3F, H1E, H2H. Faculty: Maureen Dolan

HC 292
LANGUAGE AND LANDSCAPE
Undergraduate
In this course we will investigate the significance of physical landscape to human imagination and language. It is frequently assumed that human minds somehow exist "above" the physical universe, but our perspective unifies the two. Through written course materials and assignments, some lecture and intensive classroom discussion, we will go beyond the dualism of classical philosophy to a more grounded view of cultural creation, seeing art, myth, and survival itself as products of place. Students will work with the idea that cultural artifacts are communicating a relationship to the land, and our coursework helps us determine its precise nature. This is a five-week course. You can register for only one competence. Pre-'99 Competencies: HC-1, HC-F. Faculty: Corinne Benedetto

HC 293
LAW AND THE WORKPLACE
Undergraduate
This course will examine the interrelationships between our economy, business and the practice of law. It will also examine contemporary legal issues in the world of work. Students will examine the structures of the legal community and the impact it has on how business is conducted, and on the economic system in which we live and work. Through readings, discussion, and group projects, students will investigate the interfaces of law, with an emphasis on torts and employment law, as well as current issues which have evolved as the practice of law has become a big business itself. Students will develop and evaluate plans individually or through group interaction for applying new insights to effecting change in their own working environments. Competencies: F-X, H-2-C, H-2-A, H-1-X. Faculty: Russell W. Hartigan

HC 295
UNDERSTANDING THE "HUMAN" IN HUMAN RESOURCES
Undergraduate
Human Resource professionals hold a diverse set of responsibilities, some of which are designed to respond to the human needs of employees. Addressing these in the context of the work environment requires an understanding of human behavior, insight into the effects of social issues on the workplace, knowledge of mechanisms and resources for problem resolution, and effective communication skills. Students will participate in group exercises and discussions designed to help develop and practice strategies for problem resolution based on increased self-awareness and empowerment. A primary textbook and related readings as well as two field assignments, self-reflective journaling, and a final integrative paper are required. Course assignments are designed to support integration and application of new skills and knowledge. Pre-1999 Competencies: HC-B, HC-U, WW. BA-1999 Competencies: H-3-D, H-3-G, F-X. Faculty: Carol Friedman

HC 296
LESSONS OF HISTORY
Undergraduate
Does history ever repeat itself? What lessons has our past taught us in planning for the future? This course will focus on an examination of the social, economic, and environmental changes that occurred in America during selected decades of the 20th century. Students will compare and contrast the 1920s with 1960s and 1930s with 1950s looking for major events, trends, and policies that repeated themselves in the subsequent generation, as well as fundamental political and economic structures. Students will share their findings and learn techniques for integrating information to form a basis for rational forecasting of future trends. Pre-'99 Competencies: HC-2, HC-3, HC-E, HC-G. BA'99 Competencies: H, H-1-F, H-1-C, H-1-X. Faculty: Jo Ann Gesiakowska
HC 297
GLOBAL STUDY OF SEX AND OPPRESSION
Undergraduate
This course is designed to expose the learner to the history, context and problems within the sex industry (prostitution, pornography, exotic dancing) as it exists throughout many countries of the world. Our foundation for discussion needs to be based in theory, of which we will discuss: functionalism, interactionism and conflict perspective and how each defines the sex industry. Next, we will explore the various definitions, levels of social acceptability (necessity) and the importance of laws that have defined this industry and our perceptions. Furthermore, we will discuss the religious, socio-cultural issues that allow for certain elements of sex work to flourish in places such as Bangkok, Thailand, the United States, and various parts of Europe. Also, we will discuss the legal acceptability of certain sex work activities within the countries discussed. Within our discussions / research of the sex industry, we will attempt to formulate answers to the controversial issue of legalization versus discrimination. Pre'99 Competencies: HC-3, HC-A, HC-P. BA'99 Competencies: A-3-C, H-1-C, H-2-A, H-2-E, H-5. Faculty: Elizabeth Beardmore.

HC 298
CONNECTING WITH AFRICA: CULTURAL AND SOCIAL ISSUES IN EAST AFRICA
Undergraduate
This travel course will introduce students to two East African countries, Kenya and Tanzania, where they will have the opportunity to get first hand information on Cultural and Social Issues in accordance with their selected competencies. This is a new course which is being developed in response to SNL students' interest and requests expressed over the years to have an option to visit and study in Eastern Africa. This course fits well in DePaul University's Vision 2012, GOAL ONE in section 1c, which states that there is a need to educate all students for an increasingly globalized world?. Students will have the opportunity to study issues of cultural/economic/social/political interest as they manifest themselves in the USA, in Kenya and in Tanzania, and in comparison to the USA. Intensive study in Chicago and onsite in Kenya and Tanzania will give students a unique opportunity to reflect on and then compare and contrast what goes on in their own country and in these two East Africa countries. This program can help the students and faculty as they seek to become more informed, responsible and effective global citizens. Again DePaul's Vision 2012 states in Goal Two: ?Prepare students to be socially responsible future leaders and engaged alumni.? One of the main aims of this course therefore is to give students the opportunity to engage in passionate conversation with Kenyans and Tanzanians on issues of justice and peace, politics and social services in order to raise their consciousness on these global issues that face humanity in East Africa and in so many other parts of the globe today, in similar ways but also in different ways. Competences: A1D, A1H, A3E, H5, H3B, H1H, E1, E2, L10,11 (LEX), FX

HC 299
ASSESSING AND MANAGING CONFLICT
Undergraduate
Our usual method for presenting, analyzing, and resolving conflicts has centered around legalistic argument; the goal being to discover the "right" answer and suppress the "wrong" ones. However, the multiple worldviews operating in the world today make such an approach to conflict less viable. Reflecting this reality, ways of communicating about and resolving conflict have arisen that go beyond enforcement of rules or legal determinations of right and wrong. In this course, we will look at various methods for handling conflict and consider how we might apply them to personal, work, community and literary conflicts through lecture, small group work, role playing, reading, various written projects, and discussion. Competencies: H-3-D, F-X, L-7. Faculty: Staff

HC 313
IMPLEMENTING EFFECTIVE TRAINING IN ORGANIZATIONS
Undergraduate
Everyone has had the delightful experience of learning by accident, of being surprised at insights and skills that emerge from experience. But accidental learning can be time-consuming and costly to organizations and individuals who have specific learning goals to meet. Engaging and effective learning in organizational settings is most often the product of systematic analysis and planning. This course will introduce a detailed protocol for designing training experiences in a variety of adult training settings. The five stage protocol (Analysis, Design, Development, Implementation, Evaluation) provides a context for students to address the following questions: Who is the audience and what is the training context? What is to be learned and why? What methods are best suited to the learning outcomes? What resources are available and appropriate to the learning outcomes and methods? At the end, students will be able to distinguish training design from development and implementation; describe characteristics of adult learners and their implications for training; define desired learning outcomes based on training context and audience; determine teaching / learning methods suited to particular training situations; and, identify and describe resources to support achieving learning outcomes. Students may register for only one competence. Pre-1999 Competencies: HC-F, WW. BA-1999 Competencies: F-X, H-2-X. Faculty: Noreen Powers

HC 314
AGE OF DICTATORS: TOTALITARIANISM IN THE INTER-WAR PERIOD
Undergraduate
This course will examine the age of dictators in the inter-war period by focusing on the principal individuals, institutions and societies involved. Root causes of totalitarianism will be developed, as well as an understanding of its impact, effectiveness, and relationship to democratic societies. Students will be stimulated to contemplate ethical and religious aspects of the despots' rule, and will comprehend the period within the larger framework of 20th century history. Competences: H1F, H2G, A3C, A4 Faculty: Chuck DiCola
HC 315

RACE, PLACE AND SPACE: ENVIRONMENTAL JUSTICE IN THE TWENTIETH CENTURY

Undergraduate

This course will provide a survey of historical and contemporary forces (social, cultural, technological, scientific and economic) which have led to the global emergence of environmental inequalities in societies during the last century. This course will also show how the environmental ethics of a society (national and international) as well as their notions of who belongs to the larger body politic have contributed to environmental inequalities in national and international geographic spaces. This course is an excellent elective for business, education, religion, sociology/anthropology and science/engineering focus area who seek to understand the foundations and ramifications of human ethics, values and culture on decisions and policies which impact the global environment (or ecosystems). Competencies: A3F, S3E, H4, H5 & FX. Faculty: Sylvia Hood Washington, MSE, Ph.D., ND

HC 317

METHODS OF DISCIPLINE FOR TODAY’S CHILDREN

Undergraduate

In today’s world, a lack of discipline can cause children to become non-productive members of society. Raising children from a loving and caring perspective is more challenging than it seems to be in the past. The complexities of this world require different approaches to behavior modification. In their struggle with raising children, parents need to know a variety of methods and models that can be used to help children develop a strong personal self-esteem and to learn that discipline is best when it is made from choices and personal decisions that the child can control. This course will help students compare two models of effective behavioral modification that can be used in the home to help parents in one of the most complicated aspects of child development. Students will be responsible for implementing strategies we discuss in class as well as finding other available methods. You can register for only one competence. Competencies: L7, A3G, A3X, H3D, FX. Faculty: Tranita Jackson

HC 318

FACING HISTORY AND OURSELVES

Undergraduate

History often ignores the story of how the common person participated in its making in favor of the heroes and the outstanding individuals. The origins and evolution of the Third Reich offer a source for examining the subtleties and texture of change as well as the background which leads to the major events which mark our history. The lessons of this period address eternal questions of human behavior tendencies toward its culmination, the pressuring of peers, the need to belong, inhumanity. By using discussion, films, and readings, students will trace how individuals are shaped by social, political, and economic forces. Pre-’99 Competencies: HC-2, HC-C, HC-D. BA’99 Competencies: H-1-F, H-3B, H-2-G. Faculty: Shelly Auslander

HC 319

ETHICAL CHOICES IN A GLOBAL COMMUNITY

Undergraduate

This course will introduce ethical dilemmas which can only be resolved with an understanding of the many perspectives of the stakeholders. The reach of many current ethical issues (environmental degradation, economic inequality, racial and sexual oppression, the AIDS epidemic, famine, violence) is global. However, though the 21st century requires us to think globally, identity groups (based on culture, ethnicity, gender, power status, etc.) view the issues from dissimilar perspectives. As a result the answers to basic questions vary greatly, for example: How are the rights of the individual balanced against the good of the community? Do oppressed people deserve preferential treatment or is equality a greater good? Should immediate needs be sacrificed for long term goals? A discussion of different viewpoints expands our range of understanding of possible approaches to ethical issues that confront us as individuals, professionals, family members, community members, and world citizens. Dilemma paradigms and resolution principles will be explored suggesting frameworks for making choices. Students will work individually and in groups to explore a wide range of ethical dilemmas. Students will demonstrate mastery of the competencies with a portfolio and oral presentation of an investigation into an ethical dilemma with global ramifications. This project will require the student to examine the ethical issue from several perspectives, conduct research from a variety of sources, compare and analyze the results, and finally commit to a substantiated approach to the dilemma. Competencies: A3C, H4, H1B, A4, H5. Faculty: Roberta Lieber

HC 320

THE POWER OF PERSUASION

Undergraduate

This course is intended to provide students with a thorough understanding of how persuasion and persuasive techniques are used in the communication process of relationships, in the family, and in the world of work. Students will study the art of persuasion by analyzing the text of selected American figures and their speeches, and learn to recognize the skill sets of sending and receiving persuasive messages. Moreover, students will study the approaches, ethics, and symbols of persuasion, by exploring the great speakers and what they were trying to accomplish through language, culture, power, and knowledge. Studying the texts will also strengthen and empower the student’s strategic approaches to persuasion, both verbal and nonverbal. Competencies: H-3-D, H-3-E, F-X. Faculty: Jay Kurtz
HC 321
THE CONTEMPORARY AMERICAN FAMILY: UNRAVELING THE MYTH
Undergraduate
This course examines the societal forces shaping aspects of stable and changing family relations; both nuclear and constructed in the United States, focusing on social-structural factors affecting union formation and dissolution (traditional marriage, the gay marriage debate, cohabitation, and divorce); parenting; traditional and "queer", the gendered division of paid work, caring work, responsibility and authority; and the role of the state in supporting families. To better appreciate the depth of contemporary changes in U.S. families, we will begin the semester with an examination of colonial and 19th-century American family life. We will pay particular attention to diverse patterns of family structure and family relationships by social class, race-ethnicity, age, gender and sexuality. We will engage with these topics in a variety of ways, including student presentations, lectures and class discussion, readings, and in-class videos. Competencies: A3G, H2X, H3X, H4, FX. Faculty: Kevin Brandyon Quinn

HC 322
HUMAN SEXUALITY
Undergraduate
Institutions such as, but not limited to the State, the Courts, Religion, Marriage and Family, the military and the industrial complex (es) have used and oftentimes misappropriated human sexuality as a means of hegemony, power and control. With the use of texts, articles, film and discussion and perhaps brief lecture, this course will present variant sexualities while deconstructing and demystifying many of the long-held traditional values, ideals and customs that many in society accept as the norm. Competencies Offered: A3A, H2X, H3X, H4, FX. Faculty: Kevin Brandyon Quinn

HC 323
THE POLITICAL ECONOMY OF THE GLOBAL VILLAGE
Undergraduate
The concentration of great wealth in some countries and grinding poverty in others may be the biggest challenge facing humanity in the new century. This course will explore issues of global inequality by comparing the political and economic systems in the US, Europe, and low-income countries. Our discussions will center on the history and culture of these nations to provide a framework for understanding differences in the way each has developed technologically and socially. Theories on politics, economic programs and foreign investment will be analyzed for insights on the paths taken by successful nations and barriers facing others. Pre-’99 Competencies: HC-1, HC-3, HC-X, WW. BA’99 Competencies: H-1-C, H-1-E, H-5, F-X. Faculty: Kimberly Richardson

HC 324
DEVELOPING VIRTUAL COMMUNITY
Undergraduate
This is a one competence course designed to engage information placed on or derived from the World Wide Web from the perspectives of a variety of ethical and legal frameworks. The issues of access and expression within the context of a free society will be considered from a variety of perspectives, e.g., the religious right, the ACLU, ordinary parents, workers in a corporate world, as citizens of the United States, as members of a global society, etc. The course will not so much focus on the answers as it will raise the questions and acknowledge the tensions. A variety of source materials will be used, especially the Internet. Students should have some knowledge of navigating the World Wide Web since this class is NOT designed to provide basic skills for using the Internet. Students may register for ONE of the following: Pre-’99 Competencies: AL-F, WW. BA’99 Competencies: S-3-F, A-3-X. Faculty: John Willets

HC 325
CITY HALLS, MALLS, AND THE MEDIA
Undergraduate
Decisions are made about the communities in which we live and work on a daily basis. Understanding how these decisions are made can empower citizens to make a difference in their everyday lives. This course will analyze the relationships among government, the media and the business community in the decision-making process. First hand information will be provided through interaction with elected officials in visits to Chicago and suburban council meetings. Competencies: H1C, H4, H2C, S3X. Faculty: Mark Enenbach

HC 326
CONTEMPORARY NATIVE AMERICAN/AMERICAN INDIAN ISSUES
Undergraduate
Native Americans are part of our history and heritage, yet many Americans have little knowledge beyond stereotypes. While invisible to the mainstream, Native American cultures are surviving, thriving, and in some cases, thriving as we enter the new millennium. This course will explore the complex issues facing Native Americans today through discussion, film, readings, and Native American news media to enable students to gain a cross-cultural perspective. Students will choose an area of focus on this subject and conduct independent research to present to their classmates. Competences: H-4, H-1-E, S-3-X, A-3-C. Faculty: Arieahn Matamonasa
HC 327  
EXPERIENTAL PSYCHOLOGY: RELATIONSHIPS BETWEEN THINKING AND FEELING

Undergraduate

Personality, temperament and past experiences all contribute to the way we relate to ourselves and to the world around us. In order to experience life more fully, to manage relationships and make life decisions, we need to be aware of how these influences have affected us, then develop new options for living. Students will become familiar with liberation psychology, which integrates principles and strategies from several schools of traditional psychological thought. Emphasis is on acquiring tools for creating an identity and understanding the context from which these tools were developed. Education methods will include group interaction and experiential exercises to guide participants in developing deeper self-awareness, acceptance of self and others. Self-disclosure by participants will be welcome, but is not required for a successful learning experience. Pre-'99 Competencies: HC-4, HC-T, AL-D. BA'99 Competencies: H-3-A, H-3-C, H-3-F. Faculty: Peggy St. John

HC 328  
GENDER ROLES AND COMMUNICATION STYLES

Undergraduate

This course will bring together students and guest speakers to look at how gender-related communication has definite historical antecedents and consequences; demonstrating how past events influence present ones. One such event is the new emergence of political demands by previously silenced gender-related groups. Although our contemporary society has in its literature the varied narratives of individuals struggling for gender-related dignity and freedom, this course will critically assess these narratives from the various perspectives of its participating students. In addition, students will use their own cultural-group experiences (where cultures have distinct beliefs, traditions, attitudes, and general way of normalizing the way one should live) to demonstrate how gender roles were socially learned and socially enforced, and became a potential guide for the behavior of its members. However, societies are not static, and today gender-related groups are asking for greater individual liberty and societal rewards than before. These changes may be related to the following questions: what other social issues does gender communication intersect (e.g., race, ethnicity, nationality, class, age, sex, religion); why were various forms of gender communication more successfully silenced by society in the past; what moral or ethical considerations does gender communication raise; and should/should not a democratic society recognize these demands? Those who register for the H-2-H/HC-R competence will have the opportunity to examine the ways race, gender, and class influence the communication styles of others. Service learners will reflect on how their personal experiences differ from or resonates with those they encounter in their service work. Students will also be able to apply course readings and topics to their own personal growth and service experience. Pre-1999 Competencies: AL-P, HC-C, HC-G, HC-J, HC-R. BA-1999 Competencies: A-3-C, H, H-1-A, H-2-H, H-3-B. Faculty: Keith Armstrong

HC 329  
MALE IDENTITY IN TRANSITION

Undergraduate

This course, open to men and women, examines issues of gender with a focus on male identity. You will examine your own perspectives, attitudes, and experiences in light of psychosocial development theory, media influences, power struggles among social groups, and relationship issues in an effort to gain a greater understanding of factors that influence male identity in today's society. The course is offered in a hybrid format, meeting every other week and interacting in an online course discussion between meetings. Projects to demonstrate competence will relate gender issues in power relations in the US, the impact of media, adult development and the workplace. Competences: H2G, H3C, H4, FX.

HC 330  
ASSESSMENT AND COUNSELING: SKILLS FOR THE HUMAN RESOURCE PROFESSIONAL

Undergraduate

A rapidly-developing area of responsibility for Human Resource professionals is employee assistance programs (EAPs). Managing and implementing EAPs requires that human resource professionals have additional skills in assessment and counseling. In this course, students will learn counseling theory and assess their own personal interactional and counseling potential for possible careers in EAP counseling. Discussion topics include intervention, enabling, alcoholism and other chemical dependencies, relapse prevention, denial, constructive confrontation, and case management. Competences: A-3-D, F-X, H-3-A, S-3-B. Faculty: William Henning

HC 331  
THE JOURNEY FROM MONEY TO PROFITS

Undergraduate

If asked, most people would correctly describe our economic system as "money-based", but few people fully understand the dynamic interplay among the various "partners." Buyers and sellers, dealers and investors hold pivotal roles, but other critically important players include the Federal Reserve Board, U.S. Treasury, Congress, and the banking system. Not only is the banking system the producer of the money supply of this nation, its actions (including those of the Federal Reserve System as the central bank) influence the level of interest rates, the level of prices, and even the relative scarcity of every commodity. And then the impact of the rest of the world must be considered. Once we have ascertained the roles and impacts of the players, we will determine how individuals, families, and communities use that information to establish and revise their own financial plans. Pre-'99 Competencies: HC-3, HC-F, WW. BA'99 Competencies: F-X, H-1-C, H-2-X. Faculty: Nancy Singer
**HC 332**  
**CHANGING RELATIONS IN U.S. COMMUNITIES**  
*Undergraduate*

During the past decade, the United States has experienced a large influx of a variety of immigrant groups. This course examines relations of established residents and new immigrants such as Koreans, Latinos, West Indians, and recent Polish immigrants as well as other groups. In an already heterogeneous society such as the United States, how are new immigrants incorporated into our political, economic, and educational institutions? What impact do new immigrants have on old established communities and their residents? What are the resulting community characteristics from interaction of the new and the old? A comprehensive understanding of changing U.S. communities is imperative to a more precise definition of the “American” identity and ourselves as a nation. This course draws heavily on students’ observations as well as on the scholarly literature. At appropriate points in the course, videos, short stories and field trips will serve as a source for understanding the experiences of various immigrant groups and their relations with other ethnicities. Students demonstrate competence through participation in class discussions and activities, as well as by writing short essays. Pre-’99 Competencies: HC-1, HC-2, HC-C, HC-G. BA’99 Competencies: H-5, H-1-E, H-1-F, H-1-B. Faculty: Marisa Alicea

**HC 333**  
**AN INTRODUCTION TO MODERN CHINESE CULTURE**  
*Undergraduate*

China’s national admiration for its antiquity is similar to America’s zeal for its future. The Chinese go back to its past masters of ideas for insight on the modern world. In this course, we will explore Chinese ideas of humanity, society, and religion by examining three major schools of thought: Confucianism, Taoism and Buddhism. We will try, as the Chinese saying goes, “to see the entire leopard through looking at one of its spots.” Translated Chinese texts, brief lectures, student presentations, debates, Chinese music, films, food, Chinese paintings and calligraphy, and discussions will be used to formulate and compare American and Chinese civilization. Competencies: H-1-F, H-1-E, A-3-E, H-5, F-X. Faculty: Joseph Liang

**HC 334**  
**THE BUSINESS OF US HEALTH CARE IN A CHANGING ENVIRONMENT**  
*Undergraduate*

This course will provide students with a foundation on the various dimensions of today’s health care system to include how it operates and is managed. This course will examine the interactions between insurance companies, the U.S. government and health providers to the delivery of quality care to the individual. The overview will include the structure of health care system segments, demographics and context of differentiation in the delivery of medical care. Students will improve their knowledge and skills in thinking critically through healthcare-related issues, successfully understand the concepts presented and discuss the ethical contexts of the decisions that businesses, government agencies and decision-makers consider when addressing health care. Key activities will entail research, analysis, and identification of best practices. Students will analyze the financial and economic health care decisions at a national, community and business level. Competences: S3X, H1X, H2X, FX. Faculty: Araceli Esquivel

---

**HCI 201**  
**MULTIMEDIA AND THE WORLD WIDE WEB**  
*Undergraduate*

An introduction to the World Wide Web and web development for non-technical majors. Students will create web pages using a WYSIWYG editor. Students will evaluate web sites using a variety of analytical and empirical methods. Students will conduct technology-related experiments following the principles of the scientific method and use technology to analyze their results. Topics include web-based technology, creating content for distribution on the web, and design principles for web sites. Students will develop an appreciation for the connections among science, mathematics, and technology in modern society, as well as for the principles guiding advances in science and technology. PREREQUISITE(S): NONE.

**HCI 271**  
**FORMATTING DIGITAL PAGES II**  
*Undergraduate*

This course builds on HCI 270 with problem-based application of perceptual and communication principles in developing effective multi-page screen environments. Includes experience with more sophisticated visual software. PREREQUISITE(S): HCI 270.

**HCI 302**  
**FOUNDATIONS OF DIGITAL DESIGN**  
*Undergraduate*

Shape, line on two-dimensional surfaces. Color. Composition rules as they apply to digitally created documents. Digital manipulation of two-dimensional images. Use of commercially available draw and paint tools to create two-dimensional designs. PREREQUISITE(S): None

Graduate standing is a prerequisite for this class.
HCI 312
ANALYSIS AND DESIGN FOR HUMAN-COMPUTER INTERACTION
Undergraduate
(Formerly HCI 300) User and task analyses that emphasize an early focus on users and their environment. Stresses methods that lead to successful communication and teamwork. PREREQUISITE(S): HCI 210.

HCI 341
USABILITY ISSUES FOR ELECTRONIC COMMERCE
Undergraduate
(Cross-listed with ECT 341) Design, prototyping and evaluation of e-commerce web sites. Context of usability in the project development life cycle. User/task analysis with emphasis on the first time and the infrequent user. Content organization. User testing with low fidelity prototypes. Aesthetics and appeal. Students' projects involve design and/or evaluation of actual electronic commerce sites. PREREQUISITE(S): HCI210 AND IT223.

HCI 350
USABILITY IN COMPUTING SYSTEMS
Undergraduate
Application of psychological theory to the design of computer systems, with emphasis on web sites. Overview of applicable research methods. Sensation, cognition, decision making, Display and control design. Overview of workspace design including biomechanics, work physiology, stress and workload. PREREQUISITE(S): HCI 210.

HCI 402
FOUNDATIONS OF DIGITAL DESIGN
Graduate
Shape, line on two-dimensional surfaces. Color. Composition rules as they apply to digitally created documents. Digital manipulation of two-dimensional images. Use of commercially available draw and paint tools to create two-dimensional designs. PREREQUISITE(S): None

CDM graduate students in the PreReq Phase are restricted from registering for this class.

HCI 406
WEB SITE DESIGN FOR HCI
Graduate
Web design introduced in a user-centered context. Application of visual design principles and common design patterns for web sites and mobile interfaces. Page markup using HTML and CSS addressing responsive web design, accessibility, and search engine optimization. PREREQUISITE(S): None

CDM graduate students in the PreReq Phase are restricted from registering for this class.

HCI 422
MULTIMEDIA
Graduate
Multimedia interface design. Underlying technological issues including synchronization and coordination of multiple media, file formats for images, animations, sound and text. Hypertext. Information organization. Survey of multimedia authoring software. Topics in long distance multimedia (World Wide Web). Students will critique existing applications and create several multimedia applications. PREREQUISITE(S): HCI 440 or consent of the instructor.

CDM graduate students in the PreReq Phase are restricted from registering for this class.

HCI 423
INTERNET MULTIMEDIA
Graduate
(Cross-listed as ECT 423) Design and prototyping of multimedia applications for delivery via the Internet. Survey of low-bandwidth file formats for images, sound, and animation. Bandwidth reduction techniques and tools. Discussion of client side and server side allocation of responsibility. Authoring tools. Students will create and evaluate several small applications. PREREQUISITE(S): HCI 440 or ECT/HCI 441.

CDM graduate students in the PreReq Phase are restricted from registering for this class.
HIC 430
PROTOTYPING AND IMPLEMENTATION
Graduate
Introduction to creating executable prototypes for interactive systems. Overview of modern user interface programming tools. The emphasis is on creating testable prototypes and evaluating them using technologies such as VB.NET and Access. Both stand-alone and Web-based applications are addressed. Students create a prototype for a predefined system, evaluate the prototype, redesign the system as necessary, and convert it to a final working system. Students prepare written documents describing their activities and present the final results to the class. PREREQUISITE(S): IM 230 and HCI 440.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

HIC 432
USER-CENTERED WEB DEVELOPMENT
Graduate
Analysis, design, and development of interactive web sites. Advanced application of HTML and style sheets for user-centered design. Survey of client-side technologies for interactive Web use. PREREQUISITE(S): IT 130.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

HIC 440
INTRODUCTION TO USER-CENTERED DESIGN
Graduate
The user-interface development process. Introduction to methods for practicing user-centered design including user and task analysis, user interface design principles and testing using low-fidelity prototypes. PREREQUISITE(S): IT 130 or Graduate Standing.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

HIC 445
INQUIRY METHODS AND USE ANALYSIS
Graduate
This course provides students with the skills necessary to acquire and organize user information for the purpose of developing task and systems analyses. Topics covered include survey construction and administration, structured observation, interviewing, and participatory design. Students learn to evaluate and organize user information toward making analysis and design decisions. Human communication and presentation skills are developed. PREREQUISITE(S): IT 223.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

HIC 450
FOUNDATIONS OF HUMAN-COMPUTER INTERACTION
Graduate
Application of engineering and psychological theory to the design of computer systems. Overview of applicable research methods and research on perception, cognition, errors, and screen design. Attention will be given to creating and applying guidelines derived from research. PREREQUISITE(S): IT 223.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

HIC 454
INTERACTION DESIGN AND INFORMATION ARCHITECTURE
Graduate

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
**HCI 460**  
**USABILITY EVALUATION METHODS**  
Graduate  
Survey of evaluation methods that can be applied to user interfaces. Methods include expert inspections, walkthroughs, usability testing and analytical approaches. Students evaluate existing systems by applying some of these methods. PREREQUISITE(S): IT 223 and HCI 440.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

**HCI 470**  
**DIGITAL PAGE FORMATTING**  
Graduate  
Problem-based applications of perceptual and communication principles to the presentation of on-line and off-screen pages. Includes experience with industry standard vector, raster and formatting software. PREREQUISITE(S): HCI 402, ART 105, or equivalent.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

**HCI 511**  
**ACCESSIBILITY AND DESIGN FOR DIVERSE USERS**  
Graduate  
Methods and principles for designing interactive technologies for diverse users, including children, elderly, and people with disabilities and alternative skills. Analysis of how current technologies address diverse user needs and considerations about how technologies might be improved to better meet diverse user needs. Class projects include a web accessibility evaluation based on current w3 standards and an in-depth research project in which students ideate a new technology or evaluate an existing technology in which they work directly with people who have disabilities. PREREQUISITE(S): HCI 445 (HCI 460 recommended)

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

**HCI 512**  
**DESIGNING FOR VISUALIZATION**  
Graduate  
Sources of graphical integrity and sophistication. Data-Ink maximization. Data density. Color and information. Effective use of space and time. PREREQUISITE(S): HCI 440 and HCI 460.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

**HCI 513**  
**DESIGN/STRATEGIES FOR INTERNET COMMERCE**  
Graduate  
(Cross-listed with ECT 555) An integrated study of design, technical, and strategic issues for Internet commerce. Web analysis, design and publishing. Visual, textual and content organization, response time, usability testing. Authorizing tools and administering web server. Internet database servicing. Internet service providers and pricing. Digital cash and encryption. Impact on the value chain, intermediation, and market structure. Strategies for mass customization, interactive marketing, and support for collaborative work. PREREQUISITE(S): ECT 353 and IS 422, or HCI 430, or advanced standing in another program.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

**HCI 514**  
**GLOBAL USER RESEARCH**  
Graduate  
Theories and approaches for conducting HCI research and creating digital media for international audiences. Varied topics include (a) cultural models and global differences that influence design of digital artifacts (b) approaches to conducting usability and other types of user research and (c) information communication and technologies for development (ICT4D). PREREQUISITE(S): HCI 445 and HCI 460

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
**HCI 520**
**LEARNER-CENTERED DESIGN**
**Graduate**
Design and evaluation of technology-based learning systems. Theories and models of human perception and cognition as they apply to learning, instruction and training. Application of established principles for analyzing and designing learning systems. Projects include evaluating existing learning systems and the creation of a learning system. **PREREQUISITE(S):** IT 223, HCI 440 and HCI 450

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

---

**HCI 521**
**DESIGNING FOR CONTENT MANAGEMENT SYSTEMS**
**Graduate**
Design and development of Web sites using common database-driven content management systems (CMSs) and publishing tools such as those used to manage blogs, community portals, and other content-heavy websites. Discussions of how familiarity with CMS tools assists the role of the user experience designer. Visual design and theme customization using prior knowledge of CSS. Taxonomy systems, installation of add-on modules, and user management using today's widely used systems.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

---

**HCI 530**
**USABILITY ISSUES FOR HANDHELD DEVICES**
**Graduate**
This seminar will cover the theoretical and practical issues of usability for handheld devices (cell phones and PDAs). Students will analyze how restricted displays and input modalities constrain applications on these platforms, and how these constraints factor into the design process. **PREREQUISITE(S):** HCI 440 and HCI 430 or CSC 418.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

---

**HCI 580**
**USER EXPERIENCE DESIGN PRACTICUM**
**Graduate**
Working with clients, students choose and practice appropriate methods learned in the HCI foundational courses to address business goals and user needs. Course coverage includes best practices for consulting, effective communication with clients and coworkers, understanding business and organizational needs, and setting realistic goals and expectations. Prerequisites: HCI 445 and HCI 454

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

---

**HCI 590**
**TOPICS IN HUMAN-COMPUTER INTERACTION**
**Graduate**
HCI topic varies with offering. Contact instructor for more information. **PREREQUISITE(S):** Completion of the HCI core courses or consent of the instructor. May be repeated for credit.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

---

**HCI 594**
**HUMAN-COMPUTER INTERACTION CAPSTONE**
**Graduate**
HCI 594 provides an opportunity for students to apply all of the skills they have learned on one comprehensive project. Multidisciplinary teams design, evaluate, and implement a user interface intensive project. Students prepare written documents describing their activities and present the final results to the class. **PREREQUISITE(S):** Completion of the HCI core courses or consent of the instructor.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
**HCI 599**
**INDEPENDENT STUDY**
**Graduate**
This is an independent study course. PREREQUISITE(S): Completion of the HCI core courses and consent of the instructor. May be repeated for credit.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

**HCI 690**
**RESEARCH SEMINAR**
**Graduate**
PREREQUISITE(S): Instructor consent.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

**HLTH 201**
**INTRODUCTION TO HEALTH SCIENCE**
**Undergraduate**
This course introduces students to the B.S. in Health Sciences undergraduate program. The course aims to introduce students to the range of disciplines (biological, sociological, psychological, cultural) found within this program, and how each contributes to our understandings of both health and illness. This will allow the students to better understand the nature of health care delivery and the methods that will best improve the health status of both individuals and the population.

A Health Science major is a prerequisite for this class.

**HLTH 202**
**HEALTH RESEARCH LITERACY**
**Undergraduate**
The purpose of this course is to provide students in the Health Sciences Program the methodology and skills required for literacy in health, and to comprehend the results of health sciences research. In this course students seeking careers in the health sciences will go beyond the health literacy level suggested for the general public in preparation for professional practice in clinical, policy, administrative, and basic science fields.

A Health Science major is a prerequisite for this class.

**HLTH 210**
**INTRODUCTION TO PUBLIC HEALTH**
**Undergraduate**
This course is designed to lay out the concepts, principles, and case outcomes of public health practice. It outlines theories of health, illness behavior, and health education. It considers community health data source, classical intervention approaches, and the planning and evaluation of community health interventions.

HLTH 201 is a prerequisite for this class.

**HLTH 310**
**SOCIAL EPIDEMIOLOGY**
**Undergraduate**
This course is designed to serve as the foundation for the study of factors that affect the health and illness of whole populations. It lays out the concepts, methods, and key findings related to the distribution of morbidity and mortality, i.e. illness and death afflicting identifiable segments of the population. It is the cornerstone of public health research. The overall perspective is that health and disease are caused by a range of factors and that social factors play a critical role in shaping a person's exposure to risk of illness and death.

HLTH 201 is a prerequisite for this class.

**HLTH 350**
**HEALTH SCIENCES CAPSTONE**
**Undergraduate**
The Senior Capstone will bring students from both concentrations in the Health Sciences Program together in an opportunity to share biomedical and psycho-social perspectives in an examination of current health issues.
HLTH 380
TOPICS IN HEALTH SCIENCES
Undergraduate
Upper level course focused on a specific topic in Health Sciences that involves reading of primary literature and discussion.

HLTH 399
INDEPENDENT STUDY
Undergraduate
INDEPENDENT STUDY

HON 100
RHETORIC AND CRITICAL INQUIRY
Undergraduate
This course covers the fundamentals of research and leads students through a sequence of writing assignments which require them to take positions and persuade audiences about issues of public concern. Students will create effective academic discourse, develop critical thinking skills, explore issues of form and style, and examine arguments. HON 100 is required for all Honors students. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 101
WORLD LITERATURE
Undergraduate
The focus of Honors 101 is the way writers use language to construct their worlds. Reading, writing, and informed discussion are at the heart of this course, which uses texts from a range of cultures and historical periods to explore how literary works represent issues of human importance.

Membership in the University Honors Program is a prerequisite for this class.

HON 102
HISTORY IN GLOBAL CONTEXTS
Undergraduate
With the goal of enhancing historical literacy and critical thinking, this course invites students to explore how the interdisciplinary tools of historical inquiry aid them in their encounter with the multicultural past through study of a particular society or societies. Students discover how historians extract meaning from primary and secondary sources while exploring the problems and issues involved in analyzing and using a variety of sources. Topics of this course vary and are set by the faculty. Each section of HON 102 will be subtitled to indicate its topic; please see the schedule for current offerings.

Membership in the University Honors Program is a prerequisite for this class.

HON 104
RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
Undergraduate
This course focuses on the collective construction of cultural reality and examines people's confrontation with the sacred as a formative instrument in this process. The overriding concern of Honors 104 is with the meaning and function of culture as a system or world that we inhabit. This world with its distinctive concepts of ultimacy, time, space, cosmos, and life passages is created and enacted through myths, narratives, and ritual performances. Students will develop analytical skills necessary to apply theoretical explanations and interpretations to the process of constructing cultural reality. All sections of the course will involve a field experience in which students enter the world of a community which is not part of their own experience.

Membership in the University Honors Program is a prerequisite for this class.
**HON 105  
PHILOSOPHICAL INQUIRY  
Undergraduate**

Providing an introduction to philosophy as a mode of inquiry, this course explores, from a variety of perspectives, the questions central to the human condition, placing philosophical positions within the context of human values. Students will address the themes of knowledge, action, and human identity, considering how one thinks critically about such questions and what it means to inquire about the human condition in a rational manner. Readings will be drawn from both primary philosophical texts and relevant material from other disciplines.

Membership in the University Honors Program is a prerequisite for this class.

**HON 110  
HONORS DISCOVER CHICAGO  
Undergraduate**

Honors Discover Chicago courses acquaint first-year Honors students with the metropolitan community, its neighborhoods, cultures, people, institutions, organizations and issues. Students will also learn about university life and resources and will become acquainted with the Honors scholarly community. Work in HON 110 includes observation, participation, readings, site visits, discussions, and writing. The course begins with an immersion week one week before the start of the autumn quarter; classes continue to meet through the autumn quarter, ending on the same date that LSP 110 courses are completed. Students will select a particular Honors Discover course from the available offerings. All Honors students must take either HON 110 or HON 111. Students entering the Honors Program after completing LSP 110 or LSP 111 should not take Honors 110. Honors Discover Chicago courses are offered during autumn quarter and are available only to first-year students in the University Honors Program. Formerly HON 111.

Membership in the University Honors Program is a prerequisite for this class.

**HON 111  
HONORS EXPLORE CHICAGO  
Undergraduate**

Honors Explore Chicago courses acquaint first-year Honors students with the metropolitan community, its neighborhoods, cultures, people, institutions, organizations and issues. Students will also learn about university life and resources and will become acquainted with the Honors scholarly community. Work in HON 111 includes readings, lectures, site visits, discussions, and writing. Students will select a particular Honors Explore course from available offerings. All Honors students must take either HON 110 or HON 111. Students with credit for 110 cannot receive credit for 111. Students entering the Honors Program after completing LSP 110 or LSP 111 should not take Honors 111. Honors Explore Chicago courses are offered during autumn quarter and are available only to first-year students in the University Honors Program. Formerly HON 110.

Membership in the University Honors Program is a prerequisite for this class.

**HON 180  
DATA ANALYSIS AND STATISTICS  
Undergraduate**

Using real-world data and open-ended investigations from a variety of disciplines, students apply quantitative and statistical reasoning skills to focus on outcomes of analysis. Students will explore the nature and description of data, probability theory, sampling, variability, estimation, analysis of correlation, hypothesis testing, and experiment design to become critical users of quantitative information. Open only to students in the University Honors Program.

LSP 120, MAT 130 or placement by test is a prerequisite for this class.

**HON 201  
STATES, MARKETS, AND SOCIETIES  
Undergraduate**

This course focuses on the organization of economic, political and social relationships within the global system, including analysis of how these relationships affect the distribution of power, resources, well-being and cultural capital in different societies. It covers such topics as phases in the growth of global trade and investment; the role of economic incentives; the historical and conceptual relationship between markets; social stratification, culture, and forms of popular participation; and the development challenges posed by international inequality and social marginality.

Membership in the University Honors Program is a prerequisite for this class.
HON 205
INTERDISCIPLINARY ARTS
Undergraduate
This course offers interdisciplinary study of two or more art forms in a particular historical period, looking at relations among the arts and between art and its cultural contexts. Students will develop a critical vocabulary for the analysis of works in the visual arts, theater, music, literature, or other art forms. Work in the course will be interdisciplinary and will include readings, classroom exercises, visits to relevant performances or exhibits, and papers. Variable topics; please see the schedule for current offerings.

Membership in the University Honors Program is a prerequisite for this class.

HON 207
INTRODUCTION TO COGNITIVE SCIENCE
Undergraduate
This course introduces cognitive science, an interdisciplinary field that draws upon aspects of cognitive psychology, philosophy, linguistics, anthropology, education, neuroscience and artificial intelligence. Its unifying goal is to construct and evaluate process-oriented theories of how people think and reason. Researchers in cognitive science typically work under the assumption that processes of human thinking can be understood in computational terms. Students will read and discuss articles describing cognitive models, experiment with computer programs that purport to be models or simulations of some aspect of human cognition, and debate whether certain models serve as viable scientific theories. Assignments include written work as well as computer projects. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 220
HONORS BIOLOGY
Undergraduate
Through reading, lecture, discussion and laboratory work on a topic in biology, students will learn scientific methods of inquiry and gain a biological perspective on the world. By examining a specific topic, the course will introduce students to some approaches used in investigating and understanding biological systems. Students will consider examples of how biological knowledge can inform discussions of socially important issues. Course work will include papers and examinations as well as laboratory investigation, with some assignments requiring students to work in teams. Variable topics; please see the schedule for current offerings. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 221
HONORS CHEMISTRY
Undergraduate
This course introduces students to scientific knowledge and inquiry through a particular topic in chemistry. The laboratory component allows students to have first-hand knowledge of the course content and also provides opportunities for student-directed investigations that model scientific inquiry as a problem-solving method. Students will develop their curiosity about the world as well as the skills to answer their own questions and evaluate the research of others; they will complete written assignments as well as laboratory work. Variable topics; please see the schedule for current offerings. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 222
HONORS ENVIRONMENTAL SCIENCE
Undergraduate
Honors Environmental Science provides an overview of the interrelationships between humans and their environment from a scientific perspective. This interdisciplinary course is designed to provide an understanding of 1) basic ecological principles and how these principles apply to human populations, 2) how cultural and societal institutions influence the availability and use of resources, 3) major environmental problems and their causes, and 4) the application of scientific knowledge and methodology to understanding and solving environmental issues. The format of this course is lecture, discussion and lab.

Membership in the University Honors Program is a prerequisite for this class.
HON 223
HONORS PHYSICS
Undergraduate
This course introduces students to scientific knowledge and inquiry through a particular topic in physics. The laboratory component allows students to have first-hand knowledge of the course content and also provides opportunities for student-directed investigations that model scientific inquiry as a problem-solving method. Students will develop their curiosity about the world as well as the skills to answer their own questions and evaluate the research of others; they will complete written assignments as well as laboratory work. Variable topics; please see the schedule for current offerings. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 225
HONORS SCIENCE TOPICS
Undergraduate
Students in Honors 225 will investigate a particular scientific topic or issue using readings, discussions, papers, and laboratory work. In the process of investigation they will learn about the nature and processes of science and will be able to describe and explain their work in writing; some projects may be done in teams. All sections of Honors 225 include a laboratory component. Please see the Schedule of Classes for current offerings.

Membership in the University Honors Program is a prerequisite for this class.

HON 300
HONORS JUNIOR SEMINAR
Undergraduate
This course, offered occasionally, invites students to enhance their skills in conducting research on issues of interest to a broad audience. Please see the schedule for current offerings. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 301
HONORS JUNIOR SEMINAR IN MULTICULTURALISM
Undergraduate
This seminar asks students to conduct research on complex issues related to multiculturalism. Topics may cover various dimensions of identity including issues of race and ethnicity, class, gender, language, religion, sexual orientation, disability and nationality. Students are encouraged to develop a critical perspective about the meaning of multiculturalism and to understand the historical and/or contemporary manifestations of inequality. All students prepare research projects and participate in seminar discussions. Variable topics; please see the schedule for current offerings. This course meets the university's requirement in multiculturalism and the Honors Program Junior Seminar requirement.

Membership in the University Honors Program is a prerequisite for this class.

HON 350
HONORS SENIOR SEMINAR
Undergraduate
This course, which meets the capstone requirement for the Honors Program, fosters preparation for life-long learning. In a seminar setting, students explore a designated topic, develop related projects, and pursue work in an area defined by the Honors faculty member who designed the particular course. Seminars will be offered in broad interdisciplinary areas, allowing seniors to choose from diverse topics; please see the schedule for current offerings. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 351
HONORS SENIOR SEMINAR IN SERVICE LEARNING
Undergraduate
This senior seminar, which meets the capstone requirement for the Honors Program, brings students into the community as they develop skills for lifelong learning. Students in this course explore theories of service and the relationship between altruism and activism as they consider the role that service will play in their lives after DePaul. Outside of class, students will devote a minimum of three hours each week to service work at one of the sites offered through the course. This course also meets the university's Experiential Learning requirement for students who have not yet fulfilled this requirement. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.
HON 395
HONORS SENIOR THESIS
Undergraduate
Honors students are encouraged to undertake a senior thesis, an independent interdisciplinary research project proposed by the student and carried out under the supervision of a faculty advisor. Students electing to complete a senior thesis must submit an application signed by a faculty director and a two-page project description to the Honors Program Director by the eighth week of the quarter prior to that in which the project will be done. Completion of the thesis project meets the capstone requirement for the Honors Program. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 397
HONORS STUDY TOUR I
Undergraduate
Study tours with faculty leaders. Research, reflection, and writing on site-specific topics and issues. Variable topics. See the Schedule for current offerings. Open only to students in the University Honors Program.

Membership in the University Honors Program is a prerequisite for this class.

HON 398
HONORS STUDY TOUR II
Undergraduate
A continuation of Honors 397. See the Schedule for current offerings.

Membership in the University Honors Program is a prerequisite for this class.

HR 102
Fundamentals of Human Resource Management
Continuing Education

HR 102
Principles of Human Resource Management
Continuing Education

HSP 1
ETIQUETTE DINNER
Undergraduate
Learning appropriate behavior as an industry professional in a social or dining environment is a skill important to successful business interaction. Instructional sessions are used to convey expected behaviors in professional settings, culminating in a formal business dinner where students can practice learned skills.

An intended or declared Hospitality Leadership major or minor or declared Real Estate major is a prerequisite for this class.

HSP 2
DELIVERING GLOBAL HOSPITALITY SERVICE LEVELS
Undergraduate
Hospitality service is delivered differently in various cultures and levels, from quick service to fine dining, budget hotels to luxury suites, and basic meeting rooms to deluxe conventions and expositions. American, Asian and European service styles are explored. An emphasis is placed upon service styles of international cuisines and personal services.

HSP 1 or an Intended or Declared Hospitality Leadership minor is a prerequisite for this class.

HSP 3
HOSPITALITY COMMUNITY SERVICE
Undergraduate
To support the Vincentian mission of DePaul and to demonstrate mastery of hospitality concepts, students are to engage in one (1) community service event during his or her senior year on a voluntary basis. The event must be sponsored by a non-profit organization and the student is to contribute his or her hospitality knowledge and skills toward the production of the event. The event or organization sponsoring it does not have to be in the hospitality industry, but the activity must be hospitality in nature.

Senior standing is a prerequisite for this class.
HSP 100  
INTRODUCTION TO HOSPITALITY  
Undergraduate  
This course takes a survey perspective in introducing students to the global hospitality industry, its associations, organizations and businesses. This course provides an overview of the historical evolution and development of modern, lodging, food & beverage, private club, meetings & events, and other hospitality related industries. Current and future career opportunities are explored.

HSP 101  
INTRODUCTION TO GLOBAL TOURISM  
Undergraduate  
This course takes a cross-disciplinary approach to examine the many facets of tourism. Specific analysis of world travel destinations, customs and traditions, visitor attractions, political, religious and other cultural differences as these relate to the tourism industry will be over-viewed. This course evaluates tourism globally while identifying economic, socio-cultural, and environmental impacts on host destinations from the perspectives of the local communities as well as the traveler. The basic dimensions of sustainability, civic engagement, ethics, service and the historical perspective that are integral to the tourism industry will be covered from a social science perspective, in order to provide students with the kind of practical knowledge that can be applied in many fields of study. This course is intended for non-Commerce students and cannot be counted toward a major or minor in Hospitality Leadership.

HSP 201  
INTERNATIONAL HOSPITALITY SERVICE & EXPERIENCE MANAGEMENT  
Undergraduate  
The concepts of service, service delivery and service recovery in different cultural and geographic contexts are explored, including the full range from limited service through deluxe, the intentional decisions of management about what and how much service to offer, the quality of service, delivering service for rather than to someone, and how to transform a service event into a repeatable, memorable experience.

HSP 202  
HOSPITALITY BUSINESS OPERATIONS  
Undergraduate  
The course details key hospitality industry organizations and their business structures. Exploring the operations specific to hotels, restaurants, private clubs and the meeting & events segments will be the focus of this course. Current issues, trends and technologies within hospitality business operations specific to these segments will be evaluated and detailed.

HSP 203  
HOSPITALITY LEADERSHIP FORUM I  
Undergraduate  
The primary goal of the course is to move students towards the development and understanding of the foundations of leadership, differentiating leadership from management, and emphasizing the core traits and other personal qualities required of successful hospitality leaders. The course further focuses on the importance of a leader's character, values and professionalism as the basis for ethical decision-making in an organizational context.

HSP 204  
HOSPITALITY LEADERSHIP FORUM II  
Undergraduate  
The course focuses on leadership skills needed to develop and promote effective teamwork. This course will cover concepts and theories regarding the leadership of teams while providing a backdrop of continuous increased self-knowledge and supportive development. The practical application of the theories covered in the course will be addressed and students will have the opportunity to develop hands-on team facilitation skills.

HSP 206  
HOSPITALITY RATIO & DATA ANALYSIS  
Undergraduate  
This course is designed to encourage and enable students to think creatively and critically about ratio data analysis as a tool in hospitality decision-making. Today many hospitality organizations are overwhelmed with data, however making the most effective and efficient use of that data is a continuing challenge. This course will provide students an opportunity to practice some of the skills associated with turning data into useful information for sound hospitality decision-making.

ACC 102 is a prerequisite for this class.
HSP 207
HOSPITALITY LAW & ETHICS
Undergraduate
Legal and ethical concepts in the hospitality industry are explored, including the structure of the American legal system, contract law, discrimination, product and property liability, and torts. Laws specific to the hospitality industry are introduced. Ethical perspectives are identified and applied to hospitality operations. Administrative law and government regulation of hospitality is also discussed.

HSP 301
SERVICE LEADERSHIP SPEAKER SERIES I
Undergraduate
Industry professionals will address service leadership and current issues in hospitality and tourism. Speakers will address the role of leadership in the creation and delivery of service. This course should be completed during a student's junior year.

Junior Standing or above is a prerequisite for this class.

HSP 302
SERVICE LEADERSHIP SPEAKER SERIES II
Undergraduate
Industry professionals will address service leadership and current issues in hospitality and tourism. Speakers will address the role of leadership in the creation and delivery of service. This course should be completed during a student's senior year.

Senior standing is a prerequisite for this class.

HSP 303
HOSPITALITY INTERNSHIP I
Undergraduate
This course is a supervised and structured industry learning experience. It is designed for students to concurrently obtain practical experience and course credit through a formal internship in a functional department within hospitality operations. Site is to be chosen in collaboration with faculty. Students must win acceptance through an interview with a hospitality professional who will supervise the practicum. Potential sites could include one of Chicago's many hotels, private clubs, convention centers, tourism offices, airports, airlines, spas or restaurants. Students are required to work a minimum of 50 hours needed for completion over a 10-week quarter.

HSP 100 and HSP 204 are a prerequisite for this class.

HSP 304
HOSPITALITY INTERNSHIP II
Undergraduate
This course is a supervised and structured industry experience. It is designed for students to concurrently obtain practical experience and course credit through a formal internship in a functional department within hospitality operations. This course reflects the importance of providing additional real-world job experience within a unique sector other than that experienced from the student's completion of their first internship. This course is designed to advance and contrast students experiences within both practica.. Site is to be chosen in collaboration with faculty. Students must win acceptance through an interview with a hospitality professional who will supervise the practicum. Potential sites could include one of Chicago's many hotels, clubs, convention centers, tourism offices, airports, airlines, spas and restaurants. Students are required to work a minimum of 50 hours needed for completion over a 10-week quarter.

HSP 303 is a corequisite for this class.

HSP 320
CLUB MANAGEMENT
Undergraduate
This course explores the management of, and leadership roles within, private city, country, and athletic clubs. Topics include: the general manager function; organizational structure of clubs; the role of the board of directors; membership requirements; equity and non-equity clubs; tax-exempt clubs and nontax-exempt clubs; duties and leadership responsibilities of department heads in private clubs; governmental regulations; the future of clubs; and the relationship of private clubs to the hospitality industry.

HSP 100 and HSP 202 are a prerequisite for this class.
HSP 321
FOOD PRODUCTION MANAGEMENT
Undergraduate
This laboratory-based course is an introduction to the basic principles of food production. Topics include culinary terminology, theory and application of food preparation techniques, food product identification and fabrication.

ServSafe Manager Certification and a declared Club Management Concentration is a prerequisite for this class.

HSP 322
QUANTITY FOODSERVICE MANAGEMENT
Undergraduate
Analysis of factors affecting quantity food production and service in the foodservice industry, emphasizing adherence to food quality and service, ethical evaluation of food products and commercial equipment, planning and coordinating food production activities for large groups, and the impact of operations upon environmental sustainability.

HSP 321, ServSafe Manager milestone and a declared Club Management concentration is a prerequisite for this class.

HSP 323
ADVANCED CLUB MANAGEMENT
Undergraduate
An in-depth, international, comprehensive study and analysis of the senior club manager’s role in operating a successful private club. Focused on advanced methods and issues including: career planning, club bylaws and rules, legal and ethical concerns, facility design and management, special enterprises within the club, break even and financial analysis, club feasibility and marketing, research interests, membership services, CCM certification and promotion/public relations. Case studies and a comparison of international approaches to managing clubs will be used to augment lectures and discussions.

HSP 320 is a prerequisite for this class.

HSP 330
FOODSERVICE MANAGEMENT
Undergraduate
This course is designed to introduce the major components of food and beverage service management and to differentiate those components from management in other hospitality segments. The course focuses on management procedures, service styles and safety in food service operations. The course examines the basics of several types of restaurants, including independents and chains. Catering operations will also be addressed.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 331
FOODSERVICE PURCHASING
Undergraduate
Details the standards of quality as applied to food, supplies and related products used in the foods industry. Provides methods and criteria for recognizing quality, evaluating, specifying, purchasing and inspecting these products. The use of technology in the purchasing component of the foodservice industry is detailed.

HSP 330 or 339 is a prerequisite for this class.

HSP 332
BEVERAGE MANAGEMENT
Undergraduate
This course is an overview of the commercial beverage industry. Emphasis is on management’s role and responsibility in operating a facility serving alcoholic beverages. Principles and practices regarding the production, selection, purchasing, storage and service of beverage alcohol in the hospitality industry are detailed.

HSP 100 and HSP 202 are a prerequisite for this class.
HSP 333  
INTERNATIONAL WINE EDUCATION & MANAGEMENT  
Undergraduate  
The purpose of this course is to introduce students to the world of wine. The course emphasizes export shares and trends for significant producing counties and regions. The course further will focus on the processes of grape growing and the science that underlies the practical issues. The implications for wine-style, quality and costs of decisions taken at each stage of wine production will be covered. Students must be legal drinking age by start of course.

HSP 334  
CONTRACT FOODSERVICE MANAGEMENT  
Undergraduate  
This course focuses on the field of professional contract food management. Major corporations will be evaluated. The course will emphasize: contractor activities, types of management contracts, contracts versus commercial foodservice operations and the client liaison.

HSP 330 or 339 is a prerequisite for this class.

HSP 339  
NON-PROFIT FOODSERVICE MANAGEMENT  
Undergraduate  
This course is designed to introduce the major components of food and beverage service management in non-profit foodservice operations such as at schools, soup kitchens, homeless shelters, disaster relief agencies, missions, etc., and to differentiate those components from for-profit organizations. The course focuses on management procedures, service styles and safety in non-profit food service operations.

HSP 340  
LODGING PROPERTY MANAGEMENT  
Undergraduate  
Practices and systems utilized in the operational management of the hotel, including front office, reservations, uniform service, and housekeeping areas. Coordination with F&B, catering, sales & marketing, and other departments are explored. Computer systems used as property management systems are introduced and discussed.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 341  
RESORT & SPA MANAGEMENT  
Undergraduate  
The range of resort and spa operations are explored and analyzed. Key topics unique to these geographic and programmatic settings are discussed, including issues in guest relations, the design of programs and amenities, the role of golf courses, tennis facilities, swimming pools and water sports, spas, the impact of operations upon environmental sustainability, and the importance of conference/meeting events in the resort industry.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 342  
TIME SHARE MANAGEMENT  
Undergraduate  
The course focus is upon the concepts of timeshare management. Topics include historical background, development process, market analysis, exchange systems, ownership and calendar issues, ethical obligations, budgeting, and customer relations.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 343  
CASINO MANAGEMENT  
Undergraduate  
Explore the history and development of gaming, casino operations including slots, table games, sports and Internet betting, credit and casino accounting, casino hotels and casino foodservice, and the marketing of the core gaming products. A central focus will be on current trends as well as the primary management and financial elements unique to operating a casino.

HSP 100 and HSP 202 are a prerequisite for this class.
HSP 349
NON-PROFIT ACCOMMODATION, SAFETY & SECURITY
Undergraduate
This course is designed to introduce the major components of lodging management in non-profit operations such as at homeless shelters, battered women and children shelters, disaster relief agencies, missions, etc., and to differentiate those components from for-profit lodging organizations. Safety and security concerns of patrons, employees and volunteers in non-profit settings are also explored. The course focuses on management procedures, service styles, and safety in non-profit lodging operations.

HSP 350
MEETING MANAGEMENT
Undergraduate
This course focuses on the fundamentals and core issues of meeting management. Development of meeting time-lines, checklists and request for proposals are covered. The course emphasizes meeting planning, budgeting, marketing, public relations, food and beverage and contract and lease negotiations.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 351
DESTINATION MANAGEMENT
Undergraduate
Provides a comprehensive coverage of worldwide tourism destinations, examining the basic principles of underlying the development of tourist demand, supply and transportation, together with a broad survey of world tourism by generating regions and by destination regions. The convention and visitors bureau (CVB) or local governmental tourism agency is discussed as an integral part of destination marketing and addresses its place and importance in the local hospitality industry and larger, general business community. Issues explored include organizational structure, financing, ethical decision-making, numerous audiences, impact upon environmental sustainability, and its sales and service missions.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 352
SPECIAL EVENTS MANAGEMENT
Undergraduate
This course examines the planning and execution of special events. It is designed to help hospitality leadership students learn the theories of event management with exposure to actual events and event planners. The student will learn how to formulate event strategies for destinations. The course will focus on planning, developing, managing, and implementing all types of events, such as entertainment events, corporate events, cultural events, sporting events and festivals.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 353
EXHIBITION MANAGEMENT
Undergraduate
In this course students will concentrate on organizing, arranging and operating conventions, trade shows, and expositions. The course focuses on the modes and methods of sales used in booking conventions and trade shows, as well as the division of administrative responsibility in their operation.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 354
MEETING & EVENT RISK MANAGEMENT
Undergraduate
This course introduces procedures to manage facilities and risk specific to the events industry. This knowledge is needed to protect guests from safety hazards and firms from loss of profits specific to this unique sector of hospitality. Topics covered include: health and safety, loss prevention and security, emergency preparedness and safeguards, program design and site management.

HSP 100 and HSP 202 are a prerequisite for this class.
HSP 355  ADVANCED MEETING MANAGEMENT  
Undergraduate  
This course introduces advanced management and decision making specific to the events industry. Analysis of current issues and future trends in meeting, exhibition and event management and their impact on other sectors within the hospitality industry will be explored.

HSP 350 is a prerequisite for this class.

HSP 360  HOSPITALITY PRICING  
Undergraduate  
Principles and practices involved in hospitality industry pricing strategies from economic, systems, marketing, distribution, and brand perspectives are explored. Topics include an introduction to yield management, technological trends, pricing theory, benchmarking and reporting matrices, transparency in group and transient market pricing, ethical pricing decisions and the impact upon environmental sustainability, hurdle rates, pricing fences, and the process of competitive analysis. Simulation hotel software is used.

FIN 310 and a completed concentration is a prerequisite for this class.

HSP 361  YIELD MANAGEMENT  
Undergraduate  
Identify, exploit and secure opportunities for hotel revenue maximization. Current methodologies are explored along with the many ethical and legal issues associated with different pricing strategies. Particular emphasis is on optimization of pricing and capacity allocation decisions, impact upon environmental sustainability, constrained optimization, quantitative models of consumer behavior, demand forecasts, and market uncertainty.

HSP 360 is a prerequisite for this class.

HSP 362  GLOBAL DISTRIBUTION SYSTEMS  
Undergraduate  
The evolution of the distribution of global hospitality and tourism products is explored. Distribution systems have become increasingly complex and sophisticated, increasing the need for successful channel management. Topics include the integration of channels, the role of intermediaries, channel optimization, pricing integrity, product packaging the impact upon environmental sustainability, and the integration of marketing efforts in distribution outlets.

HSP 360 is a prerequisite for this class.

HSP 371  CUSTOMER RELATIONSHIP MANAGEMENT  
Undergraduate  
Developing effective strategies for managing customer relationships is the focus of this course, including the active management of relationships through data analysis of customer demands, expectations, and needs. Topics include customer behaviors, expectations, creation and positioning of value, guest satisfaction, ethical service delivery, service quality and sustainable continuous improvement processes, technological applications and loyalty/reward programs.

MKT 310 and a completed concentration are a prerequisite for this class.

HSP 372  GLOBAL HOSPITALITY BRAND MANAGEMENT  
Undergraduate  
Learn to identify strategies and tactics in hospitality brand management, including brand concepts, brand equity, brand mapping, and differentiation. The focus is to explore and understand the importance of brands in hospitality, what brands mean to customers, and how brands should be managed. Students will develop an understanding of hospitality brand design, packaging, naming, profit and loss statements, and product strategies, including legal and global issues. Explore how marketing decisions regarding product policy, pricing, advertising or distribution are made when taking into account the impact on brand equity in the hospitality industry, plus information about how to build and maximize strong hospitality brands.

HSP 100, HSP 202 and MKT 301 are a prerequisite for this class.
HSP 373
INTERNATIONAL HOSPITALITY FRANCHISING
Undergraduate
This course examines franchising in the hospitality industry from both the franchiser and franchisee’s point of view. Students examine start-up, organization, franchiser/franchisee relations, cooperative marketing, legal issues, and daily operations in a variety of hospitality and tourism businesses.

HSP 100, HSP 202 and MKT 301 are a prerequisite for this class.

HSP 381
HOSPITALITY RISK MANAGEMENT
Undergraduate
Introduces procedures to manage facilities and risk in the hospitality industries. This knowledge is needed to protect guests from safety hazards and firms from loss of profits. Examines risk management processes commonly used in the hospitality industry and their potential to protect physical, non-physical, financial and human assets, including the coverage of such issues as insurance, handling losses, safety, security, ethical decision-making, environmental sustainability, crisis management, and emergency procedures.

HSP 100 and HSP 202 are a prerequisite for this class.

HSP 382
MANAGING WITH HOSPITALITY UNIONS
Undergraduate
Labor relations and collective bargaining relative to the hospitality industry and their uniqueness in the various segments are explored in this course. The course will focus on labor relation information specific to approaches used by unions to organize as well as methods used by management to combat organization.

MGT 300 is a prerequisite for this class.

HSP 386
HOSPITALITY ACCOUNTING I: REVENUES & EXPENSES
Undergraduate
The application of accounting principles as applied in the hospitality industry is explored. The purpose of this class is to advance the hospitality student’s knowledge of accounting concepts related to the income statement using the hospitality industry version of the Uniform System of Accounts. The class increases the students understanding of the importance revenue recognition, expense classification, and matching of revenue and expenses for operational analysis purposes. Students will study payroll accounting, withholding and tax reporting requirements and regulations specific to the hospitality industry along with labor variances and their relevance to understanding operations and performance versus budgets. This class, in conjunction with HSP 387, HSP 388 and HSP 389, will prepare the student to successfully sit for and pass the accounting portions of the Certified Hospitality Accountant Executive exam.

ACC 102 is a prerequisite for this class.

HSP 387
HOSPITALITY ACCOUNTING II: CAPITAL MANAGEMENT & RISK
Undergraduate
This course provides an in-depth understanding of the Balance Sheet for companies in the hospitality industry. The purpose of this class is to advance the hospitality student’s knowledge of accounting concepts. The class will provide students with an operational approach to the financial risks that exist in every organization as well as those unique to the hospitality industry. The class will also introduce students to the unique challenges of working capital management and control in the hospitality industry. The Hospitality Industry utilizes the Uniform System of Accounts to establish an industry-wide framework for reporting. The students will become familiar with the Uniform System of Accounts, its purpose and proper Balance Sheet application. This class, in conjunction with HSP 386, HSP 388 and HSP 389, will prepare the student to successfully sit for and pass the accounting portions of the Certified Hospitality Accountant Executive exam.

ACC 102 and HSP 386 are a prerequisite for this class.
HSP 388
HOSPITALITY ACCOUNTING III: BUDGETS & LEASES
Undergraduate
The purpose of this class is to advance the hospitality student’s knowledge of operating budgets, lease accounting and tax status of private clubs. This class, in conjunction with HSP 386, HSP 387 and HSP 389, will prepare the student to successfully sit for and pass the accounting portions of the Certified Hospitality Accountant Executive exam.

ACC 102 is a prerequisite for this class.

HSP 389
HOSPITALITY ACCOUNTING IV: INFORMATION TECHNOLOGY SYSTEMS
Undergraduate
In this course students are introduced to the critical information technology systems necessary to run a hospitality business including property management, distribution channels, revenue management, computing, and telecommunications. This class, in conjunction with HSP 386, HSP 387 and HSP 388, will prepare the student to successfully sit for and pass the accounting portions of the Certified Hospitality Accountant Executive exam.

ACC 102 and MIS 140 are a prerequisite for this class.

HSP 398
SPECIAL TOPICS IN HOSPITALITY
Undergraduate
Special Topics. Content and format of this course are variable. An in-depth study of current issues in hospitality. Subject matter and prerequisites will be indicated in class schedule.

HSP 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in Hospitality Leadership.

HSP 502
MANAGING THE GUEST/EMPLOYEE EXPERIENCE
Graduate
This course is designed to examine highly developed principles of the guest experience, the guest/employee interface, and the role employee development and service delivery plays within the hospitality industry. Leadership of various hospitality service operations will be studied in the context of realms of experience and guest quality assurance. Experience realms will be grounded in the constructs of unique hospitality experiences that engage guests in an inherently personal way. Topics will include: customer care and loyalty programs, creativity and innovation, employee skill development, service operation strategies, product design, capturing guest identity, and customer co-creation.

MGT 500 and MGT 502 are a prerequisite for this class.

HSP 503
ADVANCED HOSPITALITY LEADERSHIP AND PERFORMANCE
Graduate
The goal of this course is to examine advanced hospitality leadership practices within the various industry segments. Leadership principles and hospitality management approaches will be examined through the lens of financial and human capital performance. Topics include: critical decision-making, hospitality team dynamics and service performance, financial feasibility in operational delivery, brand and marketplace competency, ethics and values.

MGT 500 and MGT 502 are a prerequisite for this class.

HSP 505
SERVICE TECHNOLOGY & INNOVATION IN THE HOSPITALITY ENVIRONMENT
Graduate
This course examines the interaction and interdependency of hospitality technology and service systems in the context of service leadership, innovation and multi-media. Students will apply contemporary theory surrounding technology utilization in hospitality service systems including: human capital productivity and infrastructure hierarchy, network based service systems, efficiency and effectiveness information processing, enhanced client interfacing and user generated content issues and opportunities.

HSP 503 is a prerequisite for this class.
**HSP 506**  
**HOSPITALITY OPERATIONAL PERFORMANCE DESIGN & IMPLEMENTATION**  
Graduate  
The goal of this course is to evaluate, construct and apply innovative service design and implementation models of service systems in the hospitality operation environment. The course will enable students to analyze service systems through the lens of competitive service orientated product positioning, and operational system architecture. Topics include: hospitality systems thinking-service design, service product life cycle evolution and development, hospitality organizational structure and service system procedures, integrated hospitality operational diagnostics and operational performance metrics.

HSP 504 is a prerequisite for this class.

**HSP 550**  
**NON-PROFIT FOODSERVICE AND SHELTER MANAGEMENT**  
Graduate  
Non-profit hospitality foodservice and shelter management encompasses a broad array of institutions, associations and organizations on a local, regional and national level. The leadership requirements associated with disaster relief response, national philanthropic, and local grassroots community organizations will be examined. Non-profit organizational frameworks and governance components that are necessary to successfully lead a non-profit enterprise are explored. Topics include: leadership and logistical support/Readiness, emergency relief services, international regulatory and procedural issues, volunteer workforce planning and acquisition, food sourcing and distribution, foodservice outlets and delivery mechanisms, shelter accommodations, and community alliance networking.

MGT 500 and MGT 502 are a prerequisite for this class.

**HSP 551**  
**NON-PROFIT EVENT MANAGEMENT**  
Graduate  
Non-profit event management is evolving into a complex and dynamic discipline within the hospitality industry. This course examines the nature and structural components of event management within the non-profit sector. The course design will incorporate event conceptualization and evaluation techniques unique to the non-profit hospitality product delivery. Topics will include: market segmentation, strategic analysis for event planning, financial literacy, managerial and operational logistics, governmental and non-govermental advocacy, sponsorship development and fund raising, contract execution and contract administration.

MGT 500 and MGT 502 are a prerequisite for this class.

**HSP 561**  
**REVENUE MANAGEMENT**  
Graduate  
This course explores revenue management within the hospitality industry from a comprehensive perspective as it pertains to the importance of generating business revenues and contributions to the overall service-firm financial performance. The evolution of revenue management principles and practices within the hospitality sector has advanced in both sophistication and complexity, increasing the need for enhanced development of human capital, investments in data analytics, and systems integrated approaches to successful revenue generation. Topics include: Data mining and predictive analytics, inventory and price management, consumer behavior, social media and e-commerce, and demand based forecasting. Simulation software is used in this course to apply the principles of revenue management to practical situations.

GSB 420 and MKT 555 are a prerequisite for this class.

**HSP 562**  
**HOSPITALITY DISTRIBUTION CHANNELS**  
Graduate  
This course examines advanced principles and applied hospitality revenue management strategies associated with service distribution channels. Topics include an introduction to the global distribution networks, branding perspectives and channel management, corporate reservations systems, travel intermediary relationships, advanced pricing theory-price parity, product marketing and content consistency, search engine optimization, competitive positioning and analysis, systems processing, human capital resources and organizational processes.

HSP 561 is a prerequisite for this class.
HSP 563
HOSPITALITY DATA ANALYSIS & FINANCIAL METRICS
Graduate
This course provides a comprehensive perspective of various hospitality financial performance constructs and key industry operating performance benchmarks. Students will be indoctrinated to hospitality industry financial metrics and the critical nature of linking financial analysis with decision-making in order to achieve organizational profitability objectives. Topics include: interpretation of financial statements, operating control systems, budgeting-forecasting synthesis, operational leadership techniques and operations flow-through, flex staffing and productivity, and capital-facility maintenance. PREREQUISITE(S): GSB 420

GSB 420 is a prerequisite for this class.

HSP 793
PRACTICUM IN APPLIED HOSPITALITY LEADERSHIP
Graduate
Experiential learning plays an important role in applying academic knowledge to real-world business challenges and opportunities. This practicum in applied hospitality leadership engages students in a practical, experiential, multidisciplinary approach to learning, which fosters development of personal and professional skills. Under the direction of the course faculty, students assume the role of researchers/advisors to key Chicago hospitality organizations that seek guidance on business strategy or challenging operational issues. Projects might include: leadership assessments, service-process improvements, service innovation, event planning, club management and others. Students work closely with sponsoring organizations and supervising faculty to identify the scope of the projects, collect information and conduct analysis, and then report findings and/or recommendations. Major outcomes include an oral presentation to faculty and a written report for management.

HST 111
THE WORLD TO C.1500 (FORMERLY HST 218)
Undergraduate
This course will examine the phenomenon of civilization as experienced by West Asian, South Asian, East Asian, African, European, and Pre-Columbian American societies to 1500 A.D. Formerly HST 218.

HST 112
THE WORLD, C.1500-1914 (FORMERLY HST 219)
Undergraduate
This course will examine the global integration of all societies from 1500 A.D. to World War I. Formerly HST 219.

HST 113
THE WORLD, 1900-PRESENT (FORMERLY HST 220)
Undergraduate
A survey of the political, cultural, and technological developments of the years since 1900, concentrating on the growth of a single world-wide civilization and on the changing international balance of military, political and economic power. Formerly HST 220.

HST 121
LATIN AMERICA TO C.1800 (FORMERLY HST 205)
Undergraduate
A survey of Latin American history that offers a continental approach to the colonial period. Special attention is given to Native American societies before 1492, to the Spanish conquest of Mexico and Peru, to the trade in African slaves (Spanish and Portuguese colonies), and to issues of race, class, and gender during the colonial period. Formerly HST 205.

HST 122
LATIN AMERICA, C. 1800-PRESENT [(FORMERLY HST 203)
Undergraduate
A survey of 19th and 20th century Latin America, starting with the wars of independence and emphasizing the rise of nationalism and ideological struggles. Formerly HST 203.
HST 131
AFRICA TO 1800 (FORMERLY HST 227)
Undergraduate
A study of African history from earliest times, concentrating on the political, social and religious aspects of major African states and empires. Formerly HST 227.

HST 132
AFRICA, 1750-1900 (FORMERLY HST 228)
Undergraduate
The Age of Conquest. The origins of Afro-European relations and the political, economic and military causes of the European partition and occupation of the continent. Formerly HST 228.

HST 133
AFRICA, 1900-PRESENT (FORMERLY HST 229)
Undergraduate
The workings of the colonial system, the rise and course of independence movements, and the history of individual African states since independence. Formerly HST 229.

HST 141
THE MUSLIM WORLD, C. 600 CE TO 1100 (FORMERLY HST 223)
Undergraduate
Foundation of First Global Civilization (600-1100). A study of the emergence of Islam and the growth of the Islamic community from the time of the Prophet Muhammad until the end of the eleventh century. Formerly HST 223.

HST 142
THE MUSLIM WORLD, 1000-1500 (FORMERLY HST 224)
Undergraduate
Sultans, Khans and Shaykhs: Medieval Islamic History (1000-1500). A survey of Muslim history from the decline of the Arab caliphate to the rise of the great gunpowder empires, addressing themes of political expansion, military slavery, devastation brought about by the twin plagues of the Mongols and the Black Death, and the growth of Islamic mysticism. Formerly HST 224.

HST 143
THE MUSLIM WORLD, 1400-1920 (FORMERLY HST 225)
Undergraduate
Great Empires (1400-1920). Examines the social, cultural and economic histories of the Ottoman-Turkish, Safavid Iranian and Mughal-Indian empires which dominated the Muslim world in the crucial centuries between the end of the Mongol empire and the advent of European dominance. Formerly HST 225.

HST 151
SOUTH ASIA TO C. 900 C.E. (FORMERLY HST 256)
Undergraduate
The course follows the development of the history of the region from the earliest phases of human settlement, the first civilization in the Indus valley, and the formation of the Mauryan and Gupta empires. It will analyze the growth of different state structures from tribal/lineage based state to these great empires. It incorporates the rise of regional states and the growing importance of trade to linking South Asia with the West. It will also examine the development of different religious traditions from Vedic Brahmanism to Buddhism to Jainism and the very early days of Islam in the region. The central question of this course will be how to contextualize the relationship between structures like family, law, caste, community, state and the tumultuous changes in the subcontinent over this long period. Formerly HST 256.

HST 152
SOUTH ASIA, C. 900 CE TO 1707
Undergraduate
The course begins with the transformation of society from the `ancient? to the `medieval?, and compares it to developments in Europe in the feudal age. It then incorporates specific developments in South Asia ? political, social, cultural ? that came about with the establishment of powerful Islamic states in a region where Muslims were a minority. These issues will inform the analysis of the Ghaznavid and Ghurid invasions, the Delhi Sultanate, the Vijayanagara empire and the Mughal empire. The course will end with the Marathas and the decline of the Mughal empire, and the rising influence of the British. The central themes concern how the state, economy, culture, and society developed in the period when Islam became firmly embedded in South Asia.
HST 153
SOUTH ASIA, 1707-1947 (FORMERLY HST 257)
Undergraduate
The course begins with the decline of the Mughal Empire, and then moves to examine the British empire, the nationalist movement and finally to independence and partition in 1947. The central questions of this course continue to be relevant in the post-colonial period: how we understand the distinctive form of modernity that has developed in South Asia. Taking a comparative approach as often as possible, the course examines the fundamental ways that Britain was as transformed by the development of its empire as was colonial India. The course constantly deconstructs easy binaries of self and others/ East and West by examining the differences within Indian and British society. Formerly HST 257.

HST 161
EAST ASIA TO C. 1200 (FORMERLY HST 286)
Undergraduate
Outlines the history of the region (China, Korea and Japan) during the period of antiquity. Follows the development and the formation of dynastic rule in China and Korea and the imperial institution in Japan. Assesses the extent of the role of ancient Chinese philosophy, language, and statecraft in establishing a coherent region we now call "East Asia."

HST 162
EAST ASIA c. 1200 TO 1800 (FORMERLY HST 287)
Undergraduate
Begins with the transition of East Asia (China, Korea and Japan) from ancient to medieval society and compares it to developments in Europe during the feudal age. Explores the political, economic and cultural relations between the various states in the region as a whole as well as the specific local developments of state and society during this period. Examines the arrival of the first Europeans, traders and then Jesuit and Catholic missionaries, and the resulting radical social realignment within each society stemming from this encounter with the 'outside.'

HST 163
EAST ASIA, c.1800-PRESENT
Undergraduate
Begins with the reshaping of East Asian relations from the late 18th century following the realignment of the region after the expulsion of European Catholic missionaries. Follows the radical shift in the relations between these countries as they all sought to respond to the imperial challenges that the West imposed. Explores the central role of Japan and its effort to build an empire in and beyond East Asia from the late 19th century through its defeat in World War II and the lasting historical legacy of that history in the region.

HST 171
EUROPE, 400-1400 [FORMERLY HST 210]
Undergraduate
The important components of European society during the Middle Ages, including rulers, knights, and peasants, churchmen and nuns, urban merchants, intellectuals, and artisans. Who were these Medieval people, what differentiated them, how did they interact with each other, and how and why did these interactions change over time? Formerly HST 210.

HST 172
EUROPE, 1348-1789 (FORMERLY HST 211)
Undergraduate
The development of new European ideologies in a time of heightened political and social conflict, from the rebirth of ancient culture in Renaissance Italy, to the religious debates of the Protestant Reformation; from the theories of absolute monarchy to the early revolutionary ideologies of the Enlightenment. Formerly HST 211.

HST 173
EUROPE, 1789-PRESENT (FORMERLY HST 217)
Undergraduate
A survey of European history from 1789 to the present. Formerly HST 217.

HST 181
UNITED STATES TO 1800 (FORMERLY HST 280)
Undergraduate
A survey of the major social, political, economic and cultural themes in U.S. History from the earliest European settlements to the aftermath of the Revolution. Formerly HST 280.
HST 182
UNITED STATES, 1800-1900
Undergraduate
A survey of the major social, political, economic and cultural themes in U.S. history from the aftermath of the Revolution to the Spanish-American War. Formerly HST 281.

HST 183
UNITED STATES, 1900-PRESENT (FORMERLY HST 282)
Undergraduate
A survey of the major social, political, economic and cultural themes in U.S. history from the Progressive era to the present. Formerly HST 282.

HST 200
MEXICO AFTER INDEPENDENCE
Undergraduate
This survey covers the history of Mexico from 1821 to the present. It will examine the difficulties of nation-building during the 19th Century, the Mexican Revolution (1910-1940), and the success and failure of the "Mexican Miracle."

HST 204
FILM AND LATIN AMERICAN HISTORY
Undergraduate
An inquiry into the way film portrays historical events in Latin America.

HST 206
MEXICO: FROM THE OLMECS TO INDEPENDENCE
Undergraduate
This course surveys the history of Mexico from the rise of the Olmec Civilization to Mexican Independence in 1821. It will examine the rise, fall, and continuities of Mesoamerican civilizations, the Spanish conquest, and the creation of the colonial order.

HST 208
IMPERIAL RUSSIA
Undergraduate
This course examines political, economic, social, and cultural developments in Russia form the time of Peter the Great in the early 18th century to the collapse of tsarism in 1917. Topics include Westernization and resistance during the reigns of Peter the Great and Catherine the Great; reform and reaction under Alexander I and Nicholas I; Alexander II and the great reforms of the 1860's; industrialization and the transformation of Russian society in the second half of the nineteenth century; the rise of radicalism and emergence of revolutionary movements; and the revolutions of 1905 and February 1917.

HST 209
THE RISE AND FALL OF THE SOVIET UNION
Undergraduate
This course examines major political, social, economic, and cultural developments in twentieth-century Russia form the collapse of tsarist rule through the fall of communism. Topics include the rise of Bolshevism and the October Revolution; the Civil War and allied intervention; the period of NEP and "revolutionary dreaming;" Stalin and Stalinism; the Great Patriotic War; Khrushchev and the "thaw," Brezhnev and "developed socialism," and the rise and fall of Mikhail Gorbachev.

HST 212
MEDIEVAL AND RENAISSANCE WOMEN
Undergraduate
Gender roles and ideologies in pre-modern and early modern Europe, from ancient Mediterranean and Germanic women to high Medieval ladies, nuns, serfs, and city women, from early feminism to the restrictions and opportunities brought by the Renaissance and Reformation. Emphasis on primary sources, especially women's writings.
HST 213
MEDIEVAL MYSTICS IN EUROPE: 1000-1600 AD (CROSS-LISTED AS CTH 228)
Undergraduate
The evolution over time of theories and experiences of human union with God, and of varied Christian spiritual paths and practices, as described in mystical literature, saints' lives, religious art, and music. Emphasis on the monastic, urban, and courtly institutional contexts of the documents. Cross-listed as CTH 228

HST 214
EASTERN EUROPE TO 1699
Undergraduate
A survey of the area's settlements by Slavic and non-Slavic peoples, the establishment of medieval states, the East European Renaissance and Reformation, the struggle of Cross and Crescent, and the growth of Habsburg and Ottoman power.

HST 215
EASTERN EUROPE: 1699 TO 1914
Undergraduate
A survey of the East European Enlightenment and absolutism, the Polish Partitions, and the effects of revolutionary ideas on multinational empires.

HST 216
EASTERN EUROPE: 1914-PRESENT
Undergraduate
A survey of World War I and its effects in Eastern Europe; the rise of nation-states; the destruction of traditional agrarian societies; the impact of World War II; and the establishment and decline of Communist regimes.

HST 221
EARLY RUSSIA
Undergraduate
This course examines political, economic, social, and cultural developments in Russia from the emergence of the Kievan state in the ninth century to the reign of Peter the Great in the early eighteenth century. Topics include the rise and fall of Kiev; the Mongol invasion and rule by the "Golden Horde;" the rise of Moscow and unification of Great Russia; the consolidation of tsarist authority and the reign of Ivan the Terrible; the Time of Troubles; and the early Romanov dynasty.

HST 222
MODERN GERMANY, 1870-PRESENT
Undergraduate
Following the path from Germany's unification in the late 19th century via two world wars, the country's division in the course of the Cold War, and ultimately the country's reunification at the close of the 20th century, one of the goals of this course is to introduce students to the major cornerstones of modern German history. Another objective, however, aims at using these events in the exploration of shifting ideas about what it has meant to be German, exploring what factors determined inclusion in or exclusion from the German community.

HST 226
ISLAM AND THE WEST: A SURVEY OF ORIENTALISM
Undergraduate
From "heresy" to "the Green Threat," this course studies the changing perceptions of Islam and the Islamic world held by those in "Western" societies from the time of the Crusades down to the contemporary era.

HST 232
CULTURE AND POLITICS IN IMPERIAL CHINA
Undergraduate
Examines the history of Chinese civilization from the early Shang kingship through the development of the Chinese Empire (221 B.C. - A.D. 1911). We will focus on systematic changes in political, economic, and social structures in China and the intellectual and cultural forms that each configuration produced. Topics include the growth of the Chinese empire, Chinese forms of Buddhism, and the development of Chinese philosophy, scholarship and literature.
HST 233  
THE RISE OF MODERN CHINA  
Undergraduate  
Examine the history of Chinese civilization from the 18th century to the present. We will survey the height of the authority of the Qing Imperial government, its dissolution in the 19th century, and the creation of a revolutionary China in the 20th century. Topics include the Opium War and China’s foreign relations, the introduction of Westernized technology and education, and the rise of Communism under the leadership of Mao Zedong. Also considers the ways in which our contemporary understanding of China is formed by recent developments in the media - Chinese news and film.

HST 235  
EUROPEAN EXPANSION: AGE OF DISCOVERY  
Undergraduate  
A survey of the political, intellectual and scientific roots of the expansion of Europe and of the main voyages of discovery between 1400 and 1825.

HST 236  
EUROPEAN EXPANSION: AGE OF EMPIRE  
Undergraduate  
The establishment of European empires in the 19th and 20th centuries, the nature and effect of empires, the reasons for their disappearance and their legacy for Europe and the non-Western world.

HST 237  
HISTORY OF THE CITY OF ROME  
Undergraduate  
Topics in the history of urban Rome from antiquity through the modern age.

HST 239  
WOMEN IN MODERN EUROPE, 1800-PRESENT  
Undergraduate  
This course will explore the diversity of women’s and girls’ experiences across Europe as they negotiate between public and private spheres, daily life and great events, Europe and the world. Themes may include industrialization, suffrage, imperialism, “new women,” facism, and communism.

HST 240  
HISTORY OF CHICAGO  
Undergraduate  
A history of the founding and development of Chicago from a frontier village to a major industrial, commercial and cultural center. This course will focus on the changing lives of ordinary Chicagoans.

HST 241  
WORLD REFUGEE CRISIS  
Undergraduate  
This is a survey of global refugee crisis and internal displacement between 1945 and the present. The course will focus on the following issues and challenges: human rights, definitions and causes of crisis, internal/external displacements, “environmental” refugees, protection and integration, refugee children, and conflict resolutions in post-war societies.

HST 243  
Undergraduate  
This course traces the development of the Catholic Church from a missionary enterprise to the position of a major social, political, and economic institution. The course will examine the manner in which the hierarchical institution of the Catholic Church has related to the liberal ideal of American democracy.
HST 245
THE HISTORY OF THE BAHAMAS: LOYALSTS, SLAVES & THE CREATION OF AN AFRO-BAHAMIAN WORLD
Undergraduate
History of the Bahamas during the late eighteenth and nineteenth centuries. Focus on the establishment of British rule in the late eighteenth century, the history of slavery in the Bahamas, particularly its expansion after the settlement of Afro-Bahamian society in the nineteenth century. Because the trip will involve time in both Nassau and on San Salvador, the course will compare urban and out island historical and social developments during the Loyalist and post-Loyalist periods.

HST 246
AFRICAN-AMERICAN HISTORY TO 1800
Undergraduate
West African culture, the middle passage, development of the Slave trade, introduction of slavery into the American colonies, African-Americans in the Revolutionary War and the Constitution.

HST 247
AFRICAN-AMERICAN HISTORY, 1800-1900
Undergraduate
African-American participation in frontier life, in the growth of the cotton industry, in the Civil War and Reconstruction to Booker T. Washington.

HST 248
AFRICAN-AMERICAN HISTORY, 1900 TO PRESENT
Undergraduate
W. E. B. Du Bois and Booker T. Washington debates; Marcus Garvey and the Harlem Renaissance, the Great Migration, Civil Rights to Black Power. Cross-listed as ABD 258.

HST 249
ORIGINS OF THE FIRST WORLD WAR, 1871-1917
Undergraduate
Examines the development of the European (and Great Power imperial) state system after the unification of Germany; the formation (and global implications) of the pre-war alliance structure; the political and social movements of nationalism, imperialism, and militarism; the naval race; and the July Crisis of 1914.

HST 250
ORIGINS OF THE SECOND WORLD WAR, 1914 - 1941
Undergraduate
Examines the European (and world) state system in the aftermath of the First World War and the Russian Revolution; the attempts to forge a new international equilibrium at the Paris Peace Conference and after; the rise of Hitler and Nazism; appeasement; the immediate origins of the Second World War in Europe; and the rise of militarism and advent of war in East Asia.

HST 251
ORIGINS OF THE COLD WAR, 1917 - 1953
Undergraduate
Examines the rise of the United States as a world power; the diplomatic significance of the Russian Revolution; the wartime alliance between Great Britain, the United States and the Soviet Union; the collapse of the international order in the aftermath of the Second World War; and the advent of the Cold War.

HST 252
Undergraduate
The origins, nature and progress of the Cold War from the end of World War II until the collapse of the Soviet Union.
HST 253
HISTORY OF THE MODERN OLYMPICS
Undergraduate
This course will examine the Modern Olympics: the oldest and most inclusive institutionalized effort to engender international exchange and perpetuate peacefulness through athletic excellence. Relying on a mix of primary and secondary sources, the course will touch on an array of important issues, including globalization, race relations, gender issues, the rise of popular culture, and terrorism.

HST 254
AMERICAN URBAN HISTORY
Undergraduate
An overview, examining American urban life from the early days of the colonial seaport, through the rise of the smoky industrial center, to today's troubled “dual city” of the rich and the poor. Throughout the course, we will focus on how urbanization affected the lives of the diverse peoples who experienced it. We will also explore the ways in which city life contributed to changes in American culture, and to a greater acceptance of social and cultural diversity.

HST 258
WOMEN IN HISTORY
Undergraduate
A comparative study of women's social, cultural, political, economic roles over time in three parts of the world.

HST 259
HISTORY OF WESTERN SCIENCE
Undergraduate
A survey of scientific thought and discovery from the ancient Greeks to the early 20th century.

HST 260
LESBIAN AND GAY AMERICAN HISTORY, COLONIAL TO 1970
Undergraduate
This course surveys LGBTQ (lesbian, gay, bisexual, transgender, and queer) history in America from the colonial era to the Stonewall Riots. Through primary and secondary source readings and class discussion we will examine how understandings of same-sex sex and sexuality have been constructed in the past. Special attention is paid to readings that draw revealing connections between same-sex sexuality and race, class, and gender.

HST 261
CATHOLICISM IN WORLD HISTORY I: JESUS TO 1500 (CROSS-LISTED AS REL 213/CTH 205)
Undergraduate
A study of the development of the Catholic Church from the time of Jesus to the Renaissance. Religious movements, piety and art as well as theology and ecclesiastical history will be examined. Cross-listed as REL 213 and CTH 205.

HST 262
CATHOLICISM IN WORLD HISTORY II: 1500 - PRESENT (CROSS-LISTED AS REL 214/CTH 206)
Undergraduate
A study of the development of Catholicism since 1500 exploring the Catholic Reformation, Catholicism's encounter with the Enlightenment, the missionary movement and the Catholic Church in the United States. Cross-listed as REL 214 and CTH 206.

HST 263
JAPAN TO C. 1200 (FORMERLY HST 230)
Undergraduate
Follows the formation of a unified state in central Japan during the 5th and 6th centuries. Considers the influence of Korean immigrants and Chinese philosophy and statecraft on the unification of Japan in early antiquity. Explores rise of Japan's aristocratic court culture in Nara and Kyoto as well as powerful Buddhist institutions and the emergence of the warrior class in Eastern Japan. Formerly HST 230.
HST 264
JAPAN c.1200 - 1800
Undergraduate
Follows the emergence of the warrior class and the system of dual political authority until the 14th century, with the imperial court in Kyoto and the samurai elite in Kamakura. Continues with an examination of the early modern processes of urbanization and the growth of a monetary economy, changes in social organization, major cultural innovations, and religious/intellectual movements.

HST 265
JAPAN, c. 1800-PRESENT
Undergraduate
Follows the radical transformation of Japanese politics, society, and economy with the commercialization of the countryside, the weakening of samurai rule, and increased, often hostile, contact with Western imperialist nations. Explores expansion of Japan as an imperialist nation from the middle of the 19th century and the lasting legacy of that expansion in the region. Explores WWII and postwar political, economic, social changes in contemporary Japan.

HST 266
IRELAND, 1450 - 1800, CONQUEST, COLONIZATION & REBELLION
Undergraduate
This course offers a survey of Irish history from the end of the middle ages to the union of Ireland and Great Britain in 1800. It traces the ways in which Ireland was brought under great English (later British) control through processes of agreement, conquest and colonization; and the ways in which various groups within Ireland sought to resist such developments.

HST 268
IRELAND, 1800-PRESENT
Undergraduate
Survey of Irish history from 1800 to 2000. Examines the course of Irish history from the Act of Union (creating the United Kingdom), through the struggles and reforms of the 19th century (Catholic Emancipation, the Famine and Irish diaspora, Fenianism, Land Reform and Home Rule), to the creation of the modern nation-state of the 20th century (the Easter Rising, partition and civil war, the role of Eamon deValera, the Republic, and the Troubles). Topics include the contributions of Irish culture and its influence in Europe and the world.

HST 269
INTRODUCTION TO PUBLIC HISTORY
Undergraduate
Presentation of American history for public consumption, particularly museum exhibitions, historic preservation, and archival collections. Good preparation for an internship in history.

HST 270
U.S. HIS TORICAL LANDSCAPE
Undergraduate
The course considers how the American landscape has been shaped by native occupants, and later, by agricultural settlement and industrial development. A key theme is how culture has shaped the physical world we inhabit, from 1500 to circa 1950.

HST 271
OLD REGIME AND REVOLUTIONARY FRANCE
Undergraduate
This course provides students with a firm foundation in the history of early modern France, ca. 1500-1800, including major developments of the period and an understanding of the relationship between the French revolution and the period that preceded it. Topics will include (among others) the rise of absolutist monarchy, the Enlightenment, French colonialism, pre-revolutionary social and economic conditions, and the French Revolution.

HST 272
FASCISM AND COUNTER REVOLUTION
Undergraduate
An analysis of the various ideological trends that form the mature Fascism from 1920 to the present.
HST 273
HISTORY OF SEXUALITY IN EUROPE
Undergraduate
This course will explore key ideas, practices and patterns across multiple European societies from the French Revolution until the present. Key topics may include demographics, identities, sexology, and sexual consumerism.

HST 274
INTELLIGENCE IN 20TH CENTURY
Undergraduate
A study of intelligence gathering and analysis in the twentieth century (and beyond). This course will address the role intelligence played in the politics, diplomacy, and strategy of the leading world powers. Special consideration will be given to the eras of the two world wars, the cold war, and the emerging nations in the post-war period. The course is comparative in nature and will examine the intelligence communities of the United States, the European powers, the Soviet Union, Japan, China, and Israel.

HST 275
SEX IN AMERICA, PURITANS TO VICTORIANS
Undergraduate
This course surveys the history of three centuries of American ideas about sex and sexuality. By focusing on sexual variation from the era of colonial settlement through the end of the nineteenth century, this course will challenge conventional interpretations of sex in early America.

HST 276
SEX IN AMERICA, LATE VICTORIANS TO PRESENT
Undergraduate
This course will provide an overview of the history of American sexuality from the late 19th century through the present. The course will draw from social and cultural history, the history of medicine and psychology, legal and political history, literature, mass media, and gender studies in order to understand the creation of modern sexual identities.

HST 277
WAR AND PEACE IN THE MODERN AGE
Undergraduate
A survey of military history from 1648 to the present with emphasis on the relationship between armed forces and the societies that create them, the impact of technology on warfare, and efforts to limit deadly conflict.

HST 278
HISTORY OF AMERICAN RELIGION
Undergraduate
A survey of major religious traditions, movements, and themes in American history from the colonial period to the present, including the relationship between religious values and beliefs and other aspects of American culture.

HST 279
WESTWARD EXPANSION IN U.S.
Undergraduate
Explores traditional, comparative, and multicultural perspective of successive frontiers in American history. The period covered is approximately 1775 to 1890.

HST 283
ASIAN-AMERICAN IMMIGRATION AND HISTORY, 1840-1965
Undergraduate
This course surveys Asian American history from the early nineteenth century to 1965. It explores the changing experiences of Asian immigrants and their citizen descendants in the United States within the larger context of immigration and race relations in American history. The course deals with the following broad themes: causes and processes of migration, responses from American society, and experience of immigration.
HST 284
HISTORY OF EDUCATION IN THE UNITED STATES
Undergraduate
Thematic study of the educational developments in U.S. History

HST 285
ANCIENT ROME: AUGUSTUS TO CONSTANTINE
Undergraduate
This course examines the history of the Roman Empire from its beginnings under Augustus (27 BCE-14 CE) to its reorganization under Diocletian (284-305 CE) and Constantine (306-337 CE). Both textual and archaeological sources will be used to understand political, economic, and social developments.

HST 288
WOMEN IN UNITED STATES HISTORY
Undergraduate
The history of women’s work, family, and political lives in America.

HST 290
ANCIENT EGYPT
Undergraduate
This course traces the developments of Egyptian civilization from its earliest beginnings to the Arab/Muslim conquest. Emphasis will be on assessing material culture with students being introduced to techniques of Egyptian archaeology and papyrology.

HST 291
THE FERTILE CRESCENT: MESOPOTAMIA AND BEYOND
Undergraduate
Analyzes the early civilizations in the Fertile Crescent through an examination of material culture. Attention will also be given to the archaeology and archaeological methods of the Near East including Jericho and Catalhoyuk.

HST 292
HISTORY OF ENGLAND TO 1688
Undergraduate
A survey of cultural, social, economic, and constitutional developments in England from the Norman Conquest to the Glorious Revolution.

HST 293
HISTORY OF BRITAIN SINCE 1688
Undergraduate
History of Britain Since 1688. special emphasis on the continued evolution of the constitution, the industrial revolution, imperialism, and Britain's changing role in Europe.

HST 294
ANCIENT GREECE
Undergraduate
Traces the development of Greek civilization through an examination of material culture. Emphasis will be on the major monuments and artifacts of the Greek world from prehistory to the Classical Age. Students will also be introduced to techniques and methods of classical archaeology.

HST 295
AMERICAN HISTORY ON FILM
Undergraduate
Using film in combination with both primary and secondary historical source material, this course will consider the impact of cinematic myth-making on our understanding of actual historical events.
HST 296
ANCIENT ROME: ORIGINS TO THE END OF THE REPUBLIC
Undergraduate
This course traces the development of Rome from a small settlement on the banks of the Tiber in the eighth century BCE to a Mediterranean power in the first century BCE. Both textual and archaeological sources will be used to understand political, economic, and social institutions of the Archaic and Republican periods.

HST 297
IMPERIAL SPAIN, 1469-1808
Undergraduate
Analysis of Spain and Spanish empire between 1468-1808. During this period, Spain united and became a leading global power with enormous consequences for Western and world history. Emphasis on the political, economic, socio-cultural history of Iberian society.

HST 298
INTRODUCTION TO HISTORICAL SOURCES AND METHODS
Undergraduate
This is the first of two introductory core courses required of all history majors, history minors, and education majors with a concentration in history. In this course, students will learn the varied ways in which scholars interpret the past, focusing particularly on the evidence and arguments used by historians in their work. To that end, students will learn about the varieties of primary sources (textual, material, oral) as well as the varied methods historians use to analyze such evidence. In addition, students will practice analyzing primary source evidence in oral and written presentations, learn how to use the library for historical research, and how to discern scholarly arguments in secondary sources.

(WRD 103 and WRD 104) or HON 100 or HON 101 is a prerequisite for this course.

HST 299
CRAFT OF HISTORY
Undergraduate
This course is the second of two introductory core courses required of all history majors, history minors, and education majors with a concentration in history. In this class, students will bring to bear the skills in historical sources and methods learned in HST 298 to complete a substantial independent research project. To that end, students will learn how to identify a historical question or problem about which to conduct research; how to find, obtain, and evaluate primary source evidence to research; how to build a secondary source bibliography using reference works, monographs, and scholarly journal articles; and develop and execute a coherent plan for writing and revising a substantial research paper (of at least 10 pages in length) based on an integrated use of both primary and secondary sources.

HST 298 a prerequisite for this course.

HST 301
U.S. LABOR HISTORY
Undergraduate
This course will explore the history of American labor from 1877 to the present. We will particularly focus upon the work of recent American labor historians who examines such themes as the relationship between ethnicity, race, gender, and class: how and why work has changed; the role of unions, families, churches and other working-class institutions in workers lives; the relationship between working-class cultures and mass cultures; and how capitalism, the state, and workers themselves have shaped class relations.

HST 199 or HST 299 is a prerequisite for this class.

HST 302
MAPS IN HISTORY AND CULTURE
Undergraduate
Examines maps in multiple cultures and the relationship of these to local geographies and perception of place.

HST 199 or HST 299 is a prerequisite for this class.

HST 303
TOPICS IN LATIN AMERICAN HISTORY
Undergraduate
Topics in Latin American History

HST 199 or HST 299 is a prerequisite for this class.
HST 304
ETHNOHISTORY: THE STUDY OF PRE-LITERATE PEOPLES
Undergraduate
An inquiry into the sources and methods for writing the history of pre-literate peoples, such as the Aztecs, Mayas, and Incas.

HST 199 or HST 299 is a prerequisite for this class.

HST 306
COLONIAL LATIN AMERICA: POWER & DEVELOPMENT OF A MULTI-RACIAL SOCIETY
Undergraduate
The multicultural origins of colonial rule in the Americas from the 15th to the early 19th century.

HST 199 or HST 299 is a prerequisite for this class.

HST 308
EUROPE FROM CONFLICT TO CONSENSUS
Undergraduate
The course will examine the emergence of a European identity during the second half of the twentieth century. Special attention will be given to the evolution of the European Union and NATO as representative institutions.

HST 199 or HST 299 is a prerequisite for this class.

HST 310
INTER-AMERICAN AFFAIRS
Undergraduate
A mostly twentieth-century survey of political relationships between the United States and Latin American nations, emphasizing dependency and interdependence theories.

HST 199 or HST 299 is a prerequisite for this class.

HST 311
THE HISTORY OF THE CARIBBEAN: FROM COLUMBUS TO CASTRO
Undergraduate
The history of the Caribbean from colonial times to the present, with special emphasis on the factors that give each nation its particular character.

HST 199 or HST 299 is a prerequisite for this class.

HST 312
LATINOS IN THE UNITED STATES
Undergraduate
A survey of the history, politics, and culture of the major Latino groups in the United States: Mexicans, Puerto Ricans, Cubans, Dominicans, and Central Americans. Traces the history of these groups from the 19th century to the present by analyzing their impact on the United States.

HST 199 or HST 299 is a prerequisite for this class.

HST 313
THE OLD SOUTH
Undergraduate
Considers the history of the southern states before the Civil War, focusing especially on the growth of southern slavery, the development of African-American culture, the socio-economic features of a slave society, as well as the distinctive political and ideological contours of the region.

HST 199 or HST 299 is a prerequisite for this class.
HST 314
THE CUBAN REVOLUTION
Undergraduate
General analysis of the impact of the Cuban Revolution on Cuban society and the international political arena. The historical background of the revolution as well as its accomplishments and shortcomings will be emphasized.

HST 199 or HST 299 is a prerequisite for this class.

HST 316
GOD, SELF, AND SOCIETY IN MEDIEVAL CULTURE
Undergraduate
The roots of Western thought in medieval education, literature, philosophy, and science. The interactions between high theology, mysticism, and popular culture. History and autobiography.

HST 199 or HST 299 is a prerequisite for this class.

HST 317
INDIVIDUAL AND SOCIETY IN RENAISSANCE ITALY
Undergraduate
The flowering of culture, humanism and the arts in fourteenth- and fifteenth-century Italy. Renaissance politics, patronage and diplomacy. Religion and the Papacy.

HST 199 or HST 299 is a prerequisite for this class.

HST 318
THE AGE OF REFORMATIONS
Undergraduate
Late medieval religion and society; the Reformations of Luther and Calvin, and the Catholic reform movements. Nationalism and the state in sixteenth-century Europe. The expanding world.

HST 199 or HST 299 is a prerequisite for this class.

HST 319
IMMIGRANT AMERICA
Undergraduate
An overview of the ethnic experience in American society, how ethnic diversity has shaped America as America has re-shaped the lives of immigrants.

HST 199 or HST 299 is a prerequisite for this class.

HST 320
TOPICS IN WORLD HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

HST 199 or HST 299 is a prerequisite for this class.

HST 321
TOPICS IN AFRICAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

HST 199 or HST 299 is a prerequisite for this class.
HST 322
TOPICS IN ASIAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

HST 199 or HST 299 is a prerequisite for this class.

HST 323
THE CULTURES OF EARLY CHRISTIANITY
Undergraduate
Late antique and early medieval intellectual history in social context.

HST 199 or HST 299 is a prerequisite for this class.

HST 324
COLONIAL LATIN AMERICA: AGE OF CONQUEST, 15TH - 17TH CENTURIES
Undergraduate
This course examines the complexities of the Age of Conquest and focuses on the historical experience of Indigenous societies during the early colonial period. Special attention is given to the social and economic structures of Indigenous societies before 1492, to the Spanish exploration and conquest, to the presence of Indigenous allies and their role in the dynamics of conquest/colonization, to the demographic catastrophe that followed the conquest, and to the social, cultural, and economic characteristics of early colonial societies.

HST 199 or HST 299 or instructor consent is a prerequisite for this course.

HST 328
ENGLISH CONSTITUTIONAL HISTORY
Undergraduate
A study of Anglo-Saxon institutions; feudalism after the Norman conquest; growth of the common law; foundations of Parliament and the development of central administrative systems.

HST 199 or HST 299 is a prerequisite for this class.

HST 329
SPECIAL TOPICS IN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

HST 199 or HST 299 is a prerequisite for this class.

HST 330
TOPICS IN EUROPEAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

HST 199 or HST 299 is a prerequisite for this class.

HST 331
THE NATION AND NATIONALISM IN EUROPE
Undergraduate
Examines the emergence of nations and nationalism in modern Europe as well as nationalists' use and abuse of history.

HST 199 or HST 299 is a prerequisite for this class.

HST 332
FRENCH REVOLUTION AND NAPOLEON
Undergraduate
Analyzes the demise of the Old Regime, rise and fall of revolutionary idealism, and the emergence of Napoleon.

HST 199 or HST 299 is a prerequisite for this class.
HST 333
VICTORIAN ENGLAND
Undergraduate
A detailed study of selected political, social, economic and cultural themes in 19th century England.
HST 199 or HST 299 is a prerequisite for this class.

HST 334
BRITAIN IN THE TWENTIETH CENTURY
Undergraduate
An in-depth look at selected themes in recent British history including the economic and imperial decline of Great Britain.
HST 199 or HST 299 is a prerequisite for this class.

HST 335
EUROPE IN AN AGE OF ENLIGHTMENT
Undergraduate
Analyzes European society and culture in the late 17th and 18th centuries and the intellectual movements that grew out of this historical context, which is frequently considered the cradle of modern Western history and thought.
HST 199 or HST 299 is a prerequisite for this class.

HST 338
THE GREAT WAR, 1914 - 1918
Undergraduate
By using a variety of perspectives--social, cultural, intellectual, political--this course will examine and re-examine the ways that the First World War shaped and affected the modern world. After examining the broader causes of the war, the course will work outward from the battlefields to the home fronts, to the empires, and throughout the post-war world. Although this course focuses on European history, instructors may also examine its global context.
HST 199 or HST 299 is a prerequisite for this class.

HST 339
HISTORY FROM PICTURES: VISUAL CULTURE IN EAST ASIAN HISTORY
Undergraduate
How do historians use paintings, woodblock prints, lithographs, photographs, postcards, and other visual artifacts in understanding the past? How do visual objects differ from conventional documents as sources of historical evidence? In this course, we will investigate the methodological approaches to writing history using visual artifacts as primary source material. In particular, we will consider the impact of these issues on the writing of East Asian history.
HST 199 or HST 299 is a prerequisite for this class.

HST 340
CULTURE AND GENDER IN JAPAN
Undergraduate
Examines gender and society in early modern and modern Japanese history [c.1600-present].
HST 199 or HST 299 is a prerequisite for this class.

HST 341
PEASANTS IN MODERN EUROPEAN HISTORY
Undergraduate
An analysis of the significance and ultimate disappearance of the peasantry, formerly the numerically dominant group in European society, emphasizing both its social history and the methods needed to study the non-literate.
HST 199 or HST 299 is a prerequisite for this class.
HST 342
TOPICS IN AFRICAN-AMERICAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.
HST 199 or HST 299 is a prerequisite for this class.

HST 346
AFRICAN-AMERICAN INTELLECTUAL HISTORY
Undergraduate
African-American contributions in the areas of philosophy, theology, politics, literature, and art from 1619 to the present.
HST 199 or HST 299 is a prerequisite for this class.

HST 347
EUROPE IN THE BELLE EPOQUE
Undergraduate
This course will examine European, social, political and cultural history form 1890 to 1914. Themes will include imperialism, class and gender, social Darwinism, and the European alliance system.
HST 199 or HST 299 is a prerequisite for this class.

HST 348
EUROPE UNDER THE DICTATORS
Undergraduate
This course will examine selected totalitarian regimes of interwar Europe. Themes will include propaganda and mass culture, "scientific racism," the crisis of democracy, and the Holocaust.
HST 199 or HST 299 is a prerequisite for this class.

HST 349
THE HOLOCAUST
Undergraduate
This course places the Shoah, the Holocaust of European Jewry, at the center of a broader discussion of anti-Semitism, the rise of Nazism, the conduct of World War II, and the persecution and murder of other groups designated as outsiders or as enemies of the Nazi regime. Close attention is given to interpreting the behavior and experiences of perpetrators, victims, bystanders, and resisters, to the role of the churches, and to the politics of post-Holocaust legal proceedings and the complex work of memory and representation.
HST 199 or HST 299 is a prerequisite for this class.

HST 352
MEDIEVAL INDIA
Undergraduate
Examines the social, cultural and political histories of South Asia from prehistoric times to the waning of the Mughal Empire.
HST 199 or HST 299 is a prerequisite for this class.

HST 353
MODERN INDIA AND PAKISTAN
Undergraduate
Examines the modern history of India, giving special attention to India as a prototype of economic and political change in the Third World.
HST 199 or HST 299 is a prerequisite for this class.
HST 354  
U.S. WOMEN’S HISTORY  
Undergraduate  
The purpose of this course is to introduce students to the history of women's work, family, and political lives in America. This intensive reading and discussion course is also designed to provide a detailed overview of recent historical literature and historiographic interpretations in American Women's history.

HST 199 or HST 299 is a prerequisite for this class.

HST 359  
SOCIETY AND CULTURE IN THE LATE SOVIET ERA  
Undergraduate  
This seminar focuses on the society and culture of the USSR in the late Soviet period (i.e., from Stalin's death in 1953 to Gorbachev's resignation in 1991). It emphasizes themes such as: evolving notions of the individual in a collective society; tensions between emerging national (ethnic) and supranational (Soviet) identities; attitudes toward science and technology; city and countryside; consumption and consumerism; popular culture and celebrity, work and leisure, religion and orthodoxy; memory and commemoration; sexuality, gender roles, youth culture, and more.

HST 199 or HST 299 is a prerequisite for this class.

HST 361  
TOPICS IN ISLAMIC HISTORY  
Undergraduate  
Variable topics. Consult course schedule for current listings.

HST 199 or HST 299 is a prerequisite for this class.

HST 362  
ATLANTIC HISTORY, 1492-1825  
Undergraduate  
An examination of intercontinental exchanges and cross-cultural links across the Atlantic ocean that both separated and united the Western Hemisphere, Europe, and Africa in the pre-industrial era.

HST 199 or HST 299 is a prerequisite for this class.

HST 363  
MODERN BALKANS (EUROPE) (PREREQ(S): HST 199 OR CONSENT OF INSTRUCTOR)  
Undergraduate  
The establishment of national states, the social transformation from peasant to industrial societies, and the effects of war and revolution in southeastern Europe since the late 18th century.

HST 199 or HST 299 or instructor consent is a prerequisite for this course.

HST 364  
PALESTINE UNDER THE BRITISH MANDATE  
Undergraduate  
This course examines the foundation and evolution of the British Mandate of Palestine from 1914 to 1948 in its British imperial, Middle Eastern, and world historical contexts. Students will engage primary and secondary sources associated with controverted issues, including Zionism, creation of the Mandate, immigration, and inter-communal conflict.

HST 199 or HST 299 is a prerequisite for this class.

HST 365  
THE CRUSADES  
Undergraduate  
Addresses the European Crusades to the Holy Land from a World Historical Perspective.

HST 199 or HST 299 is a prerequisite for this class.
HST 366
THE MODERN MIDDLE EAST AND NORTH AFRICA
Undergraduate
The history of the region since 1800. Topics covered include the end of Ottoman Empire, the impact of European Imperialism and the renewal of Islam.

HST 199 or HST 299 is a prerequisite for this class.

HST 367
COMPARATIVE LATIN AMERICAN BORDERLANDS
Undergraduate
This course compares the role of frontiers in the histories of Mexico, Brazil and Argentina. It will focus on periphery-center relations, the rise of caudillos, and frontier social movements.

HST 199 or HST 299 is a prerequisite for this class.

HST 368
SOCIAL MOVEMENTS IN LATIN AMERICA
Undergraduate
This course examines how Native Americans, slaves, peasants, and other subaltern people actively resisted their subservient status in Latin America. It will cover a variety of protest movements, from "pre-modern" (such as millenarian movements, slave rebellions, urban riots, and "race" wars) to "modern" (such as social revolutions).

HST 199 or HST 299 is a prerequisite for this class.

HST 369
REVOLUTIONS IN LATIN AMERICA
Undergraduate
This course surveys, analyzes, and compares a series of revolutionary movements, conflicts, and regimes in 20th Century Latin America.

HST 199 or HST 299 is a prerequisite for this class.

HST 370
AMERICAN COLONIAL HISTORY
Undergraduate
The European's first contact, exploration, and settlement of the Eastern seaboard, with discussion of significant political, economic, and social consequences.

HST 199 or HST 299 is a prerequisite for this class.

HST 371
THE AMERICAN REVOLUTION
Undergraduate
The establishment of American independence, adoption of the Constitution; the first years of the republic considered in analytical detail.

HST 199 or HST 299 is a prerequisite for this class.

HST 372
ANTEBELLUM AMERICA
Undergraduate
This course treats the significant social, political, economic, and cultural developments shaping America and Americans during the first fifty years of the nineteenth century.

HST 199 or HST 299 is a prerequisite for this class.
HST 373
THE CIVIL WAR ERA
Undergraduate
Treats the major political causes of the sectional conflict, the significant military strategies and tactics of the war, the end of slave, and the experiences of a wide-range of citizens and soldiers.

HST 199 or HST 299 is a prerequisite for this class.

HST 374
EMERGENCE OF MODERN AMERICA, 1877-1914
Undergraduate
New cultural patterns, political party battles, growth of big business and organized labor, women's suffrage movement, Populism and the Progressive Era.

HST 199 or HST 299 is a prerequisite for this class.

HST 375
THE GREAT DEPRESSION AND THE NEW DEAL ERA
Undergraduate
A consideration of World War I, the Twenties, the Great Depression, and the New Deal.

HST 199 or HST 299 is a prerequisite for this class.

HST 376
THE UNITED STATES SINCE 1940
Undergraduate
Significant developments in American life during the period after World War II.

HST 199 or HST 299 is a prerequisite for this class.

HST 378
THE AMERICAN WEST IN THE 20TH CENTURY
Undergraduate
This course explores cultural, social, and political interaction in the American West during the 20th century. Themes include popular culture, state-federal relationships, environmental changes, urbanization, political and social movements, immigration, and cultural formation.

HST 199 or HST 299 is a prerequisite for this class.

HST 379
RECONSTRUCTION AND THE RISE OF JIM CROW
Undergraduate
Covers the problems of reunion between the North and the South after the Civil War, including the struggle for African-Americans' civil and political rights, the transition to a free labor economy in the South, and the eventual end of reconstruction and establishment of racial segregation in the South and the nation.

HST 199 or HST 299 is a prerequisite for this class.

HST 382
CHICAGO HISTORY MUSEUM ADVANCED SEMINAR
Undergraduate
Students will develop skills and knowledge applicable to public history careers, will gain a firm conceptual understanding of public history historiography, and of how the Chicago History Museum does public history. Students will apply this knowledge to class discussions, assignments, and actual museum projects. The course will be take place at the CHM, and a CHM curator will teach the course. Expect group work and field trips. Class will comprise of students from DePaul and other Chicago-area universities.

HST 199 or HST 299 is a prerequisite for this class.
HST 383
BORDERLANDS AND FRONTIERS IN AMERICA
Undergraduate
Consideration of the changing conceptions of frontiers in American history with attention to the development of historical borderlands communities.

HST 199 or HST 299 is a prerequisite for this class.

HST 384
TOPICS IN AMERICAN HISTORY
Undergraduate
Variable topics. Consult course schedule for current listings.

HST 199 or HST 299 is a prerequisite for this class.

HST 385
UNITED STATES CONSTITUTIONAL HISTORY TO 1865
Undergraduate
Examines the English colonial charters, the constitutional aspects of the American Revolution and the federal Constitution; explores ratification issues, judicial power, the concepts of the Federal system, separation of powers, Foreign Affairs and national security as defined in the U.S. Constitution with reference to major Supreme Court decisions in these areas.

HST 199 or HST 299 is a prerequisite for this class.

HST 386
UNITED STATES CONSTITUTIONAL HISTORY SINCE 1865
Undergraduate
Problems of civil liberties, rights of accused, privacy and constitutional issues and controversies arising during and after World War II, including the major decisions of the Warren court, Burger court and Rehnquist court.

HST 199 or HST 299 is a prerequisite for this class.

HST 387
TOPICS IN RUSSIAN HISTORY
Undergraduate
Each time this course is taught, it will examine in depth a specific problem, issue, theme, or moment in Russian history as described in the course subtitle. Possible offerings include: "Mass Culture in the Soviet Union and Post-Soviet Russia," "Stalin and Stalinism," "Crime and Criminality in Russia," "The Russian Revolution," "Gender and Sexuality in Russia," and "The Rise and Fall of the New Soviet Man."

HST 199 or HST 299 is a prerequisite for this class.

HST 388
THE COURT AND THE U.S. BILL OF RIGHTS
Undergraduate
An examination of historical, philosophical, and legal developments related to the Bill of Rights in the U.S. Constitution. The course will also examine how the Bill of Rights has been affected by Supreme Court appointments, court decisions, and constitutional amendments.

HST 199 or HST 299 is a prerequisite for this class.

HST 389
TOPICS IN PUBLIC HISTORY
Undergraduate
Public history is a field of history that requires its practitioners to use the skills and methods of academic history with an eye towards connecting the public with that history. This seminar focuses on the skills, methods, sources and themes that are relevant to historians whose work takes them outside of the classroom. Theme of the seminar will vary with instructors. Some off-campus fieldtrips may be required.

HST 199 or HST 299 is a prerequisite for this class.
HST 390
PRACTICUM IN HISTORICAL RESEARCH AND WRITING
Undergraduate
The History Practicum allows students to engage in deep and sustained historical research and writing, with multiple opportunities for instructor feedback and student revision. It is also an excellent way for students to experience firsthand the linkages between broad reading in a given field and subsequent primary-source based research in that field. Every autumn and winter quarter, certain 300-level course offerings will be designated as Practicum-linked classes. Students ready to take this course can choose among the offerings as suits their interests.

HST 391
LOCAL AND COMMUNITY HISTORY
Undergraduate
Collaborative learning groups will work with community partners in order to produce a tangible end-of-quarter public history project whose audience will be the greater Chicago community. This course carries a junior year experiential learning credit.

HST 199 or HST 299 is a prerequisite for this class.

HST 392
PUBLIC HISTORY INTERNSHIP
Undergraduate
Selected students are placed in work-study positions, under faculty supervision to help prepare themselves for non-teaching careers with background in historical technique. Credit variable.

HST 199 or HST 299 is a prerequisite for this class.

HST 393
TEACHING HISTORY AND THE SOCIAL SCIENCES (CROSS-LISTED AS SE 310/ T&L 453)
Undergraduate
Teaching History And The Social Sciences (Cross-listed as SE 310/T&L 453)

HST 394
AFRICAN-AMERICAN URBAN HISTORY
Undergraduate
Examination of the African American experience in American cities: from slave era, to the migration, to the present.

HST 199 or HST 299 is a prerequisite for this class.

HST 395
ISSUES IN NON-U.S. LEGAL HISTORY
Undergraduate
Designed to develop in the prelaw student analytical and adversarial skills useful in the practice of law, and to confront controversial issues dealing with values of the lawyer and the citizen.

HST 199 or HST 299 is a prerequisite for this class.

HST 396
ORAL HISTORY PROJECT
Undergraduate
An introduction to the techniques of oral history with particular emphasis on public history.

HST 199 or HST 299 is a prerequisite for this class.

HST 397
HISTORY CAPSTONE SEMINAR
Undergraduate
Open to seniors majoring in History. Others may take course with permission of instructor.

(HST 199 or HST 299), Senior standing and status as a History major or minor are a prerequisite for this class.
HST 398
STUDY TOUR
Undergraduate
An in-depth, on-site overview of the historical, political, social and economic reality of a foreign country. Credit variable.

HST 399
INDEPENDENT STUDY
Undergraduate
Majors only. Credit variable.
Junior standing or above is a prerequisite for this class.

HST 421
THE HISTORICAL DISCIPLINE
Graduate
This course introduces students to the fundamental concerns and skills necessary for the study of history at the graduate level. It does this by providing a “history of history,” giving students an overview of the growth and development of the academic discipline of history, by addressing issues of methodology, historiography and historical philosophy, and by providing students with an awareness of current concerns, controversies, and debates in the discipline. Restricted to students in the MA in History program.
Status as an MA in History student is a prerequisite for this class.

HST 422
SEMINAR IN PRIMARY SOURCE ANALYSIS
Graduate
This course builds upon HST 421. It focuses on issues raised by the analysis of historical evidence, and exposes students to the many practical and theoretical tools by which historians construct historical knowledge out of this “raw” material. The course will include study of primary sources, methods of analysis and authentication, and ways in which different kinds of sources are integrated into coherent historical narratives.
HST 421 is a prerequisite for this class.

HST 431
COLLOQUIUM IN AMERICAN HISTORY
Graduate
Variable topics. Consult course schedule for current listings.
HST 421 is a prerequisite for this class.

HST 432
COLLOQUIUM IN LATIN AMERICAN HISTORY
Graduate
Variable topics. Consult course schedule for current listings.
HST 421 is a prerequisite for this class.

HST 433
COLLOQUIUM IN AFRICAN HISTORY
Graduate
Variable topics. Consult course schedule for current listings.
HST 421 is a prerequisite for this class.

HST 434
COLLOQUIUM IN ASIAN HISTORY
Graduate
Variable topics. Consult course schedule for current listings.
HST 421 is a prerequisite for this class.
HST 435
COLOQUIUM IN EUROPEAN HISTORY
Graduate
Variable topics. Consult course schedule for current listings.

HST 421 is a prerequisite for this class.

HST 436
COLOQUIUM IN ISLAMIC HISTORY
Graduate
Variable topics. Consult course schedule for current listings.

HST 421 is a prerequisite for this class.

HST 437
COLOQUIUM IN WORLD HISTORY
Graduate
Variable topics. Consult course schedule for current listings.

HST 421 is a prerequisite for this class.

HST 438
COLOQUIUM: SPECIAL TOPICS IN HISTORY
Graduate
Variable topics. Consult course schedule for current listings.

HST 421 is a prerequisite for this class.

HST 489
GRADUATE CAPSTONE
Graduate
This is an intensive seminar in which students are asked to analyze a number of important works of scholarship drawn from the breadth and complexity of the historical discipline. The course allows students to synthesize the many skills they have learned in their earlier classes, notably the ability to read and assess historical monographs. They will thereby demonstrate their competence in analyzing historical arguments, their knowledge of both historiography and historical content, and their proficiency in understanding the variety of primary sources and methods of interpreting them.

HST 421 is a prerequisite for this class.

HST 492
GRADUATE INTERNSHIP
Graduate
Internship.

HST 421 is a prerequisite for this class.

HST 497
INDEPENDENT STUDY
Graduate
Independent Study

HST 421 is a prerequisite for this class.
HST 499  
**THESIS RESEARCH**  
Graduate  
Between four and eight hours credit to be determined by the department.

HST 421 is a prerequisite for this class.

HST 500  
**CANDIDACY CONTINUATION**  
Graduate  
Required of all students who are not registered for regular courses but who occasionally utilize University facilities during completion of course requirements and/or research. Non-credit. $40.00 per quarter.

HST 501  
**CANDIDACY MAINTENANCE**  
Graduate  
This zero-credit hour course is for MA in History students who are not actively working on their theses or final projects, but who wish to maintain university status. Candidacy Maintenance does not allow borrowing or deferment of loans, but does grant student access to DePaul resources such as labs, libraries and the gym.

HTHC 515  
**INTRO TO HEALTH COMMUNICATION**  
Graduate  
Because of the increasing degree of health consciousness in our society, individuals not only interact more frequently with health care providers, but health care organizations play more active roles in their surrounding communities. In addition, health care cultures are changing. Health care organizations play active social and political roles when responding to national health issues or crises. Hence, it is important that we, as consumers of health care, understand the communication challenges that are inherent within health care organizations, and how those can impact the effectiveness of our communication as a participant in health care contexts.

HTHC 516  
**RESEARCH METHODS FOR HEALTH CARE PRACTITIONERS**  
Graduate  
This course focuses on health care methodologies relevant to health care administration — including a cross section of both qualitative and quantitative methodologies. Designing questionnaires and surveys, the analysis and presentation of survey data, interviewing strategies, the analysis and presentation of qualitative data. Students will also be provided with skilled technical writing assignments geared toward providing an understanding of how to most effectively present data within the contexts of reports, visuals for meeting or memoranda.

HTHC 517  
**HEALTH CARE LITERACY**  
Graduate  
The U.S. Department of Health and Human services included improved consumer health literacy as Objective 11-2, and identified health literacy as an important component of health communication, medical product safety and oral health. Health Literacy refers to obtaining, processing and understanding basic health information. This course examines how the consumer can be not only informed more effectively and efficiently, but also how health information should inform decision making in multiple health contexts.

HTHC 519  
**ASSESSMENT AND INTERVENTION FOR HEALTH CARE ADMINISTRATORS**  
Graduate  
Health care practitioners must acquire management consulting skills necessary to identify areas in need of change within health care organizations. Problem identification, data collection, intervention and implementation phases of assessment and intervention are taught from the perspective of the health care organization. The course probes common management problems in health care, internal working relationship challenges as well as organizational structure issues that arise.
HTHC 520
HEALTH CARE CAMPAIGNS AND COMMUNITY ACTION
Graduate
This course will focus on the use of communication strategies to inform and influence individual and community decisions regarding health in the following contexts: the multidimensional nature of health communication; understanding empirical research in health communication; behavioral theories in health communication; rhetorical theories in health communication; legal and ethical concerns in health communication; the communication of risk and uncertainty; and the design of health campaigns.

HTHC 521
HEALTH AND FAMILY COMMUNICATION
Graduate
The course, Family and Health Communication, addresses health-related issues that families may experience, while situating them within a theoretical context. Using theories such as Family Systems Theory and Communication Privacy Management Theory, this course will take a Lifespan Approach to better understand family health issues. Some of the topics that will be covered in this course may include care giving responsibilities, long-term disease, disability, addiction, psychological disruption, sexual health, and end of life issues as affects the family system. Cultural and social norms, in addition to public and health policies are also addressed, as they provide insight into the larger scope of understanding family and health communication, as ultimately, the health of family members impact the functioning of the family system.

HTHC 522
MANAGERIAL COMMUNICATION IN HEALTH CARE CONTEXTS
Graduate
This course will equip students to more effectively understand and manage the dynamic communicative systems, processes, and interactions of people and messages within healthcare environments. This course will explore interpersonal differences with a focus on the role communication plays with various organizational stakeholders, superior-subordinate relationships, internal-external customer relations, managerial problem solving, decision-making, facilitation of change and use of appropriate leadership strategies, as well as organizational structure and ethical and legal requirements. Additionally, this course also focuses on understanding the relationship between designing, managing, and disseminating messages, data, information, and knowledge that health care facilities and professionals have to deal with on a daily basis; appropriate performance feedback principles; and presentational speaking and writing.

HTHC 523
TOPICS IN HEALTH COMMUNICATION
Graduate
Topics will include: Gay, Lesbian and Transgender Health Care Issues, Patient Advocacy, Communication and Constraint, Multicultural Communication in Health Care Contexts and Advance Care Planning

HTHC 524
HEALTH CARE TEAMS & LEADERSHIP
Graduate
Modern organizations are increasingly interested in shifting their organizational structures towards the goal of creating self-managed work teams. Much of the health care delivery system is already structured formally or informally around the team concept, whether these be surgery teams, consulting office staff, or other health and wellness delivery personnel. Therefore, those pursuing a career in health care greatly benefits from knowledge and experience with two interdependent aspects of group dynamics: decision-making under conditions of uncertainty, and the philosophy and practice of developing groups into self-managed teams. This course will combine a lecture/discussion with a teamwork intensive action learning component towards the goal of making the student competent to either create or optimize the results of self-managed work teams in their own organization (if called upon to do so), or to understand and thrive in this work mode without stress.

HTHC 525
NARRATIVES IN HEALTH CARE
Graduate
Focusing on the performance and narrative paradigms of communication studies, the course would survey uses of performance and narrative methods to consider health communication relationships. Narrative and narrative performance are sites of health communication issues for marginalized populations, difficult conversations, and alternate means of reporting. For example, narrative and narrative performance are increasingly being used as part of medical curriculum, as a means to train health care professionals to understand the experiences of their patients, encourage deep listening, and foster different professional-patient relations. For cancer, HIV/AIDS, and other patients, performance becomes a means of speaking into mainstream and dominant discourses of health and to actively shape discourses from their own subjectivities. This increases the visibility of health care experiences in its gendered, sexualized, and racialized dimensions. Finally, narrative and narrative performance offers an additional means of visibility in catalyzing change in public, legislative, scholarly and relational arenas.
IB 500
GLOBAL ECONOMY
Graduate
This course is designed to be an introduction to the economic environment in which businesses operate. With the increasing interdependence of national economies and the growing role of global enterprises, the understanding of international economic issues is vital to decision-makers. The material covered will include both socio-cultural aspects and economic and financial dimensions of global business. Students should obtain a grasp of the basic theory as well as a knowledge of the major current issues in the global economy. (FORMERLY ECO 556)

IB 505
GEOPOLITICAL AND CULTURAL ISSUES IN INTERNATIONAL BUSINESS
Graduate
Analysis of major geographical and cultural conditions in those countries most involved in U.S. foreign trade. Guest lectures, comprehensive maps and pertinent media presentations supplement weekly class discussion.

IB 520
INTERNATIONAL TRADE THEORY AND POLICY
Graduate
Modern theories of international trade: classical theory of comparative advantage, factor proportions theory, factor price equalization, application of welfare economics to international trade, including regional economic integration, commercial policy and tariff problems.

FIN 555 is a prerequisite for this class

IB 521
INTERNATIONAL MACROECONOMICS (CROSS-LISTED AS ECO 558)
Graduate
This course analyzes traditional macroeconomic issues in a framework that explicitly allows for international trade and capital flows. Topics covered include exchange rate and balance of payments determination, the impact of international trade and capital mobility on domestic monetary and fiscal policy, fixed vs. floating exchange rate systems, exchange rate overshooting and other topics. Cross-listed as ECO 558.

ECO 509 is a prerequisite for this class.

IB 525
ECONOMICS OF DEVELOPING COUNTRIES
Graduate
This course reviews models of economics development and some of the key issues in economic development including agricultural and rural development, population, economic growth, the role of government, health, education, income distribution, trade regime and policy, international capital flows and the environment, international trade and foreign resource flows. The course integrates country studies of selected developing economies and regions, cross-country statistical studies and theoretical tools drawn from the fields of microeconomics, macroeconomics, and international trade.

FIN 555 is a prerequisite for this class

IB 526
COMPARATIVE ECONOMIC SYSTEMS
Graduate
A study of the contrasting theories of socialism and capitalism.

FIN 555 is a prerequisite for this class

IB 530
INTERNATIONAL FINANCE
Graduate
International Finance integrates the financial activities, institutions, and multinationals of the global finance arena. In addition to extending the tools of financial analysis to an international setting, the course studies the strategies available to a multinational because of operations in a multiple of countries. Topics include foreign currency and political risk, capital budgeting in a multinational setting, and cash flow management between countries.

FIN 555 is a prerequisite for this class
The objective of this course is to develop clear awareness of the international business operations, practices and environment. It provides the concepts, methods and tools necessary to face the global challenges in international management. The objective is met through lectures, classroom discussions, library assignments and research work. Students will learn the effective use of the international business references. By the end of the course, they are expected to have developed a high level of competency in acquiring, understanding, analyzing and synthesizing international management information from international business directories, databases and CD-ROMs.

In-depth analysis of the economic and cultural aspects of doing business in a particular region, e.g. Western Europe, Middle East, Japan, etc. The course focuses on the region's business relations with the United States, its trade and management practices and the successful conduct of business negotiations. The area under consideration will vary from quarter to quarter in order to cover regions of particular interest to our students and the business community of Chicago.

The differences between markets and distribution systems in various countries are explored. By emphasizing the social and economic factors causing these differences a sound understanding of and empathy with different international marketing problems are developed. Analyses are made of the organization of trade channels in various cultures, of typical government policies towards international trade in countries at different stages of development, and of international marketing research, advertising, and exporting. Offered Variably.

MKT 555 is a prerequisite for this class.

Off-campus seminar, usually one to three weeks, providing exposure to international business cultures. IB 755 is a corequisite for this class.

Some of the International Business Seminars offered eight rather than four credits. Students are ordinarily required to complete an in-depth research paper in an international business area approved by the director of the seminar. Information gathered during the seminars with business and governmental organizations must be incorporated into the research paper. IB 750 is a corequisite for this class.

Content and format of the course are variable. An in-depth study of current issues. Subject mater will be indicated in class schedule. Offered Variably.

Available to graduate students of demonstrated capability for intensive independent work in international business.

Introduction to chemical engineering and engineering productivity software. Communication skills development, technical reporting and presentation, engineering ethics, and a variety of topics are discussed.
ICE 202
MATERIAL AND ENERGY BALANCES
Undergraduate
Material and energy balances for engineering systems subjected to chemical and physical transformations. Calculations on industrial processes. CSC 224/225 or equivalent; MAT 149/152/162 and CHE 113 or CHE 131 recommended. (Taught at IIT as CHE 202)

ICE 296
INTRODUCTION TO IPRO
Undergraduate
Introduction to process design. Principles and techniques in effective team work. Performance of selected design tasks in project groups integrated with ICE 496. Practice with process design software. First part of the ICE 296 - ICE 496 project package. Only chemical engineering students should register for this course. ICE 101, ICE 202, or consent recommended. [Taught at IIT as IPRO 296]

ICE 301
FLUID MECHANICS AND HEAT-TRANSFER OPERATIONS
Undergraduate
Flow of fluids and heat transfer. Fundamentals of fluid flow and heat transfer design equations as applied to selected unit operations. ICE 202 and ICE 252 recommended. COREQUISITE(S): ICE 343, MAT 260. Taught at IIT as CHE 301.

ICE 302
MASS-TRANSFER OPERATIONS
Undergraduate
Mass transfer in stagewise and continuous contacting equipment. Mass transfer design equations as applied to selected unit operations. Unsteady state operations in mass transfer equipment. (Taught at Illinois Institute of Technology as CHE 302) ICE 301 recommended.

ICE 317
CHEMICAL ENGINEERING LABORATORY I
Undergraduate
Laboratory work in the unit operations of chemical engineering, fluid flow, heat transfer, and other selected topics. (Taught at Illinois Institute of Technology as CHE 317) ICE 301 recommended.

ICE 320
TRANSPORTATION PHENOMENA
Undergraduate
The equations of change in different coordinate systems (mass, momentum, and energy transport). Velocity distribution in laminar and turbulent flow. Formulation and analytical solutions to the problems of viscous flow, molecular diffusion, heat condition and convection. (Taught at Illinois Institute of Technology as CHE 406) ICE 301, ICE 302 & ICE 252 recommended.

ICE 322
CHEMICAL ENGINEERING LABORATORY II
Undergraduate
Laboratory work in distillation, humidification, drying, gas absorption, filtration, and other areas. (Taught at Illinois Institute of Technology as CHE 418)

ICE 324
CHEMICAL REACTION ENGINEERING
Undergraduate
Introduction to the fundamentals of chemical kinetics. The design, comparison, and economic evaluation of chemical reactors. Emphasis on homogeneous systems. Taught at Illinois Institute of Technology as CHE 423. ICE 302, ICE 351 and ICE 326 recommended.

ICE 326
PROCESS MODELING AND SYSTEM THEORY
Undergraduate
ICE 328
PROCESS CONTROL
Undergraduate
Dynamic process models, stability assessment, feedback and feedforward control strategies, design and tuning of closed-loop controllers, time
domain and frequency domain design and performance assessment methods. Multivariable systems, interaction, multi-loop control. Software
for process simulation and controller design. (Taught at Illinois Institute of Technology as CHE 435) ICE 302 and ICE 326 recommended.

ICE 330
NUMERICAL AND DATA ANALYSIS
Undergraduate
Utilization of numerical methods to find solutions to a variety of chemical engineering problems. Emphasis placed on problem formulation,
development of computer code, and interpretation of results. Techniques covered include: systems of algebraic equations, linear regression,
and statistics. Numerical differentiation and integration, solution of ordinary and partial differential equations. (Taught at Illinois Institute of
Technology as CHE 439)

ICE 332
CHEMICAL PROCESS THERMODYNAMICS
Undergraduate
Second law analysis of cooling, separation, combustion, and other chemical processes. Chemical reaction equilibrium and processing
applications. ICE 351 recommended.

ICE 334
CHEMICAL PROCESS DESIGN
Undergraduate
Introduction to design techniques and economic aspects of chemical processes. The technical and economic aspects of equipment selection
and design, alternative methods of operation. (Taught at Illinois Institute of Technology as CHE 494) ICE 302, ICE 351 and ICE 326
recommended.

ICE 351
CHEMICAL ENGINEERING THERMODYNAMICS
Undergraduate
Laws of thermodynamics and their application to chemical engineering operations. (Taught at IIT as CHE 351) ICE 343 recommended.

ICE 383
ELECTRONIC CIRCUITS
Undergraduate
Circuit concepts, Ohm's Law, Kirchoff's Laws, network theorems. Circuit elements, DC and AC network analysis. Diodes, transistors, and
electronic amplifiers. Digital electronics circuits and instrumentation. (Taught at IIT as ECE 383) PHY 172 recommended.

ICE 397
INTERPROFESSIONAL PROJECT
Undergraduate
Interprofessional projects allow students to learn teamwork, leadership and project management skills, while working in multidisciplinary
teams on projects involving technical, ethical, environmental, economic, public policy and legal issues. IPRO project teams are typically
comprised of 6-10 students from sophomore through graduate level from all disciplines that can broadly contribute to a project effort. While
every effort will be made to accommodate students' first choices, it may be necessary to balance students across all projects that will be
scheduled for the semester or to consolidate students into fewer projects to meet minimum team requirements. Specific rules about selection
of IPRO projects may apply in certain degree programs. Some projects may carry Humanities or Social Sciences credit. Students must consult
the lead faculty member for the project and their faculty advisor before registering for a project. (Taught at Illinois Institute of Technology as
IPRO 397)
ICS 200
INTRODUCTION TO BUSINESS
Undergraduate
This course is designed for non-Commerce majors who want a minor in business. The course will help the student develop an understanding of the role of the major functional areas of business, as well as ethical considerations, the globalization of business and the role of entrepreneurship. Considerations will be given to the possible career opportunities in each of the functional areas studied.

Undergraduate Business students (COMM, UNCOM, GPCOM) are restricted from registering for this class.

ICS 201
PERSONAL FINANCIAL DECISION MAKING
Undergraduate
Students will be exposed to a wide variety of money-related topics, with an aim to familiarize the participants with everyday financial issues.

ICS 350
INTERNATIONAL BUSINESS SEMINAR
Undergraduate
This foreign study course is meant to introduce the student to the world of international life and business as it is today. The course provides students the opportunity to visit and study foreign commercial enterprises on-site as they exist today. Additional emphasis is placed on the understanding overseas cultures, self-reference criteria, and the fact that people around the world can maintain/develop hopes and dreams within their own lifestyle even though it may differ from others. Most courses in this group will count for liberal studies credit as an experiential learning course. See the Director of the Driehaus Center for International Business or the College of Commerce undergraduate office for additional information. Registration with the Driehaus Center is required. International Business Seminars may not be taken Pass/Fail.

ICS 392
SENIOR SEMINAR
Undergraduate
A variety of Senior Seminars is offered every term. Individual sections focus on selected content areas reflecting issues facing business in contemporary society. These seminars are designed to enable and encourage students to see the world differently, to reflect on those differences and to communicate, both orally and in writing, the results of that reflection.

Senior standing is a prerequisite for this class.

ICS 394
ENTREPRENEURSHIP STRATEGY
Undergraduate
This course is an overview of strategic management applied to entrepreneurial enterprises. General business management problems integrating marketing, accounting, finance and management functions are analyzed from the perspective of the CEO or entrepreneur concerned with start-up and planning of a new venture. The case method is used in this course and real "live" cases may be analyzed. The entrepreneurial process is investigated, including entrepreneurial characteristics, trends in the small business sector of the global economy, start-up and growth strategies and nurturing creativity in organizations. Focus is placed on either a consulting project with a small business or community organization, which may require time outside of class for the project, or on case studies.

(FIN 290 or FIN 310), MGT 300, MKT 310 and senior standing are a prerequisite for this class.

ICS 395
MANAGEMENT STRATEGY
Undergraduate
Management strategy is a course which synthesizes the functional business activities into a general management perspective of the business enterprise. This course presents a conceptual framework for understanding the operation of the firm within the global business environment. Corporate strategy is examined from the perspective of: strategic choice, the link between strategy and organization, and the management of strategic change. Examples will be drawn from service, manufacturing, and not-for-profit organizations. The course emphasizes the use of group decision-making, self-directed work teams, and formal group reports and presentations.

MGT 300, MKT 310 and FIN 310 are a prerequisite for this class.
ICS 396
HOSPITALITY STRATEGY
Undergraduate
Hospitality strategy is a capstone course designed to expose students to a strategic perspective on issues that concern the firm as a whole. This viewpoint is integrative in that it draws on concepts from the functional disciplines (i.e. Marketing, Finance, Accounting, Operations) in the diagnosis, analysis and resolution of complex business situations. Students will read, discuss and apply a body of theory and techniques from the field of strategic management. The course emphasizes the development of practical problem solving skills. Corporate strategy is examined from the perspective of: strategic choice, the link between strategy and organization, and the management of strategic change. Examples will be drawn from various hospitality operations around the world. The course emphasizes the use of group decision-making, self-directed work teams, and formal group reports and presentations.

Senior standing is a prerequisite for this class.

ICS 398
SPECIAL TOPICS
Undergraduate
Special Topics. Content and format of this course is variable. Subject matter will be listed in the university class schedule. These courses will be used for a variety of course content and delivery methods including the Foreign Study Seminar Series.

ICS 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive work in interdisciplinary studies.

At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.

IDS 497
INDEPENDENT STUDY (NON-CAPSTONE)
Graduate
Independent study in an area that does not lead directly into the thesis or capstone. Students may also register for this course on a topic indirectly related to their thesis or capstone if they will subsequently take IDS 498, in which the student directly prepares to write the Integrating Project/Thesis. The MALS and IDS Program requires that students taking independent studies follow a specified format of meeting frequency, activities, and scholarly production. This format is available on the program website or from the MALS and IDS office. Registration is by permission of the Director of the MALS and IDS Program and the instructor of the independent study.

IDS 498
INDEPENDENT STUDY [CAPSTONE]
Graduate
Independent study undertaken as preparation for thesis or practicum capstone options. This course is optional preparation for IDS 499, Capstone. The MALS and IDS Program requires that students taking this course follow a specified format of meeting frequency, that they produce a review of literature related to their thesis or practicum, an annotated bibliography, and the required Formal Proposal for the thesis or practicum. Registration is by permission of the Director of the MALS and IDS Program and the permission of the instructor who serves as the thesis or practicum director.

IDS 499
CAPSTONE
Graduate
Capstone for students doing a thesis, practicum or enhanced portfolio essay. Students may register for this course after the Formal Proposal for the thesis or practicum, or the Enhanced Portfolio Essay Proposal, has been approved. Students are normally expected to complete their capstone projects within the quarter in which they take this course. This course carries four hours of credit. Registration is by permission of the Director of the MALS and IDS Program and the permission of the instructor who serves as the student's capstone director.

IDS 501
ACTIVE STATUS
Graduate
Students register for this course during periods when they are not registered for courses but wish to have access to university facilities. Ordinarily students will not use this course once they have been admitted to candidacy during the thesis or capstone.
IDS 502  
CANDIDACY CONTINUATION  
Graduate  
Students who have completed ISP 499 Thesis/Capstone may register for this course in order to have continued access to university facilities. Students may register for this course no more than three times.

IDS 602  
CANDIDACY CONTINUATION  
Graduate  
This registration is required of all students who are not registered for courses but who occasionally use University facilities during completion of course requirements or research projects. Non-credit. $40.00 per quarter.

IIT 105  
INTRODUCTION TO COMPUTER PROGRAMMING I  
Undergraduate  
Introduces the use of high-level programming language (C/C++) as a problem-solving tool including basic data structures and algorithms, structured programming techniques, and software documentation. Designed for students who have had little or no prior experience with computer programming. (Taught at Illinois Institute of Technology as CS 105.)

IIT 115  
ENGINEERING GRAPHICS AND DESIGN  
Undergraduate  
Basic traditional and computer-based techniques and applications, multiview sketching, orthographic projection, isometric and oblique pictorials, sectioning, auxiliary views, principles of descriptive geometry, dimensioning, detail drawings, introduction to design and computer-aided drafting and design (CAD). (Taught at Illinois Institute of Technology as EG 105.)

IIT 200  
INTRODUCTION TO C++ PROGRAMMING  
Undergraduate  
Problem-solving and program design using C++. Introduces a variety of programming techniques, algorithms, and basic data structures-including an introduction to object-oriented programming. (Taught at Illinois Institute of Technology as CS 200.)

IIT 201  
MECHANICS OF SOLIDS I  
Undergraduate  
Free body diagrams. Equilibrium of a particle, a system of particles, and a rigid body. Distributed forces, centroids, centers of gravity, and moments of inertia. Analysis of structures. Friction. Internal loads in bars, shafts and beams. Stress and strain in axially loaded members. (Taught at Illinois Institute of Technology as MMAE 201.)

IIT 202  
MECHANICS OF SOLIDS II  
Undergraduate  
Stress and strain relations, mechanical properties. Axially loaded members. Torsion of circular shafts. Plane stress and strain, Mohr's circle, stress transformation. Elementary bending theory, normal and shear stresses in beams, beam deflection. Combined loading. (Taught at Illinois Institute of Technology as MMAE 202.)

IIT 203  
INTRODUCTION TO MECHANICS  
Undergraduate  
IIT 210
CIRCUIT ANALYSIS I
Undergraduate
Ohm's Law, Kirchoff's Laws, and network element voltage-current relations. Application of mesh and nodal analysis to circuits. Dependent sources, operational amplifier circuits, superposition, Thevenin's and Norton's Theorems, maximum power transfer theorem. Transient circuit analysis for RC, RL, and RLC circuits. Introduction to Laplace Transforms. Concurrent registration in ECE 212 and ECE 218 is strongly encouraged. (Taught at Illinois Institute of Technology as ECE 211)

IIT 211
MATERIALS SCIENCE
Undergraduate
The scientific principles determining the structure of metallic, polymeric, ceramic semiconductor and composite materials; electronic structure, atomic bonding, atomic structure, microstructure and macrostructure. The basic principles of structure-property relationships in the context of chemical, mechanical, and physical properties of materials. (Taught at Illinois Institute of Technology as MS 201.)

IIT 212
ANALOG AND DIGITAL LABORATORY
Undergraduate
Basic experiments with analog and digital circuits; familiarization with test and measurement equipment; combinational digital circuits; familiarization with latches, flip-flops, and shift registers; operational amplifiers; and transient effects in first-order and second-order analog circuits; PSpice software applications. (Taught at Illinois Institute of Technology as ECE 212)

IIT 213
CIRCUIT ANALYSIS II
Undergraduate
Circuit Analysis II Sinusoidal excitation and phasors. AC steady-state circuit analysis using phasors. Complex frequency, network functions, pole-zero analysis, frequency response, and resonance. Two-port networks, transformers, mutual inductance, AC steady-state power, RMS values, introduction to three-phase systems and Fourier series. Concurrent registration in ECE 214 is strongly encouraged. (Taught at Illinois Institute of Technology as ECE 213)

IIT 214
ANALOG & DIGITAL LAB II
Undergraduate
Design-oriented experiments including counters, finite state machines, sequential logic design, impedances in AC steady-state, resonant circuits, two-port networks, and filters. A final project incorporating concepts from analog and digital circuit design will be required. (Taught at Illinois Institute of Technology as ECE 214)

IIT 218
DIGITAL SYSTEMS
Undergraduate
Number systems and conversions, binary codes, and Boolean algebra. Switching devices, discrete and integrated digital circuits, analysis and design of combinational logic circuits. Karnaugh maps and minimization techniques. Counters and registers. Analysis and design of synchronous sequential circuits. (Taught at IIT as ECE 218)

IIT 242
DIGITAL COMPUTERS & COMPUTING
Undergraduate
Basic concepts in computer architecture, organization, and programming, including: integer and floating point number representations, memory organization, computer processor operation (the fetch/execute cycle), and computer instruction sets. Programming in machine language and assembly language with an emphasis on practical problems. Brief survey of different computer architectures. (Taught at Illinois Institute of Technology as ECE 242)

IIT 252
INTRODUCTION TO DIFFERENTIAL EQUATIONS
Undergraduate
IIT 271
ENGINEERING MATERIALS AND DESIGN
Undergraduate
Mechanical behavior of metals, polymers, ceramics and composites, laboratory testing methods including tension, torsion, hardness, impact, toughness, fatigue and creep. Evaluation of structural performance in terms of material processing, service conditions and design. (Taught at Illinois Institute of Technology as MMAE 271.)

IIT 300
INSTRUMENTATION LAB
Undergraduate
Basic electronic skills for scientific research. Electrical measurements, basic circuit analysis, diode and transistor circuits. Transistor and integrated amplifiers, filters, and power circuits. Basics of digital circuits, including Boolean algebra and design of logic circuits. (Taught at Illinois Institute of Technology as PHYS 300)

IIT 301
COMMUNICATION ELECTRONICS
Undergraduate
Radio frequency AM, FM, and PM transmitter and receiver principles. Design of mixers, oscillators, impedance matching networks, filters, phase-locked loops, tuned amplifiers, power amplifiers, and crystal circuits. Nonlinear effects, intermodulation distortion, and noise. Transmitter and receiver design specification. Credit will be given for either ECE 401 or ECE 409, but not for both. (Taught at IIT as ECE 401)

IIT 304
MECHANICS OF AEROSTRUCTURES
Undergraduate
Loads on aircraft, and flight envelope. Stress, strain and constitutive relations. Torsion of open, closed and multi-cell tubes. Energy methods. Castigliano's theorems. Structural instability. (Taught at Illinois Institute of Technology as MMAE 304)

IIT 305
DYNAMICS
Undergraduate

IIT 306
MECHANICS OF SOLIDS AND DESIGN
Undergraduate

IIT 307
ELECTRODYNAMICS
Undergraduate

IIT 308
SIGNALS AND SYSTEMS
Undergraduate
Time and frequency domain representation of continuous and discrete time signals. Introduction to sampling and sampling theorem. Time and frequency domain analysis of continuous and discrete linear systems. Fourier series convolution, transfer functions. Fourier transforms, Laplace transforms, and Z-transforms. (Taught at Illinois Institute of Technology as ECE 308)
IIT 310
FLUID MECHANICS WITH LABORATORY
Undergraduate
Basic properties of fluids in motion. Lagrangian and Eulerian viewpoints, material derivative, streamlines, etc. Continuity, energy and linear
and angular momentum equations in integral and differential forms. Integration of equations for one-dimensional flows and application to
problems. Incompressible viscous flow; Navier-Stokes equations, parallel flow, pipe flow, and the Moody diagram. Introduction to laminar
and turbulent boundary layers and free surface flows. Lab Component: Introduction to measurements of fluid properties and basic features of
fluid flows; flow through pipes and channels, flow-induced forces on bodies; First Law of Thermodynamics; six laboratory experiments in
small groups supplemented by demonstrations and films. (Taught at Illinois Institute of Technology as MMAE 310.)

IIT 311
COMPRESSIBLE FLOW
Undergraduate
Design of nozzles, diffusers and wind tunnels. Simple waves and shocks in unsteady duct flow. Steady two-dimensional supersonic flow
including oblique shocks and Prandtl-Meyer expansions. (Taught at Illinois Institute of Technology as MMAE 311)

IIT 312
AERODYNAMICS OF AEROSPACE VEHICLES
Undergraduate
Analysis of aerodynamic lift and drag forces on bodies. Potential flow calculation of lift on two-dimensional bodies: numerical solutions;
source and vortex panels. Boundary layers and drag calculations. Aerodynamic characteristics of airfoils; the finite wing. (Taught at Illinois
Institute of Technology as MMAE 312)

IIT 313
ENGINEERING ELECTRONICS
Undergraduate
Physics of semiconductor devices. Diode operation and circuit applications. Regulated power supplies. Bipolar and field-effect transistor
operating principles. Biasing techniques and stabilization. Linear equivalent circuit analysis of bipolar and field-effect transistor amplifiers.
Laboratory experiments reinforce concepts. (Taught at Illinois Institute of Technology as ECE 311)

IIT 314
ELECTRONIC CIRCUITS
Undergraduate
structure, characteristics and applications. Stability and compensation. Laboratory experiments reinforce concepts. (Taught at Illinois Institute
of Technology as ECE 312)

IIT 315
FLUID MECHANICS
Undergraduate
Basic properties of fluids in motion. Langrangian and Eulerian viewpoints, materials derivative, streamlines, etc. Continuity, energy, and linear
and angular momentum equations in integral and differential forms. Integration of equations for one-dimensional forms and application to
problems. Incompressible viscous flow; Navier-Stokes equations, parallel flow, pipe flow, and the Moody diagram. Introduction to laminar
and turbulent boundary layers and free surface flows (Taught at IIT as MMAE 313).

IIT 317
INTRODUCTION TO COMPUTER NETWORKS WITH LABORATORY
Undergraduate
Emphasis on the physical, data link, and medium access layers of the OSI architecture. Different general techniques for networking tasks, such
as error control, flow control, multiplexing, switching, routing, signaling, congestion control, traffic control, scheduling will be covered along
with their experimentation and implementation in a laboratory. (Taught at Illinois Institute of Technology as ECE 407)
IIT 319  
FUNDAMENTALS OF POWER ENGINEERING [CORRESPONDS TO ECE 319]  
Undergraduate  
Principles of electromechanical energy conversion. Fundamentals of the operation of transformers, synchronous machines, induction machines, and fractional horsepower machines. Introduction to power network models and per-unit calculations. Gauss-Siedel load flow. Lossless economic dispatch. Symmetrical three-phase faults. Laboratory considers operation, analysis and performance of motors and generators. The laboratory experiments also involve use of PC-based interactive graphical software for load flow, economic dispatch, and fault analysis. (Taught at Illinois Institute of Technology as ECE 319)

IIT 320  
THERMODYNAMICS  
Undergraduate  
Introduction to thermodynamics including properties of matter: First Law of Thermodynamics; and its use in analyzing open and closed systems; limitations of the Second Law of thermodynamics; entropy. (Taught at Illinois Institute of Technology as MMAE 320.)

IIT 321  
APPLIED THERMODYNAMICS  
Undergraduate  

IIT 322  
HEAT AND TRANSFER  
Undergraduate  

IIT 323  
MICROWAVE CIRCUITS AND SYSTEMS WITH LABORATORY  
Undergraduate  
Maxwell's equations, waves in free space, metallic and dielectric waveguides, microstrips, microwave cavity resonators and components, ultra-high frequency generation and amplification. Analysis and design of microwave circuits and systems. (Taught at IIT as ECE 423)

IIT 325  
ANALYSIS AND DESIGN OF INTEGRATED CIRCUITS  
Undergraduate  
Contemporary analog and digital integrated circuit analysis and design techniques. Bipolar, CMOS and BICMOS IC fabrication technologies, IC Devices and Modeling. Analog ICs including multiple-transistor amplifiers, biasing circuits, active loads, reference circuits, output buffers; their frequency response, stability and feedback consideration. Digital ICs covering inverters, combinational logic gates, high-performance logic gates, sequential logics, memory and array structures. Team design projects. (Taught at IIT as ECE 425)

IIT 329  
INTRODUCTION TO VLSI DESIGN  
Undergraduate  
Processing, fabrication, and design of Very Large Scale Integration (VLSI) circuits. MOS transistor theory, VLSI processing, circuit layout, layout design rules, layout analysis, and performance estimation. The use of computer-aided design (CAD) tools for layout design, system design in VLSI, and application-specific integrated circuits (ASICs). In the laboratory, students create, analyze, and simulate a number of circuit layouts as design projects, culminating in a term design project. (Taught at IIT as ECE 429)
IIT 330
ENGINEERING MEASUREMENTS
Undergraduate
Introduction to applications of measurement instrumentation and design of engineering experiments. Generalized characteristics of sensors and measurements systems. Signal conditioning and computer-based data acquisition and analysis. Measurement of motion, force, strain, torque, shaft power, pressure, sound, flow, temperature and heat flux. Design of experiments proposals. Team-based projects addressing application of engineering measurements to a variety of engineering problems. Effective communication of experimental results. (Taught at Illinois Institute of Technology as MMAE 430.)

IIT 332
DESIGN OF MECHANICAL SYSTEMS
Undergraduate
Small-group design projects drawn from industry. (Taught at Illinois Institute of Technology as MMAE 432)

IIT 333
DESIGN OF THERMAL SYSTEM
Undergraduate
Application of principles of fluid mechanics, heat transfer, and thermodynamics to design of components of engineering systems. Examples are drawn from power generation, environmental control, air and ground transportation, and industrial processes, as well as other industries. Groups of students work on projects for integration of these components and design of thermal systems. (Taught at Illinois Institute of Technology as MMAE 433)

IIT 334
MATRIX ALGEBRA AND COMPLEX VARIABLES
Undergraduate
Vectors and matrices; matrix operations, transpose, rank, inverse; determinants; solution of linear systems; eigenvalues and eigenvectors. The complex plane; analytic functions; contour integrals; Laurent series expansions; singularities and residues. (Taught at Illinois Institute of Technology as MATH 333)

IIT 336
DESIGN OF AEROSPACE VEHICLES I
Undergraduate
The focus of this course is on applications ranging from commercial to military and from manpowered to high-speed to long-duration aircraft. Students will examine aircraft design including aerodynamic, structural and powerplant characteristics to achieve performance goals. The quarter project is a collaborative effort in which small design groups complete the preliminary design cycle of an aircraft to achieve specific design requirements. (Taught at Illinois Institute of Technology as MMAE 436)

IIT 337
DIGITAL SIGNAL PROCESSING I
Undergraduate
Discrete-time system analysis, discrete convolution and correlation, Z transforms. Realization and frequency response of discrete-time systems, properties of analog filters, IIR filter design, FIR filter design. Discrete Fourier Transforms. Applications of digital signal processing. Credit will be given for either ECE 436 or ECE 437, but not for both. (Taught at IIT as ECE 437)

IIT 338
CONTROL SYSTEMS
Undergraduate
Signal-flow graphs and block diagrams. Types of feedback control. Steady-state tracking error. Stability and Routh Hurwitz criterion. Transient response and time domain design via root locus methods. Frequency domain analysis and design using Bode and Nyquist methods. Introduction to state-variable descriptions. Credit will be given for either ECE 438 or ECE 434, but not for both. (Taught at IIT as ECE 438)

IIT 339
DESIGN OF AEROSPACE VEHICLES II
Undergraduate
Spacecraft systems design including mission analysis and astrodynamics, launch vehicle requirements, attitude determination and control, propulsion, structural design, power systems thermal management, and telecommunications. Semester-long project is focused on the integration of multiple systems into a coherent spacecraft design to achieve specific mission requirements. (Taught at IIT as MMAE 437).
IIT 341
SPACECRAFT AND AIRCRAFT DYNAMICS
Undergraduate
Kinematics and dynamics of particles, systems of particles, and rigid bodies; translating and rotating reference frames; Euler angles. Aircraft longitudinal and lateral static stability; aircraft equations of motion. Spacecraft orbital dynamics; two-body problem classical orbital elements; orbital maneuvers. (Taught at Illinois Institute of Technology as MMAE 441)

IIT 342
SPACECRAFT DYNAMICS
Undergraduate

IIT 343
SYSTEMS ANALYSIS AND CONTROL
Undergraduate

IIT 350
COMPUTATIONAL MECHANICS II
Undergraduate
Taught at IIT as MMAE 450.

IIT 352
AEROSPACE PROPULSION
Undergraduate
Analysis and performance of various jet and rocket propulsive devices. Foundations of propulsion theory. Design and analysis of inlets, compressors, combustion chambers, and other elements of propulsive devices. Emphasis is placed on mobile power plants for aerospace applications. (Taught at Illinois Institute of Technology as MMAE 452)

IIT 355
CARDIOVASCULAR FLUID MECHANICS
Undergraduate
Anatomy of the cardiovascular system. Scaling principles. Lumped parameter, one-dimensional linear and nonlinear wave propagation, and three-dimensional modeling techniques applied to simulate blood flow in the cardiovascular system. Steady and pulsatile flow in rigid and elastic tubes. Form and function of blood, blood vessels, and the heart from an engineering perspective. Sensing, feedback, and control of the circulation. Possible project using custom software to run blood flow simulations (Taught at IIT as MMAE 455).

IIT 371
ENGINEERING MATERIALS AND DESIGN
Undergraduate
Mechanical behavior of metals, polymers, ceramics and composites, laboratory testing methods including tension, torsion, hardness, impact, toughness, fatigue and creep. Evaluation of structural performance in terms of material processing, service conditions and design. (Taught at Illinois Institute of Technology as MMAE 371)

IIT 372
HEALTH PHYSICS
Undergraduate
This course covers topics in Radiation Physics, including general aspects of radioactivity, radioactive series decay, alpha particle energies, beta decays, electron capture, gamma ray emission, interaction of radiation with matter, two-particle collisions, elastic scattering, interaction of heavy charged particles with matter, Coulomb force interactions, radiative stopping power, collision stopping power for heavy charged particles, interaction of light charged particles with matter, and bremsstrahlung radiation (Taught at IIT as PHYS 571)
IIT 373
HEALTH PHYSICS II
Undergraduate
Continuation of the basic health physics sequence, including neutron production and interaction with matter; methods of radiation detection; radiation dosimetry; chemical and biological effects of radiation; radiation protection standards; shielding; dosimetric models; accelerator, reactor and medical health physics. (Taught at IIT as PHYS 572)

IIT 374
PROBABILITY AND STATISTICS
Undergraduate
Elementary probability theory including discrete and continuous distributions, sampling, estimation, confidence intervals, hypothesis testing, and linear regression. Credit not granted for both MATH 474 and MATH 475. (Taught at Illinois Institute of Technology as MATH 474)

IIT 375
AEROSPACE MATERIALS LAB
Undergraduate
Taught at IIT as MMAE 372.

IIT 378
MANUFACTURING PROCESSES
Undergraduate
Principles of material forming and removal processes and equipment. Force and power requirements, surface integrity, final properties and dimensional accuracy as influenced by material properties and process variables. Design for manufacturing. Factors influencing choice of manufacturing process. (Taught at Illinois Institute of Technology as MMAE 485.)

IIT 391
IIT CO-OP
Undergraduate
The student will participate in on-site or off-site activity (including, but not limited to, production or research activity). The student will be responsible for, e.g., designing, testing and deploying hardware or software, and may be involved in production level issues. Typically, this position will be a coop at some institution designated by IIT.

IIT 397
INTER-PROFESSIONAL PROJECT (FORMERLY IPRO 397)
Undergraduate
Interprofessional projects allow students to learn teamwork, leadership and project management skills while working in multidisciplinary teams on projects involving technical, ethical, environmental, economic, public policy and legal issues. IPRO project teams are typically comprised of six to ten students from sophomore through graduate level and from all disciplines, who can broadly contribute to a project effort. While every effort will be made to accommodate students’ first choices, it may be necessary to balance students across all projects scheduled for the semester or to consolidate students into fewer projects to meet minimum team requirements. Specific rules about selection of IPRP projects may apply in certain degree programs. Some projects may carry humanities or social sciences credit. Students must consult the lead faculty member for the project and their faculty adviser before registering for a project. (Taught at Illinois Institute of Technology as IPRO 497; formerly IPRO 397)

IIT 398
INTER-PROFESSIONAL PROJECT
Undergraduate
Interprofessional projects allow students to learn teamwork, leadership and project management skills while working in multidisciplinary teams on projects involving technical, ethical, environmental, economic, public policy and legal issues. IPRO project teams are typically comprised of six to ten students from sophomore through graduate level and from all disciplines, who can broadly contribute to a project effort. While every effort will be made to accommodate students’ first choices, it may be necessary to balance students across all projects scheduled for the semester or to consolidate students into fewer projects to meet minimum team requirements. Specific rules about selection of IPRP projects may apply in certain degree programs. Some projects may carry humanities or social sciences credit. Students must consult the lead faculty member for the project and their faculty adviser before registering for a project. (Taught at Illinois Institute of Technology as IPRO 497)
ILL 200
ILLUSTRATION FOUNDATIONS
Undergraduate
This course will focus on improving the basic skills needed for creating concept art and storyboards for animation and games. Areas of focus include practical perspective, technical rendering, observational drawing and color theory. These skills will be applied in basic prototyping projects. PREREQUISITE(S): GD 105 or ANI 105

ILL 206
HISTORY OF COMICS
Undergraduate
This course will cover the history of the art form collectively known as "comics" --mechanically reproduced graphic storytelling--which includes comic strips, comic books, graphic novels, Japanese manga and online comics. Students will be introduced to the evolution of the art form from 18th century precursors, to late 19th century newspaper pages, to the 20th century comic book, through today's sophisticated graphic novels. The course will devote considerable time to comics of other cultures, with special emphasis on Japan and Europe. It will also examine the relationship of comics to culture at large, and the struggle of underground and alternative comic artists to explore adult subjects such as politics and gender.

ILL 210
DIGITAL ILLUSTRATION I
Undergraduate
Introduction to illustration development in image, line and photography, combining computer applications and hand-rendered approaches. PREREQUISITE(S): GD 105, ART 105, ANI 105 or GPH 211

ILL 211
INTERMEDIATE DIGITAL ILLUSTRATION
Undergraduate
Intermediate practice for illustration development in image, line and photography, combining computer applications and hand-rendered approaches, will be studied. PREREQUISITE(S): GD 105 or ANI 105 or ART 106

ILL 220
GRAPHIC NARRATIVE
Undergraduate
This course introduces students to the components of graphic narrative, including superhero and alternative comics, comic strips, manga, and graphic novels. Students will learn fundamental materials and techniques, including penciling and inking, digital painting and coloring, and publishing, and create their own graphic narratives. The course will also provide an overview of the history of comics and graphic storytelling, and their relation and importance to the art of animation. PREREQUISITE(S): ART 106

IM 208
VIRTUAL WORLDS AND ONLINE COMMUNITIES
Undergraduate
Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cyberculture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging. PREREQUISITE(S) WRD 104

IM 210
INTRODUCTION TO HUMAN-COMPUTER INTERACTION
Undergraduate
This course familiarizes students with the user interface development process, including user and task analysis, interaction design, prototyping and evaluation. Students study human perception, cognition and motor abilities as they relate to the design of interactive systems. In a series of projects, students design and revise prototypes as they apply a user-centered design process. Emphasized topics include user profiles, information architecture and usability testing. Students provide written analysis of their research and process. PREREQUISITE(S): None
IM 220
INTERACTIVE MEDIA I
Undergraduate
This course applies interactive media principles for a variety of contexts with a goal of exploring relative merits among common interaction paradigms. Based on assessed needs and intended functionality, students create working prototypes that demonstrate a range of design patterns, particularly those with a high level of interactivity such as rich internet applications, games, and visual simulations. Emphasis is given to visual design principles and aesthetics for creating interesting and engaging interactive experiences. PREREQUISITE(S): ANI 105

IM 222
INFORMATION VISUALIZATION
Undergraduate
This course discusses the basic problems and techniques of visualizing quantitative and qualitative data. Topics include: perception, types of information, representation of univariate and multivariate data and relational information, analysis of representations, presentation, and dynamic and interactive visualizations. Students will create visualizations using graphical software PREREQUISITES: LSP 120

IM 230
SCRIPTING FOR I INTERACTIVE MEDIA
Undergraduate
This course is an introduction to Object-Oriented programming using Flash ActionScript. Subjects covered include variables, loops, conditionals, event handling, and classes, and how they are used to create real-world interactive web applications and animations. PREREQUISITE(S): None

IM 270
USER-CENTERED WEB DESIGN
Undergraduate
(Formerly HCI 270) Principles of interactive design for web pages and sites. Design patterns for information navigation. Use of HTML and CSS to produce standards- and accessibility-compliant web pages. Overview of technologies supporting dynamic and interactive content. Prerequisites: IT 130 or HCI 201

IM 315
THEORY AND PERCEPTION OF COLOR
Undergraduate
(Formerly HCI 315) A problem-based course introducing additive and subtractive colors systems and their technology. It explores the perceptual phenomena of color relationships and their applications in digital environments. PREREQUISITE(S): IM 210 and (GPH 211 or GD 105)

IM 320
INTERACTIVE MEDIA II
Undergraduate
This course will use complex interactive web projects to challenge students to solve real-world problems. Students will build upon the organizational and analytical strategies learned in IM I while expanding their knowledge of Flash subjects such as site integration, utilizing remote data and manipulating video. PREREQUISITE(S): IM 220 Interactive Media I

IM 322
MULTIMEDIA
Undergraduate
Underlying technological issues including synchronization and coordination of multiple medias, file formats for images, animations, sound, and text. HyperText. Information organization. Survey of multimedia authoring software. Long distance multimedia (World Wide Web). Students will critique existing applications and create several multimedia applications. Students present their final results to the class. PREREQUISITE(S): CSC211 OR IM210.

IM 330
ADVANCED SCRIPTING FOR INTERACTIVE MEDIA
Undergraduate
This course builds on the Flash ActionScript programming skill learned in Scripting for Interactive Media. Students will focus on designing, coding and debugging complex applications. PREREQUISITE(S): IM 230 Scripting for Interactive Media
IM 332
USER-CENTERED WEB DEVELOPMENT
Undergraduate
(Formerly HCI 332) Analysis, design, and development of interactive web sites. Advanced application of HTML and style sheets for user-centered design. Survey of client-side technologies for interactive Web use. PREREQUISITES: IT 130.

IM 336
INTERACTIVE MEDIA SCRIPTING FOR PROGRAMMERS
Undergraduate
Object-oriented programming in ActionScript for students who already know how to program. Students will design, code and test interactive media using standard and custom designed classes. PREREQUISITE(S): Experience in at least one high-level programming language.

IM 360
USER-CENTERED EVALUATION
Undergraduate
(Formerly HCI 360) Overview of user research and usability evaluation methods. User research includes interviews, profiles and scenarios. Usability evaluation methods include expert inspections and usability testing. PREREQUISITE(S): IM 210.

IM 390
TOPICS IN HUMAN-COMPUTER INTERACTION
Undergraduate
(Formerly HCI 390) May be repeated for credit. PREREQUISITE(S): Completion of the HCI core courses or consent of the instructor.

IM 394
HUMAN-COMPUTER INTERACTION CAPSTONE COURSE
Undergraduate
(Formerly HCI 394) Provides an opportunity for students to apply all of the skills they have learned on one comprehensive project. Multi-disciplinary teams design, evaluate, and implement a user interface intensive project. Students prepare written documents describing their activities and present the final results to the class. (PREREQUISITE(S):Senior standing).

IM 399
INDEPENDENT STUDY
Undergraduate
(Formerly HCI 399) Independent Study.

IN 110
LIVING AND WORKING IN A GLOBAL ENVIRONMENT
Undergraduate
This course will address dilemmas and opportunities that individuals may encounter as they work or study in multicultural and global environments. The purpose of this course is to increase the effectiveness of individuals in identifying, understanding and managing cultural differences in the workplace as well as outside of it. A variety of learning methods will be used, including lectures, readings, case studies, videotapes, critical incidents, and small group research and presentation. Guest speakers will be invited to share their experiences with the class. Pre-1999 Competencies: HC-1, HC-J, HC-H, HC-X,WW. BA-1999 Competencies: L-7, F-X, H-1-E, H-1-A, H-5  Faculty: Miriam Ben-Yoseph

IN 117
ART IN CHICAGO
Undergraduate
This course centers on two distinctive but very different resources for art studies in Chicago: the Terra Museum of American Art and the Museum of Contemporary Art (MCA). The Terra Museum focuses mainly on 19th and 20th century American art, especially the luminous landscapes of American Impressionists. The MCA concentrates on the last 50 years in art, from surrealism through pop art, earth art, video art, and new developments reaching all the way up to today. Both museums are expanding, presenting students with opportunities to take part in museum tours, talks, publications, and lecture series. Competencies: A-1-B, A-1-I. Faculty: Joe Cunniff

LL 250 is a prerequisite for this class.
IN 200
GUIDED INDEPENDENT STUDY: ADVANCED ELECTIVE
Undergraduate
Guided Independent Study: Advanced Elective

LL 250 is a prerequisite for this class.

IN 203
WRITING AND EDITING THE SNL NEWSLETTER
Undergraduate
Working on a newsletter gives students the opportunity to learn and demonstrate communications competence that can have real value in the world of work. Students have the opportunity to plan, write, edit, and produce an issue of a newsletter on a subject of their choice, including work on the SNL newsletter. After registering, students should contact the instructor for an initial individual meeting. Competence: F-X.
Faculty: Doug Murphy

LL 250 is a prerequisite for this class.

IN 205
CREATIVE WRITING: INTRODUCTION TO POETRY
Undergraduate
Poetry is one of the most ancient and common forms of verbal expression. In this course, you will read selections from the works of eight poets whose work has greatly influenced 20th century American poetry (six from the course text, two of your own choosing, with approval of instructor). You will then create, for each poet, a poem modeled upon his or her work. Most will be free verse; specific instructions on theme and approach will be given. You will also keep a journal exploring your poetic efforts. Course requires access to email. Pre-1999 Competence: AL-2; BA 1999 Competence: A-2-A.

IN 207
CREATIVE WRITING: FORMS OF POETRY
Undergraduate
Although much contemporary poetry is written in unrhymed free verse, there are many other options available to the aspiring poet. In this internet-based course, you will select six traditional poetic forms from more than ten possibilities; forms include the sonnet, villanelle, ballad, rhymed free verse, charm, haiku/tanka, pantoum and others. You will examine several excellent examples of the poetic form, then write your own poem in that form. Some examples of your work will be posted on the class "magazine" associated with the website. Online access is required for this class. Pre 1999 Competencies: AL-2, AL-F; BA 1999 Competencies: A-2-A, A-2-X.

IN 230
ANIMALS AND CONTEMPORARY LIFE
Undergraduate
This is a Service Learning, Externship. Students will pursue literature on the historical connections between animals and humans, and will review philosophies concerning treatment of animals. Students will also be exposed to current issues in animal welfare, including a volunteer experience in an animal shelter. In this course, faculty will provide a framework for assessing the roles and condition of animals, particularly domestic animals, in our culture. Assigned readings range from Peter Singer’s noted work on animal experimentation Animal Liberation to excerpts from Black Elk Speaks, a Native American treatise on hierarchy and respect for life in American aboriginal culture. Students will pursue their own interests through further readings and commentary. Pre-1999 Competencies: LL-7, AL-9 & AL-10, HC-9 & HC-10, PW-9 &PW-10. BA-1999 Competencies: LEX

IN 233
THE ETHNIC MUSEUMS OF CHICAGO: CULTURAL HISTORIES
Undergraduate
This course offers students opportunities to explore, compare and utilize some of the fascinating ethnic museums of Chicago devoted to Polish, Irish, Jewish, Mexican and African-American culture. Students will visit the DuSable Museum of African American History, the Mexican Fine Arts Center, the Polish Museum of America and the Spertus Museum of Judaica and be encouraged to take advantage of their talks, classes, special exhibits, workshops, community events. Competencies: A-1-B, H-2-B. Faculty: Joseph Cunniff

LL 250 is a prerequisite for this class.
IN 236
FICTIONAL WORLDS AND THEIR CREATORS: GEOGRAPHY AND FANTASY
Undergraduate
Some writers create fantasy worlds which feel so real and are such complete places that they can be mapped. Writers like Conan Doyle, J.R.R. Tolkien, Edgar Rice Burroughs and C.S. Lewis create imaginary geographies that compel reader belief. In this course, students will choose a fictional world and its creator for study. Study will involve analysis of literature and evaluation of the relationship between imagination and literary art that can also relate to basic cartographic concepts. An initial in-person meeting with the instructor is required. Competencies: A-1-A, A-1-C, H-1-F. Faculty: J. Warren Scheideman

LL 250 is a prerequisite for this class.

IN 238
THE JUVENILE COURT SYSTEM
Undergraduate
The text in this course provides background and content needed to understand and engage in discussion regarding the Juvenile Court in Illinois. It provides us with an opportunity to examine the strengths and weaknesses of this special court. Topics included in the study are 1) the history of the court, 2) how race has shaped the workings of the court, 3) the part politics has planned over the 100+ years of the court, 4) how the court’s legal decisions determine the long term consequences in the lives of juveniles and society in general, 5) the difference between the juvenile court and the adult court, 6) how the court handles dependent children, 7) what is offered by the court for disabled children, and 8) the advantages and disadvantages of being tried in juvenile court rather than in the adult court. Competences: H1X, H2X. Faculty: Barbara Donnelly

IN 239
SCIENCE/WRITING
Undergraduate
Observation is the beginning of science. It is also the beginning of the process of writing. This online course is designed to encourage you to observe the natural world and write clearly about it. Thus you will be simultaneously strengthening your observational skills and your expressive skills. You will observe a single natural setting over the course of a quarter, writing short prose pieces that follow specific guidelines. At least one of these pieces will be posted on the class website for those outside the class to read, thus providing you with an experience of online publication. Internet access and familiarity are required prior to the beginning of class. Pre-'99 Competencies: AL-2, PW-2. BA'99 Competencies: A-2-A, S-1-C. Faculty: Pat Monaghan.

IN 243
POST TRAUMATIC SLAVE SYNDROME AND ITS EFFECTS
Undergraduate
This FDIS seeks to inform students about the impact of post-traumatic slave syndrome (PTSS) resultant from experiencing two-hundred and fifty years of American chattel slavery, has had on African-American life and culture. It is a subject that has legal, historical, psychological and sociological implications and thus is 'a must' for students pursuing undergraduate and/or graduate work in these areas. With this primary goal in mind, students will be asked to review a text on the subject, Joy DeGruy-Leary's Post Traumatic Slave Syndrome: America's Legacy of Enduring Inquiry and Healing and selected readings where appropriate. Equipped with a sound understanding of PTSS, students will then be asked to construct a 4 to 5 page paper on their understanding of this phenomenon. Students are also asked to develop a second project that emerges directly from the competence. Suggestions for such projects are presented in the syllabus. Students can only register for one among the following competencies: H-4, H-1-B, H-1-I, A-3-A, A-2-C, F-X. Faculty: Nancy Davis

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.

IN 249
NEW YORK: AN HISTORICAL OVERVIEW
Undergraduate
This Faculty Designed Independent Study (FDIS) encourages students to study the history of one of our nation's oldest and most vibrant cities, that of New York City which includes that of its five boroughs: Manhattan, Bronx, Brooklyn, Staten Island, and Queens. The readings associated with the course provides a skeletal history of the city's nearly four hundred years. Students are then asked to read a series of articles that elaborate on key historical events and/or eras, i.e. the city's role in the American Revolution, the Great Depression, the impact of deindustrialization and suburbanization, and development of art and culture across different epochs, among other areas. Students are finally asked to supplement readings and a major homework assignment with a five-page paper that mirrors the spirit of their competence. The collection of readings and video presentations offer a fascinating, insightful, and fun look at one of the most interesting and intriguing American metropolises. Competencies offered: H-1-F, H-1-H, H-1-B, A-3-G, FX. Please contact the instructor to request a syllabus.
IN 250
YOU, YOUR WORK AND THE WORLD
Undergraduate
This course is for students who wish to integrate work and learning. Students will learn career planning skills, explore the organizations in which they work, gain an understanding of how they contributed to their organizations, and discuss societal and world issues, as they affect their workplaces. Students are required to work 10 hours per week while enrolled in the course and attend four 3-hour class meetings. Competences: FX - Can identify and understand specific societal and world issues that affect one's current workplace environment.; FX - Can develop a comprehensive career portfolio that successfully summarizes one's educational, workplace, and volunteer activities, for the purpose of highlighting one's accomplishments for prospective employers.

IN 251
VALUES-BASED LEADERSHIP: MAKING A DIFFERENCE WHILE MAKING A PROFIT
Undergraduate
The primary focus of IN 251 is to examine and apply the values, goals and operating methods of visionary leaders who have successfully pursued financial rewards for themselves and their organizations, while also achieving, through their actions, broader social goals. The results of the examination will be applied at the students' internship sites, where students will demonstrate a range of leadership skills, including an analysis of basic management issues and recommendations for improvements. In addition to working at least 100 hours at an internship site, the course will consist of four class meetings and ongoing Blackboard discussions. Competences: FX - Can identify and articulate common characteristics of successful values-conscious corporate leaders who have achieved financial success while simultaneously recognizing the importance of social responsibility; FX - Can apply one's understanding of successful values-based corporate leadership to determine one's personal and professional goals and strengthen one's leadership skills.

IN 252
CREATIVITY AS A CHANGE AGENT IN THE WORKPLACE
Undergraduate
Creativity as a Change Agent in the Workplace explores how innovation is a controlling variable within all careers. Students will study how creativity functions within his or her workplace. The course will examine the process of creativity as it might work to revolutionize an industry or force it into failure. Students will examine creative innovations related to the following: invention, leadership, advertising and marketing, teaming concepts and collaboration, and the drive behind entrepreneurship. This experiential learning course is designed to focus the student's attention on the creative process as it relates to the observable workplace, reflective practice, and the application of theories and ideas. Competences: FX - Can recount and reflect upon the history of creative innovations within the workplace as these innovations relate to invention, leadership, advertising and marketing concepts, teaming and collaborative tools, and entrepreneurship.; FX - Can apply one's understanding of these creative innovations in an analysis and plan for change in one's current workplace.

IN 253
PUBLIC SERVICE CAREERS
Undergraduate
This course will provide an opportunity to students to familiarize themselves with career opportunities in the public service sector by focusing on (a) the types of problems that public service organizations attempt to address; (b) the different strategies used by different types of public service organizations; and (c) the range of available public service jobs. The course will promote the life-long process of integrating work and learning, enable students to view their internship within a broad perspective, assist career decision-making, promote individual success through on-the-job experience, and provide students with valuable networking opportunities - all with a focus on public service careers. Competences: FX - Can analyze the types of problems that public service organizations attempt to address; the different strategies used by different types of public service organizations; and the range of available public service jobs.; FX - Can apply one's understanding of public service organizations to develop strategies for one's own organization and to develop one's own professional career goals.

IN 254
CORPORATE SOCIAL RESPONSIBILITY
Undergraduate
Corporate Social Responsibility analyzes the mutually dependent relationship between businesses and society, focusing on how organizations can contribute their resources, expertise, and innovations to the benefit of our local, national, and global communities. By examining their own internship experiences, along with real world case studies, research, and commentary, students will examine the critical decision-making processes organizations address as they balance competitive advantages against the weight of social progress. Students are expected to wrestle with the variable issues confronting corporate social responsibility in relation to their own fields of interest. Throughout the course, students will analyze how their current workplaces determine a competitive edge while staying attentive to the social, public, and environmental consequences of their actions. Competences: FX - Can analyze the critical decision-making processes one's organization needs in order to balance competitive advantages against the weight of social progress.; FX - On the basis of the analysis of one's current organization, can develop a plan to achieve a competitive advantage, while staying attentive to the social, public, and environmental consequences of their actions.
IN 261
THE PARENT ROLE
Undergraduate
What does society expect of parents? How have theorists and researchers defined who the parent is and what the parental role involves? How do these descriptions change as children grow? How do parents communicate and nurture their infants and young children? How do their communication skills change as children become older? What attitudes, information and skills do parents need to have to fulfill their role? Students draw from their readings, videos and exercises, to answer these questions. They follow the parent role as it evolves as children grow. Students learn alternative methods of relating to children and discuss the pros and cons of each. They work out ways of dealing with common childhood situations, using a process for dealing with any parenting issue. Students are encouraged to reflect on and discuss their own parenting experiences as a child and, if relevant, as a parent. Competences: E1 & E2. Faculty: Harriet Heath. Can be taken for one or both competences.

IN 264
VOICES AND VISIONS: A TELEVISION COURSE IN MODERN POETRY
Undergraduate
Students will use the PBS series "Voices & Visions" as an introduction to the lives and writing of several American poets from Walter Whitman to Sylvia Plath. They will concentrate further on the writings of at least one poet and learn to appreciate and interpret that work, gaining insight into the poet's vision, techniques, and message. Competencies: A-1-A, A-1-C, A-1-D. Faculty: R. Craig Sautter

LL 250 is a prerequisite for this class.

IN 265
ENVIRONMENTAL DISRUPTION AND INFECTIOUS DISEASE
Undergraduate
Infectious diseases are the leading cause of death worldwide with more people dying of these diseases than from cancer and heart disease combined. Not surprisingly, it is the developing countries that are most affected. What may be surprising is even in the U.S. contagious diseases rank third as a leading cause of death. And what is even more surprising is that even as we continue to develop new vaccines and antibiotics, deaths from infectious diseases are actually increasing in this country (by 58% between 1980 and 1992). Why? Microbes, such as viruses and bacteria, can replicate in a matter of days (or even minutes) and can change genetically much faster than human cells. With their rapid reproduction and their mutability, microbes have the ability to adapt to almost any type of external conditions. This affords them an evolutionary advantage during periods of massive environmental fluctuations (such as the present). Because environmental disruptions tip the balance in favor of microbes, current radical physical and social changes (such as population growth, urbanization, deforestation, reduction of biological diversity, climactic changes, etc.) contribute to the increase in infectious diseases. Students will examine connections between environmental disruptions (particularly those induced by human activities) and the emergence and reemergence of infectious diseases. *Prerequisite: either a course in environmental science or in microbiology. Pre-1999 Competence: PW-G. BA-1999 Competence: S-4 Faculty: Toby Glicken

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.

IN 266
WOMEN'S ISSUES
Undergraduate
This advanced level independent research experience provides individual students the opportunity to explore issues of interest concerning women in greater depth. Completion of Research Seminar is required. Students may design any kind of research project suitable for an advanced-level competence; such projects may include library research, surveys, interviews, or on the job projects related to women's issues. Upon registration, students should submit a brief description of the proposed research area to the instructor. Students may select a topic from the list provided in the syllabus or propose their own topic. The instructor will then contact them for an initial conversation and initiate development of a learning contract. Interaction during the quarter may be in person, email, and/or phone. This FDIS may be taken for one or two competencies. Competencies: E1, E2. Faculty: Catherine Marienau

LL 250 is a prerequisite for this class.

IN 270
WRITERS IN 1920'S AMERICA
Undergraduate
The 1920's was a marvelous decade of social change and artistic growth. H.L. Mencken and George Jean Nathan were significant literary critics. Sinclair Lewis, Willa Cather, F. Scott Fitzgerald, Ernest Hemmingway were major novelists. The New Yorker, and the Algonquin Circle (sometimes known as the "Vicious Circle"), with Dorothy Parker and the humorist Robert Benchley, enlivened the literary scene. This class will explore the American literary experience of the 1920's, and share skills of literary and historical interpretation. Competencies: A-1-A, A-1-C, H-1-F. Faculty: J. Warren Scheideman

LL 250 is a prerequisite for this class.
IN 271
STYLES AND MEANING IN JAZZ HISTORY
Undergraduate
Jazz is a unique American art form which draws on a variety of influences, the skill and creativity of the individual artist, and, in many instances, the collective imagination of a group of performers. This course will explore both the individual styles within jazz as well as the role this art has played in the transmission of culture and the expression of values. Through directed listening, reading, and consultation with the instructor, students will develop the ability to recognize forms and distinctions among both various styles and performers in the jazz idiom. Competence: A-1-E. Faculty: Joe Cunniff

LL 250 is a prerequisite for this class.

IN 273
NATURE/ NURTURE: FROM GENES TO PHENOTYPE
Undergraduate
One of the themes of contemporary investigation in biology, medicine, psychology, and other inquiries into “human nature” has been the attempts to answer the question “is it nature or nurture” that guides our destiny. Students will develop a basic understanding of hereditary mechanisms and work to gain an appreciation / facility with the various ways in which genes and environment interact. NOTE: This independent study in only available via the Internet and requires World Wide Web access, email, and basic facility with Internet media. You are invited to visit this study's home page at: www.depaul.edu/~mfiddler/nn/nnhome.html Pre-'99 Competence: PW-E. BA'99 Competence: S-2-D. Faculty: Morry Fiddler

IN 276
MARKETING APPLICATIONS IN CONTEMPORARY SOCIETIES
Undergraduate
Marketing has applications to profit as well as non-profit organizations and to services, ideas and individuals, not just products. Through this independent study, students will gain an understanding of the marketing process and the key marketing strategies of product planning, promotion, pricing, and distribution. The competence statement and course project can be customized to meet the student's World of Work objectives, taking into account the student's previous marketing experience/courses. Competence: F-X Faculty: Pam Wright

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.

IN 279
THE POWER OF GREAT WRITING
Undergraduate
A simple lawsuit in Montgomery, Alabama in 1960, raised America's awareness of the importance of a free and responsible press in a democracy. In Make No Law, Pulitzer prize winning journalist, Anthony Lewis, presents the complex story of how a great newspaper-The New York Times-almost lost its capacity to cover the civil rights movement effectively and forever sacrifice the power of independent criticism of government. He also raises the question of how an undisciplined press can trample the rights of individual citizens. For H-2-G, Students will consider the essential requirement of a democracy to balance the essential rights of freedom of press and freedom from libel. For A-1-C, Students will analyze the text to understand the techniques and strategies Lewis used to turn what could be dry subject matter-history and legal issues-into the compelling story of people engaged in the fight for civil liberty. Faculty: Susanne Dumbleton.

IN 280
CIVIL RIGHTS AND THE FIRST AMENDMENT
Undergraduate
What is the relationship between a free press and a free society? And what role do the courts play, particularly the Supreme Court, in balancing society's interest in criticizing its government against other interests, such as an individual's right to protect herself from slander or libel? How does a case make its way through the courts in the first place? And what is the proper constitutional relationship between the states and the federal government? Using Anthony Lewis' Make No Law as a starting point, this Court will attempt to explore these questions as they arose in the context of the Civil Rights movement and the path-breaking case of New York Times v. Sullivan. Competencies: H-4, H-1-D. Faculty: Fred Wellisch.

IN 281
GENDER IMPLICATIONS OF LEISURE
Undergraduate
Play, leisure, fun, sport, game, hobby, relaxation, and free time all conjure up activities for most people. Yet many people today complain that they have no time or energy for play. One factor that influences leisure is gender. Socialization patterns, biological aspects, and culture often determine activities that males and females select as leisure pursuits. This course will explore these issues and related ones as well as assist the learner in discovering her/his own desires and patterns in the arena of leisure. Pre-'99 Competence: AL-4. BA'99 Competence: A-3-D. Faculty: Suzanne Ryan

DePaul University Winter/Spring 2013 Page 1587 of 2244
IN 299
BLUES AND CHICAGO
Undergraduate
The blues are a feeling, a form, and a rich history that has influenced music from jazz to pop to the Rolling Stones. This course studies the blues with particular attention to Chicago's role in the music. Muddy Waters, Willie Dixon, and Buddy Guy are among the figures included along with readings, CDs, tapes, and visits to both a blues museum and a live blues performance. Competencies: A-1-D, A-1-H. Faculty: Joe Cunniff
LL 250 is a prerequisite for this class.

IN 300
REITERATIVE PRACTICE BASED LEARNING
Undergraduate
This independent study is designed to facilitate the pursuit of a topic or problem of the student's choice. The topic or problem may be related to the student's work or be an outgrowth of an interest relating to any one of the three liberal learning domains (HC, PW, AL). This is an opportunity to use your imagination, pursue a curiosity, or delve into a problem in a guided, but independent manner. In pursuit of the chosen focus, the student will engage in a learning strategy entitled "reiterative practice-based learning" (RPBL), which is a technique designed to enhance critical thinking, professional problem-solving, and self-directed learning skills. RPBL was developed in an attempt to structure the learning process around the "natural" problem-solving processes of the brain, thus enhancing information retention. In RPBL, the instructor functions as a tutor to students, helping them to investigate ill-structured problems by identifying what students already know, what they need to learn, and how best to acquire that learning. In a series of meetings, the tutor guides students as they encounter issues of their choice, helping them to define and elaborate the issue and to assume increasing responsibility for its resolution. Over the course of several meetings the student will both pursue the topic of interest and develop facility with the learning technique for its application to a broad range of academic and professional problems. Pre-1999 Competencies: WW, HC-F, PW-F, AL-F. BA-1999 Competencies: A-3-X, H-3-X, S-3-X, F-X. Faculty: Jean Knoll

IN 307
ADVANCED ELECTIVE SEMINAR
Undergraduate
Advanced Elective Seminar is designed to permit students to explore a topic as a group integrating various methods of inquiry and satisfy the Advanced Elective competencies: E1, E2. A specific topic, assessment and evaluation criteria as well as learning activities will be articulated by the instructor for a particular section of the course. Prerequisite: Successful completion of Research Seminar is required to register. LL 300 is a prerequisite for this class.

IN 330
THE MEN THEY WILL BECOME: RAISING BOYS TO BE MEN OF CHARACTER
Undergraduate
This course focuses on the development of young men from infancy through adulthood. Much research has been done to study how we rear little boys and young men. Whether it is to determine why boys have more trouble at school than girls, why they have more problems with anger than girls or more problems with the criminal justice system, we want to understand why. We know young boys and men are capable of nurturing, empathy, but we also know they are not reinforced by society to develop these skills. If parents want to nurture these skills they are not supported by society. Dr. McDermott has been researching and teaching courses on gender and development for years. She would be very interested in facilitating learning focusing either on how boys develop fully as men of character and care or on how a particular institution, be it family, school, etc. has failed to help boys to grow and thrive as they could. She will draw upon the books "The men they will become" by child psychiatrist Eli Newberger and other pertinent resources including "Boys will be boys" by Myriam Miedzian to help guide your study. Competences: H2A, H3B. Faculty: Dana McDermott
LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.

IN 345
EXTERNSHIP: ANIMALS AND CONTEMPORARY LIFE
Undergraduate
Students will pursue literature on the historical connections between animals and humans, and will review philosophies concerning treatment of animals. Students will also be exposed to current issues in animal welfare, including a volunteer experience in an animal shelter. Faculty will provide a framework for assessing the roles and condition of animals, particularly domestic animals, in our culture. Assigned readings range from Peter Singer's noted work on animal experimentation Animal Liberation to excerpts from Black Elk Speaks, a Native American treatise on hierarchy and respect for life in American aboriginal culture. Students will pursue their own interests through further readings and commentary. Competencies: L10, L11. Faculty: Betta LoSardo
LL 250 is a prerequisite for this class.
IN 346
NATURE - NURTURE: IT'S ABOUT THE HYPHEN!
Undergraduate
One of the themes of contemporary investigations in biology, medicine, psychology, and other inquiries into "human nature" has been the attempts to answer the question "is it nature or nurture" that guides our destiny. This question has both stimulated and restricted our understanding of ourselves and the living world around us. The question has also been reformulated in important ways to provide more helpful though often more complex "answers" and avenues to approach the pursuit of understanding ourselves. Learning Experience: The development of the E-1 and E-2 competences through this independent study is based first on learning to assess the role of environment on health using a framework that puts environmental factors in relation to non-environmental factors (e.g., biology) and secondly, on taking the perspectives of this competence into ways that the question 'what is human nature?' may be explored. Overall, hopefully this study will provide a means of analysis that is generalizable to many areas of interest and concern. There will be several steps - activities - of the study designed to progressively develop your facility with these ideas. You will develop this facility through research activities in pursuit of various questions that will require the use of library and internet database searches, your own observations, and assigned readings. You will develop a basic understanding of hereditary mechanisms and work with several examples to gain an appreciation for and facility with the various ways in which we are coming to understand how genes and environment interact. Most of what there is to be understood about these interactions lies ahead of us and so this study will offer a basis for both future understanding and the application of the competence to lives today. Because of the extent that you will be tracking down sources and gathering information, completion of Research Seminar is a prerequisite. Competencies: E1, E2. Faculty: Morry Fiddler

LL 300 is a prerequisite for this class.

IN 350
NAVIGATING THE CHANGING WORKPLACE
Undergraduate
Navigating the Changing Workplace is a completely online course, in which students use their current work experience as a laboratory to examine, discuss online, and report on key environmental issues impacting their organizations and their personal work lives. Students will be given opportunities to study workplace change, as well as diversity, ethics and leadership issues. Students will also develop networking skills and become aware of career opportunities in the Chicago community. The course is designed to equip students to navigate the changing workplace successfully and make informed career and work life decisions. Students are required to work at least 100 hours, while enrolled in the course. Competences: FX - Can analyze the strengths and weaknesses of one's current organization in relation to competing organizations, and determine strategies to augment strengths and reduce weaknesses.; FX - On the basis of the analysis of one's current organization's effectiveness, can develop and defend a comprehensive plan to move one's organization in a new direction.

IN 351
ONE BOOK/ONE CHICAGO
Undergraduate
Every fall and spring the city of Chicago announces its One Book-One Chicago reading selection. In this FDIS, you'll be able to join in the fun of exploration of the book and its many topics, which may be approached from a variety of disciplinary stances (literary, historical, sociological, religious, political, medical, scientific, etc.). You'll be able to explore thematic issues raised by the selected book and you will attend at least two Chicago events associated with the book-readings, panel discussions, library round tables, lectures, and the like. You'll have the opportunity to sharpen your research skills by reading critical articles related to the particular lenses you apply to the thematic issues in the book. Competences: E1, E2. Faculty: Ann Stanford

IN 352
EYES ON THE PRIZE: A TELEVISION HISTORY OF THE AMERICAN CIVIL RIGHTS MOVEMENT
Undergraduate
The American Civil Rights Movement was one of the most profound social movements in U.S. history. It significantly altered the nation's social structure and self-understanding and liberated a people from disenfranchisement. This course looks at the high points along the road to social justice for African-Americans and the associated changes that resulted in the legal, social, economic, and political systems of the land. Students will trace key developments from the 1954 Supreme Court ruling that integrated schools to our current racial situation by watching the award-winning PBS series and reading a significant book on the topic. Competencies: H-1-B, H-1-F. Faculty: Craig Sautter

LL 250 is a prerequisite for this class.
IN 356  
ENCOUNTERING THE NEW AGE  
Undergraduate  
We are living in a time when many of our most fundamental principles about ourselves and the world around us are being broadly challenged. The goal of this independent study is to explore this shift in outlook, or paradigm, the "new age." The specific focus of study will be shaped by the competence being developed and the interests of the student. Readings, a paper focusing on one area in which the emerging paradigm is having significant effect, and structured journal-keeping will be assigned. Three meetings are required with the instructor; if desired, more can be scheduled. Pre-'99 Competencies: AL-5, AL-D. BA'99 Competencies: A-3-B, A-3-E. Faculty: David Shallenberger

IN 363  
CHICAGO ART AND LITERATURE  
Undergraduate  
Chicago's creative experiences in public art, architecture, and literature have introduced original and significant forms and design theories. Students will explore the factors and forms which have influenced the individuals, events, and movements of Chicago's major artistic expressions. Students will gain an overall appreciation of Chicago's visual, functional, and literary contributions, while exploring in detail a particular artistic expression and forces influencing its design, presentation and reception. Competencies: A-1-A, A-1-C. Faculty: Timothy Hill

LL 250 is a prerequisite for this class.

IN 364  
PLANNING DESIGN AND DEVELOPMENT  
Undergraduate  
Chicago and some of its older communities have benefited from enlightened planning, layout, and design. Following a review of planning examples, principles and design theory, students will select a current planning activity or design development strategy and will detail plan goals, objectives and anticipated results. Students will identify opportunities for public involvement in the planning process to gain greater insight into public decision-making and the power of individual initiative. Competencies: A-2-C, H-1-I. Faculty: Tim Hill

LL 250 is a prerequisite for this class.

IN 365  
LEISURE: A MATTER OF LIFE AND DEPTH  
Undergraduate  
Play, leisure, fun, sport, game, hobby, relaxation, and free time all conjure up activities for most people. Yet many people today complain that they have no time or energy for play. One factor that influences leisure is gender. Socialization patterns, biological aspects, and culture often determine activities that males and females select as leisure pursuits. This course will explore these issues and related ones as well as assist the learner in discovering her/his own desires and patterns in the arena of leisure. Pre-'99 Competence: AL-4. BA'99 Competence: A-3-D. Faculty: Suzanne Ryan

IN 366  
CO-OP REFLECTION: ENSURE YOUR CAREER SUCCESS  
Undergraduate  
Students will put learning into practice by reflecting on their Co-op or long-term internship. Students will acquire access to and knowledge of the organizations, problems and conditions in which they are working; observe how societal and world issues surrounding leadership, social responsibility and spirituality affect their workplaces, all while preparing for a career in your field of interest. The course will be taught using a variety of guest speakers, group discussion, new media, and other interactive resources. Competence: FX

IN 367  
PSYCHOLOGY OF SEX AND GENDER  
Undergraduate  
The text in this course provides the background and context needed to engage in informed discussions on male/female differences and similarities. It provides information on the theories of sex differences and current research examining those theories. Topics explored include: 1) gender differences in social behavior and experience, 2) biology and environment-the process of becoming a male or female, 3) cognitive abilities, 4) sexual orientations, 5) hormonal and reproductive connections, 6) mental and physical health issues including stress change and adaptation, 7) sex and gender role development in childhood, 8) attachment intimacy and power, 9) economics, politics and power, 10) issues in the workplace, and 11) justice, equity and social change. Depending on the chosen competency students will decide on their area of special focus and design an individualized learning project. Such projects might include gender issues in fetal development, gender issues in the workplace, in personal relationships or in how children are treated in school. Competencies : H3A, S2C, FX. Faculty: Dana McDermott

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.
IN 368
LEARNING HISTORY AT THE MUSEUM
Undergraduate
This five week class encourages students to examine and think critically about how historical knowledge is constructed and presented. Museums, the subject of this course, are an excellent place to conduct such investigations. Studies indicate that museums are Americans most trustworthy source for learning about the past (Kammen, 2000) (ouch!). Given the political nature of museums (particularly in recent years as Dubin's book will discuss), this fact beckons us to think and study even more about how information is transmitted in what, as we learn, is a very significant educative arena. Our journey begins with some quotes regarding museums, which are culled from one of the required readings by art historian Brian Wallis. Competencies: H2B, H4. Faculty: Nancy Davis. May be taken for one competence only.

LL 102 and status as a BA-SNLG99 student are a prerequisite for this class.

IN 369
SPIRITUALITIES OF WORK
Undergraduate
For some people, "work" refers to one's job, the means of one's livelihood. Others use the word to describe volunteer work, housework, or other productive activities. Some people associate "work" with drudgery and compulsion, while others think of the word in terms of productivity and stimulation. And, for some people, "spirituality" is what they do when they no longer practice religion. Others remain committed to a religious tradition, but consider spirituality to be their particular expression of that tradition. Although there are various definitions of spirituality, most include an understanding of how individuals and groups try to find meaning and integrity in their lives. Spiritualities usually involve certain beliefs and assumptions, as well as practices intended to accomplish specific goals. In this independent study, you will consider some approaches to spirituality and will then apply them to your own experience of work. In your reflection on and writing about work, you will pay particular attention to characteristics of modern life such as the emphasis on efficiency and scientific reason, technological advances, workplace specialization, and the pursuit of health and well-being. Competences A-3-B, H-3-F, F-X. Faculty: Kevin Buckley

IN 370
COMPARATIVE THEOLOGY
Undergraduate
To give a meaning to meaninglessness is the endless quest of religion. Students will study two religions, neither their own belief system, according to a structured paradigm. This paradigm will include vision, explanation, laws, beliefs, and rituals. The diverse activities of the study will include, primarily, research and reflection with opportunities for site visits, interviews, and other information gathering activities. Students will study Islam and Hinduism or Christian Science and The Church of Jesus Christ of the Latter Day Saints (Mormons). Pre-1999 Competence: AL-5. BA-1999 Competence: A-3-E. Faculty: Suzanne Ryan

IN 372
DISRUPTING THE LIFE CYCLE: READING THE EMERGING STORY OF CANCER
Undergraduate
In 1851, Rudolf Virchow published a book called Cellular Pathology that changed the course of biology and medicine -- he theorized that the cell is the fundamental unit of life and that each cell comes from another cell, through a process of division. Disease and good health, he said, both originate with the cell. His ideas pointed the way for an increasingly detailed picture of how this fundamental unit of life works -- a picture that is taking us deeper into the inner workings of the cell's biology. At the center of this picture lies a portion of nature's universe for maintaining the continuity of life... and controlling the process of cell division -- DNA and the world of genetics. And more recently, Virchow's insight has been borne out again. The drive to overcome cancer has led to the remarkable understanding that cancer is a disruption of the normal and orderly cycle of the cell's replication and division... a cycle that is controlled by genes. The essential idea of this study is to help you develop an understanding of genetics as a biological system through the lens of how cancer and genetics intersect. From an appreciation for and facility with "thinking genetically" to assess factors --- both biological and environmental --- that contribute to health and the development of cancer, you should be able to better "read" and understand advances in understanding and treating cancer that are emerging almost daily. This very demanding study is available only on the Internet at www.depaul.edu/~mfiddler/cancer/. * World Wide Web access through Netscape or Microsoft Explorer 3.0 or higher and email are required. Pre-'99 Competence: PW-4. BA'99 Competence: S-2-A. Faculty: Morry Fiddler
**IN 376**  
**GENDERED RELATIONSHIPS AT WORK**  
**Undergraduate**  
This course will pay special attention to sex and gender issues in relationships at work. It will be studied in context so interactions between other factors (e.g. age, ethnicity, etc.) will be considered. Today in the name of equality we are inclined to deny that gender influences interactions between men and women. Researchers find that gender still has an impact on how men and women relate and suggest not talking about this can result in suspicion, mistrust, false assumptions, misunderstandings and frustration. In this class we will look at theories of gendered communication patterns and assess whether they are at play in our own places of employment. Some of the areas of study are: The double standard of expression, sports talk/family talk, sexist remarks, self-promotion, inclusion in decision-making and the use of humor. Students will read about all areas and then decide to focus their study activities either on researching one in more depth, observing behavior at their own setting in light of all areas, interviewing colleagues about the topics, etc. All students will then submit a paper integrating what they have learned through investigation, experience and reflection on this important issue. They will also make recommendations for creating more equitable environments in their own work settings. Competences: H1B, H3A, FX. Faculty: Dana McDermott

LL 102 and status as a BA-SNLDG99 student are a prerequisite for this class.

**IN 377**  
**EINSTEIN'S WAYS OF KNOWING**  
**Undergraduate**  
While reading Walter Isaacson's 2007 biography, Einstein: His Life and Universe, students will: - explore how Albert Einstein learned and compare those methods to their own. - explain the external and internal factors affecting Einstein's work and, again, compare them to similar factors in their lives. - examine the concept of moral and immoral knowledge in both Einstein's life and their own. Students will participate in cumulative chapter discussions (via Blackboard) that result in a final project addressing each of the described issues. The default project is an essay/short paper, but students are encouraged to consider other options (e.g. concept map, PowerPoint presentation) and discuss with the instructor. Competence: S3X. Faculty: Jennifer Holtz

**INT 150**  
**GLOBAL CONNECTIONS**  
**Undergraduate**  
This course is intended for non-majors who are looking to add an international perspectives course to their study. It looks at the relationships between people living across the globe. Formerly INT 300.

**INT 201**  
**THE EVOLUTION OF THE MODERN NATION STATE**  
**Undergraduate**  
This course focuses on the complex relationship between race, gender, ethnicity and nationality and explores how this relationship shapes the evolution of the modern state. The historical consolidation of the nation state and the development of national institutions are analyzed, using examples from both 19th- and 20th-century Europe and the contemporary Third World. This course is the first in the required three-course sequence. For that reason, it is open to declared majors and minors only. Other students may take the course on a space-available basis, with the permission of the director.

Sophomore standing or above and status as an International Studies major or minor is a prerequisite for this class.

**INT 202**  
**INTERNATIONAL CONFLICT AND COOPERATION**  
**Undergraduate**  
This course analyzes the nature of power in the international arena, conflicts that emerge among nations, and processes through which conflict may be resolved. It includes a critical perspective on realism and the other mainstream theories of international relations.

INT 201 and status as an International Studies major or minor is a prerequisite for this class.

**INT 203**  
**INTERNATIONAL MOVEMENTS IN THE 20TH AND 21ST CENTURIES**  
**Undergraduate**  
This course evaluates the major social movements that have shaped international developments in the 20th and 21st centuries. Includes discussions of the varieties of socialism, race, colonization and decolonization of the Third World.

INT 201, INT 202 and status as an International Studies major or minor is a prerequisite for this class.
INT 204
CULTURAL ANALYSIS
Undergraduate
This course introduces the student to the models and logic of cultural analysis. Building on experiences from the previous courses, it offers students the opportunity to explore a problem of meaning in their everyday lives. Students acquire greater confidence in dealing with cultural issues. Cross-listed as ANT 386.

INT 205
INTERNATIONAL POLITICAL ECONOMY
Undergraduate
Topics discussed include the theory of comparative advantage, trade, immigration, alternatives to neoclassical trade theory, the third world debt crisis of the 1980s and 1990s, global financial institutions, and recurrent financial crises.

ECO 105 and ECO 106 are prerequisites for this class.

INT 206
IDENTITIES AND BOUNDARIES
Undergraduate
This course explores how identity formation is shaped by cultural, historical, and political construction of barriers, borders, and boundaries, and how such formations are intertwined with ethnicity, race, nationality, gender and class.

INT 301
SENIOR SEMINAR
Undergraduate
Combines formal class work and independent research. Raises philosophical questions about the nature of and prospects for a new international order, and discusses appropriate methodologies for the field. Culminates in a senior research paper.

Senior standing and declared International Studies major or minor are prerequisites for this course.

INT 310
AFRICAN AREA STUDIES I
Undergraduate
A general interdisciplinary survey of the social, political, and economic institutions, and the cultural history of selected regions within the African continent.

INT 311
AFRICAN AREA STUDIES II
Undergraduate
A continuation of the survey of institutions and cultural history described in 310.

INT 320
WEST AND SOUTH ASIAN AREA STUDIES I
Undergraduate
A general interdisciplinary survey of the social, political, and economic institutions, and the cultural history of selected regions within West or South Asia.

INT 321
WEST AND SOUTH ASIAN AREA STUDIES II
Undergraduate
A continuation of the survey of institutions and cultural history described in 320.

INT 330
EAST ASIAN AREA STUDIES I
Undergraduate
A general interdisciplinary survey of the social, political, and economic institutions, and the cultural history of selected regions within East Asia and the Pacific.
INT 331
EAST ASIAN AREA STUDIES II
Undergraduate
A continuation of the survey of institutions and cultural history described in 330.

INT 336
CULTURES OF THE PACIFIC
Undergraduate
A survey of the social, political, and economic institutions, and the culture history of selected regions of the Pacific.

INT 340
EUROPEAN AREA STUDIES I
Undergraduate
A general interdisciplinary survey of the social, political, and economic institutions, and the cultural history of selected regions of Europe and the Soviet Union.

INT 341
EUROPEAN AREA STUDIES II
Undergraduate
A continuation of the survey of institutions and cultural history described in 340.

INT 350
LATIN AMERICAN AREA STUDIES I
Undergraduate
A general interdisciplinary survey of the social, political, and economic institutions, and the cultural history of selected regions of Latin America.

INT 351
LATIN AMERICAN AREA STUDIES II
Undergraduate
A continuation of the survey of institutions and cultural history described in 350.

INT 360
TOPICS IN DEVELOPMENT & ANTI-DEVELOPMENT
Undergraduate
A survey of the problem of endemic poverty in the Third World, together with a consideration of the various forms of public action designed to alleviate poverty. Considerable attention will be paid to the problems of rural poverty and the pitfalls and possibilities of industrialization.

INT 362
LANGUAGE AND THE POLITICS OF TERROR
Undergraduate
Politics is, among other things, the arena in which human bodies are broken. This course will concern itself with the breaking of human bodies through torture, genocide, war and poverty. Throughout, a focus will be maintained on the interface between bodies and language, on how bodies placed under extremes of pain and degradation lose their capacity for speech, and how language reaches its intrinsic limits in trying to represent bodies in pain.

INT 364
TOPICS IN INTERNATIONAL POLITICAL ECONOMY
Undergraduate
A course that offers students the opportunity to explore international trade issues in greater depth. (See schedule for current offerings.)

INT 365
TOPICS IN WAR AND PEACE
Undergraduate
A course that offers students the opportunity to explore security, war and peace studies in greater depth. (See schedule for current offerings.)
INT 366
TOPICS IN INTERNATIONAL LAW
Undergraduate
A course that offers students the opportunity to explore law and security issues in greater depth. (See schedule for current offerings.)

INT 368
TOPICS IN GLOBAL CULTURE
Undergraduate
A course that offers students the opportunity to explore global cultural studies in greater depth. See schedule for current offerings.

INT 371
INTERNATIONAL ENVIRONMENTAL POLITICS
Undergraduate
This course examines the international processes by which scientific knowledge concerning environmental change and degradation is translated into action on the parts of individuals, groups, states, and global institutions. We look at the political, legal, economic and cultural structures that reproduce the global propensity to disrupt or degrade the environment and that likewise prevent amelioration.

INT 374
TOPICS IN INTERNATIONAL ORGANIZATIONS
Undergraduate
A course that offers students the opportunity to explore the United Nations, the Organization of American States, non-governmental organizations, the European Union, NAFTA and similar trading blocks or organizations, and the policy issues associated with these organizations. (See schedule for current offerings.)

INT 380
INTERNSHIP PROSEMINAR
Undergraduate
In this phase of an off-campus internship, students develop a research agenda under the supervision of faculty that they will carry out during their off-campus residency.

INT 382
INTERNSHIP RESIDENCY
Undergraduate
This course should be used to register credit hours for both Chicago-based and off-campus residencies to complete internship agreements and approved independent research proposals. 4-8 credit hours.

INT 384
INTERNSHIP DIRECTED RESEARCH
Undergraduate
In this phase of an off-campus internship, students submit a research report to faculty and expand upon their experience through further research.

INT 388
SPECIAL TOPICS IN INTERNATIONAL STUDIES
Undergraduate
Special Topics In International Studies

INT 389
INTERNATIONAL SOCIAL ENGAGEMENT
Undergraduate
The course provides 20-25 hours of service learning opportunities for students in organizations that are pursuing local activities based on international missions or globally-informed policies. The course meetings focus on student experiences and a discussion of state, sub-state, and non-state organizational structures in the international context.
INT 390
GUEST SEMINAR
Undergraduate
Examination of a topic in international studies under the direction of a visiting professor.

INT 393
INTERNATIONAL STUDIES PRACTICUM
Undergraduate
Structured and supervised student participation in collegiate level simulations of international agencies, organizations, and conferences, including Model U.N., Model O.A.S., and others. Includes practical experience in agenda research, resolution preparation, and committee debate. The practicum extends through a single academic year. Students will register for the course in Autumn term. Four credit hours are earned at the end of the Spring term.

INT 399
INDEPENDENT STUDY
Undergraduate
Variable credit hours.

INT 401
PROSEMINAR IN INTERNATIONAL STUDIES
Graduate
The seminar defines the methodology of international studies in three ways: as a theory of institutional interactions between people separated by distance and/or culture, as a problem-based research agenda aimed at discovering more effective mechanisms for these institutional interactions, and a collection of methods that employ historical, political, economic and cultural research techniques, simultaneously or sequentially, to uncover solutions to international problems. The objectives of this seminar are accomplished by studying a series of cases, most of which require library research, with students. These serve as model thesis projects, thereby introducing students to the methodology of the field and the program requirements simultaneously. Faculty from the various disciplines offer lectures in the seminar, introducing students to a wider range of approaches and potential advisors in the Autumn term.

Graduate International Studies student is a prerequisite for this course.

INT 402
COMPLEX SOCIAL ORGANIZATION
Graduate
The seminar will work through a series of cases that show students how to connect the surface events of a contemporary economic or political situation to the underlying social and cultural structures and processes that precipitate it. Theories that attempt to validate assumptions about these underlying structures and processes are examined. Through this seminar students acquire a fundamental knowledge of social theory and the methodology of organizational analysis.

INT 401 is a prerequisite for this course.

INT 403
MOVEMENTS, REGIMES, AND IDEOLOGIES
Graduate
The seminar focuses on the organization of power in contemporary societies and the processes that legitimize or impeach authority. Students examine cases from both historical movements and contemporary movements. Through this seminar students acquire a fundamental knowledge of the agendas of modern political movements and the ideological supports for existing regimes.

INT 401 is a prerequisite for this course.

INT 404
CULTURES IN THE INTERNATIONAL CONTEXT
Graduate
An examination of contemporary issues in cultural analysis of global processes. Topics may include local-global linkages, transnational identities and communities, diasporas, Orientalism, the post-colonial condition, the post-socialist condition, commodification and consumption, meanings of gender and sexuality, globalized spaces and places, and technological transformation.
INT 405  
**ECONOMIES IN THE INTERNATIONAL CONTEXT**  
*Graduate*

Examines the historical development of the contemporary international economy. The principle channels of interaction in this economy are examined: trade and investment, diffusion of technology, and institutional borrowing and adaptation. Students encounter classical, marxian, and neoclassical (political) theories of the interaction between national economies.

INT 401 is a prerequisite for this course.

INT 406  
**GLOBALIZATION**  
*Graduate*

This seminar explores the cultural, economic, and political dimensions of current globalization processes. Topics may include flows of people, goods, ideas, or capital and how these flows impact states, movements, regimes, and localities.

INT 401 is a prerequisite for this course.

INT 490  
**SPECIAL TOPICS IN INTERNATIONAL STUDIES**  
*Graduate*

Special courses will be offered as students and faculty identify selected topics of common interest. This number is also used for students taking 300-level courses in the undergraduate International Studies program. In this case, students must have the approval of their thesis advisor and the director of the International Studies program before registering for the course.

INT 500  
**TOPICS IN GLOBAL CULTURAL ANALYSIS**  
*Graduate*

Provides students writing theses in the area of global culture with opportunities to read contemporary works in the field, including the fragmentation of identity, postcolonial historiography, and transnationalism. Students develop analytical skills that can be applied to their projects. The seminar is offered in the Spring of the first year; the course focuses on different topics under different instructors.

INT 502  
**TOPICS IN INTERNATIONAL POLITICAL ECONOMY**  
*Graduate*

Provides students writing theses in the area of international political economy with opportunities to read contemporary works in the field, including growth theories, capital and labor flows, and transformation of regimes. Students develop analytical skills that can be applied to their projects. The seminar is offered in the Spring of the first year; the course focuses on different topics under different instructors.

INT 504  
**TOPICS IN INTERNATIONAL LAW**  
*Graduate*

Course offers students the opportunity to engage in an examination of recent developments in international treaties, legal process and international organization. Topics have included refugees, trade law, criminal law and the establishment of the international criminal court, international labor law, environmental law, theories of international law, human rights and the relationship between international law and local economic development. Students work on the international law and institutional aspects of their theses.

INT 506  
**ETHICS IN INTERNATIONAL POLITICS**  
*Graduate*

Provides a detailed review of the ethical writings on international politics from a number of philosophical positions.
Course offers students the opportunity to engage in comparative examination of recent ethnic conflicts. Theories of the national/nationalism, ethnicity, race and gender are applied to case studies of conflicts involving group-based sociopolitical identification. International political legal forms of prevention and amelioration are studied and evaluated in light of theories and histories of group-based conflict. Conflicts studies have included: Northern Ireland, Rwanda, Israel/Palestine, the former Yugoslavia, Nigeria, E.Timor, Chiapas, France, Tibet, Cypruds, Kurdistan, Sri Lanka, and the U.S. Students work on the theory portion of their theses, developing a conception of group-based social identification.

Course examines historical, political economic, sociocultural and legal aspects of the migration of people across borders. Students gain a critical understanding of the development of the world labor market from early modernity through the present, as well as the structural context of recent anti-immigrant/anti-immigration politics in Europe, North America and Australia. Cultural studies concepts of diaspora, mestiza, "the new ethnicity," and hybridity are used to explore the possible formation of unique migrant subjectives. Finally we look at the consequences for the nation-state of migration-driven transnational subject and community formation. Students work on the theory portion of their theses, developing a conception of population shifts, transnational identity and their implications for social organization.

Explores the growth in the scope and power of international media to distribute images and ideas. Topics covered include First World monopolization of media, analysis of ties between media and capital, and Third World resistance to media influence.

Peacekeeping. Explores the history of UN. peacekeeping efforts and the effectiveness of these efforts in different conflicts. Topics vary with the interests of the students.

Supervised independent research aimed at acquiring primary data for the thesis.

Supervised participation in a professional activity outside of the student's current employment, that further deepens the student's understanding of his or her research area.

This course provides 20-25 hours of service learning opportunities for students in organizations that are pursuing local activities based on international missions or globally-informed policies. The course meetings are focused on student experiences and a discussion of state, sub-state, and non-state organizational structures in the international context.
INT 590
THESIS RESEARCH I: DIRECTED RESEARCH
Graduate
The workshop extends the opportunity for students to discuss their thesis research activities with faculty and to learn various techniques and strategies of effective research. Ordinarily, students register for this course in Spring term.

INT 401 is a prerequisite for this course.

INT 592
THESIS RESEARCH II: THESIS WRITING
Graduate
The workshop extends the opportunity for students to discuss their thesis writing activities with faculty and to learn various techniques and strategies of effective scholarly writing. The culmination of this course is the defense of the thesis. Ordinarily, students register for this course in Winter term.

INT 401 is a prerequisite for this course.

INT 601
CANDIDACY CONTINUATION
Graduate
Students who must take extra time to complete the requirements for the first or second year must enroll in candidacy continuation or must apply for readmission to the program.

INT 699
CANDIDACY MAINTENANCE
Graduate
Placeholder course for students NOT actively working on their thesis. This course is meant only to maintain university student status, it will not give the student full- or part-time student status and will not permit deferment of student loans.

INTC 205
COMMUNICATION, CULTURE AND COMMUNITY (Formerly CMNS 205)
Undergraduate
Examines the relationships among culture, communication, institutions, and public and private life. Students explore the possibilities and problems of contemporary forms of community through service in community organizations. The course also fulfills the junior year experiential learning requirement through community based service learning. (Formerly CMNS 205)

INTC 206
COMMUNICATING MULTICULTURAL IDENTITIES (Formerly CMNS 206)
Undergraduate
This course examines identity from a critical/poststructuralist position, approaching the notion of identity as a performative and discursive production within complex systems of power, privilege, and oppression. Together, the class will examine the ways in which discourse influences our performances of personal identity as well as the ways that it constructs our ideas about other identities (gender, race, sexuality, etc.). Through reading, discussion, and reflection, we will interrogate how individual and group identities are theorized, constructed, negotiated, and transformed; how identity is shaped by rhetorical discursive and non-discursive practices; and how identity construction is situated in historical/social/political/ideological contexts. (Formerly CMNS 206)

INTC 220
PUBLIC SPEAKING (Formerly CMNS 220)
Undergraduate
Introduction to the skills required in a variety of public speaking settings. Includes units on delivery, language, defining speech purposes and content, finding supporting material, organization, and audience analysis. Students will be required to present speeches. Background in basic writing and library skills is necessary. (Formerly CMNS 220)
INTC 230
PERFORMANCE OF LITERATURE (Formerly CMNS 230)
Undergraduate
Introduction to the communication of literature through oral interpretation. Involves critical analyses of selected literary works and preparation for and delivery of short performances. (Formerly CMNS 230)

INTC 290
COMMUNICATION WORKSHOP (VARIABLE TOPICS) (Formerly CMNS 290)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (Formerly CMNS 290)

INTC 304
MULTICULTURAL COMMUNICATION IN THE U.S.A. (Formerly CMN 304)
Undergraduate
An examination of communication within and between linguistic communities in the United States. Focus will be on the relations between language use and social institutions such as the family, the community, the media, and the educational system. (Formerly CMN 304)

INTC 307
TOPICS IN POLITICAL AND SOCIAL COMMUNICATION (Formerly CMNS 307)
Undergraduate
Examines intensively one or more issues in the Culture and Communication Track. The topics differ each term focusing on a particular area of discourse such as environmental communication, political communication, and sexuality and communication. (Formerly CMNS 307)

INTC 308
TOPICS IN INTERCULTURAL COMMUNICATION (Formerly CMNS 308)
Undergraduate
Examination of the application of linguistic and rhetorical theories to various specializations in cultural discourse. The course focuses each term on one particular area such as semiotics, language acquisition, or language and power. (Formerly CMNS 308)

INTC 309
INTERNATIONAL/GLOBAL COMMUNICATION (Formerly CMNS 309)
Undergraduate
Focuses on the world of international/global news flow and media systems in a comparative manner. Emphasizes changes that have followed the modernization of the media, the impact of globalization on individual countries, attempts to preserve the cultural character of domestic media content in the face of increased amounts of imported products, and the effects of new communication technologies, particularly the Internet. (Formerly CMNS 309)

INTC 310
DISCOURSE ANALYSIS (Formerly CMNS 310)
Undergraduate
An analytical examination of the ways in which people locate meaning cooperate, coordinate, and find coherency in conversations and in other forms of discourse, both spoken and written. The class will analyze and disclose meanings hidden in public discourse. (Formerly CMNS 310)

INTC 321
CULTURAL AND SYMBOLIC CRITICISM (Formerly CMNS 321)
Undergraduate
Introduction to the critical methodologies of rhetorical analysis. Students are instructed in ways to become more reflective consumers of discourse by examining how rhetoric instructs reality, shapes the social and political agenda and engages questions of ethics, power and persuasion. The course promotes a critical awareness of the role symbols play in influencing human perception, attitude, and action in a diverse culture. (Formerly CMNS 321)
INTC 322
ADVANCED PUBLIC SPEAKING (Formerly CMNS 322)
Undergraduate
Analyzes theories and develops skills required in persuasive speaking situations. This course is an extension of the public speaking class (INTC 220) and explores in greater detail than the first course the analysis of audiences, sources of resistance to persuasion, and appropriate logical and psychological strategies for persuasive speeches. (Formerly CMNS 322)

INTC 220 is a prerequisite for this course.

INTC 323
SOCIAL MOVEMENTS (Formerly CMN 323)
Undergraduate
This course examines the rhetoric of social movements throughout American History. As a rhetoric class, the focus is primarily on the symbolic creation of movements in order to provide background of the political and social events that gave rise to the movement. Using readings from a variety of sources, we will investigate the discursive construction of power as it relates to society and politics. The class will take a case-study approach to examining social movement rhetoric, exploring the discourse that has served to resist oppressive, or perceptively oppressive, systems. (Formerly CMN 323)

INTC 324
CULTURE OF CONSUMPTION (Formerly CMNS 324)
Undergraduate
Introduces students to the critique of our consumer culture. Teaches students how to be critical consumers and understand how to be critical consumers and understand how we consume lifestyles, images, aesthetics, and desire through our shopping patterns. Provides theoretical, observational, and critical tools that allow students to critique patterns of consumption, the production of culture through consumption, and how consumption is a means of communication. (Formerly CMNS 324)

INTC 325
PROMOTING SUSTAINABLE PRACTICES (Formerly CMNS 325 - ENVIRONMENTAL COMMUNICATION WORKSHOP)
Undergraduate
Provides a foundation in the communication skills necessary for achieving conservation goals. Introduces communication approaches such as social marketing, citizen participation, public campaigns, and environmental interpretation that have proven effective in the work of conservation professionals. (Formerly CMNS 325 - ENVIRONMENTAL COMMUNICATION WORKSHOP)

INTC 326
ENVIRONMENTAL POLITICS AND RHETORIC (Formerly CMNS 326)
Undergraduate
Rhetorical perspective on environmental public discourse. Course also explores the relationship between rhetorically constituted ideas about nature and the development of political and social ideas, institutions, and practices that inform our understanding of the human place in the environment. (Formerly CMNS 326)

INTC 328
HISTORY OF RHETORIC AND COMMUNICATION (Formerly CMNS 328)
Undergraduate
Offers an overview of historical foundations of the communication field. Examines how the formulations of rhetoric by various thinkers derived from cultural, religious, and political contexts shape human consciousness and communication patterns. Students read primary and secondary materials on classical rhetoric and rhetoric of diverse cultures. The course promotes an understanding and appreciation of antiquity and development of ideas over time in relation to current cultural and communicative patterns. (Formerly CMNS 328)

INTC 330
TOPICS IN PERFORMANCE (Formerly CMNS 330)
Undergraduate
Advanced study in performance focusing on a specific genre each quarter such as: Poetry, Fiction, Nonfiction, Drama or Chamber Theater. Other possibilities include: performing autobiography; life performances; ritual, ceremony, and storytelling; and radio and television performances. (Formerly CMNS 330)
INTC 331
COMMUNICATION FIELDWORK (Formerly CMNS 331)
Undergraduate
Provides students with experience conducting qualitative research, including data collection techniques, data coding and analysis, as well as interpretation of data and writing ethnographic reports. In addition to providing practical hands-on training in ethnographic research, this course serves to explore the theory, ethics, and politics behind various research methodologies. (Formerly CMNS 331)

INTC 332
TOPICS IN INTERCULTURAL COMMUNICATION METHODOLOGY
Undergraduate
Courses explore a range of qualitative and quantitative research strategies. Topics may include more specialized modes of gathering and assessing data, using new data technologies and software programs, and conducting communication studies.

INTC 333
CULTURAL WAYS OF SPEAKING (Formerly CMNS 333)
Undergraduate
Explores how speakers reveal culture through their everyday interactions. This course focuses on speaking as an activity through which individuals identify themselves with communities of discourse, within the United States as well as across cultural groups. It provides students with experience in discovering diverse "ways of speaking" and "codes" concerning what it means to be a person, how people relate to each other, and how they view the world. (Formerly CMNS 333)

INTC 334
URBAN COMMUNICATION (Formerly CMNS 334)
Undergraduate
Examines relationships between material features of the city and symbolic representations of urban life (e.g., photography, film, songs, public discourse) with the goal of understanding the city as a site of communication. Special attention is paid to expressions of hope for and fear of the city. (Formerly CMNS 334)

INTC 335
LATINO COMMUNICATION, CULTURE, & COMMUNITY (Formerly CMNS 335)
Undergraduate
Examines the relationships among Latino cultures, communication, institutions, and public and private life. Students explore the possibilities and problems of contemporary forms of community through service in Latino community organizations. The course also fulfills the junior year experiential learning requirement through community based service learning. (Formerly CMNS 335)

INTC 337
ASIAN-AMERICAN MEDIA REPRESENTATIONS (Formerly CMNS 337)
Undergraduate
The course takes an interdisciplinary approach in the analysis of the media images and explores issues of power, identity, race, gender, class, sexual orientation and the interaction of these factors in the representation of Asian Americans. (Formerly CMNS 337)

INTC 338
ASIAN CULTURE AND COMMUNICATION (Formerly CMNS 338)
Undergraduate
Reviews major Asian philosophical and religious traditions such as Hinduism, Confucianism, Taoism, and Buddhism and examines how these traditions influence and affect Asian cultures and communication behaviors, particularly communication among Indians, Chinese, Japanese, Koreans, and Asian Americans in various contexts. (Formerly CMNS 338)

INTC 340
LEGALIZING LANGUAGE
Undergraduate
This course examines language legislation and rules globally at national and institutional levels. We explore the ideologies and motivations that underlie such policies.
INTC 361
GENDER AND COMMUNICATION (Formerly CMNS 361)
Undergraduate
A review of the differences in communication patterns between women and men. Topics covered include language and language usage differences, interaction patterns, gender social movements, and perceptions of the sexes generated through language and communication. (Formerly CMNS 361)

INTC 367
PERFORMANCE FOR SOCIAL CHANGE (Formerly CMNS 367)
Undergraduate
This is an experiential field experience that examines the role of performance in social activism. Student projects will identify a social issue of critical concerns and devise a performative response. (Formerly CMNS 367)

INTC 392
INDEPENDENT STUDY
Undergraduate
Independent Study.

INTC 393
INTERCULTURAL COMMUNICATION PRACTICUM
Undergraduate
Structured and supervised student participation in collegiate debating, radio production or group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours. Written permission of supervising faculty member and of the departmental chair is necessary before registration.

INTC 395
DEBATE PRACTICUM (Formerly CMNS 395)
Undergraduate
This practicum centers on developing students' skills in debate and public discourse. Participation in forensic activities outside of the class (tournaments, public debates, etc.) is an expectation. (Formerly CMNS 395)

INVR 101
Investor Relations Today
Continuing Education

INVR 102
Finance Fundamentals: The Investment Process and the Capital Markets
Continuing Education

INVR 103
The Corporate Environment and Regulation Fair Disclosure Issues
Continuing Education

IPD 352
IPV6 PROGRAM
Undergraduate
A 10-week online program providing comprehensive coverage of IPv6 technologies and strategies for transitioning enterprise networks to IPv6

IPD 353
CLOUD COMPUTING WITH AMAZON WEB SERVICES PROGRAM
Undergraduate
A 10-week program in cloud computing using the Amazon Web Services platform

IPD 354
CLOUD COMPUTING INFRASTRUCTURE AND OPERATIONS PROGRAM
Undergraduate
A 6-week program in the architectures, infrastructure, and operations of Cloud Computing
IPD 355
CLOUD COMPUTING FUNDAMENTALS PROGRAM
Undergraduate
An 11-week program in the principles, methods, and technologies of Cloud Computing

IPD 356
WEB DEVELOPMENT WITH AJAX TECHNOLOGIES PROGRAM
Undergraduate
A 7-week program covering Web development with Ajax technologies

IPD 357
WIRELESS LAN SECURITY PROGRAM
Undergraduate
An 8-week program covering the latest solutions to wireless LAN security issues.

IPD 358
SHAREPOINT DEVELOPER PROGRAM
Undergraduate
A 10-week program covering Microsoft SharePoint development.

IPD 359
WEB DEVELOPMENT WITH PYTHON PROGRAM
Undergraduate
A 6-week program covering Web development with the Python programming language.

IPD 360
SQL SERVER BUSINESS INTELLIGENCE PROGRAM
Undergraduate
An 11-week in-depth program covering SQL Server 2005 analysis services, integration services, and reporting services.

IPD 363
SQL SERVER DATABASE ADMINISTRATION PROGRAM
Undergraduate
An 11-week in-depth certificate program covering database administration using SQL Server

IPD 364
LIGHTWEIGHT JAVA WEB DEVELOPMENT PROGRAM
Undergraduate
A 7-week comprehensive certificate program covering open-source, lightweight Java enterprise Web development using POJOs (Plain Old Java Objects)

IPD 365
RUBY ON RAILS PROGRAM
Undergraduate
A 7-week in-depth certificate program covering Web development using Ruby on Rails.

IPD 366
JAVA WEB SERVICES PROGRAM
Undergraduate
A 7-week program covering program covering service-oriented architecture and the development of Web services using Java
IPD 370
ADVANCED SQL PROGRAM
Undergraduate
A two-week program covering advanced SQL.

IPD 380
IT PROJECT MANAGEMENT PROGRAM
Undergraduate
A 10-week comprehensive program covering best practices in IT project management

IPD 382
JAVA DEVELOPER PROGRAM
Undergraduate
A ten-week comprehensive certificate program covering object-oriented applications development using Java for programmers. Program offered through the Institute for Professional Development; enrollment is restricted.

IPD 389
.NET DEVELOPER PROGRAM
Undergraduate
A ten-week comprehensive program covering VB.NET and .NET technologies

IPD 452
IPV6 PROGRAM
Graduate
A 10-week online program providing comprehensive coverage of IPv6 technologies and strategies for transitioning enterprise networks to IPv6.

IPD 460
SQL SERVER BUSINESS INTELLIGENCE PROGRAM
Graduate
An 11-week in-depth program covering SQL Server 2005 analysis services, integration services, and reporting services.

IPD 461
SQL SERVER DATABASE HIGH AVAILABILITY PROGRAM
Graduate
An 11-week program designed to provide a comprehensive overview of the various high availability solutions available with the latest edition of Microsoft's SQL Server.

IPD 468
.NET MOBILE APP. DEV. PROGRAM
Graduate
An 11-week focused program covering the basic skills and techniques for successfully building

IPD 500
TASTE OF COMPUTING PROFESSIONAL DEVELOPMENT
Graduate
The goals of this course are to: work collaboratively with peers to implement an inquiry-based curriculum in computer science; prepare to teach culturally-relevant foundational computing knowledge with concrete instructional strategies; and, develop a community of practice in the classroom with an interdisciplinary approach to problem-solving.

IPD 530
ADVENTURE OF THE AMERICAN MIND
Graduate
The Adventure of the American Mind (AAM) is the course component of a project designed to teach in-service classroom teachers to access, use and produce curriculum utilizing the Internet and the digitized primary source materials from the collections of the Library of Congress.
IRE 101
IRELAND, 1450 - 1800, CONQUEST, COLONIZATION & REBELLION
Undergraduate
This course offers a survey of Irish history from the end of the middle ages to the union of Ireland and Great Britain in 1800. It traces the ways in which Ireland was brought under great English (later British) control through processes of agreement, conquest and colonization; and the ways in which various groups within Ireland sought to resist such developments. Cross-listed as HST 266 & CTH 288.

IRE 102
HISTORY OF IRELAND FROM 1800 TO THE PRESENT
Undergraduate
Survey of Irish history from 1800 to 2000. Examines the course of Irish history from the Act of Union (creating the United Kingdom), through the struggles and reforms of the 19th century (Catholic Emancipation, the Famine and Irish diaspora, Fenianism, Land Reform and Home Rule), to the creation of the modern nation-state of the 20th century (the Easter Rising, partition and civil war, the role of Eamon deValera, the Republic, and the Troubles). Topics include the contributions of Irish culture and its influence in Europe and the world. Cross-listed as HST 268.

IRE 103
IRELAND: RELIGION AND THE CONTEMPORARY "TROUBLES"
Undergraduate
An examination of the role of two Christian denominations (Protestant and Roman Catholic) in the more recent "Troubles" in the north of Ireland. Attempts to discover the contributions of religious differences in fueling and resolving the animosities between the Unionist and Nationalist sides; studies the social-historical dimension of the troubles and the Protestant and Catholic religious activities and official responses to them. Cross-listed as CTH 274.

IRE 104
THE EARTH'S CULTURAL LANDSCAPE
Undergraduate
A survey of the global patterns and processes which create our world's cultures. Several cultural realms such as language, religion, folk and popular culture, ethnicity, and the built environment serve as foci for a deepened understanding of the world and its people. Cross-listed as GEO 170.

IRE 105
GEOPOLITICS
Undergraduate
A survey of theories of international relations and geopolitics, the course explores the security dilemmas and types of collective action that mold international affairs in the Post-Cold War era. Cases from Western Europe, the Balkans, the Middle East and the Trans-Caucasus region provide opportunities to assess theoretical approaches and profile the United States' security landscape for the new millennium. Cross-listed as GEO 201.

IRE 106
THE EUROPEAN UNION
Undergraduate
An interdisciplinary study of European integration following WWII, with special emphases on the political philosophy, the geopolitical basis for the block's formation, the institutional structure, the evolution of policies, and the future development of the European Union. The course nurtures research and presentation skills through simulations of the European Commission and Council. Cross-listed as GEO 316.

IRE 107
CULTURAL GEOGRAPHY
Undergraduate
How do artists depict different locations? How do television portrayals of New York City compare and contrast between situation comedies and drama series? How do lyrics and music portray a sense of place and local identity? This course will analyze how places are represented and understood through arts, music and literature. Students will develop the theoretical skills to examine the cultural geography both of the United States and elsewhere. Cross-listed as GEO 172.
IRE 201
TOPICS IN IRISH STUDIES
Undergraduate
See schedule for current offerings Cross-listed as ENG 357.

A literature course is a prerequisite for this course.

IRE 202
MODERN IRISH LITERATURE
Undergraduate
This course provides an introduction to Irish literature, including some poems in the Irish language with English translations on facing pages, written from the Literary Revival to the late twentieth century. It emphasizes the transitions from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers. Cross-listed as ENG 355.

IRE 203
CONTEMPORARY IRISH LITERATURE
Undergraduate
This course is an introduction to the vibrancy of contemporary Irish literature. It explores the ways in which literature addresses issues such as new patterns of living, communal tension, and women's experience.

IRE 249
GENDER AND POLITICS IN IRELAND
Undergraduate
This course examines the often paradoxical impact of political change and social relations on women in Ireland. Political change has at times afforded women leadership opportunities; social relations have been, especially during periods of colonial rule and the ascendancy of the Church, intensely patriarchal. The course pays particular attention to the way in which, historically and today, categories of gender have been constructed and intersect with or otherwise affect politics and social relations in the Republic of Ireland or the six counties that remain part of the United Kingdom. Cross-listed with WGS 249.

IRE 301
NINETEENTH CENTURY IRISH LITERATURE
Undergraduate
This course focuses on some of the important works of nineteenth-century Irish literature. It sees them as engaging with the often traumatic political and social changes of their time. Cross-listed as ENG 346.

A literature course is a prerequisite for this course.

IRE 302
THE IRISH REVIVAL
Undergraduate
The course invites a study of the cultural ferment of the decades from the 1890's to the 1920's in Ireland. Particular attention will be given to an introduction to the work of canonical writers such as Yeats and Joyce who emerged from it. Cross-listed as ENG 354.

A literature course is a prerequisite for this course.

IRE 303
REVOLUTION AND NATIONALISM IN IRELAND
Undergraduate
From the eighteenth to the twenty-first century Irish history has been defined by the emergence of national consciousness. This emerging consciousness has been expressed through violent rebellion against British rule and participation in British politics. This course traces the course of revolution and nationalism in Ireland from 1798 to 1923. This course traces the evolution of Irish nationalism and examines the historical literature of this subject. Key themes include: agrarian unrest, parliamentary politics, ideological revolution and the interaction of these forces to achieve independence.
IRE 379
INDEPENDENT STUDY
Undergraduate
Intensive study of a topic of special interest which is relevant to Irish Studies, normally in one of the curricular areas in which Irish Studies is taught in the minor, and usually with a faculty member who teaches in the Irish Studies program. An independent study typically involves private conferences with an instructor and supervised reading, research and writing. Written permission of the supervising faculty member and of the program director is necessary before registration.

IS 201
INTRODUCTION TO INFORMATION SYSTEMS (FORMERLY IT 201)
Undergraduate
This course demonstrates how information is used by organizations to conduct business and solve problems. This course presents information systems principles and demonstrates how they form an integral part of modern organizations. Topics include systems concepts; organizational processes; technological aspects of information systems; the Internet; IT security and ethical issues; database management; and systems development life cycle. In addition, students familiarize themselves with the DePaul computing environment and demonstrate competency at navigating that environment. PREREQUISITE(S): none

IS 208
INFORMATION TECHNOLOGY, ECONOMY AND SOCIETY
Undergraduate
Introduction to emerging information technologies and their impact on modern society. This course discusses the latest technologies used in the evolving IT environment and how these technologies are changing the modern world. Emphasis is placed on investigating issues using a variety of sources, case studies, and writing. PREREQUISITE(S): None

IS 215
ANALYSIS AND DESIGN TECHNIQUES (FORMERLY IT 215)
Undergraduate
This course presents a structured approach to analysis and design of an information system for a business. The systems development life cycle will be defined and described. Process descriptions, user and task analysis for interface development, prototyping, data flow and entity relationship diagramming will be presented. Case studies that promote critical-thinking skills provide the context for these techniques. PREREQUISITE(S): none

IS 280
COMMUNICATION FOR THE GLOBAL IT PROFESSIONAL
Undergraduate
Development of professional communication and collaboration skills for the global IT workplace. Students cultivate proficiency with traditional in-person and electronic communications, modeling the conflict resolution, personal initiative, and personal presentation behaviors necessary for career advancement. Students become comfortable users of virtual communication and collaboration toolsets such as VoIP, collaborative editors, web presentation software, virtual team portals, and virtual scheduling tools. PREREQUISITE(S): WRD 104. For students required to take LSP 120, it is also a prerequisite.

IS 313
BUSINESS APPLICATION DEVELOPMENT IN JAVA
Undergraduate
This course covers the design and implementation of several key business applications, for example, customer invoice and cash receipts, accounts receivable, finished goods and payroll. These topics will motivate the use of advanced techniques in the Java programming language with an emphasis upon database usage and business reporting. PREREQUISITE(S): CSC 212 or CSC 224.

IS 321
INFORMATION SYSTEMS ANALYSIS
Undergraduate
This course focuses on initial phases of the systems development life cycle. Topics include the systems development environment, information system fundamentals, project management techniques and concepts, requirements gathering and structuring, process and data modeling. Emphasis will be placed on CASE tools, project management tools and RAD. Students are strongly urged to take IS 321 and IS 322 in consecutive quarters. PREREQUISITE(S): IS 201, CSC 210.
IS 322
INFORMATION SYSTEMS DESIGN
Undergraduate
Continuation of the analysis and design sequence emphasizing latter stages of the SDLC including design, implementation, testing, support and maintenance. Topics include design of data storage, programs and user interfaces. Emphasis will be placed on transforming a logical design from systems analysis into a functional prototype. Students are strongly urged to take IS 321 and IS 322 in consecutive quarters. PREREQUISITE(S): IS 321, CSC 319, CSC 212.

IS 324
ENTERPRISE ARCHITECTURE
Undergraduate
This course explores the characteristics, selection, implementation and management of enterprise architecture frameworks, focusing primarily on the evaluation and planning of information systems from a top-down perspective. Major topics include enterprise architecture, Web 2.0, Enterprise 2.0, social media and networking, software as a service, content management systems, cloud computing, and portals; each is studied in terms of its characteristics and potential applications within an organization. PREREQUISITE(S): IT 215

IS 344
IT AUDITING
Undergraduate
Management and boards continue to recognize the importance of effectively managing information technology (IT) assets - to meet business objectives and to thoughtfully manage IT related business risks. This course examines the key principles related to auditing information technology processes and related controls and is designed to meet the ever increasing needs of IT audit and IT governance professionals. In addition, this course aids in the preparation for the Certified Information Systems Auditor (CISA) exam. PREREQUISITE(S): None

IS 354
WEB INFORMATION SYSTEMS DEVELOPMENT
Undergraduate
Web Information Systems Development  (PREREQUISITE: IS 353)

IS 356
BUSINESS INTELLIGENCE SYSTEMS
Undergraduate
Survey of emerging technologies used for decision support, collaborative decision support, knowledge management, and virtual team support in modern organizations. The course will critically examine how organizations may leverage these technologies toward competitive advantage. Students will gain hands on experience with SaaS collaboration and decision making tools. PREREQUISITE(S): IS 201 and IT 240

IS 370
IT APPLICATIONS IN BUSINESS
Undergraduate
An exploration of applications of Information Technology within business and non-profit organizations, with emphasis upon the following topics: ways managers, work groups, and organizations acquire and use information; typical business applications and their deployment in organizations; and information flows within common business systems. Additional topics include the role and structure of supply chains, IT support for Web-enabled enterprises, and global considerations for information system design. Coverage also includes standards for software acquisition, including evaluation of commercial software products. An introduction to the major principles of decision support and expert systems, business intelligence, and knowledge management, as well as risk, security, and disaster recovery within an organizational setting are also covered. PREREQUISITE(S): IS 215 or IS 201

IS 371
INTRODUCTION TO IT SYSTEM MANAGEMENT
Undergraduate
This course focuses on implementation and post-implementation support for information systems. Topics include testing, deployment, user training, help desk, software upgrades, and staffing for support teams. Case studies and team projects. PREREQUISITE(S): IT215.
IS 372  
SOFTWARE PROJECT MANAGEMENT  
Undergraduate  
(Cross-listed with ECT 372) An introduction to the concept and techniques of project management for a broad range of systems, including Web-based application development. Topics include resource management, organizational factors, project manager responsibilities, team building, and risk management. Tools and techniques for project estimating and scheduling will be presented. Case study and group projects.  
PREREQUISITE(S): IT215

IS 373  
INTRODUCTION TO ENTERPRISE SYSTEMS  
Undergraduate  
A course on technical and management aspects of enterprise systems, including hands-on experience. It incorporates hands-on experience on enterprise resource planning (ERP) systems. Topics include: characteristics and selection of ERP systems, ERP implementation, customer relationship management (CRM), supply chain management (SCM), ERP systems administration, cloud computing and ERP, and enterprise integration with EPR.  
PREREQUISITE(S): IS 215

IS 374  
MANAGEMENT SUPPORT SYSTEMS  
Undergraduate  
This course provides an understanding of software support for organizational decision making. Topics include: analysis, design and implementation of systems for decision support and strategic planning, including decision support systems (DSS), group decision support systems (GDSS), and enterprise decision support systems (EDSS), data warehousing, data mining and neural computing, and intelligent agents. Case studies, projects on applications, and evaluation of software.  
PREREQUISITE(S): IT215.

IS 375  
OBJECT-ORIENTED ANALYSIS AND DESIGN  
Undergraduate  
This course focuses on object-oriented modeling techniques for analysis and design. Emphasis will be on the creation of well-designed, robust and maintainable software systems. UML (Unified Modeling Language) will be examined for modeling the system. Case studies will promote critical-thinking skills as well as provide the foundation for a student project that incorporates the skills attained throughout the quarter.  
PREREQUISITE(S): IT 215 and IS 371.

IS 376  
INFORMATION SYSTEMS PROJECT  
Undergraduate  
This senior project course requires students to apply prior learning in project management and systems development life cycle by developing a complete systems from business case, analysis, design, through implementation strategies. Team project, documentation, presentation, the use of development as well as project management tools will be emphasized.  
PREREQUISITE(S): CSC212, IS371, IS372, IS373.

IS 379  
VIRTUAL SOFTWARE TEAMS  
Undergraduate  
Fundamentals of software development in a virtual environment (if possible with students from different countries). Using an open source development environment; working across time, language, and culture; effective use of collaborative tools.  
PREREQUISITE(S): IS 215 or program development experience

IS 380  
ESSENTIALS OF TECHNOLOGY ENTREPRENEURSHIP  
Undergraduate  
Introduction to the entrepreneurial process within technology intensive ventures. Roles of entrepreneurs and their start-up teams. Suitable business models and strategies. Legal issues and intellectual property. Financial issues and venture resources. Role of the customer and entrepreneurial marketing. Course will include group case studies of technology entrepreneurial ventures. Students will work in teams to develop a marketing plan and a business plan for a technology-intensive entrepreneurial venture of their choice. Course requires a prior foundational understanding of IT as is typically developed by the start of junior year.
IS 396
TOPICS IN INFORMATION SYSTEMS
Undergraduate
Advanced study focusing on a specific area of information systems each quarter. May be repeated for credit. PREREQUISITE(S): See syllabus

IS 398
INTRODUCTION TO IS MANAGEMENT SEMINAR
Undergraduate
This one-credit seminar examines the concepts of information and technology management and career options in this field. Students will assess their own interests and skill requirements for various careers. They will also analyze the impacts of IS trends and emerging technologies on their career choices. All new IS master's students are required to take this seminar as the first course. PREREQUISITE(S): None
Status as a Graduate student in the Information Systems Prerequisite Phase is a prerequisite for this class.

IS 399
INDEPENDENT STUDY
Undergraduate
Independent study form and consent of instructor required. PREREQUISITE(S): Consent of dean.

IS 400
INTRODUCTION TO IS MANAGEMENT SEMINAR
Graduate
This one-credit seminar examines the concepts of information and technology management and career options in this field. Students will assess their own interests and skill requirements for various careers. They will also analyze the impacts of IS trends and emerging technologies on their career choices. All new IS master's students are required to take this seminar as the first course. PREREQUISITE(S): None
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 421
SYSTEMS ANALYSIS
Graduate
Course focus is on both traditional and object oriented systems analysis, with an emphasis upon developing competency in a wide range of modeling techniques. Specific topics include: overview of the software development environment and project management; project selection, initiation, and planning; determining requirements; process modeling, including DFDs and use cases; logic modeling, including decision tables, sequence diagrams, and activity diagrams; introduction to Entity-Relationship Diagrams. PREREQUISITE(S): Completion of Pre requisite Phase
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 422
SYSTEM DESIGN, IMPLEMENTATION, AND MAINTENANCE
Graduate
Course focus is on both traditional and object oriented systems design. Specific topics include: database design, including logical and physical design; Entity-Relationship diagrams, class diagrams, form and report design; interface and dialogue design; design specifications, including structure charts and prototypes; designing for LANs and distributed systems, as well as the Internet; system implementation, including parallel and phased implementation, testing, documentation, and user training; system maintenance, including types of maintenance, controlling and coordinating maintenance requests, and configuration management. Course ends with a multi-week case study applying the principles from both this course and IS 421, Systems Analysis. PREREQUISITE(S): IS 421 and CSC 451
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
IS 425
ENTERPRISE INFORMATION
Graduate
This course focuses on the interrelationships and methods used by information systems groups to meet the information needs of enterprises. The course starts with an examination of the basics of enterprises information needs: the role of the value chain, the profit paradigm, and information infrastructure flows are explored. Then attention turns role of software methods, programming and security as supporting technologies. Topics include enterprise systems, commerce systems, project management, sourcing decisions, IT risk management, services and operations performed. PREREQUISITE(S): IT 215 or SE 325.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 430
FUNDAMENTALS OF IT PROJECT MANAGEMENT
Graduate
This course concentrates on monitoring, managing and controlling assets and resources on a single IT project. Topics covered are risk management; procurement and contract management; time and cost estimating; controlling and tracking techniques; quality assurance; testing and audit. Students will use common project management software for resource allocation and balancing. NO PREREQUISITES.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 433
INFORMATION SECURITY MANAGEMENT
Graduate

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 435
ORGANIZATIONAL MODELING
Graduate
The course explores contemporary approaches to analyzing and modeling organizational problems, processes, workflow, users and data. The emphasis is on the initial stages of analysis where the root cause of problems are identified, formulated and modeled. Students will acquire an array of modeling skills and be able to prescribe the proper modeling approach based on a variety of organizational and contextual factors. Business process modeling, management and metrics will be covered. Object-oriented and user-centered approaches will be introduced. PREREQUISITE(S): IS 421 or any Systems Analysis and Design course

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 440
COLLABORATIVE TECHNOLOGIES FOR LEADING PROJECTS
Graduate
Study of the process of virtual teaming with emphasis on facilitation of different time project activities and facilitation of same time meetings. Students will learn how small group psychology and group communication theories inform specific behaviors in the design and leadership of meetings. Several meeting types including information briefing, focus group, document writing, decision making, requirements gathering, and teaching/training will be explored. In addition, the course surveys current collaboration technologies and discusses how to select among those technologies usability and fit to purpose of a meeting agenda. DL students may be required to schedule same time sessions with the instructor and other DL students; see current quarter syllabus for more information on this point. PREREQUISITE(S): NONE

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 444
IT AUDITING
Graduate
Management and boards continue to recognize the importance of effectively managing information technology (IT) assets - to meet business objectives and to thoughtfully manage IT related business risks. This course examines the key principles related to auditing information technology processes and related controls and is designed to meet the ever increasing needs of IT audit and IT governance professionals. In addition, this course aids in the preparation for the Certified Information Systems Auditor (CISA) exam. PREREQUISITE(S): None

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
**IS 455**  
**ELECTRONIC BUSINESS**  
Graduate  
An introduction to electronic business. The topics include business models, technologies, business and social impact of e-business. It explores the tools, skills, business and social implications of emerging electronic business. In addition to acquiring basic skills for identifying electronic business opportunities and creating a presence in the online marketplace, the student reexamines fundamental processes of business as they are performed in cyberspace in contrast to the marketplace. This helps them understand changes as the cyberspace grows increasingly important in the global economy. **PREREQUISITE(S):** None. For Kellstadt students or students pursuing the MS in Business Information Technology only.  
Status as a MS-Business Information Technology student or Kellstadt student is a prerequisite for this class.

**IS 456**  
**KNOWLEDGE MANAGEMENT SYSTEMS**  
Graduate  
Survey of emerging technologies supporting organizational knowledge processes including capture, codification, structure, storage, dissemination and reuse. The course will critically examine how organizations may leverage these technologies toward competitive advantage. Students will experiment with contemporary knowledge management (KM) tools. Some theoretical perspectives on knowledge management (KM) and organizational learning (OL) will be introduced. **PREREQUISITE(S):** completion of foundation or core phase.  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

**IS 475**  
**INFORMATION SYSTEMS ANALYSIS AND DESIGN**  
Graduate  
Information systems development emphasizing the application of structured techniques in a case and 4Gl environment. Topics and team project tasks include case tools, entity-relationship diagramming, data-flow diagramming, structure chart, action diagram, joint application design, prototyping, design of relational database, and testing. **PREREQUISITE(S):** CSC 315 or instructor consent.  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

**IS 481**  
**SOFTWARE AND SYSTEMS DOCUMENTATION**  
Graduate  
Creating documentation for software, systems, or telecommunications projects. Development and delivery of documents (paper and Web-based) that present products and systems effectively to complex audiences. Documents include planning documents, vision statements, requirements specifications, status and milestone reports, user test plans, and user documentation. Emphasis on constructing electronic documents, appropriate content and hyperstructures for specific purposes and readers, and textual interactivity. Discussions on versioning and intellectual property issues. Presenting highly technical issues to business audiences. **PREREQUISITE(S):** Graduate Standing.  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

**IS 482**  
**LEGAL ASPECTS OF INFORMATION TECHNOLOGY**  
Graduate  
A practical survey of computer and information technology law arising in a high tech environment. Topics covered include: employment contracts, civil and criminal law, fraud and abuse, contracts, e-commerce, intellectual property, privacy, security, harmful communications, constitutional and First Amendment issues, and internal law and trade. **PREREQUISITE(S):** NONE.  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

**IS 483**  
**INFORMATION SERVICES AND OPERATIONS**  
Graduate  
This course focuses on the operational aspects of information systems in organizations by examining the concepts, tools and techniques available to IS professionals responsible for the delivery of IT services. Topics include the organization of the IT services; the procurement of hardware, software and vendor services; operation of data centers, help desks and user training, the development and use of RFPs (Request for Proposals) and SLAs (Service Level Agreements); the integration of services and operations with application development project needs, and the role of capital and operating budgets. **PREREQUISITE(S):** Completion of foundation or core phase.  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
IS 484
COMPUTERIZED ACCOUNTING SYSTEMS
Graduate
Responsibility accounting systems. Profitability accounting systems. Customer invoicing, cash receipts and accounts receivable information processing. Customer order entry, finished goods inventory, purchasing and receiving information processing. Accounts Payable, fixed assets and employee payroll systems. General ledger, budget and profit planning, sales analysis and market planning systems. PREREQUISITE(S): GSB 504 or ACC 103.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 485
REQUIREMENTS ELICITATION, ANALYSIS, AND SPECIFICATION
Graduate
This course focuses on the concepts and skills needed to elicit, analyze, specify, and manage requirements for a software or systems level project. Students will learn to identify and work with stakeholders through conducting a variety of requirements gathering techniques including interviewing, surveying, ethnography, and Joint Application Design (JAD) sessions, to identify and analyze requirements conflicts and negotiate solutions, to model requirements and specify them in unambiguous ways, and to manage requirements throughout the software lifecycle using change controls, traceability, and impact analysis techniques. The requirements process will be examined in both traditional and agile environments. Current topics such as requirements for product lines or distributed development teams will also be explored as time permits. Prerequisite(s): IS 422 or IS 430 or PM 430. A student may not take both SE 482 and IS 485 for credit toward a degree.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 500
INFORMATION TECHNOLOGY LEADERSHIP
Graduate
Managing people ethically and effectively by applying a broad range of creative approaches to individual and team leadership within an Information Technology context. Leadership methods studied include trait-based, skills-based, situational, contingency theory, path-goal theory, leader-member exchange theory, transformational, psychodynamic, and authentic leadership, as well as team leadership and the international, cultural, and ethical dimensions of leadership. Students assess their leadership styles and design individualized development plans to strengthen existing skills and expand IT leadership capabilities by incorporating additional leadership dimensions.
PREREQUISITE(S): IS 430, PM 430, OR SE 477

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 505
BUSINESS CONTINUITY/ DISASTER RECOVERY THEORIES AND STRATEGIES
Graduate
This course focuses on the knowledge necessary for an organization to prepare for a variety of major disruptions (floods, earthquakes, terrorist attacks, etc.). The goal is survival of the organization and its daily workflow despite major disruption. Students learn to analyze and prioritize risks and determine criticality ratings that are used to determine survival strategies. Students also learn how to organize employees to respond to a major disruption and how to document recovery plans. Course content includes coverage of current industry trends, as well as planning for the survival of Information Technology functions within an organization.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 506
BUSINESS CONTINUITY/ DISASTER RECOVERY MANAGEMENT AND TACTICS
Graduate
The course prepares students to lead an organization's business continuity and disaster recovery plans. Students learn the methodology needed to organize this function within an organization, evaluate an organization's business continuity and disaster recovery program according to established industry standards, and conduct a variety of quick-recovery drills. Students also focus upon industry-related human resources issues, crisis communications, and policies and procedures for setting up a command center. Course content includes coverage of current industry trends, as well as managing the survival of Information Technology functions within an organization. Prerequisite(s): IS 505

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
IS 511
SOCIAL ISSUES OF COMPUTING
Graduate
This course aims to provide a broad survey of the individual, organizational, and cultural impacts of computers and to stimulate reflection upon the social and ethical issues provoked by current and projected uses of computers. Some topics include an in-depth look at computers as they relate to workplaces, communities, public policy, legal issues, education, privacy, and moral values. PREREQUISITE(S): NONE.

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

IS 533
ENTERPRISE SECURITY INFRASTRUCTURE CONTROLS AND REGULATORY COMPLIANCE
Graduate
Design, implementation, support and management of control methods in enterprise environments. Focus is on how these controls can help organizations achieve regulatory compliance. Review of Sarbanes-Oxley and its impact on IT systems. Detailed study of how risk assessment methods, information security program management and ERP systems can be used to fulfill regulatory and legal requirements. Control Objectives for Information and related Technology (COBIT) guidelines and best practices for SOX compliance. Security management standards (ISO 17799, BS 7799 and ISO 27001) . PREREQUISITE(S): IS 433

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

IS 535
INFORMATION TECHNOLOGY INVESTMENT FINANCIAL ANALYSIS
Graduate
This course focuses on the application of financial analysis and decision-making approaches to aid information technology investment decisions at the operational, project, tactical and strategic levels. Students will learn how to apply a variety of financial methods -- breakeven analysis, present value analysis, profitability index, and return on investment to various IT investment decisions. The course will also address cost benefit analysis, outsourcing, balanced scorecard, and multi-factor scoring, benchmarking, and IT investment portfolio methods. These techniques will prepare students to manage capital budgets, acquisition of system and application software, hardware, personnel, and professional services at project and system levels as well as enterprise investment portfolio. PREREQUISITE(S): SE 477 or IS 565 or ACCT 500 or IS 430 or PM 430 or ECT 455

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

IS 536
ENTERPRISE CLOUD COMPUTING
Graduate
Cloud concepts, architecture, and service management, with particular emphasis upon identifying and analyzing potential business applications of cloud computing. Students will conduct feasibility studies, detailing the advantages and disadvantages of implementing a cloud computing platform for specific applications, with particular emphasis upon financial considerations, business benefits, and security risks. Students will develop the ability to evaluate alternatives and effectively argue in favor of their choices within the cloud computing knowledge domain. They will be able to define, apply, and defend the need for standards and best practices. Students will work within a project team following the principles of project management to design, build, and implement cloud applications.

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

IS 540
GLOBAL INFORMATION TECHNOLOGY
Graduate
A study of the hardware, software, and techniques for using virtual information technologies to support teams working in a distributed, virtual, or global environments. Topics include software survey and evaluation, software deployment within organizational and trans-organizational contexts, trans-national vendor relationships, trans-border data flow, geographically dispersed software development, and integration of diverse technologies. PREREQUISITE(S): Completion of foundation or core phase

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.
IS 549
DATA WAREHOUSING AND DATA MINING
Graduate
Introduction to data warehousing and the foundations of understanding the issues involved in building a successful data warehouse. Data warehouse development methodology and issues surrounding the planning of the data warehouse. Data quality and metadata in the data warehouse. Analysis, transformation and loading of data into a data warehouse. Development of the data architecture and physical design. Implementation and administration of the data warehouse. Introduction to data mining. (PREREQUISITE(S): CSC 449 or CSC 451 or CSC 453).

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 553
ADVANCED TOPICS FOR SYSTEMS DEVELOPMENT
Graduate
Planning and implementation of enterprise systems in the context of enterprise transformation and new market dynamics. Networked enterprise and virtual organizations. Internet and intranet applications for electronic commerce, mass customization and information empowerment. Enterprise-wide systems, business process reengineering. Interorganizational systems, sourcing options, and transformational information technologies. Value-chain analysis and competitive strategies. Case studies examine various planning and implementation approaches and impacts. PREREQUISITE(S): IS 422 or ECT 555 or SE 430.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 554
INFORMATION ENGINEERING
Graduate
Application of structured techniques on enterprise-wide data models, information architecture, and cross-functional models. Stages for information strategy planning, business area analysis, joint requirement planning, and I.E. methodology. CASE tools, organizational strategies and economics of financial justification. Case studies. (PREREQUISITE(S): IS 422 and CSC 449).

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 556
ENTERPRISE PROJECT MANAGEMENT
Graduate
This course covers how an enterprise coordinates and effectively manages all its IT projects and programs through program management and the IT program management office. Students will learn the role of the IT program management office in establishing and maintaining the project and program infrastructure and in assisting project managers, program managers, and the executive steering committee. Students will analyze the role of program management in coordinating the delivery of expected program benefits, in managing stakeholder expectations, and in establishing program governance. PREREQUISITE(S): IS 430 or PM 430 or completion of foundation phase.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 560
ENTERPRISE SYSTEMS
Graduate
An introduction to enterprise systems for data and process integration, including ERP systems. Topics include the requirements of enterprise systems, application architecture, tools, and functionality of leading enterprise systems, life cycle and methodologies for systems integration, selection, and implementation strategies. Also addressed are emerging trends for enterprise systems and relationship among component systems. PREREQUISITE(S): Advanced Standing

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IS 565
IT OUTSOURCING
Graduate
The course focuses on how organizations can use leverage of scale as a source for cost reduction; leverage of expertise for improved superior IT performance; leverage of access (e.g. location) to develop new strategies. Other topics covered include different types of sourcing strategies, sourcing maturity levels and best practices. PREREQUISITE(S): Completion of foundation or core phase

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
IS 567
KNOWLEDGE DISCOVERY TECHNOLOGIES
Graduate
An introduction to the Knowledge Discovery Technologies covering all stages of a data mining process: domain understanding, data collection and selection, data cleaning and transformation, dimensionality reduction, pattern discovery, evaluation, and knowledge extraction. The course provides a comprehensive overview of data mining techniques used to realize these stages, including traditional statistical analysis and machine learning techniques. Students will analyze large datasets and develop modeling solutions to support decision making in various domains such as healthcare, finance, security, marketing, customer relationship management (CRM), and multimedia. PREREQUISITE(S): IT 223

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 570
ENTERPRISE SYSTEM IMPLEMENTATION
Graduate
Formerly IS 450. This course is targeted towards information systems professionals who are involved in the planning and implementation of large scale, cross-functional enterprise systems. Students will examine the characteristics of technology efforts that change and transform the way people perform their tasks and how the new technology structures the flows of information and decision making using workflow modeling methods. Through case studies and exercises students gain insights into the elements of successful implementations leading to the preparation of a change management plan. Emphasis is placed on developing mechanisms for communicating and training all affected agents. PREREQUISITE(S): IS 430 or PM 430 or completion of foundation or core phase

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 571
SOFTWARE MAINTENANCE
Graduate
Software Maintenance

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 574
BUSINESS INTELLIGENCE
Graduate
Introduction to the concepts of business intelligence (BI) as components and functionality of information systems. How business problems can be solved effectively by using operational data to create data warehouses, and then applying data mining tools and analytics to gain new insights into organizational operations. Detailed discussion of the analysis, design and implementation of systems for BI, including: data management systems, decision support systems, group support systems, knowledge engineering, expert systems, and Web 2.0 tools. Case studies of application software, web tools, success and limitation as well as technical and social issues. (PREREQUISITE(S): (SE 430 or IS 435 or PM 430 or MIS 674) and (CSC 449 or CSC451).

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 575
INTELLIGENT INFORMATION RETRIEVAL
Graduate
Examination of the design, implementation, and evaluation of information retrieval systems. The focus is on the underlying retrieval models, algorithms, and system implementations. Also examined is how an effective information search and retrieval is interrelated with the organization and description of information to be retrieved. Topics include: automatic indexing; thesaurus generation; Boolean, vector-space, and probabilistic models; clustering and classification; information filtering; distributed IR on the WWW; intelligent information agents; IR system evaluation; information visualization; and natural language processing in IR. Throughout the course, current literature from the viewpoints of both research and practical retrieval technologies both on and off the World Wide Web will be examined. PREREQUISITE(S): CSC 301 or CSC 383.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
**IS 577**
**INFORMATION SYSTEMS POLICIES AND STRATEGIES**
**Graduate**
This capstone course emphasizes the planning and management of information technologies and related resources at the corporate level. Topics covered include assessment of information technologies, tracking emerging technologies and trends, managing portfolio resources and matching them to business needs, technology transfer, end-user computing, outsourcing, theoretical models, strategic applications and strategic IT planning. Students are encouraged to take this course toward the end of their study. **PREREQUISITE(S):** Ten or more CDM MS level courses.

CDM graduate students in the Pre requisition Phase are restricted from registering for this class.

**IS 578**
**INFORMATION TECHNOLOGY CONSULTING**
**Graduate**
This course is for the IT professional. The emphasis is on examining the models, techniques, and skill development for providing effective IT consulting services. The course examines the structure of IT consulting markets; leading IT consulting practices; models and approaches for providing internal IT consulting services; sourcing strategies, evaluation of RFPs and response process contract formulation, client relations and project management; knowledge management and collaboration and IT strategies. **PREREQUISITE(S):** Completion of foundation or core phase.

CDM graduate students in the Pre requisition Phase are restricted from registering for this class.

**IS 579**
**VIRTUAL SOFTWARE TEAMS MANAGEMENT**
**Graduate**
Application of project management principles, tools, and techniques to a virtual software development project; management of virtual software teams; planning, executing the plan, monitoring and controlling the development process. Work with project office (PMO) to set templates for reporting and common processes and standards; set milestones and their deliverables; establish communication medium for the virtual team. **PREREQUISITE(S):** PM 430 or advanced PM course, or Industrial certificate like PMP

CDM graduate students in the Pre requisition Phase are restricted from registering for this class.

**IS 580**
**TECHNOLOGY ENTREPRENEURSHIP**
**Graduate**
In-depth examination of the entrepreneurial process within technology intensive ventures. Roles of entrepreneurs and their start-up teams. Suitable business models and strategies. Legal issues and intellectual property. Financial issues and venture resources. Role of the customer and entrepreneurial marketing. Students will analyze and present case studies of technology entrepreneurial ventures. Students will develop a marketing plan and a business plan for a technology-intensive entrepreneurial venture of their choice. **PREREQUISITE(S):** Completion of the foundation phase.

CDM graduate students in the Pre requisition Phase are restricted from registering for this class.

**IS 590**
**INFORMATION SYSTEMS RESEARCH METHODS**
**Graduate**
Introduction of information systems (IS) research methods and theories. The course is taught as a seminar course. Both quantitative and qualitative methods are discussed. **PREREQUISITES:** At least two statistics courses among IT 223 and (CSC 424 or CSC 428)

CDM graduate students in the Pre requisition Phase are restricted from registering for this class.

**IS 596**
**TOPICS IN INFORMATION SYSTEMS**
**Graduate**
Advanced study focusing on a specific area of information systems each quarter. May be repeated for credit. **PREREQUISITE(S):** See syllabus

CDM graduate students in the Pre requisition Phase are restricted from registering for this class.
IS 599
INDEPENDENT STUDY
Graduate
Independent study form and consent of instructor required.
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. Students may register for this course no more than twice. (PREREQUISITE(S): Consent of advisor).
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 696
MASTER’S PROJECT
Graduate
Four credit hours. Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. (PREREQUISITE(S): Consent of advisor).
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IS 698
MASTER’S THESIS
Graduate
Two credit hours. Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. Independent study form required. (PREREQUISITE(S): Consent of advisor).
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

ISM 101
FOUNDATIONS OF INTERACTIVE & SOCIAL MEDIA
Undergraduate
This course approaches the study of Interactive and Social Media through the analysis of interactive media artifacts (e.g. games, apps, websites, etc.) in order to develop a shared language for what are common components of all interactive artifacts. Students will also examine how delivery platforms (e.g. smart phone, tablet, interactive kiosk, desktop, phone) constrain and afford different interactivity. Students will conduct weekly product analysis along with a final project where they inventory and analyze all of the interactive artifacts they use in a 48 hour period. PREREQUISITE(S): none.

ISM 208
VIRTUAL WORLDS AND ONLINE COMMUNITIES
Undergraduate
Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cyberculture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging. PREREQUISITE(S) WRD 104

ISM 210
INTRODUCTION TO HUMAN-COMPUTER INTERACTION (FORMERLY IM 210)
Undergraduate
This course familiarizes students with the user interface development process, including user and task analysis, interaction design, prototyping and evaluation. Students study human perception, cognition and motor abilities as they relate to the design of interactive systems. In a series of projects, students design and revise prototypes as they apply a user-centered design process. Emphasized topics include user profiles, information architecture and usability testing. Students provide written analysis of their research and process. PREREQUISITE(S): None
ISM 220
INTERACTIVE DESIGN & PROTOTYPING (FORMERLY M 220)
Undergraduate
This course applies interactive media principles for a variety of contexts with a goal of exploring relative merits among common interaction paradigms. Based on assessed needs and intended functionality, students create working prototypes that demonstrate a range of design patterns, particularly those with a high level of interactivity such as rich internet applications, games, and visual simulations. Emphasis is given to visual design principles and aesthetics for creating interesting and engaging interactive experiences. PREREQUISITE(S): ANI 105

ISM 222
INFORMATION VISUALIZATION
Undergraduate
This course discusses the basic problems and techniques of visualizing quantitative and qualitative data. Topics include: perception, types of information, representation of univariate and multivariate data and relational information, analysis of representations, presentation, and dynamic and interactive visualizations. Students will create visualizations using graphical software PREREQUISITES: LSP 120

ISM 225
WEB 2.0 BUILDING BLOCKS
Undergraduate
This seminar course will provide students with a foundation in understanding the key computational infrastructures upon which today's social applications are built (e.g. social networks, cookies, cloud computing, media streaming, APIs, location-based awareness). Student will examine popular web 2.0 sites/apps and analyze for the inclusion of building blocks in order to understand how these building blocks facilitate the user experiences deemed essential for web 2.0 apps. Prerequisite(s): none

ISM 270
USER-CENTERED WEB DESIGN (FORMERLY M 270)
Undergraduate
Principles of interactive design for web pages and sites. Design patterns for information navigation. Use of HTML and CSS to produce standards- and accessibility-compliant web pages. Overview of technologies supporting dynamic and interactive content. Prerequisites: IT 130 or HCI 201

ISM 320
ADVANCED PRINCIPLES OF INTERACTIVITY
Undergraduate
This course will use complex interactive web projects to challenge students to solve real-world problems. Students will build upon the organizational and analytical strategies learned in IM I while expanding their knowledge of Flash subjects such as site integration, utilizing remote data and manipulating video. PREREQUISITE(S): IM 220 Interactive Media I

ISM 360
USER-CENTERED EVALUATION
Undergraduate
Overview of user research and usability evaluation methods. User research includes interviews, profiles and scenarios. Usability evaluation methods include expert inspections and usability testing. PREREQUISITE(S): ISM 210

ISP 100
THE NATURE OF SCIENCE
Undergraduate
The Nature Of Science  (Cross-listed As PHY 100)

ISP 220
INTERACTIONS OF SCIENCE & TECHNOLOGY
Undergraduate
INTERACTIONS OF SCIENCE & TECHNOLOGY
ISP 245  
LIFE IN THE UNIVERSE  
Undergraduate  
Life In The Universe

ISP 300  
SELECTED SEMINAR TOPICS (CROSSLISTED AS HON 300)  
Undergraduate  
Offered each quarter, the topics of the junior seminar vary. Each offering, however, builds upon concepts introduced in a previous core course and involves a research project. Cross-listed as HON 300. Variable credit.

ISP 330  
PEER EDUCATION SERVICE LEADERS I  
Undergraduate  
This course is designed to prepare service immersion trip leaders and to promote their development as socially responsible leaders. The focus is on foundational theory and developing transferable life skills related to reflective theory and practice, Vincentian concepts of service, and peer education. Students must speak with their advisor to learn how this course may be applied to help satisfy their JYEL requirement.

ISP 331  
PEER EDUCATION SERVICE LEADERS II  
Undergraduate  
Students will apply the theories and practices learned in ISP 330 to their service immersion groups. Through experiential, interactive, academic and reflective activities students will continue reflection on Vincentian service and their leadership roles. Students must speak with their advisor to learn how this course may be applied to help satisfy their JYEL requirement.

ISP 390  
SPECIAL TOPICS  
Undergraduate  
Variable credit.

ISP 392  
INTERNSHIP  
Undergraduate  
Internship

ISP 399  
INDEPENDENT STUDY  
Undergraduate  
Variable credit.

IT 130  
THE INTERNET AND THE WEB  
Undergraduate  
An introduction to the Internet, the World Wide Web, and web development for students with a strong interest in technology. Students will create interactive web pages by writing HTML and CSS and by programming in JavaScript. Topics include the origins of the web, the roles and operations of web browsers and web servers, interacting with web applications through forms, and using style sheets to separate document structure and document formatting. PREREQUISITE(S): NONE.

IT 201  
INTRODUCTION TO INFORMATION SYSTEMS  
Undergraduate  
(Formerly IS 201 Introduction to Information Systems) This course demonstrates how information is used by organizations to conduct business and solve problems. This course presents information systems principles and demonstrates how they form an integral part of modern organizations. Topics include systems concepts; organizational processes; technological aspects of information systems; the Internet; IT security and ethical issues; database management; and systems development life cycle. In addition, students familiarize themselves with the DePaul computing environment and demonstrate competency at navigating that environment. PREREQUISITE(S): none
IT 211
INTRODUCTION TO APPLIED PROGRAMMING
Undergraduate
Introduction to application development and problem solving. Basic programming constructs including control structures, I/O functions and object-based programming. Projects include small-scale applications using web-services, file processing, databases and application software. PREREQUISITE(S): IT 130

IT 212
APPLIED OO PROGRAMMING
Undergraduate
Introduction to Object-Oriented Programming. Students will use object-oriented programming to integrate systems and applications on multiple platforms, developing and understanding basic distributed applications and how they communicate. PREREQUISITE(S): IT 211

IT 215
ANALYSIS AND DESIGN TECHNIQUES
Undergraduate
(Formerly IS 315) This course presents a structured approach to analysis and design of an information system for a business. The systems development life cycle will be defined and described. Process descriptions, user and task analysis for interface development, prototyping, data flow and entity relationship diagramming will be presented. Case studies that promote critical-thinking skills provide the context for these techniques. PREREQUISITE(S): none

IT 223
DATA ANALYSIS
Undergraduate
(FORMERLY CSC 323) Application of statistical concepts and techniques to a variety of problems in IT areas and other disciplines, using a statistical package for simple data analysis. Course topics include descriptive statistics, elementary probability rules, sampling, distributions, confidence intervals, correlation, regression and hypothesis testing. PREREQUISITE(S): MAT 130 or placement

IT 228
ETHICS IN COMPUTER GAMES AND CINEMA
Undergraduate
Societies function based on normative ethics utilizing commons sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment, in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact particularly on children will be discussed.

IT 230
BUILDING INTERNET APPLICATIONS
Undergraduate
This course presents the design and development of interactive Web applications for e-commerce. Major topics include Web server architecture; server-side programming including events and controls; application and database integration; and security issues. Students will engage in a course project to build a dynamic Web application. PREREQUISITE(S): IT 130

IT 231
WEB DEVELOPMENT I
Undergraduate
Introduction to framework-based web development. Students create interactive, dynamic web sites using a common web architecture and object-based database access. Programming for web development includes control structures, objects, functions, and use of composite data types. Prerequisite: IT 130
IT 232
WEB DEVELOPMENT II
Undergraduate
Intermediate framework-based web development. Students design and develop web applications supporting social-networking, content-sharing and functionality for business and organizational needs. Web concepts include AJAX, server-side caching, security threats. Application of object-oriented concepts. PREREQUISITE(S): IT 231 and IT 211

IT 236
USER INTERFACE DEVELOPMENT
Undergraduate
The focus of the course is to build interfaces to simple programs. The course will cover interface controls, event handling, and the use of built in and/or pre-written controls. The course will cover simple database access through a Database control and possibly access to WebServices such as Google. Good visual design principles will be emphasized throughout the course. PREREQUISITE(S): IT 130

IT 238
INTERACTIVE WEB SCRIPTING
Undergraduate
Advanced scripting with javascript and the Document-Object Model (DOM) for creating web pages. Object-oriented principles applied to user interfaces and event handling. Application of Ajax. Use of libraries such as jQuery. PREREQUISITE(S): IT 130

IT 240
INTRODUCTION TO DESKTOP DATABASES
Undergraduate
This course will introduce students to the design, implementation and use of desktop databases. Major topics include: modeling using ER diagrams, creating and maintaining a database using a PC based application, compose and use queries in Structured Query Language, create and customize forms and reports, and integrate databases with other sources of data and applications. PREREQUISITE(S): NONE

IT 263
APPLIED NETWORKS AND SECURITY
Undergraduate
This course introduces the networking and security technologies required to build and maintain a home or small-office network. Networking topics will include client/server application software configuration, network connectivity (cabling, switch and router configuration), basic IP addressing, network address translation and options for public Internet access services. Security topics will include typical threats and responses, firewalls, host hardening, password management and virtual private network (VPNs). The course has a lab component where students apply wired and wireless technologies to design and administer a small network with various applications. PREREQUISITE(S): none

IT 278
COMMUNITY-BASED TECHNOLOGY PROJECTS
Undergraduate
Project development in cooperation with a community service organization. Students will assess urban community Web needs, develop and implement a Web solution. PREREQUISITE(S): IM 210, IS 215, and IT 232

IT 300
RESEARCH EXPERIENCE
Undergraduate
This course involves the exploration of a research topic under the supervision of a research advisor. PREREQUISITE(S): Consent of dean.

IT 313
ADVANCED APPLICATION DEVELOPMENT
Undergraduate
Development of complex applications through the use and development of APIs. Appropriate selection of common data structures (hash tables, trees, stacks, queues, networks) and design patterns for use in API development. PREREQUISITE(S): IT 212
IT 320  
CONTENT MANAGEMENT SYSTEMS  
Undergraduate  
Design and use of Content Management Systems (CMSs) to manage unstructured digital media throughout the enterprise, simplify the publication of Web content, and locate and link content at any level of an organization. Discussion will focus on key users, their roles and responsibilities, collaborative workflow, and versioning. Students will become familiar with available CMSs, design a database-driven Website focusing on separation of the content's semantic layer from its layout, and implement a system using a variety of open-source software. Prerequisite(s): IT 130

IT 330  
USER INTERFACE DEVELOPMENT FOR INTERACTIVE SYSTEMS  
Undergraduate  
Graphical user interface development for web and desktop applications. Event-driven user controls. Development involves use of a visual integrated development environment (IDE). Prerequisite: IT 232

IT 373  
SYSTEM CONCEPTS  
Undergraduate  
Overview of concurrency, memory management and file system concepts for operating systems, and web servers. Application of concepts to system administration. Case studies of common operating systems. Web server operations. Virtualization. PREREQUISITES: IT 313 or CSC 383 or CSC 390

IT 398  
TOPICS IN GLOBAL INFORMATION TECHNOLOGY  
Undergraduate 
Advanced study focusing on a specific area of information technology each quarter. May be repeated for credit. PREREQUISITE(S): Consent of the Instructor

IT 403  
STATISTICS AND DATA ANALYSIS  
Graduate  
Introduction to univariate data analysis methods. Descriptive statistics and data visualization methods. Overview of sampling techniques for data collection, and introduction to statistical inference methods for decision making including simple linear regression, estimation procedures using confidence intervals and hypothesis testing. PREREQUISITE(S): None

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

IT 411  
SCRIPTING FOR INTERACTIVE SYSTEMS  
Graduate  
Introductory scripting for developing interactive web pages. Overview of HTML and CSS. Elementary programming concepts using JavaScript for learning control structures, functions, arrays, and object use. User interface development concepts include event handling and use of JavaScript libraries such as jQuery. Review of web clients, servers and architecture. PREREQUISITE(S): None

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.
IT 430
BUILDING INTERNET APPLICATIONS
Graduate
This course presents the design and development of interactive Web applications for e-commerce. Major topics include Web server architecture; server-side programming including events and controls; application and database integration; and security issues. Students will engage in a course project to build a dynamic Web application. PREREQUISITE(S): IS 440 or PM 440

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IT 432
WEB ARCHITECTURE
Graduate
Overview of Web application development for non-programmers. Hands-on exposure to the Model, View, Controller (MVC) framework using a common web framework. Topics include HTML/CSS, data modeling, authentication, AJAX and security issues. Students create and modify dynamic web sites. PREREQUISITE(S): Graduate Standing.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IT 590
TOPICS IN INFORMATION TECHNOLOGY
Graduate
Advanced study focusing on a specific area of information technology each quarter. May be repeated for credit. PREREQUISITE(S): Consent of the instructor

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IT 599
TOPICS IN GLOBAL INFORMATION TECHNOLOGY
Graduate
Course Description: This course focuses on current topics in the information and communications technologies that together support the "networked world". Samples topics are global software development and deployment, global data and information management, and cross-cultural project management for information systems. The course may be offered for variable (1 to 4) credit hours. PREREQUISITE(S): None

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

IT 698
MASTER'S THESIS
Graduate
2 credit hours) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. PREREQUISITE(S): Consent of advisor.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

ITA 101
BASIC ITALIAN I
Undergraduate
Listening to, speaking, reading and writing Italian in a cultural context for the beginning student.

ITA 102
BASIC ITALIAN II
Undergraduate
Continued emphasis on the four skills in culturally-authentic situations. ITA 101 or equivalent, including placement test or permission of instructor, is recommended.
ITA 103
BASIC ITALIAN III
Undergraduate
Completion of the basic elements of the Italian language, spoken as well as written, with due regard to the cultural context of Italian expression. ITA 102 or equivalent, including placement test or permission of instructor, is recommended.

ITA 104
INTERMEDIATE ITALIAN I
Undergraduate
Intensive practice in the use of Italian through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. ITA 103 or equivalent, including placement test or permission of instructor, is recommended.

ITA 105
INTERMEDIATE ITALIAN II
Undergraduate
Continuing practice in spoken and written Italian and further development of reading and listening abilities in an authentic cultural context. ITA 104 or equivalent, including placement test or permission of instructor, is recommended.

ITA 106
INTERMEDIATE ITALIAN III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing Italian with a concomitant heightened awareness of the cultural dimensions of the Italian language. ITA 105 or equivalent, including placement test or permission of instructor, is recommended.

ITA 197
SPECIAL TOPICS IN ITALIAN
Undergraduate
See schedule for current offerings.

ITA 198
STUDY ABROAD
Undergraduate
Variable credit.

ITA 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

ITA 201
ADVANCED COMMUNICATION I
Undergraduate
Developing culturally appropriate speech and writing through the study of speech acts and written documents within the context of a systematic study and review of grammar. ITA 106 or equivalent is recommended.

ITA 202
ADVANCED COMMUNICATION II
Undergraduate
Focus on the differences between speech and writing with an emphasis on the latter as expressed in compositions, editing and other writing activities. ITA 106 or equivalent is recommended.
ITA 203
ADVANCED COMMUNICATION III
Undergraduate
Developing a sophisticated spoken fluency using authentic oral texts as models for elaborated discourse. Written texts and writing exercises reinforce oral expression. ITA 106 or equivalent is recommended.

ITA 297
SPECIAL TOPICS IN ITALIAN
Undergraduate
See schedule for current offerings.

ITA 298
STUDY ABROAD
Undergraduate
Variable credit.

ITA 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

ITA 301
ORIGINS OF ITALIAN LITERATURE
Undergraduate
Topics will include the development of vernacular literature from the earliest texts to Dante. ITA 106 or equivalent and ITA 201-203 recommended.

ITA 302
WRITING THE SELF IN THE ITALIAN RENAISSANCE
Undergraduate
Topics will include the evolving conception of self in texts of the Humanists, Machiavelli, Castiglione, Michelangelo, Ariosto and Tasso. ITA 106 or equivalent and ITA 201-203 recommended.

ITA 303
LITERATURE OF THE SEICENTO & SETTECENTO
Undergraduate
Topics will include Baroque and Enlightenment texts of Marino, Galileo, Vico, Goldoni and Alfieri. ITA 106 or equivalent and ITA 201-203 recommended.

ITA 304
ITALIAN CIVILIZATION I
Undergraduate
The development of Italian culture from the rise of the city-state after the year 1000 to the grand achievements of poets, painters and politicians in the Renaissance court. ITA 106 or equivalent and ITA 201-203 recommended.

ITA 305
TOWARDS UNIFICATION: ROMANTICS, REVOLUTIONARIES, AND REALISTS
Undergraduate
Authors will include Foscolo, Leopardi, Manzoni, Verga, Carducci and Pascoli. ITA 106 or equivalent and ITA 201-203 recommended.

ITA 306
FUTURISM AND BEYOND: LITERATURE OF THE NOVECENTO
Undergraduate
Topics will include issues of modernity in the works of Svevo, Marinetti, D'Annunzio, Pirandello and others. ITA 106 or equivalent and ITA 201-203 recommended.

ITS 427
LEARNING AND TECHNOLOGY
Graduate
This course will focus on computer systems which are meant to help people learn something, so the primary concern is how well they support learning. We will start by looking at the state of the art in the scientific understanding of how people learn. Then we will apply these principles to evaluating designs of learning systems and to creating effective designs. Projects will involve evaluation of existing learning systems, and the creation of a simple learning system which follows design principles for effective learning. PREREQUISITE(S): NONE.

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.
ITS 431
INSTRUCTIONAL DELIVERY AND COURSE MANAGEMENT SYSTEMS
Graduate
This is an applications course in which participants will examine instructional delivery systems such as Internet-based applications, and other voice, video and data systems and course management systems such as Black Board, cu Hear me, Lectra, and Net Meeting. The course will be grounded in learning theory, management practices and organizational structures. PREREQUISITE(S): ITS 427

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

ITS 440
DISTANCE LEARNING TECHNOLOGIES
Graduate
This course is designed to enable students to design and evaluate Internet-based distance learning (IDL) systems. The course focuses on three major themes: IDL scenarios and requirements, multimedia technology and its impact in IDP systems, and network and collaboration support for IDL. PREREQUISITE(S): TDC 361 or DS 420.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

ITS 560
TRAINING AND USER SUPPORT
Graduate

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

ITS 584
ARTIFICIAL INTELLIGENCE IN LEARNING ENVIRONMENTS
Graduate
AI techniques play a natural role in learning environments by allowing technological artifacts to interact with learners in an intelligent manner, and by helping us better understand the processes that are involved in learning. This course will look at Artificial Intelligence in Learning Environments (AILE) from three viewpoints. The first is the research in human learning that relates to AI techniques. Methods like scaffolding, self-explanation, constructivism, and learning-by-doing have been used by AI systems to increase learning in a wide range of settings. The second viewpoint comes from the AI techniques that have played an important role in AILE systems. Some of these come directly from "mainstream" AI, like cognitive modeling, natural language processing, machine language, and bayesian networks. Others have been developed primarily for use in AILE systems, for example, student modeling, model tracing, knowledge tracing, and methods for evaluating learning. We will ground all of these topics by looking at particular AILE systems that have been influential by pushing the state of art and/or demonstrating substantial benefits in learning environments. PREREQUISITE(S): CS 457 OR CS 480 OR INSTRUCTOR PERMISSION.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

ITS 589
ITS CAPSTONE PROJECTS COURSE
Graduate
This practicum projects course provides an opportunity for students to apply all of the skills they have learned on one comprehensive project. Multidisciplinary teams work with educational domain experts to plan, design, implement, and evaluate an intensive instruction technology systems project. PREREQUISITE(S): Completion of the ITS Fundamental courses or consent of the instructor.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

IWS 104
RELIGIONS IN CHICAGO
Undergraduate
An experience-centered introduction to the varieties of religious thought and expression manifest in the greater Chicago area. Includes site visits.
IWS 116
INTRODUCTION TO THE ISLAMIC EXPERIENCE
Undergraduate
This course will introduce students to the religion of Islam through its sources, practices, and presence in the contemporary world. In this introduction we will briefly explore the Qur'an, the Prophet Muhammad, hadith, law, ritual and practices, sectarian movements, and issues among Muslim women. The course will also look at some of the issues facing Muslims at the present time. Cross-listed as REL 116.

IWS 121
HISTORY OF ISLAM: THE FOUNDING OF A CIVILIZATION
Undergraduate
This course covers the rise and initial spread of Islam, from its origins in Arabia to its emergence as a world-wide civilization. This course will look at the periods of late antiquity, the life of the Prophet Muhammad, the caliphate, the conquests, the first and second civil war, the Abbasid revolution, and finally the break-up of the empire in the 10th / 11th Century. This will encompass the regions of Arabia, the Fertile Crescent, North Africa, and Central Asia. The course will cover the political, religious, and intellectual history of the above periods and regions.

IWS 122
HISTORY OF ISLAM: THE FLOWERING OF A CIVILIZATION
Undergraduate
This course looks at the period from the rise of the period of the Muslim Commonwealth, 10th/11th century, to the rise of the Gunpowder States, 15th/16th century. The course will look at the different dynasties (Buyids, Fatimids, Seljuks, Ayyubids and others) that arose and were ruling the Muslim world before, and during the time of the Crusades. The course will also look at the impact of the Persian bureaucracy and Turkish military on Islamic civilization.

IWS 191
ISLAMIC WORLD STUDIES
Undergraduate
This course is the introductory course to the program. This course is to familiarize the students with the study of Islam by introducing them to the central texts - the Qur'an, Hadith literature (reports of the actions and sayings of the Prophet Muhammad), and Sira (the biography of the Prophet)- and methodologies in studying these and other primary sources (although the course will limit its scope to translated texts, students will become aware of the vast resources that are available in Arabic). Students will also learn the mechanics of research in the field. They will become aware of the Encyclopedias, Indexes, and Journals, etc., that are available to conduct proper research in the field. Formerly IWS 100.

IWS 192
WESTERN APPROACHES TO ISLAMIC STUDIES
Undergraduate
This course is the second of two introductory courses to the Islamic World Studies Program. Students will concentrate on the state of the field of Islam in the Academic world. Students will become grounded in the history of the field, from its beginning in the late 18th century until the present time. Students will become familiar with the most up to date theories that are at present governing the study on the rise of Islam and the sacred texts in the Western and Islamic Academia. Formerly IWS 101.

IWS 200
RESEARCH TOOLS
Undergraduate
IWS 200 is a skills course aimed at improving the student's ability to read and write with clarity and precision. It is meant to prepare students for other IWS courses that stress text reading, responsive writing and research. IWS 200 students will use source material relevant to Islamic World Studies from disciplines that include religious studies, history, political science and international studies. The class meets once a week for three hours. The first 60-75 minutes of each session will be devoted to discussion of weekly reading assignments. Students will complete six short response papers as weekly homework assignments and three longer writing assignments: a book review, a comparative analysis and a research paper. Formerly IWS 190.

IWS 217
ISLAM IN GLOBAL CONTEXTS (CROSS-LISTED AS REL 217)
Undergraduate
A study of Islam's developments in various global contexts, including Arabian beginnings, the Middle East, Central, Eastern and Western Europe, China, the former Soviet States and South Africa, with a focus on the impacts that these cultures and Islam have had on each other. Cross-listed as REL 217.
IWS 218
INTRODUCTION TO ISLAM IN SOUTH ASIA
Undergraduate
This course will explore the very rich history and development of Islam in South Asia. In the first part of the course we will briefly explore four overlapping, though unique phases: the early history of Islam in the region (beginning in 630), the Mughals (1526-1858), British Colonialism (1613-1947), and the contemporary world (1857-2011). In studying the early history of Islam in South Asia, we will explore both the South Asian milieu at the time of the Muslim arrival, as well as the context of Islam’s arrival within the greater narratives of its own expansions. In studying the Mughals we will explore not only the rise and decline of this 600 year enterprise, but also the issues addressed by a Muslim minority ruling over a Hindu majority. In studying the history of British Colonialism in India, we will explore the India’s perceived role in the greater project of Colonialism, Muslim encounters with modernity, and the changing dynamics of Muslim-Hindu interactions in response to the occupying power. In the post-Colonial phase, we will explore the anti-Colonial independence movements (the Khilafat movement and the Pakistan movement), followed by the mapping of South Asia as a three part nation-state: India, Pakistan, Bangladesh, with discussion on Kashmir, and Sri Lanka, involving a transnational conversation between multiple Islamic outlooks. In the post-Colonial phase, we will explore the artistic role of Muslims in the developing Indian consciousness. In the final part of the course, we will explore the role of Islam in South Asia in the 21st Century, exploring Global Societies, South Asian Diaspora, Pan-Islamism, Hindu Nationalism, Religious violence, and Bollywood.

IWS 220
MUSLIM HISTORIES IN LATIN AMERICA, THE CARIBBEAN, AND LATINO USA
Undergraduate
This course maps Muslim histories in Latin America and the Caribbean, as well as in U.S. Latino/a communities, from the late fifteenth century to today. In this broad historical approach, we explore five distinct moments: the place of Moors or Muslim Iberians in the colonization of the ?New World;? enslaved Male West Africans mobilizing against a Luso-Brazilian imperial order; indentured South Asians and creolization in Caribbean nationalist ideologies; early and mid-twentieth century Arab migration to South America, and, most recently, Latin American, Caribbean, and U.S. Latino/a conversion, or what many call, reversion, to Islam. Our main goal is to explore Muslim histories as a window into the themes of colonialism, slavery, creolization, migration, and post-9/11 politics within these Latin/o Americas. In so doing, we are necessarily locating Muslims at the very conception and in the very pulse of what is today considered Latin America and the Caribbean, tracing their histories through Iberian colonizers, enslaved Africans, indentured South Asians, migrant Arabs, and finally, Latino/a converts. By studying this Muslim history of the Latin/o Americas, we seek to gain novel insights into a lesser-explored dimension of Latin America and the Caribbean as well as map the global breadth of Islam.

IWS 230
ISLAMIC FINANCE
Undergraduate
This course is a comprehensive introduction to Islamic finance, from its religious and legal origins and principles to its most advanced forms. This course focuses on the underlying principles of Islamic finance through a study of its scriptural and jurisprudential origins and reviews most of its products such as Mud?raba, Mush?raka, Mur?baha, Project finance, Suk?k, Tak?ful, Ij?ra and equity mutual funds etc. The course also examines today’s Islamic finance industry with a closer look at the structure and governance of contemporary Islamic financial institutions and international regulatory bodies.

IWS 251
ISLAMIC ART (CROSS-LISTED WITH HAA 222)
Undergraduate
An examination of the origins of Islamic culture in Arabia and the spread of Islamic art and religion across the Middle East, North Africa, Spain, Sicily, Iran, India, and Central Asia; emphasizes the meaning of religious imagery. Cross-listed with HAA 222.

IWS 263
RELIGION AND POLITICS IN THE MIDDLE EAST (CROSS-LISTED AS REL 263)
Undergraduate
An exploration of Judaism, Christianity and Islam as they develop and interact in the Middle East, historically and in terms of contemporary religious and political issues. Includes a study of personal narratives of people from Jewish, Christian and Muslim communities. Cross-listed as REL 263.
IWS 265  
REFORM MOVEMENTS WITHIN ISLAM (CROSS-LISTED AS REL 265)  
Undergraduate  
This course will deal with the idea of “reform” within Islamic political movements in the modern period. The course will analyze various Islamic reform movements such as the Wahahabis, the Muslim Brotherhood, the Modernists, the Traditionalists, seeking a pattern in these movements. Cross-listed as REL 265.

IWS 266  
ISLAM IN THE UNITED STATES (CROSS-LISTED AS REL 266)  
Undergraduate  
An examination of the story of Islam in the United States in three historical periods: antebellum America, the first half of the 20th century, and the latter half of the 20th century. Explores Muslim slave life; the possibilities of retentions of Islam in slave culture; the religious, social/economic, and political life of Muslims at the beginning of the 20th century; the emergence of Islamic thought in the U.S. through an overview of the works of Isma'il as-Faruqi, Seyyed Hossein Nasr and Fazlur Rahman. Cross listed as REL 266.

IWS 270  
ISLAMIC ETHICS  
Undergraduate  
Ethics is concerned with the character, customs, principles or standards of human conduct. Ethics is also concerned with the norms of human conduct. Islam is considered an essentially ethical religion meaning that it is fundamentally concerned with establishing the norms of human conduct in a relationship with God. Islamic conceptions of ethics/morality derive directly from the Qur’an. The lives of Muslims should ideally reflect the spiritual characteristics preferred by the Qur’an. In Islam there is no real distinction between being religious and ethical. In this course students will explore the ethical world of Muslims through glimpses of Islamic thought on pluralism, politics, abortion, war, euthanasia, and social justice.

IWS 271  
THE QUR’AN AND ITS INTERPRETERS (CROSS-LISTED AS REL 271)  
Undergraduate  
A study of the origin, transmission, and interpretation of the Qur’an. Cross listed as REL 271.

IWS 272  
MUSLIM WOMEN IN TEXTS (CROSS-LISTED AS REL 272)  
Undergraduate  
Explores major current approaches to the study of Muslim women, focusing on the Qur’anic conversation on women, on the commentaries provided by men, and on the emerging voices of Muslim women and non-Muslims. Cross-listed as REL 272.

IWS 277  
INTRODUCTION TO SUFISM  
Undergraduate  
This course will look at the history of Sufism (Islamic Mysticism). The course will look at the roots of Sufism and its early advocates, the medieval articulation and formalization of the tradition, to its renaissance in the modern period and its use as a ‘moderating’ tool. Students by the end of the course will also have a firm grounding in the terms and concepts that govern Sufism.

IWS 278  
INTRODUCTION TO THE HADITH  
Undergraduate  
This course will introduce students to the hadith (the tradition of the Prophet Muhammad). The course will look at the historical development of the collection, study, and criticism of the hadith. Students will learn the utilization of the hadith in the establishment of Muslim religious practices, law, political and cultural norms. Students will become familiar with the technical terms that are utilized by the scholars of hadith. Students will also come to understand the modern debates about hadith study and hadith utility (or lack there of) in the modern world.

IWS 285  
ROMAN CATHOLICISM’S ENCOUNTER WITH OTHER RELIGIONS  
Undergraduate  
A study of how Roman Catholicism understands and responds to other religious traditions, other ways of being religious, and how the encounter with those other traditions affects Roman Catholicism's understanding of itself and its teachings.
IWS 292
HISTORY OF JIHAD
Undergraduate
This course will look at the history of jihad. It will take a look at the institution of jihad in three different periods: early period (622-750) middle period (1095-1415) and finally the modern period (1798-2001). The course will look at the understanding of the concept of jihad and see if there is any consistent theory and how it compares to the Christian understanding of the Just War theory.

IWS 295
SECTARIAN MOVEMENTS WITHIN ISLAM (CROSS-LISTED AS REL 295)
Undergraduate
This course will look at the various sects within Islam such as Shi'ism, Kharjism, etc. The course will also look at theological sects such as the Mu'taziliets. The course will be concerned with the history, the beliefs, and the present circumstances (if they still exist today) of these sects. Cross listed as REL 295.

IWS 298
READINGS IN THE QUR'AN
Undergraduate
This course will look at the Qur'an and its impact on several genres: the Qur'an and story telling; the Qur'an and law giving; the Qur'an and poetry; the Qur'an and imagery etc., Students will see how the Qur'an (in its oral and written form) impacted the literature and art of the Islamic and non-Islamic Near East. Students will first become familiar with the Qur'an and its context by a close reading of the text (in its translation). Then students will look at other literary works and see how much the Qur'an has shaped and impacted these 'secular' genres.

IWS 299
HISTORY OF ISLAMIC PHILOSOPHY
Undergraduate
This course looks at one of the main intellectual outgrowths of the Islamic tradition: Falsafa (Philosophy), the translation movement it spawned, and its interaction with Greek and Hellenistic philosophy. As we look at this historical development we will read important Islamic philosophers both in the medieval and modern period, such as: al-Kindi, al-Farabi, Ibn Sina, Ghazali, Ibn Rushd, Ibn Hazm, Ibn Tufayl, Ibn Bajjah, Suhrawardi, Nasir al-Din Tusi and Mulla Sadra.

IWS 300
MUSLIMS IN AMERICAN FICTION AND FILM
Undergraduate
This course will analyse the portrayal of Islam and Muslims by American fiction writers, documentary and screenwriters. Students will use normal analytical categories as they read popular mystery thrillers, romance novels, watch documentaries and review major movies.

IWS 302
MODEL ARAB LEAGUE
Undergraduate
This course is centered around students' participation in the Model Arab League as delegates from member-states chosen by IWS. Students engage with others from universities in the Mid-West region on the most important social, economic, environmental, cultural and political issues facing Arab leaders and ordinary citizens. The in-class component will include pertinent background information in these areas along with a specific focus on parliamentary procedure of the states they will represent.

IWS 310
CONVERSATIONS ON ARAB-ISRAELI CONFLICT
Undergraduate
This course is designed to run in connect with SolyaConnect, a virtual classroom experience for IWS majors and minors. Students will be in live conversations with students in various universities in the U.S. and the Middle East on issues directly related to this conflict. Students begin in last weeks of winter quarter and continue throughout Spring Quarter, registering for course in Spring. Laboratory work which is virtual classroom is coupled with classwork real class setting.
IWS 320
MUSLIM HISTORIES OF THE LATIN/O AMERICAS
Undergraduate
This course maps Muslim histories in Latin America and the Caribbean, as well as in U.S. Latino/a communities, from the late fifteenth century to today. In this broad historical approach, we explore five distinct moments: Moorish Iberians in the colonization of the so-called “New World” as well as their reinvention today; enslaved West Africans mobilizing against a Luso-Brazilian imperial order; indentured South Asians and creolization in Caribbean nationalist ideologies; early and mid-twentieth century Arab migration to South America, and, most recently, Latin American, Caribbean, and U.S. Latino/a conversion, or what many call, reversion, to Islam. Our goal is to explore Muslim histories as a window into the themes of colonialism, slavery, creolization, migration, and post-9/11 politics within these Latin/o Americas. In so doing, we are locating Muslims at the very conception and in the very pulse of what can be called the Latin/o Americas, tracing their histories through Iberian colonizers, enslaved Africans, indentured South Asians, migrant Arabs, and finally, Latino/a converts. By studying this Muslim history of the Latin/o Americas, we seek to gain novel insights into a lesser-explored dimension of Latin America, the Caribbean, and the Latino/a U.S. as well as map the global breadth of Islam.

IWS 324
ISLAMIC LAW (SHARIAH) AND AMERICAN CULTURE
Undergraduate
An intensive study of the many dimensions of religious liberties in a pluralist society. Explores the language of constitutional and political discourse generally, and the ways in which language affects an understanding of the First Amendment. Includes case studies on particular religious communities and their encounters with American law. Cross-listed as REL 324.

IWS 327
MEDIA AND ISLAM
Undergraduate
Media and Islam examines the journalistic techniques and communication theories behind how mainstream U.S. news media, print, broadcast and online bring news and information about the Arab and Muslim worlds to the American public. The course pairs media pieces with academic writing to stimulate critical thinking on media coverage of 1) characterizations of Muslims and Islam, including Islamic diversity, 2) contextual links between political Islam and Western/U.S. policies in the Muslim world, 3) the concept of jihad, 4) the status of Muslim women, and 5) the Israeli-Palestinian conflict. The course is presented in a three-hour, weekly seminar format and stresses reading, discussion and class participation. Written requirements are a midterm essay (assigned two weeks before due date) and a final media research paper on an approved topic of choice. There are no exams or quizzes.

IWS 330
ISLAMIC LAW, ITS HISTORY AND MODERN APPLICATIONS
Undergraduate
This course is a brief introduction to Islamic Law and its history including case studies of its modern applications. Students will trace the history of Islamic legal theory from its beginnings until the modern period. The focus is on the early formation of theory-its major themes and arguments along with the variety of doctrines that contribute to it. Students will examine how the socio-religious realities interface with the production of legal discourse as they build on previous coursework on modern reformers and the sources of law. This course will also explore the ongoing conversations over religious faith as the basis of a legal system. Last, we transition to the contemporary period through case studies where we will consider how the case connects with or departs from these larger debates and the different contemporary methodologies and arguments used.

IWS 340
SPECIAL TOPICS IN ISLAMIC WORLD STUDIES
Undergraduate
See schedule for current offerings.

IWS 341
MUSLIM INTELLECTUAL TRENDS 1900-PRESENT
Undergraduate
Modernization and its attendant demands for economic, political and sometimes religious change ignited Muslim thought in the 20th century. Various western theories on modernity and modernization are perceived in the Muslim world as imperialistic and directly linked to threats of neo-colonialism. This course engages a variety of scholars in an exclusively textual approach, seeking to 'strike a balance' between analysis of their seminal texts and philosophical frameworks. We will examine the works of six scholars and the contexts that define them such as race, class, and gender.

DePaul University Winter/Spring 2013 Page 1637 of 2244
IWS 345
ISLAMIC PHILOSOPHY
Undergraduate
This course looks at one of the main intellectual outgrowths of the Islamic tradition: Falsafa (Philosophy), the translation movement it spawned, and its interaction with Greek and Hellenistic philosophy. As we look at this historical development we will read important Islamic philosophers such as: al-Kindi, al-Farabi, Ibn Sina, Ghazali, Ibn Rushd, Ibn Hazm, Ibn Tufayl, Ibn Bajjah, Suhrawardi, Nasir al-Din Tusi and Mulla Sadra.

IWS 395
SENIOR CAPSTONE SEMINAR
Undergraduate
This is a seminar for Islamic World Studies majors. It is both an opportunity to reflect on what has been gained from studies and experiences in Islamic studies and an opportunity to strengthen that learning and expand those experiences with direct contact with Muslim communities in Chicago and overseas through the Soliya Program. Students will meet with leaders and members of Chicago's Muslim communities and through Soliya meet with their peers in universities here and abroad. Soliya, through a partnership with the United Nations Alliance of civilizations aims to reduce tensions across cultural divides. This aspect of the course will be integrated throughout with the assistance of Jennifer Von Diehle, Assistant director for International Collaborations at DePaul.

IWS 399
INDEPENDENT STUDY
Undergraduate
Independent study designed for majors.

JOUR 240
BROADCAST JOURNALISM
Undergraduate
An introduction to the preparation and presentation skills needed by broadcast journalists. This is a studio course that will allow the gathering and delivery of news and public affairs programming with the development of the critical competencies students must have if they are considering careers in the profession.

JOUR 245, JOUR 278 and JOUR 330 are prerequisites for this course.

JOUR 275
NEWS EDITING
Undergraduate
This course introduces students to editing and publishing procedures, including proofreading, copyediting and layout for different types of publications, including newsletters, brochures, periodicals and books. Skills in grammar, punctuation, style, organization, design and headline writing are emphasized along with the editor's role in the ethics of the profession, including questions of libel. Students will understand the editor's central role in the newsroom and the flow of a story from a reporter to the public.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 275
INTRODUCTION TO JOURNALISM
Undergraduate
An introduction to the field of journalism. Instruction and practice in writing and reporting news stories. Students will learn the skills needed to become better communicators and to understand the news in the world around them.

JOUR 276
PHOTOJOURNALISM (CROSS-LISTED AS ART 377)
Undergraduate
Introduction to the theoretical and technical foundations of photography with exploration of the medium's aesthetic, documentary and narrative purposes. Cross-listed as ART 377.
JOUR 278
NEWS REPORTING
Undergraduate
This course is designed to go beyond the inverted pyramid of basic news writing and focus on some of the sophisticated newsgathering techniques used by journalists. Story generation techniques will be examined along with interviewing techniques. The course will also explore how databases and documents can enhance a story, including the use of surveys, field experiments and participant observation.
JOUR 275 is a prerequisite for this class.

JOUR 279
FEATURE WRITING
Undergraduate
This practicum develops the observational and narrative skills essential to writing feature stories in a variety of journalistic contexts. Students will learn the story telling techniques that emphasize human interest, description and the details of a subject. Instruction will include illustrated lectures, class discussions, writing exercises and critiques.
JOUR 275 is a prerequisite for this course.

JOUR 290
JOURNALISM WORKSHOP (VARIABLE TOPICS)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in journalism that can enhance their knowledge and expertise. Workshop topics can include video camera basics, non-linear editing with Final Cut Pro news print design (including InDesign, Photoshop, Illustrator), and online editing tools (including Word Press). Students may take a maximum of 4 credit hours of JOUR 290 in the major, and a total of 8 credit hours.

JOUR 317
EXPERIENTIAL LEARNING
Undergraduate
Students learn advanced reporting techniques while developing projects under the direction of a faculty supervisor. This course is designed to take learning out of the classroom and enables students to develop portfolio pieces while gaining critical real world experiences in reporting.

JOUR 330
WRITING FOR BROADCAST
Undergraduate
This course introduces students to the writing and formatting requirements of broadcast journalists. Part of this instruction is to give students an understanding of how writing for broadcast differs from writing for print and the awareness it takes to write copy that supports and strengthens the visuals that viewers will be watching. Strong writing is the backbone of broadcast journalism, and this course gives students a firm foundation in the writing skills that produce broadcast stories worth watching.
JOUR 275 is a prerequisite for this course.

JOUR 343
JOURNALISM AND THE AMERICAN EXPERIENCE
Undergraduate
This seminar analyzes the current condition of American print, broadcast and online journalism in light of their historic past. Journalism's social responsibilities and its functioning as a business are examined across major periods of American history—the colonial and revolutionary press, the early Republican and penny press, the Civil War press and the press of industrializing America, the rise of the tabloid press, and the role of the press in reporting the development of the United States as a world power during World War II and in its aftermath will be captured.

JOUR 350
RADIO NEWS
Undergraduate
Nowhere has the rise of new technologies had a greater impact than in radio reporting. This course gives students opportunities to stream their stories through field and studio productions that connect listeners within communities and around the world. Students will be trained in writing for the ear, and the unique local and international possibilities of radio reporting.
JOUR 275 and JOUR 278 are prerequisites for this course.
JOUR 361
JOURNALISM LAW AND ETHICS (formerly The Press, The Law and Democracy)
Undergraduate
This course examines the unique role of the press in providing the information that makes democracy possible. Students will learn the ethical and legal obligations of the reporter and news organizations and the impact that new technologies are having on news gathering and dissemination. The course aims at enhancing student understanding of the social responsibility of journalists in the public life of the nation and its citizens.

JOUR 362
THE PRESS AND THE PRESIDENCY
Undergraduate
This seminar describes the current and historic relationship between the mass media and the American presidency, focusing on the connections between press coverage to agenda-setting and public opinion in presidential campaigns. Students will analyze conditions in which press-presidential relations are cooperative or adversarial, including the market forces that have shaped that relationship and the news values that have reinforced it.

JOUR 363
ONLINE JOURNALISM
Undergraduate
This course introduces students to the principles and practices of online journalism. Students learn both conceptual and technical skills in multimedia reporting. Although the course provides groundwork in using digital tools to produce online content, the focus is on journalism. As much as possible, assignments will allow students to grasp online journalism concepts and apply them to real-world scenarios.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 364
INVESTIGATIVE REPORTING
Undergraduate
The course will include discussions and reporting projects that will analyze how investigative story ideas are developed, how decisions are made in the selection and development of investigative stories: how public records and other sources of information are obtained and used in investigative reporting: ethical dilemmas; and the impact of investigative journalism on public opinion and policy with a particular focus on issues of race, diversity and urban affairs.

JOUR 275 is a prerequisite for this course.

JOUR 365
TELEVISION NEWS I
Undergraduate
This is a course in electronic newsgathering. Student teams will shoot and edit stand up news packages. To do this, students will learn the basic elements in developing a broadcast news story--from originating the story idea, researching it, illustrating it, doing interviews, and then packaging the story for air.

JOUR 275, JOUR 278 and JOUR 330 are prerequisites for this course.

JOUR 366
MAGAZINE REPORTING
Undergraduate
The digital world of reporting and editing has created unparalleled opportunities to reach specific readers with targeted stories. This course introduces students to the opportunities of magazine writing and the strategies used by magazine writers. Writing assignments will strengthen a student's grasp of the resources available to modern magazine writers and the techniques of research and interviewing that are the basis of skilled storytelling.

JOUR 275 and JOUR 278 are a prerequisite for this class.
JOUR 367
INTERNATIONAL REPORTING
Undergraduate
This course analyzes the impact new technologies and world events are having on foreign correspondents and international reporting. The digital revolution is having a profound effect on the ability of news makers and organizations to compete with governments in worldwide information flows. Access to information has made citizens more inter-dependent while creating extraordinary opportunities for journalists to tell stories that increase the understanding and enlarge the imagination of their readers.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 368
SPORTS REPORTING
Undergraduate
Sports reporting is a go-to destination for online, print, and broadcast consumers of sports information. This course gives students an understanding of the social and cultural significance of sports. It trains them to look for themes and details that go beyond the simple score of a contest to the symbolic importance of athletics in the post-modern experience. Students will complete the course with a new appreciation for what makes for strong sports reporting and what accounts for its unique hold on the popular imagination.

JOUR 275 and JOUR 278 are a prerequisite for this class.

JOUR 374
COMMUNITY JOURNALISM
Undergraduate
Students will examine the work of major news chains that have begun experimenting with local coverage patterns that are informed by community leaders and community organizations identifying what matters in their community. Supporters of this approach claim it is the future for news organizations attempting to fulfill their social responsibility. Critics claim it undermines the independence of the press.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 377
SPECIAL TOPICS IN JOURNALISM
Undergraduate
Focuses on a specific topic related to the field of journalism. Included might be such topics as sports reporting, Chicago journalism, tabloid journalism, and Front Page news. See schedule for description of current topic.

JOUR 275 and JOUR 278 are prerequisites for this course.

JOUR 380
REPORTING FOR GOOD DAY DEPAUL
Undergraduate
This course will give students extensive experience doing on-air reporting for the DePaul student television news program, "Good Day DePaul." Reporters will cover breaking news stories, features, and serious enterprise stories. Students must have experience shooting in the field and editing in Final Cut Pro, either through previous television news courses at DePaul, or from other work. Students will be permitted to take this course in two different quarters.

JOUR 365 is a prerequisite for this class.

JOUR 383
ONLINE JOURNALISM II
Undergraduate
This course builds on what students learned in Online Journalism I. The emphasis is on developing a student-run website made up of stories and sections that utilize interactivity and multimedia features to engage the online audience. Students develop an understanding of a website's structure and how larger sites are built vs. the microsites. The course is designed to simulate the workflow in digital newsrooms.

JOUR 363 is a prerequisite for this class.
**JOUR 385**  
**TELEVISION NEWS II**  
*Undergraduate*  
Television News II builds on the knowledge students have gained in our introductory Television News class in producing news packages for broadcast. Students will develop longer format feature pieces that combine skills in writing, reporting, shooting, narration, editing, and producing. The best of this work should serve as portfolio pieces for students considering careers in broadcasting and related industries. TV News I and Writing for Broadcast are prerequisites for taking this course.

JOUR 330 and JOUR 365 are a prerequisite for this class.

**JOUR 390**  
**WRITING FOR THE DEPAULIA**  
*Undergraduate*  
This course is designed for the serious journalism student who wants on-deadline experience writing for The DePaulia newspaper and web site. Students will cover beats of interest to the DePaul community throughout the quarter and also will receive assignments from DePaulia editors. Stories and beats can be as varied as campus news, sports, the arts or news in the Lincoln Park and South Loop communities. Students may repeat the course once for credit. Not available for DePaulia editors.

JOUR 275 and JOUR 278 are prerequisites for this course.

**JOUR 393**  
**JOURNALISM PRACTICUM**  
*Undergraduate*  
Structured and supervised student participation in collegiate debating, radio production or group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours.

**JOUR 399**  
**INDEPENDENT STUDY**  
*Undergraduate*  
JOUR 501  
**THE SOCIAL RESPONSIBILITY OF JOURNALISM**  
*Graduate*  
This course introduces students to the historic development of social responsibility theory and its continuing role in defining the obligations of journalists in creating an informed citizenry as a critical part of the democratic process. The course analyzes the ongoing tension between journalistic responsibility and the obligations of news organizations to turn profits for their shareholders and the constitutional imprimatur of journalism to offer the information that makes self-governance possible.

Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 502**  
**NEWS NOW: JOURNALISM IN THE INFORMATION AGE**  
*Graduate*  
This course offers historic context in critically examining issues now facing journalism. Students will analyze the impact that convergence and digital technologies are having on ethical decisions that must be made by socially responsible journalists during every news shift. Topics include: who is a "reporter" in the digital age and what are the rights and privileges of the online reporter in a converged environment that influence confidentiality, defamation, privacy, gate-keeping, sensationalism, the public's right to know, globalization, corporatization, and public opinion.

Status as a Graduate Journalism student is a prerequisite for this class.

**JOUR 503**  
**REPORTING FOR CONVERGED NEWSROOMS**  
*Graduate*  
This course is designed to equip journalists with the techniques needed in assembling and producing stories that can be published and distributed across integrated media platforms. Students will learn to write and edit reports for online media in ways that add value to stories and encourage readers to drill down into these news narratives for information worth knowing. Students will develop an understanding of how newsgathering practices are evolving through digital media and the role of teamwork in disseminating these stories to an informed citizenry.

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 504
BACKPACK REPORTING
Graduate
This course gives students the practical experience they need in news gathering and distribution within the converged landscape of electronic newsgathering. This will involve the preparation needed in covering stories, writing reports, shooting pictures and videos, and downloading these files along with links to relevant sites online. This course will prepare students to act independently and with others throughout the digital news gathering cycle, including the production of content in multiple information formats.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 505
ADVANCED TELEVISION REPORTING
Graduate
This course will teach students how to be responsible broadcast news reporters, anchors, producers, and editors, who bring added value to stories in today’s converged newsroom environment. Students will learn all aspects of the news gathering and distribution process from story conception to the research, interviewing, reporting, writing, shooting, editing, and producing that goes into a successful, must-see story.

JOUR 503 is a prerequisite for this class.

JOUR 506
NEWSCAST PRACTICUM
Graduate
This course teaches students how to construct a newscast, while fulfilling the social responsibility of the press. Students will learn how to utilize digital technologies to craft stories that empower citizens to participate more fully in public life. Students will rotate through different positions weekly—reporter, anchor, editor, technical director, director, floor director, and producer—in producing a weekly public affairs program.

JOUR 503 is a prerequisite for this class.

JOUR 507
VISUAL COMMUNICATION
Graduate
This course gives students a theoretical and practical grounding in the digital world of photo-journalism. Students will be introduced to the wide array of tools available to reporters in illustrating content from their stories on the web. This includes the hardware and software packages now available in digital story-telling and how citizens use the information in interpreting the news of the day.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 508
NICHE JOURNALISM
Graduate
The course examines the explosion in magazine and trade publication journalism that is able to target specific audiences with content designed exclusively for them. Students will use the tools now available in reaching reader communities that share common interests and information. This is revolutionizing the ways in which stories are told, while creating communication communities that share common interests and speak a common language.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 509
JOURNALISM LAW AND ETHICS
Graduate
This course examines the philosophical roots of the First Amendment and how free speech jurisprudence impacts the journalism profession. Students will learn how legal and moral issues arise when newsgathering and free speech conflict with other constitutional and common law rights, and how developments in technology and economics are creating new challenges for journalists and the courts.

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 510
SPORTS REPORTING
Graduate
This course gives students an historic understanding of the role of the sports writer and sports section and the impact the online universe is having on sports writing and reporting. Students will the values of modern sports editors and the techniques used by modern sports writers. Students will learn the perspective and context that makes good sports writing truly exceptional.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 511
ARTS & ENTERTAINMENT REPORTING
Graduate
Arts and Entertainment reporting is among the most widely read, but often is the most poorly executed aspect of a publication or broadcast. Students taking this course will develop a critical appreciation for the role of arts and entertainment reporting in the history of the press and its current role in creating a culture that appreciates and understands the arts and their profound contribution to human understanding.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 512
BUSINESS WRITING AND REPORTING
Graduate
This course will help students better understand the critical role that business and finance reporting plays in the United States and the world economy. Students will develop the techniques that are necessary in responsibly researching, reporting, writing, and editing business and financial news. Segments of the course will be devoted to the history of the discipline, the ethical responsibilities of the business press, and the unique opportunities now available to the digital reporter of business and financial news.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 513
CHICAGO AND URBAN AFFAIRS REPORTING
Graduate
This course analyzes what is distinctive about Chicago reporting. Students will be introduced to the rich tradition and history of reporting in this city, and the central role this work has played in the development of urban reporting nationwide. To do this, students will take a close look at the institutions, people, neighborhoods, decision-makers and events that impact Chicago residents in their everyday lives. The emphasis will be on localizing our approach to stories through a beat system that will allow students to regularly report on important areas of municipal life.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 514
OPINION AND COLUMN WRITING
Graduate
Students will learn what makes for extraordinary opinion and column writing with an emphasis on strong reporting that enables writers to assemble arguments based on the firm foundation of fact. Also examined will be the new ways in which digital delivery systems both empower and threaten the free flow of ideas within and across interest communities.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 515
SPECIAL TOPICS IN JOURNALISM
Graduate
Topics have included Advanced Reporting; The Chicago Olympics; The Press and The Presidency; Reporting Campaign 2008; and From Franklin to the Internet: A History of American Journalism.

Status as a Graduate Journalism student is a prerequisite for this class.
**JOUR 517**  
**EXPERIENTIAL LEARNING IN JOURNALISM**  
**Graduate**  
Students learn advanced reporting techniques while developing projects under the direction of a faculty supervisor. This course is designed to take learning out of the classroom and enables students to develop portfolio pieces while gaining critical real world experiences in reporting. Instructor Permission Required

Status as a Graduate Journalism student is a prerequisite for this class.

---

**JOUR 518**  
**WRITING AND REPORTING**  
**Graduate**  
This course teaches foundational journalistic skills in writing and reporting for those students coming into the program without significant previous course work or professional experience in journalism. Instructor consent required.

Status as a Graduate Journalism student is a prerequisite for this class.

---

**JOUR 519**  
**INTERNATIONAL REPORTING**  
**Graduate**  
Digital technologies have created a more interdependent world while radically transforming how that world is reported. This course analyzes the current state of foreign affairs reporting and teaches students how to think critically about foreign news reporting, while giving them the skills needed to execute stories in this challenging environment.

Status as a Graduate Journalism student is a prerequisite for this class.

---

**JOUR 520**  
**DIGITAL EDITING**  
**Graduate**  
This class will examine how journalists can effectively find personal accounts of news events online and evaluate their credibility. It will look at a variety of related issues on the web, including ethical reporting, gathering story ideas, reliable sourcing, and social media experimentation. Students will experience working at a live aggregate news site to practice what they've learned in socially responsible digital editing.

Status as a Graduate Journalism student is a prerequisite for this class.

---

**JOUR 521**  
**SPORTS PRODUCING**  
**Graduate**  
This course will focus on producing sports content for broadcast with an emphasis in television production. Students will learn to write and produce compelling stories through the lens of sports, including coverage of DePaul athletics. The best of this work will be featured on DePaul's broadcast and online outlets as well as university's athletics website. Instructor permission required for this course. Students must have a working knowledge of television production equipment.

Status as a Graduate Journalism student is a prerequisite for this class.

---

**JOUR 522**  
**MULTI-PLATFORM NEWS EDITING**  
**Graduate**  
This course introduces students to editing and publishing procedures, including proofreading, copy editing and headline writing for various publications, including newspapers and online media. Skills are emphasized in AP style, grammar, usage, punctuation, story organization, brevity, basic layout, photo editing, cutline writing, news judgment, ethics and print/online headline writing. In addition to editing basics, students learn industry-standard InDesign software to lay out print news pages.

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 523
ONLINE SPORTS REPORTING
Graduate
Students will report, write, edit and produce online stories about sports issues, features and other topics. Skills are emphasized in game coverage, sports blogging, building a sports community on Twitter, shooting and editing video, recording and editing audio, and building basic web pages in HTML. The course also will explore ethical and legal issues pertaining to video and audio usage rights, athlete branding and other topics in the multimedia sports journalism culture.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 524
WRITING FOR THE DEPAULIA
Graduate
This course is designed for the serious Journalism student who wants on-deadline experience writing for The DePaulia newspaper and website. Students will cover stories from each section of the paper (news, features, entertainment, opinion and sports) throughout the quarter. Some assignments will come from DePaulia editors, but students are expected to come up with their own ideas. Stories can be as varied as campus news or news in the Lincoln Park and South Loop communities. Supplementing stories with photos and video is expected.

JOUR 525
URBAN AFFAIRS REPORTING
Graduate
There are stories hidden in plain sight throughout the city, and this course will cover how to find and cover those stories from the ground up. Urban Affairs Reporting will focus on the stories that happen beyond City Hall, in neighborhoods and communities, among individuals and groups - stories that influence and are influenced by government, business, and other powerful institutions. The course will help students improve their ability to develop sources, find story ideas, and thereby cover critical urban issues with greater depth, originality, and excitement. Students will learn how to report these often fascinating stories across a variety of print and online platforms.

JOUR 526
POLITICAL COMMUNICATION
Graduate
This course examines how political communication and related media affect public opinion, civic life, elections, and public policy, and the impact of these communication dynamics on civic institutions and democratic decision-making. Students will study how journalists, elected officials, citizens, and political strategists construct, use, and understand political messages, including how news, advertising, and entertainment media contribute to the shaping of political perceptions, emotions, and behaviors in a variety of circumstances domestically and internationally.

JOUR 527
LIFESTYLE REPORTING
Graduate
This course will give students the tools to write Lifestyle stories and to think creatively. Assignments will include human-interest stories, health, fitness, design, fashion, food, leisure and social issues. The class will concentrate on the tools reporters need to create this kind of work, from good quotes to relevant sourcing.

JOUR 528
REPORTING FOR GOOD DAY DEPAUL
Graduate
This course will give students extensive experience doing on-air reporting for the DePaul student television news program, Good Day DePaul. Reporters will cover breaking news stories, features, and serious enterprise stories. Students must have experience shooting in the field and editing in Final Cut Pro, either through previous television news courses at DePaul, or from other work.

JOUR 505 or instructor consent is a prerequisite for this class.
JOUR 529
ONLINE NEWS BUREAU
Graduate
This course offers first-hand experience on a digital newsroom. Students should already have a grasp of basic online journalism skills through earlier classes or practical experience. The emphasis of the course is on producing high-quality stories both in terms of content and in terms of presentation. Throughout the quarter, students will work as multimedia producers, editors and reporters to create content for thewiredloop.info, a platform for news experimentation.

JOUR 503 or instructor consent is a prerequisite for this course.

JOUR 533
REPORTING THE LAW
Graduate
This course helps students understand the complex issues raised by news coverage of the American legal system with a focus on reporting intelligently and responsibly about the events and issues that arise on the crime and courthouse beats. Students will learn how to interpret court documents, how to identify and cultivate sources on these beats, and ways to find and report the news from events in the legal process. By focusing learning on this specific government branch and sharpening skills on acquiring and deciphering public records, the course will better equip students to fulfill the watchdog role of the press.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 590
JOURNALISM WORKSHOP
Graduate
This course allows students to sample a range of hands on, practical offerings in journalism that can enhance their knowledge and expertise. Workshop topics can include video camera basics, non-linear editing with Final Cut Pro and news page layout and design. PLEASE NOTE THAT THIS IS A 2-CREDIT COURSE. Students can take this course a maximum of two times for a total of 4 credits.

JOUR 592
INDEPENDENT STUDY
Graduate
Students will be guided in the development of a special project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 602
CANDIDACY CONTINUATION
Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans.

Status as a Graduate Journalism student is a prerequisite for this class.

JOUR 532
THE PRESS AND THE PRESIDENCY
Graduate
This course analyzes the historic competition between candidates, the media, and presidential campaigns. It examines how public understanding of political issues, public policy, and the candidates is created. We'll drill down into conditions that lead to a cooperative or adversarial press in campaign reporting and how the public perceives the political process and the role of the press in forming public opinion in presidential campaigns and during presidencies.

Status as a Graduate Journalism student is a prerequisite for this class.
JOUR 534  
TOPICS IN PHOTOJOURNALISM  
Graduate  
This course is a practicum designed to prepare visual journalists for the skills they'll need in a rapidly changing profession. Students will learn about the strategic use of photographs in digital storytelling, including the role of photographs in multimedia production. Students will also understand the ethical obligations faced by today's photojournalist.

Status as a Graduate Journalism student is a prerequisite for this class.

JPN 101  
BASIC JAPANESE I  
Undergraduate  
Listening to, speaking, reading and writing Japanese in a cultural context for the beginning student.

JPN 102  
BASIC JAPANESE II  
Undergraduate  
Continued emphasis on the four skills in culturally-authentic situations. JPN 101 or equivalent, including placement test or permission of instructor, is recommended.

JPN 103  
BASIC JAPANESE III  
Undergraduate  
Further work on the basic elements of the Japanese language, spoken as well as written, with due regard to the cultural context of Japanese expression. JPN 102 or equivalent, including placement test or permission of instructor, is recommended.

JPN 104  
INTERMEDIATE JAPANESE I  
Undergraduate  
Intensive practice in the use of Japanese through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills.

JPN 103 is a prerequisite for this class.

JPN 105  
INTERMEDIATE JAPANESE II  
Undergraduate  
Continuing practice in spoken and written Japanese and further development of reading and listening abilities in an authentic cultural context.

JPN 104 is a prerequisite for this class.

JPN 106  
INTERMEDIATE JAPANESE III  
Undergraduate  
Developing more fluency in speaking, understanding, reading, and writing Japanese with a concomitant heightened awareness of the cultural dimensions of the Japanese language.

JPN 105 is a prerequisite for this class.

JPN 110  
INTENSIVE BASIC JAPANESE I  
Undergraduate  
An intensive introduction to reading, writing, and speaking Japanese in a cultural context for the beginning student. For participants in the DAAAO Program.
JPN 111
INTENSIVE BASIC JAPANESE II
Undergraduate
An intensive introduction to reading, writing, and speaking Japanese in a cultural context for the beginning student; continues JPN 110. For participants in the DAAAO Program.

JPN 301
ADVANCED JAPANESE IV
Undergraduate
Development of fourth year level advanced skills in reading. Students are also expected to develop deeper knowledge of the people, culture and society of Japan (e.g., Japanese education, women's issues, ecology, etc.) through language learning, and to build proficiency to express one's own ideas and opinions effectively. JPN 203 or equivalent recommended.

JPN 302
ADVANCED JAPANESE V
Undergraduate
Development of fourth year level advanced skills in reading. Students are also expected to develop deeper knowledge of the people, culture and society of Japan (e.g., Japanese education, women's issues, ecology, etc.) through language learning, and to build proficiency to express one's own ideas and opinions effectively. JPN 301 or equivalent recommended.

JPN 303
ADVANCED JAPANESE VI
Undergraduate
Development of fourth year level advanced skills in speaking and listening. Students are also expected to develop deeper knowledge of the people, culture and society of Japan (e.g., Japanese education, women's issues, ecology, etc.) through language learning, and to build proficiency to express one's own ideas and opinions effectively. JPN 302 or equivalent recommended.

JPN 304
CONTEMPORARY JAPANESE LITERATURE
Undergraduate
Readings from Tanizaki, Kawabata, Mishima, or other contemporary authors from Showa era to present.

JPN 304 is a prerequisite for this class.

JPN 310
JAPANESE CULTURE
Undergraduate
Discussion of selected cultural topics from different periods with appropriate collateral readings. Formerly Japanese 302.

JPN 310 is a prerequisite for this class.

JPN 311
ADVANCED DISCUSSION AND READING I
Undergraduate
Expanding the knowledge of vocabulary and kanji characters through discussions of current issues in the news and in newspapers and academic writing exercises. Formerly Japanese 300.

JPN 311 is a prerequisite for this class.

JPN 312
ADVANCED DISCUSSION AND READING II
Undergraduate
Developing the formal and academic oral fluency and writing skills through authentic aural and written materials through debates and discussions of current cultural and political issues. Formerly Japanese 301.

JPN 311 is a prerequisite for this class.
**JPN 313**  
**ADVANCED DISCUSSION AND READING III**  
**Undergraduate**  
Focus on the formal expressions and interactions in business and academic settings and extensive reading of authentic materials on modern Japan with an emphasis on essay-writing activities.

JPN 312 is a prerequisite for this class.

---

**JPN 320**  
**ADVANCED COMMERCIAL JAPANESE**  
**Undergraduate**  
Advanced preparation for the use of Japanese in the business world.

JPN 106 is a prerequisite for this class.

---

**JPN 330**  
**INTRODUCTION TO JAPANESE LINGUISTICS**  
**Undergraduate**  
Study of a wide range of topics including Japanese language analysis, dialectal variations, and the history of the Japanese language. Data collection on oral and written texts with related class discussions.

JPN 106 is a prerequisite for this class.

---

**JPN 342**  
**ADVANCED HIGH JAPANESE I**  
**Undergraduate**  
The first course in a sequence of three courses designed for advanced high Japanese learners to practice reading and discussion of authentic cultural, historical, or literary materials. Topics vary with offering: see current schedule for details. Recommended for students who have completed fourth year of Japanese courses (JPN 301 - 303), or have equivalent proficiency in Japanese.

---

**JPN 343**  
**ADVANCED HIGH JAPANESE II**  
**Undergraduate**  
The second course in a sequence of three courses designed for advanced high Japanese learners to practice reading and discussion of authentic cultural, historical, or literary materials. Topics vary with offering: see current schedule for details. Recommended for students who have completed fourth year of Japanese courses (JPN 301 - 303) or have equivalent proficiency in Japanese.

---

**JPN 344**  
**ADVANCED HIGH JAPANESE III**  
**Undergraduate**  
The third course in a sequence of three courses designed for advanced high Japanese learners to practice reading and discussion of authentic cultural, historical, or literary materials. Variable credit. Permission of chair or instructor required.

JZZ 1
JAZZ ENSEMBLE
Undergraduate
(0 credit) Current performance styles for large ensemble; new arrangements and compositions emphasized; performances both on and off campus. Placement audition required. All MEN courses are repeatable courses.

JZZ 2
JAZZ CHAMBER ENSEMBLE
Undergraduate
(0 credit) Study, rehearsal, and performance of literature for jazz chamber groups. All of the MEN courses are repeatable courses.
JZZ 200
JAZZ ENSEMBLE
Undergraduate
(1 credit) Current performance styles for large ensemble; new arrangements and compositions emphasized; performances both on and off campus. All of the MEN courses are repeatable courses.
Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 201
JAZZ CHAMBER ENSEMBLE
Undergraduate
(1 credit) Study, rehearsal, and performance of literature for jazz chamber groups. All of the MEN courses are repeatable courses.
Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 300
ESSENTIALS OF JAZZ I
Undergraduate
(2 credits) Basic and advanced chord constructions in written and keyboard applications.
Status as a Music student is a prerequisite for this class.

JZZ 301
ESSENTIALS OF JAZZ II
Undergraduate
(2 credits) Harmonizing melodies by the use of advanced harmonies and techniques of modern chord substitutions. Developing the ability to "play by ear."
JZZ 300 is a prerequisite for this class.

JZZ 302
ESSENTIALS OF JAZZ III
Undergraduate
(2 credits) Improvisation with particular emphasis on the blues arranging and accompanying techniques; a survey of recent trends in popular music.
JZZ 301 is a prerequisite for this class.

JZZ 303
JAZZ HISTORY AND STYLE
Undergraduate
(2 credits) An intensive study of the periods of jazz, major performers and composers, trends, influences, stylistic features and related materials.
A petition to major is a prerequisite for this class.

JZZ 304
JAZZ ARRANGING I
Undergraduate
(3 credits) Investigation of jazz harmony, and concepts of weight and density in scoring for jazz ensemble, studio orchestra, and jingle writing. A year-long sequence of courses.
JZZ 302 is a prerequisite for this class.
JZZ 305
JAZZ ARRANGING II
Undergraduate
(3 credits) Investigation of jazz harmony, and concepts of weight and density in scoring for jazz ensemble, studio orchestra, and jingle writing. A year-long sequence of courses.

JZZ 304 is a prerequisite for this class.

JZZ 306
JAZZ ARRANGING III
Undergraduate
(3 credits) Investigation of jazz harmony, and concepts of weight and density in scoring for jazz ensemble, studio orchestra, and jingle writing. A year-long sequence of courses.

JZZ 305 is a prerequisite for this class.

JZZ 308
JAZZ IMPROVISATION I
Undergraduate
(2 credits) Techniques of jazz improvisation with an emphasis on basic chord construction and melodic line development.

JZZ 302 is a prerequisite for this class.

JZZ 309
JAZZ IMPROVISATION II
Undergraduate
(2 credits) Techniques of jazz improvisation with an emphasis on basic chord construction and melodic line development.

JZZ 308 is a prerequisite for this class.

JZZ 310
JAZZ IMPROVISATION III
Undergraduate
(2 credits) Techniques of jazz improvisation with an emphasis on basic chord construction and melodic line development.

JZZ 309 is a prerequisite for this class.

JZZ 314
JAZZ PEDAGOGY
Undergraduate
(2 credits) A study of the methods of teaching jazz improvisation arranging, composition, conducting and rhythm section techniques. Can serve as an elective for music education majors.

A petition to major is a prerequisite for this class.

JZZ 315
JAZZ SENIOR RECITAL
Undergraduate
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed in the Senior year. This recital is required as partial fulfillment of the degree of Bachelor of Music in Jazz Studies. COREQUISITE: Students must be registered for 2 or 4 credits of applied lessons during the quarter the recital is presented.

A petition to major is a prerequisite for this class.
JZZ 316
APPLIED JAZZ COMPOSITION
Undergraduate
Private instruction exploring advanced techniques and methods of jazz composition and arranging.
JZZ 306 is a prerequisite for this class.

JZZ 317
APPLIED JAZZ IMPROVISATION
Undergraduate
(2-4 credits) Applied instruction in jazz style and improvisation. The instructor will tailor the content of study to the student and may include fundamentals specific to the instrument.

JZZ 318
JAZZ GUITAR
Undergraduate
(2 or 4 credits) Open only to School of Music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All undergraduate music students may enroll in up to 48 quarter hours of applied study during their undergraduate career. No student may exceed the 48 quarter hour limit.
Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 319
JAZZ PERCUSSION
Undergraduate
(2 or 4 credits) Open only to School of Music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All undergraduate music students may enroll in up to 48 quarter hours of applied study during their undergraduate career. No student may exceed the 48 quarter hour limit.
Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 320
JAZZ PIANO
Undergraduate
(2 or 4 credits) Open only to School of Music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All undergraduate music students may enroll in up to 48 quarter hours of applied study during their undergraduate career. No student may exceed the 48 quarter hour limit.
Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 321
JAZZ SAXOPHONE
Undergraduate
(2 or 4 credits) Open only to School of Music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All undergraduate music students may enroll in up to 48 quarter hours of applied study during their undergraduate career. No student may exceed the 48 quarter hour limit.
Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 322
JAZZ STRING BASS
Undergraduate
(2 or 4 credits) Open only to School of Music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All undergraduate music students may enroll in up to 48 quarter hours of applied study during their undergraduate career. No student may exceed the 48 quarter hour limit.
Status as an Undergraduate Music student is a prerequisite for this class.
JZZ 323
JAZZ TROMBONE
Undergraduate
Open only to School of Music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All undergraduate music students may enroll in up to 48 quarter hours of applied study during their undergraduate career. No student may exceed the 48 quarter hour limit.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 324
JAZZ TRUMPET
Undergraduate
(2 or 4 credits) Open only to School of Music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All undergraduate music students may enroll in up to 48 quarter hours of applied study during their undergraduate career. No student may exceed the 48 quarter hour limit.

Status as an Undergraduate Music student is a prerequisite for this class.

JZZ 325
JAZZ RHYTHM TECHNIQUES
Undergraduate
This course will provide students with information and performance techniques associated with instruments typically orchestrated to form a jazz rhythm, section in jazz chamber or large ensemble settings. Specific topics will include individual instrument roles, performance styles and tempos, and classic rhythm, section analysis.

JZZ 398
INDEPENDENT STUDY
Undergraduate
Status as a Music student is a prerequisite for this class.

JZZ 400
JAZZ ENSEMBLE
Graduate
(1 credit) Current performance styles for large ensemble; new arrangements and compositions are emphasized; performances are presented both on and off campus. Audition required. All MEN courses are repeatable courses.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 401
JAZZ CHAMBER ENSEMBLE
Graduate
(1 credit) Study, rehearsal and performance of literature for jazz chamber groups. All MEN courses are repeatable courses. Placement audition required.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 402
ADVANCED JAZZ COMPOSITION I
Graduate
(4 credits) Composition of works for jazz chamber groups and big bands.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 403
JAZZ ANALYSIS AND APPLICATION
Graduate
(4 credits) Studies of major jazz composers in transcription. Application of styles in compositional projects.

Status as a Graduate Music student is a prerequisite for this class.
JZZ 404
ADVANCED JAZZ COMPOSITION II
Graduate
(4 credits) Advanced topics in jazz composition. Composing for jazz chamber groups and big bands.
JZZ 402 is a prerequisite for this class.

JZZ 405
JAZZ HISTORY
Graduate
This course will be centered around study of the bebop period, which is the foundation of modern jazz. The swing era will be studied, which is the period immediately preceding bebop, to understand the reasons bebop came about. The substyles that developed after the bebop period are called the cool school and the hard bop periods. The reasons theses periods came about will also be discussed. With regard to these periods, significant recordings, musicians, and style development will be discussed.
Status as a Graduate Music student is a prerequisite for this class.

JZZ 406
JAZZ STYLE AND ANALYSIS
Graduate
At the completion of this course, students will demonstrate a theoretical and aural understanding of the process of jazz improvisation, including song forms and structures, chord/scale relationships, chord notation and phrasing; transcribe, analyze, and perform selected solo jazz improvisations by recorded jazz artists; have made two class presentations that will incorporate the student's performance and written analysis of select solo jazz improvisations, and a historical biography of the recorded solo artist. Open to all graduate music students.
Status as a Graduate Music student is a prerequisite for this class.

JZZ 407
JAZZ GRADUATE RECITAL
Graduate
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed during the graduate residence. This recital is required as partial fulfillment of the degree of Master of Music in Jazz Studies. COREQUISITE: Students must be registered for 2 or 4 credits of applied lessons during the quarter the recital is presented.
APM 407 is a prerequisite for this class.

JZZ 408
JAZZ ENSEMBLE
Graduate
(0 credit) Current performance styles for large ensemble; new arrangements and compositions are emphasized; performances are presented both on and off campus. Audition required.
A Jazz Composition concentration is a prerequisite for this class.

JZZ 409
APPLIED JAZZ COMPOSITION
Graduate
Private instruction exploring advanced techniques and methods of jazz composition and arranging.
JZZ 404 is a prerequisite for this class.

JZZ 410
JAZZ COMPOSITION FINAL PROJECT
Graduate
Completion of a 7-10 minute original composition for standard jazz ensemble instrumentation (5 reeds, 4 trumpets, 4 trombones, and rhythm section). This project is required as partial fulfillment of the degree of Masters of Music in Jazz Studies (Composition emphasis only).
JZZ 404 is a prerequisite for this class.
JZZ 411
JAZZ PEDAGOGY
Graduate
(2 credits) A study of the methods of teaching jazz improvisation arranging, composition, conducting and rhythm section techniques. Can serve as an elective for music education majors.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 412
APPLIED JAZZ IMPROVISATION
Graduate
(2-4 credits) Applied instruction in jazz style and improvisation. The instructor will tailor the content of study to the student and may include fundamentals specific to the instrument.

JZZ 413
JAZZ GUITAR
Graduate
(2 or 4 credits) Open only to music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All graduate music students may enroll in up to 24 quarter hours of applied study during their graduate career. No student may exceed the 24 quarter hour limit.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 414
JAZZ PERCUSSION
Graduate
(2 or 4 credits) Open only to music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All graduate music students may enroll in up to 24 quarter hours of applied study during their graduate career. No student may exceed the 24 quarter hour limit.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 415
JAZZ PIANO
Graduate
(2 or 4 credits) Open only to music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All graduate music students may enroll in up to 24 quarter hours of applied study during their graduate career. No student may exceed the 24 quarter hour limit.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 416
JAZZ SAXOPHONE
Graduate
(2 or 4 credits) Open only to music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All graduate music students may enroll in up to 24 quarter hours of applied study during their graduate career. No student may exceed the 24 quarter hour limit.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 417
JAZZ STRING BASS
Graduate
(2 or 4 credits) Open only to music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All graduate music students may enroll in up to 24 quarter hours of applied study during their graduate career. No student may exceed the 24 quarter hour limit.

Status as a Graduate Music student is a prerequisite for this class.
JZZ 418
JAZZ TROMBONE
Graduate
(2 or 4 credits) Open only to music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All graduate music students may enroll in up to 24 quarter hours of applied study during their graduate career. No student may exceed the 24 quarter hour limit.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 419
JAZZ TRUMPET
Graduate
(2 or 4 credits) Open only to music students. Students may not enroll in applied lessons in excess of 4 quarter hours per quarter. All graduate music students may enroll in up to 24 quarter hours of applied study during their graduate career. No student may exceed the 24 quarter hour limit.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 425
JAZZ RHYTHM SECTION TECHNIQUES
Graduate
This course will provide students with information and performance techniques associated with instruments typically orchestrated to form a jazz rhythm, section in jazz chamber or large ensemble settings. Specific topics will include individual instrument roles, performance styles and tempos, and classic rhythm, section analysis.

JZZ 450
JAZZ CHAMBER ENSEMBLE
Graduate
(0 credit) Study, rehearsal, and performance of literature for jazz chamber groups. All of the MEN courses are repeatable courses.

A Jazz Composition concentration is a prerequisite for this class.

JZZ 460
TOPICS IN JAZZ STUDIES
Graduate
(1-4 credits) In depth investigation of a topic in jazz studies.

Status as a Graduate Music student is a prerequisite for this class.

JZZ 498
INDEPENDENT STUDY
Graduate
Independent Study

Status as a Graduate Music student is a prerequisite for this class.

LAT 101
BASIC LATIN I
Undergraduate
Basic Latin I is the first Latin translation course. This course introduces students to the basics of the language of the Romans, which includes the Latin alphabet, pronunciation, the beginnings of Latin grammar and Latin composition.

LAT 102
BASIC LATIN II
Undergraduate
Basic Latin II is the second Latin translation course. Students continue LAT 101 by completing their introduction to Latin grammar. Emphasis is on morphology, complex syntax, English to Latin composition, Latin dictation, reading and translation of longer sections of Latin prose.
LAT 103
BASIC LATIN III
Undergraduate
Basic Latin III is the third Latin translation course. Students continue LAT 102 and refine their knowledge of Latin empirically by reading extended passages from selected classical Latin authors. Emphasis is on morphology, review of syntax and prosody.

LAT 113
LATIN FOR READING IV: INTRODUCTION TO LATIN POETRY
Undergraduate
Latin for Reading IV (Introduction to Latin Poetry) is the fourth Latin translation course. Students concentrate on translation of classical Latin poetic authors, together with a grammatical review, attention is given to prosody and metrics.

LAT 114
LATIN FOR READING V: INTRODUCTION TO LATIN PROSE
Undergraduate
Latin for Reading V (Introduction to Latin Prose) is the fifth Latin translation course. Students concentrate on translating classical Latin prose authors, together with a grammatical review, attention to prosody and rhetorical figures.

LAT 115
LATIN FOR READING VI: LATIN PROSE COMPOSITION
Undergraduate
Latin for Reading VI (Introduction to Latin Composition) is the sixth Latin translation course. Latin to English translation of selected Latin prose authors is balanced with English to Latin translation. Attention to style, idiom and rhetorical figures as a means toward further mastery of Latin reading skills.

LAW 102
BUSINESS ORGANIZATIONS
Professional
(3 hrs) Provides a basic introduction to the modern American business corporation. Major subject areas covered include the steps required for organizing a corporation, the nature of the corporate entity concept, control and management of the corporation, fiduciary duties of directors and controlling shareholders and an introduction to federal securities law and partnership and agency law.

LAW 105
CONTRACTS
Professional
(4 hrs.) Required for JD. Covers offer and acceptance, consideration, remedies, third party beneficiaries, conditions, anticipatory breach, impossibility and frustration, the Statute of Frauds, discharge and illegality. Common law principles and applicable portions of the Uniform Commercial Code are studied.

LAW 112
LEGAL ANALYSIS RESEARCH AND COMMUNICATION I
Professional
(2 hrs) Required for JD. Designed to develop the first-year student’s professional writing skills by involving students in a structured analysis of good and bad legal writing, as well as applying the principles and methods of legal analysis to specific writing tasks. Lectures on research tools, including an explanation of the major legal publications and their uses are also provided. Emphasis is given to research techniques and legal citation form.
LAW 114
LEGAL ANALYSIS RESEARCH AND COMMUNICATIONS TEACHING ASSISTANTS
Professional
(1 or 2 cr. hrs.) LARC TAs will work with LARC instructors to ensure a productive learning environment for students. TAs will work with one instructor for the two-semester LARC course. TAs attend LARC class, hold office hours and conferences with students, conduct research, mark ungraded assignments and perform other related tasks. TAs meet as a group, from time to time, with the LARC Director to ensure consistent delivery of information and advice to students. Permission required.

LAW 115
LEGAL ANALYSIS RESEARCH AND COMMUNICATIONS III
Professional
(3 hrs) Builds upon the analysis, research and communication skills established in the first-year required classes. Focuses on appellate brief writing and oral advocacy skills.

LAW 119 and LAW 119 is a prerequisite for this class.

LAW 119
LEGAL ANALYSIS RESEARCH AND COMMUNICATIONS II
Professional
(3 hrs) Required for J.D. Lecture on legal research skills, primary legal publications, research techniques, and legal citation form.

LAW 112 is a prerequisite for this class.

LAW 120
CIVIL PROCEDURE
Professional
(4 hrs) Required for J.D. A basic survey of the fundamental principles which control the allocation and use of judicial power in the American legal system. The principle areas of inquiry include subject matter jurisdiction, personal jurisdiction, phases of a law suit, problems of diversity jurisdiction and former adjudication.

LAW 140
CONSTITUTIONAL PROCESS
Professional
(4 cr.) Required for J.D students. This course analyzes the judicial process in constitutional law cases, focusing primarily upon the decisions of the United States Supreme Court. Emphasis is given to the nature of judicial review, the distribution of governmental power in our federal system, and the Fourteenth Amendment. Topics include the separation of powers, the federal and state commerce authority, implied fundamental rights, and equal protection of law.

LAW 160
PROPERTY
Professional
(4 hrs) Required for J.D. Basic concepts of the law of property are covered through a survey of the holding of wealth and transactions in the family and commercial context, with the attendant public policy limitations on owner control. Specific topics include: concepts of ownership and possession; the divisibility of title; present and future interests; bailments; the landlord-tenant relation; interests in the land of another; recording; gifts; contracts of sale; land financing; public and private control of land use.

LAW 170
TORT LAW
Professional
(4 hrs) Required for J.D. Provides an introduction to the basic theories underlying the American common law system of compensation for injuries to person and property. The major topics covered are intentional torts, negligence, strict liability and damages.

LAW 201
ILLINOIS CIVIL PROCEDURE
Professional
(3 hrs) An analysis of the Illinois Civil Practice Act and the rules of the Illinois Supreme Court which apply to litigation, emphasizing the Circuit Court of Cook County.
LAW 202
EMPLOYMENT DISCRIMINATION
Professional
(3 credit hours)  This course covers the most important Federal laws dealing with discrimination in employment and emphasizes Title VII of the Civil Rights Act of 1964. The course is designed to develop an understanding and recognition of racism and sexism in the context of employment.

LAW 140 is a prerequisite for this class.

LAW 204
LAW REVIEW
Professional
Members of the editorial board must enroll for credit. Students perform editorial tasks assigned by the editor-in-chief. Evaluation is pass/fail. 3 credit hours per semester for a maximum of 2 semesters. Instructor's permission required.

Status as a JD student is a prerequisite for this class.

LAW 206
SEXUAL ORIENTATION AND THE LAW
Professional
3 credit hours. An examination of the legal issues raised by sexual orientation. Beginning with prosecution of sodomy and legal discrimination, including exclusion from military service, and anti-civil rights initiatives. The struggle for gay lesbian rights will be examined in the context of employment, schools, and domestic relations.

LAW 208
HUMAN RIGHTS PRACTICUM: CHIAPAS
Professional
(2 hr)  A 3 week program for functional Spanish speaking students in Mexico where students develop their "legal" Spanish and learn about the inter-American and Mexican legal systems.

LAW 210
FEDERAL INCOME TAXATION
Professional
(3 hrs)  Required for Certificate in Taxation unless student takes LAW 212. Provides a study of tax law as it relates to the individual. Emphasis is placed on statutory materials, regulations, rulings and judicial decisions. Special consideration is given to the concept of gross income, adjusted gross income, deductions and gains.

LAW 212
FEDERAL INCOME TAXATION AND FEDERAL POLICY
Professional
(4 hrs)  Required for Certificate in Taxation unless student takes LAW 210. Examines economic and government policy context out of which tax laws arise and ethical issues in tax practice as well as substantive tax law. Designed for those who have never studied taxation. Examines how Congress uses its revenue power to shape the economy as a whole and to implement its philosophy of taxation.

LAW 213
DOMESTIC VIOLENCE
Professional
(3 hrs)  This course will examine the criminal system response to domestic violence, focusing on the transformation of laws and institutions to address a problem historically conceptualized as "private." Topics will include: barriers to victim cooperation and law enforcement; law and policies governing mandatory arrest and prosecution; marital rape; battering during pregnancy; battered women who kill; expert testimony on battered woman syndrome; child protection concerns; evidentiary issues arising in domestic violence trials; anti-stalking legislation; civil/criminal protective order practice; and recent US Supreme Court decisions impacting domestic violence.

LAW 217
JOURNAL FOR SOCIAL JUSTICE
Professional
The Journal for Social Justice will address areas of public interest. Members of the editorial board must enroll in this course for credit. Students enrolled are expected to perform editorial tasks. Evaluation of student work is pass/fail. 2 credit hours
LAW 218
TAXATION OF STRUCTURED REAL ESTATE TRANSACTIONS
Professional
This course will provide an introductory overview of the primary tax considerations involved in structured real estate transactions, including: an analysis of the effect of income taxes on real estate transactions; a comparison of the various structures used for the ownership and development of real estate; a review of section 1031 like-kind exchange driven real estate syndications; alternative financing techniques such as sale-leaseback transactions; REIT; and inbound and outbound real estate investments.

LAW 220
ADVANCED CIVIL PROCEDURE
Professional
This course will explore topics beyond the introductory civil procedure course including class actions, mass torts, multi-party litigation and other problems associated with complex litigation. 3 credit hours

LAW 225
ADVANCED ISSUES IN REAL ESTATE TRANSACTIONS
Professional
(3 credit hours) This course will cover advanced residential and commercial real estate theory and practice. Special emphasis will be placed on legal and business issues affecting building design and construction; condominium development and conversion; property management; distressed sales, loans, and workouts; negotiation of sales and leases in a difficult market; green leases and construction; and advanced tax saving devices, such as preservation through conservation easements and section 1031 Exchanges of real estate property.

LAW 230
UNITED STATES FOREIGN RELATIONS LAW
Professional
(3 cr. hr.) This course will provide an overview of the extensive body of law that regulates the authority of the federal government in the areas of foreign affairs and the making of foreign policy. This body of law includes the US Constitution, congressional statutes, key executive orders, federal court decisions, and applicable rules deriving from treaties and customary international law. The course examines in detail the interaction of the Constitution with the foreign policy powers of the Congress and the President, and the ways in which doctrines of the separation of powers have shaped the allotment of legal authority in US foreign relations among the three branches of government.

LAW 232
CATHOLIC SOCIAL JUSTICE & THE LAW
Professional
(2 cr. hrs) This course introduces students to the foundation and structure of Catholic Social Teachings and asks: how (if at all) is this relevant to American legal theory, practice and public discourse? Topics considered will include, among others: economic justice, natural law, religious freedom, death penalty, war, abortion and gay marriage. At the conclusion, students will have a greater knowledge and understanding of the Catholic social ethical system and increased abilities to communicate, apply and critique other theories and institutions of social justice.

LAW 236
JOURNAL OF SPORTS LAW AND CONTEMPORARY PROBLEMS
Professional
The Journal of Sports Law and Contemporary Problems will address issues regarding athletes, student-athletes and the overall climate in professional and amateur sports. The Journal will endeavor into matters of sports and culture, sports and society, sports and academics and sports and the law.

LAW 245
REPRESENTING THE PROFESSIONAL ATHLETE
Professional
(3 credit) This class examines issues specific to the sports-client management industry, covering a variety of practical issues pertinent to sports-client management and the sports industry. Current events having to do with sports law will be worked into the course.
LAW 247
PUBLIC INTERNATIONAL AVIATION LAW & POLICY
Professional
(3 credits) This course will explore the laws, regulations, and policy choices affecting the complex world of global air transport. The course will consider topics relating to aviation safety and security, capital investment, labor relations, airport ownership and operations, economic regulation. Assessment will be by a take home final examination.

LAW 248
PRIVATE INTERNATIONAL AVIATION LAW
Professional
(3 credit hours) This course will examine the international legal regime that governs air carrier liability and the unification of private international aviation law through the adoption of international conventions. The course will review liabilities of air carriers toward passengers and shippers under the Warsaw Convention and the Montreal Convention, and will examine the basic framework the Rome Convention on third-party surface liability, and two treaties promulgated to replace the Rome Convention: the Unlawful Interference Convention and the Ground Damage Convention. Manufacturers’ liability will also be reviewed, as will the international regime for aircraft financing established by the Cape Town Convention/Aircraft Protocol.

LAW 250
SENIOR RESEARCH SEMINAR
Professional
(3 hrs) Required for JD. The student must write an in-depth paper of Law Review quality on a topic of the professor’s choosing.

LAW 251
DEATH PENALTY DEFENSE PRACTICUM
Professional
(3 credit hours) The Death Penalty Defense Practicum is essentially will be a hybrid course. Students can register for it as a clinic or as their senior writing requirement. Students will work with Professor Lyon to provide resources to capitaly charged individuals and their counsel without actually taking on the direct representation of those individuals in other states such as Georgia, Texas, Alabama and Arizona. This four credit course will teach basic death penalty law and we accept requests from capital defenders to do research and writing that they need help with. This might take the form of an amicus brief, a motion and memorandum of law, a thorough examination of the literature in a forensic area and the like. Some direct representation may be done by the clinic, and so the opportunity to do investigation, and appear in court will also be available.

LAW 252
BAR PASSAGE STRATEGIES
Professional
2 credit hours. This course will address techniques for answering questions on bar examinations, which differ significantly from law school finals. Students will practice writing answers for each bar exam component (essay, multiple choice and performance) and receive feedback in writing and in individual conferences.

LAW 260
INTERNATIONAL LAW THESIS
Professional
(6 credits) The Thesis is an independent research project on a topic of international law and/or policy under the supervision of a full-time faculty member. The student must produce an in-depth paper of publishable quality, 55-90 pages in length.

LAW 271
TRADEMARK & UNFAIR COMPETITION LAW
Professional
(2 credits) This course will be a substantive and procedural discussion of the creation and enforcement of trademark rights and the rights conferred by statutory and common law under the general rubric of unfair competition law. Topics may include trademark law (including dilution), misappropriation of trade values and trade secrets, regulation of false and deceptive advertising, interference with contracts and trade relations and the right of publicity.
LAW 275
NATURAL RESOURCES LAW
Professional
(3 cr. hr.) This course explores the different ownership, allocation, and management regimes for different types of natural resources. The course focuses on the property law principles that underpin each of the different natural resource regimes and how federal, state, and private priorities shape and "distort" the regimes. Numerous natural resources are examined including water, wildlife, forests, fisheries, and mining.

LAW 290
ANATOMY OF A DEAL: FROM INCEPTION TO CLOSING
Professional
(2 credit hours) This course will provide law students with skills they will need as entry-level transactional lawyers. The focus will be on how to perform due diligence and how to draft resolutions, corporate documents, various closing documents and third-party opinion letters. Students will also study sample agreements that appear in many different types of deals, including commitment papers, indemnities, guaranties, escrows, pledge agreements, and security agreements.

LAW 102 and LAW 105 are a prerequisite for this class.

LAW 300
CORPORATE FINANCE
Professional
(3 hrs) Provides a basic analysis of corporate capital structures, dividends and retained earnings, federal policies promoting disclosure and prohibiting fraud and mergers and acquisitions.

LAW 102 is a prerequisite for this class.

LAW 301
SPECIAL TOPICS IN LAW
Professional
(1 hr) This course is a "mini-course" which is taught either one hour a day for two weeks each year or once a week for 5 weeks. The topic changes.

LAW 303
BUSINESS AND COMMERCIAL LAW JOURNAL
Professional
Members of the editorial board must enroll in this course for credit. Students enrolled are expected to perform editorial tasks assigned by the editor-in-chief. Evaluation of student work is pass/fail. 3 credit hours

LAW 304
SALES
Professional
(3 hrs) A survey of the law of sales (principally Article Two of the Uniform Commercial Code) and related Uniform Commercial Code provisions. Emphasis is placed on core concepts, including warranty, buyer and seller remedies and risk of loss.

LAW 305
SECURED TRANSACTIONS
Professional
(3 hrs) Covers the law of personal property security (principally Articles Nine and Seven of the Uniform Commercial Code) and consumer financing arrangements. Emphasis is given to transactional planning of consumer, equipment, inventory, accounts and warehouse financing arrangements, and the priorities of conflicting legal interests. Provisions of the Federal Consumer Credit Code, usury laws and the Fair Credit Reporting Act are discussed.

LAW 308
WILLS AND TRUSTS
Professional
(3 hrs) A study of trusts, wills and fiduciary administration, including laws of succession, will revocation, trust powers and problems of testamentary and inter vivos gratuitous transfers.
LAW 310
COMMERCIAL PAPER
Professional
(3 hrs) Focuses on the law of negotiable instruments (principally Articles Three and Four of the Uniform Commercial Code). Emphasis is placed on negotiability, transfer, the legal effect of endorsement, holder in due course doctrine, real and personal defenses, forgery.

LAW 311
WORKOUTS & RESTRUCTURING/FINANCIAL TROUBLED COMPANIES
Professional
(3 credits) This course will examine a pre-bankruptcy corporate restructuring from the viewpoint of each of the principal parties to that workout and will examine the legal and business issues commonly faced by each party. Students will develop an understanding of the legal rights available to each party and the strategies often employed by parties with competing interests when a company is in financial distress.

LAW 312
TRIAL ADVOCACY II
Professional
(3 hrs) Covers advanced exercises in the mechanics of trial and trial preparation. Students develop case plans and proof analyses consistent with the theory of the case. During the trial of several simulated cases including a jury trial, students address such complex trial problems as: evidence retrieval in complex litigation, examination of medical and forensic expert witnesses, argument of motions during trial, impeachment, and instructions conferences. Students conduct detailed witness preparation exercises and voir dire. There is review of litigation technology and use of videotaping of student performances.

LAW 410 and LAW 450 are a prerequisite for this class.

LAW 313
CRIMINAL JUVENILE JUSTICE
Professional
(3 hrs) This course will deal with the legal processes for dealing with juvenile crimes and status offenses.

LAW 315
FEDERAL HABEAS CORPUS PRACTICE AND PROCEDURE
Professional
This class explores the history and application of the writ of habeas corpus. The AGreat Writ@ came to our country by way of English Common Law, and is given explicit recognition in the United States Constitution. It remains a protection for individual rights in criminal cases. Because habeas corpus petitions constitute a significant portion of the caseload of district courts, this course may be of interest to students pursuing federal clerkship opportunities.

LAW 319
LITIGATION STRATEGY: PRE-TRIAL, CRIMINAL
Professional
(3 hrs) Offers comprehensive treatment of the key problems encountered in the pretrial stages of the criminal case, including fact investigation, motions to suppress evidence, plea negotiations, preliminary hearings, arraignment, and pretrial conferences. Students conduct simulated pretrial motions, client interviews, fact investigations, counseling, negotiating and settlement sessions. Simulated depositions and motions are argued, as well as simulated pretrial conferences, are conducted during class.

LAW 410 and LAW 518 are a prerequisite for this class.

LAW 321
ADOPTION LAW
Professional
This course will explore issues related to adoption law. The course content will include the historical background of the American law of adoption, adoption procedure, parental consent to adoption, voluntary and involuntary termination of parental rights, choosing adoptive families, the Indian Child Welfare Act, race and sexual orientation issues in adoption, international and interstate adoption, and wrongful adoptions.
LAW 323
CHILD PROTECTION: ABUSE & NEGLECT
Professional
(3 credits) This course deals with the legal processes for dealing with child abuse and neglect.

LAW 326
FINANCIAL REGULATION IN THE WAKE OF THE CRISIS
Professional
(3 cr. hr.) This course will examine structural challenges to the stability of the U.S. economy that surfaced in the wake of the financial crisis and potential methods of dealing with these issues through federal regulation. It will introduce students to such economic concepts as accounting, capital markets, risk, derivatives, hedge funds, and securitization and explain the catastrophic consequences of the interaction between these elements during 2007-2009. We will then discuss both existing tools for preventing the recurrence of economic disasters and proposed alternatives. No prior knowledge of economics or finance will be assumed.

LAW 327
PRISON LAW
Professional
(3 credits) This course serves as an introduction to prison law and prisoner rights law. The course explores prison management issues, the Prison Litigation Reform Act and the application of the First and Eighth Amendments to prisons. Students will also visit a prison as part of the course.

LAW 329
LEGAL CLINIC III
Professional
(3 hrs) This course will offer a select number of students a leadership role within Legal Clinic I and Legal Clinic II. Responsibilities will be based on experience and activities will include involvement in litigation. Students will work under the supervision of licensed attorneys. Permission Required. Graded.

LAW 330
EMERGENCY RELIEF & EQUITABLE REMEDIES
Professional
(2 credit hours) Covers the mechanics of how to brief and argue requests for temporary restraining orders, injunctions, stays, bonds, and other equitable remedies. The course will discuss litigation strategy from both the plaintiff and defendant perspective, and will provide experience in drafting briefs and orally arguing a hypothetical case. Finally, the class will discuss options with respect to appellate review.

LAW 120 and LAW 170 are a prerequisite for this class.

LAW 333
MUSIC LAW
Professional
(3 hrs.) This course deals with issues relating to the organization and operation of the music industry. The course covers the principal statutes governing the industry and considers issues relating to the interests of both artists and recording companies.

LAW 334
SOLO & SMALL PRACTICE
Professional
(3 cr. hr.) This is a skills course designed to teach students how to build their own law practice.

LAW 336
JOURNAL OF ART TECHNOLOGY & INTELLECTUAL PROPERTY EDITORIAL BOARD
Professional
(2 hrs) Members of the editorial board must enroll in this course for credit. Students enrolled are expected to perform editorial tasks assigned by the editor-in-chief and are expected to supervise the student writing staff. Pass/fail only.
LAW 337
BIOTECHNOLOGY PATENT STRATEGIES FOR THE NEW MILLENNIUM
Professional
(3 hrs) Designed for students with an interest in the biotechnology aspect of patent law. Covers enablement, utility, claim drafting, means plus function language, obviousness, and the patentability of nucleic acid sequence and expressed sequence stages.

LAW 338
INTELLECTUAL PROPERTY FOR CORPORATE TRANSACTIONAL LAWYERS
Professional
(3 hrs) For students interested primarily in a corporate practice. Focuses on issues a corporate practitioner should be aware of regarding transactions involving the transfer of intellectual property assets or technology, such as the sale and licensing of intellectual property generally, licensing software, Internet law, advertising clearance and litigation.

LAW 105 is a prerequisite for this class.

LAW 341
CYBERLAW
Professional
3 credit hours. This course provides a survey of selected topics in the rapidly evolving area of law applied to cyberspace and the internet. The course touches upon numerous areas of substantive law such as intellectual property, torts, jurisdiction, and privacy and the First Amendment, explores how courts have applied the law to the internet, and raises the important policy questions underlying the application of law to this new medium.

LAW 344
COPYRIGHT LAW
Professional
This course will provide an in-depth study of the theory and application of copyright law. Subjects include copyright history and theory, the Digital Millennium Copyright Act, renewal and reversion, ownership issues, and a study of the interface between the economic aspects of copyright and the personal interests of authors.

LAW 345
LEGAL CLINIC SUMMER
Professional
(3 credit hrs) Students work in one of the clinic modules under the supervision of a clinical attorney concentrating on real life problems with real clients and organizations. Instructor's permission required.

LAW 348
MERGERS AND ACQUISITIONS
Professional
(3 hrs) Aspects of business entities involved in a merger, consolidation, acquisition and other forms of combination. Examines business, financial, personal and real property, employment relations, labor, taxation, and environmental issues. Also analyzes the tax consequences of the particular form of combination.

LAW 102 is a prerequisite for this class.

LAW 349
INTERNATIONAL TRADE LAW
Professional
(3 hrs) An introduction to the regulatory structure of global economic relations, focusing on the theoretical and substantive foundations of multilateral systems such as the IMF, GATT, NAFTA and the European common market. The course also analyzes the legal and constitutional framework for the treatment of international trade questions in the US, the European Union and Japan, and explores how this framework accommodates selected issues of global trade policy.
LAW 352
LAW OF FILM AND TV PRODUCTION AND DISTRIBUTION
Professional
(3 credit hours) This course will take students through the principal steps of actual production and distribution of Film and Television properties and will examine the legal issues presented at each stage of production and distribution. In addition to the prerequisites, Entertainment Law (357) or Music Law (333) are recommended prior to registration in this class.

LAW 102, LAW 271 and LAW 344 are a prerequisite for this class.

LAW 356
DISPUTE RESOLUTION
Professional
(3 hrs) Gives students the means to evaluate critically dispute resolution processes as a basis for counseling clients in the selection of and participation in a process appropriate for the resolution of a particular dispute. Students, who are divided into teams, alternate the roles of attorney and client, attempt to resolve a complex civil case utilizing three dispute resolution processes: pre-trial conference, mediation and arbitration. Each team works with two associates from a financial consulting or an accounting firm who are their expert witnesses to prepare for and participate in these processes. Lawyers, professional mediators and professional arbitrators act as the neutrals in the three processes. From year to year, different substantive areas are the focus of the problem, and Intellectual Property is one of the problems.

LAW 357
ENTERTAINMENT LAW
Professional
(3 hrs) Focuses on various aspects of entertainment law practice including performance contracts, managers and agents, recording and publishing agreements and music licensing.

LAW 358
EMPLOYEE BENEFITS
Professional
(3 hrs) Employee Benefits covers the creation and operation of retirement plans under the Employment Retirement Income Security Act of 1974 (ERISA) as well as medical and other welfare benefit plans for employees.

LAW 359
INDIVIDUAL EMPLOYMENT RIGHTS
Professional
(3 hrs) Examines issues in workplaces that are not governed by collective bargaining, such as hiring, wrongful termination, workplace privacy and defamation, protection against harassment, employees' legal obligations to employers.

LAW 361
ECONOMIC JUSTICE, IDENTITIES & MARKETS
Professional
This course will explore how the law and the marketplace create and preserve economic inequality according to race, gender, sexual orientation, and other identity categories while maintaining a stance of 'neutrality.' The class will critically analyze the inter-relatedness of law, markets, and identity using frame-works from classic market theory, law and economics, critical race theory, feminist legal theory, 'queer theory,' and critical legal studies. The course objective is to provide critical analytic skills to students to develop contemporary critiques of classic market and legal structures for the purpose of aiding subordinated communities in the pursuit of economic justice. By so doing, students should be able to negotiate more effectively, the societal tension between 'efficiency' and 'equality' in the law and in the marketplace. The course and casebook are designed to provide materials for students and teachers do not have formal training of economics, but who are interested in cross-cutting issues of discrimination and unequal wealth that results from the history of cumulative and synergistic discrimination. 3 credit hours

LAW 363
RESTORATIVE JUSTICE
Professional
(3 cr. hr.) This is a skills course designed to teach restorative justice techniques including circles, victim-perpetrator conferences, and peer juries. Readings, simulations, and practice during class will prepare students to actually lead restorative justice circles in selected cases in the Domestic Relations Division of the Circuit Court of Cook County.
LAW 364  
HOUSING SEGREGATION & INTEGRATION  
Professional  
(3 hrs.) This course examines the legal underpinnings of the systems that have segregated communities, and asks what legal mechanisms might be used to reverse the trends and build integration. Both the significant federal case law reinforcing the nation's commitment to safe, decent and affordable housing to all, and an examination of the policy and research work that advocates and scholars have used will be reviewed. The coursework is national in focus but leans on the history of Chicago.

LAW 366  
ADVANCED ISSUES IN DIVORCE PRACTICE  
Professional  
This course covers advanced financial issues including pensions, contingent stock options, property transmutation as well as more complicated considerations of child custody and support in both interstate and international contexts. The course covers substantive law and engages the students in a practical application of the law such as a negotiation or a drafting exercise. At the instructor's option, all students will be required to complete a service learning component working in the field, which typically must be performed during business hours.

LAW 367  
ANIMAL LAW  
Professional  
This course will offer a comprehensive examination of the rights afforded to animals as well as a look at the application and enforcement of those rights. Topics will include a history of animal rights, legislation, case law, ethics, lobbying and a discussion of issues confronting major lobbying and activist organizations. Constitutional, land use planning, international and environmental law issues will also be presented. The course will be taught through lecture and extensive class discussion including case and regulation analysis. 3 credit hours

LAW 368  
COLLECTIVE BARGAINING PROCESS  
Professional  
(3 credits) The primary thrust of the course will be to provide an understanding from both the union and employer points of view, of collective bargaining and how the process operates to produce an agreement, encompassing the wages, terms and conditions of employment.

LAW 369  
LITIGATION LAB  
Professional  
(3 cr.) The course is a practicum in which students will work with practitioners on actual cases, under the supervision of the instructor. The Lab is designed to expose and involve students in the planning and development of various aspects of litigation practice in sophisticated cases. LAW 410 is a prerequisite for this class.

LAW 371  
LAW & CLIMATE CHANGE  
Professional  
(3 credit hours) This course will address domestic and international responses to the effects of climate change. It will focus on domestic efforts to regulate climate change-inducing technologies and on international approaches to funding, developing, transferring and disseminating mitigation and adaption technologies.

LAW 444 or LAW 447 or LAW 344 or LAW 271 or LAW 489 is a prerequisite for this class.

LAW 372  
VOTING RIGHTS  
Professional  
(3 hrs) This course will explore the intersection of law and the political process. Topics covered may include campaign finance law, redistricting, racial and partisan gerrymandering, ballot access laws, the Voting Rights Act of 1965, modern barriers to voting, and the regulation of political parties.
LAW 375  
ARBITRATION OF INTERNATIONAL COMMERCIAL DISPUTES  
Professional  
3 credit hours. This course is designed to teach students the necessary skills to become effective advocates in the international arbitration process. The course analyzes international arbitration and the substantive law of the international sales of goods. At the end of this course students will have the opportunity to compete for a position on teams representing the College of Law at the Vis International Competitions held each spring in Vienna or Hong Kong.

LAW 380  
THE BUSINESS OF LAWYERING  
Professional  
(1 credit) This course will address topics bearing on the business aspects of the practice of law including the economics of practice, establishing an office, client development, hiring support staff, affiliating with other lawyers, etc. It will be taught in Los Angeles, California over spring break. There will be an administrative fee of $500 to cover books and program costs. Students will be responsible for their own transportation and housing.

LAW 401  
ADVANCED ANTITRUST  
Professional  
(3 hrs) Deals in depth with several areas not covered by the basic course in antitrust: mergers and joint ventures; the Robinson-Patman Act; international antitrust; and the relationship between patent and copyright, on the one hand, and the antitrust laws, on the other. Students are provided with problems from current antitrust cases in these areas and are asked to analyze and argue these problems in class. 3 credit hours. LAW 402 is a prerequisite for this class.

LAW 402  
ANTITRUST  
Professional  
(3 hrs) Studies the basic federal antitrust statutes which proscribe monopolization, conspiracies to restrain trade, and mergers that unduly tend to concentrate markets. This course also entails a working knowledge of American economic history, familiarity with simple rules of applied microeconomics, and a grasp of strategic commercial behavior.

LAW 403  
FORENSIC EVIDENCE  
Professional  
(3 hrs) An examination of the technical and legal aspects of scientific aids in the trial of civil and criminal cases. Demonstrations by scientific experts are used to provide the students with concrete knowledge of the problems involved. LAW 410 is a prerequisite for this class.

LAW 407  
CONFLICT OF LAWS  
Professional  
(3 hrs) Studies the major methodologies and frameworks for the resolution of choice of law problems and jurisdictional conflicts within the federal system.

LAW 408  
ESTATE AND GIFT TAXATION  
Professional  
(3 hrs) Required for Certificate in Taxation. Deals with the effect of federal estate and gift taxes on transfers made during life and at death. The gift tax sections of the Internal Revenue Code and the marital deduction are studied in detail.
LAW 409
ESTATE PLANNING
Professional
(3 hrs) Concerned with planning for the transfer of property to younger generations and to charities. Focuses on the techniques for reducing income, estate and gift taxation.

LAW 210 or LAW 212 is a prerequisite for this class.

LAW 410
EVIDENCE
Professional
(3 hrs) A survey of the rules governing the presentation, admission and exclusion of facts in civil and criminal judicial proceedings, including rules of competency, relevancy, privilege and hearsay.

LAW 411
GUIDED RESEARCH
Professional
(1-2 hrs) Students who have earned at least a 2.0 g.p.a. after the completion of at least 31 credit hours may engage in assigned research under the direction and supervision of a full-time faculty member. Graded pass/fail.

LAW 412
FEDERAL COURTS
Professional
(3 hrs) Studies the problems, conflicts and accommodations in jurisdiction, procedure and review peculiar to the dual system of federal and state courts.

LAW 140 is a prerequisite for this class.

LAW 415
BANKRUPTCY
Professional
(3 hrs) A survey of the Federal Bankruptcy Code, including the trustee's power of avoidance, Chapter 13, debtor's right to discharge, federal tax liens and priorities.

LAW 417
LABOR LAW
Professional
This course addresses the common law and federal statutes applicable to private sector labor-management relations with an emphasis on organizational matters and negotiations. The course contains the following aspects: statutory interpretation, policy concerns, appropriate practical strategies for both labor and management, social issues and values, ethical issues, advocacy skills, administrative law, critical analysis of decisions, remedies and the relationship of federal labor law to other laws.

LAW 419
LITIGATION STRATEGY: PRE-TRIAL, CIVIL
Professional
(3 hrs) Offers a comprehensive treatment of the key problems encountered in the pretrial stages of civil litigation, including drafting of the complaint, case planning, interrogatories and other written discovery and pretrial orders. Students conduct simulated pretrial motions, client interviews, fact investigations, counseling, negotiating, and settlement sessions. Simulated depositions and motions argument, as well as simulated pretrial conferences, are conducted during class session.

LAW 410 is a prerequisite for this class.
LAW 420
REAL ESTATE TRANSACTIONS
Professional
(3 hrs) Explores the basic concepts and documents involved in the inter vivos transfer, financing, development and use of real property. Topics covered include brokers’ agreements, condominiums, title assurance, land trusts and closings.

LAW 160 is a prerequisite for this class.

LAW 422
PUBLIC INTERNATIONAL LAW
Professional
(3 hrs) Covers the general principles of international relations, including such topics as what is a state, the elements of state responsibility, jurisdiction and nationality, the Law of War, the United Nations and certain international organizations.

LAW 423
REMEDIES
Professional
(3 hrs) Studies the interplay and choice of remedies (legal and equitable) available in the principal types of contract and tort actions. Damages, the object of an award in contract and in tort, limitations on recovery, the elements of damages, specific performance of contracts, specific relief in tort, injunctions and the specific limitations on their availability, restitution, constructive trusts and equitable liens are included.

LAW 427
APPELLATE TECHNIQUE
Professional
(3 hrs) Teaches both substantive law relating to appellate practice as well as skills training in appellate advocacy, focusing on: the ability to effectively analyze legal problems, efficiently perform legal research, collect and sort facts, write effectively and orally communicate effectively and persuasively.

LAW 428
INDEPENDENT STUDY
Professional
(3 hrs) Students who have earned at least a 3.00 g.p.a. after completion of at least 40 credits may undertake independent study under the supervision of a full-time faculty member. The student must produce an indepth research paper of publishable quality not substantially covered by a currently offered course. Fulfills the Seminar requirements. Instructor's permission required.

LAW 429
LEGAL CLINIC I
Professional
(3-6 hrs) Students work in one of the clinic modules under the supervision of a clinical attorney concentrating on real life problems with real clients and organizations. Instructor's permission required.

LAW 432
SECURITIES REGULATION
Professional
(3 hrs) Deals with federal and state regulation of the distribution and transaction of investment securities. Problems related to the nature and extent of investor protection under securities legislation are studied.

LAW 102 is a prerequisite for this class.

LAW 434
PUBLIC HEALTH LAW
Professional
An examination of past and present aspects of the law concerning the health of the public by identifying the various government entities involved and reviewing specific areas of public health policy law, common law and regulation. Examines the federal basis for public health regulation, the state and local government basis for regulation, the constitutional and statutory limitations, and current problems which require legal responses. 3 credit hours.
If a student is selected to be an editor of the Journal, the student may enroll for two units of credit per semester up to a total of six units of credit. A student is expected to work for four semesters on the publication, but may enroll for credit in any three of the four semesters in which he or she works on the Journal. 2 credit hours per semester. Pass/fail only.

**LAW 438**
**MEDIATION**
Professional
(3 hrs) Designed for students who seek to understand the application of the zealous representation standard within the mediation process. The course provides students with a basis to evaluate critically when and how to represent clients in mediation. They experience the mediation process through classroom simulations as mediators, attorneys and clients. Through simulated teaching methodology, students focus on effective advocacy in mediation.

**LAW 440**
**ADVANCED MEDIATION**
Professional
(3 credits) This course builds on the skills learned through the simulated experiences of the basic Mediation course. The course includes three components: specialized training, class sessions and the representation of pro se clients in the mediation of commercial cases or the mediation of small claims cases. Student representation in the spring semester will occur in commercial cases referred from judges in the Law Division of the Circuit Court of Cook County, Illinois. The representation is limited to the mediation phase of these cases. A 711 license is required and students work under the supervision of the instructor. In the fall semester students will serve as the Mediator in small claims cases in the Circuit Court of Cook County, Illinois under the supervision of the Center for Conflict Resolution.

**LAW 436**
JOURNAL OF HEALTH CARE LAW EDITORIAL BOARD
Professional

**LAW 441**
**SPORTS LAW**
Professional
(3 hrs) A study of the application of various legal doctrines to a broad range of sports-related activities. The course focuses upon many of the legal issues arising in professional sports, including the impact of the antitrust and labor laws and representation of the professional athlete.

**LAW 444**
**ENVIRONMENTAL LAW**
Professional
(3 hrs) A survey of federal and state remedies for the protection of the environment.

**LAW 445**
**STATE AND LOCAL GOVERNMENT LAW**
Professional
(3 credit hrs) Analyzes the legal principles which determine the role that the local government unit plays in the American system of government. Powers of local government to regulate the activities of the individual are discussed in detail.

**LAW 447**
**PATENT LAW**
Professional
This course is designed for two types of students: (1) those who intend to practice in the area of patent law specifically; and (2) those who plan to enter into a generalized intellectual property practice. Students explore concepts and selected problems in patent law and examine the impact of policy considerations on patent statutes and jurisdictions. The course covers all substantive aspects of patent law, including patentable subject matter; patent disclosure requirements; patentability requirements; infringement - both literal and under the doctrine of equivalents; defenses; and remedies.
LAW 448
INTERNATIONAL BUSINESS TRANSACTIONS
Professional
(3 hrs) Examines the foreign law aspects of establishing American business abroad, including international investment and finance relations, and problems posed by treaty, convention and trade practice between the United States and foreign countries.

LAW 102 is a prerequisite for this class.

LAW 449
PREDATORY LENDING
Professional
(3 hrs) This course will examine the origins and dimensions of predatory lending, defined as mortgage loan origination fraud and foreclosure rescue fraud. Emphasis will be given to the development of the sub-prime mortgage market, facets of predatory lending and various methods to curb it. This course will include background lectures and discussion, case study and analysis, and written and oral advocacy exercises related to actual cases.

LAW 450
TRIAL ADVOCACY I
Professional
(3 hrs) Examines fundamental trial techniques. Students are expected to perform simulated courtroom exercises in voir dire, opening statements, direct and cross-examination, introduction of exhibits, closing arguments, objections and trial motions. Students are also required to prepare trial books and exhibits and to participate in a simulated bench trial.

LAW 410 is a prerequisite for this class.

LAW 453
COMMERCIAL ARBITRATION
Professional
(3 hrs) This course is designed to teach students the necessary skills to become effective advocates in the commercial arbitration process. Students develop arbitration skills through role-play exercises, including actual advocacy in simulated arbitrations. Additionally, the course teaches the jurisprudence of commercial arbitration, the evolution of the case law in the field and where arbitration fits within the spectrum of dispute resolution processes. The course also teaches students to critically evaluate the ethical and professional issues in the field of arbitration.

LAW 454
INTERNATIONAL INTELLECTUAL PROPERTY
Professional
Examines the growing importance of intellectual property in the international context. Covers the scope of protection granted trademarks, copyrights and patents in foreign jurisdictions so that effective comparisons can be made between foreign and domestic law. Explores the scope and substance of international treaties. Strategies for obtaining cost effective intellectual property protection in the global economy will be examined. 3 credit hours.

LAW 271, LAW 344, LAW 447 or LAW 489 is a prerequisite for this class.

LAW 455
LEGAL DRAFTING
Professional
(3 hrs) Legal drafting courses on various topics give students an opportunity to hone their research and writing skills on an advanced legal. Students may take one course per semester. All courses are limited enrollment.

LAW 456
JURISPRUDENCE
Professional
This course offers an introduction to issues in legal philosophy. It provides an overview of several influential legal theories, including: legal realist, legal positivist, and natural law approaches. Topics covered will include: the nature of law, the relation between law and morality; the extent to which legal rules constrain judicial decisionmaking; and, the question whether there is an obligation to obey the law. 3 credit hours.
LAW 457
FEMINIST JURISPRUDENCE
Professional
3 credit hours. This course examines various feminist legal theories and their impact on the philosophy of law. After introductory materials addressing equality theory and constitutional standards, the class will apply feminist legal theories to different substantive areas, especially violence against women.

LAW 458
BANKING LAW
Professional
(3 hrs) Studies the American system of banking as a regulated industry. Regulation and traditional banking activities are studied as well as formation of banks, bank holding companies, trust powers, bank antitrust problems, federal insurance and international banking problems.

LAW 459
REAL ESTATE FINANCE AND COMMERCIAL DEVELOPMENT
Professional
(3 credit hours) This course addresses legal and economic issues relevant to commercial real estate development and investment, including acquisition, financing, leasing ownership structures and tax considerations.

LAW 160 and LAW 420 are a prerequisite for this class.

LAW 460
BUSINESS PLANNING
Professional
(3 credit hours) Combines advanced work in business organizations, securities law and federal taxation in the context of business planning and counseling.

LAW 210 or LAW 212 is a prerequisite for this class.

LAW 461
CORPORATE REORGANIZATIONS
Professional
(3 hrs) Survey of methods of reorganizing corporate enterprise. Cognate issues in the fields of taxation, securities regulation, and bankruptcy are also discussed.

LAW 102 is a prerequisite for this class.

LAW 462
INSURANCE LAW
Professional
(3 hrs) Cross listed course for Public Services program. Provides a comprehensive overview of the basic principles of insurance law, including: a review of how the business of insurance has developed to meet contemporary business and consumer needs; the significance of insurance in modern business; and the importance of insurance and insurance law in the practice of law. Reviews the ways in which legislators, regulators and the courts have intervened in the operations of the insurance marketplace; the purposes of such interventions, and whether such purposes have been served.

LAW 464
ADVANCED CRIMINAL PROCEDURE: PRETRIAL
Professional
(3 hrs) Offers an in-depth analysis of the decision to prosecute, restraints and prerogatives in the acquisition and use of evidence of criminal conduct, the law of arrest, search and seizure, interrogation, pretrial detention, preliminary hearings, pretrial motions, plea bargaining and other selected topics related to the pretrial phase of criminal prosecutions.

LAW 506 and LAW 518 are a prerequisite for this class.
LAW 465
ADVANCED CRIMINAL PROCEDURE: TRIAL
Professional
3 credit hours. Analyzes the important phases of the criminal trial, including jury selection, opening and closing statements, presentation of witnesses, defense issues, assistance of counsel, guilty pleas, double jeopardy, jury instructions, sentencing, and ethical issues.

LAW 468
WHEN JUSTICE FAILS
Professional
This course is designed to examine the circumstances in which the judicial system is likely to fail to serve the interests of justice. The course begins with an examination of the ideas and historical events that have led us to expect that our courts will operate in a neutral and fair manner. At the same time, some consideration is given to when the system is unlikely to operate in this manner. The bulk of the course will be spent in examining five famous trials in which justice appears to have failed. 3 credit hours.

LAW 470
ADVANCED PATENT LAW
Professional
Required for a Certificate in Intellectual Property with a Patent Specialty. Provides a more practical perspective and application of the doctrines covered in the basic Patent Law course. Among the topics covered are patent searches, claim drafting, re-examination and reissue considerations, design patents, international patents, and licensing. 3 credit hours.

LAW 473 is a prerequisite for this class.

LAW 472
MENTAL HEALTH LAW
Professional
(3 hrs) Cross listed course for Public Services program. Examines significant issues in law and psychiatry and involves in-depth research and writing. Subjects include regulation of mental health professionals, malpractice, informed consent, confidentiality, incompetency, guardianship, commitment and mental health issues related to criminal law.

LAW 473
LAW AND ECONOMICS
Professional
(3 credits) This course covers the fundamentals of law and economics, including how law and economics applies in both common law and statutory settings. There is no requirement that students previously have studied economics.

LAW 474
LAW AND POPULAR CULTURE
Professional
3 credit hours. Explores the image of the lawyer (law student and judge) in American culture through an examination of American films and critical writings related to these films. Examines such issues as the judiciary and the rule of law with a focus of the Nuremberg Trial. Also explores the treatment of a single legal event, the trial of Leopold and Loeb for the murder of Bobby Franks, in three films representing distinct approaches to the underlying subject matter as well as to film making.

LAW 475
NEGOTIATIONS
Professional
Analyzes and uses problem solving to explore the use of negotiation techniques in the legal setting. 3 credit hours.

LAW 476
FINANCIAL ACCOUNTING FOR LAWYERS
Professional
Provides a survey of accounting principles and issues relevant to the practice of law, including accounting methods and procedures, accounting issues in business, corporate and tax law and the use of accounting data in financial analysis and business planning. This course is closed to students who have completed more than one accounting course at the undergraduate level. 3 credit hours.
LAW 477
FIRST AMENDMENT FREEDOM OF SPEECH
Professional
(3 cr.) This is an advanced constitutional course focusing upon First Amendment Freedom of Speech. Topics that will be covered include: the history and philosophy of freedom of speech; speech that incites action; fighting words; libel; obscenity and sexually explicit speech; commercial speech; content-based and content-neutral regulations of speech; vagueness and overbreadth; prior restraints upon speech; freedom of association; the right not to speak; campaign contributions as speech; freedom of the press; and, the broadcast media.

LAW 481
LEGAL PROFESSION
Professional
(3 hrs) Required for all JD students. Explores the role of the legal profession in American society. Legal education, admission to the bar, organization of the practicing bar, discipline, unauthorized practice, group legal services and other current problems are discussed.

LAW 482
INTERNATIONAL PROTECTION OF HUMAN RIGHTS I
Professional
(3 hrs) Surveys and analyzes the legal aspects of protecting human rights through international action. Relevant treaties, conventions and international practices are discussed.

LAW 487
HOUSING LAW
Professional
(3 hrs) An examination of local and federal laws and policies aimed at creating and preserving housing, low-income and affordable housing, both rental and owner-occupied. Includes consideration of housing-related litigation and issues related to subsidized housing, landlord-tenant court, fair housing, and predatory mortgage lending.

LAW 488
LAND USE PLANNING
Professional
(3 hrs) An analysis of the various legal devices by which private individuals and the public attempt to control the use of land resources. Such topics as private covenants, zoning, the master plan, eminent domain, urban rehabilitation and subdivision controls are explored.

LAW 489
INTELLECTUAL PROPERTY SURVEY
Professional
(3 hrs) Surveys the legal interests recognized by American law in intellectual and artistic creations. Legal problems involved in the economic exploitation of intellectual and artistic property rights also are discussed. No credit if completed Intellectual Property: Copyrights and Trademarks (LAW 339).

LAW 490
STATE CONSTITUTIONAL LAW
Professional
(3 credit hours) This course examines state court decisions from around the country to illustrate the array of state constitutional issues occurring in modern American law. State constitutions are a source of rights independent of the Federal Constitution and frequently are applied by state courts to grant more expansive protection for individual rights than the Federal Constitution affords. Moreover, state constitutional law, like its federal counterpart, is not limited to issues involving individual rights. Course coverage may include equality, due process of law, criminal procedure, property rights, religion, freedom of speech, school funding, the right to a remedy, the structure of state government, judicial power, and amendment processes.
LAW 493
CONSTITUTIONAL LAW: FIRST AMENDMENT RELIGION CLAUSES
Professional
(3 hrs) This course explores religious freedom in America under the First Amendment. The focus of the course is on the constitutional doctrines relating to the Free Exercise Clause and the Establishment Clause of the First Amendment, as well as the underlying assumptions and conflicts that have animated First Amendment constitutional argument over time. In addition, the course proposes to examine the extent to which religious interest groups have influence and control the development of religion clause jurisprudence.

LAW 495
LAW AND THE MASS MEDIA
Professional
(3 credit hours) Focuses on media law that affects journalism regulation of the media business. Topics include media and first amendment theory; prior restraint, regulation of media business, obscenity, commercial speech, private actions against the media, defamation, privacy and copyright, news-gathering, subpoenas and searches, access to information, and access to judicial proceedings, and broadcasting (content regulation and cable and new technology).

LAW 140 is a prerequisite for this class.

LAW 497
CONSUMER PROTECTION
Professional
(3 hrs) Surveys the common law and state and federal statutes which protect consumers in various aspects of sales and credit transactions. The course begins with inducements (advertising and marketing techniques), explores financing the deal (credit regulation), substantive contract terms (unconscionability, warranties, and interest rates) and post-transaction problems (debt collection).

LAW 498
SCHOOL LAW
Professional
(3 hrs) Designed to explore some of the principal legal problems arising out of the American educational system. The right to an education, the rights and duties of teachers, and the responsibilities of students and academic freedom are some of the issues discussed.

LAW 501
RACE, RACISM AND UNITED STATES LAW
Professional
(3 hrs) Examines the judiciary's approach to racial discrimination from the Colonial period through the Brown v. Board of Education case in 1954. Includes an analysis of the post-Brown status of racial subordination in the legal system and consider recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Americans and Chicanos. Through an integrated analysis of the groups' legal histories, the class will foster a comprehensive understanding of race and racism as foundational elements in United States law.

LAW 502
JEWISH LAW
Professional
(3 hrs) Introduces students to the structure and methodology of Jewish law, examines how substantive Jewish law principles are employed to resolve difficult social and ethical issues in a variety of legal contexts, and considers the extent to which such processes may inform a thoughtful dialogue regarding resolution of similar questions in secular society.

LAW 503
CIVIL RIGHTS
Professional
(3 hrs) Analyzes selected topics in the civil rights field, with emphasis on the reconstruction amendments to the Constitution and equal protection. Statutory issues will be discussed. Different topics will be chosen for in-depth treatment, such as voting rights, housing, criminal justice administration and education.
LAW 506
CRIMINAL LAW
Professional
3 credit hours. Required for J.D. students. Provides a survey of the substantive law of crimes and defenses. This course includes a study of specific crimes, elements of criminal liability, and the purposes of punishment.

LAW 507
FEDERAL CRIMINAL LAW
Professional
(3 hrs) Examines criminal enforcement resources, the Racketeer Influenced and Corrupt Organizations (RICO) statute, mail fraud, drug enforcement, criminal tax issues, criminal civil rights, obstruction of justice, fugitive felons and other aspects of federal criminal system. LAW 506 and LAW 518 are a prerequisite for this class.

LAW 508
ADMINISTRATIVE PROCESS
Professional
(3 credit hours) Reviews the powers and procedures of federal, state and local administrative bodies as they affect private parties, including administrative jurisdiction, adjudication, rulemaking, methods of decision, rules of evidence and judicial review. LAW 140 is a prerequisite for this class.

LAW 509
LAW AND THE FAMILY UNIT
Professional
(3 hrs) Provides an introduction to the creation and governance of family relationships, including such topics as marriage, adoption, neglect, conciliation, parentage proceedings, child custody problems, domestic violence, duty to support and property rights vis-a-vis members of the family unit.

LAW 510
THE MARRIAGE DISSOLUTION PROCESS
Professional
(3 hrs). Covers those topics relating to the dissolution of marriage, including judicial jurisdiction in dissolution and custody cases, regulation of marriage, annulment, bases for dissolution, spousal support, equitable division of property, child custody and support.

LAW 511
WOMEN AND THE LAW
Professional
(3 hrs). This course will focus on the intersection of law and gender, identifying and analyzing the gender norms reflected in our legal system. The course will focus on how U.S. laws reflect and embody societal attitudes toward gender.

LAW 513
INTERNATIONAL CRIMINAL LAW
Professional
(3 hrs) Covers problems of public control of criminal activity that cross international boundaries, such as extradition, air piracy, and control of drug traffic.

LAW 514
LEGAL CLINIC II
Professional
(3-6 hrs) Students work in one of the clinic modules under the supervision of a clinical attorney concentrating on real life problems with real clients and organizations. Instructor's permission required.
LAW 516
IMMIGRATION LAW AND POLICY
Professional
(3 hrs) Gives the students an understanding of the complexities of current US immigration law and policy and the opportunity to develop and complete a research project on a related topic. Topics of discussion include: current legislative proposals, sources of immigration power, role of the federal courts, family immigration, grounds of exclusion, deportation, Mexican community concerns, asylum and refugee problems and citizenship.

LAW 517
ASYLUM AND REFUGEE LAW AND POLICY
Professional

LAW 518
CRIMINAL PROCEDURE
Professional
3 credit hours. A survey of the administration of criminal justice, with an emphasis on pretrial procedure. Primary focus is placed upon government evidence gathering, as well as the prosecution and defense of offenders.

LAW 521
LEGISLATIVE PROCESS
Professional
(3 hrs) Surveys the legal aspects of the legislative process such as legislative structure, role of statutes, committees, access to information, enactment process, campaign finance, lobbying, speech and debate clauses, and legislative compromise.

LAW 523
MISSION-BASED LAWYERING: LEGAL PRACTICE IN THE NON-PROFIT SECTOR
Professional
(3 credit) This is a course focused on preparing law students for eventual work in the non-profit sector as 1) practicing lawyers, 2) lawyer-managers and 3) lawyer-board members. The course will provide an initial overview of the law of non-profit organizations, after which the course will take a multi-disciplinary approach to analyzing the legal aspects of working for, or with, non-profit public interest law organizations.

LAW 524
FIELD PLACEMENT
Professional
2 or 3 credit hours. This program is designed to give upper level students practical experience in an externship with a public agency, non-profit organization, member of the judiciary, or for-profit organization, such as a private law firm or in-house counsel for a corporation. Upper level students, who have at least 28 credit hours and a GPA of 2.0, may apply to participate. Participants are accepted on a case by case basis. Externships are unpaid. No student can receive more than 3 credit hours per semester and no more than 9 credit hours toward their JD degree if 3 of those credits are earned during a summer placement. Otherwise, students are limited to 6 credits hours total. A placement for 3 credit hours is expected to complete 180 hours of work whereas 120 hours of work is expected for a 2 credit hour placement.

LAW 525
CLASSROOM COMPONENT
Professional
1 credit hour. This is a supplemental course in which students are graded upon their experiences and written reports.

LAW 531
LABOR RELATIONS IN THE PUBLIC SECTOR
Professional
(3 hrs) Explores the existence and extent of public and quasi-public employment rights to engage in concerted activities, to be represented by unions and to bargain collectively. Attention is given to the context and implementation of federal, state and local legislation and ordinances and various executive orders. Emphasis is given to the various dispute resolution and impass resolution machinery developed in the public sector, including mediation, fact-finding, voluntary arbitration and mandatory arbitration.
**LAW 533**  
**PATENT LAW MOOT COURT**  
Professional  
(3 credit hours)  Students will be required to write both an appellee and an appellant brief on a topic related to patent law. Competitions are based on an advanced problem-orientated study in patent law. Selected students must register for the course. Instructor's permission required.

**LAW 535**  
**ART AND THE LAW**  
Professional  
(3 hrs) Focuses on issues concerning legal issues and the arts. Includes the international regimes for copyright protection, comparison of different national copyright systems, and definition and treatment of artists' (moral) rights in their works. Ethical and legal aspects of international trade in art objects and antiquities, national and international attempts to control such trade, and issues involved in protection of cultural property and cultural resource management, as well a conflicts of law in the recovery of stolen art works.

**LAW 536**  
**NATIONAL MOOT COURT COMPETITION**  
Professional  
(3 hrs) Students who are selected for one of the National Moot Court Teams must register for the course. The competitions are an advanced problem-oriented study of appellate brief writing and oral advocacy. Graded pass/fail.

**LAW 537**  
**INTERNATIONAL MOOT COURT COMPETITION**  
Professional  
(3 hrs) Students who are selected for the International Moot Court Team must register for the course. The competitions are an advanced problem-oriented study of appellate brief writing and oral advocacy.

**LAW 541**  
**ILLINOIS CRIMINAL LAW**  
Professional  
This course is an elective, upper lever class, which provides students with a particular interest in the substantive prohibitions, as well as affirmative defenses, reflected in the Illinois penal code and caselaw. It is intended to complement the basic substantive Criminal Law course, which focuses on basic elements of crimes and defenses, by an in-depth exploration of offenses and grounds for exculpation not generally studied in the basic course. 3 credit hours

**LAW 543**  
**TELECOMMUNICATIONS LAW AND POLICY**  
Professional  
(3 hrs) Focuses on the regulation of radio and television broadcasting laws as well as the regulation of cable and new satellite technology. A segment on telephone regulation is included. Also contains an entertainment law component focusing on the relationship between movie companies and other program providers and major distributors such as cable and broadcast stations. Some attention to copyright law for movies and other programs by cable systems and satellite distributors.

**LAW 544**  
**WOMEN AND JEWISH LAW**  
Professional  
(3 credit hours) This course will examine the primary issues of Jewish Law affecting women, particularly as they pertain to family law. Among the topics that will be highlighted are marriage, divorce, sexual relations, and child rearing responsibilities. The course will involve an examination of both the classical Jewish law texts on these topics (in English) as well as a discussion of more current positions on the issues covered. There are no prerequisites and students need not have any background, or religious affiliation to take this class.

**LAW 545**  
**ISLAMIC LAW & LEGAL THOUGHT**  
Professional  
(3 credits) This course is organized around two main objectives. First, we consider the internal structure of Islamic Law (Sharia) and legal thought. Second, we consider Islamic Law in relation to modern legal systems and theories - religious and secular. The aims are not only to introduce the principles of Islamic Law but also place Islamic Law in conversation in the fields of comparative law, international law and human rights, constitutional law and jurisprudence.
LAW 546
POVERTY LAW
Professional
(3 hrs) Provides an overview of poverty law and the legal problems encountered by the poor in our society. The course considers legislative and administrative representation as methods of poverty advocacy, as well as the current trend away from constitutional litigation and toward state responsibility. It considers the legal developments in poverty law including housing, education, family and public benefits.

LAW 548
ADVANCED MEDIATION: AS MEDIATOR
Professional
(3 credits) This course builds on the skills learned through the simulated experiences of the basic Mediation course. The course includes three components: specialized training, class sessions and the mediation of small claims cases referred by judges in the Circuit Court of Cook County, Illinois. Students will serve as the Mediator under the supervision of the Centers for Conflict Resolution.

LAW 438 is a prerequisite for this class.

LAW 549
ADVANCED MEDIATION: AS ADVOCATE
Professional
(3 credits) In this course, students represent litigants who have appeared pro se in commercial cases in the Law Division of the Circuit Court of Cook County, Illinois. They are referred by the judges for student representation during the mediation phase of the case only. A 711 license is required and students work under the supervision of the instructor.

LAW 438 is a prerequisite for this class.

LAW 551
FOREIGN STUDY ABROAD: VIENNA
Professional
Students enrolled in the DePaul University/Vienna University of Economics and Business (WU) program enroll in Vienna University of Economics and Business law courses under this number for one semester. The exact content depends upon the course in which the student is enrolled. Maximum of 13 credits per semester. Graded pass/fail.

LAW 552
SUMMER LEGAL STUDIES: SORRENTO, ITALY
Professional
This program offers students exposure to an international resolutions and a global approach to business in addition to Italian comparative criminal focus. Director permission required. 3 courses/5 credits total.

LAW 555
ADVANCED LEGAL RESEARCH
Professional
(3 cr. hours) This course is to strengthen student research and legal analysis skills. The course will build upon students’ knowledge of source materials; introduce new sources and techniques of research; and how best to apply this knowledge to specific legal problems. Also, the cost effectiveness and relative advantages of manual versus electronic research will be explored. All students must have working Lexis and Westlaw passwords and active e-mail accounts.

LAW 559
INTERNATIONAL & EUROPEAN LAW PROGRAM (MIEBL)
Professional
(1 or 2 hrs) Students enrolled in the DePaul University/Universidad Pontificia Comillas International and European Business Law (MIEBL) program enroll in Universidad Pontificia Comillas law courses under this number. The exact content depends upon the course in which the student is enrolled. Maximum of 15 credits per semester.
LAW 561
COMMUNITY ECONOMIC DEVELOPMENT
Professional
This public interest law course will focus on the strategies for developing low-income communities and to engage in strategies and organizational forms to change lives. 3 credit hours.

LAW 570
ELECTRONIC DISCOVERY
Professional
This course will provide an in-depth treatment of both the legal and technical aspects of electronic discovery and provide the student with a detailed grounding in the law and application of electronic discovery principles to civil and criminal litigation. 2 credit hours - held 9 weeks.

LAW 580
FOREIGN STUDY PROGRAM
Professional
(3 hrs) Students enrolled in the DePaul University/University College Dublin Cooperative enroll in University College Dublin law courses under this number. The exact content depends upon the course in which the student is enrolled. Maximum of 12 credits per semester. Graded pass/fail.

LAW 581
SUMMER LEGAL STUDIES PROGRAM AT BEIJING FOREIGN STUDIES UNIVERSITY, CHINA
Professional
The program focuses on the legal principles related to international transactions in the Asia-Pacific area and will provide a comprehensive overview of China's legal system.

LAW 582
INTERNATIONAL HUMAN RIGHTS LAW AND POLICY COLLOQUIUM
Professional
(2 cr. hrs.) This course is a discussion-based exploration of legal protections afforded in international law to refugees, internally displaced persons (IDPs) and stateless persons. Public policy (domestic, regional and international will be a large part of the discussion in class. Students are expected to come to class ready to address issues beyond the text of the treaties and laws, and to be prepared to discuss from alternate perspectives. The practice of international law requires an ability to read and understand the treaties and conventions that create it, and any policy discussion requires that a lawyer be able to find and analyze the texts, and use those texts in the formation of a policy argument. Class meets 9 weeks.

Law 422 or LAW 482 is a prerequisite for this class.

LAW 583
SUMMER LEGAL STUDIES IN MADRID, SPAIN
Professional
This program focuses on European human rights law and European business and commercial law. Director permission required. 3 courses/5 credit hours total.

LAW 584
SUMMER LEGAL STUDIES IN PRAGUE
Professional
The program will offer students exposure to global practice in the fields of corporate law and employment law, with a special emphasis on countries within the European Union. 2 courses/5 credits.

LAW 585
SUMMER LEGAL STUDIES IN COSTA RICA
Professional
The program links basic principles of international law with an overview of the Inter-American Human Rights System and with special focus on how human rights ideas, advocacy, and activist strategies have transformed Latin American society and politics. The program facilitates student engagement with important regional human rights advocates and includes visits to key institutions such as the Inter-American Court of Human Rights. 2 courses/6 credit hours total.
LAW 586
CONSTITUTIONAL TORTS & SECTION 1983
Professional
(3 crs.) This course provides an in-depth study of 42 USC sec. 1983, the most widely used statute for protecting civil rights and redressing violations of the constitution. Among the topics covered are the elements and defenses to a cause of action, municipal liability, absolute and qualified immunity for public officials, state action, monetary relief, injunctive remedies, causation, choice of forum, and attorney's fee shifting.

**LE 211**  
TOUR OF HAYMARKET  
Undergraduate  
The tour includes the Haymarket sculpture, the court house, the Altgeld statue and the cemetery where the martyrs are buried.

**LGQ 150**  
INTRODUCTION TO LESBIAN, GAY, BI SEXUAL, TRANSGENDER, QUEER STUDIES [SSMW]  
Undergraduate  
This course will focus on defining this emerging field while giving students some perspective on the history and diversity of LGBTQ communities. It will also help prepare students for study in the various fields covered by the electives required for the minor. The course will be taught by faculty from a variety of disciplines and thus undoubtedly shift emphases somewhat with every offering. Topics will include: introduction to and definition of LGBTQ Studies as a field; historical roots of LGBTQ communities in the US and elsewhere; theoretical models of sexuality and gender; contemporary issues in LGBTQ politics and culture.

**LGQ 236**  
GAY MEN'S HEALTH MATTERS  
Undergraduate  
The purpose of this course is to introduce students to health issues relevant to gay men. We will explore effects of minority status, heterosexism and homophobia on gay men's health, including but not limited to STD/HIV/AIDS, substance use and mental health. Students will review epidemiological data, theoretical frameworks, and community-based health promotion approaches in order to gain a broad perspective on risk and resilience factors, health indicators, and strategies for self-care applicable to gay men's health.

**LGQ 250**  
LGQ FRENCH HISTORY: OLD REGIME TO THE PRESENT  
Undergraduate  
This course studies male and female same-sex affection in France roughly from the Enlightenment through the early twenty-first century. It examines the representations of homosexuality over more than two centuries taking into account a variety of often contradictory images that have been current in French society, representations that range, among males, from the diabolical criminal of the nineteenth century Romantics to today?s trend-setting (and all too domesticated) gay male, and, among females, from elegant salon figures to contemporary feminist militants. Special attention is focused on the history of homosexuality since WWII because the French gay and lesbian community?s progress since that time is impressive and particularly rich in its implications for the American civil rights struggle. Additional readings from French writers on homosexual themes compliment most of the readings from the textbooks.
LGQ 319
QUEER PIONEERS: CULTURE, GENDER, AND POLITICAL ACTIVISM
Undergraduate
This course examines some of the historical roots and contemporary realities of lesbian and gay politics in the United States through the biographies of pioneering individuals whose lives and work shaped an ongoing struggle for civil rights and social justice. Conventional wisdom holds that the modern lesbian and gay movement was born in 1969 with the Stonewall riots in New York City, although recent scholarship traces the movement's roots to the mid-nineteenth and early twentieth centuries. More than thirty years after what began at Stonewall as an angry and disorganized appeal for basic human dignity, lesbians and gays have today begun to enter the mainstream of U.S. politics. Within this context, the biographies of individuals who, as activists and artists, rose to challenge the conventions of culture, gender, and political exclusion will be studied in-depth to both illuminate the politics of social movement and suggest how these diverse individuals and experiences may influence present and future efforts for cultural and political change. This course fulfills an elective in the WMS, AMS, or PSC majors, an elective in the LGQ minor.

LGQ 332
CREATING CHANGE: CONTEMPORARY GLBT POLITICS (CROSS-LISTED AS WGS 332 & PSC 312)
Undergraduate
This course explores the historical roots and contemporary realities of gay, lesbian, bisexual and transgendered (GLBT) politics, nationally and internationally. GLBT groups and individuals are gaining political recognition, challenging institutions, and creating change by asserting claims to rights and protections under law. Such issues as hate crimes, marriage, AIDS, and ballot initiatives over non-discrimination law and policy have entered the political mainstream since the 1970's. This course examines the GLBT movement, its political and social strategies, conflicts and issues, and the political roles played by its members as participants in political culture.

LGQ 338
SEXUAL JUSTICE: LESBIANS, GAYS AND THE LAW (CROSS-LISTED AS WMS 338)
Undergraduate
This course examines the historical and contemporary relationships between lesbians, gays, and the law in the U.S., focusing on the intersections of power, sexuality, and identity with issues of sexuality-based discrimination. It focuses on case law, along with social science and legal literature, seeking out a diversity of voices and experiences. Primary emphasis will be on cases that have come before the U.S. Supreme Court since the mid-1950's, with particular attention paid to how groups and individuals have reached out to the court system for redress of injustice and how these groups and individuals have exercised or failed to exercise power within the legal process. The U.S. legal system has reflected a complex set of social and institutional arrangements with regard to sexuality. This course explores the evolution and current construction of these arrangements, how power is allocated and adjudicated, and how law may be used to resist and dismantle pervasive discrimination.

LGQ 397
SPECIAL TOPICS IN LGBTQ STUDIES
Undergraduate
See course schedule for current offerings.

LGQ 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

LL 50
ACTIVE STATUS CONTINUATION
Undergraduate
Active Status Continuation

LL 60
PROFICIENCY EXAMINATION FEE ASSESSMENT
Undergraduate
Proficiency Examination Fee Assessment
Learning Assessment Seminar is the first of the required courses in the Lifelong Learning Area and designed to help students make educational decisions in the context of their educational and personal goals, become well-versed in SNL's philosophy and competence framework, and make concrete plans for completion of their degree. This course is also the first step toward admission to baccalaureate degree-seeking status within SNL and carries two hours of academic credit. Competence: L-1. Faculty: Staff

The Writing Workshop will help students be more confident, efficient and effective writers. Each student will work with the instructor to design an individual plan for improving the student's writing and mastery of the writing process. This is a four-credit hour course for which students earn the H3J competence. If it fits in their plan for improvement, students may use the Workshop to work on papers for competence in other courses or through the ILP process. The focus of the Workshop is on academic writing. This is not a creative writing course.

This six credit hour course is held over two consecutive quarters, and require two separate registrations. It is designed for students who need substantial enhancement of their writing skills before progressing further in the program. The course will review the fundamentals of college level writing with the goal of students being able to write clearly and fluently. Students who are required to take this course must complete it before taking Foundations of Adult Learning. Intensive College Writing For the first quarter, register for the course titled, Intensive College Writing, for two credit hours. If you are taking this course at the Loop campus, you must register again next quarter for the continuation of this course with the same instructor. This continuation of the course equals four credit hours. If you are taking this course at a suburban campus, you must register again next quarter for any College Writing course. College Writing equals four credit hours. At the conclusion of the second quarter at all campuses, the competence will be awarded. Competence: L-4. Faculty: Michelle Mohr; William Muller

This course will meet over two quarters, and require two separate registrations. For the first quarter, register for the course titled, Intensive College Writing, for two credit hours. Next quarter, you must register again for the continuation of this course titled, Intensive College Writing II with the same instructor. This continuation of the course equals four credit hours. At the conclusion of the second quarter, the competence will be awarded. BA-1999 Competence: L-4. Pre-1999 Competence: LL-4

In this required course, SNL students focus on writing skills associated with effective performance in a variety of settings. Students will review and practice the essentials of good writing by building on their particular strengths and improving areas of difficulty. In addition to receiving individual feedback and guidance from the instructor, students learn to give feedback on writing to one another. This is a Pass/Fail class. However, you have the option of taking the course for a letter grade. If you wish to take the course for a letter grade, you must inform your instructor in writing by the end of the second week of class. Once you commit to taking the course for a letter grade, you cannot switch back to Pass/Fail. Pre-requisite required: successful completion of Learning Assessment Seminar. Competence: L-4. Faculty: Staff

DePaul University Winter/Spring 2013 Page 1693 of 2244
Writing Together - Writing Well: A Community Approach to Academic Writing and Personal Narrative allows SNL students to complete the required L4 competence as well as an additional competence in a single 6-credit course. For the required L4 competence, you will study the meanings and implications of literacy; read and respond to scholarly works; and learn the strategies of academic writing that will allow you to be successful at SNL. You will explore literacy by sharing, responding to, and editing your own and others’ writing during guided in-class writing workshops. For the additional competence, you will study and apply this writing group process to an out-of-class project.

Competences: L4, and H1X, H2X or A3A.

I consider everybody as having a right to marry once in their lives for love.? -Jane Austen While Austen, the woman, believed in the power of love, Austen, the author, presented both the realistic and the ideal paths to marriage in her novels. Academic Writing/Pride and Prejudice allows SNL students to complete the required L4 competence as well as an additional competence in a single 6-credit course. For the required L4 competence, students will learn to use writing for college-level learning, thinking, and communicating through pre-writing, revisions, academic writing genres, and referencing scholarly works related to Pride and Prejudice. For the additional competence, students will further examine the social context of the novel, create a definition of happiness, and analyze the effects of money and class on the characters.

Competences: L4, A1X. Faculty: Jane Wagoner

In this required course, students are introduced to the basic concepts behind the skills of effective listening, dynamic thinking, and persuasive argumentation and have an opportunity to practice these skills within an active and experiential context. Through peer and small group activities, problem-based exercises, and self-evaluation skills, students will develop effective habits of thinking that can be employed in subsequent learning experiences. This course satisfies the L5 competence and carries four hours of tuition credit.

In this course students will focus on developing writing, critical reading and analysis skills. Students will review and practice the essentials of good writing by building on their particular strengths and improving areas of difficulty. Students will receive individual feedback and guidance from faculty on grammar, idea development, organization, using sources to formulate arguments, and students will learn to give feedback on writing to one another. This course will give students the opportunity to practice several types of writing including journals, essays and research papers. In this class, students will have the opportunity to practice each of these assignments while improving control over the mechanics and process of writing. Particular emphasis will be given to the process of revision as students learn to refine and develop their writing. The class assumes a basic understanding of English grammar and composition. Competences: L4 (required), A1A, A1X. Faculty: Staff

Students who take this course for both the L4 and A1D competences will focus on academic writing skills and the writing process while learning and writing about Chicago disturbances and disasters throughout history. While many people know about the sinking of the Titanic, not everyone knows about the Eastland disaster. This ship was scheduled to take people across Lake Michigan to Indiana for a picnic; however, it never left the Chicago River. When the ship rolled over on its side, 800 Western Electric employees lost their lives. While the Chicago Fire is famous, another fire changed school fire safety regulations. A mistaken address contributed to the devastating fire at Our Lady of the Angels School where 92 children and 3 nuns died. Learn what caused the 1919 Chicago Race Riots, the Pullman Strike and other disturbances and disasters that have changed Chicago’s history. Competences: L4 and A1D. Faculty: Jane Wagoner. Students must register for L4.

This is a five-week, two-credit course that satisfies the L4 competence and meets every other week in an SNL Learning Cluster.
This new Truman Bridge course deals with the methods, principles, and practice of college writing, while giving students an opportunity to write papers that address specific cultural issues, many of which may relate to students' professional aspirations. The course may be taken for a maximum of two competencies, one of which MUST be L-4 or LL-4. Instructor: Rita Thomson. Wednesdays, 6 - 9 pm. 15 sessions. First 7 meetings at Truman College, as follows: 1/9, 1/16, 1/23, 1/30, 2/6, 2/13, 2/20. Final 8 meetings at SNL, Loop Campus, as follows: 2/27, 3/6, 3/13, 3/20, 3/27, 4/3, 4/10, 4/17. Pre-199 Competencies: LL-4, HC-F, WW. BA-1999 Competencies: L-4, H-1-X, H-3-X, F-X.

Academic Writing for Adults and Critical Thinking are required courses at the School for New Learning. In Academic Writing, SNL students focus on writing skills associated with effective performance in a variety of settings. Meanwhile, the Critical Thinking competence and course aims to a) make students aware of their own thinking processes; b) help them develop those processes; and c) help them bring those processes to bear on college-level intellectual activity. In the blend of these two competencies, particular emphasis will be placed on how we do this through writing. Instructors will emphasize skills and strategies of critical thinking and reading as well as practice in the recognition, construction and evaluation of arguments from a thought-perspective and written-perspective that are inherently intertwined. No matter which competence students take, students in this course will learn to identify assumptions, connect assertions to evidence, state generalizations, analyze arguments and bring multiple perspectives to bear on complex issues through a writing practice that will build on particular strengths and improve on areas of difficulty. Students can expect to receive much individual feedback and guidance from the instructors; students will also learn to give feedback on writing to one another. This course carries eight tuition credit hours; however, students may choose to take either the L4 competence for four credit hours or the L5 competence for four credit hours.

This course provides an introduction to various topics in quantitative reasoning that most adults will be exposed to throughout their university course work, their careers and their daily lives and how to more effectively handle these topics. It covers different approaches to problem solving, how numbers are used in the real world, how to manage your personal finances, basic concepts in statistics and how they are applied in everyday settings and, finally, how money and populations grow and decay. Scientific calculators and the Excel spreadsheet program will be used as tools for exploring algebraic and statistical concepts. Excel spreadsheets and charts are used extensively to illustrate graphically how to display, analyze and interpret data. Using mathematical models to understand real-world phenomena and to make predictions is an important component of the course. Access to a PC and the Internet is required. Quantitative reasoning will be a large part of the class discussion. Competence: L6

Students will often be called upon to deal with quantitative information in their academic studies, their daily lives and their ministries. This course will build their capacities to understand how numbers are used in the professional life and to apply different quantitative approaches to problem solving. The course will examine financial matters in particular and develop students' capacities to account for the financial resources of a community, congregation or organization. Through this course, therefore, students will develop and demonstrate their competence to use mathematical symbols, concepts, and methods to describe and solve problems. Competence: L6

This course examines the changing life challenges faced by children and adolescents, eg, parent-child, school work, dating, leisure time, drugs, etc., over recent past decades. However, this historical context mainly provides a framework for engaging the significant challenges children and adolescents face today. This includes home, school, and society. This course will then turn to how adults relate to their own children and devise strategies that help them develop a positive environment where the child can develop and achieve a sense of self-dependency and social contribution. Competences: L-7, A-3-G, H-3-X, F-X Faculty: Tranita Jackson
In this required course, the instructor becomes the students' Faculty Mentor for the duration of their academic programs. During this course, students learn how to submit learning from experience for competencies. They complete a plan to achieve their learning and professional goals, and also begin work on a reflective portfolio in the Lifelong Learning Area that they will complete at their Last Committee Meeting. Students are encouraged to take this course early in their program. Prerequisite: Successful completion of Learning Assessment Seminar and approval for registration. This course satisfies two competencies and carries six hours of tuition credit. Competencies: L2, L3.

Status as a BA student in SNL and (LL 102 or DCM 313) are a prerequisite for this class.

Late in the 19th century, an English magazine ran a series of articles highlighting passages of prose and verse selected by leading authors of the time. This series provides a clear view of the opinions of this group of writers and provides an opportunity for us to make a comprehensive study of their perspective. Each student will research, edit, write and help create a class project that produces a monograph, a book, on this subject. This course will run over two quarters. Work in the first quarter will prepare for the creating, writing, and revising of the book. Pre-'99 Competencies: HC-H, AL-1, AL-H, AL-L, LL-4, LL-6, LL-8. Faculty: Harvey T. Lyon

This required course fulfills two competencies and carries six tuition hours. Students will learn to pose questions and use methods of formal inquiry to answer questions and solve problems as preparation for their Externship and Advanced Project. The instructor selects a topic around which to organize the course. The topic is broad enough to allow students to pursue research in areas of interest, while providing a common reference point for class discussion. Prerequisite: Students must complete Foundations of Adult Learning, College Writing and Critical Thinking prior to registration. Competencies: L8, L9.

LL 250 and (LL 150 or LL 104 or LL 153 or LL 154) and (LL 155 or DCM 310 or LL 105) are a prerequisite for this class.

Externship is a required course in which SNL students design and execute an independent study project, guided by their academic committees, which engages them in learning under new conditions and in reflecting on the methods of independent learning used. Externship is offered in two modes: as a service learning course or as a course completed individually with your faculty mentor. To register for Externship as a service learning course, use Campus Connect. To register as a course with your mentor, submit a paper registration form found on the SNL website. Externship carries 4 tuition credit hours. Prerequisite: Successful completion of Research Seminar is required prior to registration. Competences: L10, L11.

LL 300 is a prerequisite for this class.

This required course is a problem-solving experience which represents the culmination of an SNL student's learning in a specific area. Students, guided by their academic committee, design and execute an independent project which demonstrates the integration of theory and practice, and the ability to pursue and document avenues of inquiry with excellence. * Successful completion of Major Seminar is required before registration. Major Piece of Work carries six hours of academic credit. Students in the Pre-'99 Program register for LL-8, and a pair of capstone competencies in the same domain: HC-9, HC-10, AL-9, AL-10, PW-9, PW-10, WW-9, WW-10. BA'99 Competencies: F-11, F-12.

This required course is the final requirement completed by SNL students to earn their degree. Primary purposes are to 1) bring appropriate and reflective closure on the SNL experience; 2) enable students to celebrate and share their work with others who have accomplished goals and projects; and, 3) reflect upon the overall SNL experience, its developmental effect, its contribution to lifelong learning, and the transferable skills, attitudes, etc. that were developed as a result of the SNL experience. * Students must be approved to register for Summit Seminar by their academic committee upon successful completion of all degree requirements. Summit Seminar carries four hours of academic credit for Pre-'99 and a fee for BA'99. Pre-'99 Competencies: LL-9 & LL-10. BA'99 Competencies: L-12. Faculty: Staff
**LL 315**  
**ADV ELECT SEMINR: UTOPIA, MILLENNIUM, & APOCALYPSE: VISIONS OF HUMAN DESTINY FROM BIBLE TO HOLLYWOOD**  
*Undergraduate*  
Though usually associated with a sub-culture of palm readers, ouija boards, tarot cards, and crystal balls, predicting the future is a lot more than just a parlor trick or confidence game. In fact it is a serious imaginative and intellectual activity that has engaged the talents of many of the world's greatest writers, thinkers, and filmmakers. In this course students will review and analyze a selection of representative works of "futurology" and visionary imagination both old and new - from the apocalyptic prophesies of the Bible to the end-of-the-world scenarios typical of Hollywood sci-fi. While viewing or reading these works, students will also compare and evaluate various theories of world history as they seek to answer the question: Is it actually possible - by combining imagination, reason, and established methods and principles of scientific history - to predict the future course of civilization? Course materials will include the novel *Brave New World* by Aldous Huxley as well as films by Kubrick and Spielberg. Prerequisite: Please Note: Students taking the course for E1, E2, or pre-1999 capstone credit must have completed Research Seminar. Faculty: David Simpson

**LL 350**  
**CAPSTONE SEMINAR**  
*Undergraduate*  
Capstone Seminar is designed to permit students to explore a topic as a group integrating various methods of inquiry. Pre-1999 students will address one set of capstone competencies of their choice (HC-9, HC-10; PW-9, PW-10; or AL-9, AL-10). BA-1999 students may address the Advanced Electives (E-1, E-2). Specific assessment and evaluation criteria as well as learning activities will be articulated by the instructor for a particular section of the course. * Successful completion of Major Seminar or Research Seminar is required to register.

**LL 390**  
**SUMMIT SEMINAR**  
*Undergraduate*  
This required course is the final requirement completed by SNL students to earn their degree. Primary purposes are to 1) bring appropriate and reflective closure on the SNL experience; 2) enable students to celebrate and share their work with others who have accomplished goals and projects; and, 3) reflect upon the overall SNL experience, its developmental effect, its contribution to lifelong learning, and the transferable skills, attitudes, etc. that were developed as a result of the SNL experience. * Students must be approved to register for Summit Seminar by their academic committee upon successful completion of all degree requirements. Summit Seminar carries four hours of academic credit for Pre-1999 and a fee for BA-1999. Pre-1999 Competencies: LL-9 & LL-10. BA-1999 Competencies: L-12. Faculty: Staff

FA 303 and LL 302 are a prerequisite for this class.

**LLS 425**  
**EXPLORING MODES & PROCESSES OF SYSTEMATIC INQUIRY**  
*Graduate*  
This seminar provides students with an opportunity to develop the Liberal Learning Skills through exploring modes and processes of systematic inquiry. Students develop researchable questions and use these questions to gather and critically evaluate information and identify appropriate research methodologies. In addition, students practice searching, managing and analyzing information sources and building integrative literature reviews.

**LLS 435**  
**UNDERSTANDING PERSONAL AND ORGANIZATIONAL CHANGE SEMINAR**  
*Graduate*  
This seminar provides students with an opportunity to develop the Liberal Learning Skills through understanding personal and organizational change. Multiple dimensions and dynamics of change and the roles and responsibilities of professionals as change agents are explored. Special emphasis is placed on analyzing change processes using both linear and systems models and formulating interventions to facilitate productive change in the workplace (profit and nonprofit).

**LLS 445**  
**IMPROVING INTERPERSONAL DYNAMICS**  
*Graduate*  
This seminar provides students with an opportunity to develop the Liberal Learning Skills through improving interpersonal dynamics. Students are introduced to various models for working collaboratively with diverse constituents over multiple contexts. In addition, students are provided opportunities to strengthen their interpersonal relations and communications skills (per context) by learning and practicing strategies and techniques that foster skill development.
EXERCISING EFFECTIVE LEADERSHIP SEMINAR
Graduate
This final seminar provides students with an opportunity to develop the Liberal Learning facilities through exercising effective leadership. Major themes of each of the previous seminars are integrated within the concept of effective leadership in a changing world. Key theories and principles relative to the management/leadership continuum are examined as well as the implications of current trends for the future of leadership both in general and within students' personal/professional contexts.

VALUING HUMAN DIFFERENCES SEMINAR
Graduate
This seminar provides students with an opportunity to develop the Liberal Learning facilities through valuing human differences. The origins, nature, and costs of prejudice and other barriers that interfere with the valuing of human differences are explored in and of themselves and in relation to the increasingly diverse workforce in today's organizations. In addition, through group discussions and interviews, students are provided with opportunities to gain a deeper understanding of their own prejudices and to develop a rationale for revaluing human differences in their own lives.

ENGAGING ETHICAL REASONING SEMINAR
Graduate
This seminar provides students with an opportunity to develop the Liberal Learning facilities through engaging ethical reasoning. A variety of ethical decision-making frameworks are explored as well as the nature and impact of ethical issues and questions pertinent to organizational contexts. Case studies are used to stimulate reflection on individual and societal moral values. In addition, particular attention is given to designing a personal model of ethical decision-making for application within various contexts.

PERSONAL EFFECTIVENESS
Graduate
This domain examines the physical, cognitive and spiritual dimensions of personal development and performance. Central questions include: Who am I and what should I become? What habits of mind, attitude, and behavior might I improve upon? How can I construct personal meaning and inform future actions from my experiences? Embedded in these questions are the core concepts of learning and change, choice and consequence, identity, and various dimensions of self. Seminars in this domain might address topics such awareness, agency, emotional intelligence, mindfulness, motivation, reflection, resilience, and self-discipline.

INTERPERSONAL EFFECTIVENESS
Graduate
This domain focuses on one's ability to both communicate effectively and understand the meaning of others' communications. To develop interpersonal effectiveness, one must overcome the barriers that result from differences in culture, race, ethnicity, gender, age, disability, and socio-economic status. Interpersonal effectiveness requires self-awareness, cultural competence, and skills in active listening, building trust, dialogue, collaboration, and conflict resolution. Central questions include: How can we improve interpersonal relationships in both personal and professional domains? How can we make decisions and solve problems together? What are the dynamics of and processes for collaboration? How do we understand and use the human/computer interface as tool to enhance communication? Seminars in this domain might address topics such as intercultural communication, valuing human similarities and differences, interpersonal communication, and 21st century human-computer interfaces and interactions.

ORGANIZATIONAL EFFECTIVENESS
Graduate
This domain explores the larger systemic contexts within which individuals function. As the world grows increasingly complex and interconnected, the ability to understand and navigate people-in-groups (organizational, societal, and global) becomes increasingly critical. In this domain, students broaden and deepen their capacity to make a difference at ever-widening levels of system. Central questions include: How do we engage as organizational resources, community participants, members of society and global citizens? How do we get along? How do we get work done? How do we both fit-in and remain unique? Seminars in this domain might address topics such as project management, leadership, organizational culture, career management, performance improvement, context scanning, global citizenship, trend analysis, cross-cultural agility, and future visioning.
LLS 440  
VALUES EFFECTIVENESS  
Graduate  
This domain examines the ability of individuals to recognize and analyze their own values and those of others in order to find effective ways to translate those beliefs into effective action. When individuals expand awareness of their own choices and recognize the choices of others, they can live their own lives more effectively and successfully mediate conflicts with others. Central questions include: What should I do in this situation? Why did he/she/they decide to do things that way? That is so clearly wrong? isn't it? Seminars in this domain might address topics such as ethical reasoning, decision-making, values-clarification, priority setting and courage in action.

LLS 450  
INQUIRY EFFECTIVENESS  
Graduate  
This domain focuses on developing methods and processes of inquiry that can be applied in any of the other domains. Adults must be able to engage in self-directed inquiry in order to understand and act effectively in their personal, professional, social, and civic lives. In this domain, students learn methods for systematically and strategically exploring questions, problems, ideas, and experiences. Central questions include: How do I formulate viable questions? What information do I need to understand a problem and what is the best way to obtain it? What are different ways to analyze an idea? How can I make sense of what I have experienced? Seminars in this domain might address strategies and methods to generate and engage primary research; to gather and manage information; to organize, analyze and present data; and to pursue targeted methods of inquiry.

LSE 201  
DIVERSE VALUES AND VOICES IN EDUCATION  
Undergraduate  
This course explores the interaction of societies and their education efforts/designs within a multicultural context. Case studies are used to examine various cultural groups within their own environment, the interactions of people from different cultures, and various cultural phenomena. Educational experiences leading persons from a monocultural perspective to a more multicultural perspective are explored. Students are asked to consider culture as learned behavior/perspective. They will explore their own cultural experiences/development and those of others. The goal is a realization of culture as a respected framework within the context of education. This course satisfies the self, society, & modern world requirement.

LSE 210  
MULTICULTURALISM AND EDUCATION  
Undergraduate  
This course will engage students in an examination of issues of diversity and multiculturalism within educational contexts in the United States. It includes an investigation of the historical and experiential perspectives of different cultural groups as well as an analysis of issues of access, inequality, power, and the distribution of resources. Students should gain an understanding of individual, group, inter-group, and intra-group perspectives, behaviors, and socialization practices regarding identity, relationships, values, ways of knowing, and world views. The central objective of the course is the development of a critical perspective regarding the meaning of multiculturalism and the significance of its role in educational settings.

LSE 254  
THE POLITICS OF EDUCATION  
Undergraduate  
This course examines school and other educational sites as political institutions. It explores the ways in which the goals, the content taught, and the organization of educational institutions are shaped by relations of power and by political trends in society. It also explores schools and classrooms as political terrains in which issues of power are contested along lines of race, class, ethnicity, gender, language, sexual orientation, and other forms of difference. The course considers ways in which schools may reproduce or contest the existing social order. The dynamic interplay of political context and the internal politics of schools will be studied theoretically and through specific issues such as language and immigration policy, affirmative action, educational vouchers, textbook selection, and educational reform movements. This course satisfies the self, society, & modern world requirement.

LSE 258  
EDUCATION AND SOCIAL JUSTICE  
Undergraduate  
A variable topics course designed to examine education within a philosophical framework which focuses upon the relatively great potential of education as an agent for social justice and change. Through the examination of current issues and concerns, students are expected to engage in critical analysis, reflect upon theoretical frameworks, examine public policies and values, and consider ways in which schools and educators can promote the development of social justice. Each time the course is offered it will focus on one of the following topics: gender; ethnicity; language and culture; or social class and economic opportunity. For each topic, attention will be given to the issues of institutional responses to differences, equity, access and outcomes. This course satisfies the self, society, & modern world requirement.
LSE 300
EDUCATION AND LITERATURE
Undergraduate
This course is designed to engage students in critical reflection, commentary, and evaluation of literature, informed by theoretical as well as aesthetic considerations. Literary works will be interpreted and analyzed regarding interactions between form and content, as well as effects of authors' treatment of material upon the construction of meaning. Primary goals are the enhancement of understanding, appreciation and enjoyment of literature. Social and cultural dimensions of literature will also be addressed within the context of examining educational issues such as: what it means to become educated in culturally diverse contexts; construction of identity; the development of values and world views; the individual in relationship to community and/or society; and relationships among artistic works, human experiences and education. This course satisfies the arts and literature requirement.

LSE 310
CONTEMPORARY ISSUES IN EDUCATION
Undergraduate
This is a variable topics course which examines the way current, significant issues affect, and are affected by education. Each quarter the course will focus on a contemporary problem or question with broad social, political, or cultural implications and will examine it from a multicultural perspective. Examples of topics are: homelessness, immigration and public education, privatization and corporate involvement in schools, youth culture and education, or the use and misuse of measures of achievement and ability. The course will explore the topic from multiple perspectives and draw on multiple disciplines. This course satisfies the self, society, & modern world requirement.

LSE 354
CULTURE, CONTEXT AND LEARNING
Undergraduate
This course is based on the premise that learning is situated in the context of dynamic interpersonal relationships through which critical thinking may be fostered and ideas challenged. Students will examine the intellectual, emotional, and intrapsychic processes by which knowledge is constructed and shaped by cultural meanings which validate particular forms of thought and structures of knowledge. Various theories of learning will be discussed as they inform educational practices and their underlying assumptions will be examined. In addition, this course will engage the cultural nature of all human activity, cognitive processes, and bodies of knowledge. Attention will be given to their historical role of race and class as they determine what bodies of knowledge and processes of learning are validated within the dominant culture. Students will engage in self-reflective experiences, theoretical analyses, and community based activities to examine the various meanings constructed as people learn within social and cultural contexts. This course satisfies the self, society, & modern world requirement.

LSE 362
IDENTITY AND EDUCATION
Undergraduate
This variable topics course will focus upon how individuals and groups take on identities and how education and schooling affect the process. It will use multiple perspectives and a variety of contexts (such as family, community, nation, and international communities) to analyze how notions of self are developed, forged, and named and how these notions change over time. It will also examine how identities are constructed in relationship to issues such as ethnicity, class, gender, sexual orientation, language, religion, culture, age, and ability and their interconnections in the lived experience of individuals and groups. This course satisfies the self, society, & modern world requirement.

LSE 380
PHILOSOPHICAL ISSUES IN EDUCATION
Undergraduate
This course is a critical inquiry to major philosophical writings in education. This course satisfies the philosophical inquiry requirement.
PREREQUISITE(S): PHL 100; SCU 207 highly recommended.

LSE 404
CHILD REARING ACROSS CULTURES
Graduate
Study of child-rearing practices, the effects of culture on cognitive development and the implications for teaching strategies for the child whose first language is not English.
LSE 420
COMPARATIVE EDUCATION
Graduate
This course is devoted to the study of historical and contemporary issues related to comparative education—with an emphasis upon early childhood, elementary, and secondary levels. Through a comparative study of educational public policy, we will examine assumptions about the aims and purposes of education and schooling in terms of economic, political and social dimensions. Major topics and issues addressed will include the following: examining what it means to be educated; examining similarities and differences in the ways developed and developing countries educate children and youth; the organization and structure of educational institutions; disconcerning implicit and explicit values in different approaches to teaching and learning; relationships between schools and communities; education and the issues of change and social justice.

LSE 430
EDUCATION AND SOCIAL JUSTICE
Graduate
A variable-topics course designed to examine education within a philosophical framework which focuses upon the relatively great potential of education as an agent for social justice and change. Through the examination of current issues and concerns, students are expected to engage in critical analysis, reflect upon theoretical frameworks, examine public policies and values, and consider ways in which schools and educators can promote the development of social justice. Each time the course is offered it will focus on one of the following topics: gender; ethnicity; language and culture; or social class and economic opportunity. For each topic, attention will be given to the issues of institutional responses to differences, equity, access and outcomes. (CROSS-LISTED with LSE 258)

LSE 438
GENDER AND EDUCATION
Graduate
A variable-topics course designed to actively engage students in examination of the literature and issues related to gender and education. Curriculum, teaching and learning, achievement, and the organization structure and culture of schools are among the key concerns. Gender will be addressed as it intersects with other forms of inequality and difference: race, ethnicity, class, etc. Each time the course is offered it will focus on a particular topic, but for each topic attention will be given to issues about institutional responses to inequality and differences.

LSE 450
DYNAMICS OF AFRI CAN-AMERIC AN CULTURE
Graduate
This course is intended for those interested in cultural and human relations in order that they may examine the contributions of the black person to American Culture; gain a functional understanding of the social, economic and political development of the black person on America itself. (Cross-listed with SOC 490).

LSE 460
INTERNATIONAL STUDIES IN EDUCATION
Graduate
This variable-topics course will focus upon educational issues in a particular country or region outside of the United States. Through comparative study, a number of issues will be addressed: aims and purposes of education and schooling; economic, political, social and cultural contexts of educational policies; similarities and differences in organization and structure of educational systems; relationships between home, community and educational institutions; education, development and issues of social change.

LSE 461
INTERNATIONAL STUDIES IN TEACHING AND LEARNING
Graduate
This variable-topics course will focus upon aspects of curriculum, teaching and learning in a particular country or region outside of the United States. It requires work in the chosen country or region under the guidance of teachers familiar with its educational practices. The course will examine how curriculum is organized, developed and implemented in classrooms and schools with concentration on particular subjects or levels. From a comparative perspective, particular attention will be paid to the values and assumptions underlying curriculum and teaching.
LSE 462
INTERNATIONAL FIELD EXPERIENCES IN EDUCATION
Graduate
Through clinical experience outside of the United States, students will observe, participate in and reflect upon teaching and learning in cultural settings that differ from their own. This field experience abroad provides an opportunity to develop an understanding of what it means to be educated in the context of another society or culture. The intent of this experience is to add more global perspective to one's own professional knowledge and practice. Variable credit, ranging from 2-8 quarter hours can be earned, dependent upon the nature and duration of this field experience.

LSI 96
FIELD EXPERIENCE FOR DUAL CERTIFICATION
Graduate
(non-credit) Required of all Dual Certification students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses. A total of 200 hours are required.

LSI 346
STRATEGIES FOR MAINSTREAMING AND INCLUSION
Undergraduate
Focus will be on the practical problems related to the integration of exceptional children and youth into regular classrooms. Identification, characteristics, programs, curricular variations, and techniques for securing maximum development of students with a variety of special needs with emphasis on learning disabilities. The course also covers historical background, as well as current legal and service provision issues, including mainstreaming and inclusion. PREREQUISITE(S): Junior standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.

LSI 430
INTRODUCTION TO ASSESSMENT OF READING AND LEARNING DISABILITIES
Graduate
This course introduces the student to concepts and procedures in assessment of literacy and learning disabilities. Emphasis will be given equally to a theoretical framework for testing and to practical applications with actual tests. Topics to be covered include standardized testing (test construction, reliability and validity, procedures for administering standardized tests, scoring, test interpretation, non-discriminatory testing, and cultural, linguistic, and technical limitations of standardized tests) criterion referenced assessment (informal, curriculum-based, authentic assessment, portfolio assessment) and, other modes of assessment (interviewing and case histories). The course will examine assessment of various cognitive abilities, oral language, and achievement in reading, spelling, and writing. Candidates will also be introduced to analysis and interpretation of tests, profiling and report writing.

Status as an Education student in the LSI program is a prerequisite for this class.

LSI 431
FOUNDATIONS OF LITERACY: ASSESSMENT AND INSTRUCTION I
Graduate
This course focuses on the nature of the reading process, current literacy theory and practices, and research-based instructional strategies to develop literacy skills in emergent and developing readers and students with reading/learning disabilities. Emphasis will be placed on understanding the reading process, analyzing and applying research-based instructional practices, administering, analyzing, and interpreting formal and informal reading assessments, and making informed instructional decisions to meet the unique needs of individual readers. Differences in reading abilities will be examined in light of providing appropriate, effective, and meaningful literacy instruction.

Status as an Education student in the LSI program is a prerequisite for this class.

LSI 432
DEVELOPING LITERACY: ASSESSMENT AND INSTRUCTION II
Graduate
LSI 432 focuses on the reading, writing and literacy development of the middle and high school student (Grades 5-12). Emphasis will be placed on understanding literacy, the reading process, the interaction of reading and learning, and the connections of reading and writing. All of the above will be examined taking into consideration the physical, emotional, social, and cognitive development of the middle level student, in conjunction with the diverse demands placed upon the student by the schools. In order to comprehend these complex relationships, philosophical approaches, theoretical models, assessment measures and practical implications will be analyzed. Finally, the role of technology in literacy will be examined. (Prerequisite: LSI 431).

LSI 431 and status as an Advanced Masters Education student are a prerequisite for this class.
LSI 433
DIAGNOSIS AND INTERVENTION FOR READING AND LEARNING DISABILITIES
Graduate
This course is designed to give the student an understanding of the characteristics of children with reading and learning disabilities, and of the process of diagnostic evaluation, test interpretation and report writing, and strategies for intervention. It is also designed to give some practical experience with selected tests used in diagnosis. Emphasis will be given to the use of case study material to help the student learn to analyze and interpret assessment data, write diagnostic results, and develop intervention strategies. (Prerequisite: LSI 430).

LSI 434
LITERATURE FOR SUCCESSFUL AND STRUGGLING READERS
Graduate
This course will familiarize students with different genres of quality children's literature and how to select and use books that are appropriate and meaningful for children and youth with and without reading disabilities. Students will discuss, analyze, and critique literary elements (author's style of writing, character development, setting, mood, and theme), determine estimated readability levels, and engage in reader response activities that promote critical discussion and a personal interaction with text. Students will become familiar with authors, illustrators, and books that represent diverse cultures, races, ethnic and ability groups, and develop meaningful literature extensions that support various curricular areas, develop literacy skills, and promote an enjoyment of reading.

Status as an Education student in the LSI program is a prerequisite for this class.

LSI 435
CURRICULUM, COLLABORATION, ADMINISTRATION AND SUPERVISION OF READING PROGRAMS
Graduate
This course will prepare the reading specialist to assume a leadership role within a school or district, to help develop and supervise reading programs, and to be instrumental in integrating good reading practices throughout the curriculum and across grade levels. Students will learn about the leadership role of the reading specialist as they explore the ways in which a reading specialist can be a teacher leader, curriculum developer, and liaison to parents and the community beyond the school.

Status as an Education student in the LSI program is a prerequisite for this class.

LSI 437
LEADERSHIP AND PROFESSIONAL DEVELOPMENT IN READING & LEARNING
Graduate
In this course, an emphasis will be placed on developing the necessary skills to provide leadership, professional development and support to school personnel in the area of literacy, particularly for struggling readers and those with learning disabilities. Students will engage in a variety of activities to promote the development of these skills which include but are not limited to planning and executing a professional development event, evaluating published reading programs to determine their alignment with research-based instructional practices, administering and interpreting findings from standardized measures of academic achievement, instructing others how to interpret findings from standardized measures of achievement and mentoring a colleague in the area of literacy instruction. (Prerequisites: LSI 431, and LSI 432).

LSI 438
READING COMPREHENSION FOR STRUGGLING READERS: LITERATURE-BASED AND CONTENT AREA INSTRUCTION
Graduate
This course is designed to contextualize comprehension strategy instruction in the framework of high-quality children's literature and content-area expository texts. Students will learn think-aloud strategies to use across genres, as well as explicit, research-based instructional practices in comprehension for struggling readers. Opportunities for students to model integrated strategy use with peers and participate in a service-learning project to engage struggling readers in meaningful interactions with texts will be provided. Students will also learn the characteristics of engaging, quality literature and well-structured, accessible expository texts, and apply this learning to support classroom teachers in selecting books to engage K-12 students of a variety of backgrounds and skill levels. The relationship between comprehension and writing instruction will also be explored.

LSI 440
SURVEY OF EXCEPTIONAL LEARNERS: PSYCHOLOGY AND EDUCATION
Graduate
A survey of exceptional learners and characteristics of students with both high- and low-incidence disabilities, with consideration of placements appropriate for children with such disabilities. Emphasis on historical, theoretical, practical and legal implications and issues. The course also addresses the importance of developing and maintaining collaborative relationships with parents and professionals in order to maximize the academic, social, and emotional benefits of all learners.
LSI 442
SURVEY AND CHARACTERISTICS OF THE EXCEPTIONAL LEARNER
Graduate
A survey of exceptional learners and characteristics of students with both high and low incidence disabilities, with consideration of alternative placements appropriate for children with various disabilities including the learning disabled. Emphasis on historical, theoretical, practical and legal implications and issues, as well as on the roles of special education professionals, including consultation and collaboration, in inclusion of exceptional learners.

LSI 443
PSYCHOLOGICAL TESTS AND METHODS IN DIAGNOSIS
Graduate
Principles of measurement and test construction including an evaluation of standardized test instruments. Principles of broad-based assessment involving case history, criterion-referenced tests and informal assessment. Emphasis on understanding the strengths and limitations of a wide variety of assessment instruments.

LSI 446
PSYCHOLOGY AND EDUCATION OF THE EXCEPTIONAL CHILD
Graduate
Identification, characteristics, programs, schools, curricular variations, techniques for securing maximal development. Includes historical background, current legal and service provision issues including mainstreaming and inclusion.

Advanced Teacher Candidate Standing is a prerequisite for this class.

LSI 456
ADVANCED ISSUES AND STRATEGIES IN SPECIAL EDUCATION
Graduate
This course will examine current trends, issues, and strategies in the field of special education. This is an advanced course that will consider topics related to inclusion, overrepresentation, and transition services such as modifying curriculum, positive behavioral supports, collaboration and co-teaching, teacher scheduling, student scheduling, behavioral and academic data collection within general education classrooms, communication with families, developing and implementing IEP's, and managing paraprofessionals. Prerequisite: LSI 442 or LSI 446 or equivalent.

LSI 457
SEMINAR AND RESEARCH IN SPECIAL EDUCATION
Graduate
This course examines current research in special education including topics such as the social construction of special education; the assumptions of deficit vs. difference models of educational services; the overrepresentation of students of color and students from lower socioeconomic status backgrounds in special education; placement settings, inclusion, and service delivery models; and issues related to the short and long-term effects of special education on the lives of students with disabilities. Students select and pursue a topic of research interest and complete a professional portfolio. (Prerequisites: LSI 458, LSI 467, LSI 468, LSI 469).

LSI 458
TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES I
Graduate
Introduction to the theoretical and practical approaches to instruction for students with high incidence disabilities across ages and levels of severity. Emphasis on developing an understanding of supportive learning environments, classroom and behavior management; developing collaborative practices with multiple service providers and families to meet the needs of diverse learners with high incidence disabilities. Strategies and materials for improving the social, emotional, and academic adjustment and functioning of students with high incidence disabilities are examined. Includes teaching social and emotional curricula; developing and implementing functional behavioral assessment; and monitoring growth and development in targeted areas. Strategies to increase the individual's self awareness, self-management, self control, self reliance, and self esteem are considered. (Prerequisite: LSI 442).
**LSI 461**
**COLLABORATIVE PRACTICE AND SPECIAL EDUCATION**
Graduate

The purpose of this course is to develop pre-service teachers' understanding of the importance of developing and maintaining collaborative relationships with parents and professionals in educational environments. Students will develop an understanding of professional and legal responsibilities, networks, organizations, and services available for students with disabilities and their families. Students will also examine various educational models for working collaboratively with teachers, parents, and support personnel in classrooms and schools. Students will articulate a personal philosophy and strategies for working collaboratively with families, teachers, paraprofessionals, and other professionals within educational environments.

**LSI 462**
**INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH DISABILITIES I: ACCESSING GENERAL EDUCATION CURRICULUM**
Graduate

This course focuses general theories of learning, instructional modifications, accommodations, grouping strategies, technology, and assessments used for helping to provide students with disabilities access to general education curricula. Course topics will focus on the effectiveness of these strategies for working with students with mild, moderate, and severe disabilities. Students will begin to articulate a personal philosophy and approaches designed to enhance the educational experiences of children and youth with disabilities and they will begin to examine the relationship between schooling and long term outcomes.

**LSI 465**
**INDUCTION INTO THE FIELD OF EDUCATION**
Graduate

Designed primarily as a culminating course experience at the graduate level, this course utilizes a seminar approach to help students clarify their understanding of issues related to special education, general education, and teaching in urban schools. All students will prepare a portfolio based on their experiences within the graduate program. These portfolios will contain evidence of each student's development during the program and students will make connections between their own theoretical, philosophical, and professional orientations and the Urban Professional Multicultural Model.

**LSI 467**
**TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES II**
Graduate

Continued study of the theoretical and practical approaches to instruction for students with high incidence disabilities across ages and levels of severity. Translation of diagnostic information into teaching strategies and development of an instructional plan (IEP) including transition needs. Emphasis on understanding theoretical models of literacy, literacy development, instructional strategies, and adjusting literacy instruction to meet the needs of diverse learners. Principles of diagnostic teaching will be discussed. Specific teaching techniques and materials will be reviewed, including appropriate uses of technology. (Prerequisite: LSI 442).

**LSI 468**
**TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES I**
Graduate

Introduction to the theoretical and practical approaches to instruction of children with low incidence disabilities including functional assessment and instructional strategies, curricular options and adaptations, as well as levels of participation and accommodation in the general curriculum. Emphasis will be placed on understanding theoretical models of language development and communication, instructional strategies for language and communication, and adjusting language instruction to meet the needs of diverse learners. Candidates will explore individualized planning (IEPs), transition needs, integration of related services into the instructional program, and strategies and materials for improving the social, emotional, and academic functioning of diverse students with low-incidence disabilities. (Prerequisite: LSI 442).

**LSI 469**
**TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES II**
Graduate

Continued study of the theoretical and practical approaches to instruction for diverse students with low incidence disabilities. Focuses on addressing the intellectual, educational, physical, motor, health, social, and transitional needs of diverse students with more severe low incidence disabilities. Examination of etiological factors, growth, development, and long-term outcomes. Developing collaborative efforts with family and multiple care and service providers is addressed. Provides strategies to facilitate maintenance and generalization of both academic and non-academic skills across learning environments. Includes experiences with assistive technology, community-based instruction, and designing and implementing a functional curriculum when needed. (Prerequisite: LSI 442).
LSI 475
METHODS OF TEACHING EARLY CHILDHOOD STUDENTS WITH LOW INCIDENCE DISABILITIES
Graduate
This course will focus on examining the developmental and learning characteristics of young children with low incidence disabilities. In specific, this course will focus on educating early childhood students with Autism Spectrum Disorders and those with Intellectual Disabilities. One of the primary goals of this course is to understand the learning needs of these children, and examine and evaluate various educational and therapeutic methods of working with them. A major part of this course will be devoted to characteristics associated with and interventions for children with Autism Spectrum Disorders.

LSI 476
SPECIAL EDUCATION CURRICULUM AND STRATEGIES FOR EARLY CHILDHOOD: HIGH INCIDENCE DISABILITIES
Graduate
Study of the theoretical and practical approaches to instruction for young children with high incidence disabilities. Emphasis placed on the development of supportive learning environments, using special curricular and behavioral management strategies for all early childhood settings; application of collaborative practices with multiple service providers and families to meet the needs of diverse learners with high incidence disabilities. Strategies and materials for improving the social, emotional, and academic adjustment and functioning of young children with high incidence disabilities are examined. Includes teaching social and emotional curricula, implementing functional behavioral assessment; and monitoring growth and development in targeted areas. Strategies to increase the young child are self-awareness, self-management, self control, self reliance, and self esteem are considered. Application of diagnostic information into teaching strategies and implementation of an instructional plan (IEP) is a central tenet of the course. (Pre-requisite: SCG 404 and T&L 427) 25 clock hours for Level II Experience.

LSI 542
TESTING/DIAGNOSIS OF READING & LEARNING DISABILITIES:PRACTICUM I
Graduate
Students participate in a clinical setting and evaluate children and adolescents with suspected learning problems. Under close instructor supervision, students will administer and interpret tests, deal with the ethics of testing, interpret and communicate results to parents, schools and other social agencies. (PREREQUISITES: LSI 430, LSI 431, LSI 432, LSI 433, LSI 434, LSI 435, LSI 436 and status as an Advanced Masters Education student are a prerequisite for this class.

LSI 543
DIAGNOSIS AND REMEDIATION OF LEARNING DISABILITIES:PRACTICUM II
Graduate
Clinical observation and practical application of the diagnostic-remedial process by working in a supervised clinical setting with children and adolescents who have specific learning disabilities. (PREREQUISITES: LSI 430, LSI 431, LSI 432, LSI 433, LSI 434, LSI 435, LSI 436 and status as an Advanced Masters Education student are a prerequisite for this class.

LSI 544
DIAGNOSIS AND REMEDIATION OF LEARNING DISABILITIES:PRACTICUM III
Graduate
Clinical observation and practical application of the diagnostic-remedial process by working in a supervised clinical setting with children and adolescents who have specific reading disabilities. (PREREQUISITES: LSI 430, LSI 431, LSI 432, LSI 433, LSI 434, LSI 435, LSI 436 and status as an Advanced Masters Education student are a prerequisite for this class.

LSI 548
INDEPENDENT STUDY IN READING AND OTHER LEARNING DISABILITIES
Graduate
REREQUISITE(S): Permission of instructor, department chair and associate dean.

LSI 549
THESIS RESEARCH IN SPECIALIZ ED INSTRUCTION
Graduate
A Master of Arts candidate conducts original research, writes a thesis, and presents an oral defense before a committee of faculty members. PREREQUISITE(S): SCG 410 and approved thesis proposal.
LSI 552  
**PRACTICUM EXPERIENCE WITH HIGH INCIDENCE DISABILITIES**  
**Graduate**  
Six weeks of supervised field experience in a cooperating school working with students with high incidence disabilities, together with structured opportunities for feedback and discussion of issues and problems encountered. (Prerequisites: LSI 458, and LSI 467).

LSI 553  
**PRACTICUM EXPERIENCE WITH LOW INCIDENCE DISABILITIES**  
**Graduate**  
Six weeks of supervised field experience in a cooperating school working with low incidence disabilities, together with structured opportunities for feedback and discussion of issues and problems encountered. (Prerequisites: LSI 468, and LSI 469).

LSI 585  
**STUDENT TEACHING AND SEMINAR IN SPECIAL EDUCATION-ELEMENTARY EDUCATION**  
**Graduate**  
Five school days per week in supervised teaching experience for a full academic quarter. Students will also attend a student teaching seminar one day per week where they will discuss issues related to this experience. Faculty advisors and the Director of Student Teaching, working in conjunction with individual students, will determine appropriate student teaching placements. (Prerequisite: Permission required).

LSI 597  
**EARLY CHILDHOOD EDUCATION SPECIAL EDUCATION PRACTICUM**  
**Graduate**  
Supervised teaching in a cooperating school serving young children with disabilities for three hundred clock hours; arranged in collaboration with supervising faculty member and the Field Experience Office. Candidates will reflect upon their teaching experiences with young children with disabilities; collaborate with colleagues and instructor to identify alternative strategies for problematic situations. PREREQUISITE(S): Application and approval required. Open only to DePaul students.

LSI 600  
**REGISTERED STUDENT IN GOOD STANDING**  
**Graduate**  
(0 credit) Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. $50 per quarter.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

LSI 606  
**REVIEW OF LITERATURE**  
**Graduate**  
This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., reviewing and synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching data bases. In other words, students will need to be able to ask and answer such questions as "What is known about? What are major issues and themes?"

LSI 607  
**INTEGRATIVE PAPER**  
**Graduate**  
Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of a theory, or conversely, developing/refining a theory based on investigations made in the field. In other words, as graduates encounter new theories and practices they will need to be able to investigate and evaluate them, asking and answering questions about "How theories work."
LSI 608
CAPSTONE IN LANGUAGE, LITERACY, AND SPECIALIZED INSTRUCTION
Graduate
Culminating experience(s) that help(s) students acquire the qualities of professionalism and leadership needed to play a significant role in
one's professional education community. Students are expected to situate and understand educational issues in a larger context; keep current
in and be able to organize and present a body of research on an education-related question; connect research with practical, professional
activity; demonstrate mastery of a sub-field of a discipline; write in a format that meets accepted scholarly criteria and participate in an
ongoing professional conversation. A final product such as master's paper(s), comprehensive exam, or collection of professional work
products is required.

LSI 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for
their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required.
Registration limited to three terms. $50 per quarter.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

LSP 110
DISCOVER CHICAGO
Undergraduate
Discover Chicago courses acquaint first-year DePaul students with the metropolitan community, its neighborhoods, cultures, people,
institutions, organizations and urban issues. Students also learn about university life, resources, and strategies for how to achieve
academically. Learning is accomplished through a variety of means, but particularly through first-hand observation, active participation,
personal discovery, and reflection. The course begins with an immersion week one week prior to the official start of the autumn quarter.
Classes continue to meet throughout the autumn quarter. Topics for Discover Chicago courses vary and students select one of interest and
then investigate the subject using Chicago as a learning lab and site of discovery. First-year students must register for either LSP 110 or LSP
111. Students will receive credit for only one section of LSP 111, Explore Chicago or LSP 110, Discover Chicago. Students who received credit
for LSP 111 cannot receive credit for LSP 110. Courses offered during the autumn quarter and available to first-year students only. Formerly
ISP 103.

LSP 111
EXPLORE CHICAGO
Undergraduate
Explore Chicago courses acquaint first-year DePaul students with the metropolitan community, its neighborhoods, cultures, people,
institutions, organizations, and issues. Students also learn about university life, resources, and strategies for how to achieve academically.
Learning is accomplished through a variety of means, but particularly through lecture, discussion, guest lecturers, first-hand observation,
active participation, personal discovery, and reflection. Topics for Explore Chicago courses vary and students select one of interest, and then
investigate the subject area using Chicago as a backdrop of inquiry. First-year students must register for either LSP 110 or LSP 111 . Students
will receive credit for only one section of LSP 110, (Discover Chicago) or LSP 111, (Explore Chicago). Students who received credit for LSP
110 cannot receive credit for LSP 111. Courses offered during the autumn quarter and available to first-year students only. Formerly ISP 102.

LSP 112
FOCAL POINT SEMINAR
Undergraduate
Focal Point Seminars provide first-year DePaul students with the opportunity to learn how to closely examine a single topic, such as: a well-
known person, place, event, issue, or text. Students discover the complexity of a subject by studying it from the perspectives of multiple
disciplines and different fields of inquiry, and by reading and extensively writing about it. Because the class is a seminar, students also debate
the topic through lively class discussions. Topics for Focal Point Seminars vary, and students have the opportunity to select a seminar that
piques their curiosity, and connects with intellectual goals and interests. Students will receive credit for only one section of LSP 112, Focal
Point Seminar. Courses available to first-year students only. Formerly ISP 101.

WRD 103 or HON 100 is a prerequisite for this class.
LSP 120
QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
Undergraduate
This course provides a mathematical foundation for students to become confident and critical users of quantitative information of all kinds: numerical, graphical, and verbal. Students analyze data from a wide variety of fields, making and critiquing quantitative arguments. Mathematical topics include proportional reasoning and rates, the making and interpretation of graphs, linear and exponential models, logarithms, and finance. The course is taught in a hands-on laboratory environment where students are introduced to computer tools for data analysis and presentation. PREREQUISITE(S): MAT 100, MAT 101, or demonstrating readiness via the math placement test taken at matriculation. As an alternative to taking LSP 120, this requirement can be met by passing a separate LSP 120 Proficiency Exam (see qrc.depaul.edu). A student whose major requires calculus is exempt from this requirement. Formerly ISP 120.

ISP 110 or MAT 100 or MAT 101 or placement by test is a prerequisite for this class.

LSP 121
QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II (FORMERLY ISP 121)
Undergraduate
This course provides more advanced mathematical and computational methods in the analysis and interpretation of quantitative information. Topics include databases, descriptive statistics, measures of association and their interpretation, elementary probability theory, and an introduction to algorithms and computer programming. The course is taught in a hands-on laboratory environment where students are introduced to advanced computer tools for data analysis, including databases and a professional statistical software package. PREREQUISITE(S): LSP 120 or a passing score on the LSP 120 Proficiency Exam. As an alternative to taking LSP 121, this requirement can be met by passing a separate LSP 121 Proficiency Exam (see qrc.depaul.edu). A student whose major requires calculus is exempt from this requirement. Formerly ISP 121.

LSP 120 or (MAT 147 or above) is a prerequisite for this class.

LSP 200
SEMINAR ON MULTICULTURALISM IN THE UNITED STATES
Undergraduate
This course provides the opportunity for students to learn about some dimension of multiculturalism relevant to the United States, as considered in the context of the global community. Multiculturalism includes questions of ethnicity, race, class, gender, language, religion, and sexual orientation. Courses pay attention to the history of multiculturalism; examine the experiences and perspectives of at least three distinct cultural groups; develop a critical perspective about meanings of multiculturalism; and investigate the historical roots of inequalities related to differences in class, ethnicity, gender, age, language, religion, ability, and sexual orientation. Topics of seminars vary and students select a course that interests them. Students can complete only one course numbered LSP 200. Formerly ISP 200.

LSP 320
PEER EDUCATION THEORY AND PRACTICE
Undergraduate
This course is designed to introduce students to the principles and practices of how to mentor first-year students into the academic, intellectual and social life of the University. The course also prepare students to serve, if selected, as peer educators for incoming students in the upcoming autumn quarter. Formerly ISP 320.

LSP 321
PEER EDUCATION THEORY AND PRACTICE II (FORMERLY ISP 321)
Undergraduate
This course is designed to support students chosen to serve as peer educators to the principles and practices of how to mentor first-year students into the academic, intellectual and social life of the University. Formerly ISP 321.

LST 200
FOUNDING MYTHS AND CULTURAL CONQUEST IN LATIN AMERICA
Undergraduate
This course challenges students to connect the cataclysmic formation of the Latin Americas from the cultures of Europe, Africa, and the Native (indigenous) peoples with the processes that inform our modern world. Colonialism, social stratification and forms of conflict and rebellion all played pivotal roles in the formation of Latin America from origins to the 18th century. The history and culture of the region is presented from many perspectives and across many disciplines.
LST 201
STRUGGLE AND RESISTANCE IN LATIN AMERICA
Undergraduate
Latin America is more than a geographical reality. This interdisciplinary course asks how Latin America has been forged through local and global struggles for economic sovereignty, political self-determination, social and cultural identities in the 19th, 20th, and 21st centuries. Students will be introduced to the histories of economic dependence after the dawn of political independence, the intertwined dynamics of U.S. interventionism and Latin American resistance, the making of indigenous movements, as well as the interrelated issues of gender, race, and sexuality.

LST 202
CONSTRUCTING LATINO COMMUNITIES
Undergraduate
This course is an interdisciplinary introduction to Latino Studies. It explores the socio-historical background of the major Latino groups in the United States, and the economic, political, and cultural factors that converge to shape Latino group identity. This course examines contemporary issues affecting Latinos including the evolution of Latino ethnicity, immigration, transnationalism and the formation of Latino communities, activism, and media representations of Latinos.

LST 203
MEDIA AND CULTURAL STUDIES ACROSS THE AMERICAS
Undergraduate
LST 203 is an introduction to media and cultural studies with a specific focus on cultural transactions in the American hemisphere, particularly as they reflect the relationship of the U.S. to Latin America, Central America, Mexico, and the Caribbean. This course studies the history of national and cultural identities and social struggle, especially with regard to a north/south relationship, imperialism, revolution and social change, tourism, globalization, postcolonialism and the construction of gender, sexuality, race, and ethnicity. Students examine how relationships across the Americas have been depicted in popular culture and the social and political meanings of these representations.

LST 243
SURVEY OF LATIN AMERICAN ART (CROSS-LISTED AS ART 243)
Undergraduate
This course offers an overview of the principal developments in the history of Latin American art, from prehistoric times to the modern period. The course will view pre-Columbian, colonial and modern Latin American art contextually as artistic traditions are considered in light of major historical changes. (Cross-listed with ART 243)

LST 247
ART OF THE ANCIENT AMERICAS (CROSS-LISTED AS HAA 245)
Undergraduate
This class surveys the art of the ancient Americas (circa 1000BC-1520AD), with a focus on the most artistically significant civilizations of Mesoamerica and South America and some of the difficulties encountered in studying them. Lectures will explore visual traditions as diverse as the people they reflect; cultures to be covered include the Olmec, Maya and Aztec of Mesoamerica, and the Moche and Inca of Peru. Course material will constantly probe the relationship between the visual forms studied and their likely political and/or social function; however, especially because of the scarcity of primary source texts, the class will also regularly raise questions of methodology in pre-Columbian scholarship. Students should emerge from the class with a grasp of the contribution of specific scholars of pre-Columbian art, with an appreciation of some of the problems of its study, and with the understanding of some of the most significant-and heterogeneous-artistic forms from the ancient Americas. Cross-listed as HAA 245.

LST 248
ART IN THE SPANISH AMERICAN EMPIRE (CROSS-LISTED WITH HAA 246/ CTH 250)
Undergraduate
This course offers a critical survey of the art of colonial Latin America (circa 1520s-1820s), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the 16th century and Independence in the early 19th century, lectures will survey state-sanctioned arts of the Iberian colonizers, including the foundations of the Catholic Church across the "New World" landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context.. Cross-listed with HAA 246 and CTH 250.
LST 249
MODERN LATIN AMERICAN ART (CROSS-LISTED WITH HAA 247)
Undergraduate
This lecture class is a survey of Latin American art created since the Wars of Independence which helped to create the modern nations in the 19th century (i.e. 1820s through the present). Lectures consider the struggle of artists to articulate newly sovereign identities through visual production, even as complicated relationships with Europe and increasingly, the United States, continue. Topics covered include Latin American modernism, surrealism, radical arts, and social realism, with a special consideration of post-revolutionary Mexican mural painting. Cross-listed with HAA 247.

LST 290
LATINO RELIGIOUS EXPERIENCE IN THE UNITED STATES (CROSS-LISTED AS REL 113)
Undergraduate
An examination of the diverse nature of Latino religion, from its indigenous roots to its institutional forms, within the social and political context of American culture. Cross-listed with REL 113.

LST 291
LOOKING FOR GOD IN LATIN AMERICA (CROSS-LISTED AS REL 291)
Undergraduate
An examination of religious traditions such as Catholicism, indigenous religions, and Protestantism in Latin America, with special focus on how these traditions have been transplanted and reshaped upon entry into varied Latino communities in the United States. Historical analyses of the Latin American roots of these traditions will provide contextualization for the ongoing examination of transnational religious cultures in the U.S. Cross-listed with REL 291.

LST 300
SPECIAL TOPICS IN LATIN AMERICAN STUDIES
Undergraduate
SPECIAL TOPICS IN LATIN AMERICAN STUDIES

LST 303
BORDER MATTERS: LITERATURE & CULTURE IN THE LATINO/ A BORDERLANDS
Undergraduate
In this course we will study the values and dynamic that is promoted in different Latino communities in the United States. In order to give context to the present situation of Latinos in the U.S. we will study some of the social issues in the countries of origin which have resulted in immigration and their encounter with borderlands. The notion of a Latina and Latino cultural “borderlands” has proven a ubiquitous and powerful conceptual paradigm in recent years, organizing distinct ethnic groups (Cuban American, Mexican American, Central American, Puerto Rican, etc.) according to the rubrics of pan-ethnic identity labels (Hispanic, Latina/Latino, etc.) and transnational geographies (Latin America, the Americas, etc.). This course will examine a wide range of Latino/a literary expressions produced in the Latina/Latino borderlands, particularly in areas of cultural contact and conflict. While the most obvious focus will be the Texas-Mexico border region, including ongoing efforts to establish the public meaning of the Alamo, additional borderlands, literal and figurative, will be considered. The Latina and Latino borderlands have also inspired critics and theorists to imagine postmodern, post national subject formations, in which questions of ethnicity, gender, and sexuality are shifted from the margins to the center of critical discourse. We will therefor investigate the use and limits of recent “border theory”.

LST 305
LATINO COMMUNITIES AND SOCIAL ENGAGEMENT
Undergraduate
In-depth, critical examination of different Latino communities. Topics include: Mexican-American Community, Puerto Rican Community and Cuban-American Communities.

LST 306
LATINO COMMUNITIES IN CHICAGO
Undergraduate
This course studies Latino Communities, focusing on their cultural and historical constructions from a community based learning experience.

LST 307
GROWING UP LATINO/ LATINA IN THE U.S.
Undergraduate
A critical as well as a community based examination of the experiences of growing up as a Latino/Latina person in the United States.
LST 308
MOTHERHOOD IN LATINO COMMUNITIES
Undergraduate
This is an intellectual, as well as a community based exploration of motherhood in Latino communities and the theories of motherhood in feminist criticism throughout Latin America. Other topics: fatherhood, the extended family and the community as family.

LST 309
SOCIAL ENGAGEMENT AND LATINO FAMILIES
Undergraduate
Social Engagement And Latino Families

LST 310
SPECIAL TOPICS: LATINOS IN THE U.S.
Undergraduate
SPECIAL TOPICS: LATINOS IN THE U.S.

LST 311
CONTEMPORARY ISSUES AND SOCIAL ENGAGEMENT
Undergraduate
Contemporary Issues And Social Engagement

LST 312
LATINA/O SEXUALITIES
Undergraduate
In this course the construction of sexuality as experienced by Latina/os will be examined through the analysis of recent interdisciplinary scholarship, literary selections and other popular cultural forms. We consider how gender and sexuality are constructed, enacted, represented, and communicated in a range of Latino/a communities and subcultures. Our analysis of readings/films/music will allow us to understand the changing and contested meanings of gender and sexuality within Latino/a culture.

LST 321
GLOBALIZATION IN THE AMERICAS
Undergraduate
In this course, we examine the processes of globalization in the Americas. The world seems to be a smaller place--accessible through the internet and global markets--and national borders seem to be more porous than ever before. Various agents--corporations, people, political organizers and organizations--are able to work on a global scale. Many critics argue that globalization has created a larger division between the wealthy and the poor. How has globalization affected the way we live our lives? In this course, we discuss the many debates around globalization and the political situation in Latin America, North America, and the Caribbean as well as the global justice movements that address inequity and injustice. You will become familiar with these debates and their histories, particularly with the growing anti-globalization position taken by many political leaders in Latin America. In this course, you will take a position regarding this contemporary political arena and become well-acquainted with various trends, policies, and activist movements around globalization. You will analyze your place in this political arena and determine how you will negotiate your position. We discuss the impact of various international organizations and trade agreements, from IMF, the World Trade Organization, the UN, the Organization of American States, NAFTA, and the Free Trade Area of the Americas. We will analyze the protest movements in Cancun and Seattle. We look at the increasing tourist apartheid in different parts of the Americas, particularly in the Caribbean. We discuss the impact and organization of international activism from anti-globalization movements to global justice movements. We will discuss and debate strategies for resistance. We access many of these issues through cultural productions (film, tv, advertisements, etc) that address the difficult dilemmas of neo-liberalism (rule of the market).

LST 322
MEXICAN CINEMA
Undergraduate
In this course we analyze the history and practice of a national cinema in relation to government film policy, filmmaking practices and programs, intellectual and cultural context, and national and popular concerns. We study various facets of Mexican cinema from conceptions of race/gender/sexuality, major figures of cinema, and the current conditions of Mexican Cinema. We will explore Mexican Cinema in relation to other film industries of the Americas, especially in relation to the United States and Hollywood and to the oppositional political practices of the New Latin American cinema of the sixties and seventies.
LST 330
LATINOS IN EDUCATION
Undergraduate
This course examines historical and current issues related to the education of Latinos in the US that range from PK-12 to higher education. The course explores the sociolinguistic, historical, sociocultural, legal and political contexts that shape the educational experiences of Latinos in the US, paying particular attention to policy and the current state of affairs in the education of Latinos. The Latino Diaspora will also be explored.

LST 336
EXPERIENCING MEXICAN ART
Undergraduate
The history of Mexican art in the Modern era. Some sections of this course will engage students in studio problems that address specific issues in the history of Mexican culture.

LST 338
COLONIAL LATIN AMERICAN ART
Undergraduate
This course will survey painting, sculpture, architecture, and the decorative arts in the Americas from contact with Europe up through independence movements of the 19th century. Special attention will be given to the intersection of artistic production with broad social, economic and political trends.

LST 348
INDIGENOUS POLITICAL STRUGGLES
Undergraduate
This course explores the struggles for social justice and the right to have rights by indigenous peoples. It emphasizes contemporary cases and the cultural contexts in which indigenous political strategies have developed and transformed. It uses historical data to understand the issues faced by indigenous peoples. Students conduct research on indigenous struggles and their connections to other social movements at the local, national, and international levels.

LST 390
SENIOR SEMINAR (CROSS-LISTED AS SOC 390 & INT 301)
Undergraduate
A capstone course that integrates the students' prior course work and experiences by allowing the student to define a final culminating project. The seminar functions as a coordinated independent study course with extensive participation of Latin American and Latino Studies Program faculty.

LST 392
INTERNSHIP
Undergraduate
INTERNSHIP

LST 394
THESIS
Undergraduate
THESIS

LST 395
TRAVEL STUDY
Undergraduate
TRAVEL/STUDY

LST 399
INDEPENDENT STUDY
Undergraduate
INDEPENDENT STUDY
The objective of this course is to increase the students’ competence in working with numbers of ordinary arithmetic, using a large variety of practical problems and situations from basic sciences as motivation. Formerly WRC 104.

An introduction to functions, linear equations, linear inequalities, absolute values, systems of linear equations, exponents, and polynomials. Formerly WRC 204.

MAT 094 or placement is a prerequisite for this course.

An introduction to the algebra needed for quantitative reasoning with a focus on functions and modeling. This course emphasizes the applications of elementary algebra and the use of functions to model and analyze real-world situations. Topics include functions from graphical, tabular, and symbolic points of view and models using linear, quadratic, power, exponential, and logarithmic functions. Graphing technology is extensively used. This course is prerequisite to LSP 120 and is intended for students continuing on to LSP 120. This course is not recommended for students whose plan of study includes calculus.

MAT 094 or placement is a prerequisite for this course.

Functions, factoring, rational expressions, roots, radicals, quadratic equations, quadratic inequalities.

MAT 095 is a prerequisite for this class.

This course gives students a deeper understanding of the foundations of elementary mathematics. Topics include problem solving, number systems, the decimal system, the number line, rounding, fractions, percentages, addition and subtraction.

MAT 101 or LSP 120 or equivalents or placement by test is a prerequisite for this class.

This course gives students a deeper understanding of the foundations of elementary mathematics. Topics include problem solving, fractions, percentages, addition, subtraction, multiplication, and division.

MAT 110 is a prerequisite for this class.

Students with very little mathematical background and little or no computing background will be given a brief introduction to the use of Microsoft Excel for mathematical purposes. This will be followed by a brief discussion of chance, gambling, and probability. Several popular games (such as lotteries, roulette, craps, and poker) will be considered both from a theoretical point of view and by means of very simple computer simulation. At the end, we will discuss briefly topics from game theory such as zero-sum games and game with cooperation.

MAT 094 or placement is a prerequisite for this course.
MAT 115  
MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS III  
Undergraduate  
Continuation of Math 110-111.

MAT 111 is a prerequisite for this class.

MAT 130  
PRECALCULUS  
Undergraduate  
Functions and their graphs, exponential and logarithmic functions, inverse functions, polynomial and rational functions.

MAT 101 or placement by test is a prerequisite for this class.

MAT 131  
TRIGONOMETRY  
Undergraduate  
Trigonometric functions, inverse trigonometric functions, trigonometric identities, laws of sines and cosines, polar coordinates and complex plane.

MAT 130 or equivalents or placement by test is a prerequisite for this class.

MAT 135  
BUSINESS CALCULUS I  
Undergraduate  
Differential calculus of one or more variables with business applications. Formerly BMS 125.

MAT 130 or equivalent is a prerequisite for this class.

MAT 136  
BUSINESS CALCULUS II (FORMERLY BMS 126)  
Undergraduate  
Integral calculus, matrix algebra, and probability theory with business applications. Formerly BMS 126.

BMS 125 is a prerequisite for this class.

MAT 137  
BUSINESS STATISTICS  
Undergraduate  
Basic concepts of statistics and applications; data analysis with the use of Excel; theoretical distributions; sampling distributions; problems of estimation; hypothesis testing; problems of sampling; linear regression and correlation. Formerly BMS 142.

MAT 136 or equivalent is a prerequisite for this class.

MAT 140  
DISCRETE MATHEMATICS I  
Undergraduate  
Combinatorics, graph theory, propositional logic, singly-quantified statements, operational knowledge of set theory, functions, number systems, methods of direct and indirect proof.

MAT 130 or above or equivalents or placement by test is a prerequisite for this class.

MAT 141  
DISCRETE MATHEMATICS II  
Undergraduate  
Methods of direct and indirect proof, set theoretic proofs, sequences, mathematical induction, recursion, multiply-quantified statements, relations and functions, complexity.

MAT 140 is a prerequisite for this class.
MAT 147
CALCULUS WITH INTEGRATED PRECALCULUS I
Undergraduate
Limits, continuity, the derivative, rules of differentiation, and applications, with precalculus review included for each topic. The full MAT 147-8-9 sequence will cover all the material of MAT 150-1-2 plus additional precalculus material.

MAT 130 or equivalents or placement by test is a prerequisite for this course.

MAT 148
CALCULUS WITH INTEGRATED PRECALCULUS II
Undergraduate
Extrema, curve sketching, related rates, definite and indefinite integrals, applications of the integral, exponential and logarithmic functions, with precalculus review included for each topic.

MAT 147 is a prerequisite for this class.

MAT 149
CALCULUS WITH INTEGRATED PRECALCULUS III
Undergraduate
Techniques of integration, L'Hopital's rule, improper integrals, Taylor polynomials, series and sequences, first-order differential equations, with precalculus review included for each topic.

MAT 148 is a prerequisite for this class.

MAT 150
CALCULUS I
Undergraduate
Limits, continuity, the derivative, rules of differentiation, exponential and logarithmic functions, related rates and other applications.

MAT 131 or placement by test is a prerequisite for this course.

MAT 151
CALCULUS II
Undergraduate
Applications of the derivative, extrema, curve sketching, definite and indefinite integrals, applications of the integral.

MAT 150 or MAT 160 or MAT 170 is a prerequisite for this class.

MAT 152
CALCULUS III
Undergraduate
Techniques of integration, L'Hopital's rule, improper integrals, series and sequence Taylor polynomials.

MAT 151 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 160
CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I
Undergraduate
Limits, continuity, the derivative, rules of differentiation, exponential and logarithmic functions, related rates and other applications. Course meets for an additional 1.5 hour lab session each week in order to cover the material in greater depth. Students considering a math major are advised to take the 160 or 170 sequence.

MAT 131 or placement by test is a prerequisite for this class.
MAT 161  
CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS II  
Undergraduate  
Applications of the derivative, extrema, curve sketching, definite and indefinite integrals, applications of the integral. Course meets for an additional 1.5 hour lab session each week in order to cover the material in greater depth.

MAT 150 or MAT 160 or MAT 170 is a prerequisite for this course.

MAT 162  
CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS III  
Undergraduate  
Techniques of integration, L'Hopital's rule, improper integrals, series and sequences, Taylor polynomials. Course meets for an additional 1.5 hour lab session each week in order to cover the material in greater depth.

MAT 151 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 170  
CALCULUS I WITH SCIENTIFIC APPLICATIONS  
Undergraduate  
The course will cover the following topics using examples from the sciences: Functions as models, logarithmic scale graphing, exponential growth and decay, difference equations and limits of sequences, geometric series, functions and limits, trigonometric functions and their limits, continuity, limits at infinity, the derivative, differentiation rules, derivatives of trigonometric and exponential functions, related rates, derivatives of inverse and logarithmic functions. Course meets for an additional lab session each week during which time students will work on applied mathematics projects based on the topics covered in the course. Students majoring in the sciences should consult with their major department to decide between the 160 and 170 sequences.

MAT 131 or placement by test is a prerequisite for this class.

MAT 171  
CALCULUS II WITH SCIENTIFIC APPLICATIONS  
Undergraduate  
The course will cover the following topics using examples from the sciences: Applications of the derivative including approximation and local linearity, differentials, extrema and the Mean Value Theorem, monotonicity and concavity, extrema, inflection points, graphing, L'Hospital's Rule, optimization, and the Newton-Raphson method, antiderivatives, the definite integral, Riemann sums, the Fundamental Theorem of Calculus, area, cumulative change, average value of a function, and techniques of integration: substitution rule and integration by parts. Course meets for an additional lab session each week during which time students will work on applied mathematics projects based on the topics covered in the course.

MAT 150 or MAT 160 or MAT 170 is a prerequisite for this class.

MAT 172  
CALCULUS III WITH DIFFERENTIAL EQUATIONS  
Undergraduate  
This course is designed for students in the life sciences and covers some topics from MAT 152, differential equations and an introduction to the Calculus of functions of several variables. Specific topics are as follows. Numerical integration, partial fraction expansions, Taylor approximations of a function, differential equations, separation of variables, slope fields, Euler's existence theorem, polygonal approximations to solutions of differential equations, the logistic equation and allometric growth models, equilibria of differential equations and their stability, applications of stability theory, functions of several variables, partial derivatives, directional derivative and the gradient. Course meets for an additional lab session each week during which time students will work on applied mathematics projects based on the topics covered in the course.

MAT 151 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 207  
HISTORY OF PROBABILITY AND STATISTICS  
Undergraduate  
History Of Probability And Statistics
MAT 215
INTRODUCTION TO MATHEMATICAL REASONING
Undergraduate
An introduction to basic concepts and techniques used in higher is mathematics courses: set theory, equivalence relations, functions, cardinality, techniques of proof in mathematics. The emphasis on problem solving and proof construction by students. The department recommends that students take this course no later than the spring quarter of the sophomore year.

MAT 149 or MAT 152 or MAT 162 or MAT 172 is a prerequisite for this class.

MAT 220
LINEAR ALGEBRA WITH APPLICATIONS
Undergraduate
(Primarily for non-mathematics majors.) Systems of linear equations, matrices and matrix algebra, determinants, applications to linear programming, graph theory, etc.

MAT 141 or MAT 148 or MAT 151 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 242
ELEMENTS OF STATISTICS
Undergraduate
Descriptive statistics, elements of probability, the binomial and normal probability models; large and small sample hypothesis testing, correlation and regression analysis. Use of computer packages. This course does not count toward mathematics major credit. Cross-listed with SOC 279.

MAT 101 or above or placement by test is a prerequisite for this class.

MAT 260
MULTIVARIABLE CALCULUS I
Undergraduate
Vectors in 2-space and 3-space, vector-valued functions, cylindrical and spherical coordinates, multivariable functions, partial differentiation with applications to extrema.

MAT 149 or MAT 152 or MAT 162 or MAT 172 is a prerequisite for this class.

MAT 261
MULTIVARIABLE CALCULUS II
Undergraduate
Multiple integration, line and surface integrals, change of variable in multiple integration, Green's and Stokes' theorems.

MAT 260 is a prerequisite for this class.

MAT 262
LINEAR ALGEBRA
Undergraduate
Systems of linear equations and matrices; vectors in n-space; vector spaces: linear combinations, linear independence, basis; linear transformations, change of basis, eigenvalues and eigenvectors.

MAT 260 is a prerequisite for this class.

MAT 301
HISTORY OF MATHEMATICS
Undergraduate
History of mathematics with problem solving.

MAT 141 or MAT 215 is a prerequisite for this class.
MAT 302
COMBINATORICS
Undergraduate
Methods of counting and enumeration of mathematical structures. Topics include generating functions, recurrence relations, inclusion relations, and graphical methods.

MAT 141 or MAT 215 is a prerequisite for this class.

MAT 303
THEORY OF NUMBERS
Undergraduate
A study of properties of integers: divisibility; Euclid's Algorithm; congruences and modular arithmetic; Euler's Theorem; Diophantine equations; distribution of primes; RSA cryptography.

MAT 141 or MAT 215 is a prerequisite for this class.

MAT 304
DIFFERENTIAL EQUATIONS
Undergraduate
Linear equations, systems with constant coefficients, series solutions, Laplace transforms, and applications. Formerly MAT 338. CO-REQUISITE(S): MAT 261.

MAT 261 is a corequisite for this class.

MAT 309
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Undergraduate

SE 364 is a prerequisite for this class.

MAT 310
ABSTRACT ALGEBRA I
Undergraduate
The first quarter of a 3-quarter sequence. Topics in the sequence include the integers; abstract groups, rings, and fields; polynomial rings; isomorphism theorems; extension fields; and an introduction to Galois theory. MAT 303 is highly recommended.

MAT 262 and (MAT 141 or MAT 215) are a prerequisite for this class.

MAT 311
ABSTRACT ALGEBRA II
Undergraduate
Continuation of 310.

MAT 310 is a prerequisite for this class.

MAT 312
ABSTRACT ALGEBRA III
Undergraduate
Continuation of 311.

MAT 311 is a prerequisite for this class.

MAT 320
GEOMETRY I
Undergraduate
Incidence and separation properties of plane; congruence; parallel postulate; area theory; ruler and compass construction.

MAT 141 or MAT 215 is a prerequisite for this class.
MAT 321
GEOMETRY II
Undergraduate
Introduction to solid geometry and noneuclidean geometry (hyperbolic and spherical models); other special topics.

MAT 320 is a prerequisite for this class.

MAT 323
DATA ANALYSIS AND STATISTICAL SOFTWARE I (CROSS-LISTED AS CSC 323)
Undergraduate
Computing with a statistical package. Introduction to data analysis, elementary statistical inference, regression and correlation. This course does not count toward mathematics major credit.

MAT 130 or placement by test is a prerequisite for this class.

MAT 324
DATA ANALYSIS & STATISTICAL SOFTWARE II (CROSS-LISTED WITH CSC 324)
Undergraduate
Advanced features and applications of the statistical package used in 323.

MAT 323 is a prerequisite for this class.

MAT 326
SAMPLE SURVEY METHODS
Undergraduate

MAT 349 or MAT 353 is a prerequisite for this class.

MAT 328
DESIGN OF EXPERIMENTS
Undergraduate
Linear models and quadratic forms. Single, two and several-factor experiments, incomplete designs, confounding and fractional factorial experiments. Response surfaces and partially balanced incomplete block designs.

MAT 349 or MAT 353 is a prerequisite for this class.

MAT 330
METHODS OF COMPUTATION AND THEORETICAL PHYSICS I
Undergraduate
Computational and theoretical methods in ordinary differential equations, complex numbers, systems of equations, phase plane analysis, bifurcations. Applications to damped, driven oscillators, electronics.

MAT 261 is a prerequisite for this class.

MAT 331
METHODS OF COMPUTATION AND THEORETICAL PHYSICS II
Undergraduate
Computational and theoretical methods in ordinary differential equations, complex numbers, systems of equations, phase plane analysis, bifurcations. Applications to damped, driven oscillators, electronics. Lab Fee. COREQUISITE(S): MAT 261.

MAT 261 is a prerequisite for this class.

MAT 335
REAL ANALYSIS I
Undergraduate
Real number system, completeness, supremum, and infimum, sequences and their limits, lim inf, lim sup, limits of functions, continuity.

(MAT 149 or MAT 152 or MAT 162 or MAT 172) and (MAT 141 or MAT 215) are a prerequisite for this class.
MAT 336
REAL ANALYSIS II
Undergraduate
Properties of continuous functions, uniform continuity, sequences of functions, differentiation, integration. To follow 335 in the Winter Quarter.

MAT 335 is a prerequisite for this class.

MAT 337
COMPLEX ANALYSIS
Undergraduate
Complex functions; complex differentiation and integration; series and sequences of complex functions.

MAT 261 and MAT 335 is a prerequisite for this class.

MAT 340
TOPOLOGY
Undergraduate
An introduction to point-set topology: metric spaces, topological spaces, continuity, connectedness, and compactness.

(MAT 141 or MAT 215) and (MAT 220 or MAT 262) is a prerequisite for this class.

MAT 341
STATISTICAL METHODS USING SAS
Undergraduate

MAT 342
ELEMENTS OF STATISTICS II
Undergraduate
Multiple regression, correlation, analysis of variance, time series, and sampling. Course content and emphases will vary with students' needs and backgrounds.

MAT 137 or MAT 157 or MAT 323 or MAT 348 is a prerequisite for this class.

MAT 343
BUSINESS STATISTICS II (FORMERLY BMS 342)
Undergraduate
Multiple regression, correlation, analysis of variance, time series and sampling. Statistical theory applied to business. Use of a statistical computing packages. Course content will vary with the needs and desires of individual students. MAT 137 is recommended.

MAT 348
APPLIED STATISTICAL METHODS
Undergraduate
Introduction to statistical software (which will be used throughout the course). Descriptive statistics; elementary probability theory; discrete and continuous probability models; principles of statistical inference; Simple linear regression and correlation analysis.

MAT 148 or MAT 151 or MAT 161 or MAT 171 is a prerequisite for this class.

MAT 349
APPLIED STATISTICAL METHODS II
Undergraduate
A continuation of Mathematics 348. Multiple regression; analysis of frequency data, ANOVA and some experimental designs; nonparametric inference and time series analysis. Use of statistical software.

MAT 348 is a prerequisite for this class.
MAT 351
PROBABILITY AND STATISTICS I
Undergraduate
Probability spaces, combinatorial probability methods, discrete and continuous random variables and distributions, moment generating functions, development and applications of the classical discrete and continuous distributions.

MAT 261 is a prerequisite for this class.

MAT 352
PROBABILITY AND STATISTICS II
Undergraduate
Joint probability distributions and correlation; law of large numbers and the central limit theorem; sampling distributions and theory of estimation.

MAT 351 is a prerequisite for this class.

MAT 353
PROBABILITY AND STATISTICS III
Undergraduate
Principles of hypothesis testing; most powerful tests and likelihood ratio tests; linear regression; one-way analysis of variance; categorical data analysis, nonparametric statistics.

MAT 352 is a prerequisite for this class.

MAT 354
MULTIVARIATE STATISTICS (CROSS-LISTED WITH MAT 454)
Undergraduate
The multivariate normal distribution. Hypothesis tests on means and variances including the multivariate linear model. Classification using the linear discriminant function. Principal components and factor analysis.

MAT 262 and MAT 353 are a prerequisite for this class.

MAT 355
STOCHASTIC PROCESSES
Undergraduate

MAT 353 is a prerequisite for this class.

MAT 356
APPLIED REGRESSION ANALYSIS
Undergraduate

MAT 353 and (MAT 220 or MAT 262) is a prerequisite for this class.

MAT 357
NONPARAMETRIC STATISTICS
Undergraduate

PREREQUISITE: MAT 349 or 353
MAT 358
APPLIED TIME SERIES AND FORECASTING
Undergraduate
Development of the Box-Jenkins methodology for the identification, estimation, and fitting of ARIMA, and transfer-function stochastic models for the purpose of analyzing and forecasting stationary, non-stationary, and seasonal time series data. The course emphasizes practical time-series data analysis using computer packages and includes applications to economic, business, and industrial forecasting. Cross-listed with MAT 512.

MAT 341 and MAT 353 are a prerequisite for this class.

MAT 359
SIMULATION MODELS AND MONTE CARLO METHOD
Undergraduate
Techniques of computer simulation of the classical univariate and multivariate probability distribution models, and such random processes as random walk, Markov chains, and queues. Cross-listed with MAT 459.

MAT 341 and MAT 353 are a prerequisite for this class.

MAT 361
ACTUARIAL SCIENCE I
Undergraduate
The Theory of Interest: Theory and applications of compound interest to annuities, amortization schedules, sinking funds, bonds, and yield rates. Cross-listed with MAT 461. COREQUISITE: MAT 351.

MAT 149 or MAT 152 or MAT 162 is a prerequisite for this class and MAT 351 is a corequisite for this class.

MAT 362
ACTUARIAL SCIENCE II
Undergraduate
Basic Contingencies: The theory and applications of contingency mathematics in life and health insurance, annuities, and pensions from both a probabilistic and a deterministic viewpoint. Topics include survival distribution and life tables, life insurance, and life annuities. Cross-listed with MAT 462.

MAT 361 is a prerequisite for this class and MAT 352 is a corequisite for this class.

MAT 363
ACTUARIAL SCIENCE III
Undergraduate

MAT 362 is a prerequisite for this class.

MAT 364
STOCHASTIC RISK MODELS
Undergraduate
Distributional quantities, distribution properties and classification, frequency and severity models, aggregate loss and ruin models. Cross-listed with MAT 464.

MAT 353 is a prerequisite for this class.

MAT 365
STOCHASTIC SURVIVAL MODELS
Undergraduate
Construction of parametric and nonparametric models, model validation and selection, credibility theory, simulation techniques. Cross-listed with MAT 465.

MAT 353 is a prerequisite for this class.
MAT 366
MATH EMATICAL DEMOGRAPHY
Undergraduate
Introduction to demography; mortality table construction and methods of population and demographic analysis.

MAT 363 is a prerequisite for this class.

MAT 367
CREDIBILITY THEORY (CROSS-LISTED AS MAT 467)
Undergraduate
Credibility theory and loss distributions with applications to casualty insurance classification and rate making. Cross-Listed As MAT 467.

MAT 362 is a prerequisite for this class.

MAT 368
MATH EMATICAL FI NANCE
Undergraduate
Financial derivatives, risk management, investment strategies, arbitrage, valuation, Put-call parity, the binomial model, option pricing, lognormal models for asset prices, Black-Scholes formula, value at risk and conditional tail expectation, Brownian motion and Ito's lemma, interest rate models. Cross-listed with MAT 468.

MAT 353 is a prerequisite for this class.

MAT 370
ADVANCED L INEAR ALGEBRA
Undergraduate
Vector spaces, basis and dimension; matrix representation of linear transformations and change of basis; diagonalization of linear operators; inner product spaces; diagonalization of symmetric linear operators, principal-axis theorem, and applications. Cross-listed MAT 470.

MAT 262 and (MAT 141 or MAT 215) are a prerequisite for this class.

MAT 372
LOGI C AND SET THEORY
Undergraduate
Topics in axiomatic set theory, formal logic, and computability theory.

MAT 141 or MAT 215 is a prerequisite for this class.

MAT 381
FOURIER ANALYSIS AND SPECIAL FUNCTIONS
Undergraduate
The course covers the basic principles of discrete and continuous Fourier analysis and some of its applications currently used in scientific modeling. Students will use the computer to implement the computational algorithms developed in the course. Some of the topics covered will include Fourier transforms and their application to signal and image processing, discrete Fourier series, the fast Fourier transform algorithm and applications to digital filtering, and the Radon transforms and its applications to tomography.

MAT 262 is a prerequisite for this class.

MAT 384
MATH EMATICAL MODELING
Undergraduate
Modeling of real world problems using mathematical methods. Includes a theory of modeling and a study of specific models, selected from deterministic, stochastic, continuous, and discrete models. Cross-listed with MAT 484.

(MAT 220 or MAT 262) and (MAT 348 or MAT 351) are a prerequisite for this class.
MAT 385
NUMERICAL ANALYSIS I
Undergraduate

(MAT 220 or MAT 262) and (MAT 149 or MAT 152 or MAT 162 or MAT 172) is a prerequisite for this class.

MAT 386
NUMERICAL ANALYSIS II (CROSS-LISTED WITH MAT 486 & CSC 386/486)
Undergraduate
Theory and algorithms for efficient computation, including the Fast Fourier transform, numerical solution of non-linear systems of equations. Minimization of functions of several variables. Sparse systems of equations and corresponding eigenvalue problems.

MAT 385 is a prerequisite for this class.

MAT 387
OPERATIONS RESEARCH I: LINEAR PROGRAMMING (CROSS-LISTED AS MAT 487)
Undergraduate
The Linear Programming problem and its dual; the simplex method; transportation and warehouse problems; computer algorithms and applications to various fields.

(MAT 262 or 220) and (any introductory programming course) are prerequisites for this course.

MAT 388
OPERATIONS RESEARCH II: OPTIMIZATION THEORY (CROSS-LISTED AS MAT 488)
Undergraduate
Integer programming; non-linear programming; dynamic programming; queuing theory; game theory.

MAT 387 is a prerequisite for this class.

MAT 389
OPERATIONS RESEARCH III
Undergraduate
Advanced Topics.

MAT 388 is a prerequisite for this class.

MAT 390
MATHEMATICS READING AND RESEARCH
Undergraduate
The course will provide students with a hands-on experience about research in mathematical sciences. Students will attend seminars and research colloquia, and will actively participate at discussions about the topics presented. Students will reflect on the connections between various areas of modern mathematics, the challenges of structuring and solving problems, and the personal experience of doing mathematics. As a final project, each student will prepare and present a mathematical expository paper describing a current area of research, emphasizing its relevance to mathematics in general and its connections to real world problems. This course may be used to satisfy the junior-year experiential learning (JYEL) requirement.

MAT 391
STUDIES IN DEMOGRAPHY
Undergraduate
The course introduces students to the study by statistical methods of human populations in terms of type of data sources, population composition, growth, fertility, mortality, morbidity, health, migration, and urbanization. In addition, the course has a major component, which emphasizes the study of current characteristics of the populations of developing countries in comparison with some developed countries including the United States of America. Students are required to present and submit a research project with comparative analysis of demographic statistics obtained on several developing and developed countries.
MAT 395
TOPICS IN MATHEMATICS
Undergraduate
Consult course schedule for current offerings. Course may be repeated for credit when title and content change. Variable credit allowed.

MAT 396
SENIOR THESIS RESEARCH
Undergraduate
A thesis option is available to mathematics majors who wish to pursue an extended independent project related to a theoretical or applied focus of the program. Students would work under the guidance of a faculty mentor. A total of 4 credits must be completed over the one or two quarters prior to the thesis submission. Interested students are strongly encouraged to enroll in MAT 390 during their junior year.

MAT 397
MATHEMATICAL PEDAGOGY: THEORY & PRACTICE
Undergraduate
Introduction to current theories and practices in college mathematics instruction; helps undergraduate mathematics majors develop a deeper understanding of fundamental mathematical concepts and an awareness of how people learn mathematical ideas, and prepares them to work as consultants in mathematics instruction. Mathematical tutoring practicum is required. Four credit hour course offered over a two quarter span during the autumn and winter quarters only. See instructor for further information. This course maybe used to satisfy the junior experiential learning requirement, but it does not count toward mathematics major or minor credit. Cross-listed with MAT 697.

MAT 398
SENIOR CAPSTONE SEMINAR
Undergraduate
Topics vary from year to year. This course does not count toward the mathematical major or minor credit.

MAT 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

MAT 400
APPLIED ABSTRACT ALGEBRA I
Graduate
Applied Abstract Algebra I

MAT 401
APPLIED ABSTRACT ALGEBRA II
Graduate
Applied Abstract Algebra II

MAT 400 is a prerequisite for this class.

MAT 421
BASIC BIOSTATISTICS
Graduate
This course includes both data analysis and experimental design, up to and including survival analysis such as used in the analysis of clinical trials. The course will be supplemented by standard topics with application areas relevant to drug development, including pharmacokinetics, clinical trials, bioequivalence, and pharmacoepidemiology.

MAT 453 or instructor consent is a prerequisite for this class.
MAT 422
GENE EXPRESSION ANALYSIS
Graduate
In this course, students will build on the principles of MAT 421 by considering experimental design and data analysis issues pertaining to gene expression and genome-wide association studies. Introduction to gene expression studies, multiple comparisons problem in microarray studies, introduction to genome-wide association studies and experimental design for GWAS - one and two-stage approaches will also be addressed.

MAT 421 and MAT 453 are a prerequisite for this class.

MAT 423
GENOME SEQUENCING
Graduate
The course provides a basic understanding of sequencer-based genetic analyses starting with the basics - what a genome sequencer is, how genome sequences are assembled, and the statistics involved in designing sequencer experiments. The course will also consider typical models of sequence evolution leading into coverage of approaches to sequence alignment and statistical phylogeny along with issues related to biomedical applications, detecting sequence variants, transcriptome and metagenome sequencing, and ChIP-Seq. RNA and protein folding will also be included.

MAT 453 or instructor consent is a prerequisite for this class.

MAT 434
TOPOLOGY
Graduate
An introduction to point-set topology: metric spaces, topological spaces, continuity, connectedness, and compactness.

MAT 336 or instructor permission is a prerequisite for this course.

MAT 435
MEASURE THEORY
Graduate
This is a course in Lebesque integration; the study of measure spaces and measurable functions; the basic theorems of Lebesque integration; Egoroff's theorem, the monotone limit theorem, the Lebesgue dominated convergence theorem; an introduction to Lp spaces, Holder's inequality, Minkowski's inequality; Fubini's theorem.

MAT 336 or MAT 434 is a prerequisite for this course.

MAT 436
FUNCTIONAL ANALYSIS
Graduate
This course is an introduction to the basic theory of functional analysis. Students will study linear operators and functionals on Hilbert and Banach Spaces including covering three basic theorems; the Hahn Banach theorem, the uniform boundedness principle and the open mapping theorem. Spectral theory will also be studied.

MAT 261 and (MAT 141 or MAT 215) are prerequisites for this course.

MAT 437
COMPLEX ANALYSIS
Graduate
Course topics: Complex functions; complex differentiation and integration; series and sequences of complex functions. Cross-listed with MAT 337.

MAT 261 and (MAT 141 or MAT 215) are prerequisites for this course.

MAT 441
APPLIED STATISTICS I
Graduate
Parametric and non-parametric statistical inferential methods for the univariate and bivariate situations using SAS. Specific topics include classical and exploratory graphical & numerical methods of data descriptions; inference about means, medians, and associations including analysis of variance and linear regression. Data analytic projects are an integral part of the course.
MAT 442
APPLIED STATISTICS II
Graduate
A continuation of MAT 441. Repeated measures design, association, analysis of covariance, and multivariate relationships. Diagnostics and model building. Methods of categorical data analysis. Logistical regression and log-linear models. Data analytical projects using SAS are an integral part of the course.

MAT 441 is a prerequisite for this class.

MAT 443
APPLIED STATISTICS III
Graduate
A continuation of MAT 442. The course material generalizes univariate methods of inference to multivariate situations using SAS. Specific topics include canonical correlation, discriminate analysis, principal component analysis, factor analysis, and multivariate analysis of variance. Emphasis in the curse is on data analytic projects.

MAT 442 is a prerequisite for this class.

MAT 448
STATISTICAL METHODS USING SAS
Graduate

MAT 451
PROBABILITY AND STATISTICS I
Graduate
The course covers elements of probability theory; distributions of random variables and linear functions of random variables; moment generating functions; and discrete and continuous probability models. COREQUISITE(S): MAT 260.

MAT 260 is a corequisite for this class.

MAT 452
PROBABILITY AND STATISTICS II
Graduate

MAT 451 is a prerequisite for this class and MAT 261 is a corequisite for this class.

MAT 453
PROBABILITY AND STATISTICS III
Graduate
A continuation of MAT 452. More on hypothesis testing, most powerful, uniformly most powerful, and likelihood ratio tests. Introduction to the analysis of variance; linear regression; categorical data analysis, and nonparametric methods of inference.

MAT 452 is a prerequisite for this class.

MAT 454
MULTIVARIATE STATISTICS (CROSS-LISTED 354)
Graduate
The multivariate normal distribution. The general linear model. Multivariate regression and analysis of variance; discriminant analysis; principal component and factor analysis; applications and use of statistical software.

MAT 453 is a prerequisite for this class.
MAT 455
STOCHASTIC PROCESSES
Graduate

MAT 453 is a prerequisite for this class.

MAT 456
APPLIED REGRESSION ANALYSIS
Graduate
Simple linear, multiple, polynomial and general linear regression models. Model diagnostics; Model selection and Validation. Cross-listed with MAT 356.

MAT 453 is a prerequisite for this class.

MAT 457
NONPARAMETRIC STATISTICS
Graduate
Inference concerning location and scale parameters, goodness of fit tests, association analysis and tests of randomness using distribution free procedures. Bootstrap techniques. Smoothing methodologies. Cross-listed with MAT 357.

MAT 453 is a prerequisite for this class.

MAT 458
STATISTICAL QUALITY CONTROL
Graduate
History; Deming guide to quality; graphical techniques of process control; Schewhart's control charts for means, ranges, standard deviations, individual measurements, and attributes; process capabilities and statistical tolerance; cumulative-sum charts. product liability; acceptance sampling; product and process design; applications and case studies.

MAT 459
SIMULATION MODELS AND MONTE CARLO METHOD
Graduate
Techniques of computer simulation of the classical univariate and multivariate probability models, and such random processes as random walks, Markov chains, and queues. Cross-listed with MAT 359.

MAT 453 is a prerequisite for this class.

MAT 460
TOPICS IN STATISTICS
Graduate
One of the following topics: Clinical trials; Reliability and life testing; Categorical data analysis; Bootstrapping; Data Mining; Response Surface Methodology; Meta analysis; Survival Models.

MAT 453 or instructor consent is a prerequisite for this class.

MAT 461
ACTUARIAL SCIENCE I: THEORY OF INTEREST
Graduate

MAT 149 or MAT 152 or MAT 162 or MAT 172 is a prerequisite for this class and MAT 451 is a corequisite for this class.
MAT 462
ACTUARIAL SCIENCE II: BASIC CONTINGENCIES
Graduate
Basic Contingencies: The theory and applications of contingency mathematics in life and health insurance annuities and pensions, from both a probabilistic and a deterministic viewpoint. Topics include survival distribution and life tables, life insurance and life annuities. Cross-listed as MAT 362. CO-REQUISITE: MAT 452.

MAT 461 is a prerequisite for this class and MAT 452 is a corequisite for this class.

MAT 463
ACTUARIAL SCIENCE III: ADVANCED CONTINGENCIES
Graduate
Advanced Contingencies: A continuation of MAT 462. Topics include net premiums, net premium reserves, multiple life functions, multiple decrement models, and valuation theory for pension plans. Cross-listed with MAT 363.

MAT 462 is a prerequisite for this class.

MAT 464
STOCHASTIC RISK MODELS
Graduate
Introduction to risk theory and applications. Economics of insurance, individual risk models for short-term and single-term, collective risk models over an extended period, and applications. Cross-listed with MAT 364.

MAT 463 is a prerequisite for this class.

MAT 465
STOCHASTIC SURVIVAL MODELS
Graduate
Mathematical methods for population analysis and survival models. Cross-listed with MAT 365.

MAT 464 is a prerequisite for this class.

MAT 466
MATHEMATICAL DEMOGRAPHY
Graduate
Introduction to demography, mortality table construction and methods of population and demographic analysis.

MAT 465 is a prerequisite for this class.

MAT 467
CREDIBILITY THEORY
Graduate
Credibility theory and loss distributions with applications to casualty insurance classification and ratemaking.

MAT 462 is a prerequisite for this class.

MAT 468
MATHEMATICAL FINANCE
Graduate
This course will be required of students in the Financial Mathematics concentration. The main topics will be stochastic calculus and partial differential equations leading up to a derivation of the Black-Scholes option pricing model and its variants, along with discrete methods. This course should also be of interest to students of applied mathematics and physics. There will be an opportunity to analyze real option data in conjunction with theory. Possible additional topics would include numerical methods, dividends, options on futures and exotic options. Cross-listed with MAT 368.

MAT 453 is a prerequisite for this class.
MAT 470
ADVANCED LINEAR ALGEBRA
Graduate
Vector spaces, basis and dimension; matrix representation of linear transformations and change of basis; diagonalization of linear operators; inner product spaces; diagonalization of symmetric linear operators, principal-axis theorem, and applications. Cross-listed as MAT 370.

MAT 262 and (MAT 141 or MAT 215) are a prerequisite for this class.

MAT 471
GROUP THEORY
Graduate
Course topics: Classes of groups; actions of groups on sets; Sylow theorems; decomposition of groups; structure of finite abelian groups.

MAT 472
FIELD AND GALOIS THEORY
Graduate
Course topics: Commutative rings and fields; irreducible polynomials and field extensions, adjunction of roots, algebraic extensions, splitting and normal fields, cyclic extensions, the Galois group, and the Fundamental theorem of Galois theory. Cross-listed with MAT 312.

MAT 311 and MAT 471 are prerequisites for this course.

MAT 473
RINGS AND MODULES
Graduate
Course topics: Rings and Algebras; classes of unique factorization domains; modules and principal isomorphism theorems, classes of modules, decomposition of finitely generated modules; Jordan and rational canonical form of a matrix.

(MAT 311 and MAT 470) or MAT 472 is a prerequisite for this course.

MAT 481
FOURIER ANALYSIS AND SPECIAL FUNCTIONS
Graduate
The course covers the basic principles of discrete and continuous Fourier analysis and some of its applications currently used in scientific modeling. Students will use the computer to implement the computational algorithms developed in the course. Some of the topics covered will include Fourier transforms and their application to signal and image processing, discrete Fourier series, the fast Fourier transform algorithm and applications to digital filtering, and the Radon transforms and its applications to tomography.

MAT 262 is a prerequisite for this class.

MAT 484
MATHEMATICAL MODELING (CROSS-LISTED AS MAT 384)
Graduate
Modeling of real world problems using mathematical methods. Includes a theory of modeling and a study of specific models, selected from deterministic stochastic, continuous and discrete models.

(MAT 220 or MAT 262) and (MAT 451 or MAT 348) are a prerequisite for this class.

MAT 485
NUMERICAL ANALYSIS I
Graduate

MAT 220 or MAT 262 is a prerequisite for this class.
MAT 486  
NUMERICAL ANALYSIS II (CROSS-LISTED WITH CSC 386/486, MAT 386)  
Graduate  

MAT 487  
OPERATIONS RESEARCH I: LINEAR PROGRAMMING  
Graduate  
The linear programming problem and its dual; the simplex method; transportation and warehouse problems; computer algorithms and applications to various fields. Cross-listed with MAT 387.  
MAT 220 or MAT 262 is a prerequisite for this class.  

MAT 488  
OPERATIONS RESEARCH II: OPTIMIZATION THEORY  
Graduate  
Integer programming; nonlinear programming; dynamic programming. Cross-listed as MAT 388.  
MAT 487 is a prerequisite for this class.  

MAT 489  
QUEUEING THEORY WITH APPLICATIONS  
Graduate  
Discrete and continuous-time Markov chain models, Queuing systems, and topics from renewal and reliability theory.  
MAT 453 is a prerequisite for this class.  

MAT 494  
GRAPH THEORY AND NETWORK FLOWS  
Graduate  

MAT 495  
DYNAMIC PROGRAMMING  
Graduate  

MAT 496  
GAME THEORY  
Graduate  
The minimax theorem for two-person, zero-sum games. Two-person general-sum games and noncooperative person games; Nash equilibrium.  

MAT 498  
PROBLEM SOLVING IN MATHEMATICS  
Graduate  
Course topics: problem solving in various topics from GRE Subject examination in Mathematics. Consult course schedule for current offerings. Course may be repeated for credit when title and content change.
MAT 512
APPLIED TIME SERIES AND FORECASTING
Graduate
Development of the Box-Jenkins methodology for the identification, estimation and fitting of ARIMA, and transfer-function stochastic models for the purpose of analyzing and forecasting stationary, non-stationary, and seasonal time series data. The course emphasizes practical time series data analysis, using computer packages and includes applications to economic, business and industrial forecasting.

MAT 341 or MAT 348 or MAT 453 is a prerequisite for this class.

MAT 526
SAMPLING THEORY AND METHODS
Graduate

MAT 453 is a prerequisite for this class.

MAT 528
DESIGN AND ANALYSIS OF EXPERIMENTS
Graduate
Single-factor fixed, random and mixed designs with and without restrictions on randomizations, including randomized block designs, Latin & Graeco-Latin squares. Factorial and fractional factorial experiments. Nested and split-plot designs. Confounding and response surface methodology.

MAT 453 is a prerequisite for this class.

MAT 595
GRADUATE THESIS RESEARCH
Graduate
A thesis option is available to graduate students who wish to pursue an extended independent project. Students would work under the guidance of a faculty mentor. A total of 4 credits must be completed over the one or two quarters prior to the thesis submission.

MAT 596
ADVANCED TOPICS IN ALGEBRA
Graduate
Consult course schedule for current offerings. Course may be repeated for credit when title and content change.

MAT 597
ADVANCED TOPICS IN ANALYSIS
Graduate
Consult course schedule for current offerings. Course may be repeated for credit when title and content change.

MAT 598
ADVANCED PROBLEM SOLVING IN ALGEBRA AND ANALYSIS
Graduate
Course topics: problem solving in various topics in Algebra and Analysis. Consult course schedule for current offerings. Course may be repeated for credit when title and content change.

MAT 599
INDEPENDENT STUDY
Graduate
Offered by arrangement. Approval by department chair required.
MAT 600  
**EXPERIMENTATION, CONJECTURE, AND REASONING WITH NUMBERS**  
*Graduate*

This course will focus on furthering the participants' number sense together with providing them with opportunities to: 1) Use and discuss the roles of experimentation, conjecture, and logical reasoning in developing mathematical understanding; 2) Appreciate the value of algebraic notation in problem solving by comparing solutions done both with and without algebra; 3) Engage in mathematical speaking and writing with discussion of (a) how to evaluate accurate vs. inaccurate statements, (b) what level of detail is appropriate in an answer given the point of the problem, (c) what ways of presenting solutions are suitable for various audiences; 4) Discuss the distinction between "how" a mathematical strategy works and "why" it works, and articulate the pedagogical value of knowing the "why."

MAT 602  
**CANDIDACY CONTINUATION**  
*Graduate*

Non-credit. Required of all students who are not registered for regular courses but who occasionally utilize University facilities during completion of course requirements and/or research. $40.00 per quarter.

MAT 605  
**GEOMETRY FOR MIDDLE SCHOOL TEACHERS**  
*Graduate*

An introduction to geometry designed to engage students in the construction, description, and analysis of geometric objects, including three-dimensional objects. These activities will be used to generate questions and hypotheses that will lead to more abstract concepts and general arguments. Emphasis throughout will be on informal reasoning, experimental methods, inductive as well as deductive arguments, local organization, and the development of mathematical thinking. Appropriate technology will be used to explore hypotheses and support mathematical reasoning. Topics will include: polyhedra, and their nets, cross sections, and projections; triangles, quadrilaterals, and polygons; congruence and similarity; the Pythagorean theorem; perimeter, area, and volume; circles and spheres, symmetry and transformations; and tessellations. The course will also include discussion and reflection on learning mathematics.

MAT 606  
**MATHEMATICS SOFTWARE FOR TEACHERS**  
*Graduate*

Introduction to various mathematical software packages for the investigation of significant mathematical ideas. Emphasis will be on the use of software in the high school classroom for the enhancement of students' discovery and understanding of fundamental mathematical concepts.

MAT 608  
**INVESTIGATING HIGH SCHOOL MATHEMATICS**  
*Graduate*

Drawing on high school mathematics content, students will identify and explore the mathematical themes that might form the content of a 12th grade capstone course. In the process, they will reflect on and discuss the major issues encountered when learning the mathematical concepts that form the basis of high school mathematics, identify ways to collaborate in order to improve mathematics learning, and identify ways in which they can take leadership roles in mathematics teaching and learning.

MAT 609  
**TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS**  
*Graduate*

Theories, methods, materials and techniques for teaching and learning mathematics in secondary and upper elementary schools. This course is required for students seeking secondary math certification.

MAT 610  
**CALCULUS FOR MATHEMATICS TEACHERS I**  
*Graduate*

A review of topics from precalculus using algebraic, numerical, and graphical perspectives including linear functions, exponential functions, logarithms, polynomials, and trigonometric functions. An introduction to limits, continuity, the derivative, and basic properties of real numbers. Introduction to graphing calculators and free graphing software with applications to classroom teaching.
MAT 611
CALCULUS FOR MATHEMATICS TEACHERS II
Graduate
A continuation of Math 610. The derivative and its applications, including optimization and related rates. Introduction to integration and numerical algorithms using graphing calculators. Offered every Winter.
MAT 610 is a prerequisite for this class.

MAT 612
CALCULUS FOR MATHEMATICS TEACHERS III
Graduate
A continuation of Math 611. Techniques of symbolic and numerical integration with geometric applications. Sequences, series, power series, and Taylor series. Offered every Spring.
MAT 611 is a prerequisite for this class.

MAT 615
CALCULUS FOR ADVANCED PLACEMENT TEACHERS - I
Graduate
Linear, exponential, logarithmic, power, and trigonometric functions from algebraic, numerical, and graphical perspectives. Limits, continuity, and the derivative. Graphing technology will be used. Advanced placement exams will be examined with applications to classroom teaching.

MAT 616
CALCULUS FOR ADVANCED PLACEMENT TEACHERS - II
Graduate
A continuation of Math 615 - applications of the derivative, the definite integral, Riemman sums, techniques of integrations, numerical integration using graphing calculators, and applications of the integral.
MAT 615 is a prerequisite for this course.

MAT 617
CALCULUS FOR ADVANCED PLACEMENT TEACHERS III
Graduate
A continuation of MAT 616 - infinite series and sequences, Taylor polynomials and Taylor series, differential equations, and slope fields.
MAT 616 is a prerequisite for this course.

MAT 618
TOPICS IN CALCULUS AND DIFFERENTIAL EQUATIONS
Graduate
Taylor's theorem, parametric equations, slope fields, Euler's method. The second half of the course will look at the history of calculus and the development of ideas such as limits, least upper bounds, convergence of series, countability, and cardinality.
MAT 612 is a prerequisite for this class.

MAT 620
GEOMETRY FOR MATHEMATICS TEACHERS
Graduate
Axiom systems, types of reasoning used in proofs, Euclidean geometry results with concentration on triangles and circles, introduction to non-Euclidean geometry, and introduction to geometry classroom software. Offered every Spring.
MAT 660 is a prerequisite for this course.
MAT 622
ALGEBRA FOR MIDDLE SCHOOL TEACHERS I
Graduate
This course is the first of a 3-quarter sequence designed in part to prepare elementary and middle grade teachers to teach an algebra class to qualified 8th grade students in their schools. It is based on a vision of mathematics instruction throughout the grades that continuously builds students' algebraic skills and thinking. This first course in the sequence emphasizes problem-solving as an entry point into algebra for mathematics learners. Students see algebra as an active process for solving problems and as arising naturally as a way to generalize the laws of arithmetic, analyze patterns, and describe relationships in tables, graphs, and equations. In addition, students review and examine foundational concepts in algebra (variables, equations, relations, graphs, slopes of lines, and equations of lines) and are introduced to research on the development of algebraic thinking in middle grade students.

MAT 623
ALGEBRA FOR MIDDLE SCHOOL TEACHERS II
Graduate
The second course in the algebra sequence builds on the first and maintains emphases on problem-solving, deeper understanding of the central concepts of beginning algebra, and awareness of difficulties students have when encountering the subject for the first time. Topics include systems of linear equations, solving linear inequalities and systems of inequalities, absolute values equations and inequalities, and quadratic functions.

MAT 624
FUNCTIONS AND MODELING
Graduate
Advanced concepts in beginning algebra provide a basis for a deeper treatment of the relationship between functions and data, and lay the groundwork for the development of polynomial, exponential, and logarithmic models. The course will integrate the use of technology such as graphing calculators and spreadsheets.

MAT 625
GEOMETRY
Graduate
Axiom systems, types of reasoning used in proofs, Euclidean geometry results with concentration on triangles and circles, introduction to non-Euclidean geometry, and introduction to geometry classroom software.

MAT 630 is a prerequisite for this course.

MAT 630
HISTORY OF MATHEMATICS THROUGH PROBLEM SOLVING I
Graduate
Classical problems and techniques in number theory, algebra and geometry from a historical point of view. Stress on both historical aspects of mathematics and on solutions of concrete problems.

MAT 631
HISTORY OF MATHEMATICS THROUGH PROBLEM SOLVING FOR MATHEMATICS TEACHERS
Graduate
Topics include the development of calculus, probability theory, number theory, non-Euclidean geometry, and set theory. Offered every Winter. MAT 650 is a corequisite.

MAT 620 and MAT 670 are prerequisites for this course.

MAT 632
HISTORY AND CULTURAL FOUNDATIONS OF MATHEMATICS
Graduate
This course is a cross-cultural survey of the history of mathematics, with emphasis placed on the development of concepts encountered by students in elementary and middle school. The course will also serve as a capstone for the program in that it will include references to content from all the earlier courses and will explicitly ask teachers to make connections across the middle school mathematics curriculum. The students will complete a small group research project in which they choose a mathematical concept from the program and use it as a focal point to study the development of mathematical ideas across time and across cultures.
MAT 635
HISTORY OF MATHEMATICS [PREREQ(S): 665]
Graduate
Classical problems from number theory, algebra, Euclidean and non-Euclidean geometry, set theory, probability, and the development of calculus. There will be an emphasis on the historical aspects of mathematics and the solution of concrete problems.
MAT 665 is a prerequisite for this course.

MAT 640
MULTIVARIABLE CALCULUS FOR MATHEMATICS TEACHERS
Graduate
Functions of several variables, vectors, dot products and cross products, partial differentiation, directional derivatives, optimization, Lagrange multipliers, polar and spherical coordinates. Use of software packages to illustrate three dimensional objects.
MAT 612 is a prerequisite for this class.

MAT 643
IDEAS OF CALCULUS IN THE MIDDLE SCHOOL CURRICULUM
Graduate
The course will introduce students to the "big ideas" of Calculus including limits, derivatives, and integrals. The course will emphasize how the mathematics in the middle school curriculum can lay a foundation for the study of continuous mathematics and to the role that Calculus plays in the sciences. In particular, direct connections to the topics of this course and the middle school curriculum will be made by studying activities from curriculum materials currently used in CPS that are relevant to the topics of Calculus. Trigonometry from the perspective of the middle school classroom will be used as the launching point for introducing the major ideas of the course. The course will also give the students the opportunity to understand the interplay between the concepts and tools they learned in the MMT 415-417 sequence and Calculus.

MAT 645
MULTIVARIABLE CALCULUS FOR ADVANCED PLACEMENT TEACHERS
Graduate
Functions of several variables, vectors, dot products and cross products, partial differentiation, directional derivatives, optimization, Lagrange multipliers, multiple integrals, polar and spherical coordinates. Computers will be used to illustrate concepts.
MAT 617 is a prerequisite for this course.

MAT 649
DATA ANALYSIS AND PROBABILITY
Graduate
This course covers the fundamental concepts of probability that are part of the middle school curriculum and recent research findings on student learning of probability and classroom implications of this research. In addition, it covers the principles of graphically displaying, collecting and analyzing data with and without the use of technology. Topics will include measures of central tendency and dispersion, graphical representations of data (histograms, boxplots, bar charts, pie charts, and line graphs), and the design of experiments and simulations.

MAT 650
PROBABILITY & STATISTICS FOR MATHEMATICS TEACHERS I
Graduate
Combinatorics, sets, probability, random variables, distribution and density functions, multiple integration, standard probability laws, jointly distributed random variables. Use of graphing calculators, applets, and software packages to illustrate concepts. Offered every Winter.
MAT 640 and MAT 660 are prerequisites for this course.

MAT 651
PROBABILITY & STATISTICS FOR MATHEMATICS TEACHERS II
Graduate
Central limit theorem, point and interval estimation of parameters, hypothesis testing, least squares and regression. Offered every Spring.
MAT 650 is a prerequisite for this class.
MAT 655
PROBABILITY AND STATISTICS FOR ADVANCED PLACEMENT TEACHERS I
Graduate
Combinatorics, sets, probability, random variables, distribution and density functions, standard probability laws, jointly distributed random variables. Advanced placement exams will be examined with applications to classroom teaching.

MAT 656 is a prerequisite for this course.

MAT 656
PROBABILITY AND STATISTICS FOR ADVANCED PLACEMENT TEACHERS II
Graduate
A continuation of MAT 655 - central limit theorem, point and interval estimation of parameters, hypothesis testing, least squares, and regression.

MAT 656 is a prerequisite for this course.

MAT 660
DISCRETE STRUCTURES FOR MATHEMATICS TEACHERS
Graduate
Logic and proof, number theory, sequences and mathematical induction, sets and functions, cardinality recursion, and introduction to combinatorics.

MAT 665
DISCRETE STRUCTURES WITH A TRANSITION TO HIGHER MATHEMATICS
Graduate
A transition to advanced courses having a greater emphasis on proof and abstraction. Techniques of proof, logic, sets and functions, number theory, recursive sequences, mathematical induction, and an introduction to combinatorics.

MAT 670
ABSTRACT ALGEBRA FOR MATHEMATICS TEACHERS
Graduate
Examines the integers, prime numbers, the Euclidean algorithm, the uniqueness of prime factorization, equivalence relations, rational numbers, real numbers, and complex numbers. Provides examples of groups, rings, and fields and also covers the Fundamental Theorem of Algebra, modular arithmetic, and roots of polynomials of small degree. Offered every Summer.

MAT 612 and MAT 660 are a prerequisite for this class.

MAT 671
ABSTRACT AND LINEAR ALGEBRA FOR MATHEMATICS TEACHERS
Graduate
A continuation of Math 670. Examines the irreducibility of polynomials, criteria for solvability by radicals, rational values of trigonometric functions, difference functions, partial fraction decomposition, and geometric constructions with ruler and compass. Also examines linear independence, spanning sets, and the basis of a vector space. Along with Math 670, it provides the theoretical foundation for many topics covered in high school mathematics courses. Offered every Fall.

MAT 670 is a prerequisite for this class.

MAT 675
ABSTRACT ALGEBRA I
Graduate
Integers, rational numbers, real numbers, complex numbers, fundamental theorem of algebra, modular arithmetic, polynomials rings, roots of polynomials of small degree, and values of trigonometric functions. This course provides the theoretical foundation for many topics covered in high school mathematics courses.

MAT 665 is a prerequisite for this course.
MAT 676
ABSTRACT ALGEBRA II
Graduate
A continuation of MAT 675 - topics include group theory, vector spaces, difference functions, partial function decomposition, introduction to Galois theory, geometric constructions, and the insolvability of the quintic.

MAT 675 is a prerequisite for this course.

MAT 680
FOUNDATIONS OF CALCULUS FOR ADVANCED PLACEMENT TEACHERS
Graduate
Completeness properties of the real number line, limit theorems, the intermediate value theorem, the existence of the definite integral, differential equations, and slope fields. Students will review problems from recent AP Calculus examinations and each topic will be linked to specific problems on the AP exams.

MAT 685
REAL ANALYSIS
Graduate
To better prepare teachers of A.P. Calculus, the theoretical foundations of calculus are examined. An in depth look at fundamental results in calculus such as the Intermediate Value Theorem, the Extreme Value Theorem, the Mean Value Theorem, the Fundamental Theorem of Calculus, Taylor's Theorem, and L'Hopital's Rule.

MAT 617 and MAT 665 are prerequisites for this course.

MAT 697
MATHEMATICAL PEDAGOGY: THEORY AND PRACTICE
Graduate
Introduction to current theories and practices in college mathematics instruction; designed to prepare students to work as consultants in mathematics instruction by helping them develop a deeper understanding of fundamental mathematical concepts and an awareness of how people learn mathematical ideas. Mathematical tutoring practicum is required. Four-credit hour course offered over a two quarter span during the autumn and winter quarters only. See instructor for further information.

MAT 699
TOPICS IN MATHEMATICS FOR TEACHERS
Graduate
Diverse topics in mathematical modeling or mathematical appreciation germane to the secondary school classroom.

MCS 207
HISTORY OF CINEMA I, 1890-1945
Undergraduate
This course examines the history of cinema as one of the most influential cultural forms of the 20th Century. We will study the aesthetic and technological developments of cinema during its first 50 years, as well as examine the social and economic factors shaping its history. Initially influenced by other art forms (theater, literature, painting) filmmaking quickly acquired its own formal system, language, and traditions. We will trace the changing styles, techniques, content, and methods of filmmaking as an art form, as popular culture, and as an industry. We will consider how cinema is bound to its social context via audience relations, economics, technology, and ideology. The limited scope of this course will cover primarily feature-length, narratives films as the dominant mode of filmmaking, although we will also look at the development of documentary and experimental filmmaking. The class will consist of lectures, screenings, and discussions.

MCS 208
HISTORY OF CINEMA II, 1945-1975
Undergraduate
This course covers the continued rise and development of cinema from 1945 to 1975. The course will have a dual focus, looking simultaneously at both the American studio system and international cinemas. The lectures, screenings, and discussions place equal emphasis on charting the development of cinematic techniques as well as examining the growth of specific national cinemas. In addition, the course surveys international stylistic trends in narrative, documentary, and avant-garde film. Students will acquire a broad understanding of the institutional, social, technological, and aesthetic forces that have shaped the development of cinema during the mid-twentieth century. Lab for film viewing required.
MCS 209
HISTORY OF CINEMA III, 1975-PRESENT
Undergraduate
This final course in the film history sequence is designed to introduce students to a sense of modern film history and the multiple permutations of cinema around the modern film history and the multiple permutations of cinema around the globe. It presents film history from a global perspective, concentrating primarily on the development of new national and transnational cinemas. The course continues to chart the development of the American studios since the mid-1970s while examining the effects of media consolidation and convergence. Moreover, the course seeks to examine how global cinemas have reacted to and dealt with the formal influence and economic domination of Hollywood filmmaking on international audiences. Class lectures, screenings, and discussions will consider how cinema has changed from a primarily national phenomenon to a transnational form of communication in the 21st century.

MCS 231
INTRODUCTION TO DOCUMENTARY STUDIES
Undergraduate
This course examines the rise and growth of documentary forms, including audio, film, television, photography, literary journalism and ethnography. Students will study representative works from each documentary approach and learn to analyze the techniques of observation and representation at use in these pieces. Students will become familiar with major theoretical constructions of documentary and be able to use these analytical tools to critique documentary forms. Lab for film viewing required.

MCS 251
SPACES OF CINEMA IN ROME
Undergraduate
This course examines the history and heritage of Italian cinema through an analysis of critically acclaimed films produced in Rome. Topics of focus include the comparison of Italian and Hollywood constructions of historical settings, and the cinematic organization of visual space. The course features visits to the Roman sites where films examined in the course were produced. The course's goal is the development of an understanding of filmmakers' artistic choices and the expectations that they set up for their audiences through setting. Offered in conjunction with the Rome Film Studies Program.

MCS 252
CONTEMPORARY ITALIAN CULTURE THROUGH FILM
Undergraduate
This course provides an exploration of contemporary Italian culture through the medium of cinema. The course examines how cinema addresses complex social and political concerns in Italy. Topics and themes include health care; the transformation of the structure of the family; immigration and emigration; the perennial problem of organized crime; and the difficulties faced by the younger generations in their attempt to integrate into society. Italian film industry professionals and cultural historians will provide context and perspective on contemporary social issues facing Italy. Offered in conjunction with the Rome Film Studies Program.

MCS 271
MEDIA AND CULTURAL STUDIES (FORMERLY INTRODUCTION TO RADIO, TELEVISION, AND FILM)
Undergraduate
This course provides students with a theoretical and methodological background in the interdisciplinary field of cultural studies, which considers media and culture as sites for the construction and contestation of race, class, gender, ethnicity, sexuality and nation. The course provides a foundation in critical cultural studies, ideology critique, critical race and gender studies, transnational media studies and active audience studies.

MCS 273
STORYTELLING & STYLE IN CINEMA (FORMERLY FILM/VIDEO ANALYSIS)
Undergraduate
Course covers basic concepts and terminology of film and video as forms of art and mass culture. This course covers the aesthetic elements that constitute film and video texts: plot structures, sets, costumes and makeup, acting, lighting, cinematography, editing, and sound. By performing extensive textual analyses, students learn how the interaction of these elements produces meaning. Students also gain basics of how these concepts are practiced in film production. After mastering the aesthetic concepts, students also examine their use in three different modes of film: fiction, documentary, and the avant-garde. There is a required lab for film viewing. (Formerly Film/Video Analysis)
MCS 286
RADIO PRACTICUM
Undergraduate
Students who already actively participate at DePaul's radio station have the opportunity, depending on the station's needs, to produce on-air announcements, specialized broadcasts (weather, sports, University-based topics), newscasts, and assist station managers with their day-to-day responsibilities for MCS credit. In addition to working at the radio station, students must successfully complete a short research project on an approved topic.

MCS 290
MEDIA & CINEMA STUDIES WORKSHOP (VARIABLE TOPICS)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in media and cinema studies that can enhance their knowledge and expertise. Two types of workshop classes are offered: research and production. Examples of Research Workshop topics can include film criticism, Survey Design, and Academic Writing Bootcamp. Examples of Production Workshop topics include non-linear editing with Final Cut Pro, Multimedia Design, and Video Camera Basics. Students may take a maximum of 4 credit hours of MCS 290 in the major, and a total of 8 credit hours.

MCS 331
TOPICS IN DOCUMENTARY STUDIES
Undergraduate
A rotating topics course that could focus on specific historical era or specific group of texts or documentarians from across film, television, audio, writing, and photography.

MCS 339
RADIO BROADCASTING
Undergraduate
The overall objectives of this course are to familiarize students with the radio broadcasting industry, the history of the medium and current issues facing broadcasters. Furthermore, we will discuss matters such as indecency, deregulation, and the many challenges that terrestrial radio is likely to face from Internet and satellite broadcasters. Additionally, we will discuss job responsibilities in the radio industry as well the day-to-day operations at radio stations. Finally, it is expected that students will be well prepared for advanced radio production and radio and television internships as a result of succeeding in this course.

MCS 341
TOPICS IN RADIO STUDIES
Undergraduate
Subjects rotate among several historical and conceptual topics, such as Rock Radio, Talk Radio, Gender and Radio, Radio and American Culture, etc. Students will have the opportunity to build upon the foundations of radio that are explored in other radio courses. Radio topics courses are considered advanced study in the subject area; therefore, students are encouraged to complete MCS 339 or MCS 342 prior to taking a radio topics course.

MCS 342
HISTORY OF TELEVISION & RADIO
Undergraduate
A history of radio, television, and cable that examines their relations to other media industries including programming, economics, industrial structures, audiences, government and industry policies, and social effects. The course includes viewing, analysis and criticism of significant and representative programming.

MCS 343
MEDIA ETHICS
Undergraduate
Entertainment and social media dominate popular culture today in a way that begins to completely define American culture. In what ways do entertainment media impact society? As creators of media, what special responsibilities do we have? And as creators of entertainment media how can we use these ethical theories in our daily practice? This course will examine the underlying ethical theories used when we try to arrive at ethical judgments about right and wrong. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. The issue of balancing individual creativity vs. cultural impact, particularly on children, will be addressed. The course will culminate with the formulation of elements of an ethical code of conduct for every electronic (social) media, television professional and movie creator.
MCS 348
TOPICS IN FILM GENRE
Undergraduate
This course offers an historical examination of film genres, with a varying focus on one particular genre: film noir, musicals, melodrama, detective/gangster film, science fiction film, comedy, Western, animation, youth films. The course explores the relationship of genres to general social histories. Lab for film viewing required.

MCS 349
TOPICS IN FILM STUDIES
Undergraduate
Examination of a particular era of film history or national cinema, film movements, or moments in social history and their relationship to film production. Topics currently in rotation include Film Sound Studies, American Films of the 1970s, War and Film, feminist film, Psychoanalysis and Cinema, etc. Lab for film viewing required.

MCS 350
TOPICS IN GLOBAL CINEMA
Undergraduate
This course is designed as a critical study of global filmmakers and the issues surrounding cinema and its transnational circulation. The class will examine specific aspects of the growth and evolution of cinema and look at points of contact between different cultural discourses, national cinematic styles, genres, and reception. Artistic, social, political, and industrial issues will be examined to provide different models of cinematic creation and consumption. Recent topics have included Latin American Cinemas, Asian Cinemas, Transnational Cinema, New German Cinema, History of French Film, Contemporary Global Directors, etc. Lab for film viewing required.

MCS 351
TOPICS IN TELEVISION STUDIES
Undergraduate
This course offers advanced study of television as a unique audio-visual culture with its own history and styles. This course presumes basic knowledge of television terms and methods of media analysis. Studies of a selected aspect of television history, television criticism, or national television are offered regularly. Recent topics have included Global Television, Reality TV, American TV of the 1950s, Television News, etc.

MCS 352
TOPICS IN NEW MEDIA
Undergraduate
This course examines the effects of new and/or digital media on interpersonal communication, media industries, and/or media culture. Depending on the specific focus of this variable elective course, it might focus on economic, social, political, or aesthetic implications of new media, including the Internet, interactive games, and other new media technologies and applications.

MCS 353
TOPICS IN MEDIA STUDIES
Undergraduate
This is a rotating topics class for subjects that encompass a number of different media, including radio, television, film. Possible topics may include: Media and Politics, Contemporary News Media, Reception Studies, Fan Studies, etc.

MCS 354
TOPICS IN MASS MEDIA
Undergraduate
This is a rotating topics class for subjects that span a broad range of media outlets, from radio, television, film, and new media to journalism, advertising, and public relations. Possible topics may include: Chinese Mass Media, Children’s Media, Media and Censorship, Media Regulation, etc.
**MCS 355**
**US TELEVISION AND SEXUALITY**
*Undergraduate*

This course will examine the continued negotiation of sex and sexuality on American television. Whether through their structuring absence, head-on attendance, or mere subtle implication, sex and sexuality have been omnipresent within the medium since its proliferation in the late 1940s. Through lenses of TV, social history, and gender/sexuality criticism, this course will examine various ways in which sexual issues such as the marriage bed, female sexual agency, GLBT visibility, teen sex, and rape have made their ways onto and been pushed off of the small screen. It will also interrogate how these broad categories interact with TV's assumed social role, contemporary and historical notions of American values, and TV regulation.

**MCS 356**
**TOPICS IN DOCUMENTARY PRODUCTION**
*Undergraduate*

The course will focus on developing skills in conceptualizing, directing, and editing various styles of documentary films. Students will explore the documentary filmmaking process by viewing a range of documentary films and deconstructing/discussing their attributes, learning basic interview techniques and constructing narratives and stories. Emphasis will be placed on developing technical proficiencies in hand-held cinematography, location sound recording, and editing. Students will produce documentary projects in team groups throughout the term. Ultimately, the goal is for students to learn to define and interpret their own personal directorial approach to documentary filmmaking.

**MCS 357**
**TOPICS IN TELEVISION PRODUCTION**
*Undergraduate*

This is a rotating topics class for developing skills in the conceptualization, direction, and editing of television programs. Students will explore techniques of television storytelling and style. Students will produce projects throughout the term.

**MCS 361**
**FANDOM & PARTICIPATORY CULTURE**
*Undergraduate*

This course introduces students to the world of media fandom. Fans are people who hold an emotional attachment to media texts. By investigating the types of media texts people connect to, as well as the work fans do in their community, students encounter new ways of participating with media. Students not only examine fans as cultural "producers," who make media just as much as they consume it, but also examine media from the point of view of a fan. This course also looks at how participating in fandom can aid the development of diversity and positive social change.

**MCS 366**
**COMMUNICATION, TECHNOLOGY AND SOCIETY**
*Undergraduate*

Survey of a variety of contemporary and historical issues related to the introduction and diffusion of communication technologies in society. Especially examines how new technologies, particularly the Internet, are transforming the communication landscape. Emphasis on issues of intellectual property, surveillance, privacy, regulation, message construction, and access will be central to this course.

**MCS 373**
**AUDIO DOCUMENTARY**
*Undergraduate*

This course uses hands-on projects so that students can explore the steps in the process of creating an audio documentary. Through practical application students consider questions that surround the interpretation of cultural experience. Additionally, students analyze a variety of approaches to audio documentary in an effort to understand better this significant form of storytelling.

**MCS 375**
**LATINO/A TELEVISION AND MEDIA**
*Undergraduate*

Drawing from Latin American and U.S. television studies, this course explores the political, industrial and cultural dynamics that shape televisual representations in Latin American television and/or Spanish language Television in the US. More specifically, Spanish-language television and media will be examined from interdisciplinary frameworks, which include the cultural analysis of televisual modes, national and international regulations of media production and distribution, histories of production, and ethnographies of viewing.
MCS 376
LATIN AMERICAN CINEMA
Undergraduate
This course examines the production, distribution and impact of cinema in the Latin American context. Transnational relations with other industries, such as Hollywood and the European film context will be considered. We will investigate how social, economic and political forces have shaped or are presently influencing and transforming national cinemas. Questions of identity and cultural difference, particularly in relation to immigration, diasporas, transnationalism, youth culture, class, gender, sexuality, race and ethnicity are central to the discussions. We will consider the diversity of styles and topics that are now redefining the cinema of the region.

MCS 383
TALKING ABOUT FILM: THEORY & CRITICISM
Undergraduate
This course is to familiarize students with a wide range of disciplines (film, art history, philosophy, psychology, etc.) and how these ideas both inflected the development of classical film theories as well as the evolution of cinema. Moreover, the scope of the course seeks to examine the overall process whereby theoretical discourse develops historically. Lab for film viewing required.

MCS 273 or instructor permission is a prerequisite for this course.

MCS 386
RADIO PRODUCTION
Undergraduate
Students will learn radio broadcasting and audio production techniques. Students will work in a lab environment to complete broadcast quality production work. Though the emphasis of the course will be on broadcast writing, speech, and production techniques, students will have the opportunity to perform on-air shifts at DePaul's radio station and complete non-traditional production work, such as podcasts. MCS 286, Radio Practicum and MCS 339, Radio Broadcasting are recommended but not required courses.

MCS 389
TOPICS IN MEDIA PRODUCTION
Undergraduate
This course is a rotating topic course in areas of media production and may include classes such as Podcasting, Advanced Radio Production, Advanced Audio Documentary, Radio News, Multimedia Production, etc. There may be a lab fee for the course.

MCS 399
INDEPENDENT STUDY
Undergraduate
MCS 501
FILM AND MEDIA THEORY
Graduate
This course will serve as a foundation for students in theories of film, television, and new media. An engagement with areas such as formal analysis, television and film spectatorship, authorship, television flow, and media specificity will provide both a brief historical framework for these disciplines, as well as a survey of major texts. Readings will include scholars/theorists such as Sergei Eisenstein, David Bordwell, Laura Mulvey, Horace Newcomb, Raymond Williams, Nick Browne, and Henry Jenkins. Formerly MCS 501 Introduction to Media Studies.

MCS 502
MEDIA AND CULTURAL STUDIES
Graduate
This course provides students with a theoretical and methodological background in the interdisciplinary field of cultural studies, which considers media and culture as sites for the construction and contestant of race, class, gender, ethnicity, sexuality and nation. The course provides a foundation in critical cultural studies, ideology critique, critical race and gender studies, transnational media studies and active audience studies.

MCS 503
GLOBAL CINEMA/ MEDIA
Graduate
This course surveys a number of frameworks for understanding the global dynamics that constitute particular media cultures around the world. We will examine historical perspectives and debates concerning the processes of globalization and the media's constitutive role in impacting our conceptions of space and time across local, national and transnational terrains. Students will interrogate how the actions of nation states, civil society and transnational corporations impact media industries and ask how media representations are contested across registers of nation, region, citizenship, class, religion, labor, gender, Diaspora, race, migration and ethnicity.
MCS 504  
HISTORIOGRAPHY AND RESEARCH  
Graduate  
This course will offer critical perspectives and methods to film and media history and research. Areas of exploration will include how popular history and academic historiography interact, the way certain subjects and facts are emphasized over others, the different forms used to represent historical knowledge, and questions of history and memory. In addition to the assumptions, methods, and purposes of film/media histories, the course will also ask crucial questions regarding the nature of inquiry and the status of data and evidence. Students will learn how to address a specific research question through a variety of methodologies in a cogent and comprehensive manner. Students will also develop competency in writing a research proposal and using research tools such as Endnote and online journal databases.

MCS 519  
TOPICS FOR CAREER DEVELOPMENT IN MEDIA  
Graduate  
This course introduces students to possible areas for professional advancement in media and cinema. As a rotating topic, it will focus on four areas of development: archiving and curating; community activism; programming series and festivals; the practice of media criticism; and the use of digital media in various contexts. The courses under this rubric may include experiential learning opportunities.

MCS 520  
TOPICS IN MEDIA STUDIES  
Graduate  
This is a seminar that focuses on a particular area of media studies including, but not limited to, topics such as the contemporary media industries, kids media culture, television studies, music cultures, digital divide, race and media, celebrity culture, radio studies, war and media, gender and media, global television, new media studies and sexuality and media. Students may take this seminar repeatedly in different topic areas.

MCS 521  
TOPICS IN CINEMA STUDIES  
Graduate  
This is a seminar-level course that provides in-depth examinations of Cinema Studies topics. Topics vary from quarter to quarter and may include studies of film genres, film authorship, national cinemas, global cinema, gender in cinema, animation, film theory, early cinema, film aesthetics, race and representation, film sound studies, or other rotating topics.

MCS 522  
TOPICS IN CINEMA/MEDIA HISTORY  
Graduate  
Examination of a particular era of film history or national cinema, film movements, or moments in social history and their relationship to film production. Topics currently in rotation include American Films of the 1970s, Latin American Cinema, War and Film, New German Cinema, feminist film, etc. Examination of a particular era or forms of television/media from a historical perspective. Topics could include but are not limited to: History of American Broadcasting, International Broadcasting Structures, Television Outside the Box, Public and Community Broadcasting, genre-specific histories, etc.

MCS 530  
NEW MEDIA AND CULTURE  
Graduate  
This seminar considers the cultural ramifications of new media in shaping life experience and opportunity. As interactive digital media technologies expand opportunities for social networking, text and instant messaging, file sharing, collaborative authoring, blogging, podcasting and mobile communication, this seminar asks how these new technologies impact identity formation, creative participation and concepts of public culture. Issues of concern include race, gender, class, sexuality, cultural citizenship, fandom, subcultures and democratic participation.

MCS 531  
MEDIA POLICY  
Graduate  
This seminar considers the regulatory policies that have shaped media culture including those governing ownership, content, labor and intellectual property. The focus is on how citizens, industries, governments and social movements have sought to impact the role of media in public and private life including issues such as civil rights, media conglomeration, sex and violence, free speech, public access, children's media, public radio/TV, fair use in copyright, international governance, commercialization and equal opportunity. Students engage with these issues through investigating historical and contemporary case studies within local and global contexts.
MCS 532  
**ASIAN CINEMA/ MEDIA**  
Graduate  
This seminar examines the cultural, social and economic contexts to Asian cinema/media. The course focuses on national and regional cinema/media industries and their transnational contexts of production, circulation and reception. Students consider questions of identity and cultural difference, particularly in relation to immigration, Diasporas, transnationalism, youth culture, class, gender, sexuality, race and ethnicity. As well as an historical survey, the course considers recent develops as digital technologies impact Asian media cultures.

MCS 533  
**LATIN AMERICAN CINEMA/ MEDIA**  
Graduate  
This seminar examines the production, distribution and impact of cinema and media in the Latin American context. We will view a range of works from major and minor industries and investigate how social, economic and political forces have shaped or are presently influencing and transforming national cinemas and their industries. Questions of identity and cultural difference, particularly in relation to immigration, diasporas, transnationalism, youth culture, class, gender, sexuality, race and ethnicity are central to the discussions. We will consider the diversity of styles and topics as much as the discursive and theoretical frameworks that in the past defined, or those that are now redefining, the cinema and media of the region.

MCS 534  
**DOCUMENTARY STUDIES**  
Graduate  
This course examines the rise and growth of documentary forms, including audio, film, television, photography, and literary journalism. Students will study representative works from each documentary approach and learn to analyze the techniques of observation and representation at use in these pieces. Students will become familiar with the social, aesthetic, and historical discourses of documentary and understand major theoretical and critical approaches of analyzing documentary forms. Students will become aware of the convergent and divergent qualities that are features of qualitative research, journalism, and documentary practice. Students will learn how documentary functions as a witness to personal and public histories.

MCS 541  
**AUDIO DOCUMENTARY**  
Graduate  
This course uses hands-on projects so that students can explore the steps in the process of creating an audio documentary. Through practical application students consider questions that surround the interpretation of cultural experience. Additionally, students analyze a variety of approaches to audio documentary in an effort to understand better this significant form of storytelling.

Status as a Graduate Media and Cinema Studies student is a prerequisite for this class.

MCS 542  
**TOPICS IN PRODUCTION**  
Graduate  
This course allows students to take production courses from across the university including, but not limited to, Advanced Sound Design, Advanced Non-linear Editing, Documentary Production, Advanced Cinematography, Document Design, Online Documentation, Writing and Technology, Web Design I and Web Design II.

MCS 550  
**FANDOM AND ACTIVE AUDIENCES**  
Graduate  
Fans, people who hold an emotional attachment to a particular object, have been the object of academic study for twenty years; yet, the study of audiences and reader/viewer-ship has a much longer and more detailed history that goes back hundreds of years. Why this fascination with the way people interpret and react to media? What is it about fans, audiences, or readers that holds such interest for academics? This course will explore the relationship between fans, academics, and cultural studies. Through an examination of the way fans and active audiences are studied, we can better understand our media, our texts, and our selves.

Status as a Graduate Media and Cinema Studies student is a prerequisite for this class.
MCS 590
MEDIA & CINEMA STUDIES WORKSHOP (VARIABLE TOPICS)
Graduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups.

MCS 592
INDEPENDENT STUDY
Graduate
This is a class reserved for independent coursework and specialization under the supervision of a faculty member. Students approved to take this class may do so at any point in the program. However, graduate students in the M.A. in Media, Culture and Society, should enroll in MCS 592 Independent Study during the quarter they write and defend the thesis/project proposal. This is a pass/fail 4-credit hour course. Enrollment in this course requires your thesis/project advisor's approval. Tuition is charged. You must complete your thesis/project proposal to be approved for this class.

MCS 599
RESEARCH THESIS
Graduate
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged and loan deferment is available. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll.

MCS 601
ACTIVE DEGREE COMPLETION
Graduate
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans.

MCS 602
CANDIDACY CONTINUATION
Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans.

MCS 523
TOPICS IN GLOBAL FILM & MEDIA
Graduate
This course surveys a number of frameworks for understanding the global dynamics that constitute particular media cultures around the world. We will examine historical perspectives and debates concerning the processes of globalization and the media's constitutive role in impacting our conceptions of space and time across local, national and transnational terrains. Students will interrogate how the actions of nation states, civil society and transnational corporations impact media industries and ask how media representations are contested across registers of nation, region, citizenship, class, religion, labor, gender, Diaspora, race, migration and ethnicity.

Status as a Graduate Media and Cinema Studies student is a prerequisite for this class.

MED 95
CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH
Undergraduate
(0 credit) Required of all music education students. Observations and participation experience with children and youth in a school or agency. This course is a prerequisite for student teaching and related professional courses. This course serves as a pre-requisite for MED 392.

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.
MED 101
BRASS I
Undergraduate
(1 credit) Trumpet and french horn. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.
Status as a Music student is a prerequisite for this class.

MED 102
BRASS II
Undergraduate
(1 credit) Trombone, euphonium and tuba. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.
Status as a Music student is a prerequisite for this class.

MED 103
WOODWINDS I
Undergraduate
(1 credit) Clarinet and saxophone. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.
Status as a Music student is a prerequisite for this class.

MED 104
WOODWINDS II
Undergraduate
(1 credit) Oboe and bassoon. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.
Status as a Music student is a prerequisite for this class.

MED 105
STRINGS I
Undergraduate
(1 credit) Violin and viola. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.
Status as a Music student is a prerequisite for this class.

MED 106
STRINGS II
Undergraduate
(1 credit) Cello and string bass. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.
Status as a Music student is a prerequisite for this class.

MED 107
PERCUSSION I
Undergraduate
(1 credit) This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.
Status as a Music student is a prerequisite for this class.
MED 108  
PERCUSSION II  
Undergraduate  
(1 credit) This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.  
Status as a Music student is a prerequisite for this class.

MED 109  
WOODWINDS III  
Undergraduate  
(1 credit) Flute. This course focuses on the fundamentals of instrumental performance, pedagogy, and other related information. Open only to School of Music students.  
Status as a Music student is a prerequisite for this class.

MED 121  
CLASS GUITAR  
Undergraduate  
(1 credit) Open only to School of Music students. Techniques of functional guitar.  
Status as a Music student is a prerequisite for this class.

MED 196  
CLASS VOICE  
Undergraduate  
(1 credit) Open only to School of Music students. A developmental approach to singing.  
Status as a Music student is a prerequisite for this class.

MED 200  
MUSIC EDUCATION LAB ENSEMBLE  
Undergraduate  
(1 credit) This course is designed to provide music education majors with experience singing and playing secondary and tertiary instruments in a student led lab ensemble. The participants will also explore literature appropriate for 6-12 grade choral, wind, and string ensembles. Music education majors who have completed the conducting courses or are currently taking Conducting for the Music Educator will serve as conductors for the Lab Ensemble; music education majors who are currently in the methods mix may take this class as a music education elective and will serve as instrumentalists and singers in the ensemble. This class may be taken for two quarters (freshman. Sophomore, or senior year) as a one-credit music education elective (2 total quarter hours). The third year the class would be taken as the lab component of the Conducting for the Music Educator class.

MED 201  
CLASSROOM INSTRUMENTS  
Undergraduate  
(2 credits) The purpose of this course is to provide students with the opportunities to develop basic skills using instruments and sound sources appropriate for use in general music (K-8) classroom settings. This course will focus on: at least one voice of recorder, body percussion, barred Orff instruments, unpitched percussion, and drums. The skills and knowledge students attain from the course experience will better prepare them to play and teach these instruments to children in school settings and beyond.

MED 300  
ELEMENTARY & MIDDLE SCHOOL INSTRUMENTAL METHODS & LAB  
Undergraduate  
(4 credits)  
MED 303 is a prerequisite for this class.
MED 301
SECONDARY INSTRUMENTAL METHODS AND LAB
Undergraduate
Secondary Instrumental Methods & Lab. (2 hrs.)
MED 300 is a prerequisite for this class.

MED 303
ELEMENTARY VOCAL-GENERAL METHODS & LAB
Undergraduate
(4 credits)
Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 304
MIDDLE SCHOOL VOCAL METHODS AND LAB
Undergraduate
Junior High Vocal Methods & Lab. (2 hrs.)
MED 303 is a prerequisite for this class.

MED 305
SECONDARY VOCAL METHODS AND LAB
Undergraduate
(2 credits)
MED 303 is a prerequisite for this class.

MED 306
INTRODUCTION TO MUSIC EDUCATION
Undergraduate
(2 credits) Concurrent teaching/observation required
Status as a Music student is a prerequisite for this class.

MED 307
ORCHESTRAL LITERATURE
Undergraduate
(2 credits) This course will provide students with a practical introduction to the various types of string and full orchestra literature available at the elementary, middle, and high school levels. Topics will include music source information, comprehensive musicianship in practice, score listening, score study and evaluation, source materials, grading of educational literature and copyright law.
A petition to major is a prerequisite for this class.

MED 308
ACCOMPANYING FOR THE MUSIC EDUCATOR
Undergraduate
(2 credits) The objectives of this course are to help students further develop practical keyboard facility and keyboard musicianship skills, reinforce musical and theoretical concepts presented in Musicianship classes, improve facility of reading piano music, establish keys of pieces by preparing scales, arpeggios, and chord progressions, and combine all of the above in teaching more effectively and confidently with good piano accompaniment for classroom/choral teaching.
A petition to major is a prerequisite for this class.
MED 309
AFRICAN DRUMMING FOR THE MUSIC EDUCATOR
Undergraduate
(2 credits) This course is designed to introduce music education students to the basics of African Drumming and how to incorporate this genre into the k-12 music classroom. Students will learn to drum, sing, and dance within this genre. They will also write lesson/unit plans that demonstrate their understanding of how to incorporate African Drumming in the music classroom.

Status as a Graduate Music Education student or an Undergraduate Music Education major with a completed petition to major is a prerequisite for this class.

MED 310
MUSIC EDUCATION FOR THE EXCEPTIONAL CHILD
Undergraduate
(4 credits) A survey course highlighting special education mandates that affect music educators, including profiles of giftedness and various areas of disability. Alternative teaching strategies and classroom management techniques are also addressed.

MED 303 is a prerequisite for this class.

MED 311
MARCHING BAND TECHNIQUES
Undergraduate
(2 credits) Basic marching techniques and movements, selection and use of music, design and charting of shows.

Status as a Graduate Music Education student or an Undergraduate Music Education major with a completed petition to major is a prerequisite for this class.

MED 313
CHORAL LITERATURE I
Undergraduate
A petition to major is a prerequisite for this class.

MED 325
TECHNOLOGY FOR MUSIC EDUCATORS
Undergraduate
This course will acquaint the music education major with a variety of music technology hardware and software applications, which may be used effectively for instruction in the music classroom and studio.

Status as a Graduate Music Education student or an Undergraduate Music Education major with a completed petition to major is a prerequisite for this class.

MED 340
CONDUCTING FOR THE MUSIC EDUCATOR
Undergraduate
This course will equip the music educator with the preliminary abilities to teach from the podium (i.e. in a performance ensemble setting). It will provide a sequential and methodical approach to the knowledge, skills, and attitudes that are necessary for effective and efficient teaching in the performing ensemble classroom.

A petition to major in Music Education is a prerequisite for this class.

MED 360
TOPICS IN MUSIC EDUCATION
Undergraduate
(1-4 credits) Concentrated study of a selected area of music education.

Status as a Graduate Music Education student or an Undergraduate Music Education major with a completed petition to major is a prerequisite for this class.
MED 365
INTRODUCTION TO KODALY
Undergraduate
This course will cover the philosophy and basic teaching tools promoted by Zoltan Kodaly. Participants will finish with an abundance of new songs, games, activities and techniques that will energize, organize, and perhaps transform their teaching. Daily schedule will include pedagogy, musicianship, folk music materials, and special topics such as instruments in the classroom and classical music connections for elementary students.

Status as a Graduate Music Education student or an Undergraduate Music Education major with a completed petition to major is a prerequisite for this class.

MED 380
KODALY: LEVEL I
Undergraduate
(3 credits) Using high quality traditional folk music as the initial core musical material, Kodaly-inspired musician educators engage their students in joyful, sequential, developmentally-appropriate, child-centered, interactive, sound-based instruction. During an intensive two-week summer workshop, the Level I Kodaly Certification program introduces the Kodaly approach in a three-part program: musicianship, Kodaly pedagogy, and folk music and materials. Offered only in the summer as a workshop.

Status as a Graduate Music Education student or an Undergraduate Music Education major with a completed petition to major is a prerequisite for this class.

MED 381
KODALY: LEVEL II
Undergraduate
(3 credits) Continued intensive study of materials, techniques, and pedagogy for sequential skill and curriculum development in beginning level concepts and elements for developing dictation and sight-reading skills; repertoire for singing, moving, and listening. Folk music materials and analysis; continuation of personal retrieval system. Modes, diatony, simple functional harmony; Conducting. Chorus.

MED 380 or completion of Kodaly Level I at another accredited program is a prerequisite for this class.

MED 382
KODALY: LEVEL III
Undergraduate
(3 credits) Continued intensive study of materials, techniques, and pedagogy for sequential skill and curriculum development in intermediate level concepts and elements for developing dictation and sight-reading skills; repertoire for singing, moving, and listening. Folk music materials and analysis; continuation of personal retrieval system. Modes, diatony, simple functional harmony; Musicianship, Kodaly Pedagogy, Folk Music and materials, and Chorus.

MED 381 or Kodaly Level II at another accredited institution is a prerequisite for this class.

MED 383
DALCROZE: LEVEL I
Undergraduate
(2 credits) Eurythmics, solfege, improvisation, pedagogy, composition, and body technique.

Status as a Graduate Music Education student or an Undergraduate Music Education major with a completed petition to major is a prerequisite for this class.

MED 386
ORFF: LEVEL I
Undergraduate
(3 credits) Introduction to Orff-Schulwerk through the process of integrating rhythm and movement, speech and song, rhythm instruments, Orff instruments, and soprano recorder for creative music-making with children in pre-school, elementary grades, and those with special needs; emphasis on materials in major and minor pentatonic scales.

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.
MED 389  
CARL ORFF CHAPTER WORKSHOP  
Undergraduate  
Carl Orff Chapter Workshop  

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 390  
ORFF: LEVEL II  
Undergraduate  

(3 credits) Continuation of all aspects of the Schulwerk process; emphasis on a variety of materials, vocal, instrumental, and improvisational techniques for children in the middle and upper elementary grades; introduction of alto recorder; experience with dorian, aeolian, phrygian modes, major and minor tonalities.

MED 386 or completion of Orff Level I at another accredited institution is a prerequisite for this class.

MED 391  
ORFF: LEVEL III  
Undergraduate  

(3 credits) Advanced course leading to certificate in Orff-Schulwerk; additional exploration of Schulwerk materials found in volumes 35 and techniques of contemporary music; further development of skills in arranging rhythmic, speech, movement, and melodic materials for a variety of educational settings; recorder ensemble, lesson planning, and teaching opportunities.

MED 390 or completion of Orff Level II at another accredited institution is a prerequisite for this class.

MED 392  
STUDENT TEACHING  
Undergraduate  

(12 credits) A variety of supervised and directed experiences in the teaching of music in elementary and secondary schools. The teaching in schools is supplemented with conferences, evaluations, and seminars. COREQUISITE(S): MED 393.

MED 300, MED 303, MED 306, MED 310, MED 095 and status as a Music Education major is a prerequisite for this class.

MED 393  
STUDENT TEACHING SEMINAR  
Undergraduate  

(0 credit) COREQUISITE(S): MED 392.

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 398  
INDEPENDENT STUDY  
Undergraduate  
INDEPENDENT STUDY  

Status as a Music Education student who has passed the petition to major is a prerequisite for this class.

MED 400  
CULTURALLY RESPONSIVE MUSIC EDUCATION: EXPLORING CONCEPTS, THEORIES, AND PRACTICE IN K-12 CLASSROOMS  
Graduate  

The American classroom has been changing radically over the past two decades. Currently, one in nine children is the child of an immigrant, with most immigrants coming from Latin America and Asian countries. The changing demographic of American schools is in stark contrast to the face of the teaching profession, which is predominantly white and female. The purpose of this course is to introduce music educators to the concepts and theories that ground culturally responsive pedagogy, and to provide a framework for adaptation of this pedagogy into the music classroom.
MED 401
SEMINAR IN MUSIC EDUCATION I: HISTORY AND PHILOSOPHY OF MUSIC EDUCATION
Graduate
(4 credits) The courses are designed 1) to develop a philosophical and historical perspective of music education; 2) to study the psychology of music; 3) to study topics in curriculum design; 4) to encourage study and research in areas of student interest and need; and 5) to study contemporary issues in music education that can have significant impact on classroom teaching.
Status as a Graduate Music Education student is a prerequisite for this class.

MED 402
SEMINAR IN MUSIC EDUCATION II: PSYCHOLOGY OF MUSIC TEACHING & LEARNING
Graduate
(4 credits) The courses are designed 1) to develop a philosophical and historical perspective of music education; 2) to study the psychology of music; 3) to study topics in curriculum design; 4) to encourage study and research in areas of student interest and need; and 5) to study contemporary issues in music education that can have significant impact on classroom teaching.
MED 401 is a prerequisite for this class.

MED 403
SEMINAR IN MUSIC EDUCATION III: CURRICULUM DEVELOPMENT IN MUSIC EDUCATION
Graduate
(4 credits) The courses are designed 1) to develop a philosophical and historical perspective of music education; 2) to study the psychology of music; 3) to study topics in curriculum design; 4) to encourage study and research in areas of student interest and need; and 5) to study contemporary issues in music education that can have significant impact on classroom teaching.
MED 402 is a prerequisite for this class.

MED 404
HISTORY OF MUSIC EDUCATION IN THE UNITED STATES
Graduate
This class will provide graduate music education majors with the opportunity to develop historical frameworks for their understanding of the teaching profession. Students will gain a perspective of music education history, in order to better understand the present and future. Students will be expected to question the nature and value of music, in order to gain a sense of purpose in your teaching. Throughout the quarter, historical issues will be addressed in relation to the practice of teaching.

MED 413
CHORAL LITERATURE I
Graduate

MED 492
TECHNIQUES OF RESEARCH IN MUSIC EDUCATION
Graduate
This course will examine the basic questions, issues and theoretical frameworks central to the purpose, conceptualization, conduct, writing, reading, and the use of educational research as a means for informing educational theory, practice and policy.
Status as a Graduate Music Education student is a prerequisite for this class.

MED 498
MASTERS CANDIDATE RESEARCH
Graduate
Status as a Graduate Music Education student is a prerequisite for this class.

MED 499
INDEPENDENT STUDY
Graduate
Status as a Graduate Music Education student is a prerequisite for this class.
MEN 1
WIND SYMPHONY
Undergraduate
(0 credit) Study and rehearsal of traditional and new wind repertoire in preparation for concerts presented regularly each year. Placement audition required. All MEN courses are repeatable courses.

MEN 2
ENSEMBLE 20+
Undergraduate
(0 credit) Study, rehearsal, and performance of living composers' music and 20th century masterpieces, with focus on music for mixed ensembles of 8-25 players; acquisition of skills and instrumental techniques necessary for playing contemporary music.

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 23
CONCERT CHOIR
Undergraduate
(0 credit) Rehearsal and performance of choral works from a variety of styles and historical periods. An audition is required before the first rehearsal of the quarter.

MEN 30
CHAMBER ORCHESTRA
Undergraduate
(0 credit) Study, rehearsal, and performance of masterpieces of the smaller orchestra repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra, with emphasis on developing good listening and blending abilities. Placement audition required.

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 31
SYMPHONY ORCHESTRA
Undergraduate
(0 credit) Study, rehearsal, and performance of masterpieces of the orchestral repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra. Placement Audition Required.

MEN 37
WIND ENSEMBLE
Undergraduate
(0 credit) Study, rehearsal, and performance of masterpieces of wind literature, both traditional and contemporary, with focus on music for ensembles of 8-30 players; acquisition of necessary musical and professional skills for playing in such an ensemble. All MEN courses are repeatable courses. Placement audition required.

MEN 41
CHAMBER MUSIC
Undergraduate
(0 credit) A practical application of performance techniques for advanced instrumentalists and vocalists; repertoire adapted to the instrumentation of the class according to the ability of the class member; public performance. All MEN courses are repeatable courses.

MEN 47
UNIVERSITY SINGERS
Undergraduate
(0 credit) An advanced choral ensemble of selected voices. Audition required. All MEN courses are repeatable courses.
MEN 101
WIND SYMPHONY
Undergraduate
(1 credit) Study and rehearsal of traditional and new wind repertoire in preparation for concerts presented regularly each year. All of the MEN courses are repeatable courses.

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 123
CONCERT CHOIR
Undergraduate
Rehearsal and performance of choral works from a variety of styles and historical periods. Open to all DePaul undergraduates by audition.

MEN 130
CHAMBER ORCHESTRA
Undergraduate
(1 credit) Study, rehearsal, and performance of masterpieces of the smaller orchestra repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra, with emphasis on developing good listening and blending abilities. Placement audition required.

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 131
SYMPHONY ORCHESTRA
Undergraduate
(1 credit) Study, rehearsal, and performance of masterpieces of the orchestral repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra. All of the MEN courses are repeatable courses.

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 221
WIND ENSEMBLE
Undergraduate
(1 credit) Study, rehearsal, and performance of masterpieces of wind literature, both traditional and contemporary, with focus on music for ensembles of 8-30 players; acquisition of necessary musical and professional skills for playing in such an ensemble. All of the MEN courses are repeatable courses.

Status as an Undergraduate Music student is a prerequisite for this class.

MEN 231
UNIVERSITY SINGERS
Undergraduate
(1 credit) An advanced choral ensemble of selected voices. All of the MEN courses are repeatable courses. Open to all DePaul undergraduates by audition.

MEN 241
CHAMBER MUSIC
Undergraduate
(1 credit) A practical application of performance techniques for advanced instrumentalists and vocalists; repertoire adapted to the instrumentation of the class, according to the ability of the class members; public performance. All of the MEN courses are repeatable courses.

Status as an Undergraduate Music student is a prerequisite for this class.
MEN 300
AFRICAN MUSIC ENSEMBLE
Undergraduate
(1 credit) Students will learn musical techniques and repertory from cultures of Africa and the African diaspora. Course activities may include instrumental techniques, singing, and dancing. No prior experience with African music necessary.
Status as a Music student is a prerequisite for this class.

MEN 301
ENSEMBLE 20+
Undergraduate
(1 credit) Study, rehearsal, and performance of living composers' music and 20th century masterpieces, with focus on music for mixed ensembles of 8-25 players; acquisition of skills and instrumental techniques necessary for playing contemporary music.
Status as an Undergraduate Music student is a prerequisite for this class.

MEN 360
TOPICS IN MUSIC ENSEMBLES
Undergraduate
(0-1 credit) In depth investigation of a topic in a music ensemble.
Status as a Music student is a prerequisite for this class.

MEN 400
ENSEMBLE 20+
Graduate
(0 credit) Study, rehearsal, and performance of living composers' music and 20th century masterpieces, with focus on music for mixed ensembles of 8-25 players; acquisition of skills and instrumental techniques necessary for playing contemporary music.
Status as a Graduate Music student is a prerequisite for this class.

MEN 401
WIND SYMPHONY
Graduate
(1 credit) Study and rehearsal of basic and new wind repertoire in preparation for concerts presented regularly each year. All MEN courses are repeatable courses. Placement audition required.
Status as a Graduate Music student is a prerequisite for this class.

MEN 402
WIND SYMPHONY
Graduate
(0 credit) Study and rehearsal of traditional and new wind repertoire in preparation for concerts presented regularly each year. Placement audition required. All MEN courses are repeatable courses.
Status as a Graduate Music student is a prerequisite for this class.

MEN 406
CONCERT CHOIR
Graduate
(0 credits) Rehearsal and performance of choral works from a variety of styles and historical periods. All MEN courses are repeatable courses. Open to graduate students only. Audition required.
MEN 407
SYMPHONY ORCHESTRA
Graduate
(0 credit) Study, rehearsal, and performance of masterpieces of the orchestral repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra. Placement Audition Required.

Status as a Graduate Music student is a prerequisite for this class.

MEN 408
WIND ENSEMBLE
Graduate
(0 credit) Study, rehearsal, and performance of masterpieces of wind literature, both traditional and contemporary, with focus on music for ensembles of 8-30 players; acquisition of necessary musical and professional skills for playing in such an ensemble. All MEN courses are repeatable courses.

Status as a Graduate Music student is a prerequisite for this class.

MEN 409
UNIVERSITY SINGERS
Graduate
(0 credit) An advanced choral ensemble of selected voices. Placement audition required. All MEN courses are repeatable courses. Open to graduate students only. Audition required.

MEN 410
CHAMBER MUSIC
Graduate
(0 credit) A practical application of performance techniques for advanced instrumentists and vocalists; repertoire adapted to the instrumentation of the class according to the ability of the class member; public performance. All MEN courses are repeatable courses.

MEN 411
ENSEMBLE 20+
Graduate
(0 credit) Study, rehearsal, and performance of living composers' music and 20th century masterpieces, with focus on music for mixed ensembles of 8-25 players; acquisition of skills and instrumental techniques necessary for playing contemporary music.

Status as a Graduate Music student is a prerequisite for this class.

MEN 412
CHAMBER ORCHESTRA
Graduate
(0 credit) Study, rehearsal, and performance of masterpieces of the smaller orchestra repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra, with emphasis on developing good listening and blending abilities. Placement audition required.

Status as a Graduate Music student is a prerequisite for this class.

MEN 423
CONCERT CHOIR
Graduate
Rehearsal and performance of choral works from a variety of styles and historical periods. An audition is required before the first rehearsal of the quarter.
MEN 430  
CHAMBER ORCHESTRA  
Graduate  
(1 credit) Study, rehearsal, and performance of masterpieces of the smaller orchestra repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra, with emphasis on developing good listening and blending abilities. Placement audition required.

Status as a Graduate Music student is a prerequisite for this class.

MEN 431  
SYMPHONY ORCHESTRA  
Graduate  
(1 credit) Study, rehearsal, and performance of masterpieces of the orchestral repertoire, both traditional and contemporary; acquisition of necessary musical and professional skills for playing in an orchestra. All MEN courses are repeatable courses. Placement audition required.

Status as a Graduate Music student is a prerequisite for this class.

MEN 437  
WIND ENSEMBLE  
Graduate  
(1 credit) Study, rehearsal, and performance of masterpieces of wind literature, both traditional and contemporary, with focus on music for ensembles of 8-30 players; acquisition of necessary musical and professional skills for playing in such an ensemble. All MEN courses are repeatable courses. Placement audition required.

Status as a Graduate Music student is a prerequisite for this class.

MEN 441  
CHAMBER MUSIC  
Graduate  
(1 credit) A practical application of performance techniques for advanced instrumentalists and vocalists repertoire adapted to the instrumentation of the class, according to the ability of class members; public performance.

Status as a Graduate Music student is a prerequisite for this class.

MEN 447  
UNIVERSITY SINGERS  
Graduate  
(1 credit) An advanced choral ensemble of selected voices. All MEN courses are repeatable courses. Placement audition required.

MEN 498  
INDEPENDENT STUDY  
Graduate  
Status as a Graduate Music student is a prerequisite for this class.

MGT 202  
MAKING SENSE OF MANAGERIAL DATA  
Undergraduate  
This course is designed to encourage and enable students to think creatively and critically about data analysis as a tool in managerial decision making. Today organizations are swamped with data, however making the most effective and efficient use of that data is a continuing challenge. This course will provide students an opportunity to practice some of the skills associated with turning data into useful information for sound managerial decision making.

MAT 137 or equivalent is a prerequisite for this course.
MGT 219
FOUNDATIONS OF BUSINESS THOUGHT
Undergraduate
A journey through the ages of written business history. This course traces the major ideas that writers, philosophers, and economists presented that helped construct the world of commerce. The course discusses readings from Plato, Aristotle, Confucius, Ben Franklin, Emerson, Thoreau, Sun Tzu, Carnegie, Marx, and Henry Ford, among others.

MGT 228
BUSINESS, ETHICS, AND SOCIETY (CROSS-LISTED WITH REL 228)
Undergraduate
This course will examine the nature and purpose of economic life and contemporary commerce as understood from the perspective of religious and secular communities, as well as the ethical implications that flow from the various worldviews. Sections of the course critically examine the thought of different religious traditions on specific business-related issues, placing a variety of religious discourses into direct conversation with secular voices regarding ethical business conduct. Cross-listed as REL 228.

WRD 103 or HON 100 or HON 101 is a prerequisite for this class.

MGT 248
BUSINESS ETHICS (CROSS-LISTED WITH PHL 248)
Undergraduate
An examination of various ethical and moral issues arising in contemporary business and its activities which affect our society and the world. Cross-listed with PHL 248.

MGT 300
PRINCIPLES OF MANAGEMENT
Undergraduate
Effective application of managerial techniques and concepts to continually improve an organization's competitive position in the marketplace. Topics include management processes, values and attitudes, ethics and diversity, the global environment of management, strategic planning, organizational structures, motivation, leadership, teams, human resources, organizational control, and organizational communications.

At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.

MGT 301
PRINCIPLES OF OPERATIONS MANAGEMENT
Undergraduate
Operations management focuses on the effective application of managerial techniques and concepts related to the delivery of services, manufacturing, and supply chain processes. Topics may include operations strategy, forecasting, project management, quality management, supply chain management, facility location and layout, productivity, inventory management, and scheduling.

ACC 101, ACC 102, ECO 105 and (MAT137 or equivalent) are a prerequisite for this class.

MGT 302
ORGANIZATIONAL BEHAVIOR
Undergraduate
This course focuses on the nature and consequences of human behavior in organizations. The prediction, explanation and management of individual and group behavior in the organization is dependent upon an understanding of the concepts of organizational behavior. Classroom experiences will focus on both understanding and practicing these concepts. Topics cover both the individual level - e.g. perception, attitudes, motivation - and the group level - e.g. leadership, group dynamics, communication, power and politics, and decision making.

MGT 300 is a prerequisite for this class.

MGT 307
HUMAN RESOURCES MANAGEMENT
Undergraduate
Concepts, theories, principles and techniques of personnel administration. Job analysis, employment law, recruitment, selection, training and development, employee motivation and performance appraisal, compensation, employee benefit programs, grievances, and labor relations.

At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.
MGT 315
MANAGEMENT SCIENCE
Undergraduate
Management science involves the use of quantitative models to support decisions faced by managers. Topics include model formulation, linear, non-linear and integer programming, transportation, transshipment and assignment formulations, network flow, decision analysis, and multicriteria decision making. Spreadsheet and other software packages will be used to model, solve, and analyze these problems.

MGT 301 is a prerequisite for this class.

MGT 320
TRAINING AND CAREER DEVELOPMENT
Undergraduate
A study of the training and management development practices of organizations. Emphasis is placed on the identification of training needs, program design, choice of training methods and the evaluation of results. The practices and legislation affecting promotion of employees are also discussed.

MGT 307 or (declared HSP Leadership specialization and HSP 382) is a prerequisite for this class.

MGT 322
THE MANAGEMENT & MEASUREMENT OF QUALITY
Undergraduate
The theory and application of the concepts, principles and tools of modern quality control and management in manufacturing and service organizations. Specific topic areas include product design, process control, vendor selection and certification, quality information systems, quality costs, customer contact, and TQM philosophies and techniques.

MGT 301 is a prerequisite for this class.

MGT 323
SUPPLY CHAIN MANAGEMENT
Undergraduate
Analysis of the purchasing function, including sourcing, buying methods, vendor analysis, and contract execution. Organization and management of the supply chain with emphasis on intra and inter-company relationships, especially with logistics and general management.

MGT 301 is a prerequisite for this class.

MGT 325
SUSTAINABLE MANAGEMENT
Undergraduate
This course discusses and analyzes the concept of sustainability within a business and management setting. It will analyze the complex relationship between business and the environment and it will explore the nature of business in today’s global context where addressing environmental and social issues is becoming increasingly important. Furthermore, it aims to discuss how the talents of business might be used to solve world’s environmental and social problems. Rather than focusing on a ‘doom and gloom’ approach, the course aims to emphasize the solutions towards a sustainable economy.

MGT 330
RECRUITMENT AND SELECTION
Undergraduate
An examination of the recruiting and selection process used by organizations in the public and private sectors. A select group of tests will be discussed and used by the student for familiarization. EEO, Affirmative Action, and other legislation affecting recruiting and selection of employees will be discussed.

MGT 307 or (declared HSP Leadership specialization and HSP 382) is a prerequisite for this class.
MGT 335
COMPENSATION & BENEFITS
Undergraduate
The course has two major goals. The first is to learn how to design a pay system that is efficient, legally compliant, and fair/ethical. This is done through such topics as pay strategy, job descriptions, job evaluation, pay surveys, pay structures, pay increases, and legal compliance. The second goal is to learn how to design a benefits plan that supports company objectives and values. This is done through such topics as legal compliance, retirement plans, health insurance plans, social security, workers’ compensation, and work-life benefits.

MGT 307 or (declared HSP Leadership specialization and HSP 382) is a prerequisite for this class.

MGT 340
LEADERSHIP IN SPORTS: LESSONS FOR COACHING IN THE WORKPLACE
Undergraduate
A framework of leadership and coaching is utilized to critically examine the effectiveness of several sports' coaches and their leadership/coaching styles, as they motivate players to achieve their maximum level of performance. Lessons from leading sports' coaches are then applied to the workplace, where managers motivate employees to perform to their potential. The course also highlights the importance of unique situations in both the sports and workplace arenas. Major topics to be covered include roles of coaches and players, skills of coaching, coaching teams, and "flow" in sports and organizations.

MGT 345
SERVICE SECTOR MANAGEMENT
Undergraduate
The intangible nature of services creates special challenges for the management of service organizations. These challenges are considered through examples drawn from various service industries - e.g., banking, transportation, hotel/restaurant, and retail - and from internal service functions such as personnel, information processing and production planning. Discussion, exercises, and assignments focus on the nature of service operations, decisions faced in the management of services and tools available to facilitate effective and efficient service delivery. Topics covered include: the service economy, service concept, design of service delivery systems, staffing delivery systems, capacity management, quality control, and service strategy. PREREQUISITE(S): MGT 301.

MGT 301 is a prerequisite for this class.

MGT 354
GLOBAL HUMAN RESOURCE MANAGEMENT
Undergraduate
Concepts, theories, principles and techniques for effectively managing a workforce globally. The focus is on effective strategies relating to human resource strategy, staffing, development, performance management, remuneration management, legal/regulatory compliance and employee/labor relations in geographically dispersed and culturally diverse organizations. The purpose of the course is to help students understand the issues related to effectively managing a workforce in a global organization and how human resource strategies and programs can enable the workforce to contribute to organizational success.

MGT 300 is a prerequisite for this class.

MGT 355
NEGOTIATIONS
Undergraduate
This course relies upon experiential learning to enhance students' ability to get what they want through the negotiation process. It is a 'skill building' course designed to help each student become more persuasive --- both personally and professionally. The course makes use of lecture, class discussion, various 'street negotiation' assignments, and a major bargaining exercise. It enables students to compete effectively in future negotiations.

MGT 300 is a prerequisite for this class.

MGT 356
SPORTS MANAGEMENT
Undergraduate
Students will examine the major issues facing sport managers in a variety of sport organization settings. Through the lens of organizational theory and behavior, areas explored include professional, Olympic, collegiate, and youth sport. Other areas of focus will include sponsorship, technology, legal issues, and emerging issues through course projects and case studies. Students will be exposed to various disciplines/careers through guest lecturers in the sports industry and/or on-site experiences.

MGT 300 is a prerequisite for this class.
MGT 357  
INTERNATIONAL BUSINESS  
Undergraduate  
This course is designed to develop students' knowledge and the skills needed to face the challenges of globalization. It provides participants with the global perspective required to expand their intercultural communication competencies and conduct business internationally. The subjects scheduled are diversified in nature and scope. They cover many fields of knowledge such as the multi-national company's environment, culture, strategy and organization as well as the role of managers in today's global business. The course topics and assignments are intended to enrich participants' professional and personal lives.

MGT 360  
LEADERSHIP  
Undergraduate  
Leadership is a social influence process, the success of which is dependent upon certain skills (e.g. communication, conflict resolution) and situational factors (e.g. task characteristics, organizational structure). This course applies traditional and contemporary leadership theory to the development of individual leadership skills. Classroom experiences focus on understanding and practicing skills associated with effective leadership.

MGT 300 is a prerequisite for this class.

MGT 361  
ORGANIZATIONAL DEVELOPMENT  
Undergraduate  
Techniques of organizational design and development with emphasis on the methods of planned and controlled change of the organization to insure its survival in a changing external environment. The interdependent elements of people, structure, tasks and technology will be examined and related to changes in problem-solving and renewal processes of personnel in the organization. Various phases of the OD process including changes in employees' attitudes, resistance to change, survey feedback, team building, sensitivity training, Quality of Work Life, and intervention techniques will be explored.

MGT 300 is a prerequisite for this class.

MGT 370  
BUSINESS PLAN DEVELOPMENT  
Undergraduate  
A business plan is an important strategic tool required to help establish the direction of an enterprise and attract capital required to run the business. It incorporates and integrates the functional areas of business and puts into practice many of the concepts and theories acquired in other classes. It describes the overall business venture, the product or service, the customers, the competition, the marketing, the legal structure, the operations, the human resources plan, the break-even analysis, the financing and all those things that are required to run a business. It helps to identify many unanticipated factors and reality-tests critical assumptions, thereby creating a roadmap for a successful enterprise. Students are encouraged to identify a business opportunity and develop their own business plan.

MGT 301 is a prerequisite for this class.

MGT 373  
CREATIVITY & ENTREPRENEURSHIP  
Undergraduate  
This course will provide an overview of the opportunity recognition and evaluation process by examining how people, the industry, and the social environment interact to identify, create and shape entrepreneurial opportunities. The focus of this course is on creativity and innovation within an entrepreneurial context. Students learn creative tools and applications to assist in designing new business ideas and ventures.

MGT 300 is a prerequisite for this class.

MGT 393  
INTERNSHIP AND MANAGEMENT CONSULTING PROGRAM  
Undergraduate  
Students encounter real work experience improving linkages between classroom efforts and the business world.

At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.
MGT 398  
SPECIAL TOPICS  
Undergraduate  
Content and format of this course are variable. An in-depth study of current issues in management. Subject matter and prerequisites will be indicated in class schedule.  
At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.

MGT 399  
INDEPENDENT STUDY  
Undergraduate  
Available to students of demonstrated capability for intensive independent work in management.  
At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.

MGT 444  
DEVELOPMENTAL ASSESSMENT CENTER  
Graduate  
Students participate in a developmental assessment center designed to assess their managerial and interpersonal skills including teamwork, oral and written communication, ethical decision-making, initiative and planning. Students receive extensive feedback regarding their performance. Based upon this feedback, personal development plans are created to be used throughout the curriculum.

MGT 500  
MANAGING FOR EFFECTIVE AND ETHICAL ORGANIZATIONAL BEHAVIOR  
Graduate  
Students will critically examine ethical and creative methods to solve problems related to managing individuals and teams. Students utilize feedback from a developmental assessment center assessing their managerial and interpersonal skills. Personal development plans are created and skills developed throughout the course. Skill development domains include perception, attribution, motivation, learning leadership, communication, team development, managing change and conflict, decision-making, power and politics and business ethics.  
MS in Taxation students are restricted from registering for this class.

MGT 501  
STRATEGIC SUPPLY CHAIN MANAGEMENT  
Graduate  
This course examines how operations related strategic decisions can lead to improved market and competitive performance. We view the supply chain (of products or services) from a strategic point of view. The design of an expedient logistics system is critically linked to the key decisions and objectives of a responsive and efficient supply chain (forecasting, aggregate planning, inventory management, matching supply with demand, transportation, location and information). We cover those topics with cases, spreadsheets and simulations to illustrate and help understand how logistical decisions impact the performance of the firm as well as the entire supply chain. Offered once a year.

MGT 502  
OPERATIONS MANAGEMENT  
Graduate  
At its core, business is about providing a superior product or service. This course analyzes the processes used to deliver products in the marketplace. World class firms have demonstrated that effective operations management can be a potent competitive weapon. This course addresses the key operations and logistical issues in service and manufacturing operations, which have strategic as well as tactical implications. Both quantitative and qualitative techniques and principles used by leading organizations are examined. Offered every quarter.  
GSB 420 or status as a MS-BIT student is a prerequisite for this class.

MGT 506  
DECISION MAKING FOR MANAGERS  
Graduate  
This course addresses Simon's three-phase problem-solving model. Students learn how to improve problem diagnosis through statistical and logical tools, creatively generate alternative solutions, and make effective decisions through decision analysis and by building decision support models. Students will use a variety of spreadsheet applications to aid in the decision-making process. Offered once per year.  
MGT 502 is a prerequisite for this class.
MGT 508
QUALITY MANAGEMENT SYSTEMS
Graduate
Organizations seeking to improve their customer satisfaction, operating efficiency, and profitability frequently turn to quality management initiatives--including; Total Quality Management, Business Process Reengineering, Six Sigma, and ISO Quality Standards. The lessons learned through the success and failure of these programs provide valuable insights to managers seeking to achieve performance excellence within their own organizations. The course relies on the Malcolm Baldrige National Quality Award framework and case analysis to explore successful quality management initiatives. Offered twice a year.

MGT 502 is a prerequisite for this class.

MGT 515
SUSTAINABLE MANAGEMENT
Graduate
This course discusses and analyzes the concept of sustainability within a business and management setting. It will analyze the complex relationship between business and the environment and it will explore the nature of business in today's global context where addressing environmental and social issues is becoming increasingly important. Furthermore, it aims to discuss how the talents of business might be used to solve world's environmental and social problems. Rather than focusing on a 'doom and gloom' approach, the course aims to emphasize the solutions towards a sustainable economy.

MGT 518
LABOR ECONOMICS AND LABOR RELATIONS (CROSS-LISTED WITH ECO 518)
Graduate
A study of the American labor force: measurement, characteristics and behavior under changing income, employment and technology. An examination of recent labor market developments provides the basis for a critical analysis and appraisal of contemporary wage theory. Topics include changes in the labor force, unemployment, wage determination, the minimum wage, internal labor markets, productivity, discrimination, unions and collective bargaining. Cross-listed with ECO 518.

MGT 555 is a prerequisite for this class.

MGT 519
SPORTS MANAGEMENT
Graduate
Students will examine the major issues facing sport managers in a variety of sport organization settings through course projects and case studies. Through the lens of organizational theory and behavior, areas explored include professional, Olympic, collegiate, and youth sport. Other areas of focus will include community and fitness centers, sponsorship, technology, legal issues, and emerging issues. Students will be exposed to various disciplines/careers through guest lecturers in the sports industry and learn current management issues from industry experts.

MGT 521
MANAGEMENT OF FAST GROWING FIRMS
Graduate
Alternative growth strategies for companies in the second stage of their life cycle are examined. After initial start-up, a unique set of problems and constraints confront the firm limiting its growth. Expansion of product line and services, new market development, redefinition of organizations, financial resource allocation, second stage financing using a case study approach, and going public are some issues that are covered. Proposed revisions are critically evaluated. Offered once a year.

MGT 500 and ACC 500 are a prerequisite for this class.

MGT 523
RECRUITMENT AND SELECTION
Graduate
An advanced study of current recruitment and selection practices of organizations both public and private. Emphasis is placed on common tests that are used and an examination of these tests for applicability in specific situations. Legislation related to EEO an Affirmative Action programs are discussed. Offered once a year.

MGT 555 is a prerequisite for this class.
MGT 524  
LEADERSHIP IN SPORTS: LESSONS FOR COACHING IN THE WORKPLACE  
Graduate  
A framework of leadership and coaching is utilized to critically examine the effectiveness of several sports' coaches and their leadership/coaching styles, as they motivate players to achieve their maximum level of performance. Lessons from leading sports' coaches are then applied to the workplace, where managers motivate employees to perform to their potential. The course also highlights the importance of unique situations in both the sports and workplace arenas. Major topics to be covered include roles of coaches and players, skills of coaching, coaching teams, and "flow" in sports and organizations.

MGT 525  
TRAINING AND CAREER DEVELOPMENT  
Graduate  
An intensive study of personnel training and development in contemporary organizations. Emphasis is placed upon the identification of training needs, program design, choice of training methods, and evaluation of results. Classroom activities focus on application with students designing and presenting training seminars. Offered once a year.

MGT 526  
COMPENSATION AND BENEFITS  
Graduate  
The course addresses the total rewards available in an organization. The first goal is to learn how to design a pay system that is efficient, legally compliant, and fair/ethical. This is done through such topics as pay strategy, internal pay alignment, external competitiveness, pay for performance, and legal compliance. The second goal is to learn how to design a benefits plan that supports company objectives. This is done through such topics as retirement plans, health insurance plans, and legally required benefits. The third goal is to learn about work-life programs.

MGT 555 is a prerequisite for this class.

MGT 529  
LIFE AND CAREER PLANNING  
Graduate  
This course is designed to develop your life and career skills to meet the challenges associated with changing careers and changing jobs. Topics include: enhancing your self-esteem, balancing life and career, tapping interests, aptitudes and values, self-marketing, resumes and interviews and strategic career planning to achieve life and career goals. This is a Human Resource Management and a Leadership and Change Management course. Offered once a year.

MGT 530  
LEADERSHIP IN ORGANIZATIONS  
Graduate  
This course utilizes a theoretical framework to provide a foundation of understanding of effective leadership in organizations. The opportunity for self-assessment of leadership strengths and management styles, as well as reflection and action planning for individual leadership development, is also provided. To enhance self-assessment, there are questionnaires, as well as classroom exercises, experienced in a supportive group environment. Examples of effective organizational leadership are also critically examined in case studies. Current leadership topics to be covered include values and vision, strategy, organizational culture, management style, leading groups and teams, and coaching, thus providing analysis from both the macro and micro organizational levels. Offered twice a year.

MGT 535  
CHANGE MANAGEMENT  
Graduate  
This course is targeted towards external and internal consultants, as well as managers and other change agents within organizations. Change Management fosters improved competency in the skills necessary during all phases of the change process - from diagnosis, to interventions, through evaluation. Organizational change issues are critically examined, and case studies, exercises, and assessments are utilized, to better understand change from organizational, group, and individual levels. Change models serve as frameworks that emphasize the importance of interactive consultative processes. A major organizational change project is required of all students. Offered twice a year.

MGT 500 is a prerequisite for this class.
MGT 545
MANAGING SERVICE OPERATIONS
Graduate
This course provides an examination of operating activities in service industries. Emphasis is on the principles of design, operation and control of service delivery systems. Lectures, cases and assignments focus on such topics as delivery system design, client interfaces, operations control, capacity management and quality control. Offered once a year

MGT 502 is a prerequisite for this class.

MGT 551
GLOBAL HUMAN RESOURCE MANAGEMENT
Graduate
Concepts, theories, principles and techniques for effectively managing a workforce in a global organization. Focus on HR strategy, staffing, development, performance management, remuneration management, legal/regulatory compliance and employee labor relations. Completion of MGT 555 is recommended prior to registration in this course.

MGT 552
MANAGING CULTURAL DIFFERENCES FOR GLOBAL SUCCESS
Graduate
"Managing Cultural Differences for Global Success" course is designed to guide and coach participants on how to work and communicate effectively with people from different cultures. The course provides a hands-on approach for developing cross cultural competency. Comparative cultural models will explain how concepts such as culture, values, time, power, mindsets and thinking patterns differ in the world. We will illustrate with real-life cases pertaining to doing business in Europe, Asia and the Americas.

MGT 555
STRATEGIC MANAGEMENT OF HUMAN RESOURCES
Graduate
This course will help students understand how the management of people is influenced by the social, ethical and legal environment; by diversity in the work place; by the organizational culture; and by the business strategy. Students will learn how to effectively perform the following HR activities: selecting employees, developing people, evaluations and rewarding performance, and motivating employees. Offered every quarter.

MGT 500 is a prerequisite for this class.

MGT 556
ETHICS AND LEADERSHIP: STREETS OF CHICAGO
Graduate
The innovative Management Department Streets of Chicago course, "Leadership & Ethics," consists of ten on-site meetings with current senior leaders in the Chicago community (followed by in-class discussion sessions). These meetings allow students the exciting and rare opportunity to engage in personalized, in-depth conversations with leaders in government, CEOs and senior executives from for-profit corporations, and directors of nonprofit organizations. The meetings take place at the leader's place of business and will allow for an informal discussion with individuals otherwise known to students only through the media and at a distance. The purpose of these conversations is to gain knowledge about the role of leaders in today's corporate and non-profit environments, the impact of ethics in leadership decision-making and the responsibilities and burdens carried by these individuals. Students learn first-hand from the experiences of these extraordinary success stories so that they can glean the critical elements necessary for successful and ethical leadership. In-class sessions subsequent to each leadership meeting will involve briefings on key issues facing the leaders involved, analysis of risk assessment and management, and critical review of leadership decision-making in order to most effectively explore the actual process of leadership and the development of leadership capability and qualities. As such, the course is designed to serve both those students who are interested in leading their own entrepreneurial ventures, as well as those who seek leadership roles in larger corporations or other organizations.

MGT 557
INTERNATIONAL MANAGEMENT
Graduate
The object of this course is to develop clear awareness of the international business operations, practices and environment. It provides the concepts, methods and tools necessary to face the global challenges in international management. The objective is met through lectures, classroom discussions, library assignments and research work. Students will learn the effective use of the international business references. By the end of the course, they are expected to have developed a high level of competency in acquiring, understanding, analyzing and synthesizing international management information from international business directories, databases and CD-ROMs.
MGT 559
HEALTH SECTOR MANAGEMENT
Graduate
This graduate level, hands-on course will discuss the evolution and current trends in the delivery and financing of health goods and services in the biotechnology, pharmaceutical, medical device, and health services delivery industries within the health sector. This course will equip students with the ability to use managerial epidemiology as a decision making tool in marketing and operations in the health sector. Ultimately, this course will enable students to apply Michael Porter's Five Forces Model to analyze and manage the various industries within the health sector. This course will use lectures, role plays, simulations, and the case method. Offered once a year.

MGT 562
RESOLVING CONFLICT IN ORGANIZATIONS
Graduate
Comprehensive study and skill building exercises devoted to the development of skills necessary for managers to resolve and manage conflict within their organizations. For illustrative purposes, discussions and exercises will be in the context of employment disputes, discrimination disputes, and/or labor-management disputes. However, the skills attained in the course may be successfully used to resolve any type of conflict. Included will be a discussion of various dispute resolution methodologies including the mediation, arbitration, and investigation of asserted conflicts, real or perceived, as well as the design of dispute resolution processes and related issues of organizational fairness, justice, and ethics. Offered once a year.

MGT 500 and MGT 555 are a prerequisite for this class.

MGT 563
NEGOTIATION SKILLS
Graduate
The nontraditional course relies predominantly upon experiential learning to enhance students' ability to get what they want through negotiation. It is a skill-building course designed to help each individual student become persuasive, both personally and professionally. The course makes use of lecture, class discussion, various stress negotiation assignments and a major bargaining exercise. It builds upon failures as well as successes, enabling students to identify their own individual negotiations style. Students completing the course will have developed the ability to compete successfully in future negotiation situations at all levels and to refine the tools and techniques they learned during the quarter. Offered three times a year.

MGT 555 is a prerequisite for this class.

MGT 564
STREETS OF CHICAGO: HEALTH SECTOR MANAGEMENT
Graduate
This graduate level course will equip management, marketing, finance, and accounting students with the knowledge necessary to apply their specific expertise into one of the fastest growing sectors of the global economy. Upon completing this course, students will be exposed to not only the latest theories, techniques, and best practices but also some of the key players in Chicago's health insurance, biotechnology, pharmaceutical, hospital, and group practice industries.

MGT 565
EMPLOYMENT LAW
Graduate
The purpose of the course is to identify how a supervisor or firm owner is legally regulated in connection with the management of her or his workforce, as well as the management implications of the regulation. In this way, the student will learn of the legal ramifications of human resource management decisions. Topics which will be addressed include discrimination on the basis of age, gender, race, religion, disability and national origin, sexual harassment, drug and other forms of testing, regulation of hiring and firing decisions, privacy rights and regulation of off-work conduct. Class activities may also focus on understanding bias and prejudice in managerial decision-making. PREREQUISITE(S): MGT 555

MGT 555 is a prerequisite for this class.
MGT 566
HEALTH INSURANCE & BENEFITS
Graduate
This course is a primer on healthcare insurance and benefits programs in the United States. Emphasis will be placed on employer group plans through which most American gain access to the healthcare delivery system and receive assistance with the cost of their medical expenses. We will survey the demand for healthcare, the regulatory environment, and the predominant public and private sector health insurance programs. The challenges and perspectives of providers, insurers, and employers will be discussed, as will important ethical considerations. The course will also review benefit programs typically provided through employers with an emphasis on group medical plans, including plan types, design, effectiveness, and the development of premium rates. It will conclude with discussions of the latest healthcare reform developments and trends defining the future of the healthcare system.

MGT 570
ENTREPRENEURSHIP AND NEW VENTURE MANAGEMENT
Graduate
The focus of the course is on new venture initiation and the preparation of a business plan that can be used to generate financing and to begin operations in a new business enterprise. It examines the critical factors involved in the conception, initiation and development of new business ventures. Topics covered include the identification of characteristics of prospective entrepreneurs, identifying innovations, market potential analysis for new products or services, acquiring seed capital, obtaining venture capital for growth or purchase of an existing business and organization and operation of the new business. Each student is required to develop a business plan which will be presented to the class. Students wishing to start, develop, acquire, sell or merge a business are encouraged to do so. Offered three times a year.

ACC 500, MGT 500 and MGT 502 are a prerequisite for this class.

MGT 571
FINANCING NEW VENTURES (CROSS-LISTED WITH FIN 571)
Graduate
This course will focus on identifying, examining and evaluating various sources of original and growth capital. Emphasis will be on legal, financial and tax issues related to capital formation as well as specific problems experienced by the small-to-medium-sized firms undergoing rapid growth. Topics discussed will include financing startups, financial planning and strategy, going public, selling out and bankruptcy. A formal proposal for capital acquisition developed through field research will be required of each student.

FIN 555 is a prerequisite for this class.

MGT 572
CORPORATE VENTURES AND MANAGEMENT
Graduate
The focus of this course is on how corporations develop new ventures. It critically examines the circumstances that make it possible for employees to contribute their venture ideas to the corporate objectives and describes techniques that stimulate such ideas. Although the primary focus will be on the employee and how the individual can be entrepreneurial within a corporate structure, the course also examines how the corporation can systematically encourage innovation. Case studies of corporate ventures projects will be reviewed. Offered once a year.

ACC 500, MGT 500 and MGT 502 are a prerequisite for this class.

MGT 573
CREATIVITY IN BUSINESS
Graduate
This course explores the nature and role of creativity in organizations. Theories and modes of creative thinking, and the link between creativity and innovation are presented. The course format is largely experiential, with emphasis on group and individual exercises, techniques, simulations and cases, through which students will investigate the creative process in a variety of organizational settings. The role of managers and team members in nurturing and sustaining a creative enterprise is discussed. The course is designed to open students to the creativity within themselves and organizations, and to the tools with which creativity can be managed to promote innovation and enhance organizational effectiveness as well as satisfaction and quality of work life. Offered four times a year.
MGT 589
COACHING FOR LEADERSHIP, PERSONAL SUCCESS & PEAK PERFORMANCE
Graduate
Developing executive coaching competencies for “managers as coach” is the keynote of this course. Grounded in positive psychology and the science of human flourishing, participants will identify and apply strengths based interventions to promote organizational effectiveness, career success and life fulfillment. Students will learn and deploy the GROW model of coaching, motivational interviewing, solution focused coaching, mindfulness, and goal focused approaches to help people achieve change. Participants will also enhance their own ability to create presence, build trust, manage self awareness, listen, ask powerful questions, design actions and manage accountability. Working from a place of purpose and intention course participants will harness competitive advantage, explore finding flow, managing stress, maintaining optimism, and creating balance in work, health and family.

MGT 590
MANAGEMENT OF INNOVATION AND TECHNOLOGICAL CHANGE
Graduate
The ability to manage technological innovation has become an increasingly essential requirement for business people regardless of functional specialty. The objective of this course is to explore ways to create environments that are conducive to technological innovation. Throughout the course students examine practices, models, and approaches that established, as well as new, organizations employ to promote innovative practice, technological change, and new technologies. The following topics will be covered: the innovation process, managing technical people, the impact of organizational design on innovation, knowledge management, cross function teams and exploiting new technologies. Students will research new technologies and discuss potential business applications and issues associated with those technologies. Offered once a year.

MGT 592 is a prerequisite for this class.

MGT 595
SOCIAL ENTREPRENEURSHIP
Graduate
This course explores principles and applications of social value generation in entrepreneurial contexts. Participants will learn how agile, growing ventures are launched and managed to generate value that transcends commercial and social frontiers. The course material emphasizes concepts from traditional entrepreneurship in the context of the broader social sector environment. Diverse contributions from graduate students in the College of Commerce as well as the School of Public Service ensure deep exploration of the social venture realm. The course experience is enriched by team-based consulting to several actual Chicago social entrepreneurial ventures as a practical complement to classroom activities.

MGT 598
PROJECT MANAGEMENT: SEMINAR IN OPERATIONS MANAGEMENT
Graduate
This course covers management techniques that are applicable to a wide variety of project types including new product development, business start-ups, marketing campaigns, facility relocations, construction, research programs, and special events. Emphasis is on scheduling, budgeting, and control including the selection and application of project management software. Other topics include project organization, qualifications and roles of the project manager, project leadership, team building, and the management of conflict and stress in projects. Offered three times a year.

MGT 793
MANAGEMENT INTERNSHIP
Graduate
This is a unique opportunity in which interns gain and develop managerial skills, providing a link to mastering the dynamics of running a business. This hands-on experience allows the intern to apply his or her skill/wisdom to the work place and provides invaluable knowledge that is crucial for future advancement. While building an impressive resume for further job opportunities, the intern will be immersed in a stimulating environment with a pool of established resources. In addition, networking opportunities avail themselves to build future relationships.

MGT 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. An in-depth study of current issues in management.
MGT 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in management.

MIS 140
MANAGEMENT INFORMATION SYSTEMS
Undergraduate
Management Information Systems addresses how information technology is used to support business operations and management, especially the use of spreadsheets in business applications to ensure that students can analyze and present business data. Topics include strategic uses of IT, databases, data warehouse, decision support and artificial intelligence, e-commerce, systems development, IT infrastructure, security, emerging trends, social, ethical and legal considerations. Formerly MIS 340.

MIS 350
BUSINESS SYSTEMS ANALYSIS
Undergraduate
The focus of this course is on the early phases of information systems development, specifically: planning, analysis, and requirements specification. In general, the course covers business modeling, process management, requirements gathering and other topics deemed important to business by systems analysts and consultants. Typical topics include planning techniques, analysis techniques, the system development life cycle, data flow diagrams, data gathering, network diagrams, Gantt charts, business process reengineering, joint application design, use case diagrams, flow charts, decision trees, decision tables, structured English, and more. Offered every fall.

MIS 360
SYSTEMS ANALYSIS AND DESIGN
Undergraduate
This is a course in object-oriented systems analysis and design using UML. Students cover activity, use-case, class, sequence, state chart, and other UML diagrams. They also cover requirements analysis, GUI and infrastructure design along with project size and complexity estimating using Function Point Analysis.

MIS 362
INFORMATION SYSTEMS PROJECT MANAGEMENT
Undergraduate
The course covers IS project management concepts, techniques, tools, issues, roles and responsibilities of project leaders. Topics include, but not limited to, resource allocation, scheduling, budgeting, monitoring, controlling, use of Gantt charts, precedence analysis, PERT, and CPM. Students are exposed to Microsoft Project.

MIS 366
INTERNET TECHNOLOGIES IN BUSINESS
Undergraduate
The course will be an introduction to internet technologies with particular focus on World Wide Web and e-business applications. Topics include internet technology application framework, attributes of e-business applications, client and server side processing, web servers, Java, J2EE and Microsoft’s .NET, accessing enterprise data, HTTP security, certificates and CA, XML and e-business integration, latency and workload management, and wireless access. Students will work in groups and will be required to do one design proposal and make one presentation using Visio.

IT 130 is a prerequisite for this class.
MIS 370
DATABASE MANAGEMENT SYSTEMS DESIGN AND DEVELOPMENT
Undergraduate
The course covers topics such as entity relationship modeling, normalization, Structured Query Language, database design principles, data warehousing, transaction management, and database administration. Students will complete assignments and a group term project using Microsoft SQL Server 05.

MIS 398
SPECIAL TOPICS
Undergraduate
Special Topics
At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.

MIS 399
INDEPENDENT STUDY
Undergraduate
Independent Study is available to students of demonstrated capability for intensive independent work in management information systems.

MIS 555
MANAGEMENT OF INFORMATION TECHNOLOGY
Graduate
This course focuses on the management and use of information technology (IT). As the use of IT in society grows, particularly in business, our graduates are likely to become responsible for managing some technology resources and to participate in IT planning and development projects as founders, sponsors, team members, managers of development or end-user developers. Students should become effective users and evaluators of information, IT, and information services. The course explores a number of IT-related topics such as the strategic role of IT, IT planning and architecture, building the telecommunication highway system, management issues in systems development, the expanding universe of computing, group support systems, intelligent systems, electronic document management, and managing the human side of systems.

MIS 673
DATA MANAGEMENT
Graduate
Data has been recognized as an important corporate resource and databases have evolved into a central component of business information systems. Topics include semantic data modeling using entity-relationship and object models; data structuring with normalization; relational database design, implementation and manipulation with SQL (Structured query language); and some evolving technologies such as data warehousing, on-line analytical processing, object-oriented databases, and data visualization. Hands-on exercises include the use of a relational database system with SQL and data modeling CASE (computer-aided software engineering) tools.

MIS 674
SYSTEMS ANALYSIS AND DESIGN
Graduate
The focus of this course is on the early phases of information systems development starting with requirements analysis and specification. Alternative systems development methodologies including conventional structured approaches are reviewed but the emphasis is on distributed processing together with object-oriented analysis and design, rapid application development and prototyping, the use of CASE (computer aided software engineering) tools and GUI (graphical user interface) design with event-driven computing.

MIS 683
INFORMATION TECHNOLOGY STRATEGY AND ARCHITECTURE
Graduate
This course addresses the fundamental aspects of developing an information technology (IT) strategic plan and the enabling IT architecture to support enterprise business processes. Students explore the importance of strategic alignment of business and technology as well as the contribution IT has on the value chain. Students will be able to more effectively use and manage IT from an enterprise view and from an architectural perspective. The course includes lectures, practical case discussions and current events in the industry. It also explores how IT can be leveraged to improve shareholder value, customer satisfaction and the competitive position of the firm. This is intended to be an advanced level managerial course for practitioners who have ambitions to be a senior IT executive, management consultant or a technical analyst.
MIS 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. It involves an in-depth study of current issues in information systems and technology. Subject matter constantly changes and will be indicated in class schedule.

MIS 799
INDEPENDENT STUDY
Graduate
Available for graduate students of demonstrated capability for intensive independent work in information systems.
MIS 555 or equivalent is a prerequisite for this class

MKT 202
QUANTITATIVE METHODS IN MARKETING
Undergraduate
This course explores quantitative techniques commonly used in business to aid in marketing decision making. It explores the concepts which underlie techniques and provides skills to understand and manipulate data using spreadsheet software. Statistics that are frequently used in marketing are taught. This course should be taken as soon as you decide to pursue a major or minor in Marketing.
MAT 137 or equivalent is a prerequisite for this class.

MKT 301
PRINCIPLES OF MARKETING
Undergraduate
Marketing 301 introduces basic marketing terminology and the relationships between and among these terms relevant to the creation and implementation of basic marketing strategy. The course content also focuses upon the controllable and uncontrollable variables which have bearing on the success or failure of marketing programs. The course also provides students with opportunities to demonstrate their ability to connect concepts discussed in the text and those same concepts appearing in academic and practitioner publications and popular business periodicals.
MAT 137 or equivalent is a prerequisite for this class.

MKT 305
INTRODUCTION TO MARKETING RESEARCH
Undergraduate
This course focuses on how to match research design (exploration, surveys, observation and experiments) with an organization's marketing problems. You will learn how to: design questionnaires, collect and analyze survey data, prepare and conduct focus groups and design experiments. Some knowledge of statistics required.
(MKT 202 or FIN 202 or MGT 202) and MKT 301 are a prerequisite for this class.

MKT 310
CONSUMER BEHAVIOR
Undergraduate
An analysis of the environmental, social and psychological factors that influence an individual's consumer decisions. Specific areas studies will be consumer motivation, attitudes, learning and decision processes, as well as lifestyles, reference groups, communication and cultural influences.
MKT 301 is a prerequisite for this class.
MKT 315  
STRATEGIC TOOLS FOR MARKETERS  
Undergraduate  
This course provides depth of knowledge to understand and apply important and relevant concepts in marketing such as market demand forecast, product positioning, pricing, marketing performance assessment, and product design. The course covers several hands-on tools that are frequently used by marketers and business-people to generate deep customer insight to aid decision-making in the above-mentioned areas.

MKT 202, MKT 301 and MKT 310 are a prerequisite for this class.

MKT 320  
PRINCIPLES OF ADVERTISING  
Undergraduate  
Development of an understanding of the principles, processes, and methods employed in advertising and sales promotion of products and services directed toward consumers and business. Discussion will involve understanding the behavior of the target audience, developing advertising, budgeting for advertising, creating the message and media strategy, and measuring the effectiveness of the advertising program.

MKT 202 and MKT 310 are a prerequisite for this class.

MKT 340  
MARKETING ACROSS CULTURES: A CULTURAL PERSPECTIVE ON MULTICULTURAL MARKETS  
Undergraduate  
The course is designed to challenge students to think critically about culture and international marketing, with an emphasis and perspective on multicultural markets. The course is structured to examine cross-cultural and intercultural approaches that intertwine with the international business environment and the impact that both have on the marketing of goods and services.

MKT 202, MKT 301 and MKT 310 are a prerequisite for this class.

MKT 352  
NEW PRODUCT DEVELOPMENT  
Undergraduate  
An introduction to the various types of new products and services, and to the new product management process used by many firms to increase the likelihood of success while minimizing financial risk. Students will learn about new product conceptualization, development, and launch stages of the process, and be introduced to some of the tools and techniques employed in each.

(MKT 202 or FIN 202 or MGT 202) and MKT 301 are a prerequisite for this class.

MKT 356  
MARKETING ANALYSIS AND PLANNING  
Undergraduate  
The first course of the IME sequence addresses marketing information gathering, analysis and planning. Students will learn how to conduct secondary research at the company and industry level for analysis of a firm's competitive situation. This analysis will be drawn from real-time cases from sponsoring Chicago-area companies. Emphasis is placed on teamwork and effective communication in oral and written presentation. Students will learn to analyze a firm's industry and competition as well as how to identify a target market and position a product. Milestones will include the preparation and presentation of the situation analysis elements of a marketing plan, as well as a presentation to the client company. 8 quarter hours. Offered every Autumn.

Acceptance into the IME program is a prerequisite for this class.
MKT 357
MANAGEMENT OF MARKETING
Undergraduate
The second course in the IME sequence acquaints the student with the knowledge and skills necessary for the management of marketing activities including marketing plan preparation and tactical decision-making in changing situations. (1) Students will build upon the situation analysis and presentation skills acquired in the IME Level I, by developing skills necessary to prepare and present a marketing plan. (2) Tactical managerial decisions to be addressed include product/service management, competitive pricing decisions, distribution, and promotion decisions as faced by the manager of marketing activities in the day-to-day life of the firm. Students will learn to develop sales forecasts and budgets and apply control and analysis techniques to evaluate marketing operations. Course milestones will include market plan development and presentation to internal as well as external groups, and the presentation of analysis and recommendations to address the day-to-day management of marketing operations. Students will work in teams to address a marketing problem provided by a sponsoring Chicago-based company. This problem will require students to use available secondary data to analyze the current market situation and analyze and interpret primary data necessary to make decisions. 8 quarter hours. Offered every Winter.
Acceptance into the IME program is a prerequisite for this class.

MKT 358
MARKETING IN A GLOBAL ENVIRONMENT
Undergraduate
This final course in the IME sequence provides a strategic perspective for marketing management in a global environment. The course will address company organization, industry structure, firm's competitiveness, marketing activities, and market-entry strategies. Course milestones will address the issues and decisions normally associated with international market expansion. The course is a hands-on learning experience for the student/team through the introduction and interaction with a Chicago-based company currently involved in international business. 4 quarter hours. Offered every Spring.
Acceptance into the IME program is a prerequisite for this class.

MKT 359
ADVANCED MARKETING MANAGEMENT
Undergraduate
This course will familiarize students with the role of the marketing manager in charting the direction of a business, and formulating strategies to create or sustain competitive advantage. It provides knowledge and skills to help students identify, analyze, and address marketing problems and opportunities, and enable them to make effective business decisions. PREREQUISITE(S): MKT 202 & MKT 310
MKT 202 and MKT 310 are a prerequisite for this class.

MKT 360
INTERNATIONAL MARKETING
Undergraduate
The course is designed to provide students with an understanding of international marketing within a global framework. The course focuses on marketing concepts, theories, and principles applicable to international marketing management. The course is structured to examine the environmental factors (political, economic, cultural, and demographics) that drive host-country governments' goals and objectives that affect firms and industries operating in developed and emerging markets of the world. Emphasis is placed on marketing strategies to emerging economies in different regions of the world and to how to start, develop and become a truly global marketing force today.
MKT 202, MKT 301 and MKT 310 are a prerequisite for this class.

MKT 376
EFFECTIVE BUSINESS COMMUNICATION
Undergraduate
This course is designed to expand the participant's communication skills through the application of the principles of communication science and the psychology of persuasion in a contemporary business setting. Students are shown how to develop successful communication and message packaging strategies useful in a variety of communication venues including: memos, meetings, briefings, interviews and individual and team presentations. Oral presentations and written communication techniques are explored including use of visuals, computer graphics, and layout techniques. The mechanisms of Speech Apprehension (stage fright) are presented as well as techniques for management and reduction of this common, debilitating phenomenon. Personal ethics and credibility are explored as important components of effective communication, both individually and as part of a team.
MKT 377
FUNDAMENTALS OF SALES & NETWORKING
Undergraduate
In the current business environment, companies are focusing their efforts on recruiting well-trained and refined sales professionals who generate substantial revenue. This course is designed to expose students to the energy, decorum, techniques and methods of superior selling sought after in today's business environment. Coursework will examine networking techniques and ways in which to identify high-potential opportunities. Application of techniques is crucial to learning this material; therefore students will be given the opportunity to implement learned techniques via real-world selling activity.

MKT 378
SALES STRATEGY & TECHNOLOGY
Undergraduate
Students taking this course will be provided with a comprehensive understanding of sales strategy and sales technology used to optimally organize and deploy sales resources. At the heart of this course is an introduction to the principles of customer relationship marketing and customer acquisition programming. Students will learn via lecture, text, guest lecturers, exposure to the latest technological tools and current case study. This course will benefit participants by providing a true perspective as to what role sales plays today and will play in the future of customer-centric organizations.

MKT 379
LEADERSHIP IN SALES ORGANIZATIONS
Undergraduate
This is a strategic sales course which emphasizes strategic leadership (setting the course), organization leadership (selecting, organizing, motivating, measuring and conflict resolution), and personal leadership (leading people, leading talent and leading yourself) in today's changing sales organization.

MKT 380
SCIENCE OF RETAILING
Undergraduate
Students are introduced to concepts of the retail business model which include: identifying the target consumer and market, development and implementation of merchandising plans, interaction with supply chains, management of human resources and the financial implications of decisions at the corporate and store levels.

MKT 381
BUILDING FINANCIAL RELATIONSHIPS
Undergraduate
Students learn the basic financial products and services that help clients achieve their financial goals and will gain a basic understanding of financial planning. More importantly, students learn how to identify prospects, uncover client financial needs, help clients achieve their financial goals and build the trusted relationships that lead to turning a prospect into a customer and a customer into a lifelong client. The course includes guest speakers, role playing, presentations and the development of a personal financial plan for each student.

MKT 382
PRINCIPLES OF CATEGORY MANAGEMENT
Undergraduate
Successful companies expect their suppliers to act as partners that will help them grow their businesses, not simply to trade share among competitors. Relationships are established between buyer and seller when vendor partners demonstrate and leverage business understanding to build customer volume. In consumer packaged goods, this practice is known as category management. The course is taught through the case method to learn the category management process, use the information systems and data resources available and develop sales presentations that effectively communicate solutions for business problems in three different industries.
MKT 383
ADVANCED VALUATIONS FOR BUSINESS
Undergraduate
This is a strategic sales course which emphasizes the psychology of selling in complex selling situations, identifying the decision maker among multiple contacts, quantifying the value proposition to the customer, and presenting a compelling sales proposal.

MKT 202, MKT 310 and (MKT 376 or MKT 377) are a prerequisite for this class.

MKT 390
SERVICE MARKETING
Undergraduate
This course will explore the identifying characteristics of service marketing as compared and contrasted with product marketing. The conceptual differences in marketing of intangibles vs. tangible offerings to the market will be emphasized. The course will consist of lecture, discussion, readings and cases.

MKT 202, MKT 301 and MKT 310 are a prerequisite for this class.

MKT 393
MARKETING INTERNSHIP
Undergraduate
Internships provide an opportunity to obtain valuable professional experience and contacts in advertising agencies, manufacturing, services, public relations agencies, and communications. IME Marketing majors are required to complete one quarter of intern credit. The department's internship coordinator will work with each student to obtain placement. Students will work for and study the marketing operation of the firm. Marketing internship may be taken, with approval of the coordinator, any quarter. In lieu of internship, IME students may, with approval of the Chair, elect to complete a Marketing elective. MKT 393 qualifies for the Junior Year Experiential Learning requirement.

MKT 395
INTERACTIVE/INTERNET MARKETING
Undergraduate
The course provides an introduction to Interactive/Internet marketing methods and high-level insight into the technology challenges that the respective marketing effort presents. Business to Consumer examples and strategies will be explored in a variety of vertical markets (e.g. financial services, technology, retail, catalog, manufacturing, health care, hospitality and entertainment). Integration with other marketing channels will be discussed. Global, privacy (including legislation challenges) and ethical issues will be introduced. Format will include lecture, guest speakers from the industry, Web browsing, quizzes, analysis and strong emphasis on discussion. A web integrated marketing strategy paper will be developed incorporating all concepts and experiences.

MKT 301, MKT 310, and ([MKT 202 and MKT 305] or an intended/declared HSP Virtual Marketing specialization) is a prerequisite for this class.

MKT 398
SPECIAL TOPICS
Undergraduate
Content and format of these courses are variable. An in-depth study of current issues in marketing. Subject matter will be indicated in class schedule. The Marketing department offers special topics in a variety of areas. Students may take more than one special topics course as an elective.

MKT 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in marketing.

MKT 301, MKT 310 and permission of the instructor is a prerequisite for this class.

MKT 525
MARKETING RESEARCH I
Graduate
Required for Marketing concentration. This course provides an overview of the nature of marketing research and its role in decision-making with the organization. Specifically the students will concentrate their efforts on understanding the process of research design and implementation. Offered every quarter.

GSB 420 and MKT 555 are a prerequisite for this class.
MKT 526  
MARKETING RESEARCH II  
Graduate  
Those students interested in more extensive marketing research experience should enroll in this course. The student will begin with a data set and work closely with the instructor in performing multivariate data analysis and developing a format for presentation of results. MKT 525 is a prerequisite for this class.

MKT 528  
QUALITATIVE RESEARCH METHODS  
Graduate  
Qualitative Research Methods will explore non-survey and non-experimental techniques useful in researching issues with marketing implications. Lectures and reading assignments will be punctuated with experimental exercises, videotapes, and student presentations. Topics will include question design, content analysis, and unstructured or simple observation. Projective techniques and other indirect methods, in-depth/in-person interviews, and focus group sessions. Offered variably.

MKT 525 and MKT 545 are a prerequisite for this class.

MKT 529  
PRECISION MARKETING  
Graduate  
Geodemographic systems such as Claritas and Spectra combine publicly available demographic data with commercial databases and mapping software. These tools, which are used by most Fortune 1000 consumer firms, enable marketers to pinpoint target markets and create effective strategies for a variety of marketing activities. Course topics include the strengths and weaknesses of different approaches, identification of a geodemographic target market, and the use of geodemographic data for advertising and promotion, retail site selection, cross-selling opportunities, and other strategic decisions. Offered winter quarter.

MKT 555 is a prerequisite for this class.

MKT 530  
CUSTOMER RELATIONSHIP MANAGEMENT  
Graduate  
Students are introduced to a new strategy methodology, CRM, which is currently being adopted by many organizations in efforts to enhance their competitive advantage. Focus is placed on understanding how an enhanced customer relationship environment can differentiate an organization in a highly competitive marketplace. Both the business and consumer markets are examined in multiple vertical markets. New technology demonstrations and their impact will be discussed. Guest speakers provide current best-practice methods. Topics included: Case analysis and projects make up the course assignments.

MKT 555 is a prerequisite for this class.

MKT 534  
ANALYTICAL TOOLS FOR MARKETERS  
Graduate  
This course seeks to provide an in-depth understanding of both qualitative and quantitative analytical tools that are of critical importance to marketers. These tools will help marketers avoid head-to-head competition, understand customer perceptions, understand customer preferences, develop accurate sales forecasts, and financially value marketing strategies. The course is designed to be "hands-on" in that students will develop understanding mainly through conducting application projects and presenting results. The course is also designed to be immediately applicable to marketers’ current and future jobs.

MKT 555 is a prerequisite for this class.

MKT 535  
MARKETING STRATEGIES AND PLANNING  
Graduate  
The basic elements of planning including the identification of the company's basic purpose and mission and their translation into specific objectives. Strategies to accomplish objectives are fused from marketing, financial, and manufacturing elements but emphasizing marketing elements. This course focuses on the contribution of marketing to the establishment of company policies, objectives, and marketing planning.

MKT 555 is a prerequisite for this class.
MKT 537
NEW PRODUCT MANAGEMENT
Graduate
The course has four objectives: first, to familiarize participants with how firms manage the conceptualization, development and launch of new products and services; second, to develop a systematic process for new product development that matches the existing business context; third, to give participants knowledge of some useful and immediately applicable tools that will enable them to participate and lead a team that effectively translates a firm's strategy and customer needs into successful products and services; and finally, help participants understand the impact of company dynamics in affecting the new product development process.

MKT 525 is a prerequisite for this class.

MKT 540
STRATEGIC PLANNING: DEVELOPING SUSTAINABLE BUSINESS MODELS
Graduate
In today's hyper-competitive business environment, firms find it increasingly difficult to generate sustainable revenue growth. This course uses an organic-growth, marketing-based, customer-driven approach for developing sustainable year-on-year revenue growth. Linkages are created between existing benefits-based customer segmentation strategies, changing customer needs, the choice of a firm's or a business unit's product/service-line positioning strategy, its chosen business model, and finally its performance. Topics covered include: Outcomes-based segmentation, Price-performance curves, Market-leader positioning approaches, Business model visualization and representation, Dynamic positioning, product-line and business unit adaptation, Value migration and threats to sustainability. By the end of the course, students will know how to detect signals of change in customer needs and adapt their business models resulting in sustainability. This is a case-based course with a project deliverable due at the end of the course.

MKT 555 is a prerequisite for this class.

MKT 541
BRAND MANAGEMENT
Graduate
Brand management is an important component of both consumer and business marketing. The course addresses important branding decisions faced by an organization, particularly the role of brands in strategy. Learning objectives are (1) to increase understanding of the important issues in planning and evaluating brand strategies; (2) to provide the appropriate theories, models, and other tools to make better branding decisions; (3) to understand how marketing mix variables can affect brand equity over time; (4) to understand how to build and maintain brand equity; (5) to understand how to adapt brand strategies and tactics to optimize marketplace success.

MKT 555 is a prerequisite for this class.

MKT 542
BRAND CULTURE
Graduate
Brands are complex socio-cultural entities. They occupy a unique position in modern culture and consumers are increasingly playing a more prominent role in the legacies of brands. Despite these realities, the complex relationship between brands, consumers and culture has typically been ignored. This seminar class will explore the culture of brands, focusing on what consumers do with and to brands instead of what brands do to consumers. Readings will come from a variety of perspectives, including both practitioner and academic sources. Topics covered will include: Sociological aspects of consumers and their brands, brands and status systems, brand and consumption communities, and consumer created marketing content. This class is designed to give you an advantage in being the best brand manager. It will stress critical thinking, creativity, synthesis and application of the newest insights concerning brands. Students will emerge with a better understanding of how to engage in the practice of cultural branding.

MKT 555 is a prerequisite for this class.

MKT 545
CONSUMER BEHAVIOR
Graduate
Required for Marketing concentration. A review of the various theories, models, and techniques that attempt to explain consumer behavior. The course consists of lecture-discussions of behavioral theories, the empirical findings of contemporary research, and case studies designed to illustrate the salient issues involved in developing consumer-oriented marketing strategies.

MKT 555 is a prerequisite for this class.
MKT 550
BUSINESS TO BUSINESS MARKETING
Graduate

The marketing of business goods and services to other businesses (B:B) is more significant in our economy than consumer marketing and is the key to the continued success and productivity of the U.S. economy. In this course, the principles and practices of interindustry marketing will be explored by case analysis. The factors which must be considered before establishing marketing programs manufacturers, service industries and exporters will be examined. Examples will be drawn from varied industries, including equipment, electronics, computer systems, health care and others. New product introduction, distribution, and other marketing strategies will be emphasized.

MKT 555 is a prerequisite for this class.

MKT 555
DECISIONS IN MARKETING MANAGEMENT
Graduate

Students are provided with an overview of the marketing process for consumer-oriented firms. Focus is placed on decision-making that aligns a firm's market offerings with the wants and needs of targeted segments of customers within a continuously changing environment. Written cases/projects are part of the course assignment.

MKT 557
INTERNATIONAL MARKETING
Graduate

The differences between markets and distribution systems in various countries are explored. By emphasizing the social and economic factors causing these differences a sound understanding of and empathy with different international marketing problems are developed. Analyses are made of the organization of trade channels in various cultures, of typical government policies towards international trade in countries at different stages of development, and of international marketing research, advertising, and exporting. Offered Variably.

MKT 555 is a prerequisite for this class.

MKT 558
MARKETING ACROSS CULTURES: A GLOBAL PERSPECTIVE
Graduate

The course is structured to examine culture from two dimensions: a cross-cultural view, which compares local culture customs across various national marketing environments; and an intercultural approach where the focus is to exam the interaction between foreign firms and a host-country culture. Learning objectives: Students will gain an understanding of cultural variables from a global perspective. Students will gain the ability to compare and analyze national cultural similarities and differences across national, regional and global environments. Students will gain the ability to recognize and analyze the interaction in marketing approaches between people and business groups who have different national/cultural backgrounds.

MKT 555 is a prerequisite for this class.

MKT 575
ADVERTISING AND SALES PROMOTION MANAGEMENT
Graduate

A study of the theories and techniques applicable to the development of the promotional mix. Class consists of analysis and development of objectives, budgets, message design and media selection, and measuring the effectiveness of these for mass design and direct promotional vehicles.

MKT 545 and MKT 555 are a prerequisite for this class.

MKT 576
EFFECTIVE BUSINESS COMMUNICATION
Graduate

This course is designed to expand the participant's communication skills through application of the principles of communication science and the psychology of persuasion in a contemporary business setting. Personal ethics and credibility are explored as important components of effective communication, both as individual's and as team members. Students are shown how to develop successful communication and message packaging strategies useful in a variety of communication venues including memos, meetings, briefings, interviews and individual and team presentations. Oral presentations and written communication techniques are explored including use of visuals, computer graphics, and layout techniques. The mechanisms of Speech Apprehension (stage fright) are presented as well as techniques for management and reduction of this common, debilitating phenomenon. Personal ethics and credibility are explored as important components of effective communication.
MKT 577
LEADING BUSINESS DEVELOPMENT
Graduate
This is a course designed for managers or future team leaders seeking to maximize their resources to achieve sound business results for their organizations and customers. Utilizing current practices, processes, and proven in-market techniques, students will learn to create and maintain a customer team that achieves results with the internal as well as external customer. Emphasis will be placed on: Team Leadership Skills, Profiling and Segmenting Customers, Managing Team Performance, Developing Business Plans and Relationships, internally and externally.

MKT 578
SALES STRATEGY & TECHNOLOGY
Graduate
Students taking this course will be provided with a comprehensive understanding of sales strategy and an appreciation of sales technology used today to optimally organize and deploy sales resources. At the heart of this course is an introduction to the principles of customer relationship marketing and customer acquisition programming. Students will learn via lecture, text, guest lectures, exposure to the latest technological tools and current case study. This course will benefit participants by providing a true perspective as to what role sales plays today and will play in the future of customer-centric organizations.

MKT 583
MONETIZING MARKETING STRATEGY
Graduate
The goal of every business strategy is to create profitable customers by delivering superior value. The way in which that strategy is monetized in the implementation process is critical to the success of the venture. The key focus of the course will be the development of useful processes and metrics through the marketing and selling activities to deliver customer and corporate value which will allow managers to monitor and measure individual corporate performance. Student learning will be assessed by a combination of class participation, weekly assignments, examinations, and team performance on final written proposals and presentations.

MKT 590
MARKETING OF SERVICES
Graduate
This course examines service organizations’ distinctive approach to marketing strategy development and execution. Differences and similarities between the marketing of services and that of manufactured goods will be discussed. Other topics include measurement of quality and customer satisfaction, customer behavior and expectations, roles of service providers and customers, service competitive advantages, relationship management, overlap of service marketing with other organizational disciplines (e.g. H.R., operations, finance), organization design and value-chain impacts, outsourcing challenges and opportunities, global issues, macro environmental impacts, Business to Business and Business to Consumer examples and strategies in multiple vertical markets (e.g. financial services, technology, retail catalog, manufacturing, health care, hospitality and entertainment, automotive, government). Student groups will maintain service encounter journals which will be used as input to the group’s analysis paper assignment. Two abbreviated exams will measure the student’s grasp of service marketing concepts. Group case analysis work will reinforce the course concepts.

MKT 595
INTERNET AND INTERACTIVE MARKETING
Graduate
Explores the emerging business models, rules, tactics, and strategies associated with this medium. Integration with other channels and marketing operations is stressed. Classes are discussion-based, drawing on current applied readings and cases from a variety of industries in both the business-to-business and business-consumer markets.

MKT 555 is a prerequisite for this class.
MKT 793
MARKETING INTERNSHIP
Graduate
Internships provide an opportunity to obtain valuable professional experience and contacts in many areas of marketing e.g. advertising agencies, manufacturing, services, public relations agencies, and communications. The Department's internship coordinator will work with each student to obtain placement, if needed. Student will work for and study the marketing operations of the organization. Marketing internship may be taken, with approval of the coordinator, any quarter.

MKT 798
SPECIAL TOPICS
Graduate
Content and format of this course is variable. An in-depth study of current issues in marketing.

MKT 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in marketing.

MLS 401
VISIONS OF THE SELF
Graduate
A study of the differing visions of the self as presented in significant documents from the history of ideas. Materials selected from classic texts of literature, philosophy, theology, psychology and social science.

MLS 402
PERCEPTIONS OF REALITY
Graduate
A survey, beginning with ancient Greece and ending with the modern world, of models of universal order as developed by natural scientists and literary and visual artists.

MLS 403
THE AMERICAN EXPERIENCE
Graduate
A chronological and thematic study of the location of self within American culture. Readings chosen to reflect both dominant and dissenting ideas at specific points of American history.

MLS 404
THE CITY
Graduate
A topical examination of the urban experience using the methods and sources of both historians and social scientists. Topics include survey of various images of the city, utopian and dystopian visions, and the uniqueness of the modern city.

MLS 405
REPRESENTATIONS OF THE BODY
Graduate
This course will examine how the human body, which seems to be a natural, universal fact, is also a deeply cultural symbolic construction whose analysis yields insights into structures of power and consciousness.

MLS 406
EXPLORING OTHER CULTURES
Graduate
Examination of the history, traditions, values and institutions that have shaped the lives of people in another culture. Analysis of the "terms of encounter," that is, the perspectives that students assume as they seek to encounter the "other" Variable to
MLS 407
SELF,CULTURE AND SOCIETY IN CONTEMPORARY JAPAN
Graduate
Interdisciplinary examination of the political, economic and social order of contemporary Japan. Relationship of individuals and groups to the social order, as they create the reality of diversity and possibilities for change.

MLS 409
ENVIRONMENT AND SOCIETY
Graduate
"Environment and Society" is a 400-level interdisciplinary core course on the environment. The course might include such topics as cultural diversity in time and place with regard to the human view of the natural world, various approaches to environmental ethics, philosophical and religious influence in conceptions of the earth as environment, the relationship between scientific measurement and the social constructions of the natural world, the science and politics of climate change, race and gender considerations in environmental politics, and environmental consciousness in literature and the arts. The instructor's own disciplinary interests will play a prominent role in the course construction, but the course will draw from the sciences, the social sciences and the humanities. As in all MLS courses, the instructor will use the course assignments to work with students on enhancing graduate-level intellectual skills through reflexive pedagogy.

MLS 419
CHICAGO: THE 21ST CENTURY
Graduate
Chicago: Towards The 21st Century.

MLS 427
TOPICS IN COMMUNICATION AND CULTURE
Graduate
Variable topics relating to cross-cultural communication, culture and media, cultural difference in communication, and communication issues in multiculturalism. Consult current course schedule for topic.

MLS 428
TOPICS IN ORGANIZATIONAL COMMUNICATION
Graduate
Variable topics relating to communication issues in organizational settings, including power, institutional culture and change, training, and multicultural factors. Consult current course schedule for topic.

MLS 440
FEMINIST THEORIES
Graduate
A discussion and assessment of the various theories concerning the place of women in society, including theories that have advocated a more positive role for and valuation of women than those of the dominant society. The course will take both an historical and a topical approach. Cross-listed as WGS 300 and WGS 400.

MLS 441
WOMEN ACROSS CULTURES
Graduate
A critical analysis of the roles of women in societies around the world, with special emphasis on economics, politics, and culture. Focus is on African, Asian and Latin American cultures and non-dominant groups within Western Societies. Topics vary each quarter. Cross-listed as WGS 390 and WGS 490.

MLS 442
ETHICS AND THE ECONOMY
Graduate
This course will present the thinking of social scientists, philosophers and theologians on the impact of religious values on the origin and development of American capitalism, and their possible relevance to contemporary discussions of business ethics. Cross-listed as GSB 650 and PHL 650.
**MLS 443**
**WORK, LEISURE AND THE QUALITY OF LIFE**
Graduate
The course examines the nature and meaning of work and leisure in Western culture, and the relationship of work and leisure to contemporary issues associated with the concept “Quality of Life”. Cross-listed as SOC 475.

**MLS 445**
**GENDER AND COMMUNICATION**
Graduate
A review of the differences in communication patterns between women and men. Topics covered include language and language usage differences, interaction patterns, and perceptions of the sexes generated through language and communication. Cross-listed as CMN 523 and WGS 440.

**MLS 447**
**GENDER AND SOCIETY**
Graduate
Attention to the growing literature and empirical research on changing patterns in economic, psychological and social outcomes for women and men. Consideration of various theories of gender differentiation and inequality.

**MLS 448**
**WORK AND LEISURE IN THE FUTURE**
Graduate
The latter half of the 20th century has seen great change in the meaning, form and value assigned to work and leisure in society. Many of these changes have come to be characterized as inevitable consequences of life in post-industrial society. This course: 1) speaks to identify the factors that are shaping the future of work and leisure and 2) will explore futuristic scenarios that challenge the position of “work as a central-life meaning.” Cross-listed as SOC 476.

**MLS 449**
**TOPICS IN NON-FICTION WRITING**
Graduate
Topics addressed in different versions of the course may include writing for magazines, science writing, travel writing, writing in humanities and social science research, etc. Consult current course schedule for topics.

**MLS 450**
**CHICAGO: ARCHITECTURE & URBAN DEVELOPMENT**
Graduate
A study of urban architecture in Chicago from 1833 to 1984, including the role of planning, the purpose of open space, the place of tradition, the impact of modern design theories and evaluation of contemporary developments.

**MLS 451**
**TOPICS IN AMERICAN POLITICS**
Graduate
Topics in American Politics

**MLS 452**
**GREAT IDEAS, BUSINESS AND SOCIETY**
Graduate
A study using primary sources of the basic ideas, aspirations and values which humanity strives to attain and which constitute the basis of fundamental demands on the world of business and its managers, their policies and decisions.

**MLS 453**
**POLITICS, MEDIA AND EVERYDAY LIFE**
Graduate
An examination of various ways in which the mass media influence our perceptions of reality. Political, social and cultural implications of media processes are assessed. Cross-listed as PSC 321.
MLS 455  
COMMUNITY AND THE CITY  
Graduate  
The course explores the possibilities for community life within urban settings. It emphasizes the development of network relations and cross-cutting ties.

MLS 456  
THE USES OF AUTOBIOGRAPHY  
Graduate  
Study of selected autobiographical writings to serve as models for self-expression.

MLS 458  
ISLAM AND THE WEST IN THE MODERN WORLD  
Graduate  
An examination of the economic, cultural and political interactions of Europe and the Islamic World.

MLS 459  
WRITING IN THE PROFESSIONS  
Graduate  
Improves writing skills useful in semi- and non-technical professions; emphasis on style, tone, awareness of purpose and audience; effective memo, proposal and report design. Cross-listed with WRD 522.

MLS 460  
THE DILEMMA OF THE MODERN AGE  
Graduate  
The crisis of the individual's place in society is exposed through social sciences, philosophy, literature, art and music. The distinctive features and responses to modern culture-individualism, alienation and depersonalization are illuminated through multiple perspectives. Cross-listed as SOC 473.

MLS 461  
MODERN POETRY  
Graduate  

MLS 462  
TOPICS IN BUSINESS ETHICS  
Graduate  
Seminar in Business Ethics. Cross-listed as PHL 640 and GSB 640.

MLS 463  
NATIONALISM AND INTERNATIONAL CONFLICT  
Graduate  
This course will explore the social origins and development of national identities. How these identities have been manipulated to serve specific competitive interests in the past two hundred years will also be discussed. Cross-listed as PSC 342 & INT 365.

MLS 464  
THE CULTURE OF AMERICAN CATHOLICS  
Graduate  
How has the unique experience of immigration shaped the American Catholic Church from the colonial period to the 21st century? How did the idea of "the Church" as an authoritative hierarchy come about in the mid-20th century, and how has that notion been challenged by immigrant communities, as well as artists and intellectuals? Drawing on the disciplines of history, sociology, anthropology, cultural theory, literature and the arts, this course looks at those who built the church and those who challenged and changed it. (Course is cross-listed as REL 384, CTH 384 and MLS 464.)
MLS 467  
SELECTED TOPICS ON WOMEN IN LITERATURE  
Graduate  
Topics vary; see schedule for current offering.

MLS 468  
SELECTED TOPICS: WOMEN, SELF AND SOCIETY  
Graduate  
Topics vary; see schedule for current offerings.

MLS 473  
TOPICS IN LITERATURE  
Graduate  
Topics addressed in different versions of the course may include various themes, movements and genres in British, American and World Literature. Consult current course schedule for topic.

MLS 474  
WOMEN AND ART  
Graduate  
Examines the work of the most significant women artists from the Renaissance to the present. It will also investigate how women have been represented in Western art by both male and female artists. Cross-listed as HAA 366.

MLS 475  
TOPICS IN CONTEMPORARY FILM  
Graduate  
An examination of recent films and their relation to broader tendencies in contemporary culture. Topics vary, see schedule for current offerings.

MLS 476  
CHICAGO IN FICTION AND FILM  
Graduate  
This course examines novels and short stories written by Chicagoans during the 20th century. It also includes a few film adaptations of these works.

MLS 477  
FEMINIST ETHICS  
Graduate  
Critiques of mainstream empirical and philosophical works and of Carol Gilligan's work on ethics will include discussions on the women's voice in morality, the nature of theories by women vs. men, the formation of plural positions concerning care versus justice, and alternative ethical stances. Cross-listed as WGS 310/410 and REL 322.

MLS 478  
THE PSYCHOLOGY OF WOMEN  
Graduate  
A review of research and theory on women including sexist biases and methodology, feminist therapy, violence against women, and gender differences in the development of power and sexuality. Cross-listed as PSY 561 and WGS 470.

MLS 479  
WRITING POETRY  
Graduate  
Writing Poetry. Cross-listed as ENG 493.
MLS 480
MAJOR AUTHORS
Graduate
An examination of major writers in the English and American literary traditions. Topics vary; see schedule for current offerings.

MLS 481
SPECIAL TOPICS IN ART HISTORY
Graduate
Explorations in the history of art from ancient Egyptians to contemporary art. Topics vary.

MLS 482
ECOLOGY, SPIRITUALITY AND ETHICS
Graduate
This course explores the ecological crisis from a religious/ethical perspective, examining the dangers posed for humanity and the planet. It considers the new cosmology developing from science, especially physics, and its dialogue with philosophy, myth and religion. Cross-listed as REL 320.

MLS 483
CULTURAL PERSPECTIVES ON HEALTH AND DISEASE
Graduate
A multidisciplinary examination of the cultural factor that help form notions of the well and sick states of the human body. Included will be such topics as the social/religious history of epidemics, healing in Western and non-Western medicine, etc. Sources will be drawn from the history of medicine, anthropological and sociological works, philosophy and literature. Cross-listed as REL 320.

MLS 484
ZEN MIND
Graduate
This course examines the philosophy, art, literature and religious practice of Zen Buddhism. It explores Zen's influence in both Japan and America. Cross-listed as REL 342.

MLS 485
INEQUALITY IN AMERICA
Graduate
This course examines the nature and extent of inequality in American society and explores various psychological, political, social and economic theories which attempt to explain the existence of this phenomenon. Cross-listed as PSC 324.

MLS 486
TOPICS IN POPULAR CULTURE
Graduate
Examines a specific dimension of popular culture using interdisciplinary theories and methods. Possible topics include Food in Film, The Ideology of Romance, or perhaps the popular culture of a decade like the 1950s or 1960s. Topics vary.

MLS 487
SPECIAL TOPICS IN HISTORY
Graduate
Topics vary.

MLS 488
TOPICS IN WORLD RELIGIONS
Graduate
Topics in World Religions
MLS 489  
**TOPICS IN SOCIOLOGY**  
Graduate  
Various topics in the field of sociology.

MLS 490  
**SPECIAL TOPICS AND CONTROVERSIES**  
Graduate  
Occasional offerings of particular contemporary relevance by visiting professors. Topics vary.

MLS 497  
**INDEPENDENT STUDY [NON-CAPSTONE]**  
Graduate  
Independent study in an area that does not lead directly into the thesis or capstone. Students may also register for this course on a topic indirectly related to their thesis or capstone if they will subsequently take MLS 498, in which the student directly prepares to write the Integrating Project/Thesis. The MALS and IDS Program requires that students taking independent studies follow a specified format of meeting frequency, activities, and scholarly production. This format is available on the program website or from the MALS and IDS office. Registration is by permission of the Director of the MALS and IDS Program and the instructor of the independent study.

MLS 498  
**INDEPENDENT STUDY**  
Graduate  
Independent study undertaken as preparation for thesis or practicum capstone options. This course is optional preparation for MLS 499, Capstone. The MALS and IDS Program requires that students taking this course follow a specified format of meeting frequency, that they produce a review of literature related to their thesis or practicum, an annotated bibliography, and the required Formal Proposal for the thesis or practicum. Registration is by permission of the Director of the MALS and IDS Program and the permission of the instructor who serves as the thesis or practicum director.

MLS 499  
**CAPSTONE**  
Graduate  
Capstone for students doing a thesis, practicum or enhanced portfolio essay. Students may register for this course after the Formal Proposal for the thesis or practicum, or the Enhanced Portfolio Essay Proposal, has been approved. Students are normally expected to complete their capstone projects within the quarter in which they take this course. This course carries four hours of credit. Registration is by permission of the Director of the MALS and IDS Program and the permission of the instructor who serves as the student's capstone director.

MLS 500  
**CAPSTONE**  
Graduate  
A seminar offered occasionally to guide groups of students working on their capstone projects.

MLS 501  
**ACTIVE STATUS**  
Graduate  
Students register for this course during periods when they are not registered for courses but wish to have access to university facilities. Ordinarily students will not use this course once they have been admitted to candidacy during the thesis or capstone.

MLS 502  
**CANDIDACY CONTINUATION**  
Graduate  
Students who have completed MLS 499 Thesis/Capstone may register for this course in order to have continued access to university facilities. Students may register for this course no more than three times. Non-credit. $40.00 per quarter.
MM 200
DIGITAL PHOTOGRAPHY
Undergraduate
A course using digital cameras and software to create/modify and distribute digital photographs.

MMT 401
FOUNDATIONS OF MATHEMATICAL THINKING AND LEARNING IN THE MIDDLE SCHOOL
Graduate
This course is designed to help participants construct meaningful connections between being a learner of mathematics (i.e., a person who can solve problems, reason mathematically, communicate findings and thinking, and make connections) and being a teacher of mathematics (i.e., a person who can help others understand, use, and apply mathematical ideas). The course will begin the process (which will be continued throughout the remainder of the Master of Arts in Middle School mathematics Education program) of having students explore the interplay between narratives describing their own classroom experiences as well as literature and research about others' experiences in order to analyze the impact of developmental and interpersonal experiences on the learning and teaching of mathematics.

MMT 410
THE DEVELOPMENT OF MIDDLE SCHOOL MATHEMATICS LEARNERS
Graduate
Critical to the success of middle school mathematics learners, is their teachers' understanding of the multiple perspectives that research has taught us, as educators, about how people learn. In this course, participants will engage with the history and evolution of how the fields of educational psychology, cognitive science, applied developmental psychology, and mathematics education have contributed to a modern understanding of what constitutes effective practice for middle school mathematics teaching. Major theoretical positions and their seminal architects will be highlighted, examined and discussed. A particular emphasis will be put on each position's impact on curriculum development and classroom pedagogy for middle school mathematics.

MMT 420
TEACHING, LEARNING, AND ASSESSMENT OF MIDDLE SCHOOL MATHEMATICS
Graduate
This course will examine, in the context of classroom practice, the following themes: 1) How students can learn mathematics with conceptual understanding; 2) How to teach mathematics so that students learn with understanding; 3) How to assess students' mathematical knowledge to inform instruction and determine their growth; 4) The nature and content of innovative curriculum projects designed to teach mathematics for conceptual understanding.

MMT 430
APPLIED PROJECT IN MATHEMATICS EDUCATION
Graduate
This course will span the three quarters of the second academic year of the program and will be partnered with the three content-focused courses offered during the second year. Participants will be introduced to the field of educational inquiry through a study of various designs and methods of doing educational research. In addition, this course will help participants consider current issues in mathematics education in relationship to their own teaching and learning of mathematics and what it means to transfer the mathematics learned in other courses into one's practice as a math teacher. They will identify concrete changes they want to implement in their teaching during the years following their completion of the program based on the new content and ideas to which they have been exposed. As part of the course, the teachers will design an action research project during the first quarter, implement the project during the second quarter, and analyze the data during the third quarter.

MOL 197
SPECIAL TOPICS IN MODERN LANGUAGES
Undergraduate
See schedule for current offerings.

MOL 198
STUDY ABROAD
Undergraduate
Variable credit.
MOL 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

MOL 210
CLASSICAL MYTHOLOGY
Undergraduate
Classical Mythology is an interdisciplinary blend of the classical traditions of myth and literature, concentrating on myth. It endeavors to place Classical myths into their historical, social and cultural contexts. Students will learn significant myths and the names and functions of the most important characters in them along with primary myth theories.

MOL 211
HEROES AND EPICS
Undergraduate
Heroes and Epics is a literature course centered around Homer's Iliad and Odyssey and Vergil's Aeneid; it endeavors to place these epic poems into their geographical, historical, social, and cultural contexts. Students will learn the definition of Epic as a literary genre and discover how this genre evolved, through ancient Greek oral tradition, to reflect audiences and times.

MOL 212
CLASSICAL TRAGEDY
Undergraduate
Classical Tragedy is a literature course that introduces students to the authors, social contexts and performances of ancient Greek drama. Students will learn how to interpret the ?myth? presented on the ancient Greek stage, and how to apply what they have learned to detect and interpret the moral, social and political issues raised in this timeless, yet keenly particular, literature.

MOL 213
ANCIENT GREEK AND ROMAN COMEDY
Undergraduate
Ancient Greek and Roman Comedy. Selected landmarks of Greek and Roman satirical literature. Students learn important theories of interpretation, theories of humor as well as secondary interpretive opinions about ancient Comedy. This course endeavors to train intelligent critics of modern satire.

MOL 214
THE CLASSICAL FEMININE
Undergraduate
Close reading of translations of ancient Greek, Latin, and Semitic texts that pertain to or are written by women. We will investigate the nature and the roles of the "feminine" in Antiquity, studying the day-to-day lives of women, with emphasis on the textile arts that comprised their primary daily activity. Although students will visit these texts through English renderings, the course will yield a lively sense of the ancient languages in which they were written -- and, thereby, the living conversations with which women of these time-honored cultures expressed, and wove, themselves.

MOL 243
JAPANESE POETRY IN TRANSLATION
Undergraduate
Survey of Japanese poetry in English translation, with selections of representative authors from the Classical and Modern periods.

MOL 244
CLASSICAL CHINESE I
Undergraduate
Classical Chinese is predominantly a literary language, which has played a linguistically and culturally unifying role among the many vernacular languages of China. Permission of instructor, some Mandarin Chinese preferred.
MOL 245
CLASSICAL CHINESE II
Undergraduate
Classical Chinese is predominantly a literary language, which has played a linguistically and culturally unifying role among the many vernacular languages of China. MOL 244 or equivalent recommended.

MOL 246
CLASSICAL CHINESE III
Undergraduate
Classical Chinese is predominantly a literary language, which has played a linguistically and culturally unifying role among the many vernacular languages of China. MOL 245 or equivalent recommended.

MOL 248
CHINESE CALLIGRAPHY
Undergraduate
An introduction to the art of Chinese calligraphy. Hands-on practice as well as history and theory of the art. This course is open to students with no background in Chinese calligraphy, language, literature, or culture.

MOL 249
MODERN CHINESE LANGUAGE AND SOCIETY
Undergraduate
This course will explore facets of Modern China, with special attention to how language and culture intertwine.

MOL 277
TURN OF THE CENTURY VIENNA
Undergraduate
This course will explore a number of the prominent players who were active in Vienna during the turn of the century, such as Sigmund Freud, Gustav Klimt, Arthur Schnitzler, Ludwig Wittgenstein, and Gustav Mahler. We will examine, through primary and secondary texts, and works of art, music and film, the lasting impact of their contributions on the development of thinking and innovation in the twentieth, and indeed even twenty-first, centuries.

MOL 282
MODERN AFRICAN LITERATURE
Undergraduate
Themes and theories of postcolonial studies in relation to African culture, politics and literature. Evaluation of novels, criticism, and movies to provide an introduction to the complex, highly heterogeneous experience of modern African literature.

MOL 297
SPECIAL TOPICS IN MODERN LANGUAGES
Undergraduate
See schedule for current offerings.

MOL 298
STUDY ABROAD
Undergraduate
Variable credit.

MOL 299
INDEPENDENT STUDY
Undergraduate
Variable credit.
MOL 300
PROFESSIONAL PRACTICUM
Undergraduate
Supervised experience in teaching, tutoring, interpreting, editing, writing or other professional exercises of language skills.

MOL 308
TOPICS IN JAPANESE LITERATURE
Undergraduate
Variable topics. Taught in English. Consult schedule for current offering.

MOL 309
THE NOVELIST'S WORLD
Undergraduate
The Novelist's World.

MOL 310
JAPANESE CULTURE
Undergraduate
Japanese Culture--Geisha: Our Fantasy, Their Reality is a cross-cultural and interdisciplinary exploration of a symbol of authentic Japanese feminine beauty and a cultural icon of the American kitsch, the geisha.

MOL 311
TOPICS IN FRENCH LITERATURE
Undergraduate
Masterpieces, themes and genres of French literature from its origins to the present day.

MOL 312
TOPICS IN GERMAN LITERATURE
Undergraduate
Masterpieces, themes and genres of German literature from its origins to the present day.

MOL 313
TOPICS IN ITALIAN LITERATURE
Undergraduate
Masterpieces, themes and genres of Italian literature from its origins to the present day.

MOL 314
TOPICS IN RUSSIAN LITERATURE
Undergraduate
Masterpieces, themes and genres of Russian literature from its origins to the present day.

MOL 315
TOPICS IN HISPANIC LITERATURE
Undergraduate
Masterpieces, themes and genres of Hispanic literature from its origins to the present day.

MOL 317
RUSSIAN SHORT STORY
Undergraduate
The study of a representative selection of Russian short fiction concentrating on the great 19th-century masters such as Pushkin, Gogol, Turgenev, Tolstoy, Chekhov, Gorky, and Korolenko.
MOL 318
MASTERPIECES OF RUSSIAN LITERATURE
Undergraduate
This course will present some of the greatest Russian Short Stories (1880 - 1930). In the course, students will read short stories in English translation, by six major Russian writers: Anton Chekhov, Alexander Kuprin, Ivan Bunin, Maxim Gorky, Mikhail Bulgakov, and Mikhail Zoshchenko. Students will analyze and interpret the short stories of the 1880 - 1930 period, both with respect to form and meaning. In the process they will develop greater insight into, and enjoyment of literature. The course will relate the original works to the social and cultural issues of their own time, as well as to current problems.

MOL 319
WORLD OF THE CINEMA
Undergraduate
Critical analysis of cinematic development.

MOL 320
MODERN JAPANESE LITERATURE IN TRANSLATION
Undergraduate
Covers modern Japanese literature in English translation from the Meiji era to the present. Themes for study include tradition and modernization, the individual and society, gender, and nostalgia. In addition, beginning with excerpts from Tsubouchi Shoyo's 1886 essay “The Essence of the Novel,” students will trace the development of the novel in modern Japan.

MOL 321
CLASSICAL JAPANESE LITERATURE IN TRANSLATION
Undergraduate
Classical Japanese literature, in English translation, from the earliest periods up to the Meiji era.

MOL 322
CULTURAL HISTORY OF PARIS
Undergraduate
A study of Paris from its origins in Roman times to the present day, this study abroad course is composed of readings (primary and secondary), lectures, and on-site visits that reveal the unfolding history of Paris.

MOL 325
QUEER JAPAN
Undergraduate
This course surveys representations of same-sex sexuality in Japan from the 14th century to the present day. We will explore the intersection of history, politics, art, and culture through historiography, literature, film, photography, music, cartoons, and animation, examining “traditional” male-male sexuality, the emergence in the modern era of texts reflecting female-female sexuality, as well as the formation of new consciousness and subjectivities throughout the 20th century and into the 21st. We will look at critical issues for sexual minorities in Japan, including coming out and AIDS activism, paying particular attention to their potential relevance to sexual minorities and politics in the US. Texts will include material translated to English for the first time.

MOL 333
HISPANIC WOMEN WRITERS
Undergraduate
Same topics as Spanish 322, but taught in English; not counted as part of a Spanish major or minor.

MOL 334
EXPLORING MULTICULTURALISM THROUGH LITERATURE
Undergraduate
Exploring Multiculturalism Through Literature.

MOL 335
EXPLORING SOCIAL DIVERSITY IN LATIN AMERICA
Undergraduate
Readings and instruction in English; not counted as part of a Spanish major or minor. Cross-listed as LST 201.
MOL 337
CONTEMPORARY LATIN AMERICA THROUGH ITS LITERATURE
Undergraduate
The study of English translations of a variety of Latin American literary works that highlight key historical, political, social, and artistic trends in the region.

MOL 340
ARAB CULTURE
Undergraduate
A careful examination of Arab culture within its historical, social, and political context with in-depth analysis of the products and practices of Arab culture. Includes authentic material (video, images, and online resources) and engagement in online and in-class discussions about Arab perspectives that can be derived from these products and practices. This is a hybrid course (meets once per week onsite with students completing the rest of the required hours through online instruction, discussion, and projects). Students will receive instruction and assistance to develop the skills to work with the online portion, which includes using a social network for sharing material and discussion.

MOL 341
MEDIA IN THE ARAB WORLD
Undergraduate
The course provides in depth examination of Media in the Arab World as a product of Arab culture. Authentic media items such as television, print, and electronic media will be analyzed within their historical, social, and political context. Major themes in Arab media such as religion, gender roles, social customs, political issues, and historical perspectives will be carefully examined to better understand Arabs, their culture, and the way they think. This is a hybrid course (meets one day onsite with students completing the rest of the required hours through online instruction, discussion, and projects). Students will receive full instruction and assistance to develop the needed skills to work with the online portion, which includes using a social network for sharing material and discussion.

MOL 342
MODERN ARABIC LITERATURE IN TRANSLATION
Undergraduate
Students will learn about the history of Arab literature and selected works of modern writers from different regions in the Arab world. Literature will be examined as a product of Arab culture. In addition to the literary analysis of the works, students will analyze and discuss the cultural practice and perspectives presented in these works taking in consideration the authors? affiliation and background, as well as the historical, social, and political context of the works. This is a hybrid course (meets one day onsite with students completing the rest of the required hours through online instruction, discussion, and projects). Students will receive full instruction and assistance to develop the needed skills to work with the online portion, which includes using a social network for sharing material and discussion.

MOL 349
TEACHING MODERN LANGUAGES
Undergraduate
[Cross-listed as SE 349]

MOL 350
METHODS OF TEACHING MODERN LANGUAGES IN THE ELEMENTARY SCHOOL
Undergraduate
Provides training in the theory and methods of teaching foreign languages in the elementary school (FLES). Designed for both pre-service and in-service teachers. Pre-service teachers include foreign language majors interested in elementary school teaching and elementary majors who are proficient in a foreign language and interested in teaching FLES. In-service teachers include elementary teachers proficient in a foreign language who are teaching or who are interested in teaching FLES and secondary trained teachers who are teaching or who are interested in teaching FLES. In order to meet the objectives of this course and subsequent methods courses, it is expected that all participants be able to demonstrate proficiency in English and a second language before enrolling.

MOL 354
THEORETICAL FOUNDATIONS/ CURRENT RESEARCH SECOND/ FOREIGN LANGUAGE ACQUISITION
Undergraduate
An overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings.
MOL 355  
**CONTEMPORARY CRITICISM**  
Undergraduate  
An overview of contemporary criticism from Russian formalism to post-modernism. Cross-listed as CPL 355.

MOL 356  
**PSYCHOLINGUISTICS**  
Undergraduate  
An overview of basic issues in experimental psycholinguistics by introducing various topics, such as speech perception/production, word recognition/memory, sentence processing, first- and second-language acquisition and the brain and languages. Cross-listed as PSY 393.

MOL 357  
**TEACHING CULTURE IN THE FOREIGN LANGUAGE CLASSROOM**  
Undergraduate  
Pedagogical theory and practice in the integration of culture into the language classroom.

MOL 360  
**RUSSIAN DRAMA IN ENGLISH TRANSLATION I: 18-19TH**  
Undergraduate  
The course presents some of the greatest Russian plays of the 18th and 19th century. In the course, students will read original works in English translation by Von Vizin, Griboedov, Pushkin, Gogal, Lermontov, and Ostrovsky. Some critical works will be included. Students will read, analyze, and interpret the plays, comedies and dramas, both with respect to form and meaning.

MOL 361  
**RUSSIAN DRAMA IN TRANSLATION II: SOVIET ERA**  
Undergraduate  
Russian theater of the 20th century appeared in parallel to realistic novels and contributed to the movement of realism in Russian literature. Realism dominated in Russian literature from approximately 1845 to 1905, followed by Russian theater of the 20th century. To most foreign readers it is the most interesting part in Russian culture. Russian theater of the 20th century, presented by such authors as Chekhov, Gorky, Bulgakov and Tefi, demonstrates tendencies from realism to a vanguard. Some critical works will be included. The student will read, analyze and interpret the plays, comedies and dramas, both with respect to form and meaning. In the process they will develop greater insight into the social and multicultural issues of the time.

MOL 363  
**RUSSIAN SHORT STORY IN ENGLISH TRANSLATION I: 18 - 19TH CENTURY**  
Undergraduate  
Interpretation and analysis of major Russian short prose of the 18th and 19th century: Karamzin, Pushkin, Dostoevsky, Gogol, Turgenev, and Leskov.

MOL 364  
**RUSSIAN SHORT STORY IN ENGLISH TRANSLATION II: SOVIET ERA**  
Undergraduate  
This course presents some of the greatest Russian short stories (1880 - 1930) in English translation. Students will read short stories in English translation by four major Russian writers: Chekhov, Kuprin, Bunin and Bulgakov. Students will analyze and interpret short stories of the 1880-1930 period, both with respect to form and meaning, and discuss some critical works.

MOL 366  
**RUSSIAN NOVEL IN ENGLISH TRANSLATION I: 19TH CENTURY**  
Undergraduate  
Major Russian novels of the nineteenth century--Turgenev, Dostoyevsky, Tolstoy--in their cultural and social context.

MOL 368  
**RUSSIAN NOVEL IN ENGLISH TRANSLATION III: CONTEMPORARY**  
Undergraduate  
Major Russian prose works of the late 20th century, read in English translation. Authors include Bulgakov, Platonov, Pristavkin, and Bitov.
MOL 369
RUSSIAN LITERATURE IN FILM
Undergraduate
Greatest Russian short stories, plays, and novels of the 19-20th century, as presented in film. Readings in English translation of works by Tolstoy, Dostoevsky, Ostrovsky, Chekhov, and Pasternak.

MOL 380
COMMUNITY BASED SERVICE LEARNING
Undergraduate
Community based service learning

MOL 389
TOPICS IN COMPARATIVE LITERATURE
Undergraduate
Variable topics. Consult course schedule for current offering. Cross-listed as ENG 389.

MOL 392
INTERNSHIPS
Undergraduate
Variable credit.

MOL 396
CAPSTONE: LANGUAGE, LITERATURE, AND CULTURE
Undergraduate
This course explores the connections among linguistics, literary studies and cultural studies, as well as the relation of these fields to others, such as art, philosophy, history, psychology, law, and religion.

MOL 397
SPECIAL TOPICS IN MODERN LANGUAGES
Undergraduate
See schedule for current offerings.

MOL 398
STUDY ABROAD
Undergraduate
Variable credit.

MOL 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

MOL 400
PROFESSIONAL PRACTICUM
Graduate
Supervised experience in teaching, tutoring, interpreting, editing writing or other professional exercise of language skills.

MOL 410
JAPANESE CULTURE
Graduate
Japanese Culture--Geisha: Our Fantasy, Their Reality is a cross-cultural and interdisciplinary exploration of a symbol of authentic Japanese feminine beauty and a cultural icon of the American kitsch, the geisha.
MOL 441
MEDIA IN THE ARAB WORLD
Graduate
Survey of the Arab media - including newspapers, radio, television, and the Internet - as an object of study, and a product of Arab culture.

MOL 442
MODERN ARABIC LITERATURE IN TRANSLATION
Graduate
Introduction to Arabic literature and an examination of the Arabic modern literature as a product of Arab culture.

MOL 449
TEACHING MODERN LANGUAGES
Graduate
Cross-listed as SE 349 and T&L 449.

MOL 450
METHODS OF TEACHING FOREIGN LANGUAGES IN THE ELEMENTARY SCHOOL
Graduate
Provides training in the theory and methods of teaching foreign languages in the elementary school (FLES). Designed for both pre-service and in-service teachers. Pre-service teachers include foreign language majors interested in elementary school teaching and elementary majors who are proficient in a foreign language and interested in teaching FLES. In-service teachers include elementary teachers proficient in a foreign language who are teaching or who are interested in teaching FLES and secondary trained teachers who are teaching or who are interested in teaching FLES. In order to meet the objectives of this course and subsequent methods courses, it is expected that all participants be able to demonstrate proficiency in English and a second language before enrolling.

MOL 454
THEORETICAL FOUNDATIONS/CURRENT RESEARCH SECOND/FOREIGN LANGUAGE ACQUISITION
Graduate
An overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings.

MOL 457
TEACHING CULTURE IN THE MODERN LANGUAGE CLASSROOM
Graduate
Pedagogical theory and practice in the integration of culture into the language classroom.

MOL 460
RUSSIAN DRAMA IN ENGLISH TRANSLATION I
Graduate
The course presents some of the greatest Russian plays of the 18th and 19th century. In the course, students will read original works in English translation by Von Vizin, Griboedov, Pushkin, Gogal, Lermontov, and Ostrovsky. Some critical works will be included. Students will read, analyze, and interpret the plays, comedies and dramas, both with respect to form and meaning.

MOL 461
RUSSIAN DRAMA IN TRANSLATION II: SOVIET ERA
Graduate
Russian theater of the 20th century appeared in parallel to realistic novels and contributed to the movement of realism in Russian literature. Realism dominated in Russian literature from approximately 1845 to 1905, followed by Russian theater of the 20th century. To most foreign readers it is the most interesting part in Russian culture. Russian theater of the 20th century, presented by such authors as Chekhov, Gorky, Bulgakov and Tefli, demonstrates tendencies from realism to a vanguard. Some critical works will be included. The student will read, analyze and interpret the plays, comedies and dramas, both with respect to form and meaning. In the process they will develop greater insight into the social and multicultural issues of the time.
MOL 464
RUSSIAN SHORT STORY IN ENGLISH TRANSLATION II: SOVIET ERA
Graduate
This course presents some of the greatest Russian short stories (1880 - 1930) in English translation. Students will read short stories in English translation by four major Russian writers: Chekhov, Kuprin, Bunin and Bulgakov. Students will analyze and interpret short stories of the 1880-1930 period, both with respect to form and meaning, and discuss some critical works.

MOL 466
RUSSIAN NOVEL IN ENGLISH TRANSLATION I: 19TH CENTURY
Graduate
Major Russian novels of the nineteenth century--Turgenev, Dostoyevsky, Tolstoy--in their cultural and social context.

MOL 468
RUSSIAN NOVEL IN ENGLISH TRANSLATION III: CONTEMPORARY
Graduate
Major Russian prose works of the late 20th century, read in English translation. Authors include Bulgakov, Platonov, Pristavkin, and Bitov.

MOL 497
SPECIAL TOPICS IN MODERN LANGUAGES
Graduate
See schedule for current offerings.

MPH 501
INTRODUCTION TO PUBLIC HEALTH CONCEPTS AND PRACTICES
Graduate
This course introduces students to the concepts, principles, and case outcomes of public health practice. It outlines theories of health, illness behavior, and health education. It considers community health data sources, classical health intervention approaches, the planning and evaluation of community health interventions.

MPH 502
INTRODUCTION TO EPIDEMIOLOGY
Graduate
This course will focus on the theories and methods used in the field of epidemiology to study the occurrence, distribution and determinants of infectious and non-infectious diseases, other forms of illness (particularly those impacted by social and environmental forces), and injury in human populations. The focus will be on determining the impact, magnitude, and patterns of disease/illness/injury frequency so that causal agents can be identified and effective prevention, treatment and control measures can be designed and implemented. The course will explore variations of disease/illness/injury in relation to such factors as age, sex, race/ethnicity, occupational and social characteristics, place of residence, social inequality, susceptibility, exposure to specific agents, and other pertinent characteristics. Also of concern will be the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease.
MPH 503
INTRODUCTION TO ENVIRONMENTAL HEALTH
Graduate
Study of the environment factors that influence health. Topics include air and water pollution, global population and local community
dynamics, toxicology, infectious and chemical agents, radiation, and management.

BIO 121 or instructor permission is a prerequisite for this course.

MPH 511
HEALTH AND BEHAVIOR THEORIES AND COMMUNITY INTERVENTION (CROSS-LISTED WITH PSY 511)
Graduate
This course will examine various theories and models that have been developed to identify the range of psychosocial factors that impact
participation in both health-threatening and health-enhancing behaviors, and provide guidance for the modification of such behaviors. The
theories and models will be explored from multidisciplinary perspectives and will be applied to an array of health issues. Practical applications
of these theories to the development and implementations of theory-based public health interventions that can be applied with multiple
populations (e.g., women, adolescents, elderly, people of color) within multiple settings (e.g., communities, schools, health care settings) at
various levels of change (e.g., individual, community, social, policy) will also be explored. Cross-listed with PSY 511.

MPH 512
APPLIED COMMUNITY PUBLIC HEALTH RESEARCH METHODS
Graduate
This course will provide a critical examination of the relative strengths and limitations of various research designs, data collection methods,
and types of existing data. Students will develop an understanding of (a) the relative contributions of a mixed-methods approach to public
health research, (b) basic issues related to the measurement of public health concepts, and (c) the relative strengths and limitations of various
analytic approaches to studying public health problems. Students will familiarize themselves with peer-reviewed journals, how to search for
material on specific topics, how to develop a critical reader’s eye, and how to summarize and draw evidence-based conclusions from multiple
studies.

MPH 513
PRINCIPLES OF PUBLIC HEALTH ADMINISTRATION
Graduate
This course considers the conceptual and theoretical foundation underlying managerial decision-making. The course introduces students to
such basic managerial tools as basic accounting, cost-benefit analysis, budgeting, and marketing. Principles of strategic planning and
forecasting are examined. The course goes on to examine the legal framework that governs public health practice, organizations, human
resources, research activities, and community as well as individual patient intervention efforts.

MPH 515
PUBLIC HEALTH ETHICS AND POLICY
Graduate
This course is designed to analyze the ethical basis in which public health practice is grounded. It reviews concepts and ideas developed by a
number of disciplines including philosophy, law, political science, and economics.

MPH 522
PROGRAM DEVELOPMENT IN COMMUNITY HEALTH
Graduate
This course is designed to provide students with the background and skills to develop and evaluate community public health programs in a
variety of settings. Students will work individually and as members of teams to design measurable goals, objectives, action plans, timelines,
and evaluation indicators of community-based public health programs. Application of methods to logic modeling, proposal writing, budget
planning, project management, and data management will be examined throughout the course.

MPH 525
PROGRAM EVALUATION IN COMMUNITY HEALTH
Graduate
This course will provide students with a comprehensive theoretical, methodological and ethical foundation for conducting public health
program evaluation. Students will experience the practice aspects of evaluation including communicating and negotiating with stakeholders,
conducting an evaluability assessment, developing logic models and evaluation questions, identifying appropriate data collection methods,
gathering reliable and valid evaluation data that are appropriate to the selected design and analysis methods, analyzing data, reporting
evaluation results, and ensuring evaluation use. The instructor will facilitate a learning and skill-building environment, drawing on personal
experiences and the expertise of others in the field.
MPH 541
APPLIED STATISTICS FOR PUBLIC HEALTH
Graduate

This course emphasizes the application of statistical methods to problems of human health and disease. It covers parametric and nonparametric statistical inferential methods for univariate and bivariate situations using SPSS. Specific topics include but are not limited to the following: Interpretation of graphic and descriptive statistics for both quantitative and categorical data, confidence interval estimation and hypothesis testing methods, linear and multiple regression logistic regression, analysis of categorical data and ANOVA. Course emphasizes the statistical interpretation of the literature and analytic projects based on large data sets from published studies, the internet, or the student's workplace.

MPH 595
SPECIAL TOPICS IN PUBLIC HEALTH
Graduate

Special courses will be offered as students and faculty affiliated with the MPH program identify selected topics of common interest.

MPH 599
INDEPENDENT STUDY IN PUBLIC HEALTH
Graduate

This course can be taken in consultation with a supervising faculty member.

MPH 600
PREPARATION FOR PUBLIC HEALTH PRACTICE
Graduate

This year-long course includes a series of skills-based workshops designed to introduce students to the specialized skills and competencies needed in the public health workplace. These workshops are designed to complement the core MPH curriculum and are selected based on regular feedback from faculty, public health practitioners, and students. (0 credits)

MPH 602
COMMUNITY HEALTH ASSESSMENT
Graduate

This course is part of a three-course practicum sequence that is designed to provide the student with practical experience in the field based on skills acquired in class. The course introduces students to methods of data collection and analysis of epidemiological data. It focuses on community health indicators and research tools used to assess health data. Emphasis is on the research methods that are employed to identify community assets and goals; this step serves as the basic step in the process of community needs assessment which leads to the final objective, that is, program planning. The fundamentals of various types of community health interventions will be explored.

MPH 603
APPLIED COMMUNITY HEALTH INTERVENTIONS
Graduate

This is the second course of the three-course practicum sequence. Students are expected to engage in the following tasks: (1) assess the community health profile documenting incidence and prevalence of disease and other health problems; (2) use the findings identified in step one to plan a population-specific community-based health program designed to reduce assessed risk; (3) develop an evaluation instrument designed to determine how successful the plan is in reducing health risk.

MPH 602 is a prerequisite for this course.
MPH 604
CAPSTONE SEMINAR IN COMMUNITY PUBLIC HEALTH PRACTICE
Graduate
This is the third course of the three course practicum sequence. Students are expected to participate in a seminar, which provides the academic counterpart to the practicum experience. This course focuses on questions that arise related the data collection process, data analysis and/or interpretation of findings, and the effort to translate findings into the planning of community-based public health programs. ***The goal of the final capstone project is to integrate the information that has been learned in the students' MPH academic courses with the applied community experience. Therefore, even though the paper will be focused on the applied work that the students are conducting in their community health setting, this document should also incorporate various elements of the didactic courses that have been taken within the MPH program. The exact format and length of the paper may vary depending on the nature of the applied experience, but should include the following general sections: I. Community Health Profile and Background II. Statement of the Targeted Health Issue (including specific health determinants and/or risk factors) III. Description of the Health Intervention or Program IV. Evaluation or Monitoring Plan and Results V. Implications of Findings VI. Future Directions (including future funding of health initiatives) Students should have an outline project approved by the instructor of the Capstone Seminar prior to writing the final product. This project should demonstrate that the student is able to integrate the knowledge and skills that they have obtained throughout their MPH training to an applied community health issue and setting, and express this integration in a structure written format.

MPH 602 and MPH 603 are prerequisite for this courses.

MPH 699
COMMUNITY PUBLIC HEALTH PRACTICUM
Graduate
This year-long course includes a series of skills-based workshops designed to introduce students to the specialized skills and competencies needed in the public health workplace. These workshops are designed to complement the core MPH curriculum and are selected based on regular feedback from faculty, public health practitioners, and students.

MPH 600 is a prerequisite for this course.

MPS 490
WRITING SKILLS FOR PUBLIC SERVICE PROFESSIONALS
Graduate
This course focuses on developing writing skills (and therefore thinking skills) to meet or exceed MPS Program, professional, academic or management standards. Students receive intensive feedback and coaching on structure, organizing and style. The course is a blend of classroom and individual, online coaching sessions.

MPS 498
PUBLIC SERVICE IMMERSION
Graduate
This course uses experiential, classroom and online (Blackboard) learning methods. Students experience a supervised immersion in nonprofit or government organizations as volunteers for 200 hours with in-class reflection exercises. This course is required for students admitted into degree programs who lack sufficient work experience in public service organizations. It is also useful for students using the Public Service Program to change careers.

MPS 500
INTRODUCTION TO PUBLIC SERVICE MANAGEMENT
Graduate
Introduces students to organizational theories and practices useful to public service managers. Teaches how to use structural, human resource, political and symbolic perspectives to rethink public service organizations. Provides an introduction to managerial issues including workforce diversity, decision making and leadership; stresses critical thinking and writing skills.

School of Public Service student or department consent is a prerequisite for this course.

MPS 501
CROSS-SECTOR ANALYSIS
Graduate
Covers the examination of the size, scope, capacity, and limitations of the nonprofit, government, and business sectors, in the domestic and international context. Students will be introduced to research and become familiar with print and electronic resources and databases. They will learn to develop meaningful research questions, write literature reviews, and analyze the interrelationships between the three sectors.
MPS 502
ETHICAL LEADERSHIP
Graduate
Ethical and socially responsible leadership are core dimensions in the education of local and global public servants. This course provides students with the essential framework for personal and professional ethical decision making applied in the context of diverse workplaces and international organizations. Through lectures in ethical theories, case studies in applied ethics, and specific assignments, students clarify personal and professional values, assess moral intelligence, and develop ethical leadership integrity. Students learn about economic, political, social and environmental responsibility as applied to contemporary practices of professional and international public service.

MPS 511
SUSTAINABLE DEVELOPMENT AND NON-GOVERNMENTAL ORGANIZATIONS
Graduate
This course provides an overview of theories and approaches to sustainable social and economic development and examines the roles of Non Governmental Organizations as well as methods of evaluating their effect. The course covers the role of NGOs in building and strengthening sustainable communities and societies in developing countries.

MPS 513
VOLUNTEERISM
Graduate
This course examines the concept of volunteerism within global civil society, especially nonprofit organizations and government associations. This includes an analysis of the role of volunteers in American society, the motivation to volunteer and how to effectively recruit, train, supervise and evaluate volunteers. Students develop an understanding of the role of volunteers in the management of any social program. Assignments include group projects and service learning opportunities.

MPS 514
GOVERNMENT FINANCIAL ADMINISTRATION
Graduate
The concepts of efficiency and equity in taxation are applied to identify the advantages and disadvantages of specific taxes such as income, sales and property. Specific skill sets include present value techniques, interpreting the basic financial reports generated by governments, and evaluating financial performance of a government based upon its financial reports.

MPS 500 is a prerequisite for this course.

MPS 515
NONPROFIT FINANCIAL ADMINISTRATION
Graduate
This course explores key issues in operations budgeting and capital budgeting. Specific skill sets include cash flow analysis, variance analysis, present value techniques, interpreting financial statements, and evaluating financial performance.

MPS 500 is a prerequisite for this class.

MPS 516
MANAGEMENT OF INFORMATION TECHNOLOGY
Graduate
This course focuses on the management and use of information technology (IT). As the use of IT in society grows, particularly in business, graduates are likely to manage technology resources and participate in IT planning and development projects as founders, sponsors, team members, managers of development, or end-user developers. Students should become effective users of information, IT, and information services. The course explores a number of IT-related topics, such as the strategic role of IT, IT planning and architecture, building the telecommunications highway system, management issues on system development, the expanding universe of computing, group support systems, intelligent systems, electronic document management and managing the human side of systems.

MPS 519
RESOURCE DEVELOPMENT
Graduate
This course teaches students the theories and techniques of resource development. We discuss the fundraising tradition in the U.S., principal donor types, theories of donor behavior, and the organizational, legal and ethical contexts of fundraising. Students learn basic fundraising tools, including planning, grant writing, special events, major gifts, planned giving, and capital campaigns. Students work as volunteer consultants with nonprofit partners to analyze their current fundraising strategies and materials and help them develop new ones.
MPS 520
VALUES-CENTERED LEADERSHIP
Graduate
This interdisciplinary course explores service leadership through the lenses of Robert K. Greenleaf, The de Paul Leadership Project, Margaret J. Wheatley and other theorists and practitioners within the leadership field. The course expands our thinking on leadership to include modules dedicated to four topics: Service Leadership, Leadership and Diversity, International Leadership and Ethical Leadership. Students will assess their own leadership practices, develop a leadership action plan and participate in coaching, as coach and client. Student grading will be based on participation in self-reflection, course participation, project teams and a final project.

MPS 521
LEADERSHIP AND MANAGEMENT
Graduate
This course focuses on key factors which affect employee behavior and the nature and purposes of leader and managerial roles. In addition, it addresses recent research in leadership and management and the legal environment of personnel management. In depth analysis of psychological systems, interpersonal relations and the relationship of rewards to performance are addressed through case studies, role playing and readings.

MPS 522
FUNDAMENTALS OF HUMAN RESOURCE MANAGEMENT
Graduate
This course explores human resource issues facing employees with supervisory responsibilities in public service organizations, including those working in the volunteer, non-profit, religious, government, and education sectors. The course considers human resource planning, employee recruiting and selection, and the motivation and evaluation of staff personnel and managers both individually and in teams. Topics include recruiting and selecting employees and managers, fostering team development, managing employee stress, preventing workplace violence, and handling issues pertaining to termination, training, and development. The course also explores progressive discipline, improving performance management of employees and volunteers, and supervising “difficult” people.

MPS 500 is a prerequisite for this course.

MPS 523
GROUP DYNAMICS FOR LEADERS
Graduate
This interactive course will explore the relevant theories and methods for understanding the structures and processes of groups. The course will also consider how leaders and managers function effectively within groups. An emphasis is placed on role and function, status, power, leadership, communication, decision-making, problem solving, conflict management, negotiation, and coalition.

MPS 524
MARKETING FOR SERVICE ORGANIZATIONS
Graduate
Explores the objectives, strategies, techniques and constraints of government and non-profit services. 4 quarter hours.

MPS 525
WORKING WITH NONPROFIT BOARDS
Graduate
This course examines the legal and philosophical reasons that nonprofit organizations are governed by an external board of directors. Membership, structure and process for this body are examined, as well as the relationship of employees to the individual board members and the policies established by this group.

MPS 526
LOCAL GOVERNMENT ADMINISTRATION
Graduate
This course analyzes decision-making processes used in local government from the perspective of the chief executive officer such as city manager, township supervisor, special district administrator and park superintendent. It includes operational aspects of municipal administration including the effect of intergovernmental relations on local government, the role of the local government administrator in policy implementation and regional governance of the delivery of services that cross political boundaries. The interaction of the chief executive officer and elected board members with the community are discussed.
MPS 527
ASSOCIATION MANAGEMENT (FORMERLY MPS 549)
Graduate
Examines membership associations as a special type of public service organization, with emphasis on managing both the external policy roles of associations and internal roles related to directly serving constituent members and organizations.

MPS 528
FOUNDATION MANAGEMENT
Graduate
This course examines the concepts, functions and practices of organized philanthropy, with a primary emphasis on corporate, private and community foundations.

MPS 529
STRATEGIC MANAGEMENT AND PLANNING
Graduate
Students learn how to apply strategic management and planning concepts and tools to public and nonprofit including international organizations to achieve goals and objectives in meeting service delivery missions. The course focuses on analyzing the interaction of trends, market forces, stakeholders, and core competencies in developing visions and strategies for alternative scenarios.

MPS 530
ANALYSIS OF NONPROFIT ORGANIZATIONS
Graduate
This course explores the art and science of nonprofit management. Students analyzes nonprofits holistically, combining perspectives from law, governance, resource development, and finance. Students learn through hands-on analysis of existing nonprofit organizations and the analysis of historical case studies.

MPS 531
FINANCING AND COSTING IN HEALTH CARE
Graduate
This course focuses on practical examples of financial management of health care institutions. It examines the financial system supporting health care institutions and the financial tools providers and insurers use to keep medical costs in check. Students learn financial management, third party payment methodologies, Medicare and Medicaid, cost accounting, rate setting, budgeting and financial analysis.

MPS 534
MEDICAL SOCIOLOGY (FORMERLY MPS 547) (CROSS-LISTED AS SOC 431)
Graduate
Overview of social systems of health care in the United States, including the health-seeking behavior of patients, relationships among health care providers and organizational settings in which services are delivered. Cross-listed with SOC 431.

MPS 535
HEALTH CARE ISSUES
Graduate
This seminar focuses on contemporary issues in health care policy and management. Topics covered include public health initiatives, dimensions of health service delivery systems (cost, quality and access), and health policy reforms with a special emphasis on the opportunities to reduce disparities in health care. Students conduct an independent secondary research project on a health care topic of their choosing. Classes include discussions of the challenges of developing expertise in a subfield within the health care sector.

MPS 537
HEALTH CARE DELIVERY SYSTEMS (CROSS-LISTED AS SOC 437)
Graduate
Overview of the structure of the U.S. health systems followed by a selective international comparison of other health delivery systems including their relationships to social policies and economic factors. 4 quarter hours. Cross-listed with SOC 437.
Topics covered include: determinants of output, employment, price levels, income distribution, international trade, exchange rates, and how government policies affect these variables. Related topics receiving attention are: globalization, development and international philanthropy.

This course introduces students to the branches of economics known as microeconomics, public finance, and welfare economics. Students learn to apply standard economic tools to identify policy issues and to analyze them. Specific skill set includes present value techniques.

PREREQUISITE(S): MPS 500.

MPS 500 is a prerequisite for this class.

Focuses on processes and techniques of analyzing and designing public policies. Students are introduced to an analytical way of thinking that includes: defining and modeling policy problems; designing policy alternatives; evaluating policy alternatives using ethical, legal, economic, organizational, and political criteria; and anticipating problems of policy implementation.

MPS 501 and (MPS 514 or MPS 515 or MPS 541) are prerequisites for this class.

This course introduces students to the challenges and opportunities of policy implementation. It helps students understand and improve the implementation of public and organizational policies. Using a variety of approaches, students learn to analyze implementation, the factors that influence the process, and to monitor, evaluate, revise, and reform policies.

MPS 542 is a prerequisite for this class.

Explores the roles of individuals and organizations in the public policy process, particularly as power arrangements facilitate or impede consensus building. Examines how legislation is written and how administrative rules are formed in government agencies. Special attention is paid to advocacy techniques such as lobbying, public education, and litigation.

This course uses analytical techniques to explore policy problems faced by nonprofit organizations and governmental agencies. It considers economic and public policy tools to evaluate and resolve contemporary domestic and international issues. The course may include specialized work in a specific policy area, such as economic reform, global poverty reduction, and environmental management.

MPS 542 or MPS 613 is a prerequisite for this class.

This course combines the basic tools of financial analysis with more advanced techniques using case studies to introduce students to management control systems in nonprofit and government organizations. Specific skill sets include full-cost accounting, differential costs analysis, pricing decisions, operations analysis, output measurement, and performance reporting.

MPS 514 or MPS 525 or MPS 541 is a prerequisite for this class.
MPS 559
ENTREPRENEURSHIP AND NEW VENTURE MANAGEMENT [CROSS-LISTED WITH MGT 570]
Graduate
Entrepreneurship and New Venture Management. Cross-listed with MGT 570.

MPS 560
ADMINISTRATIVE LAW
Graduate
This course focuses on an understanding of government powers by federal, state and local agencies in the US such as oversights, rule making, adjudication and judicial review of local and federal actions, and enforcement of regulatory decision making. It examines how public administration decisions are affected by existing constitutional and legal constraints on the administrative process; it includes the Administrative Procedure Act, Open Meetings Act of Illinois, and the Freedom of Information Act.

MPS 561
LAW AND NONPROFIT ORGANIZATIONS (FORMERLY MPS 532)
Graduate
Introduces laws and regulations governing nonprofit organizations, including procedures for incorporation, maintenance of tax-exempt status, and compliance with relevant labor laws. No legal background is assumed.

MPS 562
INTRODUCTION TO HEALTH LAW (FORMERLY MPS 570)
Graduate
Introduces students from nonlegal backgrounds to the legal system. Examines legal materials, including statutes, judicial opinion, and administrative regulations. Basic legal research and writing skills are taught.

MPS 563
LAW AND PUBLIC POLICY
Graduate
Provides an overview of the legal process, developing a basic understanding of legal principles, terms, and court systems. Applies legal analysis to policy issues in the three sectors. Examines the sources of law and explores methods of legal research within the context of public policy analysis.

MPS 542 is a prerequisite for this class.

MPS 570
RESEARCH METHODS IN PUBLIC SERVICE
Graduate
This course introduces students to the principles and methods of public service research, and teaches students how to collect and analyze data. Topics include sampling, surveys, interviews, and focus groups.

MPS 502 is a prerequisite for this class.

MPS 571
METROPOLITAN PLANNING
Graduate
The purpose of this course is to provide an introduction to the professional practice of urban planning and the basic theoretical concepts on which the discipline is based. Students will analyze urban issues, decision-making processes, and resources that affect planning across a metropolitan area, including urban-suburban relations, and the complexities of zoning, economic and community development.

MPS 572
URBAN POVERTY SEMINAR
Graduate
This course explores causes of urban poverty both in the US and abroad. It compares and contrasts policies addressing basic human needs. It includes discussion of global cities and international poverty reduction programs.
MPS 573
URBAN AND COMMUNITY DEVELOPMENT
Graduate
This course discusses urban issues including social area analysis, neighborhood change, land use and other topics. It examines community organizations as problem-solving bodies that interact with government agencies to affect urban development.

MPS 575
SEMINAR IN ADMINISTRATION/BRUSSELS
Graduate
This course increases understanding and knowledge of the European Union and the North Atlantic Treaty Organization as organizations of change. It focuses on the international public sector including relationships with NGO’s and the nonprofit sector. Students expand experiential and intellectual understanding of these global actors and how they compare to the US. The course takes place in Brussels.

MPS 580
QUANTITATIVE METHODS IN PUBLIC SERVICES
Graduate
This course prepares students to use and produce quantitative analyses for policy studies and administrative decision making. It focuses on descriptive and inferential statistics, bivariate measures of correlation, and introduces the concept of statistical control. Introduces students to statistical software.

MPS 585
THESIS DESIGN
Graduate
Prepares students to undertake a capstone project. Students will be introduced to a variety of data sets and invited to explore issues in which they are interested by reviewing the relevant literature and applying the analytical tools acquired during their coursework to these data. Students with a grade point average of 3.5 or higher will have the option of collecting their own data. Students electing this option are required to find a faculty advisor with the approval of the Director.

School of Public Service student or department consent is a prerequisite for this course.

MPS 586
RESEARCH METHODS I, INTRODUCTION TO APPLIED RESEARCH AND STATISTICS
Graduate
This course introduces students to the principles underlying scientific and applied research. It covers both qualitative and quantitative approaches and teaches students to collect and analyze data. Students learn about research ethics, causality, sampling (both random and purposive), and the techniques of survey design. Students calculate descriptive and inferential statistics using statistical software. Students learn applied program research, including developing and evaluating program theory and processes.

MPS 501 and (MPS 514 or MPS 515 or MPS 541 or MS in International Public Service) are a prerequisite for this class.

MPS 587
RESEARCH METHODS II, ADVANCED APPLIED RESEARCH AND STATISTICS
Graduate
This course introduces students to more advanced mixed methods of scientific research including interviews and focus groups, observation, and ethnography. Students learn about the design of experiments and the problems associated with spuriousness and control. Students calculate and interpret bivariate and multivariate statistics using statistical software. Students learn applied research, including needs assessment and outcomes evaluations. Students develop their own research proposal for their capstone or thesis project.

MPS 586 is a prerequisite for this course.

MPS 588
INTRODUCTION TO RESEARCH AND STATISTICS FOR MANAGEMENT
Graduate
This course develops the skills necessary for understanding scientific research and conducting applied research through surveys, interviews, and focus groups. Students learn to calculate basic statistics using Excel and understand descriptive and inferential statistics. Students learn applied program research, including developing and evaluating program theory and processes.

MPS 501 and (MPS 514 or MPS 515 or MPS 541 or MS in International Public Service) are a prerequisite for this class.
MPS 589
ADVANCED RESEARCH METHODS AND STATISTICS FOR MANAGEMENT
Graduate
This course continues the study of scientific research begun in MPS 588 and introduces more advanced topics, including experimental designs and statistical control. It teaches applied methods, including needs assessment, outcomes measurement, and impact evaluations, and introduces participatory action research. Students develop their own research proposal for their capstone or thesis project.

MPS 588 is a prerequisite for this class.

MPS 590
PUBLIC SERVICE ASSESSMENT AND EVALUATION
Graduate
This course explains and explores the purposes and methodologies for assessing public service needs in shaping social policy, designing management systems, evaluating program results, and the effect of policy or program change. It includes the effectiveness of organizations in implementing policies and programs, and the development of process measures. These serve as possible approaches for completing the capstone project in MPS 593.

MPS 542 and MPS 570 are prerequisites for this course.

MPS 593
INTEGRATIVE SEMINAR
Graduate
In this capstone course students complete an action research project integrating applied research, theoretical frameworks, and professional practice. Students choose one of the applied research competencies learned in MPS 590 and focus on either a policy or management issue.

(MPS 586 and MPS 587) or (MPS 580 and MPS 590) or (MPS 588 and MPS 589) are a prerequisite for this class.

MPS 594
ETHICAL LEADERSHIP IN PUBLIC SERVICE
Graduate
This course provides students with the essential framework for personal and professional ethical decision making applied in the context of diverse workplaces and international organizations. Through lectures in ethical theories, case studies in applied ethics, and specific assignments, students clarify their personal-professional values, assess their moral intelligence, and develop their ethical leadership integrity. Students will also study the ethics of organizations, including the formation of social norms, how they influence individual decisions, and how entire organizations can become more ethical. Formerly MPS 506.

MPS 586 or MPS 588 is a prerequisite for this class.

MPS 597
PUBLIC SERVICE FELLOWS SEMINAR
Graduate
Elective, 4-credit hour course available to students with MPS CGPA of 3.75 or greater. For MPS Fellows taking MPS 593, Integrated Seminar, or MPS 598, Thesis Research I, during the academic year, meets roughly every other week during winter and spring terms. Seminar includes distinguished academic and professional guest lectures and presentations of research by Fellows.

MPS 598
THESIS
Graduate
Students carry out a theoretically-based research project designed in MPS 585. The final product of this course is a master's thesis. Binding fee.

MPS 585 and program director consent is a prerequisite for this course.

MPS 600
INDEPENDENT STUDY
Graduate
Individually supervised learning experience, usually involving extensive library research and writing. Variable credit.
MPS 601
INTERNERSHIP
Graduate
Supervised work experience during one or more quarters, usually involving application of administrative skills in an organizational setting new to the student. Variable credit.

MPS 602
CANDIDACY CONTINUATION
Graduate
Required of students who are not registered for regular courses during an academic quarter while completing course requirements or research. (0 credit) $40.00 per quarter.

MPS 604
SPECIAL TOPICS
Graduate
Topics vary each term. (May be taken more than once). Variable credit.

MPS 605
SEMINARY IN ADMINISTRATION
Graduate
In-depth examination of selected issues in public service administration. Topics vary each term. May be taken more than once.

MPS 606
SEMINARY IN HIGHER EDUCATION ADMINISTRATION
Graduate
In-depth examination of selected issues in higher education administration. Topics vary each term. May be taken more than once.

MPS 610
INTERNATIONAL/INTERCULTURAL INTERNSHIP
Graduate
The internship consists of work experience supervised by a site supervisor in an international or cross-cultural organization during one or more terms and involving the application of administrative skills in an organization new to the student. Students may take internship abroad or in the US. Variable credit.

MPS 611
MANAGEMENT OF INTERNATIONAL NGOs
Graduate
This course examines management skills and trends of international nongovernmental organizations. Through specific case studies in the fields of international public service, development and emergency, students learn current techniques for effectively manage projects, relations and operations of NGOs.

MPS 612
INTERNATIONAL POLITICAL ECONOMY
Graduate
This course provides an overview of major theories and practice in international political economy. It includes critical analysis of international political economy such as growth theories, capital and labor flows, and transformation of regimes. Students develop analytical skills for professional interests and research purposes.

MPS 613
COMPARATIVE PUBLIC POLICY
Graduate
This course is an introduction to cross-national social policy research and to the fascinating and challenging issues of comparative research. Students will learn about comparative welfare state research and reflect on major theoretical and methodological aspects of social policy. North American public policy approaches will be compared with European, Asian and Latin American case studies on education, health care, housing, social security, labor market and other policy fields.
MPS 614  
GLOBALIZATION AND CIVIL SOCIETY ORGANIZATIONS  
Graduate  
This seminar introduces students to the practices and theories of global civil society organizations. Globalization of economics, politics, technology and culture is critically reviewed as threat and opportunity for NGOs and CSOs. Students learn about network analysis of civil society in relation to the United Nations, international organizations, and transnational movements.

MPS 615  
INTERCULTURAL COMMUNICATION IN ORGANIZATIONS  
Graduate  
This course provides the necessary conceptual foundation and practical skills for leading, managing and communicating in a cross-cultural and diverse working environment. Students learn intercultural competency through applications and examples on international relations and human resource management.

MPS 616  
INTERNATIONAL RELATIONS AND CONFLICT MANAGEMENT  
Graduate  
The course focuses on theoretical foundations and practical implications of diplomacy, negotiation, mediation and peace-building to solve and prevent conflicts. It offers reflective practices and concrete directions for creating constructive solutions to interpersonal, inter-group, and international conflict.

MSC 111  
OFFICERSHIP IN THE UNITED STATES ARMY  
Undergraduate  
The purpose of this class is to introduce cadets/students to the fundamental components of service as an officer in the United States Army. These initial lessons form the building blocks of progressive lessons in values, fitness, leadership, and officership. Additionally the class addresses "life skills" including fitness, communications theory and practice (written and oral), and interpersonal relationships.

MSC 112  
PROBLEM SOLVING AND DECISION MAKING  
Undergraduate  
The course is an introduction to the "life skills" of problem solving, decision-making and leadership. The course is designed to help students in the near-term as leaders on campus. The class will help students be more effective leaders and managers in the long-term, whether they serve in the military or the civilian sector. Topics addressed include problem solving, critical thinking, problem solving methods, leadership theory, followership, group cohesion, goal setting, and feedback mechanisms. Lessons are taught in a seminar format, emphasizing student discussions and practical exercises.

MSC 113  
FUNDAMENTALS OF LEADERSHIP  
Undergraduate  
The course provides cadets/students an introduction to the critical topic of leadership. The course seeks to convince cadets/students that they can learn to be better leaders than they are now (i.e. leaders aren't born they are developed), and to provide them with a model for understanding their development as leaders.

MSC 151  
PHYSICAL READINESS I  
Undergraduate  
Introduction to the principles of fitness: a fast-paced military-style interval training class that incorporates calisthenics and an emphasis on a healthy life style. Students will undergo an evaluation of their physical fitness level and it's progression over the course of the quarter.

MSC 211  
LEADERSHIP AND PROBLEM SOLVING  
Undergraduate  
The purpose of this class is to introduce cadets/students to principal leadership instruction of the Basic Course. Building upon the fundamentals introduced in the MSC 100 level classes, this instruction delves into several aspects of communication and leadership theory.
MSC 212
MILITARY PRINCIPLES OF TACTICS
Undergraduate
This quarter focuses principally on officership, providing an extensive examination of the unique purpose, roles, and obligations of commissioned officers. It includes a detailed look at the origin of our institutional values and their practical application in decision-making and leadership. The lesson traces the Army's successes and failure as it evolved from the Vietnam War to the present.

MSC 213
OFFICERSHIP CASE STUDY
Undergraduate
This course builds on the MS I years introduction to officership and provides an extensive examination of the unique purpose, roles, and obligations of commissioned officers. The aim is to convey a clear and complete understanding of what it means to be a commissioned officer. Special emphasis is given to the officers role in shaping and guiding the growth and evolution of the Army through decisions, policies, and personal example.

MSC 252
PHYSICAL READINESS II
Undergraduate
Introduction to the principles of fitness: a fast-paced military-style interval training class that incorporates calisthenics and an emphasis on a healthy life style. Students will undergo an evaluation of their physical fitness level and it's progression over the course of the quarter.

MSC 321
FUNDAMENTALS OF MILITARY LEADERSHIP AND TRAINING
Undergraduate
Instruction and case studies, which build leadership competencies and military skills in preparation for further responsibilities as Army Officers. Specific instruction in the principles of war, decision-making processes, planning models, and risk assessment. Advanced leadership instruction focuses on motivational theory, the role and actions of leaders, and organizational communications. Must be a contracted ARMY ROTC cadet.

MSC 322
ORGANIZATIONAL LEADERS
Undergraduate
Specific instruction is given in individual leader development, planning and execution of small unit operations, individual and team development, and the Army as a career choice. Must be a contracted ARMY ROTC cadet.

MSC 323
ADVANCED LEADERSHIP
Undergraduate
This course builds upon the previous lessons while introducing advanced leadership theories on motivation, leader modeling, and the role of a leader in an organization. Must be a contracted ARMY ROTC cadet.

MSC 341
COORDINATE ACTIVITIES WITH STAFFS
Undergraduate
This module consists of four lessons designed to give the cadet an understanding and appreciation of the critical importance that staff organization, planning, and coordination play in the success or failure of military operations. The module uses historical case studies initially to illustrate these points then transitions to provide an overview of staff fundamentals and principles contained in field manual FM 101-5. Must be a contracted ARMY ROTC cadet.

MSC 342
ETHICAL IMPEMERATIVES FOR THE JUNIOR OFFICER
Undergraduate
This six-lesson module on ethics builds upon previous instruction presented in the Basic Course and the MS III year. These lessons further strengthen character and values within the cadets, increase their understanding of the Army's consideration of others expectations, and improve their capacity to make correct decisions when presented with an ethical or moral dilemma. Must be a contracted ARMY ROTC cadet.
MSC 343
ADVANCED MILITARY TOPICS
Undergraduate
This course builds upon the previous MS IV lessons while introducing advanced leadership theories on motivation, leader modeling, and the role of a leader in an organization. It will also address the responsibility and process of a leader on how to assess and apply risk assessment within the organization. Must be a contracted ARMY ROTC cadet.

MSC 353
PHYSICAL READINESS III
Undergraduate
Introduction to the principles of fitness: a fast-paced military-style interval training class that incorporates calisthenics and an emphasis on a healthy life style. Students will undergo an evaluation of their physical fitness level and it's progression over the course of the quarter.

MSC 399
MILITARY THEORY
Undergraduate
(Independent Study) Intensive research and study of one or more selected topics. The topics and research methodology are determined in consultation with the instructor. May be repeated for maximum of six credit hours.

MSW 401
PROFESSIONAL WRITING AND DEVELOPMENT
Graduate
Social work careers are increasingly more challenging and varied. Social workers must be prepared to change assignments, cases, and tasks regularly and must be able to communicate in a manner that transcends singular agencies or organizations. Effective communication strategies are required for successful professionals and efficient organizations. The practice of professional social work requires accurate and persuasive communication in multiple formats. This required, foundation-level course is designed to introduce students to the major possibilities and constraints of professional writing and other forms of communication as well as survey the career paths available to professional social workers. There is an emphasis on writing for professional settings including case studies, mandated reports, summaries, and professional publication.

MSW 411
HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I
Graduate
This is the first course of a two-part sequence designed to develop an understanding about human behavior and the social environment. This course offers an ecosystems framework and method for understanding human behavior within the context of personal, family, group and community systems. The focus is on a normative development with an emphasis on the strengths perspective. This course supports the values of diversity in society and social justice. Throughout this two quarter sequence, students will be introduced to varied theoretical paradigms for explaining and predicting human behavior so students will be exposed to both complexity and controversy within the field. Using a bio-psycho-social theoretical framework, fundamental concepts and theories are introduced with the life cycle serving as the organizational focus. The course covers the first half of the life span: conception, infancy, childhood, adolescence and young adulthood. It explores these life stages within the contexts of biological, psychological, and social systems. As students will learn, each theoretical paradigm is a social construct, uniquely offering strengths and limitations as well as value biases. Therefore, the development of a critical analytical perspective is crucial in the study of each theory. Students are thus encouraged to develop critical thinking skills as they examine the adequacy of the theories and research that they are taught so that they may appreciate the strengths and limitations of the knowledge that they are acquiring. This course takes into consideration the following factors that influence human behavior: ethnicity, age, culture, race, social class, poverty, gender, sexual orientation, spirituality, genetics, and an urban social environment. These contexts are used to understand the functioning of individual as members of families, groups, communities and larger social organizations, in order to better understand how social workers develop interventions targeting the micro, meso, and macro-systems levels. Special attention is given to the impact of social problems, human diversity, discrimination and oppression on the individual's ability to access community resources in order to reach optimal health and well-being. The goal of this approach is to help social work students develop an understanding and tolerance for variant family constellations, lifestyles, and life choices. Students are encouraged to develop a professional value system that respects difference.
HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II
Graduate
This is the second course of a two-part sequence designed to develop an understanding about human behavior and the social environment. This course offers an ecosystems framework and method for understanding human behavior within the context of personal, family, group and community systems, organizations, and institutions. The focus is on a normative development with an emphasis on the strengths perspective. Using a bio-psycho-social theoretical framework, fundamental concepts and theories are introduced with the life cycle serving as the organizational focus. The course covers the second half of the life span: young adulthood, middle adulthood, later adulthood and end of life. It explores these life stages within the contexts of biological, psychological, and social systems. This course takes into consideration the following factors that influence human behavior: ethnicity, age, culture, race, social class, poverty, gender, sexual orientation, spirituality, genetics, and an urban social environment. These contexts are used to understand the functioning of individual as members of families, groups, communities and larger social organizations, in order to better understand how social workers develop interventions targeting the micro, meso, and macro-systems levels. Special attention is given to the impact of social problems, human diversity, discrimination and oppression on the individual's ability to access community resources in order to reach optimal health and well-being. The goal of this approach is to help social work students develop an understanding and tolerance for variant family constellations, lifestyles, and life choices. Students are encouraged to develop a professional value system that respects difference.

MSW 411 and status as a MSW degree-seeking student or instructor consent are a prerequisite for this class.

INTRODUCTION TO SOCIAL WORK RESEARCH I
Graduate
This course presents the conceptual foundations and methods of research needed in order to assist students with integrating research knowledge and professional social work practice. It presents social justice as an overarching paradigm in the study of social work research. MSW 421 presents the conceptual foundations and methods of research in order to assist students with integrating research knowledge with professional social work practice and ethics. This course focuses primarily on the quantitative method but the qualitative method is also covered. The course covers the research process from problem identification through the conceptualization of research questions, sampling, design, measurement, data collection, analysis, and dissemination of findings. Additionally the course pays specific attention to ethics in research and issues of race, class, gender and sexual orientation. As an alternative to the quantitative research method, the course touches briefly on qualitative methods. The course makes use of examples and readings that focus on conducting research with individuals, families, and communities in urban environments. Students engage in a critical analysis of the quantitative research method and consider alternative methods of developing knowledge as it pertains to social work. Additionally, the course provides a basic coverage of data analysis using both the quantitative and qualitative research methods with the goal of developing student's conceptual understanding and ability to critically interpret research findings.

Status as a MSW degree seeking student is a prerequisite for this class.

ADVANCED SOCIAL WORK RESEARCH II
Graduate
The course is the second part in a two part series focusing on quantitative and qualitative methods. It continues the presentation of social justice as an overarching paradigm in the study of social work research. As it did with the first course in the sequence, MSW 422 presents the conceptual foundations and methods of research in order to assist students with integrating research knowledge with professional social work practice and ethics. The first half of the course continues the focus on the quantitative method. The second half of the quarter will examine the qualitative methods in more depth. The first part of the course covers clinical single subject designs, program evaluation, and more advanced statistical analysis. Additionally the course revisits content on ethics in research and issues of diversity. The qualitative method section of the course focuses on the fundamental research tasks found in most qualitative inquiries. The course makes use of examples and readings that focus on conducting research with individuals, families, and communities in urban environments. Students engage in a critical analysis of the quantitative and qualitative research methods and consider alternative methods of developing knowledge as it pertains to social work.

MSW 421 or MSW advanced standing is a prerequisite for this course.
MSW 431
SOCIAL WELFARE POLICY I
Graduate
All of professional social work practice is grounded in policy knowledge and theory. This foundation-level course is designed to provide students with the entry-level knowledge of social work ethics and values, policy formation and analysis, and practice skills necessary to impact and interpret the rules and regulations surrounding social welfare. Emphasis is placed on understanding political processes at the agency, local, regional and federal level and attention is given to economic considerations as well as the unique role of social welfare policy in regulating the lives of clients, particularly those from historically oppressed groups including women, children, poor people, people of color, people with disabilities, the aged, gay, lesbian, bisexual and transgender people, people from various ethno-cultural backgrounds, people with diverse religious beliefs, recently arrived immigrants, people for whom English is a second language and others in the urban environment. Content covered in this course includes constructs from United States history, political science, and economics, in addition to social work practices and principles. The course focuses on the analysis of social policies utilizing social work ethics and values. This course is the first of two required social welfare policy courses for MSW degree candidates; the assignments for this course relate to assignments in the second policy course, MSW 432. Students who are admitted into the MSW degree program or who are planning to take both policy courses should store their documents electronically so that they may be retrieved for future review and use.

MSW 432
ADVANCED SOCIAL WELFARE POLICY II
Graduate
This is the second of two required Social Welfare Policy Courses in the MSW curriculum. This concentration course focuses on policy practice (including advocacy) skills in agencies and organizations. While including a review of analytical techniques, there is emphasis in this course on the human interactions which shape policy review and implementation. Attention will be paid to the unique position of social workers and social work values in impacting those plans and processes which guide services that are based in agencies and institutions, including government. Building on the work begun in MSW 431 (Social Welfare Policy I), students learn those skills and applications which influence social policy using social work values and ethic as a major lens thru which policy practice is facilitated. Emphasis on social justice and human rights will be facilitated in the course as one key responsibility of (all social work) policy practitioners. As much of the content of the course will center on specific client, agency, and institutional contexts, students will need social work practice experience to ground their observations and work in this course. The course will focus on how laws and regulations are enacted and on skills in communications, lobbying, advising and other forms of influencing policy decision-makers in the interest of social justice.

MSW 450
SPECIAL TOPICS IN SOCIAL WORK
Graduate
See schedule for current offerings. Graduate standing required.

MSW 481
FOUNDATION PRACTICE I
Graduate
This course is the first in a series of three required foundational courses (MSW 481, MSW 482 and MSW 483) designed to equip students with the basic theoretical knowledge, analytical skills, practice skills, and values needed to practice generalist social work with diverse individuals and families in an urban context. The course is grounded in an empowerment model with an emphasis on social justice and the Vincentian values of respect, advocacy, service, and inventiveness. Additionally, the foundation practice sequence gives attention to the importance of diversity within oppressed groups including women, children, poor people, people of color, people with disabilities, the aged, gay, lesbian, bisexual, and transgender people, people from various ethno-cultural backgrounds, people with diverse religious beliefs, recently-arrived immigrants, and people for whom English is a second language. The sequence prepares students for advanced, community practice. The course will explore the implementation of the ecosystems perspective as it applies to a generalist practice. The course will also cover the relationship between professional and personal values, social work ethics, assessment, relationship building, implementing change strategies, and practice evaluation. Experiential exercises and assignments will be utilized to help students apply the practice concepts presented in this course. Students will be asked to share their field experiences in class to link course content to field work. Experiential exercises utilizing role playing and small group work will allow students to practice the skills in a supportive environment. This course is to be taken concurrently with MSW 491 (Foundation Field Education I) and is required of all students enrolled in the first year field sequence.

Declared MSW student and department permission are prerequisites for this course.
This course is the second in a series of three required foundational courses (MSW 481, MSW 482 and MSW 483) designed to equip students with the basic theoretical knowledge, analytical skills, practice skills, and values needed to practice generalist social work with groups in an urban context. The course will emphasize the development, implementation, and evaluation of various forms of therapeutic groups along with some content on organizational task groups. Task groups will be covered more thoroughly in MSW 483. Additionally, the foundation practice sequence gives attention to the importance of diversity within oppressed groups including women, children, poor people, people of color, people with disabilities, the aged, gay, lesbian, bisexual, and transgender people, people from various ethno-cultural backgrounds, people with diverse religious beliefs, recently-arrived immigrants, and people for whom English is a second language. The sequence prepares students for advanced, community practice. Course instruction will emphasize didactic lecture, but group-simulation experiential exercises will also be an important part of presenting the content. Students will also be required to conduct an analysis and presentation of a group experience from their internship. The course is grounded in an empowerment model with an emphasis on social justice and the Vincentian values of respect, advocacy, service, and inventiveness. This course is to be taken concurrently with MSW 492 (Foundation Field Education II) and is required of all students enrolled in the first year field sequence.

MSW 481 and department permission are prerequisites for this course.

This course is the third in a series of three required foundational courses (MSW 481, MSW 482 and MSW 483) designed to equip students with the basic theoretical knowledge, analytical skills, practice skills, and values needed to practice generalist social work within communities and organizations. Specifically, this course introduces skills associated with task groups which serve to meet client needs in communities and organizations. The course is grounded in the empowerment model with an emphasis on social justice and the Vincentian values of respect, advocacy, service, and inventiveness. Additionally, the foundation practice sequence gives attention to the importance of diversity within oppressed groups including women, children, poor people, people of color, people with disabilities, the aged, gay, lesbian, bisexual, and transgendered people; people from various ethno-cultural backgrounds, people with diverse religious beliefs, recently-arrived immigrants, and people for whom English is a second language. The sequence prepares students for advanced, community practice. This course is to be taken concurrently with MSW 493 (Foundation Field Education III) and is required of all students enrolled in the first year field sequence.

MSW 482 and department permission are prerequisites for this course.

This course is required for all Advanced Standing students and may be taken as an elective (with its co-requisite course, MSW 494) with permission of the Instructor. This course must be taken with MSW 494. This course is designed to equip students with the basic theoretical knowledge, analytical skills, practice skills, and values needed to prepare for advanced, community practice in social work. The course is grounded in the empowerment model with an emphasis on social justice and other Vincentian values. Additionally, it gives particular attention to the importance of diversity, including race/ethnicity, gender, economic class, disability, and sexual orientation in the context of social work macro practice. This course is to be taken concurrently with MSW 494 (Advanced Standing Foundation Field Education).

(MSW 483 and MSW 493) or MSW advanced standing is a prerequisite for this course.
This course is designed to support students in their Foundation Year of Field Education, and to complement the Foundation Year Sequence. Students will be provided with the opportunity to apply the beginning skills and knowledge needed to professionally aid individuals and families using the bio-psycho-social model and the empowerment approach, and introduce key components of field work and working with community organizations and social service agencies. This course is the first of three field education courses which are required of all MSW degree students. Students enrolled in this course must also be concurrently enrolled in MSW 481. (Foundation Practice I). The foundation field education course also requires working in an approved field placement for 160 agency contact hours during the autumn quarter. Students should be mindful that they need to complete a minimum of 540 hours during the academic year. The course will meet several times during the autumn quarter. Issues related to practice will be discussed, including ethics, networking with community organizations, diversity, and supervision. Social work is practiced in agencies and organizations that work directly with people. Students in this course are placed in human service organizations or agencies where they will develop skills in interviewing, data collection, problem identification, and formulating goals with clients within the context of professional social work values and ethics and the auspices of the agency in which the student is based. Students are required to develop an understanding of the agency's history and purposes, its programs and services, and its role in the greater urban community. Students must always be able to demonstrate a professional awareness of self in working with clients as well as an understanding of human diversity as it relates to working with clients and working towards restorative and social justice. The course provides students the opportunity to explore a range of concepts that support the learning objectives of the Foundation course sequence, and include: o Exposure of students to a wide range of practice situations o Provide opportunities for discussion of field related issues o Provide opportunities for troubleshooting and problem solv ing of pragmatic and procedural aspects of field instruction o Provide a forum for the development of the 'professional self' and skills necessary to participate in professional consultation The process for field placement and supporting policies are further articulated in the student handbook and the field education manual. Each student is required to submit a learning contract specific to their placement agency each quarter. The learning contract should include learning activities which can reasonably be accomplished within the academic quarter and which reflect both student and program learning needs. Concurrent enrollment in MSW 481 and confirmation of field placement for current academic year. Declared MSW student and department permission are prerequisites for this course.

This course is designed to support students in their Foundation Year of Field Education, and to complement the Foundation Year Sequence. Students will be provided with the opportunity to apply the beginning skills and knowledge needed to professionally aid individuals and families using the bio-psycho-social model and the empowerment approach, and introduce key components of field work and working with community organizations and social service agencies. This course is the second of three field education courses which are required of all MSW degree students. Students enrolled in this course must also be concurrently enrolled in MSW 482. (Foundation Practice II). The foundation field education course also requires interning in an approved field placement for at least 180 agency contact hours during the winter quarter. Students should have completed at least 180 hours at their internship prior to the start of the winter quarter and must complete a minimum of 540 internship hours during the academic year. The course will meet several times during the winter quarter. Issues related to practice will be discussed, including ethics, networking with community organizations, diversity, and supervision. Social work is practiced in agencies and organizations that work directly with people. Students in this course are placed in human service organizations or agencies where they will develop skills in interviewing, data collection, problem identification, and formulating goals with clients within the context of professional social work values and ethics and the auspices of the agency in which the student is based. Students are required to develop an understanding of the agency's history and purposes, its programs and services, and its role in the greater urban community. Students must always be able to demonstrate a professional awareness of self in working with clients as well as an understanding of human diversity as it relates to working with clients and working towards restorative and social justice. The course provides students the opportunity to explore a range of concepts that support the learning objectives of the Foundation course sequence, and include: o Exposure of students to a wide range of practice situations o Provide opportunities for discussion of field related issues o Provide opportunities for troubleshooting and problem solving of pragmatic and procedural aspects of field instruction o Provide a forum for the development of the 'professional self' and skills necessary to participate in professional consultation The process for field placement and supporting policies are further articulated in the student handbook and the field education manual. Each student is required to submit a learning contract specific to their placement agency each quarter. The learning contract includes learning activities which can reasonably be accomplished within the academic quarter and which reflect both student and program learning needs. Concurrent enrollment in MSW 482 and confirmation of field placement for current academic year required. MSW 491 is a prerequisite for this class.
MSW 493  
FOUNDATION FIELD EDUCATION III  
Graduate
This course is designed to support students in their Foundation Year of Field Education, and to complement the Foundation Year Sequence. Students will be provided with the opportunity to apply the beginning skills and knowledge needed to professionally aid individuals, families, and groups using the bio-psycho-social model and the empowerment approach, and introduce key components of field work and working with community organizations and social service agencies. This course is the third of three foundation field education courses which are required of all MSW degree students. Students enrolled in this course must also be concurrently enrolled in MSW 483. (Foundation Practice III). The foundation field education course requires working in an approved field placement for at least 180 agency contact hours during the spring quarter. Students must complete a total of 540 hours by the end of spring quarter. The student will also be required to actively participate in a meeting with the Field Instructor and the Field Liaison at the end of the quarter to discuss the student's progress and quarterly evaluation. The course will meet several times during the spring quarter. Issues related to practice will be discussed, including ethics, networking with community organizations, diversity, and supervision. Social work is practiced in agencies and organizations that work directly with people. Students in this course are placed in human service organizations or agencies where they will develop skills in interviewing, data collection, problem identification, and formulating goals with clients within the context of professional social work values and ethics and the auspices of the agency in which the student is based. Students are required to develop an understanding of the agency's history and purposes, its programs and services, and its role in the greater urban community. Students must always be able to demonstrate a professional awareness of self in working with clients as well as an understanding of human diversity as it relates to working with clients and working towards restorative and social justice. The course provides students the opportunity to explore a range of concepts that support the learning objectives of the Foundation course sequence, and include:  
- Exposure of students to a wide range of practice situations  
- Provide opportunities for discussion of field related issues  
- Provide opportunities for trouble shooting and problem solving of pragmatic and procedural aspects of field instruction  
- Provide a forum for the development of the 'professional self' and skills necessary to participate in professional consultation  
- The process for field placement and supporting policies are further articulated in the field education manual.  
Each student is required to submit a learning contract specific to their placement agency each quarter. The learning contract should include learning activities which can reasonably be accomplished within the academic quarter and which reflect both student and program learning needs. Concurrent enrollment in MSW 483 and continuation in field placement for current academic year required.  
MSW 492 and department permission are prerequisites for this course.

MSW 494  
ADVANCED STANDING FOUNDATION FIELD EDUCATION  
Graduate
This course is the third of three foundation field education courses which are required for all Advanced Standing students and may be taken as an elective (with its co-requisite course, MSW 484) with permission of the Instructor. The course must be taken with MSW 484. This course also requires enrollment in an approved field agency placement for the entire summer session. Students are required to complete a minimum of 150 contact hours at the agency. This course is designed to assist students with processing the many theoretical, analytical, and practice skills needed to prepare for community practice, an advanced approach to social work. This course is to be taken concurrently with MSW 484 (Advanced Foundation Practice).

MSW 499  
INDEPENDENT STUDY  
Graduate
(1 to 4 Credit Hours) Individually-supervised learning experience, usually involving extensive research and written analysis.

MSW 501  
PROGRAM EVALUATION  
Graduate
Administrator and staff of social programs have experienced continued pressure to document the effectiveness of community-based programs. Public agencies, private funders and other external organizations now routinely require program evaluation as part of the funding package. Additionally, agency administrators and staff want to know if their programs are effectively helping their clients. These internal and external demands now make it essential that social workers are skilled in developing, implementing and utilizing program evaluation. This course offers a comprehensive overview of how program evaluation fits in today's social service environment. It presents social justice as an overarching paradigm in the study of program evaluation. The course will cover three methods of program evaluation: needs assessments, outcome evaluations, and process evaluations. The course will also cover the history of evaluation and ethical considerations related to race, ethnicity and sexual orientation. The course also emphasizes the role of program evaluation with community-based organizations that exist in an urban context. Practical issues related to organizational mission, staff resistance, resource demands and evaluation ethics will be covered in order to offer a reality-based perspective on conducting program evaluation. The course is grounded in the Vincentian values of respect, advocacy, service, and inventiveness.  
Declared MSW student and MSW 422 are prerequisites for this course.
MSW 521
FUND DEVELOPMENT AND MANAGEMENT I
Graduate
This two-part course series introduces students to creating, implementing and adjusting budgets within agencies and programs which serve people. This course is the first of two required courses in fund development for MSW students and is taken either concurrently with MSW 582 (Community Practice II) or before advanced field education. MSW 521 emphasizes budget preparation and fund acquisition while MSW 522 focuses on fund distribution. Successful completion of MSW 501 (Program Evaluation) is required for enrollment in this course, as is the successful completion of the MSW research sequence (MSW 421 & 422). This course introduces students to budgetary operations and the ethical, value-based planning and decision-making processes by which social workers must implement fiscal and administrative decisions. This course also prepares students for MSW 522 (Fund Development & Management II) in which students will practice skills in program marketing and fundraising (including grant-writing).

MSW 421, MSW 422, (MSW 483 or MSW 484), (MSW 493 or MSW 494) and MSW 501 are a prerequisite for this class.

MSW 522
FUND DEVELOPMENT AND MANAGEMENT II
Graduate
Building upon concepts introduced in MSW 521 (Fund Development and Management I), this course is the second of two required courses in fund development for students in the MSW program. MSW 522 focuses on fund distribution and control. This course also reviews principles of marketing and fund raising in programs and agencies within the context of social services. Attention is given to program development and fundraising which includes grant writing. This course is taken either concurrently with or prior to MSW 583 (Community Practice III). This course continues review of many topics introduced in MSW 521. MSW 522 will also introduce topics such as budgetary control, allocation, monitoring, and preparation for audits. Students are also introduced to topics such as purchase of services and fees for services.

MSW 581
COMMUNITY PRACTICE I
Graduate
Using select theoretical approaches, including empowerment practice, this course equips students with the advanced skills and knowledge needed to practice in community-serving agencies and organizations. The emphasis in this course, which represents the first of three consecutive, required (advanced) practice courses, is on leadership and management of human service organizations. This course introduces students to the knowledge, skills and professional values essential to leadership of community-based or community-serving programs and organizations. This course covers leadership theories, styles, and techniques; supervision and facilitation; and the critical role(s) leadership play(s) in agency and program administration. Special attention is paid to the unique considerations of people with diverse backgrounds (and representatives of other marginalized groups) in leadership positions as well as working towards the promotion of social and economic justice. It is required that this course be taken concurrently with MSW 591 (Advanced Field Education I).

(MSW 483 or MSW 484) and (MSW 493 or MSW 494) are prerequisites for this course.

MSW 582
COMMUNITY PRACTICE II
Graduate
Using select theoretical approaches, this course equips students with the advanced skills and knowledge needed to practice in community-serving agencies and organizations. The emphasis in this course, which represents the second of three consecutive, required (advanced) practice courses, is on program planning. This course introduces students to the skills and knowledge needed to plan and design programs in community-based, people-serving organizations, starting with problem analysis and needs assessment. Related topics such as understanding the multiple dimensions of social problems, operationalizing concerns, and the importance of collaboration and addressing diverse groups, needs within a community practice framework are also addressed. Measures for accountability and effectiveness, especially for professional social workers, are also addressed. Attention is also given to the needs of historically-marginalized groups and planning for full social and economic justice. It is required that this course be taken concurrently with MSW 592 (Advanced Field Education II).

MSW 581 is a prerequisite for this class

DePaul University
Winter/Spring 2013
Page 1818 of 2244
MSW 583
COMMUNITY PRACTICE III
Graduate
Using select theoretical approaches, this course equips students with the advanced skills and knowledge needed to practice in community-serving agencies and organizations. The emphasis in this course, which represents the final of three consecutive, required (advanced) practice courses is on resource development and marketing. This course continues facilitation in planning and designing programs in community-based or community-serving organizations while also providing students with opportunities to integrate fund development, program evaluation, and effective stewardship of resources to leverage lasting social change, especially on behalf of historically-oppressed communities. Additional related topics include analysis of organizational change, partnerships, strategic planning, and quality assurance. It is required that this course be taken concurrently with MSW 593 (Advanced Field Education III).

MSW 582 is a prerequisite for this course.

MSW 591
ADVANCED FIELD EDUCATION I
Graduate
This three-part course is the final, advanced field education sequence which requires concurrent enrollment in MSW 581 (and 582, 583 in subsequent academic quarters). This course also requires enrollment in an approved field agency placement for the entire academic year, where students are required to complete a minimum of 180 contact hours at the agency during the autumn quarter. Students should keep in mind that they must complete 580 hours during the academic year. This course is designed to assist students in processing the many theoretical, analytical, and practice skills needed to practice advanced social work in community settings. Attention is also paid to the unique considerations of women and representatives of other historically-marginalized groups in organizational leadership roles through required learning objectives and tasks.

MSW 581 and MSW 591 are a prerequisite and MSW 582 is a co-requisite for this class.

MSW 592
ADVANCED FIELD EDUCATION II
Graduate
This course is the second in the final, three-part, advanced field education sequence, and requires concurrent enrollment in MSW 582 as well as successful completion of MSW 581 and MSW 591. This course also requires enrollment in an approved field agency placement for the entire academic year where students are required to complete a minimum of 580 hours over the academic year. Typically, students in MSW 592 are expected to complete a minimum of 190 contact hours at the agency during the Winter Quarter. This course is designed to assist students in processing the many theoretical, analytical, and practice skills needed to practice advanced social work in community settings. Attention is also paid to the unique considerations of women and representatives of other historically-marginalized groups in organizational leadership roles through required learning objectives and tasks.

MSW 582 and MSW 592 are a prerequisite for this class.

MSW 593
ADVANCED FIELD EDUCATION III
Graduate
This course is the third in the final, three-part, advanced field education sequence and requires concurrent enrollment in MSW 583 (and successful completion of MSW 582 and MSW 592). This course also requires enrollment in an approved field agency placement for the entire academic year, where students are required to complete a minimum of 580 contact hours at the agency during the academic year. This course is designed to assist students in processing the many theoretical, analytical, and practice skills needed to practice advanced social work in community settings. Attention is also paid to the unique considerations of women and representatives of other historically-marginalized groups in organizational leadership roles through required learning objectives and tasks.

MSW 582 and MSW 592 are a prerequisite for this class.

MUS 100
UNDERSTANDING MUSIC
Undergraduate
(4 credits) Developing an understanding of musical elements and forms, and how composers use them to create music throughout the history of western music. This course also includes a look at the musics of the world and jazz. This course is not available to students in the School of Music. Arts and Literature.

MUS 102
COMPOSITION AND SOUND ART FOR NON-MUSIC MAJORS
Undergraduate
Students in this course develop their own creative music projects. Activities include performing, recording, and emulating styles of all kinds in new compositions. Instrumental, vocal, and computer music ability can be fostered in this course. No previous experience necessary. This course is not available to students in the School of Music. Arts and Literature.
MUS 104
MUSICAL EVOLUTION AND INNOVATION: RENAISSANCE TO 20TH CENTURY
Undergraduate
Musical Evolution and Innovation from the Renaissance to the 20th Century. An examination of how musical compositions from 1600 to our own time have been influenced by physical and technical limitations of instruments, tuning, and related matters. This course is not available to students in the School of Music. Arts and Literature.

MUS 105
ROCK MUSIC-THE BEATLES: MUSIC, AESTHETICS AND CULTURE
Undergraduate
This course is a survey of the music and movies of the Beatles. Topics covered in this class include the basic elements of music to allow students to analyze and compose simple songs. No previous knowledge of music is necessary. This course is not available to students in the School of Music. Arts and Literature.

MUS 106
THE ART OF ELECTRONIC MUSIC
Undergraduate
An examination of the art and techniques of electronic music and the influence electronics have had on contemporary music from Varese to rap. This course will examine the literature and cultural implications of electronic music as well as contemporary music techniques such as analog and digital recording, synthesis, sequencing and sampling. This course is not available to students in the School of Music. Arts and Literature.

MUS 107
HITCHHIKER'S GUIDE TO MUSIC THEORY
Undergraduate
(4 credits) The fundamentals of notation and elemental theory for non-music majors. Online drills and short composition studies will be included as course activities. Arts and Literature.

MUS 108
ROCK MUSIC OF THE WORLD
Undergraduate
A historical survey of the world's main styles of rock music, extending from Chuck Berry to Puff Daddy to Cold Play, from Bob Marley to Black Sabbath. This course is not available to students in the School of Music. Arts and Literature.

MUS 109
FROM WAGNER TO YOUTUBE: THE WEDDING OF MUSIC AND DRAMA
Undergraduate
Examines the use of music to reinforce drama and visual image in opera, film and rock video. This course is not available to students in the School of Music. Arts and Literature.

MUS 110
MUSICIANSHIP I
Undergraduate
(4 credits) (Autumn) Theory fundamentals - from keys, scales, and intervals, through four-part writing

Status as a Music student is a prerequisite for this class.

MUS 111
AURAL TRAINING I
Undergraduate
(1 credit) A three-quarter sequence of sight-singing and dictation. Each quarter is a prerequisite for the next.

Status as a Music student is a prerequisite for this class.
MUS 113
GROUP PIANO I
Undergraduate
(1 credit) The first three courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters.

Status as a Music student is a prerequisite for this class.

MUS 120
MUSICIANSHIP II
Undergraduate
(4 credits) (Winter) Integrated study of theory/history pertaining to music of the Baroque period.

MUS 110 is a prerequisite for this class.

MUS 121
AURAL TRAINING II
Undergraduate
(1 credit) A three-quarter sequence of sight-singing and dictation. Each quarter is a pre-requisite for the next.

MUS 111 is a prerequisite for this class.

MUS 123
GROUP PIANO II
Undergraduate
(1 credit) The second of three courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters.

MUS 113 is a prerequisite for this class.

MUS 130
MUSICIANSHIP III
Undergraduate
(4 credits) (Spring) An integrated study of theory/history pertaining to music of the Classical period

MUS 120 is a prerequisite for this class.

MUS 131
AURAL TRAINING III
Undergraduate
(1 credit) A three-quarter sequence of sight-singing and dictation. Each quarter is a pre-requisite for the next.

MUS 121 is a prerequisite for this class.

MUS 133
GROUP PIANO III
Undergraduate
(1 credit) The third of three courses in a two year (six-quarter) sequence of two one-hour classes per week using electronic piano labs. Curriculum is organized on the basis of six levels of functional keyboard competence, coordinated with the two-year Musicianship Studies experience described above. Emphasis is on sight-reading, harmonization, theory, score-reading, accompanying and ensemble playing. Note: Students with extensive previous keyboard experience may complete the competence requirements in fewer than six quarters.

MUS 123 is a prerequisite for this class.
MUS 140  
MUSIC OF THE WORLD’S PEOPLE  
Undergraduate  
(4 credits) A survey of music roles and practices in a variety of countries and continents. This course is not available to students in the School of Music. Arts and Literature.

MUS 200  
MUSIC OF THE UNITED STATES TO 1900  
Undergraduate  
(4 credits) This course discusses two types of subject matter: the traditions of art music or "classical" American music from the Colonial era through the latter Nineteenth Century; and the important vernacular or popular tradition of music which emerged between 1830-40 and continued up through about 1900. Music student may only use this course to fulfill free electives. Arts and Literature.

MUS 201  
MUSIC OF THE UNITED STATES SINCE 1900  
Undergraduate  
(4 credits) This course discusses two types of subject matter: the traditions of art music or "classical" American music in the twentieth and twenty-first Centuries. Additionally, important vernacular or popular traditions since 1900 will be studied. This includes idioms such as: jazz blues, Broadway musicals, the standard popular song, motion picture music, commercial music, rock and roll, and various other types of popular music. Music student may only use this course to fulfill free electives. Arts and Literature.

MUS 202  
WOMEN AND MUSIC  
Undergraduate  
(4 credits) A survey exploring the roles of women musicians in their societies. This course may only be used as a free elective for students in the School of Music. Arts and Literature.

MUS 203  
CONTEMPORARY MUSICAL IMPROVISATION: SCRATCH ORCHESTRA  
Undergraduate  
(4 credits) This course will focus on improvisational practices with a focus on experimental composers between 1959 - 1980. Students will form a large ensemble. Class activity will focus on hands-on music making with a combination of laptops and acoustic instruments.

MUS 204  
WHAT WERE THE BLUES? 1920-1960  
Undergraduate  
(4 credits) This course will follow the history of the blues from its first recordings in the early 1920s through the "rediscovery" of classic blues artists in the late 50s, with an emphasis on listening to and discussing a rich legacy of classic blues recordings.

MUS 205  
THAT HIGH LONESOME SOUND: BLUEGRASS 1936-1972  
Undergraduate  
A study of the social, cultural, and technological contexts of classical bluegrass, recordings made between 1936 and 1972.

MUS 206  
ITALIAN POPULAR SONGS IN CONTEXT: THEN AND NOW  
Undergraduate  
Students will study Italian popular songs throughout the last eight centuries, emphasizing their use to mirror, reflect, and influence socio-cultural norms of the time and place of their creation.
MUS 208
COMMUNITY AUDIO ART PRODUCTION
Undergraduate
This Experiential Learning course involves collaborative art production, electro-acoustic and computer music, experimental sound techniques, radio art, political music, socially engaged audio documentary, soundscape design, field recordings, sound installation, conceptual art, public service announcements, and interdisciplinary art. In addition to a historical survey of works in this genre, students will complete one group project and one solo project. This course may only be used as a free elective for students in the School of Music. Junior Year Experiential Learning.

MUS 210
MUSICIANSHIP IV
Undergraduate
(4 credits) (Autumn) An integrated study of theory/history pertaining to music of the 19th century.

MUS 130 is a prerequisite for this class.

MUS 211
AURAL TRAINING IV
Undergraduate
(1 credit) A three-quarter sequence of sightsinging and dictation.

MUS 131 is a prerequisite for this class.

MUS 213
GROUP PIANO IV
Undergraduate
(1 credit) The last three courses in the two-year sequence described above.

MUS 133 is a prerequisite for this course.

MUS 220
MUSICIANSHIP V
Undergraduate
(4 credits) (Winter) An integrated study of theory/history pertaining to music of the 20th and 21st centuries.

MUS 210 is a prerequisite for this class.

MUS 221
AURAL TRAINING V
Undergraduate
(1 credit) A three-quarter sequence of sightsinging and dictation.

MUS 211 is a prerequisite for this course.

MUS 223
GROUP PIANO V
Undergraduate
(1 credit) The last three courses in the two-year sequence described above.

MUS 213 is a prerequisite for this course.

MUS 230
MUSICIANSHIP VI
Undergraduate
(4 credit) (Spring) History of music of the Middle Ages and the Renaissance.

MUS 220 is a prerequisite for this class.
MUS 231
AURAL TRAINING VI
Undergraduate
(1 credit) A three-quarter sequence of sightsinging and dictation.
MUS 221 is a prerequisite for this course.

MUS 233
GROUP PIANO VI
Undergraduate
(1 credit) The last three courses in the two-year sequence described above.
MUS 223 is a prerequisite for this class.

MUS 265
MUSICAL TRADITIONS OF AMERICA AND THE WORLD
Undergraduate
(2 credits) An introduction to the musical styles of world cultures and jazz. Required of all music majors.
Status as a Music student is a prerequisite for this class.

MUS 272
TRENDS IN 20TH CENTURY ART AND MUSIC
Undergraduate
(4 credits) Appreciative approach to the styles of selected 20th-century artists and composers. School of Music students may take this course only as a free elective. Arts and Literature.

MUS 274
THE GOSPEL MUSIC TRADITION IN AMERICA
Undergraduate
(4 credits) The origins, people, context, spirit and music. This course may only be used as a free elective for students in the School of Music. Arts and Literature.

MUS 275
HISTORY OF THE SYMPHONY
Undergraduate
(4 credits) An examination of the development, literature and spirit of one of Man's great artistic traditions. This course may only be used as a free elective for students in the School of Music. Arts and Literature.

MUS 278
JAZZ
Undergraduate
(4 credits) A comprehensive study of the origins and developments of jazz, specifically concentrated on important jazz styles and performers since 1917. This course may only be used as a free elective for students in the School of Music. Arts and Literature.

MUS 279
MUSIC HISTORY I: CHANT TO BACH
Undergraduate
This course is designed for transfer music majors who have already completed a year of music theory but have not taken music history. This class involves extensive listening, examination of musical scores, and reading assignments each week.
Status as an Undergraduate Music student is a prerequisite for this class.
MUS 303
BASIC CONDUCTING PRACTICUM
Undergraduate
(Zero credit) Individual practice in conducting technique and rehearsal technique. This course must be taken concurrently with Basic Conducting (MUS 304).

MUS 230 and MUS 231 are a prerequisite for this class.

MUS 304
BASIC CONDUCTING
Undergraduate
(4 credits) Basic Conducting technique, score reading, and rehearsal technique. Application of analytical techniques to scores in preparation and rehearsal. COREQUISITE: Basic Conducting Practicum (MUS 303).

MUS 230 and MUS 231 are a prerequisite for this class.

MUS 305
MUSICAL ENCOUNTERS OF THE PORTUGUESE EMPIRE
Undergraduate
(4 credits) This course explores the role that music played in encounters between Europeans traveling on behalf of the Portuguese Empire and the cultures colonized by the Portuguese beginning in fifteenth century and continuing today in post-colonial contexts. This course will also examine the musical genres that developed as a result of cross-cultural contact. Musical case studies are selected from different historical periods and diverse cultures and geographical areas encompassed by the Portuguese Empire: Portugal, Asia, Africa, and South America. This class will include listening and reading assignments, and students will have the opportunity to further explore an area of interest in a research project on a topic of their choice. Arts and Literature.

MUS 306
PUNK ROCK THROUGH THE YEARS: ISSUES & AESTHETICS
Undergraduate
(4 credits) This course explores the aesthetic, political, and social issues that have shaped the development of punk rock and its various sub-genres in the United States and the United Kingdom since the early 1970's.

Status as a Music student is a prerequisite for this class.

MUS 308
ANALYTICAL TECHNIQUES
Undergraduate
(4 credits) Investigation of various analytical approaches to music syntax, structure, style and texture (including timbral and vocal or instrumental configurations) as exhibited in representative compositions from many historical periods.

MUS 230 is prerequisite for this class.

MUS 360
TOPICS IN MUSICIANSHIP
Undergraduate
(2-4 credits) In depth investigation of a topic in musicianship studies.

Status as a Music student is a prerequisite for this class.

MUS 378
MEDIEVAL AND RENAISSANCE MUSIC
Undergraduate
(2 credits) This course is concerned with the history and development of musical styles and procedures during the Medieval and Renaissance periods, with reference to significant compositions, musical examples, and recordings.

Status as a Music student is a prerequisite for this class.
MUS 379  
BAROQUE MUSIC  
Undergraduate  
(2 hours) This course is concerned with the history and development of musical styles and procedures during the Baroque period, with reference to significant compositions, musical examples, and recordings.

Status as a Music student is a prerequisite for this class.

MUS 381  
HISTORY OF OPERA  
Undergraduate  
(2 credits) A history of opera from the 17th century to the present. Emphasis on the development of musical style with particular reference to significant operas, musical examples, and recordings.

Status as a Music student is a prerequisite for this class.

MUS 383  
HISTORY OF THE OPERA II  
Undergraduate  
History of Opera II. (2 hrs.) A history of opera during the 19th and 20th centuries; emphasis on the development of musical style with particular reference to significant operas, musical examples, and recordings.

MUS 381 is a prerequisite for this class.

MUS 384  
CLASSIC MUSIC  
Undergraduate  
(2 credits) This course is concerned with the history and development of musical styles and procedures during the Classical period, with reference to significant compositions, musical examples, and recordings.

Status as a Music student is a prerequisite for this class.

MUS 385  
ROMANTIC MUSIC  
Undergraduate  
(2 credits) This course is concerned with the history and development of musical styles and procedures during the Romantic period, with reference to significant compositions, musical examples, and recordings.

Status as a Music student is a prerequisite for this class.

MUS 386  
MUSIC SINCE WORLD WAR II  
Undergraduate  
(2 credits) This course is concerned with the history and development of musical styles and procedures during post World War II period, with reference to significant compositions, musical examples, and recordings.

Status as a Music student is a prerequisite for this class.

MUS 387  
EARLY 20TH CENTURY MUSIC  
Undergraduate  
(2 credits) This course is concerned with the history and development of musical styles and procedures during the early 20th Century, with reference to significant compositions, musical examples, and recordings.

Status as a Music student is a prerequisite for this class.
MUS 395
SENIOR CAPSTONE SEMINAR
Undergraduate
(4 credits) This course is designed to fulfill the senior capstone experience for School of Music Bachelors of Arts students only. Students will develop a final project, culminating their musical studies in relationship to their liberal arts studies. The individual projects should reflect an advanced level of musical understanding, scholarship, and writing. The School of Music faculty member will meet with the students in a biweekly seminar throughout the quarter, and on an individual basis as needed.

A petition to major is a prerequisite for this class.

MUS 398
INDEPENDENT STUDY
Undergraduate
A petition to major is a prerequisite for this class.

MUS 400
MUSIC RESEARCH I
Graduate
Introduction to research types and techniques; bibliography and bibliographical sources; elementary statistics; the development of writing skills; analysis of research examples.

Status as a Graduate Music student is a prerequisite for this class.

MUS 408
ANALYTICAL TECHNIQUES
Graduate
(4 credits) Investigation of various analytical approaches to music syntax, structure, style and texture (including timbral and vocal or instrumental configurations) as exhibited in representative compositions from many historical periods.

Status as a Graduate Music student is a prerequisite for this class.

MUS 420
HISTORY OF THE ORATORIO
Graduate
An analytical and historical study of oratorio literature from 1600 to the present.

Status as a Graduate Music student is a prerequisite for this class.

MUS 435
18th & 19th WIND HISTORY AND LITERATURE
Graduate
(4 credits) There is a consistent historical connection between wind music of the ancient and medieval periods, and the music of today. This course will trace that historical line, focusing on the 18th & 19th Centuries. The development of repertoire as well as the functions and uses of wind music will be explored. It is the intention of this class to address the needs of people who will perform, conduct, or teach “classical” wind music as part of a career. Emphasis will be placed on original music suitable for professional concert performance.

Status as a Graduate Music student is a prerequisite for this class.

MUS 436
20th CENTURY WIND HISTORY AND LITERATURE
Graduate
(4 credits) There is a consistent historical connection between the wind music of the ancient periods and the music of today. This course will briefly trace that connection and then focus on the development and function of wind music in the 20th century. It is the intention of this class to address the needs of people who seek to perform, conduct, or teach wind music as part of their career.
MUS 460
TOPICS IN MUSICIANSHIP
Graduate
(2-4 credits) In depth investigation of a topic in musicianship studies.
Status as a Graduate Music student is a prerequisite for this class.

MUS 475
MEDIEVAL MUSIC
Graduate
Historical survey of music from the Middle Ages: sacred and secular music as artistic, theoretical, and intellectual expression of the Middle Ages; history of musical styles to 1420; performance practice issues
Status as a Graduate Music student is a prerequisite for this class.

MUS 478
RENAISSANCE MUSIC
Graduate
Historical survey of music from the Renaissance. Musical style, compositional procedures, and performance practice are studied, within the social, political and economic environment in which the composers worked.
Status as a Graduate Music student is a prerequisite for this class.

MUS 479
BAROQUE MUSIC
Graduate
Historical survey of Baroque music and performance practice. Representative examples of both vocal and instrumental music are studied, mostly using the analytical techniques of the period, with the aim of becoming familiar with the most significant manners of composition of Baroque composers.
Status as a Graduate Music student is a prerequisite for this class.

MUS 481
HISTORY OF OPERA
Graduate
The course surveys the history of opera in western culture from its beginnings in the 17th century through the 20th century. The class materials cover stylistic trends and genres as demonstrated through seminal works. Each class period will contain a relevant analytical study.
Status as a Graduate Music student is a prerequisite for this class.

MUS 482
WORLD MUSIC CULTURES
Graduate
This graduate course will provide a global musical perspective and widen the lens through which students experience music. Through lectures, listening, guest performances, and engaging discussion students will gain rich insights into new worlds of music.
Status as a Graduate Music student is a prerequisite for this class.

MUS 484
CLASSICAL MUSIC
Graduate
Traces the development of musical style during the Classical Era through the analytical study of examples in the main musical forms such as sonata form. Reception and performance practice then and now will be addressed.
Status as a Graduate Music student is a prerequisite for this class.
MUS 485
ROMANTIC MUSIC
Graduate
Survey of nineteenth century music through a close analysis of representative Romantic works. The course will cover the expansion of both harmonic language and form leading to their eventual breakdown and reinterpretation.

Status as a Graduate Music student is a prerequisite for this class.

MUS 486
MUSIC SINCE WORLD WAR II
Graduate
This course surveys Western art music and related theoretical and technical issues from near the end of World War II to the present focusing on the development of new musical languages, new instruments and new methods of analysis.

Status as a Graduate Music student is a prerequisite for this class.

MUS 487
20TH CENTURY MUSIC BEFORE WWII
Graduate
This course surveys Western art music and related theoretical and technical issues from near the end of the 19th century to World War II, focusing on the new musical languages and aesthetics developed from 1890 until 1940.

Status as a Graduate Music student is a prerequisite for this class.

MUS 498
INDEPENDENT STUDY
Graduate
Status as a Graduate Music student is a prerequisite for this class.

MUS 500
CANDIDACY CONTINUATION
Graduate
A course for continuing graduate students who have not completed research, course requirements, or comprehensive examinations, but wish to retain their student status. "Candidacy Continuation" will enable students to use the University facilities during the quarter they register. The registration will be for 0 credit, although a $40 fee will be charged per quarter.

Status as a Graduate Music student is a prerequisite for this class.

MWR 497
WRITING THE LITERATURE OF FACT
Graduate
MWR 498

MWR 499
THESIS RESEARCH
Graduate
Thesis Research

MWR 500
INDEPENDENT STUDY
Graduate
Independent Study

MWR 501
NMS 501
PROSEMINAR IN NEW MEDIA STUDIES
Graduate
Introduces the field of New Media Studies and the faculty who teach in it. Each week a different NMS faculty member will present his or her research and relate that topic to the wider field of NMS. Encourages students to clarify their course of study and build alliances with faculty and students with similar interests.

NMS 502
NEW MEDIA, OLD MEDIA
Graduate
New Media, Old Media offers a critical examination of the rise of the information age and its impact on old media. This course will situate the NMS program in the historical/critical development of mass media and its relationship to power and meaning-making.

NMS 504
TEXT AND IMAGE
Graduate
In this course we will explore the increasingly important dynamic between textual information and visual information. In this course we will read about how hypertext has changed the environment and nature of the written word, and we will examine how the Web has “remediated" previous media into a new dynamic. We will use this knowledge to perform analyses of visual and textual artifacts; students may also create their own artifacts.

NMS 505
WORKSHOP/PORTFOLIO SEMINAR
Graduate
Students will have a choice between a collaborative workshop or a more individually-centered portfolio development seminar. Each group prepares a digital media project for an existing community group, such as a social service organization. Those students preferring to work independently will, under the guidance of the advising professor, develop and defend a complete portfolio of their work within the NMS program. May be repeated for elective credit.

NMS 506
INTERNSHIP
Graduate
In consultation with the director of NMS, students design a field experience under the direction of a project director in the field. The field experience may be derived from issues raised in courses, from thesis research, or from personal research interests.

NMS 507
INDEPENDENT STUDY
Graduate
In consultation with the director, advanced students may devise, with the approval of an NMS faculty member, an independent course of study that is related to the field yet does not duplicate a core or elective course already available.

NMS 508
DESIGN RHETORICS
Graduate
This course provides students with a theoretical foundation and practical skills in the design of rhetorically sophisticated new media objects. We will learn basic principles of visual composition, both by examining existing compositions and building our own. We will also seek to understand the way visual literacies and culture shape the rhetorical choices we make as designers and managers of new media projects.
NMS 509  
SPECIAL TOPICS IN NEW MEDIA STUDIES  
Graduate
See schedule for current offerings.

NMS 520  
WEB DESIGN I  
Graduate
An introduction to the process of making functional sites for display on the Internet. Students will learn HTML-based development software, and work with imaging software to apply fundamental theories of new media design to the production of working computer-screen applications.

NMS 521  
WEB DESIGN II  
Graduate
An introduction to digital authoring software, such as Macromedia Flash, that allows for the combination of animation, sound, and complex user interaction. Students will design and produce working animations while exploring the balance between purpose, usability, and aesthetic appeal.

NMS 530  
HTML/ CSS  
Graduate
An introduction to fundamental web development and design languages. Students will learn HTML syntax, naming practices, and techniques for developing and structuring web pages and sites. Students will also learn how to style HTML pages with Cascading Style Sheets (CSS). While most instruction will proceed through XHTML, students will also have an opportunity to explore HTML5 and CSS3.

NMS 540  
DIGITAL ARCHIVES  
Graduate
This course provides students with an overview of issues related to digital archives, and hands-on experience with contemporary archiving practices. Students in NMS 540 will explore digital archiving through theoretical readings and case studies, and create or maintain digital archives for local organizations.

NMS 597  
CANDIDACY CONTINUATION  
Graduate
Masters candidates who are not enrolled in a course during a given quarter but who want to maintain active university status should register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit, $40.00 per quarter.

NSG 200  
HEALTH AND NUTRITION  
Undergraduate
This course provides an introduction to the complex interactions between nutrition, exercise, genetics, cultural factors, physiological and psychological stressors and health. Each class provides an overview on the various nutritional factors which influence the health of individuals. A population based approach is used to address the issue of world hunger and undernutrition. Multiple perspectives relating to nutrition are included such as cultural, religious, family and alternative nutritional lifestyles.

NSG 210  
PARENTING IN MULTICULTURAL FAMILY SYSTEMS  
Undergraduate
Families exist in complex systems of home, community and environment. Each family depends on their cultural history, previous experiences and social supports to assist with parenting. Today over 70% of families have two working parents. In the case of single parenting or blended families stressors are great. This course will examine the effect of culture and family traditions on parenting practices in the United States. Multiple family theories will be introduced and discussed. The primary focus is identification of child and family risk factors and strengths. Identifying positive parenting behaviors will enhance the well being, self esteem and health of the family.
**NSG 230**  
**WOMEN'S HEALTH: THE PHYSICAL SELF**  
*Undergraduate*  
This course explores the biological dimensions of women's health. The theoretical bases for evaluating medical research, assessing personal health, and decision-making consumerism from a feminist perspective are emphasized. An advanced-level scientific research paper due at the end of the quarter. Laboratory fee required. **PREREQUISITE(S):** ENG 104 or HON 100 or HON 101.

WRD 103 or HON 101 or HON 100 or ENG 120 is a prerequisite for this class.

**NSG 232**  
**MEN'S HEALTH: THE PHYSICAL SELF**  
*Undergraduate*  
This introductory course explores the unitary nature of men's health patterns focusing on anatomy and physiology of the major body systems emphasizing the differences in males. Health issues pertinent to these system differences in males will be presented based upon health risks, assessment, screening, diagnosis, management, and treatment. Developing an understanding of male anatomy and physiology utilizing correct medical terminology to describe various parts and conditions. Elements of scientific research are explored in the context of lecture and laboratory sessions. Students select a research-based topic supported by clinical research studies to articulate their knowledge and understanding through a written paper and oral presentation.

**NSG 260**  
**STATISTICS FOR THE HEALTH SCIENCES**  
*Undergraduate*  
This course introduces the health science student to theory and application of probability, risk, descriptive and inferential statistics. Computer laboratory experience focuses on using data sets in clinical trials, epidemiology, and critical pathway development.

**NSG 261**  
**INTRODUCTION TO FINANCE/ ACCOUNTING IN HEALTH CARE**  
*Undergraduate*  
This course introduces students to basic principles, concepts, and techniques in cost accounting, reimbursement, budgeting, and financial management in health care for the practicing health professional.

**NSG 301**  
**INTRODUCTION TO THE ART AND SCIENCE OF NURSING I**  
*Undergraduate*  
This course provides a foundation for integrating the art and science of nursing into a meaningful holistic practice. In lecture, emphasis is placed on the introduction of theoretical content and current issues that are basic to holistic practice and to the role of the nurse as a clinical leader. Laboratory time, mandatory practice sessions and clinical hours provide rigorous settings in which nursing skills will be learned, practiced, and refined. All students will participate in a service-learning experience in a community setting which serves to broaden perspectives, encourage skills practice and integrate course content.

**NSG 302**  
**INTRODUCTION TO THE ART & SCIENCE OF NURSING II**  
*Undergraduate*  
The science of unitary human beings and selected nursing theories are examined further as the basis for holistic nursing practice. The roles of the nurse as health facilitator and provider of care are emphasized. Concepts of diversity, rhythmicity, motion, values, and health visioning are the focus of classroom and laboratory experiences related to health promotion and healing of individuals and families experiencing acute patterns of illness.

**NSG 303**  
**INTRODUCTION TO THE ART & SCIENCE OF NURSING III**  
*Undergraduate*  
The science of unitary human beings and selected nursing theories are examined further as the basis for holistic nursing practice. The roles of the nurse as patient teacher and mental health counselor are emphasized. Principles of health promotion and disease prevention are the focus of classroom and laboratory experiences related to the care of individuals and families experiencing chronic patterns of illness. **PREREQUISITE(S):** NSG 302.
NSG 304
CONCEPTS OF HUMAN ADAPTATION II
Undergraduate
Concepts Of Human Adaptation II  CO-REQUISITE(S): NSG 305/306

NSG 307
ART AND SCIENCE OF NURSING IV: PSYCHIATRIC MENTAL HEALTH
Undergraduate
This course examines the etiology, symptomatology, and clinical management of selected mental illnesses across the lifespan. The art and science of nursing and selected nursing and non-nursing theories are examined further as the basis for critical thinking, compassionate communication, and therapeutic nursing interventions in mental health nursing practice. The evidence base for psychiatric nursing will be examined and applied to practicum experiences. Various psychiatric nursing roles will be explored in the contexts of health promotion, disease management and rehabilitation. Course meets for 3 hours lecture and 8 hours clinical. PREREQUISITE(S): NSG 303.

NSG 313
TRENDS AND ISSUES IN NURSING
Undergraduate
History, theory, and practice of professional nursing with specific attention to the advanced generalist?s role in leadership and management. Skills in clinical leadership, budget and quality management, supervision, and change are introduced. Refinement of skills in critical thinking, decision-making, communication, and conflict resolution are emphasized.

NSG 322
BASIC PATHOPHYSIOLOGY AND PHARMACOLOGY
Undergraduate
The integration of principles from biology, chemistry, psychology, and sociology provide the framework for an examination of life processes in the human macro and microenvironment as rhythmic, diverse, negentropic and continuous. The nursing role in facilitating safe, effective pharmacotherapy is emphasized.

NSG 330
FOUNDATIONS OF PROFESSIONAL NURSING PRACTICE
Undergraduate
This course introduces the registered nurse student to the philosophy and mission of the Department of Nursing. Major areas of emphasis include evolution of nursing as a scientific professional discipline, the role of the professional nurse as client advocate, change agent and teacher, the role of power and politics as sources of empowerment, and the legal and ethical parameters in the scope of nursing practice.

NSG 332
PHYSICAL AND PSYCHOSOCIAL ASSESSMENT STRATEGIES
Undergraduate
This course is designed to prepare the student to perform comprehensive physical assessments and mental status exams of the individual in the context of their family and community. (Laboratory fee required). PREREQUISITE(S): Completion of all CSH courses except for NSG 377 & 380 and ACT-PEP exams or equivalent.

NSG 335
LESBIAN HEALTH MATTERS
Undergraduate
This course explores the unitary processes and experiences of health and quality of life for lesbians in diverse communities and with a range of identification and orientation. The idea that homophobia exists and serves as a significant barrier to access and to maintenance of health for lesbians underpins the course. The course uses multiple forms of scientific literature, general literature, film, and art to study the personal, ecological, and socially constructed determinants of health and quality of life. Various feminist, nursing, queer, and post-colonial perspectives on contemporary scientific and social discourse will emphasize linking health and illness with economic, social/cultural, and political dimensions of society. Concepts of personal health patterning, risk reduction, and health promotion will be stressed.

NSG 340
INTRODUCTION TO THE RESEARCH PROCESS
Undergraduate
This course provides the student with basic knowledge of the research process to plan, implement, and evaluate therapeutic nursing interventions. Emphasis is on the development of skills necessary to read, interpret, and critique published research in nursing and to conduct systematic library research. PREREQUISITE(S): Basic statistics course
NSG 360
THE PROFESSIONAL NURSE AS TEACHER
Undergraduate
The changing nature of health care in the United States requires people to have and be able to use increasingly complex information. Teaching is one of the core talents of the professional nurse. This course provides an overview of specific content and strategies basic to the teaching/learning process in health promotion.

NSG 372
THE PROFESSIONAL NURSE AS CASE MANAGER
Undergraduate
This course focuses on professional role development and the fundamental components of the professional nurse role from provider to coordinator of care. The focus of nursing care delivery is case management, specifically the management of human and material resources necessary for meeting episodic health care needs of individuals and families. PREREQUISITE(S): Completion of LAS required courses and ACT-PEP exams

NSG 373
PRACTICUM: THE PROFESSIONAL NURSE AS CASE MANAGER
Undergraduate
This course provides for clinical application of case management theory. Experiential learning activities focus on implementing data-based clinical models for nursing practice in institutional and home health settings. The student's own work setting can be used as the basis for clinical activities. PREREQUISITE(S) or COREQUISITE(S): NSG 372

NSG 376
THE PROFESSIONAL NURSE AS COMMUNITY CASE MANAGER
Undergraduate
Emphasis is on the delivery of comprehensive, culturally appropriate services to meet the continuing health needs of individuals, families, groups and communities. Students will design population-specific interventions to reduce assessed risk, incidence, and prevalence of community health problems. The focus of nursing care delivery is case management, specifically the promotion of health across the continuum of care and the coordination of services for at-risk individuals and groups. PREREQUISITE(S): NSG 332 COREQUISITE(S): NSG 377

NSG 377
PRACTICUM: PROFESSIONAL NURSE AS COMMUNITY CASE MANAGER
Undergraduate
This course is taken concurrently with Nursing 376 and provides opportunities for developing the professional nurse role in community health care. Experiential learning activities focus on community assessment, health program planning and evaluation, and management of innovation at the community level. Health education and leadership development are emphasized in both public health and community-based settings involved in health care delivery for individuals, families, and communities. COREQUISITE(S): NSG 376

NSG 380
UNDERGRADUATE SYNTHESIS
Undergraduate
This course provides a capstone experience in professional nursing practice. Topics, readings, and course requirements are decided by the students in collaboration with the professor. Students will complete a project demonstrating integration of the liberal arts and sciences with the professional practice of nursing in contemporary society. Ordinarily this will take the form of a senior research project or thesis. A professional resume and final assessments also will be completed. PREREQUISITE(S): NSG 372 and NSG 373

NSG 399
INDEPENDENT STUDY
Undergraduate
INDEPENDENT STUDY Variable credit. PREREQUISITE(S): Department consent
NSG 400
THEORETICAL COMPONENTS OF NURSING
Graduate
In this seminar, participants examine the nature, function and development of selected concepts, models and theories for their relevance to advanced nursing practice and nursing research. The structure of theory is analyzed according to the relationship between its components and the type of theoretical statements used. A process for developing a conceptual framework for inquiry and data-based nursing practice is presented. PREREQUISITE(S): Graduate Standing.

NSG 401
NURSING RESEARCH I
Graduate
A seminar course emphasizing the concepts of the research process though presentation, discussion, and analysis of various research approaches, methodologies, designs, and instrumentation. Critique of published nursing research will enable the students to use concepts presented to evaluate current studies. PREREQUISITE(S): NSG 400 & 480 or equivalent.

NSG 402
NURSING RESEARCH II
Graduate
The development of a specific research proposal for the graduate synthesis project or thesis is developed. Emphasis is on protection of human subjects and methods for research utilization, evidenced-based evaluation of clinical practice, and theory-based nursing research. PREREQUISITE(S): NSG 401

NSG 422
APPLIED PATHOPHYSIOLOGY
Graduate
(Formerly NSG 525) A synthesis of organic & inorganic chemistry, molecular biology, and cellular physiology that serves as a foundation for advanced understanding of pathophysiology and pharmacology. PREREQUISITE(S): Organic and Inorganic Chemistry

NSG 424
PATHOPHYSIOLOGY FOR ADVANCED PRACTICE
Graduate
Survey of current advances on human physiology with emphasis on the cellular and microcellular basis of health and disease. Students will engage in intensive study of human anatomy and physiology and complex pathophysiologic processes. Current research findings are reviewed for implications for health promotion, health maintenance and health restoration. PREREQUISITE(S): NSG 422 or equivalent. May be taken concurrently with NSG 484

NSG 425
FISCAL MANAGEMENT IN HEALTH CARE
Graduate
Fiscal management and budgetary practices in health care institutions are explored. Budget preparation, cost-benefit, analysis, product costing, reimbursement, and analysis of financial status in organizations is emphasized.

NSG 426
PHARMACOLOGY II
Graduate
Continuation of NSG 322: Basic Pathophysiology and Pharmacology. PREREQUISITE(S): NSG 322.

NSG 430
POLITICAL AND LEGAL ISSUES IN HEALTH CARE
Graduate
Seminars will discuss social, economic, legislative and regulatory mechanisms that influence professional practice and health policy in the United States. Emphasis is on the legal definition of professional practice as well as major issues involved in designing, implementing and evaluating policy decisions including scope, dynamics, and conceptual and practical dilemmas.
NSG 431
HEALTH PROMOTION FOR FAMILIES AND COMMUNITIES
Graduate
Exames issues, frameworks, theories and techniques relevant to health promotion for individuals, families and communities. Health disparities and social & cultural factors impacting health and wellness are examined and methods for assessing and facilitating cultural competence of providers and institutions are studied. The nurse's role as advocate for health promotion in public policy is discussed.

NSG 432
THEORIES OF HEALTH BEHAVIORS ACROSS THE LIFESPAN
Graduate
Analyzes selected theories that predict decision-making in health care issues. Concepts and theories related to prevention and optimal health care as well as social, cultural and economic aspects of wellness and illness are explored.

NSG 433
NURSING AND BIOMEDICAL ETHICS IN HEALTH CARE
Graduate
Seminars and case studies are used to explore issues and frameworks for ethical practice and research in the health professions.

NSG 439
INTERNATIONAL COMPARATIVE HEALTH CARE SYSTEMS
Graduate
NSG 439 provides a comparison between the American and an international country's health care systems including their histories, economics, and methods for the delivery of care. Current challenges and controversies are described. Course is open to Department of Nursing students who have completed NSG 303 or equivalent and includes an experience in that country. Course replaces NSG 430: Political and Legal issues and the leadership/education elective.

NSG 440
MATERNAL HEALTH NURSING
Graduate
The art of childbearing nursing: a didactic and clinical course as presented and discussed in class and implemented in the clinical setting. Focus is on the role of the nurse in caring for healthy newborns, and childbearing women who may be experiencing actual or potential educational needs, illness manifestations, or injury patterns. A variety of clinical settings, both inpatient and outpatient for maternity care will be utilized. Course meets for 3 hours lecture and 8 hours clinical. PREREQUISITE(S): NSG 307; concurrent registration with NSG 441.

NSG 441
INFANT, CHILD AND ADOLESCENT NURSING
Graduate
The art of pediatric nursing: a didactic and clinical course as presented and discussed in class and implemented in the clinical setting. Focus is on the role of the nurse in caring for children ranging from newborns through adolescents. Levels of prevention, health promotion, health maintenance and health restoration will be discussed. Emphasis is placed on the physical, psychosocial, and developmental needs of infants, children and adolescents within the family as well as the alterations that occur during hospitalization. Major causes of morbidity and mortality will also be covered. The influence of health policy, cultural, economic, and ethical issues on the child and family are also addressed. Course meets for 3 hours lecture and 8 hours clinical. PREREQUISITE(S): NSG 307; concurrent registration with NSG 440.

NSG 442
COMMUNITY HEALTH NURSING
Graduate
The emphasis of this course is to provide a theoretical basis for nursing and public health sciences in the field of population health. Emphasis is placed on application of the principles of primary health care, strategies of health promotion, disease prevention and management across the life-span in home and community settings, and nursing practice of community-based families and population. Current trends and professional, legal/ethical, economic, cultural, and environmental issues are examined as they apply to community health nursing. Course meets for 3 hours lecture and 8 hours clinical. PREREQUISITE(S): NSG 440 and NSG 441.
NSG 443
CLINICAL IMMERSION AND INTERNSHIP
Graduate
This is the capstone clinical course in which students, preceptors, and faculty collaborate in application and synthesis of the core concepts of caring, collaboration, communication, cultural sensitivity, community and environment as they relate to the nursing care of clients with complex health care problems throughout the life span. The students will also demonstrate competency in clinical skills, critical thinking, problem solving, and time management. The purpose of the synthesis course is to facilitate the integration of current and prior curricular content so that the student can become an active and productive member of the health care team. PREREQUISITE(S): NSG 442 and NSG 472.

NSG 445
NURSING PROFESSIONALISM, ADVOCACY, AND LEADERSHIP
Graduate
This course discusses the concepts essential to the development of the professional identity and role of the nurse as a leader. Unique leadership contributions of professional nursing to healthcare in multiple settings will be discussed. The nurse?s interactions with nursing colleagues and other health care providers will be addressed with an emphasis on leadership, communication, delegation, conflict resolution, negotiation and team building. The course draws on current knowledge and theory of leadership and the profession of nursing. The course will focus on the role of the professional nurse in relation to lawful, ethical practice and in relation to current health care system needs and expectations. Nursing roles and specialty practices will be discussed with regard to the leadership provided by these nurse experts. The course will also emphasize the development of the collaborative skills and understanding necessary to lead within the complex healthcare system, including the ability to present her/himself as a professional with evidence of leadership abilities. Meets for 4 hours lecture and discussion. CO-REQUISITE(S): NSG 442 and NSG 472.

NSG 448
INDEPENDENT STUDY
Graduate
This course is reserved for individuals who wish to do focused study at the graduate level.

NSG 450
SELECTED TOPICS IN NURSING
Graduate
This course is reserved for special seminars organized from time to time to accommodate the needs of groups interested in specific topics.

NSG 451
INTRODUCTION TO NURSING ADMINISTRATION AND LEADERSHIP
Graduate
This course is an introduction to the nursing leadership concentration as well as an overview of current issues and theory of nursing administration for all advanced practice nurses. As an introduction to the nursing leadership concentration, this course places emphasis on developing master's level skills of critical reading, scholarly writing, analytical discussion, and shared leadership. May also be taken as a health sciences management elective. The expected outcome of the course is a nursing research question and literature review that will form the basis of the students work in their concentration and the final research project.

NSG 452
ORGANIZATIONAL AND FINANCIAL MANAGEMENT IN HEALTH CARE (CROSS-LISTED AS NSG 521)
Graduate
This course provides insight and reflection on the executive role in advanced practice and organizational administration. Concepts, models, and techniques used to manage systems in a variety of health care organizations or practices are analyzed. Organizational assessment, resource development, and product costing are emphasized. This course provides insight and reflection on the executive role in advanced practice and organizational administration. Concepts, models, and techniques used to manage systems in a variety of health care organizations or practices are analyzed. Organizational assessment, resource development, and product costing are emphasized.

NSG 453
CASE MANAGEMENT AND THE MANAGED CARE ENVIRONMENT
Graduate
In this course, students engage in analysis of concepts central to an in-depth understanding of the managed care environment and case management as a clinical care system. Emphasis is upon development of skill in organizational and population-based assessment and data analysis, clinical pathway development, and interdisciplinary collaboration. Students develop a data-base for a clinical project focusing on a client population from their work environment.
NSG 454
INNOVATIONS IN HEALTH CARE DELIVERY
Graduate
This course provides the instruction and clinical experience for the development of the advanced practice nurse role as case manager and administrator. Learning activities focus on implementing contemporary data-based nursing practice models in a variety of health care settings, and the diffusion of innovation at the individual, family and organizational levels. PREREQUISITE(S): NSG 453.

NSG 455
CURRICULUM DEVELOPMENT FOR HEALTH CARE SYSTEMS
Graduate
Theories, principles and approaches to curriculum development are explored. Basic elements of curricular design are examined in relation to traditional and evolving paradigms, reflecting development in social and professional dimensions of health care.

NSG 456
PRACTICUM IN NURSING ADMINISTRATION I
Graduate
Practicum In Nursing Administration I PREREQUISITE(S): NSG 451 and NSG 452

NSG 457
PRACTICUM IN NURSING ADMINISTRATION II
Graduate
Practicum In Nursing Administration II PREREQUISITE(S): NSG 451, 452 AND 456

NSG 458
TEACHING IN HEALTH CARE SYSTEMS
Graduate
This course prepares the registered nurse to apply theories, principles and strategies in education. Emphasis is on education as a vehicle for enhancing the health of populations and systems from an ecological perspective. PREREQUISITE(S): Department consent

NSG 459
PRACTICUM IN TEACHING IN HEALTH CARE SYSTEMS
Graduate
Practicum In Teaching In Health Care Systems (PREREQUISITE(S): NSG 455 and NSG 458

NSG 460
ADVANCED HEALTH ASSESSMENT ACROSS THE LIFESPAN
Graduate
Lecture focus on the synthesis of scientific knowledge in performing integrated, comprehensive assessments of individuals from infancy through maturity. Emphasis is placed on the child in the context of the family and community. Laboratory practice includes taking the health history and performing the physical examination to evaluate primary health care needs. PREREQUISITE(S): NSG 422 and 424 or concurrent. (Laboratory fee required)

NSG 461
ADVANCED PEDIATRIC ASSESSMENT
Graduate
Lectures focus on the synthesis of scientific knowledge in performing integrated, comprehensive assessments of children from infancy through early adolescence. Emphasis is placed on the child in the context of the family and community in health and illness. Laboratory practice included taking the health history and performing physical examinations to evaluate primary and clinical care needs. PREREQUISITE(S): NSG 422, NSG 424, NSG 460.
NSG 462
ADVANCED WOMEN'S HEALTH ASSESSMENT
Graduate
Lectures focus on the synthesis of scientific knowledge in performing integrated, comprehensive assessments of women from late adolescence through maturity. Emphasis is placed on the woman in the context of the family and community in health and illness. Laboratory practice includes taking the health history and performing the physical examination to evaluate primary and reproductive health care needs. PREREQUISITE(S): NSG 422, NSG 424, NSG 460.

NSG 464
ADVANCED HEALTH ASSESSMENT ACROSS THE LIFESPAN
Graduate
This course builds on the skills acquired in health assessment and will introduce the skills and knowledge needed to perform a history and physical examination on patients of all ages. Lecture will focus on the synthesis of scientific knowledge in performing integrated, comprehensive assessments of individuals from infancy through maturity. Emphasis is placed on the child in the context of the family and community. Laboratory practice includes taking the health history and performing the physical examination to evaluate primary health care needs. Adult Nurse Practitioner students will not participate in the assessment of the infant and child, but instead will participate in more in-depth assessment of the older adult. PREREQUISITE(S): NSG 422 and NSG 424.

NSG 422 and 424 are a prerequisite for this class.

NSG 472
CRITICAL CARE NURSING
Graduate
The art of nursing is practiced within the clinical environment with a focus on the roles of health care provider and coordinator in medical-surgical nursing. Analysis and application of current research in the epidemiology of health and disease is used as the basis for decision-making in performing the nursing assessment, contributing to interdisciplinary treatment planning, and facilitating health promotion and illness prevention. The integrated role of the professional nurse in providing holistic care is emphasized. Prerequisite(s): NSG 303, NSG 460.

NSG 473
PRIMARY CARE OF THE INFANT, CHILD, AND THE ADOLESCENT
Graduate
The course is designed to explore health promotion, health protection, and disease prevention dimensions in pediatric primary care. It will focus on many of the common issues related to clinical, developmental and behavioral needs of children and adolescents and their families. The dynamics of the pediatric client and nurse practitioner relationship will be analyzed, focusing on life transitions and the impact of health and illness on infants, children, and adolescents and their families. Clinical practice guidelines will be evaluated through epidemiological and research evidence of selected developmental and behavioral disorders, as well as acute and chronic health problems. Also, selected theory-based models relevant to primary care of children will be critiqued. COREQUISITE(S): NSG 484. PREREQUISITE(s): NSG 422, NSG 424, NSG 460, NSG 484.

NSG 474
PRIMARY CARE OF THE ADULT AND OLDER ADULT
Graduate
Lectures focus on synthesis and application of scientific knowledge for family advanced practice nursing in primary care. The emphasis of course content is on building advanced knowledge of chronic and complex health problems in the primary care management of adults. This course examines primary health care needs of adults across the life span, with a focus on health promotion and disease prevention. The integrated role of the advanced practice nurse in providing holistic care and collaborative practice is emphasized. PREREQUISITE(S): NSG 422, NSG 424, NSG 460 COREQUISITE(S): NSG 484.

NSG 475
CLINICAL MANAGEMENT OF PREGNANCY AND CHILDBIRTH
Graduate
This advanced practice course provides a comprehensive review of both complicated and high-risk obstetrical conditions. Course content builds upon the nurse practitioner student's knowledge of primary care for low-risk obstetrical patients. Clinical practice guidelines for the advanced practice nurse in a woman's health specialty practice or in a practice devoted largely to the care of women in the family is emphasized. PREREQUISITE(S): NSG 422, NSG 424, NSG 460, NSG 484.
NSG 476
CLINICAL MANAGEMENT OF PEDIATRIC HEALTH AND ILLNESS
Graduate
Lectures focus on synthesis and application of scientific knowledge for pediatric advanced practice nursing. The integrated role of the advanced practice nurse in providing holistic care and collaborative practice is emphasized. PREREQUISITE(s): NSG 422, NSG 424, NSG 460, NSG 461, NSG 484.

NSG 477
CLINICAL MANAGEMENT OF WOMEN’S HEALTH AND ILLNESS
Graduate
Lectures focus on synthesis and application of scientific knowledge for gynecologic advanced practice nursing. The integrated role of the advanced practice nurse in providing holistic care and collaborative practice is emphasized. PREREQUISITE(S): NSG 460 or 462.

NSG 478
CLINICAL MANAGEMENT OF ACUTE AND CHRONIC ILLNESSES IN PRIMARY CARE
Graduate
Lectures focus on synthesis and application of scientific knowledge for adult advanced practice nursing. The integrated role of the advanced practice nurse in providing holistic care and collaborative practice is emphasized. The dynamics of the adult client and nurse practitioner relationship will be analyzed, focusing on life transitions and the impact of health and illness on adults, families, and communities. Clinical practice guidelines will be evaluated through epidemiological and research evidenced of selected acute, emergent and chronic health problems. Prerequisite(s): NSG 422, NSG 424, NSG 460, NSG 484 or equivalent.

NSG 479
MANAGEMENT OF GERIATRIC SYNDROMES
Graduate
This course examines selected clinical issues and health problems of older adults, and provides a foundation in advanced gerontological nursing. Comprehensive geriatric assessment, changes in normal aging, geriatric syndromes, and functional status of older adults will be explored. Students will apply evidence-based practice to promote wellness, maximize function, and enhance self-care of older adults.

NSG 480
STATISTICAL METHODS FOR THE HEALTH SCIENCES
Graduate
This course is designed to assist students to understand, interpret, and apply statistical methods to address health science research questions. Beginning with a basic understanding of data and data integrity, level of measurement, and statistical concepts and assumptions, students will focus on describing variables using measures of central tendency and measures of dispersion, addressing research questions using appropriate parametric/non parametric, epidemiologic and multivariate statistical models. Students will also practice using statistical software to manage, graphically display, describe and analyze sample data. PREREQUISITE(S): Undergraduate statistics course.

NSG 481
BIOSTATISTICS AND EPIDEMIOLOGY
Graduate
The application of biostatistics/epidemiology to clinical practice and research is the intent of this seminar. Initial discussions will focus on understanding biostatistics and epidemiological statistics as applied to health and disease in diverse populations. From considering the relationship between measurement and biostatistics to understanding the importance of insuring data integrity throughout the research process, students will examine existing data sets (federal, voluntary agencies, professional/specialty organizations). Then the focus will be on understanding epidemiological statistics (rates, proportions, relative and absolute risk), descriptive statistics, measures of differences, measures of relationships/prediction, and multivariate statistical models as applied to health and disease. PREREQUISITE(S): Undergraduate Statistics.

NSG 482
INTRODUCTION TO EPIDEMIOLOGY
Graduate
An investigative problem-solving process is used to study the personal and ecological determinants of health and disease frequencies in diverse populations. Data are manipulated to plan, implement and evaluate health promotion and disease control programs for a variety of health care settings. Infectious and chronic disease prevention are emphasized. Students electing to take the course for four credit hours will complete a project using the epidemiologic method. Two credit hours. PREREQUISITE(S): Advanced Health Statistics.
NSG 483  
**PRACTICUM IN POPULATION BASED NURSING PRACTICE I**  
Graduate  
This is the first practicum in a sequence of supervised clinical experiences for nurse practitioner students. The focus of NSG 483 is on application of health assessment and examination skills in the clinical setting, identification of health risks, and learning how to manage common illnesses. Analysis and application of current research is used as the basis for decision-making in performing the health history and physical assessment, contributing to interdisciplinary treatment planning, and teaching for health promotion and illness prevention.

NSG 484  
**PHARMOCOLOGY FOR ADVANCED NURSING PRACTICE**  
Graduate  
Provides the advanced-practice nurse with the knowledge base necessary to manage pharmacological therapy for acute and chronically ill clients collaboratively with other members of the health care team. Direct and indirect responsibility for clinical decision-making regarding the administration, management and evaluation of drugs are emphasized. PREREQUISITE(S): Physiology for Advanced Nursing Practice or equivalent or concurrent registration, Organic and Inorganic Chemistry, and Microbiology.

NSG 485A  
**FAMILY AND COMMUNITY NURSING I OBSTETRICS**  
Graduate  
The art of family and community nursing: a didactic and clinical course as presented and discussed in class and implemented in the clinical setting. Focus is on the role of the nurse in caring for healthy newborns, and childbearing women who may be experiencing actual or potential educational needs, illness manifestations, or injury patterns. A variety of clinical settings, both inpatient and outpatient for maternity care will be utilized. Lecture, video demonstrations, human patient simulations, case studies, and active participation are included in the classroom. PREREQUISITE(S): NSG 472. CO-REQUISITE(S): NSG 485B.

NSG 485B  
**FAMILY AND COMMUNITY NURSING I PEDIATRICS**  
Graduate  
The art of family and community nursing: a didactic and clinical course as presented and discussed in class and implemented in the clinical setting. Focus is on the role of the nurse in caring for healthy newborns, children, and adolescents with a focus on normal growth and development, common acute illness and chronic illnesses in all ages of pediatric patients. The focus is on student learning that contextualizes who may be experiencing actual or potential educational needs, illness manifestations, or injury patterns. A variety of clinical settings, both inpatient and outpatient for pediatrics will be utilized. Lecture, video demonstrations, human patient simulations, case studies, and active participation are included in the classroom. PREREQUISITE(S): NSG 472. CO-REQUISITE(S): NSG 485A.

NSG 486  
**THE ART OF FAMILY & COMMUNITY NURSING II**  
Graduate  
The art of nursing is practiced with a focus on integrating the roles of health care provider, teacher, and case manager. Learning experiences focus on adults and families in a variety of settings including the home, hospital, and community. Emphasis is placed on the critical appraisal of individual and community health patterns and mental illness manifestations, and the development and testing of therapeutic nursing interventions in collaboration with other health professionals. PREREQUISITE(S): NSG 485 or NSG 485A and NSG 485B. Ten credit hours.

NSG 487  
**PRACTICUM IN POPULATION-BASED NURSING PRACTICE II**  
Graduate  
This is the second practicum in a sequence of supervised clinical experiences for nurse practitioner students in which students demonstrate increasing comprehensive practice of primary care in the context of specialty practice for selected populations. Nurse practitioner student readings, assignments, and clinical experiences in primary care: family, adult, pediatric, or women's health with an emphasis on health promotion and disease prevention. PREREQUISITE(S)(S): NSG 422, NSG 424, NSG 460, NSG 484, NSG 483, NSG 492. COREQUISITE(S): NSG 493.
NSG 488
PROFESSIONAL ISSUES & RESEARCH IN POPULATION-BASED ADVANCED PRACTICE NURSING
Graduate
This course introduces the graduate nursing students to a variety of advanced practice nursing roles and the competencies needed for successful practice in those roles. The students explore the conceptual, theoretical, and empirical bases of population based advanced practice nursing. Critical thinking skills are developed through the student's debate of current local, state, and national laws and analysis of coding case studies. Communication skills are fostered through the use of class discussions and development of various assignments. Scholarly written and verbal presentations enhance the student's understanding of historical, economical, political, legal, and ethical perspectives of advanced practice nursing.

NSG 489
PRACTICUM IN POPULATION-BASED NURSING PRACTICE II
Graduate
This is the second course in a sequence of supervised clinical experiences for nurse practitioner students in which students demonstrate increasing comprehensive practice of primary care in the context of specialty practice for selected populations. Nurse practitioner student readings, assignments, and clinical experiences in primary care: family, adult, pediatric, or women's health with an emphasis on health promotion and disease prevention. PREREQUISITE(S): NSG 460 or NSG 464, NSG 474, NSG 483, NSG 484.

NSG 490
PRACTICUM IN POPULATION-BASED NURSING PRACTICE III
Graduate
This is the third clinical practicum in a sequence of supervised clinical experiences for nurse practitioner students in which students demonstrate increasing comprehensive practice of primary care in the context of specialty practice for selected populations. This course provides the opportunity to integrate the multiple professional roles of the advanced practice nurse while refining their skills in the comprehensive practice of primary care and/or specialty practice for selected populations. Emphasis is on health promotion and disease prevention with unitary human beings in mutual process with their environment in the management of health and illness, teaching and health counseling and organizational and role competencies. Students select sites and preceptors in family, adult, pediatric or women's health promotion according to their area of concentration and self-assessed strengths and weaknesses. PREREQUISITE(S): NSG 422, NSG 424, NSG 460, NSG 484, NSG 483, NSG 487, NSG 492, NSG 493. COREQUISITE(S): NSG 494.

NSG 491
PRACTICUM IN ACUTE AND CHRONIC ILLNESS
Graduate
Six credit hours.

NSG 492
CLINICAL DECISION-MAKING FOR ADVANCE PRACTICE NURSING I
Graduate
An on-line clinical seminar course designed to introduce the advanced practice nursing student to the clinical reasoning process in primary care and its application in the assessment of health and illness across the lifespan. Interpretation of x-ray and laboratory tests is considered as it illuminates findings from the health history and physical exam. The advanced level practitioner role is stressed with clinical decision making as a central concept. Analysis and application of theory and research in assessment, diagnosis, therapeutic nursing intervention, and clinical evaluation is the basis for exploring the clinical decision making process. PREREQUISITE(S): NSG 422, NSG 424, NSG 484 COREQUISITE(S): NSG 483.

NSG 493
CLINICAL DECISION-MAKING II FOR ADVANCE PRACTICE NURSING
Graduate
This course builds on and integrates previous courses in the advance pratice nursing sequence that focuses on clinical management skills of illness in primary care settings. The advanced level practitioner role is stressed with clinical decision making as a central concept. Analysis and application of theory and research in assessment, diagnosis, therapeutic nursing intervention, and clinical evaluation is the basis for exploring the clinical decision making process. PREREQUISITE(S): NSG 422, NSG 424, NSG 460, NSG 484, NSG 492, NSG 483. CO-REQUISITE(S): NSG 487.
NSG 494
Graduate
This course builds on and integrates previous courses in the advance practice nursing sequence that focuses on clinical management skills of acute and chronic illness across the lifespan. Students learn to assess, diagnose, and manage acute episodic illness commonly encountered in ambulatory health settings. The advanced level practitioner role is stressed with clinical decision making as a central concept.
PREREQUISITE(S): NSG 422, NSG 424, NSG 460, NSG 484, NSG 492, NSG 493, NSG 483 CO-REQUISITE(S): NSG 490.

NSG 498
P R O F E S S I O N A L  N U R S E  R O L E  D E V E L O P M E N T
Graduate
The nurse as clinician, educator, manager, activist, research coordinator, and entrepreneur are some of the many roles available to professional nurses in contemporary society. This course provides opportunity to explore selected roles of the professional nurse and the advanced practice nurse in diverse practice settings. Students select readings and seminar topics for discussion in class as well as design and implement a project for a selected professional nurse role. Principles of needs assessment, program planning and evaluation provide the framework for the project. Refinement of skills in critical thinking, decision-making, communication, and innovation are emphasized. Co-REQUISITE(S): NSG 486. Two credit hours.

NSG 500
C H E M I S T R Y  A N D  P H Y S I C S
Graduate
Review of principles of physics with emphasis on their application in the clinical practice of anesthesia. Nurse anesthesia residents (NAR) will engage in a comprehensive analysis of cell physiology and biochemistry with emphasis upon metabolism, enzyme function, and protein synthesis. Current research findings and their anesthetic implications will be discussed.

NSG 501
A N A T O M Y  A N D  P H Y S I O L O G Y  I
Graduate
An intensive 6 quarter hour course designed to provide the nurse anesthesia resident (NAR) with current knowledge of advanced anatomy and physiology of the gastrointestinal, nervous and endocrine systems. The course is divided into three sections with emphasis placed on the structural and functional role of each system in maintaining homeostasis. Clinical implications of current research findings will be stressed.

NSG 502
A N A T O M Y  A N D  P H Y S I O L O G Y  I I
Graduate
An intensive 6 quarter hour course designed to provide the nurse anesthesia resident (NAR) with current knowledge of advanced anatomy and physiology of the cardiovascular, respiratory and renal systems. The course is divided into sections with emphasis placed on the structural and functional role of each system in maintaining homeostasis. Clinical implications of current research findings will be stressed.

NSG 503
P A T H O P H Y S I O L O G Y
Graduate
An intensive 6 quarter hour course designed to provide the nurse anesthesia resident (NAR) with current knowledge of diseases and disorders of the nervous, endocrine, cardiovascular, respiratory, renal, GI/hepatic, and musculoskeletal systems. Implications for the design and implementation of an appropriate anesthesia care plan for individuals with specific system disease/disorders will be discussed in detail. Emphasis will be placed on system-specific diagnostic and therapeutic procedures that require anesthesia services.

NSG 504
P R I N C I P L E S  O F  A N E S T H E S I A  P R A C T I C E  I
Graduate
Designed to introduce the nurse anesthesia resident (NAR) to the advanced practice of nurse anesthesia. Emphasis is placed upon pre-operative patient assessment, anesthesia equipment and technology, airway management, intra-operative management, and postoperative care of patients undergoing general and regional anesthesia. Course includes orientation to clinical practice.
NSG 505
PRINCIPLES OF ANESTHESIA PRACTICE II
Graduate
An intensive 4 quarter hour course designed to provide the nurse anesthesia resident (NAR) with current knowledge of special populations, including pediatric, obstetric, geriatric and trauma patients, as well as patients requiring pain management. Emphasis will be placed on the anatomical and physiological differences that characterize each population with a focus on the pathological disorders unique to each group. The preparation, implementation and evaluation of an appropriate nurse anesthesia care plan for these populations will be stressed.

NSG 506
PRINCIPLES OF ANESTHESIA PRACTICE III
Graduate
An in-depth course that places emphasis on perioperative anesthetic management of patients presenting for specialty surgical procedures or requiring management for chronic pain. Implications for the development, implementation, and evaluation of anesthesia care plans will be stressed. The ethical, legal and professional issues that influence the advanced practice of nurse anesthesia will be discussed. Course includes preparation for the Certification Examination for Certified Registered Nurse Anesthetists.

NSG 507
ANESTHETIC PHARMACOLOGY
Graduate
This course is an in depth introduction to anesthetic pharmacology. It covers the pharmacokinetics, pharmacodynamics, and pharmacotherapeutics of drugs used in the administration of general, local, and regional anesthesia and provides the scientific basis for the advanced practice of nurse anesthesia.

NSG 508
ADJUNCTIVE ANESTHETIC
Graduate
This 4 quarter hour hybrid course (in class and on-line sections) includes the pharmacokinetics, pharmacodynamics, and pharmacotherapeutics of drugs used in the treatment of a variety of disease states. Implications of current therapy with these agents and use of selected agents as adjunctive therapy in the advanced practice of nurse anesthesia will be stressed.

NSG 509
ADVANCED PHYSICAL ASSESSMENT FOR NURSE ANESTHETISTS
Graduate
This course will provide strategies that promote effective history-taking along with cognitive and psychomotor skills needed for the advanced physical assessment of the neurological, musculoskeletal, respiratory, cardiac, circulatory, and gastrointestinal systems across the lifespan. The assessment of body systems includes an overview of anatomy and physiology, techniques necessary to perform inspection, palpation, percussion and auscultation; and interpretation of physical findings and laboratory testing relevant to the advanced practice of nurse anesthesia.

NSG 510
ANESTHESIA PRACTICUM I
Graduate
An introduction to the clinical practice of anesthesia with emphasis on the principles introduced in ANES 500-504, 507 and 508. Includes administration of anesthesia for select patient populations under direct instruction and supervision of a certified registered nurse anesthetist (CRNA) or anesthesiologist.

NSG 511
ANESTHESIA PRACTICUM II
Graduate
Expanded application and integration of basic principles applicable to ANES 510. PREREQUISITE(S): NSG 510

NSG 512
ANESTHESIA PRACTICUM III
Graduate
This practicum provides the nurse anesthesia resident (NAR) with an opportunity to apply and integrate the basic principles of nurse anesthesia practice. Emphasis is on the anesthetic comprehensive management of the adult patient presenting for elective and emergency surgery. PREREQUISITE(S): NSG 510, NSG 511
NSG 513
ANESTHESIA PRACTICUM IV
Graduate
The first of four advanced anesthesia practicums that allow the third year nurse anesthesia resident (NAR) the opportunity to develop, implement, and evaluate anesthesia care plans for all patient populations undergoing a wide variety of specialty surgical and therapeutic procedures. It is designed to broaden the knowledge and skill base of the NAR. Includes seminar presentations on selected topics or issues relative to the advanced practice of anesthesia and completion of online bimonthly review quizzes. PREREQUISITE(S): NSG 510, NSG 511, NSG 512

NSG 514
ANESTHESIA PRACTICUM V
Graduate
The second in a series of advanced practicums that provide the third year nurse anesthesia resident (NAR) with the opportunity to develop, implement, and evaluate an anesthesia care plan for all patient populations undergoing a wide variety of surgical and therapeutic procedures. Emphasis is placed on application, integration, and synthesis of knowledge, skills, and attitudes that are representative of the advanced practice of nurse anesthesia. Includes seminar presentations on selected topics and issues relative to the advanced practice of anesthesia and completion of online bimonthly review quizzes. PREREQUISITE(S): NSG 510, 511, 512, 513

NSG 515
ANESTHESIA PRACTICUM VI
Graduate
The third in a series of advanced practicums that provides the third year nurse anesthesia resident (NAR) with the opportunity to develop, implement, and evaluate an anesthesia care plan for all patient populations undergoing a wide variety of surgical and therapeutic procedures. Emphasis is placed on application, integration, and synthesis of the knowledge, skills, and attitudes representative of the advanced practice of nurse anesthesia. Includes seminar presentations on selected topics or issues relative to the advanced practice of anesthesia and completion of online bimonthly review quizzes. PREREQUISITE(S): NSG 510, 511, 512, 513, 514

NSG 516
ANESTHESIA PRACTICUM VII
Graduate
The final advanced practicum in which the third year nurse anesthesia resident (NAR) demonstrates the knowledge, skills, and attitudes necessary for entry level nurse anesthesia practice: proficiency in providing perioperative nurse anesthesia care for all patient populations; an ethical and culturally sensitive approach to patient care; analysis and synthesis of current research for application into practice; ability to perform a comprehensive self evaluation; and display of a professional attitude toward life long learning. Includes seminar presentations on selected topics or issues relative to the advanced practice of nurse anesthesia. PREREQUISITE(S): NSG 510, 511, 512, 513, 514, 515

NSG 521
INNOVATIONS IN HEALTH CARE DELIVERY (CROSS-LISTED AS NSG 452)
Graduate
This course provides the laboratory and clinical experiences for the development of the professional nurse role as case manager and administrator. Learning activities focus on implementing contemporary data-based nursing practice models in a variety of health care settings, and the diffusion of innovation at the individual, family and organizational levels.

NSG 525
SCIENTIFIC FOUNDATIONS FOR ADVANCED PRACTICE NURSING
Graduate
Scientific Foundations For Advanced Practice Nursing

NSG 540
CULTURE, ETHICS, AND POLICY ANALYSIS
Graduate
This seminar is designed to explore cultural and ethical perspectives and their relationships to health policy. Health disparities, based on social and cultural difference are clearly linked to major diseases such as heart disease, cancer, diabetes, hypertension and stroke and to access to, and outcomes of health services. Class discussions will focus on the past, current and future health policy needs of multicultural and multifaceted societies. The phenomena of cultural, ethnic, gender, class, and sexual variation in complex societies; notions of diversity and social justice; understandings of cultural conflicts and how cultural differences are managed in healthcare settings will be considered. Students will integrate concepts of all levels of prevention in health care, examine research in health ethics and health policy and discuss legislative processes for their potential to improve the health of the public. Meets for 4 hours lecture and discussion.
NSG 554  
INFORMATICS AND TECHNOLOGY APPLICATIONS  
Graduate  
This course focuses on information systems technology and its application for the improvement and transformation of patient-centered health care. Implications of informatics for advanced practice nursing and health care in general are explored. Impact on consumer-provider relationships, ethical and legal issues, global/future informatics issues and electronic health record issues are being examined. The course prepares the student to become proficient at selecting and using technology for organizing, analyzing, managing, and evaluating information in nursing administration, education, and clinical practice settings. The use of technology as an adjunct to doctoral-level inquiry and how it supports clinical and professional decision-making is explained and demonstrated.

NSG 555  
PHARMACOTHERAPEUTIC IMPLICATIONS FOR THE OLDER ADULT  
Graduate  
This course examines various factors that impact the pharmacokinetics and pharmacodynamics of pharmacotherapeutic agents used in the care of the older adult. Economic and policy issues regarding pharmacotherapy of the older adult will be explored. Students will develop primary and secondary strategies to detect and resolve problems related to the use of these agents in the older adult.

NSG 598  
GRADUATE SYNTHESIS  
Graduate  
Students conduct supervised research terminating in a manuscript suitable for publication. The study must be approved by the selected faculty advisor and the Nursing Department Human Subjects Committee prior to registration for credit hours. Students are encouraged to generate research questions from their clinical area of study courses early in their program. PREREQUISITE(S): NSG 400, NSG 401, NSG 402 and NSG 480 and permission of instructor

NSG 599  
THESIS RESEARCH  
Graduate  
Students conduct supervised original research terminating in a completed and bound thesis. The study must be approved by the selected faculty advisor and the thesis committee approved by the department prior to registration for credit hours and must be completed during the term. Formerly NSG 405. PREREQUISITE(S): NSG 400, 401, 402,480 & permission of instructor

ORGC 201
BUSINESS AND PROFESSIONAL COMMUNICATION (Formerly CMNS 201)
Undergraduate
Employers demand strong communication and presentation skills. In order to compete effectively in the job market, students need to acquire and practice the written and oral communication skills needed to interview successfully. Furthermore, as a professional you will not only be expected to be a confident speaker, but also to organize and prepare clear, concise and interesting presentations. You will also need to communicate effectively while working as the member of a team or in other group contexts. In developing the knowledge, competencies and skills needed to communicate effectively in these and other contexts, this course will embrace opportunities for both critical thinking and applied problem solving. (Formerly CMNS 201)

ORGC 212
SMALL GROUP COMMUNICATION (Formerly CMNS 212)
Undergraduate
A survey of the variables operating in group interactions. Combines principles with practice through participation in small group experiences. Topics include group formation, group formats, organizational approaches, decision-making models, group observation and evaluation. (Group) (Formerly CMNS 212)

ORGC 251
ORGANIZATIONAL COMMUNICATION (Formerly CMNS 251)
Undergraduate
This course focuses on the role of communication in organizational life. Attention will be devoted to exploring how communication simultaneously shapes and is shaped by organizations. Topics include conflict and mediation, stress and social support, the supervisor-subordinate relationships, workplace diversity, organizational consultation and new communication technologies in organizations. (organizational) (Formerly CMNS 251)

ORGC 290
ORGANIZATIONAL COMMUNICATION WORKSHOP (VARIABLE TOPICS) (Formerly CMNS 290)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (Formerly CMNS 290)

ORGC 316
COMMUNICATION AND GROUP DECISION-MAKING (Formerly CMNS 316)
Undergraduate
Advanced undergraduate course in small group communication. Students develop skills and abilities in identifying various factors that contribute to the success and failure of group decision-making in organizational contexts. Class sessions will focus on theories, research, and practices in group processes, and their applications to issues in real life. (Formerly CMNS 316)
ORGC 317
TOPICS IN GROUP COMMUNICATION (Formerly CMNS 317)
Undergraduate
Examines selected topics in group communication processes. Topics may include group creativity, communicating in virtual teams, conflict in groups, and group facilitation. (Formerly CMNS 317)

ORGC 332
TOPICS IN ORGANIZATIONAL COMMUNICATION METHODOLOGY (Formerly CMNS 332)
Undergraduate
Courses explore a range of qualitative and quantitative research strategies. Topics may include more specialized modes of gathering and assessing data, using new data technologies and software programs, and conducting communication studies. (Formerly CMNS 332)

ORGC 350
COMMUNICATION AND SOCIALIZATION IN WORK (Formerly CMNS 350)
Undergraduate
Examines how human beings move through the world of work, paying particular attention to the role communication plays in this process. Influences that help shape people's perceptions of work during youth and adolescence are reviewed, as are those that help individuals develop expectations about life in particular organizations prior to entry. In addition, the class focuses on new hire adjustment, the processes by which "rookies" gradually become "veterans" in the workplace, and covers voluntary and involuntary retirement. (Organizational) (Formerly CMNS 350)

ORGC 352
COMMUNICATION AND THE CORPORATE CULTURE (Formerly CMNS 352)
Undergraduate
Focuses on the communicative implications of such cultural elements as values, heroes, rites, rituals, symbolism and storytelling. Analyzes and presents ways of adapting to the diverse components of a culture. (Organizational) (Formerly CMNS 352)

ORGC 353
COMMUNICATION AND ORGANIZATIONAL CHANGE (Formerly CMNS 353)
Undergraduate
Explores the impact of change on the day to day work experience of organizational members. How culture, management philosophy and individual performances are influenced by change. Political, symbolic interactional, and human resource perspectives are explored. (Organizational) (Formerly CMNS 353)

ORGC 354
EMPLOYMENT INTERVIEWING (Formerly CMNS 354)
Undergraduate
Studies theory and practice of interviewing. Course focuses each term on a particular interview application (journalistic, employment, research, etc.) and examines strategies appropriate for interviewer and interviewee. Covers planning, conducting and evaluating interviews as well as relevant legislation. (Formerly CMNS 354)

ORGC 355
CONFLICT MANAGEMENT (Formerly CMNS 355)
Undergraduate
Examines the theory and process of conflict in interpersonal and organizational contexts. Focuses upon the causes, types, and theories of conflicts as well as upon practical approaches to dispute resolution. Topics include: social-psychological as well as process perspectives of conflict; personal conflict style/s; conflict sources; destructive versus constructive interaction cycles; impression management; conflict escalation or diminishment; and resolution strategies. (Formerly CMNS 355)

ORGC 356
COMMUNICATION CONSULTING (Formerly CMNS 356)
Undergraduate
Examines how to partner with a client to facilitate constructive organizational change and behavioral growth in the workplace. Focuses on contemporary consulting through case studies. Previous courses in organizational, small group, or interpersonal communication are suggested. (Formerly CMNS 356)
ORGC 357
TOPICS IN ORGANIZATIONAL COMMUNICATION (Formerly CMNS 357)
Undergraduate
Topics covered in this course might include: communication and customer service, assessment and intervention in organizations, comparative management, democratic participation in organizations, gender in the workplace, etc. (Formerly CMNS 357)

ORGC 392
INDEPENDENT STUDY
Undergraduate
Independent Study.

ORGC 393
ORGANIZATIONAL COMMUNICATION PRACTICUM (Formerly CMNS 393)
Undergraduate
Structured and supervised student participation in collegiate debating, radio production or group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours. (Formerly CMNS 393)

PAM 200
INTRODUCTION TO THE BUSINESS OF MUSIC
Undergraduate
(2 credits) Through lecture, discussion and projects, the student learns about various aspects of the music industry. This course is an overview of music business, studying relationships between artists, managers, agents, and attorneys; record companies and recording contracts; major labels vs. independent labels; music publishing and performing rights organizations; touring and merchandising; copyright and music licensing; careers in the music industry; and topical issues facing the industry today.

Status as an undergraduate Music or undergraduate Business student is a prerequisite for this class.

PAM 301
PERFORMING ARTS MANAGEMENT I: INTRODUCTION TO PERFORMING ARTS MANAGEMENT
Undergraduate
(4 credits) The class will introduce the history, theory, and art of management and leadership in the field of performing arts. The student will learn about styles of arts administration, contemporary issues facing the artists, administrators, and organizations, and opportunities for careers in arts administration and management. (Cross-listed with THE 201)

PAM 200 is a prerequisite for this class.

PAM 302
PERFORMING ARTS MANAGEMENT II: ORGANIZATIONAL STRUCTURE AND FINANCIAL MANAGEMENT
Undergraduate
(4 credits) Through lecture, discussion, and projects, the student learns about producing and presenting arts organizations and not-for-profit organizational structures, short- and long-term planning, financial management, and audience development. Other topics include choosing a season, managing ticket sales, box office procedures, facility management, and management information systems.(Cross-listed with THE 202)

PAM 301 is a prerequisite for this class.

PAM 303
PERFORMING ARTS MANAGEMENT III: MARKETING FOR THE ARTS
Undergraduate
(4 credits) Through lecture, discussion, and projects, the student learns about strategies and objectives in marketing and promoting the performing arts. Specific focus is given to targeting audiences; organizational image and branding; patron support services; promotions, publicity, and advertising; and working with various forms of media, including social networking and technology-based platforms. (Cross-listed with THE 203)

PAM 302 is a prerequisite for this class.
PAM 304
PERFORMING ARTS MANAGEMENT IV: INSTITUTIONAL ADVANCEMENT & COMMUNITY ENGAGEMENT
Undergraduate
(4 credits) Through lecture, discussion and special projects, the student learns about institutional advancement and development and collaborations with internal and external constituencies. Topics covered include forming partnerships, community outreach, board development and engagement, fund raising and grant writing, donor cultivation, and the philanthropic community. This course is the final course in the four-course sequence on Performing Arts Management, and integrates the topics, vocabulary, themes, and subjects introduced in the previous three courses. (Cross-listed with THE 207)

PAM 303 is a prerequisite for this class.

PAM 305
COMMERCIAL MUSIC BUSINESS
Undergraduate
Through lecture, discussion, reading and projects, students will get an in-depth look at the commercial/for-profit music business with a focus on artist management, record labels (present and future), marketing and touring. Specific attention is given to artist-manager relationship; artist-label relationship; marketing strategies; and the current changes and evolution of the industry, at large.

PAM 200 is a prerequisite for this class.

PAM 306
TECHNOLOGICAL TRENDS & DEVELOPMENTS IN THE MUSIC INDUSTRY
Undergraduate
(2 credits) This course will examine the changes within the music industry; past, present, and future; and the technological advancements which provide the catalyst for those changes. Students will develop a basic understanding of the technological breakthrough, recognize its significance and examine how the music industry exploits these new developments into business opportunities never before possible.

PAM 307
LEGAL ISSUES IN THE MUSIC INDUSTRY
Undergraduate
(2 credits) This course is a study of legal concepts and issues related to the music industry - types of contracts; contracts mechanics and formats; relationships between artists and key personnel; recording contracts and record labels; copyright issues related to artists, performers, and composers, copyright infringement issues; digital music issues; labor relations; landmark legal cases related to the music industry; and topical legal issues facing the industry today.

PAM 200 is a prerequisite for this class.

PAM 308
MUSIC PUBLISHING
Undergraduate
(2 credits) This course is a study of the past, present, and future of music publishing. The course is intended and designed to examine the principles and procedures involved in music publishing, both nationally and internationally. Topics include music ownership and copyright registration; copyright searches and infringement; primary functions of a music publisher; sources of publishing income and licenses; current practices and trends and future issues.

Status as an Undergraduate or Graduate Music student or Undergraduate Business student is a prerequisite for this class.

PAM 309
MUSIC IN THE REAL: AN ENTREPRENEURIAL APPROACH TO PRESENTING MUSIC IN TODAY’S MARKETPLACE
Undergraduate
Through opportunity creation, case study, discussion and peer evaluation, this course analyzes and simulates the professional performing arts marketplace, providing collaborative hands-on experience for performers and arts managers-in-training. In this course, performers will hone their musical point-of-view and create an original, self-produced performance opportunity in the DePaul community, with marketing materials and a business structure to support their project. Arts Management students will collaborate with performers on these projects, providing support to their colleagues in a way that models their future professional activities. Each student will also be responsible for analyzing a current successful model, identifying keys to success. This course is intended to bridge the transition from college to career, providing the artistic, career development and entrepreneurship training that have become essential in today’s professional environment. (2 CREDITS)
PAM 360
TOPICS IN PERFORMING ARTS MANAGEMENT
Undergraduate
An in-depth study of special topics related to the fields of Performing Arts Management and/or Music Business; such as Music Entrepreneurship, Arts Advocacy, or Career Development.

Status as a Music student, an Undergraduate Theatre student or Undergraduate Business student is a prerequisite for this class.

PAM 398
PERFORMING ARTS MANAGEMENT INTERNSHIP
Undergraduate
The internship provides the student with an experiential opportunity to learn by working with professionals in the Performing Arts Management and/or Music Business industries.

Status as a Music student is a prerequisite for this class.

PAM 399
INDEPENDENT STUDY
Undergraduate
Status as a Music student is a prerequisite for this class.

PAX 200
PERSPECTIVES ON PEACE, JUSTICE, AND CONFLICT STUDIES
Undergraduate
A survey of key issues in the study of violence, conflict and its peaceful resolution including an examination of nonviolence as a philosophy and as a technique of action and social change. The course treats aggression, oppression, and nationalism as particularly problematic in an increasingly global human community. The course introduces key concepts in peace studies (positive and negative peace, structural and direct violence, the analysis of conflict) and demonstrates the links with other parallel concerns (minority issues, women's issues, social change, international relations). In addition to traditional methods of instruction, this course will rely on students working at designated community service organizations which will be treated as one of the central learning resources in the course.

PAX 206
BOUNDARIES AND IDENTITIES
Undergraduate
This course explores how identity formation is shaped by cultural, historical, and political construction of barriers, borders, and boundaries, and how such formations are intertwined with ethnicity, race, nationality, gender and class.

PAX 210
FROM INTERNATIONAL CONFLICT TO RESOLUTION AND PEACE
Undergraduate
This interdisciplinary course examines the basic questions of peace studies in different and "diverse" contexts, from personal relationships to societies and states, and addresses the consequences of conflict and conflict resolution in the contemporary world.

PAX 212
SOCIAL JUSTICE AND SOCIAL CHANGE [FORMERLY PAX 230]
Undergraduate
An exploration of the mutual interdependence of social justice and non-violence, understanding it as a strategy for social change and a vision for social concord. Formerly PAX 230.

PAX 214
CONFLICT: INTERVENTION, NEGOTIATION AND ADVOCACY
Undergraduate
An exploration of theories of conflict and the intervention methods for dealing with conflicts at the interpersonal and group levels.
PAX 218
HUMAN RIGHTS: PROMISE AND PROBLEMATICS
Undergraduate
This course will explore the historical origins, foundational principles, and socio-political efficacy of human rights discourse in contemporary international relations, domestic politics, and ethical thought. It consider issues such as the religious and/or secular foundation of human rights; their universality in relation to particular cultural customs and norms; the relative priority of individual and collective rights; and the legitimacy of international humanitarian intervention in sovereign nations.

PAX 220
ACTIVISM
Undergraduate
This course will look at the various ways in which people across the globe organize to fight for better living conditions, social justice, human rights, environmental protection, labor issues, sustainable development alternatives, political representation, and gender issues, among others.

PAX 231
ANALYZING POVERTY, ITS CAUSES AND CONSEQUENCES
Undergraduate
This course investigates a variety of viewpoints on the causes and effects of poverty. Poverty is a complex and multidimensional condition often difficult to measure, comprehend and change. It includes lack of or limited access to material needs (food, water, shelter, health care, etc.), social relations (participation, inclusion, rights, etc.), income and wealth (unemployment, resources, etc.) and moral, psychological, or spiritual well-being. This course reviews the current poverty debates from the economic, policy, social, political, cultural and moral perspectives that influence the implementation of poverty reduction programs.

PAX 240
VOICES OF WAR AND PEACE; ART, LITERATURE AND FILM
Undergraduate
This course is an overview of the ways in which the arts, including literature and film, portray warfare and the attempts to end violence and build reconciliation and peace.

PAX 250
TOPICS ON PEACE, JUSTICE, AND CONFLICT STUDIES
Undergraduate
A workshop covering practical instruction in mediation, conflict resolution, and nonviolent methods for promoting social change.

PAX 252
FORGIVENESS AND RECONCILIATION
Undergraduate
A study of various understandings of "forgiveness" and "reconciliation" in several religions and cultures. The nature and dynamics of forgiveness and reconciliation will be examined both theoretically and in relationship to specific conflicts. Cross-listed with REL 252.

PAX 290
TOPICS ON JUSTICE AND PEACE
Undergraduate
A topics course geared to introductory level discussions of the core elements of justice and peace-building as they occur in specific venues, such as religion.

PAX 300
SENIOR SEMINAR
Undergraduate
A seminar on a key theoretical topic on peace, justice or human rights, or conflict, viewed from an interdisciplinary perspective and though a wide variety of theoretical positions.

(Two from PAX 200, 210, 212, 214, 220) or permission of the Program Director is a prerequisite for this course.
PAX 303
BORDER MATTERS: LITERATURE & CULTURE IN THE LATINO/A BORDERLANDS
Undergraduate
In this course we will study the values and dynamic that is promoted in different Latino communities in the United States. In order to give context to the present situation of Latinos in the U.S. we will study some of the social issues in the countries of origin which have resulted in immigration and their encounter with borderlands. The notion of a Latina and Latino cultural "borderlands" has proven a ubiquitous and powerful conceptual paradigm in recent years, organizing distinct ethnic groups (Cuban American, Mexican American, Central American, Puerto Rican, etc.) according to the rubrics of pan-ethnic identity labels (Hispanic, Latina/Latino, etc.) and transnational geographies (Latin America, the Americas, etc.). This course will examine a wide range of Latino/a literary expressions produced in the Latina/Latino borderlands, particularly in areas of cultural contact and conflict. While the most obvious focus will be the Texas-Mexico border region, including ongoing efforts to establish the public meaning of the Alamo, additional borderlands, literal and figurative, will be considered. The Latina and Latino borderlands have also inspired critics and theorists to imagine postmodern, post national subject formations, in which questions of ethnicity, gender, and sexuality are shifted from the margins to the center of critical discourse. We will therefor investigate the use and limits of recent "border theory". Cross-listed with LST 303.

PAX 348
INDIGENOUS POLITICAL STRUGGLES [CROSS-LISTED WITH LST 348]
Undergraduate
This course explores the struggles for social justice and the right to have rights by indigenous peoples. It emphasizes contemporary cases and the cultural contexts in which indigenous political strategies have developed and transformed. It uses historical data to understand the issues faced by indigenous peoples. Students conduct research on indigenous struggles and their connections to other social movements at the local, national, and international levels. Cross-listed with LST 348.

PAX 350
CAPSTONE IN PEACE, JUSTICE & CONFLICT STUDIES
Undergraduate
An integrative seminar drawing together students' theoretical work and hands-on expertise.

PAX 381
TOPICS IN PEACE BUILDING
Undergraduate
An advanced course looking at the history, theory and implementation of a specific tool for peace building, from diplomacy (state or citizen), legislative & juridical interventions, inner peace practices, and the like.

PAX 382
TOPICS IN SOCIAL JUSTICE AND SOCIAL CHANGE
Undergraduate
An advanced course that investigates one specific arena of social justice, such as environmental racism, gender injustice, religious bigotry, and the like, from a variety of disciplinary perspectives.

PAX 383
TOPICS IN CONFLICT INTERVENTION
Undergraduate
An advanced course that studies one or more types of nonviolent interventions in conflict, including violent conflict and warfare; examples include community organizing, political interventions, educational campaigns, etc.

PAX 384
TOPICS IN ACTIVISM AND ADVOCACY
Undergraduate
An advanced course that looks at the history, merits, values, and organizational possibilities for specific models of activism.

PAX 385
TOPICS IN HUMAN RIGHTS
Undergraduate
Advanced topics on human rights, the competencies approach, institutionalized protection of rights, and the like.
PAX 386
TOPICS IN GLOBAL JUSTICE
Undergraduate
The course will investigate the ways in which global agents, whether governments, NGOs, or corporations act and interact in order to address systemic global inequities and injustice.

PAX 387
TOPICS IN PEACE, JUSTICE AND RELIGION
Undergraduate
This course will investigate the interfaces between one or more religious traditions and the ways in which the questions of peace-building and social justice are handled and responded to with concrete action.

PAX 389
TOPICS IN COMMUNITY DEVELOPMENT, ADVOCACY, & ACTIVISM
Undergraduate
This course will use specific issues, groups, and actions to study how working for the just needs of communities occurs in a variety of ways and settings.

Two 200-level PAX courses are prerequisites for this course.

PAX 390
INTERNSHIP
Undergraduate
The internship as an independent project allows students to find an peace, justice, or conflict intervention organization that will give them a meaningful experience in the work of their organizations or to sign up with a credit-bearing internship with another academic institution. Permission of the Director.

PAX 392
INTERNSHIP IN PEACE, JUSTICE, AND CONFLICT STUDIES
Undergraduate
The Internship in Peace, Justice and Conflict Studies exposes students to practical learning experiences in non-profit and government agencies through an intensive internship. Students work 100 hours with an organization arranged through Steans Center. Cross-listed with CSS 395.

PAX 399
INDEPENDENT STUDY
Undergraduate
The content and evaluation methods for this course are negotiated by the student with an individual faculty member. Only open to students of Junior or Senior standing.

PAX 365
TOPICS IN WAR AND PEACE
Undergraduate
This course will deal with one of many ways to discuss the large-scale conflict that is war and the different methods to prevent, delay, and conclude such conflicts, in order to have peace. Cross-listed with INT 365.

PE 60
AEROBICS
Undergraduate
(2 credits) This course provides instruction and requires participation in the dynamics of exercises that train the cardio respiratory system. These exercises include but are not limited to low-impact aerobics, high impact aerobics, step-aerobics, use of cardio equipment, spin, slide, and circuit training.
DEPARTMENT OF physical education and human performance

BEGINNING WEIGHT TRAINING
Undergraduate
(2 credits) This course introduces students to strength training principles and activities: free weights, resistance machines, and functional exercises. Emphasis is placed on the development of strength and flexibility of the major muscle groups. Health-related fitness guidelines are presented to assist the student in developing overall fitness.

ADVANCED AEROBICS
Undergraduate
(2 credits) Advanced instruction in appropriate conditioning techniques and daily participation in monitored strenuous levels of aerobic exercise combined with dance. PREREQUISITE(S): PE 060 or instructor's approval.

FITNESS AND CONDITIONING
Undergraduate
(2 credits) The main components of health-related fitness: cardiovascular endurance, muscular strength, muscular endurance, flexibility, and body composition are integrated into the fitness sessions, topic presentations, and health/fitness assessments. Emphasis is placed on improving overall wellness through exercise and healthy lifestyle choices.

ADVANCED WEIGHT TRAINING
Undergraduate
(2 credits) Advanced instruction and participation in the use of free weights and various machines for body building and weight training. PREREQUISITE(S): PE 066 or instructor's approval.

RAPE AGGRESSION DEFENSE SYSTEMS
Undergraduate
This 30-hour self-defense course is open to all female students and teaches awareness, prevention, risk reduction and avoidance techniques. In addition, students will learn the importance of physical fitness and perform exercises designed to improve their speed, physical strength and flexibility to aid them in self-defense. At the end of the course, students will be given the opportunity to test their knowledge and skills in various attack scenarios, under the supervision of at least one certified R.A.D. Basic Physical Defense instructor, in a safe and supportive environment.

MOTOR DEVELOPMENT THROUGHOUT THE LIFE SPAN
Undergraduate
Through lecture, film analysis, direct observation and instruction of children, and class discussion, students will gain a greater understanding of the maturational and environmental factors that affect human growth and motor development. Since this development is a process that continues throughout our life span, prenatal through adult characteristics will be examined.

SWIMMING
Undergraduate
(2 credits) This course is designed to provide the student with skill instruction and analysis of the most widely used swimming strokes and basic dives. Principles of hydrodynamics and basic water safety will also be emphasized. Various individual skill levels will be considered to provide a safe and inclusive experience. Additionally, this course introduces the student to the concepts and procedures for teaching basic swimming in a school setting.

GYMNASTICS
Undergraduate
(2 credits) This course introduces the student to the concepts and procedures for teaching basic gymnastics in a school setting. Emphasis will be given equally to skill acquisition, spotting techniques, explanation/demonstration of skills, and the theoretical framework, which supports a gymnastics program. Students will be provided with the opportunity to acquire skills and spotting techniques for basic stunts, tumbling, balance, balance beam, parallel & uneven parallel bars, vaulting, and rhythmic gymnastics.
PE 181
FLAG FOOTBALL
Undergraduate
(2 credits) Offered alternate years. Fundamental skills, group drills, strategy, styles of offensive and defensive team play will be covered. Physical education majors will focus on teaching, officiating and assessment.

PE 182
VOLLEYBALL
Undergraduate
(2 credits) Offered alternate years. Fundamental skills, drills, strategy, team play, rules interpretation, and officiating will be covered. Physical education majors will focus on teaching, officiating and assessment.

PE 183
SOCCER-SPEEDBALL
Undergraduate
(2 credits) Offered alternate years. Development of basic skills and progressive teaching stages: fundamental stage, game-related stage, game-condition stage, and functional training to include experience in speedball and other lead-up activities.

PE 185
BASEBALL-SOFTBALL
Undergraduate
(2 credits) Offered alternate years. Fundamental skills, group skills, styles of offensive and defensive team strategy will be covered. Physical education majors will focus on teaching, officiating and assessment.

PE 186
TRACK AND FIELD
Undergraduate
(2 credits) Offered alternate years. Track and field skills, rules, warm-up drills, management of track and field meets will be covered. Physical education majors will focus on teaching, officiating and assessment.

PE 187
BASKETBALL
Undergraduate
(2 credits) This class introduces and reviews the fundamentals of basketball. It covers basic skills and knowledge of game play, court positions, rules, and drills carried out in practice situations. Physical education majors will focus on teaching, officiating and assessment.

PE 206
PERSONAL AND COMMUNITY HEALTH
Undergraduate
This course is designed to assist students in gaining insight into their health/wellness attitudes, behaviors, and choices. Health/wellness experiences and topics examine the total wellness concept, as a self-designed, dynamic style of living which focuses on optimal functioning and quality of life. Emphasis is placed on the physical, emotional, intellectual, social, occupational and spiritual dimensions of health/wellness.

PE 213
FOLK-SOCIAL DANCE
Undergraduate
(2 credits) Fundamentals, techniques, terms and teaching principles of line dance, square dance, ballroom, and swing dance will be covered. Students are introduced to basic style and basic choreography.

PE 273
HEALTH AND NUTRITION
Undergraduate
This course will provide students with an introductory background in nutrition throughout the life span. The study of foods and their effects upon health, development and performance of the individual will be emphasized. Software analysis of dietary intakes will facilitate an individual reflective approach to an application of the content.
PE 276
TENNIS
Undergraduate
(2 credits) Instruction and practice on basic patterns of movement of tennis skills. Knowledge of rules, etiquette, playing instructions and teaching methods for application of skills stressed.

PE 277
GOLF
Undergraduate
(2 credits) Basic patterns of movement for a controlled golf swing with woods and irons; chipping, pitching and putting skills. Golf course rules and playing instructions. Teaching methods for application of skills stressed.

PE 302
FIRST AID: RESPONDING TO EMERGENCIES
Undergraduate
(2 credits) This course is designed to provide instruction, demonstration, and practice in application of basic emergency first aid skills. Students will learn to recognize the signs and symptoms of specific life threatening injuries and how to properly care for these injuries as citizen responders. Students will also have the opportunity to achieve Heartsaver CPR, AED, and First Aid Certification by the American Heart Association.

PE 303
ATHLETIC INJURIES
Undergraduate
Principles and techniques of prevention, recognition, treatment, care including adhesive strapping and wrapping and rehabilitation of common athletic injuries. Attention given to role of coach-trainer for emergency field procedures

PE 304
THE SCHOOL HEALTH PROGRAM
Undergraduate
This course is designed to cover the scope of health services that could be provided through a comprehensive school health program. The school environment, community involvement, and legal/ethical considerations will be emphasized.

PE 317
PHYSICAL EDUCATION AND CLASSROOM MANAGEMENT IN THE ELEMENTARY SCHOOL
Undergraduate
The course is designed to promote an understanding of the contribution that physical education makes to the elementary school curriculum and the development of the whole child. Lesson planning, instructional delivery, and classroom management will be focused as students engage in 15-20 hours of supervised field experience teaching WHOLE classes of children in local schools. (PREREQUISITE(S): Junior status and 25 hours of Clinical Experience).

A Physical Education major in Advanced Standing is a prerequisite for this class.

PE 341
HISTORICAL AND PHILOSOPHICAL FOUNDATIONS OF PHYSICAL EDUCATION
Undergraduate
This course will review the history of sport, fitness and physical education; the impact that events have had on their development; and how physical education, fitness and the use of sport is influenced by society. Emphasis will be placed on philosophical perspectives and ethical values of this profession, both for the educator and the sport & fitness management employee. Content is devoted to the study and understanding of sport and physical activity within numerous cultures throughout history to support diversity and help students consider the multiple perspectives expressed through the incorporation of sport and physical activity.

PE 346
ORGANIZATION/ADMINISTRATION OF PHYSICAL EDUCATION, SPORTS & FITNESS PROGRAMS
Undergraduate
Organization and Administration of Physical Education, Sports, and Fitness Programs. Emphasis is placed on understanding the management process: functions, application to various settings, program development, budget, facilities, marketing/promotion, and risk management.

Advanced Teacher Candidate Standing is a prerequisite for this class.
PE 351  
KINESIOLOGY  
Undergraduate  
Movements of the human body. Application is made to teaching of fundamental and specialized motor skills. Development and maintenance of the human structure through intelligent selection of activities and efficient use. Lecture is supplemented with in class laboratory activities. (PREREQUISITE(S): BIO 201 and BIO 202).

Advanced Teacher Candidate Standing is a prerequisite for this class.

PE 352  
PHYSIOLOGY OF EXERCISE  
Undergraduate  
Effects of muscular activity on the systems of the body. Nature of neuro-muscular activity, circulatory and respiratory adjustments during exercise, metabolic and environmental aspects of exercise, fatigue and training fitness. Lecture is supplemented with in class laboratory activities. (PREREQUISITE(S): BIO 201 and BIO 202).

Advanced Teacher Candidate Standing is a prerequisite for this class.

PE 360  
EDUCATIONAL PSYCHOLOGY AND MEASUREMENT OF LEARNING  
Undergraduate  
This course presents those principles of educational psychology specifically related to the psychomotor learning domain, the selection of tests to measure learning of physical skills for all populations, administration of tests, data collection, and the statistical analysis needed to evaluate the learning process. Specifically, measures of central tendency, variability and correlation statistics; and standard tests of health and skill related components of fitness, motor performance, anthropometry, and specific sport analysis will be included in this course.

Advanced Teacher Candidate Standing is a prerequisite for this class.

PE 362  
FITNESS TESTING, ASSESSMENT AND PRESCRIPTION  
Undergraduate  
This course is designed to provide theoretical knowledge of and select practical skills in fitness assessment, exercise program design, and client instruction in preparation for a national certification exam in personal training. Topics include guidelines for instructing safe, effective, and purposeful exercise, essentials of the client-trainer relationship, conducting health and fitness assessments, and designing and implementing appropriate exercise programming.

Advanced Teacher Candidate Standing is a prerequisite for this class.

PE 372  
METHODS AND MATERIALS FOR PHYSICAL EDUC CURRICULUM/INSTRUCTION-SECONDARY SCHL  
Undergraduate  
This course is designed to provide an understanding of physical education curriculum planning, teaching methods, classroom management, unit and lesson plans in a secondary school setting. Students will engage in 20-24 hours of field work to observe and participate in whole class instruction, in an attempt to integrate theoretical classroom content with on-site experiences.

Advanced Teacher Candidate Standing is a prerequisite for this class.

PE 374  
ADAPTED PHYSICAL EDUCATION  
Undergraduate  
Diversified program of development activities, games, sports and rhythms suited to the interests, capacities, and limitations of students with disabilities who may not be able to participate in the general physical education program. PREREQUISITE(S): BIO 201 and BIO 202 or consent of instructor.

Advanced Teacher Candidate Standing is a prerequisite for this class.
PE 378
PHYSICAL EDUCATION STUDENT TEACHING IN ELEMENTARY EDUCATION
Undergraduate
(6 or 12 credits) Five school days a week of supervised teaching in a cooperating elementary school for half an academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. PREREQUISITE(S): Application and approval required. Open to only DePaul students.

PE 379
PHYSICAL EDUCATION STUDENT TEACHING IN SECONDARY EDUCATION
Undergraduate
(6 or 12 credits) Five school days a week of supervised teaching in a cooperating secondary school for half an academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. PREREQUISITE(S): Application and approval required. Open only to DePaul students.

PE 380
INTERNSHIP IN FITNESS MANAGEMENT
Undergraduate
(12 credits) Four hundred hours of supervised training in a health setting will be completed through this course. Students will receive practical experience in fitness testing, individual and group training, class instruction, program planning, and other facets of fitness management programming. Special interests of students will be addressed based on the internship site. (PREREQUISITE(S): Open only to students who have applied and been accepted by the fitness management program advisor, and have completed all coursework).

PE 384
PHYSICAL EDUCATION CAPSTONE
Undergraduate
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective physical education teachers with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to early childhood education. The course is grounded in the School of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program.

PE 390
PSYCHO-SOCIAL ASPECTS OF EXERCISE AND SPORT
Undergraduate
Psycho-Social Aspects of Exercise and Sport. Principles of human behavior, psychology, sociology, and motivational theory are covered as they relate to exercise fitness and sport. Students are introduced to personality factors, leadership skills, psychological skills training, and group dynamics which play important roles in the psychological development of individuals involved in exercise and sport programs. Advanced Teacher Candidate Standing is a prerequisite for this class.

PE 391
THEORY AND TECHNIQUES OF COACHING
Undergraduate
This course is designed to introduce areas from which basic coaching theories and techniques of various sports can be developed, to expose students to situations which place the coach in a decision making position and encourage students to examine practical problems which will influence the quality of an athletic program.

PE 392
ADVANCED ATHLETIC TRAINING TECHNIQUES
Undergraduate
This is an advanced course dealing with the principles and techniques of prevention, recognition, and treatment of athletic injuries. (PREREQUISITE: PE 303).
PE 393
THERAPEUTIC MODALITIES AND EXERCISE
Undergraduate
(4 credits) An introduction to principles and protocols for the care of athletic injuries and for the use of exercise in rehabilitation. After the modalities and exercise regimes used in the treatment of athletic injuries are discussed and demonstrated, students will be expected to demonstrate their proper use. (PREREQUISITE(S): PE 392 or permission of the instructor).

PE 394
SPORT AND EXERCISE NUTRITION
Undergraduate
This course will provide the student with advanced knowledge of all areas of nutrition as they relate to the different types of exercise and sports. Prior basic nutritional knowledge is required for successful completion of this course. Topics will include but not limited to substrate utilization during different types of metabolic processes, hyper-hydration and nutrients loading prior to activity, nutrient maintenance during various types of exercise, recovery nutrition, nutrition planning for weight management, sport specific nutrition and consumer issues related to sport supplementation.

PE 399
INDEPENDENT STUDY IN PHYSICAL EDUCATION
Undergraduate
(1 or 4 credits) PREREQUISITE(S): Permission of Department Chair and Associate Dean.

PE 450
PSYCHOLOGY OF SPORT BEHAVIOR AND ATHLETIC PERFORMANCE
Graduate
A study of the philosophical and psychological concepts pertaining to sports, in general, and competitive athletic programs specifically. The course will be conducted in a seminar style, analyzing the various coaching and administrative techniques in sports programs. Emphasis will be given to intercollegiate sports. Elementary, secondary and professional sports programs will be included.

PE 451
CURRENT ISSUES AND TRENDS IN ATHLETICS AND PHYSICAL EDUCATION
Graduate
An analysis of the current issues, trends and changes in competitive athletic programs and physical education programs. Major consideration will be given to problems relating to development of goals and objectives, preparation of program budgets, financial considerations, media input, and legal ramifications of the various programs.

PE 452
EXERCISE SCIENCE AND SPORT
Graduate
A study of the advanced concepts and theory pertaining to analysis of human movement. Application will be made for the teaching of fundamental motor skills as well as the specialized analysis made by the coach. Discussion of the various techniques, sophisticated equipment, and empirical evidence will support the conclusions determined in the seminar. The course will be designed for professional physical educators and individuals involved in the coaching profession.

PE 453
ADVANCED HEALTH CONCEPTS
Graduate
This course will present advanced concepts in health for the individual interested in Health Education or the Allied Health Professions. Emphasis will be placed on instructional methodology, curriculum planning, and educational evaluation in the health profession.

PE 454
ADVANCED CARE OF THE ATHLETE
Graduate
This course is designed to expand the student's knowledge of athletic injuries, incorporating hands-on experience. Topics will include current issues in anatomy and physiology; athletic first aid and emergency situations; standard procedure for diagnosis and treatment; conditioning, prehabilitation and rehabilitation; heat stress injuries; nutrition and eating disorders; taping, wrapping and bracing; and other related topics in sports medicine.
PE 455
INTERNSHIP IN PHYSICAL EDUCATION
Graduate
This internship is designed to enrich student understanding of organizational and administrative principles through practical opportunities working with experienced professionals in the field of Sport and Physical Education.

PE 457
ADVANCED COACHING THEORIES & TECHNIQUES
Graduate
This course is designed to cover a review of basic coaching theories and techniques of various sports and then cover advanced theories and application of these theories. The goal of the course is to expose students to situations that will place the coach in a decision making position and encourage students to examine practical problems that will influence the quality of an athletic program. (Crosslisted with PE 391)

PHL 100
PHILOSOPHY AND ITS ISSUES
Undergraduate
An introduction to basic philosophical concepts, methods, and problems.

PHL 200
ETHICAL THEORIES
Undergraduate
Selected readings to acquaint students with different approaches to ethics.

PHL 202
PHILOSOPHY OF GOD
Undergraduate
An investigation of the ways in which philosophers have talked about, and argued for or against, God.

PHL 204
PHILOSOPHY AND EXISTENTIAL THEMES
Undergraduate
A study of the principal ideas regarding the human condition developed in existential literature: death, absurdity, alienation, freedom, God, authenticity.

PHL 206
TOPICS AND CONTROVERSIES
Undergraduate
A study of selected topics and controversies.

PHL 208
VALUES AND PERSONS
Undergraduate
A study of the connections between different conceptions of selfhood and different ethical, political and aesthetic values.

PHL 229
BIOMEDICAL ETHICS (CROSS-LISTED AS REL 229)
Undergraduate
Moral and ethical issues arising in contemporary biomedical advances and in health care from the perspective of Religious Studies and Philosophy.

PHL 230
CONTEMPORARY TOPICS IN ETHICS
Undergraduate
This course will examine a range of ethical issues of contemporary concern, such as abortion, euthanasia, and capital punishment.
PHL 231
PHILOSOPHY AND THE QUESTION OF RACE
Undergraduate
A philosophical inquiry into such issues as racism, anti-Semitism, genocide.

PHL 232
WHAT IS FREEDOM?
Undergraduate
This course will investigate various conceptions of freedom, and will consider in particular the difference between freedom and "doing or saying whatever you wish."

PHL 233
ISSUES IN SEX AND GENDER
Undergraduate
A philosophical investigation into the nature of sex and gender and the role they play in defining human identity.

PHL 234
PHILOSOPHY AND MODERN SOCIETY
Undergraduate
This course will consider such issues as the relation between society and the state, the connections between work, leisure and poverty, and the social effects of prejudice and resentment.

PHL 235
PHILOSOPHY AND THE ENVIRONMENT
Undergraduate
A philosophical study of our environment, the nature of nature, the ecosystem, and the planet.

PHL 236
PHILOSOPHY AND THE CITY
Undergraduate
This course examines the meaning of the city for philosophy and the meaning of urbanization for the formation of values.

PHL 237
PHILOSOPHY, CONFLICT AND PEACE
Undergraduate
A philosophical reflection upon the causes of war and the possibilities for peace.

PHL 238
PHILOSOPHY AND WOMEN
Undergraduate
An examination of the unique contribution which women have made, and can make, to philosophy and the study of values.

PHL 239
PHILOSOPHIES OF AFRICA
Undergraduate
Philosophies Of Africa

PHL 240
LOVE, HATRED AND RESENTMENT
Undergraduate
A phenomenological inquiry into these three powerful emotional states.
PHL 241
ETHICS AND PUBLIC POLICY
Undergraduate
A study of the ways in which ethics can assist us in thinking about matters of public policy.

PHL 242
PHILOSOPHY AND TECHNOLOGY
Undergraduate
Philosophy And Technology

PHL 243
PHILOSOPHY AND FILM
Undergraduate
A study of philosophical themes that arise in films.

PHL 244
PHILOSOPHICAL THEOLOGY (CROSS-LISTED AS CTH 242)
Undergraduate
An introduction to the interactions of philosophy and Christian theology.

PHL 245
REASON AND SOCIETY
Undergraduate
A study not aimed at the production of particular skills but at understanding of the proper role of reason in social institutions and the formation of public opinion.

PHL 246
SURVEY OF BLACK AESTHETIC THOUGHT (CROSS-LISTED WITH ABD 234)
Undergraduate
This course examines the history of the aesthetic thought that has emerged from the minds of Black creative intellectuals in the United States and globally.

PHL 248
BUSINESS ETHICS (CROSS-LISTED WITH MGT 248)
Undergraduate
An examination of various ethical and moral issues arising in contemporary business and its activities which affect our society and the world.

PHL 250
PHILOSOPHY AND SOCIAL CHANGE
Undergraduate
Junior Year Experiential Learning

PHL 261
GENDER AND VALUES
Undergraduate
An investigation of the philosophical and experiential sides of gender and the values implicit in these.

PHL 262
BLACK FEMINIST THEORIES
Undergraduate
A study of the issues raised by black feminist and womanist writers both in the United States and globally.
PHL 263
PHILOSOPHY AND WOMEN OF COLOR
Undergraduate
An examination of the philosophical work of women of color, from a variety of ethnic, national, and global contexts.

PHL 264
PHILOSOPHY AND POSTCOLONIALITY
Undergraduate
An investigation of the central issues in the work that protests the colonial conditions in the United States and globally.

PHL 280
CRITICAL THINKING
Undergraduate
A study of argumentation as it occurs in everyday life, the media, etc.

PHL 281
BASIC LOGIC
Undergraduate
A study of fundamental logical concepts and techniques, methods of argument, and ways of detecting fallacies.

PHL 282
SYMBOLIC LOGIC I
Undergraduate
Symbolic Logic

PHL 283
SYMBOLIC LOGIC II
Undergraduate
A study of the methods and techniques of formulating and evaluating arguments with the help of symbolic notation.

PHL 287
INTRODUCTION TO ASIAN PHILOSOPHIES
Undergraduate
An introduction to Asian Philosophy, examining some of the central philosophical issues and movements in Asian thought, such as Hinduism, Buddhism, Confucianism, and Daoism.

PHL 290
PHILOSOPHIES OF GENDER
Undergraduate
A philosophical investigation into the concepts of sex and gender as categories of identity and their relation to philosophical knowledge.

PHL 291
MORAL PHILOSOPHY
Undergraduate
A philosophical investigation of ethical issues and theories.

PHL 100 is a prerequisite for this course.
PHL 292
PROSEMINAR IN PHILOSOPHICAL WRITING
Undergraduate
Proseminar in philosophical writing.

PHL 100 is a prerequisite for this course.

PHL 293
ANCIENT PHILOSOPHY
Undergraduate
A study of selected thinkers and issues from ancient Greece.

PHL 100 is a prerequisite for this course.

PHL 294
MEDIEVAL PHILOSOPHY
Undergraduate
A study of selected thinkers and issues from the Medieval period.

PHL 100 is a prerequisite for this course.

PHL 295
EARLY MODERN PHILOSOPHY
Undergraduate
A study of some of the main philosophers and philosophical movements from the 17th and 18th centuries.

PHL 100 is a prerequisite for this course.

PHL 296
KANT & 19TH CENTURY PHILOSOPHY [FORMERLY PHL 313]
Undergraduate
A study of Kant and some of the most influential thinkers of the 19th century.

PHL 100 is a prerequisite for this course.

PHL 297
20TH CENTURY PHILOSOPHY
Undergraduate
A study of selected thinkers and issues from the 20th century.

PHL 100 is a prerequisite for this course.

PHL 314
SURVEY OF ETHICS
Undergraduate
An intensive study of the broad range of the history of and approaches to ethics.

PHL 100 is a prerequisite for this course.

PHL 315
SURVEY OF POLITICAL PHILOSOPHY
Undergraduate
An intensive study of the broad range of the history of and approaches to political philosophy.

PHL 100 is a prerequisite for this course.
PHL 320
METAPHYSICS
Undergraduate
A critical examination of selected metaphysical systems and issues.

PHL 100 is a prerequisite for this course.

PHL 321
EPISTEMOLOGY
Undergraduate
An investigation of some of the central issues in the philosophy of knowledge, including the nature of knowledge, truth and certainty.

PHL 100 is a prerequisite for this course.

PHL 322
PHILOSOPHY OF LANGUAGE
Undergraduate
An investigation into the nature of language and its significance for philosophical inquiry.

PHL 100 is a prerequisite for this course.

PHL 325
BASIC CONCEPTS OF PHENOMENOLOGY
Undergraduate
This course emphasizes the principal themes of such thinkers as Husserl, Merleau-Ponty and Heidegger.

PHL 100 is a prerequisite for this course.

PHL 327
TOPICS IN ETHICS
Undergraduate
A focused discussion of specific issues in moral and ethical philosophy.

PHL 100 is a prerequisite for this course.

PHL 328
TOPICS IN ECONOMIC, SOCIAL AND POLITICAL PHILOSOPHY
Undergraduate
A focused discussion of specific issues in economic, social and political philosophy.

PHL 100 is a prerequisite for this course.

PHL 330
JUNIOR HONORS OPTION
Undergraduate
Junior Honors Option

PHL 340
PHILOSOPHY OF RELIGION
Undergraduate
A study into the significance of religious phenomena for philosophy.

PHL 100 is a prerequisite for this course.
PHL 341
AESTHETICS
Undergraduate
A study of the relationship of philosophy and the arts, with a critical appraisal of theories of beauty.

PHL 100 is a prerequisite for this course.

PHL 342
PHILOSOPHY OF LAW
Undergraduate
An examination of fundamental legal concepts, and particularly of the concept of law itself.

PHL 100 is a prerequisite for this course.

PHL 343
PHILOSOPHIES OF PUNISHMENT
Undergraduate
An examination of theories of punishment, particularly the two dominant western concepts of retributive and rehabilitative.

PHL 100 is a prerequisite for this course.

PHL 350
PHILOSOPHY AND THE NATURAL SCIENCES
Undergraduate
Philosophy And The Natural Sciences

PHL 353
PHILOSOPHY AND HISTORY (CROSS-LISTED AS HST 261)
Undergraduate
A study of some of the most significant theories of history.

PHL 100 is a prerequisite for this course.

PHL 354
PHILOSOPHY AND PSYCHOLOGY
Undergraduate
A philosophical inquiry into the nature and history of psychology, psychoanalysis, and psychotherapy.

PHL 100 is a prerequisite for this course.

PHL 355
THEORIES OF INTERPRETATION (CROSS-LISTED AS CTH 336)
Undergraduate
Philosophical hermeneutics and Biblical interpretation.

PHL 100 is a prerequisite for this course.

PHL 356
TOPICS IN POSTMODERNISM
Undergraduate
A philosophical study of selected themes concerning the condition of, and works about, postmodernity.

PHL 100 is a prerequisite for this course.
PHL 357
TOPICS IN PSYCHOANALYSIS
Undergraduate
Selected philosophical issues in psychoanalysis, for example, from early writers like Janet through contemporary theorists such as Irigaray.

PHL 100 is a prerequisite for this course.

PHL 360
GREEK PHILOSOPHY
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 361
PLATO
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 362
ARISTOTLE
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 363
MEDIEVAL AND RENAISSANCE PHILOSOPHY
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 364
17TH AND 18TH CENTURY RATIONALISM
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 365
17TH AND 18TH CENTURY EMPIRICISM
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 366
DESCARTES
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 367
THE ENLIGHTENMENT
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 368
GERMAN IDEALISM
Undergraduate
German Idealism
PHL 369
KANT
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 370
HEGEL
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 371
19TH CENTURY PHILOSOPHY
Undergraduate
19Th Century Philosophy

PHL 372
MARX
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 373
NIETZSCHE
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 375
PHENOMENOLOGY AND EXISTENTIALISM
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 376
AMERICAN PHILOSOPHY
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 377
PHILOSOPHY AND DECONSTRUCTION
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 378
ANALYTIC PHILOSOPHY
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 379
EASTERN THOUGHT
Undergraduate
Eastern Thought
PHL 380
SELECTED FIGURES AND TEXTS
Undergraduate
PHL 100 is a prerequisite for this course.

PHL 381
DRAMATIC THEORY: TRAGEDY (CROSS-LISTED AS THE 224)
Undergraduate
A study of some of the main philosophical theories of tragedy together with readings of some of the most important ancient and modern tragedies.
PHL 100 is a prerequisite for this course.

PHL 382
DRAMATIC THEORY: COMEDY (CROSS-LISTED AS THE 225)
Undergraduate
A study of some of the main philosophical theories of comedy together with readings of some of the most important ancient and modern comedies.
PHL 100 is a prerequisite for this course.

PHL 383
PHILOSOPHICAL THEMES IN LITERATURE
Undergraduate
An investigation of philosophical topics as they appear in fiction, drama, and poetry.
PHL 100 is a prerequisite for this course.

PHL 384
FEMINIST ETHICS
Undergraduate
A study and critique of various feminist theories of ethics.
PHL 100 is a prerequisite for this course.

PHL 385
FEMINIST PHILOSOPHIES
Undergraduate
A study and critique of issues related to women and of their philosophical presuppositions and consequences.
PHL 100 is a prerequisite for this course.

PHL 386
PHILOSOPHIES OF AFRICA
Undergraduate
A study of patterns of philosophical thinking from the African continent.
PHL 100 is a prerequisite for this course.

PHL 387
TOPICS IN ASIAN PHILOSOPHY
Undergraduate
Focuses on a particular issue, figure, or period in Asian philosophy. Topics will vary according to instructor.
**PHL 388**  
**TOPICS IN COMPARATIVE PHILOSOPHY**  
Undergraduate  
Draws on philosophies from different cultures to explore philosophical issues from a comparative perspective. Topics and areas will vary according to instructor.

**PHL 389**  
**LATIN AMERICAN PHILOSOPHY**  
Undergraduate  
What does it mean to speak of Latin American philosophy? What is the difference between merely doing philosophy in Latin America and doing Latin American philosophy? These are issues that some thinkers in Latin America grapple with. This course will explore the history and nature of Latin American philosophy. Moreover, we shall examine some of the reasons why, in sharp contrast to the European and Anglo-American philosophical traditions, questions of the very existence of an autochthonous Latin American philosophical tradition are heatedly debated both in Latin America and beyond.

**PHL 390**  
**SELECTED TOPICS AND CONTROVERSIES**  
Undergraduate  
SELECTED TOPICS AND CONTROVERSIES

**PHL 391**  
**SENIOR CAPSTONE SEMINAR**  
Undergraduate  
A capstone seminar on selected topics in philosophy, that integrates the goals of the liberal studies program.

**PHL 392**  
**TOPICS IN FEMINIST PHILOSOPHY**  
Undergraduate  
Selected issues or approaches within feminist work, such as feminist metaphysics, feminist peace theory, particular feminist figures, and the like.

PHL 100 is a prerequisite for this course.

**PHL 393**  
**TOPICS IN CRITICAL RACE THEORY**  
Undergraduate  
A study of the intersection of issues from critical race theory and feminist/gender studies.

PHL 100 is a prerequisite for this course.

**PHL 394**  
**TOPICS IN POSTCOLONIALISM**  
Undergraduate  
Selected philosophical issues in postcolonial writings, such as notions of identity and place, key figures, representation and film, and the like.

PHL 100 is a prerequisite for this course.

**PHL 395**  
**SENIOR THESIS**  
Undergraduate  
An opportunity for intensive independent work, open to philosophy majors of outstanding achievement. By petition only. Contact the department office for further information. Philosophy 395 is not applicable to major field requirements, though it may be used as an open elective. Permission required.
PHL 396
**INDIAN PHILOSOPHY**
Undergraduate
An investigation into various philosophies as they originated in India, for instance, Hinduism substance metaphysics, Buddhist process metaphysics, Charvakan materialism.

PHL 100 is a prerequisite for this course.

PHL 398
**TRAVEL/ STUDY**
Undergraduate
By arrangement with sponsoring faculty, foreign and domestic travel or residence programs may be combined with lectures, readings, and research assignments. Variable credit.

PHL 399
**INDEPENDENT STUDY**
Undergraduate
Independent Study

PHL 100 is a prerequisite for this course.

PHL 400
**SPECIAL TOPICS IN TRADITIONAL PHILOSOPHERS**
Graduate
Special Topics In Traditional Philosophers

PHL 410
**PLATO I**
Graduate
A study of Plato's life and early dialogues.

PHL 411
**PLATO II**
Graduate
A study of the middle and later dialogues.

PHL 415
**ARISTOTLE I**
Graduate
A study of Aristotle's life and selected topics of his theoretical philosophy: organon, physics, psychology, and metaphysics.

PHL 416
**ARISTOTLE II**
Graduate
A study of aspects of Aristotle's practical and productive philosophy: ethics, politics, rhetoric, and poetics.

PHL 420
**AUGUSTINE**
Graduate
A study of Augustine's philosophy through an examination of some of his major writings.

PHL 425
**AQUINAS**
Graduate
A study of his philosophy, especially its relations to theology, through an examination of selected major works.
An examination of Hobbes' role as the father of modern political philosophy: a study of the Leviathan and the Elements of Law.

An examination of Descartes' role as the father of modern philosophy; issues of the Regulae, the Discours, and the Meditations.

A study of the major theoretical works.

A study of the major philosophical works.

A study of the Ethics and/or the Theologico-Political Treatise.

A study of the major theoretical works.

An examination of contemporary problems in the area of medical legal ethics.

An examination of Hume's place in classical British empiricism; a study of A Treatise of Human Nature.
PHL 452
CONTEMPORARY AMERICAN PHILOSOPHY
Graduate
None

PHL 470
PHILOSOPHY OF WITTGENSTEIN
Graduate
PHL 495
ADVANCED SYMBOLIC LOGIC
Graduate
None

PHL 500
SPECIAL TOPICS IN THE HISTORY OF PHILOSOPHY
Graduate
None

PHL 510
KANT I
Graduate
An introduction to the critical philosophy of Kant by concentrating on the Critique of Pure Reason.

PHL 511
KANT II
Graduate
A study of the Critique of Practical Reason or the Critique of Judgment.

PHL 512
KANT III
Graduate
Kant III: Kant's Political Writings

PHL 513
THEORETICAL FOUNDATIONS OF NORMATIVE ETHICS I
Graduate
A comparative overview of the ethical writings of Aristotle and Aquinas, with emphasis on the natural law tradition.

PHL 514
THEORETICAL FOUNDATIONS OF NORMATIVE ETHICS II
Graduate
A comparative overview of Kant's moral theory and Mill's moral theory.

PHL 515
HEGEL I
Graduate
An Introduction to Hegel: The Phenomenology of Spirit.

PHL 516
HEGEL II
Graduate
Readings in the Science of Logic or the Philosophy of Right.
PHL 517
HOLDERLIN
Graduate
An examination of the major theoretical writings, ca. 1797-1804.

PHL 518
SCHELING
Graduate
An examination of the treatise on human freedom (1809).

PHL 520
MARX I
Graduate
An introduction to Marx through a study of selected topics and works.

PHL 521
MARX II
Graduate
A study of selected topics and works from both Marx/Engels and their disciples.

PHL 522
SOCIAL AND POLITICAL PHILOSOPHY
Graduate
None

PHL 525
NIETZSCHE
Graduate
An introduction to the philosophy of Nietzsche through Beyond Good and Evil, Thus Spake Zarathustra and selected topics and works.

PHL 527
PHILOSOPHY, ETHICS, AND ECONOMICS
Graduate
An examination of classical and contemporary theories from Smith and Marx to Friedman, Held and others.

PHL 535
HUSSERL I
Graduate
An introduction to Husserl through a study of selected topics and works.

PHL 536
HUSSERL II
Graduate
Selected topics and works.

PHL 540
SCHELER I
Graduate
An introduction to Scheler, with emphasis on the phenomenology of value.
PHL 541
SCHELER II
Graduate
Selected topics and works (Resentment, etc.).

PHL 550
HEIDEGGER I
Graduate
An introduction to Heidegger through study of a major work and one of the Marburg lectures.

PHL 551
HEIDEGGER II
Graduate
Selected topics and questions.

PHL 552
HEIDEGGER III
Graduate
Heidegger III

PHL 557
TOPICS IN CONTINENTAL PHILOSOPHY
Graduate
None

PHL 559
FOUCAULT
Graduate
An introduction to Foucault through a study of selected topics and works.

PHL 560
THE PHILOSOPHY OF GABRIEL MARCEL
Graduate
The Philosophy Of Gabriel Marcel

PHL 561
LYOTARD
Graduate
An introduction to Lyotard through a study of selected topics and works.

PHL 565
MERLEAU-PONTY I
Graduate
A study of The Phenomenology of Perception with consideration given to Merleau-Ponty's place in contemporary philosophy.

PHL 566
MERLEAU-PONTY II
Graduate
A study of the themes of his social philosophy and final ontology.
PHL 570
SARTRE I
Graduate
A study of Being and Nothingness with attention given to Sartre's early phenomenological studies as background and to some of his literary works and criticism, such as Nausea and Saint-Genet.

PHL 571
SARTRE II
Graduate
The social thought of Jean-Paul Sartre. A study of A Critique of Dialectic Reason along with appropriate literary works and more recent political writings.

PHL 575
RESPONSES TO SADE
Graduate
An examination of Sade's writings and responses by such thinkers as de Beauvoir, Lacan, Deleuze, Klossowski, and Blanchot.

PHL 577
DERRIDA I
Graduate
An introduction to Derrida through a study of selected topics and works.

PHL 578
DERRIDA II
Graduate
Selected topics and questions.

PHL 584
RICOEUR NARRATIVE
Graduate
Ricoeur Narrative

PHL 585
RICOEUR
Graduate
A study of Ricoeur's philosophy and phenomenology of the will with stress on its background and its place in contemporary French phenomenology.

PHL 586
METAPHOR AND POETIC LANGUAGE
Graduate
An examination of Ricoeur's work in poetics.

PHL 587
READING LEVINAS I
Graduate
Reading Levinas I

PHL 588
READING LEVINAS II
Graduate
Reading Levinas II
PHL 589
PHILOSOPHY, LITERATURE, COMMUNITY
Graduate
Discussion of such thinkers as Bataille, Derrida, Jabes, and Nancy.

PHL 590
TRENDS IN CONTEMPORARY FRENCH PHILOSOPHY
Graduate
A look at the increasing importance of structuralism, deconstruction, philosophy of language, and hermeneutics in contemporary French thought.

PHL 591
CRITICAL RACE THEORY
Graduate
Critical Race Theory.

PHL 600
SEMINAR ON AMERICAN THOUGHT
Graduate
None

PHL 601
SEMINAR ON AESTHETICS
Graduate
SEMINAR ON AESTHETICS

PHL 629
SEMINAR ON CONTEMPORARY PROBLEMS
Graduate
None

PHL 639
SEMINAR ON RAWLS, NOZICK, AND THE CONTRACTUAL TRADITION
Graduate
A study of the contract model from its roots in Locke and Rousseau to the work of Rawls and Nozick.

PHL 640
PROBLEMS IN ETHICS (CROSS-LISTED AS GSB 640)
Graduate
A seminar in business ethics that centers on theoretical, practical, and pedagogical issues.

PHL 641
SEMINAR ON THE CONTINENTAL TRADITION IN ETHICS
Graduate
A comparative discussion of the ethical theories of Scheler, Hartmann, Brentano, Levinas, etc.

PHL 650
TOPICS IN RELIGIOUS ETHICS (CROSS-LISTED AS MLS 442 & GSB 650)
Graduate
A study of religious influences on theoretical and practical ethics.
PHL 651
TOPICS IN BUSINESS ETHICS
Graduate
A seminar in business ethics that centers on theoretical, practical, and pedagogical issues.

PHL 656
SEMINAR ON SOCIAL AND POLITICAL THOUGHT
Graduate
A study of selected writings of key social and political thinkers.

PHL 657
TOPICS IN SOCIAL AND POLITICAL THOUGHT
Graduate
Topics In Social And Political Thought

PHL 660
SEMINAR IN FEMINIST ETHICS (CROSS-LISTED AS MLS 477/ WMS 410)
Graduate
Examination of the care perspective as compared to the justice perspective on moral development.

PHL 661
TOPICS IN FEMINIST THEORY
Graduate
Includes such themes as feminist ontologies, theories of discourse and writing, science and technology, etc.

PHL 697
GRADUATE TEACHING PRACTICUM
Graduate
Examination of teaching method concepts.

PHL 698
MASTER’S THESIS RESEARCH
Graduate

PHL 699
DISSERTATION RESEARCH
Graduate

PHL 700
INDEPENDENT STUDY
Graduate
None

PHL 701
CANDIDACY CONTINUATION
Graduate
Students admitted to candidacy who have completed all Ph.D. course requirements and who are actively working on their dissertations during the quarter are to register by permission of the graduate director. Students are required to be registered for either PHL 701: Candidacy Continuation or PHL 799: Candidacy Maintenance each quarter of the academic year until the dissertation has been defended and the degree completed. The latter course, PHL 799, is to be used during quarters when the student is not actively doing dissertation work. Non-credit, $40.00 per quarter.
**PHL 799**  
**CANDIDACY MAINTENANCE**  
**Graduate**  
Ph.D. Candidates who are not actively working on their dissertations during a given quarter but who want to maintain active university status can register for this course by permission of the graduate director. Please note that this course does not maintain student status for purposes of student loans. Non-credit, $40.00 per quarter.

**PHY 104**  
**THE SUN & ITS PLANETS**  
**Undergraduate**  
Focuses on the development of our knowledge about the Solar System with an emphasis on the origin, structure and motion of the planets and the Sun. Topics include both historical astronomy and our current understanding based on information from spacecraft sent to other planets. Cannot receive credit for both PHY 104 and PHY 114. Lab fee.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

**PHY 110**  
**BASIC ELECTRONICS: PRINCIPLES & TECHNIQUES**  
**Undergraduate**  
Introduction to analog electronics that develops the basic principles needed to understand consumer electronics. Emphasis is given to audio applications, but the same basic principles are the foundation of modern computer technology. Lab Fee.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

**PHY 114**  
**EXPLORING OTHER WORLDS**  
**Undergraduate**  
Activity-based course that compares the local environment of Earth in the Solar System to worlds and environments elsewhere in the Universe. Cannot receive credit for both PHY 104 and PHY 114. Lab fee.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

**PHY 120**  
**HOW THINGS WORK**  
**Undergraduate**  
This course will develop an understanding of the physics of everyday objects and experiences such as bouncing balls, roller coasters, balloons, thermostats, violins, microwave ovens and sunglasses. The relevant physics concepts will be introduced through demonstrations and simple experiments.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

**PHY 150**  
**GENERAL PHYSICS I**  
**Undergraduate**  
Mechanics, vibrations and fluids. Laboratorv fee.

MAT 131 or above is a prerequisite for this class.

**PHY 151**  
**GENERAL PHYSICS II**  
**Undergraduate**  
Heat, thermodynamics, sound and light. Laboratory fee.

PHY 150 is a prerequisite for this class.
PHY 152
GENERAL PHYSICS III
Undergraduate
Electricity, magnetism and modern physics. Laboratory fee.
PHY 151 is a prerequisite for this class.

PHY 155
GENERAL PHYSICS
Undergraduate
Includes Physics 150 plus half of 151. Summer only. 6 hours. Laboratory fee.
MAT 131 or above is a prerequisite for this class.

PHY 156
GENERAL PHYSICS
Undergraduate
Includes half of Physics 151 plus 152. Summer only. 6 hours. Laboratory fee.
PHY 155 is a prerequisite for this course.

PHY 170
UNIVERSITY PHYSICS I
Undergraduate
Mechanics and fluids. Laboratory fee. Autumn. COREQUISITE(S): MAT 147 or MAT 160 or MAT 170.
MAT 147 or MAT 160 or MAT 170 is a corequisite for this class.

PHY 171
UNIVERSITY PHYSICS II
Undergraduate
Heat, sound and light. Laboratory fee. Winter COREQUISITE(S): MAT 161 or 171 or 148.
PHY 170 is a prerequisite for this course.

PHY 172
UNIVERSITY PHYSICS III
Undergraduate
Electricity and magnetism. Laboratory fee. Spring COREQUISITE(S):MAT 162 or 172 or 149.
PHY 171 is a prerequisite for this course.

PHY 190
MATLAB PROGRAMMING FOR SCIENTISTS AND MATHEMATICIANS
Undergraduate
Introduction to the Matlab Programming environment with an emphasis on applications of interest to science and mathematics students. Topics include basic operations, functions and scripts, arguments and scope, and graphics. Applications include curve fitting, visualization of data, root finding, and solving systems of equations.

PHY 200
LIGHT AND ATOMS
Undergraduate
A conceptual treatment of light and matter, which emphasizes the counter-intuitive behavior of atoms, electrons and photons. Topics covered include the electrical nature of matter, wave-particle duality, the uncertainty principle, and philosophical implications. Some applications to technology will also be discussed such as lasers, fiber optic communication, superconductivity, and magnetic storage of data. lab fee.
LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course,
PHY 204
FRONTIERS OF THE UNIVERSE
Undergraduate
Focuses on the tremendous increase in our understanding of the universe beyond the Solar System that has occurred in recent years. Topics include stellar evolution, the properties of stars, supernova explosions, black holes, galaxies, and the origin of the universe.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

PHY 205
EINSTEIN'S PECULIAR IDEAS
Undergraduate
A conceptual treatment of Einstein's groundbreaking ideas about space, time, and the nature of reality. Topics covered include special relativity, Einstein's contributions to quantum physics, including his criticisms of its orthodox interpretation, and some aspects of his theory of gravity. Aspects of Einstein's thoughts on social issues will also be briefly discussed.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

PHY 206
SOUND AND ACOUSTICS
Undergraduate
Sound waves, their production, transmission and detection; applications to music, acoustics and noise pollution. Lab fee.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

PHY 220
THE DYNAMIC OCEAN (CROSS-LISTED WITH GEO 220)
Undergraduate
Develops the concepts of physical oceanography. Topics include the chemical and physical properties of seawater, the dynamics of ocean currents and circulations, the physics of water waves and tides, the interaction of the ocean with the atmosphere, the formation of coastlines, and the effects of pollution on the ocean. Cross-listed with GEO 220.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

PHY 223
LIGHT, COLOR, AND PHOTOGRAPHY (CROSS-LISTED WITH ART 223)
Undergraduate

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

PHY 225
WEATHER AND CLIMATE [SI:QT] [PREREQ(S): LSP 120 OR HON 180] [CROSS-LISTED WITH GEO 225]
Undergraduate
Develops the physical concepts needed to understand the atmosphere, the oceans, and their interactions with the aim of building a conceptual model of weather and climate. Long-term climate variability and climate related environmental issues are also discussed. Cross-listed with GEO 225.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

PHY 231
LINEAR ELECTRIC CIRCUITS
Undergraduate
Frequency response and feedback, operational amplifiers as linear amplifiers, active filters, oscillators, communication circuits and data conversion circuits. Lab fee

PHY 110 is a prerequisite for this course.
**PHY 232**
**INTRODUCTION TO DIGITAL ELECTRONICS**
Undergraduate

Principles of combinational logic circuits. Boolean algebra and Boolean function simplification. State diagrams and sequential logic circuits, and MSI devices. Digital circuit prototyping using SSI components. (lab fee)

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

---

**PHY 236**
**THE SCIENCE OF DIGITAL AUDIO**
Undergraduate

Introduction to the physics and mathematics of digital audio, including the conversion of sound energy into electrical signals, the digitization of the signal, conversion of the signal to a standard format, storage of the signal on a hard disk or a CD, and manipulation of the digitized signal. Also includes a discussion of the ethics and legality of downloading digitized audio, in the context of intellectual property rights. This course assumes familiarity with trigonometric mathematical functions.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

---

**PHY 270**
**UNIVERSITY PHYSICS IV**
Undergraduate

20th-century physics. Lab Fee Autumn

PHY 172 is a prerequisite for this course.

---

**PHY 300**
**METHODS OF COMPUTATIONAL AND THEORETICAL PHYSICS I**
Undergraduate

Computational and theoretical methods in ordinary differential equations, complex numbers, systems of equations, phase plane analysis, bifurcations. Applications to damped, driven oscillators, electronics. Lab Fee Winter COREQUISITE(S): MAT 261.

---

**PHY 301**
**METHODS OF COMPUTATIONAL AND THEORETICAL PHYSICS II**
Undergraduate

Fourier series, Fourier transforms, partial differential equations, Legendre polynomials, special functions. Applications to wave motion, electricity and magnetism, modern physics, optics. lab fee. Spring

PHY 300 is a prerequisite for this course.

---

**PHY 310**
**MECHANICS I**
Undergraduate

One-, two-, and three-dimensional motion, conservative systems, Lagrangian and Hamiltonian mechanics, central-force problems.

PHY 300 is a prerequisite for this course.

---

**PHY 311**
**MECHANICS II**
Undergraduate

Systems of particles, collisions and scattering, motion in rotating frames, rigid body motion.

PHY 310 is a prerequisite for this course.
PHY 315  
**CHAOS IN PHYSICAL SYSTEMS**  
*Undergraduate*  
Motion in phase space, characteristics of chaotic systems, Lyapunov exponents, stability of equilibrium solutions, strange attractors, bifurcations, discrete dynamics, and applications to lasers, fluids, and other physical systems.

PHY 300 is a prerequisite for this course.

PHY 320  
**ELECTRICITY AND MAGNETISM I**  
*Undergraduate*  
Electrostatics, magnetostatics, and boundary-value problems.

PHY 301 is a prerequisite for this course.

PHY 321  
**ELECTRICITY AND MAGNETISM II**  
*Undergraduate*  
Time varying fields, electromagnetic waves, and radiation.

PHY 320 is a prerequisite for this course.

PHY 325  
**LASER PHYSICS (CROSS-LISTED AS PHY 425)**  
*Undergraduate*  
Interaction of radiation and matter, pumping mechanisms for lasers, optical resonators, cw and transient laser behavior, laser types, current topics in optical physics.

PHY 300 is a prerequisite for this course.

PHY 330  
**SENIOR CAPSTONE PHYSICAL SCIENCE**  
*Undergraduate*  
Senior Capstone in the Physical Sciences. Topics in the physical sciences and their social, political, environmental and economic impact.

Student standing of at least junior level is a prerequisite for this course.

PHY 335  
**NON-EQUILIBRIUM PHYSICS AND SELF-ORGANIZATION**  
*Undergraduate*  
The spontaneous formation of structure is one of the most interesting phenomenon in nature and arises in fields as diverse as physics, chemistry, biology, management, economics, and sociology. Many self-organizing systems show similarities in the way the structure arises, indicating that there are underlying general principles that govern these systems. This course will investigate these principles. PHY 340 or consent recommended.

PHY 340  
**THERMAL PHYSICS**  
*Undergraduate*  
Statistical interpretation of the laws of thermodynamics and physical applications.

PHY 301 is a prerequisite for this course.

PHY 342  
**COMPUTATIONAL PHYSICS**  
*Undergraduate*  
Computational solution and simulation of physical systems; applications chosen from nonlinear dynamics, optics, central-force motion, fluids, condensed matter.

PHY 301 is a prerequisite for this course.
Matrix methods for image formation, diffraction, interferometry, coherence, scattering, polarization, holography, Fourier transform spectroscopy. PHY 320 recommended.

Solution of Maxwell's equations for dielectric waveguides, optical communications, nonlinear effects in dielectric waveguides, and current research. PHY 321 recommended.

Introduction to quantum mechanics, including the solution of the Schrodinger equation in one and three dimensions for a variety of potentials. Applications to atomic systems and solids.

PHY 301 is a prerequisite for this course.

Applications of quantum mechanics, including time-independent and time-dependent perturbation theory, the variational principle, and an introduction to scattering theory.

PHY 360 is a prerequisite for this course.

Theoretical and phenomenological approaches to nuclear structure and strong, electromagnetic, and weak interactions of nuclei. Topics of study include the theory of scattering and decay of nuclei, resonances, nuclear models.

PHY 360 is a prerequisite for this course.

Radioactive decay processes, interactions of radiation with matter, general properties of radiation detectors, and applications to basic nuclear spectroscopy, health physics and medical physics. Cross-listed w/ PHY 466.

PHY 270 is a prerequisite for this course.

A laboratory course covering analysis and construction of analog and digital circuits used in experimental research. Lab fee

Provides a foundation to the core concepts of cosmology, with an emphasis on developing physical insight. Discusses recent major developments in cosmology, such as the cosmological constant and accelerating universe, and key future developments, including details of the cosmic microwave background and gravitational wave detection. PHY 310 recommended.
PHY 378
TOPICS IN APPLIED PHYSICS
Undergraduate
Current topics in applied physics, as determined by the interests of the instructor and students.

PHY 301 is a prerequisite for this course.

PHY 380
EXPERIMENTAL PHYSICS I
Undergraduate
Experimental techniques in optics, atomic and nuclear physics. Approved for Experiential Learning Credit. Laboratory.

PHY 270 is a prerequisite for this course.

PHY 381
EXPERIMENTAL PHYSICS II
Undergraduate
Experimental techniques in solid-state and high-vacuum physics. Laboratory.

PHY 380 is a prerequisite for this course.

PHY 382
EXPERIMENTAL PHYSICS III
Undergraduate
Experimental Physics III (laboratory)

PHY 381 is a prerequisite for this course.

PHY 384
ADVANCED LABORATORY
Undergraduate
Variable credit Laboratory experience in techniques selected in consultation with instructor. Lab fee.

PHY 390
APPLIED COMPUTATIONAL PHYSICS LABORATORY
Undergraduate
Project-based computational laboratory of problems in modern applied physics. Numerical modeling of experiments, computer interfacing of experiments, computational techniques in data analysis.

PHY 301 is a prerequisite for this course.

PHY 391
ELECTRONIC PROPERTIES OF MATERIALS
Undergraduate
The free-electron gas model, energy band theory, theory of metals and alloys, transport phenomena, dia-and para-magnetism, ferromagnetism, and antiferromagnetism, superconductivity.

PHY 360 is a prerequisite for this course.

PHY 392
STRUCTURAL PROPERTIES OF MATERIALS
Undergraduate
Periodicity, symmetry and classification of crystal structure, X-ray diffraction, reciprocal lattice, crystal binding, Debye theory of heat capacity, anharmonic interactions, point defects, surfaces.

PHY 360 is a prerequisite for this course.
PHY 395
METHODS OF THEORETICAL PHYSICS
Undergraduate
Special functions, complex integration, calculus of variations, coordinate transformations.

PHY 301 is a prerequisite for this course.

PHY 398
READING AND RESEARCH
Undergraduate
Undergraduate research participation. Variable credit.

PHY 399
INDEPENDENT STUDY
Undergraduate
Independent Study. Variable credit.

PHY 400
CLASSICAL MECHANICS FOR TEACHERS
Graduate
Concepts and materials for teaching mechanics as part of high school physics. Only offered by arrangement.

PHY 401
ELECTRICITY AND MAGNETISM FOR TEACHERS
Graduate
The principles of electricity and magnetism, including electric circuits. This level is appropriate for regular and AP high school Physics teachers. Only offered by arrangement.

PHY 402
ATOMIC AND NUCLEAR PHYSICS FOR TEACHERS
Graduate
This course provides a broad perspective for teachers. It includes atomic, nuclear and some particle physics. Only offered by arrangement.

PHY 403
TOPICS IN PHYSICS TEACHING
Graduate
Selected topics for high school teachers. May be taken more than once. Only offered by arrangement.

PHY 404
OPTICS FOR TEACHERS
Graduate
Geometrical and physical optics from the perspective of high school teaching. Applications to photography and holography. Only offered by arrangement.

PHY 406
VIBRATIONS, WAVES AND SOUND FOR TEACHERS
Graduate
Techniques for teaching high school science including musical acoustics and sound reproduction. Only offered by arrangement.

PHY 410
CHAOS IN PHYSICAL SYSTEMS
Graduate
Motion in phase space, characteristics of chaotic systems, Lyapunov exponents, stability of equilibria, strange attractors, bifurcations, discrete dynamics, applications to lasers, fluids, and other physical systems.
PHY 411
ELECTRODYNAMICS I
Graduate
Electrostatics and magnetostatics in vacuum and in media; electromagnetic induction; Maxwell's equations; the Poynting vector; electromagnetic wave propagation.

PHY 412
QUANTUM MECHANICS I
Graduate
Schroedinger equation, operators, eigenvalues; series of eigenfunctions; physical interpretation; one- and three-dimensional applications.

PHY 420
ELECTRODYNAMICS II
Graduate
Further studies of electromagnetic wave propagation; scattering; dispersion; bounded structures and guided waves; electromagnetic radiation, including multipole radiations and radiation from systems of radiators.

PHY 411 is a prerequisite for this course.

PHY 425
LASER PHYSICS (CROSS-LISTED AS PHY 325)
Graduate
Interaction of radiation and matter, pumping mechanisms for lasers, optical resonators, cw and transient laser behavior, laser types, current topics in optical physics.

PHY 435
NON-EQUILIBRIUM PHYSICS AND SELF-ORGANIZATION
Graduate
The spontaneous formation of structure is one of the most interesting phenomenon in nature and arises in fields as diverse as physics, chemistry, biology, management, economics, and sociology. Many self-organizing systems show similarities in the way the structure arises, indicating that there are underlying general principles that govern these systems. This course will investigate these principles. PHY 340 or consent recommended.

PHY 440
CLASSICAL MECHANICS
Graduate
Variational principles; Lagrangian and Hamiltonian mechanics; small oscillations; canonical transformations; Hamilton-Jacobi theory.

PHY 442
COMPUTATIONAL PHYSICS
Graduate
Contemporary Topics in physics are examined via numerical solutions. Calculations using an interactive approach and graphical representation are used extensively.

PHY 445
STATISTICAL MECHANICS
Graduate
Principles of statistical mechanics; applications to weakly interacting systems such as the classical plasma and Fermi gas; strongly interacting systems; transport theory; fluctuations and irreversible processes, phase transitions.
PHY 450
PHASE TRANSITIONS & CRITICAL PHENOMENON
Graduate
Applications of equilibrium statistical mechanics to the study of phase transitions and critical phenomena. Topics include the Ising model of magnetism, critical phenomena in fluids, mean field theory, Landau-Ginzburg theory, and the renormalization group.

PHY 340 and PHY 445 are prerequisites for this course.

PHY 454
FOURIER OPTICS
Graduate
Fourier Optics and optical processing of information. Topics include diffraction theory, optical transfer functions and holography. The Fourier Transform and Fast Fourier Transform are used extensively.

PHY 456
FIBER OPTICS (CROSS-LISTED AS PHY 356)
Graduate
(Cross-listed as PHY 356) Solution of Maxwell's equations for dialectic wave guides, optical communications, nonlinear effect in dialectic wave guides, and current research.

PHY 460
QUANTUM MECHANICS II
Graduate
Review of basic quantum theory; vector spaces; linear operators; observables; commutators; projection operations; representations; angular momentum theory; systems of identical particles; invariance.

PHY 412 is a prerequisite for this course.

PHY 465
NUCLEAR PHYSICS
Graduate
Theoretical and phenomenological approaches to nuclear structure and strong, electromagnetic, and weak interactions of nuclei. Topics of study include the theory of scattering and decay of nuclei, resonances, nuclear models.

PHY 412 is a prerequisite for this course.

PHY 466
RADIATION PHYSICS (CROSS-LISTED WITH PHY 366)
Graduate
Interactions of X-rays, nuclear radiations, etc. with matter; radiation detectors; dosimetry; shielding; applications to medical physics. Cross-listed with PHY 366.

PHY 475
INTRODUCTION TO COSMOLOGY
Graduate
Provides a foundation to the core concepts of cosmology, with an emphasis on developing physical insight. Discusses recent major developments in cosmology, such as the cosmological constant and accelerating universe, and key future developments, including details of the cosmic microwave background and gravitational wave detection.

PHY 478
TOPICS IN APPLIED PHYSICS
Graduate
This course number is reserved for individual study at the graduate level. Special seminars organized from time to time to accommodate the needs of groups of students in specialized subjects of topical interest.
PHY 480
THESIS RESEARCH
Graduate
This course number designates research performed to gather thesis material. Up to two registrations are allowed. No less than four quarter hours; no more than eight quarter hours total credit.

PHY 490
STRUCTURAL PROPERTIES OF MATERIALS
Graduate
Periodicity, symmetry and classification of crystal structure; X-ray diffraction; reciprocal lattice; crystal binding. Debye theory of heat capacity; anharmonic interactions; point defects; surfaces.

PHY 491
ELECTRONIC PROPERTIES OF MATERIALS
Graduate
The free-electron gas model; energy band theory; theory of metals and alloys; transport phenomena; dia- and para-magnetism, ferromagnetism, and antiferromagnetism; superconductivity.

PHY 495
METHODS OF THEORETICAL PHYSICS (CROSS-LISTED WITH PHY 395)
Graduate
Special functions, complex integration, calculus of variations, coordinate transformations. Cross-listed with PHY 395.

PHY 701
CANDIDACY CONTINUATION
Graduate
Non-credit. Students who are not registered for regular courses will be permitted to register in this course only if they are actively working on their thesis. $40.00 per quarter.

PHY 702
CANDIDACY MAINTENANCE
Graduate
Placeholder course for students not actively working on their thesis. This course is meant only to maintain university student status, it will not give the student full- or part-time student status and will not permit deferment of student loans. Non-credit, fee per quarter.

PM 430
FUNDAMENTALS OF IT PROJECT MANAGEMENT
Graduate
This course concentrates on monitoring, managing and controlling assets and resources on a single IT project. Topics covered are risk management; procurement and contract management; time and cost estimating; controlling and tracking techniques; quality assurance; testing and audit. Students will use common project management software for resource allocation and balancing. NO PREREQUISITES.

PM 440
COLLABORATIVE TECHNOLOGIES FOR LEADING PROJECTS
Graduate
Study of the process of virtual teaming with emphasis on facilitation of different time project activities and facilitation of same time meetings. Students will learn how small group psychology and group communication theories inform specific behaviors in the design and leadership of meetings. Several meeting types including information briefing, focus group, document writing, decision making, requirements gathering, and teaching/training will be explored. In addition, the course surveys current collaboration technologies and discusses how to select among those technologies usability and fit to purpose of a meeting agenda. DL students may be required to schedule same time sessions with the instructor and other DL students; see current quarter syllabus for more information on this point. PREREQUISITE(S): NONE

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.
PM 535
INFORMATION TECHNOLOGY INVESTMENT FINANCIAL ANALYSIS
Graduate
This course focuses on the application of financial analysis and decision-making approaches to aid information technology investment decisions at the operational, project, tactical and strategic levels. Students will learn how to apply a variety of financial methods -- breakeven analysis, present value analysis, profitability index, and return on investment to various IT investment decisions. The course will also address cost benefit analysis, outsourcing, balanced scorecard, and multi-factor scoring, benchmarking, and IT investment portfolio methods. These techniques will prepare students to manage capital budgets, acquisition of system and application software, hardware, personnel, and professional services at project and system levels as well as enterprise investment portfolio. PREREQUISITE(S): IS 425 or SE 477 or IS 565 or ACCT 500 or IS 430 or PM 430 or ECT 455

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

PM 556
ENTERPRISE PROJECT MANAGEMENT
Graduate
This course covers how an enterprise coordinates and effectively manages all its IT projects and programs through program management and the IT program management office. Students will learn the role of the IT program management office in establishing and maintaining the project and program infrastructure and in assisting project managers, program managers, and the executive steering committee. Students will analyze the role of program management in coordinating the delivery of expected program benefits, in managing stakeholder expectations, and in establishing program governance. PREREQUISITE(S): (IS 430 or PM 430 or SE 477 or completion of foundation phase

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

PM 570
ENTERPRISE SYSTEM IMPLEMENTATION
Graduate
This course is targeted towards information systems professionals who are involved in the planning and implementation of large scale, cross-functional enterprise systems. Students will examine the characteristics of technology efforts that change and transform the way people perform their tasks and how the new technology structures the flows of information and decision making using workflow modeling methods. Through case studies and exercises students gain insights into the elements of successful implementations leading to the preparation of a change management plan. Emphasis is placed on developing mechanisms for communicating and training all affected agents. PREREQUISITE(S): IS 430 or PM 430 or SE 477 or completion of foundation or core phase

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

PM 577
IT PORTFOLIO MANAGEMENT AND STRATEGIES
Graduate
This capstone course integrates the skills and techniques learned in previous IT Project Management courses. Through in depth analysis of case studies and readings, along with presentations by outside speakers experienced in IT Portfolio Management and IT strategy, students use their skills from previous IT project management courses to solve IT strategic and IT portfolio problems. The course starts with formulating the IT strategy from the corporate strategy. Then the IT Portfolio of initiatives, projects and assets is build and fine tuned. PREREQUISITE(S) IS 556 or PM 556

CDM graduate students in the Pre-requisite Phase are restricted from registering for this class.

POL 101
BASIC POLISH I
Undergraduate
Listening to, speaking, reading and writing Polish in a cultural context for the beginning student. (Offered on a demand basis only.)

POL 102
BASIC POLISH II
Undergraduate
Continued emphasis on the four skills in culturally authentic situations. (Offered on a demand basis only.)
POL 103
BASIC POLISH III
Undergraduate
Further work on the basic elements of the Polish language, spoken as well as written, with due regard to the cultural context of Polish expression. (Offered on a demand basis only.)

POL 104
INTERMEDIATE POLISH I
Undergraduate
Intensive practice in the use of Polish through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. (Offered on a demand basis only.)

POL 105
INTERMEDIATE POLISH II
Undergraduate
Continuing practice in spoken and written Polish and further development of reading and listening abilities in an authentic cultural context. (Offered on a demand basis only.)

POL 106
INTERMEDIATE POLISH III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing Polish with a concomitant heightened awareness of the cultural dimensions of the Polish language. (Offered on a demand basis only.)

POL 110
INTERMEDIATE POLISH FOR HERITAGE SPEAKERS I
Undergraduate
Introduction to grammar and written composition for heritage speakers of Polish with little or no formal language training. For students who already speak Polish in their families or communities. (Offered on a demand basis only.)

POL 111
INTERMEDIATE POLISH FOR HERITAGE SPEAKERS II
Undergraduate
Introduction to grammar and written composition for heritage speakers of Polish with little or no formal language training. For students who already speak Polish in their families or communities. (Offered on a demand basis only.)

POL 112
INTERMEDIATE POLISH FOR HERITAGE SPEAKERS III
Undergraduate
Introduction to grammar and written composition for heritage speakers of Polish with little or no formal language training. For students who already speak Polish in their families or communities. (Offered on a demand basis only.)

POL 197
SPECIAL TOPICS IN POLISH
Undergraduate
See schedule for current offerings. (Offered on a demand basis only.)

POL 198
STUDY ABROAD
Undergraduate
Variable credit.
POL 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

POL 205
POLISH FOR THE NATIVE SPEAKER I
Undergraduate
Introduction to grammar and written composition for native speakers of Polish with little or no formal language training. (Offered on a demand basis only.)

POL 206
POLISH FOR THE NATIVE SPEAKER II
Undergraduate
Continued emphasis on improved grammar and writing for native speakers of Polish with limited formal Polish language training. (Offered on a demand basis only.)

POL 207
POLISH FOR THE NATIVE SPEAKER III
Undergraduate
Advanced conversation practice emphasizing standard Polish speech for those with limited formal training in spoken Polish. (Offered on a demand basis only.)

POL 297
SPECIAL TOPICS IN POLISH

POR 101
BASIC PORTUGUESE I
Undergraduate
Listening to, speaking, reading and writing Portuguese in a cultural context for the beginning student. (Offered on a demand basis only.)

POR 102
BASIC PORTUGUESE II
Undergraduate
Continued emphasis on the four skills in culturally authentic situations. (Offered on a demand basis only.)

POR 103
BASIC PORTUGUESE III
Undergraduate
Completion of the basic elements of the Portuguese language, spoken as well as written, with due regard to the cultural context of Portuguese expression. (Offered on a demand basis only.)

POR 104
INTERMEDIATE PORTUGUESE I
Undergraduate
Intensive practice in the use of Portuguese through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. (Offered on a demand basis only.)

POR 105
INTERMEDIATE PORTUGUESE II
Undergraduate
Continuing practice in spoken and written Portuguese and further development of reading and listening abilities in an authentic cultural context. (Offered on a demand basis only.)

POR 106
INTERMEDIATE PORTUGUESE III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing Portuguese with a concomitant heightened awareness of the cultural dimensions of the Portuguese language. (Offered on a demand basis only.)

PPS 200
INTRODUCTION TO PUBLIC POLICY
Undergraduate
This core course is designed to provide the student with an introduction to the field of public policy. The historical origins of policy analysis, definitions of what constitutes “public policy”, various theoretical approaches developed to address policy problems, and contemporary policy debates on various substantive issues. By the end of the course each student has a solid background for further study of public policy and the social sciences. This course should be taken as one of the first courses in the major. It is a prerequisite for other PPS courses.

PPS 201
PUBLIC POLICY AND URBAN ISSUES
Undergraduate
This core course is designed to introduce students to the study of urban areas, to some of the more exciting and difficult issues faced by cities, and finally, to some of the policies designed to address these issues. Readings assist students in exploring what makes cities function, how they have changed over time and what it was like to live through those changes, can show us how modern ways of seeing and modern ways of making sense came into being. If student is a PPS major, then students are encouraged to take PPS 200 prior to PPS 201.

PPS 202
PUBLIC POLICY AND ENVIRONMENTAL ISSUES
Undergraduate
This core course reviews the environmental public policy issues in the United States. The history of the modern environmental movement and the impact it continues to have on public policy is explored. Students apply concepts of environmental policy and move towards proposing policy solutions. If student is a PPS major, then students are encouraged to take PPS 200.

PPS 205
PUBLIC POLICY RESEARCH METHODS
Undergraduate
This core course provides students an understanding of and some experience with the qualitative and quantitative research methods used in public policy for collecting and identifying relevant data. Policy analysis, policy arguments, and policy making use of data to identify public problems, identify possible policies for public problems, and support arguments for specific policy alternatives. The credibility and quality of policy analyses and arguments depends in large part on the validity and reliability of that information.

PPS 206
QUANTITATIVE PUBLIC POLICY ANALYSIS
Undergraduate
This course focuses on writing of research questions and hypotheses, selection of appropriate quantitative statistical analyses for research questions, interpretation of statistical results, and communication of those results. A significant portion of the course work will involve doing statistical analyses of existing data using Statistical Package for the Social Sciences (SPSS) in the computer lab. Students will prepare a substantial paper using the techniques for public policy analysis learned in class. Students majoring in PPS are strongly encouraged to have completed PPS 205 before taking this course. This core course for PPS majors and minors should be taken before the senior year. Formerly PPS 204.

PPS 250
ISSUES IN NEIGHBORHOOD DEVELOPMENT
Undergraduate
A major focus of urban policy and grassroots action is the condition of city neighborhoods. This course examines trends in urban policy as they have affected neighborhoods, neighborhood-grounded grassroots action, and local neighborhood development initiatives.

PPS 251
URBAN POVERTY
Undergraduate
This course examines the demographics of poverty and its concentration in central cities. In addition, definitions of poverty and public policies aimed at alleviating poverty are explored with the aim of understanding why poverty remains prevalent in the United States.
PPS 252  
PUBLIC POLICY IN COMPARATIVE HISTORICAL PERSPECTIVE  
Undergraduate  
This course examines the origins and evolution of urban public policy in the United States and other countries. Substantive emphases include city planning measures, urban redevelopment, health and environmental measures, as well as various social policies.

PPS 253  
THE CINEMATIC CITY  
Undergraduate  
This course examines the relationship between the city and cinema and explores how the city both real and ideal is represented in film. Covering a diverse selection of films, genres, and historical periods, the course critically explores the relationship between urban forms and cinematic representations.

PPS 254  
SCREENING SUBURBIA  
Undergraduate  
The course explores how suburbia was represented in cinema since the post-war period. Covering diverse selection of films and genre, the course examines how domesticity, family life, gender roles, race, suburbanization, domestic space and architecture have been in cinematic space. Drawing on historical and contemporary sources, the course places suburbia at the center stage and examines the relationship between cinema and suburban ideals and how cinema as a particular mode of representation has sought to address suburbia as a particular American social and cultural landscape.

PPS 255  
CITIES, GLOBALIZATION AND PUBLIC POLICY  
Undergraduate  
The course will examine the process of globalization on cities and its policy implication. In particular, the course will explore how the impact of globalization on cities may be evaluated; what benefits or problems they produce and for whom. It will conclude by looking at how public policy professionals can influence these results.

PPS 300  
APPLIED URBAN AND ENVIRONMENTAL ECONOMICS  
Undergraduate  
The purpose of this core course is to provide students with a foundation in microeconomic analytical tools through which to analyze urban and environmental policy issues. This course is intended to be participatory and applied. A variety of public policy issues are examined in terms of microeconomic theory and application.

PPS 301  
PUBLIC POLICY AND THE POLITICAL PROCESS  
Undergraduate  
Policy decisions almost inevitably involve politics. This core course explores the politics of the urban political machines that dominated politics in many cities for a long time, though some might argue that they actually had few policy interests other than to remain in power. The course examines how power is distributed in cities, and how it is used to get at the various problems confronting cities. That is, how politics affects policy. The course studies the players in the game of policy formation, and the policy process itself. While the focus may be on cities, make no mistake, politics impacts environmental policy decisions and the process of making those decisions as well.  
PPS 200 and declared Public Policy Studies major are prerequisites for this course.

PPS 302  
IMPLEMENTATION OF ENVIRONMENTAL AND URBAN POLICY  
Undergraduate  
This course examines how organizational cultures affect decision making. The course focuses on bureaucratic decision making routines, the implementation of policy, and the factors which advance or constrain effectiveness in urban and environmental settings. The course also explores the utility of various communication strategies and techniques in executing policies.
PPS 303
PUBLIC POLICY AND LEADERSHIP
Undergraduate
This course analyzes modes of leadership within the context of public policy formulation and implementation. The policy-making process in post-industrial democracies will be discussed from bureaucratic, grassroots, and electoral standpoints, emphasizing the challenges for civic and community leadership that emerge from negotiating competing interests in policy outcomes.

PPS 324
PUBLIC POLICY AND NATURAL RESOURCES
Undergraduate
This course considers the present policies underlying the designation and management of national parks, national forests, wetlands, and other public lands and regulating the use, conservation, and preservation of land, mineral, timber, and water resources. Students will discuss the need for and evolution of public policies to regulate mining, fishing, timbering, and the use of water for generating electricity, irrigation, and recreation, as well as the strengths and limitations of these policies.

PPS 329
TOPICS IN ENVIRONMENTAL STUDIES
Undergraduate
This course provides an in-depth examination of various environmental studies issues.

PPS 330
SUSTAINABLE DEVELOPMENT
Undergraduate
Sustainable development has become a crucial concept in international initiatives worldwide. It attempts to foster policies that balance the need for economic development with practices that promote healthy communities and ecosystems. This course is based on the instructor's theoretical and practical experience gathered in developed and developing countries under market and command economies conditions. Special emphasis is placed on the role of institutions, both governmental and non-government, in shaping economic policies that are compatible with environmental health. The course pursues the objective of preparing students to understand main environmental problems and to generate solutions for these problems from a multidisciplinary perspective.

PPS 331
ENVIRONMENTAL JUSTICE
Undergraduate
The purpose of this course is to provide students with a historical background on environmental justice (EJ) in the US and an understanding of the current EJ movement. Policy debates surrounding EJ are highlighted from recent studies on determining 'disproportionate impact' to local EJ communities. In addition, students will experience the challenges of EJ organizations in Chicago through the service-based leaning component of the course. Twenty-five hours of service learning is required for completion of this course.

PPS 332
NATIONAL PARKS POLICY AND GOVERNANCE
Undergraduate
This course focuses on the interrelationship between public policy, human values, and nature as displayed through environmental policy governing our national parks. Special attention is given to the cultural dynamics (including political and legal) that are demonstrated in how public policies have been created and implemented over time in regards to our national parks. The course reviews the policy literature and theories associated with the management of the national parks as it reflects our societal values of the time period. These policies have dramatically changed over time, so it is an ideal venue that demonstrates a significant change in how we view nature. The role of tourism, economic development pressures and property owners (takings) concerns will be included. Also, critical thinking about national parks policy will be required. This is taught as a hybrid course.

PPS 333
GREEN CITIES
Undergraduate
This course looks at public policies pertaining to urban sustainability. Low-carbon transportation, green building policies, locally produced renewable energy, and storm water management policies are among the topics discussed.
PPS 334
SUSTAINABLE LAND REVITALIZATION AND BROWNFIELDS REDEVELOPMENT PROJECT
Undergraduate
This course introduces students to environmental public policy issues associated with Brownfields, Superfund sites, and an assortment of state and local land revitalization programs. Substantive emphasis includes examination of social problems and public policy impediments associated with the revitalization of neighborhoods.

PPS 340
DYNAMICS OF PUBLIC POLICY [CROSS-LISTED AS PSC 320]
Undergraduate
Competing theories of policy formulation and the application of these theories to current policy contexts. Problems of policy implementation will be considered. Cross-listed with PSC 320.

PPS 350
CRITICAL ISSUES IN URBAN DEVELOPMENT
Undergraduate
The course examines the central issues in contemporary urban development: how urban restructuring, demographic shifts, new patterns of production and consumption, as well as technologically-grounded globalization processes, shape urban development. The course emphasizes the changing context of urban development policy and explores various critical approaches to interpreting urban development policy.

PPS 351
THE POLICY AND POLITICS OF URBAN HOUSING
Undergraduate
The course looks at housing as a social symbol and material commodity, with particular emphasis placed on the role of government in the direct provision of housing and the indirect support of home ownership, as well as housing policies indirect impact on neighborhood development, race relations, and metropolitan surburbanization.

PPS 352
 ISSUES IN URBAN EDUCATIONAL POLICY
Undergraduate
This course examines the politics, history, and social context of urban education. Special attention is devoted to emerging policy alternatives such as the use of school vouchers and the formation of charter schools.

PPS 359
TOPICS IN URBAN STUDIES
Undergraduate
This course provides an in-depth examination of various urban studies issues.

PPS 393
CAPSTONE: GENTRIFICATION
Undergraduate
This course is designed to bring together much of the knowledge attained by Public Policy students during their four years at DePaul by focusing on the often contentious issues of urban gentrification and re-gentrification. Gentrification involves economic issues, political issues, environmental issues, educational issues, race and ethnicity, and equity issues as well. The course shall examine the variables associated with the process of gentrification, the advantages and disadvantages of that process, the winners and the losers in the process, and the political and economic implications of all of this.

PPS 204 and status as a Public Policy Studies major with Senior standing are a prerequisite for this class.

PPS 394
GREEN INFRASTRUCTURE
Undergraduate
This course is designed to integrate the two concentrations of the Public Policy major to address sustainable management of essential urban infrastructure systems, including stormwater management, energy production and efficiency, and urban forests. The course shall examine how municipal green infrastructure investment reflects larger social values and encourages students to examine the social forces that impact the efficacy of green infrastructure.
PRAD 244
PRINCIPLES OF ADVERTISING
Undergraduate

Examines the construction and implementation of an advertising campaign from the assessment of client needs through completion of the finished project. Analysis of successful advertisements and exposure to contemporary theory complements practical experience gained through completion of course projects.

PRAD 255
PUBLIC RELATIONS
Undergraduate

The foundational course in the public relations/advertising track traces the development of public relations/advertising industries and practices. Students are introduced to theories and principles in public relations/advertising, along with the roles and responsibilities of professionals working in public relations, advertising and related disciplines. Students examine industry regulations, societal implications, and strategic planning processes associated with public relations/advertising campaign and programs.

PRAD 256
WRITING FOR PUBLIC RELATIONS AND ADVERTISING
Undergraduate

This class provides students the opportunity to apply Public Relations/Advertising theories and principles to the development of media materials. The course familiarizes students with various forms of persuasive writing and requires them to develop a writing portfolio that demonstrates their ability to write for diverse audiences. Assignments include campaign plans, news media kits, speeches, video scripts and more.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 290
PUBLIC RELATIONS AND ADVERTISING WORKSHOP (VARIABLE TOPICS)
Undergraduate

This course allows students to sample a range of hands on, practical offerings in public relations and advertising that can enhance their knowledge and expertise. Workshop topics can include SEO/SEM, media sales and buying, focus group moderating, and Adobe Creative Suite (InDesign, Photoshop, Illustrator), among others. Students may take a maximum of 4 courses of PRAD 290 in the major, and a total of 8 credit hours.

PRAD 291
RESEARCH METHODS FOR THE PRAD PROFESSIONAL
Undergraduate

Research is critical to any advertising or public relations campaign. This course introduces students to the uses and applications of research in the fields of public relations and advertising. The goal is to provide future practitioners with information needed to commission and apply research to their work problems in the industry. Students will learn to recognize valid and reliable research and to utilize this data in decision making for their agencies or clients. Students will learn to form appropriate questions, select and develop appropriate methods (qualitative and quantitative), and analyze the data for unique consumer insights. Students learn to develop research that ensures messages are able to meet the strategic needs of their clients and agencies.

PRAD 244 or PRAD 255 is a prerequisite for this class.
PRAD 320
EVENT PLANNING
Undergraduate
This course aims to provide students with the occupational, technical and interpersonal skills necessary to “survive and thrive” in the special event industry. In addition to specific content knowledge, students will develop cross-cultural awareness, global understanding and communication skills as they relate to the event industry as a whole. The course will prepare students for a variety of options: pursuit of employment in the special events industry, professional development for those already employed in the field and general knowledge for those interested in the special events field. The purpose of this course is to acquire an in-depth knowledge about the specialized field of event planning, and to become familiar with management techniques and strategies required for successful planning, promotion, implementation and evaluation of special events.

PRAD 334
ADVERTISING AND PUBLIC RELATIONS ETHICS
Undergraduate
This class explores issues of Public Relations/Advertising from both theoretical and practical perspectives. A focus is on the professional and social responsibilities of Public Relations/Advertising professionals and prevailing norms in public relations, advertising and related disciplines. Students also address issues related to institutional ethical practices. Ethical standards and practices associated with the use of persuasive communication are also addressed.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 335
ADVERTISING AND SOCIETY
Undergraduate
This course challenges students to think critically about the societal effect of public relations and advertising with regard to their roles in the production and maintenance of consumer culture and the formation of public opinion. Students read widely from a body of social criticism that may diminish democracy and endanger our collective public life. This course asks future practitioners to confront the uses and abuses of public relations and advertising, and to understand the negative social consequences that can result.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 336
ADVERTISING CAMPAIGNS
Undergraduate
This course is designed to help students develop a thorough understanding of the entire advertising campaign planning process. Working in teams, students will approach a communication problem for a real-world client just as an advertising agency would when working on new business. Students will bring together knowledge from past courses as they gather and analyze primary and secondary data to assess the client’s situation then develop a comprehensive campaign plan. This includes the development of a creative message strategy and advertising campaign as well as a strategic media plan.

PRAD 244, PRAD 256 and (CMNS 291 or PRAD 291) are a prerequisite for this class.

PRAD 337
PUBLIC RELATIONS CAMPAIGNS
Undergraduate
This course is designed to expose students to the use of public relations and advertising strategies and techniques in a variety of functions, including community relations, employee relations, government relations, and media relations. Through case studies, students examine contemporary examples of successful public relations programs and campaigns and discover how practitioners function as intermediaries between organizations and their publics.

PRAD 255, PRAD 256 and (CMNS 291 or PRAD 291) are a prerequisite for this class.

PRAD 338
HEALTH AND PUBLIC RELATIONS
Undergraduate
This course will familiarize students with the major issues/problems in the United States health care system. Students will explore current issues in health policy such as the problem of the uninsured, the rising cost of health care, and the politics of health from a public relations perspective. Each student will be responsible for assuming the role of a public relations director for a health organization in the public or private sector.

PRAD 255 or a Health Sciences major is a prerequisite for this class.
PRAD 339  
INTEGRATED COMMUNICATION CAMPAIGNS  
Undergraduate  
Integrated Communication Campaigns  

(PRAD 244 or PRAD 255) PRAD 256 and (CMNS 291 or PRAD 291) is a prerequisite for this class.

PRAD 350  
ACCOUNT PLANNING  
Undergraduate  
The account planner represents the voice of the consumer in the advertising process. This course will examine the history of account planning and its relationship within advertising agencies to creative development. Special emphasis will be placed on the qualitative and ethnographic research techniques used by planners, and the role that curiosity and empathy play in understanding different consumer audiences.

PRAD 351  
COPYWRITING  
Undergraduate  
This course examines the various ways and styles of writing effective and persuasive advertising copy. Through in class and outside work, students will have the opportunity to develop a variety of advertising/communication pieces, from television and radio scripts, to print and alternative/new media. Emphasis is placed on defining an overriding strategy, and then translating that strategy into effective pieces of communication.

PRAD 352  
DIGITAL ADVERTISING  
Undergraduate  
This course is designed to provide students with an introduction to the dynamic field of digital advertising. The emergence of new media technologies has dramatically changed the ways and strategies for communicating with and engaging consumers. This course provides conceptual basis of digital advertising that separates digital advertising from traditional advertising. This course helps students understand how the digital advertising industry is evolving with the new media technologies and addresses a wide variety of digital advertising through a practical and theoretical framework. Issues will include social media, user-generated content, online community, mobile advertising, and permission marketing, among others.

PRAD 357  
ADVERTISING PORTFOLIO I  
Undergraduate  
This advanced-level course is designed to provide students with hands-on knowledge of what it takes to succeed as a copywriter or art director in today's advertising industry. This course really focuses on the process of generating great ideas that translate into strategic and memorable advertising campaigns. Students learn about the importance of a strong selling proposition, about theories of the creative process, and about idea generation techniques. The course places particular emphasis on the finished campaign execution, as students gain practical knowledge in creative advertising. It all culminates in portfolio critique, where industry creatives come in to evaluate students' work.

PRAD 361  
ACCOUNT PLANNING AND CONSUMER INSIGHTS FOR LATINO MARKETS  
Undergraduate  
This course encompasses both the similarities and differences of Latino consumers in the U.S. and explores the differences among the unique Latino cultures, their media habits and the effectiveness of using various promotional tools to affect their consumer behavior. The account planner represents the voice of the consumer in the advertising process. This course will examine the role of account planning and its relationship within advertising agencies to creative development. Special emphasis will be placed on the qualitative and ethnographic research techniques used by planners, and the role that curiosity and empathy play in understanding different Latino consumer audiences to gain insight about these groups' motivations and behaviors.

PRAD 244 or instructor permission is a prerequisite for this course.
PRAD 362
LATINO STRATEGIC COMMUNICATION CAMPAIGNS
Undergraduate
Focuses on how to effectively target messages to Latino populations in ways that move beyond stereotypic and simplistic models of Latino audiences. Emphasis on developing culturally relevant integrated campaigns that incorporate appreciation of the diversity of Latino audiences. Students learn creative strategies for dialoguing with Latino consumers, customers, stakeholders, and influencers to develop public relations and advertising messaging in both the commercial and non-profit sector. Distinctive characteristics of the Latino population are considered, along with the rich diversity of these communities. Consideration given to effective use of new media and strategic decisions about communicating in English versus Spanish.

(PRAD 244 or PRAD 255) PRAD 256 and (CMNS 291 or PRAD 291) is a prerequisite for this class.

PRAD 375
COMMUNICATION LAW
Undergraduate
This course is designed to provide students with an introduction to the portions of U.S. Law that define the scope of First Amendment protection for communication activities. The goal of the course is to help students understand legal issues important to professionals in the media-related fields of advertising, journalism, public relations and other communication specialties. The course helps students understand both their rights to communicate in political and commercial environments and the restrictions permitted on certain communication activities.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 376
CRISIS COMMUNICATION MANAGEMENT
Undergraduate
This course focuses on crisis communication and management, emphasizing practical application of theories, strategies, and tactics from a public relations perspective. Additionally, there is a focus on issues relevant to planning, development and execution of crisis communications programs for businesses and organizations and strategic public relations techniques for communication with stakeholders during a crisis.

PRAD 255 is a prerequisite for this class.

PRAD 377
MARKETING PUBLIC RELATIONS
Undergraduate
This course explores the strategic use of public relations to attain marketing objectives. Marketing Public Relations (MPR) is an important part of a reputation building or product branding effort for a corporation, and it can also be a valuable strategy for government agencies and non-profit organizations. Lectures and projects will demonstrate ways to use public relations strategically to add value to integrated marketing programs. By the end of the course, teams will prepare and present key aspects of a marketing public relations plan to a client.

PRAD 255 is a prerequisite for this class.

PRAD 378
CREATIVITY IN ADVERTISING
Undergraduate
PRAD 244 is a prerequisite for this class.

PRAD 379
ADVERTISING MEDIA PLANNING
Undergraduate
This course examines the diverse capabilities of various media available to advertisers and the process by which advertising media plans are constructed to help meet marketing communication objectives for a product or service. The course provides fundamentals on the language, tools, research methods and concepts employed in the media planning process and helps students build media plans using appropriate objectives, strategies and tactics. The course will help students develop a heightened appreciation for the roles of logic, analysis, and insight in the media planning and buying process.

PRAD 244 is a prerequisite for this class.
PRAD 380
POLITICAL COMMUNICATION
Undergraduate
This course examines how various U.S. government agencies, jurisdictions, and politicians communicate with the public and how the public influences the government through communication. Topics covered include: theory, strategies, and tactics behind effective government and political communication; how to critically evaluate government and political communication; and how individuals and groups influence the government and politicians through communication.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 381
ADVERTISING AND CHILDREN
Undergraduate
This course examines the social and behavioral effects of advertising directed to children, and addresses such topics as what children know and think about advertising, how children respond emotionally to advertising, how advertising can affect behavioral patterns, the changing regulatory environment and related social and psychological issues including materialism and self-esteem. Students will have the opportunity to assess the existing environment and to design creative interventions.

PRAD 382
NON-PROFIT PUBLIC RELATIONS
Undergraduate
This course examines the philosophical and theoretical foundations of public relations and volunteerism. Strategic communication strategies relating to both internal and external publics will be explored including the unique legal and ethical issues that impact non-profit organizations. Students will gain hands-on experience, using a variety of theoretical foundations to guide development of strategic communication materials for local non-profit organizations.

PRAD 255 is a prerequisite for this class.

PRAD 391
SPECIAL TOPICS IN PUBLIC RELATIONS
Undergraduate
This course allows students to sample a range of topical offerings in public relations that have included International Communication and PR, Event Planning, and Study Abroad. In addition to these topics, new topics for this concentration might include Media Relations in Latin America, The Use of Social Media Among Latinos, Marketing PR Strategies for Latino Markets, and other Latino relevant topics.

PRAD 255 is a prerequisite for this class.

PRAD 392
SPECIAL TOPICS IN ADVERTISING
Undergraduate
This course allows students to sample a range of topical offerings in advertising that have included Media Planning, Advertising in the Digital Age, Ad Copywriting, Advanced Advertising Campaigns, Consumer Promotions, and Psychology of Advertising. Topics for this concentration might include: Media Planning for Latino Markets, Ad Copywriting for Latino Markets, The Advertising Industry in Latin America.

PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 393
SPECIAL TOPICS IN PUBLIC RELATIONS AND ADVERTISING
Undergraduate
PRAD 244 or PRAD 255 is a prerequisite for this class.

PRAD 396
CAPSTONE SEMINAR IN PUBLIC RELATIONS AND ADVERTISING
Undergraduate
This culminating experience for PRAD majors integrates the knowledge learned during their undergraduate years with a forward-thinking professional curriculum designed to prepare students for the competitive 21st century workplace. The course will cover such essential career-building topics as social media management; creating and leveraging a professional network; understanding effective teamwork strategies; time management and work-life balance skills; and creating a plan and fine-tuning the skills needed to secure a full-time position in the public relations and advertising industries.
PRAD 505
CRITICAL PERSPECTIVES ON PUBLIC RELATIONS AND ADVERTISING
Graduate
This course examines the ever-increasing influence of public relations and advertising in our society, highlighting issues of power and social responsibility. Students are asked to think critically about the societal effects of public relations and advertising and their roles in the production and maintenance of public opinion. Future practitioners consider the potentially adversarial relationship that exists between public relations and advertising and the media in societies based on a free press.

PRAD 553 or PRAD 555 is a prerequisite for this class.

PRAD 510
SPEECH WRITING AND PRESENTATION
Graduate
The course will allow students to gain experience writing and delivering speeches and making professional presentations. An emphasis will be placed on the role of speeches and speechwriters and the responsibilities associated with those involved in such an integral part of a democratic society. The multiple uses and value of speeches and presentations as public relations tools will also be addressed.

PRAD 511
CONSUMER INSIGHTS FOR LATINO MARKETS
Graduate
The course encompasses both the similarities and differences of Latino consumers in the U.S. and focuses on how to uncover key insights about consumer buying and information processing behavior among a diverse group of Latino cultures. The insight process is commonly used in advertising and marketing but is gaining popularity in public relations and employee communications. Students will learn how to develop their own instincts as an information consumer, as well as learn some key consumer psychology and research methodologies to learn why individuals behave as they do in the marketplace. Students will find and distill secondary research data and then utilize some qualitative research techniques, such as focus groups, ethnographic research, projective techniques, and in-depth interviewing to develop a key insight into a target group. PREQ: PRAD 553

PRAD 553 is a prerequisite for this class.

PRAD 512
LATINO MARKETING COMMUNICATION
Graduate
Many organizations and businesses are actively pursuing the Latino market. Yet few PR/advertising programs train students to communicate effectively with this growing target audience. This course covers development of culturally relevant messages and students gain practice in developing strategic campaigns addressing this market and explore the effectiveness of using paid advertising, public relations and events, direct response (coupon redemption) and social media among different Latino cultures.

PRAD 514
CONTEMPORARY ISSUES IN PUBLIC RELATIONS AND ADVERTISING
Graduate
A seminar devoted to the reading and discussion of contemporary academic and popular works dealing with emerging issues in the fields of public relations and advertising. Students gain advanced knowledge of new industry trends and explore issues central to current professional debates.

(Graduate Public Relations and Advertising student) and (PRAD 553 or PRAD 555 or instructor permission are prerequisites for this course.

PRAD 515
PUBLIC RELATIONS WRITING
Graduate
The goal of this course is to help students develop the professional writing skills needed for success in public relations. Students analyze the process of strategic public relations planning and explore the communication techniques used to establish positive relationships with organizational constituents. They apply what they have learned by developing and presenting a variety of public relations materials, such as program plans, news releases, magazine/report/newsletter copy, video scripts, web copy and speeches. Upon the successful completion of this course, students will have a professional portfolio of public relations writing samples.

(Graduate Public Relations and Advertising student and PRAD 555) or instructor permission is a prerequisite for this course.
PRAD 520
PUBLIC RELATIONS THEORY
Graduate
This course is designed to orient students to the theories that dominate Public relations scholarship, as well as the prevailing theories applied in practice. Students will review the historical evolution of various theories, critiques that have contributed to theory development, and the current status of various theories in the field.

Graduate Public Relations and Advertising student and PRAD 555 are prerequisites for this course.

PRAD 530
PUBLIC RELATIONS AND ADVERTISING MANAGEMENT
Graduate
This course focuses on the application of management principles and practices to the effective development of public relations and advertising plans, programs and campaigns. The course examines management practices in organizational and firm settings and considers issues and practices related to planning, budgeting, new business development and account management.

Graduate Public Relations and Advertising student and PRAD 553 and PRAD 555 are prerequisites for this course.

PRAD 535
PUBLIC RELATIONS IN HEALTH CARE
Graduate
This course will help students understand the organizational impact of health policy in America and prepare students to assume roles in communication management positions in the United States health care industry. Students will explore current issues in health policy such as the problem of the uninsured, the rising cost of health care, and the politics of health. Each student will be responsible for focusing on a particular aspect of health policy and developing a report on the topic.

PRAD 540
CRISIS COMMUNICATION MANAGEMENT
Graduate
This course examines institutional crisis communication from a management perspective. Emphasis is on crisis response strategies and organizational approaches for preventing and managing crisis events. Students develop case studies of contemporary crises and participate in simulations designed to develop professional expertise and practical skills in crisis communication management.

(Graduate Public Relations and Advertising student and PRAD 555) or instructor permission is a prerequisite for this course.

PRAD 550
INTEGRATED COMMUNICATION CAMPAIGNS
Graduate
The course presents a formal model for the implementation of integrated marketing communication plans across a number of communication functional areas. The course stresses the importance of campaign consistency, expression of unique audience insights, creative leverage, and the establishment of zero-based execution parameters. Case studies are examined as models for understanding elements of successful programs and for the development of team projects.

(Graduate Public Relations and Advertising student) and (PRAD 553 or PRAD 555 or instructor permission are prerequisites for this course.

PRAD 551
ADVERTISING AND COPYWRITING
Graduate
This course will introduce students to the world of the ad copywriter. It will encompass everything from the development of a strategy, to the execution of that strategy in all forms of ad related communication. Students will learn the techniques of good ad writing and create work for Print, TV, Radio, IMC elements, new media, among other forms. PREREQUISITE(S): PRAD 553

PRAD 553 is a prerequisite for this course.
PRAD 553
ADVERTISING
Graduate
This foundational course examines the theories, principles, applications and standards of advertising in multiple contexts, both from the perspectives of the practitioner and the consumer.

Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 554
CREATIVE PROCESSES
Graduate
The course focuses on creative processes critical in integrated marketing communication. Overall, the course is designed to help participants think more creatively. Readings include research and theoretical studies of creative processes and institutional practices, as well as more personal essays by representative figures from several different creative venues. Cases studies are the basis for fashioning directed creative responses, discussions, in-class activities and final projects.

Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 555
PUBLIC RELATIONS
Graduate
This course involves the study of the theory, history, practice and future of public relations in a comprehensive way. It is a course designed to allow public relations students to understand the breadth of the field and to investigate specific areas of public relations (i.e., political, medical, financial, government, corporate, education, etc.). It will also cover the operations and objectives PR practice from both the corporate and non-profit sectors.

Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 556
STRATEGIC PLANNING IN PUBLIC RELATIONS
Graduate
Students will learn how to analyze an organization's initial situation, prior to public relations programs; how to formulate strategies and objectives for proper pre-planning; and how to develop a rich and measurable PR plan. Budgets, tactics and timelines will also be discussed and required as an aspect of the final PR plan project.

Graduate Public Relations and Advertising student and PRAD 555 are prerequisites for this course.

PRAD 557
ADVERTISING COMMUNICATION STRATEGY
Graduate
The course examines the development of advertising communication strategy within the context of an organization's overall marketing objectives. The course emphasizes harmonization of strategies for internal and external audiences and for support of organizational vision. Case studies define the relationship of marketing communication to product and service innovation, pricing and distribution. Particular attention is given to strategies which are imaginative and cost-effective.

(Graduate Public Relations and Advertising student and PRAD 553) or instructor permission is a prerequisite for this course.

PRAD 560
POLITICAL AND GOVERNMENT PUBLIC RELATIONS
Graduate
Political Public Relations focuses on the development and delivery of strategic messages by political parties, candidates and officeholders in American politics. Students will be responsible for researching, discussing, and evaluating the effectiveness of these messages. Special emphasis will be placed on the role of the spokesperson in a political campaign and/or serving as a spokesperson for an elected official.

(Graduate Public Relations and Advertising student and PRAD 555) or instructor permission is a prerequisite for this course.
PRAD 562
MEDIA RELATIONS
Graduate
Explores the communication between reporters and organizational spokespeople. Topics include goals of reporters and spokespeople during the transmission of information, interpretation of the various types of corporate media for reporters, techniques for corporate spokespeople for giving effective interviews. Case studies will be analyzed.

Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 563
MEDIA PLANNING
Graduate
This is an advertising class that focuses on researching and assessing various media and media markets for possible use in advertising campaigns. Traditional print, broadcast, and out-of-home media are explored as well as digital media options and search engine optimization tools. Concepts of audience coverage, reach, frequency, ratings, share, gross rating points, Web page hits and click-throughs, CPM, and other cost and audience factors will be explored. PREREQUISITE(S): PRAD 553

PRAD 563 is a prerequisite for this class.

PRAD 564
CORPORATE COMMUNICATION
Graduate
A global business center, Chicago boasts one of the country?s largest concentrations of Fortune 500 companies, employing thousands of communication professionals. This course examines the development, practice, goals and responsibilities of the corporate communication function, and three of its major specialty areas ? media relations, employee communications and investor relations. Through readings, discussions, assignments and guest speakers, students will gain practical knowledge of core concepts driving the growth of corporate communication, such as corporate reputation, brand image and brand equity, and corporate social responsibility.

PRAD 575
COMMUNICATION LAW AND ETHICS
Graduate
This course covers the aspects of communication law and ethics relevant to communication professionals. Legal topics include First Amendment concepts, libel, privacy, copyright, freedom of information, and regulation of advertising. The ethical component focuses on the professional responsibilities of practitioners in communication fields with special emphasis on public relations and advertising.

(Graduate Public Relations and Advertising student and PRAD 553 and PRAD 555) or instructor permission is a prerequisite for this course.

PRAD 585
RESEARCH METHODS FOR THE COMMUNICATION PROFESSIONAL
Graduate
This course covers core issues involved in the collection and analysis of information to be used in decision-making. Topics covered include the retrieval of archival data, survey design, focus group interviewing, sampling techniques, techniques for analyzing data, and campaign evaluation.

(Graduate Public Relations and Advertising student and PRAD 553 and PRAD 555) or instructor permission is a prerequisite for this course.

PRAD 590
PUBLIC RELATION & ADVERTISING WORKSHOP
Graduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include focus groups.

PRAD 592
INDEPENDENT STUDY
Graduate
Students will be guided in the development of a special research project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member. PREREQUISITE(S): Approval from instructor and department chair
PRAD 595
SPECIAL TOPICS IN PUBLIC RELATIONS & ADVERTISING
Graduate
This course examines a broad range of topics related to public relations and advertising processes. The course may address such topics as issues management, consumer behavior, relationship management, strategic planning and program development, or integrated communication campaigns.

(Graduate Public Relations and Advertising student) and (PRAD 553 or PRAD 555 or instructor permission are prerequisites for this course.

PRAD 597
COLLOQUIUM ON PUBLIC RELATIONS AND ADVERTISING
Graduate
This course brings students together with professionals in public relations and advertising to illustrate the diverse nature of work in these fields. Speakers from both corporate and non-profit organizations will be invited to share their professional experiences and to discuss the knowledge competencies and skills required to succeed in these fields.

PRAD 599
RESEARCH THESIS
Graduate
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.

Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 601
ACTIVE DEGREE COMPLETION
Graduate
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans.

Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 602
CANDIDACY CONTINUATION
Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans.

Status as a Graduate Public Relations and Advertising student is a prerequisite for this class.

PRAD 340
CONSUMER PROMOTION
Undergraduate
This course explores the various ways marketers engage consumers with a specific goal of generating a purchase. This course will cover the basics of promotion, as well as the ways brands activate more image-based marketing tactics, such as sports and arts sponsorships, cause marketing, and entertainment marketing. Students will learn how these tools can meet the dual objectives of driving purchase while maintaining a brand’s image.
**PRF 111**  
**ACTING I**  
Undergraduate  
First course in a 3 course sequence. Intensive work with Spolin-based improvisation in which the issues of creating theatrical reality are addressed through the medium of theater games. The work culminates in the spring of the year with text-based experiences drawn from either contemporary plays and scenes or story theater.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 112**  
**ACTING I**  
Undergraduate  
Second course in a 3 course sequence. Intensive work with Spolin-based improvisation in which the issues of creating theatrical reality are addressed through the medium of theater games. The work culminates in the spring of the year with text-based experiences drawn from either contemporary plays and scenes or story theater.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 113**  
**ACTING I**  
Undergraduate  
Third course in a 3 course sequence. Intensive work with Spolin-based improvisation in which the issues of creating theatrical reality are addressed through the medium of theater games. The work culminates in the spring of the year with text-based experiences drawn from either contemporary plays and scenes or story theater.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 121**  
**MOVEMENT I**  
Undergraduate  
First course in a 3 course sequence. Two quarters of movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use, and over-all self awareness. One quarter will continue with the elements explored in yoga but will be more focused on freeing the self through the use of music, movement improvisation, and a variety of coordination skills.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 122**  
**MOVEMENT I**  
Undergraduate  
Second course in a 3 course sequence. Two quarters of movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use, and over-all self awareness. One quarter will continue with the elements explored in yoga but will be more focused on freeing the self through the use of music, movement improvisation, and a variety of coordination skills.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**PRF 123**  
**MOVEMENT I**  
Undergraduate  
Third course in a 3 course sequence. Two quarters of movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use, and over-all self awareness. One quarter will continue with the elements explored in yoga but will be more focused on freeing the self through the use of music, movement improvisation, and a variety of coordination skills.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 131
VOICE AND SPEECH I
Undergraduate
Voice & Speech I (4 quarter hours) First course in a 3 course sequence. The focus of the work is on relaxation, alignment, breathing, the development of free resonance flow, and good articulation of vowels and consonants.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 132
VOICE AND SPEECH I
Undergraduate
Second course in a 3 course sequence. The focus of the work is on relaxation, alignment, breathing, the development of free resonance flow, and good articulation of vowels and consonants.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 133
VOICE AND SPEECH I
Undergraduate
Third course in a 3 course sequence. The focus of the work is on relaxation, alignment, breathing, the development of free resonance flow, and good articulation of vowels and consonants.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 211
ACTING II
Undergraduate
First course in a 3 course sequence. Scene study work begins. Students explore the relationship of the self to the role through the use of intention, relationship, environment, and text. A variety of playscripts are drawn from contemporary theatre.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 212
ACTING II
Undergraduate
Second course in a 3 course sequence. Scene study work begins. Students explore the relationship of the self to the role through the use of intention, relationship, environment, and text. A variety of playscripts are drawn from contemporary theatre.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 213
ACTING II
Undergraduate
Third course in a 3 course sequence. Scene study work begins. Students explore the relationship of the self to the role through the use of intention, relationship, environment, and text. A variety of playscripts are drawn from contemporary theatre.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 214
MAKE-UP
Undergraduate
First course in a 3 course sequence. Basic skills of two-dimensional painting as well as basic prosthetic and skin-texturing work are analyzed in this course designed to acquaint the actor with theatrical make-up.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 215
MAKE-UP
Undergraduate
Second course in a 3 course sequence. Basic skills of two-dimensional painting as well as basic prosthetic and skin-texturing work are analyzed in this course designed to acquaint the actor with theatrical make-up.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 216
MAKE-UP
Undergraduate
Third course in a 3 course sequence. Basic skills of two-dimensional painting as well as basic prosthetic and skin-texturing work are analyzed in this course designed to acquaint the actor with theatrical make-up.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 221
MOVEMENT II
Undergraduate
Focus will be on full body awareness through Feldenkrais' (and other) movement lessons and through the study of anatomy. Emphasis will be placed on recognizing limiting patterns of response in the self (including inappropriate tensions) and moving beyond those to increase the physical choices and alternatives available to the student. Work is begun on the dynamics of movement and on embodying a role.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 222
MOVEMENT II
Undergraduate
Focus will be on full body awareness through Feldenkrais' (and other) movement lessons and through the study of anatomy. Emphasis will be placed on recognizing limiting patterns of response in the self (including inappropriate tensions) and moving beyond those to increase the physical choices and alternatives available to the student. Work is begun on the dynamics of movement and on embodying a role.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 223
MOVEMENT II
Undergraduate
Actors will continue to develop material from previous movement classes, now placing specific focus on combining imaginative work with skill work to explore the realization of dynamics, rhythm, space and flow of energy. Techniques will be used to aid the actor physicalize inner needs, wants and intentions demanded by various roles.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 231
VOICE AND SPEECH II
Undergraduate
Actors are introduced to the progression of voice exercised in Kristin Linklater's Freeing the Natural Voice. The focus of the class is on developing techniques that foster the connection between the acting impulse and the voice.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 232
VOICE AND SPEECH II
Undergraduate
Actors explore the second half of the Linklater voice progression. The focus is on developing each actor's full vocal range. In addition to the voice exercises, students work on a variety of texts chosen to support their growing acquisition of skills.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 233
VOICE AND SPEECH II
Undergraduate
The focus is on speech. Clarity of articulation and effective use of vowels is developed by learning the International Phonetics Alphabet.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 261
INTRODUCTION TO PERFORMANCE
Undergraduate
First course in a 3 course sequence. Under the guidance of a director, all second-year acting majors rehearse and perform a play for faculty viewing and evaluation. Students are encouraged to integrate skills acquired in other classes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 262
INTRODUCTION TO PERFORMANCE
Undergraduate
Second course in a 3 course sequence. Under the guidance of a director, all second-year acting majors rehearse and perform a play for faculty viewing and evaluation. Students are encouraged to integrate skills acquired in other classes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 263
INTRODUCTION TO PERFORMANCE
Undergraduate
Third course in a 3 course sequence. Under the guidance of a director, all second-year acting majors rehearse and perform a play for faculty viewing and evaluation. Students are encouraged to integrate skills acquired in other classes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 281
STAGE COMBAT
Undergraduate
Students learn the fundamentals of hand-to-hand combat and weaponry with a focus on developing skills safely and effectively for the stage.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 290
PERFORMANCE WORKSHOP FOR NON-MAJORS
Undergraduate
Students work on basic performance skills through individual and group exercises in acting, voice and speech and movement. Can be taken by non-Theatre School students.

PRF 311
ACTING III
Undergraduate
First course in a 3 course sequence. Classical work begins with Shakespeare and possibly other classical texts. Specific focus is given to scansion and First Folio technique. This study is coordinated with both the movement and the voice and speech classes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 312
ACTING III
Undergraduate
Second course in a 3 course sequence. Classical work begins with Shakespeare and possibly other classical texts. Specific focus is given to scansion and First Folio technique. This study is coordinated with both the movement and the voice and speech classes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 313
ACTING III
Undergraduate
Third course in a 3 course sequence. Classical work begins with Shakespeare and possibly other classical texts. Specific focus is given to scansion and First Folio technique. This study is coordinated with both the movement and the voice and speech classes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 314
ACTING LABORATORY
Undergraduate
First course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 315
ACTING LABORATORY
Undergraduate
Second course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 316
ACTING LABORATORY
Undergraduate
Third course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 317
TOPICS IN SCENE STUDY
Undergraduate
Working with MFA II Directing students, this course will focus on scene study from plays by a particular seminal dramatist. Actors will benefit from in-depth analysis and rehearsal of scenes, exploring the playwright’s style and dramatic influence. Course restricted to upper-level Theatre Performance Students only.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 318
TECHNIQUE
Undergraduate
First course in a 2 course sequence. An advanced level acting course which concentrates the work on carefully selected exercises, monologues, and scenes, in order to further develop physical, sensorial, and emotional skills, in preparing a role.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 319
TECHNIQUE
Undergraduate
Second course in a 2 course sequence. An advanced level acting course which concentrates the work on carefully selected exercises, monologues, and scenes, in order to further develop physical, sensorial, and emotional skills, in preparing a role.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 321
MOVEMENT III
Undergraduate
Actors will continue to build their vocabulary of effort/shape techniques, thereby helping them expand range of choice in physical shape and action for role work. Period dances, manners and clothing will be explored to help the students physically connect to the period and/or style work explored in acting and voice class.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 322
MOVEMENT III
Undergraduate
Actors will continue to build their vocabulary of effort/shape techniques, thereby helping them expand range of choice in physical shape and action for role work. Period dances, manners and clothing will be explored to help the students physically connect to the period and/or style work explored in acting and voice class.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 323
MOVEMENT III
Undergraduate
Actors will continue to further the work in period dances and manners with an emphasis on the student taking greater control of this research and its implementation into acting. Imaginative use of self is channeled through character mask work which is then applied to Shakespearean scenes. Full body awareness through movement lessons is continued.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 331
VOICE AND SPEECH III
Undergraduate
Breath work, vocal sounding, and physical alignment are focused on the poetry of Walt Whitman.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 332
VOICE AND SPEECH III
Undergraduate
An introduction to dialect study includes an exploration of the actor's own idiolect and the acquisition of several dialects, including American Southern, Irish, and varieties of British.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 333
VOICE AND SPEECH III
Undergraduate
Speech work centers on verse speaking and character transformation through vigorous exploration of dramatic texts. Playwrights may include Moliere, Shaw and Howard Barker.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 361
REHEARSAL AND PERFORMANCE I
Undergraduate
First course in a 3 course sequence. Advanced acting and directing students are continually involved in rehearsal and/or performance of plays in showcase, playworks, or workshop productions. These students constitute the acting company for the school.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 362  
REHEARSAL AND PERFORMANCE I 
Undergraduate  
Second course in a 3 course sequence. Advanced acting and directing students are continually involved in rehearsal and/or performance of plays in showcase, playworks, or workshop productions. These students constitute the acting company for the school.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 363  
REHEARSAL AND PERFORMANCE I  
Undergraduate  
Third course in a 3 course sequence. Advanced acting and directing students are continually involved in rehearsal and/or performance of plays in showcase, playworks, or workshop productions. These students constitute the acting company for the school.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 374  
DIRECTING  
Undergraduate  
First course in a 3 course sequence. An introductory class in which the student is exposed to a wide range of topics related to the craft of the director. These range from pre-production preparation, to the theatre space and composition/picturization considerations, to the actor/director relationship. Teaching methods include lecture, discussion, and in-class projects.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 375  
DIRECTING  
Undergraduate  
Second course in a 3 course sequence. An introductory class in which the student is exposed to a wide range of topics related to the craft of the director. These range from pre-production preparation, to the theatre space and composition/picturization considerations, to the actor/director relationship. Teaching methods include lecture, discussion, and in-class projects.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 376  
DIRECTING  
Undergraduate  
Third course in a 3 course sequence. An introductory class in which the student is exposed to a wide range of topics related to the craft of the director. These range from pre-production preparation, to the theatre space and composition/picturization considerations, to the actor/director relationship. Teaching methods include lecture, discussion, and in-class projects.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 380  
ADVANCED PERFORMANCE WORKSHOP FOR NON-MAJORS  
Undergraduate  
This course is a continuation of PRF 290 and will allow students who have completed the introductory course further exploration in performance by applying basic acting skills to the presentation of short plays and scenes from modern dramatic literature.
PRF 290 is a prerequisite for this class.
PRF 381  
ADVANCED STAGE COMBAT  
Undergraduate

In this course students will continue their study of unarmed and rapier-&-dagger techniques, as well as adding a third weapon discipline as taught by The Society of American Fight Directors (past options have included knife, broadsword, quarterstaff, small sword) for use in stage and film performance. The students will perform choreography in all three disciplines, in scenes which they themselves select but which are choreographed by the instructor. The students are then given the opportunity to take the SAFD's Skills Proficiency Test for all three weapons, with an outside adjudicator, in the hope of reaching "Actor Combatant" status within the SAFD.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

---

PRF 390  
IMPROVISATION  
Undergraduate

This workshop for graduating performance students is designed to renew the student's relationship with the foundation of the training program: Spolin-based improvisational work. There is a particular emphasis on the use of the games as a stimulus for spontaneity, strong playing relationships and trouble shooting within the rehearsal process.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

---

PRF 399  
INDEPENDENT STUDY: PERFORMANCE  
Undergraduate

Independent Study

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

---

PRF 411  
ACTING IV  
Undergraduate

First course in a 3 course sequence. Utilizing an ensemble approach, this class helps prepare the student for the rigors of the professional world by integrating the skills learned in previous years training through the use of exercises, improvisations, reading and discussions, and a variety of performance projects including scenes and monologues.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

---

PRF 412  
ACTING IV  
Undergraduate

Second course in a 3 course sequence. Utilizing an ensemble approach, this class helps prepare the student for the rigors of the professional world by integrating the skills learned in previous years training through the use of exercises, improvisations, reading and discussions, and a variety of performance projects including scenes and monologues.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

---

PRF 413  
ACTING IV  
Undergraduate

Third course in a 3 course sequence. Utilizing an ensemble approach, this class helps prepare the student for the rigors of the professional world by integrating the skills learned in previous years training through the use of exercises, improvisations, reading and discussions, and a variety of performance projects including scenes and monologues.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 414
AUDITION
Undergraduate
Students experience handling the range of possible audition situations. Topics include selecting and preparing materials, building a repertoire, and sight reading. Guest professionals lecture on practical survival techniques from job hunting to union membership. The work of the class culminates in The Graduate Showcase, when students audition for an audience of invited agents, casting directors, and directors.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 415
AUDITION
Undergraduate
Students experience handling the range of possible audition situations. Topics include selecting and preparing materials, building a repertoire, and sight reading. Guest professionals lecture on practical survival techniques from job hunting to union membership. The work of the class culminates in The Graduate Showcase, when students audition for an audience of invited agents, casting directors, and directors.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 416
GRADUATE SHOWCASE
Undergraduate
Through the rehearsal process, undergraduate acting majors prepare monologues and scenes, culminating ultimately in a showcase for an invited audience of casting directors, agents, and directors.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 417
NEW PLAY WORKSHOP
Undergraduate
A specialized workshop which brings together MFA 1 actors, MFA 3 Directors, and BFA 3 & 4 playwrights to explore the collaborative process of developing and staging new plays.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 418
NEW PLAY WORKSHOP
Undergraduate
A specialized workshop which brings together MFA 1 actors, MFA 3 Directors, and BFA 3 & 4 playwrights to explore the collaborative process of developing and staging new plays.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 419
NEW PLAY WORKSHOP
Undergraduate
A specialized workshop which brings together MFA 1 actors, MFA 3 Directors, and BFA 3 & 4 playwrights to explore the collaborative process of developing and staging new plays.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 420
ACTING FOR THE CAMERA
Undergraduate
“Film acting” prepares the student for the professional world in front of the camera(s). The student learns the different techniques between stage and film, between soaps, sitcoms, commercials, and features. The student is also exposed to life on the set, contracts, agents, managers and steps to finding work. This class is a bridge for the student for the student from the classroom to the professional world.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 421
MOVEMENT IV
Undergraduate
The technique of movement to music will be used to: Stimulate the actor's imagination, experiment with the identification, translation, and articulation of creative impulses, intensify ensemble work, expand the range of expression, and strengthen and condition the body.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 422
MOVEMENT IV
Undergraduate
The technique of Movement to Music will be used to: Stimulate the actor's imagination, experiment with the identification, translation, and articulation of creative impulses, intensify ensemble work, expand the range of expression, and strengthen and condition the body.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 423
MOVEMENT IV
Undergraduate
This quarter the student will explore African dance, including West African dance styles, songs and rhythms, different ethnic groups from which the dances and songs originated, and the relationship between various West Africa tribal rhythms and movements.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 431
VOICE AND SPEECH IV
Undergraduate
Continued development of skills designed to assist the student with a comfortable transition to the professional world through an approach to singing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 432
VOICE AND SPEECH IV
Undergraduate
Continued development of skills designed to assist the student with a comfortable transition to the professional world through and approach to singing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 433
VOICE AND SPEECH IV
Undergraduate
The course is designed to continue the development of professional skills through the study of voiceover.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 434
ADVANCED SCENE STUDY
Undergraduate
A scene study and monologue class taught by a resident or visiting professional actor or director. Scenes and monologues are drawn from a variety of performance styles. The class is intended to help the student navigate the gap between training and the professional acting world.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
PRF 435
ADVANCED SCENE STUDY
Undergraduate
A scene study and monologue class taught by a resident or visiting professional actor or director. Scenes and monologues are drawn from a variety of performance styles. The class is intended to help the student navigate the gap between training and the professional acting world.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 436
ADVANCED SCENE STUDY
Undergraduate
A scene study and monologue class taught by a resident or visiting professional actor or director. Scenes and monologues are drawn from a variety of performance styles. The class is intended to help the student navigate the gap between training and the professional acting world.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 461
REHEARSAL AND PERFORMANCE II
Undergraduate
Advanced acting and directing students are continually involved in rehearsal or performance of plays in Showcase, Playworks, or workshop productions. These students constitute the acting company for the school.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 462
REHEARSAL AND PERFORMANCE II
Undergraduate
Advanced acting and directing students are continually involved in rehearsal or performance of plays in Showcase, Playworks, or workshop productions. These students constitute the acting company for the school.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 463
REHEARSAL AND PERFORMANCE II
Undergraduate
Advanced acting and directing students are continually involved in rehearsal or performance of plays in Showcase, Playworks, or workshop productions. These students constitute the acting company for the school.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 471
SEMINAR: SPECIAL TOPICS IN DIRECTING
Undergraduate
According to the expertise of faculty and the needs and interests of advanced students, this course deals variously with selected topics in stage directing, including the history and development of stage directing as an independent art form, directing theory, and directing methodology.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

PRF 511
GRADUATE ACTING I
Graduate
Beginning with a series of exercised and improvisations, the class introduces the acting student to the basic components of the acting process. Scene work forms the backbone of this class.

Status as Graduate Theatre student is a prerequisite for this class.
PRF 512
GRADUATE ACTING I
Graduate
Beginning with a series of exercised improvisations, the class introduces the acting student to the basic components of the acting process. Scene work forms the backbone of this class.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 513
GRADUATE ACTING I
Graduate
Beginning with a series of exercised improvisations, the class introduces the acting student to the basic components of the acting process. Scene work forms the backbone of this class.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 521
GRADUATE MOVEMENT I
Graduate
Movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use and over-all self-awareness. This class will also meet two extra hours with a different instructor to concentrated on the imaginative use of self, to explore physical improvisation and to explore movement techniques that will aid the student to use themselves more freely and expand their range of expression.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 522
GRADUATE MOVEMENT I
Graduate
Movement based on the technique of yoga as a means for the discovery of body mechanics, physical alignment, self-use and over-all self-awareness. This class will also meet two extra hours with a different instructor to concentrated on the imaginative use of self, to explore physical improvisation and to explore movement techniques that will aid the student to use themselves more freely and expand their range of expression.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 523
GRADUATE MOVEMENT I
Graduate
Work focuses on full body awareness through Feldenkrais (R) movement lessons and through the study of anatomy. The emphasis will be place on deepening the actor’s kinesthetic awareness and on developing a more articulate physical instrument, understanding the restrictions of habit, exploring dynamics and increasing the ability to make dynamic choices.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 524
GRADUATE MOVEMENT I: FELDENKRAIS
Graduate
An experiential and demonstration course in better self-use and physical organization. Approaches include Feldenkrais, "Awareness Through Movement" lessons and the study of anatomy.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 525
GRAD MOVEMENT I: FELDENKRAIS
Graduate
An experiential and demonstration course in better self-use and physical organization. Approaches include Feldenkrais, "Awareness Through Movement" lessons and the study of anatomy.

Status as Graduate Theatre student is a prerequisite for this class.
PRF 530
MFA I SPEECH
Graduate

This course is designed to open awareness regarding the placement of vocal resonance and the shaping of vowels and consonants. Status as Graduate Theatre student is a prerequisite for this class.

PRF 531
GRADUATE VOICE AND SPEECH I
Graduate

Foundation work consists of breathwork, skeletal alignment, and the development of free voice flow. Classes include a regime of intensive group exercises, and attention is paid to the expansion of each actor's individual expressiveness. The fundamental work is inspired by the Feldenkrais(r) and the Lessac System and is further influenced by the writings of Cicely Berry and Patsy Rodenburg. Status as Graduate Theatre student is a prerequisite for this class.

PRF 532
GRADUATE VOICE AND SPEECH I
Graduate

Foundation work consists of breathwork, skeletal alignment, and the development of free voice flow. Classes include a regime of intensive group exercises, and attention is paid to the expansion of each actor's individual expressiveness. The fundamental work is inspired by the Feldenkrais(r) and the Lessac System and is further influenced by the writings of Cicely Berry and Patsy Rodenburg. Status as Graduate Theatre student is a prerequisite for this class.

PRF 533
GRADUATE VOICE AND SPEECH I
Graduate

 Actors will continue to explore fundamental skills acquired during Fall and Winter Quarters. The actors learn the first half of the progression of exercises in Kristin Linklater's Freeing the Natural Voice. The focus is on connecting acting impulses to the voice. Status as Graduate Theatre student is a prerequisite for this class.

PRF 540
GRAD SPEECH I: ADVANCED NOTATION
Graduate

Objectives are to extend the use of phonetic symbols to describe the speech of self and others, to explore an ever-widening range and flexibility of choice in pronunciation, to develop a more acute "ear" for the music of vowels and consonants and to apply the work to texts. Status as Graduate Theatre student is a prerequisite for this class.

PRF 551
MFA I IMPROVISATION
Graduate

Intensive work in Spolin-based improvisation in which the issues of creating theatrical reality are addressed through the medium of theatre games. Status as Graduate Theatre student is a prerequisite for this class.

PRF 552
MFA I MEISNER
Graduate

Sanford Meisner said, "Acting is the ability to live truthfully under imaginary circumstances." In this first of a two quarter sequence, actors will participate in a sequence of structured improvisational exercises focused on the first half of that sentence: living truthfully. The foundational exercise is called Repetition. Using Repetition as a base, students will explore exercises specifically designed to improve their listening and answering skills and increase their ability to respond to their partner moment to moment. Status as Graduate Theatre student is a prerequisite for this class.
Building on the work of the winter quarter, students will use their enhanced partner attention skills in order to focus on the second half of Meisner's definition of acting: "living truthfully under imaginary circumstances." Each exercise in the progression is designed to expand the actor's ability to imagine and personalize circumstances that are meaningful to them. We will also explore what the student needs to do to be ready for the first moment of a scene or play: Emotional Preparation. Finally, actors will learn how to carry over what they have learned into a scripted scene.

Status as Graduate Theatre student is a prerequisite for this class.

Graduate acting and direction students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series and workshop productions. Acting students constitute the casting pool for the school.

Status as Graduate Theatre student is a prerequisite for this class.

Status as Graduate Theatre student is a prerequisite for this class.

One quarter hour. Students learn the fundamental of hand-to hand combat and weaponry with a focus on developing skills safely and effectively for the stage.

Status as Graduate Theatre student is a prerequisite for this class.

This course covers the basics of the directing process with an emphasis on textual analysis. Lecture discussion and performance projects are utilized to develop a common understanding and vocabulary useable in the wide variety of theatrical situations the contemporary director is likely to confront. The final project of the class is the direction of a short play.

Status as Graduate Theatre student is a prerequisite for this class.

The final project of the class is the direction of a short play.

Status as Graduate Theatre student is a prerequisite for this class.

This workshop for graduating and performance students is designed to renew the student's relationship with the foundation of the training program: Spolin-based improvisational work. There is a particular emphasis on the use of games as a stimulus for spontaneity, strong playing relationships and trouble shooting within the rehearsal process.

Status as Graduate Theatre student is a prerequisite for this class.
**PRF 591**
**DIRECTING THEORIES**
**Graduate**
This course is designed to introduce students to the history of stage directing as an independent art form and to the key directorial thinkers of Western theatre. Through both lecture and practice, student learn the theories and techniques of such innovators as Stanislavski, Meyerhold, Craig Artaud, Brecht, Clurman, Grotowski, Brook, LeCompte, and Bogart.

Status as Graduate Theatre student is a prerequisite for this class.

**PRF 592**
**DIRECTING THEORIES**
**Graduate**
This course is designed to introduce students to the history of stage directing as an independent art form and to the key directorial thinkers of Western theatre. Through both lecture and practice, student learn the theories and techniques of such innovators as Stanislavski, Meyerhold, Craig Artaud, Brecht, Clurman, Grotowski, Brook, LeCompte, and Bogart.

Status as Graduate Theatre student is a prerequisite for this class.

**PRF 599**
**INDEPENDENT STUDY**
**Graduate**
Independent Study

Status as Graduate Theatre student is a prerequisite for this class.

**PRF 611**
**GRADUATE ACTING II: CLASSICAL**
**Graduate**
The goal of this year-long course in Heightened Text/Classical Acting is to join the emotional, physical and imaginative life of a role with the technical skills needed to express that character to its fullest. This is achieved through rigorous foundation work and applying the basic tenets of acting to the acting of plays in verse; making strong choices that are grounded in the text, establishing a connection to the scene partner, listening and responding to what is happening in the scene, and integrating the work done in other voice, speech and movement classes.

Status as Graduate Theatre student is a prerequisite for this class.

**PRF 612**
**GRADUATE ACTING II: CLASSICAL**
**Graduate**
In winter quarter, students work with dramatic monologues, explore and study Shakespeare's prose and scenes from the Jacobean playwrights John Webster, John Ford and Thomas Middleton. Though prose lacks meter, it has its own rhythm, in part defined by punctuation and rhetorical shape. Finding that rhythm of thought is essential to the clarity and life of the prose. With prose, as with meter, rhetoric, and imagery, we approach the work through both brain and body: balancing analytical and physical techniques for understanding and harnessing the dynamics of Shakespeare's language.

Status as Graduate Theatre student is a prerequisite for this class.

**PRF 613**
**GRADUATE ACTING II: CLASSICAL**
**Graduate**
The spring quarter will focus on comedies by Shakespeare, Moliere, Sheridan, Wilde and Coward. Students will call upon all of the truth-seeking, risk-taking and relish-making that comedy and heightened language requires. Only farce and commedia are larger. The resulting agility with text provides a firm foundation for confident performance of all classical and modern roles. Exploration of Shakespeare's comedies will include collaboration with M.F.A. Directors with scenes to be presented as an invited-audience showing.

Status as Graduate Theatre student is a prerequisite for this class.
PRF 614
THE DIRECTOR AND THE ACTING PROCESS
Graduate
This year-long class focuses on how the director helps the actor. Through both participation and observation in this undergraduate scene study class taught by a senior member of the acting faculty, the directing student acquires the skills and strategies necessary in helping the actor personalize and embody the text.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 615
THE DIRECTOR AND THE ACTING PROCESS
Graduate
This year-long class focuses on how the director helps the actor. Through both participation and observation in this undergraduate scene study class taught by a senior member of the acting faculty, the directing student acquires the skills and strategies necessary in helping the actor personalize and embody the text.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 616
THE DIRECTOR AND THE ACTING PROCESS
Graduate
This year-long class focuses on how the director helps the actor. Through both participation and observation in this undergraduate scene study class taught by a senior member of the acting faculty, the directing student acquires the skills and strategies necessary in helping the actor personalize and embody the text.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 617
DIRECTING: SCENE STUDY
Graduate
This is a two-quarter classic play scene study class. MFA directors will learn a variety of techniques in staging, text analysis, and working with actors. Directors will work with a variety of modern writers including Chekov, Ibsen, Miller, and O'Neill. They will also investigate working with heightened text including Moliere, Shakespeare, and the Greeks.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 618
DIRECTING: SCENE STUDY
Graduate
This is a two-quarter classic play scene study class. MFA directors will learn a variety of techniques in staging, text analysis, and working with actors. Directors will work with a variety of modern writers including Chekov, Ibsen, Miller, and O'Neill. They will also investigate working with heightened text including Moliere, Shakespeare, and the Greeks.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 619
THE DIRECTOR AND THE NEW PLAY DEVELOPMENT PROCESS
Graduate
This course is offered every other year and explores the director's role in the development of new plays. MFA Directors work with professional playwrights on new work. Directors are introduced to the many ways they may be charged with presenting new work, including table readings, staged readings, workshops, designed workshops and world premieres. Over the course of the quarter, directors rehearse and present one sit-down reading and one staged reading. Additionally, students rehearse and present a staged reading in a professional situation.

Status as Graduate Theatre student is a prerequisite for this class.
PRF 621
GRADUATE MOVEMENT II
Graduate
Movement work focused on the exploration of effort/shape and how to function within the boundaries of form. Period dances, manners, and clothing will be explored and the creation of specific worlds (styles) will be emphasized.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 622
GRADUATE MOVEMENT II
Graduate
Movement work focused on the exploration of effort/shape and how to function within the boundaries of form. Period dances, manners, and clothing will be explored and the creation of specific worlds (styles) will be emphasized.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 623
GRADUATE MOVEMENT II
Graduate
Movement work designed to further the work in period dances, manners, and the creation of specific worlds (styles) with an emphasis on the student taking greater control of this research and its implementation into action. Full Body awareness through movement lessons is continued. Imaginative use of self is also channeled through character mask work.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 631
GRADUATE VOICE AND SPEECH II
Graduate
Intensive, individualized work on the development of the full range of the actor’s voice. The second half of the Linklater progression is explored in depth. Texts are chosen that place greater demands on the actor’s growing emotional and vocal capabilities.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 632
GRADUATE VOICE AND SPEECH II
Graduate
Intensive, individualized work on the development of the full range of the actor’s voice. The second half of the Linklater progression is explored in depth. Texts are chosen that place greater demands on the actor’s growing emotional and vocal capabilities.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 633
GRADUATE VOICE AND SPEECH II
Graduate
Intensive, individualized work on the development of the full range of the actor’s voice. The second half of the Linklater progression is explored in depth. Texts are chosen that place greater demands on the actor’s growing emotional and vocal capabilities.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 641
GRADUATE ACTING II: MYTH, FABLE, & FOLKLORE IN DRAMA
Graduate
This course explores the world of archetype, performance and magic in drama across boundaries of time and tradition. Inspired by folktales, myths, oral poetry and rituals from many traditions, the students develop original and play-based theatrical work both solo and ensemble. Resources include the traditional stories of African, Asian, South American, European and American literature, as well as plays from modernity that explore a mythic or folkloric basis.

Status as Graduate Theatre student is a prerequisite for this class.
PRF 642
GRADUATE ACTING II: TRAGIC FOCUS FROM 1700 TO 1950
Graduate
This course explores a broad swath of tragic-focused dramatic material from Restoration through 1950. The students select scenes from plays that follow tragic shape and perform them in scene study form.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 643
GRADUATE ACTING II: COMIC FOCUS FROM 1700 TO 1950
Graduate
This course explores a broad swath of comic-focused dramatic material from Restoration through 1950. The students select scenes from plays that follow comic shape and perform them in scene study form.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 661
REHEARSAL AND PERFORMANCE II
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 662
REHEARSAL AND PERFORMANCE II
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 663
REHEARSAL AND PERFORMANCE II
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 671
MFA WORKSHOP II: ACTOR AS ENTREPRENEUR
Graduate
MFA Workshop is a flexible laboratory time period designed to accommodate a number of possibilities of workshops, lectures, and demonstrations with guest artists mainly from the Chicago theatre community and beyond. MFA Workshop also accommodates a number of projects generated by the MFA Acting students themselves. As MFA Workshop is a process class, projects and workshops may or may not result in a showing. (Some activities in the class will combine MFA I and MFA II students and some will be specific to each class.)
Status as Graduate Theatre student is a prerequisite for this class.

PRF 672
MFA WORKSHOP II: ACTOR AS ENTREPRENEUR
Graduate
MFA Workshop is a flexible laboratory time period designed to accommodate a number of possibilities of workshops, lectures, and demonstrations with guest artists mainly from the Chicago theatre community and beyond. MFA Workshop also accommodates a number of projects generated by the MFA Acting students themselves. As MFA Workshop is a process class, projects and workshops may or may not result in a showing. (Some activities in the class will combine MFA I and MFA II students and some will be specific to each class.)
Status as Graduate Theatre student is a prerequisite for this class.
MFA WORKSHOP II: ACTOR AS ENTREPRENEUR
Graduate

MFA Workshop is a flexible laboratory time period designed to accommodate a number of possibilities of workshops, lectures, and demonstrations with guest artists mainly from the Chicago theatre community and beyond. MFA Workshop also accommodates a number of projects generated by the MFA Acting students themselves. As MFA Workshop is a process class, projects and workshops may or may not result in a showing. (Some activities in the class will combine MFA I and MFA II students and some will be specific to each class.)

Status as Graduate Theatre student is a prerequisite for this class.

ADVANCED STAGE COMBAT
Graduate

In this course students will continue their study of unarmed and rapier-&-dagger techniques, as well as adding a third weapon discipline as taught by The Society of American Fight Directors (past options have included knife, broadsword, quarterstaff, small sword) for use in stage and film performance. The students will perform choreography in all three disciplines, in scenes which they themselves select but which are choreographed by the instructor. The students are then given the opportunity to take the SAFD’s Skills Proficiency Test for all three weapons, with an outside adjudicator, in the hope of reaching ‘Actor Combatant’ status within the SAFD.

Status as Graduate Theatre student is a prerequisite for this class.

DIRECTING II
Graduate

A laboratory class in which student directed scenes are rehearsed and presented for discussion and criticism. Several cuttings are directed during the year.

Status as Graduate Theatre student is a prerequisite for this class.

DIRECTING II
Graduate

A laboratory class in which student directed scenes are rehearsed and presented for discussion and criticism. Several cuttings are directed during the year.

Status as Graduate Theatre student is a prerequisite for this class.

DIRECTING II
Graduate

A laboratory class in which student directed scenes are rehearsed and presented for discussion and criticism. Several cuttings are directed during the year.

Status as Graduate Theatre student is a prerequisite for this class.

INTERNSHIP
Graduate

The internship provides the student with an opportunity to learn by working with experienced professionals in an area related to his or her area of study at The Theatre School.

Status as Graduate Theatre student is a prerequisite for this class.
PRF 691
DIRECTING SEMINAR
Graduate
This course provides the opportunity for all three years of MFA directors and directing faculty to share, discuss and investigate particular and immediate aspects of directing. The course provides a forum for directors to discuss current rehearsal processes and trouble-shoot with their colleagues and instructor. Additionally, directing students reflect on, discuss and receive feedback from their colleagues and instructor on production work. The second half of the course focuses on honing a specific directorial skill or exploring new directorial territory. This component changes quarterly at the discretion of the instructor.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 692
DIRECTING SEMINAR
Graduate
This course provides the opportunity for all three years of MFA directors and directing faculty to share, discuss and investigate particular and immediate aspects of directing. The course provides a forum for directors to discuss current rehearsal processes and trouble-shoot with their colleagues and instructor. Additionally, directing students reflect on, discuss and receive feedback from their colleagues and instructor on production work. The second half of the course focuses on honing a specific directorial skill or exploring new directorial territory. This component changes quarterly at the discretion of the instructor.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 693
DIRECTING SEMINAR
Graduate
This course provides the opportunity for all three years of MFA directors and directing faculty to share, discuss and investigate particular and immediate aspects of directing. The course provides a forum for directors to discuss current rehearsal processes and trouble-shoot with their colleagues and instructor. Additionally, directing students reflect on, discuss and receive feedback from their colleagues and instructor on production work. The second half of the course focuses on honing a specific directorial skill or exploring new directorial territory. This component changes quarterly at the discretion of the instructor.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 711
GRADUATE ACTING III: COMPANY CREATION
Graduate
This course is a journey with toolbox through creating and producing ensemble-based theater. Students follow two pathways: creating theater and producing theater. The path of creating follows on the self-generated work of MFA I and II Workshops, empowering the class to imagine and rehearse an original piece of theater through an invented process. Weekly rehearsal meetings build the piece into a "producer's rehearsal" at the end of the quarter. The path of producing introduces the class to tools necessary for mounting theater in Chicago or elsewhere. Using the piece under construction as their example, the students delegate and coordinate work on mission statement, company structure/contracts, by-laws, board formation, not-for-profit/tax-exempt status, grant writing, fundraising, space rental, rehearsal process, press relations, advertising, audience development, festivals, transfers, documentation, and touring.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 712
GRADUATE ACTING III: PROFESSIONAL PREPARATION
Graduate
This course follows on the Audition class from fall quarter bringing the students into simulated auditions for weekly guests including professional casting directors, casting agents, talent managers, artistic directors, and filmmakers from Chicago and beyond. Feedback will focus on empowering the actors to strengthen their approach, courage, effectiveness and flexibility in the casting process as felt in the "real world."

Status as Graduate Theatre student is a prerequisite for this class.
PRF 713
GRADUATE ACTING III: ADVANCED IMPROVISATION
Graduate
This intensive course capstones the impulse work and Spolin-based work from MFA I Improvisation by updating the class to improvisational forms that extend beyond scenic and sketch. Mining the rich and still-unfolding history of Chicago improvisation, students flex their creative muscles by exploring long-form improvisational models and unique multi-scenic structures.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 714
AUDITION
Graduate
This studio-based class introduces the student to multiple forms of audition practiced in professional theater as well as those forms practiced in film, television, and commercials. Students train rigorously with monologues, cold readings, callback scenes, copy reading, and reader-style auditions in weekly class simulations. The course will cover methods for researching and attending auditions, finding and preparing suitable material, as well as handling the audition process professionally and successfully. Discussions of “type,” “color-blind casting,” manager/agent relationships, and ethical concerns of auditions will be included.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 716
GRADUATE SHOWCASE
Graduate
Through the rehearsal process, graduate acting majors prepare monologues and scenes, culminating ultimately in a showcase for an invited audience of casting directors, agents, and directors.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 720
ACTING FOR THE CAMERA
Graduate
"Film acting" prepares the student for the professional world in front of the camera. Working in front of the camera(s), the student learns the different techniques between stage and film techniques and the differences, between soaps, sitcoms, commercials, and features. The student is also exposed to life on the set, contracts, agents, managers and steps to finding work. This class is a bridge for the student from the classroom to the professional world.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 721
GRADUATE MOVEMENT III
Graduate
The technique of movement to music will be used to: stimulate the actor's imagination, experiment with the identification, translation, and articulation of creative impulses, intensify ensemble work, expand the range of expression and strengthen and condition the body.

Status as Graduate Theatre student is a prerequisite for this class.

PRF 722
GRADUATE MOVEMENT III
Graduate
An independent study of movement for the actor.

Status as Graduate Theatre student is a prerequisite for this class.
PRF 723
GRADUATE MOVEMENT III: PILATES
Graduate
This is a finishing level movement class that is taught by certified instructors at a nearby studio. Working on Pilates equipment ("reformers", etc.), this class offers the student a chance to further learn about efficient patterns of motion while creating an evenly conditioned body. Pilates helps the student develop strong core muscles and build strength without "bulking up". This class will draw upon the student's previous movement classes by challenging their awareness, levels of inquiry and physical decisions in a non-theatrical movement class.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 724
GRADUATE MOVEMENT III: PILATES
Graduate
This is a finishing level movement class that is taught by certified instructors at a nearby studio. Working on Pilates equipment ("reformers", etc.), this class offers the student a chance to further learn about efficient patterns of motion while creating an evenly conditioned body. Pilates helps the student develop strong core muscles and build strength without "bulking up". This class will draw upon the student's previous movement classes by challenging their awareness, levels of inquiry and physical decisions in a non-theatrical movement class.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 731
GRADUATE VOICE AND SPEECH III
Graduate
Students continue to develop professional skills through singing.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 732
GRADUATE VOICE AND SPEECH III
Graduate
Students acquire flexibility in role development through vocal exploration.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 733
VOICEOVER
Graduate
The course is designed to continue the development of professional skills through the study of voiceover.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 761
REHEARSAL AND PERFORMANCE III
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school.
Status as Graduate Theatre student is a prerequisite for this class.

PRF 762
REHEARSAL AND PERFORMANCE III
Graduate
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school.
Status as Graduate Theatre student is a prerequisite for this class.
PRF 763  
REHEARSAL AND PERFORMANCE III  
Graduate  
Graduate acting and directing students are continually involved in rehearsal and performance of plays in the Showcase, the Playworks series, and workshop productions. Acting students constitute the casting pool for the school.  

Status as Graduate Theatre student is a prerequisite for this class.

PRF 771  
SEMINAR: SPECIAL TOPICS IN DIRECTING  
Graduate  
According to the expertise of faculty and the needs and interests of advanced students, this course deals variously with selected topics in stage directing, including the history and development of stage directing as an independent art form, directing theory, and directing methodology.  

Status as Graduate Theatre student is a prerequisite for this class.

PRF 781  
THESIS PROJECT IN DIRECTING  
Graduate  
A year long research and performance project that culminates in a fully supported production and written thesis. The production is part of The New Directors Series presented for the general public.  

Status as Graduate Theatre student is a prerequisite for this class.

PRF 782  
THESIS PROJECT IN DIRECTING  
Graduate  
A year long research and performance project that culminates in a fully supported production and written thesis. The production is part of The New Directors Series presented for the general public.  

Status as Graduate Theatre student is a prerequisite for this class.

PRF 783  
THESIS PROJECT IN DIRECTING  
Graduate  
A year long research and performance project that culminates in a fully supported production and written thesis. The production is part of The New Directors Series presented for the general public.  

Status as Graduate Theatre student is a prerequisite for this class.

PSC 120  
THE AMERICAN POLITICAL SYSTEM  
Undergraduate  
A survey of the national political system, including discussions of the political beliefs and behavior of citizens, the constitutional structure, and national political processes.

PSC 140  
INTRODUCTION TO INTERNATIONAL RELATIONS  
Undergraduate  
Three main themes are dealt with: the nature of power in the international political system, conflict and conflict resolution in the system, and the basis of national foreign policy decisions. Issues of current importance, such as the likelihood of global war, conflict between rich and poor nations, and East-West relations, provide the substantive material to illuminate these main themes.
PSC 150
INTRODUCTION TO COMPARATIVE POLITICS
Undergraduate
This course focuses on the way in which political systems other than that of the United States operate. The common features of governments are identified and examined with special attention to such topics as political elites, political institutions, mass political behavior, political change and revolution. Examples are drawn from a wide range of political systems.

PSC 201
GEOGRAPHIC INFORMATION SYSTEMS
Undergraduate
An introductory-level course covering the fundamentals of Geographic Information Systems (GIS). Topics include GPS, remote sensing, data models (vector and raster), coordinate systems, and map design. Instruction is accomplished through lectures and hands-on computer lab exercises using ArcGIS. Cross-listed with GEO 241.

LSP 120 or HON 180 or (MAT 130 or above) is a prerequisite for this course.

PSC 205
STATISTICS FOR THE SOCIAL SCIENCES
Undergraduate
Data description and interpretation; table construction; correlation, regression and ANOVA; introduction to multivariate analysis; statistical inference and hypothesis testing. Cross-listed with SOC 279.

MAT 100 or higher or placement by test is a prerequisite for this class.

PSC 213
POLITICAL SOCIALIZATION
Undergraduate
This course considers the social institutions important for the political development of individuals. The political significance of institutions such as the family, the school and the work place will be examined. (Please note that the catalog number for this course was changed from PSC 219 to PSC 213 effective Autumn, 2001)

PSC 214
POLITICS AND MULTICULTURALISM
Undergraduate
This course examines the theoretical and practical dilemmas facing multicultural societies, with special emphasis on the United States. Special attention is paid to questions of identity, integration, and separatism.

PSC 216
AMERICAN POLITICAL CULTURE
Undergraduate
An examination of the shared symbol systems that provide meaning and structure for political life. Key historic cultural concepts, such as individualism, materialism and mobility will be considered, and their connections to contemporary popular culture explored.

PSC 217
WOMEN AND POLITICS
Undergraduate
This course explores the ways in which women interpret, gain access to, and use political power. It focuses on sex- and gender-based differences in the political socialization process, and their implications for the participation and organization of women. Gender-related legislation and "women's" political issues are also evaluated. Particular attention is given to women and politics in the United States.

PSC 218
AFRICAN-AMERICAN POLITICS
Undergraduate
This course discusses the nature and scope of African-American politics. Major topics include the radical, liberal, moderate and conservative wings of African-American political discourse, the civil rights movement and its aftermath, the rise of African-American mayors, and presidential politics. An historical survey of African-American politics, and the factors that have shaped them, may also be included.
PSC 219
TOPICS IN POLITICAL CULTURE
Undergraduate
The course focuses on specific themes or concerns in politics and culture. Variable topics.

PSC 220
THE AMERICAN PRESIDENCY
Undergraduate
An examination of the structure of the presidency, its relationship to other political and social institutions, and the way in which that office is shaped by individual presidents.

PSC 221
CONGRESS AND THE LEGISLATIVE PROCESS
Undergraduate
This course provides an analysis of congressional elections, the structure and operation of the United States Congress, the behavior of its members, and the relationship of the Congress to interest groups, the public, the President and the bureaucracy.

PSC 222
POLITICAL PARTIES AND ELECTIONS
Undergraduate
The course explores the changing nature and function of political parties in the United States, factors that affect individual and aggregate vote choice, and the electoral process.

PSC 223
URBAN POLITICS
Undergraduate
Communities running the gamut from small towns through urban neighborhoods to big cities are examined with reference to their structures of government, systems of political influence, and public policy issues.

PSC 224
BUREAUCRACY AND POLITICS
Undergraduate
This course examines the ways that administrative organizations participate in and influence the policy-making process and the common forms of politics within bureaucracies.

PSC 225
STATE POLITICS
Undergraduate
The formal structures of government and political behavior found among the fifty states and their local subdivisions are surveyed.

PSC 229
TOPICS IN AMERICAN POLITICS
Undergraduate
This course discusses selected topics in American politics.

PSC 230
CLASSICAL POLITICAL THOUGHT
Undergraduate
Political thought of the ancient, medieval and early modern period including Plato, Aristotle, Cicero, St. Thomas, and Machiavelli.

PSC 231
MODERN POLITICAL THOUGHT
Undergraduate
Political thought of the modern period including Hobbes, Locke, Rousseau, Hume, Burke, Mill, and Marx.
PSC 233
POLITICAL IDEAS AND IDEOLOGIES
Undergraduate
An introduction to the enduring political issues confronted by major theorists and political traditions. (Please note that the catalog number for this course was changed from PSC 203 to PSC 233 effective Autumn, 2001.)

PSC 234
FREEDOM AND EMPOWERMENT
Undergraduate
Considers different models for the distribution of power including forms of classic and modern elitism and representative and democratic theories. Explores issues of citizenship, community, participation, representation and constitutionalism. The dynamic of inclusion and exclusion within society are addressed as well as theories that point to political, economic, and cultural liberation.

PSC 235
EQUALITY AND SOCIAL JUSTICE
Undergraduate
Considers how societies distribute social goods of power, status, wealth, and informal resources and models of just distribution utilized in classic and modern political theory. Shifts in the meaning of social justice over the course of history and the critical contests over this issue are addressed, as well as the emergence of new models focusing on regional and global concerns. The major concepts including capitalism, socialism and meritocracy are considered.

PSC 236
LEGITIMACY AND CRISIS
Undergraduate
Considers how states achieve validation with their members and maintain that validation through such mechanisms as socialization, education, information flow, civil religion, and war. Theories of social crisis that challenge regime legitimacy are considered as well as issues of revolution, counterrevolution, and regime stabilization.

PSC 239
TOPICS IN POLITICAL THOUGHT
Undergraduate
Variable topics.

PSC 242
AMERICAN FOREIGN POLICY
Undergraduate
An examination of the forces that shape the broad outlines of United States foreign policy, including historical background, and the effects of social forces and governmental structures. The challenges, opportunities and constraints presented by the international environment are also considered.

PSC 243
RUSSIAN FOREIGN POLICY
Undergraduate
This course will probe the institutions, objectives and techniques which are reflected in contemporary Russian external policy. Economic, military and cultural dimensions will augment the primarily political focus of the course. One segment of this course examines Russian - American relations today.

PSC 244
LATIN AMERICAN-UNITED STATES RELATIONS
Undergraduate
This course analyzes the dual thrust of Latin American foreign relations: toward autonomy and “third world” nationalism on the one hand, and interdependence and integration on the other. The course analyzes the background of Latin American-United States relations in the 20th century, and also gives attention to the new relationships and issues emerging among Latin American states.
This course examines the content and domestic and international contexts of the foreign policies of Western European nations, NATO, and the European Union.

This course surveys the international relations of selected Asian countries. For each country, the course presents the basic historical background shaping foreign relations, introduces the external and domestic influences on foreign policy, and identifies emerging international challenges. It examines both the economic and military-security dimensions of Asian foreign relations.

This course discusses selected topics in the area of international relations.

An overview of select Western European political and economic systems (including those of Britain, France and Germany); examination of the European Union and relations between Western Europe and the international community.

This course offers an overview of the fundamental premises, structures and political developments in Russia. Special attention is given to issues of transition from Communism to the new reality, and the emphasis is on contemporary politics. Key issues include the place of the military, economic and business patterns, health, education, and gender.

An examination of the history of Latin America and the major institutions, social sectors, and actors that shape the political life of the region. The course focuses on the development of revolutionary regimes and movements as well as military regimes and their demise during the transition to democracy.

An introduction to contemporary government and politics in Asia, focusing on China and Japan, with comparative reference to other Asian and non-Asian political systems. Special attention will be made to the emerging political and economic role of the Pacific Rim.

An introduction to African politics. The course will focus on the basic concepts, issues, and theoretical models used in studies of the dynamics of government and politics in Africa from the precolonial era to the contemporary period.

This course explores contemporary political issues in the Middle East. It includes country profiles, a review of the Arab-Israeli conflict, analysis of opposing viewpoints about the revival of Islam and about Islamic fundamentalism, and the region's position in the emerging new world order.
PSC 259  
COUNTRY STUDIES  
Undergraduate  
Intensive study of the politics of one foreign nation.

PSC 260  
LAW AND THE POLITICAL SYSTEM  
Undergraduate  
An examination of the American judicial system with special attention to the role of the Supreme Court in American politics, the personnel of the American legal system, the problem of crime and the nature of the criminal justice system, and selected issues in constitutional law, including discrimination, privacy, family life, and freedom of speech, press, assembly and religion.

PSC 261  
FIRST AMENDMENT RIGHTS  
Undergraduate  
A discussion and analysis of Supreme Court decisions interpreting the meaning of the First Amendment guarantees of freedom of speech, press, assembly and religion.

PSC 262  
RIGHTS OF DEFENDANTS  
Undergraduate  
A discussion and analysis of Supreme Court decisions interpreting the meaning of the phrase "due process of law" and the various specific provisions protecting the rights of criminal defendants.

PSC 263  
EQUAL PROTECTION OF THE LAWS  
Undergraduate  
A discussion and analysis of Supreme Court decisions interpreting the meaning of the Equal Protection Clause of the 14th Amendment and resolving issues of race and sex discrimination, school segregation, and the status of indigents in American law.

PSC 269  
TOPICS IN PUBLIC LAW  
Undergraduate  
This course discusses selected topics in the area of public law.

PSC 282  
POLITICAL ACTION AND SOCIAL JUSTICE  
Undergraduate  
This course combines community-based service learning with readings, lectures and classroom discussions to investigate the nature of social justice and the extent to which individual and community political action can promote it. (Please note that the catalog number for this course was changed from PSC 396 to PSC 282 effective Autumn, 2001.)

PSC 284  
MOCK TRIAL: CIVIL LAW  
Undergraduate  
Mock Trial is a co-curricular activity involving intercollegiate competitive simulation of court cases. This course is taught by attorneys and gives students a chance to learn first hand about the work of trial attorneys, understand the judicial system, examine the anatomy of the litigation process, develop critical thinking skills, enhance their communication skills, and participate in simulated trial experiences. Students will learn and practice the basic elements of trial advocacy, including opening statements, direct and cross-examination of witnesses, objections, and closing arguments. PSC 284 focuses on civil law, cases, and procedures.
PSC 285
MOCK TRIAL: CRIMINAL LAW
Undergraduate
Mock Trial is a co-curricular activity involving intercollegiate competitive simulation of court cases. This course is taught by attorneys and gives students a chance to learn first hand about the work of trial attorneys, understand the judicial system, examine the anatomy of the litigation process, develop critical thinking skills, enhance their communication skills, and participate in simulated trial experiences. Students will learn and practice the basic elements of trial advocacy, including opening statements, direct and cross-examination of witnesses, objections, and closing arguments. PSC 285 focuses on criminal law, cases, and procedures.

PSC 286
CAMPAIGNS AND SOCIAL ENGAGEMENT
Undergraduate
This course examines political campaigns and participation in the United States, the role of civic engagement in a representative and democratic political system, and the ethics of political campaigns. Students engage in an experiential project including participation in a political organization.

PSC 288
BIKING, POLITICS AND POLICY
Undergraduate
This class focuses on biking, politics and transportation policy. Through reading, riding, and reflection, students will examine and experience policies that generate bike friendliness. They will also meet with political actors and interest groups that contribute to continuing policy development. The bike’s potential contribution to a green future and to alleviating the political problems of allocating scarce finite resources will also be assessed.

PSC 289
GROUP INTERNSHIP SPECIAL TOPIC
Undergraduate
Various internships.

PSC 299
SPECIAL TOPICS
Undergraduate
SPECIAL TOPICS

PSC 300
POLITICAL ANALYSIS AND RESEARCH
Undergraduate
An introduction to the scientific method as applied in political science research. Among the topics covered are distinctions between normative and empirical statements, techniques for gathering data, basic data analysis, and interpretation of statistical results. This course is strongly recommended for students considering graduate study.

PSC 305
WRITING IN POLITICAL SCIENCE
Undergraduate
Good writers intensively revise their work. This class will improve students’ writing through instruction and revision. The course is intended for students intending to go to law or graduate school or who struggle with writing papers in political science.

PSC 310
POLITICAL CULTURE AND DEVELOPMENT
Undergraduate
Examines the theoretical and empirical linkages between development and culture. Development remains a hotly contested concept, as its relationship with “culture,” or the norms, customs, practices and institutions that govern social relations in a particular society. The relationship between culture and development poses significant challenges to students of international and comparative political economy, especially in an era of unprecedented globalization.
PSC 312
CREATING CHANGE: CONTEMPORARY GAY, LESBIAN, BISEXUAL & TRANSGENDERED POLITICS (CROSS-LST W/ WMS 332)
Undergraduate
Explore the historical roots and contemporary realities of gay, lesbian, bisexual and transgendered (GLBT) politics, nationally and internationally. Such issues as hate crimes, marriage, AIDS, and ballot initiatives over non-discrimination law and policy have entered the political mainstream since the 1970's. This course examines the GLBT movement, its political and social strategies, conflicts and issues, and the political roles played by its members as participants in political culture. (cross-list with WMS 332)

PSC 319
ADVANCED TOPICS IN POLITICAL CULTURE
Undergraduate
Various topics in political cultures.

PSC 321
MASS MEDIA AND AMERICAN POLITICS
Undergraduate
The rise, fall and manipulation of public opinion and voting behavior, with special attention given to the mass media.

PSC 322
URBAN POLICYMAKING
Undergraduate
U.S. urban policy is examined from the standpoints of program objectives, the mechanics of their evaluation, and the barriers to their effective implementation.

PSC 323
CHICAGO GOVERNMENT AND POLITICS
Undergraduate
The particular socioeconomic characteristics of Chicago are linked with its formal government structure, informal political style, and prominent public issues. To enhance this analysis, comparisons with other U.S. cities are employed.

PSC 324
INEQUALITY IN AMERICAN SOCIETY
Undergraduate
This course examines the nature and extent of inequality in American society and explores various psychological, political, social, and economic theories which attempt to explain the existence of this phenomenon.

PSC 325
LATINO POLITICAL EMPOWERMENT
Undergraduate
An in-depth, critical examination of the politics and identity of Latinos in the United States. Major topics include the emergence of Latino communities, the political economy of Latino communities, and institutions and processes of contemporary Latino politics.

PSC 327
PUBLIC OPINION
Undergraduate
An in-depth look into how individuals form opinions, how researchers attempt to measure attitudes, what the public thinks about a variety of social and public policy issues, and the role that public opinion plays in American society, politics and our notions of democracy.

PSC 328
ADVANCED TOPICS IN AMERICAN POLITICS
Undergraduate
Advanced topics In American politics.
PSC 329
ADVANCED TOPICS IN PUBLIC POLICY
Undergraduate
Advanced Topics In Public Policy.

PSC 330
AMERICAN POLITICAL THOUGHT
Undergraduate
An examination of the enduring problems of American political thought from colonial time to the present, including puritanism, constitutionalism, Calhoun, populism, socialism, Social Darwinism, and pragmatism.

PSC 331
CONTEMPORARY POLITICAL THOUGHT
Undergraduate
An intensive seminar discussion of selected political and social thought of contemporary significance drawn from main currents of liberalism, conservatism, socialism, fascism, anarchism, and existentialism.

PSC 333
MARXISM
Undergraduate
An analysis of Marxist political and economic thought as represented by the writings of Marx, Lenin, Trotsky, Lukacs, Sartre. Primary texts will be examined, and their application to the contemporary setting considered.

PSC 334
LATIN AMERICAN POLITICAL THOUGHT
Undergraduate
An historical survey of important themes in political thinking in Latin America. The readings draw upon literature and the writings of political actors and theorists.

PSC 335
THEORIES OF THE CHURCH (CROSS-LISTED AS CTH 209)
Undergraduate
This course deals with the theological, social, and political implications of ecclesiology, or "theories of the church". Students will explore ideas about the origins and purposes of the Church, notions of authority and membership, matters of church and state, and more. The impact of Marxist, feminist, and conservative ideologies on understandings of the church may also be explored. The course will integrate theological, sociological, and political methods of analysis. Cross-listed as CTH 209.

PSC 336
AFRICAN-AMERICAN POLITICAL THOUGHT
Undergraduate
Considers black political thought through a variety of ideological, political, legal and historical perspectives. First explores early efforts by blacks to challenge the racialized limitations of America's core principles of liberty, equality and democracy in the contexts of abolitionism, the women's suffrage movements, Manifest Destiny, and American industrialism. Then concentrates on the evolution of contemporary black political thought, with an emphasis on both conceptual diversity and continuity over time.

PSC 337
CHRISTIAN POLITICAL THOUGHT
Undergraduate
An exploration of key themes, thinkers and movements in the Christian tradition's engagement with power, governance, authority, and allegiance. Students explore scriptural and early church sources, important pre-modern theologians like Augustine and Aquinas, Reformation figures including Luther and Calvin, and contemporary philosophers, theologians and topics.
PSC 338
POLITICS AND LITERATURE
Undergraduate
This course investigates themes in politics through the perspective of major works of literature. The emphasis is on the ways in which writers utilize the imaginative process to represent and investigate the working of society, culture, the individual, the public and private realms, and relationships in order to convey a complex understanding of political values and processes in their eras.

PSC 339
ADVANCED TOPICS IN POLITICAL THOUGHT
Undergraduate
Advanced topics in political thought.

PSC 340
THE EUROPEAN UNION
Undergraduate
This course examines the history, institutional structures and processes, and policies of the EU. It will look at how the EU is unique, sharing characteristics of states and of international organizations.

PSC 342
ARMS, SECURITY, AND WAR
Undergraduate
Focus is on the military dimensions of international politics, such as nuclear and conventional deterrence, arms races, arms control, alliances, and American defense policy, and how those affect war and peace.

PSC 344
WORLD POLITICAL ECONOMY
Undergraduate
Political conflicts over trade relations, global inequality, development, growth, inflation, and scarcity are analyzed, with special emphasis placed on a description of the institutions and processes that shape international economics.

PSC 345
THE CATHOLIC CHURCH IN WORLD POLITICS (CROSS-LISTED AS CTH 386)
Undergraduate
This course seeks to familiarize students with major theories, research traditions, and issues regarding the role of Catholicism in the contemporary world. It will assess the role of various levels and actors with the Church--the Vatican, priests and nuns, lay groups and movements, activists, and others--in working as forces of social change/stability in matters of world politics, economics, and culture. The course will also consider the impact of globalization and other transnational processes on the activities and options of Catholic institutions and actors.

PSC 346
THE UNITED NATIONS AND WORLD PROBLEMS
Undergraduate
This course will examine the historical and theoretical foundations of the United Nations, particularly in light of the changing problems and issues that confront the global community, such as international peace and security, global economic inequality, and environmental and human rights norms.

PSC 347
ETHICS IN WORLD POLITICS
Undergraduate
Drawing on general theories of international relations and historical cases, this course examines both the forces that inhibit the development and effectiveness of ethical norms at the international level and the conditions under which such norms develop and affect the behavior of states and other actors.
PSC 349
ADVANCED TOPICS IN INTERNATIONAL RELATIONS
Undergraduate
Advanced topics in international relations.

PSC 351
REVOLUTION AND TERRORISM
Undergraduate
Aspects of revolution, emphasizing contemporary cases, including units on ideology, leaders, followers, organization, techniques, weapons, causes and theories of revolution.

PSC 353
COMPARATIVE DEMOCRACY AND DICTATORSHIP
Undergraduate
This course compares democracies and dictatorships in order to ascertain how they differ and what are the requisite conditions for each type of political system. Among the concepts to be examined are elections, participation, distribution of resources, corruption, and transparency.

PSC 354
POLITICAL REPRESENTATION IN COMPARATIVE PERSPECTIVE
Undergraduate
A comparative treatment of those processes and institutions that comprise the representative system, including executives, legislatures, political parties, coalitions, and elections.

PSC 355
STATE AND NATION BUILDING
Undergraduate
This course examines the origin, nature and strategies of state formation in general, with particular emphasis on African state processes.

PSC 356
ETHNIC CONFLICT IN THE THIRD WORLD
Undergraduate
This course examines the nature, causes, and consequences of ethnic conflict in "Third World" nations, including conflict resolution in the presence of ethnic and racial cleavages.

PSC 357
EASTERN EUROPE IN TRANSITION
Undergraduate
This course covers the causes of the "democratic" revolutions in 1989 and the processes of change in Eastern Europe as those countries transform from Soviet-model political systems to other forms of politics. The course will cover economic and social developments within those nations as well as relevant changes in their international environments.

PSC 358
GLOBAL GENDER ISSUES
Undergraduate
This course examines how inequalities between women and men are connected to the global politics of power, security, the political economy, and ecology. It focuses on the theoretical and practical linkages between "women's issues" and political matters such as wars of secession, arms proliferation, global economic recessions, and environmental degradation. Questions of the nature of power, abuses of human rights, the human costs of global inequality, and the meaning of a just world order are explored.

PSC 359
ADVANCED TOPICS IN COMPARATIVE POLITICS
Undergraduate
Advanced topics in comparative politics.
PSC 361
INTERNATIONAL LAW
Undergraduate
The nature, sources, and applications of international law in the international community, including issues of recognition, territory, jurisdiction, settlement of international disputes, diplomatic agents, intervention and the use of force.

PSC 362
THE CRIMINAL JUSTICE SYSTEM
Undergraduate
An overview of the important features of the American criminal justice system, including the role of police, courts and corrections. The course analyzes conventional and alternative definitions of crime and explanations for criminal behavior. An examination of race and class issues as they relate to criminal justice, and their implications for public policy, is also included.

PSC 363
WOMEN AND THE LAW
Undergraduate
This course investigates the variety of ways in which women come into relation with the law, focusing on laws and judicial decisions dealing with equal opportunity. Cross-listed as WGS 326.

PSC 364
COMPARATIVE PROTECTION OF INDIVIDUAL RIGHTS
Undergraduate
This course will compare the status of individual rights in Britain, the United States, and Canada, and under the European Convention on Human Rights. Course materials will consist of judicial decisions and other materials on specific areas of civil liberties.

PSC 365
VOTING RIGHTS AND THE LAW
Undergraduate
Explores the legal and political struggles of two originally disenfranchised groups-women and African Americans-to gain access to the ballot, and what their struggles reveal about American law, politics and society. This course is also intended to familiarize students with dominant legal theories, as well as introduce them to alternative approaches such as Critical Race Theory and Critical Feminist Theory. The readings include Supreme Court opinions, legal theories of voting rights jurisprudence, political theories of representation, and historical narratives.

PSC 366
NATIONAL SECURITY AND THE U.S. CONSTITUTION
Undergraduate
Explores the relationship between the U.S. Constitution and the government’s responsibility for the protection of national security. The course examines the constitutional doctrine of separation of powers and the respective roles of Congress, the President, and the courts in the conduct of foreign policy and the use of military force. It also examines the relationship between national security and protection of various rights, including freedom of speech, freedom of the press, privacy, and personal liberty.

PSC 367
IMMIGRATION LAW
Undergraduate
Examines the various legal categories under the U.S. Immigration and Nationality Act that permits persons to be admitted to the United States either temporarily or permanently. It also examines U.S. policies toward illegal immigration and the rights of aliens after the 9/11 terrorist attacks.

PSC 369
ADVANCED TOPICS IN PUBLIC LAW
Undergraduate
Advanced topics in public law.
PSC 385
PUBLIC POLICY: FIELD STUDIES
Undergraduate
This course focuses on the interrelationship between public policy, human values, and nature as displayed through environmental policy governing our national parks. Special attention is given to the cultural dynamics (including political and legal) that are demonstrated in how public policies have been created and implemented over time in regards to our national parks.

PSC 390
CAPSTONE SEMINAR
Undergraduate
Senior capstone seminar.

PSC 390
CAPSTONE SEMINAR
Undergraduate
Senior standing is a prerequisite for this class.

PSC 392
INTERNSHIP
Undergraduate
By arrangement.

PSC 392
INTERNSHIP
Undergraduate
Variable credit.

PSC 393
HONORS SEMINAR
Undergraduate
Variable credit.

PSC 394
SENIOR THESIS
Undergraduate
Variable credit.

PSC 395
TRAVEL/STUDY
Undergraduate
By arrangement with sponsoring faculty, foreign and domestic tours or residence programs may be combined with lectures, readings, and research assignments. Variable credit.

PSC 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

PSY 105
INTRODUCTORY PSYCHOLOGY I
Undergraduate
Introduction to the history and science of psychology; human development through the life span; learning, memory, thinking, language, and intelligence; personality; social psychology. PSY 105 and PSY 106 will include a research participation requirement of no more than six hours. PSY 105 and PSY 106 may be taken in either order; one is not a prerequisite for the other.

PSY 106
INTRODUCTORY PSYCHOLOGY II
Undergraduate
Introduction to the history and science of psychology; neuroscience and behavior; sensation and perception; states of consciousness; motivation and work; emotion; stress and health; psychological disorders; therapy. PSY 105 and PSY 106 will include a research participation requirement of no more than six hours. PSY 105 and PSY 106 may be taken in either order; one is not a prerequisite for the other.
PSY 210  
PSYCHOLOGY OF BUSINESS AND INDUSTRY  
Undergraduate  
Applications of theories and methods of psychology to the study of human behavior in business, industry and other work environments. Cannot be used as psychology major course.

PSY 105 or 106 is a prerequisite for this class.

PSY 213  
LESBIAN, GAY, BISEXUAL AND TRANSGENDER PSYCHOLOGY  
Undergraduate  
Overview of psychological and social issues relevant to lesbian, gay, bisexual, and transgendered (LGBT) individuals and communities. The course will examine key concepts, LGBT psychological research, and efforts to promote liberation and well being.

PSY 215  
HUMAN SEXUALITY  
Undergraduate  
Historical, cultural, psychological and physiological aspects of human sexuality. Cannot be used as psychology major course.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 218  
PSYCHOLOGICAL PROBLEMS OF CONTEMPORARY FAMILY  
Undergraduate  
An overview of the major psychological issues facing the contemporary family. Cannot be used as psychology major course.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 220  
LATINA/O PSYCHOLOGY  
Undergraduate  
The purpose of this course is to examine the psychological research literature on the mental health and well being of Latina/o populations in the United States. A number of relevant topics will be examined, including the current state of Latinas/os in psychology, cultural characteristics and values, immigration, acculturation, ethnic identity, stereotypes and discrimination, health, and education. The goal of this course is for students to be better equipped in understanding the factors that influence the psychology of the Latina/o population.

PSY 221  
ASIAN AMERICAN PSYCHOLOGY  
Undergraduate  
This course provides an overview of historical and current issues related to the psychology of Asian Americans. Factors such as changing demographics, ethnic identity and acculturation will be examined.

PSY 240  
STATISTICS I  
Undergraduate  
Descriptive and inferential statistics in the behavioral sciences.

(PSY 105 or PSY 106) and LSP 120 or equivalents are a prerequisite for this class.

PSY 241  
RESEARCH METHODS I  
Undergraduate  
Introduction to methods of psychological research to enable students to become more sophisticated consumers of research information. Students will learn and apply basic methodological concepts and skills. Students will conduct a non-experimental research project, analyze the data, and write a paper based on the project. PSY 241 and PSY 242 may be taken in either order; one is not a prerequisite for the other.

(PSY 105 or PSY 106) and (PSY 240 or MAT 242 or SOC 279 or MAT 137) are a prerequisite for this class.
PSY 242
RESEARCH METHODS II
Undergraduate
Design, execution, analysis and interpretation of psychology research, with an emphasis on experimental design. Students will conduct an experimental research project, analyze the data, and write a paper based on the project. PSY 241 and PSY 242 may be taken in either order; one is not a prerequisite for the other.

(PSY 105 or PSY 106) and (PSY 240 or MAT 242 or SOC 279) are a prerequisite for this class.

PSY 280
CONTEMPORARY ISSUES
Undergraduate
Psychological aspects of topics of current interest and relevance.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 302
PERSONAL ADJUSTMENT AND MENTAL HEALTH
Undergraduate
Psychological principles involved in personality and interpersonal adjustments. May only be taken for credit toward psychology major by students in the Comprehensive Evening Program. May be taken as general elective by all students.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 303
HUMAN DEVELOPMENT
Undergraduate
Principles of development from conception through maturity. May only be taken for credit toward psychology major by students in the Comprehensive Evening Program. May be taken as general elective by all students.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 305
PSYCHOLOGY AND SOCIAL JUSTICE
Undergraduate
This course is designed to provide students with both in-class and applied experience within the field of psychology, including an overview of psychology as an academic discipline. Offered every quarter.

PSY 105 or 106 is a prerequisite for this class.

PSY 306
SERVICE LEARNING
Undergraduate
This course is designed to provide students with both in-class and applied experience in a specific area of psychology. Course focuses on one particular topic per term, such as Mental Health Problems in Contemporary Society, Chronic Fatigue Syndrome, etc. Check course schedule for current offerings.

PSY 105 or 106 is a prerequisite for this class.

PSY 310
CONNECTING WITH YOUTH THROUGH RESEARCH, ADVOCACY, AND SERVICE: QUARTER I
Undergraduate
This course is the first in a three-quarter service learning sequence designed to teach students the latest research on stressors affecting low-income urban communities and effective strategies for making a difference in those communities. Students will put their learning into practice by connecting as mentors and advocates with low-income urban adolescents.
PSY 311
CONNECTING WITH YOUTH THROUGH RESEARCH, ADVOCACY, AND SERVICE: QUARTER 2
Undergraduate
This course is the second in a three-quarter service learning sequence designed to teach students the latest research on stressors affecting low-income urban communities and effective strategies for making a difference in those communities. Students will put their learning into practice by connecting as mentors and advocates with low-income urban adolescents.

PSY 312
CONNECTING WITH YOUTH THROUGH RESEARCH, ADVOCACY, AND SERVICE: QUARTER 3
Undergraduate
This course is the third in a three-quarter service learning sequence designed to teach students the latest research on stressors affecting low-income urban communities and effective strategies for making a difference in those communities. Students will put their learning into practice by connecting as mentors and advocates with low-income urban adolescents.

PSY 317
PSYCHOLOGY OF INTERPERSONAL RELATIONSHIP
Undergraduate
A review of psychological issues, theory, and research related to close relationships, e.g., attraction, love, attachment, friendship, sexuality, jealousy, conflict and power. Cross-listed with PSY 435.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 325
PSYCHOLOGY OF WOMEN
Undergraduate
A review of research and theory on women, including sexist bias in methodology, violence and discrimination against women, gender differences in power and nonverbal behavior in relationships.

PSY 105 or 106 is a prerequisite for this class.

PSY 326
PSYCHOLOGY OF MEN
Undergraduate
This course evaluates and investigates research and theory of the psychology of males in present society.

PSY 333
CHILD PSYCHOLOGY
Undergraduate
Infancy and childhood. Description and evaluation of principles and theories of development from conception through childhood.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 334
ADOLESCENT PSYCHOLOGY
Undergraduate
Biological, cognitive, emotional and social development. Covers theories and research on normal and abnormal development during adolescence.

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 340
STATISTICS II
Undergraduate
Introduction to advanced statistical techniques such as analysis of variance and regression models.

PSY 240 or equivalents is a prerequisite for this class.
PSY 341
METHODS IN QUALITATIVE RESEARCH (CROSS-LISTED WITH PSY 416)
Undergraduate
Methods in Qualitative Research (Cross-listed as Psychology 416). Principles and techniques of research design in behavioral, social and clinical research; questionnaires, interview schedules, rating scales involving multivariable analyses. Application of parametric and nonparametric tests. Application of research findings to professional practice.

(PSY 105 or 106) and (PSY 240 or equivalents) and PSY 340 are a prerequisite for this class.

PSY 342
RESEARCH METHODS III
Undergraduate
Advanced research methods; topics will vary by instructor.

PSY 241 and PSY 242 are a prerequisite for this class.

PSY 343
INTRODUCTION TO PSYCHOLOGICAL MEASUREMENT
Undergraduate
Measurement in psychology; emphasis on standardization, reliability, validity; test and scale development.

PSY 241 and PSY 242 are a prerequisite for this class.

PSY 345
CULTURAL ISSUES IN PSYCHOLOGY
Undergraduate
Race and ethnic relations in the U.S. is not a fixed, static phenomenon, but rather a dynamic, ever-changing pattern of relationships. This course assists students in understanding the diversity, heterogeneity, and complexity of race relations in American society.

PSY 105 or 106 is a prerequisite for this class.

PSY 346
PSYCHOLOGY OF THE AFRICAN-AMERICAN CHILD (CROSS-LISTED WITH PSY 521)
Undergraduate
Development and socialization of the African-American child from infancy to adolescence. Emphasis on psychological and cultural factors which influence these processes. Understanding the child, family and the child, language and IQ, education and learning styles, and cultural identity are all emphasized. Cross-listed with PSY 521.

PSY 105 or 106 is a prerequisite for this class.

PSY 347
SOCIAL PSYCHOLOGY
Undergraduate
Survey of social psychological theory and research on how individual behavior, thoughts, and feelings are influenced by the social context in which they occur.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 348
SOCIAL COGNITION AND MENTAL CONTROL
Undergraduate
Theory and research dealing with major aspects of social cognition and mental control, including social perception, stereotyping, memory and affect, as well as the self-control of thought, emotion and behavior. Cross-listed with PSY 560.

PSY 347 is a prerequisite for this class.
PSY 351
THEORIES OF PERSONALITY
Undergraduate
Survey of major personality theories with separate emphasis on clinically-derived and research-derived theories. Freudian psychoanalysis is especially emphasized in the clinical area. Personality research philosophy is presented separately and as part of the research-derived theories.

PSY 105 or 106 is a prerequisite for this class.

PSY 353
ABNORMAL PSYCHOLOGY
Undergraduate
Description of the nature, symptoms, treatment applications, and cause of psychological disorders.

PSY 105 or 106 is a prerequisite for this class.

PSY 354
COMMUNITY PSYCHOLOGY
Undergraduate
Focus on systemic and ecological theories of human behavior, diversity, social support, community intervention and evaluation, empowerment, social change, and working with underserved populations. Community service project strongly encouraged. Cross level with PSY 654.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 355
TEAMS AND WORK GROUPS IN ORGANIZATIONS
Undergraduate
The behavior and thinking of individuals in teams and work groups and the functioning of teams in organizational settings.

(PSY 105 or PSY 106) and (PSY 347 or PSY 380) are a prerequisite for this class.

PSY 356
PRINCIPLES OF FIELD RESEARCH AND ACTION
Undergraduate
Basic knowledge of program development, program evaluation, consultation, human diversity, ethics, group dynamics, and interpersonal skills.

PSY 354 is a prerequisite for this class.

PSY 357
APPLIED PSYCHOLOGY I
Undergraduate
Overview of behavioral principles, strategies, and system approaches to individual, organizational, and community change. Generally taken in junior year.

PSY 358
APPLIED PSYCHOLOGY II
Undergraduate
Approaches to counseling, psychotherapy and helping relationships. Generally taken in junior year.

PSY 357 is a prerequisite for this class.

PSY 359
FIELD WORK IN COMMUNITY RESEARCH AND ACTION
Undergraduate
Field work in community research and action.

PSY 356 and senior standing are a prerequisite for this class.
PSY 360
THEORIES OF LEARNING AND COGNITION
Undergraduate
Classical and modern theories.

PSY 105 or 106 is a prerequisite for this class.

PSY 361
HISTORY AND SYSTEMS OF PSYCHOLOGY
Undergraduate
Historical development of psychology and its fields. Cross-listed with PSY 461.

(PSY 105 or 106), PSY 240, (PSY 241 or equivalents) and PSY 242 are a prerequisite for this class.

PSY 362
SEMINAR IN COGNITION (CROSS-LISTED WITH PSY 563)
Undergraduate
Consideration of a current important topic area in cognitive psychology. Cross-listed with PSY 563.

PSY 105 or 106 is a prerequisite for this class.

PSY 363
ALCOHOLISM, DRUG ADDICTION AND RECOVERY
Undergraduate
Survey of major research findings in the area of alcoholism and drug addiction. Description of treatment programs for recovery and explorations of drug free ways to alter consciousness.

PSY 105, PSY 106 or the equivalent of Introduction to Psychology is a prerequisite for this class.

PSY 364
HEALTH PSYCHOLOGY AND STRESS MANAGEMENT
Undergraduate
Considers interaction of mind and body in maintaining health and resisting disease. Contributions of exercise, lifestyle, psychological functioning, and spirituality to wellness will be examined. Students will practice and document their experience with a wide range of stress management/exercise techniques.

PSY 105 or 106 is a prerequisite for this class.

PSY 366
BEHAVIOR PROBLEMS OF CHILDREN
Undergraduate
Factors associated with deviance in children and adolescents. Examination of personal and social consequences. Review treatment programs for children.

PSY 105 or 106 is a prerequisite for this class.

PSY 367
PSYCHOLOGY OF EXCEPTIONAL CHILDREN
Undergraduate
Comprehensive introduction to the study of special children--those children who do not reach their fullest potential because of physical, social, cognitive, or behavioral factors.

PSY 105 or 106 is a prerequisite for this class.
PSY 368
CHILD ABUSE AND NEGLECT (CROSS-LISTED WITH PSY 678)
Undergraduate
This course investigates in detail the causes, consequences, and contextual factors associated with child maltreatment (abuse and neglect) and interventions for children and families. The course considers maltreatment within an ecological context and examines issues of culture and diversity (e.g., race, gender, ethnicity, socioeconomic status, sexual identity, family structure) in relation to maltreatment. It is designed for students with prior coursework in psychological research methods and child psychology or equivalent. Cross-listed with PSY 678.

PSY 240, PSY 241 and PSY 333 or equivalents are a prerequisite for this class.

PSY 369
EMOTIONAL AND BEHAVIORAL DISORDERS CHILDREN AND ADOLESCENTS
Undergraduate
This course examines the major developmental and emotional difficulties experienced by children and adolescents. Factors that lead to the development of disorders, classification and treatment methods will also be examined. Students will be required to complete 25 hours of service in an organization which provides services to this population.

PSY 370
SOCIAL AND EMOTIONAL DEVELOPMENT (CROSS-LISTED WITH PSY 555)
Undergraduate
This course focuses on the development of emotions, social relationships and social interactions. Both theoretical perspectives and research findings are present and analyzed. Topics to be covered may include primary emotions and their development, nonverbal communication of emotion, socialization within the family, friendship and peer relations, aggression, moral development, sex role development and attachment.

PSY 333 is a prerequisite for this class.

PSY 372
RESEARCH METHODS IN SOCIAL PSYCHOLOGY
Undergraduate
Overview of methods and associated problems unique to conducting research with humans both in the laboratory and the field.

PSY 347 is a prerequisite for this class.

PSY 373
HAPPINESS, JUDGMENT AND DECISION MAKING
Undergraduate

PSY 105 or PSY 106 is a prerequisite for this class.

PSY 375
SENSATION AND PERCEPTION
Undergraduate
The physiology of sensory systems and the psychological mechanisms of perception.

(PSY 105 or PSY 106) and PSY 242 are a prerequisite for this class.

PSY 377
PHYSIOLOGICAL PSYCHOLOGY
Undergraduate
Nervous system and endocrine functions as related to behavior.

(PSY 105 or PSY 106) and PSY 242 are a prerequisite for this class.
PSY 378  
COMPARATIVE PSYCHOLOGY (CROSS-LISTED WITH PSY 554)  
Undergraduate  
Patterns of behavior shown by various animal species. Cross-listed with PSY 554. 

(PSY 105 or PSY 106) and PSY 242 are a prerequisite for this class.

PSY 379  
COGNITIVE NEUROSCIENCE  
Undergraduate  
This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

PSY 380  
INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY (CROSS-LISTED WITH PSY 680)  
Undergraduate  
Application of theories and methods of psychology to the study of human behavior in business, industry, and other organizations. Cross-listed with PSY 680.

PSY 105 or 106 is a prerequisite for this class.

PSY 381  
PERSONNEL PSYCHOLOGY  
Undergraduate  
Application of concepts from differential psychology and measurement to employee selection, performance appraisal, placement and training in business and other organizations.

PSY 380 is a prerequisite for this class.

PSY 382  
ORGANIZATIONAL BEHAVIOR  
Undergraduate  
Theories in learning, personality, work motivation, job attitudes, and organizational culture, and application to employee behavior.

PSY 380 is a prerequisite for this class.

PSY 385  
TRAINING AND DEVELOPMENT IN ORGANIZATIONS  
Undergraduate  
Issues related to training in industry and other organizations. Such topics as needs assessment, training program design, and program evaluation will be covered, along with relevant ethical, social and economic issues.

PSY 380 is a prerequisite for this class.

PSY 388  
TOPICAL SEMINAR IN INDUSTRIAL - ORGANIZATIONAL PSYCHOLOGY  
Undergraduate  
Current topics and issues in I-O Psychology beyond the introductory course with particular emphasis on recent developments and research. Topics vary.

PSY 380 is a prerequisite for this class.

PSY 392  
PSYCHOLOGY OF ALIENATION  
Undergraduate  
Causes of individual and group alienation, and the resultant behavior.

PSY 105 or 106 is a prerequisite for this class.
PSY 393
PSYCHOLINGUISTICS (CROSS-LISTED AS MOL 356)
Undergraduate
Applications of linguistic theory and the psychology of language.

PSY 394
ADVANCED TOPICS IN PSYCHOLOGY
Undergraduate
Senior standing is a prerequisite for this class.

PSY 395
FIELD WORK/INTERNSHIP
Undergraduate
Supervised experience in selected off-campus settings and associated readings. Generally taken in senior year.
PSY 357 and PSY 358 are a prerequisite for this class.

PSY 396
HONORS IN PSYCHOLOGY
Undergraduate
Attendance at monthly Honors Seminar is required. Honors thesis is completed during the student's senior year. Can be registered for more than once.
Senior standing is a prerequisite for this class.

PSY 397
EXPERIENTIAL LEARNING/PSYCHOLOGY RESEARCH
Undergraduate
Experiential Learning/Psychology Research.

PSY 398
TUTORING AND MENTORING IN PSYCHOLOGY
Undergraduate
Senior standing is a prerequisite for this class.

PSY 399
INDEPENDENT STUDY
Undergraduate
PSY 402
PERCEPTUAL PROCESSES
Graduate
Analysis of the variables involved in the determination of perception with particular attention to the problems of space, motion, distance, size, form, aftereffects and constancies.

PSY 404
LEARNING AND COGNITIVE PROCESSES
Graduate
Survey of classical and instrumental conditioning, biological constraints, attention, memory, cognition, and practical applications. Major theoretical approaches include stimulus-response, early cognitive theories and information processing theory.

PSY 406
PHYSIOLOGICAL PROCESSES
Graduate
The functional role of neural systems important for the processes of motivation, emotion, sleep, memory, and cognition.
PSY 409
STATISTICS FOR THE BEHAVIORAL SCIENCES
Graduate
Applied inferential statistics.

PSY 240 is a prerequisite for this class.

PSY 410
ADVANCED STATISTICS I
Graduate
Graphical methods for data display, analysis of variance, multiple comparisons, multifactor analysis of variance, randomized block, repeated measures, and related designs. Cross-listed as SOC 450.

PSY 340 is a prerequisite for this class.

PSY 411
ADVANCED STATISTICS II
Graduate
Multiple linear regression, analysis of covariance, and logistic regression.

PSY 410 is a prerequisite for this class.

PSY 412
ADVANCED STATISTICS III
Graduate
Advanced Statistics III

PSY 411 is a prerequisite for this class.

PSY 413
ANALYSIS OF LONGITUDINAL DATA
Graduate
Analysis of changes and time-dependent data.

PSY 414
CATEGORICAL DATA ANALYSIS
Graduate
Analysis of contingency tables and count data logit, probit and loglinear models.

PSY 416
METHODS IN QUALITATIVE RESEARCH
Graduate
Principles and techniques of research design in behavioral, social and clinical research; questionnaires, interview schedules, rating scales involving multivariable analysis. Application of parametric and nonparametric tests. Application of research findings to professional practice.

PSY 418
MULTIVARIATE STATISTICAL ANALYSIS
Graduate
Multivariate regression, principal component, cluster analysis and multidimensional scaling. Canonical correlation, multivariate analysis of variance, linear discriminant function analysis.

PSY 411 is a prerequisite for this class.
**PSY 419**  
**FACTOR ANALYSIS AND PATH MODELING**  
**Graduate**  
Theoretical foundations, methods of analysis, and comparison of various factor analytic models. Structural equation and measurement models using the Mplus/ LISREL program.

PSY 411 is a prerequisite for this class.

**PSY 420**  
**ADVANCED RESEARCH METHODOLOGY**  
**Graduate**  
Design and analysis of basic and applied psychological research with an emphasis on statistical software.

PSY 411 is a prerequisite for this class.

**PSY 421**  
**ADVANCED EXPERIMENTAL DESIGN**  
**Graduate**  
None

**PSY 422**  
**COMPUTING FOR THE BEHAVIORAL SCIENTIST**  
**Graduate**  
An introduction to computer programming, web development, and other computer-intensive techniques as applied to behavioral science research.

**PSY 425**  
**COGNITIVE PROCESSES**  
**Graduate**  
Cognitive Processes

**PSY 426**  
**ADVANCED LANGUAGE SEMINAR: PSYCHOLOGY OF BILINGUALISM**  
**Graduate**  
This course presents an introduction to how bilinguals produce and understand language by examining theoretical constructs and research in psycholinguistics. It also explores developmental and methodological issues in bilingualism research.

**PSY 427**  
**SENSORY PROCESSES**  
**Graduate**  
Sensory Processes

**PSY 430**  
**ADVANCED SOCIAL PSYCHOLOGY**  
**Graduate**  
Advanced study of social psychological methodology, ethics and deception, attitudes, altruism, aggression, and interpersonal processes and attraction.

**PSY 432**  
**ATTITUDE ANALYSIS**  
**Graduate**  
Theory and research in attitude formation and organization, communication and persuasion, resistance to persuasion, and measurement techniques.
PSY 433
SOCIAL JUDGMENT
Graduate
Theory and research in judgment of social stimuli, perceiving and evaluating persons, and social comparison processes.

PSY 434
SMALL GROUP BEHAVIOR
Graduate
Theory and research in goal formation, conformity, power and communication structures, cohesion, and task performance. The emphasis is on the behavior of persons within groups.

PSY 435
PSYCHOLOGY OF INTERPERSONAL RELATIONSHIPS
Graduate
Theory and research on selected aspects of close relationships. Cross-level with PSY 317.

PSY 437
ADVANCED PERSONALITY
Graduate
Critical analysis of research in personality with emphasis on the development and testability of major constructs in contemporary research.

PSY 439
ADVANCED DEVELOPMENTAL PSYCHOLOGY
Graduate
Current research and theories in child development relating to the preschool child, elementary school child, and adolescent. Emphasis on cognitive, language, and social/emotional development.

PSY 440
PSYCHOLOGY OF WORK AND MOTIVATION
Graduate
Current research and theories in organizational psychology relating to motivation, job satisfaction, work attitudes, employee withdrawal, and counterproductivity.

PSY 441
PSYCHOLOGY OF LEADERSHIP
Graduate
Current research and theories in organizational psychology relating to leadership, supervision, job performance, and managerial training. Emphasis is on theoretical development and empirical evaluation of constructs in contemporary research.

PSY 442
PERSONNEL PSYCHOLOGY
Graduate
Major issues in the Human Resource area. Topics include job analysis, job evaluation, pay equity, benefits, incentive systems, and personnel selection methods, focusing on recruitment, biodata, references, testing, interviews.

PSY 443
PSYCHOLOGY OF DESIGN
Graduate
This course helps students understand how theoretical principles of psychology can be applied to the design of human-centered organizations, environments and technologies. Prior familiarity with psychology and experimental design is strongly recommended. Cross-level with PSY 383.
PSY 444
PERFORMANCE APPRAISAL
Graduate
Theory of criterion development, the evaluation process, and measurement in performance appraisal. Emphasis on design and development.

PSY 445
ADVANCED TRAINING AND DEVELOPMENT IN ORGANIZATIONS
Graduate
In-depth exposure to issues related to training in industry and other organizations. Such topics as needs assessment, training program design, program evaluation, and relevant social and economic issues will be covered.

PSY 446
PSYCHOLOGICAL THEORIES OF ORGANIZATIONS
Graduate
Theory and research in the psychology of organizations relating to organizational design, analysis, systems, processes and change.

PSY 447
ORGANIZATIONAL CONSULTATION
Graduate
Applies behavioral science and managerial theories and methodologies to organizational consultation and change processes.
PSY 446 is a prerequisite for this class.

PSY 448
CONCEPTS, METHODS, AND ETHICS FOR INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
The major concepts and techniques relevant to I/O psychology. Topics include psychometrics, regression, validity generalization, utility, legal issues, affirmative action, and ethics.

PSY 450
PSYCHOLOGICAL MEASUREMENT
Graduate
Logical and mathematical principles underlying test construction with emphasis on evaluating the reliability and validity of scores.

PSY 451
APPLIED STATISTICAL PREDICTION
Graduate
Applications of statistics and psychological measurement to the problems of predicting human performance. Several computer programs will be used to analyze data.

PSY 454
BEHAVIOR MODIFICATION
Graduate
Analysis of principles, practices and research related to learning theory and the modification of human behavior.

PSY 461
HISTORY AND SYSTEMS OF PSYCHOLOGY
Graduate
A review of the history of modern psychology, including various theoretical systems. Topics covered will include contributions of important leaders in the field, specific trends throughout the history of psychology, and the major philosophical questions underlying psychological science. Cross-level with PSY 361.
PSY 469  
EMOTIONS AND EMOTIONAL DEVELOPMENT  
Graduate  
Emotions And Emotional Development

PSY 473  
THE PSYCHOLOGY OF JUDGMENT AND DECISION-MAKING  
Graduate  

PSY 481  
INDIVIDUAL INTELLIGENCE TESTING I  
Graduate  
Theories of intelligence and cognitive development. Introduction to the administration of verbal and various nonverbal tests including the Stanford Binet, Wechsler Intelligence Scale for Children and Wechsler Adult Intelligence Scale and the clinical use of these instruments. Materials fee $10.00.

PSY 482  
PERSONALITY ASSESSMENT  
Graduate  
Administration and scoring of the Rorschach and Thematic Aperception Test and other tests. Evaluation of tests and related areas of research and development.

PSY 483  
ADVANCED PSYCHODYNAMICS  
Graduate  
Advanced study of projective techniques and other assessment methods, with emphasis on analysis, interpretation and integration of all pertinent clinical data, and report writing.

PSY 484  
BEHAVIORAL ASSESSMENT  
Graduate  
Behavioral observation and recording. Self-report measures. Physiological measurement. Evaluation of behavioral measures and areas of research.

PSY 485  
NEUROPSYCHOLOGICAL TESTING  
Graduate  
Introduction to theory and assessment techniques related to adult and child neurological functioning.

PSY 486  
ADVANCED PSYCHOPATHOLOGY  
Graduate  
Review of the major diagnostic categories as outlined by the current Diagnostic and Statistical Manual. Current issues in psychopathology and related research are reviewed.

PSY 487  
PSYCHOPATHOLOGY OF THE CHILD  
Graduate  
Introduction to the many categories of psychopathology affecting children and adolescents. Emphasis on the developmental and environmental contexts.
PSY 488
**PRINCIPLES OF PSYCHOTHERAPY**
Graduate
Analysis of theoretical approaches to psychotherapy.

PSY 489
**GROUP PSYCHOTHERAPY**
Graduate
Principles, theories and techniques of group psychotherapy. Problems of selection of group members and evaluation of progress.

PSY 491
**TREATMENT METHODS WITH CHILDREN**
Graduate
Consideration of a variety of treatment approaches used to help alleviate the psychological problems of children.

PSY 492
**PRINCIPLES OF CONSULTATION**
Graduate
The principles and dynamics involved in the various types of consultative relationships. Techniques of consultation with parents, teachers, agencies, physicians and others in regard to problems and deviancy, methods of management and treatment.

PSY 493
**ADVANCED COMMUNITY PSYCHOLOGY**
Graduate
An advanced introduction to community psychology with an emphasis on major historical and contemporary themes such as prevention of psychological problems and promotion of wellness, empowerment and social justice, community research methods, diversity in gender, ethnicity, sexual orientation and disability status, community processes, and collaboration and intervention to address social problems.

PSY 495
**GRANT WRITING IN PSYCHOLOGY**
Graduate
This course will facilitate students’ ability to transpose psychology principles and theory into practice by preparing them to be psychology entrepreneurs via the grant writing process. Class members will become familiar with public and private funding sources, searching for appropriate funding sources, and reviewing a proposal. Class members will create a grant proposal that can be submitted to a funding organization.

PSY 500
**PROFESSIONAL ETHICS**
Graduate
Introduction to ethical issues in the field of clinical psychology. Two quarter hours.

PSY 501
**STATISTICAL APPLICATIONS SEMINAR**
Graduate
Introduction to advanced applications of statistical packages for data analysis, data management, and simulation.

PSY 510
**BEHAVIORAL MEDICINE**
Graduate
Behavioral medicine approaches are introduced.
PSY 511
HEALTH PSYCHOLOGY
Graduate
A survey of the psychological factors involved in health and illness. Also explores the psychological issues in prevention of illness, and psychological considerations in treatment. Cross-listed as MPH 511.

PSY 520
PRINCIPLES OF HUMAN DIVERSITY
Graduate
Considerations related to minority status and issues specific to diagnostics and interventions with minority populations.

PSY 521
PSYCHOLOGY OF THE AFRI CAN-AMERICAN CHILD
Graduate
Development and socialization of African-American child from infancy to adolescence. Emphasis on psychological and cultural factors which influence these processes. Understanding the child, family, language and IQ, education and learning styles, and cultural identity are all emphasized. Cross-level with PSY 346.

PSY 550
SEMINAR IN TEACHING PSYCHOLOGY
Graduate
This course exposes students to major pedagogical and classroom management considerations in higher education and familiarizes students with instructional support services across the university. This year-long, cohort-based course is required for graduate students prior to becoming instructors in the department. It begins each Winter Quarter and ends Autumn Quarter. Students who enroll should expect to complete all requirements for the master?s degree prior to Autumn Quarter. Zero-credit hours.

PSY 551
SEMINAR IN EXPERIMENTAL PSYCHOLOGY
Graduate
None

PSY 552
SEMINAR IN NEUROPSYCHOLOGY
Graduate
None

PSY 553
SEMINAR IN PERSONALITY RESEARCH
Graduate
None

PSY 554
SEMINAR IN DEVELOPMENTAL PSYCHOLOGY
Graduate
This course focuses on special topics in developmental psychology and may cover social, emotional, language, and/or cognitive development during selected portions of the lifespan. Relevant theories and empirical research will be analyzed. Cross-level with PSY 378.

PSY 555
SOCIAL AND EMOTIONAL DEVELOPMENT
Graduate
Focus on development of emotions, social relationships, and social interaction. Both theoretical perspectives and research findings are presented and analyzed. Topics covered may include: primary emotions and their development, nonverbal communication of emotions, socialization within the family, friendship and peer relations, aggression, moral development, sex role development, and attachment. Cross-level with PSY 370.
PSY 556
SEMINAR IN SOCIAL PSYCHOLOGY
Graduate
None

PSY 557
SEMINAR IN LEARNING AND COGNITIVE PROCESSES
Graduate
Seminar in current issues in cognitive psychology.

PSY 558
SEMINAR IN ADVANCED STATISTICS
Graduate
PSY 411 and PSY 420 are a prerequisite for this class.

PSY 559
SEMINAR IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Four quarter hours.
PSY 448 is a prerequisite for this class.

PSY 560
SOCIAL COGNITION
Graduate
Theory and research dealing with the major aspects of social cognition and mental control, including social perception, stereotyping, memory and affect. Cross-level with PSY 348.

PSY 561
ADVANCED PSYCHOLOGY OF WOMEN AND GENDER (CROSS-LISTED WITH MLS 478/WGS 470)
Graduate
A review of research and theory on women, including sexist biases in traditional research, feminist methodology, pedagogy and therapy, violence against women, gender differences in development, relationships, sexuality, and the interplay of gender, race and sexual orientation. Cross-listed with MLS 478 and WGS 470.

PSY 562
SEMINAR IN FAMILY THERAPY
Graduate
A review of systems theory and the assessment and treatment of families.

PSY 563
MENTAL IMAGERY (CROSS-LISTED AS PSY 362)
Graduate
Theory, research and practical applications of mental imagery are considered in lecture/discussion/student-report format. Variety of imagery techniques will be reviewed which have been found useful in research and practice. Special attention devoted to the differences between subjective approaches (consciousness and vividness ratings) versus objective approaches (memory measures) of studying imagery. Cross-listed with PSY 362.

PSY 564
SEMINAR IN CLINICAL RESEARCH
Graduate
PSY 488 is a prerequisite for this class.
PSY 565
PROFESSIONAL DEVELOPMENT SEMINAR
Graduate
An interactive seminar that provides guidance regarding master's thesis research, comprehensive examination or literature review, and/or dissertation plans. Attention to pathways for success in doctoral education, practica, internship, scientific research and careers. Selected topics vary with student needs and interests.

PSY 566
SEMINAR IN PSYCHOPATHOLOGY
Graduate
None

PSY 567
SPECIAL TOPICS IN COMMUNITY PSYCHOLOGY
Graduate
Explores topics of current interest in the area of Community Psychology and related fields for advanced graduate students, with emphases on theory, research and intervention.

PSY 568
SEMINAR IN COMMUNITY PSYCHOLOGY
Graduate
Analysis of theories of community and human behaviors from the standpoint of general systems principles.

PSY 569
SEMINAR IN PROGRAM EVALUATION
Graduate
Analysis of major research programs dealing with social and mental health problems with emphasis on epidemiological and socio-clinical research methods. Four quarter hours.

PSY 570
SEMINAR IN PSYCHOTHERAPY RESEARCH
Graduate
None

PSY 572
PSYCHOBIOLOGY OF SOCIAL COGNITION
Graduate
Explores social cognition in the frame of evolutionary, neorophysiological, and developmental biology. Comparison of human with other animal social-cognitive characteristics will be examined. Neuropsychological data and developmental psychobiology will be studied.

PSY 574
PRE-PRACTICUM IN CLINICAL PSYCHOLOGY
Graduate
Introduction to practica duties. May be repeated three times. No Credit.

PSY 577
PRACTICUM IN CLINICAL ASSESSMENT
Graduate
Supervised experience in intake interviewing, psychological evaluation, and case conference presentation in a clinic, hospital or community agency setting. Zero credit hours.
PSY 578
PRACTICUM IN CLINICAL PSYCHOLOGY
Graduate
Supervised experience in diagnostic assessment, intervention planning, psychotherapy and report writing through varied assignments to campus or community agencies. Zero credit hours.

PSY 579
PRACTICUM IN CHILD CLINICAL PROCEDURES
Graduate
Supervised practice in the diagnosis and treatment process of the problems of children and adolescents. May be repeated twice. Zero credit hours.

PSY 582
ADVANCED PRACTICUM-CLINICAL PSYCHOLOGY
Graduate
Zero credit hours.

PSY 583
PRACTICUM IN COMMUNITY MENTAL HEALTH
Graduate
Zero credit hours.

PSY 584
PRACTICUM IN SPECIAL AREAS IN PSYCHOLOGY
Graduate
Zero credit hours.

PSY 585
FIELDWORK IN COMMUNITY SETTINGS
Graduate
An applied experience which integrates skills of consultation, program development, advocacy, and program evaluation.

PSY 586
PRACTICUM IN APPLIED INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Supervised experience in the application of I/O Psychology and technical report writing.

PSY 587
PRACTICUM IN ADVANCED RESEARCH IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Supervised experience in I/O research and the preparation of research results for publication.

PSY 588
TOPICS IN EXPERIMENTAL PSYCHOLOGY I
Graduate
Consideration of topics of current interest to the faculty and advanced graduate students. Introduction to research methods and data analysis.

PSY 589
TOPICS IN EXPERIMENTAL PSYCHOLOGY II
Graduate
Topics in experimental psychology.
PSY 590
THESIS SEMINAR
Graduate
Zero-credit hours.

PSY 591
COLLOQUIUM IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Required of all I/O students. Register in Fall term; continues throughout the year. Presentations on research and other topics by students, faculty, and invited speakers. Zero-credit hours.

PSY 592
DIRECTED RESEARCH
Graduate

PSY 593
PRE-DOCTORAL RESEARCH
Graduate
Graduate students in specific doctoral programs are required to register for this course for at least three quarters prior to registering for Psy 598 (Dissertation Seminar) or Psy 599 (Dissertation Research). This course requires full-time (at least 8-12 hours per week) work on research under the supervision of a faculty mentor. Zero-credit hours.

PSY 594
PSYCHOLOGICAL RESEARCH
Graduate
A course involving intensive readings in contemporary psychological literature. (Arranged by prior consultation with the chair). One to four quarter hours

PSY 595
COLLOQUIUM
Graduate
Required of all graduate students each quarter until graduation. Lectures by psychologists and members of the faculty. Zero-credit hours.

PSY 596
INTERNSHIP IN CLINICAL PSYCHOLOGY
Graduate
Arranged with consent of director of clinical training. Zero-credit hours.

PSY 597
MASTER’S THESIS RESEARCH
Graduate
Original investigation of a specific research problem. Four hours required.

PSY 598
DISSERTATION RESEARCH SEMINAR
Graduate
Seminar for doctoral candidates working on their dissertation. Students will develop their proposals or write their results and discussion sections, depending on status of their dissertation research. Students will also review and critique work of other students. Zero credit hours.
PSY 599
DISSERTATION RESEARCH
Graduate
Four hours total required. One to four hours per quarter.

PSY 634
ADOLESCENT DEVELOPMENT
Graduate
Focus on normal processes in adolescent development as well as risk factors for maladaptive development.

PSY 639
ADVANCED DEVELOPMENTAL PSYCHOLOGY
Graduate
Focus on major theories and research in child development.

PSY 653
ABNORMAL PSYCHOLOGY
Graduate
Focus on the primary psychological diagnoses common today.

PSY 654
COMMUNITY PSYCHOLOGY
Graduate
Focus on systemic and ecological theories of human behavior, diversity, social support, community intervention and evaluation, empowerment, social change, and working with underserved populations. Community service project required. Cross-level with PSY 354.

PSY 663
ALCOHOLISM, DRUG ADDICTION, AND RECOVERY
Graduate
Research and theory on alcoholism, drug addiction, and recovery are the focus of this course. Cross-level with PSY 363.

PSY 678
CHILD ABUSE AND NEGLECT
Graduate
This course surveys the causes, consequences, and contextual factors associated with child maltreatment (abuse and neglect) and interventions for children and families. The course considers maltreatment within an ecological context and works to build sensitivity to diverse families and cultural patterns. It is designed for graduate students with some prior coursework or experience in child psychology, mental health, or child welfare. Cross-level with PSY 368.

PSY 680
INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
Graduate
Application of theories and methods of psychology to the study of human behavior in business, industry, and other organizations. Cross-level with PSY 380.

PSY 701
CANDIDACY CONTINUATION
Graduate
Students admitted to candidacy for the doctoral degree who have completed all course and dissertation registration requirements are required to be registered each quarter of the academic year until the dissertation and final examination have been completed. Zero-credit hours.

PSY 702
NON-RESIDENT CANDIDACY CONTINUATION
Graduate
Non-Resident Candidacy Continuation
RE 300
REAL ESTATE LAW
Undergraduate
This course reviews the essential legal requirements of real estate transactions.

RE 320
URBAN PLANNING AND PUBLIC POLICY
Undergraduate
This course provides a systematic introduction to urban planning issues for students who have little background in this area. The course will explore both historical and contemporary urban planning concepts and will cover a wide variety of topics including land use regulation, economic development, environmental and energy planning, growth management and urban development issues, generally from a real estate and built environment perspective.

RE 350
REAL ESTATE ANALYSIS
Undergraduate
This course introduces essential institutional, legal, regulatory, and financial aspects of real estate in the U.S. economy and financial system. The course incorporates demographic data for real estate market analysis and includes an exercise in land use planning.

At least 88 cumulative units is a prerequisite for Business courses that require Junior standing.

RE 352
REAL ESTATE FINANCE
Undergraduate
Patterns of financing real estate property, including individual, commercial and industrial-relates to capital structure analysis. Institutional analysis, including middlemen and ultimate financing sources-relates to capital market analysis. Leverage effects, collateral and protective devices-relates to risk and return analysis.

FIN 310 and RE 350 are a prerequisite for this class.

RE 354
REAL ESTATE VALUATION
Undergraduate
Real Estate Valuation. Introduction to the appraisal process. Basic approaches to valuation analysis including both residential and income properties. This course includes the income capitalization methods and complex valuation assignments.

FIN 310 and RE 350 are a prerequisite for this class.

RE 398
SPECIAL TOPICS
Undergraduate
Special Topics in Real Estate offers an in-depth study of current industry-related issues. Content, format, and prerequisites vary by section. Subject matter will be indicated in the class schedule.

RE 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in real estate.
RE 520
URBAN PLANNING AND PUBLIC POLICY
Graduate
This course provides a systematic introduction to urban planning for students who have little background in this area. The course will explore both historical and contemporary urban planning concepts and will cover a wide variety of topics including land use regulation, environmental and energy planning, growth management?smart growth? issues, legal and regulatory requirements and regional/national planning concepts, generally explored from a real estate perspective. The course will conclude with a three class urban planning workshop, redeveloping a five block blighted neighborhood in a hypothetical city to create a well-designed, sustainable community.

RE 521
LEGAL ISSUES IN REAL ESTATE
Graduate
This course is designed to be a quarter long survey of real estate principles. The study of real estate law will be approached on both practical and theoretical levels, with an emphasis on the historical underpinnings of land law. This course does presume some familiarity with the basic principles of Contract law and, to a lesser degree, Tort law. Knowledge of the formational elements of Contract should precede consideration of remedies uniquely applicable to Real Property: Foreclosure, Specific Performance etc.. Familiarity with the method and form of decisional (`case?) law is an important part of this course.

RE 525
PROJECT MANAGEMENT: DESIGN AND CONSTRUCTION
Graduate
This course provides a systematic introduction to building design and construction for students who have little background in this area. The course will explore both the conceptual and practical aspects of designing and constructing commercial buildings and will cover a wide variety of topics including:- site development and zoning issues- building design and layout- building materials, systems and construction methods and practices- construction budgets- project scheduling- overall proforma feasibility- LEED Certification, Sustainability and Green Building issuesThe course will include a major project that will allow each student to develop a conceptual building design, a construction budget, a construction schedule and a proforma feasibility analysis. The course will also include a number of guest speakers from the building design and construction industry who will discuss current trends in their areas of expertise. This course is an introduction to this topic and not meant for students who have significant experience in building design or construction. There are no prerequisites for those students studying at the graduate level.

RE 530
REAL ESTATE INVESTMENT AND FINANCE
Graduate
Analysis of real estate investment opportunities and the characteristics that distinguish them from other assets. Emphasis is upon forecasting cash flows and estimating risk. Case analysis is an integral part of the course technique.
FIN 555 is a prerequisite for this class.

RE 531
REAL ESTATE FINANCE
Graduate
RE 530 and FIN 555 are prerequisites for this class.

RE 533
REAL ESTATE MARKET ANALYSIS AND VALUATION
Graduate
Critical analysis of the appraisal process and its theoretical foundation. Market analysis techniques and valuation of income producing properties. Exploration of both basic and innovative approaches to value employing computer databases and information technology.
RE 530 and FIN 555 are prerequisites for this class.
RE 535
REAL ESTATE INVESTMENT
Graduate
Analysis of different strategies available to real estate investors. Focus is on large-scale development and institutional investment portfolio
decisions. The case method is an integral part of the course technique.
RE 530 and FIN 555 are prerequisites for this class.

RE 570
ADVANCED REAL ESTATE ANALYSIS WITH ARGUS
Graduate
This course is designed to develop the vocabulary, concepts, and analytical skills necessary to make informed commercial real estate
investment decisions at a very detailed level and will employ lectures, readings, and case work using the Argus software platform, as well as Co Star and Site To Do Business (STDB). The course is for the Argus beginner and intermediate user but is not for the advanced Argus user. Completion of RE 530 is a prerequisite. However, those who have not completed RE 530 but have sufficient analytical skills may be admitted to the class with the instructor’s permission. Please note that this course requires each student to have the use of and be able to bring to class each class night a Windows based laptop (or a MAC based laptop with a Windows emulator installed, as Argus only runs on Windows). Students will be required to purchase the Argus student software package for $100 and the SYDB student package for $20.

RE 596
REAL ESTATE SEMINAR
Graduate
The objectives of this course are to identify current, researchable topics pertaining to real estate and for students to perform independent
research on selected topics approved by the seminar professor. Meetings will be held on both a class and on an individual basis. Students will present both their proposals and the results of their preliminary investigations in class. A seminar research paper is required of each student.

RE 793
INTERNSHIP
Graduate
This is a unique opportunity in which interns gain and develop managerial skills, providing a link to mastering the dynamics of running a business. This hands-on experience allows the intern to apply his or her skill/wisdom to the work place and provides invaluable knowledge that is crucial for future advancement. While building an impressive resume for further job opportunities, the intern will be immersed in a stimulating environment with a pool of established resources. In addition, networking opportunities avail themselves to build future relationships.

RE 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. In-depth study of current issues in finance. Subject matter will be indicated in class schedule. Offered variably.

RE 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in finance.

REC 200
INTRODUCTION TO SOUND RECORDING TECHNOLOGY
Undergraduate
(2 credits) Introductory course to acquaint students with concepts and techniques of sound recording technology. Open to all music students and required for SRT majors.
Status as a Music student is a prerequisite for this class.
REC 201
RECORDING TECHNOLOGY I
Undergraduate
(4 credits) Open only to School of Music students. Basic studies in audio engineering with technological application in recording studio settings. Emphasis on acoustics, microphones, and microphone techniques. This is part of a two-year sequence of courses for sound recording technology majors.

REC 200, MUS 230, PHY 110, PHY 206 and PHY 232 are a prerequisite for this class.

REC 202
RECORDING TECHNOLOGY II
Undergraduate
(4 credits) Open only to School of Music Students. Basic studies in audio engineering with technological application in recording studio settings. Emphasis on principles of digital recording, editing, and sampling. This is part of a two-year sequence of courses for sound recording technology majors.

REC 201 is a prerequisite for this class.

REC 203
RECORDING TECHNOLOGY III
Undergraduate
(4 credits) Open only to School of Music students. Basic studies in audio engineering with technological application in recording studio settings. Emphasis analog recording and signal processing. This is part of a two-year sequence of courses for sound recording technology majors.

REC 202 is a prerequisite for this class.

REC 216
PRO TOOLS AND THE DEVELOPMENT OF THE RECORDING STUDIO
Undergraduate
(4 credits) The goal of this course is to transform students from casual listeners of recorded music into educated critical analysts. Students will study the history and development of recording technology and recording studios. Lab exercises will teach the basics of recording and signal processing using Digidesign Pro Tools software. Arts and Literature.

REC 300
CONTEMPORARY FILM SCORING
Undergraduate
(4 credits) Undergraduate level course designed for Music, CDM, Communication, and Theater majors who want an understanding of film music and the mechanics of scoring to picture. It will cover the basics of spotting films, writing with a click track, and utilizing synthesizers and samplers to realize film music.

Status as Undergraduate or Graduate Music student, Undergraduate Theatre student, Undergraduate Communication student or Undergraduate CDM student is a prerequisite for this class.

REC 301
RECORDING TECHNOLOGY IV
Undergraduate
(4 credits) Open only to School of Music students. Basic studies in audio engineering with technological application in recording studio settings. Emphasis on consoles. This is part of a two-year sequence of courses for sound recording technology majors. COREQUISITE(S): REC 304.

REC 203 is a prerequisite for this class.

REC 302
RECORDING TECHNOLOGY V
Undergraduate
(4 credits) Open only to School of Music students. Basic studies in audio engineering with technological application in recording studio settings. Emphasis on solid state logic console and audio/video sound design. COREQUISITE(S): REC 305.

REC 301 is a prerequisite for this class.
REC 303
RECORDING TECHNOLOGY VI
Undergraduate
(3 credits) Open only to School of Music students. Basic studies in audio engineering with technological application in recording studio settings. Emphasis on surround sound mixing, digital video, and DVD authoring. COREQUISITE(S): REC 306.

REC 302 is a prerequisite for this class.

REC 304
SOUND PRACTICUM I
Undergraduate
(2 credits) Practical experience with technological applications in the recording studio. CO-REQUISITE(S): REC 301.

REC 200 and REC 203 are a prerequisite for this class.

REC 305
SOUND PRACTICUM II
Undergraduate
(2 credits) Practical experience with technological applications in the recording studio. COREQUISITE(S): REC 302.

REC 304 is a prerequisite and REC 302 is a corequisite for this class.

REC 306
SOUND PRACTICUM III
Undergraduate
(2 credits) Practical experience with technological applications in the recording studio. COREQUISITE(S): REC 303.

REC 305 is a prerequisite and REC 303 is a corequisite for this class.

REC 307
COMMERCIAL MUSIC PRODUCTION
Undergraduate
(4 credits) For students with a music theory background that want to learn how to realize music using digital sequencing and sampling. This course will focus on creating tracks in pop genres that could be used in soundtracks, video games, and commercials.

Status as a Music student is a prerequisite for this class.

REC 360
TOPICS IN SOUND RECORDING TECHNOLOGY
Undergraduate
(2-4 credits) In depth investigation of a topic in sound recording technology

REL 103
RELIGIOUS WORLDS IN COMPARATIVE PERSPECTIVE
Undergraduate
An examination of the nature and function of religion in human life. An exploration of common patterns underlying the variety of religious experience and expression.
The purpose of this course is to provide a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people. It seeks to provide students an entree into the world of Jewish religious and historical experience and to help them develop a conceptual understanding of the thought and practice that underlies the Jewish worldview. It also seeks to examine certain continuities and discontinuities in the conception of Judaism as reflected in selected texts which express the full range of Jewish religious and national creativity. Among the topics to be discussed are the complex relations of Jewish thinkers to the surrounding non-Jewish cultures, and how these interactions affected the Jews' understanding of Judaism. The approach to this material will be intellectual-historical. The course is designed as the first part of a two-course sequence on the history of Judaism from the Bible to the present. It focuses on the history of Jewish tradition from the earliest references to Ancient Israel circa 1200 BCE to the expulsion of Jews from Spain in 1492.

The purpose of this course is to provide a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people. It seeks to provide students an entree into the world of Jewish religious and historical experience and to help them develop a conceptual understanding of the thought and practice that underlies the Jewish worldview. It also seeks to examine certain continuities and discontinuities in the conception of Judaism as reflected in selected texts which express the full range of Jewish religious and national creativity. Among the topics to be discussed are the complex relations of Jewish thinkers to the surrounding non-Jewish cultures, and how these interactions affected the Jews' understanding of Judaism. The approach to this material will be intellectual-historical. The course is designed as the second part of a two-course sequence on the history of Judaism from the Bible to the present. It focuses on the history of Jewish tradition from the expulsion of Jews from Spain in 1492 to the present.

An introductory course offering a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people, surveying the basic aspects of traditional Jewish life and thought as well as the people's many-sided experience of the modern world.

An introductory course surveying the range of traditions that have emerged within the Christian movement, and offering an historical perspective on the life and thought of Christian communities, and their prospects for the future.

Major religious movements in America with emphasis upon the development of religious pluralism. Impact of religious beliefs and values upon American culture.

An examination of the diverse nature of Latino religion, from its indigenous roots to its institutional forms, within the social and political context of American culture.

An examination of the religious experience of African Americans and its African precursors through historical and literary resources, reflecting this people's distinctive past and its interactions with other elements of American culture. Formerly REL 215.
REL 116
THE ISLAMIC EXPERIENCE
Undergraduate
An introduction to major recurrent religious themes and alternative models of religious interpretation and authority in Islam's manifold expressions, from the life of Muhammad and the Qur'an, to popular ritual and spirituality and the Islamic humanities.

REL 142
HINDU EXPERIENCE
Undergraduate
A survey of the varieties of Hindu practice and thought. Hinduism in India and throughout the world will be examined.

REL 143
BUDDHIST EXPERIENCE
Undergraduate
A survey of the varieties of Buddhist practice and thought. Different forms of Buddhism throughout the world will be examined.

REL 144
THE AFRICAN RELIGIOUS EXPERIENCE
Undergraduate
A survey of the varieties of African religious practice and thought.

REL 161
INDIGENOUS RELIGIONS OF NORTH AMERICA
Undergraduate
An introductory exploration of the close ties particular religious traditions of Native North America have with their own distinctive historical realities, geographic-celestial topographies, and political and social structures. Considers variety of oral, written, ritual, visual and archaeological texts.

REL 162
POPULAR AND INDIGENOUS RELIGIONS OF MEXICO AND CENTRAL AMERICA
Undergraduate
An exploration of old and new religious traditions of Mexico and Central America and its diaspora. Our studies will focus on myths and stories as ancient as pre-Conquest times and as recent as today's movies; and we will examine them in written, oral, visual, ritualized, theatrical, musical and even electronic forms.

REL 180
INTRODUCTION TO CATHOLICISM
Undergraduate
An examination of the breadth of the Catholic experience from a 1st-century Jewish religious movement to a 21st-century global religion.

REL 183
THEMES IN CATHOLIC SOCIAL THOUGHT (CROSS-LISTED WITH CTH 183)
Undergraduate
An initial, systematic examination of major themes in modern Catholic social thought. Cross-listed as CTH 183.

REL 190
INTERPRETING SACRED TEXTS
Undergraduate
A survey of the formation, use and interpretation of sacred texts by religious and secular communities.

REL 199
RELIGIOUS STUDIES - OFF CAMPUS
Undergraduate
Religious Studies credits earned off-campus. Topics vary.
REL 200
DEBATES ABOUT GOD
Undergraduate
A study of classical and contemporary arguments regarding the existence and meaning of "God," as developed in a variety of theistic traditions.

REL 201
RELIGION AND ETHICS I
Undergraduate
Analytic and normative approaches to ethics in Western philosophical and Christian traditions.

REL 202
ETHICAL WORLDS: MORAL ISSUES ACROSS CULTURES
Undergraduate
An exploration of religion and ethics from a comparative and international perspective. Ethical dimensions of diverse world religious traditions will be investigated within their own particular historical and cultural contexts, and students will be asked to consider and evaluate their own ethical orientations in the light of these studies.

REL 205
RELIGION AND ETHICS II
Undergraduate
Analytic and normative approaches to ethics in a non-Christian tradition, such as Judaism, Islam or African traditional religions.

REL 212
RELIGION AND POPULAR CULTURE
Undergraduate
An exploration of various forms of popular culture and their intersection with diverse religious traditions and ethical concerns. The course also examines the marketing in mass media of religious themes in popular culture.

REL 213
CHRISTIAN THOUGHT IN CLASSICAL AND MEDIEVAL TIMES
Undergraduate
A study of the development of Christian theologies in Western civilization from post-New Testament times to the Renaissance, with emphasis on St. Augustine and St. Thomas Aquinas.

REL 214
TRANSFORMATION IN CHRISTIANITY: THE REFORMATION TO THE PRESENT
Undergraduate
A study of the development of Christianity since 1500 C.E., exploring the Protestant and Catholic Reformations, the growth of Christianity in the United States, and its encounter with a variety of Enlightenment and post-Enlightenment themes and figures, especially concerning science, justice, relativity and religious pluralism.

REL 217
ISLAM IN GLOBAL CONTEXTS
Undergraduate
A study of Islam's developments in various global contexts, including Arabian beginnings, the Middle East, Central, Eastern and Western Europe, China, the former Soviet States and South Africa, with a focus on the impacts that these cultures and Islam have had on each other.

REL 218
BLACK INTELLECTUAL TRADITIONS
Undergraduate
An introduction to Black intellectual traditions which emerge from and inform Black religious traditions and which have religious and/or liberation content. Thinkers and content vary.
REL 219
SLAVERY, RACE AND RELIGION
Undergraduate
This class examines religious arguments, from the 1500's through the 1700's, for and against slavery. Students will investigate different historical and theoretical definitions of slavery. Students will also gain an introduction to the relationship between slavery, evangelicalism, capitalism, and Enlightenment moral philosophy.

REL 220
PSYCHOLOGY AND RELIGION
Undergraduate
Psychological factors operative in acquisition, formation and development of religious expression and commitment.

REL 221
RELIGION IN SOCIETY
Undergraduate
Sociological study of religious groups, institutions, behavior, and belief systems in human life and society.

REL 222
CONTEMPORARY MORAL ISSUES
Undergraduate
A study of the relations between religious beliefs and moral action to be carried out through an examination of the ethical and moral response of various religious traditions to selected moral issues such as war and peace, sexual behavior, etc.

REL 223
LITERATURE AND THE SACRED
Undergraduate
Variable topics. How human beings across cultures express their intimations of ultimate meaning in a variety of genres ranging from aphorisms and autobiographies to mythic and fictional narratives.

REL 224
RELIGION AND POLITICS IN THE UNITED STATES
Undergraduate
Variable topics. Explores the interplay of religion, politics and culture in the United States, focusing on citizenship and religious identity in the USA's multicultural, multiethnic, multireligious society. Various sections will focus on different particular religious communities and themes, such as the Religious Right and the Religious Left, the political activities of particular communities, and the challenges of interreligious dialogue.

REL 225
RELIGION AND THE ARTS
Undergraduate
Variable topics. How human beings across cultures express their comprehension and experience of ultimate meaning in a variety of artistic forms.

REL 226
TECHNOLOGY, ETHICS, AND SOCIETY
Undergraduate
An examination of the impact of modern technologies on society with particular attention paid to ethical issues.

REL 227
RELIGIOUS ETHICS AND PROFESSIONAL LIFE
Undergraduate
A study of the ethical dimensions of contemporary professional life from the standpoint of religious traditions and values, focusing primarily on medicine, law and business.
REL 228
BUSINESS, ETHICS AND SOCIETY (CROSS-LISTED WITH MGT 228)
Undergraduate
This course will examine the nature and purpose of economic life and contemporary commerce as understood from the perspective of religious and secular communities, as well as the ethical implications that flow from the various worldviews. Sections of the course critically examine the thought of different religious traditions on specific business-related issues, placing a variety of religious discourses into direct conversation with secular voices regarding ethical business conduct. Cross-listed as MGT 228.

WRD 103 or HON 100 or HON 101 is a prerequisite for this class.

REL 229
MEDICINE, ETHICS AND SOCIETY
Undergraduate
Moral and ethical issues arising in contemporary biomedical advances and in health care from the perspectives of Religious Studies and of Philosophy.

REL 232
ANCIENT ISRAEL: HISTORY, LITERATURE, AND RELIGION (CROSS-LISTED AS CTH 212)
Undergraduate
The development of Judaism from Moses to the Rabbinic era with special attention to social and historical questions. Cross-listed as CTH 212.

REL 233
THE NEW TESTAMENT (CROSS-LISTED WITH CTH 213)
Undergraduate
An introduction to the historical-critical investigation of the New Testament. Topics include the earliest Christian writings (letters of Paul), the production of "gospels" about Jesus, and the development of early churches in the context of ancient history and society.

REL 234
VARIETIES OF EARLY CHRISTIANITY
Undergraduate
An examination of multicultural diversity in early Christianity through a study of materials excluded from the New Testament canon; Christian apologists defending the church against pagan intellectuals and Roman imperial magistrates; comparisons of early Christian fiction and ancient Greek novels; and an examination of Gnostic writings.

REL 235
PAUL AND HIS INFLUENCE IN EARLY CHRISTIANITY
Undergraduate
A critical study of Paul's literary remains as primary sources for reconstructing the development of the Christian movement, focusing on Paul's communities, ethics and theology. Early interpretations and assessments of Paul will also be considered.

REL 236
VARIETIES OF JUDAISM IN THE GREEK AND ROMAN WORLD
Undergraduate
An examination of Judaism from the Jews' return from Babylonian exile in 538 BCE to the promulgation of the Mishnah in 200 CE, with a focus on the Roman period. The Dead Sea Scrolls, as well as concepts of the Messiah, the resurrection of the dead, the final judgment and the idea of the "Bible" will be studied.

REL 237
GODS IN THE ROMAN EMPIRE
Undergraduate
This course examines the role of gods in the social, political, and economic world of the first four centuries of the Roman Empire. Topics will include: the role of gods in civic life; the imperial cult; the use of the categories religion, superstition, and magic to mark social status; gods, family, and social values; religious innovation and the emergence of new gods; and the rise of Christianity and the worship of Jesus as a god. This course will pay special attention to the social interactions that create and sustain the plausibility of the existence of unseen deities governing the affairs of humans.
REL 238
THE HISTORICAL JESUS
Undergraduate
An investigation of the early Christian Gospels and other sources for reconstructing the life of Jesus of Nazareth. The relation of historical reconstruction and religious interpretation, and the significance of conflicting interpretations of Jesus, will also be considered.

REL 239
THE BIBLE GOES TO THE MOVIES
Undergraduate
This course examines the interaction of the Bible and Hollywood movies by considering how stories, ideas, and themes from the Bible have been portrayed in movies. Specific biblical texts will be analyzed in their historical context and in relation to contemporary movies.

REL 241
RELIGION IN CHINESE HISTORY, SOCIETY AND CULTURE
Undergraduate
An exploration of the Chinese religious landscape, focusing on social and practical dimensions of Chinese religion, such as state rituals and private cults, liturgies and individual practices of Taoist priests and adepts, politico-religious ideas that inspired popular messianic movements throughout Chinese history, and interrelations of Buddhist and Taoist clergies and institutions in the state.

REL 242
HINDU THOUGHT AND CULTURE
Undergraduate
Hinduism is one of the world's oldest religions, but it is also the world's most diverse religion. Despite its variety, certain themes have remained throughout the ages--karma and ethical responsibility, liberation from the bonds of worldly existence through yoga and devotion, communication with the divine through ritual, and the many forms, male and female, that God can take. This course traces the development of Hinduism from 5000 years ago to the present, with emphasis on change and continuity in those themes.

REL 243
BUDDHIST THOUGHT IN CULTURAL CONTEXT
Undergraduate
A study of Buddhism from its beginnings as a "non-orthodox" renunciant and monastic movement in ancient India, through its development into a myriad of religious expressions and practices, philosophical tendencies, and social forms over its twenty-five hundred year history.

REL 245
RELIGION IN JAPANESE HISTORY, SOCIETY, AND CULTURE
Undergraduate
Explores the specific interplay between religion and culture in Japan. Taking historical and cultural factors into account, it considers prehistoric Japanese religion, ancient imperial myths, the assimilation of Buddhism, Confucianism, and continental (Chinese/Korean) culture, the religious and aesthetic worlds of the court nobility and the warrior class, popular mountain cults, the revival and systematization of Shinto, the impact of western culture, Japanese ultranationalism, and the religious situation in the post-war period.

REL 246
TRADITIONS OF CHINESE POPULAR CULTURE
Undergraduate
Promotes an understanding of Chinese worldview and life in the perspective of the common Chinese people from ancient to modern times. Based on historical and modern texts in translation, some historical and ethnographic studies, as well as visual and aural materials, the course explores gender and generational relations and conflicts, ancestor veneration, the worlds of ghosts and gods, festivals, art, and entertainment, but also aspects of misery and social unrest. Although the course will draw largely on popular and entertaining sources, it will also pay attention to historical developments, the relationship between popular and elite traditions, as well as sociological and anthropological issues arising from these contexts.

REL 247
LITERATURE AND RELIGION IN JAPAN
Undergraduate
Focuses on the pervasive influence of religious thought and sentiment on Japanese literature from ancient to modern times and explores the intricate relationship between religion, aesthetics, and the arts in Japanese culture. Considers original works including ancient Japanese mythology and poetry, the memoirs of court ladies and Buddhist hermits, romance, epics, folktales and social satire, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them.
REL 248
LITERATURE AND RELIGION IN CHINA
Undergraduate
Focuses on the interpretation of literature and religion in China. Considers original works of literature and explores the religious origins of Chinese script and writing itself, poetry and mystical philosophy, cosmology and revealed scripture, popular tales, ballads, plays and novels, and the reworking of contemporary Chinese American authors of their literary and religious heritage, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them.

REL 250
MYSTICISM IN RELIGIOUS TRADITIONS
Undergraduate
This course will look at the phenomena of mysticism, its doctrines and practices, in various religious traditions. It will also look at how various forms of mysticism have influenced the religious traditions with which they associated, (e.g. how Sufism has impacted Islamic religion, civilization and society.) The course will then look at the present situation of mysticisms in regard to religious traditions and to broader societies.

REL 251
THE IDEA OF 'EVIL'
Undergraduate
This course will try and answer the question what is evil? In religious traditions is evil a relative term? Or is it a universal absolute? Does evil exist independently, or is it a result of the absence of good? How do religious traditions deal with the notion of evil? After we look at the religious, philosophical, historical, conceptualization of evil and how different religious traditions deal with it, the class will look at evil in popular culture (anthropological understanding of evil). How does the popular imagination understand evil? How do they depict and imagine evil (in film, and in literature)? Are these universalities or are they cultural relativism? How has popular culture dealt with evil? Finally the course tries to see if there is any connection with the popular imagination and religious traditions when it comes to evil.

REL 252
FORGIVENESS AND RECONCILIATION
Undergraduate
A study of various understandings of "forgiveness" and "reconciliation" in several religions and cultures. The nature and dynamics of forgiveness and reconciliation will be examined both theoretically and in relationship to specific conflicts. Cross-listed with PAX 252.

REL 254
THE BODY & HUMAN RELATIONSHIPS: DIVERGENT MEANINGS, CONFLICTING VALUES
Undergraduate
Love and sexuality in biblical and nonbiblical religions, examined cross-culturally, conceptually, and ethically.

REL 256
WELLNESS AND DISEASE IN RELIGIOUS PERSPECTIVE
Undergraduate
A study of notions related to human "health," "well-being" and "disease" in various religio-cultural situations. Physical, mental and spiritual health -- individual and communal -- will be considered. The significance of "plague," especially AIDS, as socio-religious and spiritual events will be critically examined.

REL 257
DEATH AND ITS BEYOND: EXPERIENCE, MYTH AND RITUALS
Undergraduate
Religious attitudes and practices responding to the phenomena of death and dying, studied cross-culturally, conceptually and ethically.

REL 259
RELIGION AND SOCIAL ENGAGEMENT
Undergraduate
An investigation of the ways in which various religious traditions engage the social order. Traditions, persons and movements that form the focus of the course will vary from section to section. The course will integrate theory and practice in studying forms of religious engagement. All students will perform some service to a community or within a community organization or agency.

Sophomore standing is a prerequisite for this class.
REL 260
RELIGION AND POLITICAL CONFLICT
Undergraduate
An examination of the role of religions and religious movements in political conflicts. Particular sections will examine the relationship of religions to violence and peacemaking in different areas of the world.

REL 262
RELIGION AND GLOBALIZATION
Undergraduate
An examination of the moral, religious, and social dimensions of the phenomenon of globalization. Through a critical assessment of both the positive and the negative dimensions of globalization, students will seek to understand more fully the ethical implications of globalization for economics, culture, and society.

REL 263
RELIGION AND POLITICS IN THE MIDDLE EAST
Undergraduate
An exploration of Judaism, Christianity and Islam as they develop and interact in the Middle East, historically and in terms of contemporary religious and political issues. Includes a study of personal narratives of people from Jewish, Christian and Muslim communities.

REL 264
COLONIZATION, RELIGION AND RESISTANCE
Undergraduate
This course will explore the religious traditions and cultural identities of some of the peoples native to the Americas, Africa, Asia and Oceania; problems they have with the “civilized” world and their potential solutions to them.

REL 265
REFORM MOVEMENTS WITHIN ISLAM (CROSS-LISTED WITH IWS 265)
Undergraduate
This course will deal with the idea of "reform" within Islamic political movements in the modern period. The course will analyze various Islamic reform movements such as the Wahahabis, the Muslim Brotherhood, the Modernists, the Traditionalists, seeking a pattern in these movements.

REL 266
ISLAM IN THE UNITED STATES (CROSS-LISTED WITH IWS 266)
Undergraduate
An examination of the story of Islam in the United States in three historical periods: antebellum America, the first half of the 20th century, and the latter half of the 20th century. Explores Muslim slave life; the possibilities of retentions of Islam in slave culture; the religious, social/economic, and political life of Muslims at the beginning of the 20th century; the emergence of Islamic thought in the U.S. through an overview of the works of Ismail as-Faruqi, Seyyed Hossein Nasr and Fazlur Rahman.

REL 268
MODERN JUDAISM
Undergraduate
An examination of central features of the modern Jewish experience including the transition from traditional to modern religious life and practice, American Judaism, the Holocaust, and the establishment of the State of Israel.

REL 269
JUDAISM IN ANTIQUITY
Undergraduate
This course traces the history of Israelite and Jewish culture and religion from their origins in the world of the Ancient Near East in the second millennium BCE until the rise of Islam in the seventh century CE. We will critically examine the meaning and mutual relationship of such categories as ?ancient Israelite? religion, ?biblical? religion, and ?early Judaism.? We will also discuss the history of religious institutions, texts, and practices, as well as the dynamics of continuity and change in ancient Israelite and Jewish society. This course will pay special attention to the complex relationship that exists between history and collective memory as constructed through texts and rituals.
REL 270
WOMEN IN THE BIBLE
Undergraduate
An examination of the historical role of women in the Bible and the contemporary concerns of feminist theology, women's spirituality and ethical issues arising from the contemporary application of these biblical texts to women's experiences.

REL 271
THE QUR'AN AND ITS INTERPRETERS (CROSS-LISTED WITH IWS 271)
Undergraduate
A study of the origin, transmission, and interpretation of the Qur'an.

REL 272
MUSLIM WOMEN IN TEXTS (CROSS-LISTED AS IWS 272)
Undergraduate
Explores major current approaches to the study of Muslim women, focusing on the Qur'anic conversation on women, on the commentaries provided by men, and on the emerging voices of Muslim women and non-Muslims.

REL 273
JESUS ACROSS CULTURES
Undergraduate
A study of the multiple and diverse (primarily theological, but also literary, artistic and philosophical) historical and contemporary images of Jesus, as a way of understanding the diversity of this tradition and of its impacts on society, and of understanding the issue of plurality or diversity itself in religious traditions.

REL 275
COMMUNITY AND AUTHORITY IN MEDIEVAL JUDAISM
Undergraduate
An introduction to the history, religion and culture of the Jewish people under Christendom and Islam from the fourth through the end of the fifteenth centuries.

REL 278
WOMEN AND RELIGION
Undergraduate
A study of the historical and contemporary roles and contributions of women within major religious traditions, especially Christianity and Judaism.

REL 280
ROMAN CATHOLIC THEOLOGICAL THINKING
Undergraduate
A study of the Roman Catholic tradition of “faith seeking understanding” examining the content and the process of emergence of Catholic beliefs about such matters as God, sin, Jesus Christ, revelation, the church and eschatology. Cross-listed with CTH 243.

REL 281
ROMAN CATHOLIC LITURGY (CROSS-LISTED WITH CTH 231)
Undergraduate
A study of the emergence, meaning and dynamics of ritual in the Roman Catholic tradition.

REL 282
ROMAN CATHOLIC SPIRITUAL LITERATURE
Undergraduate
A study of the foundational religious experiences that underlie the Roman Catholic tradition, of the narratives they generate, and of their representations in various media such as poetry, music, myths, sacred legends and apologetic stories.
REL 283
ROMAN CATHOLIC SOCIAL THOUGHT IN CONTEXT
Undergraduate
A study of Roman Catholicism's understanding of its relation to the social world, including such matters as the relation between Church and State, the moral authority of the Church, and of its teaching on such issues as social ethics, politics and economics.

REL 284
CATHOLICISM AS A SPIRITUAL PATH (CROSS-LISTED WITH CTH 229)
Undergraduate
An experience-centered study of the relationship between contemplation and action, prayer and service, liturgy and social justice, personal religious experience and the wider experience of Catholics. Both historical and contemporary spiritualities will be explored. (Cross-listed as Catholic Studies 229)

REL 285
ROMAN CATHOLICISM'S ENCOUNTER WITH OTHER RELIGIONS
Undergraduate
A study of how Roman Catholicism understands and responds to other religious traditions, other ways of being religious, and how the encounter with those other traditions affects Roman Catholicism's understanding of itself and its teachings.

REL 286
PILGRIMAGE, RELIGION AND POPULAR CULTURE
Undergraduate
How has the role of pilgrimage evolved from antiquity to the present age, and how can the phenomenon of pilgrimage provide a modern window into how a people define what is spiritually significant? Might the phenomenon of pilgrimage, as it is found in nearly every religious tradition, provide a common language and thus a means for building bridges across boundaries of religious difference? This course examines pilgrimage as a religious, cultural, historical and ethical phenomenon. Using methodologies developed in the study of religion, ethics, anthropology and popular culture, this course will introduce students to pilgrimage as it is practiced in expressions of Judaism, Christianity and Islam. The aim of this course is to explore some of the competing typologies and events associated with the formal study of religious ritual and then apply these learnings to modern cultural phenomena, work that will prepare students for the project of constructing their own pilgrimages.

REL 287
ROMAN CATHOLIC MORAL TRADITIONS
Undergraduate
This course examines various moral topics within a Roman Catholic framework. Papal pronouncements, Magisterial statements, Episcopal texts, the works of influential theologians, and critical voices both within and beyond the Church will be critically examined. Special attention will be paid to the method of moral argumentation.

REL 290
LATINO/A LIBERATION TRADITIONS
Undergraduate
What does liberation mean in the context of the Americas today? How have people of Latin American descent -- both in Latin America and the United States -- connected conceptions of liberation to related ideas of liberty and freedom, as well as to notions of political revolution, cultural identity, and prophetic forms of religious faith? This course examines how these questions have been theorized across the Latino/a Americas, especially as they relate to questions of religion. Topics include liberation philosophy, critical pedagogy, prophetic religion, cultural praxis, Latina feminism, and decolonial thought.

REL 291
LOOKING FOR GOD IN LATIN AMERICA
Undergraduate
An examination of religious traditions such as Catholicism, indigenous religions, and Protestantism in Latin America, with special focus on how these traditions have been transplanted and reshaped upon entry into varied Latino communities in the United States. Historical analyses of the Latin American roots of these traditions will provide contextualization for the ongoing examination of transnational religious cultures in the U.S.
REL 295
SECTARIAN MOVEMENTS WITHIN ISLAM (CROSS-LISTED WITH IWS 295)
Undergraduate
This course will look at the various sects within Islam such as Shi'ism, Kharjism, etc. The course will also look at theological sects such as the Mu'taziliets. The course will be concerned with the history, the beliefs, and the present circumstances (if they still exist today) of these sects.

REL 298
METHODS AND APPROACHES IN THE STUDY OF RELIGION
Undergraduate
A study of the methods, theories, and philosophical approaches used to describe what is termed "religion" in the West. The course will focus on the central questions, key authors, and historical movements that have influenced the field of religious studies. Formerly REL 208.

REL 299
RELIGIOUS STUDIES, OFF-CAMPUS
Undergraduate
Religious Studies credits earned off-campus. Topics vary.

REL 300
THEORIES OF CULTURE AND RELIGION
Undergraduate
An investigation of the cultural study of religion. Considers classical, modern and postmodern approaches from a variety of traditions and academic disciplines. Uses a variety of materials such as oral and written texts and visual artifacts, as well as the works of major theorists.

REL 301
THEORIES OF RELIGION AND SPIRITUALITY
Undergraduate
An interdisciplinary investigation into the nature of religious experience drawing on the fields of anthropology, psychology, sociology, and theology.

REL 305
TOPICS IN RELIGION AND CULTURE
Undergraduate
Examines particular issues in the relationship between religion and culture. Specific topics for current offering are noted in the current class schedule.

REL 320
TOPICS IN RELIGIOUS ETHICS
Undergraduate
Examines methods and content of religious ethics. Specific topics for current offering are noted in the current schedule.

REL 322
FEMINIST ETHICS (CROSS-LISTED WITH WGS 310/410 & MLS 477)
Undergraduate
An investigation of theoretical issues regarding women's moral experiences and of feminist ethical arguments combatting various forms of oppression.

REL 324
ISLAMIC LAW (SHARIAH) AND AMERICAN CULTURE
Undergraduate
An intensive study of the many dimensions of religious liberties in a pluralist society. Explores the language of constitutional and political discourse generally, and the ways in which language affects an understanding of the First Amendment. Includes case studies on particular religious communities and their encounters with American law.
REL 340  
INQUIRIES IN WORLD RELIGIONS  
Undergraduate  
Various topics within the comparative study of religions. Specific topics for current offering are noted in the current schedule.

REL 341  
TAOISM: CHINA'S INDIGENOUS HIGH RELIGION  
Undergraduate  
A study of Taoist thought, imagination and expression, through sacred literature, the organization of clergy, and the nature and function of its institutions in interaction with the authority of the Chinese state, with Buddhism, and with the broader scheme of popular Chinese culture and religion.

REL 342  
ZEN MIND  
Undergraduate  
A study of the thought and practice of Zen Buddhism, focusing on the role of Zen in shaping ideas, ethics and the arts in Japan and America.

REL 343  
MORAL PHILOSOPHY AND ETHICS IN CHINA  
Undergraduate  
An exploration of Chinese ethics the philosophical, religious and socio-political traditions which shaped them and were formed by them. Considers the major philosophical schools of China's classical age--Confucianism, Monism, Taoism, and Legalism--with Han dynasty cosmology, the ethical orientations of the Taoist and Buddhist religions, neo-Confucianism, and also the traumatic encounter with western power and thought. Addresses comparative issues concerning traditional Chinese values in relation to western views, particularly in terms of modern relations between China (and East Asia) and the west.

REL 344  
YOGA AND TANTRA  
Undergraduate  
An examination of the history, philosophy and cultural meaning of body-oriented liberative techniques as they developed on the Indian subcontinent and Himalayan region in Hinduism and Buddhism. Students registering for this course are expected to have studied one or both of these traditions in courses such as REL 142, 143, 242, or 243, or in other courses. Background in theory is also useful.

REL 350  
TOPICS IN RELIGIOUS THOUGHT  
Undergraduate  
Examines specific methods, issues, and/or movements in religious thought. Specific topics for current offering are noted in the current class schedule.

REL 351  
LIBERATION THEOLOGY  
Undergraduate  
Focuses upon the ideas and practices of a radical movement for the transformation of Christianity and for social justice that originated in the “Basic Christian Communities” of Latin America and spread from there to North America and the Third World. Entails either an Applied Research or Service Learning component.

REL 360  
SACRIFICE AND TIME IN ANCIENT MEXICO AND CENTRAL AMERICA  
Undergraduate  
An exploration of the history of Mesoamerica before Columbus and the conquistadores, from the perspectives of the indigenous peoples, their conquerors, and contemporary scholars, with special emphasis upon the religious and cultural dimensions of Mesoamerican civilization.
REL 362
JEWS AND THEIR MESSIAHS
Undergraduate
This course will introduce students to the history of messianic beliefs in Judaism from biblical times to the present. It is often assumed that messianism, i.e. the belief in a savior figure destined to come in the future to usher in a new age of redemption and moral goodness, has always been central to Judaism. The course will examine whether our modern concept of messianism can be used as a valid tool to describe Jewish religious experience. The course will also analyze the extent to which Jewish messianic beliefs varied over time by examining major messianic texts and movements in their historical, literary, and cultural contexts.

Sophomore standing is a prerequisite for this class.

REL 363
CLASSICAL TEXTS IN JUDAISM
Undergraduate
An advanced analysis of selected Jewish texts.

REL 365
TEXTS, HISTORY, AND ISLAM
Undergraduate
An advanced analysis of selected Islamic texts.

REL 370
FEMINIST THEOLOGIES
Undergraduate
An exploration of women's experience as a primary resource and norm for theology, focusing on themes of inclusion, exclusion, representation and liberation in particular social, political and historical contexts.

REL 372
SEXUALITY, GENDER AND RELIGION: CROSS-CULTURAL PERSPECTIVES
Undergraduate
A consideration of religion and feminism in differing cultural contexts using a comparative perspective. While the course will consider selected Western viewpoints, its emphasis will be on a sampling of different emerging feminisms of non-Western religious traditions.

REL 380
TOPICS IN RELIGIOUS TEXTS
Undergraduate
Examines methods and meanings in the study of religious texts. Specific topics for current offering are noted in the current class schedule.

REL 382
RELIGION IN THE CONTEMPORARY UNITED STATES
Undergraduate
An advanced examination of traditional communities and contemporary movements in the United States.

REL 384
THE CULTURE OF AMERICAN CATHOLICS
Undergraduate
How has the unique experience of immigration shaped the American Catholic Church from the colonial period to the 21st century? How did the idea of “the Church” as an authoritative hierarchy come about in the mid-20th century, and how has that notion been challenged by immigrant communities, as well as artists and intellectuals? Drawing on the disciplines of history, sociology, anthropology, cultural theory, literature and the arts, this course looks at those who built the church and those who challenged and changed it. (Course is cross-listed as REL 384, CTH 384 and MLS 464.)
REL 390
INTEGRATING SEMINAR
Undergraduate
A seminar for Religious Studies majors focusing upon the methods, classic texts and current issues in the study of religion.

At least junior standing and permission of the department chair are prerequisites for this course.

REL 392
FOREIGN STUDY IN RELIGION
Undergraduate
Under this number, students taking courses in religion or theology as part of a DePaul-sponsored program of study abroad may receive Religious Studies credit when approved in advance by the director of the Foreign Studies Program and the chair of the Religious Studies Department.

REL 393
INTERNSHIP IN RELIGIOUS STUDIES
Undergraduate
Open only to students working on Religious Studies major or minor concentrations. For more information contact the department chair. .

At least junior standing and permission of the department chair are prerequisites for this course.

REL 397
SENIOR THESIS
Undergraduate
Religious Studies majors who wish to undertake a special project of independent study are encouraged to apply. Student works towards completion of a special project under the direction of a project coordinator and faculty committee of three. Student must have a cumulative GPA of at least 3.000 overall, 3.100 in Religious Studies courses, and permission of the department chair.

REL 398
INDEPENDENT STUDY
Undergraduate
A two-credit course done under the supervision of a faculty member with the permission of the Department Chair.

REL 399
INDEPENDENT STUDY
Undergraduate
Independent Study

At least junior standing and permission of the department chair are prerequisites for this course.

RELC 211
INTERPERSONAL COMMUNICATION (Formerly CMNS 211)
Undergraduate
An introduction to the factors that shape communication between two people. Topics include self-concept formation, perception, message formation, verbal and nonverbal communication, active listening, and defensiveness. (Relational) (Formerly CMNS 211)

RELC 290
COMMUNICATION WORKSHOP (VARIBLE TOPICS) (Formerly CMNS 290)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (Formerly CMNS 290)
RELC 311
TOPICS IN RELATIONAL COMMUNICATION (Formerly CMNS 311)
Undergraduate
Explores specialized topic within the field of interpersonal communication. Past topics have included: emotions & communication, gender & its relation to interaction, the "social construction" of interpersonal realities, etc. (Formerly CMNS 311)

RELC 312
EVOLUTION AND COMMUNICATION (Formerly CMNS 312)
Undergraduate
This seminar explores how communication, across a variety of topics, can be understood with respect to the theory of evolution. Specifically, this course examines how millions of years of human evolution influences how people interact in their personal and social relationships. (Formerly CMNS 312)

RELC 313
NONVERBAL COMMUNICATION (Formerly CMNS 313)
Undergraduate
This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include: physical appearances, gestures, face and eye behavior, vocalics, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts. (Relational, Group, Organizational) (Formerly CMNS 313)

RELC 314
FAMILY COMMUNICATION (Formerly CMNS 314)
Undergraduate
This course surveys topics relevant to understanding communication phenomena in the setting of the family. Topics include: family systems, patterns, meaning, themes, roles and types, family life cycles, stressors and conflict, changing family forms and contexts. (Relational, Group, Organizational) (Formerly CMNS 314)

RELC 318
CLOSE RELATIONSHIPS (Formerly CMNS 318)
Undergraduate
This course examines the role of communication in the development, maintenance, and deterioration of romantic attachments. Topics include attraction, intimacy and self-disclosure, attachment beliefs, jealousy, satisfaction, commitment, trust, betrayal, conflict, autonomy, interdependence, etc. (Relational) (Formerly CMNS 318)

RELC 319
THE DARK SIDE OF PERSONAL RELATIONSHIPS (Formerly CMNS 319)
Undergraduate
This course explores the "dark side" of interpersonal communication by examining the growing literature on the troubling or problematic aspects of close relationships. Topics covered include relational dilemmas, relational control and dominance, hurtful messages, paradoxical communication, social predicaments, relational transgressions, privacy violations, physical abuse, verbal aggression, etc. (Formerly CMNS 319)

RELC 320
DECEPTIVE COMMUNICATION (Formerly CMNS 320)
Undergraduate
Explores the use of deceptive communication in social and personal relationships from a range of theoretical perspectives including ethics, evolutionary biology, linguistics, social and developmental psychology and jurisprudence. (Formerly CMNS 320)

RELC 329
PERSUASION (Formerly CMNS 329)
Undergraduate
Explores major theoretical assumptions of current persuasion research. Examines causes and effects of effective and ineffective persuasion. Analyzes persuasive skills and strategies for a variety of persuasion applications, e.g. political, interpersonal, intercultural, and advertising. (Formerly CMNS 329)
The goal of this course is provide students with a research-based understanding of the role of communication within dating relationships. Accordingly, this course traces the life-cycle of a dating relationship. Specifically, this course begins by examining initial interactions that are potentially romantic and could turn into dating interactions. Next, the course focuses on how people engage in dating relationships and the factors that influence relationships. Finally, the course concludes with what happens after dating (i.e., long term commitment/marriage, relational termination, or the death of a partner). (Formerly CMNS 340)

Structured and supervised student participation in collegiate debating, radio production or group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours.

Students will gain an understanding of the different meta-theoretical frameworks used to explain relational communication as well as an understanding of what theories are and how theories are developed. A wide range of relational theories will be used in explaining what constitutes relational communication. Students will be provided with opportunities to apply theoretical concepts to everyday personal and professional relations as well as given opportunities to critique and analyze the efficacy of those theories presented.

This course will examine current research examining the communication processes that keep ongoing relations healthy, constructive and functions. Openness, accessibility and fairness all contribute to the health and maintenance of ongoing relationships. But other theories including social exchange theory, interdependence theory and theories of self-disclosure, uncertain reduction and avoidance all contribute to understanding why some relationships continue while others falter. The concepts, theories and models pertinent to understanding mature relationships and why they remain vital, constructive and functional will constitute the foundation for this course. Students completing the course will understand strategies for strengthening ongoing relationships while simultaneously assessing key areas in need of development or remediation.

This course will explore the unique role that attachment styles play in the formation, maintenance, and deterioration of close relationships. Attachment theory will be used to examine how working models of self and other influence patterns of interaction among relational partners. Topics will include how attachment styles influence self-disclosure, conflict resolution, jealousy and deceptive communication. Students will also explore communicative strategies for dealing with attachment related problems.

This course is designed to provide students with a framework that offers the opportunity to choose and read a list of central texts in Relational Communication. Students will all read and discuss, together, at least one historical text and two books that were identified as seminal or central texts by a group of leading scholars in Communication Studies. Students will then identify a list of 3-5 additional central texts in their particular area of the discipline (e.g., emotion, relational dialectics, face work) and read those texts throughout the quarter, reporting their findings to colleagues in the seminar. Each student?s reading list must be compiled and approved by the professor. The seminar participants will complete outlines (which will be shared with all class participants), discussion questions, and facilitate class discussion about their chosen texts. Through reading and thinking about the material, this will produce high-quality and provocative discussion resulting in quality work that will be distributed to colleagues leading to a more holistic understanding about relationship studies.
RELC 511
TOPICS IN INTERPERSONAL COMMUNICATION
Graduate
Explores specialized topics within the field of relational communication. Past topics have included emotions and communication, gender and its relationship to interaction, and the social construction of interpersonal realities.

RELC 513
NONVERBAL COMMUNICATION
Graduate
Nonverbal messages are important as we typically monitor our own nonverbal messages less, but believe others' nonverbal messages more than their verbal messages. Likewise, research suggests that 65% of our communication is based on nonverbal messages and some estimates are as high as 93%. Clearly such messages are important, yet we spend little time examining such messages. That said, the goal of this course is to provide you with a research based overview of a variety of nonverbal messages, that is, everything we communicate without using our words. This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include physical appearances, gestures, face and eye behavior, vocalic, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts.

RELC 514
FAMILY COMMUNICATION
Graduate
This course surveys topics relevant to understanding communication phenomena in the setting of the family. Topics include: family systems, patterns, meaning, themes, roles and types, family life cycles, stressors and conflict, changing family forms and contexts. Students completing the course will understand the relationship between strong marital, parent child and sibling communication and relational satisfaction. Furthermore students will learn how to pay closer attention to the nonverbal manifestations of thoughts and feelings, be prepared for solving unavoidable family problems, be able to detect the conditions that contribute to excessive family conflict, understand how lack of intimacy weakens family structures, and distinguish between the need for instrumental and affective communication in strengthening family bonds.

RELC 519
DARK SIDE OF INTERPERSONAL COMMUNICATION
Graduate
This course explores the "dark side" of interpersonal communication by examining the growing literature on the troubling or problematic aspects of close relationships. Topics covered include relational dilemmas, relational control and dominance, hurtful messages, paradoxical communication, social predicaments, relational transgressions, privacy violations, physical abuse, and verbal aggression. Upon completion of the course students will understand the positive and negative consequences of avoiding topics for discussion, they will understand how uncertainty constitutes both an obstacle and an opportunity in a relationship, they will better understand the difficulties of transitioning from online to offline relationships, they will understand the kinds of events that people perceive to be hurtful as well as the consequences of complaining, bullying, whining and teasing.

RUS 101
BASIC RUSSIAN I
Undergraduate
Listening to, speaking, reading and writing Russian in a cultural context for the beginning student.

RUS 102
BASIC RUSSIAN II
Undergraduate
Continued emphasis on the four skills in culturally authentic situations.

RUS 103
BASIC RUSSIAN III
Undergraduate
Further work on the basic elements of the Russian language, spoken as well as written, with due regard to the cultural context of Russian expression.
RUS 104
INTERMEDIATE RUSSIAN I
Undergraduate
Intensive practice in the use of Russian through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills.

RUS 105
INTERMEDIATE RUSSIAN II
Undergraduate
Continuing practice in spoken and written Russian and further development of reading and listening abilities in an authentic cultural context.

RUS 106
INTERMEDIATE RUSSIAN III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing Russian with a concomitant heightened awareness of the cultural dimensions of the Russian language.

RUS 197
SPECIAL TOPICS IN RUSSIAN
Undergraduate
See schedule for current offerings.

RUS 198
STUDY ABROAD
Undergraduate
Variable credit.

RUS 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

RUS 201
ADVANCED RUSSIAN LANGUAGE I
Undergraduate
Third-year course covering oral and written communication, reading and writing, and grammar and syntax. RUS 106 or equivalent recommended.

RUS 202
ADVANCED RUSSIAN LANGUAGE II
Undergraduate
Third-year course covering oral and written communication, reading and writing, and grammar and syntax. RUS 106 or equivalent recommended.

RUS 203
ADVANCED RUSSIAN LANGUAGE III
Undergraduate
Third-year course covering oral and written communication, reading and writing, and grammar and syntax. RUS 106 or equivalent recommended.

RUS 205
ADVANCED RUSSIAN: LITERATURE AND CULTURE I
Undergraduate
Grammar, written composition and cultural readings for native speakers of Russian.
RUS 206
ADVANCED RUSSIAN: LITERATURE AND CULTURE II
Undergraduate
Continued emphasis on improved grammar and writing for native speakers of Russian with collateral cultural readings.

RUS 207
ADVANCED RUSSIAN: LITERATURE AND CULTURE III
Undergraduate
Advanced composition and writing course emphasizing standard and literary language with appropriate literary and cultural readings.

RUS 297
SPECIAL TOPICS IN RUSSIAN
Undergraduate

RUS 316
RUSSIAN NOVEL
Undergraduate
The course will allow students to read and analyze novels from important Russian authors such as Tolstoy, Gorky and Zamyatin. Students will write papers and present short stories on these authors as well as others. Cross-listed with MOL 316. RUS 106 or equivalent, and RUS 201-203 or RUS 205-207, recommended.

RUS 317
RUSSIAN SHORT STORY
Undergraduate
The course will allow students to read and analyze short stories from important Russian authors such as Chekov, Bunin and Bulgakov. Students will write papers and present short stories on these authors as well as others. Cross-listed with MOL 317. RUS 106 or equivalent, and RUS 201-203 or RUS 205-207, recommended.

RUS 318
MASTERPIECES OF RUSSIAN LITERATURE
Undergraduate
This course will explore masterpieces of Russian literature from a variety of genres: plays, novels, short stories and poetry. Works by authors such as Tolstoy, Chekov, Dostoyevsky, Gogol, Nabokov, Pushkin, Turgenev, Akhmatova, Mayakovsky, Pasternak and Yevtushenko will be read within their historical context to provide a basis for literary appreciation and analysis. RUS 106 or equivalent, and RUS 201-203 or RUS 205-207, recommended.

RUS 360
REALISM IN RUSSIAN DRAMA
Undergraduate
This course will explore masterpieces of Russian drama from the 18th and 19th centuries. Playwrights such as Puskin, Gogol, Turgenev, Tolstoy, Chekov and Ostrovsky will be studied to examine Realism within the context of the dramatic genre. RUS 106 or equivalent, and RUS 201-203 or RUS 205-207, recommended.
RUS 361
TWENTIETH CENTURY RUSSIAN DRAMA
Undergraduate
This course will explore Russian Drama within the context of the pre- and postwar period. Playwrights such as Chekov, Bulgakov, and emigre writers, as well as post-Soviet authors, will be examined. Through extensive treatment of the dramatic genre, students will have a clearer understanding of Russian drama as an art form. RUS 106 or equivalent, and RUS 201-203 or RUS 205-207, recommended.

RUS 369
RUSSIAN LITERATURE AND FILM
Undergraduate
Greatest Russian short stories, plays, and novels of the 19-20th century, as presented in films by Soviet and Post-Soviet film-makers. Readings in the original (Russian) of Tolstoy, Dostoevsky, Ostrovsky, Chekhov, Bulgakov, and Pasternak's work.

SAP AMST01
SHORT-TERM PROGRAM: AMSTERDAM, BRUSSELS AND PARIS
Undergraduate
This short-term December intercession program to the Netherlands, Belgium, and France examines the role of globalization and its economic and cultural impacts on the urban areas of these countries. The Program includes two coordinated courses taken in the fall and winter quarters.
SAP ARCH01
SHORT-TERM PROGRAM: ARGENTINA AND CHILE
Undergraduate
This short-term December intercession program explores the history, culture, economics, and politics of Argentina and Chile. The program includes meetings with university students and faculty, representatives of the arts, domestic and foreign businesses, the U.S. expatriate community, and Consular officials, as well as visits to cultural and historical institutions. The Program includes two coordinated courses taken in the fall and winter quarters.

SAP ARCH02
SHORT-TERM PROGRAM: ARGENTINA AND CHILE
Graduate
This short-term December intercession program explores the history, culture, economics, and politics of Argentina and Chile. The program includes meetings with university students and faculty, representatives of the arts, domestic and foreign businesses, the U.S. expatriate community, and Consular officials, as well as visits to cultural and historical institutions. The Program includes two coordinated courses taken in the fall and winter quarters.

SAP ATHN99
TERM PROGRAM: ATHENS, GREECE
Undergraduate
This term-long study abroad program in Athens is offered for Winter-Spring quarters through Greece’s renowned College Year in Athens (CYA). Coursework and excursions juxtapose the history and contributions of ancient Greece with the Greece of today—a country situated geographically, socially and culturally at the confluence of Europe, Asia, Africa and the Middle East. Students earn a total of 32 credits for five courses through CYA. Two courses are required: a Modern Greek language course and an Art and Archaeology course. The remaining three electives are worth 6 credits each and may be chosen from CYA’s wide range of disciplines, which include Art and Archaeology, Classical Languages, Environmental Studies, Ethnography, History, International Relations, Literature, Modern Greek Language, Philosophy, Political Science, and Religion.

SAP BAHM01
SHORT-TERM PROGRAM: BAHAMAS
Undergraduate
This short-term December intercession program to the Bahamas is for students interested in history, archaeology, and applied anthropology. During this three-week program, students explore the Bahamas’ history and culture in Nassau, San Salvador, and Abaco. In addition, students participate in either an archaeological research project covering slavery and emancipation or an applied anthropological research project examining migration and community development. The program includes two coordinated courses, one in history and one in anthropology taken in the fall and winter quarters.

This program is appropriate for a broad range of majors, and is highly recommended for its International Business courses. DePaul students either live an apartment shared with international students or in a dormitory. Students receive a total of 30-36 credits in the winter-spring quarters.

This short-term December intercession program takes student to Dubai and Bahrain. The courses explore the commercial context and labor practices in this intensely transnational economy. Students will meet with policy makers, corporate managers and laborers to gain multiple perspective on business practices. Preparatory classes will provide the historical, social and cultural context to understand the region's economy. Students enroll in two courses associated with this program.

This term-long study abroad program in China is offered during the Winter-Spring quarters at Tsinghua University in conjunction with Syracuse University. This program is designed to address the complexities of contemporary China and its languages. The academic program begins with a two-week field study seminar to Beijing, Xi'an and Shanghai, and is followed by classroom study at Tsinghua. Students live in single dormitory rooms on Tsinghua's modern campus.

This term-long study abroad program is designed for students interested in German language and society. After successfully completing the winter and spring quarters students have the option of staying for the fall quarter. Students begin the program at DePaul University's Lincoln Park campus with a focus on learning about German history and society.

This short-term graduate program to Belgium allows students to broaden their perspective on public-policy analysis and public service management in an international context. The course explores how globalization is affecting national governments and traditional cultures while encouraging the creation of international non-profits and supra-national governing agencies. Students will learn how large agencies, such as the European Union and NATO, are strengthening relationships and working more closely with grassroots organizations throughout the world.
This short-term December intercession program to Brazil is designed for students from all colleges. Visiting three cities in Brazil, the course focuses on Information Technology (IT) in Brazil from multiple perspectives. Students learn about the history and development of IT in Brazil, the role it plays in economic development as well as its socio-cultural impact. In addition to seeing some of the highlights of the city, the participants will conduct a number of site visits to businesses, government offices, non-governmental organizations and institutions of higher learning. The program is open to graduate and undergraduate students from any college at DePaul. The program starts with several pre-departure sessions and continues through the winter quarter with meetings scheduled upon return.

This short-term program is designed to provide students with an understanding of social area analysis, neighborhood change, land use, and other topics by exploring the planning initiatives underway in Curitiba, Brazil, one of the most innovative urban areas in South America. The program site serves as an "urban laboratory" to evaluate a wide range of policies intended to enhance the efficiency and "livability" of a metropolitan region, improve public services, and support the development of critical infrastructure. At the host institution, the Pontificia Universidade Catolica do Parana (PUCPR), students critically evaluate how various strategies can be used to promote harmonious development and economic improvement in complex metropolitan areas involving many different units of government. They also compare the strategies used in Curitiba with those used in Chicago.

This business seminar to Beijing and Shanghai focuses on the evolution of ownership structures in China spurred by the country's membership in World Trade Organization (WTO). Through visits to majority-Chinese owned companies, Joint Ventures between Chinese and foreign companies, as well as wholly foreign owned companies, students have the opportunity to explore China's changing economic and regulatory structures and gain an understanding of how Chinese business culture varies across companies according to their different ownership structures.

This short-term program in Chiapas, Mexico focuses on sustainable development and indigenous rights in the Mayan cultures of Chiapas, Mexico. Participants learn about development and sustainability through meetings with fair trade cooperatives, women's organizations and Mexican and international nongovernmental organizations (NGOs). They learn about the effect of globalization on indigenous economies, organizations, and identities, as well as, the ongoing Chiapas struggle for democracy, justice, and dignity. Although language study is not a pre-requisite, Spanish-speaking students could maximize their learning in this program.
SAP CHTB01
SHORT-TERM PROGRAM: CHINA AND TIBET (SNL)
Undergraduate
This short-term study abroad program to China and Tibet is offered by the School for New Learning during the summer. Focusing on ethnic minority cultures located mostly in and around Yunnan province, students examine China's current state as they encounter regions that practice traditional beliefs and customs despite the monumental changes that are occurring. By traveling in present-day China and Tibet, students gain insight into the balance between a society's rich and complex past and the present. Students can register for either 3 or 4 competencies (with committee permission). Non-SNL students may apply for credit for this course with the approval of their department advisors.

SAP CLMB01
SHORT-TERM PROGRAM: COLOMBIA (SNL)
Undergraduate
This short-term study abroad program to Cartagena, Colombia is offered by the School for New Learning during December intercession. Cartagena, Colombia provides the backdrop for this course which will stimulate your thinking about the meaning of leisure in your life and the interrelated nature of leisure in our global society. Cartagena offers a rich sense of history, beautiful beaches, excellent food, cultural events, competitive sports, and superior natural areas. Its heterogeneous ethnic and racial make-up is unmatched in the world making it a perfect environment to study and experience leisure. This program will be led by a faculty member of the School for New Learning.

SAP CLMB02
SHORT-TERM PROGRAM: COLOMBIA (SPS)
Graduate
The program to Bogota, Colombia, seeks to expose students to ethical management tools and issues in an international context. By engaging with and learning from local practitioners, students will enhance their intercultural understanding, communication skills, and examine alternative approaches to issues of ethics in public service management. Students will also learn about how issues of ethics cross borders and the cultural sensitivities that are often involved in public service management through an immersion in Bogota, organizational site visits, and intensive fieldwork.

SAP CNMX99
EXCHANGE: NAMP (CANADA & MEXICO)
Undergraduate
The Program for North American Mobility in Higher Education is a run cooperatively by the governments of the United States, Canada, and Mexico. The purpose of this program is to promote a student-centered, North American dimension to education and training. Students gain specialized knowledge of free-trade and migration issues within a cross-cultural environment. Students study abroad for a semester in Canada or Mexico at one of the four partner universities: Universidad Iberoamericana or Universidad de Guanajuato in Mexico; York University or Concordia University in Canada. All students will take part in research for a case study that will be used in a final publication of NAMP (North American Mobility Project).

SAP CUBA01
SHORT-TERM PROGRAM: CUBA
Undergraduate
This study abroad program introduces the history, culture, economics, and politics of Cuba before and after the revolution of 1959. During their travels, participants will interact with Cuban students, professors, policy makers, artists, and average citizens. From a historical perspective on the Cuban Revolution, students will learn about its impact on Cuban society, Latin America, the "Third World," and the United States, while focusing specifically on the contemporary international business environment and economic climate in Cuba.

SAP CUBA02

From a historical perspective on the Cuban Revolution, students will learn about its impact on Cuban society, Latin America, the "Third World," and the United States, while focusing specifically on the contemporary international business environment and economic climate in Cuba.
This program seeks to expose students to comparative and foreign policy issues as they pertain to the bilateral relations between the United States and Cuba. By engaging with and learning from local practitioners, students will enhance their intercultural understanding, communication skills, and examine alternative approaches to issues in foreign policy. Students will learn about how policy issues cross borders and the cultural sensitivities that are often involved in foreign policy through an immersion in Havana, organizational site visits, and intensive fieldwork.

This short-term seminar to Prague and Vienna will broaden your general awareness of the international business climate of Central Europe. You will be provided with an understanding of the business, political and educational issues affecting this region's transition from a centralized to a market driven economy.

This graduate nursing program examines health care in the Czech Republic, particularly its political, social, economic, and ethical implications. Networking with Czech medical and nursing students and government employees, participants learn about the contemporary changes in nursing science and practice in national and European contexts. Their experiences abroad help students draw parallels and contrasts to health care policies, practice, and access in the United States.

This term-long study abroad program in Dublin, Ireland is offered in cooperation with Ireland's Institute of Public Administration. Upper level undergraduates have the outstanding opportunity to study and intern in the Irish Parliament or a non-governmental organization. During the winter and spring terms, students earn a total of 28 DePaul credits: 10 credits for the internship and 18 credits for the remaining courses.

Visiting three countries in Europe, participants explore sustainable value creation - a multidisciplinary concept of economic development, technological advancement, and environmental sustainability/energy conservation. A variety of interactions and visits with CleanTech companies, fossil-free communities, and a zero-carbon city make up the bulk of travel. At each site, students connect with key executives and local governments and visit the physical plants and facilities.
SAP DMSW02
SHORT-TERM PROGRAM: DENMARK, SWEDEN, AUSTRIA (COMMERCE)
Graduate

SAP DUBL01
SHORT TERM PROGRAM: SPS DUBLIN
Graduate
These summer seminars in Dublin are offered by the School of Public Service in conjunction with All Hallows College in Dublin. The courses are taught by American and Irish faculty. There, they explore public service management and strategy as applied in non-government sectors, such as health care, social service, associations, education, and the arts. The program offers one-week, executive-style courses that may be taken in sequence. Additional program meetings are held on DePaul's campus prior to and after travel.

SAP ENGL01
SHORT-TERM PROGRAM: ENGLAND (SNL)
Undergraduate
This short-term December intercession program to Great Britain offered by the School of New Learning provides opportunities for students to gain valuable understandings of religion, art, and culture that endures in present day Britain while unraveling its rich and complex past. This program's structure is that of a pilgrimage, allowing students some time for reflection as well as learning as they encounter sacred space, respond to aesthetic artifacts and religious rituals, and engage in guided inquiry about the role of these institutions of religion, culture, and education in the past as well as the present.

SAP ESIT01
SHORT-TERM PROGRAM: ESTONIA & ITALY (SNL)
Undergraduate
Participants in this two-country study abroad course on cross-cultural communication will examine how language and interactions are used in various contexts in Estonia and Italy. They will observe communication dynamics in informal settings, such as cafes and piazzas, and in the formal setting of schools and universities. Using concepts from assigned readings, they will then analyze how different socio-cultural factors shape individuals and interaction patterns in both societies, as well as in the United States. A primary focus will be on Estonian and Italian schools and universities, where participants will compare these organizational structures and study their implications for cross-cultural communication among and between teachers and students.

SAP FRNC01
SHORT-TERM PROGRAM: FRANCE
Undergraduate
his short-term summer program in France takes students on a cycling ‘pilgrimage’ as they explore issues associated with pilgrimage, Catholic Church history and the life of Vincent de Paul. Special attention will be given to an experiential exploration of the elements of pilgrimage, the historical dimensions of Vincent de Paul's life and its influence on the ideas and practices of modern Vincentians. The purpose of this program is to offer students an intense experiential complement to academic study and intellectual investigations into topics like religious devotion, the historical development of ideas and practices, migration, multiculturalism, poverty, women’s leadership in the Catholic Church, and ‘Vincentianism.’ Students enroll in two courses associated with the program.
SAP FRPO99
EXCHANGE PROGRAM: FRANCE (SCIENCES PO)
Undergraduate
Participants in this year-long exchange program with Sciences Po, an international university with campuses across France. Students are placed at one of their many campuses to study in courses focused on the historic, economic, political, and sociological facets of France, Europe, and the World.

SAP FRSW01
SHORT-TERM: FRANCE & SWITZERLAND (COMMERCE)
Undergraduate
Exploring the tourism industry in France and Switzerland, two of the most popular travel destinations in Europe, students compare and contrast customer behavior trends and tourism operations in these countries and the United States. In France, students concentrate on the infrastructure of transportation, lodging, food and beverage, and tourism opportunities for visitors. During the stay in Switzerland, students learn about regional transportation, the role of sports in tourism, and the cultural influences of national groups on the tourist experience. A major theme of the seminar is the concept of "a stranger in a strange land," providing students with a heightened awareness of what a traveler experiences, including the impact of jet lag, confusion in customs, and language difficulties with directions, instructions, explanations, and different foods.

SAP FYGR01
SHORT-TERM PROGRAM: FY@GERMANY
Undergraduate
This short term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students learn about the important scientific discoveries made by Johannes Kepler and Albert Einstein. Students learn about the people and the society these scientists lived in, apply their discoveries in lab activities, and investigate how science is presented by museums and science education centers in Germany and the U.S. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.

SAP FYIR01
SHORT-TERM PROGRAM: FY@IRELAND
Undergraduate
This short term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students explore Dublin's rich literary and cultural traditions. Students read and discuss travel writing and other literature and are coached in writing about place using a variety of styles and genres. With this foundation, students travel to Ireland to visit Dublin and neighboring areas. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.

SAP FYJD01
SHORT-TERM PROGRAM: FY@JORDAN
Undergraduate
This short term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students use archaeology, anthropology, and geography to uncover past and present experiences of what is now Jordan. Students discuss the impacts that artifacts, key events, and important players had in shaping the region. During travel, students spend time in the capital city of Amman and various archeological sites. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.
This short-term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students learn about Mayan civilization and its legacies in the Yucatan Peninsula today. Students read literature and view films produced by indigenous writers and filmmakers. During travel to Merida, the capital city of the Yucatan, students visit vibrant neighborhoods throughout the city and Mayan ruins. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.

This short-term program will focus on immersion and deeper understanding of African traditional healing, colonial history, culture, and self-development. The other focus will primarily explore the opportunities and challenges of the current IT business environment, resulting in the launch of a media learning IT project with partner institution in Ghana.

This short-term seminar will focus in Munich and Berlin, which is one of Germany's biggest industrial centers. Once a symbol of Cold War division, Berlin today is a link between Western and Eastern Europe. The Berlin-Brandenburg capital region lies at the very heart of an expanding European Union and offers many new and exciting opportunities for the future! Culturally this seminar will take you to Dachau and many other on a WWII tour of Berlin.

In this business seminar, students will experience Hong Kong and Bangkok, two of the most beautiful, exciting locations of the 21st century. Through various company and site visits, students gain a unique cultural experience as well as the knowledge of global business management and organizations functioning in a foreign environment.
This short-term December intercession program takes students through India, beginning in the capital of Delhi and continuing on to the cities of Bangalore and Pune. In addition to guest lectures, guided observations and experiential learning activities, students learn about Indian environmentalism by participating in two restoration projects. The program includes two coordinated courses taken in the fall and winter quarters.

This short-term December intercession study abroad program creates learning opportunities for students to understand development challenges and the role of NGOs, the government, and for-profit entities in developing and implementing policy initiatives related to climate change, rural development, healthcare, education, gender initiatives, microfinance and micro-enterprise, micro-farming and organic farming, water management and watershed development. Students have the opportunity to interact with government administrators and leaders, Indian graduate students and program beneficiaries in rural and urban areas. Students complete four online learning modules prior to leaving for India.

This short-term business seminar provides students the opportunity to examine India's changing macro-environment (political, economic, cultural and demographics) and its fledging micro-environment (information services, manufacturing, retail and financial). During the program, students visit various Indian companies in several major urban centers such as Mumbai, Pune, Bangalore, and Delhi. In addition, students have the chance to visit specific rural areas to become acquainted with domestic-type NGO initiatives.

This short-term Autumn Quarter program offered by the School for New Learning brings students to one of Ireland's most scenic regions and the nation's most renowned arts festivals. Students explore cultural identity as expressed and supported by the arts, as well as the impact of land and landscape on culture and artistic expression. Clifden's largest festival, Clifden Arts Week, is an internationally renowned venue for the most impressive traditional and contemporary Irish culture. Four competences are available to students who have taken Research Seminar and who enroll for Externship or Advanced Electives.

This short-term Summer program explores the history and culture of Istanbul - the center of Byzantine civilization for a millennium, the capital of the Ottoman empire for more than 450 years, and the largest city of the modern Turkish republic. Students participating in this program must register for a specific spring quarter course and ENG 398 in summer session. Participants earn a total of eight academic credits.

SAP JAN01
SHORT-TERM PROGRAM: JAPAN (CDM)
Undergraduate
This short-term December intercession program in Japan is open to undergraduate and graduate students in CDM who have a strong interest in computer gaming and animation. A 2-week trip to Tokyo and Kyoto takes students to visit several gaming and animation companies in Japan. Touring studios and meeting with their developers and managers help students learn the characteristics and practices of Japan’s gaming and animation industries. Students also learn about issues involved in developing games and animation for the global market, and strategies for international promotion. In addition, the program introduces some of the latest and upcoming technologies in the field. Throughout the trip, students learn about the culture of Japan and how it is reflected in Japanese computer games and animation films.

SAP JAN02
SHORT-TERM PROGRAM: JAPAN
Undergraduate
This short-term December intercession program in Japan focuses on the historical events of the 1945 atomic bombing, the religious sensibilities and ethics that informed responses to the event, and current nuclear issues. Students visit centuries-old temples and shrines in Kyoto, talk with an atomic-bomb survivor in Hiroshima, and visit Catholic churches Nagasaki, home to Japan’s largest Catholic community. The Program includes two coordinated courses taken in the fall and winter quarters.

SAP JAN03
SHORT-TERM PROGRAM: JAPAN (COMMERCE)
Undergraduate
This short-term seminar will focus on SMEs and their drive to accelerate into the 21st Century behind smart, unconventional, strategies and partnerships and local-community leadership. During the seminar, students will be exposed to the traditional Japan national culture juxtaposed against a new paradigm of industry innovation and entrepreneurship. Students will visit both large traditional firms as well as non-traditional entrepreneurial SME firms involved in product and process innovations across several industry sectors.

SAP JRD01
SHORT-TERM PROGRAM: SPS JORDAN
Graduate
This short-term summer study abroad program to Jordan is designed for graduate students in Public Service. The program increases intercultural and managerial capacity of professionals interested in, or currently working with, refugees or with populations with Arabic or Middle Eastern origin. The immersion activities and international service learning increases students’ knowledge of refugees in Islamic contexts in Jordan. Participants will have the opportunity to study Arab culture and its impact on cross-cultural communication and service organizations in Jordan.
SAP KNYA01
SHORT-TERM PROGRAM: KENYA GBM
Undergraduate
This short-term December intercession program to Kenya is organized in conjunction with the Green Belt Movement (GBM), a grassroots non-governmental organization founded by Nobel Prize winner Wangari Maathai. Her renowned organization focuses on providing income and sustenance to millions through planting trees and restoring the environment. Classroom activities on campus prior to travel introduce students to the courses’ topics. While in Kenya, students and GBM members work on community projects such as tree planting, food security, and sustainable agriculture. Students enroll in two courses, one in the fall and one in the winter.

SAP KNYA02
SHORT-TERM PROGRAM: KENYA (SPSMSW)
Graduate
This short-term December intercession program offers graduate students the opportunity to study health, social welfare and development needs in metropolitan and rural Nairobi during the December intersession. Students will spend 2 to 3 weeks visiting schools, religious missions, community cooperatives, relief agencies and/or governmental offices to gain appreciation for the challenges and opportunities confronting Kenya and other African nations.

SAP KNYA03
SHORT-TERM PROGRAM: KENYA & TANZANIA (SNL)
Undergraduate
This program prepares students for lives in an increasingly globalized world by engaging issues and questions of the East African experience, including foreign pressures and influences on indigenous values and social justice dilemmas like class marginalization and the impacts of globalization on lifestyles and economies. Social and cultural exploration in which simple observation serves as a powerful tool for uncovering deeper meanings in everyday events in the lives of Kenyans and Tanzanians provides students with experiences to which they compare their lives in the United States through personal reflection. The participants’ ongoing dialogue with local cultures and peoples raises consciousness on global issues of justice, peace, politics and traditions. In addition, students have the chance to explore the landscape and the major natural monuments of both countries.

TERM PROGRAM: LONDON THEATER, ENGLAND
Undergraduate
This term-long study abroad program at the Central School of Speech and Design in London is open only to students from the Theater School.

SAP LNDN99
TERM PROGRAM: LONDON, ENGLAND
Undergraduate
This term-long study abroad program to London during the Winter-Spring term provides students options for studying and interning in one of Europe's most storied cities. Students enroll in classes at the University of Westminster in disciplines of a wide range. The program has an optional internship component, which provides career-orientated possibilities for students of almost any discipline.

SAP LYON99
EXCH PROGRAM: ATLANTIS (FRANCE & SWEDEN)
Undergraduate
This year-long trans-Atlantic dual degree program in technology and business prepares students for success in the interconnected world of the 21st century. Funded through a federal grant, this program provides financial support for students from DePaul's College of Computing and Digital Media (CDM) to spend one semester in France and one in Sweden. Students obtain two bachelor degrees upon successful completion of the program.
This term-long study abroad program is offered during the Fall quarter, with an option to remain abroad for the Winter quarter. The Fall program through Cultural Experiences Abroad (CEA) focuses on the studies of Spanish language and culture. The Winter program is offered in cooperation with Centers for Academic Programs Abroad and offers students the opportunity to further their linguistic and cultural competencies while interning in their area of study. During the Fall, students earn a total of 18 credits: 13.5 for their Spanish courses taken at Universidad Complutense Madrid and 4.5 for the course taught by the DePaul faculty director accompanying the group to Madrid. Students remaining for the Winter earn an additional 16 credits: 4 for Spanish courses, 4 for an internship course, and 8 for the internship.

Students who participate in the Fall quarter program in Madrid have an option of remaining in Madrid for the winter and conducting an internship. The Winter program is offered in cooperation with Centers for Academic Programs Abroad (CAPA) and offers students the opportunity to further their linguistic and cultural competencies while interning in their area of study. Students earn an additional 16 credits: 4 for Spanish courses, 4 for an internship course, and 8 for the internship.

Participants in this semester-long or year-long exchange program with Universidad Panamericana. Students enroll in a maximum of 6 courses or 24 credit hours per semester on this program. Universidad Panamericana in Guadalajara offers some courses in Business and Management taught in English.

This term-long study abroad program is offered during Summer-Fall terms. Students enroll at world-class Monash University, located outside of Melbourne. Monash's extensive range of course offerings satisfies the interests of students from any college or major. All students enroll in a Contemporary Australia course with excursions to the outback, the Great Ocean Road and sites around Melbourne. While in Australia, students can take advantage of many activities including outdoor excursions throughout Victoria and activities in and around Melbourne including attending sporting and cultural events. Students earn a total of 24 credits distributed between summer and fall terms.

This short-term December intercession program explores the society and culture of Morocco and the ways in which Morocco has been written about in literature. The program begins in the cosmopolitan capital of Rabat and continues on to the imperial cities of Meknes and Fez. Students learn about Moroccan family life during homestays in Fez. These experiences, as well as the camel trek and desert camping trip provide material for student writing and reflections. Students enroll in two courses associated with this program, one in the fall and one in the winter.

This summer Arabic language program in Morocco provides seven weeks of intensive Arabic language study combined with cultural immersion and a home-stay experience. Students participate in intensive language study in the centuries-old city of Fez, Morocco at the Arabic Language Institute in Fez (ALIF). Private tutoring and cultural activities will be provided to strengthen language and cultural learning. Students enroll in a course about Moroccan society and culture taught by DePaul faculty members during the spring quarter prior to travel. 16 credits total.

Students enroll in a course about Moroccan society and culture taught by DePaul faculty members during the spring quarter prior to travel.

After successful completion of the Winter quarter program in Merida, a select number of students have the option of staying in Merida for the spring and conducting a service-learning internship. Students remaining for the spring enroll in Community Internship (CSS 395) in Merida and two Spanish courses.

This language intensive program in Merida, Mexico is offered during the Winter quarter. The activities, course work, and excursions highlight the ways in which the Yucatan Peninsula has developed cultural patterns and institutions quite different than the rest of Mexico. While in Merida for the winter, students enroll in two Spanish courses, Mayan Culture & Community (ANT 390/CSS 201), and a faculty director course.

This term-long program offers students the chance to craft short films and perfect their filmmaking skills in the cultural and artistic hub of Mexico. The program immerses students in Mexican film production, working with student film crews and sharing tricks of the trade with students from the prestigious university, Universidad Iberoamericana. In their integration into the rich life of Mexico City, students have the opportunity to incorporate the vibrantly colored environment, the fervor and chaos of rush hour, the mouthwatering smells of local restaurants and the constant hum of a foreign capital into the soul of their short films.

This program focuses on three overlapping sites of analysis in Mexico City, the world's fourth-largest megacity. First, students learn about the intense growth Mexico City has experienced over the past several decades and the ways that official urban planning efforts by federal and local officials have addressed the social, environmental, and infrastructural challenges that accompany a massive increase in population. Second, students study neighborhoods that have developed reputations as bohemian enclaves and subsequently experienced gentrification. Finally, field studies provide opportunities to learn about formal and informal spaces of leisure and popular culture. Visits to outdoor marketplaces in a variety of neighborhoods, alternative musical cultural centers, media outlets, and public squares and stadiums that serve as sites of national identity and local pride are included in the itinerary.
SAP MXCY04
SHORT-TERM PROGRAM: MEXICO CITY & GOLD COAST (COMMERCE)
Undergraduate
In this two-way cultural exchange program in hospitality leadership, students compare and contrast tourism industry operations in Mexico and the United States with their peers at Iberoamerican University in Mexico City, whose visit to Chicago is coordinated by DePaul. Next, the DePaul students travel to Mexico City and Puerto Vallarta to visit local hospitality and tourism businesses with the Iberoamerican students. Through these visits, DePaul students explore the challenges of managing hospitality operations in Mexico and discuss differences in consumer behavior and preferences, impacts of culture in tourism behavior, forecasting issues, pricing strategies, ethical concerns, and service delivery variations.

SAP NLGS01
SHORT-TERM PROGRAM: NOGALES, MEXICO
Undergraduate
This short-term December intercession program takes students to visit communities, organizations and activists on both sides of the Mexico-US border. During course work and travel students explore changes affecting Nogales? economic, social, political and religious life in light of recent immigration policies and the North American Free Trade Agreement (NAFTA). Students also examine firsthand the impact of national borders on populations and return with new perspectives for establishing workable guidelines for social justice. Students enroll in two courses, one in the fall and one in the winter.

SAP NGYA99
TERM PROGRAM: NAGOYA, JAPAN (IES)
Undergraduate
This term-long program in Winter-Spring is hosted by Nanzan University in Nagoya and the Institute for the International Education of Students (IES). Students take an intensive Japanese language course and an additional three courses chosen from a range of Japanese Studies courses taught in English. Advanced language students may take seminars taught in Japanese.

SAP NTLD01
SHORT-TERM PROGRAM: NETHERLANDS (PSY)
Undergraduate
This short-term summer program gives DePaul students interested in psychology and business the opportunity to research and learn cross-cultural applications of Industrial Organization and Psychology through an experience in the Netherlands and France. Students will read research articles written by researchers in the Netherlands and France as well as readings that specifically address the cross-cultural

SAP OSKA98
EXCHANGE PROGRAM: OSAKA, JAPAN (KANSAI GAIDAI) (AQ)
Undergraduate
Participants in this exchange program with Kansai Gaidai University take four courses, two of which are Japanese language classes. The remaining courses are taught in English and give students a broad understanding of Japanese culture, society, and economy. Students may choose electives from a variety of academic areas including art, international studies, political science, and sociology.

SAP OSKA99

**SAP PHLP01**
**SHORT-TERM PROGRAM: SPS PHILIPPINES**
**Graduate**
The Manila (Philippines) study abroad program in the December intercession is an opportunity to learn applied research methods and monitoring and evaluation approaches for urban poverty reduction. The program is a collaborative effort between DePaul University and Adamson University in Manila. The program places DePaul graduate students in collaborative teams of Adamson faculty and community leaders for evaluating the works of the Vincentian Center for Social Responsibility (VCSR) among marginalized sectors and informal settlers of Metro Manila. Students enhance their research skills for development research and monitoring and evaluation (M&E). The cross-cultural and service-learning character of this program offers to students a perfect opportunity to become effective, ethical and collaborative international public service researchers.

**SAP PPRC01**
**SHORT-TERM PROGRAM: PUERTO RICO**
**Undergraduate**
This short-term study abroad program provided students the opportunity to witness and participate in transnational processes. Through readings, lectures, site visits, and service learning projects that link Puerto Rico to Chicago, students explore the contexts from which the Puerto Rican nation emerges. The program integrates service learning in Puerto Rico and in Chicago, utilizing the Steans Center's "Bringing It Home" model as a means to examine the direct political, economic, and cultural connections between Puerto Rican communities on the island and Puerto Rican communities in Chicago. Students enroll in two courses associated with the program.

**SAP ROME98**
**SUMMER PROGRAM: ROME, ITALY**
**Undergraduate**
This program provides an opportunity to study how Italian culture and identity are portrayed through films from classics such as La Dolce Vita and Bicycle Thieves to acclaimed contemporary works like Romanzo Criminale. Visits to filming locations in Rome illuminate how cinema uses settings to shape a viewer's experience of a city, a nation, and a people. Furthermore, discussions with Italian film industry representatives provide a firsthand perspective on the filmmaking process, revealing how creative and practical choices affect the representation of cultural issues. The program includes a survival Italian course and a weekend excursion.
SAP ROME99
TERM PROGRAM: ROME, ITALY
Undergraduate
This term-long study abroad program in Rome is offered during the Autumn quarter. Students experience the culture and society of Italy while studying the language, art, history, and religious background of the city. They attend language classes at Italiaidea, a local language institute. Service placements are also arranged for students in advanced language classes. Students live with local host families in areas throughout the city. Students earn 18 credits during their stay: 9 credits through Italian courses at the students' appropriate levels, 4.5 credits for a faculty directed course and 4.5 credits for one elective course taught by a local professor.

SAP RSSA01
SHORT-TERM PROGRAM: RUSSIA
Undergraduate
This short-term summer program focuses on the medieval art and history of Imperial Russia. The program visits in Novgorod and St. Petersburg. These two cities, both designated UNESCO World Heritage Sites, offer one of the world's richest ensembles of urban planning, art, architecture, and historical treasures. Students participating in this program earn 8 credit hours for two 4 credit courses. They will select a course in the spring and summer session.

SAP SGMY01
SHORT-TERM PROGRAM: SINGAPORE & MALAYSIA
Undergraduate
This short-term seminar explores the cultural and historical links between Singapore and Malaysia while analyzing the similarities and differences in their economic strategies. With the influence of colonialism and rapid economic growth after independence, the seminar provides insights into the economic and political development of two important South Asian societies. Students participate in meetings with government agencies, financial institutions, macro- and micro-businesses and media agencies to learn about a variety of issues.

SAP TUSC01
SHORT-TERM PROGRAM: SPS TUSCANY
Graduate
This short-term summer study abroad program in Tuscany, Italy focuses on the study of European food policies and the comparative analysis with the American food system. The program benefits from the collaboration with the International Slow Food Movement and its Foundation for Biodiversity.

SAP VIEN01
SHORT-TERM PROGRAM: VIENNA
Undergraduate
This study abroad program introduces students to the peoples, locations, and traditions significant in Vienna of both the fin-de-siecle and today. Present-day Vienna still bears the stamp of the great personalities that shaped its culture and identity in the late nineteenth and early twentieth centuries, yet it is also a modernizing place, one that combines traditions of the past with innovations of the present, and exists as a global, multicultural center that straddles Western and Central Europe. It is also an ideal site for discovering how culture operates in people's lives by closely examining the things they eat, how those things are acquired in a large city, and how what people eat can tell us who they think they are. As a city of modern tastes, Vienna is shown through an exploration of music, visual arts, architecture, coffeehouse culture, as well as an examination of Viennese foods and systems of eating. VIET01

SAP VIET01
SHORT-TERM PROGRAM: VIETNAM
Undergraduate
This program offers students an opportunity to travel throughout Vietnam and explore multiple facets of its 1,000-year history, including its history of war in the twentieth century and its global emergence in the twenty-first. This program focuses on how Americans understand and interpret their encounters with other cultures, not only looking at how Americans have perceived Vietnam, but also how contemporary American culture has adopted, and been transformed by, its encounter with Vietnam. The trip features a variety of academic and cultural visits in locales such as Ho Chi Minh City, Hoi An, Hue, Hanoi, and Ha Long Bay.

SAP WADC99
TERM PROGRAM: WASHINGTON DC
Undergraduate
DePaul University, in collaboration with The Fund for American Studies (TFAS), offers students the opportunity to learn about the political process through a full time internship in Washington, D.C. for the fall semester. The program is designed for undergraduate students interested in American politics and provides internship opportunities in the areas of political journalism, lobbying, government offices and agencies, and the nonprofit sectors. Capital Semester allows students to earn 12 transferable course credits at Georgetown; essentially, students will participate in their internship during the day and take three required evening courses.

SCG 25
BASIC TECHNOLOGY LITERACY
Graduate
(0 Credit) This online course provides students with a knowledge about assembling, using, and troubleshooting basic technology hardware and software. In this course, students demonstrate understanding of basic computer setup and the use of peripheral devices such as printers, speakers, flash drives, scanners, digital cameras, videos, and computer software.

SCG 401
ADVANCED DEVELOPMENTAL PSYCHOLOGY
Graduate
Current research and theories in human development relating to motivation, personality, learning and socialization. Case studies and an analysis of various developmental problems.
SCG 402
PSYCHOLOGY OF LEARNING
Graduate
Study of the learning-teaching process with specific emphasis on the person as a learner, human capacity and potential, learning theories and materials, motivation, concept formation, and behavior.

SCG 403
HUMAN DEVELOPMENT AND LEARNING: ELEMENTARY
Graduate
This course will focus on the developmental processes of school-age children, kindergarten through middle school, by beginning with the study of the young child's social, emotional, cognitive, and physical growth and change. The theoretical and observational study of child development will be framed by an examination of culture, gender, and socio-economic factors as they inform assumptions about normative processes. The relationship between development and learning in a social context will be examined with particular attention to children's developing concepts in math, science, and language arts. Attention will also be given to the role of teachers and schools and other institutions in fostering the healthy development and learning of young people.

SCG 404
HUMAN DEVELOPMENT AND LEARNING: THE EARLY YEARS
Graduate
This course will focus on the developmental process of children from birth to age 8 by beginning with the study of the young child's social, emotional, cognitive and physical growth and change. The theoretical and observational study of child development will be framed by an examination of culture, gender, and socio-economic factors as they inform assumptions about normative processes. The relationship between development and learning in a social context will be examined with particular attention to children's developing cognitive concepts. Attention will also be given to the role of teachers, schools, and other institutions in fostering the healthy development and learning of young children. COREQUISITE(S): T&L 400.

SCG 406
HUMAN DEVELOPMENT AND LEARNING: SECONDARY
Graduate
This course focuses on the multiple factors that contribute to the period of adolescence, bridging childhood and adulthood. Particular attention is given to the intrapsychic, interpersonal, biological, and socio-cultural processes that are mediated by the meanings that youth give to their identity vis a vis rac, class, and gender formations within the broader society. Students will engage in interdisciplinary study of theories to examine the implications for teaching and learning processes and the role of educational institutions in fostering the healthy development of youth in society. Forms of inquiry will include students' examination of their own lives and assumptions, critique of theory, and observations of young people in a variety of contexts.

SCG 408
EDUCATION AND SOCIETY
Graduate
A study of social forces that impinge upon the educational enterprise and analysis of the relationship to major social problems in urban education with emphasis on their social, economic, political, historical and philosophical dimensions.

SCG 409
SOCIOLOGY OF EDUCATION
Graduate
This course focuses on the relationship between school structures and culture, social relations of race, ethnicity, class, and gender, and ideologies organizing education in the United States. Students will explore a range of theories in the sociology of education that explore linkages between school structures and processes and broader social forces. Readings may examine the political economy of schooling, inequalities in educational practices, and student and teacher identities shaped by schools and the larger society.

SCG 410
INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES
Graduate
(formerly CUG 400) This course will examine the basic questions, issues and theoretical frameworks central to the purpose, conceptualization, conduct, writing, reading and the use of educational research as a means for informing educational theory, practice and policy. Students will be exposed to the multiple frameworks which inform education research, the various methodologies employed in collecting and analyzing data and will examine the advantages, limitations and values implicit in conducting and evaluating research.
SCG 411
PHILOSOPHY OF EDUCATION
Graduate
This course examines the relationship of education to the moral and ethical dilemmas or predicaments of the human condition. It will entail issues related to the nature of education's responsiveness, or lack there of, to the concerns of the human condition: for example, human alienation, suffering, success and failure, caring, freedom, responsibility, liberation and agency. Special attention will be given to how these concerns influence or have social, cultural and political implications for how teachers address them within the teaching and learning process.

SCG 439
PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION
Graduate
This course examines foundational and contemporary theories of youth and adolescent development. It considers how these theoretical ideas relate to contemporary questions of youth and middle level education. The course explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. This course seeks to develop in prospective educators a broader capacity to theorize about youth and schooling, and, hence, to act critically and reflectively in multiple contexts in which youth learn.

SCG 527
GLOBAL ISSUES IN EDUCATION
Graduate
Studies of school systems outside the United States, their methods, curriculum and achievements.
Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 582
PRACTICUM IN EDUCATIONAL TECHNOLOGY AND NEW MEDIA
Graduate
This course provides directed experiences in decision-making for curriculum planning, instructional design and delivery, scholarship and leadership in instructional technology-supported learning contexts. Students will engage in co-teaching activities in technology-rich classrooms; develop an instructional technology plan; make field evaluation and use of educational hardware and software; review and discuss research and professional literature in instructional technology; evaluate and use instructional products; develop and present a multimedia-based project; learn and apply theories and principles of instructional and information message design; engage in collaborative, micro-teaching activities online; develop a technology-enhanced instructional program for the K-12 environment; create a staff development plan with focus on technology applications for administrative purposes; conduct an evaluation study on-site; observe and experiment face-to-face and virtually with a range of instructional technology applications; produce comparative reviews on the use of instructional technology in various school settings. The practicum will also provide students with multiple opportunities to reflect and share their thinking with each other in a supportive community of learners and researchers. (Prerequisites: SCG 402 & CS 460).

SCG 588
INDEPENDENT STUDY IN SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION
Graduate
Independent Study in Social and Cultural Foundations in Education. PREREQUISITE: Permission of instructor, program chair and associate dean.

SCG 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
(0 credit) Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. $50 per quarter.
Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.
SCG 603
PROSEMINAR: CULTURE AND EDUCATION
Graduate
This course focuses on the relationship between education, pedagogy, and theories of culture framed by a concern for social justice. Topics may include the pedagogical and political dimensions of popular culture, questions of knowledge production, the relationship between knowledge and power of the political economy of culture production.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 604
PROSEMINAR: IDENTITY CONSTRUCTIONS AND NEGOTIATIONS
Graduate
This course examines identity construction in educational contexts. Drawing on theoretical frameworks in the sociology of education, postmodernist, feminist and critical theories of education, and cultural studies literature, this course will explore identity as complex and multifaceted. It explores relations of class, race, ethnicity, gender, and sexuality and the implications of sociality for contemporary education.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 608
PROSEMINAR: IDEOLOGY, POWER AND POLITICS
Graduate
This course examines how power operates pedagogically and how domination and resistance get shaped in education. It considers power relations in society and how these power relations enter into educational discourse and practice. It also explores ways in which power produces various educational practices and ways in which power gets psychically configured. Students will examine major theories of power, analyze race, ethnicity, gender, class and sexuality as systems of power and consider the educational implications of such an analysis.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 610
INTRODUCTION TO RESEARCH METHODS
Graduate
(Special section of SCG 410, Introduction to Research: Purposes, Issues and Methodologies.) This course will examine the basic questions, issues and theoretical frameworks central to the purpose, conceptualization, conduct, writing, reading and the use of educational research as a means for informing educational theory, practice and policy. Students will be exposed to the multiple frameworks which inform educational research, the various methodoogies employed in collecting and analyzing data and will examine the advantages, limitations and values implicit in conducting and evaluating research. Students will also begin exploring possible thesis topics as they begin defining their particular research purpose, methodology and issues.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 611
PROSEMINAR: PHILOSOPHICAL STUDIES IN EDUCATION, CULTURE AND ETHICS
Graduate
Examines both traditional philosophical questions in education from such perspectives as Africana, feminist, Latino/Hispanic thought and distinctively Africana, feminist, and Latino/Hispanic issues in a philosophical way. Some of the perspectives are, for example, the necessary conditions of a humanistic education, the relation between theory and practice, the relationship between individual and institutional/society, the role of education in the struggle for social justice, the role of aesthetics in human development and projects of political emancipation, the dialectics of history and experience in the development of liberatory ideas, and the moral and ethical dimensions of education.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 614
CRITICAL MEDIA LITERACY
Graduate
This course focuses on theories of media interpretation, cultural pedagogy, and cultural studies. Literature from critical media literacy, cultural studies, critical pedagogy, communication studies, sociology, and philosophy will inform student understanding of how media educates, how interpretations of media are struggled over, and how such practices relate to broader structures of power, identity formation, political economy of media, theories of communication and representation, and pedagogy.
SCG 615  
THEORIZING IN EDUCATION, TECHNOLOGY AND SOCIETY  
Graduate  
This course explores philosophical and sociological theories of education, technology and society. Topics include the social, political, and pedagogical implications of educational technology and new media. The aim of the course is to introduce students to the history of critical theoretical perspectives on educative technologies through foundational texts in the humanities and social sciences as well as contemporary studies in the multiple educative aspects of technology. Course readings will draw on scholarship in philosophy, sociology, new media, educational foundations, and political theory.

SCG 617  
SPECIAL TOPICS IN SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION:  
Graduate  
This course will provide students with an opportunity for critical examination of issues in the social and cultural foundations of education. Topics could include: educational theory; social context of education; education and social justice; education and social transformation, educational policy; and issues in educational reform.

SCG 625  
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)  
Graduate  
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of thesis/capstone advisor required each term. Registration limited to three terms. $50 per quarter.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

SCG 635  
ADVANCED QUALITATIVE RESEARCH METHODOLOGIES  
Graduate  
This course extends the fundamental principles of educational research first introduced in SCG 610. It provides students with theoretical and practical preparation in conceptual issues in qualitative research and research design. Students will explore a variety of methodological approaches to interpretive inquiry in social science research, research design, methods of data collection, research ethics, and critical analysis. This course will prepare students to undertake the capstone master's thesis requirement.

SCG 636  
THESIS RESEARCH  
Graduate  
A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit. Completion of this course is required to receive the MA Degree in Social and Cultural Foundations in Education.

SCG 637  
CAPSTONE: SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION  
Graduate  
The SCFE Capstone allows students to explore substantive areas of scholarship within their areas of interest and to create a final project or paper of their own design under the mentorship of a faculty member in the program. The Capstone is an opportunity to engage in a synthesis of what has been learned through coursework, and to integrate and compare knowledge gained from students' own research with that which was learned in the program. The capstone course will involve preparation of a substantive piece of work. Upon completion of all coursework, students enrolled in this course will select and work with a Capstone Advisor (a faculty member in the SCFE program) to discuss possible paper topics. The paper will generally consist of library-based research and will typically be 20-25 pages in length. Completion of this course is required to receive the MEd Degree in Social and Cultural Foundations in Education.
SCG 701
PHILOSOPHY OF ETHICS IN EDUCATION
Graduate
This course is a philosophical investigation into the structure and meaning of ethics within education. Education, a condition for self-formation and self-other relations, is explored as a site of ethical inquiry. It is within this framework that education, which involves learning, teaching, response, and communication, is posed as a condition of ethical possibility and not merely as the vehicle through which a certain ethics gets carried out. Primary and secondary philosophical and non-philosophical literature and authors within and outside of philosophy of education will be used to study these issues.

Status as an EDD student with a declared concentration is a prerequisite for this class.

SCG 711
CULTURE, POWER AND EDUCATION
Graduate
The purpose of this course is to facilitate the development of a critical understanding of the larger concept of culture within the notion of multiculturalism. This begins by recognizing that educational institutions such as schools and universities are cultural institutions engaged in the making of culture. While the focus of multiculturalism is about theorizing difference in relation to the particular cultural processes that go on in schools and universities, its focus does not address how educational institutions are shaped by broader cultural dynamics that are outside of the immediate context of educational institutions. It is in this context that doctoral students will examine how cultural processes are intimately connected with social relations, especially with class relations, with gender and ethnic divisions, and with the racial restructuring of social relations. They will also explore how culture involves power, which serves to produce inequalities in the abilities of individuals and social groups to define and realize their needs. In addition, culture will be analyzed as a site of social difference and struggle. The primary focus of the course will be to explore how the larger political economy, popular culture and politics of a society effect the dynamics of how culture is constructed within social life. Doctoral students from within this framework will analyze what we mean by culture; how it is produced and consumed; the relationship of everyday life are represented by dominant cultural and sub-cultural groups and institutions. It is in this context that the course also examines how relations of power, knowledge, social identity and pedagogy within educational institutions are conditioned and shaped by the educational practice that shapes and impinges upon the internal workings and purposes of educational institutions.

Status as an EDD student with a declared concentration is a prerequisite for this class.

SCG 721
HUMAN DEVELOPMENT AND THE EDUCATIONAL PROCESS
Graduate
This course will examine the process of human development and learning through the ages by critically examining cross-cultural research and developmental theories designed to describe and interpret the physical, social, emotional, intellectual, and psychological processes involved. Emphasis will be placed on the range of individual, familial, environmental, and cultural factors that may enhance or inhibit human growth and development, and on the critical role that human relationships play in the lifelong interactive processes of learning and growth. Considerable attention will be paid to the historical role of power, culture, class, gender and capability in defining and interpreting certain behaviors as indicators of normative development. These normative indicators will be critiqued with regard to underlying cultural assumptions and values, their function in fostering and maintaining current social, educational and political relations, and their contribution to the current crises in urban education and the development of children and youth. Class participants will examine their perspective on human development and learning and explore the socio-cultural and historical bases which contribute to their underlying values and assumptions. Through multifaceted inquiry utilizing self-reflection, case studies, theoretical analyses, and child assessment and observation, participants will consider the implications for their work as educational leaders in approaching current challenges with students, parents, community, and teachers and in creating schools that will foster societal change to support the healthy development of children and youth.

Status as an EDD student with a declared concentration is a prerequisite for this class.

SCG 735
QUANTITATIVE RESEARCH METHODS I
Graduate
This course is designed to provide doctoral level students with theoretical and practical preparation in quantitative research design including: instrumentation; data collection; statistical analysis; ethics and politics of the conduct of research; and development of analytical skills for critiquing quantitative research. Students will have the opportunity to work with real databases to conduct both univariate and multivariate analyses, including correlations, ANOVAS, and multiple regressions. Prerequisite: SCG 785.

SCG 785 and status as an EDD student is a prerequisite for this class.
SCG 745
QUALITATIVE RESEARCH METHODS I
Graduate
This course is designed to provide doctoral level students with theoretical and practical preparation in qualitative methods including: data collection and analysis; ethics and the politics of the conduct of research; and critical analytical skills for review and critique of qualitative research. Students will be introduced to a range of approaches to qualitative inquiry that may include: narrative inquiry; ethnography; case study; phenomenology; grounded theory; and participatory action research from a variety of theoretical perspectives. Prerequisite: SCG 785.

SCG 755 and status as an EDD student is a prerequisite for this class.

SCG 755
QUANTITATIVE RESEARCH METHODS II
Graduate
A continuation of SCG 735. Students will prepare a methodology section of a research project and will learn how to write up quantitative results of their analyses. By the end of the course students should be able to: understand quantitative methodological approaches; select appropriate data collection strategies; conduct the appropriate analysis for the research question(s) proposed and the nature of the data; and be prepared to write a candidacy paper. Prerequisite: SCG 735.

SCG 755 and status as an EDD student is a prerequisite for this class.

SCG 765
QUALITATIVE RESEARCH METHODS II
Graduate
A continuation of SCG 745. Students will conduct a pilot study on an issue of interest using a qualitative research design. By the end of the course students should be able to: understand qualitative methodological approaches; select appropriate data collection strategies; conduct the appropriate analysis for the research question(s) proposed and the nature of the data; and be prepared to write a candidacy paper. Prerequisite: SCG 745.

SCG 745 and status as an EDD student is a prerequisite for this class.

SCG 775
SEMINAR: FRAMEWORKS OF INQUIRY IN EDUCATIONAL RESEARCH I
Graduate
This course offers doctoral students a general introduction to theory and practice in educational research. First, it is designed to help students develop an understanding of the assumptions that underlie multiple approaches to knowledge construction and the conduct of inquiry in education. Second, the course will introduce students to the structural organization of a research manuscript. By the end of the course students should be able to: understand key theoretical and methodological issues in educational inquiry; engage in the critical analysis of multiple educational frameworks; recognize the components of a research manuscript; and identify a general topic area for dissertation research.

Status as a EDD student with a declared concentration is a prerequisite for this class.

SCG 775
SEMINAR: FRAMEWORKS OF INQUIRY IN EDUCATIONAL RESEARCH II
Graduate
Drawing upon the knowledge and skills developed in Frameworks of Inquiry I, this course is designed to enhance students' ability to critically analyze existing research as a crucial element in completing their own doctoral research. Emphasis will be placed on the preparation of a critical literature review. By the end of the course students should be able to: review the components of a research proposal; develop further the ability to evaluate research critically; conduct a literature review that will involve interpretation, evaluation, and synthesis of literature on a topic of their choice; refine a topic for dissertation research; and make an informed decision between the quantitative and qualitative sequences. Prerequisite: SCG 775

SCG 775 and status as an EDD student is a prerequisite for this class.
SCG 895
ADVANCED DOCTORAL RESEARCH SUPPORT SEMINAR:
Graduate
This course is designed to assist doctoral students with the candidacy paper, the proposal and/or the dissertation research. Students will have the opportunity to set individual project goals. The course will incorporate classroom lecture, group discussion, individual assignments, and individual consultation in order to support students as they move toward completion. This course meets over 2 quarters and should be taken at the end of program coursework. Prerequisite: SCG 755 or 765
(SCG 755 or SCG 765) and status as an EDD student is a prerequisite for this class.

SCU 207
SOCIAL AND HISTORICAL ISSUES IN EDUCATION
Undergraduate
This course examines through an interdisciplinary framework sociological and historical issues and concerns associated with the relationship between education and public life. The course analyzes education as a form of cultural power, addressing its political and ideological effects. Emphasis will be placed upon the social and historical meanings and purposes assigned to education, especially as it pertains to questions of race, gender, sexuality, and the political economy of class.

SCU 336
ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
Undergraduate
Theories of development throughout adolescence including current issues of problems and growth crises in attaining maturation. The course also includes adult and aging life span considerations. Emphasis is placed on the role of the early childhood professional in interaction with adults in the lives of young children (i.e., parents, grandparents).

SCU 337
HUMAN GROWTH AND DEVELOPMENT
Undergraduate
This course is an introduction to the study of the process of human development from conception to old age. Through a range of theories, the periods of childhood, adolescence, and adulthood are examined with particular attention to the role of culture, gender, and class as they inform the contextualized process of growth and change across the life span.

SCU 338
THE PROCESS AND EVALUATION OF LEARNING
Undergraduate
The process involved in human learning is examined from alternative theoretical and research paradigms and perspectives. The roles of emotions, cultural differences, social realities, cognitive uniqueness, character and achievement tendencies are examined with respect to learner functioning. Alternative methods and techniques for evaluating learner development and academic achievement are surveyed and discussed. Emphasis is placed upon identifying the characteristics of individually and culturally responsive and responsible testing and assessment protocols in the school setting.

Advanced Teacher Candidate Standing is a prerequisite for this class.

SCU 339
PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION
Undergraduate
This course introduces foundational and contemporary theories of youth and adolescent development. It provides an investigation of how these theoretical ideas relate to contemporary questions of youth and middle level education. The course explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. This course seeks to develop in prospective educators a broader capacity to theorize about youth and schooling and, hence, to act critically and reflectively in multiple contexts in which youth learn.

Advanced Teacher Candidate Standing is a prerequisite for this class.

SCU 399
INDEPENDENT STUDY
Undergraduate
(1 to 4 credits) Education core unit. PREREQUISITE(S): Permission of Department Chair and Associate Dean.
SE 325
INTRODUCTION TO SOFTWARE ENGINEERING
Undergraduate
This course introduces students to the activities performed at each stage of the development process so that they can understand the full lifecycle context of specific tasks such as coding and testing. Topics will include software development processes, domain modeling, requirements elicitation and specification, architectural design and analysis, product and process level metrics, configuration management, quality assurance activities including user acceptance testing and unit testing, project management skills such as risk analysis, effort estimation, project release planning, and software engineering ethics. PREREQUISITE(S): CSC 212 or CSC 224 or CSC 396 or CSC 242 or CSC 262 or IM 330 or CSC 243

SE 330
OBJECT ORIENTED MODELING
Undergraduate
Object-oriented modeling techniques for analysis and design. Provides the tools and techniques needed to solve complex, real-world software engineering problems in an object-oriented manner, using the most effective elements of the Unified Process. The course covers the essential concepts and notation of the Unified Modeling Language (UML), the standard notation for object-oriented analysis and design. Team project. PREREQUISITE(S): CSC 212 or CSC 262 or CSC 300

SE 333
SOFTWARE TESTING
Undergraduate
This course is designed for the software engineering professional to gain a greater understanding of the key ingredients in creating and/or managing a successful testing program to meet project needs. Topics covered include test lifecycle planning, test design & coverage analysis, complexity, levels of testing such as unit, integration, system, performance and stress testing. Best practice strategies in software testing such as verification & validation, early lifecycle testing, risk based testing and automation will also be examined including exposure to test automation methods and tools. PREREQUISITE(S): CSC 383 or SE 330 or CSC 301

SE 350
OBJECT-ORIENTED SOFTWARE DEVELOPMENT
Undergraduate
Principles, techniques and tools of object-oriented modeling, design, implementation, and testing of large-scale software systems. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): CSC 301 or CSC 383

SE 352
OBJECT-ORIENTED ENTERPRISE APPLICATION DEVELOPMENT
Undergraduate
This course focuses on applying object-oriented techniques in the design and development of software systems for enterprise applications. Topics include component architecture, such as Java Beans and Enterprise Java Beans, GUI components, such as Swing, database connectivity and object repositories, server application integration using technologies such as servlets, Java Server Pages, JDBC and RMI, security and internationalization. PREREQUISITE(S): CSC 301 or CSC 383.

SE 356
SOFTWARE DEVELOPMENT FOR MOBILE AND WIRELESS SYSTEMS
Undergraduate
This course will focus on the unique aspects of developing software applications for mobile and wireless systems, such as personal digital assistant (PDA) devices and mobile phones. Topics will include user interface design for small screens with restricted input modalities, data synchronization for mobile databases as well as wireless programming and the use of web services. PREREQUISITE(S): SE 350

SE 357
CONCURRENT SYSTEM DEVELOPMENT
Undergraduate
Fundamentals and techniques of developing concurrent object-oriented applications, using a patterns-based approach. Concepts covered include threads, synchronization and object locking, thread blocking and deadlock, safety and liveness, state-dependent action and concurrency control. PREREQUISITE(S): SE 350.
SE 358
SOFTWARE DEVELOPMENT FOR LIMITED AND EMBEDDED DEVICES
Undergraduate
This course will focus on the unique aspects, tools, and techniques for developing software applications for limited and embedded devices, such as set-top boxes, micro-controllers and smart cards. Topics will include memory management for low-memory devices and efficient programming techniques for limited processors. Students will gain hands-on experiences in customizing and configuring embedded OS, handling various types of sensors and actuators such as barcode readers, RFID sensors, etc, and building software applications that meet the functional and non-functional requirements. PREREQUISITE(S): SE 350

SE 359
AGILE SOFTWARE DEVELOPMENT
Undergraduate
This course focuses on the fundamentals, principles, tools, and techniques in agile software development. Students will gain hands-on experiences in agile software development through projects dealing with various aspects of agile development, including planning, construction, testing, and integration. Students will be able to effectively participate in and manage agile software development as a result of their successfully completing this course. PREREQUISITE(S): SE 350

SE 368
SOFTWARE MEASUREMENT AND PROJECT ESTIMATION
Undergraduate
This course will discuss various software metrics and defect models. Productivity and effort estimation models as well as software cost estimation will also be discussed. PREREQUISITE(S): IT 223 and SE 330.

SE 371
PRACTICES OF GLOBAL SOFTWARE DEVELOPMENT
Undergraduate
This course studies the challenges and solutions for developing software in a global environment. Topics covered include strategic issues related to allocation of tasks; communication issues that arise due to distance, time zone differences, infrastructure support, geographical dispersion, and lack of information communication; coordination complexity; cultural issues, technical issues related to information and artifact sharing, and architectural design, and finally knowledge management issues. Some sections of this course will include a hand-on global development project in conjunction with teams of students at other universities, while other sections will focus on a more in-depth theoretical discussion of these issues and concepts. PREREQUISITE(S): SE 325 and CSC 391

SE 380
DESIGN OF OBJECT-ORIENTED LANGUAGES
Undergraduate
This course covers issues in the design and specification of object-oriented programming languages. Sample topics include the use of patterns in program representation, static and dynamic semantics, subject reduction, sub-typing, inheritance, polymorphism, genericity and concurrency. PREREQUISITE(S): SE 350

SE 391
SOFTWARE ENGINEERING STUDIO I
Undergraduate
Students will work in small teams to develop realistic software systems in a master-apprentice environment. The instructor will serve as a master/mentor/project leader. Students will apply the knowledge and skills they have learned in previous course in solving real world problems. PREREQUISITE(S): SE 350.

SE 392
SOFTWARE ENGINEERING STUDIO II
Undergraduate
This course is a continuation of SE 391. SE 391 and SE 392 must be taken as a sequence in consecutive quarters. PREREQUISITE(S): SE 391.
SE 430
OBJECT ORIENTED MODELING
Graduate
Object-oriented modeling techniques for analysis and design. Provides the tools and techniques needed to solve complex, real-world software engineering problems in an object-oriented manner, using the most effective elements of the Unified Process. The course covers the essential concepts and notation of the Unified Modeling Language (UML), the standard notation for object-oriented analysis and design. Team project. PREREQUISITE(S): CSC 212 or CSC 262 or CSC 300.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 433
SOFTWARE TESTING AND QUALITY ASSURANCE
Graduate
This course is designed for the software engineering professional to gain a greater understanding of the key ingredients in creating and/or managing a successful testing program to meet project needs. Topics covered include test lifecycle planning, test design & coverage analysis, complexity, levels of testing such as unit, integration, system, performance and stress testing. Best practice strategies in software testing such as verification & validation, early lifecycle testing, risk based testing and automation will also be examined including exposure to test automation methods and tools. PREREQUISITE(S): CSC 383 or SE430 or CSC 301

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 450
OBJECT-ORIENTED SOFTWARE DEVELOPMENT
Graduate
Principle, techniques and tools of object-oriented modeling, design, implementation, and testing of large-scale software systems. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): (CSC 383 or CSC 393 or CSC 301) and (CSC 224 or CSC 212 or CSC 300)

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 452
OBJECT-ORIENTED ENTERPRISE COMPUTING
Graduate
This course focuses on applying object-oriented techniques in the design, development, and integration of server-side enterprise applications using technologies such as servlets, Java Server Pages, and JDBC. Topics include web applications, multi-tier architecture, model-view-controller architecture, database connectivity, and security. PREREQUISITE(S): CSC 212 or CSC 224 or CSC 396 or CSC 301.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 453
ARCHITECTURE AND FRAMEWORKS FOR DEVELOPING CLIENT APPLICATIONS
Graduate
This course will focus on software architectures, frameworks, and techniques for developing web-based thin client applications as well as rich desktop client applications. Topics will include discussion on design and architectural patterns, such as model-view-controller pattern; survey of widely used development frameworks for building client applications, such as Struts, Java Server Face (JSF), Swing, and SWT, etc.; discussion of widely used techniques such as AJAX; evaluation of the strengths and weaknesses of these technologies for making technology decisions. Students will gain hands-on experiences in developing applications that utilizes these frameworks and techniques. Prerequisite: SE452.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 456
ARCHITECTURE OF COMPUTER GAMES
Graduate
This course discusses the software architecture and the engineering of computer games. The topics include gaming platforms, libraries and frameworks for game development, techniques for accessing and managing low level devices and resources, and application of artificial intelligence. PREREQUISITE(S): CSC 301

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
SE 457
SERVICE-ORIENTED ARCHITECTURE
Graduate
An in-depth study of service-oriented architecture (SOA) from the business, architectural, and technology perspectives. The business perspective will explain the imperatives behind SOA and discuss the significance of SOA in industry. The architectural perspective will discuss the different architectural models of software development and contrast these with SOA. The technology perspective will provide students with the opportunity to gain the required hands-on experience to analyze, design, implement and deploy SOA solutions that will meet both functional and non-functional requirements. Major topics include software architectures in practice, SOA development lifecycle, Enterprise Service Bus, SOA analysis and design methods, Web Services, and governance. Prerequisite: SE450 or CSC435

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

SE 459
AGILE SOFTWARE DEVELOPMENT
Graduate
This course focuses on the fundamentals, principles, tools, and techniques in agile software development. Students will gain hands-on experiences in agile software development through projects dealing with various aspects of agile development, including planning, construction, testing, and integration. Students will be able to effectively participate in and manage agile software development as a result of their successfully completing this course. PREREQUISITE(S): SE 450

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

SE 468
SOFTWARE MEASUREMENT/ PROJECT ESTIMATION
Graduate
Software metrics. Productivity, effort and defect models. Software cost estimation. PREREQUISITE(S): Introductory Statistics and (SE430 or SE450)

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

SE 475
MANAGING GLOBALLY DISTRIBUTED SOFTWARE DEVELOPMENT
Graduate
Managing Globally Distributed Software Development (GDSD) for IT projects. Issues associated with time zone differences, infrastructure support, geographical dispersion, and lack of centralized communication. The course will focus on the management, implementation and deployment of software within the context of outsourced, distributed development, and insourced projects. Additional topics include strategic management issues such as justification, vetting, consulting services and partnerships. Course will include several hands-on distributed development projects. PREREQUISITE(S): CSC 301 or CSC 393

SE 477
SOFTWARE AND SYSTEMS PROJECT MANAGEMENT
Graduate
Project Management is presented from a practitioner's view. The four basic building blocks of software project management: people, process, tools, and measurements are covered. Special emphasis is placed on professional standards such as the Project Management Book of Knowledge and IEEE Software Engineering Standards. Specific topics include Managing People, Selecting Project Tools, Leadership & Motivation, Software Development Processes, Estimation, Risk Analysis, Scheduling and Tracking, Leveraging Measurements, and Project Completion. Consideration is given to rapid development and project cultural issues. PREREQUISITE(S): Knowledge of the Software development life cycle model, for example through courses such as SE430, ECT455, IS425, MIS555 or through appropriate work experience.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

SE 480
SOFTWARE ARCHITECTURE I
Graduate
The Software Architecture process is concerned with describing, evaluating, and designing systems at the architectural level. This course will discuss the role of architecture and the architect in the software development cycle. It will introduce architectural patterns and tactics, architecture assessment techniques, architecture driven design, and techniques for documenting architectures. The course will involve design, development, and assessment activities. PREREQUISITE(S): SE 450

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
SE 482  
REQUIREMENTS ENGINEERING  
Graduate  
Requirements Engineering (RE) plays a critical role in the software development process. This course will introduce related vocabulary, concepts, and techniques, and will examine the role of RE in software and systems engineering. The course will cover topics related to eliciting, validating, negotiating, analyzing, specifying, and managing requirements. Popular RE tools will also be introduced. Prerequisite: SE430 or SE450.

CDM graduate students in the PreReq phase are restricted from registering for this class.

SE 491  
SOFTWARE ENGINEERING STUDIO  
Graduate  
Students will work in small teams to develop realistic software systems in a master-apprentice environment. The instructor will serve as a master/mentor/project leader. Students will apply knowledge and skills they have learned in previous course in solving real world problems. PREREQUISITE(S): SE 450.

CDM graduate students in the PreReq phase are restricted from registering for this class.

SE 511  
PRACTICES OF GLOBAL SOFTWARE DEVELOPMENT  
Graduate  
This course studies the challenges and solutions for developing software in a global environment. Topics covered include strategic issues related to allocation of tasks; communication issues that arise due to distance, time zone differences, infrastructure support, geographical dispersion, and lack of information communication; coordination complexity; cultural issues, technical issues related to information and artifact sharing, and architectural design, and finally knowledge management issues. Some sections of this course will include a hands-on global development project in conjuncion with teams of students at other universities, while other sections will focus on a more in-depth theoretical discussion of these issues and concepts. Prerequisite(s): SE 450 or SE 430 or IS 430 or PM 430. A student may not take both IS 540 and SE 511 for credit toward a degree.

CDM graduate students in the PreReq phase are restricted from registering for this class.

SE 525  
SOFTWARE SECURITY ARCHITECTURE  
Graduate  
Students in this course will learn architectural patterns for integrating security into software such as web applications. Topics include: an overview of software security; integration of authentication, access control, and auditing into software; programming with symmetric-key and asymmetric-key cryptography, including key distribution and key management, use of certificates, and SSL/TLS; security mechanisms in modern runtime environments, e.g., code signing, code verification, access control, and security policies. Students will get hands-on experience designing and implementing secure software. Prerequisite(s): CSC 435 and SE 450

CDM graduate students in the PreReq phase are restricted from registering for this class.

SE 526  
SOFTWARE SECURITY ASSESSMENT  
Graduate  
Students in this course will learn how to conduct software security assessment to identify software vulnerabilities in software such as web applications and operating system services. Topics include: common software vulnerabilities and attack vectors; malicious payloads, including shellcode structure; and application review techniques, including fuzzing and code auditing. Students will get hands-on experience identifying vulnerabilities in software. Prerequisite(s): CSC 435

CDM graduate students in the PreReq phase are restricted from registering for this class.

SE 529  
SOFTWARE RISK MANAGEMENT  
Graduate  
Identification, estimation, evaluation, planning, controlling, and monitoring of risk involved in the development, maintenance, operation and evolution of systems. PREREQUISITE(S): IT 223 and SE 430 or consent.

CDM graduate students in the PreReq phase are restricted from registering for this class.
SE 533  
SOFTWARE VALIDATION AND VERIFICATION  
Graduate  
Techniques, methods and tools for software inspection and testing. Theory and applications of formal verification of programs. Techniques and tools for automated analysis of programs. PREREQUISITE(S): SE 450.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 546  
SOFTWARE ARCHITECTURE AND DESIGN FOR DESKTOP APPLICATIONS  
Graduate  
This course will introduce students to architecture, design and implementation issues for developing GUI-based desktop application. The goal is to understand the engineering aspect of user interface development – that is the basic software architectures and designs that govern the development of graphical user applications including patterns like the Model-View-Controller and its derivatives, event-driven design, as well as addressing concurrency, performance, caching, and software packaging and distribution issues. The course will also provide an in-depth exposure to the toolkits available in Java. Examples include JFC/Swing, JMF, JAF. Prerequisite(s): SE450.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 549  
MODEL-DRIVEN SOFTWARE DEVELOPMENT  
Graduate  
Advanced methods and techniques in software specification, modeling, and model-driven development. Topics include approaches to software specification and modeling, formal specification languages, techniques for structural and behavioral modeling of software systems, and tools for analysis and transformation of software systems. PREREQUISITE(S): SE 430 or SE 450.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 554  
ENTERPRISE COMPONENT ARCHITECTURE  
Graduate  
This course will focus on object-oriented component architectures for enterprise applications. Topics include: Enterprise Java Beans (EJB), Java Naming and Directory Interfaces (JNDI), Java Mail and Messaging Services. PREREQUISITE(S): SE 450 or SE 452.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 556  
ADVANCED ARCHITECTURE OF COMPUTER GAMES  
Graduate  
This course discusses the advanced issues in software architecture and the engineering of computer games. The topics include engineering and programming issues in graphics, scene management, kinematics, simulation, collision detection. Software design patterns and frameworks for computer games. Project management, configuration management, and quality assurance of computer game development projects. PREREQUISITE(S): SE 456 and CSC374 or instructor consent.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 558  
ARCHITECTURE AND DESIGN FOR MULTIPLAYER GAMES  
Graduate  
Multiplayer games were made possible by the advances in networking technology, increases in processor speed and data storage. Today, the majority of successful game titles are equipped with a multiplayer capability. This technical course discusses the fundamental aspects of multiplayer game development such as: design techniques, architectures, client and server side implementation, time and event synchronization, databases. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374 or instructor consent.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
SE 560
STRUCTURED DOCUMENT INTERCHANGE AND PROCESSING
Graduate

Document and data interchange among different applications is an extremely important aspect of software application development. This course will focus on emerging technologies associated with the Extensible Markup Language (XML), such as the Document Object Model (DOM), the Simple API for XML (SAX), the XML Stylesheet Language (XSL) and Transformation Language (XSLT), and XML Schema. Applications of these technologies will be discussed in conjunction with tools and techniques for parsing, transforming, and manipulating documents. PREREQUISITE(S): SE 450 OR ((CSC 383 or CSC 301) and SE 430).

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 581
SOFTWARE ARCHITECTURE II
Graduate

In this second Software Architecture course, students will be exposed to case studies of real-world software architectures for which reliability, performance, availability, scalability and other such concerns drive the architectural design. Students will gain hands-on practice in reverse engineering, designing, and assessing existing systems including performance testing. Student will build on their prior knowledge to design complex systems in principled and systematic ways. The course will involve designing and implementing a simulated high scalability, high reliability system. PREREQUISITE(S): SE 480

SE 582
SOFTWARE-INTENSIVE SYSTEMS ENGINEERING AND MANAGEMENT
Graduate

This course will introduce students to fundamental principles of systems engineering for large and complex software intensive systems. The course will include a study of systems engineering failures, and will cover topics related to problem frames: systems level modeling of hardware and software components, concept definition, design tradeoffs, risk assessment, interface definition and related systems engineering activities. Additional topics such as product line development, ultra-large scale systems, and engineering of safety critical systems will also be covered. PREREQUISITE(S): (SE 470 or PM 430 or IS 430) and (SE 430 or SE 482 or IS 485)

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 591
SOFTWARE ENGINEERING STUDIO II
Graduate

This is the continuation of SE 491. SE 491 and 591 must be taken as a sequence in two consecutive quarters. PREREQUISITE(S): SE 491.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 598
TOPICS IN SOFTWARE ENGINEERING
Graduate

Specific topics will be selected by the instructor and may vary with each quarter. PREREQUISITE(S): See syllabus

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 690
RESEARCH SEMINAR
Graduate

Readings and discussion on current research topics. Students may register for this course no more than three times. PREREQUISITE(S): Consent of the instructor.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
SE 691
RESEARCH SEMINAR CONTINUATION
Graduate
This course is intended for students not registering in either SE 696 or SE 698. After registering for SE 690, students register for this course in each subsequent quarter until they complete the research. Students who fail to do so will be required to re-enroll in SE 690 to meet the requirement for completing that course. Prerequisite: SE 690

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 696
MASTER’S PROJECT
Graduate
(4 credit hours) Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. PREREQUISITE(S): Consent of advisor.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 698
MASTER’S THESIS
Graduate
(2 credits) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. PREREQUISITE(S): Consent of advisor. Independent study form required.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SE 699
SOFTWARE ENGINEERING RESEARCH CONTINUATION
Graduate
Students register for continuation credit after registering for SE 698 in each subsequent quarter until they complete their thesis. Students who fail to do so will have to reregister for SE 698 to meet the requirement for completing that course. PREREQUISITE(S): SE 698.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

SEC 309
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Undergraduate
Prepares for teaching mathematics at the middle school and secondary school levels. Examines contemporary issues in teaching mathematics, methods of teaching secondary mathematics, and recent history in mathematics curriculum development. Emphasis on the development of alternative teaching strategies and the implementation of the NCTM Standards. Lesson and unit development, evaluation, and classroom management also will be discussed. PREREQUISITE(S): SEC 364 or equivalent.

SEC 363, SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 310
TEACHING HISTORY, AND SOCIAL SCIENCES IN SECONDARY SCHOOLS
Undergraduate
Prepares for teaching history and social sciences at the middle and secondary school levels. Examines the nature and purpose of history and social sciences curriculum within secondary schools, the current status of social studies materials and practices, and issues confronting today's secondary social studies teachers. Emphasis on alternative teaching strategies, resources for teaching and learning, teachers' responsibilities in curriculum development and decision making, and methods and materials for addressing cultural diversity. Lesson and unit development, evaluation, and classroom management also will be discussed. PREREQUISITE(S): SEC 364 or equivalent.

SEC 363, SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.
SEC 320
EXPLORING TEACHING IN THE URBAN HIGH SCHOOL
Undergraduate
This course is an invitation to secondary education as a profession, an opportunity for students considering education as a career to explore the reality of teaching and learning a disciplinary content area in a variety of Chicago-area schools. Students will become familiar with different narratives of teaching through teacher and student biographies, testimonials, literature, film, and classroom observations. They will explore the interrelationships between, for example, popular cultural beliefs about schooling; teacher and student identities; and classroom interaction. The instructor will coordinate observations in several classrooms as the basis for intensive, guided reflective work, aimed at supporting students' initial and subsequent efforts of developing identities as disciplinary content educators (25 hours of high school classroom observation required).

SEC 325
LITERACY IN THE CONTENT AREAS
Undergraduate
The course explores the interrelationships between reading, writing, and other forms of communication (e.g., classroom talk, technology, visual arts) that are available to content area middle-level and high-school teachers. There will be an emphasis on the interrelationship of all aspects of language, oral and written, that result in literacy as a meaning-making tool in the construction of content-area knowledge. The course will discuss specific aspects of literacy processes from a multicultural, multilingual perspective as they apply to a variety of school settings in general and urban schools in particular. Students will become acquainted with theoretical issues as well as a wide range of literacy-teaching strategies including reading, writing, research, and study skills to be tailored to the needs of different students and to be applied across a variety of learning situations and text types.

SEC 326
TEACHING WRITING
Undergraduate
This course prepares teacher candidates for teaching writing and composition at the middle and secondary school levels. The course focuses upon methods of teaching composition, examination of literature and research about the composing process, the development of language and reading skills, and the assessment and evaluation of writing. The development of writing curriculums will also be explored.

SEC 328
TEACHING LITERATURE
Undergraduate
This course prepares teacher candidates for teaching literature at the middle and secondary school levels. Examines contemporary issues in the teaching of literature, explores methods of teaching major literary genres, addresses problems of literacy and focuses on the transactional nature of reading and writing. Emphasis on developing a repertoire of ways of teaching literature and a variety of literature curriculums.

SEC 329
TEACHING YOUNG ADULTS LITERATURE
Undergraduate
This course is devoted to the study of Young Adult Literature: an exciting, emerging genre of literature. Issues and ideas to be examined include the following: current debates regarding issues in curriculum and teaching; selecting, reading, evaluating, and teaching young adult literature; cultivation of life-long reading habits and literacy development. Students will become familiar with major writers of young adult literature, read diverse texts, explore major genres, review award winning novels, consider the role of the media, and develop creative projects.

SEC 339
TEACHING SCIENCE IN THE SECONDARY SCHOOL
Undergraduate
This course is designed to update teachers in the methods of teaching science. This involves reviewing the processes of science, theories of learning, and instructional strategies appropriate to laboratory science. This course also provides an update on the current trends and issues in science education as well as an analysis of successful science curricula programs. PREREQUISITE(S): SEC 364 or equivalent.
SEC 363
ORIENTATION TO SECONDARY TEACHING AS A PROFESSION
Undergraduate
(6 credits) In this process-oriented course, students engage in critical reflection on the roles and expectations of secondary educators from both institutional and community perspectives. Questions considered will include: what is an educator, what is a professional, what are the attributes of effective teachers, what do effective teachers do? Students will examine their own values and begin to develop their own philosophies about education and teaching. Included in this course are 25-30 hours of clinical experiences at arranged sites.

SEC 364
METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
Undergraduate
(6 credits) This course will examine materials, methods, and techniques appropriate for teaching in secondary schools. Topics include: educational goals; the development of a rationale and underlying assumptions; instructional goals and objectives; learning objectives; both cognitive and affective; classroom environment; classroom management principles and techniques; multicultural materials in various content areas; the development of appropriate methods and materials; current curriculum issues and controversies. Included in this course are 25-30 hours of clinical experiences at arranged sites. PREREQUISITE(S): SEC 363 or permission.

SEC 365
ART AND PEDAGOGY
Undergraduate
This course surveys the trajectory of visual thoughts and explores strategies in alternative as well as, mainstream routes of production and distribution exercised by artists, arts educators, citizens, and visualists, through the use and presentation of documents, writings, and works. SEC 365 examines the visual arts and culture in and outside of spaces where learning occurs and locates methodologies of implementing visual arts teaching effectiveness when evident intersections secure the promises of new pedagogical practices. This course presents an overview of the social, historical, cultural, and political influences of visual culture on the proximity of the arts and education, seeking to negotiate the roles and interpretations of visual culture as language, information, curriculum, activism, design, and production within the context of multiple working environments.

SEC 366
TEACHER AS ARTIST
Undergraduate
This course, which is the second in a two-part sequence, builds on the strategies, projects, and understanding of SEC 365. SEC 366: Arts and Pedagogy sets up the conditions through an off site center to prepare work in collusion with youth of middle and high school age and explore the models in cooperation with other artists, art educators, and teachers throughout the community we select to work in. The focus and attention of this course is directed towards actual teaching, project facilitation, and authoring of developed projects and small programs that were initiated and designed in SEC 365.

SEC 384
CAPSTONE IN SECONDARY EDUCATION
Undergraduate
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific early childhood education. The course is grounded in the School of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program. COREQUISITE(S): SEC 390.

SEC 390
SECONDARY STUDENT TEACHING
Undergraduate
(12 credits) Five school days a week in supervised teaching in a cooperating school for a full academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. PREREQUISITE(S): Application and approval required. Open only to DePaul students.
SEC 399
INDEPENDENT STUDY IN SECONDARY EDUCATION
Undergraduate
(1-4 credits)  PREREQUISITE(S): Permission of instructor, program chair and associate dean.

SEV 611
RETURN DRIVEN STRATEGY
Graduate
This course provides a framework that will enable Kellstadt students to make a significant impact on the future of their organizations and their careers. The seminar course focuses on Return Driven Strategy including the 11 tenets of successful business strategy, leveraging genuine assets, significant forces of change and strategic valuation. This seminar will focus on a deep analysis of the strategies and successful value creation of great companies. Each student will participate in a team project to apply the strategy tenets of Return Driven Strategy to an organization. The seminar-driven course will include an executive seminar session for the morning session of the first day which will include executives attending the session for executive education. This course is led by Dr. Mark L. Frigo, Director of the Center for Strategy, Execution and Valuation.
ACC 500 and ACC 555 or instructor's consent is a prerequisite for this class.

SEV 621
STRATEGY EXECUTION
Graduate
The course examines strategic performance measurement, including the balanced scorecard and value-based management as frameworks for describing and executing strategy. The course will focus on the latest developments in Strategic Risk Management and the implications for strategy and performance measures. We will study how high performance companies measure and manage performance, strategic risk, and corporate sustainability performance, as well as the ethical dimension of strategy and execution. (This course is accepted as a core course the SEV Concentration and can be used as course in the Management Accounting and Financial Planning and Control Concentrations).
ACC 500 and ACC 555 or instructor's consent is a prerequisite for this class.

SEV 641
STRATEGIC VALUATION
Graduate
This course surveys valuation methods, forecasting techniques, and practical methods for driving valuations from strategic corporate analysis. The course shows the link between strategic analysis and valuations - converting our qualitative understanding of company initiatives into quantitative forecasts and valuation models. The guiding principles for developing valuation models, and the tools and techniques for enhancing that analysis are introduced. This course builds a skillset for evaluating other valuation models and a first-hand experience in building models for various companies in differing settings. The course differs from traditional treatments in its focus on the actual building of valuation models directly from financial statements and the valuation projects based on real-time data. This course is co-designed and co-taught by Dr. Mark L. Frigo, and Joel C. Litman, Clinical Professor of Business Strategy at DePaul's Kellstadt Graduate School of Business. They have been combining their efforts in the research, study, and development of business strategy models and frameworks for execution and value-creation and have assisted a wide range of public and private companies in the application of these concepts.
FIN 555, SEV 611 and SEV 621 or instructor permission are a prerequisite for this class.

SNC 185
THE BEATLES AND THE CREATIVE PROCESS
Undergraduate
The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition. Arts and Literature.
SNC 186
SPIRITUALITY AND HOMELESSNESS
Undergraduate
This course will examine the broad issue of homelessness by providing students the opportunity to reflect upon a service learning experience at a community-based organization that serves the homeless population in Chicago. Students will explore what can be learned about themselves as reflective practitioners, service learners, and spiritual human beings when reflecting upon this experiential learning process. Through the class discussions, assigned readings, invited speakers, and journal assignments, students will reflect on their own beliefs and perceptions of homelessness and analyze the history, causes, and policy associated with this societal problem. Faculty: Karl Nass Junior Year Experiential Learning.

SNC 187
RACE AND IDENTITY IN THE AMERICAN THEATER
Undergraduate
This course will explore issues of race and racial identity in American society through the medium of theater. Texts will include several of the following: “Blues for an Alabama Sky,” a Civil War retelling of the Oedipus story; “Twilight, Los Angeles, 1992,” Anna Deveare’s performance piece based on the Rodney King riots; “The Story,” Tracy Scott’s play about the pressures on a young black journalist to climb the media ladder; “Spinning Into Butter,” Rebecca Gilman’s provocative play about racial harassment on a college campus; Lorraine Hansberry’s classic “A Raisin in the Sun;” Thomas Gibbons’ “Personal Collection,” which deals with the issue of appropriation of cultural heritage; and one of the ten plays from August Wilson’s epic cycle. The class will also view a play on these themes at a Chicago theater. Faculty: Fred Wellisch Arts and Literature.

SNC 188
PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS
Undergraduate
An introduction to moral philosophy with emphasis on the conflict between “moral relativism” (or “subjective” ethics) on the one hand and “moral realism” (or “objective” ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world. Philosophical Inquiry.

SNC 189
CONTEMPORARY NATIVE AMERICAN/AMERICAN INDIAN ISSUES
Undergraduate
Native Americans are part of our history and heritage, yet many Americans have little knowledge beyond stereotypes. While invisible to the mainstream, Native American cultures are surviving, striving and in some cases, thriving as we enter the new millennium. This course will explore the complex issues facing Native Americans today through discussions, films, readings, experiential learning activities and Native American news media to enable students to gain a cross-cultural perspective. Students will choose an area of focus on this subject and conduct independent research to present to their classmates. Faculty: Arieahn Matamonasa Self, Society and the Modern World.

SNC 190
AFRICAN-AMERICAN STUDIES IN CRITICAL PERSPECTIVE
Undergraduate
This course is important for students who seek to gain a comprehensive understanding of African-American history in the United States. It will begin with discussions of African culture, the Atlantic Slave Trade, and early forms of slavery/indenturing. It will pay particular attention to the colonial and Revolutionary experience, delving into the mass exodus of Africans during the Revolutionary War, and African-American’s role and position in the country’s formative years. Enslavement, the Civil War and Reconstruction will follow as key areas of study. In every discussion, students will be asked to look for parallels between the contemporary and 18th and 19th century African-American experience and, where appropriate, to identify key social and cultural thinkers and leaders of the various historical periods. The primary texts for the course will be John Hope Franklin’s ‘From Slavery to Freedom,’ articles and readings written by scholars and important early African-American artists and intellectuals, and video presentations. Faculty: Nancy Davis Understanding the Past.

SNC 191
ISSUES IN SCIENCE AND RELIGION
Undergraduate
This course develops students’ understandings of the scientific and religious constructions of self in the modern world (natural and social). The institutions and bodies of knowledge comprising science, religion, and their overlap are critically analyzed. Key historic debates are examined, for example: the Vatican’s trial of Galileo for his teachings of a heliocentric universe; the controversial reception of Darwin’s theory of evolution; and the 2001 U.S. policy on embryonic stem cell research. Through such analyses, the course develops students’ skills in making ethically-informed decisions and thus recognizing their roles in the public debates involving the intersection of science and religion. Faculty: Rev. Joseph McCann CM PhD Self, Society and the Modern World.
SNC 192
NEW ORLEANS IN SONG, STORY & STRUGGLE
Undergraduate
The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry: music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, r&b, zydeco and funk. We will situate these art forms in social and historical context and examine the complex creative processes which have shaped them. We will become familiar with innovators and icons such as Louis Armstrong, Professor Longhair, Clifton Chenier, the Neville Brothers and Dr. John. We will also read works by literary artists who have a background in and/or fascination with New Orleans, including The Awakening by Kate Chopin; A Streetcar Named Desire by Tennessee Williams; and Mumbo Jumbo by Ishmael Reed. Moreover, we will consider the role played in American history and imagination by New Orleans as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level. Faculty: John Kimsey Arts and Literature.

SNC 193
THE SCIENCE OF SEXUAL ORIENTATION
Undergraduate
This course will engage you in scientific inquiry on the nature of sexual orientation. You will be challenged to master the scientific content of leading programs of research on twins, brain and other anatomical structures, hormones, genetic linkages, birth-order, and animal behavior through assigned readings, lectures, and multimedia resources. Moreover, you will also engage in the scientific process through a collaborative research project concerning an aspect of sexual orientation that leads you through the steps of stating a question, designing a study, collecting and analyzing data, and interpreting the results. You will also develop skills in identifying the limits to particular forms of scientific inquiry by recognizing the constraints of methods, sources of bias, reliability of results, and certainty of conclusions. This course will encourage you to place the modern research within ethical and social contexts in which to make judgments about the potential relevance and impacts of scientific knowledge about sexual orientation. Scientific Inquiry [SI] LSP 120 is a prerequisite for this class.

SOC 101
INTRODUCTION TO SOCIOLOGY
Undergraduate
Introduction to the language, theories, methods, and research findings of the sociologist at work.

SOC 105
SOCIAL PROBLEMS
Undergraduate
Examination of important societal problems and issues with attention to their causes, their impact, and the possibility of resolution. The course considers the role of social movements, government and the private sector.

SOC 200
SOCIAL WORK AND SOCIAL WELFARE
Undergraduate
The nature of social work with a focus on the delivery of a variety of human services like health care and welfare; emphasis on professional-client relationships; examination of government agencies and voluntary associations.

SOC 203
RACE AND ETHNIC RELATIONS
Undergraduate
Interpretation and understanding of relationships between religious, ethnic and racial groups. The course emphasizes racial conflict and its resolution as well as the need to eradicate racism.

SOC 204
THE IMMIGRANT EXPERIENCE
Undergraduate
This course deals with the immigrant experience in the United States examining immigration and its effects on both this immigrants and the larger society, from the earliest days of this nation to the present. Students consider the demographic aspects of immigration, patterns of societal inclusion and exclusion, institution building, existential issues, cultural issues, economic issues, legal issues, educational issues, political issues and the nature of multiculturalism in the U.S.
SOC 205
SELF AND SOCIETY
Undergraduate
The course examines the relationship between individuals and the social and cultural environment. It introduces theories of the self and society (psychoanalytic theories, Weberian perspectives, symbolic interaction and social construction, feminist theories, existential perspectives, etc.). Readings include field studies and case studies. Students are introduced to research methods such as life narrative analysis and observation.

SOC 206
WORK AND SOCIETY
Undergraduate
Examines the job market, the impact of work on individuals and the nature of different kinds of work, including professions and jobs in bureaucracies and business.

SOC 207
YOUTH AND SOCIETY
Undergraduate
Using an historical and cross-cultural perspective, this course examines the social position of youth in today’s society; youth subcultures; key institutions within which youth are socialized and controlled.

SOC 101 or SOC 105 is a prerequisite for this class.

SOC 208
LAW AND SOCIETY
Undergraduate
Examines the legal system in its social contexts; considers its moral and social roots, its continuity and contradictions, and its ability to deliver justice. Draws upon cross-national comparison.

SOC 209
SOCIOLOGY OF WOMEN
Undergraduate
Cross-cultural analysis of women's roles. How various social institutions the media, work, the family, education, religion treat sex-role distinctions and how the women's movement is attempting to confront them.

SOC 210
THE COMPUTERIZED SOCIETY
Undergraduate
Examines the impact of computers and automation on society and the nature of technological change, with a focus on new electronic technologies and computers. Special attention is given to the nature of careers in computer science and emerging social issues and problems.

SOC 211
GENDER AND SOCIETY
Undergraduate
A consideration of the development of sex roles, gender identity and sexual behavior in a social context; how gender roles are shaped by families, youth culture, and the life cycle.

SOC 212
COMMUNITY AND SOCIETY
Undergraduate
An analysis of neighborhoods, cities, suburbs and utopian communities; the examination of major trends in urbanization and the evaluation of urban and community policies.
SOC 213
BLACK AMERICAN MUSIC CULTURE: TRADITIONS AND INNOVATIONS
Undergraduate
Study in African American culture that deals with the experience of music and musicians. Using some historical references with live contemporary illustrations the course will essentially examine the engagement of African American music/musicians in their community and in the larger multicultural American society.

SOC 214
POLICE AND THE URBAN COMMUNITY
Undergraduate
The nature of police work, decision-making structures and processes, conflict and cooperation in police-community relationships.

SOC 217
THE WORLD OF WORK
Undergraduate
An examination of work from an international perspective. Special emphasis will be placed on work in a global economy, the rise of new labor forces in developing nations and changing labor forces in post modern economies.

SOC 220
THEORIES OF CRIME AND DELINQUENCY
Undergraduate
Analysis of theories of causes and control of crime and juvenile delinquency; examination of delinquency subcultures, and the distribution of crime and juvenile delinquency.

SOC 221
INTRODUCTION TO THE U.S HEALTH CARE SYSTEM
Undergraduate
Examination of occupations and organizations in the U.S. health care system. Topics include: quality, access, and cost of health services; occupations and organizations involved in delivering health care; financing of care through health insurance and government programs. Recommended gateway course for all students in Health and Health Services concentration.

SOC 222
HEALTH AND INTERNATIONAL HEALTH CARE SYSTEMS
Undergraduate
Addresses the variation in health care delivery arrangements across countries by examining the health care systems from a socio-cultural perspective. Exploring why and when countries began building their health care systems, and what underlying values are reflected in those institutional arrangements.

SOC 223
SOCIOLOGY OF HEALTH AND ILLNESS [FORMERLY SOC 350]
Undergraduate
Examines how illness is related to sociological phenomena such as the social class of the patient or the organization of the health care delivery system. Formerly SOC 350.

SOC 224
INTRODUCTION TO STATISTICAL REASONING
Undergraduate
Introduction to statistics including data description and statistical inference used in many scientific fields of knowledge. Introduces students to computers in statistical analysis with examples drawn from social and natural sciences.

SOC 230
SEX AND GENDER IN THE CITY
Undergraduate
Examines the role of sex, sexuality, and gender in urban life, their interaction in urban spaces, and the formation of related private and public social policies.
SOC 231
RACE AND ETHNICITY IN THE CITY
Undergraduate
The social and cultural importance of urban ethnic communities and their interrelationships are investigated through a study of neighborhood development and change. Special emphasis on the major ethnic communities of Chicago.

SOC 232
GLOBAL CITIES
Undergraduate
National and international comparisons of urbanization and urbanism as a way of life in world cities, regional/satellite cities, and cities of production and distribution. Focus on the impact of power and resources on city life throughout the world.

SOC 233
SOCIOLOGY OF SPORT
Undergraduate
This course examines sports as a societal microcosm and as an idealized world for both individuals and institutions. Sport is also viewed as a major element in the making of American mythology.

SOC 235
ADOLESCENT HEALTH
Undergraduate
Examination of social, political, geographic, and psychological forces affecting adolescent health in the U.S. Focus on occurrence, cause, and prevention of adolescent health risk behaviors, such as sexual behavior, violence, and substance use. Discussion of policy and community practice.

SOC 236
IMMIGRATION, HEALTH AND ILLNESS
Undergraduate
Examines linkage of immigration to health and illness, including health status of immigrants, differences in health outcomes in the host country and countries of origin, occupational health and injury patterns, eating habits, healing practices, and access to health care. Includes fieldwork and review of research findings.

SOC 245
URBAN SOCIOLOGY (FORMERLY SOC 345)
Undergraduate
Study of urban growth and its impact. Topics explored include metropolitan development and change, population density, diversity and migration, urban life styles, urban institutions and important societal trends. Local, national and cross-national cases are examined. (Formerly taught as SOC 345)

SOC 248
WHITE RACISM
Undergraduate
This seminar is an introduction to white studies and white racism. White racism is a set of socially organized attitudes, behaviors and beliefs about differences between Blacks and other groups of color in the United States. The focus is on how the color White is constituted as dominant in social life throughout the United States and Western Europe.

SOC 250
GROUP DIVERSITY
Undergraduate
Study of cultural identities, values, and interaction of diverse groups. Among the concepts explored will be race, ethnicity, religion, gender, social class, sexual orientation, ableism, and age. The material will draw upon all the social sciences as well as appropriate samples from the literature.

SOC 101 or SOC 105 is a prerequisite for this class.
SOC 253
SLAVERY AND RACIALIZATION
Undergraduate
Addresses both the coming of slavery in Western civilization and how the ideology of race is used to interpret historical events and situations. The course will consider how slavery created the formation of a racist color line.

SOC 254
ANCIENT GREECE AND ROME
Undergraduate
The course explores the society and culture of ancient Greece and Rome, including mythology, art, and social institutions. The impact of these cultures on contemporary popular culture and social thought is considered. Emphasis on primary materials.

SOC 256
SOCIAL CHANGE
Undergraduate
Examines changes in societies since 1800, including change in technology, culture, and social and political institutions. Topics include modernization, revolution and media. The course emphasizes comparative, global perspectives and use of primary sources.

SOC 271
INTRODUCTION TO DEMOGRAPHY
Undergraduate
An examination of important population related problems and issues facing nations today. Selected topics include comparative population policies and their societal implications, population control, mortality patterns, changing patterns of illness and epidemic disease, contemporary migration and refugee patterns and related national policies, and the societal responses to changing age structures.

SOC 279
INTRO STATS FOR THE SOCIAL SCIENCES
Undergraduate
Data description and interpretation; table construction; correlation, regression and ANOVA; introduction to multivariate analysis; statistical inference and hypothesis testing. Cross-listed with MAT 242.

MAT 100 or higher or placement by test is a prerequisite for this class.

SOC 280
MASS MEDIA AND CULTURE
Undergraduate
Analysis of the relations between modern society and the mass media such as TV, film, radio and the print media.

SOC 281
SOCIOLOGY OF ROCK MUSIC
Undergraduate
Rock music is studied as an object of culture, both as art and as mass culture. Attention is given to its creation, dissemination and appreciation.

SOC 282
ROCK JOURNALISM
Undergraduate
This course explores the wide variety of rock writings, from album and concert reviews to interviews with musicians. The functions served by the rock press will also be considered as part of the hype machine of the rock industry, as critical information for an audience whose knowledge of rock does not come from formal education.
SOC 290
SPECIAL TOPICS IN SOCIOLOGY
Undergraduate
In-depth examination of selected and timely social issues. Topics vary from quarter to quarter. Topics may be initiated by students.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 291
SPECIAL TOPICS IN SOCIOLOGY
Undergraduate
Two-credit-hour courses on special topics in Sociology.

SOC 292
COLLECTIVE ACTION
Undergraduate
The socio-legal implications of violent and nonviolent protest in bringing about social change. Emphases: social and historical causes that precipitate violence; court response to civil disobedience.

SOC 301
THE JUVENILE COURT SYSTEM: ITS OPERATIONS
Undergraduate
An introduction to the juvenile-court system. The interaction of police, judges and court officers. The role of discretion in disposition.
SOC 208 or SOC 220 or PSC 260 or BLW 201 is a prerequisite for this course.

SOC 304
SOCIAL DEVIATION (CROSS-LISTED AS SOC 468)
Undergraduate
Comparison of theories and conceptual frameworks about deviance. Analysis of deviant life styles and careers. Examination of societal efforts to control deviance.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 305
POWER, CONSTRUCTIONS OF DEVIANCE, AND SOCIAL CONTROL
Undergraduate
This course employs a variety of theoretical paradigms to examine social constructions of deviance and conformity. It pays close attention to the relationship of such behaviors to conventional values, institutions, power, and mechanisms of social control.

SOC 306
FAMILIES
Undergraduate
Ideas, theories and research on families. Topics include change and variety in family patterns, fertility and child rearing.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 307
SOCIOLOGY OF SUBSTANCE USE AND ABUSE
Undergraduate
Sociological perspectives on substance use and abuse, related high-risk behavior, drug traffic, community impact, and prevention and public policy.

SOC 308
CULTURE, COMMUNITY AND POLITICS
Undergraduate
Explores the cultures and forms of organization of various groups in the United States, including music, art, community politics, and social movements. Specific topics vary.
SOC 309  
SOCIOLOGY OF SEXUALITY  
Undergraduate  
Explores social construction of sex and sexuality, the intersection of gender, race, and sexuality, sexual orientations, and major issues in sexual politics, such as the gay/lesbian movement, discrimination, abortion, and sterilization.  
(SOC 101 or SOC 105) and SOC 209 are prerequisites for this course.

SOC 310  
CRITICAL PERSPECTIVES ON CRIMINAL JUSTICE  
Undergraduate  
In this course, students will explore the history and social meaning of "criminal justice" in the United States. Readings, reflections, and discussions will push students to examine the criminal justice system as a system of social control and will alert students to the raced and classed character of this system.

SOC 311  
SOCIOLOGY OF LATINO CULTURE  
Undergraduate  
Examination of major cultural expressions and practices among Latino groups in American society. The family unit, cultural identity, music, art, literature, language, film and youth gangs are among the topics discussed.

SOC 313  
SOCIOLOGY OF EDUCATION  
Undergraduate  
Examines the structure of schooling in the United States and other societies. Topics include: Schools as organizations; teaching as a profession; peer cultures in schools; racial/ethnic, class, and gender inequalities in education.

SOC 315  
LAW, POWER AND RESISTANCE  
Undergraduate  
In this course, students examine the law in its social context. Readings, reflections, and discussions will push students to explore the role of law both in the production and maintenance of inequality and in marginalized people's struggles for justice.  
SOC 208 or SOC 220 or PSC 260 or BLW 201 is a prerequisite for this course.

SOC 316  
STREET GANGS  
Undergraduate  
Examines the problems associated with street gangs and "troublesome youth groups" in the United States and Europe. Classical and contemporary theories of gang formation and proliferation are reviewed. Both quantitative and qualitative gang research efforts are studied. Street gang reduction policies and programs (national and local) are scrutinized. Emphasis is placed on the street gang's relationship with other organizations and social actors in the same "habitat."

SOC 220 is a prerequisite for this class.

SOC 317  
GENDER, CRIME AND JUSTICE  
Undergraduate  
In this course students explore the ways in which gender intersects with crime and justice in the U.S. and increasingly, globally. Using feminist and critical perspectives, this course interrogates the gendered and racial nature of the criminal justice system, examines the ways in which gender intersects with patterns of offending, victimization, survival, and resistance, and looks at the ways that criminal justice institutions and gender interact. It also asks students to think critically about alternatives to incarceration and other ways of establishing justice.
SOC 318
SOCIAL CHANGE IN THE DEVELOPING WORLD
Undergraduate
Examines various processes of social and cultural change, with particular focus on peoples undergoing or emerging from cultural, political or economic oppression.

SOC 321
HEALTH AND HUMAN SERVICE ORGANIZATIONS
Undergraduate
The work of health and human service organizations is examined; the origins of these organizations, their goals and the problems inherent in attaining the goals, are considered.

SOC 322
TREATMENT AND PREVENTION OF DELINQUENCY
Undergraduate
A review of traditional and current practices of programs designed to treat delinquents and prevent delinquency, with emphasis on the variety of available correctional facilities.

SOC 323
THE SOCIAL WELFARE INSTITUTION
Undergraduate
The evolution of social welfare as an urban institution and the creation of the welfare state are examined. An analysis of social welfare in the United States within the context of economic, political, social and philosophical developments.

SOC 326
AGING AND THE LIFE COURSE
Undergraduate
A look at the changing age composition of the population; meaning and societal definition of aging, the different types of responses to growing older and the various social programs designed for older people. Introduction to life course theories.

SOC 330
THEMES IN SOCIAL THOUGHT
Undergraduate
Consideration of the writings of social philosophers regarding the nature, origins and meanings of human society.

SOC 331
SOCILOGICAL THEORY
Undergraduate
Exploration of the nature of theory and an analysis of selected social theorists.

SOC 333
THE SOCIOLOGY OF SLAVERY
Undergraduate
This course examines and analyzes the institution of slavery in the United States from a sociological perspective. Important areas examined include the origins and functions of American slavery and racism, abolition, ideology and the idea of slavery and the origins of the African American class structure in the United States.

SOC 340
SOCIAL INEQUALITY
Undergraduate
Examination of inequalities in wealth and power and their consequences for individuals and the society; for example, the institutions of law, health care, education and politics.

SOC 101 or SOC 105 is a prerequisite for this class.
SOC 341
THE SOCIOLOGY OF OCCUPATIONS
Undergraduate
Analysis of the characteristics and problems of a wide range of occupations including the professions (recruitment, ethics, associations and sources of authority).

SOC 342
ORGANIZATIONAL DYNAMICS
Undergraduate
Examination of the structure and process of organizations in the public and private sectors, life in organizations and the interrelationship of individuals and organizations.

SOC 343
SOCIAL DIMENSIONS OF RELIGION (CROSS-LISTED WITH REL 221)
Undergraduate
Analysis of the interplay of society and religion, the clergy as an occupational group, and the relationship of religious ideology to social change.

SOC 344
POLITICAL SOCIOLOGY
Undergraduate
Social and economic bases of the political system in a comparative perspective.

SOC 346
URBAN ETHNOGRAPHY
Undergraduate
An introduction to field research in an urban environment.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 347
CLASS, POWER AND DECISION MAKING IN THE CITY
Undergraduate
Analysis of decision-making in urban settings. Considers the role of class disparities, power, citizen protest and community participation in urban outcomes.

SOC 348
THE CITY IN THE FUTURE
Undergraduate
Alternative views of urban structures and social life in the post-industrial age. Considerations of the implications of energy, different technologies, future shock and social trends.

SOC 351
HEALTH DISPARITIES
Undergraduate
Examination of persistent health disparities in the U.S. and the influence of social settings on morbidity and mortality, as well as the impact of social class, gender, and race/ethnicity on disease and illness patterns and access to health care.

SOC 353
SOCIOLOGY OF MENTAL ILLNESS
Undergraduate
Examines the social history of, and societal reaction to, the mentally ill. Review of contemporary social perspectives on mental illness and social research on mental hospital institutionalization; the dynamics of the therapist-patient relationship.
SOC 354
COMPARATIVE COMMUNITY POLITICS (CROSS-LISTED AS SOC 426 & MPS 574)
Undergraduate
The course examines a variety of areas affecting the social and political organization of communities in the U.S. and other countries. Important areas examined include social organization, the institutional and socioeconomic structure, urbanization, patterns of citizen participation and the social organization of political decision making.

SOC 355
CHICAGO AS A SOCIAL SYSTEM
Undergraduate
This course draws upon the rich tradition of sociological work carried out in Chicago to exemplify, illuminate, and integrate a variety of sociological concepts, theories and methodologies.

SOC 356
THE CITY IN CROSS-CULTURAL PERSPECTIVE
Undergraduate
This course examines the city as a type of human settlement, focusing on the different forms, functions, images and ideological perceptions of cities across a number of different cultures.

SOC 357
LATIN AMERICAN POLITICAL ECONOMY/SOCIETY
Undergraduate
A comprehensive view of the metropolitan and colonial origins and development of Latin America. Also provides an overview of major social and economic issues facing Latin America today, including balance of payment problems, inflation, stabilization, poverty, inequality, and land reform.

SOC 358
REVOLUTIONS AND PEASANT REBELLIONS
Undergraduate
Analyzes the most important revolutions and peasant rebellions of the twentieth century as well as the most relevant cases from previous periods, such as the French Revolution.

SOC 360
SOCIAL SERVICES IN CONTEMPORARY SOCIETY (CROSS-LISTED AS SOC 432)
Undergraduate
Social services and welfare programs as developed in contemporary industrial societies. Comparison between European social services and the American social services provides a basis for considering the implications of social policy.

SOC 365
HEALTH AND GLOBALIZATION
Undergraduate
Comparative approach to understanding changes in health and illness patterns, diet and consumption, and access to health care associated with economic expansion, global inequalities, and changes in local economies, occupations and cultures. Case studies of selected non-industrialized countries.

SOC 370
PEOPLE, PLACES, AND FOOD
Undergraduate
Exploration of community food resources and the relationship to chronic disease such as obesity, diabetes, and hypertension. Qualitative methods focus on meanings of eating habits and how people secure food. Analyzes barriers and supports for healthy eating habits in Chicago neighborhoods. Service-learning component.
SOC 372
HEALTH CARE SYSTEMS: A COMPARATIVE PERSPECTIVE
Undergraduate
Examines the variations in health care delivery systems across selected countries and analyzes social and cultural forces that influence these systems, with an emphasis on differences in health outcomes.

SOC 373
PUBLIC HEALTH AND HIGH RISK BEHAVIOR
Undergraduate
Explores problems in community and public health such as HIV/AIDS and injection drug use. Topics may vary.

SOC 380
RESEARCH METHODS IN SOCIOLOGY I
Undergraduate
The logic of procedures of social science methodology. Initiation of student research project: formulation of problem, design of research, data collection. Presentation of the range of methods available for various types of social research.

SOC 381
RESEARCH METHODS IN SOCIOLOGY II
Undergraduate
Continuation of the research project begun in Sociology 380. Data manipulation and analysis with the use of computers; interpretation, write-up, and synthesis of the research experience.

SOC 3279 and SOC 380 are prerequisites for this class.

SOC 382
QUALITATIVE METHODS
Undergraduate
Introduction to qualitative methods in sociology, grounded theory, data collection and analysis, field research, life histories, and unobtrusive measures.

SOC 383
VISUAL SOCIOLOGY
Undergraduate
Examines the history of the still photograph as a document of social problems and conditions, a cultural artifact with a linguistic structure of its own. Methodological issues involved in using photographs as research tools are studied. Students conduct own documentary research project.

SOC 384
ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
Undergraduate
This course imparts the art, craft, and discipline behind the making of sociological ethnographic documentary films. Throughout the course students learn ethnographic concepts and methods, develop film criticism faculties, and build a film production skill set.

SOC 385
THE SOCIAL SIGNIFICANCE OF BLACK MUSIC AND ENTERTAINMENT
Undergraduate
The course is a sociological interpretation of Afro-American culture by focusing on the social significance of black entertainment; the course draws attention to how entertainment has been used to make social commentary.

SOC 386
POPULAR CULTURE AND THE ARTS (CROSS-LISTED AS SOC 480)
Undergraduate
Multiple perspectives, from modern to post modern, are applied to a range of forms of popular culture, both in historical context and in their current forms. Topics to be covered include examining the concept of popular culture, the analytic tools to understand it, and analyzing some of its manifestations (e.g. sports, mass media, gambling, holiday presentations, shopping, theme parks, theme restaurants, etc.)
"Celebrities are known for being well-known." The course explores the role of media and fans in the making of celebrity and considers celebrity as a key feature of contemporary society.

Sociological perspectives on shopping, consumer culture, and social-psychology of consumer behavior.

Selected topics form the basis of an in-depth consideration. Topics vary and may be initiated by students.

Two-credit-hour course on special topics in Sociology.

Combines basic understanding of sociological principles with field experience.

A senior seminar course that enables students to conduct original research and integrate theory and methods. PREREQUISITE(S): Senior standing and SOC 331. Seniors are strongly encouraged to enroll in this course.

Senior standing and SOC 331 are a prerequisite for this class.

Foreign and domestic study tours with lectures and research by special arrangement with sponsoring programs

Placement of students in work-study situations relevant to careers in health and human services, social work, juvenile justice, law and society, urban and community services. Clinical and Experiential (can fulfill jr. yr. requirement). (1 to 4 credit hours).

Senior status and permission of the department chair are prerequisites for this course.
SOC 401
ADVANCED INTRODUCTION TO SOCIOLOGY
Graduate
A focused and intense introduction to the current state of the discipline of sociology: its basic concepts, theories, methodologies and research strategies. Students completing the course are expected to be able to engage successfully in the department's graduate program.

SOC 402
STATISTICS FOR THE SOCIAL SCIENCES
Graduate
Introduction to quantitative and statistical reasoning in the social sciences, quantitative data analysis, and computer software.

SOC 403
SOCIAL POLICY AND SOCIAL CHANGE
Graduate
Examines the process of policy-making and the effects of policies on individuals, organizations, and communities.

SOC 404
CLASSICAL AND MODERN THEORY
Graduate
Covers classical social theory (Marx, Durkheim, and Weber) and social theory through the 1960s.

SOC 405
SOCIOLOGICAL PERSPECTIVES
Graduate
Examines sociological theories, methods and concepts through a study of the work of contemporary sociologists.

SOC 411
SOCIAL RESEARCH
Graduate
This course focuses on the logic of sociological inquiry, ethical issues of research, the various methods social scientists use, and research in applied settings. For Sociology MA students only.

Status as a SOC Graduate student is a prerequisite for this class.

SOC 412
DATA ANALYSIS
Graduate
The implementation of a research project. Analytic techniques, data processing and the preparation of a written research report.

SOC 411 is a prerequisite for this class.

SOC 413
QUALITATIVE METHODS
Graduate
An examination of qualitative methods in sociology: data collection and analysis, field research, life histories, unobtrusive measures and visual methods employing video and film equipment are emphasized.

SOC 414
LITERATURE REVIEW WRITING PROJECT
Graduate
This course requires students to complete a paper reviewing the sociological literature on a topic of their choice. Successful completion of the literature review paper is one of the ways in which students may fulfill the final project requirement leading to the master's degree.
SOC 415
WRITING A RESEARCH PAPER
Graduate
This writing project is open to students who are working on their literature review, research papers, and thesis.

SOC 416
APPLIED ANTHROPOLOGY (CROSS-LISTED AS ANT 316)
Graduate
(Cross-listed as ANT 316)

SOC 417
ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
Graduate
This course imparts the art, craft, and discipline behind the making of sociological ethnographic documentary films. Throughout the course students learn ethnographic concepts and methods, develop film criticism faculties, and build a film production skill set.

SOC 418
DOCUMENTARY FILMS IN SOCIAL SCIENCES
Graduate
This course critically examines the history of documentary filmmaking and criticism in the social sciences and humanities. Students analyze documentary films created by social scientists and non-social scientists over the past 100 years.

SOC 420
URBAN SOCIOLOGY
Graduate
Introduction to advanced level studies in applied urban sociology: contemporary urban theory, research, and policy issues.

SOC 421
URBAN ANTHROPOLOGY
Graduate
Theories and methods of contemporary anthropology are employed to analyze a variety of topics of urban phenomena including the process of urbanization, urbanism-urban culture, subcultures, ethnic life styles—and the notion of images of cities.

SOC 422
URBAN AND COMMUNITY ANALYSIS
Graduate
Quantitative analysis of urban issues including social-area analysis, patterns of segregation, neighborhood change, and other selected topics.

SOC 423
RESEARCH ON URBAN CULTURES
Graduate
Ethnological approach to urban life stressing the qualitative analysis and evaluation of different types of urban communities, community organizations, and urban life styles.

SOC 424
THE SOCIOLOGY OF HOUSING
Graduate
An in-depth approach of a major component of urban life with a focus on federal and local policies, programs and issues.

SOC 425
STRATEGIES OF COMMUNITY ORGANIZATIONS
Graduate
Strategies and techniques used in the formation and process of community organizations.
SOC 426  
**URBAN DEVELOPMENT POLICIES**  
**Graduate**  
Community agencies viewed as problem-solving organizations. Concentration on the impact of state and local government on community organizations and how community organizations influence social policy. Sequel to SOC 425.

SOC 430  
**MEDICAL ANTHROPOLOGY (CROSS-LISTED AS SOC 319)**  
**Graduate**  
(Cross-listed as SOC 319)

SOC 431  
**SOCIOMETRY OF HEALTH, ILLNESS AND MEDICINE (CROSS-LISTED AS MPS 534)**  
**Graduate**  
Analysis of the social system of health care: practitioners, organizations, patients, and their multiple interrelationships. An evaluation of problems in health care delivery systems.

SOC 432  
**SOCIAL SERVICES IN CONTEMPORARY SOCIETIES (CROSS-LISTED AS SOC 323)**  
**Graduate**  
Analysis of the concept of welfare, evaluation of the social organization of welfare and the problems of welfare service systems. The interrelationships between welfare and the family, employment, health and crime are explored.

SOC 433  
**THE SOCIOLOGY OF EDUCATION**  
**Graduate**  
Analysis of educational organizations and their effects—including characteristics of institutional structures, teaching as an occupation, and the relationship between educational attainment and social mobility.

SOC 434  
**YOUTH SERVICES: HEALTH AND WELFARE**  
**Graduate**  
Review of research on various youth problems (e.g., substance abuse, pregnancy, runaways) and consideration of efforts at amelioration and control.

SOC 435  
**STRUCTURE OF HEALTH CARE ORGANIZATIONS**  
**Graduate**  
A case study approach emphasizing the interaction of the clinical, administrative, and other components of the health care team, the formulation of policy, and the control and distribution of resources.

SOC 436  
**YOUTH SERVICE DELIVERY SYSTEMS**  
**Graduate**  
Consideration of the current state of youth services in Illinois. Analysis of the administration of agencies and their programs: program design, the funding process, intervention strategies.

SOC 437  
**HEALTH CARE DELIVERY SYSTEMS (CROSS-LISTED AS MPS 537)**  
**Graduate**  
Consideration of the current state of health care delivery in the United States, the growth and projected direction of health care in the future. Implications of national policy on local delivery; cross-national comparisons and economic conditions will be considered.
SOC 438
SOCIOLOGY OF SUBSTANCE USE & ABUSE
Graduate
Sociological perspectives on substance use and abuse, related high-risk behavior, drug traffic, community impact, and prevention and public policy.

SOC 440
LAW AND SOCIAL SCIENCE
Graduate
Analysis of the American legal system as an instrument of social control, social change, and social reform. The impact of social science research on public policy decisions.

SOC 441
PUBLIC HEALTH AND HIGH RISK BEHAVIOR
Graduate
This course brings sociological theory, concepts, and methods to bear on HIV/AIDS, hepatitis B and C (HBV, HCV), and other adverse health outcomes prevalent among injection drug users (IDUs), men who have sex with men (MSM), and “high risk heterosexuals” (HRHs).

SOC 442
CRIMINAL JUSTICE: HISTORY, THEORY, AND ANALYSIS
Graduate
Study of major criminological theories and their application to systems of corrections. Present trends at federal, state, city and private correctional institutions.

SOC 443
LAW AND ADMINISTRATION OF JUSTICE
Graduate
Analysis of legal systems and their implementation; jurisprudence and its role in the development and change of legal systems; role of the courts and the police as related to community social problems.

SOC 444
POLICING INEQUALITY
Graduate
Examination of the policies and practices of law enforcement agencies and personnel and their impact on the communities they serve.

SOC 445
TRAFFIC: THE SOCIAL ORGANIZATION OF CHICAGO’S ILLEIICIT DRUG ECONOMY
Graduate
This course examines the social organization of Chicago’s illicit drug trade and attempts to make appropriate and judicious research-based generalizations to economies, cultures, and societies outside of the city.

SOC 446
LAW ENFORCEMENT POLICY ISSUES
Graduate
Examines the development, implementation, and evolution of formal and informal policies and procedures governing police agencies, correctional facilities, probation and parole systems, and the courts. Policy enactment on the “front lines” of law enforcement bureaucracies is emphasized.

SOC 447
SOCIAL CONTROL AND SOCIAL DEVIANCE
Graduate
Examines theories and research on the social organization of institutions that label and process deviants.
SOC 448
STREET GANGS
Graduate
Examines the problems associated with street gangs and "troublesome youth groups" in the United States and Europe. Classical and contemporary theories of gang formation and proliferation are reviewed. Both quantitative and qualitative research on gangs are studied. Gang reduction policies and programs (national and local) are scrutinized. Emphasis is placed on the street gang’s relationship with other organizations and social actors in the same "habitat."

SOC 449
CRIMINAL ORGANIZATIONS
Graduate
The problem of organized crime in American society is examined. Both traditional and emerging groups are studied. The ethnic succession and alien conspiracy theories are reviewed. The importance of social structural influences for the development of criminal organizations is emphasized.

SOC 450
ADVANCED STATISTICS I (CROSS-LISTED AS PSY 410)
Graduate
Advanced Statistics I (cross-Listed As Psy 410)

SOC 451
HEALTH POLICY ANALYSIS: INTERNATIONAL PERSPECTIVES
Graduate
In this course, we will learn and discuss the foundations of international health policy analysis by engaging in health policy analysis. In an international comparative context, we will study the relationship between social organization, knowledge about health and illness, the development of health policies and the resulting health and illness outcomes.

SOC 452
MODERNITY, GLOBALIZATION AND SOCIAL THEORIES
Graduate
This course will review classical and contemporary sociological work in both modernity and globalization and will help students assess if that social theory still allows us to understand social reality or whether we need to create a new set of sociological propositions to understand our present and future.

SOC 455
CHILDHOOD, FAMILY, PUBLIC POLICY
Graduate
Examines contemporary public policy issues and relevant research concerning parenting, marriage, household structure, and family formation, with a focus on the U.S.

SOC 460
SOCIOLOGY OF THE FAMILY
Graduate
Examines demographic trends in this century, recent literature on women and men, wives and husbands, children and parents. Some comparative material is included.

SOC 461
SOCIOLOGY OF YOUTH
Graduate
Critical analysis of literature on nondelinquent youth; focus on the social contexts within which the transition to adulthood occurs.

SOC 462
SOCIALIZATION
Graduate
Perspectives on the individual's acquisition of patterns of behavior and culture in social groups.
SOC 463
SOCIAL PSYCHOLOGY
Graduate
The influence of group life on personality development, social interaction, and social behavior.

SOC 464
SOCIAL INEQUALITY AND STRATIFICATION
Graduate
An analysis of inequalities in power, wealth and prestige with an emphasis on the concept of social class, trends in social mobility, and relationships to current social topics such as housing, welfare and political participation.

SOC 465
RACE AND ETHNIC RELATIONS
Graduate
Theoretical perspectives on racial, ethnic, gender, sexual orientation and differentially abled groups emphasizing processes of group formation, patterns of prejudice and discrimination, and an evaluation of methods to reduce prejudice and discrimination.

SOC 466
SOCIOLOGY OF SOCIAL MOVEMENT
Graduate
Study of social trends, social movements, communications, and crowd behavior. Emphasis on processes of social change, includes examination of historical and cross-cultural case material.

SOC 467
ORGANIZATIONS
Graduate
The functioning, premises, and consequences of formal organizations will be considered using a variety of perspectives.

SOC 468
SOCIAL DEVIATION (CROSS-LISTED AS SOC 304)
Graduate
Research and theory in the sociology of deviant behavior, emphasis upon such topics as the labeling of deviants, the analysis of deviant careers, patterns of deviant socialization, and the roles of agents or agencies of social control.

SOC 469
SOCIOLOGY OF LIFE CYCLE
Graduate
A look at the changing age composition of the population; meaning and societal definition of aging, the different types of responses to growing older, and the various social programs designed for the aged.

SOC 470
GENDER AND SOCIETY (CROSS-LISTED AS MLS 447 & WMS 460)
Graduate
Theory and research on roles of men and women, sexual behavior and patterns of gender inequality.

SOC 471
SOCIOLOGY OF KNOWLEDGE
Graduate
An analysis of the social forms of knowledge and the social processes by which individuals acquire this knowledge. The institutional organization and social distribution of knowledge.
**SOC 472**  
**SOCIOLOGY OF RELIGION**  
Graduate  
An historical and contemporary analysis of the interrelationship between religion and society. Emphasis upon the sacred/secular and church-sect typologies, new religious movements and religion's contributions to societal values, beliefs and meaning systems.

**SOC 473**  
**THE DILEMMA OF THE MODERN AGE (CROSS-LISTED AS MLS 460)**  
Graduate  
(Cross-listed as MLS 460) The crisis of the individual's place in society and in the world itself-the dilemma of modernity-is exposed through social science, philosophy, literature, art, and music. The distinctive features of and responses to modern culture-individualism, alienation, and depersonalization-are examined through the multiple perspectives that form the modern mind.

**SOC 474**  
**POPULATION PROBLEMS (CROSS-LISTED AS SOC 271)**  
Graduate  
An examination of population related problems and issues facing nations today. Selected topics include comparative population policies and their societal implications, population control, mortality patterns, changing patterns of illness and epidemic disease, contemporary migration and refugee patterns and related national policies, and the societal responses to changing age structures.

**SOC 475**  
**SOCIOLOGY OF WORK (CROSS-LISTED AS MLS 443)**  
Graduate  
Examination of the nature, meaning and history of work and leisure in Western culture; and the relationship of work and leisure to issues associated with the contemporary concept of "quality of life".

**SOC 476**  
**WORK AND LEISURE IN THE FUTURE (CROSS-LISTED AS MLS 448)**  
Graduate  
(Cross-listed as MLS 448) There has been a great change in the meaning, form and value assigned to work and leisure in society. Many of these changes have come to be characterized as inevitable consequences of life in post-industrial society. This course: 1) speaks to identify the factors that are shaping the future of work and leisure and 2) will explore futuristic scenarios that challenge the position of "work as a central-life meaning."

**SOC 477**  
**SEX, SEXUALITY AND POLITICS**  
Graduate  
Focus on sexuality as one of the central organizing ideologies shaping the fabric of our social life. Topics covered include the medicalization of sex, sex and race, pornography, sex and globalization, and gay liberation movement, etc.

**SOC 479**  
**MEN, MASCULINITY AND POWER**  
Graduate  
This course reviews the development of men's studies and its connection with the development of women's studies. It examines the construction of masculinity and the issue concerning gender inequality.

**SOC 480**  
**POPULAR CULTURE AND THE ARTS (CROSS-LISTED AS SOC 386)**  
Graduate  
(Cross-listed as SOC 386) The course explores topics in popular culture and the arts from a sociological perspective. The focus includes specific arts (film, music, photography, etc), subcultures of artists and performers and the impact of the market on the arts and popular culture.
SOC 481
SELF AND SOCIETY
Graduate
This course examines sociological perspectives on self and society. In particular, the course will focus on the way that self and society are mediated through an analysis of small group interaction. Group interaction mediates individual action and social structure, therefore making the study of small group interaction generalizable to larger social patterns of organization.

SOC 487
SOCIOLOGY OF CELEBRITY
Graduate
"Celebrities are known for being well-known." The course explores the role of media and fans in the making of celebrity and considers celebrity as a key feature of contemporary society.

SOC 490
AFRICAN-AMERICAN CULTURE (CROSS-LISTED AS SCG 450/ LSE 450)
Graduate
(Cross-listed as SCG450/LSE450) Intended for teachers and students of society in order that they may examine the contributions of the African American community to American culture; gain a functional understanding of the social, economic and political development of blacks in America; gain an insight into problems created by racism and social construction of race.

SOC 491
AFRICAN-AMERICAN SOCIAL THOUGHT AND SOCIAL ACTION
Graduate
The course examines a unique African-American community-service tradition. This tradition embodied in a social thought perspective merges direct social action with intellectual ideas to improve conditions of America's black community. Contributions of social scientist and social activists will be used to demonstrate this perspective and to discuss sociology topics as community, race and social change.

SOC 492
ERADICATING WHITE RACISM
Graduate
This graduate seminar addresses key dimensions of the social construction Whiteness (how British, Jews, Irish, Italians, etc. became White) and how the consequence White racism (denial of opportunity to non-Whites) in the United States perpetuates a system of racialized inequality. The seminar is designed to prepare students for critical self-reflection, self-appraisal, and social change.

SOC 493
VISUAL SOCIOLOGY
Graduate
A sociological view of documents that record social reality. These documents primarily include photographs but can also include paintings and sculpture.

SOC 494
RACISM AND RESISTANCE
Graduate
In this course, although we will be particularly interested in the way White Supremacy is created and maintained in the post-civil rights era, we will ground our examination in the histories that created our present. We will end the course with a frank discussion of what can be done to resist racism and racial oppression in our own lives.

SOC 495
SPECIAL TOPICS IN SOCIOLOGY
Graduate
Special courses will be offered as students and faculty identify selected topics of common interest.
SO 498
INTERNSHIP
Graduate
Students may be placed with agencies where they will have the opportunity to participate in activities such as research and counseling. Credit may vary but is subject to the limit of eight quarter hours.

SO 499
INDEPENDENT STUDY
Graduate
Independent Study

SO 500
THESIS RESEARCH
Graduate
The thesis research should culminate in the acceptance of a thesis. Four quarter hours, one registration.

SO 510
MA PROJECT COMPLETION
Graduate
Students may register for this class if they are engaged in work on a writing project (thesis or MA project). Registration requires certification by the chair that the student is engaged in research or writing. The course does not apply to completion of an IN in a class. This course may be taken at most 3 times.

SO 601
ACTIVE STUDENT STATUS
Graduate
Registration in this course provides access to the library and other university facilities. There is no indication whether or not the student is working on the writing project. Non-credit. $40.00 fee.

SP 101
BASICS SPANISH I
Undergraduate
Listening to, speaking, reading and writing Spanish in a cultural context for the beginning student.

SP 102
BASICS SPANISH II
Undergraduate
Continued emphasis on the four skills in culturally authentic situations.

SP 103
BASICS SPANISH III
Undergraduate
Completion of the basic elements of the Spanish language, spoken as well as written, with due regard to the cultural context of Spanish expression.

SP 104
INTERMEDIATE SPANISH I
Undergraduate
Intensive practice in the use of Spanish through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills.
SPN 105
INTERMEDIATE SPANISH II
Undergraduate
Continuing practice in spoken and written Spanish and further development of reading and listening abilities in an authentic cultural context.

SPN 106
INTERMEDIATE SPANISH III
Undergraduate
Developing more fluency in speaking, understanding, reading and writing Spanish with a concomitant heightened awareness of the cultural dimensions of the Spanish language.

SPN 114
INTERMEDIATE SPANISH FOR HERITAGE SPEAKERS I
Undergraduate
The first quarter of a combined basic and intermediate sequence for home-background speakers of Spanish who have had little or no previous formal study of the language.

SPN 115
INTERMEDIATE SPANISH FOR HERITAGE SPEAKERS II
Undergraduate
The second quarter of a combined basic and intermediate sequence for home-background speakers of Spanish who have had little or no previous formal study of the language.

SPN 116
INTERMEDIATE SPANISH FOR HERITAGE SPEAKERS III
Undergraduate
The third quarter of a combined basic and intermediate sequence for home-background speakers of Spanish who have had little or no previous formal study of the language.

SPN 124
INTERMEDIATE SPANISH I: SERVICE LEARNING
Undergraduate
Intensive practice in the use of Spanish through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. Provides Experiential Learning credit through Community Based Service Learning: includes at least 25 hours of required work off-campus.

SPN 125
INTERMEDIATE SPANISH II: SERVICE LEARNING
Undergraduate
Continuing practice in spoken and written Spanish and further development of reading and listening abilities in an authentic cultural context. Provides Experiential Learning credit through Community Based Service Learning: includes at least 25 hours of required work off-campus.

SPN 126
INTERMEDIATE SPANISH III: SERVICE LEARNING
Undergraduate
Developing more fluency in speaking, understanding, reading and writing Spanish with a concomitant heightened awareness of the cultural dimensions of the Spanish language. Provides Experiential Learning credit through Community Based Service Learning: includes at least 25 hours of required work off-campus.

SPN 197
SPECIAL TOPICS IN SPANISH
Undergraduate
See schedule for current offerings.
SPN 198
STUDY ABROAD
Undergraduate
Variable credit.

SPN 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

SPN 201
ADVANCED GRAMMAR AND COMMUNICATION
Undergraduate
A systematic study and review of grammar points that typically cause difficulty for students of Spanish as a foreign language. Developing appropriate speech and writing through the study and discussion of films and various types of written documents within a cultural context.

SPN 202
ADVANCED COMPOSITION AND COMMUNICATION
Undergraduate
Continued study of grammar, speech and writing with emphasis on the development of an effective prose style.

SPN 203
ADVANCED CONVERSATION I
Undergraduate
Developing a more sophisticated spoken fluency; backup support provided through written texts and exercises.

SPN 204
ADVANCED CONVERSATION II
Undergraduate
Refinement of advanced speaking skills.

SPN 205
ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS I
Undergraduate
For native speakers of Spanish to be taken in lieu of 201.

SPN 206
ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS II
Undergraduate
For native speakers of Spanish to be taken in lieu of 202.

SPN 207
ADVANCED CONVERSATION FOR THE HERITAGE SPEAKER
Undergraduate
For Heritage Language Speakers of Spanish to be taken in lieu of 203 or 204.

SPN 220
INTRODUCTION TO LITERARY ANALYSIS IN SPANISH
Undergraduate
Introduction to the vocabulary and methods of literary criticism. Study of various genres and periods.
SPN 221
INTRODUCTION TO PENINSULAR CIVILIZATION
Undergraduate
Survey of cultural, social, intellectual, and political development of Spain.

SPN 242
INTRODUCTION TO SPANISH LINGUISTICS
Undergraduate
Introduction to sounds, structure, history, and dialects of Spanish. Strongly recommended for students planning to take SPN 352 “Spanish Phonology and Phoentics.”

SPN 251
SPANISH FOR THE MEDICAL PROFESSIONS
Undergraduate
Development of communication skills for medical professionals, as well as insurance and social service workers. Reviews structures of Spanish grammar essential to oral practice and idioms commonly needed by healthcare providers.

SPN 252
COMMERCIAL SPANISH I
Undergraduate
Provides business-oriented students with sufficient Spanish language skills to be able to conduct basic business activities in Spanish-speaking countries. Strongly recommended for students planning to take SPN 320 "Advanced Commercial Spanish".

SPN 254
SPANISH FOR LAW PROFESSIONALS
Undergraduate
The objective of this course is to provide vocabulary, idiomatic expressions, and cultural information for the specific needs of the professionals in the legal field.

SPN 297
SPECIAL TOPICS IN SPANISH
Undergraduate
See schedule for current offerings.

SPN 298
STUDY ABROAD
Undergraduate
Variable credit.

SPN 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

SPN 301
SPANISH LITERATURE I: MIDDLE AGES THROUGH THE GOLDEN AGE
Undergraduate
Middle Ages through the Golden Age.

SPN 302
SPANISH LITERATURE II: THE ENLIGHTENMENT TO THE PRESENT
Undergraduate
The Enlightenment to the present.
SPN 303
LATIN AMERICAN LITERATURE & CULTURE I
Undergraduate
From the discovery of America to Romanticism.

SPN 304
LATIN AMERICAN LITERATURE AND CULTURE II
Undergraduate
From Modernism to the present.

SPN 305
LATIN AMERICAN NOVEL
Undergraduate
Topics include: contemporary, testimonial novel.

SPN 306
HISPANIC LITERATURE OF THE CARIBBEAN
Undergraduate
Topics include Cuban, Puerto Rican, Dominican, Afro-Caribbean.

SPN 307
PENINSULAR CIVILIZATION
Undergraduate
Social, intellectual and artistic background of Spain.

SPN 308
MEDIEVAL SPANISH LITERATURE
Undergraduate
El Cid, La Celestina, El Conde Lucanor, Libro de Buen Amor.

SPN 309
SPANISH BALLAD
Undergraduate
Origins, kinds, readings and interpretations.

SPN 310
THE GOLDEN AGE
Undergraduate
Topics include: Lyric poetry, theater.

SPN 311
CERVANTES
Undergraduate
This course focuses on Miguel de Cervantes's Don Quijote. It examines how this "first modern novel" responds critically to developments in Renaissance literature, religious and political thinking, and theories of fictional and non-fictional representation.

SPN 312
THE SPANISH NOVEL
Undergraduate
Topics include: the picaresque novel; 19th-century novel; 20th-century novel.
SPN 313
THE GENERATION OF 1898
Undergraduate
Azorin, Baroja, Ganivet, Machado, Unamuno, Valle-Inclan.

SPN 314
CONTEMPORARY HISPANIC LITERATURE
Undergraduate
Topics include: the literature of Spain; Spanish-American literature.

SPN 315
MEXICAN LITERATURE
Undergraduate
Representative texts from different periods and genres.

SPN 316
THE HISPANIC ESSAY
Undergraduate
Topics include: essay of Spain; Spanish-American essay; 19th-century; 20th-century; 21st-century essay.

SPN 317
THE HISPANIC SHORT STORY
Undergraduate
Topics include: short story in Spain; Latin American short story: Mexican, South American, Central American.

SPN 318
THE HISPANIC THEATER
Undergraduate
Topics include: Peninsular drama, Latin American drama, Hispanic theater of the United States.

SPN 319
CONTEMPORARY POETRY
Undergraduate
Topics include: the poetry of Spain, the Generation of 1927, Latin American poetry, Latino poetry.

SPN 320
COMMERCIAL SPANISH II
Undergraduate
Advanced preparation for the use of Spanish in the business world.

SPN 321
U.S. LATINO/A WRITERS
Undergraduate
Topics include Chicano literature, Puerto Rican literature, the literature of exile.

SPN 322
HISPANIC WOMEN WRITERS
Undergraduate
Topics include: Latina, Latin American, and Peninsular writers.
SPN 323
REVOLUTION IN LATIN AMERICAN LITERATURE
Undergraduate
Topics include: The Mexican Revolution, the Cuban Revolution, Revolutions in Central America, and a Survey of Revolutionary Movements.

SPN 324
THE BIRTH OF THE NOVEL IN SPAIN
Undergraduate
Prose fiction from the romances of chivalry to Cervantes.

SPN 325
TRANSLATION AND INTERPRETATION
Undergraduate
Perspectives on Hispanic business through readings and translations. Court interpretation/instantaneous translation.

SPN 326
SPANISH STYLISTICS
Undergraduate
An advanced writing class requiring the writing of numerous texts of differing length and purpose. Includes the examination of rhetorical strategies and the contextual registers of language in order to develop a more effective prose style.  SPN 106/SPN 116 or equivalent, and SPN 201-203 or SPN 205-207, recommended.

SPN 327
AREA STUDIES IN LATIN AMERICAN LITERATURE
Undergraduate
Topics include: Central America, the Andean region, and the Southern Cone.

SPN 328
MODERN LATIN AMERICAN THEATRE
Undergraduate
Study of representative drama from the "revolutionary" period in modern Latin American theatre, 1960s-1970s.

SPN 329
LATINO GAY AND LESBIAN LITERATURE
Undergraduate
Representative texts of Latino and Hispanic gay and lesbian authors.

SPN 330
LATIN AMERICAN AND SPANISH CINEMA
Undergraduate
Survey of film directors and their works in Spain and Latin America.

SPN 331
FILM AS A SUBVERSIVE ART
Undergraduate
Decoding literature through films based on literary works by Garcia-Marquez, Fuentes, Lispector.

SPN 332
NINETEENTH CENTURY SPANISH NOVEL
Undergraduate
This course is based on the reading, discussion and critique of major representative works in the novel of Spain of the 19th century.
SPN 333
GOLDEN AGE THEATER
Undergraduate
Spanish theater of the seventeenth century, with a focus on the comedia, a new popular art form that appealed to audiences across social classes.

SPN 335
U.S. LATINA WRITERS
Undergraduate
Survey of literature by modern Latina women writers from the United States, focusing on the social, cultural and political development of Latinas and their affirmation and reaffirmation of identity through their literature in today's society.

SPN 339
THE GENERATION OF 1927
Undergraduate
This course examines the peninsular Spanish "Generation of 1927" in considerable depth with emphasis on the best known literary figure in the group, Federico Garcia Lorca.

SPN 340
SPANISH CREATIVE WRITING WORKSHOP
Undergraduate
Development of creative writing and analysis skills in a variety of genres, including poetry, short fiction, and theatre. Focus may vary according to the instructor.

SPN 351
SPANISH IN THE U.S.
Undergraduate
An introduction to the varieties of Spanish spoken in the U.S. Includes code-switching, language maintenance and language policy.

SPN 352
SPANISH PHONOLOGY AND PHONETICS
Undergraduate
An in-depth study of the language's sound system and intensive pronunciation practice.

SPN 370
LATIN AMERICAN CIVILIZATION
Undergraduate
Social, intellectual and artistic background of Latin America.

SPN 371
CULTURAL DIVERSITY AND LEGACIES THROUGH FILM
Undergraduate
Topics from Spain and Latin America.

SPN 372
LITERATURE OF THE DOMINICAN REPUBLIC
Undergraduate
This course examines the literary and cultural production of the Dominican Republic and how it explores or proposes (trans)Caribbean identities.

SPN 374
LITERATURE OF THE CONQUEST
Undergraduate
This course explores the early encounters between Europe and the Americas. Analysis of letters, reports, histories, and political tracts from European, Amerindian, and Mestizo sources.
SPN 375
LATIN AMERICAN LITERATURE FROM INDEPENDENCE TO MODERNISM
Undergraduate
General introduction to the most important literary movements in Hispanic American countries, beginning with the wars of independence from Spain until the last part of 19th century.

SPN 376
SOR JUANA INES DE LA CRUZ
Undergraduate
This advanced course in literature is dedicated to study Mexican writer Sor Juana Ines de la Cruz (1648-1695), the leading poet and intellectual figure of the Colonial Period.

SPN 377
PERUVIAN REALITIES IN A MULTICULTURAL SOCIETY: HISTORY, CULTURE, POLITICS, VIOLENCE & SOCIAL JUSTICE
Undergraduate
This interdisciplinary course will introduce students to the history, culture, politics, and general life of the peoples of Peru.

SPN 378
FOUNDATIONAL FICTIONS
Undergraduate
This course explores the relationship between national consolidation and romantic novels. It is based on the reading, discussion, and analysis of major representative “Foundational Fictions” in 19th-century Latin American Literature. SPN 220 highly recommended. SPN 106/SPN 116 or equivalent, and SPN 201-203 or SPN 205-207, recommended.

SPN 391
SOCIO LINGUISTICS OF HERITAGE LANGUAGE LITERACY
Undergraduate
This course explores the sociolinguistic issues related to gaining literacy in a heritage language, specifically, Spanish. This is a Junior Year Experiential Learning (JRYR) course, and as such requires 25 hours of service.

SPN 392
TRANSNATIONALISM AND SOCIAL JUSTICE
Undergraduate
This course explores the overarching theme of violence across different Latin American social realities.

SPN 393
LATINO MEDIA AND DIGITAL CULTURE LITERACY
Undergraduate
This course explores Latino media literacy from a local, national, transnational and bilingual perspective. This is a Junior Year Experiential Learning (JRYR) course, and as such requires 25 hours of service.

SPN 394
LATINO CULTURAL LITERACY AND COMMUNITY ENGAGEMENT
Undergraduate
This course explores local Chicago histories and institutions and their engagement in politics and advocacy for Latinos. This is a Junior Year Experiential Learning (JRYR) course, and as such requires 25 hours of service.

SPN 397
SPECIAL TOPICS IN SPANISH
Undergraduate
See schedule for current offerings.
SPN 398
STUDY ABROAD
Undergraduate
Variable credit.

SPN 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

SPN 401
SPANISH LITERATURE I: MIDDLE AGES THROUGH THE GOLDEN AGE
Graduate
Middle Ages through the Golden Age. Cross-listed with SPN 301.

SPN 402
SPANISH LITERATURE II: THE ENLIGHTENMENT TO THE PRESENT
Graduate
The Enlightenment to the present. Cross-listed with SPN 302.

SPN 403
LATIN AMERICAN LITERATURE & CULTURE I
Graduate
From the discovery of America to Romanticism. Cross-listed with SPN 303.

SPN 404
LATIN AMERICAN LITERATURE AND CULTURE II
Graduate
From Modernism to the present. Cross-listed with SPN 304.

SPN 405
LATIN AMERICAN NOVEL
Graduate
Topics include: contemporary, testimonial novel. Cross-listed with SPN 305.

SPN 406
HISPANIC LITERATURE OF THE CARIBBEAN
Graduate
Topics include Cuban, Puerto Rican, Dominican, Afro-Caribbean. Graduate standing required.

SPN 407
PENINSULAR CIVILIZATION
Graduate
Social, intellectual and artistic background of Spain. Cross-listed with SPN 307.

SPN 408
MEDIEVAL SPANISH LITERATURE
Graduate
El Cid, La Celestina, El Conde Lucanor, Libro de Buen Amor. Cross-listed with SPN 308.
SPN 409
SPANISH BALLAD
Graduate
Origins, kinds, readings and interpretations. Cross-listed with SPN 309.

SPN 410
THE GOLDEN AGE
Graduate
Topics include: Lyric poetry, theater. Cross-listed with SPN 310.

SPN 411
CERVANTES
Graduate
This course focuses on Miguel de Cervantes's Don Quijote. It examines how this "first modern novel" responds critically to developments in Renaissance literature, religious and political thinking, and theories of fictional and non-fictional representation.

SPN 412
THE SPANISH NOVEL
Graduate
Topics include: the picaresque novel; 19th-century novel; 20th-century novel. Cross-listed with SPN 312.

SPN 413
THE GENERATION OF 1898
Graduate
Azorin, Baroja, Ganivet, Machado, Unamuno, Valle-Inclan. Cross-listed with SPN 313.

SPN 414
CONTEMPORARY HISPANIC LITERATURE
Graduate
Topics include: the literature of Spain; Spanish-American literature. Cross-listed with SPN 314.

SPN 415
MEXICAN LITERATURE
Graduate
Representative texts from different periods and genres. Cross-listed with SPN 315.

SPN 416
THE HISPANIC ESSAY
Graduate
Topics include: essay of Spain; Spanish-American essay; 19th-century; 20th-century; 21st-century essay. Cross-listed with SPN 316.

SPN 417
THE HISPANIC SHORT STORY
Graduate
Topics include: short story in Spain; Latin American short story: Mexican, South American, Central American. Cross-listed with SPN 317.

SPN 418
THE HISPANIC THEATER
Graduate
Topics include: Peninsular drama, Latin American drama, Hispanic theater of the United States. Cross-listed with SPN 318.
SPN 419
CONTEMPORARY POETRY
Graduate
Topics include: the poetry of Spain, the Generation of 1927, Latin American poetry, Latino poetry. Cross-listed with SPN 319.

SPN 420
COMMERCIAL SPANISH II
Graduate
Advanced preparation for the use of Spanish in the business world. Cross-listed with SPN 320.

SPN 421
U.S. LATINO/A WRITERS
Graduate
Topics include Chicano literature, Puerto Rican literature, the literature of exile. Cross-listed with SPN 321.

SPN 422
HISPANIC WOMEN WRITERS
Graduate
Topics include: Latina, Latin American, and Peninsular writers. Cross-listed with SPN 322.

SPN 423
REVOLUTION IN LATIN AMERICAN LITERATURE
Graduate
Topics include: The Mexican Revolution, the Cuban Revolution, Revolutions in Central America, and a Survey of Revolutionary Movements. Cross-listed with SPN 323.

SPN 424
THE BIRTH OF THE NOVEL IN SPAIN
Graduate
Prose fiction from the romances of chivalry to Cervantes. Cross-listed with SPN 324.

SPN 425
TRANSLATION AND INTERPRETATION
Graduate
Perspectives on Hispanic business through readings and translations. Court interpretation/instantaneous translation. Cross-listed with SPN 325.

SPN 426
SPANISH STYLISTICS
Graduate
An advanced writing class requiring the writing of numerous texts of differing length and purpose. Includes the examination of rhetorical strategies and the contextual registers of language in order to develop a more effective prose style. Cross-listed with SPN 326.

SPN 427
AREA STUDIES IN LATIN AMERICAN LITERATURE
Graduate
Topics include: Central America, the Andean region, and the Southern Cone. Cross-listed with SPN 327.

SPN 428
MODERN LATIN AMERICAN THEATRE
Graduate
SPN 429
LATINO GAY AND LESBIAN LITERATURE
Graduate
Representative texts of Latino and Hispanic gay and lesbian authors. Cross-listed with SPN 329.

SPN 430
LATIN AMERICAN AND SPANISH CINEMA
Graduate

SPN 431
FILM AS A SUBVERSIVE ART
Graduate
Decoding literature through films based on literary works by Garcia-Marquez, Fuentes, Lispector. Cross-listed with SPN 331.

SPN 432
NINETEENTH-CENTURY SPANISH NOVEL
Graduate
This course is based on the reading, discussion and critique of major representative works in the novel of Spain of the 19th century.

SPN 433
GOLDEN AGE THEATER
Graduate
Spanish theater of the seventeenth century, with a focus on the comedia, a new popular art form that appealed to audiences across social classes. Cross-listed with SPN 333.

SPN 435
U.S. LATINA WRITERS
Graduate
Survey of literature by modern Latina women writers from the United States, focusing on the social, cultural and political development of Latinas and their affirmation and reaffirmation of identity through their literature in today's society. Cross-listed with SPN 335.

SPN 439
THE GENERATION OF 1927
Graduate
This course examines the peninsular Spanish "Generation of 1927" in considerable depth with emphasis on the best known literary figure in the group, Federico Garcia Lorca. Cross-listed with SPN 339.

SPN 440
SPANISH CREATIVE WRITING WORKSHOP
Graduate
Development of creative writing and analysis skills in a variety of genres, including poetry, short fiction, and theatre. Focus may vary according to the instructor. Cross-listed with SPN 340.

SPN 451
SPANISH IN THE U.S.
Graduate
An introduction to the varieties of Spanish spoken in the U.S. Includes code-switching, language maintenance and language policy.

SPN 452
SPANISH PHONOLOGY AND PHONETICS
Graduate
An in-depth study of the language's sound system and intensive pronunciation practice.
SPN 470
LATIN AMERICAN CIVILIZATION
Graduate
Social, intellectual and artistic background of Latin America. Cross-listed with SPN 370.

SPN 471
CULTURAL DIVERSITY AND LEGACIES THROUGH FILM
Graduate
Topics from Spain and Latin America. Cross-listed with SPN 371.

SPN 472
LITERATURE OF THE DOMINICAN REPUBLIC
Graduate
This course examines the literary and cultural production of the Dominican Republic and how it explores or proposes (trans)Caribbean identities. Cross-listed with SPN 372.

SPN 474
LITERATURE OF THE CONQUEST
Graduate
This course explores the early encounters between Europe and the Americas. Analysis of letters, reports, histories, and political tracts from European, Amerindian, and Mestizo sources. Cross-listed with SPN 374.

SPN 475
LATIN AMERICAN LITERATURE FROM INDEPENDENCE TO MODERNISM
Graduate
General introduction to the most important literary movements in Hispanic American countries, beginning with the wars of independence from Spain until the last part of 19th century. Cross-listed with SPN 375.

SPN 476
SOR JUANA INES DE LA CRUZ
Graduate
This advanced course in literature is dedicated to study Mexican writer Sor Juana Ines de la Cruz (1648-1695), the leading poet and intellectual figure of the Colonial Period. Cross-listed with SPN 376.

SPN 477
PERUVIAN REALITIES IN A MULTICULTURAL SOCIETY: HISTORY, CULTURE, POLITICS, VIOLENCE & SOCIAL JUSTICE
Graduate
This interdisciplinary course will introduce students to the history, culture, literature, politics, and general life of the peoples of Peru.

SPN 478
FOUNDATIONAL FICTIONS
Graduate
This course explores the relationship between national consolidation and romantic novels. It is based on the reading, discussion, and analysis of major representative "Foundational Fictions" in 19th-century Latin American Literature. Cross-listed with SPN 378.

SPN 497
SPECIAL TOPICS IN SPANISH
Graduate
See schedule for current offerings.

SPN 498
STUDY ABROAD
Graduate
Variable credit. Permission required.
SPN 499
INDEPENDENT STUDY
Graduate
Variable credit. Permission of chair and instructor required.

STEM 230
INTRODUCTION TO EARTH AND SPACE SCIENCE
Undergraduate
This course provides an overview of the dynamic geological nature of Earth, its place in the solar system and universe, and the fundamental Earth-sky-human relationship. The format of the course is lecture, discussion, laboratory activities, and student group presentations. The course content is aligned with the Illinois Earth and Space Science Content Area Standards for educators and thus also meets the needs of secondary education majors wishing to pass the Illinois state exam for certification in earth and space science. LSP 120 or HON 180 is recommended. formerly SDV 230.

STEM 231
INTRODUCTION TO EARTH AND SPACE SCIENCE (WITHOUT LAB)
Undergraduate
This course provides an overview of the dynamic geological nature of Earth, its place in the solar system and universe, and the fundamental Earth-sky-human relationship. Students will develop an understanding of 1) the processes that shape Earth’s surface and interior over geologic time, 2) the formation, evolution, and physical properties of the sun and its planets, asteroids, and comets, 3) the physical basis for phenomena such as eclipses, phases, and seasons, 4) the formation, evolution, and properties of stars, galaxies, and the universe, 5) the historical progression of human understanding of Earth’s geologic history and its place in space and time, and 6) the associated technologies that have enabled this progression. Students will encounter several historical examples that illustrate the provisional nature of science and the interaction of experiment, observation, and theory. The format of the course is lectures, discussions, laboratory activities, and student group presentations. formerly SDV 231.

STEM 240
SCIENCE AT THE EDGE OF SPACE
Undergraduate
Earth’s atmosphere and near-space environment play an increasingly important role in our lives in areas such as global warming, ozone depletion, and telecommunications. The upper atmosphere is also a starting point for human exploration of space beyond Earth. In addition to learning about Earth’s upper atmosphere and beyond, students will build simple scientific experiments and launch them on a weather balloon to an altitude of 100,000 feet. (Lab Fee) formerly SDV 240.

STEM 310
SCIENTIFIC MODELING
Undergraduate
Introduction to mathematical models used in scientific work: discrete dynamical systems, continuous models, stochastic models, Markov chains, and compartment models. Course is example-driven, with models being implemented on the computer. MAT 151 recommended. formerly SDV 310.

STEM 360
SCIENTIFIC DATA ANALYSIS I
Undergraduate
Descriptive methods of data analysis, probability models, statistical inferential procedures including regression and analysis of variance, especially as it relates to scientific data arising from observations and experiments. Includes the use of one or more computer statistical analysis packages. MAT 150 recommended. formerly SDV 360.

STEM 361
SCIENTIFIC DATA ANALYSIS II
Undergraduate
Advanced statistical and data-mining methods with science-related case studies. Topics include multiple regression, logistic regression, decision trees, and naive Bayesian classification. STEM 360 recommended. formerly SDV 361.
STEM 390
SENIOR CAPSTONE I
Undergraduate
Students will examine a scientific issue with historical or public policy significance from multiple points of view, ethical, social, as well as scientific. The topic will necessarily be one in which the interpretation and visualization of data plays a significant role in framing debate. Students will work individually or in small groups to create projects featuring the interplay of quantitative and non-quantitative approaches. STEM 361 recommended. Formerly SDV 390.

STEM 391
SENIOR CAPSTONE II
Undergraduate
Students work on a quarter-length project whose end product is either a detailed mathematical analysis or a visualization of several large scientific data sets. The project will integrate a few of the science topics done in SDV 390 with data analysis and visualization. Collaborations with researchers and organizations such as educational institutions and museums are especially encouraged. Formerly SDV 391.

STEM 399
INDEPENDENT STUDY
Undergraduate
Variable credit. Formerly SDV 399.

STEM 405
ECOLOGY FOR TEACHERS
Graduate
This course provides a broad survey of ecological principles through laboratory and field investigations appropriate in an urban setting. The course focus is on the use of local environments to promote awareness of and appreciation for the complexity, diversity and structure of the natural world while developing skills in hypothesis testing, experimental design and data analysis. Formerly SDV 405.

STEM 409
MATHEMATICAL METHODS FOR MIDDLE SCHOOL SCIENCE TEACHERS
Graduate
This course develops the mathematical methods that support the teaching of science at the middle school level: proportional reasoning, rates, exponents and scientific notation, graphing, and elementary modeling. The course incorporates the use of technology such as calculators and spreadsheets for scientific analysis.

STEM 410
TOPICS FOR TEACHERS
Graduate
Selected topics in science and science education. Formerly SDV 410.

STEM 411
FOUNDATIONS OF PHYSICAL SCIENCE I
Graduate
This course explores the nature of scientific inquiry, using a historical case study of the development of classical physics in the work of Copernicus, Brahe, Kepler, Galileo, and Newton. It explores the roles of observation, classification, experiments, theory, and mathematical models in science as well as the character of scientific change. Formerly SDV 411.

STEM 412
FOUNDATIONS OF PHYSICAL SCIENCE II
Graduate
Fundamental concepts of physics examined quantitatively: velocity, acceleration, surface area, volume, density. Elementary modeling for data analysis, including spreadsheets and data acquisition software. Scaling of physical quantities. Formerly SDV 412.
STEM 413
LIGHT AND WAVES
Graduate
Fundamentals of wave motion with application to light, water, and sound. Teachers are introduced to a variety of physical science topics in the curriculum as well as an example of the extraordinary unifying power of physics concepts such as waves. Formerly SDV 413.

STEM 420
CHEMISTRY FOR TEACHERS
Graduate
The structure and composition of matter. Physical and chemical change, examined from conceptual viewpoints which include atomic theory, stoichiometry, periodicity, bonding, equilibrium, thermodynamics and kinetics. Formerly SDV 420.

STEM 421
CELL BIOLOGY FOR TEACHERS
Graduate
This course focuses on the chemical and cellular nature of living organisms, cell structure and function, and heredity. Enzymes, the movement of materials across membranes, photosynthesis, respiration, cell division, and basic genetics. Formerly SDV 421.

STEM 422
EVOLUTION AND DIVERSITY FOR TEACHERS
Graduate
This course explores the subjects of biological evolution and species diversity. Topics covered include the history of our understandings of the origin and nature of species, mechanisms that produce evolutionary change, geographic variation and speciation, current theories and evidence of life's origin and the history of life on earth. Controversies in biological evolution, both scientific and cultural will be discussed. Formerly SDV 422.

STEM 423
PLANT AND ANIMAL BIOLOGY FOR TEACHERS
Graduate
This course focuses on the structure and function of living organisms. Students will investigate how different organisms solve common problems of food acquisition, digestion and the distribution of nutrients, waste removal, gas exchange, maintenance of homeostasis and reproduction. While this course examines the diversity of living forms, there is a special emphasis on the structure and function of the human body. Formerly SDV 423.

STEM 425
TOPICS IN LIFE SCIENCES FOR TEACHERS
Graduate
Diverse topics in Life Sciences appropriate for middle school and high school students. Offered occasionally. Formerly SDV 425.

STEM 430
ASTROBIOLOGY FOR TEACHERS
Graduate
Astrobiology focuses on basic questions such as: How does life of any kind begin and develop? Does life exist elsewhere in the universe? What are the environmental limits for life? What is the future of life on the earth and beyond? The course reviews the origin and evolution of life on Earth and goes on to examine the prospects of habitats capable of supporting life in our solar system, and the potential for planets and life to exist orbiting other stars. Students will work with NASA remote sensing data of the earth, the other planets, and their moons. Formerly SDV 430.

STEM 431
ASTRONOMY FOR TEACHERS
Graduate
This course emphasizes astronomy particularly relevant to the middle school science curriculum. The structure of the solar system, motion of the sun, phases of the moon, familiarity with the night sky, stellar structure and evolution, galaxies, and introduction to cosmology. Students will be familiarized with student reading materials particularly appropriate for the combined teaching of science and reading. Students will make observations and use sky simulation software. Formerly SDV 431.
STEM 432
GEOLOGY AND PLANETARY SCIENCE FOR TEACHERS
Graduate
Planetary formation and evolution. Plate tectonics and the rock cycle, including volcanism, planetary interiors, weathering, sedimentation, and metamorphism. Formerly SDV 432.

STEM 440
HEAT AND ENERGY FOR TEACHERS
Graduate
Concept of energy, its nature, forms, and transfer with applications to physical science and earth science. Definition of energy in terms of work, potential and kinetic energy, conservation of energy, thermal energy, solar energy, energy in earth systems. Formerly SDV 440.

STEM 441
WEATHER AND CLIMATE FOR TEACHERS
Graduate
Basic physical and chemical processes that shape weather and climate. Solar radiation and the seasons, composition and structure of the atmosphere, atmospheric processes, human effects, historical and contemporary climate change. This course emphasizes quantitative methods. Formerly SDV 441.

STEM 442
ENVIRONMENTAL SCIENCE FOR TEACHERS
Graduate
A general introduction to the scientific background of some of the most important environmental problems facing urban areas, the nation and the world. Population dynamics, water and energy resources, ecosystem degradation, extinction and the loss of biodiversity, and climate change. The course will include a field observation and experiment.

STEM 490
SCIENCE TEACHING CAPSTONE
Graduate
Teachers will further examine current research on how students at the middle school level learn science concepts and conduct an action research project involving science teaching. STEM 405, STEM 412, STEM 413 and six content courses recommended. Formerly SDV 490.

STEM 698
TOPICS FOR MATHEMATICS AND SCIENCE TEACHERS
Graduate
Diverse topics in teaching and learning of mathematics and science. These courses are designed for current and future teachers.

STEM 699
INDEPENDENT STUDY
Graduate
Variable credit. Formerly SDV 699.

SW 105
INTRODUCTION TO COMPUTER INFORMATION TECHNOLOGY
Undergraduate
In this course, students will learn about personal computing by exploring Windows Vista operating systems, including an introduction to common personal computer productivity applications software using MS Office 2007. Students will learn the basic, intermediate, and advanced level of MS Word, Excel, Power Point, and Access. They will also explore home networks and wireless systems, developing basic technical skills in designing, managing, and securing home networks. Truman Bridge Course. Competences: S3X, S1X, S5, FX. Faculty: Zaya Khananu. May be taken for a maximum of 3 competences.
SW 106
MIND, BRAIN, CONSCIOUSNESS: THE MIND AND BIOTECH REVOLUTION
Undergraduate
What is so special about the mind? Why is brain-death the death of the human? What is consciousness and how do we define it? Does artificial intelligence actually exist or is this a construct of the technologists? In this class, we will examine questions about the mind-body division, right brain-left brain distinctions, the differences between robots and humans, and how the brain processes information and sensory data. We will use both biotechnology research and artistic experience to explore these questions. Wright Bridge Course. Can be taken for up to 3 competences. Competences: S3A, S3F, A5, A2D, A2A. Faculty: Daniel Galemb and Polly Hoover

SW 121
INTERNET APPLICATIONS FOR SMALL BUSINESSES
Undergraduate
This course examines the design and development of web applications for small business. The course focuses on Internet technology to support consumer-oriented e-commerce, enterprise e-business solutions, and emerging business-to-business trading models. The topics will cover e-business models, internet marketing, online transactions ethical and social issues and internet security. Students will study different models for e-commerce applications and build a web application for small business using HTML, VB Script and Active Server Page. Competences: A3C, S1D, S3F, FX Faculty: Staff

SW 126
S5 / EXPERIENTIAL LEARNING EVALUATION: INFORMATION TECHNOLOGY
Undergraduate
S5 Information Technology. Can use contemporary information technology effectively.

SW 175
CAREGIVING AND WELLNESS
Undergraduate
Who takes care of the family caregiver? All of us at one time or another inevitably face the challenge of either being a caregiver for a child, sibling, partner or parent, supporting another family member in this role, or caring for ourselves. This human experience can be overwhelming and affects the caregiver’s mental, emotional, spiritual and physical well-being. It is well-documented that this role can result in an emotional toll. Although caregiving can be very rewarding, it can also be a difficult experience plagued with stress, fear, anxiety, depression and isolation. These factors add strain to all members of the family and can either threaten our health or compound an existing health condition. Students review the implications of being a caregiver, develop a plan, learn to recognize health-threatening symptoms, identify support systems and prepare to be proactive in finding solutions to remain healthy while they face any life challenge. This course also teaches students how to overcome obstacles and practice relaxation techniques. The final paper may consist of writing a personal health plan to maintain optimal health or a plan for how to remain a healthy family caregiver. Competences: S3B, H3F, FX. Faculty: Maria Ugarte-Ramos

SW 193
THE SCIENCE OF SEXUAL ORIENTATION
Undergraduate
This course will engage you in scientific inquiry on the nature of sexual orientation. You will be challenged to master the scientific content of leading programs of research on twins, brain and other anatomical structures, hormones, genetic linkages, birth-order, and animal behavior through assigned readings, lectures, and multimedia resources. Moreover, you will also engage in the scientific process through a collaborative research project concerning an aspect of sexual orientation that leads you through the steps of stating a question, designing a study, collecting and analyzing data, and interpreting the results. You will also develop skills in identifying the limits to particular forms of scientific inquiry by recognizing the constraints of methods, sources of bias, reliability of results, and certainty of conclusions. This course will encourage you to place the modern research within ethical and social contexts in which to make judgments about the potential relevance and impacts of scientific knowledge about sexual orientation. Competence:A3X, S2X, S3X. Faculty: Maria Ugarte-Ramos

SW 195
ELEMENTS OF ALGEBRA
Undergraduate
This course provides an introduction to use of algebra. Students will begin by exploring arithmetic and plane geometry skills including fractions, decimals, percentages, and metrics. When ready for algebra, the class will learn to manipulate equations. The emphasis will be placed on building confidence in solving everyday problems through algebra. Although the course will move to complex and simultaneous equations, the focus will remain on algebra basics and their applications. The first half of these courses meet at Truman College and the second half at DePaul's Loop Campus, and lasts up to 15 weeks. You may register for up to 2 competencies (L6 and one other comp). Competencies: L6, S2X, FX.
SW 201  WEB PAGE DESIGN  
Undergraduate  
With so many people jumping on the Web publishing bandwagon, you can easily feel like you’ve been let in the dust. Today, people are cranking out publications with worldwide distribution and impact as a result of Web publication software. This course is designed for Web page content creators and aims to give you the skills needed to build basic pages on the internet using Microsoft’s FrontPage 2000. FrontPage allows Web publishing without knowledge of HTML (the language used to create Web pages). FrontPage allows you to write and design your web site on your own computer and publish the final product to a distant server. Once your site is on the server, you can republish changes or you can open the site directly on the server for minor changes and updates. Competences: FX, S3X, S1D. Faculty: Michael Lightfoot

SW 202  WEB PAGE DEVELOPMENT AND DESIGN  
Undergraduate  
This course describes the tools and techniques needed to design a web site for personal and professional use. We will cover the fundamentals of web site design practices, HTML, forms, image creation and editing, and Javascript through lecture, discussion, lab and homework. Students will complete a series of exercises that lead toward building a functional web site using these tools and techniques. Successful completion of Exploring the Internet is required to register. Web access is also required. Competencies: F-X, S-1-D, S-1-X, A-2-C. Faculty: David Lash

SW 203  STATISTICS FOR USE  
Undergraduate  
This course is designed for students who for career-related activity or further academic (graduate) studies, need those quantitative and numerical skills beyond Practical Math. covered. *Some facility with algebra as evidenced by Practical Math and Applied Algebra or its equivalent is required. Topics will include the center and risk associated with financial data, identifying the trend and making predictions for economic and scientific data, measuring the likelihood of an occurrence in a game of chance, or even estimating a political candidates chances based on polls. Examples will be used to introduce and reinforce theory. The student will build confidence and learn to solve practical problems by using statistics. Competencies: F-X, H-1-X, S-2-X. Faculty: Staff.

SW 204  URBAN GROWTH AROUND THE GLOBE  
Undergraduate  
The earth sustains various kids of organisms, including those created for and by humans. Cities, their growth and decline, provide us with a rich source of information about history, society, population, and ecology. In short, the study of cities tells us who we are, where we have been, and where we are likely to go next. As we in the United States work to develop a global perspective, we need to include the assessment of city evolution across the world. Given our dependence upon global sources of energy and our position as world political leader, we need to be consciously aware of how cities across the world influence and are influenced by US economy and values. This course will analyze the interrelationships among population, the environment, and economics. Past, current, and potential future policies relative to these issues will be evaluated. Competences: H5, FX, S2X, S3X. Faculty: Mark Enenbach

SW 205  PRACTICAL ALGEBRA  
Undergraduate  
This course covers algebraic concepts and computational skills ranging from basic variable representation to solving equations and deriving/using advanced mathematical formulas to solve financial problems. The basic skills needed for comprehension will be reviewed as each new concept is introduced. Calculators will be used throughout the course. A scientific calculator with the "log" function is the most useful. Competences: S2X, FX. Faculty: John Hemmerling

SW 206  NUTRITION AND BIOLOGICAL DEVELOPMENT  
Undergraduate  
Today’s consumers want and need to be educated about taking charge of their own health. With the current fact-pace world that has spilled over into our eating habits, food choices have become unlimited. Choosing a healthful approach to diet requires basic information about our body's nutritional needs. The greater our understanding of our basic bodily needs, the better able we are to make choices concerning our health. This course will offer an overview of the basic science of nutrition, with an emphasis on the relationship between disease and nutrition, and current research findings. Competencies: S2A, S2C, S2D, S3B, S4. Faculty: Patricia Stifter
SW 207
PUBLIC HEALTH ISSUES IN AFRICA
Undergraduate
Public health issues have an impact on any ministry that a student might serve in. This course will build students’ capacities to understand the scientific information that explains public health issues such as HIV/AIDS, malaria and other infectious diseases. They will learn about health care practices and strategies that can be used to address public health issues, especially in the ministries that they will work in. They will examine cultural and gender dimensions of public health issues. Through this course, therefore, students will develop and demonstrate their competence to describe, categorize, and analyze the interactions and exchanges between living organisms and their physical environments and to assess health care practices based on an understanding of the biological and social factors that contribute to definitions of health. Competences: S2D, S3B.

SW 208
ISSUES IN SCIENCE AND RELIGION
Undergraduate
This course develops students’ understandings of the scientific and religious constructions of self in the modern world (natural and social). The institutions and bodies of knowledge comprising science, religion, and their overlap are critically analyzed. Key historic debates are examined, for example: the Vatican’s trial of Galileo for his teachings of a heliocentric universe; the controversial reception of Darwin’s theory of evolution; and the 2001 U.S. policy on embryonic stem cell research. Through such analyses, the course develops students’ skills in making ethically-informed decisions and thus recognizing their roles in the public debates involving the intersection of science and religion. Competencies: S3D, H1F, A3X, S2X. Faculty: Rev. Joseph McCann CM PhD

SW 209
BIODIVERSITY
Undergraduate
The study of biological diversity, which is the measurement of the amount of genetic, species and ecological variation on earth, is emerging as one of science’s and society’s most important and urgent endeavors. Scientific efforts to study biodiversity have intensified because of our growing appreciation of the pivotal roles human population growth and urbanization play in accelerating the extinction of plant and animal species through the destruction of critical habitats. In this course, we will examine the central questions: How is the security of humanity dependent on the perpetuation of biological diversity? Do we have an obligation to future generations to keep life on the planet as diverse as possible? Since life on earth has been evolving and diversifying for at least 3.8 billion years and most of the diversity that once existed (as much as 99%) has been lost to extinction processes, we will focus on the character and causes of earth’s past biodiversity crises in order to critically assess the severity of the current “biodiversity crisis.” Students will be introduced to major biodiversity issues through discussions, readings, lectures, labs, field trips, and original inquiry. Subjects will include: the ways different cultures view the biosphere, biodiversity measurements and monitoring, biodiversity trends in earth’s geologic past, the value of and human dependence on biodiversity, global and regional biodiversity currently at risk, policies to protect biodiversity (“the regulation of extinction”), the role of science and technology in preserving biodiversity, restoration ecology and ecological economics. Students will develop a detailed research paper, adhering to a scientific reasoning format, on a biodiversity issue of their choice. Competences: S1B, S2D, S3C, S4. Faculty: Kevin Downing

SW 210
ENVIRONMENTAL ISSUES OF THE 21ST CENTURY
Undergraduate
Have you ever wanted to enhance your environmental awareness locally, nationally, and internationally? Do you ponder your impact on the earth’s natural resources? Students will explore environmental quality, sustainability, natural resources, water, soil, and air quality, global warming, and human interactions with the environment. A series of discussions, activities, guest speakers, debates, oral presentations, and computer modeling exercises will offer concept comprehension as well as insight in improving environmental quality. At the end of the course students will reflect on ways to improve environmental quality individually and as a community. Competences: S1A, S3C, S4, FX. Faculty: Akilah Martin

SW 211
USING INFORMATION TECHNOLOGY EFFECTIVELY
Undergraduate
Dealing with change has become essential for all of us, in our private lives and in our organizations and businesses. For some people, change is a stimulating adventure. For others, it is painful anxiety-provoking. Yet the reality of today’s business world is that no one can avoid change. The implementation of information technology in the workplace result in complex changes and poses difficult challenges for supervisors and employees. In this course, we will examine issues regarding the individual and social aspects of implementing information technology in work and community. We will explore questions of access to and control of information technology, and concerns for individual privacy. The students will be exposed to a variety of conceptual frameworks and perspective that they may use for interpreting problems and managing change related to integrating computer technology into social systems of work. We will explore each framework or perspective by applying it to case studies. We will reflect on the effectiveness and shortcomings of each interpretive perspective. Pre-1999 Competencies: HC-5, PW-Q, WW. BA-1999 Competencies: F-X, H-2-C. Faculty: Michael Lightfoot
SW 212
URBAN ENVIRONMENTAL SCIENCE
Undergraduate
The study of environmental science uncovers the relationship between the built environment and the natural processes of the earth. This includes human interactions and the impact on habitats, plants, animals and those non-living entities that we rely on such as water, air and soil. An examination of the dynamics of human population growth and migration, food production and climate issues, chemical toxicology and health, waste and sustainability, energy production and consumption will illustrate how these issues are connected by increasing global urbanization. This course will provide the framework to guide your decisions as a consumer and a citizen in both a global and local environment. Role-playing and discussions on everything from the choices of fabrics for clothes, transportation, animal rights to the amount of water used while brushing your teeth will show the connections of your behavior to global consequences. Through reading, research, writing, class discussion, individual and group projects, students will learn the key to a sustainable future. Competences: S-4, S-1-A, S-2-D. Faculty: Nadine Bopp

SW 213
MEASURING GLOBAL CLIMATE CHANGE
Undergraduate
In this course we will view global climate change from several angles and through various lenses. What happened to climate during the last 800 million years? What happened since the beginning of the industrial revolution? We'll evaluate predictions and prescriptions for the future. We'll consider politics, economics, and human beliefs and behaviors as they relate to the current global warming trend. Topics for study can range from one person's daily decisions about tooth-brushing or commuting, up to larger issues such as "Why did nearly 200 countries, but not the U.S., ratify the Kyoto Protocol?" or "What happens to Europe, and the rest of us, if the Atlantic Ocean Gulf Stream stalls out?" Doing a major paper or project for each chosen competence will allow you to focus on whatever aspects of global climate change you find most compelling. The overall goal is to become more informed, and to act more responsibly, about Earth, its living organisms and climates, and our influences on them. Competences: H2E, S2E, S4, S3C

SW 214
OUTCOME ORIENTED COMMUNICATION
Undergraduate
Businesses are run by people who work in a constantly changing communication and organizational environment. Modern communication involves many types of communication media such as written reports, telephone, email, websites, text messaging, online conferencing and face-to-face meetings. All of these communication media are not equal when addressing business problems and using the wrong communication media for specific types of problems can actually create problems that were not there in the first place. The Outcome Oriented Communication method covered in this class presents communication as a proactive tool for avoiding problems instead of as a remediation tool for correcting problems that might have been avoided with proper communication. It was developed by the instructor in conjunction with his consulting, academic and professional work. Students will be encouraged to use their "life as a laboratory" during the duration of this course as a way of testing the concepts against their own reality, finishing the course with a much better understanding of how to adapt their personal communication style to different personal and business problem solving situations. Competences: H-3-X, S-3-X, FX

SW 215
STRESS MANAGEMENT FOR HEALTH AND WELLNESS
Undergraduate
This course will explore the effect of stress upon the physiology of the body and offer a variety of alternative methods to alleviate these symptoms. Students will gain an understanding of the body's stress response mechanisms and how this response when not checked can lead to consequences that diminish the quality of life. Students will learn techniques for activating the body's relaxation response mechanisms. We will explore the theoretical and practical application of relaxation techniques such as controlled breathing, meditation, self-massage, biofeedback, Yoga, Tai Chi and other alternative health practices. The importance of nutrition as a means of combating stress will also be covered. Through experiencing the physiological response of the body to stress reduction techniques, students will gain the ability to assess and manage their own stress. Other skills students will be able to acquire include: recognizing stress symptoms in self and others, how to choose a stress reduction method, understanding the relationship between stress and wellness, and devising stress reduction regimes for others. Journaling, a short paper, selected readings and demonstration of advanced Yoga and Tai Chi techniques by a guest speaker will enhance the learning experience. Competencies: H-3-F, S-2-A, S-3-X. Faculty: Yirser Ra Hotep
SW 216
THE SCIENCE AND COMMERCE OF COFFEE AND TEA
Undergraduate
The class will use a variety of readings, discussions, and activities to explore the science and economics of popular hot beverages. This class will focus on the science behind growing and brewing coffees and teas (and tisanes) and these beverages' effects on the human body. Coffees, in particular, teas, and tisane elements less so, are grown in highly specific ecosystems. The class will learn about and compare these ecosystems, earth friendlier alternative ecosystems for these commodities, and common forest ecosystems that are found in Northern Illinois. The class will also look at the historic and current state of coffee and tea commerce. The class will include field trips that could include: local orchards, area coffee houses, area organic food stores, teahouses, etc. Some of these trips will be during regularly scheduled class time and others may be assigned as independent student work outside of class. WARNING: Basic taste testing during the class will focus on coffee and tea without additions. While students will have many opportunities to review popular, flavored coffee and tea drinks, in-class taste tests will focus on unadulterated coffee and tea comparisons. Students must be willing to sample expressos and coffees black. Competences: S4, S2X, S1B, FX. Faculty: Jill Joachim

SW 217
WANTED: THE BEST AND THE BRIGHTEST
Undergraduate
In this course, students examine intelligence testing and its uses in employee selection and placement. Students learn the principles of assessing human traits (reliability, validity, bias, and other systematic errors) and apply them to intelligence testing. We will work to define “intelligence” and consider various approaches to intelligence, contrasting the theories of unitary vs. multiple intelligences. Students will examine the implications of the definitions and measurement approaches on different groups of people, both historically and currently, with attention to the unintended effects of the biases of test developers and the ethical implications of different approaches and uses of intelligence testing. Competences: H3A, S3D, A3C, FX. Faculty: Staff

SW 218
WHAT IT MEANS TO BE HUMAN
Undergraduate
Self-awareness distinguishes humans from other species of animals and allows us to raise questions about ourselves. This course will examine the works of Freud, Jung, Adler, Skinner, Maslow, and others. Emphasis will be placed on the evolution of questions as well as answers in personality theories. Through readings, lectures, videos, discussions, and written assignments, students will examine the application of the scientific process to themselves and others. Pre-'99 Competencies: PW-2, PW-4, PW-5, HC-4. BA'99 Competencies: S-1-A, S-2-A, S-2-C, H-3-A. Faculty: Anthony Kopera

SW 219
THE AGING (OR REENGAGING) BRAIN?
Undergraduate
In this course, we will examine the latest research on the aging process and, specifically, its relationship to the brain. We will cover a mix of material from psychological and, especially, neuroscientific fields. Students will also be introduced to the field of neuroplasticity, which is revolutionizing the way we understand the functioning power of the brain. Neuroplasticity, in simple terms, is the brain's ability to rearrange its connections and, therefore, its functions based on experiences. In other words, the brain has the capacity to literally change itself, based on experiences, to achieve positive results. The goals of this course are to understand how the brain works, examine its impact on our daily actions, study how aging impacts brain functioning, discover the learning and adjustment potential of the brain, and apply the principles of the 3 P's. We will use numerous examples to understand the brain, including health, work, relational, and personal settings. Students will ultimately answer the question of whether they will have an aging or reengaging brain. Competences: H3X, S2X, S2C, FX. Faculty: Joseph Chen

SW 220
COSMIC HISTORY: FROM BIG BANG TO MANY UNIVERSES
Undergraduate
This course invites students to enter into some of the universe's most mysterious spaces, especially black holes, red shifts, and tenth dimensions. Scientific studies of the cosmos have reached a remarkable level of consensus, but mysteries continue to boggle astrophysicists' minds. Einstein's Theory of General Relativity, Hubble's "Big Bang," and subsequent theories regarding dark energy, dark matter, black holes, and other features of cosmic history are now supported by a growing body of evidence from studies of background radiation, "red shifts," and other astrophysical data. But puzzles remain that compel the boldest of thinkers to reconsider the physics of both the cosmic and the subatomic. This course invites students to engage in critical analyses of twentieth-century developments in the science of cosmic history, its creative process, and its movement toward connecting diverse aspects of the universe within a Grand Unified Theory. Competences: A5, H1F, S2B, S4
SW 221
BUILDING AN ONLINE CATALOG OF CHICAGO ACTIVISM
Undergraduate
This class will chart, categorize, and record all the civic activism and social change organizations working in Chicago and post mini-profiles to a Wikipedia space that the general public will be able to search by type of issue and neighborhood. This publishing project will grow with each class's contributions and will allow viewers to post comments and add links and other resources. Students will be provided with information about the types of community change organizations working in Chicago and will then have a choice of assignments such as the following: research groups within a specific setting (e.g. recycling); research groups working in a specific community (e.g. Lawndale); research a hero/heroine of social change (e.g. Gail Cincotta); or research a specific incident in Chicago's social change history (e.g. The Haymarket Riot). Students will also work on the user interface and conduct user experience tests to see how casual viewers use the site. Viewers on the site will be able to browse the organizations by type of issue and neighborhood. This reference will be a significant resource for citizens who want to make a difference in Chicago. Competencies: L7, A2D, S1D, S3X

SW 222
WEB SITE DESIGN
Undergraduate
Designing a web site, for personal or professional use, requires a number of skills. This course serves as an introduction to the tools and methods for creating effective web sites. Students will learn the fundamentals of HTML, forms, image creation and editing, and JavaScript through exercises which will lead to the creation of a functional web site by the end of the course. In addition to these practical skills, the course will also discuss the effective design practices for a successful web site. * Prerequisite: Successful completion of *Exploring the Internet* course, familiarity with Windows, ability to use a word processor, some experience using the Internet. Competencies: F-X, S-1-D, A-5, A-2-C.

SW 223
PRINCIPLES OF A SUSTAINABLE LIFESTYLE
Undergraduate
Our consumer choices, habits and lifestyle have a local and global impact. The items we consume, such as: housing, furnishings, clothing, transportation, travel, food, recreation, entertainment and disposables mainly come from non-renewable natural resources produced in far away lands and have a cradle-to-grave lifecycle. Awareness and education as to the safety and efficacy of consumer products is often suspect with contradicting information from the media, manufacturers, government and advocacy groups. Employing a sustainable paradigm for all of your consumer choices will allow you to have a smaller footprint, (ecological and carbon) on the planet and live a healthier, guilt free existence. We will explore the meaning of the `triple bottom line' or cradle to cradle approach to consumption. Consumer models, field trips and personal experiments will help pave the way to become a conscientious global citizen. Competences: S1E, S2D, S3B, H1H. Faculty: Nadine Bopp

SW 224
ENVIRONMENTAL SOCIOLOGY
Undergraduate
This course opens the discussion of the relationships and conflicts of society's perception of the built and natural landscape. It crosses the intersection of technology and industry and their resulting social problems. The study of society includes the phenomena of equity and inequality that beset humans and the living and non-living components that we experience daily. The act of consumption and the economy of technology, over time, impact human populations, mold our social experiences, and inform the actions that determine the physical environment in which we live. Ideologies, cultural, moral and ethical values present risk and knowledge that hone the attitudes and actions within our human communities. Humans, often being pragmatic, ultimately learn to mediate conflicts (environmental, social, cultural, economic and political) in order to perpetuate the institutions and social dynamics of our civilization. Competences: S3E, S1B, S3C, H1E.

SW 225
INFORMATION TECHNOLOGY
Undergraduate
The world in which students will live and minister will be shaped more and more by information technology. In this course, students will learn how to effectively use computers and computer programs. They will develop computing skills that they can use in their academic studies, in their community lives, and in their ministries. They will learn how to use computers to communicate more effectively, to do research, to find information on the Internet, to organize and analyze data, to manage financial information, and to present information to others. Through this course, therefore, students will develop and demonstrate their competence to use contemporary information technology effectively and to understand general computing principles and solve problems using computer-based applications. (2 competencies) S5, S1D.
SW 226  
CAREERS IN SCIENCE  
Undergraduate  
“Careers in Science” is a course designed to enlighten and broaden your knowledge about the many science careers (i.e. environmental science, biology, chemistry, food science, nutrition, geology, math etc). You will determine the appropriate career path that is best suited to your interests, knowledge, skills and abilities. This class will also offer graduate school and/or professional training preparation.  
Competences: S1X, FX. Faculty: Akilah Martin

SW 227  
HUMAN GROWTH AND AGING  
Undergraduate  
As we progress through life and its stages, we realize and experience the fact the human body is biologically changing, growing and aging. This course provides a study of the basic structure and functions of the human body, its anatomy and physiology. With this foundation, age-related characteristics and some dysfunctions associated with the aging process are studied. Students will apply learned theoretical principles by using their own bodies and examination of preserved materials in the laboratory experiments to explore and assess anatomy and body functions as they apply to age related changes. Competencies: S-4, S-2-A, S-2-C, S-3-A. Faculty: Anne B. Donnersberger

SW 228  
ENVIRONMENTAL SCIENCE  
Undergraduate  
Africa has some of the most valuable environmental resources in the world. But it is also experiencing some of the greatest environmental tragedies. Everyone is affected by the degradation of the land, the destruction of forests, the loss of biodiversity and the pollution of air, water and food. The poor and marginalized are the most vulnerable to these problems. Justice and peace are impossible without healthy, sustainable environmental policies and practices. Everyone ministering in the contemporary Church and society must understand and address these environmental challenges. This course will help students learn how to interpret contemporary scientific information about the environmental issues that impact every aspect of life in Africa. They will examine gender and cultural issues that relate to environmental problems. They will also critique potential solutions to environmental problems. Through this course, therefore, students will develop and demonstrate their competence to describe and explain connections among diverse aspects of nature and to understand the scientific and social dimensions of an environmental issue. Competences: S4, S3C

SW 229  
BUSINESS AND WAR FROM A COGNITIVE SCIENCE PERSPECTIVE  
Undergraduate  
This course will use principles from Cognitive Science to investigate the causes and effects of American military and economic policies. With reference to pertinent aspects of psychological, neurological, and philosophical motivations for human decisions on strategies related to war and trade, and in view of historical patterns of societal behavior in these areas, a systematic effort will be made to ascertain America's self-image and the forces driving our cooperative and adversarial relationships with other nations. Students in this course will be required to participate through selected readings, brief reports on those readings, and class discussions. Each student will choose a specific topic of interest for individualized study, which will entail research and writing for an academic paper, a class presentation, and an effort to publish the work on one of a number of selected websites. A strong emphasis will be placed on the use of currently popular and freely available video and audio software to present findings. Students will learn how to use presentation software, edit video and audio files, convert presentation files to other formats, and upload results to the Internet. Competences: H1J, H5, S1A, S5. Faculty: Paul Buccheit

SW 230  
UNDERSTANDING AND APPLYING PROJECT MANAGEMENT  
Undergraduate  
Project Management is a very important business discipline that can become very complicated. There are numerous Project Management methodologies, and all of them share the same basic steps and tools. The purpose of this course is to demystify Project Management by presenting its basic framework and tools. The course translates Project Management theory into a practical and effective methodology the student will be able to apply on the job. Starting with working definitions of Project and Project Management, the course describes how projects are initiated, evaluated and organized with analytic techniques such as discounted cash flow and PERT/CPM. Project execution and control are covered next, along with the documentation and communications skills that are needed to keep a project on track. The course concludes with an overview of Project Management applied to computer software development. Competences: L7, H2X, S3X, S5, FX. Faculty: Clifford Ratza
**SW 231**
**URBAN DIRT**
*Undergraduate*

Urban Dirt is a course designed for the student who desires to know the difference, complexity, and the diversity between soil and dirt. The benefit of learning about soils is multi-fold: understanding the Earth, understanding how and where your food grows, gardening, impact on water quality, and most of all understanding your role in improving overall environmental quality and sustainability. In addition, this class will offer introductory knowledge of soils and its dynamism. Although learning soils can be very scientific, there are several social and artistic views of soils. If you ever wanted to know why soils are various colors, various fertility, uses, mapping, home to various organisms, then this is the course to take. Understanding the complexities of soil, will aid in understanding Earth's and its intricacy. Competencies: H2X, S1X, S2X, S4. Faculty: Akilah Martin

**SW 232**
**DIMENSIONS OF AGING: CHANGING IDENTITIES**
*Undergraduate*

Living longer provides us many opportunities and challenges. Our parents, our relatives, our friends and ourselves are all involved in aging. This is a journey that we all take without much planning or preparation. We will explore many facets and perspectives on aging to deepen our understanding and empathy and enable our own plan. Students will examine the aging process from many perspectives, including social, psychological, economic, physical, and health. We will identify and analyze our attitudes toward aging. Through reading, lectures, guest speakers, interviews and personal planning we will: - analyze and evaluate broad societal and specific cultural attitudes toward aging. - evaluate strategies for successful aging and design a personal plan. - develop interviewing and discussion skills around complex and changing identities related to aging. Competencies: A3G, H1B, H2X, S2X, S3B. Faculty: Patrick Ryan

**SW 233**
**DESIGNING DYNAMIC ORGANIZATIONS - A HOLISTIC VIEW**
*Undergraduate*

In the twenty-first century the business landscape is changing more rapidly than ever before, organizations of every level are facing a myriad of restructuring issues. To meet the emerging needs, organization design is becoming more, not less, important. There is a need for dynamic, reconfigurable organizations that recognize and respond to rapid changes. A well-thought-out organization design empowers and enables employees to work in the highly interdependent, team-oriented environments that typify today's business landscape. Further, the clearer the rationale for the design, the more quickly design decisions can be reassessed and modified to respond to external forces. This course provides business leaders at all levels everything they need to implement positive, progressive change. Competencies: A2C, H2C, L7, S3F, FX. Faculty: Kumiko Watanuki

**SW 234**
**VIRTUAL PALEONTOLOGY**
*Undergraduate*

Paleontology is the study of fossils which are the remains and traces of past living things. The investigation of fossils is essential to our understanding of how life originated and evolved on earth. Fossils provide us with critical information regarding the character and age of the most significant biological events in earth's history, including: the earliest forms of life, the pivotal development of multi-celled plants and animals, the rise and demise of the dinosaurs, the adaptive diversification of mammals, and the origin of our own species. This course will examine how fossils can be used to decipher ancient patterns of development and change within earth's physical and biological systems, how biodiversity patterns for fossil groups compare to living groups, and how the anatomy of plant, invertebrate, and vertebrate fossil groups evolved in both form and function. Other topics will include: fossil preservation, determining the age of fossils, reconstructing ancient environments and ecosystems, lifestyles of fossils, dinosaurs, mass extinctions and the evolution-creation controversy. This course is offered via the Internet and makes use of the exciting and growing graphical resources available there on paleontology topics. Students will be introduced to major paleontology principles and issues through readings, links to multimedia resources on the Web, structured chat-room discussions, virtual labs and simulations, fossil specimen kits, a fieldtrip to a natural history museum or fossil site, and original inquiry into a current topic in paleontology. Assessment of student learning will be based on participation in course activities, lab and simulation reports, an essay exam on course readings, and development of a detailed research paper on a current issue in paleontology. The research paper will follow a scientific journal format and will employ scientific reasoning. Pre-'99 Competencies: PW-2, PW-4, PW-5, PW-G, PW-I, PW-O. BA'99 Competencies: S-4; S-1-A; S-1-B; S-2-A; S-2-C; S-3-E. Faculty: Kevin Downing

**SW 235**
**YOGA AND WELL-BEING**
*Undergraduate*

The ancient practice of yoga offers a combination of benefits: physical endeavor, relaxation, contemplation and stress reduction. This course will explore the many dimensions of yoga. Class meetings provide time for the practice of yoga movement, focused breathing and meditation, all of which help to reduce stress. Students explore the impact of these practices on body and mind through independent research, reflection and class discussion. As a result of this course, students will learn fundamental yoga movement; identify the impact of yoga on the physical body; explore yoga philosophy; and understand how yoga is one component of well-being. Competencies: A3B, H3F, S1X, S2C. Faculty: Rebecca Russell
SW 236
ADVANCED INTERNET
Undergraduate
This course is designed for students who want to move their basic computer skills up to the next level. It addresses more advanced concepts of computer literacy. Students in this course will take their Internet skills to new levels, how to get comfortable surfing the web and how to navigate the flood of information once they find what they're looking for. Students will learn how to enhance effectiveness of search engine, expand their knowledge about other browsers application and general networking concepts, apply the techniques to safeguard against viruses and SPAM and keep computers free from unwanted visitors. Students will find helpful information on the most talked about newcomers to the online world such as social networking sites like Facebook and MySpace, blogging, and downloading media content from YouTube and iTunes, as well as an introduction to the personal email and instruction for safe surfing. Competences: S1, S3X, S1X, FX. Faculty: Zaya Khananu

SW 237
ENERGY, CHEMISTRY, AND SOCIETY
Undergraduate
This course is designed to introduce students to the fundamental principles and processes in chemistry that will help in their understanding of energy and the environment, including their interaction with society. Current public issues (e.g., conservation, pollution, energy policy, global climate change, etc.), which covers earth sciences as well as other branches of science, serve as the framework. It integrates significant aspects of the physical sciences, particularly chemistry, with the student?s other studies as well as everyday experiences. This course carefully discusses the impact of our actions on the lifetimes of energy resources. The connection between the macroscopic world we experience and world of atoms and molecules will be explored. Sufficient use of quantitative and real chemistry will put the topics on a sound basis for students who have had little mathematical or scientific background. Competences: S1B, S1C, S2B, S3A, S3D. Faculty: Dr. Nithya Rajan

SW 238
BIOLOGY OF AGING
Undergraduate
Students will explore current and historical understanding of the human aging process, with emphasis on normal versus abnormal changes. Each student will select 1) a body system and 2) a related disorder/abnormality to focus on in anchoring their experiences. In addition, students will complete a project for each competence selected on enrollment: S1C, S2C, S3X, S4. Faculty: Jennifer Holtz

SW 239
THE BOTANICAL WORLD
Undergraduate
All life is dependent on plants. They are our most precious resource. Our relationship with the plant world encompasses things we take for granted: food, clothes, furniture, musical instruments, medicines, homes and the aesthetic qualities of plants that permeate and refresh the human condition. Recent scientific successes in genetics and biotechnology have made us more aware of what has been done to plants. In this highly interactive course, we will explore these new controversial revelations and the connections between plants and our individual lives. While this is not a laboratory course, we will look at and take apart real plants in and outside the classroom, and even grow some lower plants (molds) at home. There will be one field trip to the Lincoln Park Conservatory and a walk around the Loop (weather permitting). Competencies: S-1-A, S-2-X, S-3-B, S-4.. Faculty: Nadine Bopp

SW 240
SCIENCE, ART AND MEANING
Undergraduate
Scientists and artists both respond to nature, in ways which are both similar and different. In this class, we will explore ways of understanding the natural world and of expressing that understanding. A field trip to the Dunes National Park in Indiana will offer a living laboratory for this experience and expression. Pre-1999 Competencies: AL-2, AL-4, AL-F, PW-2, PW-F, PW-H, PW-I. BA-1999 Competencies: A-1-B, A-2-A, S-1-C, S-2-B, S-1-B. Faculty: Pat Monaghan
From the oil, coal, and nuclear materials that supply us energy to the metallic minerals and soils that make available building materials, electronics, jewelry and food, modern civilization is dependent on an assortment of non-renewable resources. This course will introduce you to the geologic processes that generate society's principal mineral and energy resources including oil, natural gas, coal, nuclear materials, gold, industrial metals, gems, and soils. We will investigate how geological circumstances result in the geographic distribution and scarcity of mineral and energy resources, the historic interdependence to and competition of societies for these resources, and the geopolitical and economic consequences of resource depletion due to population growth and global industrialization. Topics investigated will include: oil formation and peak oil; coal/natural gas formation and cap and trade policies; nuclear fuels and enviro-statism; gold formation, gold as money, and gold as a cultural artifact; gem formation, crystallography and gem use in jewelry; metallic mineral formation, industrial use, and scarcity trends; soil formation, farming and soil depletion; and the global outlook on mineral and energy resources. Competences: S1B, S2C, S3C, S4, FX. Faculty: Kevin Downing

Food is much more than sustenance. It often defines us, our origins, our families and speaks to us about succor, satisfaction, and the winning of hearts. This course sets students loose in the environment of their own kitchens with a number of structured exercises that demonstrate scientific principals first hand. It includes classroom discussion and examination of these principles. Furthermore, students will discuss how cuisine and cooking styles are unique to and important to world cultures and the people who experience them. In addition to attendance and discussion, learners will keep food journals and short final papers or presentations. The course will be a hybrid class, meeting both on line and on campus. Competences: S4, H5, H1E, S3C. Faculty: Jill Joachim

This course looks at instructional design in much more depth and the Technology, Training and Human Performance Course. In this course, the student will study what Instructional Design is, how it works, and why it is important in the design of all types of career and educational training. The course will present various models of instructional design, then have the students design actual instructional training modules. Competences: FX, H2X, H3X, S2X. Faculty: Ruth Gannon-Cook

This course will teach students the basic concepts of statistics. Students will investigate topics including descriptive statistics, correlation, normal distributions, probability, sampling distributions and hypothesis testing. By the end of this course, students will be able to complete a statistical analysis of datasets using Microsoft Excel as the primary tool. Considerable time will also be devoted to discussing how statistics are used and abused. Competences: H3X, S2X, S3X, FX. Faculty: John Hemmerling

This course is designed to provide learning opportunities that derive their unique attributes from a focus on the African continent. We will review definitions of technology and globalization as they apply to emerging African nations. We will study how the general application and use of various technologies have affected the developing countries of Africa from a social, cultural, economic and practical perspective. Technologies to be reviewed include electrification, radio and television, telecommunications, computers, and the Internet. Students will participate in a live video conference with a group of United Nations delegates assigned to committees that oversee technology matters around the world for the purpose of discussing the dispersion of technology. Students must have regular access to the Internet because of research requirements. See also: http://www.wheresitat.com/ for more information. Pre-1999 competencies: PW-3, PW-P, HC-H, HC-X. BA-1999 competencies: L-7, S-5, S-3-F, H-5. Faculty: Donna Jones-Illsley
SW 246
PHARMACOLOGY AND HEALTH
Undergraduate
This course will be an overview of the main human biological systems in health while highlighting and emphasizing the chief pharmacological agents used to treat common human diseases and pathologies of those systems. Discussion will include pharmacokinetics, drug action mechanisms, side effects, costs, and the role that prevention might play in attempting to minimize drug utilization. The course will include a historical overview of the use of medicine throughout the ages and consider current drug development. Through the use of a textbook, current literature review, discussion and audio visual adjuncts, the course will help to build a foundation for basic understanding of the relationship between healthy human biological systems, pathology development, and how pharmaceutical agents relate to health and disease. Competences: S2A, S2C, S2D, S3B. Faculty: Patricia Stifter

SW 247
SCIENCE TECHNOLOGY SOCIETY
Undergraduate
The 20th century has experienced the greatest number and most profound changes of any in our history. From the invention of plastic to the identification of genes, science and the practical application through technology has changed the way we think and perceive our environment. This course will be an overview of some major discoveries that occurred in the past 100 years and how these discoveries have effected society for good or sometimes not so good. We will look at how the work of women and minority scientists has been included/not included into the mainstream. Competencies: S-3-F, S-3-A Faculty: Nadine Bopp

SW 248
THE SCIENCE BEHIND ENVIRONMENTAL SCIENCE
Undergraduate
This course is designed to equip the student with the necessary learning experiences that will enable the student to make informed decisions that affect environmental well-being and environmental sustainability. Learning experiences will include, but not limited to, classroom instruction, groups discussions, and individual research. Competences: S4, S1X, S2D. Faculty: John Prusko

SW 250
WIDGETS, CLICKS, & TWEETS: ESSENTIALS OF APPLIED WEB TECHNOLOGY
Undergraduate
This course will provide students with an overview of the history of the Internet and basic marketing strategies as they relate to the Internet and Web 2.0 technologies. Students will learn about how to keep abreast of new technology, how these technologies can be used to market services and products as well as how they can be used to create and maintain social networks for professional use. Competences:S1D, FX.

SW 251
UNDERSTANDING GLOBAL HEALTH CONCEPTS AND PRACTICES
Undergraduate
Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences and humanities, learners will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. We will explore the factors shaping the global distribution of disease and their connection with issues of social, economic and political development, as reflected in the Millennium Development Goals. We will also consider the impacts of globalization on health risks and availability of health resources. By engaging in critical assessment and proposing innovative solution ideas, we will develop all four competences offered for this course. Competences: H5, H1X, S1X, S3X. Faculty: Dr. Isidore Udoh

SW 252
ENVIRONMENT AND HEALTH
Undergraduate
Using scientific reasoning the student will determine how and to what extent the quality of health and life can be altered in varied geographic and personal environments. As a foundation emphasis will be placed scientific method, cellular structure and reproduction and an overview of environmental issues impacting health today. Relationships of the nutrition-digestive and respiratory systems of the human body as environmental portals will be studied. Problem-solving skills will be employed in the manipulation of data. Investigation of norms and the deviations from these norms in selected physiological systems also will be studied. Competences: L7, S4, S1A, S2D, S3B. Faculty: Jill Joachim
SW 253
USING STATISTICS
Undergraduate
This course is designed to introduce the basic concepts of descriptive statistics, employ their use in everyday life, and make sense of the data. Students will create statistical analyses of data and learn top make decisions from reports that they produce in Excel. Understanding statistical concepts is emphasized instead of memorization of formulas. Students will learn from group projects how to analyze data using Excel spreadsheets. The course involves participation in discussion, presentation of cases and demonstration of analyses. Pre- 1999 Competencies: HC-F, PW-3, PW-L, WW. BA-1999 Competencies: H1X, SZE, S5, FX.

SW 254
INTRODUCTION TO COMMUNICATION SOFTWARE
Undergraduate
In this introductory course, students will develop a broad knowledge of personal computers and an understanding of how they can be used, with various software packages, to communicate and solve problems in your personal and work lives. The class will be 'hands-on', you will learn how to access and use Microsoft Word, Excel, and Powerpoint, as well as Internet applications (getting connected, e-mail, web browsers, and various search engines. The course is lecture/discussion and lab oriented. No familiarity with computers is expected. BA-1999 Competencies: F-X, S-1-D, S-5. Pre-1999 Competencies: PW-3, PW-F, WW.

SW 255
BRAIN, MIND AND BEHAVIOR
Undergraduate
Scientists have only recently found means to isolate chemicals of the brain, analyze its electrical systems and try to answer questions such as: How does the brain strike a balance between its genetic blueprint and influences from the environment? Where does it "hold" language? This course explains what science knows and does not know about the human brain. It draws on the most current findings, theories, and applications of brain science. Students will meet for guided discussions and will be given textual material for class activities and independent assignments. Competencies: H-3-A, S-4, S-1-A, S-2-A, S-2-C. Faculty: Patricia Stifter

SW 256
USING YOUR COMPUTER CREATIVELY
Undergraduate
Computers, we all have them, we all use them, but do we enjoy them? Our computers do many wonderful things. Understanding what they can do and how they can help us to accomplish our own unique needs are two different levels of understanding. In this course we will explore how to use current programs to save time, enrich presentations, and access the multitude of interesting and useful information and images available literally at our fingertips. Students will explore creative uses of word processing, data bases, Internet searches, and presentation technology to enhance their skills and final products for work, school and pleasure. Prerequisites:Basic familiarity with Windows 95 and Microsoft Word is required. An existing student email account on DePaul's Shrike system is required for class participation and can be obtained through DePaul ID Services at 312/362-5959. Please see: http://www.depaul.edu/~kskorupa/computing. Pre-1999 Competencies: PW-3, AL-M, WW. BA-1999 Competencies: L-7, A-2-D, F-X.

SW 258
THE CITY IN THE YEAR 2030
Undergraduate
What will cities be like 25 years from now? The history of cities throughout the world offers clues to this question. This course will explore the theories of leading experts in the field of urban research and prognostication. Students will examine these views in the context of the political system, population trends, and urban economic activity. Recommended strategies to improve the strength of historically great cities will be analyzed and compared. Practical application of concepts utilized in other areas will be evaluated in terms of their potential use in the City of Chicago. Competencies: H-1-H, H-2-X, S-2-D, A-1-X. Faculty: Mark Enenbach

SW 259
INTERNET TECHNOLOGY
Undergraduate
This course will familiarize the student in using the Internet. The course will highlight how to use the Internet for research and information queries. A brief history of the Internet will be reviewed as well as steps to connect to the Internet. The course will introduce the students to file transfer protocols, web browsers, search engines and newsgroups. Each student will gain exposure to surfing the net for both business and personal use. The course will emphasize a hands on approach and make use of lecture and discussion methods. Homework will consist of reading and web page development. Prerequisites: Basic familiarity with Windows 95 and Microsoft Word is mandatory. An existing student account on Shrike is required for class participation and projects. Pre-1999 Competencies: PW-3, PW-F, WW. BA-1999 Competencies: S-5, S-1-D, F-X. Faculty: Mary Garcia
SW 260
DE-CODING HUMAN BEHAVIOR
Undergraduate
This course targets the link between the physical environment and social behavior. Every physical space is also a social space; its organization contains a "code" of responsive behavior for people to understand. We focus on these "codes," and examine the ways they provoke conformity and deviance from individuals and groups. Students are expected to enter the social environment and gather publicly-observable data for analysis in the classroom setting. The ethics of social research, and of an observer's interaction with the environment, are key points of inquiry during the quarter. Students in this course work at a "pre-ethnography" level, and are primed by its conclusion to enter and analyze any social group and its physical surround. Competencies: A4, L7, H2X, S2D, FX. Faculty: Corinne Lally Benedetto

SW 261
EXPLORATIONS IN BIOLOGY
Undergraduate
This course provides an introductory study of organic macromolecules, the cell, genetic activity and the theory of evolution. Throughout the course we will stress the interdependence of the three biological sub-specialties of genetics, ecology and evolution. Competencies: S-4, S-1-A, S-2-C. Faculty: Barbara Berchiolli

SW 262
CHICAGO HOSTS NATO/G8
Undergraduate
In May of 2012, Chicago will host 2 major world meetings. One will be a meeting of the North Atlantic Treaty Organization(NATO) and the 2nd will be a meeting of the G8, the 8 most powerful world economies. This will be the first time that a city has hosted 2 major conferences since London did in 1977. The students will explore the history of the military alliance and its current involvement in many countries of the world. The global market is dominated by the 8 biggest economies of the countries that will be present in Chicago. Students will be able to learn how the big 8 control the global economic world. In addition, there will be major demonstrations against both organizations. In every city where the meetings have occurred, protestors were a major presence. Thus the students will be exploring and evaluating the major military alliance of the western powers as well as the 8 countries that dominate the other 180 countries of the world. Students will see the relationship between military, and economic power and the ethical issues involved. Competences: H5, S3X, A3C, FX. Faculty: JoAnne Gesiakowska

SW 263
THE CITY IN NATURE: WRITING THE URBAN LANDSCAPE
Undergraduate
In the 200-year-old tradition of American Nature Writing, its practitioners--from John Muir to Thoreau to Edward Abbey--have been indifferent if not openly hostile to cities. The nature essay has tended to focus on the writer's experience of landscapes where people are not normally resident: deserts, mountains, the deep forests. This focus suggests that nature is out there, and that to feel a part of it, we must leave where we live and go visit it. In this nonfiction writing course, students use the conventional essay to offer an alternative possibility: that we inhabit nature wherever we live, including cities, and that the intersection of nature and culture in urban environments is an important subject for analysis and exposition. To prepare themselves to write their own nature essays, students will read along the extraordinary canon of American nature writing; become familiar with the natural history of their own local environments; keep an urban nature journal; and familiarize themselves with current readings in environmental philosophy and ecopsychology. The College Writing course or its equivalent is a pre-requisite for this course. Pre- 1999 Competencies: AL-1, PW-E, PW-I. BA 1999 Competencies: A-1-A, S-1-B, S-1-X.

SW 264
ANIMALS AND CONTEMPORARY LIFE
Undergraduate
This is a Service Learning, Externship. Students will pursue literature on the historical connections between animals and humans, and will review philosophies concerning treatment of animals. Students will also be exposed to current issues in animal welfare, including a volunteer experience in an animal shelter. In this course, faculty will provide a framework for assessing the roles and condition of animals, particularly domestic animals, in our culture. Assigned readings range from Peter Singer's noted work on animal experimentation Animal Liberation to excerpts from Black Elk Speaks, a Native American treatise on hierarchy and respect for life in American aboriginal culture. Students will pursue their own interests through further readings and commentary. Pre-1999 Competencies: LL-7, AL-9 & AL-10, HC-9 & HC-10, PW-9 &PW-10. BA-1999 Competencies: L-9, E-1, E-2.
SW 266
AN APPROACH TO SYSTEM THINKING
Undergraduate
This course provides an introduction to the form of systems thinking called system dynamics. This course introduces the theory and application of the system dynamics modeling approach as it is used to support strategic decision making in complex social systems. It involves the qualitative and quantitative mapping of the relevant system structure (including physical processes, information links and human decision-making) and the simulation of the dynamic consequences of that structure. The aim is both to examine the general modes of behavior that result so as to gain qualitative insights and also to experiment with alternative policies in order to formulate ones which improve behavior. It has three distinctive themes: the concept of information feedback, the use of computer simulation models to explore complex behavior and the need to work with the mental models of relevant system actors (with a view both to drawing on the relevant knowledge and interpretations of the system and to implementing the insights gained from the modeling process). The course deals with all stages of the modeling approach as well as introducing some research topics in the field. Students will use ‘state of the art’ simulation software with a graphical interface (such as STELLA/iThink) and will be expected to work with quantitative computer models. The practical application of system dynamics will be emphasized throughout, using various cases studied from business public-policy making and elsewhere. Competencies: L-7, H-2-C, S-1-D, S-1-X, S-5, F-X. Faculty: Thomas E. Long

SW 267
SPRING WILDFLOWERS
Undergraduate
In this course, students will use photography to make an intimate acquaintance with the earliest spring flowers to become aware of the various woodland ecologies which nurture these species. A manually controlled, adjustable 35mm SLR camera is required for this course and must be brought to the first class. We will make all day Saturday field trips to parks and nature preserves in Michigan, Indiana and Illinois. Students will use field guides, observe and record elements of the environment of each species photographed, and learn the skills of a naturalist. Student photographs and a final paper based on field notes will be evaluated for their quality, accuracy, and detail. Students should expect to spend at least $50.00 for film and processing. Pre-'99 Competencies: PW-2, AL-B. BA'99 Competencies: S-1-A, A-2-C. Faculty: Peggy Stevens

SW 268
WOMEN, NATURE, AND ECOLOGY
Undergraduate
Women and nature have been linked since earliest times. As our ideas about both have changed, so have our ideas of their relationship. Changing conceptions of the body, as part of nature, have impacted our understanding of the mind's functioning, approaches to physical and psychological health, and religious thought. Students will study three models of nature to formulate how each looks at the human relationship to nature, defines sex roles, impacts health, and religious standards. We will use readings and discussion. Pre-'99 Competencies: PW-E, HC-C, PW-F. Faculty: Mary Louise Doherty

SW 269
ENERGY AND HEALTH
Undergraduate
This course will provide a framework for understanding human energy systems, such as digestion and respiration, as regarding current healthcare practices to enhance their effectiveness (dietary approach, manipulation therapies, acupuncture, exercise, and meditation). We will consider connections between social and environmental variables such as constitution, stress, lifestyle, and vital physiological functions. Each class will build on the basic understanding of biological systems in relation to energy through lecture and discussion. We will review literature on various healthcare practices to discern sound approaches and practical applications. Students will cultivate an appreciation for daily health choices that cumulatively affect their health. Competencies: S-2-A, S-2-C, S-3-D, S-4. Faculty: Staff

SW 270
MAKING STATISTICAL WORK
Undergraduate
This highly interactive course will help students understand and use statistics to their advantage at work, and in their lives as informed citizens, consumers, and/or parents. Using examples from daily life and work, students will learn to frame and solve common problems. Despite its scary (or boring) reputation, statistics is at heart a set of very powerful tools for thinking and communicating. With the tools learned in this course, students will be better able to cut through reports at work, weigh the claims of political candidates, drill holes in misleading information, and hammer out the real significance of the news. This is a course for all those who have ever wondered: how likely they are to be hit by lightning, whether they are “normal,” what percentage of the population really elects the President, or what the odds are of winning the Lottery. (Hint: watch out for that lightning!) Prerequisite: Some facility with algebra, as evidenced by Practical Math and Applied Algebra or its equivalent is required. Pre-’99 Competencies: HC-E, PW-F, WW. BA'99 Competencies: H-1-X, S-2-X, F-X. Faculty: Tom Angelo
SW 271
CHEMICALS IN THE ENVIRONMENT
Undergraduate
Confusion and controversy permeate the discussion of the role man-made chemicals play in the environment. This course will provide an understanding of some basic principles of chemistry, so students can evaluate current environmental issues in their communities, and in the press. A major emphasis will be on the total picture: benefits, costs, risks, and hazards associated with common man-made chemicals. We will follow the chemicals from their manufacture through their use and ultimate disposal. Demonstrations, discussions, readings, and reports will stimulate the student to critically evaluate the impact a group of chemicals has on the quality of our lives, and on the ecosystem. Pre-'99 Competencies: PW-2, PW-I, PW-M, PW-N   BA'99 Competencies:  S-1-A, S-1-B, S-3-C, S-3-D. Faculty: Cecilia Radlowski

SW 274
IMPACTS OF VARIOUS ENVIRONMENTS ON HEALTH
Undergraduate
Using scientific reasoning, the student will determine how and to what extent the quality of health and life can be altered in varied geographic and personal environments. The physiological relationships of the nutrition-digestive, and respiratory systems of the human body will be studied in depth as systems susceptible to negative environmental influences. Use of mathematics and problem-solving skills will be employed in the manipulation of data in the investigation of norms and the deviations from these norms in selected physiological systems. Students will be actively involved in the learning process. Class activities will include lecture, laboratory group projects (including examination of preserved materials), videos, readings and manipulations of data. Competencies:  S-4, S-1-A, S-2-D, S-3-B, L-7. Faculty: Anne B. Donnersberger

SW 275
BODY, MIND, SPIRIT: YOGA AND MEDITATION
Undergraduate
Why are 20 million Americans practicing yoga? This course, BODY, MIND, SPIRIT: YOGA AND MEDITATION, answers that question with an introduction to yoga and meditation techniques and the underlying scientific and philosophical principles of the system of yoga. The first half of each class will be experiential, conducted as a yoga and meditation class for beginners, providing tools to reduce stress, focus the mind, and cultivate inner peace. This first hour and a half will use yoga postures, breathing exercises, and meditation techniques. The second half of each class will use readings, reflection, and discussion to examine the scientific and philosophical knowledge of yoga as a way to ease stress, strengthen the bone and muscle structures, lower blood pressure, increase flexibility and strength, improve mind functioning, and provide spiritual sustenance. We will read Yoga Mind Body and Spirit: A Return to Wholeness by Donna Farhi, and the The Yoga Sutras of Patanjali, research articles on the scientific studies of yoga's benefits from journals and websites, etc. Each student will keep weekly reflection journal observations on the changes (s)he notices in himself or herself. This course will refresh, relax, rejuvenate. Yoga mats and other props will be provided. Bring/wear comfortable clothes (no jeans, belts, dresses). This is a GENTLE YOGA class for beginners - NO PREVIOUS EXPERIENCE is needed. Yoga means to unite or yoke so course will explore the ways to unite body, mind, spirit. This course is designed to 1) help establish good health and well-being; 2) gain scientific knowledge and understanding of the various systems of the human body; and 3) explore the spiritual benefits of meditation. Please note: PLEASE EMAIL TEACHER BEFORE CLASS BEGINS. Competences: A3B, H3F, S2C, S3B. Faculty: Maureen Dolan

SW 278
BIOLOGICAL ASPECTS OF STRESS
Undergraduate
As many as 93% of disease are now believed to be related to stress. This astounding figure underscores the importance of understanding the various aspects of stress, particularly the biological dimensions. The links among perceptions, personally type, brain chemistry, and the endocrine and cardiovascular functions are becoming increasingly well established. More recently, links between our immune system and the activities of the brain are helping us to recognize the truly integrated functions of our bodies in ways which will have very important impacts on our conceptions of health and disease. Students will develop an understanding of stress and stressors, the relationship of stress and the General Adaptation Syndrome as a focal point for applying this information. Exploration of individual differences in stress responses and stress-management techniques will provide a platform for synthesizing information on a personal basis and for analyzing environment/biological interactions.

SW 280
GROWTH AND DECLINE: A DEMOGRAPHIC PUZZLE
Undergraduate
The search for balance between economic goals and environmental concerns is an ongoing struggle faced by communities, states, and countries throughout the world. The successes and failures of population and environmental planning will be reviewed in both an historical and a theoretical context. Students will explore issues involved in establishing vital and healthy places to work and live. Through lecture-discussions, readings, films, and independent research, the relationships among population, public services, corporate growth and development, and environmental regulations will be examined. Students will select an area for study and formulate their own demographic and planning strategies. This course meets for only five weeks. Competencies: H-1-H, S-2-D, S-3-C. Faculty: Mark Enenbach.
SW 281
ALASKA
Undergraduate
From the mid-century push for statehood and the 1960's fight for Native land rights, through the pipeline boom of the 1970's and the economic bust of the 1980's, Alaska's recent history has been tumultuous and presents an ideal context for exploring the challenges of resource development. Many of the controversies which have recently divided Alaska result from the complex relationship between rights of indigenous people and development of the state's rich natural resources. Pre-1999 Competencies: HC-1, HC-3, HC-F, HC-9, HC-10, PW-A, PW-C, PW-D, PW-F, PW-9, PW-10, AL-C, AL-E, AL-F, AL-9, AL-10.

SW 282
NUTRITION BASICS AND BEYOND
Undergraduate
This introductory course will provide a framework for understanding the fundamentals of nutrition, vitamins and minerals, nutrition and disease prevention, food labeling, nutrition through the life cycle, weight management and more. Each class will build upon the basics by exploring current issues and research related to specific topics. Throughout the course, students will begin to separate information from misinformation as well as gain practical knowledge to incorporate into day to day life. Competences: S2A, S2C, S4. Faculty: Elizabeth Wall

SW 283
SOCIETIES IN TRANSITION: ERITREA AND ETHIOPIA
Undergraduate
Throughout the world, societies are changing as former political and economic structures are supplanted by emerging democratic systems. SNL has developed travel-study courses under the general title "Societies in Transition" as a way of introducing adult learners to these dramatic changes and as a means of allowing them to experience rich and diverse histories, new cultures, and extraordinary physical environments. Emergent Eritrea: Independence Along the Red Sea is the first in the series to focus on the Horn of Africa, a region of significant geopolitical importance. This course provides students first-hand exposure to Eritrea, one of Africa's newest nations, during its critical phase of postwar reconstruction and modernization. Our exploration of the geographic features, ecology and natural resources of Eritrea will elucidate the environmental challenges facing the inhabitants of this sub-Saharan region. Students will have the opportunity to meet with individuals from many sectors of this society, including artisans, teachers, Eritrean students, government officials, freedom fighters, priests, members of the women's federation, and business owners.

SW 285
GHOST OF PRECALCULUS
Undergraduate
The purpose of this course is to continue to develop the student's logical, pattern recognition, organizational, and algebraic skills. The goals are to prepare the student to deal with the increasing mathematical nature of life's problems and to prepare the student for a possible future calculus courses. The course will rely heavily on the interactive approach. Examples will be studied to introduce theory and applications. Discussion and questions will be encouraged. Homework will be recommended and discussed, and the student will do problems in class.

SW 286
SEXUAL HEALTH
Undergraduate
We will study the male/female anatomy and physiology, and its dysfunction like impotency and infertility. We will discuss how these dysfunctions affect normal sexual function, how sexually transmitted diseases are identified and avoided. Emphasis will be on healthy and safe sexual physiological function. We will explore sexual development throughout the life cycle from adolescence, middle age to maturity and how these biological changes impact our sexual health. The learning experience will include lectures, discussions, and expert speakers from the field. Pre-'99 Competencies: PW-4, PW-5, PW-2. BA '99 Competencies: S-2-A, S-2-C, S-1-A. Faculty: Phyllis M. Wallace

SW 287
ROCKET TO THE STARS 2000: SPACE FLIGHT IN FILM SOCIETY
Undergraduate
This course explores the impact of space flight in the 20th century. We have witnessed development of space flight, and have extended our reach beyond the surface of our planet. Outer space has provided a host of new discoveries that have revolutionized our understanding of ourselves, the universe, and our significance within it. It has also created serious social, economic, and political repercussions for our society. Culturally, Space has also been a kind of blank screen upon which we project our aspirations, our fears, and our speculations. We will examine how popular film has also fashioned our hopes, our fears, and reflected our thoughts about space flight. BA'99 Competencies: A-1-I, S-1-E, S-3-A. Pre-'99 Competencies: AL-L, PW-B, PW-J. Faculty: Harvey Nystrom
SW 288
DESIGNER LIVING: RELATING WORK AND LIVING TO HEALTH
Undergraduate
Creating a balanced lifestyle is coming to be seen as the core of preventive medicine and holistic approaches to health. In this course, students will create a self-care program comprising diaphragmatic breathing, the relaxation response, pacing, exercise, and a balanced diet. In class, focus will be placed on such issues as reappraising our concept of work and leisure, the impact of belief-systems on human biology, and the influence of our concept of time and of light on the human body.

SW 289
MAKING MULTIMEDIA PRESENTATIONS
Undergraduate
This course will instruct the student in the use of popular multimedia software for the development of professional-quality business presentations. Training will be provided in the areas of video and audio editing, graphics enhancement, slideshow creation, and moviemaking. Students will demonstrate their work through in-class presentations and via the internet. The primary focus of each student's multimedia presentation will be the impact of technology on the current state of the U.S. economy. Each student will select and research a specific issue related to technology and finance, prepare a professional-quality video, and present the results of his/her work in class. Competences: A5, H2G, S1D, S5. Faculty: Paul Buchheit

SW 290
CONCEPTS IN MATHEMATICS
Undergraduate
This course will focus on interpreting numerical data and problem-solving using basic mathematical tools. Selected topics from branches of mathematics will be reviewed, including: probability, statistics, charts, graphs, linear equations, and solving word problems through basic algebra. Methods will include lectures, hands-on applications, small group problem-solving, quizzes, and research. Pre-1999 Competencies: PW-1, PW-B, PW-F, WW. BA-1999 Competencies: S-2-X, S-3-X, L-6, F-X. Faculty: Pervez Rahaman, Pat Ryan

SW 291
HISTORY OF LIFE ON EARTH
Undergraduate
The study of fossils, the remains and traces of past living things, is essential for understanding and reconstructing the history of life on earth. Fossils provide us with critical information regarding the character and age of the most significant biological events in earth's history including the earliest forms of life, the pivotal development of multi-celled plants and animals, the rise, success, and demise of the dinosaurs, the diversification of the mammals, and the origins of our own species. In this course, you will explore how fossils and scientific reasoning are integrated to discern the complex history of life on earth. You will also evaluate the impact the discovery and recognition of earth's fossil record has had on society over the last several hundred years such as the position of humans among other species and the corresponding creation-evolution debate. Competences: S1B, S2A, S2C, S3D, S4. Faculty: Kevin Downing

SW 292
EXPLORING EARTH'S PHYSICAL FEATURES
Undergraduate
From majestic mountains and volcanoes, to expansive oceans and scenic plateaus and canyons, the landforms of Earth are diverse and awe-inspiring. In this course, you will explore the character, distribution and evolution of landforms as they reflect millions of years of complex change involving both the Earth's surface and internal processes. Upon completion of this course you will have an essential understanding of earth's landforms, their geologic history and the physical and chemical processes that sculpt them. You will be able to explain connections between earth's physical features, natural resource distribution, and the quality of human life. Principal topics covered will include: plate tectonics, earthquakes, erosion and weathering, sedimentation, rock types, mountains, volcanoes, plateaus, coasts, the plains, deserts, glaciation, and the economics of earth's physical features. Particular emphasis will be placed on understanding the evolution of earth's geologic features using specific landform examples from North America and elsewhere. Competences: S1A, S2B, S2C, S4. Faculty: Staff

SW 293
AGING REASON
Undergraduate
Reasoning, like human life, comes in layers that need to be unravelled if we are to make sense of it. As Bernard Shaw put it, "Reason makes a good servant but a bad master" That may come as a surprising thought to those of us brought up to think that everything desirable and true is scientific and science is based on reason. This course will examine the maturing of the reasoning processes employed in science, the mechanisms or methodologies used to validate data, namely the development of scientific reasoning in the Western hemisphere from naive realism through logical positivism to Popperian falsification. This will help us to clarify the status of the data that we use or write about. It will also examine the maturing of the biological processes of the human being, the mechanisms of aging, including modern research experience demonstrating the way in which underlying assumptions can influence both reasoning about and experience of biological aging processes. Class presentation and discussion backed up by library-based reading. In class, we will focus on the key concepts of paradigms in science and religion, in youth and aging and the way in which basic assumptions influence perception, behavior, and experience.
SW 294
GLOBAL ENVIRONMENTAL CHANGE
Undergraduate
Many ongoing changes in the natural environment are so extensive in scale that scientists consider them a threat to sustaining a reasonable quality of life for humans worldwide. Examples of issues of particular and urgent concern are: the rapid changes in the chemistry of the atmosphere that can alter the earth's prevailing climate patterns; the amount of pollutants in the oceans that can breach essential parts of the food chain; the consumption or contamination of natural resources, such as minerals for industrial use, petroleum, groundwater, and agriculturally important soils and; the spatial reduction of terrestrial biomes with corresponding extinctions of organisms. In this course, we will review and analyze the recent earth science research on these and other global change issues in order to assess their relative importance for the human community. We will also examine and evaluate how human activities can have direct and causal relationships to specific adverse global environmental changes. Additional topics that will be addressed include emerging theories of sustainable development, ecological ("Green") economics, and environmental laws. Through readings, discussions, lectures, and original inquiry, students will be introduced to the principal global environmental change issues. Students will select one issue for more detailed analysis and utilize the course learning experience to formulate a plan for personal, governmental, and/or global action to address an environmental problem. Pre-1999 Competencies: PW-2, PW-A. Faculty: Kevin Downing

SW 295
SUCCESSFUL INTERVIEWING
Undergraduate
Interviewing "the process of asking and answering questions" is a part of everyday experience. This course introduces and explores the fundamental principles, theories and techniques of interviewing including the interpersonal communication process, common types of interviews, interview structure, questions and responses. Through collaborative and experiential learning activities, students will prepare for and participate in all aspects of the interview process as the interviewer and interviewee. Competences: L-7, FX, H-3-X, S-3-X

SW 296
A BIOLOGICAL APPROACH TO VIOLENCE
Undergraduate
There is a significant difference of opinion concerning aggressive or violent human behavior. Is it a social response to an environment of poverty and other psychological phenomena? Or can it be explained in terms of a biochemical syndrome consistent with scientific data and therefore remediable with psychoactive drugs? In this course, students will be introduced to normal brain anatomy and biochemistry and the technologies that have helped us understand cerebral function. We will examine literature in the biological, medical, and psychological sciences in an effort to develop and demonstrate critical reading and analytic skills of both scientific and pseudoscientific material. We will explore the relative contributions of environment and biology to understanding aggressive and violent behavior as well as potential modifiers of the same. Pre-'99 Competencies: PW-4, PW-E, HC-4. BA'99 Competencies: H-3-A, S-2-A, S-3-B. Faculty: Gary Kohn

SW 297
WRITING THE EARTH
Undergraduate
In this course, students will learn creative writing while exploring geologic history. Geology is the window into history of the earth and all the organisms that have lived and died here. Every work in quarries, road cuts, or pebbles on a beach carries part of the earth's story. Students will learn to read rocks and open the book of the earth history. There, one can find the drama of evolution and mass extinction, the violent uplift of mountains and their slow erosion into plains, the crashing of seas flooding the continents and the drying of sediments abandoned as the seas recede, the first steps of an ape that would be human and the changes that made all of us from that beginning. Earth history is filled with drama, with actual adventure, and light romance, and grim catastrophe. Factual writing alone cannot communicate the emotions we feel as we experience earth's own poetry. For that, we need the depth and energy of creative expression. In this course, students will learn the basics of reading rocks and explore earth history for themselves. They will also learn to communicate their experience to others through creative writing in fiction, essays, or poetry. Regular class meetings will be held with full day field trips. Class time will be divided between the explorations of geologic concepts and creative writing. Geologic concepts will be introduced through readings, discussion, and hands-on experience with real rocks. Creative writing will be introduced through readings, discussions, and writing exercises. Most of the writing exercises for each class will be based on student's hands-on experience in that class.

SW 298
EXPLORING THE INTERNET
Undergraduate
In this introductory-level course, you will develop a broad knowledge of the Internet technology and understand how it can be useful to personal and work life. The class will be "hands on" and you will learn how to access Internet applications and use them. We will discuss the history of the Internet, getting connected to the Internet, and the various functions used on the Internet -including email, Web Browsers, emerging technologies, and search engines. We will also create websites, focusing on their design, rather than the HTML coding. Competencies: F-X, S-1-D, S-5, S-1-X. Faculty: Staff. See a syllabus at http://condor.depaul.edu/~dmurphy/
SW 299
MATTERS OF SCIENCE
Undergraduate
One set of laws describes all motion. All matter is made of atoms (actually quarks and leptons!). Stars live and die like everything else. All life is based on the same genetic code. These basic ideas of science and their application to technology are the focus of this course and they offer you what will probably be a new way of thinking about science. If you can get excited about recognizing and discovering what lies behind many everyday encounters with the world around you -- and some not so everyday as well -- just for the enjoyment of learning about them and how they work, this course may be the way to put capstones on your Physical World competencies. This will be a course unlike any other you have experienced -- you will be learning on an independent study basis but also interacting and exchanging ideas with others in a virtual classroom located on the Internet. Through your research in response to questions and pursuit of independent projects, guidance by a primary text, other readings and the instructor, the fruits of your classmates' efforts, and the unexpected that can come from (written) conversation, this course will touch on the roots of most scientific disciplines (eg. physics, chemistry, astronomy, biology, ecology). It will do so in ways that should help you to see their connections to each other and to various technologies. You will also examine your own problem-solving strategies and various aspects of scientific inquiry. An overall outcome of achieving the competencies of this course will be the development of a scientific literacy to build on in the future. You are invited to visit the course home page: www.depaul.edu/~mfiddler/ms/home.html * Prerequisites: 1. Willingness to participate in an experimental learning activity. 2. Major Seminar / Research Seminar or high level of comfort with library research. 3. Experience with Windows' and use of electronic mail. 4. Access to the Internet. This class meets twice as a group; the first night and sixth week of the quarter. Pre-1999 Competencies: PW-9, PW-10. BA-1999 Competencies: E-1, E-2. Faculty: Morris Fiddler

SW 300
USING THE INTERNET TO PARTICIPATE IN THE INTERNATIONAL COMMUNITY
Undergraduate
This course provides an overview of the structure and work of the international community that revolves around the United Nations and the growing role of citizen advocacy (nonprofit) organizations in Chicago and around the world. Chicago hosts the second largest number of nonprofit organizations in the country. Students use the course web page to develop Internet research and email skills while focusing on international issues. Homework is posted on the web page, assignments are sent and received via email, and Internet search skills are developed through the course term paper. *Students must have access to the Internet through any personal account or use the university computer labs. Pre-1999 Competencies: HC-2, HC-D, HC-X. BA'99 Competencies: H-1-F, H-2-G, H-5. Faculty: Patricia Szczerba.

SW 315
ENVIRONMENTAL ETHICS AND SUSTAINABILITY
Undergraduate
This experiential class focuses on readings from Leopold’s A Sand County Almanac, including his important essay, “Thinking Like a Mountain?” as well as readings from John Muir, who grew up in nearby Portage, Wisconsin. Students will visit the Leopold Center, the world’s greenest building, as well as the famous ‘shack” where Leopold lived and wrote. They will also tour the Crane Foundation, which works with endangered waterbirds around the world. A visit to one of America’s largest farmers’ markets, followed by a sustainable lunch at a Wisconsin restaurant, will provide ideas on how Leopold’s philosophy can be brought into daily life. During the class, students will reside at Holy Wisdom, a retreat center with a restored prairie in Madison. The area to be visited is unique in the Midwest. Most of the prairie land in the region was formed when vast glaciers crushed the land flat during various Ice Ages in the past. But a small area of southwestern Wisconsin, northwestern Illinois, and eastern Minnesota were never glaciated. There, the hill-and-stream erosion of more than 400,000 years has led to a quite different environment than the surrounding area. Called the “Driftless Area” (because there was no glacial “drift” or dust), the region is famously scenic and was home to the great American architect Frank Lloyd Wright, whose designs reflect the landscape of the region. As the course will be held in autumn, we may anticipate beautiful colors in the deciduous forests. Competencies: A4, S4. Faculty: Patricia Monaghan

SW 316
RISE OF THE MAMMALS
Undergraduate
The modern world is dominated by mammals. Mammals have evolved, adapted and currently thrive in tremendously diverse habitats, including the oceans, lakes, rivers, tropical and temperate forests, mountain regions, caves, deserts, grasslands, the arctic tundra and polar regions. How did mammals become so diverse on the planet? Why did they remain small and relatively insignificant for the first two-thirds of their extraordinary 200 million year history? Where and when did modern mammal groups originate? What does the fossil record indicate about the character and timing of human physical and behavioral evolution? In this course, we will explore the extensive fossil record of mammals in order to gain insights to these and other questions concerning the history of this critically important animal group. Through discussions, readings, lectures, labs, examination of fossil specimens, original inquiry, analysis of museum exhibits, and application of scientific reasoning, students will be introduced to the fossil record of mammals and its critical role in establishing patterns of mammalian evolution and historical biogeography. Topics will include: fossil preservation; determining the age of fossil mammals; the transition from reptiles to mammals; Mesozoic mammals; the rise of mammals and extinction of large dinosaurs; evaluating the ecology of ancient mammals; and, the origins and diversification of modern mammal groups. Particular emphasis will be placed on examining the fossil record of primates leading to Homo sapiens and relating ancient mammal biodiversity patterns to current mammal extinction concerns. Pre-1999 Competencies: PW-2, PW-A, PW-F. Faculty: Kevin Downing
SW 317
BODY SCAN: PRACTICAL ANATOMY AND YOUR ENVIRONMENT
Undergraduate
We are confronted daily with a barrage of physical challenges to our body—particularly, our musculoskeletal system. This we experience as pain and altered or loss of function: headaches, backaches, muscle spasms, pinched nerves, etc. When assessing the physical ramifications of stress and strain, an understanding of basic anatomy in the context of our environmental issues (i.e., work, exercise) and the process of aging, is key to making positive choices and changes. In this course, students will utilize a text/workbook, clinical case histories, presentation of a research topic, and class discussions. Pre-1999 Competencies: PW-4, PW-5, PW-E. BA-1999 Competencies: S-2-A, S-2-C, S-2-D. Faculty: Maureen Kreuser

SW 318
THE UNIVERSE, SCIENCE, AND THE QUEST FOR UNDERSTANDING
Undergraduate
Astronomy, one of the oldest sciences, links our wonder at the beauty of the night sky, and our quest for meaning, and practical necessities such as navigation and communications. Students will discover in a playful, conceptual, and generally non-mathematical way how science, with intuition, inspiration, and logic helps us to understand our most basic questions: how are the stars made, how is the stuff that we are made of produced, where is the universe headed, and what lies at the end of time? Learning in class will be achieved by a combination of readings, discussion, observational exercises, with one field trip to a major scientific site. Pre-1999 Competencies: PW-2, PW-F, AL-5. BA-1999 Competencies: S-1-A, S-3-X, A-3-E. Faculty: Harvey Nystrom

SW 319
ENCOUNTERING UNCERTAINTY AND CHANGE
Undergraduate
Ambiguity, confusion, doubt—these seem to be synonyms for uncertainty. But the word has had a special meaning since quantum physicist Werner Heisenberg articulated the Uncertainty Principle more than 50 years ago. What effect does an observer have on an event? Can we accurately judge two things at once? How does the decision what to analyze effect the outcome of the analysis? These are some of the questions which the Uncertainty Principle poses. This class explores the revolutionary change from mechanistic science to relativity and quantum theory. The challenge of Uncertainty in the arts and social sciences will also be considered. Finally, the role which Uncertainty plays in our lives will be explored. This course will involve selected readings, including nonmathematical explanations of Heisenberg’s work as well as application of his theory to other disciplines. Videos and films will provide other texts for examination. Classroom work will include thought experiments, small-group interaction, and nongraded writing; tour of Fermilab particle accelerator will be required. Pre-‘99 Competencies: PW-2, PW-B, AL-3, WW. Faculty: Patricia Monaghan

SW 320
CHAOS AND COMPLEXITY
Undergraduate
Chaos: the word is often used to indicate a state of utter disorder. Yet dynamical systems theory—the science of chaos—suggests that the connection between chaos and order is not a simple opposition. Chaos may, in fact, be the seedbed for emergent order. This course examines theories of chaos and the connected theories of complexity, both in terms of scientific applications and as metaphors for the creative process. Students will develop a solid grounding in the development and current state of chaos/complexity theory. Several media, together with simple experimentation, will be used to study fractal geometry, entropy and negentropy, and thermodynamics. After this grounding, students will have the opportunity to analyze their own creative process in terms of the principles of chaos and complexity. Pre-‘99 Competencies: PW-2, PW-F, AL-5. Faculty: Pat Monaghan.

SW 321
BIOLOGY AS DESTINY: GENETICS AND THE RE-MAKING OF HUMAN KIND
Undergraduate
From scholarly conferences which debate the site of the “gene for criminality” to mass-appeal treatises on IQ such as The Bell Curve, contemporary biological research is “turning up the heat” on the long-simmering “nature vs. nurture” controversy. The question of whether we are determined by our biology or are products of our culture is once again on the center stage of public concern. Moreover, it seems the very definition of ourselves as unique organisms is under assault. From transplanting the organs of other species into humans, test-tube babies, ans surrogate mothers - to genetic testing, DNA fingerprinting, and sex selecting - from cloning to engineering super-humans: these are but a small sample of the disturbing potential suggested by biology’s current “tinkering with life.” This course explores the intermingling of biological theories and methods, political ideologies, and social dynamics found in research such as the project to map the human genome. Primarily through lecture, we will first establish a basic knowledge of current genetics. On that basis, through discussion and class exercises, we will explore the history and present status of the shifting definition of “human nature” We will be interested particularly in how the scientific and social processes involved are influenced by class, race, culture, and gender considerations.
SW 322
EVOLUTION: A HISTORY OF CONTROVERSY
Undergraduate
The biological universe is wondrously complex and diverse. Evolutionary biologists study the processes that brought about that diversity and complexity. Evolutionary theory attempts to answer many questions. What are the different kinds of organisms? Why are there these kinds of organisms and not others? By what mechanisms do new kinds appear or old kinds change? What is a biologic species? Why do some organisms have sex while others do not? The history of evolutionary thought is a history of controversies in evolutionary thought. We will examine the evidence and arguments on all sides of a question and we will discover how that evidence and those arguments changed through time. Through lecture, readings, and hands-on activities, students will be introduced to form and content of major evolutionary debates. Through class discussion and short position papers, students will argue their opinions on these debates from the point of view of their selected competencies. Students will be expected to complete an exploratory visit to the Field Museum as a homework assignment. The Internet is a lively resource for any course on evolution. In this class, students will gain some Internet literacy as they search for sources and view newsgroup debates. They may even correspond with some of today's evolutionary thinkers. We will also have a pass-word-protected newsgroup for private class discussion.

SW 323
EARTH SCIENCE AND THE HUMAN FUTURE
Undergraduate
This course is rooted in the scientific investigation of the earth, its elements and history, with an eye toward patterns leading to probable future changes. The learning experience includes current literature in relevant disciplines, journal writing and an outdoor lab component. Pre-1999 Competencies: PW2, PW5, ALF. BA-1999 Competencies: S1A, A1E, S2C, S4.

SW 324
THE BUSINESS OF ENERGY
Undergraduate
In this class we will be discussing some of the history of electrical power generation and regulations that formed the way the business developed in the United States. We will review environmental regulations and their effect on the electrical power generation business today. We will evaluate the deregulation of the electrical generation business and discuss the facts, the pro and cons and current events occurring throughout the United States. Finally, the students will be challenged to propose solutions to avoid energy shortages in the future. Pre-1999 Competencies: PW-5, PW-G, PW-J, PW-K. PW-M. BA-1999 Competencies: S1E, S2B, S2C, S3C, S4.

SW 325
THROUGH THE EYES OF THE SCIENTISTS: THE EVOLVING UNIVERSE
Undergraduate
Science appears daunting, but few subjects are as exciting and dramatic as the ageless story of the human mind challenging itself to figure out something altogether new about our evolving universe. Through rich and varied original writings of the greatest scientific thinkers, we will explore some of the most remarkable milestones and breakthroughs in scientific thought from physics to paleontology. Famous scientific personalities will come to life in their vivid explanations of astonishing insights and experiences of discovery in their memoirs and biographies. We will glean understanding into the adventure of the creative process by looking through the eyes of the scientist and ponder the paradoxes, mystery and beauty of human life and what it means to be human. We will emphasize both the contrasts and continuity of scientific thought between the ancient and modern eras, and proceed from the premise that science is inspired by simple wonder and curiosity about the universe of life. By asking "why?", we will live science in its purest form, for each answer only sparks new questions and allows us to take the words of Einstein to heart: "The important thing is not to stop questioning. Curiosity has its own reason for existing. Never lose a holy curiosity." Competences: S4, S3E, A3G, A3X.

SW 326
ENERGY: WHAT IT IS AND HOW WE USE IT EVERY DAY
Undergraduate
Energy: what is it? Many of us take it for granted without understanding it. We typically use up to three different forms of energy dozens of times a day. Where does it come from? How do we use it? Because it is so interwoven into our daily lives, we need to be aware of how we use energy and the consequences. This course will explore these ideas while laying the foundation for basic understanding of energy in our daily lives. Topics covered will include what energy is, the different ways we consume it, the technologies behind the different ways we use energy, including different fuels, energy conversion, electricity, nuclear power, energy from water, wind power, and solar energy. Finally, we'll take a look to the future and discuss resources, costs and prices, and alternatives. Demonstrations and mini lab sessions will be included to offer students direct experience with forms of energy. Competences: S4, S1A, S3D, S2C. Faculty: John Tallarovic.
SW 327
WEB SITE DESIGN FOR ELEMENTARY SCHOOLS
Undergraduate
In this web page design course, students will design a web site for a Catholic elementary school as a service learning project in a collaboration between SNL and the Office of Catholic Education, Chicago. Depending on the size of the school, two students may volunteer to collaborate on one school or work alone. Students will meet for seven to eight classes and allocate time to meet with their school representative the other two to three classes. These meetings do not have to be traditional class time but can be scheduled at the convenience of the student and school representative. Students will receive material from their school representative that includes text and images and will collaborate with the school representative in designing the web site. Class time will include editing images, scanning, inserting sound clips and evaluating school web pages. Students must know inserting formatted text, links, tables and targets. Because of the skill level required for this project, students must apply for and be approved by the instructor before course registration. Applicants must have successfully passed the Internet Technology and Its Applications course or have significant experience in fundamentals of web page design with Netscape Composer. To apply for this course, contact Pat Szczerba at pszczerb@condor.depaul.edu as early as possible. Include the link to your current web site home page. Students will be admitted to this course who demonstrate web page design skills required to produce a quality web site for an elementary school. Pre-requisites: approval by instructor. Class is limited to 15 students. Competencies: BA-1999 H2H, S3X, A2D. Pre-1999: HCR, PWF, ALM. Course web site: www.depaul.edu/~pszczerb/sch.html

SW 328
INFECTIOUS DISEASE: A GLOBAL CHALLENGE
Undergraduate
In 1967 the United States Surgeon General announced that it was "time to close the book on infectious disease". Antibiotics had been introduced in the 1940's, there was an ever-lengthening list of diseases for which immunization was available, and many world health officials imagined a future free of infectious diseases. Yet, as we begin the twenty-first century, infectious diseases are still the leading cause of death in the world. Why? How do we begin to understand the emergence of AIDS, Ebola virus, Lyme disease or Hantavirus? How can we explain the worldwide reemergence of tuberculosis, a disease that had come close to being relegated to history books? In this online course we will seek answers as we study the nature of microbes and the complex, often interrelated factors that contribute to their ability to challenge us even as we pit our science and technologies against them. We will examine such factors as population growth, urbanization, ecological disruption, human migration and antibiotic misuse. In 1996 the Director-General of the World Health Organization announced, "We stand on the brink of a global crisis in infectious diseases." Clearly the book on infectious disease is still wide open, and we will read some of its pages. Competencies: H5, S2D, S3B. Faculty: Siobhan N' Bhuachalla

SW 329
DATABASE DEVELOPMENT FOR MANAGING INFORMATION
Undergraduate
Database Development for Managing Information is a two competence course over a full 10 week term (4 Credits) term. Using the Office 2010 tools suite (in particular Access 2010), this course takes students through the entire process for building a database system that will be used to capture, store and present information. In addition to database concepts like designs, reports and SQL queries, the students will discuss and analyze relationships between technology and society. Competences: S1D, S3X, H2B, FX.

SW 330
THE LIVING BIOSPHERE: A NEW LOOK AT LIFE ON EARTH
Undergraduate
This course will expose students to nature's dynamic synergy through a variety of integrative learning techniques using modern technology, videos, group projects and provocative readings. Students will develop a strong understanding of Gaia theory and its place in contemporary natural science. This theory, proposed by the English chemist, James E. Lovelock, conceptualizes the earth as a large nesting, interactive system of life, soil, atmosphere and ocean. Earth is assumed to be a breathing biosphere; a symbiotic world. This course presents radical and cutting-edge views of life on earth for learners' discussion, reflection and critique. Competencies: S4, S2D, S3B, L7, S1A Faculty: Donna Jones-IIsley.

SW 331
BIRDS IN THE ENVIRONMENT: ORNITHOLOGY
Undergraduate
Does habitat and biodiversity loss pertain to cities like Chicago? Could species and habitats still exist in urban areas, which are so different from jungle and ocean? The answer to both questions is yes when we look at seasonal bird migration. Birds have migrated to and from nesting and breeding sites for thousands of years. They can travel from pole to pole, not only passing through our backyards, but even staying and nesting there. The goal of our class is to experience birds and habitat that are unique to this area and to study their relationship to humans. This relationship puts birds in peril by forcing them into concentrated, small patches of habitat yet shows signs of hope in the form of protecting habitats such as our forest preserves and restoring habitats such as the Midewin prairie. Participants should expect to work in the field on some Friday evenings in addition to five Saturdays, with classroom discussion interspersed with field experiences. Competencies: S1A, S2A, S3C, S4. Faculty: Kurt Leslie
SW 332  
VIRTUAL BIODIVERSITY: EXAMINING LIFE ON EARTH  
Undergraduate  
The exploration and measurement of the amount of genetic, species, and ecological variation on earth is emerging as one of science's and society's most important and urgent endeavors. Scientific efforts to study earth's biodiversity have intensified because of our growing appreciation of the role human population growth and urbanization play in accelerating the extinction of plant and animal species through the destruction of critical habitats. Since life on earth has been diversifying for at least 3.8 billion years, but most of the biodiversity that once existed (as much as 99%) has been lost to extinction processes, we will focus on exploring what are "normal" levels of extinction on earth. Central questions addressed in this course are: How is the security of humanity dependent on biological diversity? Is a mass extinction event currently in progress on earth? Do we have an obligation to future generations to keep life on the planet as diverse as possible? Students will be introduced to major biodiversity issues through discussions, readings, lectures, labs, and original inquiry. Students are required to participate in a self-directed fieldtrip to a biological reserve and to develop a detailed research paper on a biodiversity issue of their choice structured in a scientific format. This course will employ a great variety of online biodiversity resources available at institutional websites. Subjects of the course will include: different views the biosphere; biodiversity trends in earth's fossil record; the value of and human dependence on biodiversity; biodiversity at risk; policies, economics, and technology to protect biodiversity. Competencies: S4, S2C, S3D, S2A.  Faculty: Staff.

SW 333  
THE HUMAN GENOME PROJECT  
Undergraduate  
This course presents a basic understanding of genetic principles necessary to discuss the impact on society of the Human Genome Project. Classical genetics, from its inception as a discipline, held that every organism's genetic makeup was conditioned primarily by environmental factors. Darwin summarized this by claiming that environmental pressures produced organisms whose genetic makeup ensured survival in a particular environment (the survival of the fittest). Contemporary genetics, however, is entering a new era in which both the environment and genetic technologies share in the mission of modifying an organism's genetic makeup. The project of sequencing the human genome has enabled scientists for the first time to identify health-related genes and, based on this, to design new treatments for age-old diseases. At the same time, the Human Genome Project, and genetic research based on it, is raising ethical concerns for the way genetic knowledge will impact health care into the 21st century. Genomics, as the new discipline is being called, explores this complex but fascinating world of cutting-edge genetic research. It is this very world that we will explore in our class setting through a variety of methods including laboratory investigations, class discussions, and student presentations. This class begins by meeting at Truman College. Subsequent sessions will be held at both Truman College and DePaul University's Loop Campus. You may register for up to three competencies. Competencies: S4, S1B, S2A, S2D, S3A.  Faculty: Barbara Berchieri

SW 334  
EVERYDAY CHEMISTRY  
Undergraduate  
Each day we are immersed in chemicals and are participants in and observers of many chemical reactions. This course is designed to teach chemistry and physical science through the observation and explanation of many events we observe in daily life. It has been specially planned for students who have little or no background in science. We will examine the chemistry of substances from table salt and food additives, to fuels for our cars and homes, to semiconductors, new plastics, and revolutionary materials that will improve our lives in the 21st century. This course will emphasize the interconnections in our world through science. We will address safety and the "positive" and "negative" impact of chemicals on our world. There is a chemistry kit required for this course, so that you can perform the experiments safely at home. It is available directly from Http://www.AtHomeScience.com/and is listed as ChemKit-334 Only for DePaul Univ. SW-334: Everyday Chemistry. Please order the kit as soon as you register for the course. Competencies: S4, S1A, S1E, S3A.  Faculty: Cecelia A. Radiowski

SW 335  
USING THE INTERNET TO ENHANCE YOUR CAREER  
Undergraduate  
The Internet has radically expanded the options available to people looking for employment and the alternatives available to employers looking for people. These new options are available for the most part only to people who know how to use the PC, who understand the internet, and who can capitalize on the bewildering array of resources in this new medium. This course will focus on how to make effective use of electronic media to manage and enhance your career. Students will participate in both individual and group exercises designed to sharpen their web-based research, networking, personal marketing, and communication skills. BA-1999 Competencies: S3F, FX. Pre-1999 Competencies: PW3, WW.
The twentieth century not only brought us the dawn of the Information Age, but continued to bring us rapid changes in information technology. All computer systems and applications will change over time. As business requirements change and new techniques are implemented, computers and applications will need changes to keep pace. As we begin the 21st century, computer literacy will undoubtedly become prerequisite in whatever career a student chooses. In this course, we will enhance your knowledge of Microsoft Office software applications. The class consists of some lecture and mostly computer Lab activities. We will expand your knowledge and skills required for communicating and moving information electronically by introducing you to application shortcuts and seldom used features. We will also gain an appreciation for the effect of information technology on people. The framework of this course is based on the use of Microsoft Office 2007 software to include Word, Excel, Access, PowerPoint and Office Tools with specific hands-on exercises in the computer Lab. This class assumes you have a basic knowledge of earlier versions of Microsoft Office (2000-03). We will also introduce you to features of the Vista Operating System. Competencies: S1D, S3X, S5, FX. Faculty: Michael Lightfoot

Syllabus: [http://www.snl.depaul.edu/WebMedia/People/SW_336_Lightfoot.pdf](http://www.snl.depaul.edu/WebMedia/People/SW_336_Lightfoot.pdf)

This course will address the principles of genetics with an emphasis on the genetic code of the human genome. In this course we will examine: how the genetic code is stored, how it is used, how it is evolving, how it is passed from one generation to the next, the consequences of genetic code errors, the medical, technological, legal and ethical issues associated with the human genome. We will discuss how we can, and how we should, use the information on the human genome. Competencies: S1E, S2A, S2D, S3B, S3D. Faculty: Yoav Ben-Yoseph

In ancient times, science and philosophy were one and the same. Our contemporary views of nature and the scientific method are relatively late additions to the world’s bank of knowledge. In this class, students will explore how thinkers in older societies make sense of nature. Systems to be examined include mythological approaches to explaining the natural world, and ancient laws derived from Anthropology, Archeology, Astronomy and the theories of Quantum Physics. Students may take this course for only one competence. Competencies: S3A, S3E, H2X, A3G. Faculty: Elvrid Lawrence

This course concerns the effective use of microcomputer technology for working professionals, business analysts, project administrators, and support specialists. The course utilizes a project-oriented approach to achieving computer software proficiency in a PC environment, using word processing, spreadsheets, databases, e-mail, and Internet applications. Students will analyze real-world situations, identify underlying issues and possible solutions, and apply best use of technology and available resources to accomplish tasks and goals. Students should have a basic familiarity with the use of microcomputers in a Windows environment. Competencies: S-1-D, S-5, F-X. Instructor: Staff

Today, global climate change is threatening human society. Sometimes incorrectly called “global warming,” these shifts in the earth’s weather systems have been tied to the burning of fossil fuels in industrialized countries like the United States. But we have to drive to work, don’t we? We need to heat our homes, don’t we? Besides, what difference does one person make? This course considers the way that human life is connected to the world around us. It also provides an opportunity to see how you might make changes in response to growing concern over global climate change. The course does not propose one solution over another. Rather, it encourages you to become aware of ecological issues and to determine your own answers to the questions they raise. In this class, you will learn to assess the effect of personal choices on the earth and be introduced to other possible choices. Competences: S1C, S3C, S4, FX. Faculty: Staff

The objective of this course is to provide a basic understanding of Information Technology security. It will address technology in detail approach for both home and work protection. This course will provide an overview of the objectives of security and a framework for understanding fundamentals which should be in place for an Information Technology setting to achieve an adequate security level. Competencies: H-2-C, S-3-A, S-3-X, F-X. Faculty: LeRoy Foster.
SW 343
SYSTEMS IN BIOLOGY
Undergraduate
What is human biology? What are cellular functions? Homeostasis? How, precisely, does the human being work? In this course, students will examine how biological systems work together to create a functional human. Each week, students look at a different human biological system, will examine the basic cellular makeup/anatomy of that system as well as the general functioning of that system, and then will apply that information to overall health issues. BA-1999 Competencies: S4, S1A, S2A, S2C, S2D, S3B Pre-1999 Competencies: PW2, PW4, PWG, PWH, PWK. Faculty: Patricia Stifter.

SW 344
THE INTERNET
Undergraduate
In this course, students will be introduced to the world of the Internet. Students will develop some knowledge of internet technology and how it can be useful in personal and work life. Items to be discussed include Internet history, getting connected, and such functions as email, browsing and search engines. You may register for only one competence. BA-1999 Competencies: S3X, FX. Pre-1999 Competencies: PWF, WW.

SW 345
CREATING PRESENTATIONS IN POWERPOINT, WORD, AND PUBLISHER
Undergraduate
As the workplace becomes increasingly sophisticated, more and more companies expect employees to create attractive PowerPoint presentations, use Publisher to create flyers, brochures and newsletters, and create attractive Word documents. In this course, students will learn design skills in creating work and classroom presentations using PowerPoint, Word and Publisher. Students are encouraged to use course materials from other classes and/or from the workplace and format these materials in PowerPoint, Word and Publisher. Students can then present these projects in other classes and at the workplace but are not required to do so. This course utilizes a project-oriented approach to achieving skills in presentation software. Students will analyze real-world situations, identify appropriate software solutions and apply the best software to accomplish tasks and goals. This course will also include basic Internet and Excel functions. Students should have a basic familiarity with the use of computers in a Windows environment. Course website: condor.depaul.edu/~pszczerb/pwp.html. Thursdays, Loop Campus. Competences: S5, A2X, FX, S1D. Faculty: Patricia A. Szczepanek.

SW 346
WHAT IS SCIENCE?
Undergraduate
What comes to mind when you think about science and technology? Do they seem mysterious, incomprehensible and yet powerful? Could science and the machines it creates both benefit some and harm others? In the best sense, science is about asking questions and continually questioning itself. It is considered a systematic, precise, objective way to study the natural world. Yet if science attempts to be neutral and unbiased in its approach, its results historically leave us with a bitter irony. One example is nuclear energy, it gives us terrible power to destroy and creates extremely harmful radioactive waste yet thru modern medicine using nuclear equipment, also has saved many lives and eliminated suffering. Our daily lives are governed by scientific and technological systems run by experts. Foresters know how to plant trees, but not how to establish conditions under which villagers in developing countries can manage natural forests for themselves. Engineers know how to develop technologies that benefit industries, but not how to persuade factories from polluting. How much do we really know about the definition of science and its influence on our culture? Did pre-farming cultures use science as a way of understanding their role in the world or is science a phenomenon of modern cultures? In this course, students will examine through critical thinking the nature and history of science and its effects on the future. Students will also address issues in conflicting global views of the use and abuse of technology and developing methods of sharing, controlling, and monitoring our scientific output. BA-1999 Competencies: H5, S2X, S4 Pre-1999 Competencies: HCX, PW2, PWF, PWP. Faculty: Kurt Leslie.

SW 347
ENVIRONMENTAL ETHICS: HUMAN VALUES, CULTURE AND THE ENVIRONMENT
Undergraduate
For thousands of years humans, from the time they were able to make the first tools to the production of nuclear technologies, have changed and in many cases radically altered their environment. Their perceptions (values and culture) with respect to the human relationship (and or responsibility) to the environmental spaces in which they lived and or the global commons (like space and the oceans) for the benefit of their current or future society has been critical in influencing the way in which the integrity of the environment and global commons has been impacted. This course will provide a survey of various environmental ethics that have emerged during human history among Western and non-Western cultures; and how these divergent environmental ethics have shaped and influenced not only planetary but space ecosystems. This course will also examine the consequences of environmental ethics on past current and future human societies from economic, political, social and environmental health perspectives. This course is an excellent elective for business, education, religion, sociology/anthropology and science/engineering focus area who seek to understand the foundations and ramifications of human ethics, values and culture on decisions and policies which impact the global environment (or ecosystems). Competencies: A3C, A4, S3C, S4, FX. Faculty: Sylvia Hood Washington, MSE, Ph.D., ND.
SW 348
NATURE WRITING
Undergraduate
Observation is the beginning of science. It is also the beginning of the process of writing. This class is designed to encourage you to observe the natural world and to write clearly about it. Thus you will be simultaneously strengthening your observational skills and your expressive skills. You will observe a single natural setting over the course of a quarter, writing short prose pieces that follow specific guidelines. Some of these pieces will be posted on the class website for those outside the class to read, thus providing you with an experience of online publication. Basic skills in grammar and punctuation are assumed; although it is not a prerequisite, you will find it helpful to have completed College Writing before you start this class. Competences: A2A, A2X, S1A, S1X, S4. Faculty: Patricia Monaghan.

SW 349
RELATIONSHIPS BETWEEN PLANT AND HUMAN LIFE
Undergraduate
The purpose of this course is to increase student's awareness and understanding of plant structure, function and diversity, and to help students discover past, current and potential future uses of plants. This course uses Ethnobotany to help students understand how the scientific process leads to new understandings about how our world works and how it can aid us in understanding ways we use science in our lives. Specific learning objectives of the course are to understand and appreciate: (1) plant structure and function and the relationship between the two, (2) plant adaptations and how these adaptations affect the distribution and abundance of plants in nature, (3) the diversity of plants and the ways in which botanists group plants, (4) the way that science contributes to our understandings of how the world works and informs our decisions of how we want our society to be. Note: This course is also being offered to traditional-age Barat students. Dr. Berchiolli is an experienced SNL instructor who uses methods of instruction most conducive to adult students. SNL students will attend the first five weeks only. Competencies: S1A, S2C, S3C. Faculty: Barbara Berchiolli.

SW 350
P90/CAPSTONE SEMINAR: PHYSICAL WORLD
Undergraduate
Capstone Seminar is designed to permit students to explore a topic as a group integrating various methods of inquiry. Pre-99 students will address one set of capstone competencies of their choice (HC-9, HC-10; PW-9, PW-10; or AL-9, AL-10). BA-99 students may address the Advanced Electives (E-1, E-2). Specific assessment and evaluation criteria as well as learning activities will be articulated by the instructor for a particular section of the course. * Successful completion of Major Seminar or Research Seminar is required to register.

SW 352
TECHNOLOGY, TRAINING, AND HUMAN PERFORMANCE
Undergraduate
What Robinson & Robinson describe as “the shift from providing training to improving performance" has been cited as a top priority in our fast-paced, global economy. This course covers the principles of training and human performance through an analysis of real case studies in a number of work environments. The course will also present the necessary technology and instructional design tools so that students can design their own training program and develop a basic training and performance plan that reflects their own work environments. I will presume that students enrolling in the course have basic computer skills, including the ability to use and save work with Microsoft Word. Competencies: H-2-X, S-1-D, S-3-X, F-X. Faculty: Ruth Gannon Cook.

SW 353
THE CREATIVE BRAIN
Undergraduate
While brain structure and function can seem daunting, exploring this organ from the perspective of creative output gives learners a non-threatening frame of reference to which all can relate. Learners will look into traditional and contemporary theories of both creativity and brain versus mind, as well as how creativity is perceived in society. Competences: A3G, A5, H3X, S2A. Faculty: Staff.

SW 354
INTEGRATING MS OFFICE APPLICATIONS FOR REPORT WRITING
Undergraduate
Students will use an array of Microsoft applications and the Internet to set up a marketing conference spanning several days. They will create documents and solve problems using multiple applications to complete these tasks more efficiently. Competences: S-5, S-1-D, S-1-X, A-2-X, F-X. Faculty: Alexander Bodak III.
SW 355
COMPUTERS AND SOCIETY
Undergraduate
This course explores how computing technologies such as computer software, hardware, and networking have affected our society. You will examine the basics of how these technologies work and how they have affected areas of human endeavors. We will examine how these technologies changed, improved, simplified and complicated society. Competences: S1E, S3A, S3F, H2G. Faculty: David Lash

SW 356
DATABASE DESIGN AND IMPLEMENTATION FOR SMALL BUSINESS APPLICATIONS
Undergraduate
This course will teach non-computer literate persons to be able to translate a business problem into a conceptual database design, and further to convert the design into a database application using Microsoft Access. By the end of the course, the student should be able to apply knowledge to the following: (1) describing basic database concepts and using common database terminologies; (2) designing databases using appropriate designing notations; (3) translating a schema into a database application in Access; (4) conducting simple user-interface design; and (5) designing small business-based applications. Competences: A5, S1D, S3E, FX. Faculty: Staff

SW 357
URBAN GEOGRAPHY: THE STUDY OF CITIES
Undergraduate
Course topics include the following: early settlement patterns, their political and social development; transportation mechanisms and their impact on concentrated centers of population; consumerism and trade; locational factors for settlements; neighborhood development, from ghettos to gentrification; urban planning issues; ethnic diversity, poverty and social planning; the built environment of structures; modes of communication with respect to technology, its impact on the global population; comparisons/contrasts of contemporary development between global world cities and American cities. Competencies: A3G, H1H, H5, S3X. Faculty: Nadine Bopp

SW 358
INTRODUCTION TO SPREADSHEETS
Undergraduate
This is an introductory course will use Excel 2003 (Office XP). Topics include spreadsheet basics, formatting and printing, formulas and functions, charting, and data management. No prior knowledge of spreadsheet software is required; however, students are expected to have a working knowledge of Windows. Upon successful completion of this course, students will be able to do the following: create and test spreadsheets using Microsoft Excel 2003; explain and use functions, create pie, bar, column, and line graphs; explain and use linking and embedding; use clip art to add visual interest to a spreadsheet; and explain and use data management capabilities such as data forms, query, filter, subtotals, sort, and pivot tables. Competencies: H2C, S3A, S3X, FX. Faculty: LeRoy Foster

SW 359
EVERYDAY BIOMEDICAL ETHICS
Undergraduate
Right, wrong. Sometimes right, rarely wrong" Wrong for children, right for women" Biomedical issues are in the news almost every day, and often it's hard to understand what to think, even less how to think, about their ethical implications. Some ethical issues have a long history and substantial background, while others are so new that even ethical experts struggle. How can a non-expert intelligently read and understand what's published? Competencies: A3G, A4, H4, S1B, S3X. Faculty: Staff

SW 360
SOCIETY AND INFORMATION TECHNOLOGIES
Undergraduate
Humans have a long line of technological advances that includes tools, weapons, transportation, mechanical, industrial, and medical advances. On one hand, the computer is just another invention that is part of this long line of technological advances. On the other hand, the ability to program the computer makes it different with an incredible diversity of uses. Computer technology has made large impacts in diverse areas such as sports management, health care, employment, manufacturing, education, defense, and automobiles and many other areas. This course explores how computing technologies such as computer software and hardware, and networking has affected our society. Students will examine the basics of how these technologies work and how they have affected areas of human endeavors. We will examine how these technologies changed, improved, simplified and complicated society. Competencies: S3A, S3F, H2G. Faculty: Staff
SW 361
INTRODUCTION TO COMPUTER PRODUCTIVITY
Undergraduate
Microsoft Office is the most ubiquitous application suite in personal computing. There is little Office cannot do, from document creation and editing, e-mail and scheduling, spreadsheet and database management, desktop publishing, image editing and even Web design. In this course, we will explore several component applications of Office 2007, focusing on word processor Word, spreadsheet Excel and presentation software PowerPoint, with the goal of developing facility with each application individually and using an integrated approach. Competence: S5. Faculty: Staff

SW 362
INSTRUCTIONAL DESIGN FOR TRAINING
Undergraduate
This course will look at instructional design in much more depth than the Technology, Training and Human Performance Course. In this course, the student will study what Instructional Design is, how it works, and why it is important in the design of all types of career and educational training. The course will present various models of instructional design, then have the students design actual instructional training modules. Competencies: FX, S2X, H2X, H3X. Faculty: Ruth Gannon-Cook

SW 363
THE SCIENCE OF YOGA
Undergraduate
Yoga is an ancient system of spiritual development and transformation. In the process of spiritual development the practitioner of Yoga acquires a wide array of physical and psychological benefits that improves health and well being. Yoga and meditation (meditation is a branch of Yoga) has been demonstrated to be effective in relieving stress, treating anxiety and depression, preventing and healing injuries and improving the functioning of children with special needs. The Science of Yoga will explore the positive physical and psychological benefits of Yoga from a scientific perspective. We will examine scientific studies that have been done on the effects of Yoga and meditation to gain an understanding of why this system of spirituality has become an increasingly integral part of modern health and fitness practice. The ancient origins and philosophical foundations of Yoga will be evaluated in the context of modern understanding of physiological and psychological processes. Students in this class will practice Yoga and meditation techniques and keep a journal of the effects that they experience. They will compare their experiences with the data from scientific studies. Students will also share and compare their experiences from practicing Yoga and meditation with their classmates. Competences: S4, S1X, S1C, S2C. Faculty: Elvrid Lawrence

SW 364
WOMEN OF SCIENCE
Undergraduate
Students will explore the contributions of women scientists through recorded history, the essence and importance of their work, the social world in which they worked and their contemporaries, and the challenges they faced at various times in history. Each student will select a scientist about whom he or she will develop a final project, to include: biographical data, a synopsis of the scientist's socioeconomic and political world, description of her work and how it affected contemporary understanding of the world. Also, students will work in teams of 2 or 3 to find and present initiatives undertaken since 1945 to encourage involvement of women in science, math and technology fields. Competencies: A3C, H1B, H4, S1E, S3A. Faculty: Jennifer Holtz

SW 365
ADDICTION STUDIES
Undergraduate
Humans are an intensely curious species. This trait has led us to discover substances which make us feel calmer, more alert, more powerful, more connected to or more distant from our surroundings. Today we live with a wide array of drugs that affect mind and body. Whether we desire to feel light-headed, euphoric and relaxed or have our senses heightened there is a psychoactive drug available to alter our consciousness. Some of these drugs, such as alcohol, nicotine, caffeine, and inhalants, are legal in our society. Others such as stimulants, narcotics, hallucinogens, anabolic steroids, and prescription drugs for mood disorders, are legally restricted. When used appropriately many of these substances have the capacity to enhance our lives. Inappropriate use, however, carries the risk of addiction - often accompanied by personal, social and economic decline. This is an introductory course in the field of addiction studies. In this course we will examine the relationship between drugs and behavior, the personal and social concerns of drug-taking behavior and how drugs work in the body and mind. Legal and legally restricted drugs as well as medical drugs will be discussed. We will also cover issues of prevention, treatment and education. By the end of this course students will understand (1) the differences between use, abuse and addiction to drugs; (2) the extent of substance abuse in the United States today; (3) the legal, social and cultural ramifications of substance abuse; (4) methods of treatment and prevention of substance abuse; (5) major classifications of addictive substances; and (6) how drugs work in mind and body. This course will be a mix of lecture, discussion, videos and other supplemental materials. In addition to their competence papers, students will work in small groups on projects related to addiction and will present their group's findings to the class. Competencies: A-3-X, H-2-A, H-3-F, S-2-C, S-3-B. Faculty: Robert Mills
SW 366
EXPRESSIVE ARTS THERAPY
Undergraduate
Expressive Arts Therapy is a multi-arts approach in which different art modalities are woven into the therapeutic process as appropriate to a client's situation. It is grounded not in any particular techniques or media but in the capacity of the arts to respond to human suffering. Various arts—poetry, movement, drawing, painting, journaling, improvisation, music, and sculpture—are used in a supportive setting to facilitate growth and healing. Expressive arts processes have been used successfully in almost all psychotherapeutic contexts, ranging from work with the severely ill to the facilitation of human growth and potential. There is a growing use of the arts in health education, hospice work, and in community art projects especially after catastrophic events. The class will be conducted in a workshop format in which theoretical content will be combined with experiential learning. Lecture, discussion, audio-visual presentation, experiential exercise, guest speakers, and field trips comprise the structure of the class. Competencies: A-2-A, A-5, H-3-X, S-3-B. Faculty: Joan Cantwell

SW 367
LEISURE, RECREATION, AND HEALTH
Undergraduate
This course will stimulate your thinking about the meaning of leisure in your life. Leisure today and historically has been central to the human experience. It is an elemental experience, essential to the total well-being of every person; it is a reflection and expression of the cultural values of a society; it is an important vehicle for treatment. Leisure and recreation services are also essential for healthy communities in terms of social climate, environmental quality, and economic stability. Leisure services comprise one of the largest and fastest growing industries in the world, whether measured in dollars spent, persons served, hours of time devoted, or resources used. The study of leisure and recreation is a broad discipline, combining diverse fields of study and professional practice. This course will (1) illustrate the importance of leisure to you and your loved ones, (2) contribute to your ability to become an informed consumer of leisure, (3) question the binary relationship of work and leisure and, (4) teach you how to use leisure to increase emotional and physical health, resulting in a higher quality of life. The course will be interactive and participatory. Competencies: A3D, H3F, H4, S1X. Faculty: Dan Hibbler

SW 368
ADVANCED POWERPOINT AND WORD
Undergraduate
Essential prerequisites: S5 skills in PowerPoint and Word In this advanced course, students will master higher level skills in PowerPoint and Word and study beginning principles of design. Course skills include organizing content, formatting content, collaborating on documents, and formatting and moving documents. This course will begin with studying the Microsoft Certificate Exams for PowerPoint and Word. Prerequisite skills: The following functions will not be “taught” but students will use them as the foundation for the advanced skills in this course. PPT: Students must be able to create slides, and insert a master slide, Draw toolbar elements, websites and sound. Word: Students must be knowledgeable in using the Draw toolbar, inserting web images, text wrapping, cropping images, and setting tabs. Materials: flash memory stick at least 128K and textbook. Course website: condor.depaul.edu/~pszczerb/apw.html Competences: A2D, A2X, S1X, FX. Faculty: Pat Szczerba

SW 369
CHRONIC ILLNESS: WHEN SOMETHING IS ALWAYS WRONG
Undergraduate
Everyone has either a disorder or a relative with a disorder, but often we focus only on the clinical information that physicians give us, especially since they can't quantify suffering and impact. We would do a bit of applied anatomy, but look at the psychosocial aspects of chronic illness as well, working primarily from “The Illness Narratives: Suffering, Healing, and the Human Condition” (Kleinman) Books about $50. Competences: H3F, S1B, S2A, S3B. Faculty: Jennifer Holtz

SW 370
SEXUAL HEALTH AND DEVELOPMENT
Undergraduate
This course will introduce students to a variety of topics related to human sexuality. The course will begin with a historical view of sexuality and lead to an analysis of current topics in sexuality related to health and physical development, culture and politics. The format of the course will consist of class meetings every other week and attentive participation to the online discussion board in between class sessions. Students will be required to read articles provided by the instructor and discuss them during class and on the course discussion board. The course will be divided into several modules related to sexual and physical health, relationships and gender issues, atypical sexual behavior and the roles of spirituality, culture, media, gender and aging. Students will participate in class presentations and present research on the web board related the competencies taken in the class. Competences: A1D, H3F, S4, S3B. Faculty: Dr. Anna Maria Wegierek
Dinosaurs are one of the most diverse and successful groups of vertebrates in earth's history. Originating over 220 million years ago, they dominated earth's land biomes for over 150 million years and diversified to include the largest land animals in earth's history, a wide range of aquatic groups, and even a diverse clade capable of flight (the birds). Consequently, mammals remained in the background as small nocturnal creatures during the dinosaurs long reign. Only after a cataclysmic extinction event 65 million years ago involving most dinosaurs groups did the mammals diversify into modern groups including our own primate lineage. This course will introduce students to the remarkable dinosaurs, tracking their origin, surveying their success, and evaluating their decline. Learning will emphasize investigation of the forms, function, and variation within the major dinosaur groups as well as the connections of dinosaur evolution to diverse factors such as climate change, ecology, biological competition, and mass extinction. The course learning activities will encompass discussions, readings, lectures, labs, internet resources, museum resources and original inquiry. Competencies: S1B, S2A, S4. Faculty: Kevin Downing. Syllabus: http://snl.depaul.edu/WebMedia/People/SW_371.pdf

In this course, students will be introduced to common computer applications in MS Office 2003: Word, Excel, Power Point, Access and Outlook. Students will also learn how to use internet Explorer and Netscape browsers as well as learn how to navigate the Web, mark favorite pages, save pages, set options and security levels. We will explore PCs and Mac operating system environments; reviewing their similarities and differences. Finally, we will develop basic technical skills in designing and managing home networks in terms of connections, security, and wireless systems. Competences: S5, S1D, FX. Faculty: Zaya Khananu

Teacher candidates will observe and interact with infants and toddlers (25 clock hours). Appropriate assessment and intervention methodologies will be emphasized. COREQUISITE: SCG 404.

Teacher candidates will observe and interact with young children and their families in programs, family conferences and home visits (25 clock hours). They also will observe and work with families of young children with special needs.

Students will observe and interact with preschool-age children (25 clock hours). Appropriate early childhood curricula will be emphasized. COREQUISITE(S): T&L 407. Advanced Teacher Candidate Standing is a prerequisite for this class.

Students will observe and interact with and teach primary-age children (25 clock hours). Appropriate curricula for children in the primary grades will be emphasized. COREQUISITE: T&L 408. Advanced Teacher Candidate Standing is a prerequisite for this class.
T&L 404
INTRODUCTION TO ELEMENTARY EDUCATION
Graduate
This is the first in a sequence of theory and practice courses that serves to familiarize teaching candidates with the world of elementary and middle schools. Through observation and participation in schools, self-reflection, independently created assignments, cooperative learning assignments and classroom discussion, candidates will acquire familiarity with schools and classrooms including: social/cultural context, classroom climate, classroom management, curricular coherence, standards-based instruction, and teacher professional beliefs and practices. Written critical reflections and papers serve as initial foundation for the development of teaching philosophies. COREQUISITES: For T&L EE majors, concurrent enrollment in SCG 403 and T&L 583 is required.

T&L 406
LANGUAGE DEVELOPMENT OF THE YOUNG CHILD
Graduate
This course will focus on the development of language in young children, including techniques and materials for use in assessing and enhancing speech and language development. Emphasis will be on issues relating to second language learners and young children with special needs. PREREQUISITE: SCG 404.

T&L 407
PREPRIMARY PROGRAMS: CURRICULUM AND STRATEGY
Graduate
Students will plan, implement and evaluate activities that promote the physical, emotional, social, spiritual, creative, and cognitive development of preschool children from diverse cultural and socioeconomic backgrounds. Methods of facilitating children's play; individualization through building on children's experiences, learning styles and interests; using media; and developing learning centers will be emphasized. Assessment practices are incorporated in this experience. PREREQUISITE: SCG 404. COREQUISITE: T&L 402.

T&L 409
PROFESSIONAL PRACTICE IN ELEMENTARY SCHOOLS
Graduate
This course is an introduction to the professional roles required of elementary school teachers. Students will develop a knowledge-based framework for considering the many factors involved in decision-making in an elementary classroom. This framework will serve to guide students as they create a social studies curriculum unit, which integrates planning skills, teaching strategies, classroom management and evaluation techniques. Daytime clinical hours are required during this course. (Only for Dual Cert majors).

T&L 410
CHILDREN'S LITERATURE AND FAMILY LITERACY
Graduate
This course addresses literacy development in young children and the roles of families and early childhood programs in fostering that development. Strategies for enhancing literacy, such as word play, storytelling, conversations will be provided and all appropriate genres of children's literature will be explored. Finally, the course features appropriate poetry, early books for infants and toddlers, read-aloud materials, and all genres of children's literature for young children.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 411
ASSESSMENT IN EARLY CHILDHOOD SPECIAL EDUCATION
Graduate
Candidates will study, use, and evaluate early childhood assessment methods and tools that are appropriate for young children with diverse learning, cultural, and socioeconomic experiences. Focus of the course is on the teacher candidate's acquisition of knowledge and skill regarding an array of formal and informal assessment instruments and techniques used to gather information needed for making decisions about typical and atypical children served in individual and group learning situations. Focus is directed toward the development of curricular goals and instructional approaches that evolve from the assessment information. Such information is used to create learning plans, including Individualized Family Service Plans (IFSP) and Individualized Education Plans (IEP), serving child and family responsively.

Advanced Teacher Candidate Standing is a prerequisite for this class.
EMERGING READING AND LANGUAGE ARTS

Graduate

This course focuses on the curriculum content and sequence, instructional and assessment strategies as well as considerations integral to the creation of authentic, effective emergent literacy environments and engagements for pre-kindergarten through third grade. Theory and practice principles are woven into course assignments and required field experiences designed to observe, teach, and reflect upon instructional decisions made for individual as well as groups of children. Prevailing curricular and instructional models (e.g., code-based, meaning-oriented, balanced) and their histories are compared and contrasted. The influences of development, home language(s) and dialect(s) (especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidate instructional planning and teaching. Case studies and lesson planning facilitate the application of course content. PREREQUISITE(S): For T&L EE majors prereq is T&L 404 and advanced standing; for T&L ECE majors prereq is T&L 408 or T&L 432 and Advanced Standing. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 416 and T&L 583 is required.

Advanced Teacher Candidate Standing is a prerequisite for this class.

READING/LANGUAGE ARTS IN THE MIDDLE GRADES

Graduate

This course extends Emerging Reading and Language Arts to facilitate increased independence in students as strategic readers and competent writers. It focuses on the further development of reading comprehension and writing abilities in the intermediate grades and middle school. Emphasis is placed on the complex nature of literacy addressing issues such as content-area literacies, learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Application of course material is facilitated through fieldwork focusing on the design, teaching, and reflection on literacy lesson(s) for intermediate learners.

PREREQUISITE(S): T&L 412 and Advanced Standing. COREQUISITES: For T&L EE majors, concurrent enrollment in LSI 446 and T&L 583 in a public school is required.

T&L 415

TEACHING AND LEARNING ELEMENTARY SCHOOL SCIENCE

Graduate

This course is an introduction to materials, methods and strategies for helping students in grades K-8 become scientifically literate: ie., to understand the nature of science and its impact on technology and science. Particular attention will be given to theoretical views about how children learn science, the proper use of materials and equipment, the development of scientific thinking, e.g., skills in observing, classifying collecting, and interpreting data, questioning strategies, and ways to assess student progress. Inquiry based lesson plans and case studies invite application of course content. Daytime field required during this course. PREREQUISITE(S): T&L 409 or T&L 404, & Advanced Standing and for T&L EE majors completed application to student teaching. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 419 and T&L 584 is required.

Advanced Teacher Candidate Standing is a prerequisite for this class.

TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS

Graduate

This course is an introduction to materials, processes for developing, and strategies for mathematical literacy in grades K-8. Particular attention will be given to the theoretical views about how children learn mathematics, the proper use of manipulative materials, the development of mathematical thinking, e.g., skills in estimation, pattern recognition, or spatial perception; the use of technology, and ways to assess student progress. Lesson planning, teaching, and critical reflection are an integral component of this course. Clinical hours required. PREREQUISITE(S): T&L 409 or T&L 404 and Advanced Standing. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 412 and T&L 583 is required.

Advanced Teacher Candidate Standing is a prerequisite for this class.

LEARNING THROUGH THE ARTS (FORMERLY CDG 418)

Graduate

This course focuses on the arts (visual art, music, drama and dance) as an integral component of teaching and learning in the elementary school curriculum. Students will explore a variety of art forms and disciplines to develop a critical aesthetic and artistic vocabulary. Students learn to help children utilize artistic media in the exploration and expression of thoughts and feelings. Emphasis is placed on design, construction, and implementation, and assessment of authentic conceptual classroom arts activities that integrate the arts with other classroom curricula. Daytime clinical hours (10) are required during this course. COREQUISITES: For T&L EE majors, concurrent enrollment in SCG 408 is required.
T&L 419
CURRICULUM AND STRATEGIES: SOCIAL STUDIES
Graduate
This course is an introduction to an integrated view of social studies for engaged citizenship. Through the study of strategies (such as concept formation, historical inquiry, role-play, etc), materials (such as primary sources) teacher candidates will learn and apply principles of curricular integration to create curriculum/units that engage elementary learners in the exploration of issues, ideas, and perspectives that impact our world. PREREQUISITE(S): T&L 409 or T&L 404, & Advanced Standing and for T&L EE majors completed application to student teaching. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 415 and T&L 584 is required.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 420
MATH AND SCIENCE IN EARLY CHILDHOOD
Graduate
Students will explore theoretical principles, materials, methods, and activities for teaching and integrating mathematics and science in preschool and primary grades. Students will conduct clinical observations and complete individualized teaching assignments. PREREQUISITE(S): SCG 404, T&L 432 and Advanced Standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 421
CHILD AND FAMILY IN THE MULTICULTURAL COMMUNITY
Graduate
This course will focus on understanding the diversity of children and families in approaches to development, learning, and disability. It will examine how teachers may provide a curriculum and environments within the context of family and community that honor the families' and communities' beliefs, values, and practices. In addition, ways to develop and maintain productive and collaborative relationships between professionals and families, communities and other professionals across the range of systems are examined.

T&L 422
CLASSROOM ASSESSMENT
Graduate
This course focuses on study, use, and evaluation of assessment practices in diverse, K-8 contexts. Assessment is addressed as part of instructional systems, attending to issues including: the appropriate use of standardized measures, formal and informal classroom assessment, portfolio development, as well as reporting to all stakeholders. This course also emphasizes ways of involving students and parents in assessment processes, how to observe and assess children individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system. PREREQUISITE(S): SCG 403, T&L 404, and one Curriculum and Strategies course (e.g., T&L 412, T&L 413, T&L 415, T&L 416, T&L 418, T&L 419).

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 423
UNDERSTANDING YOUNG CHILDREN'S BEHAVIOR
Graduate
This course focuses on understanding children's observable behaviors and environmental and biological factors, that effect young children's behaviors (ages birth through 8). It will provide students with techniques to identify and effectively address negative behaviors in young children by using principles of Applied Behavior Analysis, and Functional Behavior Assessment. General classroom management techniques will also be examined. Completing 15 hours of field experience in an early childhood special education setting is part of requirement for this course.
T&L 424
INTRODUCTION TO SECONDARY EDUCATION
Graduate
This course is an introduction to the DePaul Secondary Education program as well as the professional world of secondary school teaching. In this course, candidates develop the knowledge and skills necessary for being a reflective practitioner. Candidates focus on understanding themselves (professional identity) and their behaviors in teaching situations with students in schools. These insights, combined with subject-matter knowledge, guide the development of various course assignments. Candidates will learn how to observe effectively in a school setting, to identify school governance issues, to understand school environment and the current social issues that shape it, and will experience a variety of teaching methods and resources for their future teaching. Candidates will acquire knowledge of important social concepts and theories that affect education, especially as they affect educational change in urban societies. As candidates become aware of differences in individual, ethnic, and cultural group attitudes, values and needs, they also will learn to recognize the complexities of teaching and learning in a pluralistic society. Candidates will be committed to teaching as a responsible professional who acts ethically as well as in a collegial fashion. In addition to class attendance, candidates are required to complete 15 daytime fieldwork hours as part of the course. This course is a prerequisite to T&L 425. It is highly recommended that this course be taken concurrently with SCG 406.

T&L 425
CURRICULUM AND INSTRUCTION IN SECONDARY EDUCATION
Graduate
This course will examine materials, methods, and techniques appropriate for teaching in secondary schools. Topics include writing instructional objectives, developing lesson plans, designing a curriculum unit, understanding classroom management and assessment related issues. Students will be encouraged to reflect upon their own emerging educational philosophies as well as draw from previous courses they have taken. Students will be given many opportunities for planning, using and evaluating a variety of instructional strategies while preparing and teaching a micro lesson in front of their peers. Students will be committed to teaching as a professional acting responsibly, ethically, and collegially in accordance to Vincentian Personalism. Prerequisite course: T&L 424

T&L 424 is a prerequisite for this class.

T&L 426
TEACHING WRITING
Graduate
Prepares for teaching writing and composition at the middle and secondary school levels. The course focuses upon methods of teaching composition, examination of literature and research about the composing process, the development of language and reading skills, and the assessment and evaluation of writing. The development of writing curriculums will also be explored. PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 427
YOUNG EXCEPTIONAL CHILD
Graduate
This course introduces students to the field of early childhood special education including the Early Intervention System. Characteristics of infants, toddlers and young children with special needs as well as, methods of working with different disabilities during early years will be explored. Strengths and needs of families of young children with disabilities and collaboration with family members will be emphasized. Completing 15 hours of field experience in an early childhood special education setting is a part of this course’s requirements of the requirements for this course.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 428
TEACHING LITERATURE
Graduate
Prepares for teaching literature at the middle and secondary school levels. Examines contemporary issues in the teaching of literature, explores methods of teaching major literary genres, addresses problems of literacy and focuses on the transactional nature of reading and writing. Emphasis on developing a repertoire of ways of teaching literature and a variety of literature curriculums. PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.
T&L 429
TEACHING YOUNG ADULT LITERATURE
Graduate
This course is devoted to the study of Young Adult Literature: an exciting, emerging field. Issues and ideas to be examined include the following: current debates regarding issues in curriculum and teaching; selecting, reading, evaluating, and teaching young adult literature; cultivation of life-long reading habits and literacy development. Students will become familiar with major writers of young adult literature, read diverse texts, explore major genres, review award winning novels, consider the role of the media, and develop creative projects.
PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing.
Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 430
TEACHING LITERACY K-12
Graduate
This course provides an overview of the curriculum, instruction, and assessment strategies used in K-12 classrooms to foster and develop students' L1 and L2 literacies. Through guided examination of prevailing theories of language acquisition and development that currently influence classroom practices across the K-12 continuum, this course enables future teachers of world languages to grow in their understanding of the literacy-learning contexts that students will bring to their language classrooms. Issues that emerge in planning and conducting literacy instruction in schools are discussed and deliberated through university classroom experiences as well as required field experiences (15 hours, minimum: level 1). Course participants enjoy multiple opportunities to apply and analyze theories; to observe, critique, and practice instructional strategies; to make informed curricular and instructional decisions; and to use assessment to inform one's planning.

T&L 431
EARLY LANGUAGE AND LITERACY DEVELOPMENT
Graduate
This course will focus on enhancing language development and promoting early literacy in young children. It addresses instruction and assessment of language and literacy skills. Students will learn how family/child and teacher/child interactions promote language and literacy development and learning. Implementation of language and literacy curricula and activities that lead to growth in the key areas of literacy development for preschool and primary aged children will be explored. (Combination of previous T&L 406 and T&L 412).

T&L 432
EARLY CHILDHOOD CURRICULUM STRATEGIES AND PHILOSOPHY (BIRTH-8)
Graduate
Operating from a constructivist curricular perspective that considers individual child and the social learning context, students will plan, implement and evaluate activities that promote the physical, emotional, social, spiritual, aesthetic, creative, and cognitive development of young children from diverse cultural and socioeconomic backgrounds. Methods of) facilitating children's play; individualization through building on children's experiences, learning styles and interests; using technology and, developing learning centers will be emphasized. A variety of teaching methods and classroom management strategies will be discussed and illustrated, including teacher led instruction and student-centered instruction. Students will be encouraged to reflect upon their own emerging educational philosophies and teaching styles as they take part in laboratory and field experiences. Many opportunities for planning, using and evaluating a variety of teaching methods will be offered. Each student will write at least one teaching unit on a primary social studies theme. Prerequisite: Child Growth and Development: the Early Years, taken concurrently with T&L 402). (Combination of previous T&L 407 and T&L 408)
Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 433
EARLY CHILDHOOD SPECIAL EDUCATION STRATEGIES
Graduate
This course focuses on a range of curricular and instructional strategies that foster individual abilities and meet the individual learning needs within the contexts of group and individualized instruction in a variety of learning situations: classrooms, community and home environments. Teacher candidates acquire knowledge and skill to develop individual long-term and short-term educational service plans based on knowledge of children?s needs and abilities; families? goals, priorities, and concerns for their children; communities; content areas; and early childhood curriculum goals. (Replaced HSC 408).
T&L 436
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Graduate
Prepares for teaching mathematics at the middle school and secondary school levels. Examines contemporary issues in teaching mathematics, methods of teaching secondary mathematics, and recent history in mathematics curriculum development of alternative teaching strategies and the implementation of the NCTM Standards. Lesson and unit development, evaluation and classroom management also will be discussed. PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 439
METHODS OF SECONDARY SCIENCE EDUCATION
Graduate
This course is designed to update teachers in the methods of teaching science. This involves reviewing the processes of science, theories of learning, and instructional strategies appropriate to laboratory science. This course also provides an update on the current trends and issues in science education as well as an analysis of successful science curricula programs. PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 440
EARLY CHILDHOOD EDUCATION CROSS-CULTURAL STUDIES
Graduate
The course will discuss the historical, philosophical and cultural foundations of the education of young children in a multicultural society, emphasizing the role of ethnicity in development of young children within the context of families, childcare centers, and educational systems. Topics include: history of immigration and predictions for the future; the effects of population shifts on the education of English Language Learners; the impact of laws, litigation and executive orders on bilingual/English-as-a-Second-Language education; understanding cultural and linguistic differences regarding locating and using educational resources.

T&L 441
EARLY CHILDHOOD METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS
Graduate
This course will discuss best practices in teaching and learning in ESL and bilingual early childhood classroom contexts. Students will learn about different approaches and methodologies currently used to support the development of listening, speaking, reading and writing in social and academic contexts in learners of English as a second language. Curriculum based-assessment, cultural awareness and self-reflective practice will also be addressed.

T&L 442
EARLY LITERACY DEVELOPMENT AND SECOND LANGUAGE ACQUISITION
Graduate
This course will examine the process of learning and using a second language. Research in second language acquisition (SLA) is multi-disciplinary in nature, reflecting the complexity of language learning and use. Linguistic, psychological and social processes that underlie language(s) learning and use will be introduced and applied to the understanding of this learning in young children. In this course, language acquisition theory concerning relationships between early literacy and oral language development in first and subsequent languages will be addressed.

T&L 443
ASSESSING YOUNG BILINGUAL/ESL LEARNERS
Graduate
This course will focus on the discussion of basic principles and current approaches to assessment of language learning students in ESL. Children?S language learning in ESL or language learning of children in EST and bilingual early childhood and early elementary educational settings. The different purposes of process and product assessment tools, authentic and curriculum-based forms of assessment, issues in the assessment of English Language Learners (ELLs), and assessment in academic areas for early elementary ELLs will be explored.
T&L 444
EARLY CHILDHOOD BILINGUAL/ESL PRACTICUM
Graduate
This course will focus on application of the theories in effective teaching practices, and assessment procedures appropriate for young English Language learners. It will emphasize on application of knowledge gained from previous ESL/ELL courses, and demonstration of skills necessary to work collaboratively and effectively with families of young English Language learners. Professional behaviors that respect, value, and support all children's native language and culture will be reinforced.

T&L 449
TEACHING MODERN LANGUAGES
Graduate
Prepares for teaching modern languages at the middle and secondary school levels. Examines the theory and practice of teaching modern languages with an emphasis on developing alternative teaching strategies and using diverse resources. Lesson and unit development, evaluation and classroom management will also be discussed. Issues that emerge in planning and instruction are discussed and deliberated through university classroom experiences as well as required field experiences (15 hours, minimum; level 2). PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing. (CROSS-LISTED: WLE 349)

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 450
METHODS OF TEACHING WORLD LANGUAGES IN THE ELEMENTARY SCHOOL
Graduate
This course is designed to provide training in the theory and methods of teaching Foreign Languages in the elementary school (FLES) to both pre- and in-service teachers. Pre-service teachers include World Language majors interested in elementary school teaching and elementary majors who are proficient in a world language and interested in teaching FLES. In-service teachers include elementary teachers proficient in a world language who are teaching or who are interested in teaching FLES and secondary trained teachers who are teaching or who are interested in teaching FLES. In order to meet the objectives of this course and subsequent methods courses, it is expected that all participants be able to demonstrate proficiency in English and a second language before enrolling. Issues surrounding elementary methods are discussed and deliberated through university classroom experiences as well as required field experiences (15 hours, minimum; level 2).

T&L 453
TEACHING HISTORY AND SOCIAL SCIENCE IN SECONDARY SCHOOLS
Graduate
Teaching, History and Social Science in Secondary Schools. Prepares for teaching history and social sciences at the middle and secondary school levels. Examines the nature and purpose of history and social sciences curriculum within secondary schools, the current status of social studies materials and practices, and issues confronting today's secondary social studies teachers. Emphasis on alternative teaching strategies, resources for teaching and learning, teachers' responsibilities in curriculum development and decision-making, and methods and materials for addressing cultural diversity. Lesson and unit development, evaluation and classroom management also will be discussed. PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 455
READINGS IN AMERICAN HISTORY
Graduate
Prepares students for teaching American history at the secondary level. Readings focus on the foundational texts of American history from the colonial era to the late 20th century, with an emphasis on gaining content knowledge and applying it to teaching in the secondary classroom. Class discussions focus on matters of interpretation, evidence, and historiography.

T&L 465
ART AND PEDAGOGY
Graduate
This course surveys the trajectory of visual thoughts and explores strategies in art production and distribution (e.g., documents, writing, and practice) used by artists, art educators, and visualists. This course examines the visual arts in and out of space where learning occurs and explores the (in) effectiveness of the visual arts when intersected with pedagogical practices. The course presents a foundation in the social, historical, cultural, and political influences on visual thinking and explores the interpretation of visual production as language, information, curriculum, activism, design, and new media within multiple working spaces. Site visits required. PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.
T&L 466
TEACHER AS ARTIST
Graduate
This course investigates strategies for creative enterprise and visual studies and includes art projects and site work, reading, investigations, multi-media projects and writing. Through the use of various media and technologies, students explore methods for teaching, authoring, and/or collaborating in preparing visual arts curriculum. The course explores teaching practices in space where technology, youth, and social and educational elements intersect. Teaching practices within diverse settings are considered as well as the contribution of artists, writers, place makers, teachers, designers, and cultural workers. Site visits are required. PREREQUISITE(S): T&L 405 or T&L 425 and Advanced Standing.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 481
INTERNSHIP IN PRESCHOOL SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE)
Graduate
Candidates conduct 75 hours of intense supervised field work in preschool during the winter quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have either taken ECE 310: Preprimary Programs: Curriculum and Strategy (at the undergraduate level), and T&L 432: ECE Curriculum Strategies and Philosophy (at the graduate level) in a previous quarter, or they are taking these courses as co-requisites with this internship.

T&L 482
INTERNSHIP IN PRIMARY SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE)
Graduate
Candidates conduct 75 hours of intense supervised field work a primary grade (K-3) during the spring quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have either taken ECE 311: Curriculum and Instruction in Primary Grades (at the undergraduate level), and T&L 432: ECE Curriculum Strategies and Philosophy (at the graduate level) in a previous quarter, or they are taking these courses as co-requisites with this internship.

T&L 525
READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM
Graduate
This course analyzes the relationships among reading, writing, speaking and listening. It encourages middle level and high school teachers in all disciplines to take these interrelationships into account and to plan curricula that include current teaching strategies to enable students to become better readers, writers and thinkers in their various content-areas. This course will also concentrate on group process and its role in effective teaching within and across content-areas. Language use, learning and teaching are considered from a multicultural perspective.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 565
INDEPENDENT STUDIO TOPICS
Graduate
This course is a self directed graduate course in the Visual Arts Education Program. Candidates who consider this course must develop a written proposal for their work and identify professional expectations of this quarter long immersion in advanced study. Candidates may select from a range of possible pursuits from preparing a new body of work or preparing an exhibition to working within a host of selected museums or galleries as an art education intern throughout the city and suburbs. All candidates are required to meet with a faculty member for an initial interview to discuss contact hours, needs and limitations, critique times and locations and the required documentation from the 11 week experience. All proposals must be approved by a faculty member in the program.

T&L 583
FIELD EXPERIENCE LAB
Graduate
This field-based course will facilitate preservice teacher candidates' experiences working in elementary and middle school classrooms. This supervised field experience is an opportunity to apply content and pedagogical knowledge in authentic settings. 24 clock hours are scheduled at school sites and visible during registration though subject to modification based changes in schools' schedules. Students will enroll in this course multiple times during their program across diverse sites and will engage in different activities aligned with concurrent courses. COREQUISITES: For T&L EE majors, T&L 404 and SCG 403; or T&L 412 and T&L 416; or T&L 413 and LSI 446.
T&L 584
PRE-STUDENT TEACHING FIELD EXPERIENCE
Graduate
This field-based experience occurs in teacher candidates' student teaching sites. Scheduling is negotiated between teacher candidate and mentor teacher based on classroom social studies and science content area schedule. This supervised field experience is an opportunity to apply content and pedagogical knowledge as well as gain introductory contextual understandings of student teaching site. PREREQUISITE: For T&L EE majors, completed application to student teaching. COREQUISITE: For T&L EE majors, T&L 419 and T&L 415.

T&L 585
ELEMENTARY STUDENT TEACHING
Graduate
(6 quarter hours) Students will be placed for a minimum of 10 weeks in an elementary school. Seminar will meet once a week, in the participating schools and/or at DePaul. At first, they will focus on issues of immediate concern to student teachers. As the students gain experience the seminar will examine six or eight classroom issues, that is, topics which students have found to be significant on the basis of their experience. These would include such things as assessment, evaluation, classroom management, curriculum planning, and relationships with colleagues. After delineating what the issues are, students would be expected to analyze and discuss readings which relate to the issues. PREREQUISITE(S): Application and approval required. Open only to DePaul student.

T&L 586
ELEMENTARY STUDENT TEACHING SEMINAR
Graduate
(2 credit hours) This course is taken concurrently with T&L 585, Elementary Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and career as teachers. COREQUISITE(S): T&L 585

T&L 588
INDEPENDENT STUDY IN TEACHING AND LEARNING
Graduate
PREREQUISITE(S): Permission of instructor, department chair and associate dean.

T&L 589
THESIS RESEARCH IN TEACHING AND LEARNING
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit. PREREQUISITE(S): SCG 410 and approved thesis proposal.

T&L 590
SECONDARY STUDENT TEACHING
Graduate
(6 quarter hours) Students will be placed for a minimum of 10 weeks in a secondary school. Seminar will meet once a week, in the participating schools and/or at DePaul. At first, they will focus on issues of immediate concern to student teachers. As the students gain experience the seminar will examine six or eight classroom issues; that is, topics which students have found to be significant on the basis of their experience. These would have found to be significant on the basis of their experience. These would include such things as assessment, evaluation, classroom management, curriculum planning, and relationships with colleagues. After delineating what the issues are, students would be expected to analyze and discuss readings which relate to the issues. PREREQUISITE(S): Application and approval required. Open only to DePaul student.

T&L 591
SECONDARY STUDENT TEACHING SEMINAR
Graduate
(2 credit hours) This course is taken concurrently with T&L 590, Secondary Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and career as teachers. COREQUISITE(S): T&L 590
T&L 592
WORLD LANGUAGES STUDENT TEACHING
Graduate
(6 credit hours) Student teaching is the culminating experience of the World Languages certification program. It is a ten-week, 30-hour/week experience. Students must successfully complete student teaching with a grade of B- or better in a language classroom in which they are seeking certification to teach. The course is taken concurrently with T&L 593, World Languages Seminar. PREREQUISITE(S): Application and approval required. Open only to DePaul student.

T&L 593
WORLD LANGUAGES SEMINAR
Graduate
(2 credit hours) This course is taken concurrently with T&L 592, World Languages Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and career as teachers. COREQUISITE(S): T&L 592

T&L 595
EARLY CHILDHOOD STUDENT TEACHING
Graduate
(6 quarter hours) This course requires students to participate in supervised teaching at a cooperating school, five full days per week, for an academic quarter. Part of the teaching will be in a preprimary setting and part will be in a primary setting. Feedback and discussion of issues encountered in student teaching as well as new materials and techniques of student teaching will be included. PREREQUISITE(S): Application and approval required. Open only to DePaul students.

T&L 596
EARLY CHILDHOOD STUDENT TEACHING SEMINAR
Graduate
(2 credit hours) In this seminar, candidates will reflect upon their teaching experiences with young children; collaborate with colleagues and instructor to identify alternative strategies for problematic situations. Candidates will outline ways to maintain strategies for lifelong learning. In addition, candidates will share resume development and job-search strategies. COREQUISITE: T&L 595.

T&L 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
(0 credit) Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. $50 per quarter.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

T&L 611
INDUCTION INTO THE TEACHING PROFESSION: SECONDARY
Graduate
This course is designed to assist first-year secondary teachers to make the transition from student of teaching to teacher. The course creates a bridge between first-year teachers' formal education and the realities of their classrooms. In particular, the course provides assistance with the following: 1) understanding their induction into the profession; 2) analyzing their new educational contexts; 3) actualizing their educational philosophies; 4) developing their pedagogical knowledge; and 5) identifying and making the most of professional support systems within their schools. Prerequisite: Completion of student teaching or practicing teacher. PREREQUISITE(S): T&L 590 or practicing teacher.

T&L 590 is a prerequisite for this class.

T&L 614
INDUCTION INTO THE TEACHING PROFESSION: EARLY CHILDHOOD
Graduate
This course is designed to assist first-year early childhood teachers make the transition from student teaching to teacher. It creates a bridge between first-year teachers' formal education and the realities of their classrooms, providing assistance with: understanding their induction into the profession; analyzing their new educational contexts; actualizing their educational philosophies; developing their pedagogical knowledge; and identifying and making the most of professional support systems within their schools. PREREQUISITE(S): Completion of student teaching or practicing teacher.

T&L 595 is a prerequisite for this course.
T&L 615
SPECIAL TOPICS IN TEACHING AND LEARNING
Graduate
Current issues and problems in education will be discussed. Focus will be current research and best practice. Prerequisite: 30 quarter hours in graduate education.

T&L 616
SPECIAL TOPICS IN INDUCTION TO TEACHING AND LEARNING: CLASSROOM ASSESSMENT
Graduate
Current issues and problems in classroom-based assessment is the concentration of this course. Activities and discussion will include teacher-made paper and pencil assessment, linking assessment to planning and instruction, test-preparation, performance assessment, grading, and interpretation of standardized tests. Focus will be current research and best practice. Prerequisite: 30 quarter hours in graduate education.

T&L 625
CANDIDACY CULMINSING PROJECT (STUDENT IN GOOD STANDING)
Graduate
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms. $50 per quarter.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

T&L 575
WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
Graduate
This course engages students in WLE curriculum development and language program advocacy, creation, and sustainability based on an examination of federal and state WLE history and policies and on a review of national and state standards. Reviews theory and application of curriculum development to world language instructional programs, such as design, scope and sequence, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal world language education program models are examined and analyzed in light of WLE history, policy, and standards (20/15 hours; level 1).

TCH 320
EXPLORING TEACHING IN THE URBAN HIGH SCHOOL
Undergraduate
This course is an invitation to secondary education as a profession, an opportunity for students considering education as a career to explore the reality of teaching and learning a disciplinary content area in a variety of Chicago-area schools. Students will become familiar with different narratives of teaching through teacher and student biographies, testimonials, literature, film, and classroom observations. They will explore the interrelationships between, for example, popular cultural beliefs about schooling; teacher and student identities; and classroom interaction. The instructor will coordinate observations in several classrooms as the basis for intensive, guided reflective work, aimed at supporting students' initial and subsequent efforts of developing identities as disciplinary content educators (25 hours of high school classroom observation required).

TCH 390
CAPSTONE: INTEGRATING EDUCATION & DISCIPLINARY FOUNDATIONS
Undergraduate
This course is designed to help students conceptualize issues and opportunities in teaching their disciplinary content to diverse students and in different classroom contexts. Ten hours Level 2 field experiences required. In this course, students will analyze and reflect on how teaching in their disciplines is informed by diverse cultures of schooling and youth, including the influences of economic, social, cultural, political, gender, and religious factors on schooling, educational policy and opportunity. Students will use disciplinary content to critically and creatively reflect on the teaching of that content in secondary schools. Students will be introduced to issues and ways of presenting essential disciplinary content in ways that engage diverse learners, including learners who have not been served well by formal education. Students will also develop a theory of teaching that emphasizes the intersection of disciplinary content with multicultural perspectives.
TCH 401
TEACHING AS A PROFESSION IN SECONDARY SCHOOL
Graduate
This course is an introduction to the five-year Program, including the College of Education's conceptual framework and teacher dispositions, and to the professional world of secondary school teaching, including the policy bodies and stakeholders that impact teaching. Within this developing understanding of the larger context of secondary education, students will begin to articulate clearly professional identities and the behaviors inherent in those identities, including their impact on student learning. Drawing on previous coursework and their growing understanding of differences in individual, ethnic, and cultural group attitudes, values, and needs, students also will learn to recognize the complexities of teaching and learning in a pluralistic society. Ultimately, students will be committed to teaching as a responsible professional who acts in an ethical and collegial fashion. Twenty hours of Level 2 field experience is required.

TCH 411
THE NATURE OF ENGLISH
Graduate
This course is designed to help students to see that the field of English Studies is bigger than the component they probably identify as English (it's Literature, Writing, and Linguistics/Grammar). Students will explore the formation of the discipline up to the current day, focusing on the shifting understanding of ways of reading, writing and thinking about language. They will strive to answer the questions: What does it mean to be a student of language and literature? and, What are the ways of knowing characteristic of English and Writing, Rhetoric, & Discourse majors? In doing so, students will relate the disciplinary content of their major to their daily lives and interests and to the larger framework of human endeavor and understanding, including identifying its importance to the personal lives of high school students. The course is a prerequisite for TCH 421.

TCH 412
THE NATURE OF HISTORY AND THE SOCIAL SCIENCES
Graduate
This course builds on the content course work students have done in the seven disciplines grouped under the heading "social sciences" (history, political science, geography, sociology, anthropology, economics, and psychology). In this class students will get further exposure to the basic concepts of the social science disciplines and consider the connections as well as differences between them. The course emphasizes how different disciplinary backgrounds lead students to bring different perspectives to their study of social phenomena and helps them see these phenomena from multiple vantage points. The course will employ a case study approach framed around social issues of interest to all seven disciplines (e.g. social control, threats, development, natural disasters). A student prepared in economics, for example, will ask a different set of questions about America's war on drugs than students from the fields of history or political science. This course will first have students examine a social phenomenon from the perspective of their major discipline, then have them shift to examining an event or issue from an alternative perspective. The above economics student's first project might be based on an economic analysis of the war on drugs, a second project would focus on the history of New Orleans and the devastation caused by hurricanes, and a third project would use the perspectives of political science and sociology to analyze the development of an urban community. By the end of the course, students will have applied the knowledge and skills of multiple social science disciplines to evaluate social phenomena, considered the relationship and differences between those disciplines, and be prepared to enter TCH 422 where they will apply their content knowledge to inquiry and teaching in the field.

TCH 413
THE NATURE OF MATHEMATICS
Graduate
This course builds on students' mathematics understanding by emphasizing the universality of mathematics as a cultural endeavor. In it, students will explore the historical trends in mathematic and how those trends have been taught. Students will understand that, mathematics, at its core, is deductive; however, it also requires intuition. Thus, the course examines the interaction among intuition, experimentation, conjecture, abstraction, and deductive reasoning not only in the classroom but also in the everyday use of mathematics. It also examines the interplay between concrete problem-solving and generalization.

TCH 414
THE NATURE OF SCIENCE
Graduate
This course is about the nature of science and the interactions between science and society. It will build on the foundation of understandings that students already have about the processes and conventions of science developed through their years as science students to create opportunities for deeper understandings of the beliefs and assumptions inherent to the creation of scientific knowledge. These opportunities will be developed through direct interactions with professional scientists as well as through case studies and readings that illustrate the strengths, limits and pitfalls of the scientific endeavor as well as provide opportunities for students to relate science to their daily lives and interests and to a larger framework of human endeavor and understanding (e.g., relationships among systems of human endeavor including science and technology; relationships among scientific, technological, personal, social and cultural values). Cases will be drawn from different scientific disciplines as well as from modern and historic times. In this way, science students will have a better understanding of what it means to be a scientist and how science interfaces with society. The course is a prerequisite for TCH 424.
TCH 421
INQUIRY & APPLICATION IN DEVELOPING SECONDARY ENGLISH PEDAGOGY
Graduate
This course builds on TCH 411 by preparing teacher candidates to distinguish between what needs to be taught (content) and how it is taught (pedagogy), with an emphasis on understanding the historical shifts in the teaching of content and how these shifts inform teaching and learning in today's English language arts classrooms. The course also introduces students to methods of inquiry and reflection on content pedagogical knowledge. Students will examine their own educational experience through the lens of the historical trends, focusing on how they learned and what they understood their teachers to be doing. This initial case study will serve as an introduction into case study methods. Students will also develop expertise in one of the three historical trend areas - reading, writing, and language - and examine how the trend has informed teaching and learning and shaped curriculum, pedagogy, and assessment. Students will develop a case study of a practicing teacher using the lens of the historical trend in which they are developing expertise.

TCH 422
INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY
Graduate
This course builds on the content knowledge students developed and reinforced in TCH 412. More, it asks them to make the shift from considering how a person prepared in the social sciences analyzes social phenomena to how such a person teaches the social sciences. Students will do this by developing two units of inquiry-based case studies that they could use in their own classrooms. The topics of these case studies will vary from section to section, depending on the needs of the students and expertise of the instructor. Possible topics include the Constitution, the Cold War, slavery, and the Iraq War. As students work on these projects, they will continue to reflect on the course work they have done in the content areas as well as the instruction they see teachers delivering in their field experiences. They will contemplate such questions as: "What are the connections between the social science disciplines? How can they be taught together, creating interdisciplinary courses at the high school level? What are the differences between the social science disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about social events but also the freedom to pursue their interests and make sense of the world on their own terms?" By the end of this course, students through readings and their projects will have advanced their learning about the nature of inquiry, its implementation in the classroom, and the connections and differences between the social science disciplines.

TCH 423
INQUIRY & APPLICATION IN DEVELOPING SECONDARY MATHEMATICS PEDAGOGY
Graduate
This course builds on TCH 413 by introducing students to inquiry methods to understand the teaching and learning of mathematics. Students will explore how mathematics has been and is taught by examining major paradigm shifts in mathematics education and the impact those paradigms and shifts have on pedagogical content knowledge, or knowledge of how to teach disciplinary content. Students will use case study methods to look at instructional practices and begin to articulate their own mathematics teaching pedagogy. With the completion of this course, students will have a deeper understanding of mathematical literacy and the barriers to understanding and teaching mathematics, as well as being able to identify what makes an exceptional math teacher who is able to address the needs of all students.

TCH 424
INQUIRY & APPLICATION IN DEVELOPING SECONDARY SCIENCE PEDAGOGY
Graduate
Following TCH 414, this course transitions from asking "what does a scientist do?" to a consideration of why science literacy in the general public has been so difficult to achieve. The focusing questions for TCH 424 are: "How do we teach science? What is science literacy? Why is an understanding of science important to the general public? and What are the major obstacles and strategies to achieving science literacy?" The course begins by participants self-reflecting on their own educational experiences that led to their paths in science education: what have been their successful learning strategies, how have teachers influenced their education and what have been successful and less than successful classroom instructional strategies? From this, students will begin science classroom observation, discussing their observations with their peers, and speaking with educators about their experiences teaching high school science and about the goals and short-comings of science education. Throughout this process, students will read seminal literature on science literacy and explore cases challenging their notions of the teacher-learner relationship and the relationship between science and society. As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public.
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, the course focuses on research related to the teaching of the English language arts in the middle school and high school and pedagogical content knowledge, including research on teaching and learning, curricula and instructional delivery, assessment, and the relationship of socio-cultural, economic, and language use to teaching and learning disciplinary-specific content. Students will develop and implement small discipline-specific research projects, identifying research questions, conducting a literature search, developing a theoretical framework, and collecting and analyzing data.

This course introduces students to education research methods and discipline-specific research and inquiry. TCH 461
INQUIRY & TEACHING OF MIDDLE SCHOOL ENGLISH
Graduate
This course addresses issues of teaching and learning the English language arts at the middle-school level (grades 5 through 8). During the first five weeks, the course focuses on foundational and contemporary theories of middle-school-aged adolescent development. It introduces candidates to theoretical and philosophical issues related to contemporary questions of youth and middle level education. It explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. The last six weeks of the course explore the differences between middle school and high school students within the context of designing English language arts curriculum, creating a classroom environment, and implementing instructional delivery strategies and methods that meet diverse middle school students, including English language learners and students who speak nonmainstream dialects of English.

TCH 462
INQUIRY & TEACHING OF MIDDLE SCHOOL HISTORY AND THE SOCIAL SCIENCE
Graduate
This course addresses issues of teaching and learning history and the social sciences at the middle-school level (grades 5 through 8). During the first five weeks, the course focuses on foundational and contemporary theories of middle-school-aged adolescent development. It introduces candidates to theoretical and philosophical issues related to contemporary questions of youth and middle level education. It explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. The last six weeks of the course explore the differences between middle school and high school students within the context of designing history and social science curriculum, creating a classroom environment, and implementing instructional delivery strategies and methods that meet diverse middle school students, including English language learners and students who speak nonmainstream dialects of English.

TCH 463
INQUIRY & TEACHING OF MIDDLE SCHOOL MATHEMATICS
Graduate
This course addresses issues of teaching and learning mathematics at the middle-school level (grades 5 through 8). During the first five weeks, the course focuses on foundational and contemporary theories of middle-school-aged adolescent development. It introduces candidates to theoretical and philosophical issues related to contemporary questions of youth and middle level education. It explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. The last six weeks of the course explore the differences between middle school and high school students within the context of designing mathematics curriculum, creating a classroom environment, and implementing instructional delivery strategies and methods that meet diverse middle school students, including English language learners and students who speak nonmainstream dialects of English.

TCH 464
INQUIRY & TEACHING OF MIDDLE SCHOOL SCIENCE
Graduate
This course addresses issues of teaching and learning the sciences at the middle-school level (grades 5 through 8). During the first five weeks, the course focuses on foundational and contemporary theories of middle-school-aged adolescent development. It introduces candidates to theoretical and philosophical issues related to contemporary questions of youth and middle level education. It explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. The last six weeks of the course explore the differences between middle school and high school students within the context of designing science curriculum, creating a classroom environment, and implementing instructional delivery strategies and methods that meet diverse middle school students, including English language learners and students who speak nonmainstream dialects of English.

TCH 461
TEACHING ENGLISH IN THE HIGH SCHOOL 1
Graduate
This course introduces students to the theoretical and practical issues of teaching the English language arts in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism.
TCH 472
TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1
Graduate
This course introduces students to the theoretical and practical issues of teaching history and the social sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism.

TCH 473
TEACHING MATHEMATICS IN THE HIGH SCHOOL 1
Graduate
This course introduces students to the theoretical and practical issues of teaching mathematics in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of mathematics in all its representations. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism.

TCH 474
TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
Graduate
This course introduces students to the theoretical and practical issues of teaching the sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism.

TCH 481
TEACHING ENGLISH IN THE HIGH SCHOOL 2
Graduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 421 and TCH 471. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities, with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 471, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism.

TCH 482
TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2
Graduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 422 and TCH 472. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 471, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism.
TCH 483
TEACHING MATHEMATICS IN THE HIGH SCHOOL 2
Graduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 423 and TCH 473. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of mathematics in all its representations with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 471, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism.

TCH 484
TEACHING THE SCIENCES IN THE HIGH SCHOOL 2
Graduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 424 and TCH 474. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 471, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism.

TCH 495
ASSESSMENT ISSUES IN SECONDARY EDUCATION
Graduate
This course introduces candidates to theoretical and philosophical issues related to educational assessment. It addresses the range of assessments teachers will encounter in school settings, including individual cognitive and social and emotional assessments; course material, curricula, and disciplinary program assessments; and large scale high-stakes testing. The course provides candidates opportunities to explore student, program, and curricular assessment issues, including assessment methods and tools; standardized, quantitative, and qualitative assessments; formal and informal assessments; formative and summative assessments; integrated, self-, and peer assessments; cultural, social, economic, and language influences on assessments; and issues of reliability and validity in assessment.

TCH 590
STUDENT TEACHING
Graduate
This course is the culminating experience for TCH Program students and requires 11 weeks of onsite student teaching in a high school content area classroom. The course requires students to be in a high school full-time, participating in both in-class instruction and extra-curricular activities related to the school. PREREQUISITES: Open only to TEACH Program Students; Student teaching application and approval required.

TCH 591
STUDENT TEACHING SEMINAR
Graduate
This course must be taken concurrently with TCH 590. The seminar format provides students an opportunity to reflect on their student teaching experiences and to reach back and consider what they have learned in the TCH Program and their next steps as practicing teachers. COREQUISITE(S): TCH 590.

TDC 261
BASIC COMMUNICATION SYSTEMS
Undergraduate
(Formerly TDC 361) Introduction to voice, data, and multi-media network communications fundamentals. Wired, Wireless, and Optical applications in Local, Metropolitan, Wide Area Networks are explored. The overview explains how technical, regulatory, competitive, standardization and cultural factors impact modern network applications. Approved for Scientific Inquiry credit. PREREQUISITE(S): NONE.
TDC 311
COMPUTERS IN TELECOMMUNICATIONS SYSTEMS
Undergraduate
An introduction to computer organizations and operating systems. Computer components and functions, logic circuits, internal processing, multiprogramming, timesharing, memory management, file management, interrupts and I/O peripheral devices. PREREQUISITE(S): CSC211 or CSC261.

TDC 362
PRINCIPLES OF DATA COMMUNICATIONS
Undergraduate
Theory and components of data communication systems, modes, codes, and error detection techniques for data transmission, network protocols and line control procedures, communication carrier facilities and system planning. PREREQUISITE(S): (TDC 311 or CSC373) and (IT 263 or TDC261)

TDC 363
INTRODUCTION TO LOCAL AREA NETWORKS
Undergraduate
Principles of computer networks using LANs as an example. Issues in communications protocols and compatibility. Client-server versus peer-peer software applications. Network operating system services and management of local networks. PREREQUISITE(S): IT 263 OR TDC 261.

TDC 364
VOICE COMMUNICATIONS TECHNOLOGIES
Undergraduate
A detailed study of transmission, signaling and switching systems for facilities-based public and private voice networks. Voice digitization and transmission over circuit-switched and packet-switched infrastructures. Computer telephony integration techniques. Quality of service issues in integrated voice-over-data systems. Course may include laboratory work with PBX lab. PREREQUISITE(S): NONE.

TDC 365
NETWORK INTERCONNECTION TECHNOLOGIES
Undergraduate
A comprehensive study of network interconnection technologies including layer 2 bridges and switches, layer 3 routers and higher-layer gateways. The TCP and IP protocols will be studied in detail, including IP address management and router operations and management along with associated Internet protocols. RIP and OSPF protocols will be considered. Course includes laboratory work with protocol analyzers and router administration. PREREQUISITE(S): IT 263 or TDC 261.

TDC 368
NETWORK PROGRAMMING
Undergraduate
Programming distributed client/server applications; the sockets interface and multitasking issues; client/server models; remote procedure call; examples of applications such as electronic mail and file transfer. PREREQUISITE(S): CSC261 or CSC309.

TDC 369
NETWORK PERFORMANCE ANALYSIS AND DESIGN
Undergraduate
Quantitative foundations of network performance analysis. Probability theory and queueing theory will be developed and applied to problems in LAN performance, traffic engineering, and the analysis of throughput and response time measures for data communications networks. Performance tradeoffs in network design. PREREQUISITE(S): IT223 and MAT151 and TDC365.

TDC 371
WIRELESS COMMUNICATIONS NETWORKS
Undergraduate
TDC 372
DIGITAL ACCESS SERVICES
Undergraduate
A survey of access line technologies used to access Internet and other business network services. Topics will include traditional DS1, DS3 and SONET transport as well as Integrated Services Digital Network (ISDN), Digital Subscriber Line (DSL), Cable Modems, satellite services, Asynchronous Transfer Mode (ATM), and wireless data access methods. PREREQUISITE(S): IT263 or TDC261.

TDC 375
NETWORK PROTOCOLS
Undergraduate

TDC 376
NETWORK PROJECT
Undergraduate
Case study in developing a large network project. Students will work in groups to analyze and design a major network system. PREREQUISITE(S): TDC 365.

TDC 377
FUNDAMENTALS OF NETWORK SECURITY
Undergraduate
Fundamentals of Network security design and implementation. Review of components used in an enterprise security infrastructure including routers, firewalls, security auditing and assessment tools, Virtual Private Networks (VPN) and Intrusion Detection Systems (IDS). The integration of the different components will be studied in detail, including IP addressing, Network Address Translation (NAT), design of firewall rule sets and performance considerations. Course includes laboratory work with routers, firewalls, Virtual Private Networks and security assessment tools. Pre-req: TDC 365.

TDC 378
INFORMATION STORAGE AND MANAGEMENT
Undergraduate
This course provides a comprehensive overview of network-based storage technology and information storage infrastructure. Major topics include the storage architectures, service features, and benefits of Intelligent Storage Systems. Networked storage technologies include fiber channel (FC), based Storage Area Network (SAN), Network Attached Storage (NAS), and IP-SAN. Advanced storage technologies on Content Addressed Storage (CAS), information security, and storage virtualization are also discussed. PREREQUISITE(S): none

TDC 379
TELECOMMUNICATION AND NETWORK SECURITY PRACTICUM
Undergraduate
Design and implementation of telecommunication and network security infrastructure. This laboratory-based class includes the setup of realistic network infrastructure environment using bridges, routers, layer 2/3 switches and servers. Advanced routing infrastructure implementation using OSPF, RIPv2, EIGRP, BGP, multi-homed BGP setups and IGP/EGP redistribution. Network infrastructure hardening using routers and switches. PREREQUISITE(S): TDC 365 or Instructor consent. Good knowledge of TCP/IP is required.

TDC 384
SCRIPTING FOR NETWORK MANAGEMENT
Undergraduate
This is a hands-on course on using script languages to develop practical applications for Network Management. Students will first learn the fundamentals of Linux system and script language(s) for task automation, and use scripts to develop dynamic web sites. After that, the course will cover Simple Network Management Protocol (SNMP), and use Application Programming Interface (API) to automate networks tasks of Fault Management, Configuration Management, Accounting Management, Performance Management, and Security Management (FCAPS). The final project of the course is to develop a dynamic web site with the above five functional areas to manage Linux servers, Ethernet switches and IP routers. Prerequisite: (IT263 or TDC261) and (CSC211 or CSC261).

TDC 390
TOPICS IN NETWORK TECHNOLOGY
Undergraduate
May be repeated for credit. (PREREQUISITE(S): Completion of TDC 363 and TDC 365 or consent of the instructor).
TDC 399
INDEPENDENT STUDY
Undergraduate
Independent study for variable credit. PREREQUISITE(S): Requires approval of faculty advisor and consent of the Dean.

TDC 405
VOICE AND DATA NETWORK FUNDAMENTALS
Graduate
This course provides an introduction to voice and data networking technologies, including public and private voice services, Ethernet and Internet data technologies, network security, business applications and network management. The structure, regulation, and history of the telecom and data network industry will be discussed as well. PREREQUISITE(S): None

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

TDC 411
INTRODUCTION TO COMPUTER AND NETWORK SYSTEMS
Graduate
This course is an introduction to computer architecture and operating systems with an emphasis on network systems. Topics include computer components and functions, logic circuits, process management, memory management, file management, interrupts and I/O peripheral devices. Students will have several hands-on labs on the Linux environment and learn to write the Shell script for system and network administration. PREREQUISITE(S): None

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

TDC 413
INTRODUCTION TO LAN AND WAN
Graduate
This course covers the principles of local area network (LAN) and wide area network (WAN) technologies including structured cabling, protocols, network devices, and network operating systems. Students will learn the theories and practices of designing, provisioning, and deploying LAN and WAN in an enterprise environment. Assigned lab exercises involving LAN/WAN configuration and troubleshooting will help reinforce various concepts. PREREQUISITE(S): None

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

TDC 425
VOICE/DATA NETWORK FUNDAMENTALS
Graduate
This course provides an introduction to voice and data networking technologies, including public and private voice services, Ethernet and Internet data technologies, network security, business applications and network management. The structure, regulation and history of the telecom and data network industry will be discussed as well. PREREQUISITE(S): Graduate Standing. Students majoring in MS Telecom or MS CINS programs will not receive credit for this course.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

TDC 431
EMERGING WIRELESS AND MOBILITY NETWORKS (formerly TDC 531)
Graduate
A study of evolving 2.5, 3rd & 4th Generation Wireless Networks, and disruptive technologies like WiFi(802.11), WiMax, Bluetooth, RFID, Ultra-Wideband and the security implications mobility networks. This course provides a balanced view of the Wireless Industry in transition, through evolving technology, regulation, competition and standards. Students will be better prepared to deal with the rapid changes and seize the opportunities as data mobility impacts traditional telecommunications and private networks. In addition students will have access to extensive Global Wireless Education Consortium materials to support their individual advanced interests. PREREQUISITE(S): IT263 or TDC361

CDM graduate students in the Prequisite Phase are restricted from registering for this class.
TDC 460  
FOUNDATIONS OF NETWORK TECHNOLOGIES  
Graduate  
An introductory course on network technologies for local and wide area networks. The course examines in detail the core concepts fo network architectures, Ethernet systems including wired, wireless, and Metro, virtual local area networks, storage area networks, optical networking, and the more traditional network services such as T-1, frame relay, Asynchronous Transfer Mode (ATM), and SONET.  
PREREQUISITE(S): (TDC 261 or IT 263) and (TDC 363 or CNS 378)  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 463  
COMPUTER NETWORKS AND DATA SYSTEMS  
Graduate  
A detailed discussion of the upper layers of network architectures. Network protocol organization will be discussed using TCP/IP as an example. IP addresses, subnetting, supernetting, and CIDR. Routing algorithms. Transport layer protocols. Application layer protocols. Introduction to IPv6. PREREQUISITE(S): IT263 or TDC261 or TDC425 or ECT425.  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 464  
CONVERGED MULTIMEDIA NETWORKS  
Graduate  
Exploration of multimedia networks including voice, data, and video services offered by network carriers and Internet Service Providers (ISP) to both enterprise and residential customers. The course starts with an overview of current voice and data networks and presents the driving forces leading to a converged multimedia network. The focus is on Voice over IP (VoIP), including signaling, protocols, equipment, network architecture/design, traffic engineering, and service deployment strategy. PREREQUISITE(S): TDC 261 or IT 263  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 468  
NETWORK PROGRAMMING  
Graduate  
The course covers the basic and advanced issues of TCP/IP networking programming such as multiple processes, I/O multiplexing, multi-threaded processes, multicasting and secure network programming USING C/C++. Application examples such as Internet browsing, instant messaging, proxy filtering and file transfer protocols are discussed. PREREQUISITE(S): (CSC309 or CSC262) and (TDC463 or CSC435).  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 477  
NETWORK SECURITY  
Graduate  
Network infrastructure security issues, including perimeter security defense, firewalls, Virtual Private Networks, Intrusion Detection Systems, wireless security, network security auditing tools and ethical considerations. Strategies for the deployment of "Defense-In-Depth" mechanisms in an enterprise computing environment. Pre-requisite(s): TDC 463 Computer Networks or consent from instructor (CNS 340 Foundations of Information Assurance recommended).  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 478  
INFORMATION STORAGE AND MANAGEMENT  
Graduate  
This course provides a comprehensive overview of network-based storage technology and information storage infrastructure. Major topics include the storage architectures, service features, and benefits of Intelligent Storage Systems. Networked storage technologies include fiber channel (FC), based Storage Area Network (SAN), Network Attached Storage (NAS), and IP-SAN. Advanced storage technologies on Content Addressed Storage (CAS), information security, and storage virtualization are also discussed. PREREQUISITE(S): none  
CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
TDC 484
SCRIPTING FOR NETWORK MANAGEMENT
Graduate
This is a hands-on course on using script languages to develop practical applications for Network Management. Students will first learn the fundamentals of Linux system and script language(s) for task automation, and use scripts to develop dynamic web sites. After that, the course will cover Simple Network Management Protocol (SNMP), and use Application Programming Interface (API) to automate networks tasks of Fault Management, Configuration Management, Accounting Management, Performance Management, and Security Management (FCAPS). The final project of the course is to develop a dynamic web site with the above five functional areas to manage Linux servers, Ethernet switches and IP routers. Prerequisite: ( IT 263 or TDC 261) and (CSC 211 or CSC 261 or CSC 243).

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 511
TELECOMMUNICATIONS PRACTICUM
Graduate
Introduction to the functionality and management of voice and data communications equipment in the Telecommunications and Local Area Networks laboratories. Emphasis will be on practical understanding and experience through laboratory exercises. PREREQUISITE(S): (TDC 311 or CSC 373), TDC 460, TDC 463.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 512
CELLULAR AND WIRELESS TELECOMMUNICATIONS
Graduate
A survey course which includes an overview of all the design and network elements that comprise the foundation of today's cellular networks. Topics include the evolution of cellular technology; basic cellular design and operation principles; cell base station design and function; a review of digital wireless technologies; radio frequency (RF) and antenna propagation basics; an overview of towers; microwave radio systems; roaming and intercarrier networking; the business side of wireless and landline interconnection to the Public Switched Telephone Network (PSTN). PREREQUISITE(S): TDC 464

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 514
COMPUTER TELEPHONY
Graduate
A study of enabling technologies allowing the integration of voice communications services with personal computers, LANs and mainframes. Telephony programming interfaces, call management software, intelligent fax/data retrieval and interactive voice response systems will be considered. PREREQUISITE(S): TDC 463 and TDC 464.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 532
WIRELESS SYSTEM ENGINEERING AND DEPLOYMENT
Graduate
The course covers technologies and theories that support the design, deployment and operation of modern-day digital wireless networks. The first half of the course will address concepts of RF theory, RF propagation, base station engineering, and antenna propagation. The second half of the course focuses on distributed antenna systems (DAS), and various digital wireless technologies used on modern networks and emerging technologies for the future. IP Multimedia Subsystem (IMS) technology and architectures, along with its interfaces to future wireless networks, will also be addressed. PREREQUISITE(S): TDC 512

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
TDC 542
PROTOCOLS FOR ADVANCED WIRELESS NETWORKS
Graduate
This course provides students with an in-depth study of the advanced wireless communication protocols and technologies. It starts with an overview of the wireless evolution from the first generation network to the modern and future wireless technologies. It will then go on to explore major aspects of each advanced wireless technology: air interface, smart antennas, network infrastructure, network elements and their functions, QoS, security, mobility, and performance. Wireless protocols, including both User-to-Network Interface (UNI) and Network-to-Network Interface (NNI), are also studied in detail. Students will also learn new service opportunities provided by these advanced wireless technologies. PREREQUISITE(S): TDC 512

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 560
ADVANCED NETWORK TECHNOLOGIES AND DESIGN
Graduate
This course introduces advanced network technologies and design, including Multi-Protocol Label Switching (MPLS), MPLS Virtual Private Networks, IP storage networks, content distribution, capacity planning and traffic engineering. PREREQUISITE(S): TDC 460, TDC 463

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 562
COMPUTER-COMMUNICATION NETWORK DESIGN & ANALYSIS
Graduate
This course provides an in-depth study of Internet protocols from the perspective of network planning, simulation and troubleshooting. The course includes in-depth study of Internet traffic, traffic measurement techniques, network planning and simulation using simulation tools, and packet management techniques. PREREQUISITE(S): TDC 463.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 563
PROTOCOLS AND TECHNIQUES FOR DATA NETWORKS
Graduate
Advanced topics in TCP/IP including IPv6, TCP traffic control, routing protocols, multicast routing protocols, and upper layer protocols supporting Quality of Service (QoS) in the new generation of the Internet; compression techniques; introduction to SNA and APPN, SNA and TCP/IP integration. PREREQUISITE(S): TDC 463.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 567
TELECOMMUNICATION SYSTEMS DESIGN AND MANAGEMENT
Graduate
The theory and practice of Telecommunication system design. Ongoing systems management. Telecommunication management including selection of vendors/systems, structuring an RFP systems proposal analysis, computer aided telecommunications management. Telecommunication management strategies from a business perspective. PREREQUISITE(S): TDC 463.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 568
NETWORK MANAGEMENT
Graduate
The five major areas of network management--fault management, performance management, security, accounting and configuration management--are discussed. Advanced topics such as fault diagnosis and isolation, event correlation, MIB design, SNMP programming, performance monitoring, service level agreements and network security architectures are also discussed. PREREQUISITE(S): TDC 463.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
TDC 577
NETWORK SECURITY II
Graduate
This course is an advanced class in network security. Topics include: Intrusion Detection and Prevention Systems; Security Engineering processes; Advanced firewall considerations; Honeypots; Incident response; Forensics; Enterprise security policy development and complex enterprise security infrastructure design and integration. PREREQUISITE(S) TDC 477 or TDC 572

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 588
ADVANCED NETWORK DEFENSE SYSTEMS
Graduate
This course focuses on developing techniques for attack detection and mitigation in enterprise networks. The course includes: traffic/log analysis, anomaly detection, intrusion prevention, adaptive security policy, alarm analysis, and worm contaminating and quarantining, performance evaluation of defense systems. Special emphasis will be giving to developing intelligent network defense systems. Thus, students must be prepared to do programming projects using any platform or programming language. PREREQUISITE(S) TDC 477 and (CSC309 or CSC212 or CSC261)

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 593
TOPICS IN TELECOMMUNICATIONS
Graduate
This is an independent study course. PREREQUISITE(S): Consent of instructor. Independent study form required.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 594
NETWORK CAPSTONE
Graduate
In this class students will synthesize knowledge from previous courses to design, build, test, and demonstrate a comprehensive network project as members of a project team. Topics introduced or reviewed, and used in completing the project, will include network requirement analysis, network architecture design, vendor evaluation, planning, experimental design, physical design, logical design, security design, testing strategy, documentation, change management, and network management strategy. Other topics include reasoning about uncertain user requirements, negotiation, online meeting techniques, and group dynamics. The capstone course will extensively use the DLPOD environment and the OPNET for network design and experiment.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 597
TOPICS IN DATA COMMUNICATIONS
Graduate
This is an independent study course. (PREREQUISITE(S):Consent of instructor. Independent Study form required).

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. Students may register for this course no more than twice. PREREQUISITE(S): Consent of the instructor.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.
TDC 696
MASTER’S PROJECT
Graduate
(4 credit hours) Students may register for this course only after their advisor has approved a written proposal for their project. PREREQUISITE(S): Consent of advisor. Independent study form required.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TDC 698
MASTER’S THESIS
Graduate
(2 credit hours) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. PREREQUISITE(S): Consent of advisor. Independent study form required.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

TEC 104
INTRODUCTION TO THEATRE TECHNOLOGY
Undergraduate
(3 quarter hours) This course introduces students to technical systems and standard technical theatre practices. The course emphasizes proper industry-accepted nomenclature of systems, tools, materials, and integrated infrastructure and introduces the steps involved in larger processes. In addition, a specific focus of the course is the establishing of collaborative team work between peers.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 105
INTRODUCTION TO STAGE MANAGEMENT
Undergraduate
Intro to Stage Management is a required class which takes place during the fall quarter of the stage management students’ first year. The class covers a combination of stage management methods used at The Theatre School and best professional practices for the beginning stage manager. Visits to The Theatre School shops and discussions with shop supervisors introduce the first year stage managers to the needs, requirements, and preferred professional methods as defined by the construction processes of the shops.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 107
THEATRE CREW
Undergraduate
Theatre Crew (2 quarter hours) All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 108
THEATRE CREW
Undergraduate
Theatre Crew (2 quarter hours) All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 109
THEATRE CREW
Undergraduate
Theatre Crew (2 quarter hours) All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 111
DRAWING FOR DESIGNERS I
Undergraduate
The first in a three quarter sequence of general drawing courses exclusively for students enrolled in the design majors of The Theater School. Two credit hours. Open to Theatre students only.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 112
DRAWING FOR DESIGNERS II
Undergraduate
The second in a three quarter sequence of general drawing courses exclusively for students enrolled in the design majors of The Theater School.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 113
DRAWING FOR DESIGNERS III
Undergraduate
The third in a three quarter sequence of general drawing courses exclusively for students enrolled in the design majors of The Theater School.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 120
SOUND SOFTWARE
Undergraduate
This class is an overview of the computer programs Sound Design majors will need to create their work. This helps them get a jump-start on how to manipulate sound files on the computer within Peak and Logic, with an overview of the M7CL console they will be using when they start designing the following year.

TEC 151
TECHNICAL DRAWING I
Undergraduate
First course in a 3 course sequence. Mechanical drawing techniques and projection theories are practiced, including drawing-board geometry, scale and dimensioning, and orthographic principles.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 152
TECHNICAL DRAWING I
Undergraduate
Second course in a 3 course sequence. Mechanical drawing techniques and projection theories are practiced, including drawing-board geometry, scale and dimensioning, and orthographic principles.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 153
TECHNICAL DRAWING I
Undergraduate
Third course in a 3 course sequence. Mechanical drawing techniques and projection theories are practiced, including drawing-board geometry, scale and dimensioning, and orthographic principles.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 208
SOUND TECHNOLOGY I
Undergraduate
This class introduces students to the fundamentals of sound technology. Students will become familiar with a range of audio components and specifications, and learn how they function, how they connect to each other, and why they are used in a modern theatre. Students will be able to put together a sound system and understand how audio signals flow thru that sound system.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 209
SOUND TECHNOLOGY I
Undergraduate
This class teaches the history of the recording industry by learning about the most popular studios that shaped the sound of recorded music. You will also learn the practice and set-up of studio recording.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 210
SOUND TECHNOLOGY I
Undergraduate
Every day of this class presents you with a sound system that is not producing sound. And each day there is a lesson to learn about how to approach and troubleshoot problems that often arise when designing sound for theatre.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 251
TECHNICAL DRAWING II
Undergraduate
First course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 252
TECHNICAL DRAWING II
Undergraduate
Second course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 253
TECHNICAL DRAWING II
Undergraduate
Third course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 254
COSTUME TECHNOLOGY I
Undergraduate
First course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 255
COSTUME TECHNOLOGY I
Undergraduate
Second course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 256
COSTUME TECHNOLOGY I
Undergraduate
Third course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 257
CONSTRUCTION AND RIGGING I
Undergraduate
First course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 258
CONSTRUCTION AND RIGGING I
Undergraduate
Second course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 259
CONSTRUCTION AND RIGGING I
Undergraduate
Third course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 267
STAGE MANAGEMENT I
Undergraduate
First course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day "nuts and bolts" in the stage management process.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 268
STAGE MANAGEMENT I
Undergraduate
Second course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day "nuts and bolts" in the stage management process.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 269
STAGE MANAGEMENT I
Undergraduate
Third course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day “nuts and bolts” in the stage management process.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 271
TECHNICAL PRODUCTION PRACTICE I
Undergraduate
First course in a 3 course sequence. For all technical students, this course makes production assignments based on the student’s ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 272
TECHNICAL PRODUCTION PRACTICE I
Undergraduate
Second course in a 3 course sequence. For all technical students, this course makes production assignments based on the student’s ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 273
TECHNICAL PRODUCTION PRACTICE I
Undergraduate
Third course in a 3 course sequence. For all technical students, this course makes production assignments based on the student’s ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 320
TECHNICAL COLLABORATION
Undergraduate
This class is designed to teach students how to collaborate, and hone their tech cueing skills, within a small storefront theatrical setting that they will undoubtedly come across when they graduate and move into the Chicago theatre community. In this class, the students will learn how to create opening and closing cues; transitions that punctuate, build/decline, propel, and show passage of time. The cues will then be amended in the workshop, to help the students learn to work quickly in changing timings and mood. Making quick artistic decisions and implementing them efficiently is the goal.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 354
COSTUME TECHNOLOGY II
Undergraduate
First course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students’ knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 355  
COSTUME TECHNOLOGY II  
Undergraduate  
Second course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students’ knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 356  
COSTUME TECHNOLOGY II  
Undergraduate  
Third course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students’ knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 357  
CONSTRUCTION AND RIGGING II  
Undergraduate  
First course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 358  
CONSTRUCTION AND RIGGING II  
Undergraduate  
Second course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 359  
CONSTRUCTION AND RIGGING II  
Undergraduate  
Third course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 367  
STAGE MANAGEMENT II  
Undergraduate  
First course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
Second course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Third course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

First course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Second course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Third course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

First course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 455  
COSTUME TECHNOLOGY III  
Undergraduate  
Second course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 456  
COSTUME TECHNOLOGY III  
Undergraduate  
Third course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 457  
PRODUCTION MANAGEMENT SEMINAR  
Undergraduate  
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 458  
PRODUCTION MANAGEMENT SEMINAR  
Undergraduate  
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 459  
PRODUCTION MANAGEMENT SEMINAR  
Undergraduate  
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 460  
THEATRE MANAGEMENT  
Undergraduate  
Theatre Management  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 467  
STAGE MANAGEMENT III  
Undergraduate  
A continuation of 369 - this course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions. With the addition of a lab session.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 468  
STAGE MANAGEMENT III  
Undergraduate  
A continuation of 467 with the addition of a lab session.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 469  
STAGE MANAGEMENT III  
Undergraduate  
A continuation of 467 with the addition of a lab session.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 471  
TECHNICAL PRODUCTION PRACTICE III  
Undergraduate  
First course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 472  
TECHNICAL PRODUCTION PRACTICE III  
Undergraduate  
Second course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 473  
TECHNICAL PRODUCTION PRACTICE III  
Undergraduate  
Third course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 490  
INTERNSHIP  
Undergraduate  
The internship provides the student with an opportunity to learn by working with experienced professionals in an area related to his or her area of study at The Theatre School.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 100  
WORLD OF THE THEATRE  
Undergraduate  
Through the aesthetic analysis of plays and dramatists that were foundational in the development of dramatic literature, the student is encouraged to develop basic critical standards for the understanding and appreciation of dramatic production. Can be taken by non-Theatre School students.  

THE 105  
HISTORY OF DRAMATIC LITERATURE  
Undergraduate  
Second course in a 3 course sequence.  
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 106
HISTORY OF DRAMATIC LITERATURE: CLASSICAL GREECE AND ROME
Undergraduate
Third course in a 3 course sequence.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 141
DESIGN WORKSHOP
Undergraduate
First course in a 3 course sequence. This course will introduce the student to the art of theatre design through the examination of the principles of design and composition, the elements of theatrical design, and the nature of collaboration and communication. It is intended for those who plan to work in the theatre in areas other than design. The focus is on the aesthetic, rather than the technical, aspects of design and on how design fits into the framework of the study of theatre in general. The class is intended to prepare those pursuing a career in theatre for communicating and working with designers. Assignments will emphasize the development of creative skills and a common vocabulary in order to establish a framework for informed choices, and for an appreciation of theatre design and its various areas of specialization. In this first course we will explore the fundamentals of visual design. Students will do several basic design projects during the quarter. The process of theatrical design will be introduced by working with a classic script for design analysis and preliminary design parameters.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 142
DESIGN WORKSHOP
Undergraduate
Second course in a 3 course sequence. In the second quarter the class will focus on applying the fundamentals of the first course to the specific task of theatre design. The emphasis is on scenic design, but costumes, lighting, and sound will also be featured. The script analyzed in the first course will continue to be used to explore the integration of design parameters with the aesthetic and conceptual goals of production. We will also discuss the design process and some of the techniques utilized by designers. Later in the quarter another classic script will be used as the foundation for a final design project culminating in a scenic design for that script.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 143
DESIGN WORKSHOP
Undergraduate
Third course in a 3 course sequence. In the third quarter the emphasis is on group artistic work. In this ‘practicum’ quarter students will collaborate in small groups on a design for a mythological story. Following that, and for the bulk of the quarter, students will be assigned to design teams consisting of director and designers. These teams will follow the entire design process, using a Shakespeare script, culminating in the formal presentation of a fully designed production. It is important to understand that the focus of this course is on design process and communication. The technical aspects of theatre design are kept to a minimum. The course aims to help theatre artists in their collaboration with theatre designers.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 200
DRAMA ON STAGE: GENDER & SEXUALITY IN THE THEATRE
Undergraduate
Through lecture, discussion, projects and actual theatre attendance, students explore the human nature of the theatrical impulse and its evolution into theatrical form. Plays and readings deal with issues of gender identity, sexual orientation, and sexuality in performance. Students follow the process of specific drama productions from script to stage and examine the artistic process and the role that sexuality and gender play in performance and rehearsal.
THE 201
THEATRE MANAGEMENT I: INTRODUCTION TO MANAGEMENT CONCEPTS IN THE PERFORMING ARTS
Undergraduate
Through lecture, discussion, readings, videos, research and projects, the student learns about styles of arts leadership, contemporary issues and best practices in the field of non-profit arts management, the history of non-profit arts administration in the US including leaders in the field and opportunities for careers in the arts. Emphasis is placed on how non-profit organizations balance their commitment to the Art, the Artist and the Audience. Specific areas of non-profit arts management to be addressed include the role of the arts manager; the primacy of the mission; planning, change and adaptation; leadership and group dynamics; and human resources. (Cross Listed with PAM 301)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 202
THEATRE MANAGEMENT I: ORGANIZATIONAL STRUCTURE AND FINANCIAL MANAGEMENT
Undergraduate
Through lecture, discussion and projects, the student learns about non-profit arts organizational structures, short-and long-term planning, intersection of mission/vision/values and programming with growth and sustainability, producing vs. presenting organizations, financial management, management information systems and budgeting. (Cross-listed with PAM 302)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 203
THEATRE MANAGEMENT I: MARKETING FOR THE ARTS
Undergraduate
Through lecture, discussion and projects, the student learns about strategies and objectives in marketing and promoting the performing arts. Specific focus is given to integrated marketing and communication strategies; market research and evaluation techniques; organizational image and branding; patron support services; and audience development. Students will create marketing and public relations plans and materials, both independently and on teams, which incorporate targeting audiences; promotions, publicity, and advertising; and working with various forms of media, including social networking and technology-based platforms. (Cross-listed with PAM 303)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 204
HISTORY OF DRAMATIC LITERATURE
Undergraduate
First course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasized theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 205
HISTORY OF DRAMATIC LITERATURE
Undergraduate
Second course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasized theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 206
HISTORY OF DRAMATIC LITERATURE
Undergraduate
Third course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasized theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 207
THEATRE MANAGEMENT I: INSTITUTIONAL ADVANCEMENT AND COMMUNITY ENGAGEMENT
Undergraduate
Through lecture, discussion and special projects, the student learns about institutional advancement and development as well as collaborations with internal and external constituencies. Topics include forming partnerships, community outreach, board development and engagement, fundraising and grant writing, donor cultivation, and the philanthropic community. This course is the final course in the four-course sequence on Performing Arts Management, and integrates the topics, vocabulary, themes, and subjects introduced in the previous three courses. (Cross-listed with PAM 304)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 208
UNDERAGE ONSTAGE
Undergraduate
This class examines theatrical literature from the Ancient Greeks through today to uncover how and why playwrights include children in their works and what affect this has on audiences. Contributing variables examined while studying these plays include the time period written in, the social, political, and cultural context, the playwright’s style, and the genre used. The class will also explore the choice faced by a number of directors; whether to use children true to the age in the script, or adults who can still play young people. The vocabulary of Dramatic Text Analysis will be taught and used when providing written and oral examination of plays covered.

THE 209
SKETCH COMEDY
Undergraduate
Live performances of sketch comedy present theatre in one of its most elemental forms. With a focus on actors and text rather than technical elements, stagings of sketch revues explore the relationship between audience and artist in a dynamic and revealing way. This course will explore both the theoretical underpinnings of comedy and the practical techniques for the creation of this work. The class will examine as literature this work that is often overlooked by critics and theorists because of its perception as a ?low? art form.

THE 210
SCRIPT ANALYSIS
Undergraduate
A study of classical text analysis. Using dramatic literature from naturalism to the avant garde, student will dissect structurally how the plays work.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 212
INTRODUCTION TO THEATRE STUDIES
Undergraduate
This course is a general introduction to the aesthetics of the various forms and permutations of theatrical performance. It is a study of performance as an art, with particular emphasis upon its cultural and social influences in our society, and its relationship with the other arts and humanities. The course will emphasize the development of skills for articulate verbal and written response to performances.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 214
ETHICAL DECISION MAKING IN THE THEATRE
Undergraduate
Ethical decisions are a challenging part of every profession. Ethical Decision-Making in the Theatre assumes two basic questions: What is an ethical decision, and why is ethics of particular resonance for theatre professionals? Through readings, writing assignments, and class discussions, this course will work to define ethics by examining examples of both ethical and unethical behavior, will examine the ethical role that theatre plays in our society, and will debate the responsibilities that we carry into the profession as theatre artists and professionals. Through group work we will determine a framework for ethical thinking and will apply this framework to specific situations facing the theatre profession today, ultimately determining whether or not the result is an ethical decision.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 224
DRAMATIC THEORY: TRAGEDY
Undergraduate
An introduction to the major developments in dramatic theory from Aristotle to the present. Through reading essays on theory along with plays, the course will create a context for understanding how the ethical, aesthetic and social philosophies of dramatic theory inform theatrical production and literature. May be taken by non-Theatre majors.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 225
DRAMATIC THEORY: COMEDY
Undergraduate
An introduction to the major developments in dramatic theory from Aristotle to the present. Through reading essays on theory along with plays, the course will create a context for understanding how the ethical, aesthetic and social philosophies of dramatic theory inform theatrical production and literature. May be taken by non-Theatre majors.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 234
DRAMATURGY I: INTRODUCTION TO DRAMATURGY
Undergraduate
The first course in the three-term Dramaturgy I sequence. Through reading about the history of dramaturgy, the course develops the intellectual framework necessary to think about the art and science of the discipline and focuses on the study of dramaturgical issues of the past two decades. Students work on theoretical projects. Some attendance at theatre productions may be required.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 235
DRAMATURGY I: INTRODUCTION TO PRODUCTION DRAMATURGY
Undergraduate
The second class in the three-term Dramaturgy I sequence, this course continues the work of THE 234 and emphasizes writing in a workshop context as well as the process of collaboration and hands-on collaboration itself. Much of the student work focuses on in-house theoretical theatre productions. Students who are dramaturgy-criticism majors prepare to work on their first dramaturgy project, the MFAI short plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 236
DRAMATURGY I: TYA AND PLAYWORKS DRAMATURGY
Undergraduate
The third class in the three-term Dramaturgy I sequence, this course focuses on the dramaturgy for theatrical productions aimed at young audiences. A major emphasis in the class is the preparation of the actor packets and study guides for The Theatre School's Playworks series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 242
STAGE DIRECTION FOR NON-MAJORS
Undergraduate
This course is designed to introduce students to the director's craft. The focus is on the director's relationship to text through the analysis of playscripts and the use of that analysis to plan an interpretation of a play. Analysis will come from a variety of perspectives--personal, psychological, social, and historical. In addition to preparing and presenting their projects, students will attend performances and write papers in response. The class combines lecture, discussion, group exercises, and in-class activities.

THE 244
DRAMATIC WRITING FOR NON-MAJORS
Undergraduate
This course is designed as an introduction to the process of playwriting. The emphasis on the exploration of a range of techniques and tools available to the playwright. Through the completion and discussion of a series of writing exercises, the class will examine the various elements of playwriting. Particular attention will be paid to the connections between form and meaning. Work for the course will include weekly exercises, written responses to plays in production, and the presentation of projects. Instructional methods will include lecture, discussion, group exercises, and in-class activities. The final project of the class will be the completion of a draft of a 10-minute play.
THE 246
STAGE DESIGN FOR NON-MAJORS
Undergraduate
The course introduces the essential principles of designing for the stage. The art of stage design is explored through the analysis and interpretation of dramatic literature. Students will engage in script analysis, creative research, critical writing, model building and rendering to present visual and written work that represents their personal reflection on the plays examined in the class.

THE 250
AMERICAN FUNNY: STAGE COMEDY FROM GROUCHO MARX TO TINA FEY
Undergraduate
We're a funny people. We also like to watch others be funny. This course explores some aspects of American stage comedy, a genre that is as funny, but less studied, than film comedy.

THE 251
STAGE TO SCREEN: CINEMATIC TRANSLATIONS OF THE DRAMATIC CANON
Undergraduate
It is almost always the case that audiences are introduced to the dramatic canon with cinematic translations of the great plays, rather than actual productions. In this course we will examine what elements theatre and film share as well as what elements one or the other medium possesses exclusively if any. What is lost or, indeed gained in cinematic translation? What is the notion of theatricality? What cannot be translated to the film? What societal elements come into play when translating a play for the screen? Socio-political and historical milieu of the original plays will be examined as well as those of the screen plays.

THE 253
THEME PARK THEATRE
Undergraduate
Theme parks have become contemporary equivalents of the ancient Greek theatre festivals - places where the citizenry gather to revisit the myths and history of the community. While much has been written about theme parks from the perspective of cultural studies, urban planning, and commerce, little attention has been paid to their function as performance or theatre. In this class we will attempt to develop criteria for evaluating theme park attractions as works of art. How do theme parks fulfill or challenge traditional definitions of theatre? What is the relationship between audience and performer? Can/should theme parks aspire to do more than entertain? How are stories told physically and architecturally? How have theme parks influenced theatre and other art forms?

THE 254
POLITICAL THEATRE
Undergraduate
This course surveys political theatre from the ancient Greeks right up until today. Through an examination of the political contents of specific plays and of theoretical reading, such as manifestos, the course instructs students in critical thinking, the relationship between form and content, and between a society and one genre of art.

THE 255
ANGELS, PUNKS AND RAGING QUEENS: THE ECLECTIC QUILT OF AIDS DRAMA
Undergraduate
Acquired Immune Deficiency Syndrome (AIDS) has left an indelible mark on both the history and culture of the world. While fear and loss can paralyze, they can also mobilize. In addition to destroying generations of artists, AIDS has become what some call “the great unifier,” giving voice to a new generation of theatre artists. But what are these voices? Cries for social change? Political rants? Stories of remembrance? Lessons to educate? All of the above? What does AIDS mean when it appears onstage in a performance? By interpreting and analyzing plays from both national and global AIDS perspectives, reading critical and reflective essays, and through discussion, students in the course will discover how the ritual of theatre has been used to create the eclectic quilt of voices that is AIDS drama.
THEATRE FOR YOUNG AUDIENCES: DRAMATIC LITERATURE: PLAYS FOR THE ONCE AND FUTURE AMERICAN AUDIENCE
Undergraduate
Over the past one hundred years or so, artists and educators in the United States have specifically dedicated themselves to sharing and creating aesthetic, creative experiences for young people. But what have been the impulses behind these plays and creations? Why specifically devise a theatre for young audiences (TYA)? Are children just little adult theatre goers or has an approach and methodology developed through the years to speak directly to young people? The goal of this introductory course is find some answers to these questions by surveying the history of dramatic literature for children in the United States from the beginning of the last century to the present day. Through readings, lectures, workshops, and discussions students will gain insight into the TYA theories, philosophies, styles, and practices that have accumulated over the years. By excavating the past and examining the present, students will achieve further appreciation and understanding of the spectrum of theatrical experiences written and improvised for children.

WRITING LOCALLY, THINKING GLOBALLY: INTERNATIONAL THEATRE FOR YOUNG AUDIENCES
Undergraduate
While writing and performing for their local communities, various international artists have made a global impact on the field of theatre for young audiences. This course is an investigation of the principles, procedures, and practices of theatre for young audiences playwrights and artists worldwide. Through analysis of readings, lectures, workshops, and discussions students will explore the skills and aesthetic techniques that theatre creators from around the globe use to communicate with their audiences. By examining historical, theoretical, and artistic intercontinental connections, students will hopefully gain further appreciation and understanding of the contemporary, global theatre for young audiences (TYA) field.

SHADOWS OF UNDERSTANDING: THE HOLOCAUST IN THEATRE AND PERFORMANCE
Undergraduate
The Holocaust of the 20th Century perpetrated and executed by Nazi Germany, has both seared itself into people's consciousness and become very much a part of world culture. Theatre and performance have been created to try to understand this event and search for meaning. Created through multiple perspectives and styles - historical and political, philosophical and religious, realistic and surrealistic, using dark humor and the power of memory, focusing on gender relations -- there is no one method of presenting the Holocaust artistically. Through a close investigation of key theatre and performances, students will discover many works that were unknown to them and that will help to shed some light on these representations more deeply, reflecting the complexity of the Holocaust in a search for understanding and ultimately seeking to answer this imperative, "Can and should art be made from representations of genocidal atrocity?"

PERFORMING MOSAIC: JEWISH CULTURE'S INFLUENCE ON AMERICAN THEATRE AND PERFORMANCE
Undergraduate
Over the years the abundance of artistic contributions from Jewish creators: playwrights, performers, composers and lyricists, acting teachers and producers - has helped to shape the American Theatre as we know it. Through a critical reading of the plays in their context and viewing performances on video this course will explore the unique synthesis and the long and colorful relationship between Jews and theatre in America. Critical questions to be asked are: How does the ethnic mosaic of America and American values and multi-culturalism act as an incubator? How did anti-Semitism and stereotypes play a role? Does the cultural memory of the Jew as the "outsider and survivor in history" provide a particular aesthetic?

CHICKS, MEAN GIRLS AND FEMMES FATALES: WOMEN WRITING IN THE AMERICAN THEATRE
Undergraduate
This course examines ninety years of women's dramatic writing in America from the jazz age to today. We will look at plays written by women, theoretical essays about the plays, and playwrights' biographies, as well as historical materials illuminating plays' themes and forms. Identity has always been important to American dramaturgy and women have always occupied a unique place in the theatre as actresses, as spectators, as icons, as demons and finally as creators. Women have been playwrights but they have also been producers and theatre adventurers.

OCULAR PROOF: SHAKESPEARE'S INFLUENCE IN CINEMA
Undergraduate
Shakespeare's plays explore the scope and depth of the human experience. Using the visual elements of cinema, these epic stories translate effectively for modern audiences. Students will read four plays by Shakespeare, and explore their thematic and dramatic interpretations on film: two adapted from Shakespeare's themes and two cinematic versions of the plays themselves which will elucidate the 'ocular proof' of Shakespeare's influence on cinema.
THE 268
INTRODUCTION TO THE PRODUCTION PROCESS
Undergraduate
This course introduces students to the specifics of the production process and focuses on similarities and differences between the curricular perspective of the production process at The Theatre School and that of the professional world. Through readings, lecture, and discussion, students will gain an orientation to the responsibilities and expectations of first-year crew assignments, basic skills involved in stage management, examples of the production process from both the Chicago and national theatre scenes, and the concept of collaboration as a fundamental component of all production work.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 269
STAGE MANAGEMENT WORKSHOP
Undergraduate
Second course in a 2 course sequence. A survey of the stage manager's role in pre-production, rehearsal, tech and performance. The course will explore the techniques and responsibilities of the stage manager in a variety of theatrical venues.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 271
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
First course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 272
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
Second course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 273
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
Third course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 291
PERFORMANCE WORKSHOP I
Undergraduate
The first course in a 3-course sequence. Students work on basic performance skills through individual and group exercises in acting, voice and speech, and movement. The work culminates in in-class performances of selected scenes and/or monologues from a variety of contemporary American plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 292
PERFORMANCE WORKSHOP II
Undergraduate
The second course in a 3-course sequence. Students expand on basic performance skills emphasized in Performance Workshop 1. The emphasis in this second quarter focuses on the actor's approach to text, intentionality and motivation, objectives, obstacles, the tactics used in realizing physical actions in performance, and an introduction to the director-actor relationship in rehearsal.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 293
PERFORMANCE WORKSHOP III
Undergraduate
The third course in a 3-course sequence. The focus of the final course is on the practical dynamics of the director-actor relationship. Students in Performance Workshop 3 serve as the acting company for those students in the third quarter of the BFA Directing sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 301
THEATRE MANAGEMENT II: INTRODUCTION TO COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about the current environment in the world of commercial theatre. Focusing on the study of producing, students will learn about the nature of the work of the producer, general manager, and other key figures; securing rights to theatrical properties; raising capital for theatrical productions (filings, offerings, Securities and Exchange Commission); facilities and touring issues. Studies include researching commercial theatre entities and individuals.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 302
THEATRE MANAGEMENT II: HUMAN RESOURCES MANAGEMENT IN THE COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about human resource management and compliance with federal employment laws including review of employee handbooks, employee benefits, payroll and withholding, I-9, W-2 and W-4 forms, employee vs independent contractor status as well as hiring someone who is a corporation. The course reviews the history, membership, contracts and work rules of the theatrical unions in the United States, collective bargaining, labor arbitration and non-union human resource management in commercial theatre.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 303
THEATRE MANAGEMENT II: FINANCIAL MANAGEMENT IN THE COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about financial planning, budgeting and accounting, box office income, booking agreements and deals, paying labor and other expenses, income statements, and settlements. Attention is paid to distinguishing between facility licensing agreements and booking contracts.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 320
MOVEMENT WORKSHOP
Undergraduate
By exploring a beginning approach to one or more methodologies intended to increase an actor's movement and use of self, this course provides a starting point for the analysis of the processes an actor uses to broaden, deepen, and clarify physical work on a character and as a member of an artistic ensemble.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 324
DRAMATIC THEORY
Undergraduate
This course explores the art and craft of reviewing and writing about theater and the other performing arts in a variety of different media, from newspapers to alternative weeklies to magazines. The course also aims at developing for the student a systematic understanding of the concepts and issues that have historically informed theatrical criticism, as well as those that inform the contemporary period.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 325
DRAMATIC CRITICISM
Undergraduate
Through reading, lecture, discussion, and writing practicum, the course introduces foundational concepts in descriptive and evaluative criticism. Through the process of writing critical responses to theatre performances, the course addresses topics from criteria for script evaluation to expected outcomes of the theatrical experience. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 326
DRAMATIC CRITICISM
Undergraduate
Through reading, lecture, discussion, and writing practicum, the course introduces foundational concepts in descriptive and evaluative criticism. Through the process of writing critical responses to theatre performances, the course addresses topics from criteria for script evaluation to expected outcomes of the theatrical experience. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 327
PLAYWRITING
Undergraduate
First course in a 3 course sequence. A practical course in which the student writes a series of exercises and short plays exploring the basic techniques of playwriting. Can be taken by non-Theatre School students with permission of instructor

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 328
PLAYWRITING
Undergraduate
Second course in a 3 course sequence. A practical course in which the student writes a series of exercises and short plays exploring the basic techniques of playwriting. Can be taken by non-Theatre School students with permission of instructor

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 329
PLAYWRITING
Undergraduate
Third course in a 3 course sequence. A practical course in which the student writes a series of exercises and short plays exploring the basic techniques of playwriting. Can be taken by non-Theatre School students with permission of instructor

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 330
MUSICAL THEATRE WORKSHOP
Undergraduate
This course provides an introduction to musical theatre through performance (including solo and group singing and scene preparation) and historical and theoretical studies (including vocal technique, musical theatre history and literature, and music theory).

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 334
DRAMATURGY II: CLASSICAL DRAMATURGY
Undergraduate
The first class in the three-term Dramaturgy II sequence, this course continues the work of Dramaturgy I and focuses on the preparation for work on a classical play.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 335  
DRAMATURGY II: NEW PLAY DRAMATURGY  
Undergraduate  
This course is taught in conjunction with The Theatre School's playwriting program and focuses the dramaturgical work involved in new play development.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 336  
DRAMATURGY II : DRAMATURGY CAPSTONE  
Undergraduate  
The final class in the dramaturgy sequence, this course focuses on issues relevant to dramaturgical work. Students in the class will be required to write a thesis essay that emphasizes a dramaturgical issue relevant to their own production work. This is course is open to theatre majors only.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 241  
ARE WE STILL FABULOUS?: QUEER IDENTITY IN CONTEMPORARY DRAMA  
Undergraduate  
Born out of ACT UP and the AIDS militant movement of the late 1980s and early 1990s, Queer Nation concerned itself with the issue of gay and lesbian enfranchisement and power. They created the battle cry, "We're here, we're queer, we're fabulous, get used to it;" thereby granting the gay community ownership of the word “fabulous.” Fabulousness not only became a new manifesto for queer politics and camp, but also became synonymous with irony, tragic history, defiance, gender-fuck, glitter, and drama. Currently, young playwrights have shifted the visor of gay drama from overtly political dramas to stories of identity and love. In replacing direct political messages with more personal appeals for social progress, is contemporary gay drama still fabulous? By interpreting and analyzing the most current queer plays, reading critical and reflective essays, and through discussion, students in the course will decide for themselves if “fabulous” is a thing of the past or stronger than ever in the present.

THE 344  
HAMLET IN PERFORMANCE: SCRIPT, STAGE, SCREEN  
Undergraduate  
It is through performance that the essence of Shakespeare materializes. In this course we will examine the relationship of Hamlet to theory, theatrical performance, and film. What makes a good production of Hamlet or a bad one? Was Hamlet rooted in economic necessity? What is lost or gained by filmic representation? To comprehend Shakespeare as a writer whose Hamlet continues to fascinate modern audiences, the course looks at not only the page-to-stage translations but also the critical cultural context in which he first achieved artistic success.

THE 345  
POLITICAL THEATRE  
Undergraduate  
This course surveys political theatre from the ancient Greeks right up until today. Through an examination of the political contents of specific plays and of theoretical reading, such as manifestos, the course instructs students in critical thinking, the relationship between form and content, and between a society and one genre of art.

THE 371  
THEATRE STUDIES PRODUCTION PRACTICE II  
Undergraduate  
First course in a 3 course sequence. This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 372  
THEATRE STUDIES PRODUCTION PRACTICE II  
Undergraduate  
Second course in a 3 course sequence. This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 373
THEATRE STUDIES PRODUCTION PRACTICE II
Undergraduate
Third course in a 3 course sequence. This course makes assignments based on the student’s ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 381
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
First course in a 3 course sequence. The styles and aesthetics of art, architecture, fashion and the decorative arts from ancient Egypt through the first half of the 20th century are examined. Emphasis is placed on periods and countries that are most important to American theatre. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 382
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
Second course in a three-course sequence. The styles and aesthetics of art, architecture, fashion and the decorative arts from ancient Egypt through the first half of the 20th century are examined. Emphasis is placed on periods and countries that are most important to American theatre. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 383
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
Third course in a three-course sequence. The styles and aesthetics of art, architecture, fashion and the decorative arts from ancient Egypt through the first half of the 20th century are examined. Emphasis is placed on periods and countries that are most important to American theatre. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 399
INDEPENDENT STUDY
Undergraduate
Independent Study

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 408
CAPSTONE: PREPARING FOR THE PROFESSION
Undergraduate
Preparing for the Profession is the first course in the 2-term Capstone sequence. This course serves as a cumulative and summative examination of both the academic and practical components of a 4-year BFA program in theatre studies. Through readings, writing, and discussion, the course will emphasize a number of theoretical issues such as the question of ethical decision-making in theatre practice and the interrelationship between liberal studies coursework (what we make theatre about) and theatre coursework (how we make theatre). From a more practical perspective, this course will also provide students with an introduction to portfolio preparation and cover letters and resumes for prospective jobs as students prepare to enter the professional market.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 410
THEATRE STUDIES CAPSTONE
Undergraduate
Graduating students will explore the practical and philosophical issues of contemporary theatre. Topics will range from the preparation of resumes and portfolios for various positions to explorations of the role of the arts in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
The 412
Portfolio Preparation
Undergraduate

Portfolio Preparation expands and heightens the work begun in THE 408, Preparing for the Profession, and THE 410, Capstone. Students during the spring quarter course will work to develop a variety of cover letters for prospective jobs, refine and finesse their resumes, review interviewing techniques, and participate in a series of mock interviews for specific theatre companies - all in preparation for Theatre Studies participation in Graduate Showcase.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

The 424
Seminar: Topics in Theatre Studies
Undergraduate

Seminars will offer intensive study of various areas of theatrical study including history, criticism, performance and production. The courses may be organized around specific topics, issues, artists or themes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

The 425
Seminar: Topics in Theatre Studies
Undergraduate

Seminars will offer intensive study of various areas of theatrical study including history, criticism, performance and production. The courses may be organized around specific topics, issues, artists or themes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

The 426
Seminar: Topics in Theatre Studies
Undergraduate

Seminars will offer intensive study of various areas of theatrical study including history, criticism, performance and production. The courses may be organized around specific topics, issues, artists or themes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

The 427
Playwright's Seminar
Undergraduate

First course in a 3 course sequence. Advanced playwrights work on longer, more complicated projects. The production values of these scripts are explored by actors and playwrights in the New Play Workshop.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

The 428
Playwright's Seminar
Undergraduate

Second course in a 3 course sequence. Advanced playwrights work on longer, more complicated projects. The production values of these scripts are explored by actors and playwrights in the New Play Workshop.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

The 429
Playwright's Seminar
Undergraduate

Third course in a 3 course sequence. Advanced playwrights work on longer, more complicated projects. The production values of these scripts are explored by actors and playwrights in the New Play Workshop.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 434  
SEMINAR: TOPICS IN DRAMATIC LITERATURE  
Undergraduate  
Seminars will offer intensive study of various areas of literature created for the theatre. The courses may be organized around specific playwrights, historical periods, styles or themes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 435  
SEMINAR: TOPICS IN DRAMATIC LITERATURE  
Undergraduate  
Seminars will offer intensive study of various areas of literature created for the theatre. The courses may be organized around specific playwrights, historical periods, styles or themes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 436  
SEMINAR: TOPICS IN DRAMATIC LITERATURE  
Undergraduate  
Seminars will offer intensive study of various areas of literature created for the theatre. The courses may be organized around specific playwrights, historical periods, styles or themes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 471  
THEATRE STUDIES PRODUCTION PRACTICE III  
Undergraduate  
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 472  
THEATRE STUDIES PRODUCTION PRACTICE III  
Undergraduate  
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 473  
THEATRE STUDIES PRODUCTION PRACTICE III  
Undergraduate  
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 490  
THEATRE STUDIES INTERNSHIP  
Undergraduate  
The internship provides the student with an opportunity to learn by working with professionals in an area related to his/her area of study at The Theatre School.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 511
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training course as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of tickets sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure.

Status as Graduate Theatre student is a prerequisite for this class.

THE 512
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure.

Status as Graduate Theatre student is a prerequisite for this class.

THE 513
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure.

Status as Graduate Theatre student is a prerequisite for this class.

THE 521
ARTS LEADERSHIP SYNTHESIS SEMINAR
Graduate
All study revolves around this weekly seminar that includes aspects of the Chicago Shakespeare work experience and DePaul course integration in addition to readings, field trips, projects, and time for independent study. The Synthesis Seminar is fluid and reflective, allowing for both examination of coursework and on-the-job experience. Each seminar session synthesizes the students' weekly studies, experiences both at work and in the community, independent research, and natural curiosity in close connection with Theatre School faculty, program director, and the Chicago Shakespeare department heads.

Status as Graduate Theatre student is a prerequisite for this class.

THE 522
ARTS LEADERSHIP SYNTHESIS SEMINAR
Graduate
All study revolves around this weekly seminar that includes aspects of the Chicago Shakespeare work experience and DePaul course integration in addition to readings, field trips, projects, and time for independent study. Status as Graduate Theatre student is a prerequisite for this class.

THE 681
ARTS LEADERSHIP THESIS PROJECT
Graduate
As the final term of the Synthesis Seminar, this course focuses on the culmination of the program and successful completion of a final capstone project. These projects will be individually selected in conference with the Program Director during the second year of the program. Possible projects include analytical reports, a specific and substantial employment undertaking, and exploration and treatise with an innovative focus in the industry.

Status as Graduate Theatre student is a prerequisite for this class.

TV 289
THE BUSINESS OF TELEVISION
Undergraduate
Course provides historical background of the television business, beginning with the initial launch of the industry in the 1940s. Students examine the establishment of the regulatory system, including the Federal Communications Commission (FCC), the operational structure of stations and networks, the development of cable and satellite broadcasting, and the programming policies and strategies of the present broadcasting industry. PREREQUISITE(S): DC 271
TV 301
TELEVISION PROGRAM DEVELOPMENT
Undergraduate
Television program development is a creative and intense process that takes you from the germ of a story idea to a fully thought out series or program. In this class, you will work with your colleagues and the instructor to enhance your skills in storytelling and in pitching your “baby” to industry executives from cable to network to public and independent services. PREQUISITE(S): DC 201, DC 272

TV 320
EDITING FOR TELEVISION
Undergraduate
Class emphasizes editing and post production producing under tight deadlines. Students edit commercials, trailers, and PSA projects. PREREQUISITE(S): DC 220, DC 271

TV 330
WEBISODE PRODUCTION
Undergraduate
Students will write, produce, edit, screen and webcast a series of five-minute webisodes over the course of the quarter, focusing on short form storytelling for online distribution. Students have to think creatively, collaborate and act quickly to complete the webisodes on deadline. The class will focus on short serial storytelling discussing composition, structure and editing for the various forms the work will take (narrative, documentary, sitcom, reality, etc…). Production groups will be assigned and create a series. Each student will write at least one script of that series that will be produced. All will take part in the production process. PREREQUISITE(S): DC 210

TV 381
LIVE EVENT/TALK TV WORKSHOP
Undergraduate
In this workshop students will produce events with guest artists, presented in front of a live studio audience. Students will help prep each appearance and participate as crew members in the multi-camera production and telecasting of the events. They will learn the professional practices and positions that constitute talk-show format television production. Post-production and finishing for Web Streaming and VOD delivery will also be addressed. 2 credits. May be repeated for credit.

TV 481
LIVE EVENT/ TALK TV WORKSHOP
Graduate
In this workshop students will produce events with guest artists, presented in front of a live studio audience. Students will help prep each appearance and participate as crew members in the multi-camera production and telecasting of the events. They will learn the professional practices and positions that constitute talk-show format television production. Post-production and finishing for Web Streaming and VOD delivery will also be addressed. 2 credits. May be repeated for credit.

CDM graduate students in the Pre requisite Phase are restricted from registering for this class.

UIP 240
CAREER PATHWAYS: EXPLORE YOUR OPTIONS
Undergraduate
This 2-credit course will help you analyze your values, skills, personality preferences and studies as a foundation for career possibilities. You will meet with a mentor from the Chicago community, who shares your career interests, and you will examine a variety of career paths, supported by research and personal reflection. This course is not recommended for seniors.

UIP 250
LIBERAL STUDIES INTERNSHIP
Undergraduate
This course is for students who wish to integrate work and learning. Students will learn career planning skills, explore the organizations in which they work, gain an understanding of how they contributed to their organizations, and discuss societal and world issues, as they affect their workplaces. Students are required to work 10 hours per week while enrolled in the course and attend four 3-hour class meetings. Attendance at an internship orientation meeting is required prior to the start of the course.
UIP 251
VALUES-BASED LEADERSHIP: MAKING A DIFFERENCE WHILE MAKING A PROFIT
Undergraduate

The primary focus of UIP 251 is to examine and apply the values, goals and operating methods of visionary leaders who have successfully pursued financial rewards for themselves and their organizations, while also achieving, through their actions, broader social goals. The results of the examination will be applied at the students' internship sites, where students will demonstrate a range of leadership skills, including an analysis of basic management issues and recommendations for improvements. In addition to working at least 100 hours at an internship site, the course will consist of four class meetings and ongoing D2L discussions. Attendance at an internship orientation meeting is required prior to the start of the course.

UIP 252
CREATIVITY AS A CHANGE AGENT THE WORKPLACE
Undergraduate

Creativity as a Change Agent in the Workplace explores how innovation is a controlling variable within all careers. Students will study how creativity functions within his or her workplace. The class will examine the process of creativity as it might work to revolutionize an industry or force it into failure. Students will examine creative innovations related to the following: invention, leadership, advertising and marketing, teaming concepts and collaboration, and the drive behind entrepreneurship. This experiential learning course is designed to focus the student’s attention on the creative process as it relates to the observable workplace, reflective practice, and the application of theories and ideas. Attendance at an internship orientation meeting is required prior to the start of the course.

UIP 253
PUBLIC SERVICE CAREERS
Undergraduate

Public service jobs involve working with organizations that aim to produce a public good, rather than produce a profit. Those organizations may be nonprofits (providing low-income housing, or supporting the arts, e.g.); community organizing groups (such as ACORN, the Association of Community Organizations for Reform Now); foundations, which typically provide funding to nonprofit organizations; unions; and the local, state, and federal governments. This course will provide an opportunity to students to familiarize themselves with career opportunities in the public service sector by focusing on (a) the types of problems that public service organizations attempt to address; (b) the different strategies used by different types of public service organizations; and (c) the range of available public service jobs. The course will promote the life-long process of integrating work and learning, enable students to view their internship within a broad perspective, assist career decision-making, promote individual success through on-the-job experience, and provide students with valuable networking opportunities, all with a focus on public service careers. Attendance at an internship orientation meeting is required prior to the start of the course.

UIP 254
CORPORATE SOCIAL RESPONSIBILITY
Undergraduate

Corporate Social Responsibility analyzes the mutually dependent relationship between businesses and society, focusing on how organizations can contribute their resources, expertise, and innovations to the benefit of our local, national, and global communities. Using an approved internship experience as a basis for observation, reflection, and problem solving, this course studies the commitment of corporate leadership as it grapples with gaining competitive advantages while striving towards social ideals. By examining their own internship experiences, along with real world case studies, research, and commentary, students will examine the critical decision-making processes organizations address as they balance competitive advantages against the weight of social progress. Attendance at an internship orientation meeting is required prior to the start of the course.

UIP 313
CO-OP WORK ASSIGNMENT
Undergraduate

These courses will enable students to gain experience in a co-op job that is related to their academic majors, concentration and professional goals. Due to changes in technology, strategic goals and hiring trends in today's organizations, students need more than classroom knowledge to become marketable upon graduation. One way in which the lessons from the classroom can be supplemented is through cooperative education jobs, in which students get practical real-world experience. Not only does a co-op work assignment provide valuable lessons which can be learned in no other way, students will gain work experience, job contacts, and job references which will make them more competitive in the post-graduation market. This is an opportunity for students to establish themselves in professional settings and apply theory.

UIP 350
ADVANCED INTERNSHIP: NAVIGATING THE CHANGING WORKPLACE
Undergraduate
Navigating the Changing Workplace is a completely online course, in which students use their current work experience as a laboratory to examine, discuss online, and report on key environmental issues impacting their organizations and their personal work lives. Students will be given opportunities to study workplace change, as well as diversity, ethics and leadership issues. Students will also develop networking skills and become aware of career opportunities in the Chicago community. The course is designed to equip students to navigate the changing workplace successfully and make informed career and work life decisions. Students are required to work at least 100 hours, while enrolled in the course.

UIP 351
CO-OP TUTORIAL
Undergraduate
This 2-credit course will consist of an independent study in a topic area to be agreed upon by you and the instructor. The primary assignment will be a paper and a presentation, describing a project that could actually be implemented at your organization and which would contribute to its success or productivity. Additional assignments will allow you to integrate your work experiences with academic readings. This course includes two meetings with your instructor and ongoing email discussions that focus on the readings. Students are required to speak with their advisor to learn how this course may be applied to help satisfy their JYEL requirement.

UIP 366
CO-OP REFLECTION: ENSURE YOUR CAREER SUCCESS
Undergraduate
Students will put learning into practice by reflecting on their Co-op or long-term internship. Students will acquire access to and knowledge of the organizations, problems and conditions in which they are working; observe how societal and world issues surrounding leadership, social responsibility and spirituality affect their workplaces, all while preparing for a career in your field of interest. The course will be taught using a variety of guest speakers, group discussion, new media, and other interactive resources.

UIP 367
GLOBAL PERSPECTIVES
Undergraduate
Global Perspectives is designed to support students' developing viewpoints and experiential reflections during an intensive internship in Honduras. Honduras, with over half of its population living below the poverty line, is the third poorest country in the western hemisphere. Students who are on the Global Brigades trip to Honduras will be asked to gain a personal as well as an analytical perspective on the effect of Honduras' struggling economy and political instability as these two variables act upon the following local concerns: poverty, education, community health, combating disease, environmental sustainability, and the way global partnerships interact. In doing so, students will be asked to reflect on their personal, immediate, and local experiences, and they will be asked to consider how a range of careers choices might work to respond to the very real, pervasive and growing concerns of poverty around the globe?even those not specific to Honduras.
VFX 200
INTRODUCTION TO VISUAL EFFECTS
Undergraduate
Students will explore contemporary concepts and approaches to production in the current state of film and video effects work. Digital and traditional methodologies will be covered, with a concentration on digital exercises illustrating modern techniques. This course has an additional fee. PREREQUISITES: NONE

VFX 278
DIGITAL COMPOSITING I
Undergraduate
This course is an introduction to compositing and special effects in digital post production. Using current editing/compositing software, students will learn techniques used to combine live action footage with 2D and 3D animation and graphics. PREREQUISITES: DC 220 and VFX 200

VFX 321
DVD AUTHORING
Undergraduate
This course is designed to guide the student in the creation of a fully interactive DVD with menus, chapters, multiple tracks, "Easter eggs," and special features. Students will utilize the current editing/motion graphics/compression/titling software in the creation of their professional quality DVD's. The class will also explore Blu-Ray and HDDVD formats. PREREQUISITES: DC 220

VFX 378
DIGITAL COMPOSITING II
Undergraduate
This course expands on topics covered in VFX 278. Emphasis is on developing the student's understanding of advanced compositing techniques and design. PREREQUISITES: VFX 278

VFX 391
VIRTUAL CINEMA
Undergraduate
Utilizing traditional, live-action, filmmaking techniques along with green screen compositing and CGI students will create high-definition narrative motion pictures. Working on a "digital backlot" students will employ HD cameras while actors work in front of a green screen to all for the artificial backgrounds as well as some major foreground elements to be added later during the post-production stage. Students will be expected to collaborate with animation students in the creation of their final projects. PREREQUISITES: VFX 378, DC 390

VFX 478
DIGITAL COMPOSITING II
Graduate
This course expands on topics covered in VFX 278. Emphasis is on developing the student's understanding of advanced compositing techniques and design. PREREQUISIT(S): VFX 278 or DC 460.

CDM graduate students in the Prequisite Phase are restricted from registering for this class.

WGS 100
WOMEN'S LIVES: RACE/CLASS/GENDER
Undergraduate
This course will introduce students to Women's & Gender Studies by exploring a range of issues that contemporary women face through experiences stratified by race, class, gender, sexuality, and disability. Topics will include women's identities; body image and the media; women's sexuality; intimate relationships and families; women, violence and criminalization; women's work, wage discrimination, and welfare reform; women's health issues, such as reproductive rights, and medical research. Participants will have opportunities to examine ways that this stratification interacts in varied eras, cultures, and sub-cultures to shape women's lives. Students will engage in an activist focus as they are introduced to the layers of oppression that affect many women's lives, from the personal to the global. As they analyze social, cultural, and political issues through "gendered lenses", participants may expand a view of their personal lives to include a framework that encourages resilient responses to such oppression.
WGS 200
WOMEN'S STUDIES IN TRANSNATIONAL CONTEXTS
Undergraduate
This course is a transnational approach to Women's & Gender Studies, examining how goods, money, and media images of women cross national in new ways. A further focus is on how this transformation of national boundaries depends not only upon political changes but also upon economic and cultural shifts. This transnational perspective pays attention to the inequalities and differences intersecting race, class, and gender that arise from new forms of globalization as well as from older histories of colonialism and racism. The course is designed to give the student an in-depth look at a world of connections that do not necessarily create similarities in how women variously experience that world. It introduces students to research by and about women that reflects transnationality in all of its possibilities and challenges.

WGS 212
GROWING UP FEMALE IN AMERICA
Undergraduate
This course examines what it means to grow up female in the contemporary U.S. It explores the ways in which girls develop and are socialized through childhood and adolescence, focusing on how families, schools, peers, and the larger culture influence young women's lives and the ways in which race, ethnicity, class and sexual orientation affect their growth and learning and how their interaction might affect the behaviors and choices of young women as they mature.

WGS 215
GENDER AND EDUCATION
Undergraduate
This course examines gender as a social construct and its meanings within the context of educational institutions, its implications for teaching and learning, and organizational practices that may oppress and/or empower groups or individuals. Emphasis is given to social forces within the larger society that affect education and schooling; sex-stereotyping and gender bias; teacher behaviors; attitudes, practices, and expectations; student motivation and achievement; principles of non-sexist education; gender bias in settings outside of schools; current issues in the media and popular culture; and the ways in which gender bias and sexism interact with other forms of prejudice, inequality, and oppression.

WGS 225
CONSTRUCTING GENDER AND SEXUALITY
Undergraduate
This course will explore through interdisciplinary theory and research how gender and sexuality are socially constructed. It will examine how such constructions have evolved over time and how individuals of diverse identities and cultural backgrounds have been affected by the changes. Discussion will focus on the roles played by powerful societal institutions (e.g., religious, political, and medical) in effectively defining what is considered gender-appropriate behavior and legitimate sexual expression. Finally, the activism of recent social movements to psychological and politically empower individuals who are neither heterosexual nor traditionally masculine or feminine will be explored.

WGS 249
GENDER AND POLITICS IN IRELAND
Undergraduate
This course explores the relationship between gender and politics in Ireland, focusing on the political history of gender relations in Ireland, women's political involvement throughout the enormous changes of the 20th Century, and contemporary legal and public policy issues related to sex/gender. The attitudes and behaviors of women as voters, activists, officeholders and peace activists will be examined, as will Ireland's place in global gender issues. We will pay particular attention to the changes that have taken place since Ireland's entry into the EU, the "Celtic Tiger" transformations of the Irish economy, and the impact of the recent worldwide economic recession on gender and politics in Ireland, along with the efforts of women, North and South, to further the process of peace in the North, which has been wracked by violence for several decades. Cross-listed with IRE 249.

WGS 250
FEMINIST FRAMEWORKS
Undergraduate
This course introduces feminist theories and methodologies with an emphasis on how theoretical frameworks shape specific research, policies, and praxis. The course will provide an introductory exploration of feminist frameworks in relationship to specific issues and questions within women's studies, with some attention to the resulting research/analytic methods. The class will delineate, analyze and compare the underlying assumptions and frameworks of a variety of feminist theories (i.e. historical materialist, liberal, radical, standpoint and identity-based, critical race, postcolonial, and transnational theoretical frameworks) in relation to a set of issues and questions (e.g. violence against women, sex discrimination, reproductive rights). The class will explore the relationship between these frameworks and knowledge production, public policy, and social change efforts within transnational contexts. Thus, the students will be able to discern how theories frame research questions and methods, as well as how they frame policy issues and action proposals; and students will be able to analyze the theoretical frameworks comparatively.
WGS 255
DECONSTRUCTING THE DIVA
Undergraduate
This course studies the figure of the diva as a powerful cultural text, central to both understanding historical conceptions of socially normative femininity and to uncovering and examining our own present-day conceptions of what it means to be feminine, to be a woman. Through fiction, drama, biography, autobiography, film, audio recordings, gender and performance theory, the course explores representations of the diva in literature, art, and popular and high culture.

WGS 270
WOMEN IN CARIBBEAN SOCIETIES
Undergraduate
This is a survey course which focuses on the diverse social, cultural and political realities of women in the Caribbean region across and within historical periods marked by colonialism, slavery and indentureship; anti-colonial, nationalist and labor movements; economic globalization and the emergence of the postcolonial. Drawing on primary documents, images, feminist postcolonial writings, the course investigates how women of indigenous, African, Chinese, Indian and multiracial (or “mixed”) descent have been positioned within various societies, and in relationship to each other. Topics covered include visual representations of women, gender and sexuality; forms of resistance and political engagement; motherhood, reproduction and the State; women in various religious traditions; work and economic status; social class, color and femininities; popular culture.

WGS 275
BLACK FEMINIST THEORIES IN A U.S. CONTEXT
Undergraduate
This course introduces students to the major figures, statements, and movements that shape Black feminist thinking, writing and activism in the United States. Issues examined may include social and economic equity, beauty and voice, activism and social change; and the exploration of identity and subjectivity through the lens of intersectionality, including race, gender, sexual orientation, class, citizenship, and immigrant status. Throughout we will consider Black feminist thought's situatedness in larger frameworks of Western feminist thought and its linkages with international feminist discourses.

WGS 290
SPECIAL TOPICS
Undergraduate
See course schedule for current offerings.

WGS 300
FEMINIST THEORIES
Undergraduate
Disagreements about what counts as feminist theory have raged as the borders of feminist discourse have shifted over the past two and a half decades. Yet most feminists continue to insist that sex/gender be considered basic categories of analysis and theory. Broadly conceived, feminist theory--historical or contemporary--represents an attempt to understand and interpret the roots and causes of women's place in the world. This course examines how different theoretical perspectives address gender, class, racial, and sexual inequalities and the method(s) proposed for social change. Students will be required to critically engage these theories in terms of how they address the commonalities and differences among women, especially insofar as these are grounded in race, class, and sexual identifications and dissonances. This course is a core requirement for the Women's & Gender Studies major.

WGS 250 is a prerequisite for this course.

WGS 303
GENDER, VIOLENCE AND RESISTANCE
Undergraduate
This course explores the social and cultural contexts of interpersonal violence in women's lives, with a focus on domestic violence, rape, harassment. The course seeks to understand how gender, race, class, sexuality, and national differences and inequalities shape the experiences of violence, the social and institutional responses to violence, and strategies for resistance and change.
WGS 306
GENDER AND FAMILIES
Undergraduate
Gender and Families is an upper-level undergraduate course that considers issues raised by the diverse roles that women, men, and children play in families. It focuses particular attention on the social construction of gender in families, and examines families in their social, economic, and political contexts. Topics covered include adult intimate relationships, the social construction of motherhood and fatherhood, and shifting gender relations of power in families, family stress and adaptation, and the impact of social policies on families' lives.

WGS 307
WOMEN IN THE MIDDLE EAST: BEYOND THE VEIL
Undergraduate
This course explores how Middle Eastern Women have been represented in the media outside of the Middle East, by Arab women scholars, and “Third World” feminists and challenges these representations by focusing on issues such as veiling, the everyday lives of Middle Eastern Women, political activism, literary works, economics and social class, and media representations.

WGS 310
FEMINIST ETHICS
Undergraduate
This course explores theoretical issues regarding women's moral experience and feminist approaches to liberation from various forms of socio-cultural and political oppression. It explores the moral status of women from their own experiences and perspectives, in contrast to traditional Western ethics' characterizations. It examines and evaluates the ethic of care as an alternative moral perspective and investigates a variety of themes and values discerned in women's moral experiences. It explores feminist ethical perspectives on oppressive social practices, such as racism and violence against women, and examines the ethical dimensions of difference among women.

WGS 314
ANTIRACIST FEMINISMS
Undergraduate
This course introduces students to the wide array of feminist thinking regarding ideologies of race, racism, white privilege, ethnocentrism, racial and ethnic identifications, and their relationship to gender, class, sexual and national identities and locations. The ways that racism has divided women's movements and feminist organizations will be examined along with the work of feminist scholars, writers, activists, and advocates who have articulated explicitly anti-racist theories, analyses, and programs within the U.S. as well as internationally.

WGS 316
REPRESENTATIONS OF THE BODY
Undergraduate
This course reflects the current explosion of intellectual interest in the body as a site of cultural meaning. We will enter this discussion by examining how the body, which seems to be a natural, universal fact, is also a deeply cultural symbolic construction. The readings attempt to capture the complexity of this evolving field using a multidisciplinary approach, including such fields as history, art, medicine, philosophy, religion, sociology, women's studies, and cultural studies. The course addresses the questions of how the body is socially created and sustained. It explores those questions in terms of tensions between nature and culture (to what extent is the body natural? cultural?), body and spirit (what does human "embodiment" mean? are we our physical bodies-and nothing else?), and how discourses of power converge in and on the body (gender/race/class/age/ability). Course topics include: the meaning of physical pain in Western history; the personal experience of and social construction of race in the U.S., with its background assumptions about skin color; the social constructions of gender, sexualities, and sexual desire; personal experience and the cultural "readings" and representations of male and female, old, disabled, and transgressive bodies; socio-cultural "readings" of physical violence pertaining to both victim and perpetrator.

WGS 320
TRANSFORMATIVE JUSTICE: THEORY AND PRACTICE
Undergraduate
This course introduces students to transformative justice responses to violence that do not rely on state institutions. These include collective processes for support and healing, intervention, accountability, and prevention. The pedagogical praxis of learning will be through communal peacemaking circles and collective strategy sessions to create community responses to violence.
WGS 322
FEMALE IDENTITIES: YOUNG ADULT LITERATURE
Undergraduate
This course is an introduction to Young Adult Literature as a genre and explores how this literature relates to adolescent girls’ experiences in diverse cultural contexts. It addresses themes related to physical and emotional development, the development of personal values and beliefs; the construction of identity; beliefs and attitudes about the body; interpersonal relationships; gender and sexuality; and coping with change, death, belonging, alienation, and escape. Course materials are multicultural with a focus upon the experiences of female adolescents in terms of ethnicity, culture, gender, religion, disability, as well as other dimensions of difference within national and international contexts.

WGS 324
WOMEN IN THEATRE: A GLOBAL PERSPECTIVE
Undergraduate
This course examines the concepts of gender and theatrical performance with reference to history, culture, critical response, viewer interpretation, and identity in a global context. Students will study character as a dramatic construct with respect to gender, race, and class; it examines how dramatic images are as diverse as their cultural contexts; explores the concepts of reader and viewer response to theater; and interrogates the relationship between the American theatrical image and the larger global context within which images are created.

WGS 326
WOMEN AND LAW
Undergraduate
This course investigates the variety of ways in which women come into relation with the law, e.g., through laws and judicial decisions dealing with equal opportunity. Cross-listed as PSC 363.

WGS 330
LESBIAN LIVES
Undergraduate
This course explores constructions of lesbian lives, politics, and communities in the U.S. using the political cartoons of artist Alison Bechdel as a primary text, along with theoretical and historical readings. Students examine the constructions of identities and politics within lesbian culture, paying particular attention to how these have changed and evolved over time, and how community can be created and sustained. Cross-listed with WGS 430.

WGS 332
CREATING CHANGE: CONTEMPORARY GLBT POLITICS
Undergraduate
This course explores the historical roots and contemporary realities of gay, lesbian, bisexual and transgendered (GLBT) politics, nationally and internationally. GLBT groups and individuals are gaining political recognition, challenging institutions, and creating change by asserting claims to rights and protections under law. Such issues as hate crimes, marriage, AIDS, and ballot initiatives over non-discrimination law and policy have entered the political mainstream since the 1970's. This course examines the GLBT movement, its political and social strategies, conflicts and issues, and the political roles played by its members as participants in political culture. Cross-listed as PSC 312 and LGQ 332.

WGS 334
GROWING UP FEMALE IN A GLOBAL CONTEXT
Undergraduate
This course will address issues related to growing up female and coming of age in the 21st century within a global context. We will focus on the following questions: what does it mean to be female, a girl, a young woman in diverse cultural and cultural contexts, examining the ways in which community, family, peers, schools and relationships with others, popular culture and public policy influence their lived experiences, attitudes, beliefs, behaviors, choices and possibilities. The analytical framework will be rooted in understanding how the intersections of race, ethnicity, class, sexual orientation, religion, and belief systems influence notions of the self, the body, and the construction of female identities.

WGS 336
WOMEN AND FILM
Undergraduate
This course explores one or more ways in which film as art, as cultural product, or as industry has dealt with women, as subjects, artists, consumers or critics of film.
WGS 338
SEXUAL JUSTICE: LESBIANS, GAYS AND THE LAW (CROSS-LISTED AS WGS 438)
Undergraduate
This course examines the historical and contemporary relationships between lesbians, gays, and the law in the U.S., focusing on the intersections of power, sexuality, and identity with issues of sexuality-based discrimination. It focuses on case law, along with social science and legal literature, seeking out a diversity of voices and experiences. Primary emphasis will be on cases that have come before the U.S. Supreme Court since the mid-1950's, with particular attention paid to how groups and individuals have reached out to the court system for redress of injustice and how these groups and individuals have exercised or failed to exercise power within the legal process. The U.S. legal system has reflected a complex set of social and institutional arrangements with regard to sexuality. This course explores the evolution and current construction of these arrangements, how power is allocated and adjudicated, and how law may be used to resist and dismantle pervasive discrimination.

WGS 350
GENDER EQUITY IN SCOTLAND
Undergraduate
This course explores issues of gender equity in Scotland today and their relation to the gender and human rights policy agenda of the United Nations. While in Chicago students will examine theoretical models upon which the Scottish gender equity agenda is based, and then travel to Scotland, where students will witness first hand the realities and experiences of institutionalizing those mechanisms. The course offers students experiential learning opportunities as they meet key players in Scots academic and policy communities who have been integrally involved in Gender Equity Initiatives

WGS 352
GENDER, COMMUNITY, AND ACTIVISM: COMMUNITY-BASED LEARNING IN WGS
Undergraduate
Gender, Community, and Activism : Community-Based Learning in WGS is an interdisciplinary experiential/service learning seminar designed for undergraduate and graduate students in the field of Women's and Gender Studies. In an effort to provide students with an experience that integrates the feminist-informed theoretical work of the classroom with practical application in the community, the course will pair students with internship opportunities at community-based organizations that focus on a cause/issue related to their particular area of scholarly interest. The course is designed to encourage learning by doing and reflecting, where students will be asked to reflect on their internship experiences outside of the classroom through course readings, written assignments, and class discussion.

WGS 354
CONTEMPORARY KNITTING: GENDER, CRAFT, AND COMMUNITY SERVICE
Undergraduate
This course will explore the gendered history of knitting and its contemporary popularity as both a creative leisure-time activity and a means of providing community service. The social history and social construction of a gendered division of labor surrounding knitting, with its complexities, provide the theoretical foundation of the course. Students will learn the basic techniques of knitting and will be expected to practice their new skills in- and out-side of the classroom. They will reach a level of proficiency sufficient to producing a minimum of three contributions to service knitting projects.

WGS 375
FEMINIST SMS OF THE BLACK DIASPORA (CROSS-LISTED AS WGS 475)
Undergraduate
This course is designed to offer a critical examination of black women's experiences and thought within a global and transnational framework. The course examines works by and about black women in diverse social, political, and geographical contexts: the continent of Africa, Western Europe, Canada, Latin America, the Caribbean, and Australia. Topics to be explored will include issues of politics and ideology; power and inequality based on intersectionality of race and other dimension of identity; agency, activism, and social movements; the mass media, popular culture and social policies.

WGS 378
UTOPIAN AND DYSTOPIAN LITERATURE AND FILM: GENDER, RACE AND BEYOND
Undergraduate
What does the future hold for humankind on this planet and elsewhere? What will life be like in the not too distant as well as far distant futures? How will societies be organized? What kinds of cultural milieus will shape life and living? How will identities be articulated and negotiated? Who will govern? Who will be in resistance? Who will be present and who will be absent? How will things come to be? These questions will form the core of our study of a genre devoted to social commentary, envisioning vastly different ideas about the future, emergent from 20th century works.
WGS 386
BLACK WOMEN’S EXPERIENCES: VARIABLE TOPICS
Undergraduate
Topics vary. This course is designed to address issues related to the particular experiences of women in the Black Diaspora. Topics will vary in terms of their particular focus in addressing issues that are important to understanding Black women's experiences in a US context and globally--making interconnections to the experiences of women of other ethnic, cultural, and national backgrounds. The course will provide occasions for students to study and examine issues such as Black women's cultural criticism, Black women in the arts, engagement in activism and social and political movements--literature and the media. Cross-listed with WGS 486 and ABD 386.

WGS 387
TEEN VIOLENCE PREVENTION
Undergraduate
This course is an interdisciplinary experiential/service learning seminar in which students will participate in, and critically reflect upon, a relationship violence prevention program in Chicago area high schools. This class will explore adolescent development, considering the ways in which economic, social, political and cultural contexts influence that development. In addition, we will focus on adolescent relationships, group work with teens, aggression and violence in intimate -- in particular teen -- relationships, and evaluation of programs to prevent teen violence. Each week students will address a set of theoretical and/or practical themes that in some way relate to teen violence and aggression, as well as prevention of such violence. Discussions of each theme will draw on course readings, lecture materials, and perhaps most importantly, students' experiences working with teens in schools.

WGS 388
QUEER THEORY: AN INTRODUCTION (FORMERLY WMS 284)
Undergraduate
This course examines some of the central texts of queer theory in order to contextualize and historicize the notion of homosexuality as a primary category of identity. The issue of sexual normativity as it relates to gay and lesbian assimilation will also be discussed. Because of the significant relationship of gender and sexuality, we will also examine theories of embodiment and take up the debates around the politics of intersex and transgender identities.

WGS 390
WOMEN ACROSS CULTURES (CROSS-LISTED AS MLS 441, WGS 490)
Undergraduate
A critical analysis of the experiences of women around the world in diverse social contexts, examined through different disciplines, with a special emphasis on economics, politics and culture. Focus is on African, Asian and Latin American cultures and nondominant groups within western societies. (Cross-listed as WGS 490 and MLS 441)

WGS 391
METHODS AND SCHOLARSHIP IN WOMEN’S STUDIES
Undergraduate
An exploration of the transforming effects that feminist methodologies and scholarship have had in the social sciences and humanities. This course emphasizes interdisciplinary research approaches, feminist publishing, and the interplay of research and activism, as it prepares students to write a research proposal. Not recommended for non-majors. (Cross-listed as WGS 491)

WGS 392
INTERNSHIP
Undergraduate
By arrangement. Variable credit.

WGS 394
WOMEN, SELF, AND SOCIETY SEMINAR
Undergraduate
Women, Self and Society Seminar (cross-listed as Women's and Gender Studies 480 and Master's of Liberal Studies 468). Variable Topics. See course schedule for current offerings.

WGS course or instructor permission is a prerequisite for this course.
WGS 395
WOMEN’S STUDIES ADVANCED SEMINAR (PREREQ: WGS 391 OR PERMISSION OF INSTRUCTOR)
Undergraduate
The Advanced Seminar emphasizes interdisciplinary methodology and students' independent research. Designed to be an integrating experience, the seminar will focus on discussion, response to research, and blending theory and application. Not recommended for non-majors

WGS 391 or instructor permission is a prerequisite for this course.

WGS 398
TRAVEL/STUDY
Undergraduate
(Cross-listed with WGS 498)

WGS 399
INDEPENDENT STUDY
Undergraduate
By arrangement. Variable credit.

WGS 400
FEMINIST THEORIES (CROSS-LISTED AS MLS 440)
Graduate
This course is designed to provide you with an introduction to the development of some contemporary feminist theories: local, global, transnational. The theories are interpretive frameworks to analyze, understand and act in the world. The theorists/writers offer concepts to critically analyze structures and practices of oppression, privilege, resilience, and resistance; they provide frameworks for conducting feminist research, advocacy, and activism for personal, social, intellectual, and/or political change and transformation. In this course, we will examine how these theoretical perspectives seek to understand and address various systems of inequality and power and the method(s) that we - theorists, scholars, researchers, advocates, activists, artists, writers - propose for change. We will discuss how these various feminisms continue to develop and evolve in relation to one another and to changing historical, political, social, economic contexts.

WGS 406
GENDER AND FAMILIES
Graduate
This course considers issues raised by the diverse roles that women, men, and children play in families. It focuses particular attention on the social construction of gender in families, and examines families in their social, economic, and political contexts. Topics covered include adult intimate relationships, the social construction of motherhood and fatherhood, and shifting gender relations of power in families, family stress and adaptation, and the impact of social policies on families’ lives.

WGS 407
WOMEN IN THE MIDDLE EAST: BEYOND THE VEIL
Graduate
This course explores how Middle Eastern Women have been represented in the media outside of the Middle East, by Arab women scholars, and "Third World" feminists and challenges these representations by focusing on issues such as veiling, the everyday lives of Middle Eastern Women, political activism, literary works, economics and social class, and media representations.

WGS 410
FEMINIST ETHICS
Graduate
This course explores theoretical issues regarding women's moral experience and feminist approaches to liberation from various forms of socio-cultural and political oppression. It explores the moral status of women from their own experiences and perspectives, in contrast to traditional Western ethics characterizations. It examines and evaluates the ethic of care as an alternative moral perspective and investigates a variety of themes and values discerned in women's moral experiences. It explores feminist ethical perspectives on oppressive social practices, such as racism and violence against women, and examines the ethical dimensions of difference among women.
WGS 414
ANTIRACIST FEMINISMS
Graduate
This course introduces students to the wide array of feminist thinking regarding ideologies of race, racism, white privilege, ethnocentrism, racial and ethnic identifications, and their relationship to gender, class, sexual and national identities and locations. The ways that racism has divided women's movements and feminist organizations will be examined along with the work of feminist scholars, writers, activists, and advocates who have articulated explicitly anti-racist theories, analyses, and programs within the U.S. as well as internationally.

WGS 415
CONTENTIONS IN FEMINIST AND GENDER THEORIZING: NEW DIRECTIONS
Graduate
This course addresses different aspects of feminist and gender theorizing and their interrelationships, focusing on exploration and critical examination of controversies and debates in the field. The course content engages students in examining philosophical, ideological, social, political, and cultural fault lines that offer opportunities to deepen and extend our understandings about discourses on women's and gender studies constructions and negotiations, in the late 20th century as well as in the early 21st century. The lens through which particular issues and ideas are viewed draws upon multiple perspectives, taking into consideration issues of culture and context, grounded in examining specificities of the local in relationship to global or transnational dynamics.

WGS 416
REPRESENTATIONS OF THE BODY
Graduate
This course reflects the current explosion of intellectual interest in the body as a site of cultural meaning. We will enter this discussion by examining how the body, which seems to be a natural, universal fact, is also a deeply cultural symbolic construction. The readings attempt to capture the complexity of this evolving field using a multidisciplinary approach, including such fields as history, art, medicine, philosophy, religion, sociology, women's studies, and cultural studies. The course addresses the questions of how the body is socially created and sustained. It explores those questions in terms of tensions between nature and culture (to what extent is the body natural? cultural?), body and spirit (what does human "embodiment" mean? are we our physical bodies -and nothing else?), and how discourses of power converge in and on the body (gender/race/class/age/ability). Course topics include: the meaning of physical pain in Western history; the personal experience of and social construction of race in the U.S., with its background assumptions about skin color; the social constructions of gender, sexualities, and sexual desire; personal experience and the cultural "readings" and representations of male and female, old, disabled, and transgressive bodies; socio-cultural "readings" of physical violence pertaining to both victim and perpetrator.

WGS 422
FEMALE IDENTITIES: YOUNG ADULT LITERATURE
Graduate
This course is an introduction to Young Adult Literature as a genre and explores how this literature relates to adolescent girls' experiences in diverse cultural contexts. It addresses themes related to physical and emotional development, the development of personal values and beliefs; the construction of identity; beliefs and attitudes about the body; interpersonal relationships; gender and sexuality; and coping with change, death, belonging, alienation, and escape. Course materials are multicultural with a focus upon the experiences of female adolescents in terms of ethnicity, culture, gender, religion, disability, as well as other dimensions of difference within national and international contexts.

WGS 424
WOMEN IN THEATRE: A GLOBAL PERSPECTIVE
Graduate
This course examines the concepts of gender and theatrical performance with reference to history, culture, critical response, viewer interpretation, and identity in a global context. Students will study character as a dramatic construct with respect to gender, race, and class; it examines how dramatic images are as diverse as their cultural contexts; explores the concepts of reader and viewer response to theater; and interrogates the relationship between the American theatrical image and the larger global context within which images are created.

WGS 426
WOMEN AND LAW
Graduate
This course investigates the variety of ways in which women come into relation with the law, e.g., through laws and judicial decisions dealing with equal opportunity.
WGS 430
lesiAn lives
Graduate
This course explores constructions of lesbian lives, politics, and communities in the U.S. using the political cartoons of artist Alison Bechdel as a primary text, along with theoretical and historical readings. Students examine the constructions of identities and politics within lesbian culture, paying particular attention to how these have changed and evolved over time, and how community can be created and sustained. Cross-listed with WGS 330.

WGS 432
CrEating ChAnge: CoNtemporary glbt politiCs
Graduate
This course explores the historical roots and contemporary realities of gay, lesbian, bisexual and transgendered (GLBT) politics, nationally and internationally. GLBT groups and individuals are gaining political recognition, challenging institutions, and creating change by asserting claims to rights and protections under law. Such issues as hate crimes, marriage, AIDS, and ballot initiatives over non-discrimination law and policy have entered the political mainstream since the 1970's. This course examines the GLBT movement, its political and social strategies, conflicts and issues, and the political roles played by its members as participants in political culture.

WGS 438
Sexual JusTice: lesbiAnS, gayS and the law (CoRss-Listed aS wgs 338)
Graduate
This course examines the historical and contemporary relationships between lesbians, gays, and the law in the U.S., focusing on the intersections of power, sexuality, and identity with issues of sexuality-based discrimination. It focuses on case law, along with social science and legal literature, seeking out a diversity of voices and experiences. Primary emphasis will be on cases that have come before the U.S. Supreme Court since the mid-1950's, with particular attention paid to how groups and individuals have reached out to the court system for redress of injustice and how these groups and individuals have exercised or failed to exercise power within the legal process. The U.S. legal system has reflected a complex set of social and institutional arrangements with regard to sexuality. This course explores the evolution and current construction of these arrangements, how power is allocated and adjudicated, and how law may be used to resist and dismantle pervasive discrimination.

WGS 440
GeNeRedeD commUницAтion (CoRss-Listed wiTh cmn 523)
Graduate
Examines research into the ways the various aspects of communication are affected by and affect the social construction of gender. Topics covered include language and language usage differences, interaction patterns and perceptions of the sexes generated through language and communication. (Cross-listed as CMNS 523)

WGS 455
Women and ArT (CoRss-Listed wiTh MLS 474 aNd Art 356)
Graduate
Examines the work of the most significant women artists from the Renaissance to the present. It will also investigate how women have been represented in Western art by both male and female artists. (Cross-listed as MLS 474 and ART 356)

WGS 460
Gender and socieTy (CoRss-Listed aS MLS 447 & soc 470)
Graduate
Attention to the growing literature and empirical research on changing patterns in economic, psychological, and social outcomes for women and men. Consideration of various theories of gender differentiation and equality. (Cross-listed as MLS 447 and SOC 470)

WGS 465
GloBaLizAtion, transnAtionAlism, aNd Gender
Graduate
This course examines how gender-based inequities are linked to global and transnational politics of power, security, political economy, militarism, and ecology. There will be a focus on how gender roles, relationships, and identities are constructed, deployed, challenged, and resisted around the globe, paying particular attention to how systems and structures of gender, race, class, sexuality, age, ability, culture, religion, nation etc. are interconnected. It will explore how resistance to structural inequities is constructed within and across national boundaries, paying particular attention to the role of non-governmental organizations (NGOs) worldwide and how the responses of NGOs to crises (e.g., nuclearism, uneven economic development, environmental degradation) highlight the shortcomings of state-centered decision making.
WGS 470
ADVANCED PSYCHOLOGY OF WOMEN AND GENDER (CROSS-LISTED AS PSY 561/MLS 478)
Graduate
A review of research and theory on women's and gender, including sexist biases and methodology, feminist therapy, violence against women, and gender differences in the development of power and sexuality. Cross-listed as MLS 478 and PSY 561.

WGS 475
FEMINISMS OF THE BLACK DIASPORA (CROSS-LISTED AS WGS 375)
Graduate
This course is designed to offer a critical examination of black women's experiences and thought within a global and transnational framework. The course examines works by and about black women in diverse social, political, and geographical contexts: the continent of Africa, Western Europe, Canada, Latin America, the Caribbean, and Australia. Topics to be explored will include issues of politics and ideology; power and inequality based on intersectionality of race and other dimension of identity; agency, activism, and social movements; the mass media, popular culture and social policies.

WGS 478
UTOPIAN & DYSTOPIAN LITERATURE AND FILM: GENDER, RACE AND BEYOND
Graduate
What does the future hold for humankind on this planet and elsewhere? What will life be like in the not too distant as well as far distant futures? How will societies be organized? What kinds of cultural milieus will shape life and living? How will identities be articulated and negotiated? Who will govern? Who will be in resistance? Who will be present and who will be absent? How will things come to be? These questions will form the core of our study of a genre devoted to social commentary, envisioning vastly different ideas about the future, emergent from 20th century works.

WGS 480
SELECTED TOPICS: WOMEN, SELF AND SOCIETY
Graduate
Topics vary. See schedule for current offerings. [Cross-listed as MLS 468 and WGS 394]

WGS 485
WOMEN, GENDER, AGENCY, AND SOCIAL CHANGE
Graduate
This course will examine women's individual and collective involvement in social, economic, and political resistance and change. The course will focus on women's participation with attention to the ways that gender shapes the history and development of social movements organized at local, national, regional and global levels, within and across differences of race, class, ethnicity, nationality, religion, geographic location and sexuality. Concrete examples of women's and gender movements within particular historical and geographical contexts, including within Africa, Latin America, Europe, the Middle East, Asia, the United States, among others, will be highlighted.

WGS 486
BLACK WOMEN'S EXPERIENCES: VARIABLE TOPICS
Graduate
Topics vary. This course is designed to address issues related to the particular experiences of women in the Black Diaspora. Topics will vary in terms of their particular focus in addressing issues that are important to understanding Black women's experiences in a US context and globally: making interconnections to the experiences of women of other ethnic, cultural, and national backgrounds. The course will provide occasions for students to study and examine issues such as Black women's cultural criticism, Black women in the arts, engagement in activism and social and political movements --literature and the media.

WGS 488
QUEER THEORY: AN INTRODUCTION
Graduate
This course examines some of the central texts of queer theory in order to contextualize and historicize the notion of homosexuality as a primary category of identity. The issue of sexual normativity as it relates to gay and lesbian assimilation will also be discussed. Because of the significant relationship of gender and sexuality, we will also examine theories of embodiment and take up the debates around the politics of intersex and transgender identities.
WGS 490
WOMEN ACROSS CULTURES (CROSS-LISTED AS MLS 441, WGS 390)
Graduate
A critical analysis of the roles of women in societies around the world, with special emphasis on economics, politics and culture. Focus is on African, Asian and Latin American cultures and nondominant groups within Western societies. Topics vary each quarter. (Cross-listed as MLS 441 and WGS 390)

WGS 491
METHODS AND SCHOLARSHIP IN WOMEN'S & GENDER STUDIES
Graduate
An exploration of the transforming effects that feminist methodologies and scholarship have had in the social sciences and humanities. This course emphasizes interdisciplinary research approaches, feminist publishing, and the interplay of research and activism, as it prepares students to write a research proposal.

WGS 400 is a prerequisite for this course.

WGS 493
FINAL PROJECT INDEPENDENT RESEARCH
Graduate
This course involves individual investigation and research (toward completion of the Master's thesis, project, or portfolio) under the supervision of a faculty member. A minimum of 4 credit hours required. Course can be repeated for a total of 8 credit hours.

WGS 495
SPECIAL TOPICS IN WOMEN'S STUDIES
Graduate
Topics vary. See schedule for current offerings.

WGS 496
CANDIDACY CONTINUATION
Graduate
Students who must take extra time to complete the requirements for the Master's thesis, project, or portfolio must enroll in candidacy continuation each quarter of the academic year until this Master's requirement has been completed. Non-credit, $40.00 per quarter.

WGS 497
CANDIDACY MAINTENANCE
Graduate
Masters candidates who are not actively working on their thesis, project, or portfolio during a given quarter but who want to maintain active university status can register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit, $40.00 per quarter.

WGS 498
FOREIGN STUDY
Graduate
Foreign Study

WGS 499
INDEPENDENT STUDY
Graduate
WLE 330
TEACHING LITERACY K-12
Undergraduate
This course provides an overview of the curriculum, instruction, and assessment strategies used in K-12 classrooms to foster and develop students' L1 and L2 literacies. Through guided examination of prevailing theories of language acquisition and development that currently influence classroom practices across the K-12 continuum, this course enables future teachers of world languages to grow in their understanding of the literacy-learning contexts that students will bring to their language classrooms. Issues that emerge in planning and conducting literacy instruction in schools are discussed and deliberated through university classroom experiences as well as required field experiences (20 hours, minimum; level 1). Course participants enjoy multiple opportunities to apply and analyze theories; to observe, critique, and practice instructional strategies; to make informed curricular and instructional decisions; and to use assessment to inform one's planning.

WLE 349
TEACHING MODERN LANGUAGES
Undergraduate
Prepares for teaching modern languages at the middle and secondary school levels. Examines the theory and practice of teaching modern languages with an emphasis on developing alternative teaching strategies and using diverse resources. Lesson and unit development, evaluation, and classroom management also will be discussed. Issues that emerge in planning and instruction are discussed and deliberated through university classroom experiences as well as required field experiences (20 hours, minimum; level 2). PREREQUISITE(S): SEC 364 or equivalent.

Advanced Teacher Candidate Standing is a prerequisite for this class.

WLE 350
METHODS OF TEACHING WORLD LANGUAGES IN THE ELEMENTARY SCHOOL
Undergraduate
This course is designed to provide training in the theory and methods of teaching Foreign Languages in the elementary school (FLES) to both pre- and in-service teachers. Pre-service teachers include World Language majors interested in elementary school teaching and elementary majors who are proficient in a world language and interested in teaching FLES. In-service teachers include elementary teachers proficient in a world language who are teaching or who are interested in teaching FLES and secondary trained teachers who are teaching or who are interested in teaching FLES. In order to meet the objectives of this course and subsequent methods courses, it is expected that all participants be able to demonstrate proficiency in English and a second language before enrolling. Issues surrounding elementary methods are discussed and deliberated through university classroom experiences as well as required field experiences (20 hours, minimum; level 2).

WLE 360
SECOND AND WORLD LANGUAGE ACQUISITION
Undergraduate
This course is an introduction to the theoretical study of second or world language acquisition (SLA) from a generative and psycholinguistic perspective. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, and age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/ semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and SLA; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second and world language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences (20 hours, minimum; level 1).

WLE 370
METHODS OF TEACHING INTEGRATED WORLD LANGUAGE K-12
Undergraduate
The purpose of this course is to provide the theoretical, research, and pedagogical foundations that underpin effective instructional practices for world language teaching and learning through the content areas. The central premise of the course is to reformulate world language instruction to integrate subject matter content into the curriculum, including science, social studies, math, fine arts, etc. This methods course is organized around the Standards for Foreign Language Learning, commonly referred to as the Five Cs: Communication, Cultures, Connections, Comparisons, and Communities. Students will learn about current theoretical bases for second-language acquisition and how theory informs classroom practice. Issues surrounding integrated instruction are discussed and deliberated through university classroom experiences as well as required field experiences (20 hours, minimum; level 2).
WLE 384
CAPSTONE I N WORLD LANGUAGE EDUCATION
Undergraduate
This course is taken concurrently with WLE 385, Student Teaching in World Languages. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and career as teachers.
COREQUISITE(S): WLE 385.

WLE 385
STUDENT TEACHING I N WORLD LANGUAGES
Undergraduate
(12 credits) Student teaching is the culminating experience of the World Languages certification program. It is a ten-week, 30-hour/week experience. Students must successfully complete student teaching with a grade of B- or better in a language classroom in which they are seeking certification to teach. The course is taken concurrently with WLE 384, World Languages Capstone. PREREQUISITE(S): Application and approval required. Open only to DePaul students.

WLE 375
WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
Undergraduate
This course engages students in WLE curriculum development and language program advocacy, creation, and sustainability based on an examination of federal and state WLE history and policies and on a review of national and state standards. Reviews theory and application of curriculum development to world language instructional programs, such as design, scope and sequence, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal world language education program models are examined and analyzed in light of WLE history, policy, and standards (20/15 hours; level 1).

WLE 326
THEORETICAL FOUNDATIONS OF ESL AND WLE
Undergraduate
Presents an introduction to the field of second and world language, with attention to basic concepts of second language acquisition in various language learning contexts. Discusses interdisciplinary perspectives of second and world language acquisition and their application to classroom practices. Topics include interlanguage, communicative competence, D/discourses, investment/motivation, sociocultural approaches to language learning, universal grammar, etc. The different factors influencing the acquisition of ESL and WLE are examined as well as current research in applied linguistics and different approaches to language teaching.

WRD 98
PREPARATION FOR COLLEGE READING (FORMERLY WRC 107)
Undergraduate
For students who need extra preparation in the development of college reading skills. Emphasizes development of reading strategies suitable for understanding a range of texts. Formerly WRC 107.

WRD 101
BASIC WRITING I (FORMERLY ENG 101)
Undergraduate
An introduction to academic writing; extensive practice in gathering and organizing ideas; attention to correctness in mechanics, grammar, and usage. Students placed in 101 are required to enroll subsequently in 102. Formerly ENG 101.

WRD 102
BASIC WRITING II (FORMERLY ENG 102)
Undergraduate
Continuation of 101, with emphasis on practice in the forms of written exposition. Students with demonstrated proficiency may be permitted to enroll in 102 without taking 101. Some sections of 102 are designated for students for whom English is a second language (ESL). Formerly ENG 102.

WRD 103
COMPOSITION AND RHETORIC I
Undergraduate
An introduction to the forms, expectations, and conventions of writing at the college level. Emphasis on audience analysis, rhetorical stance, and the nature of the composing process. Formerly ENG 103.
WRD 103X
COMPOSITION AND RHETORIC I (FOR NON-NATIVE SPEAKERS)
Undergraduate
An introduction to the forms, expectations, and conventions of writing at the college level. Emphasis on audience analysis, rhetorical stance, and the nature of the composing process. These sections are specifically designed for students whose first or dominant language is not English. Students will have the opportunity to focus on writing challenges that are unique to writing in a second or additional language, including increased attention to language skills and to the cultural expectations of U.S. academic audiences. The lower enrollment capacity of this section will allow for greater attention to students’ individual writing needs. These sections address the same course objectives all WRD 103 sections.

WRD 104
COMPOSITION AND RHETORIC II
Undergraduate
Developing a convincing argument with information and evidence drawn from a variety of sources. Emphasis on effective research strategies and professional use of sources.

WRD 103 or HON 100 is a prerequisite for this course.

WRD 104X
COMPOSITION & RHETORIC II (FOR NON-NATIVE SPEAKERS)
Undergraduate
Designed for specifically for non-native English speakers, this course focuses on developing a convincing argument with information and evidence drawn from a variety of sources. Emphasis on effective research strategies and professional use of sources.

WRD 103X or equivalent is a prerequisite for this class.

WRD 108
COLLEGE READING (FORMERLY WRC 108)
Undergraduate
Devoted to the acquisition and development of analytical, critical, and interactive reading skills essential to continued success in college, regardless of intended major. Emphasizes effective reading techniques, vocabulary development, and comprehension improvement applicable to all academic disciplines. Formerly WRC 108.

WRD 200
WRITING IN THE DISCIPLINES (FORMERLY ENG 200)
Undergraduate
Preparation for writing in academic disciplines. Special attention to forms, conventions, and expectations in university writing at the intermediate level. Formerly ENG 200.

WRD 202
PROFESSIONAL WRITING FOR BUSINESS (FORMERLY ENG 202)
Undergraduate
Effective organization and design of documents common in business life - letters, memos, reports, and resumes. Attention to audience, purpose, and style. Two quarter hours credit.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 203
STYLE FOR WRITERS
Undergraduate
This course provides students with opportunities to explore stylistic choices in written prose. Students will examine both published work and their own writing to explore how to manipulate language in specific contexts to achieve specific ends. Writing workshops will help students provide and receive constructive comments aimed at revision of drafts.
WRD 204  
TECHNICAL WRITING (FORMERLY ENG 204)  
Undergraduate  
In this course, students learn to communicate and interpret specialized information for readers' practical use. The course highlights the action-orientated goals of technical writing and the importance of accurately communicating information to users. The course provides an overview of key issues related to technical writing such as usability, audience analysis, designing pages and screens, effective collaboration with peers, interpreting and presenting data, and writing clearly and persuasively. Students learn to write, revise and present common technical writing genres such as instructions, tutorials, manuals, reports, product/process descriptions, proposals, and oral presentations. Formerly ENG 204.

WRD 205  
HISTORY OF LITERACIES AND WRITING  
Undergraduate  
Literacy is traditionally defined as the ability to read and write. This course will expand that definition to also explore the technological, cultural, and political aspects of literacy from the earliest archeological record of writing to modern information technology and digital literacy. Students will examine practices and narratives surrounding literacy, learn how both physical media and social power constrain what information gets recorded and how, and question the implications of these constraints on the ways we define and engage literacy and writing.

WRD 206  
INTRODUCTION TO PROFESSIONAL WRITING (FORMERLY ENG 206)  
Undergraduate  
In this introductory course, students learn fundamentals of professional writing, with a special focus on distinguishing academic writing from workplace writing. The course provides a solid foundation that students can build on as they develop specializations in their professional fields. Through a series of short assignments, students explore the structure and format of typical professional writing documents, examine a variety of workplace writing situations, and begin developing a clear and concise style appropriate for professional settings. Students analyze and write a number of workplace genres, such as memos, emails, letters, resumes, short reports, web documents, and professional presentations. Formerly ENG 206.

WRD 207  
INTRODUCTION TO WRITING AND RHETORIC (FORMERLY ENG 207)  
Undergraduate  
An introduction to key concepts in the history of rhetoric, the development and current state of rhetoric and writing, and the impact of rhetoric on contemporary life. The course aims at understanding rhetoric as a theoretical approach, a set of practices, and a discipline. Formerly ENG 207.

WRD 208  
INTRODUCTION TO REASONED DISCOURSE (FORMERLY ENG 208)  
Undergraduate  
Study of the problems of reasoned discourse, emphasizing invention and construction of arguments for varied audiences.  
WRD 104 or HON 100 is a prerequisite for this course.

WRD 209  
GENRE AND DISCOURSE  
Undergraduate  
In this class, students examine how discourse and genres are used to frame issues and instantiate values and beliefs. Students will explore theories of genre and discourse, learn to analyze how genre and discourse operate, understand the relationship of formal features to beliefs and practices, and produce texts in a variety of genres.

WRD 240  
ARGUMENTATIVE WRITING  
Undergraduate  
Students in this course will learn techniques for constructing argumentative writing, working with rhetorical methods of inventing and arranging written arguments. Students will examine different genres of argument, but the focus in the course will be on student production and revision. This course builds on and extends skills in argumentative writing that students gain in the first-year writing program.  
WRD 104 or HON 100 is a prerequisite for this course.
WRD 260
RHETORICAL ANALYSIS
Undergraduate
This course will introduce students to methods for analyzing symbolic acts and artifacts in order to understand the perspectives and motivations which shaped them. Students will analyze a variety of rhetorical artifacts from several perspectives including classical rhetoric, argumentation, metaphor, feminism, dramatism, and ethics. Through analysis, students will learn how messages are constructed in order to produce certain effects as well as how to question and respond critically to communication.

WRD 261
DIGITAL CULTURE
Undergraduate
Digital information technologies proliferate in our culture, significantly impacting the rhetorical contexts in which we work and play. This course will explore a variety of topics related to the expansion of digital culture and rhetoric such as the development of the Internet; gaming; the construction of personal and group identity; media convergence; the distribution of work; community, group, and subculture formation online; political and policy issues; cyberterrorism; privacy, and the representation of technology in popular media.

WRD 281
WRITING CENSORSHIP
Undergraduate
An introduction to censorship as both a mechanism of social control and a fundamental element of all rhetorical situations. Explores the history of censorship in the West and engages theoretical questions about the power of language and its suppression as a force for violence. Affords students opportunities to experiment with effective strategies of resistance by writing under varied conditions of censorship.

WRD 300
COMPOSITION AND STYLE [PREREQ(S): ENG 104 or WRD 104]
Undergraduate
Advanced instruction in invention, arrangement, and style, toward developing clear and effective prose styles.

WRD 301
WRITING IN WORKPLACE CONTEXTS (FORMERLY ENG 301)
Undergraduate
Students examine the roles of writing (transactional, informative, and persuasive) in professional contexts and learn common features of workplace writing situations (internal vs. external documents, collaboration, distribution of expertise and authority, content management, globalization) and strategies for responding to them. They will also learn about stylistic conventions common to workplace genres (building an effective professional persona through writing - tone, document design) and their typical formats. Theory and analysis will ground discussions of production and production-based projects. Formerly ENG 301.

WRD 306
RHETORICAL TRADITIONS
Undergraduate
In this historical survey course, students examine a variety of traditions in rhetorical thought. Students will become familiar with key concepts in the Western rhetorical traditional, while also interrogating the centrality of that tradition by examining marginalized or resistant currents in rhetorical thought.

WRD 309
TOPICS IN WRITING, RHETORIC AND DISCOURSE
Undergraduate
See schedule for current offerings.

WRD 103 or HON 100 is a prerequisite for this course.
WRD 320
TOPICS IN PROFESSIONAL WRITING
Undergraduate
May be repeated for credit as topics vary. This course provides students opportunities to explore concepts in depth and apply specialized practices related to a rotating selection of dedicated topics in technical and professional writing.

WRD 323
EDITING
Undergraduate
Students will explore a range of practices associated with the revision of prose for publication. Students will learn to edit for style and consistency at the document, paragraph, and sentence levels. They will also compare and learn to apply differing style guides, learn technologies central to modern editorial practice, and examine related topics such as the Plain Language Movement and preparing documents for translation.

WRD 330
LANGUAGE AND LINGUISTICS
Undergraduate
This course introduces students to major concepts in and approaches to studying language, covering topics such as language structure, language acquisition, dialect variation, language and identity, language policy, and literacy. The course presumes no prior knowledge of linguistics and will be relevant to students studying in a wide variety of majors.
WRD 104 or HON 100 is a prerequisite for this course.

WRD 340
WRITING AND REVISION
Undergraduate
This course operates on the assumption that the secret to strong writing is revision. Students will learn about theories of revision, studying how successful writers revise, and will then put those techniques into practice. The goal of the course is to develop strategies and understanding of the rhetorical situations of writing in different contexts. Students will work on developing voice, taking ownership of work, and creating strong, well supported arguments.

WRD 360
TOPICS IN RHETORIC
Undergraduate
May be repeated for credit as topics vary. This course provides students opportunities to explore concepts in depth and apply specialized practices related to a rotating selection of dedicated topics in the theory and history of rhetoric.

WRD 361
TOPICS IN ALTERNATIVE RHETORICS
Undergraduate
Women, ethnic minorities, gay/lesbian/and transgender writers, and individuals with disabilities are forced to navigate the dominant culture through strategies that draw upon and transform dominant cultural practices. Courses in this topics category will consider questions raised by alternative rhetorics and examine the way rhetorical acts construct such categories and shape the ways in which people are included or excluded from social groups and movements through language use. Students will examine and assess these mediation strategies while also developing theoretical frameworks to analyze and understand them. May be repeated for credit as topics vary.

WRD 362
SEMIOTICS
Undergraduate
Nonverbal codes and their implications for understanding rhetoric and culture.

WRD 363
VISUAL RHETORIC
Undergraduate
As both consumers and producers, we engage daily with a variety of textual and graphical elements. Participation in this course encourages critical consideration of such encounters. Students will examine the assumptions and practices that inform the authorship and interpretation of both print-based and electronic texts. The course will explore cultural and rhetorical frameworks for understanding, evaluating, and composing visual elements in various media.
WRD 368
GLOBAL ENGLISHES
Undergraduate
At the start of the 21st century, English is a global language used in commerce, technology, research, education, and even popular culture around the world. This course explores the role and nature of the English language in a global context. Course readings and discussions will examine the historical context and cultural legacy of the spread of English, global varieties of English, uses and contexts of English, issues of ownership and identity, and the future of English.

WRD 376
FIELDWORK IN ARTS WRITING
Undergraduate
The study and production of writing about art as social engagement, this course explores various genres of arts writing and their functions from the perspective of critic and artist. Combines fieldwork in the Chicago arts scene with collaborating and conversing with artists and professional writers with classroom-based discussion. Students produce a portfolio of writing about art in a variety of genres including the critical, informative, and reflective.

WRD 377
WRITING AND SOCIAL ENGAGEMENT (FORMERLY ENG 377)
Undergraduate
Using writing within community service. See schedule for current offerings.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 378
TEACHING ENGLISH AS A SECOND LANGUAGE IN CHICAGO
Undergraduate
Students explore the theory and practice of learning and teaching English as a Second Language (ESL) through readings and classroom discussion while teaching or tutoring adult ESL learners at a Chicago-area community center. Classroom and service experiences together help students develop an understanding of second language learning, teaching strategies and approaches, and issues of immigration and language policy in both U.S. and global contexts. (Can count for both JYEL credit and minor credit.)

WRD 390
RHETORIC AND PUBLIC WRITING
Undergraduate
This course encourages a reflective stance on the development of the individual writer through the educational process, particularly as that relates to the interplay of the Liberal Studies experience and the WRD major. Students will be asked to look back for the purpose of looking forward, to consider how this broad preparation to excel at rhetorical action across communities of discourse prepares one for public life as a writer. Students will develop a reflective portfolio of prior work and prepare new writing for contexts beyond undergraduate life.

WRD 395
WRITING CENTER THEORY & PEDAGOGY (FORMERLY ENG 395)
Undergraduate
Introduction to current theories and practices in writing instruction; prepares students to develop and administer writing centers and to work as writing consultants. (Writing Center practicum required).

WRD 104 or HON 100 is a prerequisite for this course.

WRD 396
WRITING FELLOWS THEORY AND PRACTICE
Undergraduate
A seminar on tutoring writing across the curriculum. Students will read articles and do writing assignments designed to familiarize Fellows with theories of writing and tutoring and to stimulate thinking about the issues these theories raise. This course will also help develop tutoring skills, including practice writing comments on sample papers, participating in mock conferences, and sharing specifics from students’ experiences as Fellows.
WRD 398
INTERNSHIP
Undergraduate
An approved internship obtained in consultation with the department's Internship Coordinator. In addition to internship duties, students will produce weekly journal entries that reflect on internship activities and related coursework; and compile a portfolio of written work product developed during the internship.

WRD 399
INDEPENDENT STUDY
Undergraduate
Independent study guided by a faculty member. Written permission of supervising faculty member and of department chair required before registration.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 500
PROSEMINAR
Graduate
An introduction to the intellectual/scholarly traditions of writing studies, rhetorical theory, and discourse. Students learn different theoretical perspectives as well as the field’s lexical-conceptual vocabulary, providing a gateway to the field and the program’s concentration areas.

Status as a Graduate Writing, Rhetoric and Discourse student is a prerequisite for this class.

WRD 503
ANCIENT RHETORICS (FORMERLY ENG 403)
Graduate
A survey of rhetorical theory from ancient Greece and Rome and as well as various Eastern traditions. The course examines important definitions and discussions of rhetoric from Plato to Augustine, with attention to their implications for an understanding of the roles of rhetoric and writing in modern society. Formerly ENG 403.

WRD 504
RENAISSANCE AND 18TH CENTURY RHETORICS (FORMERLY ENG 404)
Graduate
A survey of developments in rhetoric from the 16th through the 18th centuries. Includes consideration of the vernacular rhetorics of the English Renaissance and analysis of connections between logic, rhetoric and literary criticism in the 18th century, with attention to implications for contemporary studies of language and writing. Formerly ENG 404.

WRD 505
CONTEMPORARY RHETORICS (FORMERLY ENG 405)
Graduate
A survey of theories and practices in 19th- and 20th-century rhetoric. Examines psychological, social and philosophical roots of contemporary rhetorics and the influence of scientific and literary studies on theories of discourse. Formerly ENG 405.

WRD 506
MULTICULTURAL RHETORICS (FORMERLY ENG 406)
Graduate
An introduction to written rhetoric and culture. Explores competing conceptions of culture and meanings of literacy, particularly as they relate to American literacy education. Formerly ENG 406.

WRD 507
GLOBAL ENGLISHES
Graduate
Explores the role and nature of the English language in a global context, focusing on the historical context and cultural legacy of the spread of English, global varieties of English, uses and contexts of English, issues of ownership and identity, and writing and language instruction. Course content draws upon theoretical models of World Englishes, scholarly debates, descriptions of spoken and written English around the world, and artifacts of global Englishes.
WRD 508
DISCOURSE AND STYLE
Graduate
Explores discourse theory and practice in examining features of style, including linguistic and rhetorical perspectives.

WRD 509
GENRE THEORY AND PRACTICE
Graduate
An overview of the study of non-literary genres, focusing on contemporary theories and practices of genre and genre learning. Students become familiar with various disciplinary perspectives on genre theory, methods for analyzing non-literary genres, and pedagogical approaches to teaching genre in the writing classroom. Explores genres from textual, social, and critical perspectives, considering how genres within social and institutional contexts such as the academy, the workplace, and the public sphere.

WRD 510
TOPICS IN RHETORICAL HISTORY
Graduate
Explores topics in rhetorical history. Topics vary.

WRD 511
TOPICS IN COMMUNITY, CULTURE AND IDENTITY
Graduate
Explores topics related to community, culture, and identity from the perspectives of rhetoric and discourse. Topics vary.

WRD 512
TOPICS IN LANGUAGE
Graduate
Explores topics related to language and its intersections with rhetoric and discourse. Topics vary.

WRD 513
SEMIOTICS
Graduate
An introduction to semiotics, or the study of 'the sign'? a theory of meaning that is concerned with anything intended to or interpreted to stand for something else, including objects, pictures, sounds, gestures, and body language. The course examines the construction of meaning in manifold contexts, extending the notion of 'text' beyond the written page to any artifact that functions as a 'message' embodied in a genre and a medium.

WRD 514
SOCIOLINGUISTICS
Graduate
An introduction to the study of language in social contexts. Explores the principles of language variation and change within social contexts.

WRD 515
THE ESSAY
Graduate
Explores the history of the essay as genre from the Renaissance to the present, compares and contrasts literary essays with those written in most school settings, and offers students the opportunity to write their own extended essays on personal and professional topics.

WRD 520
COMPUTERS AND WRITING
Graduate
Explores the cultural, institutional, professional, and pedagogical implications of digital writing technology, drawing upon theories of technology as well discussions from the field of computers and composition.
WRD 521
TECHNICAL WRITING
Graduate
An introduction to various aspects of technical writing, including readability, document design, editing and usability. Formerly ENG 495.

WRD 522
WRITING IN THE PROFESSIONS (CROSS-LISTED AS MLS 459 AND MPS 508)
Graduate
Improves writing skills useful in semitechnical and nontechnical professions; emphasis on style, tone, awareness of purpose and audience; effective memo, proposal and report design.Formerly ENG 494.

WRD 523
EDITING
Graduate
An introduction to editing principles and practices in professional and technical fields.

WRD 524
DOCUMENT DESIGN
Graduate
Theories, concepts, and components of effective document design, including the interrelation of visual displays and written texts across a range of electronic and print genres. Formerly ENG 486.

WRD 525
WRITING FOR THE WEB
Graduate
An introduction to various genres of web-based communication and the roles played by writers, readers, and users of web sites. Includes analysis, design, and revision of web-based writing as well as practice producing written documents which accompany the development of web information.

WRD 526
GRANT AND REPORT WRITING
Graduate
An introduction to the purpose and structure of these common workplace genres through analysis of successful documents and guided practice in producing their own.

WRD 530
TOPICS IN PROFESSIONAL AND TECHNICAL WRITING
Graduate
Explores topics in professional and technical writing. Topics vary.

WRD 540
TEACHING WRITING
Graduate
Introduction to teaching composition at the secondary and college undergraduate levels. The course helps students develop methods of teaching composition based on modern theories of rhetoric, reading and language acquisition. Formerly ENG 480.

WRD 541
COMPOSITION THEORY
Graduate
Explores the development of contemporary theories of written composition; focuses on contexts for writing, the writing process, and reader-writer relationships. Formerly ENG 483.
WRD 542
URBAN LITERACIES
Graduate
Explores the multiple definitions of literacy with a special emphasis on adult literacy in an urban environment. Students examine the relationship between theory and practice, reading about theories of literacy from psychology, cognitive science, education, composition & rhetoric and linguistics while engaging in literacy tutoring at Chicago-area literacy sites.

WRD 543
TEACHING ESL WRITING
Graduate
Provides an overview of the theory and practice of writing in a second language. Examines distinctions between first and second language writing and major issues and dilemmas within the field, including composing processes, error correction and feedback, contrastive rhetoric, culture, course design, plagiarism, and U.S. composition classrooms.

WRD 544
TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE
Graduate
A survey course in the teaching and learning of English as a Second Language (ESL). Familiarizes students with theoretical foundations and basic principles of second language learning and teaching, the components of the major language skills (listening, speaking, reading, writing), and the social and political dimensions of teaching and learning ESL.

WRD 545
TEACHING WRITING ONLINE
Graduate
Explores the teaching of writing in online-supported distance-learning. Introduces students to challenges and best practices and techniques for specific technologies.

WRD 546
PEDAGOGICAL GRAMMAR
Graduate
An introduction to grammar instruction for language and writing classrooms. Introduces students to current research in grammar instruction and applies that research to develop strategies for the instruction of a range of aspects of English grammar, with an emphasis on rhetoric and context.

WRD 547
AP INSTITUTE IN ENGLISH LANGUAGE AND COMPOSITION
Graduate
A workshop designed to help Advanced Placement teachers prepare their students for the AP exam in English Language and Composition and for the demands of college writing. The institute is a week-long, full-day intensive workshop that covers teaching, reading, writing, style, assessment, and argumentation in accelerated high school classes. This course is offered in the summer only.

WRD 550
TOPICS IN TEACHING WRITING AND LANGUAGE
Graduate
Explores topics related to teaching writing and language. Topics vary.

WRD 551
TEACHING APPRENTICESHIP PRACTICUM
Graduate
Ongoing support in instructional practice to include grading and responding to student work; facilitating in-class activities such as discussion and peer workshopping; student-teacher conferencing; classroom management; and related topics. Available only to MA in WRD students admitted to the Teaching Apprenticeship Program.

WRD 540 is a prerequisite for this course.
WRD 582
WRITING CENTER THEORY AND PEDAGOGY (CROSS-LISTED AS WRD 395)
Graduate
Introduction to current theories and practices in writing instruction; prepares students to develop and administer writing centers and to work as writing consultants. (Writing Center practicum required.)

WRD 586
WRITING FOR PUBLIC POLICY
Graduate
Specifically for those admitted to the M.S. in Economics and Public Policy Analysis and M.B.A. in Economic Policy Analysis, this course provides instruction in writing and presentation skills that allow students to communicate research findings to economists, non-economists, business executives, interest groups, and public officials.

Status as an MS in Economics and Public Policy Analysis or MBA in Economic Policy Analysis student is a prerequisite for this class.

WRD 587
ACADEMIC WRITING FOR INTERNATIONAL GRADUATE STUDENTS
Graduate
This course is intended for international graduate students, from a broad range of disciplines, writing in English as a second language. Through various assignments and activities, and by investigating texts in their own disciplines, students will develop and practice writing skills such as summarizing, problem-solution texts, data commentary, critiquing, and various aspects of academic grammar and style.

Admission to the WRD M.A. program is a prerequisite for this class.

WRD 590
INTERNSHIP IN PROFESSIONAL/TECHNICAL WRITING
Graduate
Internship in professional and/or technical writing.

WRD 591
INTERNSHIP IN TEACHING WRITING AND LANGUAGE
Graduate
Internship in teaching writing and/or language.

WRD 595
INDEPENDENT STUDY
Graduate
Independent study guided by a faculty member.

WRD 597
CANDIDACY MAINTENANCE
Graduate
Masters candidates who are not enrolled in a course during a given quarter but who want to maintain active university status should register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit, $40.00 per quarter.

WRD 599
PORTFOLIO
Graduate
A capstone seminar course in which students select, revise, and write supplementary documentation for a collection of their work appropriate to a job search in their area of concentration or for doctoral program application.
XGAM 399
COMBINED DEGREE COURSE
Undergraduate
This course is to be used for Combined BS/MS degree programs for courses with this subject. This course can be used a maximum of three times or twelve (12) credit hours. This course is open only to students in the Combined BS/MS degree programs and is by Consent of the student's Faculty Advisor only. To register for this course, please complete the Combined Degree Course Form on the CDM web site.
PREREQUISITE(S): Consent of Faculty Advisor.

About This Handbook

The Handbook provides University policies that support both academic and behavior expectations.

The University reserves the right to change programs, courses and requirements; and to modify, amend or revoke any rules, regulations, policies, procedures or financial schedules at any time during a student's enrollment period provided.

In addition to the policies and information included in this Handbook, your college or school may have specific guidelines, policies, and procedures for which you are responsible. Please consult your college section.

The Handbook also includes sections on General Information and University Resources,

About DePaul

DePaul University was founded in 1898, by the Congregation of the Mission (or Vincentian) religious community, which follows the teachings of 17th century French priest St. Vincent de Paul. The university's mission emphasizes academic excellence, service to the community, access to education and respect for the individual.

DePaul University is the nation's largest Catholic institution of higher education and is the ninth largest private, not-for-profit university in the nation. Of the 10 largest private universities, all except DePaul are classified as "research extensive" universities, making DePaul the nation's largest university with a primary mission of teaching and service.

DePaul University uses the quarter system of class scheduling, offers more than 250 undergraduate, graduate and professional programs of study.

Academic Calendar 2012-2013

Academic calendars for additional years are available on the Academic Affairs website.

Please note any student enrolled in an online learning class offered by the College of Computing and Digital Media (CDM): Online learning classes offered by CDM have different registration dates than the institutional registration dates. Please consult the Academic Affairs calendar for these dates.

Admission

Admission to graduate programs is determined by each individual graduate program. Please consult the catalog of the respective college for additional information. For general information or to apply to a graduate program consult the Office of Admission website.

DePaul Campuses

The Lincoln Park Campus is situated about three miles north of the Chicago Loop in the vicinity of Webster (2200 N), Halsted (800 W) and Racine (1200 W). The graduate offices for: the College of Liberal Arts and Social Sciences, the College of Science and Health, the School of Music, the College of Education and The Theatre School are located on the Lincoln Park campus.

The Loop Campus is located at 1 East Jackson Boulevard, between State, Jackson and Wabash. The graduate offices for: the Driehaus College of Business, the College of Computing and Digital Media, the College of Communication and the School for New Learning are located on the Loop Campus.

In addition, some courses are available at the following suburban sites:

- The Naperville Campus is located at 150 W. Warrenville Road, Naperville, Illinois (at I-88 and Naperville Road).
- The O’Hare Campus is located in the Triangle Plaza, 8770 W. BrynMawr Ave Suite 100, Chicago, Illinois (at I-90 and Cumberland).
- The Oak Forest Campus is located at South Suburban Community College’s University and College Center, 16333 South Kilbourn Avenue, Oak Forest, Illinois (at I-57 and 167th street).

Schools and Colleges

Driehaus College of Business

Established in 1912, the Driehaus College of Business is the nation’s tenth oldest business school and serves individuals and organizations seeking access to the highest quality business education as a means for achieving intellectual and professional goals. The College also encompasses our highly respected graduate programs in business.

The Kellstadt Graduate School of Business prepares students to be leaders by frequently updating its programs to keep pace with the dynamics of global business. Kellstadt includes a highly respected part-time MBA program, which has received numerous top-10 rankings by U.S. News & World Report.

College of Communication

The College of Communication provides students with a combination of timeless principles and up-to-the-minute tools, whether they’re pursuing journalism; public relations and advertising; media studies; radio, television and film; relational, group and organizational communication; or culture and communication.

College of Computing and Digital Media

The College of Computing and Digital Media (CDM) is one of the largest colleges of its kind in the nation, and
develops the artists, designers, animators and engineers who will help the visual effects industry grow into the future. CDM is organized into two schools:

The School of Cinema and Interactive Media (CIM) features digital arts majors such as digital cinema, computer games development, animation and interactive media.

The School of Computing (SoC) incorporates traditional information technology majors such as computer science, security, information systems, networking and software engineering.

**College of Education**

The College of Education offers degree programs in bilingual/bicultural education; counseling; curriculum studies; early childhood education; educational leadership; elementary education; middle school mathematics education; reading specialist education; secondary education; social and cultural foundations of education; special education and world language education.

**College of Law**

The DePaul College of Law was one of the first law schools in the country to introduce educational innovations like the study of negotiation techniques, courses in international criminal law and pre-trial courses in skills techniques. Today, our health law and intellectual property programs are among the best in the country, according to U.S. News & World Report.

**College of Liberal Arts and Social Sciences**

The largest college at DePaul, the College of Liberal Arts and Social Sciences (LAS) encompasses more than 36 undergraduate and 28 graduate degree programs, with courses offered in the day, evenings and on weekends, primarily on the Lincoln Park Campus.

**College of Science and Health**

The College of Science and Health (CSH) was established in 2011 to help its students meet the demands of the growing fields of science and health. CSH offers multiple undergraduate majors and graduate programs in the areas of biology, chemistry, environmental science, mathematics, nursing, physics and psychology.

**School of Music**

DePaul's School of Music was founded in 1912 and is dedicated to excellence in both music teaching and performance. When they're not working with DePaul students, many of the school's faculty serve as members of the Chicago Symphony Orchestra, Lyric Opera of Chicago, or the Grant Park Symphony Orchestra, or as some of the city's most prominent freelance, chamber and jazz musicians.

**School for New Learning**

Created in 1972 to serve the learning needs of adult students, the School for New Learning (SNL) is one of the first university-wide efforts in the United States catering to older students through a separate college. SNL's innovative approach to teaching the adult student, which gives students credit toward degrees for life experience, has earned it international acclaim.

**The Theatre School**

Founded in 1925 as the Goodman School of Drama, The Theatre School at DePaul is the Midwest's oldest theatre training conservatory. Known for its highly structured program and set in a world-renowned theater city, the school has earned a reputation as a standard of excellence in American professional theatre training.
DePaul University Mission

This mission statement embodies the principal purposes of DePaul University. As such it is the nexus between past, present and future; the criterion against which plans are formulated and major decisions made; the bond which unites faculty, students, staff, alumni, and trustees as an academic community. As a university, DePaul pursues the preservation, enrichment, and transmission of knowledge and culture across a broad scope of academic disciplines. It treasures its deep roots in the wisdom nourished in Catholic universities from medieval times. The principal distinguishing marks of the university are its Catholic, Vincentian, and urban character.

Central Purposes

DePaul, in common with all universities, is dedicated to teaching, research, and public service. However, in pursuing its own distinctive purposes, among these three fundamental responsibilities this university places highest priority on programs of instruction and learning. All curricula emphasize skills and attitudes that educate students to be lifelong, independent learners. DePaul provides sufficient diversity in curricular offerings, personal advisement, student services, and extracurricular activities to serve students who vary in age, ability, experience, and career interests. Full-time and part-time students are accorded equivalent service and are held to the same academic standards.

As a comprehensive university, DePaul offers degree programs at the undergraduate and graduate levels and a range of professional programs. The liberal arts and sciences are recognized not only for their intrinsic value in undergraduate and graduate degree programs, but also because they are foundational for all specialized undergraduate programs and supportive of all advanced professional programs. The university maintains that depth of scholarship to offer the doctorate in selected academic disciplines. Libraries, computer resources, and other academic support services match the levels and diversity of degree programs.

Research is supported both for its intrinsic merit and for the practical benefits it offers to faculty, students, and society. Broadly conceived, research at the university entails not only the discovery and dissemination of new knowledge but also the creation and interpretation of artistic works, application of expertise to enduring societal issues, and development of methodologies that improve inquiry, teaching and professional practice. In meeting its public service responsibility, the university encourages faculty, staff and students to apply specialized expertise in ways that contribute to the societal, economic, cultural and ethical quality of life in the metropolitan area and beyond. When appropriate, DePaul develops service partnerships with other institutions and agencies.

Students and Faculty

DePaul invites to its programs of study students from across the nation. Originally founded for students from the greater Chicago area, and still serving them predominantly, DePaul continues its commitment to the education of first generation college students, especially those from the diverse cultural and ethnic groups in the metropolitan area. Admission standards for all degree programs are selective or highly selective. In admitting students the university places greatest weight on intellectual potential and academic achievement. It seeks diversity in students’ special talents, qualities, interests, and socio-economic background.

DePaul University seeks to manage its resources effectively so as to control the costs it charges students for programs and services. Moreover, it makes available as much financial aid as possible to assure access to a broad range of talented students. The university identifies and offers special assistance to students of high potential who have been handicapped by educational, personal or societal obstacles beyond their control. From its first charter DePaul has supported a philosophy which now is expressed as being an equal opportunity educator and employer. DePaul continues to provide equal opportunities to students and employees without regard to age, national origin, race, sex, handicap, creed or color. Moreover, it strives to recruit faculty and staff who reflect the diverse mix of the student body.

The faculty, learned yet learning, gives substance to the mission of the university. These men and women personify the intrinsic value of scholarly inquiry and the force of creative and intellectual efforts. Through their dedication to learning, their contributions to a personalistic environment, and their faith in the potential of their students, the faculty and staff serve as role models for students.

Distinguishing Marks

By reason of its Catholic character, DePaul strives to bring the light of Catholic faith and the treasures of knowledge into a mutually challenging and supportive relationship. It accepts as its corporate responsibility to remain faithful to the Catholic message drawn from authentic religious sources both traditional and contemporary. In particular, it encourages theological learning and scholarship; in all academic disciplines it
endorses critical moral thinking and scholarship founded on moral principles which embody religious values and the highest ideals of our society.

On the personal level, DePaul respects the religiously pluralistic composition of its members and endorses the interplay of diverse value systems beneficial to intellectual inquiry. Academic freedom is guaranteed both as an integral part of the university's scholarly and religious heritage, and as an essential condition of effective inquiry and instruction.

The university derives its title and fundamental mission from St. Vincent de Paul, the founder of the Congregation of the Mission, a religious community whose members, Vincentians, established and continue to sponsor DePaul. Motivated by the example of St. Vincent, who instilled a love of God by leading his contemporaries in serving urgent human needs, the DePaul community is above all characterized by ennobling the God-given dignity of each person. This religious personalism is manifested by the members of the DePaul community in a sensitivity to and care for the needs of each other and of those served, with a special concern for the deprived members of society. DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.

As an urban university, DePaul is deeply involved in the life of a community which is rapidly becoming global, and is interconnected with it. DePaul both draws from the cultural and professional riches of this community and responds to its needs through educational and public service programs, by providing leadership in various professions, the performing arts, and civic endeavors and in assisting the community in finding solutions to its problems.

Adopted
by the Board of Trustees
November, 1991

Vincentian Identity

The university derives its title and fundamental mission from St. Vincent de Paul, the founder of the Congregation of the Mission, a religious community whose members, Vincentians, established and continue to sponsor DePaul. Motivated by the example of St. Vincent, who instilled a love of God by leading his contemporaries in serving urgent human needs, the DePaul community is above all characterized by ennobling the God-given dignity of each person. This religious personalism is manifested by the members of the DePaul community in a sensitivity to and care for the needs of each other and of those served, with a special concern for the deprived members of society. DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.

University Learning Goals and Outcomes

Preamble

In common with all universities, DePaul strives to ensure that its students come away from their experience with knowledge and skills that will enable them to fulfill their personal and professional aspirations, interact productively with others in all their diverse perspectives, contribute meaningfully to society, and continue learning throughout their lives. Moreover, DePaul shares with other universities the goal that students will use their knowledge and skills to conduct themselves ethically and humanely, with an appreciation for the past and an eye towards shaping an even better future.

At the same time, DePaul’s mission -- Catholic, Vincentian, urban -- calls on us to consider these broad goals for learning in a manner that honors the university’s distinctive qualities. DePaul’s Catholic heritage encourages us to study religious traditions, and to critically examine the moral underpinnings of all academic disciplines. The example of St. Vincent, who worked with people from all strata of society in order to address urgent human needs, infuses our understanding of both education and service with a concern for social justice, for the university mission statement reminds us that “the DePaul community is above all characterized by ennobling the God-given dignity of each person.” And as an urban university, DePaul’s deep involvement in multiple communities, within Chicago and beyond, invites us to both draw on the city’s rich opportunities for learning and serve as partners in helping them move forward. In sum, the mission statement tells us, “DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.”

With the university’s mission as their foundation, these Learning Goals and Outcomes prepare students to engage in the world of the twenty-first century, carrying with them the heritage and values that distinguish DePaul.

Goal 1. Mastery of Content

This goal embraces the breadth and depth of ideas, theories, approaches, and information which DePaul students encounter through and beyond their studies.

Outcomes: DePaul graduates will demonstrate and be able to apply:

- general knowledge of cultures, religions, science, the arts, history, and computational reasoning.
- specialized knowledge and skills from within a specific discipline or field.
Goal 2. Intellectual and Creative Skills

In order to fully engage with knowledge, whether for a specific purpose or for its own sake, DePaul students are encouraged to develop the ability to think critically and imaginatively, formulate their own understanding, and effectively communicate their ideas. This goal articulates specific skills that comprise these broader abilities.

Outcomes: DePaul graduates will be able to:

- systematically access, analyze and evaluate information and ideas from multiple sources in order to identify underlying assumptions, and formulate conclusions.
- solve quantitative problems.
- create and support arguments using a variety of approaches.
- use existing knowledge to generate and synthesize ideas in original ways.
- communicate clearly in speech and writing.

Goal 3. Personal and Social Responsibility

This goal honors the notion that knowledge reflects and contributes to the values of individuals and communities. DePaul students, in particular, are challenged to consider their own values in light of the university’s mission.

Outcomes: DePaul graduates will be able to:

- articulate their own beliefs and convictions, as well as others’ beliefs, about what it means to be human and to create a just society.
- articulate what is entailed in becoming a self-directed ethical decision-maker and living a life of personal integrity.
- evaluate ethical issues from multiple perspectives and employ those considerations to chart coherent and justifiable courses of action.
- benefit their communities through socially responsible engagement and leadership.

Goal 4. Intercultural and Global Understanding

This goal speaks to the likelihood that, in our diverse and increasingly interdependent world, the future depends on individuals being able to learn from each other and make the best use of finite resources.

Outcomes: DePaul graduates will demonstrate:

- respect for and learning from the perspectives of others different from themselves.
- knowledge of global interconnectedness and interdependencies.
- knowledge to become a steward of global resources for a sustainable future.

Goal 5. Integration of Learning.

Given the wide range of opportunities for learning at DePaul, it is important for students to develop the ability to consider relationships among individual experiences of learning so as to make meaning of their education in all its variety.

Outcomes: DePaul graduates will be able to:

- relate their learning -- curricular and co-curricular -- to multiple fields and realms of experience.
- make connections among ideas and experiences in order to synthesize and transfer learning to daily practice.
- design, develop, and execute a significant intellectual project.

Goal 6. Preparation for Career and Beyond

This final learning goal builds on all the rest and calls on students to be ready to apply their knowledge and skills to the changing world that awaits them.

Outcomes: DePaul graduates will be able to effectively:

- set goals for future work that are the result of realistic self-appraisal and reflection.
- articulate their skills and knowledge and represent themselves to external audiences.
• work toward goals independently and in collaboration with others.
• employ technology to create, communicate, and synthesize ideas.
• set priorities and allocate resources.
• apply strategies for a practice of life-long learning.

Statement on Academic Advising

Academic Advising at DePaul helps students achieve their educational, personal, and career goals by providing guidance and assistance in the decision-making process. Academic Advising is most effective when all participants anticipate their future needs, commit to the process, do their part, and then reflect on their results. Students should work closely with their advisors to plan workable educational goals, to understand the degree options and requirements, to understand the financial implications of their decisions, to assess their strengths and challenges as scholars, and to clarify realistic career objectives for themselves upon graduation.

Students bear ultimate responsibility for decisions and actions that determine their success at DePaul University.

• Students will make informed decisions and register for classes on time.
• Students will obtain the necessary information for course selection and planning in their individualized programs.
• Students will make and keep appointments with their advisors.
• Students will communicate honestly and fully in these advising discussions.
• Students will regularly reflect on the consequences, both academic and financial, of their decisions as they progress in their academic careers toward life choices.

Advisors are responsible for helping students improve their decision making skills.

• Advisors guide students through this learning process during regular interactions at key points during their academic careers.
• Advisors will be available on a regular basis for consultation and encourage students to make and keep regular advising appointments.
• Advisors will monitor their advisees’ academic progress.
• Advisors will encourage students to consult available material related to their program and career choice.
• Advisors will encourage students to reflect on the academic and financial consequences of their decisions about degree programs and course-taking plans.
• Advisors will assist students to set realistic career goals that extend beyond their time at DePaul.
• Advisors will encourage students to incorporate their basic values and beliefs into their decision making process.

The university is responsible for providing the infrastructure for students, faculty, and staff to support effective advising.

• The university will provide the information that students and their advisors need to make informed and timely decisions.
• The university will provide adequate resources of personnel, funding and facilities to support the advising process.
• The university will clearly communicate to advisors and students the policies and options regarding student financial aid.
• The university will regularly evaluate the policies and procedures surrounding advising to improve the advising process on an ongoing basis.
• The university will provide training to help both advisors and students work more effectively together.
• The university will acknowledge the important contribution advisors make by recognizing advising within the institutional reward system.
Tuition and Fees

Complete DePaul tuition rates are available on the Student Accounts website. Tuition policy information is available in the policy section of this handbook.

Dual Degree Students

Students enrolled in dual-degree programs between two schools or colleges at DePaul may be charged per credit hour per course according to the program that offers each particular course. If you are registered for classes from both the College of Law and College of Computing and Digital Media, for instance, tuition for each course will reflect the tuition rate of the school or college offering that course.

Financial Aid

Financial aid applicants must meet the federal eligibility requirements for aid, and if asked, provide documents as needed to support eligibility:

- You must be a U.S. citizen or eligible non-citizen.
- You must be accepted and currently active in a graduate or professional degree program.
- For most financial aid programs, and for loan deferment, you must enroll in your program at least half-time and in courses that are fully applicable to your graduate or professional degree program. Audited courses, and courses that do not apply to your degree requirements (including undergraduate courses taken for undergraduate credit) are not considered part of your graduate enrollment base for financial aid purposes.
- You must be in good academic standing and making satisfactory academic progress in your course of
You must not be in default on any federal loan or owe a repayment on any federal grant.

You must comply with all federal regulations governing selective service registration and use of funds for educational purposes.

You must meet all federal eligibility requirements. To learn more about these eligibility requirements, including information about any prior drug conviction and federal student aid eligibility, please refer to the FAFSA questions and answers at http://studentaid.ed.gov/eligibility.

Additional information is available on the Financial Aid website.

Scholarships

Scholarships and assistantships are awarded at the program level. Please consult your college or school for additional information.

Veterans Assistance

The Office of Financial Aid handles the following VA educational benefit programs:

- The Post-911 GI Bill Program (Chapter 33) - for those who served at least 30 consecutive days on active duty after September 10, 2001
- The Post-911 GI Bill Yellow-Ribbon Program - for qualified Post-911 applicants
- The Montgomery GI Bill – Active Duty Program (Chapter 30) - for those who enlisted after 7/1/1985 (Chapter 1606 and 1607) - part of the GI Bill effective 7/1/1985
- The Montgomery GI Bill – Selective Reserve Program (Chapter 1606)
- The Montgomery GI Bill – Reservist Educational Assistance Program (Chapter 1607)
- The Survivors’ and Dependents’ Educational Assistance Program (Chapter 35) - for the spouse and children of deceased or disabled veterans
- The Vocational Rehabilitation Program (Chapter 31) - for disabled veterans approved by the Veteran’s Affairs for study at DePaul

Additional information is available through the Financial Aid website or the Veterans Affairs website.

Graduate Academic Policies

General Information

This section of the handbook provides an alphabetical listing of all University policies, procedures, and regulations related to academics. As a student, you are responsible for adhering to the policies, procedures, and regulations included here, so please familiarize yourself with them.

In addition to adhering to all university policies and requirements, you are required to adhere to the policies and requirements of your specific college and degree program. These policies and requirements include information such as: courses and credit, probation and dismissal, graduation with distinction, and time limit to completion.
Academic Integrity

DePaul University is a learning community that fosters the pursuit of knowledge and the transmission of ideas within a context that emphasizes a sense of responsibility for oneself, for others and for society at large. To preserve the quality of education offered to students, the university is responsible for maintaining academic integrity and protecting all those who depend on it, including DePaul’s community partners and institutional affiliates. Violations of academic integrity, in any of their forms, are, therefore, detrimental to the values of DePaul, to the students’ own development as responsible members of society, to the pursuit of knowledge, and to the transmission of ideas. All members of the university community share the responsibility for creating conditions that support academic integrity.

Violations of academic integrity include but are not limited to the following categories: cheating; plagiarism; fabrication; falsification or sabotage of research data; destruction or misuse of the university's academic resources, alteration or falsification of academic records; academic misconduct; and complicity. This policy applies to all courses, programs, and learning contexts in which academic credit is offered, including experiential and service-learning courses, study abroad programs, internships, student teaching and the like. If an instructor finds that a student has violated the Academic Integrity Policy, the appropriate initial sanction is at the instructor's discretion. Actions taken by the instructor do not preclude the college or the university from taking further action, including dismissal from the university. Conduct that is punishable under the Academic Integrity Policy could also result in criminal or civil prosecution.

Additional Information and the complete Academic Integrity policy can be found on the Academic Integrity website (http://academicintegrity.depaul.edu/).

Admission

DePaul University admission decisions are based on a strong academic record as well as personal and occupational achievements, ambition, energy, resourcefulness and leadership. The University recognizes that each individual brings unique abilities to the DePaul community and works with each student to find the best fit for academic success. DePaul University does not discriminate on the basis of race, color, national origin, religion, gender, sexual orientation, age or handicap in admissions, employment, or the provision of services.

For readmission, please consult your program for information.

Dismissal/ Readmission

Dismissal and Readmission decisions are made by each graduate program. Please consult your school or college catalog for additional information.
Evaluation and Credit

For information regarding the acceptance and applicability of transfer, please consult your program.

Evaluation and Credit/ Limitations

Consult your graduate program for information regarding the transfer of graduate credit from other institutions.

FERPA/ Annual Notification

Annual Notification for DePaul Students: Your FERPA Rights

We want to take this opportunity to provide you with a summary of your rights under The Family Educational Rights and Privacy Act (FERPA), the federal law that governs release of and access to student education records. Please view Understanding FERPA, a DePaul Central Learning Center video for information and instructions.

Your FERPA rights include:
1. The right to inspect and review your education record within 45 days after the University receives a request for access. If you want to review your record, contact the University office that maintains the record to make appropriate arrangements.

2. The right to request an amendment of your education record if you believe it is inaccurate or misleading. If you feel there is an error in your record, you should submit a statement to the University official responsible for the record, clearly identifying the part of the record you want changed and why you believe it is inaccurate or misleading. That office will notify you of their decision and advise you regarding appropriate steps if you do not agree with the decision.

3. The right to provide written consent before DePaul discloses personally identifiable information contained in your education records, except to the extent that FERPA authorizes disclosure without consent.

Some examples of exceptions include:

- School officials with “legitimate educational interests.” A school official has a legitimate educational interest if the official has a professional need to review your education record in order to fulfill his or her official responsibilities. Examples of people who may have access, depending on their official duties, and only within the context of those duties, include: university faculty and staff, agents of the institution, students employed by the institution or who serve an official institutional committees, and representatives of agencies under contract with the University.

- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer.

- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local educational authorities, such as a state postsecondary authority that is responsible for supervising the university’s state-supported education programs. Disclosures under this provision may be made in connection with an audit or evaluation of federal- or state-supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs. These entities may make further disclosures of personally identifiable information to outside entities that are designated by them as their authorized representatives to conduct any audit,
evaluation, enforcement or compliance activity on their behalf.

- In connection with financial aid for which the student has applied or which the student has received, if the
  information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the
  conditions of the aid, or enforce the terms and conditions of the aid.
- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate or
  administer predictive tests; (b) administer student aid programs; or (c) improve instruction.
- To accrediting organizations in order to carry out their accrediting functions.
- To appropriate officials in connection with a health or safety emergency.
- Information the school has designated as "directory information."

Directory information may be released without your written consent and includes the following: name, address,
e-mail, telephone number, date of birth, college of enrollment, year in school, major, enrollment status
(including current enrollment, dates of attendance, full-time/part-time or withdrawn), degrees, awards and
honors received (e.g., Dean’s List recognition), participation in officially recognized activities and sports, weight
and height of members of athletic teams, photographs (including ID pictures), videos depicting and/or
concerning University life, and previous educational institutions attended. Please note that you have the right to
withhold the release of directory information except to the extent that FERPA authorizes disclosure without
consent (see #3 above).

To withhold the release of your directory information, you must log into the student portal, Campus Connection,
and, under Student Privacy settings, indicate your preference. Please note two important details regarding
placing a "No Release" on your record:

1. A "No Release" on your record will prevent your name from being included on lists of students released to
   honor societies, dean's list and graduation announcements to local newspapers, and enrollment and degree
   verification to anyone, including potential employers.
2. A "No Release" applies to all elements of directory information on your record.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the
   University to comply with the requirements of FERPA.

For additional information, please consult the U.S Department of Education

Questions concerning FERPA should be referred to DePaul Central:

DePaul Central

Lincoln Park: Schmitt Academic Center, 101
Loop: DePaul Center, Suite 9100
Tel: (312) 362-8610 | dpcl@depaul.edu | depaulcentral.depaul.edu

Final Exam

During the regular academic year faculty are expected to include a final examination, final project or final
exercise in all classes. In order to provide students with sufficient time to prepare, a final examination (or
exercise) is expected to take place on the scheduled examination date and period as approved by the university.
Final projects that are substituted for a final examination or exercise are expected to be due at the time of the
scheduled examination date and period. Only under rare circumstances and with the permission of the dean of
the college may this allocated period of time for the completion of course work be shortened.
Grades can be accessed online via Campus Connection. Grades can be viewed and printed using the Unofficial Transcript in the Student Center in Campus Connection. This comprehensive report can be used for corporate tuition reimbursement. Some companies may allow the student to log onto Campus Connection with a company representative present to verify grades for an individual term.

Following is the key to the system of evaluating a student's academic achievement of the educational objectives specified by the instructor in the course syllabus. These definitions apply to the straight letter grade. A plus grade represents slightly higher achievement than the straight letter grade. A minus grade represents slightly lower achievement than the straight letter grade. For undergraduate students, the addition of a # indicates an original attempt of a course which has been repeated; therefore the grade and credit are removed from the term and cumulative grade point average and credit hours.

Once a grade is assigned, university policy prohibits faculty from changing the grade without the permission of the college-based exceptions committee. Errors made in computation of the final grade (clerical error) and removal of an IN grade in accordance with university policy are exceptions to the grade change policy. Faculty may not assign or accept additional graded material in order to improve a student's final grade.

A
The instructor judged the student to have accomplished the stated objectives of the course in an EXCELLENT manner.

B
The instructor judged the student to have accomplished the stated objectives of the course in a VERY GOOD manner.

C
The instructor judged the student to have accomplished the stated objectives of the course in a SATISFACTORY manner.

D
The instructor judged the student to have accomplished the stated objectives of the course in a POOR manner. (A grade of D will not fulfill the requirements in a major field of concentration.)

F
The instructor judged the student NOT to have accomplished the stated objectives of the course.

IN
Temporary grade indicating that, following a request by the student, the instructor has given his or her permission for the student to receive an incomplete grade. In order to receive an IN grade, the student must have a) a satisfactory record in the work already completed for the course, b) encountered unusual or unforeseeable circumstances which prevent him/her from completing the course requirements by the end of the term, and c) applied to the instructor for permission to receive an IN. Please see the Incomplete Expiration Policy in this handbook for additional information.

ING
Permanent grade assigned to a degree recipient who chooses not to resolve a grade of "IN" awarded during the two terms prior to graduation. The grade of "ING" (Incomplete, Graduated) is final, and cannot be changed or lapsed to "F" once the degree is posted.

PA
Passing achievement in a pass/fail course. (Grades A through D represent passing performance.)

W
Withdrawal from the course initiated by the student after the Last Day to Drop With No Penalty and before the Withdrawal Deadline. The W grade is automatically recorded on the student's transcript once it has been processed.

WA
Withdrawal from the course initiated by an advisor or administrator at the student's request, usually outside of established deadlines. Administrative withdrawals may be granted under extraordinary circumstances and require documentation for support. See the "Withdrawal Policy" for more information. Students seeking an administrative withdrawal from one or more courses should contact DePaul Central.

WA
Temporary grade indicating that the student is making satisfactory progress in a course that formally extends beyond
R
the end of a term. Only designated courses are eligible for R
grades. Please see the R Grade Expiration Policy for additional
information.

Permanent grade assigned to a degree recipient who chooses
not to resolve a grade of "R" awarded during the last year prior
to graduation. The grade of "RG" (Research, Graduated) is final,
and cannot be changed or lapsed to "F" once the degree is
posted.

FX
Student stopped academic activity before the end of the sixth
week (or the equivalent of the first 60%) of the term. The grade
may be changed administratively to a grade of WA within the
timeframe specified by the Withdrawal Policy deadlines (link to
policy). Students are advised to contact DePaul Central to initiate
the request to change the FX to a WA. If the FX is not changed
to a WA, it will be factored into the student’s GPA in the same
way an F would be.

M
Final grade not submitted by instructor.

AU
Auditor status; course does not earn credit.

Quality Points

Quality points are awarded to a student in relation to the grade given and the number of quarter hours of credit
attempted in the course. Quality points are awarded according to the following schedule:

<table>
<thead>
<tr>
<th>GRADE</th>
<th>QUALITY POINTS PER CREDIT HOUR</th>
<th>CREDIT HOURS</th>

AU, W, WA, IN, PA, R, RG, M Quality Points not assigned

Illustration
Grade Point Average

In general, a student's grade point average is computed by dividing the total number of quality points accumulated by the total number of credit hours attempted with quality points assigned. In addition, a number of graduate programs have specific regulations regarding the computation of the grade point for coursework outside the program. The grade point average is calculated only upon grades earned at DePaul University.

Grades, Challenges to

A. General Policies on Grading

1. Grades are determined solely on the basis of the academic performance of each student according to pre-established criteria determined by the course instructor and consistent with university, college and departmental policies.
2. Grade determination is the prerogative of the instructor subject to the constraint that any successfully challenged grade will be changed through faculty action.
3. The criteria for evaluating academic performance are to be consistent with a course's goals and objectives, which have been approved by the appropriate academic authority before the course is scheduled. On the first day of class of each course the instructor is to explain in writing to the students the criteria for evaluating as well as the methods for grading student performance (examinations, papers, reports, etc.).
4. The instructor in each course shall decide what criteria and methods for evaluating students are to be applied in the specific course. These decisions of the instructor, however, must be compatible with any policies previously accepted by the faculty of a department or college with respect to particular courses, especially courses offered in sequence where the qualifications of a student to begin an advanced course depend upon performance in a previous course. The methods of conducting a course are determined by the instructor within limitations set by the classification of a course as lecture-discussion, seminar, laboratory, etc. An instructor may vary the teaching methodology to meet particular circumstances of a course (type or number of students enrolled, concentrated calendar as in summer sessions, etc.) or the instructor's own desires to innovate or experiment with different approaches. Any method selected must be compatible with the predetermined goals and objectives of the course. While teaching methodology may change after the course has begun, grading methodology may be changed only with the consent of a majority of students in the course, taking into consideration hardships imposed upon students opposed to the change.
5. The actual evaluation and grading of academic performance is subject to the professional judgment of each instructor. Considerable personal discretion is required in these judgments - a justifiable margin of difference can exist between the evaluations made by two or more professional persons of the same academic performance.
6. Students are entitled to compare their work in the course with the criteria applied in deciding the final grade for the course. Accordingly, the course instructor is required either to return major papers and examinations to students or to make such available for students until the end of the following term. Spring Quarter materials are to be available until the end of the Autumn Quarter. For pedagogic reasons, an instructor is expected to review with the student the relative success of the student's accomplishments. The instructor is not expected to debate the grading.
7. A student may object to a grade for one or more of the following reasons:
   1. The methods or criteria for evaluating academic performance, made explicit by the instructor at the beginning of the course, usually in a course syllabus or as subsequently modified with the majority consent of the students, were not actually applied in determining the grade.
   2. The grade was determined or influenced by criteria other than those explained by the instructor or by criteria not relevant to academic performance.
   3. The instructor applied predetermined criteria unfairly, which may include but not be limited to the following items:
      1. The instructor's evaluation of academic performance so exceeded the reasonable limits of the instructor's discretion as not to be acceptable to the instructor's peers.
      2. Predetermined criteria were not explained at the beginning of the quarter or semester.

B. Policies Regarding Grade Challenge

1. All Grade Challenge Review Boards must follow the procedures listed below.
2. A challenge to a grade will be reviewed and decided by tenured faculty unless the college or school has an insufficient number of tenured faculty to staff a Review Board.
3. The student who challenges a grade bears the full burden of proof that there are sufficient grounds for
changing a grade.
4. Only the final grade of a course and its means of determination may be challenged.

C. Procedures for Establishing Grade Challenge Review Boards

1. At the beginning of each academic year, the Committee on Committees will recommend to the Faculty Council, the faculty members and alternates for one Review Board for each of the following colleges: Driehaus College of Business, Computing and Digital Media, Communication, Education, Law, Music, School for New Learning, Science and Health, and Theatre.

   It will recommend two boards for Liberal Arts and Social Sciences covering the following areas: Humanities and Behavioral and Social Sciences. The Faculty Council will make all appointments to Review Boards. The dean of a college may request the establishment of additional Review Boards.

2. Each Review Board will consist of three faculty members and two alternate faculty members and one student. Faculty members may not serve on challenges in which they are involved. Involvement includes assignment of the grade in question and/or attendance or participation in the class. In either of these cases, one of the alternates will be asked to serve.

3. The student representative on the Review Boards in Driehaus College of Business, Computing and Digital Media, Communication, Education, Liberal Arts and Social Sciences, Science and Health, Law, Music, School for New Learning, and Theatre will be the elected Senator from the college or school. In cases where this Senator is involved in the claim, i.e., had registered for, attended or participated in the class, the SGA EVP of Academic Affairs will serve as an alternate or if necessary, the president may appoint the alternate.

4. The Review Board will select its own chair and vice chair (to serve in the absence of the chair). The Chair of the Review Board receives all requests for hearing from the dean or chair of the affected department, sets the calendar, notifies all board members and involved parties of the dates and times of the hearings and informs students by written notice of the recommendations of the board. The chair is responsible for adherence to the Procedures for Filing a Grade Challenge.

5. The boards will serve until the beginning of the Autumn Quarter of the academic year.

6. A quorum of the Review Board consists of three members of the board.

7. Challenges will be upheld by a vote of three or more of the four member board. All members are voting members.

8. The members of the Review Board are expected to disqualify themselves should a conflict of interest arise.

D. Procedures for Filing a Grade Challenge

In order to provide a forum for the fair resolution of academic disputes involving individual students and appropriateness of course grades, the following procedures have been developed and will be applied to all cases involving DePaul University students.

1. A student who is considering a grade challenge must discuss the grade with the instructor before the end of the following regular term. (Spring and Summer Quarter challenges must be made before the end of the Autumn Quarter.) The instructor is expected to explain the reason for the grade to the student. Only if the instructor is not at the university during the following regular term after the grade was issued, may the student proceed to challenge the grade without meeting with the instructor.

2. If, after the discussion with the faculty member, the student still disputes the final grade, the student may continue his or her challenge by submitting a written request for a hearing from the dean or chair of the affected department, sets the calendar, notifies all board members and involved parties of the dates and times of the hearings and informs students by written notice of the recommendations of the board. The chair is responsible for adherence to the Procedures for Filing a Grade Challenge.

3. The dean of the college or school shall forward a copy of the request to the chair of the Review Board. All challenges will be thoroughly and fairly reviewed.

4. Once filed, the formal challenge is automatically forwarded through all stages of the appeal process unless the Review Board determines it to be groundless or frivolous. Additionally, the student has the option to discontinue the appeal at any stage by submitting a letter stating such to the instructor and chair of the Review Board.

   Both the student and instructor will be informed in writing of all committee recommendations and decisions as well as any new written information bearing on the case. Only the instructor and/or the Review Board are empowered to change a grade.

5. The Review Board chair will send a copy of the grade appeal request and relevant materials received with it to the instructor involved. The instructor will return the materials with a written response within two weeks unless circumstances warrant an extension.

   The chair is responsible for monitoring the time period. A copy of the instructor's response will be forwarded to the student who has filed the challenge. If the instructor does not respond within the time period, the committee will conclude its deliberations and vote on the challenge.
6. The Review Board may, at its discretion, seek oral clarification of the written responses from the student and faculty member. If it requests this further clarification, the Review Board must meet with both the student and faculty member separately if the student requests.

7. The Review Board shall evaluate the challenge and vote to approve or deny. Decisions of the Review Board arrived at by secret ballot are to be determined by a majority vote. Such action must be taken within two months of the date of filing. (If the grade appeal is not passed along its designated route within the times specified, the student should notify the dean of the school or college who will determine the reason for the delay.)

8. The Review Board is to reach one of the three following decisions:
   1. Challenge affirmed and settled by consent: i.e., the Review Board conducting the review devises a conciliation mutually acceptable to the student and the instructor who gave the grade. Should the acceptable conciliation involve a change of grade, the instructor will submit a change of grade.
   2. Challenge affirmed and the Review Board may submit a change of grade card to the dean of the college or school in which the course was taught. In determining the student's final grade, the Review Board will take into account all evidence of the student's academic performance in the course under challenge as well as the implications for the student's grade of the instructor's actions in the case in question.
   3. Challenge denied; original grade stands.

9. The decision reached by the Review Board is to be communicated by the chair of the Review Board in writing directly to the dean of the college or school, the instructor, and the student. The explanation for the decision will also be communicated.

10. Decisions by the Review Board are final and binding on all parties. The board's decision does not require the approval of the dean of the college or school, or the chair of the affected department.

---

**Grades, Incomplete (IN) and Research (R) Expiration Policy**

**Incomplete (IN) Grade**

Undergraduate and graduate students have at most two quarters to complete an incomplete. At the end of the second quarter (excluding summer) following the term in which the incomplete grade was assigned, the incomplete will automatically convert to an F grade. In the case of the Law School, incompletes must be completed by the end of the semester following the one in which the incomplete was assigned.

A faculty member has the prerogative to assign a completion date earlier than the two quarter deadline (one semester deadline for the Law School) and this date will supersede the two quarter timeframe (one semester timeframe for the Law School) stated above.

Students must adhere to the incomplete grade request procedure of the academic unit offering the course for which they are requesting the incomplete grade.

Ordinarily no incomplete grade may be completed after the grace period has expired. Instructors may not change incomplete grades after the end of the grace period without the permission of a college-based Exceptions Committee.

In the event that the original instructor is no longer available to grade the work, the Department Chair, where applicable, or the Associate Dean will identify the faculty member who will resolve the incomplete.

NOTE:Incomplete grades are not encouraged in the student's final two terms of study. However the exceptional cases, where an incomplete is approved in his or her final term and for students with an incomplete grade in a course from the term immediately preceding their final term of study, may result in the denial of final degree certification for that term and the regular incomplete grade policy will then be enforced.

Students who have completed degree requirements, but have an IN grade that has not yet expired can elect to have the degree posted and the IN grade changed to a permanent incomplete, ING. This grade is permanent and cannot be changed in the future. The student can also elect to postpone degree conferral until the IN grade is resolved.

**Research (R) Grade**

An R grade is given when a student is making satisfactory progress in a course that extends beyond the end of the term or in a project extending over more than one term. R grades, with the exception of students completing a thesis or a dissertation research course, must be completed within one academic year of the posting of the R
grade or it reverts to an F grade.

A faculty member has the prerogative to assign a completion date earlier than the one academic year deadline and this date will supersede the one academic year stated above.

Ordinarily no R grade may be changed after the grace period has expired. Instructors may not change R grades after the end of the grace period without the permission of a college-based Exceptions Committee.

In the event that the original instructor is no longer available to grade the work, the Department Chair, where applicable, or the Associate Dean will identify the faculty member who will resolve the R grade.

Students who have completed degree requirements, but have an R grade that has not yet expired can elect to have the degree posted and the R grade changed to a permanent R grade. The RG (Research, Graduated) grade is permanent and cannot be changed in the future. The student can also elect to postpone degree conferral until the R is resolved.

**Grades, Repeating Classes**

Graduate students may have the need to repeat courses. When that occurs, all grades achieved are recorded on the academic record. All attempts are to be calculated into the grade point average. Moreover, only credit for the last attempt will be applied for the degree.

**Graduation, Commencement Ceremony**

The University’s annual graduate and undergraduate commencement exercises are conducted in June. Traditionally the University hosts a baccalaureate mass to which all graduating students and their families are invited the Friday of graduation weekend.

Attendance at the graduation exercise is optional, however, graduates must notify their college office of their intention by the published deadline date. Graduates will receive detailed instructions concerning the commencement exercise from the college office.

**Graduation, Degree Conferral Policy**

Final certification of degrees is completed by Student Records thirty days after the conferral date.

In dual degree programs authorized by the colleges, the degrees will be conferred simultaneously.

Academic records will be locked upon degree conferral. Under no circumstances will changes be made to the academic record after degree conferral.

If the student begins a new program of study at DePaul, the student’s GPA will be restarted. The one exception to this rule involves Masters’ students whose DePaul Master’s Degree is accepted to meet DePaul’s PhD requirements either in the same or a new field. In this instance the GPA in the PhD program will include the GPA from the DePaul Master’s Degree. Students combining a Masters degree with a Bachelors degree in an approved DePaul combined Bachelor’s/Master’s program will restart their GPA at the beginning of their graduate
Graduation Requirements

1. The student must have satisfied all the requirements and regulations of the individual program and college or school granting the degree.
2. A formal application for graduation must be filed by a candidate. Application for graduation may be made only by classified degree seeking students. The student must complete the online degree conferral application in Campus Connection by the designated deadline date.

Submitting this on-line application does not guarantee the conferral (granting) of a degree from DePaul University. A student can change the expected completion term up to the last day of that term. Degree requirements are reviewed at the end of the expected completion term indicated. If all requirements are met, the degree will be conferred within 30 days of the end of the term. Diplomas are mailed (to graduates without financial holds), generally within 45-60 days after the end of the term.

DePaul reports degree information to the National Student Clearinghouse monthly. Many companies and agencies use this service to verify awarded degrees. A student's degree will only be verified by the Clearinghouse if the student does not have a FERPA/Privacy restriction in Campus Connection at the time the degree is conferred. Students should verify Privacy Settings before the end of their completion term.

Graduation with Honors

Please consult your graduate program for specific information regarding graduation with honors.

Immunization, Proof of

DePaul University complies with Illinois Public Act 85-1315, effective July 1, 1989, which requires post secondary institutions to submit an annual report on student immunization. Illinois law requires that all students, born on or after January 1, 1957 and enrolled half-time (Undergraduate: 6 hours, Graduate: 4 hours) or more at a post-secondary institution, provide proof of immunization for the following: Tetanus/Diphtheria, Measles (Rubeola), Mumps and Rubella (German Measles). Illinois law requires that universities prevent students from registering for any subsequent terms if proof of immunization is not provided.

Please consult the DePaul Central website for additional information.
Probation

Please consult your graduate program for information regarding probation. Academic disciplinary action including dismissal from the University may be taken by the dean of student's home college or school in accordance with the degree of the student's academic deficiency.

Registration

Students are responsible for planning their own programs and for completing course sequences and degree requirements. In planning each quarter's course of studies, students should remember that required courses take precedence over elective courses, and that some advanced courses have pre-requisites that must be completed first. Students should be guided by their interests or needs where electives are indicated. A student regularly employed is advised to discuss his or her course load for each quarter with an advisor prior to registration. Advisors are available to assist students in planning programs and schedules.

General Regulations

1. Students can add, drop, or swap classes via CampusConnection. It is the student's responsibility to verify that the transaction has been processed.
2. Students will receive credit only for classes for which they are registered.
3. Students who are not on the class roster are responsible for completing the steps necessary to resolve the issue. It is not the responsibility of the instructors to resolve the problem.
4. Student must officially register for classes by the stated deadline. For 10-week classes, the deadline is the end of the first week of the term. In addition, students should consult individual college regulations regarding special registrations (e.g., independent studies, internships, etc.).
5. The University is required to report enrollment and attendance to fulfill requirements established by several governmental agencies. To satisfy these requirements, it is University policy that attendance will be monitored in all classes. Each school or college maintains additional specific policies concerning attendance. Students should become familiar with these policies. Promptness is expected of a student for all class sessions. Tardiness of more than ten minutes is generally to be considered by the instructor as an absence.
6. Students' status at the university will be changed from "active" to "discontinued" if:
   1. There is no enrollment in the term of admittance.
   2. There is no registration activity for three consecutive quarters - excluding summers - in which case these students must seek readmission;
   3. No progress has been made towards their degree for three consecutive terms, excluding summers. (Candidates for theses and students on year-long study abroad programs are excluded from this rule.)
7. Students who have been "discontinued," must be readmitted through their Graduate Admission Office in order to continue their studies.

Academic Calendar Formulas

Academic calendar deadline dates are based on the following formulas. These formulas are particularly important for classes that meet outside the standard (10 week term plus finals week) start and end dates for a term. Please consult your college office for specific dates relevant to your class.

- Students may not add classes after 10% of the scheduled class has elapsed.
- Students who drop a class or classes after 20% of the scheduled class has elapsed will be responsible for 100% tuition and a grade of W will be assigned.
- Students may not select a Pass/Fail grading option after 20% of the scheduled class has elapsed.
- Students may not select Audit (non-credit) grading option after 30% of the scheduled class has elapsed.
- Students may not withdraw from classes after 70% of the scheduled class has elapsed.

College/ School Regulations
• Students may audit classes only with permission of their advisor or college office. Students may not change from the status of credit to audit or vice-versa after 30% of the term has elapsed (the third week of class for a 10 week class). Full tuition is assessed for audited classes.
• Students interested in earning credit in transfer must obtain approval from their college office prior to registration at the other institution.
• Extension courses taught through other accredited institutions are accepted only when the sponsoring institution itself conducts the courses and certifies the grade and credit through an official transcript. A DePaul degree-seeking student must obtain the written permission of his or her dean before enrolling in an extension course.

Registration, Student Enrollment Classifications

College credit is accumulated on the basis of quarter hours earned:

Full-time Student Status
An eight-quarter hour course load is considered full-time for graduate studies.

Half-time Student Status
A four- to seven-quarter hour course load is considered half-time for graduate studies.

Students Completing Thesis/ Dissertation Requirements
Students should consult their program for enrollment information.

Self-service Enrollment Verification Certificates are available through Campus Connection.

Requirement Term

Graduate Program Specific Information
A student will complete the graduate program requirements in place at the time of the student's first enrollment term in the graduate program. A student who changes graduate programs while his/her studies are in progress will complete the requirements in place at the time he or she enrolls in the new program.

A student who changes graduate programs during a break between terms (e.g. winter, spring) will follow the requirements in place for the term immediately following the break.

A student who applies for readmission will be subject to the program and concentration requirements in place in the enrollment term of readmission.

Other Information
A student currently enrolled in a degree program in which revisions are approved while their studies are in progress may elect to formally adopt the revised requirements.
Requirements, Curriculum

Official changes in courses, course numbers, titles, descriptions, and prerequisites and minor changes in program requirements may be made on a quarterly basis.

Multiple changes or thorough revisions in the requirements of a program, major, or concentration or the addition of new majors or concentrations which have received the required university approvals may be made twice each year. Those approved by May 15th will be effective for the Summer/Autumn terms, and those by October 15th will be effective for the Winter/Spring terms.

Transcripts

The Office of Student Records processes official transcript requests for DePaul University. Official transcripts can be requested on-line through Campus Connection. The Family Educational Rights and Privacy Act of 1974 prohibits release of confidential transcript information without the student's authorization.

Transcripts will be issued only after the student has fulfilled all financial obligations to the University.

Tuition Policy

All tuition and fees are due to DePaul University by the published tuition due date for that term. All charges must be paid in-full by the payment date.

Tuition charges for any course registrations made after the due date must be paid in full within 24 hours of registration.

Tuition bills may be accessed online through CampusConnection. The student will be required to sign up for E-Bill to access their bills or to grant access to a guest user.

Students whose accounts show a balance due after the tuition due date will be subject to a late fee and prohibited from future registration, receiving transcripts and other university services.

Withdrawal Policy

A. Withdrawal from a class:

Students who must withdraw either from a course or from the University may do so by using the University's web registration system. Students unable to use the web registration system should contact their home
school/college office, whether in person or by phone. Withdrawals processed via the web or through direct contact with the home school/college office are effective the day on which they are made. Simply ceasing to attend, or notifying the instructor, or nonpayment of tuition, does not constitute an official withdrawal from class and will result in academic as well as financial penalty.

B. Withdrawal from all classes:

1. Withdrawal from the university:
   In most cases, students wishing to withdraw from the university during a term must fill out an on-line form (whether from home or in the school/college office) and submit it to the student's home school/college. Students who are physically unable to contact the university may designate someone to act on their behalf. The student's official withdrawal date will be the date the form is received by that office.

2. Students who appear to be eligible to enroll but don't register.
   A student's status at the university will be changed to "discontinued" if:
   1. There is no activity for three consecutive quarters (or for Law two semesters), excluding Summers. In these cases students must seek readmission.
   2. No progress has been made towards their degree for three consecutive terms, excluding Summers. (Candidates for theses and students on year-long study abroad programs are excluded from this rule.) In these cases, students must meet with a college academic advisor to get permission to register and or readmission.

C. Leave of Absence

These come under three headings: personal, military, and medical. The Music and Theatre Schools already have leave of absence policies in place.

Any student wishing to take a leave of absence must complete a "Leave of Absence Application." Students may complete the online form from home, or by visiting their home school/college office.

- Military: Students called for military service should fill out an on-line "Military Leave Form." Upon their return, they will meet with an academic advisor to discuss resuming their studies.
- Non-military leaves of absence are for at most one year and non-renewable during the student's career.
- Military leaves are variable depending on their orders.

D. Graduation Separation

Students must have completed all requirements by the last day of term for which they apply for degree conferral.

In the normal course, students will receive their diplomas 8-10 weeks after the date of degree conferral.

The university's responsibility is to confer the degree and identify the student as "graduated" within 30 days of the end of the term in which they complete all the requirements for their degree.

E. Late Withdrawals and Additions

1. Decision-making for late withdrawals resides primarily in the Withdrawal Appeals Committee, chaired by the Dean of Students, for personal/medical issues; and in the School/College Offices for all other issues. These principles underlie the decision-making processes:
   - All policies are driven by academic concerns.
   - Decisions are guided by the best interests of the students.
   - Decisions will be made in compliance with federal regulations.

2. Restrictions on requesting approval for late withdrawal
   Requests for late withdrawals from one or more courses in a given quarter must be submitted to either the student's home School/College Office or the Withdrawal Appeals Committee by the following deadlines.

   **For Undergraduate/Graduate:**
   - Autumn Quarter: Last day of the last final exam of the subsequent winter quarter.
   - Winter Quarter: Last day of the last final exam of the subsequent spring quarter.
   - Spring Quarter: The end of the second week of the subsequent autumn quarter.
   - Summer Terms: Last day of the last final exam of the subsequent autumn quarter.

   **For the College of Law:**
   - Autumn Semester: Last day of the last final exam of the subsequent spring semester.
   - Spring Semester: The end of the second week of the subsequent autumn semester.
   - Summer Semester: Last day of the last final exam of the subsequent autumn semester.
During their college career, students may be allowed one medical/personal approved administrative withdrawal and one college office administrative withdrawal, each for one or more courses in a single term.

Withdrawal, Tuition

Students must withdraw from classes through the registration function in CampusConnection. Students unable to use the web registration system should contact their home school/college office, whether by email, in person, or by phone. Withdrawals processed via the web or through direct contact with the home school/college office are effective the day on which they are made. Simply ceasing to attend, or notifying the instructor, or nonpayment of tuition, does not constitute an authorized withdrawal from class and will result in academic as well as financial penalty.

When the withdrawal occurs, the tuition charge for courses during a 10-week quarter will be reduced according to the following schedule, in accord with the tuition package:

Up to 20% or 2 weeks of a ten week term 100% refund
After 20% of the term 0% refund

For courses of more than two weeks, but five weeks or less duration, no reduction will be granted after the first week of the term. For workshops or courses of two weeks or less duration, no reductions will be granted after the workshop or sessions begin. For the Summer sessions, consult your college office.

Even if you have tuition charges reduced, you will still be responsible for the non-refundable $25 registration fee, the new student fee, and college office deposits.

NOTE: Students receiving financial aid are advised to contact a Financial Aid Counselor to discuss the consequences of a withdrawal impacting academic progress and aid eligibility at DePaul University or any other school to which they may transfer. Students in university housing are advised to contact Housing to discuss the consequences of withdrawal impacting eligibility to maintain residence.

University Resources

This section provides information on an array of university resources, all designed to help you make the most of your experience at DePaul. We encourage you to read through this whole section when you arrive at DePaul, and then refer back to individual pages for information on specific resources as you need them.

Adult Student Affairs

Adult Student Affairs assists adult students in their transition to college and supports them in achieving their educational goals. By collaborating with key university and external partners, it provides services, resources and programs that address the specific needs of this student population. The office also works to create an environment that encourages and nurtures adult student engagement in campus life.
Career Center

The Career Center creates connections to the world of work, providing comprehensive, centralized employment and career services for members of the DePaul University community.

DePaul's Career Center provides students, alumni and employers with opportunities to connect with each other. The DePaul Career Center offers a wealth of career services including personal career advising, networking events and job fairs, an ongoing workshop series to help students and alumni build career skills, mentoring and connections, internship and co-op opportunities and access to hundreds of job openings.

Additional information is available from the Career Center.

Dean of Students Office

The Dean of Students Office is an invaluable resource, advocate and support for providing and identifying resources and services for students. The office helps students in navigating the university, particularly during difficult situations, as in personal and/or family crises, medical and/or personal leaves of absence and implementation of the Code of Student Responsibility.

Additional information is available from the Dean of Students Office.

DePaul Central

DePaul Central is your one-stop shop for taking care of the business tasks that come with being a college student like managing financial aid, registration and the payment process. DePaul Central ensures student issues are resolved in a timely manner and with the right level of attention and care they deserve so students can focus on what really matters: their academics.

- Visit with DePaul Central staff:
  - Lincoln Park Campus: Schmitt Academic Center 101, 2320 North Kenmore Avenue
  - Loop Campus: DePaul Center Suite 9100, 1 East Jackson Boulevard
Financial Fitness

DePaul’s Financial Fitness Program provides free services, resources and tools to help students manage costs from freshman year through graduation and beyond. Services include:

- Money management workshops
- Confidential one-on-one financial counseling
- Accessible written and online resources and tools

Additional information is available from the Financial Fitness Program.

Health Services

The DePaul Student Health Service is offered through SAGE medical group. It is available to all enrolled students for a fee. If you live in a residence hall, you’re automatically enrolled in DePaul Student Health Services.

Student Health Service is NOT health insurance; you may need additional coverage.

The DePaul University Student Health Insurance Plan has been developed especially for DePaul University students and their eligible dependents. The Student Health Insurance Plan with the Aetna Life Insurance Company is voluntary.

Additional information is available from the Dean of Students Office.

Housing Services

The Department of Housing Services provides quality facilities and services that create the premiere residential experience at DePaul University. Their staff works to create and support a rewarding living experience that will enrich students’ lives academically, socially and culturally. Through partnerships with students and others, this department strives to support the University's Vincentian values and encourages residents' growth and community responsibility.

Additional information is available from Housing Services.
Libraries

The University Libraries provide information resources and services to students, faculty, and staff at all six library locations: the John T. Richardson Library in Lincoln Park, the Loop Campus Library, the Vincent G. Rinn Law Library as well as the libraries at DePaul's Naperville, O'Hare, and Oak Forest Suburban Campuses. Electronic access to journal articles, indexes, electronic books and other information resources in the humanities, business, social sciences, computer science and other sciences, is readily available both on campus and remotely. I-Share, the Libraries' online catalog and circulation system, allows users to locate and borrow books and other materials from DePaul and 77 other academic and research libraries in Illinois, including the University of Illinois. The University Libraries provide reference and research consultation services at each campus location and through the online "Ask a Librarian" email and chat reference services.

Additional information is available from the DePaul University library.

Office of Multicultural Student Success

The Office of Multicultural Student Success seeks to cultivate student success for students of color, low-income college students, or first generation college students through sustained developmental programming, financial resources, and advocacy.

Additional information is available from the Office of Multicultural Student Success.

Student Affairs

The Division of Student Affairs offers programs and services that inspire students to explore their personal identities, their faith and values, and their role in a multicultural world. Programs are developed and conducted in conjunction with the DePaul community and guided by its mission and Catholic-Vincentian-Urban nature. In particular, Student Affairs partners with Academic Affairs and other areas of the university to engage students in diversity, social justice and community service initiatives.
Student Involvement

The Office of Student Involvement fosters student learning and success by providing opportunities for engagement through a wide variety of campus activities and organizations, holistic and intentional advising of student leaders, and the development of purposeful and mutually beneficial partnerships across the University and City of Chicago to maximize access and resources to a rich DePaul campus experience.

Technology Resources

The following list introduces some of the technology resources that are available to students at DePaul. Additional information is available on the Information Services website.

Campus Connection

Campus Connection provides access to many of DePaul’s primary services, including course registration, grades, tuition billing, transcripts, Demon Express and much more.

Computer Labs and Classrooms

There are many technology-enabled classrooms across the DePaul campuses. Technology resources in these rooms include desktop computers, LCD projectors, connections for laptops, and integrated, amplified sound systems. Specialty rooms exist across the university for classes with specific needs, and additional technology is available upon request.

DePaul also has computers available for use by students, faculty or staff, located in computer labs, lounges and lobbies across the campuses. Additional technology access is available to residence hall students; each residence hall is outfitted with study lounges allowing for student access to computers and printers at any time.

CTA U-Pass

The CTA U-Pass is a transit card that provides eligible students unlimited access to buses and trains on the Chicago Transit Authority system. Students can pick up their U-Pass at the beginning of each academic quarter.

DePaul ID Card

Your DePaul ID Card serves as your identification to enable access to various DePaul buildings, computer labs, printers, and libraries and is used to purchase items using your Demon Express account and meal plan. You must have your ID Card on hand while on campus. New students receive their ID Card at student orientation. Students can also visit ID Services to obtain an ID card.

Demon Express

Demon Express is a prepaid debit account that is linked to your DePaul ID Card. Demon Express can be used at DePaul cafeterias, coffee shops, campus bookstores, libraries, printers, copiers, and other areas.

Desire2Learn (D2L)

D2L is an electronic course management system that enables interaction between students and faculty. D2L incorporates document sharing, discussion boards, e-mail, an online grade book, assignment drop boxes, chat rooms, small group areas, online quizzes, and more. To log in, use your Campus Connection username and password. If you need assistance using D2L, training is available.
Discounts

Demon Discounts provides discounted goods and services, including computer hardware and software, to DePaul students.

E-Mail

All students are provided a free DePaul e-mail account. Additional information is available on the Information Services website.

Printing

The Intelliprint system allows students to print from DePaul computer labs. Students use their DePaul ID card to pay for prints and are entitled to a set amount of free printing per quarter. Additional funds can be added to Demon Express as needed. You may also print to the Intelliprint system wirelessly.

Residence Hall Technology

Lincoln Park residence hall rooms are equipped with high speed Internet connections, wireless Internet access, and free telephone connections.

Technical Support

The Help Desk is your first point of contact for technical assistance. The Help Desk provides free assistance via phone, e-mail and web for current DePaul students. We support all DePaul wireless networks, telephones, e-mail accounts and software.

Wireless Internet Access

Wireless internet access is available to students on all DePaul campuses.

University Center for Writing-based Learning

The University Center for Writing-based Learning offers consultation sessions about students’ writing. At both LPC and Loop locations, graduate and undergraduate peer consultants meet with DePaul students from across the university to stimulate a reflective, recursive writing process. Online consultation is also available.

Learn more at condor.depaul.edu/writing.

General Information

September 2012,

To the University Community,

The Dean of Students Office is committed to partnership in the educational mission of DePaul University. This
mission is enhanced by a Code of Student Responsibility, which outlines expectations and standards of behavior for the student community. Any community of more than 25,000 people needs rules. As a DePaul University student, the DePaul Code of Student Responsibility isn’t a list of things you can do wrong; it’s a code designed to protect your rights and those of all DePaul students. Any student who feels that another student in the community has violated their rights is encouraged to use this Code and the Dean of Students Office as a resource.

The Dean of Students Office can be an invaluable advocate and support in identifying resources and services for students. In an institution of such size and complexity it is often difficult to know where to begin when a student is struggling or having difficulty navigating the University setting. This office can be of particular help in areas of personal and/or family crisis, economic distress, or a medical/personal leave of absence. The office serves as principal liaison and resource for students and other divisions and departments within the University community.

Finally, our work with students is guided by the Socially Responsible Leader framework which is grounded in our Catholic, Urban and Vincentian mission. The development of socially responsible leaders in today’s complex, global and ever-changing world requires a campus community that is committed to holistic learning and the fostering of a campus community based on respect. It is our hope that you will make full use of the opportunities to reach your full potential that are available for you at DePaul University. In that regard, the Dean of Students Office is here to serve you with locations on both the Loop and Lincoln Park campuses.

Locations:    Student Center 307    DePaul Center 11001
Lincoln Park    Campus Loop Campus
(773) 325-7290           (312) 362-8066

In emergency situations, the office can also be reached 24 hours a day through our Public Safety Office at (773) 325-7777.

Sincerely,
Art Munin, Ph.D.
Dean of Students

---

**Student Rights**

Any community of more than 20,000 people needs rules.

As a registered DePaul University student, the DePaul Code of Student Responsibility isn’t a list of things you can do wrong; it’s a code designed to protect your rights and those of all DePaul students.

**Student Rights**

1. The University shall be open to all students who qualify under its admission standards, regardless of race, religion, national origin, age, disability, marital status, sexual orientation or gender. All students have equal right of access to the public facilities and services of the University, in accordance with University policies.
2. Students have the right to their own ideas, beliefs and political associations. Students have the right to ask questions and express their opinions without affecting their academic evaluations, as long as such do not interfere with the normal operations of their classes or infringe on the rights of other students in their classes. Instructors shall evaluate students’ performances without prejudice.
3. A student has the right to a hearing within the established University procedures, in all matters that can result in the imposition of sanctions for misconduct. Usually, a student’s status within the University will not be permanently altered until final outcome of any judicial action. However, the University reserves the right to take actions to reasonably ensure safety and security, including removing and/or suspending a student from the University pending final determination of any judicial action.
4. A student duly admitted to and registered at the University has the right to receive a clear and concise written statement concerning academic and nonacademic regulations and commitments made by the University prior to or upon initial registration for classes. A student also has the right to be advised of any changes in such matters.
5. Students have the right to join associations and are free to promote their common interests. This includes the right to become affiliated with any recognized student organization without discrimination or prejudice regarding race, color, ethnicity, religion, national origin, age, physical or mental disability, marital status, parental status, family relationship status, military status, sexual orientation, sex, gender, or other status protected by local, state, or federal law in its education settings, although fraternities and sororities are exempt from the restriction of discrimination due to gender.
6. Students have the right to participate in the governance of the University through the Student Government Association.

7. Under the guidelines established by the University, students have the right to edit and/or operate the student media.

8. In accord with University policy, for all classroom courses, a syllabus must be distributed in written form beginning on the first day of class. The dean of the college is responsible for implementing the syllabus requirements.

9. Students shall be given the opportunity to be represented at all departmental meetings by at least one full-time student majoring in the appropriate discipline. The student representative shall be chosen annually in accordance with Student Government Association guidelines and shall be a full-time voting member. The student who accepts this responsibility has the moral obligation to attend these departmental meetings.

10. Students shall have the right to vote on search committees that choose academic deans. Membership on such committees shall be achieved through the auspices of the Student Government Association.

11. Students have the right to petition institutional authority for changes in either academic or nonacademic regulations.

12. Students have the right to regular academic advisement. Undergraduate and graduate students have the right to an assigned academic advisor who is available and informed to assist and advise in class selections, to meet academic requirements and career goals.

13. Students have the right of reasonable access to University administrators and faculty during specified office hours.

14. Undergraduate and graduate students (in all colleges but the College of Law) have the right to be informed formally of their academic standing in class by the midpoint of each quarter.

15. Students have the right of protection from University personnel engaging in unreasonable search or seizure unless:

   1. there is probable cause that a violation of University policy is likely to occur, is presently occurring or has occurred;
   2. there is an apparent emergency or danger to self or others;
   3. in order to repair damage to University property;
   4. students' rights shall always remain subject to the searches of law enforcement officers who are performing their statutory duties in accordance with legally defined procedures governing search and seizure.

**Notification of FERPA Rights**

**Annual Notification for DePaul Students: Your FERPA Rights**

We want to take this opportunity to provide you with a summary of your rights under The Family Educational Rights and Privacy Act (FERPA), the federal law that governs release of and access to student education records. Please view Understanding FERPA, a DePaul Central Learning Center video for information and instructions.

Your FERPA rights include:

1. The right to inspect and review your education record within 45 days after the University receives a request for access. If you want to review your record, contact the University office that maintains the record to make appropriate arrangements.

2. The right to request an amendment of your education record if you believe it is inaccurate or misleading. If you feel there is an error in your record, you should submit a statement to the University official responsible for the record, clearly identifying the part of the record you want changed and why you believe it is inaccurate or misleading. That office will notify you of their decision and advise you regarding appropriate steps if you do not agree with the decision.

3. The right to provide written consent before DePaul discloses personally identifiable information contained in your education records, except to the extent that FERPA authorizes disclosure without consent.

Some examples of exceptions include:

- School officials with "legitimate educational interests." A school official has a legitimate educational interest if the official has a professional need to review your education record in order to fulfill his or her official responsibilities. Examples of people who may have access, depending on their official duties, and only within the context of those duties, include: university faculty and staff, agents of the institution,
students employed by the institution or who serve an official institutional committees, and representatives of agencies under contract with the University.

- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer.
- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local educational authorities, such as a state postsecondary authority that is responsible for supervising the university’s state-supported education programs. Disclosures under this provision may be made in connection with an audit or evaluation of federal- or state-supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs. These entities may make further disclosures of personally identifiable information to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, enforcement or compliance activity on their behalf.
- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid.
- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate or administer predictive tests; (b) administer student aid programs; or (c) improve instruction.
- To accrediting organizations in order to carry out their accrediting functions.
- To appropriate officials in connection with a health or safety emergency.
- Information the school has designated as “directory information.”

Directory information may be released without your written consent and includes the following: name, address, e-mail, telephone number, date of birth, college of enrollment, year in school, major, enrollment status (including current enrollment, dates of attendance, full-time/part-time or withdrawn), degrees and honors received (e.g., Dean's List recognition), participation in officially recognized activities and sports, weight and height of members of athletic teams, photographs (including ID pictures), videos depicting and/or concerning University life, and previous educational institutions attended. Please note that you have the right to withhold the release of directory information except to the extent that FERPA authorizes disclosure without consent (see #3 above).

To withhold the release of your directory information, you must log into the student portal, Campus Connection, and, under Student Privacy settings, indicate your preference. Please note two important details regarding placing a “No Release” on your record:

1. A "No Release" on your record will prevent your name from being included on lists of students released to honor societies, dean's list and graduation announcements to local newspapers, and enrollment and degree verification to anyone, including potential employers.
2. A “No Release” applies to all elements of directory information on your record.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

For additional information, please consult the U.S Department of Education (http://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.htm/) website.

Questions concerning FERPA should be referred to DePaul Central:

**Introduction to the Code/ Policies**

A student by voluntarily joining the University community agrees to abide by the standards that have been instituted by DePaul University. Students are responsible for being familiar with all of the policies and procedures included in the Code of Student Responsibility. The Code of Student Responsibility was developed by Student
Affairs to give formal recognition to the rights and responsibilities of students at DePaul University and is based on the following principles:

1. The intrinsic value of the person stands above other values. The personal rights and dignity of individuals are to be held inviolate. They take precedence over any academic goal set forth by the University.
2. The student is respected as a responsible person. He or she is, therefore, encouraged to make informed decisions with respect to his or her own education and to be involved in University decisions to the fullest extent possible.
3. The University is by definition a corporation. Just as the individual student has his or her own personal right, so the University, as a corporate person, has an obligation to exercise its rights and privileges in conformity with the laws and procedures governing its actions.
4. DePaul University recognizes that freedom to teach and freedom to learn depend upon opportunities and conditions in the classroom, on the campus and in the larger community. The responsibility to secure and respect general conditions conducive to learning is shared by all members of the academic community.

Freedom is meaningless unless responsibility is also present.

The above rights can be exercised effectively and without fear only if they are incorporated into policies and regulations that are as precise and informative as possible, and only if there are adequate procedures to settle disputes that arise in their regard. The Code of Student Responsibility protects students’ rights by making explicit all judicial procedures so that no student may be subject to judicial procedures except in strict adherence to proscribed policies.

As an academic and religious institution, DePaul has a vested interest in both the safety and well-being of the members of its campus community. As a result of the high caliber of men and women DePaul University attracts, the Code of Student Responsibility in both the academic and nonacademic areas of university life. It is the intent of the Code to provide the necessary guidelines to support and advance the educational and religious aims of the University without unduly restricting or diminishing the university experience. The Code, together with other applicable University policies, outlines the minimum acceptable level of conduct expected of every student at DePaul. The policies and procedures outlined are those that students, faculty and administrators at the University have designed to further the educational and religious aims of the institution and to assist all students in the pursuit of their educational, personal and social development.

A student by voluntarily joining the DePaul community assumes the responsibility for abiding by the standards that have been instituted by DePaul. The Vice President for Student Affairs, or his/her designee, maintains exclusive authority for imposing sanctions for behaviors that violate the Code of Student Responsibility. The Vice President for Student Affairs, or his/her designee, is also responsible for interpreting and/or implementing additional University procedures or policies to address issues that are not specifically covered by the various parts of this Code. University personnel charged with enforcement of the Code will at all times endeavor to adhere to the intent of fundamental fairness so that each student’s concern is addressed in an impartial and consistent manner.

The University may exercise jurisdiction for an offense committed on-campus. Additionally, the University may exercise jurisdiction for an offense committed off-campus (including on-line communities) when:

A. The victim of such offense is a member of the campus community (student, faculty or staff); or
B. The offense occurred at a college-sponsored or sanctioned event; or
C. The student used his or her status as a member of the University community to assist in the commission of the offense (for example student ID card to pass a bad check); or
D. The offense affects the University.

The University’s adjudication of any violation of this Code may proceed independently of any action taken by state, federal or municipal agencies. The University reserves the right to refer incidents of misconduct to civil or criminal authorities.

This Code is designed to protect the rights of all members of the University community so they can prosper academically, socially and personally. In order for this Code to work effectively, however, students must take responsibility for confronting behaviors exhibited by their peers that negatively impact their experiences and violate established standards of behavior. It is imperative that students work in partnership with University faculty and staff members to protect the rights that have been afforded them.

DePaul University reserves the right to change policies or procedures maintained herein at any time during a student’s enrollment period provided such changes are updated in the on-line Undergraduate Handbook. Students and student organizations are advised to read this Code and any other relevant policies carefully so all are aware of the policies which guide the University in its dealings with them. Students should review the Academic Policies section of the Undergraduate Handbook or contact their college office for specific information on the policies used to govern academic expectations at the University.
Alcohol

University Policy

DePaul community members owe it to themselves and others to make educated decisions about their use or distribution of alcohol. The State of Illinois prohibits the sale, use or possession of all forms of alcoholic beverages by persons under 21 years of age. Students are responsible for adhering to the university Drug Free Workplace & Legal Drinking Age Compliance policy. Students living on campus should consult the Guide to Student Housing for additional information about alcohol policies and prohibitions in the residence halls.

Health Promotion & Wellness

DePaul University expects students to uphold the law when it comes to the purchase and consumption of alcohol. This institution also seeks to educate students about making safe, responsible decisions when it comes to substance use. The Alcohol & Substance Abuse Prevention Specialist is the point of contact for all outreach and initiatives pertaining to responsible substance use. Students who are found responsible for violating DePaul University's alcohol policy may be mandated to meet with the Alcohol & Substance Abuse Prevention Specialist and participate in an intervention called BASICS (Brief Alcohol Screening and Intervention for College Students). Other students may also request to meet with the Alcohol & Drug Prevention Specialist and/or participate in BASICS. Students who have concerns about their alcohol use (or someone else's) may contact the Alcohol & Substance Abuse Prevention Specialist at any time and will not get into trouble for seeking help or information. The Alcohol & Substance Abuse Prevention Specialist can be reached at (773) 325-4550.

Students should be prepared to seek help or call 911 when a peer may be experiencing a drug overdose or alcohol poisoning. Students are expected to take action in such situations and not be a passive bystander. Here are the symptoms of alcohol poisoning, and remember that not all symptoms need to be present for alcohol poisoning to occur:

- Person is unconscious and cannot be roused;
- Person is in a stupor or exhibits confusion;
- Person is vomiting (prop unconscious persons on their sides so that they won't choke on their own vomit);
- Skin is pale, has a blue tinge, and/or skin is unusually cold to the touch;
- Abnormally slow breathing (less than 8 breaths per minute) and/or irregular breathing (a gap of more than 10 seconds between breaths);
- Seizures.

Drug overdoses can vary depending on the drug consumed, but here is a general list of symptoms that indicate help is needed. Remember that not all symptoms need be present for an overdose to occur:

- Abnormal pupil size;
- Agitation, aggressive, and/or violent behavior;
- Convulsions;
- Delusional or paranoid behavior;
- Difficulty breathing;
- Drowsiness;
- Hallucinations;
- Nausea and vomiting;
- Nonreactive pupils (pupils that do not change size when exposed to light);
- Staggering or unsteady gait;
- Sweating or extremely dry, hot skin;
- Tremors;
- Unconsciousness or death.

Additionally, the following regulations govern alcohol use by students and student organizations:

1. All casual possession or consumption of alcohol by students in designated common or non-reserved areas on university premises is prohibited regardless of age.
2. For specific policies regarding alcoholic beverages in the residence halls, please see the Guide to Student Housing.
3. Consumption of alcohol which results in behavior that infringes on the rights of others in the community is prohibited.
4. Alcoholic beverages may not be served at student-sponsored or student organization-sponsored events without written authorization from the Associate Vice President for Student Advocacy and Community...
Affairs or his/her designee. Authorization will not be given to any student organization that is hosting an event at which students under 21 will, or could be, present. Notification of such authorization will be sent to the student organization itself, the organization's moderator/advisor, the building director and the Public Safety Office.

This authorization will detail the provisions for maintaining control of the consumption of alcoholic beverages at the event. In making the final determination for authorization, the Associate Vice President for Student Advocacy and Community Affairs or his/her designee will consider the following points:

1. the presence of adequate control measures (e.g., hiring a professional bartender to serve alcohol, security, presence of university representative, method of age identification and monitoring of the event, etc.);
2. the type of event;
3. adherence to area/building procedures;
4. the presence of food and nonalcoholic beverages in a prominent place; and
5. the possible requirement of a special events permit or other license to dispense alcoholic beverages.

Depending on the location and type of event, student organizations that are sponsoring events should also consult the Catering Services Exclusivity policy and Catering Donations policy.

Student organizations may not advertise the availability of alcohol in their event publicity.

When student organizations sponsor events at which alcoholic beverages are offered for consumption, the organization and its officers shall be solely responsible for the conduct of such affairs in accord with civil law and university policies.

Civil or Criminal Law

Any student who violates any state, federal or municipal law shall be subject to judicial action for said offense(s) up to and including suspension and expulsion. The adjudication of such violations may proceed regardless and/or independently of any action taken by state, federal or municipal agencies.

Damage to Personal or Private Property

A student shall take no action that damages, or tends to damage, personal or private property not his or her own without the consent of the owner or person legally responsible for such property.

Demonstrations

Orderly and peaceful demonstrations on the campus are permitted. However, the University has the obligation to ensure the safety of individuals, the protection of property and the continuity of the educational process. When picketing or other forms of peaceful protest take place outside University buildings, the University insists on the right of free passage for all through the areas where members of the University community have a right to be. When such demonstrations take place inside University buildings, the University insists on orderliness, free passage to all rooms, lack of excessive noise, and no interference with classes, libraries, offices, assemblies or normal administrative functions. Students participating in off-campus demonstrations will be subject to...
Disorderly, Violent, Intimidating or Dangerous Behavior to Self or Others

Students are not to engage in behavior that threatens, harms or causes to place in harm themselves or other persons, or to exhibit behavior that is illegal, destructive, lewd, indecent, obscene or disorderly. The types of conduct that this regulation is designed to cover include, but are not limited to, the following examples:

1. Intentionally inflicting bodily harm upon any person; taking any action for the purpose of inflicting physical harm upon any person; taking reckless action that results in physical harm to any person; taking any action that creates a substantial risk of physical harm to any person; or threatening by any means of transmission the use of force to physically harm or injure any person.
2. Disrupting the peace, impeding classes, causing significant emotional harm, bullying, and/or endangering the safety, health or life of any person on campus through actions or words.
3. Obstructing fire escape routes such as hallways or stairwells.
4. Committing acts of an indecent or lewd nature.
5. Climbing or scaling the exterior of any University building or facility.
6. Production of sound through amplification or other means (including voices) that unreasonably disturbs or disrupts the peace of others or violates University standards.
7. Using electronic or other devices to make an audio or video recording of any person without his/her prior knowledge, or his/her effective consent.

Emergency Regulations

The specific emergency regulations and evacuation procedures for University buildings must be obeyed at all times to ensure the safety of all.

False Information

Students are not to provide false information in any form to University officials. Students are not to knowingly misuse, misrepresent or falsify any University record, I.D. card, form, computer resource or procedure. Students who assist by any means the providing of false information as described in this expectation will be considered in violation. Students are not to take any action (verbal, written, or behavior), based on known incorrect data, with direct intent to be hurtful or harmful to the University.
False Report of an Emergency

The intentional false reporting of a bomb, fire, attack or other emergency on any University-owned or -controlled property is strictly prohibited.

Firearms, Dangerous Weapons, Explosives or Fireworks

Possession or use, or assisting in the possession or use, of any of the following items, including but not limited to, firearms, knives, clubs, ammunition, explosive devices, flammable liquids, taser guns, stun guns, pepper sprays, mace, or other weapons on University-owned or -controlled property, is strictly prohibited by various local, state and/or federal laws and University policy. Students in possession of dangerous weapons or materials will be subject to immediate suspension and may face criminal or civil sanctions. Students are not to possess or explode any type of fireworks on University-owned or -controlled property unless authorized in accordance with city ordinances and approved in writing by the appropriate University officer.

Gambling

In accordance with applicable Illinois and Federal gambling laws, DePaul University prohibits gambling or any form of illegal wagering, bookmaking or unauthorized games or contests of chance on University premises, including but not limited to University Housing and/or University-sponsored functions including sporting events. In addition, students shall not knowingly provide information to assist any individual involved in any gambling activities.

Guest Responsibility and Visitation

Students and student organizations are responsible for the behavior of their guests while they are on property owned or controlled by the University or in attendance at its sponsored events. The host students or student organizations assume full responsibility for their guests’ compliance with all prescribed University policies and procedures, including those specific to building hours and residence hall visitation.
**Hazing**

The hazing of students at DePaul University is strictly prohibited. Hazing is defined in accordance with all applicable local, state, and/or federal laws and includes any action taken or situation created to produce mental or physical discomfort, embarrassment, ridicule or endangerment of a student or group of students. Such activities include, but are not limited to: use/abuse of alcohol, paddling in any form, creation of excess fatigue, physical and psychological shocks, treasure hunts, scavenger hunts, road trips or other similar activity, wearing of public apparel that is conspicuous and normally not in good taste, and morally degrading or humiliating games and activities.

**Illegal Use or Possession of Drugs or Controlled Substances**

**University Policy**

Students may not illegally use, sell, possess or distribute any state or federally controlled drug or substance on University-owned or -controlled property. The University reserves the right to take any action deemed necessary to protect the University’s interests and the safety of its students in cases involving the use, sale, possession or distribution of illegal or controlled drugs. Students are responsible for adhering to the university Drug Free Workplace & Legal Drinking Age Compliance policy. Students living on campus should consult the Guide to Student Housing for additional information about prohibited substances within the residence halls.

Students should be aware that it is unlawful to distribute prescription medication to other students for whom the medication was not prescribed. In addition to illegal drugs such as marijuana, hallucinogens, narcotics, club drugs, and medications obtained without a prescription, the following substances are prohibited on campus: MDPV or “bath salts,” Salvia, K2, and Spice.

**Health Promotion & Wellness**

DePaul University expects students to uphold laws prohibiting the purchase and use of illegal drugs and/or controlled substances. DePaul University also seeks to educate students about making safe, responsible decisions when it comes to substance use. The Alcohol & Substance Abuse Prevention Specialist is the point of contact for all outreach and initiatives pertaining to responsible substance use. Students who are found responsible for violating DePaul University’s Illegal Use or Possession of Controlled Substances policy may be mandated to meet with the Alcohol & Substance Abuse Prevention Specialist, and may also be asked to participate in an intervention called BASICS (Brief Alcohol Screening and Intervention for College Students). Other students may also request to meet with the Alcohol & Drug Prevention Specialist and/or participate in BASICS. Students who have concerns about their drug use (or someone else’s) may contact the Alcohol & Substance Abuse Prevention Specialist at any time and will not get into trouble for seeking help or information. The Alcohol & Substance Abuse Prevention Specialist can be reached at (773) 325-4550.

Students should be prepared to seek help or call 911 when a peer may be experiencing a drug overdose or alcohol poisoning. Students are expected to take action in such situations and not be a passive bystander. Here are the symptoms of alcohol poisoning, and remember that not all symptoms need to be present for alcohol poisoning to occur:

- Person is unconscious and cannot be roused;
- Person is in a stupor or exhibits confusion;
- Person is vomiting (prop unconscious persons on their sides so that they won't choke on their own vomit);
- Skin is pale, has a blue tinge, and/or skin is unusually cold to the touch;
- Abnormally slow breathing (less than 8 breaths per minute) and/or irregular breathing (a gap of more than 10 seconds between breaths);
- Seizures.

Drug overdoses can vary depending on the drug consumed, but here is a general list of symptoms that indicate help is needed. Remember that not all symptoms need be present for an overdose to occur:

- Abnormal pupil size;
- Agitation, aggressive, and/or violent behavior;
- Convulsions;
- Delusional or paranoid behavior;
- Difficulty breathing;
- Drowsiness;
- Hallucinations;
- Nausea and vomiting;
- Nonreactive pupils (pupils that do not change size when exposed to light);
- Staggering or unsteady gait;
- Sweating or extremely dry, hot skin;
- Tremors;
- Unconsciousness or death.

Information Display

Students and external groups may not distribute post, affix or otherwise attach writing or any printed materials (i.e., posters, signs, handouts, brochures, handbills, pamphlets, etc.) on University property without proper authorization. All information display and distribution must be in accordance with the University policies. Further information on University policies regarding Information Display and Distribution may be obtained from the Office of Student Involvement, the DePaul Center Student Union Information Desk or Residential Education.

Judicial Process Compliance

A student who fails to agree to participate in a required Judicial Review Process or abide by a judicial sanction, takes action to influence or coerce testimony in a Judicial Review Process, takes action that disrupts, or impairs the Judicial Review Process, or attempts to retaliate against a complainant or witness on account of their participation in the Judicial Review Process may be found in violation of failure to comply with the judicial process. Any student who knowingly provides false information in a hearing may also be found in violation of this or other parts of the Code of Student Responsibility or other applicable institutional policy.

Reasonable Directives from a University Official or Office

Students are not to disregard reasonable directives, either verbal or written, issued by a University official or office, or obstruct an official in the carrying out of his/her assigned duties or responsibilities. Failure to follow reasonable directives may result in judicial sanctions or, if appropriate, involuntary withdrawal from the University.
Residential Education and Housing Services Policies and Procedures

Students living in DePaul housing are responsible for abiding by all of the policies and procedures set forth by Residential Education and Housing Services. Failure to do so could result in consequence imposed by those departments, as well as in additional sanctions as a violation of the Code of Student Responsibility.

Safety Equipment

The unauthorized alteration, misuse or tampering with of any equipment or device intended for use in preserving or protecting the safety of members of the University community, including but not limited to keys, exit signs, fire extinguishers, fire alarms, fire boxes, standpipes, first aid equipment or emergency telephones, is prohibited.

Sexual Offense

DePaul University is committed to providing and maintaining a healthy learning and working environment for all students, staff, and faculty members. In accordance with DePaul's Catholic and Vincentian values and its role as an educational institution, the university condemns any form of sexual violence. Further, the university is dedicated to providing both prevention programming and referral services for all members of its community. This document is intended to outline university policies, procedures, disciplinary actions, programs, and prevention efforts regarding sexual violence.

In accordance with the Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act, DePaul University is required to report certain sexual offenses occurring on or near campus to the proper municipal authority. The survivor has the choice of whether or not to file a report and/or to proceed with legal action. Students should consult the DePaul Crime Reporting policy for more information. This policy can be found on the University Secretary's website.

If a sexual offense occurs, the survivor is encouraged to:

- Find a safe place.
- Seek medical treatment for possible physical injuries, transmission of STIs, and pregnancy.
- Preserve evidence of the assault:
  - Avoid showering, bathing, changing clothes, washing hands, going to the toilet, or brushing teeth
  - If you do decide to change clothes, save all of the clothing you were wearing at the time of the assault. Place each item of clothing in a separate paper bag.
  - Avoid disturbing anything in the area where the assault occurred.
- File a report.
- Seek support and counseling.

Sexual Offense Definition

At DePaul, a sexual offense is any unwanted physical contact of a sexual nature, whether by an acquaintance or by a stranger, that occurs without indication of consent of either any of the individuals involved, or that occurs under threat or coercion. Sexual offenses include, but are not limited to, rape (also referred to as sexual assault in the State of Illinois), forcible sodomy, sexual assault with an object, fondling or kissing without consent, incest, statutory rape, and the threat of sexual assault. DePaul recognizes that there is nothing a person can do...
to deserve or provoke a sexual offense. According to the Department of Justice and the FBI, rape is defined as "The penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." This definition includes any gender of the victim or perpetrator, and includes instances in which the victim is incapable of giving consent because of temporary or permanent mental or physical incapacity, including due to the influence of drugs or alcohol or because of age. Physical resistance from the victim is not required to demonstrate lack of consent.

Consent is defined as a clearly and freely given word or overt action confirming a willing desire to move forward with a specific sexual request, act, or experience. Consent cannot be obtained from individuals who have a temporary or permanent mental or physical incapacity, including being under the influence of drugs or alcohol or because of age. Consent is an affirmative response, not a lack of one, (i.e. the absence of "no" should never be interpreted as "yes").

If you wish to obtain more information on laws in the State of Illinois, please contact the Office of Sexual Health & Violence Prevention at 773-325-7295.

**University Policy**

Sexual offenses as well as threats of sexual offenses are prohibited by DePaul University.

DePaul recognizes that there are many ways to perpetrate sexual violence. Incidents may occur through physical force, intimidation, manipulation, and coercion. This may include the voluntary or involuntary use of drugs and/or alcohol that renders the survivor unable to give consent. Sexual offenses can occur within personal relationships, including those that are intimate, professional, familial, or friendly. In fact, sexual offenses involving strangers constitutes only a small percentage of cases. Individuals of any sex, sexuality, or identified gender may experience a sexual offense. It is important to remember that there is nothing a person can do to deserve or provoke a sexual offense.

If a student chooses to pursue the Judicial Review Process with respect to sexual violence, the University will ensure that the hearing officers are educated on sexual offenses before the process begins to ensure that the case is handled with sensitivity. The hearing officers receive training on definitions, processes, and how question appropriately.

Upon request the Dean of Students office may accommodate changing classes, moving residence halls, and arranging for escorts.

**Reporting Sexual Abuse & Sexual Assault**

If you are a person who has experienced or thinks you have experienced a sexual offense, whether on- or off-campus, and whether by a member of the DePaul community or not, DePaul is committed to offering a secure and supportive environment for you to receive resources and consider all available options.

The Office of Sexual Health & Violence Prevention is available for students to ask questions, discuss their experience, and request referrals. Referrals may include those related to medical treatment and evaluation; counseling; legal advocacy; and reporting.

A person who has been sexually offended is encouraged to make a report to the Public Safety Office (Lincoln Park campus 773/325-7777, Loop campus 312/362-8400), Dean of Students Office (Lincoln Park campus 773/325-7290, Loop campus 312/362-8054), or the Office of Sexual Health & Violence Prevention (773/325-7295). Staff members in all these offices receive training on working with survivors of sexual violence, so as to provide a safe and sensitive environment. The Public Safety Office is open 24 hours a day, 7 days a week.

A report serves as a means of documenting the incident and allows for immediate response by the Public Safety Office, the Dean of Students Office, and/or the Chicago Police. The report allows the student access to DePaul’s internal Judicial Review Process, whether or not they decide to proceed with criminal legal proceedings. Please note that the student will have to reveal their name in their report if they wish for the Public Safety Office or the Chicago Police to pursue an investigation, and if they would like the Dean of Students Office to conduct the internal Judicial Review Process.

When a report is received, all internal and external options will be reviewed with the student, including contacting the Chicago Police; getting medical treatment; contacting community sexual assault agencies; starting the Judicial Review Process; and connecting with DePaul University Counseling Services or off-campus counseling services. Detailed information on DePaul’s Judicial Review Process can be found under Judicial Review Process in the Code of Student Responsibility.

It should be noted that staff in the Office of Sexual Health & Violence Prevention and Dean of Students Office are compelled to comply with laws that require the reporting of certain sexual offenses occurring on or near campus to Public Safety. If the survivor does not wish to release their name, a "Jane/John Doe" report will be created about their case, thereby not revealing their identity. The survivor can at any time choose to add their name to the report if they decide to press charges at a later time. In certain cases, the University may be required to issue
Medical Treatment

A person who has experienced a sexual offense is encouraged to seek an appropriate medical evaluation as promptly as possible. Medical evaluation may include treatment of injuries endured during the event; treatment of STIs; and a full examination for the collection of physical evidence should a person later decide to pursue a criminal prosecution and/or civil action. Additional resources may be available at the time of treatment.

As per Illinois law, emergency room (ER) medical treatment for sexual abuse or assault is confidential and is of no cost to the survivor. If the survivor chooses to provide their health insurance information, the insurance carrier will be charged first and any overflow costs will be covered by the State in accordance with applicable laws. Please note that if the primary holder of the health insurance is someone other than the survivor the medical bills will be sent to that primary holder. Although the primary holder will not be required to pay the bills, they will see that the survivor was in the ER due to a sexual assault.

If a survivor chooses to seek treatment, they may call Public Safety to be taken to the ER. At the ER, the survivor may request a Sexual Assault Nurse Examiner (SANE) to conduct the examination. SANEs can provide the survivor with support to ease their experience at the hospital. The police will be contacted upon arrival at the hospital, but the survivor may decline to file a report.

Information, Support, and Counseling

Counseling is available for survivors whether or not a report is filed. Counseling provides a space for confidential disclosure, and is available both on and off campus 24 hours a day. Survivors may experience Rape Trauma Syndrome, with symptoms similar to those of Post Traumatic Stress Disorder. This condition may be serious and should be treated with respect and sensitivity. Sexual violence can affect all areas of a survivor's life and counseling can provide support to help navigate through issues that may arise.

*Please note that by dialing Public Safety at 773/325-7777 (Lincoln Park Campus) and 312/362-8400 (Loop Campus), you can access any University office listed below 24 hours a day, 7 days a week.

**Crime Victim's Compensation Law**

Under the Crime Victim's Compensation Law, a person who has been sexually abused or assaulted may be eligible for support services and medical reimbursement if the crime is reported within 7 days, or in some cases, even longer.

**Educational Programs**

1. The Office of Sexual Health & Violence Prevention provides rape awareness, education, and prevention programs and trainings each year to members of the university community, including students, staff, and faculty. Additionally, this office presents at Premiere and Transition DePaul.
2. The Student Affairs Division and the Public Safety Office coordinates and provides crime awareness programs aimed at incoming freshmen, transfer, and commuter students.
3. Self Defense classes are provided at the Ray Meyer Fitness Center for students, faculty, and staff. The classes provide participants with tools for their empowerment and safety.
4. Brochures about sexual violence and available resources are available through the Dean of Students Office, the Office of Sexual Health & Violence Prevention, the Department of Residential Education, the Women's Center, and the Public Safety Office.

**Theft, Misappropriation, Misrepresentation or Unauthorized Sale or Use**

Students are to refrain from the unauthorized occupancy, use, possession or removal from a designated area, of property belonging to the University, its community members (faculty, staff and students), guests or vendors. Services provided to or by members or guests of the University may not be used or obtained unless authorized in advance by the appropriate agent. This includes the misuse or unauthorized use of University telephones, computer services, electronic communications, facilities or funds. Also, students may not represent themselves as having the authority to enter into contracts or agreements that affect DePaul University in any way.

Only officers of DePaul, or their specific designees, are empowered to sign contracts that bind the University. Students are not to take any action (verbal, written, or behavior), based on known incorrect data, with direct intent to be hurtful or harmful to the University.
Unauthorized Entry or Exit from University Facilities

Forcible or unauthorized entry into any building, structure, facility, room or container (file cabinet, desk drawer, etc.) on the premises of University-owned or -controlled property is prohibited. Improper use of designated exits is also prohibited.

University Policies Applicable to Students

Students must abide by all University policies applicable to them as students. Students should make themselves aware of all University policies. The policies listed below are some of the policies that are most relevant to the day to day lives of students. This list is not intended to exempt students from all other University policies applicable to students.

Anti-Discrimination and Anti-Harrassment Policy and Procedures

The Anti-Discrimination and Anti-Harassment Policy provides the overall philosophy and specific approaches for addressing discrimination, harassment, and/or related retaliation issues. It serves to augment other university-wide policies and is in accordance with federal, state, and local laws and regulations. The Anti-Discrimination and Anti-Harassment Policy combines and replaces the predecessor Sexual Harassment Policy and the Anti-Discriminatory Harassment Policy. The Anti-Discrimination and Anti-Harassment Policy encompasses the University's Section 504 Grievance Procedures.

It is the policy of DePaul University that no person shall be the object of discrimination or harassment on the basis of race, color, ethnicity, religion, sex, gender, sexual orientation, national origin, age, marital status, parental status, family relationship status, physical or mental disability, military status, or other status protected by local, state, or federal law in its employment or its educational settings. DePaul University reserves the right to take actions that are consistent with its policies and procedures to deal with individuals found to have engaged in harassment, discrimination and/or retaliation in violation of this policy.

Acceptable Use Policy/ Network Security

This Policy defines guidelines for acceptable use of computing resources within the University and explains various violations of acceptable use. This Policy is intended to promote a greater computer and network security posture for DePaul University.

For the entire policy please check the University Secretary's website.
Drug Free Workplace and Legal Drinking Age Compliance

Institutions receiving federal financial assistance are required to develop and distribute to faculty, staff, students, and others, a public statement certifying compliance with the Drug Free Workplace Act and the Drug Free Schools and Communities Act.

The State of Illinois prohibits the sale, use, or possession, of alcoholic beverages by persons who are under 21 years of age.

This policy states DePaul's commitment to maintain a drug free workplace and restrict the consumption of alcohol at university events, including classes, to persons 21 years or older.

For the entire policy please check the University Secretary's website.

Endorsements Policy

DePaul's reputation and stature make it an attractive partner for many organizations and entities, but some uses of DePaul's name by others may not always promote the purposes of the university. All members of the university and the institution as a whole benefit when its name is well used and suffer when it is ill used.

The university takes a legitimate interest in the use of its name and logos for at least three reasons:

- The university and its members have a responsibility to ensure that any implied association with the university is accurate.
- Attaching the DePaul name to an event, project or publication implies a close connection with the university, usually sponsorship or endorsement. For example, such forms as the "DePaul Project on..." or the "DePaul University Guide to..." should be used only when they refer to activities for which the university itself or one of its delegated authorities is accountable. Involvement by individual faculty, students or staff members is not, by itself, a sufficient basis to title an activity as "DePaul" sponsored. Rather the activity must be one for which the university takes institutional responsibility.
- The university and its members have a responsibility to ensure that the activities with which it is accurately associated maintain standards consistent with its educational purposes.

In academic endeavors under the supervision and control of university departments, centers, institutes, or programs, adherence to these standards is assured through the normal processes of review. In other activities, relevant standards of quality and appropriateness should be established and maintained. Even some projects that satisfy the standards of quality may not appropriately use the university name (for example, partisan political activities or outside ventures carried on by individual faculty, students or staff members; see Faculty Handbook).

The university and its members have a responsibility to protect its assets by seeking a fair share of the economic value that the use of the DePaul name produces.

"DePaul University" has become a widely known and respected trademark. The commercial fruits of this fortunate reputation are largely attributable to the contributions of many generations of faculty, students and staff. Therefore they should be allocated for the benefit of the university as a whole. Any use of the DePaul name that may depreciate its long-term value should be avoided.

In accord with these responsibilities, the following standards regulate the use of the DePaul name by schools, units and individuals within the university as well as their use by individuals and institutions outside the university, as authorized.

The use regulated by this policy refers to the identification, statement or display of DePaul's name in any way that may reasonably be interpreted as implying endorsement, approval or sponsorship by the university or one of its units. Nothing in this policy is intended to discourage fair use of DePaul's name to comment on activities of the university or any of its units.

For the entire policy please check the University Secretary's website.
HIV/AIDS Guidelines

DePaul University asserts that “the intrinsic values of the human person stand above other values. The personal rights and dignity of individuals are held to be inviolate.” In an effort to maintain these principles, guidelines have been established regarding the rights of students, faculty, and staff who are HIV infected or have AIDS. The DePaul University guidelines are available throughout the University at the libraries, college offices, Student Affairs Office and the University Counseling Center.

For the entire policy please check the University Secretary’s website.

Political Campaign Activities Policy

This policy provides guidelines for DePaul University and its faculty, staff and students about political activities. DePaul, as an organization exempt from tax under Section 501(c)3, may undertake no activity whatsoever on behalf of or in opposition to any candidate for public office, whether such office be federal, state or local.

This is an absolute prohibition. For the entire policy please check the University Secretary’s website.

Sales and Solicitation - Residence Halls

The use of any space in the residence halls/university apartment community for any commercial purpose except with the express written approval of the Department of Housing Services is prohibited. Solicitation by residents or any others without the explicit written approval of the Department of Housing Services is prohibited. The posting and/or distribution of any advertisement without stamped approval of the Residence Hall Council or the Department of Residential Education is prohibited.

For the entire policy please check the University Secretary’s website.

Smoking Policy

The purpose of this policy is to comply with the Clean Indoor Air Ordinance of the City of Chicago, which requires all employers to adopt a smoking policy, and to protect the health and safety of students, faculty, staff and the general public while on university property.

The university maintains a smoke-free environment. Smoking is prohibited within all university buildings.

For the entire policy please check the University Secretary’s website.
**Space Reservations**

This Policy establishes guidelines for reserving event space at DePaul University and associated rental costs.

For the entire policy please check the University Secretary’s website.

**Clery Act**

DePaul University complies with its reporting obligations pursuant to the Clery Act. Any information regarding Clery Act reports and reporting can be obtained at Public Safety.

**Emergency Contacts**

In an emergency situation, the University reserves the right to contact a student's parent, legal guardian, spouse, and/or other designated emergency contact.

**Drug Free Schools and Community Act**

DePaul University complies with the requirements of the Drug Free Schools and Communities Act. The University shall review its compliance on a biennial basis to determine its effectiveness and to ensure that the standards of conduct and judicial sanctions have been consistently enforced. This review shall be documented in a report.

Standards of Conduct: The unlawful possession, use, distribution, sale or manufacture of controlled substances is prohibited on any premises owned or controlled by DePaul University. Under no circumstance will the University tolerate unlawful possession, use, distribution, sale or manufacture of controlled substances or the unlawful use of alcohol on campus or at University-sponsored activities.

Judicial Sanctions: Students who violate these Standards of Conduct will be subject to judicial action up to and including expulsion, in accordance with university policy, the Code of Student Responsibility, and the Judicial Review Process. A judicial sanction for violating this policy may include the completion of an appropriate rehabilitation program.

Programs for Students Requiring Assistance: Any DePaul student who has a drug or alcohol related problem may call upon the University for assistance. Anyone needing help should contact the Alcohol and Substance Abuse Prevention Specialist in the Dean of Students Office. This professional can provide a confidential referral to a drug or alcohol treatment program.
Health Risks: The use of drugs and alcohol can have a substantial and detrimental effect on health. These effects are often permanent and can lead to severe physical and psychological impairment, disability and premature death. Information on the effects of drugs and alcohol is available the Student Life Office, University Counseling Services, the Ray Meyer Fitness Center and Sage Medical/DePaul Health Services.

Legal Sanctions: Use of illicit drugs by any person is illegal under both the state and federal statutes. Use of alcohol by persons under 21 years of age is illegal under state law. Penalties for conviction under state and federal law include incarceration and fines. Federal student loans and grants may be denied to those convicted for a violation of a criminal drug statute.

Students should also consult the Alcohol policy and the Drug Free Workplace & Legal Drinking Age Compliance Policy. This policy can be found in the Undergraduate Student Handbook and on the University Secretary’s website.

Also review Drug Free Workplace and Legal Drinking Age Compliance.

Information Regarding Registered Sex Offenders

If you would like information regarding registered sex offenders enrolled or employed at DePaul University, please visit the Office of Public Safety.

Involuntary Withdrawal

DePaul University places the utmost priority on student welfare and community safety. When a student demonstrates conduct that violates DePaul’s Code of Student Responsibility or other DePaul policies, that conduct will be addressed through the appropriate disciplinary processes. This Policy is not intended to be disciplinary in nature. Rather, this Policy outlines the criteria and procedures for when and how a student may be involuntarily withdrawn from the University for demonstrating behavior that creates a direct threat to the safety or health of the student or others or that unreasonably disrupts the normal education processes and orderly operation of the University. There may be situations in which both this Policy and the Code of Student Responsibility and/or other DePaul policies are applicable.

Criteria

A student may be involuntarily withdrawn from DePaul if the University determines, in accordance with the procedures listed below, that the student:

(a) Demonstrates behavior that is unreasonably disruptive to the normal education processes and orderly operation of the University;

(b) Demonstrates behavior that endangers him/herself, or;

(c) Demonstrates behavior that endangers others or that creates a direct threat that the student may endanger others.

Determination

The involuntary withdrawal process begins when the Dean of Students receives a referral or other information regarding a student who appears to be demonstrating behavior consistent with one or more of the criteria listed above. If, after reviewing the information received, the Dean of Students determines that the student has demonstrated behavior consistent with one or more of the criteria for involuntary withdrawal from the University as stated above, the Dean of Students will inform the student of this determination. At the time of this communication, the Dean of Students will inform any student who is involuntarily withdrawn about the student's right to appeal the decision to the Associate Vice President for Student Advocacy & Community Affairs, and will
explain to the student the conditions for returning to the DePaul community (see below).

Prior to proceeding with the involuntarily withdrawal process, the Dean of Students will always encourage the student to voluntarily withdraw.

**Appeal**

A student may appeal the Dean of Students' determination regarding involuntary withdrawal (or the designated conditions for readmission following an involuntary withdrawal) to the Associate Vice President for Student Advocacy & Community Affairs. A student has five (5) business days to request this appeal. Within five (5) business days of being received by the University, the Associate Vice President for Student Advocacy & Community Affairs shall review all the available information (i.e.—all of the information made available to the Dean of Students and any additional information subsequently made available by the student), and shall, if deemed necessary by the Associate Vice President for Student Advocacy & Community Affairs, have the opportunity to ask the student additional questions.

After reviewing all the available information described above, the Associate Vice President for Student Advocacy & Community Affairs shall assess whether the student has or has not met the criteria for involuntary withdrawal from the University as stated above. The decision of the Associate Vice President for Student Advocacy & Community Affairs will promptly be communicated to the student in writing. This decision is final.

**Interim Suspension Pending Appeal**

A student who demonstrates behavior that creates an immediate direct threat to him/herself or others, or who demonstrates behavior that is immediately and significantly disruptive to the normal education processes and orderly operation of the University, may be suspended from the University on an interim basis pending an appeal.

All decisions regarding interim suspensions pending appeals will be made by the Dean of Students in consultation with the Associate Vice President for Student Advocacy & Community Affairs.

**Effect of Involuntary Withdrawal**

Students who have been involuntarily withdrawn from the University are generally not permitted to be on University premises or participate in University events. However, a student who has been involuntarily withdrawn or suspended on an interim basis pending an appeal may be on campus, with the permission of the Dean of Students or the Associate Vice President for Student Advocacy & Community Affairs, for the purposes of participating in the processes detailed in this Policy or as otherwise required and appropriate in the discretion of the Dean of Students or the Associate Vice President for Student Advocacy & Community Affairs.

Students are responsible for contacting appropriate University offices in order to ensure that their academic and financial affairs are in order (including any on-campus housing). All determinations as to the effect of an involuntary withdrawal in these areas will be made by the applicable offices in accordance with existing University policies.

**Returning to Campus—Conditions for Readmission**

A student who has satisfied the conditions for readmission outlined at the time of his or her involuntary withdrawal will be considered for readmission to the University.

Readmission conditions will be individually-tailored so as to be appropriate to each student but will always be premised on the notion that the student is no longer a direct threat to him/herself or others, and/or no longer demonstrates behavior that is disruptive to the normal educational processes and orderly operation of the University. Specific conditions for readmission might include:

(a) Appropriate documentation indicating that the student no longer demonstrates the behavior which led to the involuntary withdrawal;

(b) A treatment plan from a mental health professional or other appropriate care provider and/or verification from the provider that the student is complying with a treatment plan (or has been satisfactorily complying with a treatment plan for a designated length of time);

Students wishing to be readmitted must schedule a face-to-face meeting with the Dean of Students to discuss the student's compliance with, and appropriate documentation of, the designated conditions for readmission. All determinations as to whether the conditions for readmission have been satisfied will be made by the Dean of Students. These determinations are final.

Because conduct that gives rise to an involuntary withdrawal under this Policy might also result in sanctions in accordance with the Code of Student Responsibility, it is possible that a student who has met the designated conditions for readmission following an involuntary withdrawal might still not be eligible for re-enrollment at
DePaul due to judicial sanctions (similarly, it is possible that a student who has satisfied all judicial sanctions might still not be eligible for re-enrollment at DePaul because of an inability to meet the designated conditions for readmission in accordance with this Policy).

The Vice President for Student Affairs or his/her designee may make such reasonable exceptions to this Policy and these procedures as circumstances may require for the welfare of the institution and/or the involved student(s), provided that fundamental elements of fairness and due process are observed.

Speakers Guidelines

DePaul University encourages its recognized student organizations to sponsor guest speakers whose presentation will contribute to the role of the university as a forum for intellectual discussion, debate, investigation and/or artistic expression. Through this forum, speakers bring to the University an opportunity for students to hear and discuss opposing viewpoints on a wide range of issues. It should be understood that providing a forum in no way implies DePaul approval or endorsement of the views expressed by the sponsored speaker. A statement indicating that the presence of the speaker on campus does not imply that DePaul has approved or endorse the views expressed by the speaker must be included in all publications for and advertising about the event.

Student Organizations

The University supports and encourages student organizations in a variety of areas including scholarly, ethnic, honorary, University-sponsored, Greek and special interest. The University recognizes the value and contribution that student organizations make in a student's total college experience and education. DePaul's Recognition Policy and Procedures is a formal system used to maintain the quality and high standards of our current organizations. Recognition as a student organization accords certain rights and responsibilities. These rights and responsibilities are defined in the recognition policy along with the requirements for new student organization recognition, renewal of recognition status for current organizations and loss of recognition of current student organizations. It is each student organization's responsibility to become familiar with this policy as it applies to all organizations. This policy may be obtained from the Office of Student Life. University-sponsored organizations will have an advisor appointed by the University. All other organizations will select their own faculty or staff advisor with the approval of the Office of Student Life. Any off-campus action of any recognized student organization is the sole responsibility of the student organization and its officers. In compliance with the reporting requirements of the Clery Act and Campus Security Act, an officer of the organization must file a report of any off-campus crimes (as defined by the act) with the Dean of Students Office within 24 hours of said offense.

Student Organizations are expected to adhere to all applicable institutional regulations. The University reserves the right to determine the appropriate time, place, content, and manner for conducting activities, and posting and distribution of materials on any of its campuses. Consequently, the University may deny or restrict the activities of student organizations. Student organizations are expected to exercise good judgment in planning and promoting their activities. Failure to do so may result in judicial action being initiated against the organization; consequently, policies, procedures and sanctions set forth within the Student Code of Conduct apply to student organizations collectively as well as to individual students. The Office of Student Involvement will work in conjunction with the Dean of Students Office in any judicial action.
Student Rights Within the Judicial Review Process

A student participating in the Judicial Review Process is entitled to the following rights as a guarantee of fundamental fairness:

1. An opportunity for a hearing in order to answer charges of alleged misconduct.
2. A written statement of the alleged violations in sufficient enough detail to enable the referred student to prepare a defense.
3. The right to be accompanied by an Advisor. (See Explanation of Important Aspects of the Judicial Review Process—Advisors.)
4. For the referred student, a written statement of the possible sanctions that may be imposed.
5. The right to submit Witnesses on one's behalf and, to the extent necessary, to question Witnesses’ statements, whether verbally or in writing. (See Explanation of Important Aspects of the Judicial Review Process—Witnesses.)
6. The right to have the Judicial Review Process explained and to ask for clarification of any policies or procedures.
7. The right to have reasonable access to information specific to one's case.
8. The right to a separate hearing when a single incident gives rise to charges against more than one student.
9. The right to speak on one's own behalf.
10. The right to disqualify a member of any Judicial Board for justifiable reason.
11. The right to have proceedings and documentation kept confidential. All hearings, proceedings and case information are considered confidential except to those who have a legitimate educational interest in them, or as permitted or required under FERPA, the Clery Act, or any other legal mandate.
12. The right to request an appeal on specific grounds.

University Rights Within the Judicial Process

The University reserves the right to:

1. Refer any case involving a violation of criminal or civil law to the proper law enforcement agency.
2. Pursue judicial action against a student on behalf of the University based on reliable information from a member of the DePaul community indicating that a violation of the Code of Student Responsibility or other DePaul policy has taken place.
3. Exercise jurisdiction for an offense committed on-campus. Additionally, the University may exercise jurisdiction for an offense committed off-campus (including on-line communities) when:
   1. the victim of such offense is a member of the campus community (student, staff, faculty); or
   2. the offense occurred at a college-sponsored or sanctioned event; or
   3. the student used his or her status as a member of the University community to assist in the commission of the offense (for example, using a student ID card to pass a bad check); or
   4. the offense affects the University.
   (See Explanation of Important Aspects of the Judicial Review Process—Jurisdiction.)
4. Suspend or otherwise sanction a student on an interim basis in accordance with the procedures described below.
5. Share the outcomes of the judicial review process with those members of the University community who have a legitimate educational interest in them, or as permitted or required under FERPA, the Clery Act, or any other legal mandate.
Mediation

Every attempt should be made to resolve conflicts without formal judicial action. This informal resolution can hopefully be accomplished by students critically examining their behaviors and making the adjustments necessary to become a positive influence in the University community. To assist in the informal resolution of conflicts, a formal Mediation Services program exists through the Dean of Students Office designed to allow students to resolve conflicts with the assistance of a neutral third party. Mediation may be an alternative available for students seeking to resolve conflicts yet does not replace the Judicial Review Process. The University reserves the right to refer a case to Mediation Services. Mediation is not available for situations involving a possible violation of the Sexual Offense policy.

Other University Processes Including Residential Education

In general, the Dean of Students Office is responsible for managing the Judicial Review Process. However, other University departments may initiate investigations, manage hearing processes, or impose sanctions in accordance with other University policies and procedures, and in consultation with the Dean of Students Office and Student Affairs when appropriate. Examples of other areas that may initiate investigations, manage hearing processes, or impose sanctions in accordance with other University policies and procedures include Internal Audit, the Office of Institutional Diversity, and the AVP for Student Advocacy and Community Relations for violations of University discrimination and harassment policies in which a student is the respondent.

Students should be particularly aware that Residential Education maintains a separate judicial system for violations of Residential Education policies and, as appropriate, violations of other policies that occur in DePaul housing. Students should consult Residence Education for information regarding those policies and procedures, including information on how to file a complaint with Residential Education.

Judicial Records

Records of judicial cases that result in sanctions under this Judicial Hearing Process shall be kept in a referred student’s judicial file located in the Dean of Students Office. Student judicial records are destroyed five years after graduation or a student’s last date of attendance. Students who are suspended or dismissed from the University will have a notation placed permanently on their transcripts. The University will not release judicial records except to those who have a legitimate educational interest in them, or as permitted or required under FERPA, the Clery Act, or any other legal mandate.

General Information about the Judicial Review Process

Initiating a Complaint: A judicial action may be initiated by any member of the DePaul community (student, faculty, or staff) who feels that he/she has been adversely affected by a student's actions in violation of the Code of Student Responsibility or other policy, or who has reasonable cause to believe that a student has violated the Code of Student Responsibility or other policy.
Relationship Between the Judicial Review Process & Legal Proceedings: A student may be subject to the Judicial Review Process in addition to any civil or criminal proceedings. The University, in its sole discretion, will make the decision whether or not to delay the Judicial Review Process until the conclusion of any civil or criminal action associated with a complaint. If a referred student chooses not to participate in the Judicial Review Process because of a pending legal action, the hearing officer may render a decision based solely on the written documentation and/or the complainant's testimony available at the time without the benefit of information from the referred student.

The Judicial Review Process is designed to be educational, not legal, in nature. Rules of evidence and discovery do not apply to the Judicial Review Process. Students should not draw parallel interpretations between the Code of Student Responsibility or other DePaul policies and criminal or civil law. The outcome of a legal proceeding is not determinative on the Judicial Review Process.

Delivery of Written Notices: All written notices regarding judicial actions will be delivered personally or via the postal service or email. It is a student's responsibility to ensure that his/her information (including address, phone number and email) is current in Campus Connect.

Initial Review: Upon a written complaint that an alleged violation has occurred, the Dean of Students Office or other designated office shall conduct an initial review.

At the time of the initial review, the student will be given the following:

- A written statement of the alleged violations in sufficient enough detail to enable the student to prepare a defense.
- Reasonable access to information specific to one's case.
- An explanation of, and opportunity to ask questions about the Judicial Review Process, including (a) an explanation of the two hearing possibilities (Administrative Hearing and Judicial Board Hearing) and the University's determination as to which type of hearing will be conducted; (b) an explanation of "Important Aspects of the Judicial Review Process;" (c) an explanation of possible sanctions; and (d) an explanation of appeal procedures.
- Instructions on how to schedule the appropriate hearing.
- Information regarding any interim sanctions, if applicable.

The initial review will include a determination as to whether the University has jurisdiction over the violation. (See Explanation of Important Aspects of the Judicial Review Process—Jurisdiction.) This initial review could consist of requesting additional information from the complainant or referred student, or otherwise collecting additional information. This initial review is intended only to provide information pertinent to the incident under review and is not designed to result in a binding decision. The designated reviewer will take reasonable measures to ensure that the initial review is completed within 5 business days of the date of written complaint that a violation has occurred. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper initial review of all relevant material.

If the referred student acknowledges that a violation, or the conduct giving rise to a violation, has occurred at any time during the initial review, the process may immediately move to the sanction process. These sanctions may be appealed in accordance with the procedures detailed in the Judicial Appeals Procedures.

Initiating a Hearing: If, after the initial review, the designated reviewer determines that there is not reasonable cause to believe that the allegation has occurred, the review shall promptly cease and no record of the complaint shall be retained in the student's judicial file.

If, after the initial review, the designated reviewer determines that there is reasonable cause to believe that a violation of policy has occurred, the Judicial Review Process will move forward.

Interim Sanctions: In order to protect the health, safety, security and well-being of the University community and its members, the University reserves the right to immediately impose interim sanctions upon a student when it determines, in its sole discretion, that the continued presence of the referred student does any of the following:

1. constitutes a threat to the safety or well-being of the referred student, any other member of the University community, or any invited guest;
2. risks destruction of property; or
3. risks disruption of classroom or other campus activities.

A final determination of the charges against any student suspended or otherwise sanctioned on an interim basis shall be made through appropriate hearing procedures within 10 business days of such suspension. During this time the referred student shall forfeit those rights and privileges as the University deems appropriate. Should it be found that the student did not commit the act(s), the interim sanction shall be revoked.

Prior Record of Sanctions: Because a student's prior record of conduct will be used as a basis for more...
stringent judicial action, previous sanctioned violations in the student’s judicial file may be considered before assigning any judicial sanction(s). Any previously imposed sanctions may provide additional justification that more strict action is necessary to ensure that the student understands the full impact his/her pattern of behavior is having on the DePaul community.

**Failure to Participate:** Failure of a student to agree to, appear at, or participate in a hearing, or to otherwise disrupt the normal hearing process, may in itself constitute a violation. The University reserves the right to pursue this additional violation in the same or a separate hearing. If a referred student chooses not to have the hearing process explained, chooses not to participate in the hearing process, or otherwise fails to appear at a hearing, the hearing officer may render a decision and if appropriate, impose sanctions based solely on the information available at the time without the benefit of information from the referred student. These sanctions may be appealed in accordance with the procedures detailed in Judicial Appeals Procedures.

**Standard for Hearing Determinations:** The standard of "whether it is more likely than not that the alleged violation(s) has/have occurred" will be the basis for conducting any hearing and imposing any sanctions.

**Administrative Hearing Process**

If the University determines that an Administrative Hearing is appropriate, the first session of the Administrative Hearings will generally take place within five class of when a referred student is first notified of the judicial charge. A mutually convenient time for the Administrative Hearing will be decided upon. If necessary, an Administrative Hearing may take place over the telephone.

The actual Administrative Hearing will proceed as follows:

1. The incident report(s) will be reviewed by the Administrative Hearing officer.
2. The Administrative Hearing officer and student will discuss the alleged violation(s) that occurred.
3. The student will have an opportunity to give a statement about the incident, including an admission or denial of the alleged violations.
4. The student will submit Witness names to give statements and be questioned by the Administrative Hearing officer. (See Explanation of Important Aspects of the Judicial Review Process—Witnesses.)
5. The Administrative Hearing officer will review any relevant information and discuss the incident with the student.
6. After the Administrative Hearing officer has examined all of the evidence and heard from all of the approved Witnesses, the Administrative Hearing officer will determine that the student is or is not in violation of the Code expectation or other policy outlined.
7. If the Administrative Hearing officer finds the student in violation, he/she will determine the appropriate sanctions. Any sanctions imposed become effective immediately unless otherwise stipulated. Sanctions imposed by an Administrative Hearing officer may be appealed in accordance with the procedures detailed in the Judicial Appeals Procedures. Students will be informed of these Judicial Appeals Procedures, including to whom a request for an appeal should be directed, at the conclusion of the Administrative Hearing. The University will take reasonable steps to notify the complainant and referred student of the outcome and sanctions in writing within five business days of the last session of an Administrative Hearing, and will place all appropriate information in the referred student’s judicial file.

The Administrative Hearing officer will hold as many meetings as necessary to ensure a fair disposition of the case. If a referred student fails to attend an Administrative Hearing or otherwise participate in the process, the Administrative Hearing officer may decide the case based on the information available at the time. Any imposed sanctions will be effective immediately unless otherwise stipulated.
Judicial Board Hearing Process

If the University determines that a Judicial Board Hearing is appropriate, the Moderator (See Explanation of Important Aspects of the Judicial Review Process—Moderators.) will take reasonable steps to ensure that the referred student is notified of the following within 5 days:

1. The nature of the alleged violation(s) made against the student.
2. The names of all individuals in the Judicial Board pool, including a statement forbidding contact on this matter between the student and these individuals.
3. A copy of the Judicial Board Hearing procedures.
4. The time, date and location of the Judicial Board Hearing.

The referred student has the right to show cause to the Moderator as to why any member of the Judicial Board pool should be removed because of possible prejudice. If a student wishes to have a member of the Judicial Board pool removed, the student must notify the Moderator in writing at least 48 hours prior to the first scheduled Judicial Board Hearing. Any member of the Judicial Board pool has an obligation to disqualify himself/herself if he/she has any personal interest in the case.

The Moderator will set a date by which all materials for the judicial hearing will be sent to the Judicial Board. Materials turned into the Moderator after that date will be sent to the Judicial Board if feasible.

Reasonable efforts will be made to have the first session of the Judicial Board Hearing within 7 business days after the referred student has been notified of the above.

At the discretion of the Judicial Board, more than one hearing session may be necessary before a final determination is made.

The actual Judicial Board Hearing will proceed as follows:

1. The Chairperson convenes and presides over the Judicial Board Hearing only if the appropriate quorum is present. (See Explanation of Important Aspects of the Judicial Review Process—Judicial Boards.) The Chairperson is also charged with maintaining orderly discussion throughout the Judicial Board Hearing, generally limiting testimony per session to a maximum of three hours and ensuring that there is equal time for both the complainant and the referred student to present their evidence.
2. The Chairperson acknowledges the Advisors. (See Explanation of Important Aspects of the Judicial Review Process—Advisors.)
3. The Chairperson confirms that the referred student understands his/her rights.
4. The Chairperson reads into the record the University's opening statement and all statements of alleged violation(s).
5. The Chairperson or Moderator will ensure that the referred student(s) and complainant(s) have copies of all incident reports.
6. The complainant makes a statement or, in cases where the University is bringing the action, a University representative will present the University's case.
7. The referred student makes an opening statement, including an admission or denial of the charges.
8. Witnesses and/or evidence are presented. Witnesses will be presented one at a time. A Witness can only be present at the Judicial Board Hearing during his/her own testimony. (See Explanation of Important Aspects of the Judicial Review Process—Witnesses.)
9. Members of the Judicial Board, the Moderator, the referred student and the complainant may cross-examine any Witness who is present. All questions must be directed to the Chairperson. The Chairperson may rule any question out of order.
10. Written testimony from Witnesses unable to be at the Judicial Board Hearing may be accepted but its validity will be ruled on by the Chairperson. (See Explanation of Important Aspects of the Judicial Review Process—Witnesses.)
11. The Judicial Board may recall any Witness it wishes to question further.
12. Members of the Judicial Board may ask questions to the complainant and the referred student. At this time the complainant and the referred student may also question each other. All questions must be directed to the Chairperson. The Chairperson may rule any question out of order.
13. After all Witnesses, evidence, and testimony have been presented, the Chairperson will ask each side if there is any additional information pertaining to the case that has not been heard or submitted in writing.
14. Closing statements of no longer than five minutes may be made by the referred student and complainant.
15. At this point, all are dismissed except for the Chairperson, Judicial Board members and the Moderator. The Judicial Board determines if the student is or is not in violation of the Code expectation or other policy outlined.
16. If the referred student is to be found in violation, the Judicial Board shall determine the appropriate sanction(s). A simple majority vote by the board members will determine all outcomes. All decisions will be reviewed with the Moderator, who will share with the Judicial Board a referred student's prior record of sanctions as appropriate.
17. When deliberations have been completed, the Chairperson invites the referred student back into the room and announces the Judicial Board's decision. Any sanctions imposed become effective immediately unless otherwise stipulated. Sanctions imposed by the Judicial Board may be appealed in accordance with the procedures detailed in the Judicial Appeals Procedures. Students will be informed of these Judicial Appeals Procedures, including to whom a request for an appeal should be directed, at the conclusion of the Judicial Board Hearing. The University will take reasonable steps to notify the complainant and referred student of the outcome and sanctions in writing within five business days of the last Judicial Board Hearing, and will place all appropriate information in the referred student's judicial file.

If a referred student fails to attend the scheduled Judicial Board Hearing or otherwise participate in the process, the Judicial Board may decide the case based on the information available to it at the time. Any imposed sanctions will be effective immediately unless otherwise stipulated.

Judicial Sanctions

The Judicial Review Process is an educational one by which the University strives to instill in its students an understanding that they are responsible for their actions. When a student fails to uphold the responsibilities outlined in the Code of Student Responsibility or other policies, the University has an obligation to help him/her come to a deeper understanding of how his/her behavior impacts the campus environment.

There are several reasons for imposing judicial sanctions:

1. To redirect a student's or organization's behavior toward a standard more acceptable for members of the University community;
2. To protect the University community from possible harm or injury;
3. To require restitution for University property that is lost, stolen or damaged; and
4. To give support for financial redress to a victim for loss, harm or destruction of his/her personal property.

If, after an Administrative Hearing or Judicial Board Hearing has taken place, there is sufficient evidence that a violation has occurred, the hearing officer(s) may impose the appropriate sanction(s).

All imposed sanctions shall become effective immediately at the completion of the hearing unless otherwise stipulated.

Sanctions may be appealed in accordance with the procedures detailed in Judicial Appeals Procedures.

The following is a list of sanctions that the University may impose on a student, group of students or student organization:

1. Judicial Reprimand: A judicial reprimand does not necessarily restrict the student in any way but does signify that any further violation may result in additional judicial sanctions. A written record of the reprimand will be placed in the student's judicial file.
2. University Censure: University Censure indicates to the student that further violations will result in more serious consequences. University censure usually is given for a specified period of time not to exceed one year. This level of sanction may include restriction of activities and/or ineligibility to receive financial assistance from a University source.
3. No Contact Restriction – A no contact restriction denotes that the student is prohibited from having any contact with a particular person or persons. This contact includes but is not limited to: in person, email, text message, instant message, the internet, phone, or through other people. This contact may include any university gatherings on or off campus.
4. Judicial Probation: Judicial probation is a written statement to the student indicating that the student's behavior is of such a nature as to jeopardize continued enrollment at the University. Judicial probation can be for a specified period of time or for as long as the student is enrolled. Any behavioral infraction during the probationary period may cause the student to be removed from the University.
5. Suspension: A suspended student must carry out a total and immediate separation from the University for a required period of time and/or until particular conditions for readmission are met. Suspension may include various prohibitions regarding a student's ability to be on University property or participate in University activities. A sanction of suspension shall be permanently noted on a student's transcript, regardless of whether or not the student is successfully readmitted. At the end of the suspension period and/or once the student can demonstrate that the conditions for readmission have been met, the student may be required to meet with the Dean of Students or other designee before being readmitted to the University.
6. Dismissal: Dismissal constitutes a permanent and immediate separation from the University. The imposition of this sanction shall be permanently noted on the student's transcript and is a permanent bar to his or her readmission to DePaul University. Dismissal may include various prohibitions regarding a student's ability to be on University property or participate in University activities.

Any of the above sanctions may be combined with one or more of the following actions in order to more fully address all issues involved in a judicial case:

1. Restitution or Assessment: A student who damages University property may be required to pay actual repair or replacement costs. Failure to pay may result in withholding of the student’s records and/or additional judicial sanctions.
2. Educational Projects: An educational project designed to assist the student in better understanding the overall impact of his/her behavioral infraction(s) may be imposed. Such assigned projects might include research papers, the creation of educational materials, or the planning and/or presentation of educational programs related to the policy infraction. Assigned projects may not include physical labor unless they are directly related to the violations(s) and do not cause humiliation or degradation to the student.
3. Restriction: Restrictions upon a student’s University privileges may be imposed for a set period of time. These restrictions may include, but are not limited to, denial of the right to represent the University in any way, access to facilities or individuals, parking privileges, and/or participation in co-curricular activities.

The sanctions of Residence Hall Probation and Removal from the Residence Halls may also be imposed through the Judicial Review Process on students who live in DePaul housing. Additionally, because Residential Education maintains a separate judicial system for violations of Residential Education policies and, as appropriate, violations of other policies that occur in DePaul housing, students should consult Residence Education for information as to when a student can be placed on probation in, or be removed, from DePaul housing.

Students who are removed from DePaul housing will be subject to all of the policies and procedures set forth by Residential Education and Housing Services. Students should consult these departments for more information.

Judicial Appeal Procedures

Both complainants who are students and referred students have the right to request an appeal on specified grounds. The reason for an appeal is to guarantee that the situation has been resolved through a fundamentally fair hearing in accord with established policies and procedures.

A referred student may only request to appeal the determination or sanction on the following three grounds:

1. A substantial procedural error occurred that unreasonably impaired the ability to achieve a fair process or final decision and made the process or the final decision fundamentally unfair;
2. New evidence of substantive nature, impossible for the hearing officer to have heard at the time of the hearing, has been discovered and it would be fundamentally unfair for the officer to not consider the evidence; or
3. The initial sanction(s) are fundamentally unfair or inappropriate.

A complainant who is a student may only request to appeal the determination or sanction on the following two grounds:

1. A substantial procedural error occurred that unreasonably impaired the ability to achieve a fair process or final decision and made the process or the final decision fundamentally unfair; or
2. New evidence of substantive nature, impossible for the hearing officer to have heard at the time of the hearing, has been discovered and it would be fundamentally unfair for the officer to not consider the evidence.

In order to request an appeal, the student must submit a written request for appeal to the designated office within five business days of being notified of the initial decision. Students will be notified at the conclusion of a hearing who is the designated University representative to submit their request for an appeal. Typically, requests for appeals from Judicial Board Hearings should be submitted to the Dean of Students, while requests for appeals from Administrative Hearings should be submitted to the supervisor of the Administrative Hearing Officer (for example, if the Dean of Students served as the Administrative Hearing officer then the request for an appeal would be directed to the Associate Vice President for Student Advocacy and Community Relations; if the Associate Vice President for Student Advocacy and Community Relations served as the Administrative Hearing officer then the request for an appeal would be directed to the Vice President for Student Affairs). The individual designated to review the appeal request may decide that the sanctions imposed should be suspended pending
the outcome of the appeal. Students should understand, however, that, unless otherwise stipulated, sanctions are considered in effect once a hearing is completed, regardless of whether an appeal is requested.

The individual designated to review the student's request for an appeal will review the request for an appeal and make a determination that:

1. The request for an appeal is denied because none of the grounds for an appeal above have been met; or
2. The request for an appeal is granted because one or more of the grounds for an appeal have been met.

The student will be notified of this decision within five business days of when the University receives the request for an appeal.

If a request for an appeal is granted, then the individual designated to review the student's request for an appeal will determine whether the matter can be resolved without a new hearing (for example, modification of sanctions so that they are not fundamentally unfair or inappropriate) or whether new hearing is necessary. If a new hearing is necessary, the University will determine whether this hearing will be an Administrative Hearing or a Judicial Board Hearing. All hearings that take place after an appeal has been granted will proceed in accordance with established procedures for Administrative Hearings and Judicial Board Hearings.

All decisions regarding whether an appeal request will be granted are final. If the request for an appeal is denied, then all sanctions imposed will remain in effect.

Explanation of Important Aspects of the Judicial Review Process

Advisors

It is a student’s right to bring one Advisor to an Administrative Hearing, a Judicial Board Hearing, or any other meeting included within this Judicial Review Process. This right applies to referred student(s), complaint(s) and witnesses. An Advisor must be a current member of the DePaul community (faculty, staff, or student). However, an Advisor cannot be a student who is involved in the same judicial matter being reviewed. All Advisors must be approved in advance of a scheduled meeting or hearing by the Moderator, Administrative Hearing Officer, or other University designee.

The role of the Advisor is to act as a support person for the student by conferring quietly with the student. The Advisor is not to directly address the members of the Judicial Board, an Administrative Hearing officer, or anyone else present at a meeting or hearing.

Hearings

There are two types of judicial hearings:

1. Administrative Hearing: An Administrative Hearing is a hearing in which the hearing officer is a University designee, such as the Dean of Students or another Student Affairs professional. The procedures for an Administrative Hearing are set forth above in the "Administrative Hearing Process" section. There is no Moderator for an Administrative Hearing.
2. Judicial Board Hearing: A Judicial Board Hearing is a hearing in which the hearing officers are selected from the Judicial Board pool of members. The procedures for a Judicial Board Hearing are set forth above in the "Judicial Hearing Process" section. The Judicial Board Hearing process is managed by a Moderator.

The University will make the determination as to which type of hearing is appropriate in a particular situation.

Judicial Boards

The members of the Judicial Board pool are:

1. Six current students with at least sophomore status nominated by the Student Government Association.
2. Six faculty members nominated by the Faculty Council.
3. Six staff members nominated by the Staff Council.
Three members (one from each constituency) will comprise the panel for a Judicial Board Hearing. This panel shall be chosen by the Moderator prior to the Judicial Board Hearing. The Chairperson shall be decided upon at the time of the Judicial Board Hearing.

Student Affairs is responsible for training the pool of Judicial Board members.

Students should consult Residential Education for information about judicial boards in the Residential Education judicial process.

**Jurisdiction**

The University may exercise jurisdiction (i.e.—initiate this Judicial Review Process) for all offenses committed on campus. Additionally, the University may exercise jurisdiction for an offense committed off-campus (including on-line communities) when:

1. The victim of such an offense is a member of the campus community (student, faculty, or staff); or
2. The offense occurred at a college-sponsored or sanctioned event; or
3. The referred student used his or her status as a member of the University community to assist in the commission of the offense (for example, using a student ID card to pass a bad check); or
4. The offense affects the University.

**Moderators**

All Judicial Board Hearings will be assigned a Moderator. The Moderator may be the Dean of Students or another University designee (for example, other staff in the Dean of Students Office, or other Student Affairs professionals). The Moderator is responsible for managing the Judicial Board Hearing process, including assisting with scheduling and selecting members from the Judicial Board pool to participate in a hearing. The Moderator will be present at the Judicial Board Hearing. The Moderator has no voting role in the outcome of any Judicial Board Hearing, but all determinations by a Judicial Board as to whether a violation has occurred or regarding sanctions must be reviewed with the Moderator.

There is no Moderator for an Administrative Hearing.

**Witnesses**

Students involved on either side of a judicial case, as complainants or referred students, may submit Witnesses for an Administrative Hearing or a Judicial Board Hearing to support their statements. All Witnesses must be approved in advance by the University, and the University reserves the right to disallow any Witness. All Witnesses must generally be current members of the DePaul community (faculty, staff or students), except as otherwise approved by the University. Witness intended to present information that does not directly bear upon the circumstances of the case or duplicates all or part of testimony already presented may not be allowed. Appearance of Witnesses at the appropriate time, date and location of any hearing is the responsibility of the involved students. In some cases, the University will approve the use of written statements from Witnesses who are not available to appear at a hearing.

Witnesses will be presented one at a time. A Witness can only be present at a hearing during his/her own testimony.

The University recognizes it cannot compel any student to present him/herself as a Witness against his/her will. However, all students are encouraged to comply with the Judicial Review Process. Witnesses will be informed that giving false information may result in judicial action.
