Health Law (LLM)

Established in 1986, DePaul’s LL.M. in Health Law is considered one of the most competitive programs in the nation. Guided by outstanding full-time faculty and leading attorneys, the health law curriculum evolves as health care law and technology change, addressing the demand for lawyers with specialized credentials in this field. You may also earn course credit while gaining valuable practice experience through externships. Additionally, you may participate in programs conducted by the Health Law Institute.

Degree Requirements

The Master of Laws program begins with an orientation that introduces graduate students to DePaul’s faculty, staff, library, computer and research facilities. Students who received legal training outside the United States also will participate in a special course introducing them to the Socratic teaching method, the differences between civil and common law systems, and the foundations of the U.S. legal system.

To earn the LLM in Health Law, a student must complete 24 semester hours of credit with a minimum cumulative grade point average (GPA) of 2.50. A summer term is counted as a semester for this purpose. If a student does not meet the degree GPA requirement of 2.50, the student shall earn a Certificate in Health Law if the student completes 18 credit hours with a cumulative GPA of 2.00. Students who complete 24 credit hours with a GPA below the 2.50 GPA required to earn the degree will not be permitted to continue taking classes to improve their GPA. A student is automatically dismissed if he or she has a cumulative GPA below 2.0 for any three consecutive semesters.

The LLM program may be completed on either a full- or part-time basis but it must be completed within five years. With the exception of students admitted to and enrolled in the joint JD/LLM program, credits earned as part of the JD program do not count toward the LLM degree. In addition, with the exception of course work completed in the DePaul Health Law Certificate Program for Health Professionals, no credit is given for law courses taken before a student is admitted to and enrolled in the LLM program.

Courses must be selected from the LLM in Health Law courses listed below. LLM students also may enroll in up to three designated courses in the Public Service Management Graduate Program.

Course Requirements

Required Courses

Choose one from the list below:

- LAW 250 SENIOR RESEARCH SEMINAR (Topic must be health care law related)
- LAW 428 INDEPENDENT STUDY
- LAW 715 MASTERS ESSAY
Electives

- LAW 206 SEXUAL ORIENTATION AND THE LAW
- LAW 301 SPECIAL TOPICS IN LAW
- LAW 323 CHILD PROTECTION: ABUSE & NEGLECT
- LAW 402 ANTITRUST
- LAW 417 LABOR LAW
- LAW 429 LEGAL CLINIC I : SPECIAL EDUCATION
- LAW 455 LEGAL DRAFTING: HEALTH LAW
- LAW 462 INSURANCE LAW
- LAW 524 FIELD PLACEMENT
- LAW 604 TAX EXEMPT ORGANIZATIONS
- LAW 702 ELDER LAW
- LAW 704 TRANSACTIONAL HEALTH LAW PRACTICE
- LAW 706 HEALTH POLICY AND THE LAW
- LAW 714 BIOETHICS & THE LAW
- LAW 716 DISABILITY LAW
- LAW 718 HEALTH CARE DELIVERY SYSTEMS
- LAW 719 HEALTH CARE: FRAUD AND ABUSE
- LAW 724 MEDICAL MALPRACTICE SURVEY
- LAW 727 HEALTH CARE LAW REGULATIONS
- LAW 728 FOOD AND DRUG LAW
- LAW 730 MENTAL HEALTH ISSUES IN CRIMINAL LAW
- LAW 732 DISPUTE RESOLUTION IN THE HEALTH CARE INDUSTRY
- LAW 734 HEALTH CARE CONTRACTS
- LAW 735 HEALTH INFORMATION TECHNOLOGY LAW & POLICY
- LAW 742 MEDICARE AND MEDICAID LAW
- LAW 901 LEGAL ASPECTS OF THE BIOTECHNOLOGY BUSINESS (Online)

Liberal Arts and Sciences Electives

These courses are on the quarter system. Each course equates to 1.5 law school credits.

- MPS 524 MARKETING FOR SERVICE ORGANIZATIONS
- MPS 572 URBAN POVERTY SEMINAR

Intellectual Property (LLM)

DePaul’s LL.M. in Intellectual Property Law is regarded as one of the most extensive programs in the country, and the Center for Intellectual Property Law & Information Technology (CIPLIT®), which oversees the program, is an innovative leader in the field. With numerous course offerings, the program addresses the need for specialized training in intellectual property and information technology law.

An LL.M. in Intellectual Property Law candidate must complete 24 semester hours of credit with a minimum cumulative grade point average (GPA) of 2.5 in order to earn the degree. A student is automatically dismissed if he or she has a cumulative GPA below 2.0 for any three consecutive semesters. A Summer term is counted as a semester for this purpose. If a student does not meet the degree GPA requirement of 2.5, the student will earn a certificate in Intellectual Property if the student completes 18 credit hours with a cumulative GPA of 2.0.

Courses must be selected from the LLM in Intellectual Property courses. Candidates must complete three required courses and five electives. The LLM program may be completed on either a full- or part-time basis but must be completed within four years.

With the exception of students admitted to and enrolled in the Joint JD/LLM program, The American Bar Association mandates no credit be given for intellectual property courses taken before a student is accepted into the LLM program.

- LAW 585 SUMMER LEGAL STUDIES IN COSTA RICA Section IP and Human Rights (1 credit)
- LAW 901 LEGAL ASPECTS OF THE BIOTECHNOLOGY BUSINESS (Online course)
**International Law (LLM)**

The DePaul Master of Laws (LLM) in International Law provides an intensive one-year course of full-time study* that emphasizes the theoretical background and practical skills lawyers need to excel in international law practice.

There are concentrations in five key areas of global practice:

- International Aviation Law & Policy
- International Business, Commercial & Trade Law
- International Cultural Heritage Law
- International Governance & Rule of Law
- International Human Rights Law & Policy and Criminal Justice

The DePaul international law program is designed for both experienced attorneys and recent law school graduates from the United States and abroad who wish to:

- Earn an advanced law degree to assist in the pursuit of a career with law firms, governmental and nongovernmental agencies, and academic institutions worldwide
- Obtain practical and theoretical knowledge of international law and its interaction with the laws of the United States and other countries
- Learn the research, analytical and communication skills required to succeed in international law practice
- Represent clients engaged in international transactions and relationships
- Establish a network of professional international contacts and clients
- Work with faculty experts in international and U.S. law
- Interact with students from diverse legal cultures

Additionally, foreign lawyers and graduates will:

- Improve English language skills and gain an understanding of the U.S. legal system
- Earn an advanced law degree from an ABA-accredited U.S. law school, which may allow them to take the bar examination in several U.S. jurisdictions.**

* Graduates of ABA-approved U.S. law schools may complete the program on a part-time basis. Program may be completed in one to four years.

** Lawyers with a foreign law degree who wish to take a U.S. bar examination after graduating from the DePaul program should familiarize themselves with the eligibility and general requirements of the particular bar exam they wish to take.

With the exception of students admitted to and enrolled in the joint JD/LLM program, credits earned as part of the JD program do not count toward the LLM degree. At the discretion of the program director, students may received credit for courses previously taken during the foreign equivalent of a JD program.

- LAW 271 TRADEMARK & UNFAIR COMPETITION LAW
- LAW 297 CUSTOMS LAW
- LAW 271 TRADEMARK & UNFAIR COMPETITION LAW
- LAW 324 INTERNATIONAL SALES
- LAW 338 INTELLECTUAL PROPERTY FOR CORPORATE TRANSACTIONAL LAWYERS
- LAW 344 COPYRIGHT LAW
- LAW 407 CONFLICT OF LAWS
- LAW 454 INTERNATIONAL INTELLECTUAL PROPERTY
- LAW 455 LEGAL DRAFTING: Art Market Transactions
LAW - Joint Degree (J D/ LLM)

DePaul's J D/LLM (Juris Doctor/Master of Laws) program gives students the opportunity to develop specialized knowledge in specific areas of law. Students can simultaneously earn a JD and an LLM, an internationally recognized postgraduate law degree, in one of four areas of concentration: Health Law, Intellectual Property Law, International Law or Taxation. The JD/LLM program is designed to provide advanced training through a personalized educational experience. Students are permitted to apply nine credit hours of qualifying courses toward both degrees, allowing them to complete both degrees in three years with summer enrollment. Students can apply to the JD/LLM program prior to starting the JD program or at any time during their JD program.

Degree Requirements

Admission Requirements

Students may apply for admission to the Joint JD/LLM Program at the time of application to the JD Program (Direct Admission) or at any time prior to the last semester of the completion of the JD Program. Students applying for Direct Admission to the Joint JD/LLM Program must check the appropriate box on the JD application and submit the required essay.

Applicants admitted directly to the JD/LLM Program must achieve a minimum GPA of 2.80 at the end of their first academic year to continue their enrollment as a JD/LLM student. Students who do not meet the minimum GPA will continue their enrollment as a JD student provided they meet the requirements of that program. These students may reapply for admission to the JD/LLM Program after raising their cumulative GPA to 2.80 or higher.

College of Law students enrolled in the JD Program may apply for admission for the JD/LLM Program at any time prior to completion of the JD Program. Applicants must have a minimum cumulative GPA of 2.80 and submit the joint JD/LLM application form and required essay indicating their reason(s) for applying to the program. The application and essay should be submitted to the Office of Student Affairs. Upon admission, the student will receive a letter of admission to the JD/LLM Program and the student's program/plan will be changed to JD/LLM.

JD students admitted to the Joint JD/LLM Program in their final year may not be able to complete all program requirements within three years. Students electing to delay their anticipated JD program degree conferral for an additional semester to complete the requirements of the LLM will not receive certification to sit for the bar examination until the end of the semester in which they receive the Joint JD/LLM degree.

Credit and Program Requirements

JD/LLM students must complete all program requirements of the JD Program and the specific LLM Program to which they have been admitted. Traditional JD students must complete 86 semester hours. Traditional LLM
students must complete 24 semester hours after earning a JD degree. Students admitted to the joint program will be permitted to simultaneously apply 9 semester hours of qualifying courses toward both degrees. Therefore, in addition to the 86 hours required to earn the JD, joint JD/LLM students must earn 15 semester hours to complete the LLM. With Summer enrollment, the JD/LLM may be completed in three years. JD students electing to enter the combined program in their final year who are not able to satisfy the credit requirements or complete the required courses for their LLM will enroll in an additional semester at the College of Law in order to complete the LLM requirements.

Students completing the course requirements for the JD/LLM must have a minimum grade point average (GPA) of 2.5 in order to earn the JD/LLM. Students who complete all required coursework with a GPA below 2.5, but at or above the minimum 2.00 GPA required to earn the JD, will be awarded the JD and a certificate in the area of their LLM coursework.

To receive the joint degree, students must complete the requirements of both degrees in the same semester and in the same academic year. Credits that can be applied to both degrees will be applied only after the student concurrently completes both programs. A student who graduates from the JD Program without having been admitted to the Joint JD/LLM Program prior to graduation must apply for traditional admission to the LLM Program and complete the 24 semester hours required for graduation.

Law (JD)

As a lawyer, you will face a unique set of challenges every day, from negotiating complex agreements to successfully arguing motions in court. That's why DePaul University College of Law offers you theoretical instruction as well as creative approaches to professional skills training. Whether in the classroom or in the field, DePaul's comprehensive curriculum prepares you to succeed.

As a DePaul student, you can earn academic credit by working with real clients on real cases in every type of legal environment. Through our Clinical, Field Placement and Trial Advocacy programs, you will gain valuable first-hand experience and insight working side-by-side with distinguished faculty members and practicing attorneys.

In addition to the core Juris Doctor curriculum, you also can choose from a variety of joint degrees, graduate programs and certificate options in a number of specializations.

Degree Requirements

Law School Full-Time and Part-Time Options

The College of Law has both a full-time and a part-time option. At the end of their first year, students may change from part-time to full-time or vice versa by filing a program change request form with the Office of Student Affairs. The form is available on the College of Law website under Registration. Students may only change their status once while they are enrolled in law school.

Students are advised that a program change may affect their financial aid. For financial aid information, they should see a financial aid counselor in the Office of Financial Aid on the 9th floor of the DePaul Center.
Note that, after full-time students complete their first-year required courses and after part-time students complete their first four semesters of required courses, students may take any course, regardless of the student's part-time or full-time status.

**Credit Hour Requirements**

Juris Doctor (JD) students must complete 86 credit hours in order to graduate from the College of Law. Full-time students are expected to complete the requirements for the JD degree in three years. Part-time students are expected to complete the JD degree in four years. The maximum time to complete the JD program, if a student takes a leave of absence, is five years.

**Maximum and Minimum Credit Hours**

Upper level full-time students may register for a maximum of 16 credit hours per semester. After their third semester, part-time students may register for a maximum of 12 credit hours per semester.

Full-time students must take a minimum of 12 credit hours per semester except that full-time graduating seniors in their final semester need only take the number of credit hours necessary for them to graduate. Part-time students must register for a minimum of nine credit hours per semester except that graduating seniors need only take the number of credit hours necessary for them to graduate.

**No Credit for Course Work Taken Prior to Matriculation in the JD and LLM Programs**

The American Bar Association Standards provide that credit for a JD degree shall only be given for course work taken after the student has matriculated in a law school. A law school may not grant credit toward the JD degree for work taken in a pre-admission program.

**Course Requirements**

**Core Required Courses**

- LAW 105 CONTRACTS
- LAW 112 LEGAL ANALYSIS RESEARCH AND COMMUNICATION I
- LAW 115 LEGAL ANALYSIS RESEARCH AND COMMUNICATION III
- LAW 119 LEGAL ANALYSIS RESEARCH AND COMMUNICATIONS II
- LAW 120 CIVIL PROCEDURE
- LAW 140 CONSTITUTIONAL LAW
- LAW 160 PROPERTY
- LAW 170 TORT LAW
- LAW 481 LEGAL PROFESSION
- LAW 506 CRIMINAL LAW
- LAW 130 PREPARING FOR PRACTICE I (for 1L students entering in Fall 2014 or later)
- LAW 131 PREPARING FOR PRACTICE II (for 1L students entering in Fall 2014 or later)

**Professional Skills Requirement**

Choose one of the following:

- LAW 290 ANATOMY OF A DEAL: FROM INCEPTION TO CLOSING
- LAW 312 TRIAL ADVOCACY II
- LAW 319 LITIGATION STRATEGY: PRE-TRIAL, CRIMINAL
- LAW 330 EMERGENCY RELIEF & EQUITABLE REMEDIES
- LAW 356 DISPUTE RESOLUTION
- LAW 369 LITIGATION LAB
- LAW 419 LITIGATION STRATEGY: PRE-TRIAL, CIVIL
- LAW 427 APPELLATE TECHNIQUE
- LAW 429 LEGAL CLINIC I
- LAW 514 LEGAL CLINIC II
- LAW 345 LEGAL CLINIC SUMMER
- LAW 438 MEDIATION
- LAW 450 TRIAL ADVOCACY I
- LAW 453 COMMERCIAL ARBITRATION
- LAW 460 BUSINESS PLANNING
- LAW 475 NEGOTIATIONS
- LAW 536 NATIONAL MOOT COURT COMPETITION
- LAW 537 INTERNATIONAL MOOT COURT COMPETITION
- LAW 570 ELECTRONIC DISCOVERY
Advanced Writing Requirement

Choose one of the following:

- LAW 250 SENIOR RESEARCH SEMINAR
- LAW 251 DEATH PENALTY DEFENSE PRACTICUM
- LAW 371 LAW & CLIMATE CHANGE
- LAW 428 INDEPENDENT STUDY
- LAW 455 LEGAL DRAFTING
- LAW 468 WHEN JUSTICE FAILS

Electives

Elective courses are open to all students who meet the prerequisites for the course in question. For information on specializations, see the section on Certificates.

Third Year in Practice (3YP) Program

The Third Year in Practice Program (3YP) will provide qualifying students with a unique third-year experience engaging in the actual and simulated practice of law. Students admitted to the 3YP program will be required to complete 24 credit hours of experiential courses, including an intensive externship of at least 5 credit hours (21 to 23 hours per week) and the Third Year in Practice Seminar. In addition, students will be able to choose from an array of professional skills, practicum, legal drafting and clinic courses to create a fully immersive third year in practice.

Business Law Certificate

To earn a Certificate in Business Law, a student must complete the 86 credits required for the Juris Doctor degree and satisfy all JD requirements. Within the coursework required for the JD degree, a student must complete 15 credit hours from the listed business law courses, including two required courses and three electives. All courses are 3 credits unless otherwise indicated. An applicant must earn a minimum GPA of 3.20 in the Certificate courses. If a student takes more than 15 hours of courses from the approved list, all grades earned in those courses will be factored into the minimum 3.20 GPA requirement for the Certificate. Students may apply for only one Certificate.

Required Courses

- LAW 102 BUSINESS ORGANIZATIONS
- LAW 600 TAXATION OF CORPORATIONS & SHAREHOLDERS
  or LAW 620 PARTNERSHIP TAXATION

Electives

- LAW 202 EMPLOYMENT DISCRIMINATION
- LAW 210 FEDERAL INCOME TAXATION
- LAW 212 FEDERAL INCOME TAXATION AND FEDERAL POLICY (4 credits)
- LAW 218 TAXATION OF STRUCTURED REAL ESTATE TRANSACTIONS
- LAW 300 CORPORATE FINANCE
- LAW 304 SALES
- LAW 305 SECURED TRANSACTIONS
- LAW 310 COMMERCIAL PAPER
- LAW 311 WORKOUTS & RESTRUCTURING/FINANCIAL TROUBLED COMPANIES
- LAW 348 MERGERS AND ACQUISITIONS
- LAW 349 INTERNATIONAL TRADE LAW
- LAW 358 EMPLOYEE BENEFITS
- LAW 402 ANTITRUST
- LAW 415 BANKRUPTCY
- LAW 417 LABOR LAW
Criminal Law Certificate

To earn a Certificate in Criminal Law, a student must complete the 86 semester hours required for the Juris Doctor degree and must satisfy all JD requirements. Within the elective course work required for the JD, a student must complete 15 credit hours from the listed criminal law courses, including three required courses. All courses are 3 credits unless otherwise indicated. Criminal Law, Evidence, and Criminal Procedure do not count toward the Certificate credit requirements.

An applicant must earn a minimum GPA of 3.00 in the Certificate courses. If a student takes more than 15 hours of courses from the approved list, all grades earned in those courses will be factored into the minimum 3.00 GPA requirement for the Certificate. Students may apply for only one Certificate.

Required Courses

- LAW 464 ADVANCED CRIMINAL PROCEDURE: PRETRIAL
- LAW 465 ADVANCED CRIMINAL PROCEDURE: TRIAL
- Select one from the list below:
  - LAW 524 FIELD PLACEMENT: approved placement
  - LAW 429 LEGAL CLINIC I: approved topic
  - LAW 514 LEGAL CLINIC II: approved topic

Elective Courses

- Select from the list below:
  - LAW 213 DOMESTIC VIOLENCE
  - LAW 250 SENIOR RESEARCH SEMINAR: approved topic
  - LAW 251 DEATH PENALTY DEFENSE PRACTICUM
  - LAW 312 TRIAL ADVOCACY II
  - LAW 313 CRIMINAL JUVENILE JUSTICE
  - LAW 319 LITIGATION STRATEGY: PRE-TRIAL, CRIMINAL
  - LAW 412 FEDERAL COURTS
  - LAW 450 TRIAL ADVOCACY I
  - LAW 507 FEDERAL CRIMINAL LAW
  - LAW 513 INTERNATIONAL CRIMINAL LAW
  - LAW 547 SENTENCING LAW & POLICY
  - LAW 730 MENTAL HEALTH ISSUES IN CRIMINAL LAW
Child and Family Law Certificate

To earn a Certificate in Child & Family Law, a student must complete the 86 semester hours required for the Juris Doctor degree and satisfy all JD requirements. Within the elective course work required for the JD degree, a student must complete 15 credit hours from the listed Family Law courses with a minimum GPA of 3.00 in those courses. All courses are 3 credits unless otherwise indicated.

An applicant must earn a minimum GPA of 3.00 in the Certificate courses. If a student takes more than 15 hours of courses from the approved list, all grades earned in those courses will be factored into the minimum 3.00 GPA requirement for the Certificate. Students may apply for only one Certificate.

Required Courses

- LAW 509 LAW AND THE FAMILY UNIT
  or LAW 510 THE MARITAL DISSOLUTION PROCESS
- Choose one advanced writing requirement course from the list below:
  - LAW 250 SENIOR RESEARCH SEMINAR: approved topic
  - LAW 428 INDEPENDENT STUDY: approved topic
  - LAW 455 LEGAL DRAFTING: approved topic

Elective Courses

- Choose at least one from the list of practice-based courses:
  - LAW 213 DOMESTIC VIOLENCE
  - LAW 363 RESTORATIVE JUSTICE
  - LAW 429 LEGAL CLINIC I: SPECIAL EDUCATION
  - LAW 429 LEGAL CLINIC I: ASYLUM
  - LAW 429 LEGAL CLINIC I: FAMILY LAW
  - LAW 438 MEDIATION
  - LAW 514 LEGAL CLINIC II
  - LAW 524 FIELD PLACEMENT: approved placement
- Additional elective courses
  - LAW 313 CRIMINAL JUVENILE JUSTICE
  - LAW 321 ADOPTION LAW
  - LAW 323 CHILD PROTECTION: ABUSE & NEGLECT
  - LAW 487 HOUSING LAW
  - LAW 714 BIOETHICS & THE LAW
  - LAW 529 CHILDREN & THE LAW
  - LAW 546 POVERTY LAW
  - LAW 702 ELDER LAW
  - LAW 544 WOMEN AND JEWISH LAW
  - LAW 716 DISABILITY LAW
  - LAW 498 SCHOOL LAW
  - LAW 258 WOMEN'S HUMAN RIGHTS UNDER INTERNATIONAL LAW

Health Law Certificate

To earn a Certificate in Health Law, a student must complete the 86 credit hours required for the Juris Doctor and must satisfy all JD requirements. Within the elective courses for the JD, a student must complete 6 hours of required courses and 9 hours of elective courses from those listed below. All courses are 3 credits unless otherwise indicated.

An applicant must earn a minimum GPA of 3.20 in the Certificate courses. If a student takes more than 15 hours of courses from the approved list, all grades earned in those courses will be factored into the minimum 3.20 GPA requirement for the Certificate. A student may apply for only one Certificate.

Required Courses
General Intellectual Property Certificate

To earn a Certificate in Intellectual Property, a student must complete the 86 credit hours required for the Juris Doctor degree and satisfy all JD requirements. Within the elective course work required for the JD degree, a student must complete at least 15 credit hours from the listed courses and seminars and earn a minimum GPA of 3.20 in the Certificate courses. If a student takes more than 15 hours of courses from the approved list, all grades earned in those courses will be factored into the minimum 3.20 GPA requirement for the Certificate. All courses are 3 credits unless otherwise indicated. Students may apply for only one Certificate.

Previously taught courses, courses offered in other DePaul Colleges, and new courses and seminars that may be added to the curriculum may qualify for the Certificate with approval. In addition, with approval, students may substitute a different writing seminar or a three-credit independent study for the required writing assignment.

Academic credits received from law school journals, including the Journal of Art, Technology and Intellectual Property Law, do not count toward the credits required for the Certificate. Students who entered law school in the 2011-2012 cycle or earlier may choose to qualify for the General Intellectual Property Certificate under the requirements that were in effect until May of 2013. These requirements may be found on the College of Law website.

- LAW 608 INTERNATIONAL TAXATION
- LAW 616 TAXATION OF S CORPORATIONS AND CONDUIT ENTITIES

**Joint Degree Requirements**

The College of Law offers the following joint degree programs:

- JD/MBA (with Kellstadt Graduate School of Business)
- JD/MS in Public Service Management (with the College of Liberal Arts & Social Science's School of Public Service)
- JD/MA in International Studies (with the College of Liberal Arts & Social Science)
- JD/MS in Computer Science Technology (with the College of Computing and Digital Media)

**Requirements**

A joint degree program allows you to complete two graduate degrees concurrently in less time than it takes to finish each program individually. As a specified number of credit hours apply toward both degrees, you also pay less in overall tuition by combining programs.

Before beginning a joint degree program, both full-time and part-time law students must complete the required first-year curriculum and achieve a minimum grade point average of 3.00 in those courses. Full-time students earn 28 credits the first year, while part-time students must earn at least 28 credits within the first three semesters of the law program.

Traditional JD students must complete 86 credit hours to graduate from the College of Law. However, under the joint degree program, you earn the JD degree after completing a minimum of 76 credit hours. The College of Law applies up to 10 credits toward your JD degree for work completed in the other graduate degree program. Credit hours are eligible to be applied only after you complete the required first year JD curriculum described above. A Joint Program Coordinating Committee determines which courses offered by each program count for joint credit. A joint degree student may not receive credit for courses that create a redundancy in coursework.

For additional requirements, please visit the pages for the corresponding degrees.

**Admission**

You must be independently accepted by the college offering the desired graduate degree and meet all admission requirements for that college. If you are a full-time student, you should apply the summer prior to the second year of law school. If you are a part-time student, you should apply the spring semester of your second year.

A copy of your first-year law transcript and a cover letter requesting admission to the joint degree program also must be submitted to Assistant Dean Diana White in the College of Law, (312) 362-8537 or dwhite@depaul.edu, and you will need to schedule a meeting with her to discuss the program curriculum. Your full name, student identification number, mailing address, email address and phone number should be included in your letter. You should submit the same letter to the appropriate adviser in the other college you are applying to and schedule a
meeting to discuss the curriculum. The Joint Degree Coordinating Committee also will need a copy of your letter.

**Combined Credits and Expenses**

Full-time joint degree students generally complete the program in three or four years. Part-time applicants generally complete the joint degree program in four or five years. You may accelerate the program by taking classes in the summer or by taking more courses during the academic year. By doing so, you may potentially complete both programs one-half year earlier.

Once enrolled in a joint degree program, you no longer pay the College of Law package tuition; you pay by the credit hour for law classes and classes taken in the other program. If you are receiving financial aid at the time you reclassify to the joint degree program, you should be able to extend your award through to the completion of both degrees.

**Grading Standards**

You must meet the grading standards of the College of Law and the respective graduate degree program in order to remain in good standing. Grades are recorded on your transcript under the college in which the courses are taken, and the combined degree is recorded after you graduate. If you are dismissed from either program, the Joint Program Coordinating Committee may permit you to continue studies in the other program. You must satisfy the normal program requirements of the other school to receive the degree; no double counting of credits is permitted after a dismissal from one college.

**Leaves of Absence/Withdrawal**

You must receive permission from the Joint Degree Coordinating Committee to take a leave of absence from the joint degree program. A leave of absence is granted for a maximum of one year. If you do not enroll in classes after one year, you will be permanently withdrawn from both programs and only may re-enroll by applying to the admission offices of both colleges as a new student.

To withdraw from a joint degree program, you must receive permission from the Joint Degree Coordinating Committee. You cannot withdraw by not attending classes or by notifying professors. In most cases, a withdrawal indicates that you no longer intend to enroll in classes either at the College of Law or at the college offering the graduate degree program.

**Graduation**

To receive the joint degree, you must graduate from both schools on the same date, in the same semester/quarter and in the same year. Double counting of credits occurs only after you concurrently complete both programs.

For a December graduation, all requirements must be completed at the end of the fall semester and fall quarter. For a spring graduation, all non-law requirements must be completed at the end of the winter quarter and all law requirements at the end of the spring semester. If these requirements are not met, you will not be eligible to graduate, cannot be certified for admission to the Bar, and cannot sit for the bar examinations.

**JD/ MBA Joint Degree**

Offered jointly with DePaul's Kellstadt Graduate School of Business, the JD/MBA recognizes the growing complexity of business organizations and the increasing interaction of management and the law. The program integrates several functional areas of law and business and emphasizes the contributions each makes to the development of administrative competence.

With more than 60 years of experience in educating working professionals, the DePaul MBA program is accredited by AACSB International—the premier accreditation body for business schools—and is respected throughout Chicago, the United States and the world. Because the business world demands more cross-functional knowledge than ever, the program offers students a well-rounded curriculum of business administration with 30 concentrations in the area of their choice. The program also allows students to pursue multiple concentrations, providing them with an individualized and customized MBA experience.
Traditional MBA students must complete 72 credit hours to receive the degree. However, under the joint degree program, they are required to complete a minimum of 56 credit hours. The Kellstadt Graduate School of Business will accept up to 16 credit hours for work completed in the College of Law.

In addition to the core requirements, specific courses are required for the various MBA concentrations. Please refer to the Kellstadt Graduate School of Business catalog for complete program requirements.

### Degree Requirements

#### Requirements

A joint degree program allows you to complete two graduate degrees concurrently in less time than it takes to finish each program individually. As a specified number of credit hours apply toward both degrees, you also pay less in overall tuition by combining programs.

Before beginning a joint degree program, both full-time and part-time law students must complete the required first-year curriculum and achieve a minimum grade point average of 3.00 in those courses. Full-time students earn 28 credits the first year, while part-time students must earn at least 28 credits within the first three semesters of the law program.

Traditional JD students must complete 86 credit hours to graduate from the College of Law. However, under the joint degree program, you earn the JD degree after completing a minimum of 76 credit hours. The College of Law applies up to 10 credits toward your JD degree for work completed in the other graduate degree program. Credit hours are eligible to be applied only after you complete the required first year JD curriculum described above. A Joint Program Coordinating Committee determines which courses offered by each program count for joint credit. A joint degree student may not receive credit for courses that create a redundancy in coursework.

#### Admission

You must be independently accepted by the college offering the desired graduate degree and meet all admission requirements for that college. If you are a full-time student, you should apply the summer prior to the second year of law school. If you are a part-time student, you should apply the spring semester of your second year.

A copy of your first-year law transcript and a cover letter requesting admission to the joint degree program also must be submitted to Assistant Dean Diana White in the College of Law, (312) 362-8537 or dwhite@depaul.edu, and you will need to schedule a meeting with her to discuss the program curriculum. Your full name, student identification number, mailing address, email address and phone number should be included in your letter. You should submit the same letter to the appropriate adviser in the other college you are applying to and schedule a meeting to discuss the curriculum. The Joint Degree Coordinating Committee also will need a copy of your letter.

#### Combined Credits and Expenses

Full-time joint degree students generally complete the program in three or four years. Part-time applicants generally complete the joint degree program in four or five years. You may accelerate the program by taking classes in the summer or by taking more courses during the academic year. By doing so, you may potentially complete both programs one-half year earlier.

Once enrolled in a joint degree program, you no longer pay the College of Law package tuition; you pay by the credit hour for law classes and classes taken in the other program. If you are receiving financial aid at the time you reclassify to the joint degree program, you should be able to extend your award through to the completion of both degrees.

#### Grading Standards

DePaul University
You must meet the grading standards of the College of Law and the respective graduate degree program in order to remain in good standing. Grades are recorded on your transcript under the college in which the courses are taken, and the combined degree is recorded after you graduate. If you are dismissed from either program, the Joint Program Coordinating Committee may permit you to continue studies in the other program. You must satisfy the normal program requirements of the other school to receive the degree; no double counting of credits is permitted after a dismissal from one college.

**Leaves of Absence/ Withdrawal**

You must receive permission from the Joint Degree Coordinating Committee to take a leave of absence from the joint degree program. A leave of absence is granted for a maximum of one year. If you do not enroll in classes after one year, you will be permanently withdrawn from both programs and only may re-enroll by applying to the admission offices of both colleges as a new student.

To withdraw from a joint degree program, you must receive permission from the Joint Degree Coordinating Committee. You cannot withdraw by not attending classes or by notifying professors. In most cases, a withdrawal indicates that you no longer intend to enroll in classes either at the College of Law or at the college offering the graduate degree program.

**Graduation**

To receive the joint degree, you must graduate from both schools on the same date, in the same semester/quarter and in the same year. Double counting of credits occurs only after you concurrently complete both programs.

For a December graduation, all requirements must be completed at the end of the fall semester and fall quarter. For a spring graduation, all non-law requirements must be completed at the end of the winter quarter and all law requirements at the end of the spring semester. If these requirements are not met, you will not be eligible to graduate, cannot be certified for admission to the Bar, and cannot sit for the bar examinations.

**Law/ Computer Science - Joint Degree (JD/ MS)**

The primary goal of the joint degree JD/MS program at DePaul University College of Law and DePaul University College of Computing and Digital Media (CDM) is to prepare students for successful legal and related careers in industry, government, and other institutions that develop innovations, engage in electronic commerce, employ information technologies, and manage and protect information and data. A critical need exists for attorneys in a wide range of fields involving software development, high-technology innovations, information processing, internet and telecommunications services, digital-content, and more. Lawyers are needed to provide advice, counseling, and litigation services regarding the acquisition of and licensing of intellectual property rights; the assertion and defense of such rights; regulations governing the use, protection and preservation of information; and contractual and business practices in the high-tech sector. Graduates who have a substantive understanding of legal and technological issues regarding e-commerce, information technologies, e-discovery, computational finance, network security, digital media, or related computer science fields will have a substantial advantage in obtaining and flourishing in such positions. Graduates with the joint degree will be better prepared to be drafters, negotiators, and litigators when seeking to obtain and protect inventions, trademarks, analog and digital creations, internet websites, and domain names; advisors concerning licensing, reverse engineering, or reusing computer software, expressive, or functional media; and managers when developing policies governing the acquisition, preservation and dissemination of information for their clients and within their own institutions.

The joint JD/MS program allows students to obtain dual degrees in both law and computer science fields with only one additional year of study beyond the regular JD program and with a minimum of additional expense. The program is designed for all students who wish to deepen their technical expertise while also obtaining a law degree.

Some of the students completing the joint JD/MS degree will seek to become members of the patent bar. There are also many opportunities (including as patent litigators and licensors) for graduates who either lack the scientific or technical background required to qualify for the patent bar exam or lack the desire to practice patent law. (Membership in the patent bar is required only to file and prosecute patent applications in the United States Patent and Trademark Office; it is not a general requirement for patent law practice.) The MS in Computer Science does not itself provide a degree that currently qualifies students to take the patent bar exam, but may provide relevant course work toward fulfilling eligibility requirements.
Degree Requirements

Full-time students must complete the regular first year JD program with a minimum GPA of 3.0 before being admitted to the Joint Degree. Part-time students must complete at least three law semesters with a minimum GPA of 3.0 before being admitted to the Joint Degree. The second and third years provide some flexibility to tailor a student's program. For example, students might take three law courses in the Fall Semester and two law courses in the Spring Semester, while taking one CDM course in the Fall Quarter, two CDM courses in the Winter Quarter, and two CDM courses in the Spring Quarter. The fourth year might consist of three law courses in the Fall Semester, one CDM course in the Fall Quarter, three CDM courses in the Winter Quarter, and three CDM courses in the Spring Quarter.

This schedule allows for completion of the JD as well as completion of 14 CDM courses (the MS program plus four prerequisite courses) in four years. It is possible that, because of prerequisite coursework, the program may take some students more than four years. Since each student will require a different number of CDM prerequisites and each student will select courses based on semester/quarter availability, any particular curriculum might be different from the above-described curriculum. Students are encouraged to select courses with the assistance of the program advisors at both the College of Law and CDM.

CDM Requirements for an MS Degree

For the CDM portion of the joint degree, students may major in:

- Applied Technology
- Business Information Technology
- Computer Game Development
- Computer Information and Network Security
- Computer Science
- Digital Cinema
- E-Commerce Technology
- Human-Computer Interaction
- Information Systems
- IT Project Management
- Network Engineering and Management
- Predictive Analytics
- Software Engineering

Each program listed above follows the requirements as listed on the page for that major. These requirements are divided into phases. Upon completion of the major requirements, each student will move to the Elective Phase as described below.

Students with a GPA of 3.9 or higher will graduate from CDM with distinction.

College of Law Certificate Programs

In addition to the Joint Degree, students may obtain one of the Certificates offered by the College of Law, providing that they have met the requirements for the Certificate.

For DePaul's policy on repeat graduate courses and a complete list of academic policies see the DePaul Graduate Handbook.

Elective Phase

Students must complete 12 additional graduate quarter hours fulfilled by courses from the IP Certificate. These courses will also be counted toward the JD degree.

Degree Requirements
The following rules apply to this joint degree:

- Students may substitute up to 16 CDM credit hours for up to 10 of the 86 required law semester hours, reducing their law course requirements to 76 semester hours. However, students cannot substitute CDM credit hours for required courses in the College of Law, such as Legal Profession or Advanced Writing Requirement courses.
- Only CDM courses taken after enrollment in the College of Law may be substituted for law courses.
- Students may substitute up to 8 law semester hours for up to 3 CDM master's degree courses, reducing their CDM course requirements to 10 courses plus any necessary introductory courses.
- Students must graduate from both schools on the same date, in the same semester/quarter, and in the same year. Double counting of credit hours occurs only after the student concurrently completes both degree programs. Students should consult with the joint degree advisors regarding any questions about coordinating the completion of the two degrees.
- Students must earn a grade of B- or better in each CDM introductory course.
- Students must earn a grade of C or better in all CDM courses beyond the introductory courses.
- CDM requires that students must maintain a GPA of 2.50 or higher while pursuing their joint degrees.

Graduation Requirements

The joint degree candidate must complete all CDM requirements in November at the end of the fall quarter and all law requirements in December at the end of the autumn semester to be eligible for a December degree award. Students who plan to graduate in May must complete their CDM coursework in March by the end of the winter quarter and their law requirements in May to be eligible for a May degree award. If not, they will have to graduate in July and cannot be certified for admission to the Bar in July.

JD/ MS in Public Service Management - Joint Degree

Offered jointly with the College of Liberal Arts & Social Sciences School of Public Service, the JD/MS in Public Service Management promotes effective management of nonprofit organizations and government agencies and fosters development of sound public policies affecting the delivery of social services. The program is interdisciplinary and draws primarily on the areas of sociology, economics, political science, law and the human service professions, carefully balancing theoretical and applied approaches to contemporary challenges of administration and policy analysis. Following the tradition of St. Vincent de Paul, the Public Services Management program devotes special attention to policies and practices that promote social equality through delivery of affordable, quality services to those in greatest need.

Traditional public service management students must complete 52 hours to receive the MS degree. However, under the joint degree program, students are required to complete a minimum of 36 credit hours. The Public Service Management program will accept up to 16 hours of credit for work completed in the College of Law.

In addition to the core requirements, specific courses are required for the various public service management concentrations. Please visit the Public Service Management catalog for complete program requirements.

If these requirements are not met, you will not be eligible to graduate, cannot be certified for admission to the Bar, and cannot sit for the bar examinations.

Taxation (LLM)

For more than a quarter century, the LL.M. in Taxation has offered a comprehensive curriculum that provides instruction in both the substantive and procedural aspects of tax law. Courses range from the basics of personal and business income taxation to advanced problems in corporate and partnership taxation, estate and gift taxation, and state and local taxation. The full-time faculty is complemented by prominent and skilled adjunct faculty, balancing scholarly and practical approaches to the program.

Degree Requirements

The Master of Laws program begins with an orientation that introduces graduate students to DePaul's faculty, staff, library, computer and research facilities. Students who received legal training outside the United States also will participate in a special course introducing them to the Socratic teaching method, the differences between civil and common law systems, and the foundations of the U.S. legal system.

To earn the LLM in Taxation, a student must complete 24 semester hours of credit with a minimum cumulative grade point average (GPA) of 2.50. A summer term is counted as a semester for this purpose. If a student does not meet the degree GPA requirement of 2.50, the student shall earn a Certificate in Taxation if the student completes 18 credit hours with a cumulative GPA of 2.00. Students who complete 24 credit hours with a GPA below the 2.50 GPA required to earn the degree will not be permitted to continue taking classes to improve their GPA. A student is automatically dismissed if he or she has a cumulative GPA below 2.0 for any three consecutive semesters.

The LLM program may be completed on either a full- or part-time basis but it must be completed within five years. With the exception of students admitted to and enrolled in the joint JD/LLM program, credits earned as part of the JD program do not count toward the LLM degree. In addition, no credit is given for law courses taken before a student is admitted to and enrolled in the LLM program.

Course Requirements

**Required Courses (9 or 10 credits)**

- LAW 212 FEDERAL INCOME TAXATION AND FEDERAL POLICY (3 credits)
- or LAW 212 FEDERAL INCOME TAXATION AND FEDERAL POLICY (4 credits)
- LAW 600 TAXATION OF CORPORATIONS & SHAREHOLDERS (3 credits)
- LAW 620 PARTNERSHIP TAXATION (3 credits)
Elective Courses

- LAW 218 TAXATION OF STRUCTURED REAL ESTATE TRANSACTIONS
- LAW 250 SENIOR RESEARCH SEMINAR: approved topic
- LAW 300 CORPORATE FINANCE
- LAW 348 MERGERS AND ACQUISITIONS
- LAW 349 INTERNATIONAL TRADE LAW
- LAW 409 ESTATE PLANNING
- LAW 428 INDEPENDENT STUDY: approved topic

About

For nearly a century, the Driehaus College of Business has been committed to an urban and a metropolitan identification and the recognition that its past, present, and future are linked inextricably to the stability and vitality of the city of Chicago. For students in the college, this means studying and working in Chicago, one of the most dynamic business and financial centers in the world. For graduates of the Driehaus College of Business, this means abundant career choices and opportunities after leaving DePaul. In this way, DePaul has been the developer of Chicago's leaders in business for over nine decades.

In February 2012, Business alumnus and Life Trustee Richard H. Driehaus made the largest gift in DePaul history to support faculty excellence in graduate and undergraduate business programs. In recognition of Mr. Driehaus' $30 million commitment, generosity, and vision, the University renamed the college in his honor as part of its centennial celebrations.

Faculty

Approximately 316 men and women serve on the faculty of the college (144 full-time and 172 part-time). These individuals are committed to providing DePaul students with a challenging, high-quality classroom learning experience. This commitment has led nearly 86% of full-time faculty to earn doctoral degrees in their respective disciplines. Additionally, many members of the faculty have demonstrated their technical competence by earning professional certifications in their special fields.

Among the certifications held by members of the faculty are the following:

- Accredited Personnel Specialist (APS)
- Associate in Risk Management (ARM)
- Certificate in Data Processing (CDP)
- Certificate in Dispute Resolution (CDR)
- Certificate in Management Accounting (CMA)
- Certified Information Systems Auditor (CISA)
- Certified Internal Auditor (CIA)
- Certified Financial Planner (CFP)
- Certified Fraud Examiner (CFE)
- Certified Information Technology Professional (CITP)
- Certified Public Accountant (CPA)
- Certified Secure Programmer (CSP)
- Chartered Financial Analyst (CFA)
- Chartered Financial Consultant (ChFC)
- Chartered Property and Casualty Underwriter (CPCU)

Academics

Established in 1912, the Driehaus College of Business is the nation's tenth oldest business school. The Kellstadt Graduate School of Business was established in 1948 and is noted for its innovative programs for full-time and part-time graduate students.

The College is accredited by AACSB International, The Association to Advance Collegiate Schools of Business, a distinction held by a limited percentage of business schools around the world.

Admission & Aid

To succeed in the study of business, students must possess a number of academic qualities. Specifically, students must be able to think analytically and reason to valid conclusions relying on both quantitative and qualitative information. Particular attention is therefore given to the mathematical and verbal abilities of candidates.

Undergraduate candidates interested in admission to the Driehaus College of Business should direct all inquiries to the Office of Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu or (312) 362-8300.

Students interested in the Kellstadt Graduate School of Business should refer to the graduate admission section for more information.

For general information about admission and financial aid please visit: http://www.depaul.edu/admission-and-aid/Pages/default.aspx

For information about graduate admission, or to apply online, please visit: http://www.depaul.edu/admission-
Graduate Admission

Applicants must possess the equivalent of a bachelor's degree from a regionally accredited institution. A prospective graduate student is expected to present a superior overall previous academic record and an above average total GMAT score (or GRE score where appropriate) including high achievement on the verbal, quantitative, and on the analytical writing assessment. The examination must have been taken no earlier than five years prior to the date of admission to the program.

Other factors, such as work experience and career progression, are also important and will be considered by the Admissions Committee. All applicants are required to submit two professional letters of recommendation as well as a current resume.

All prospective students are welcome to arrange a meeting with an admissions counselor. Please phone the graduate school office for an informal appointment. Interviews are not required as part of the admissions process for the part-time M.B.A. program, but may be requested by the Admissions Committee. Interviews for the full-time M.B.A. and weekend M.B.A. programs are on an invitation-only basis. Once a completed application has been received, a preliminary review is completed and selected candidates are invited to interview.

Each applicant is considered on an individual basis. The full-time and weekend M.B.A. programs do have limited enrollments, but for the other graduate business programs there currently is no predetermined limit to the number of students who can be admitted. Thus, for these programs, all students who are judged eligible by the Admissions Committee will be invited to matriculate.

Graduate Management Admission Test (GMAT)

To be considered for admission as a degree seeking student, an applicant will be required to submit a score from the Graduate Management Admission Test (GMAT). GMAT information including dates, a list of test centers, and applications for the exam may be obtained at www.mba.com or by contacting Pearsonvue at 1-800-717-4628. The GMAT score report must come directly from Pearsonvue. A test taken more than five years prior to the date of application is not considered valid for admission purposes and would have to be retaken. An exception may be made for individuals who hold a doctoral or other terminal degree awarded by an appropriately accredited institution. An exception may also be made for fully certified CPA's applying to the Master of Science in Taxation program. Applicants to the Master of Science in Human Resources Management and the Master of Science in Economics and Policy Analysis may submit either a GMAT or GRE (Graduate Records Examinations) score. As with the GMAT, GRE scores are valid for five years.

Application Deadlines

For the day MBA program (Full-time):

Admission to the Day M.B.A. program is competitive and is limited to the Autumn Quarter. There are three application rounds, with deadlines of February 1, April 1 and July 1. Application review begins in January, and you are encouraged to apply as early as possible. Decisions are mailed on an ongoing basis beginning in January, and applicants should expect to receive an admission decision approximately 4 weeks after their application becomes complete.

Applicants who wish to be considered for scholarships and graduate assistantships should apply during the first two application rounds. These awards are generally not available to applicants who apply after April 1.

Late applications submitted after the final July 1 deadline may be considered if space remains available in the incoming class.

For the weekend MBA and MS in Economic Policy Analysis programs:

Applications must be submitted by July 1st. Applications received after July 1st will be considered on a space available basis.
For all other graduate business programs:

Applications must be submitted by:

- July 1st for the Autumn Quarter
- October 1st for the Winter Quarter
- February 1st for the Spring Quarter
- April 1st for the Summer Quarter

Applicants educated outside the United States must submit their applications one month prior to the above deadlines.

Transcripts

Degree seeking applicants must present official transcripts from each junior college, college, and university attended (even if only for one course) including DePaul University, if applicable. Credits transferred and posted on the record of a second school do not constitute an official transcript of the original school. Transcripts that are already on file as part of a student record in another College Office at DePaul may be required to remain there and in that case cannot be transferred to the Graduate School of Business Office.

Applicants should write to the Registrar of each school attended, requesting that an official transcript be sent to the student. Once all of the transcripts have been received applicants should submit them to the graduate school office in their original envelopes with the applicant's name, date of birth and program of interest noted on the envelope. We will then add the transcripts to the applicant's admission file.

An applicant who is still taking courses or completing a program at the time he/she submits an application to the Graduate School of Business will not receive full admission until a final and official transcript listing the degree awarded has been submitted to the Admissions Committee. Please see Conditional Admission and Non-degree Status for more information regarding admission prior to posting of an undergraduate degree.

Readmission

A student previously admitted who has been absent from DePaul for one year or longer must complete the application form and submit a transcript of any courses taken elsewhere during his/her absence. A student must submit a written explanation of his/her absence from the program and an updated resume. A $30 application fee is required.

If the original application has been destroyed (after an absence of two years), the student may be required to complete a new application in full.

Special Instructions for International Applicants

Educational Credentials For International Students or Programs

Applicants must submit transcripts from all colleges and universities attended, including those attended but from which no credit was earned. Exceptions may be permitted for study-abroad credit when that credit is clearly defined and displayed on the home institution transcript.

Applicants with non-U.S. educational credentials for Winter term 2012 and beyond are required to submit their official educational credentials (e.g., transcripts, mark sheets, degree certificates, graduation diplomas) and evaluation fee directly to one of the three evaluation companies below:

- Educational Credential Evaluators, Inc.
- Educational Perspectives
- One Earth International Credential Evaluation

These evaluators will then provide DePaul with a general evaluation of their studies and certified copies of their international educational credentials which will be used during admission review. Please direct any questions about required credentials to the evaluation company you have selected and not to the Kellstadt Graduate School of Business. DePaul will not accept evaluations from any other evaluation companies and will not accept any educational credentials without an evaluation from ECE, EP or One Earth.

English Proficiency

Non-native English speakers who have not completed a bachelor's or master's degree in the United States should submit scores from a recognized English proficiency test. The Kellstadt Graduate School of Business accepts results from TOEFL, IELTS and the Pearson Test of English (PTE).
Scholarship Opportunities

Please refer to the individual departments for a listing of available scholarships.

Double Demon Scholarship

Alumni from any of DePaul’s colleges who are admitted into a graduate degree program or a select certificate program* in the College of Communication, the College of Computing and Media, the College of Education, the College of Liberal Arts and Social Sciences, the College of Science and Health, the School for New Learning or the Kellstadt Graduate School of Business will automatically qualify for the Double Demon Scholarship.

This scholarship covers 25 percent of the tuition for a master’s degree or a select certificate program*. Both full-time and part-time students are eligible. No scholarship application is required; all alumni admitted to these programs beginning with the winter quarter of 2014 or thereafter qualify. This scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards.

DePaul University employees are eligible for other employee tuition benefits through the university, and therefore are not eligible for the Double Demon Scholarship.

To learn more details about this scholarship, please contact your college admissions office.

*Scholarship does not apply to all certificate programs. Please contact one of the college admissions offices above for more information.

Financial Aid

Financial aid and alternative financing programs, as well as scholarships are available to students. Completing a current FAFSA (Free Application for Federal Student Aid) is the first step to determining your overall eligibility for financial aid.

Additional information is available on DePaul’s Admission and Aid website.

Undergraduate Programs Office

The Undergraduate Programs office supports the mission of the Driehaus College of Business in a variety of ways:

- **Academic Advising:** Provides students with guidance on course selection, degree planning, and major and minor selection.

- **Records Auditing:** Assists students with determining degree progress and remaining requirements.

- **Degree Conferral:** Verifies students are eligible to receive their DePaul degree.

- **Declaration Processing:** Allows students to declare major and minor programs.
- **Orientation**: Introduces new business students to the college through Premiere DePaul, Transition DePaul, and Inter-College Transfer programs.

- **Special Programs**: Enhances the student experience through opportunities and events like Beta Gamma Sigma, Freshman Honors Convocation, and the annual Commencement Ceremony.

The Undergraduate Programs office is located in DePaul Center 5200 and may be contacted by telephone at (312) 362-5358.

## Academic Advising

All undergraduate degree seeking students in the Driehaus College of Business may receive academic advising in the Undergraduate Programs office.

Academic advisors are available to provide information concerning degree progress, curriculum, course selection, registration, academic regulations, and university policies and procedures. Academic advisors will also make appropriate referrals to help students in the use of college and university resources according to individual needs. Students are encouraged to consult their advisor periodically throughout the year.

In addition, faculty can assist in the selection of major electives and business electives which will best complement a student's major and career orientation.

The Undergraduate Programs office is located in DePaul Center 5200 and may be contacted by telephone at (312) 362-5358.

About

Communication is the art and science of creating and sharing meaning. In the College of Communication, you'll develop a deeper understanding of the complex and challenging communication practices and processes that characterize our rapidly changing world; you'll master the techniques for crafting and delivering messages across a variety of social contexts and platforms: face to face, print, audio, video, Web and other social media. You'll learn from exceptional teachers - from professors who have many years of experience in some of the biggest media markets in the nation, and from scholars publishing in some of the top national and international journals. You'll gain hands-on experience in our state-of-the-art facilities, through our award-winning radio station and newspaper, and through a wide range of internships and community projects.

The creation of a College of Communication at DePaul has set the stage for enhanced quality, substantially enriched curricular and programmatic offerings, joint programming with other schools and colleges within the university, expanded opportunities for our students to engage in workplace experiential learning; increased regional and national visibility; and significant additional growth in undergraduate programs, graduate programs, and overall enrollments.

Candidates interested in admission to the College of Communication should direct all inquires to the Office of Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu, or (312) 362-8300.

The College of Communication is home to both Undergraduate and Graduate degree programs.

Candidates interested in admission to the College of Communication should direct all inquires to the Office of Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu, or (312) 362-8300.
Scholarship Opportunities

Undergraduate

DePaul awards a variety of admission scholarships to freshmen and transfer students, as well as some scholarships for current students. For information about university opportunities, visit the scholarship page of DePaul's Admission and Aid website at http://www.depaul.edu/admission-and-aid/Pages/scholarships.aspx. The College of Communication offers some scholarship support for continuing undergraduate students. Communication scholarships opportunities vary; typically three to five scholarships are awarded each year, in the $1000-$2500 range. Details on Communication scholarship offerings can be found at communication.depaul.edu.

Double Demon Scholarship

Alumni from any of DePaul's colleges who are admitted into a graduate degree program or a select certificate program* in the College of Communication, the College of Computing and Media, the College of Education, the College of Liberal Arts and Social Sciences, the College of Science and Health, the School for New Learning or the Kellstadt Graduate School of Business will automatically qualify for the Double Demon Scholarship.

This scholarship covers 25 percent of the tuition for a master's degree or a select certificate program*. Both full-time and part-time students are eligible. No scholarship application is required; all alumni admitted to these programs beginning with the winter quarter of 2014 or thereafter qualify. This scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards.

DePaul University employees are eligible for other employee tuition benefits through the university, and therefore are not eligible for the Double Demon Scholarship.

To learn more details about this scholarship, please contact your college admissions office.

*Scholarship does not apply to all certificate programs. Please contact one of the college admissions offices above for more information.

Financial Aid

Students who plan to fund their education through federal loans should complete and submit the Free Application for Federal Student Aid (FAFSA). DePaul's Financial Aid Office will create a financial aid package based on your FAFSA information.

Graduate Admission

The College of Communication offers seven graduate programs at the masters level: Digital Communication and Media Arts, Health Communication, Journalism, Media and Cinema Studies, Organizational and Multicultural Communication, Public Relations and Advertising, and Relational Communication.

Classifications
Full Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor’s degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies indicating a capacity to successfully pursue a specific program of graduate study.
- A minimum cumulative grade point average of 3.0.
- Submission of all required supporting credentials.

Conditional Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor’s degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies indicating a capacity to successfully pursue a specific program of graduate study.
- Submission of all required supporting credentials.
- Conditional approval by the department or graduate program director of the applicants proposed program of graduate study.
- Academic conditions as designated in the conditional admission letter.
- No independent studies or non-program courses may be taken while in a conditional status.

A conditionally admitted applicant is eligible for reclassification to full, degree-seeking status when the conditions of his or her admission have been satisfied.

DePaul Students and B.A./ M.A. Programs

Undergraduate students in the College of Communication are eligible to apply for admission to the combined B.A./M.A. programs. Admission is conditional until the conferred bachelor’s degree is posted on the DePaul transcript. The M.A. programs in Digital Communication and Media Arts, Health Communication, Journalism, Media and Cinema Studies, Organizational and Multicultural Communication, and Relational Communication offer an accelerated master’s degree that begins in an undergraduate’s senior year and may be completed in one subsequent year. The combined degree programs are available to College of Communication undergraduates only. The exception to this policy are: the Health Communication program that accepts undergraduate applicants majoring in Health Science, and the Journalism program that accepts undergraduate applicants majoring in History or Political Science. Further information about these B.A./M.A. programs can be found within specific program descriptions in this Catalog and on the College web site.

Admission Procedures

General Procedures

Procedures for admission to the graduate programs in the College of Communication are outlined below. For specific information about admission requirements and deadlines to each department or program, please consult the College of Communication website.

Application: You can apply online at: www.depaul.edu/apply. To request information about College of Communication graduate programs, please email graddepaul@depaul.edu.

Supporting Credentials: We require official transcripts from all universities, colleges, and junior colleges you have attended. Please request that transcripts and other credentials be sent directly to the Office of Graduate Admission, College of Communication, 2400 N. Sheffield, Chicago, IL 60614-2215. We recommend that you request transcripts in sufficient time to meet the programs deadline.

The College of Communication graduate programs require additional supporting credentials before an application file is considered complete. Please consult the specific program listing on the College of Communication website to determine what additional materials are required for admission and the deadline by which applications and supporting materials should be submitted.

Application Fee: You can pay the application fee online as part of the online application or send a check or money order payable to DePaul University. Consult the application instructions for specific information about amount of the fee. If paying by check or money order, send it along with your supporting credentials to the Office of Graduate Admission, 2400 N. Sheffield, Chicago, IL 60614-2215. Applications submitted without an application fee will not be processed. The fee is non-refundable.

Application Deadline and Entry Terms: Consult the College website for program-specific information about application deadlines and to which academic terms the program admits new students.
Admission Decisions: The graduate admission office will notify you of your admission decision by letter. Admission applications will be reviewed only after the application and all supporting credentials, along with the application fee, have been submitted.

Deferring Admission: If you do not enroll in the term to which you were admitted, you may request that your admission be deferred for up to one year after the term to which you were admitted. After one year, you must reapply to the program. Email graddepaul@depaul.edu to request a deferral.

International Student Admission

Students who require a student visa (I-20) in order to study at DePaul must meet all admission requirements and demonstrate adequate financial support. Applicants educated in a country in which the native language is not officially recognized as English must also submit proof of English proficiency. College of Communication programs require a minimum TOEFL score of 590 (paper-based), 243 (computer-based), or 96 with no individual score less than 22 (internet-based). DePaul also accepts the IELTS (International English Language Testing System) with a minimum score of 7.5. The letter of admission and I-20 are issued only after admission. International students are encouraged to complete their applications at least one month prior to any published program deadline, or no later than three months before the start of the term, whichever date comes first.

Special Programs

American Advertising Federation (AAF)

The DePaul Student Advertising Group is the official organization for students interested in advertising at DePaul University, and part of the leading national industry trade organization devoted to best practices, professionalism, and education. Our purpose is to bring together students who share a passion for great advertising and communication solutions. Our group helps prepare students for a career in advertising by facilitating an ongoing dialogue that covers the latest developments and trends in the ad industry. We do this through a mix of guest speakers and advertising industry presentations, student ad competitions, networking and career information sessions, visits to local Chicago area advertising/communication agencies, and social events.

Debate

The College of Communication promotes social and political discussion through debate. This activity develops presentation, reasoning and persuasive skills and offers students the opportunity to participate in a variety of formats. Debate also deepens students’ understanding of the issues which will shape the future.

DePaul Communication Organization (DCO)

Students who are interested in the field of Communication may join DCO, a student-run organization. DCO hosts a variety of activities, speaking events, and site visits throughout the year that allow students an opportunity to network with one another as well as professionals in the field. DCO is open to all DePaul students regardless of their major.

Good Day DePaul (GDD)

Good Day DePaul is a weekly television news program about DePaul that is produced by students in the College of Communication. Students do on-air reporting and anchoring for the program. They also work as producers, directors, and camera people. Good Day DePaul has won many honors from both the Society of Professional Journalists and the Chicago Television Academy.

Internship Program

The College offers an internship program through which majors and minors can earn academic credit and gain practical experience in a professional setting. Students may be enrolled in CMN 394, Advanced Communication Internship, and/or CMN 395, Communication Internship Special Topics (topics vary), only after meeting college-established eligibility requirements. An individual student may participate in several internship experiences. A maximum of 16 quarter hours of internship and practicum credit can be applied to degree requirements. CMN 394 may be used to fulfill the Junior Year Experiential Learning Requirement in the Liberal Studies Program and/or as a major field requirement. If a second internship is taken, CMN 395 may count as a communication elective. A maximum of two graded internships can be used toward the major field requirements. Subsequent
hours of internship credit are taken through different CMN 395 special topics courses and fulfill unrestricted
electives. Communication minors may have one graded internship count towards completion of the minor.

**Public Relations Student Society of America (PRSSA)**

For students interested in a career in public relations, participating in PRSSA is an essential cornerstone of your
DePaul experience. The organization hosts a vibrant schedule of activities such as visits to Chicago public
relations agencies and career fairs that will build your professional network and put you on the radar screens of
future employers. The DePaul Chapter has won national recognition including the Teahan Award for
Outstanding Regional Conference, the highest honor a PRSSA Chapter may earn. DePaul’s Regional Conferences
have been sold-out events that have drawn students from campuses across the Midwest with such powerful
themes such as *Transforming Traditional Into Digital: The New Ways of PR; The Entertainment Industry: It’s Not Just an LA Thing; and PR: The Chicago Way.*

**Radio DePaul**

The College manages Radio DePaul, the award winning campus radio station. Students may earn up to eight
credit hours (four in the major) for radio production by enrolling with instructor’s permission in CMN 393,
Communication Practicum.

**Society of Professional Journalists (SPJ)/ Online News Association (ONA)**

This is a student-run organization for students interested in careers in journalism. The DePaul chapter sponsors
campus speakers, career information sessions, and journalism seminars/conferences. Student members are
eligible to apply for SPJ and ONA - sponsored internships and student competitions.

**The DePaulia**

The DePaulia is the university’s award winning student-run paper and web site, which is integrated into the
Communication curriculum. Published weekly since 1922, the newspaper covers news, sports, features, and
community-related events. Editors on the newspaper are eligible for four hours of credit under JOUR 393,
Journalism Practicum. Other students gain college credit by enrolling in (JOUR 390) Writing for the DePaulia.

**About**

DePaul’s College of Computing and Digital Media (CDM) is organized into two schools: the School of Computing
(SoC) and the School of Cinema and Interactive Media (CIM) featuring degree programs designed to keep pace
with the latest developments in technology while remaining grounded in the liberal arts and sciences. DePaul
CDM has a reputation for offering an extraordinary selection of degree programs and courses from traditional
computer science, information systems, and network technologies to game development, digital cinema,
animation, and graphic design. At CDM, students will experience a dynamic interdisciplinary curriculum and the
opportunity to explore their academic curiosity through a wide range of academic minors that reflect the diverse
offerings of CDM’s curriculum.

**Administration**

David Miller, Ph.D.
Dean

Associate Dean
Academic Advising

The College believes that academic advising is necessary for the vitality and success of the student's undergraduate education. Students are assigned a faculty advisor upon admission to the school. All students are encouraged to meet with their faculty advisor at least once each year for assistance in planning a course of study that best reflects their academic and career interests, skills, and lifestyle. Students are also assigned a staff advisor in the CDM Academic Success Center to assist with providing interpretations of university policy, academic success strategies and support services.

Advising Staff

John Glatz
   Director of Advising
Becky Krochmal
   Assistant Director of Advising

Facilities

DePaul University maintains an extensive technological infrastructure which is available for students, faculty and staff. In addition, many academic units maintain their own resources dedicated for use by their own constituents.

The College of CDM itself operates specialized laboratories in the following:
• Requirements Engineering Lab
• Mobile Commerce Lab
• Solid Objects and Graphics Lab
• Animation Lab
• Network Security Lab
• Game Development Lab
• Console Gaming Lab
• Digital Cinema Advanced Editing Lab
• High Definition Editing Suite
• Medical Informatics Lab
• Digital Cinema Studio
• Usability Testing Lab
• Intelligent Multimedia Processing Lab
• Supercomputing Cluster Lab
• Software Research Lab
• Multimedia Networking Lab
• Centre for Web Intelligence
• E-Commerce Technology Lab

Contact Us
DePaul University
College of Computing and Digital Media
243 South Wabash Avenue
Chicago, IL 60604

Academics
The College of Computing and Digital Media offers B.A., B.S., and B.F.A. degrees at the Undergraduate level and M.A., M.S., M.F.A., and Ph.D. degrees at the Graduate level. An option to pursue a combined Bachelor/Master's degree is also available for qualified students.

Online Learning
Undergraduate
Many courses are available for review and playback via the CDM Course Online playback system (COL). If a course is COL-enabled, any student registered in the course has access to the course playback. Students are strongly encouraged to utilize the COL resource wherever available. Some undergraduate courses are offered online. CDM is pleased to offer an online degree completion plan for undergraduate transfer students in B.S. in Information Technology.

Graduate
DePaul CDM Online Learning programs are specifically designed to complement the busy lifestyle of working professionals. Our Course Online (COL) lecture playback system brings the unique experience of an on-campus DePaul CDM education to off-campus students, and gives them flexibility in how, when, and where they learn.

We offer many master's degree programs that can be completed entirely online, including:

- **Business Information Technology**
- **Computer Game Development**
- **Computer Science**
- **Computer, Information and Network Security**
- **E-Commerce Technology**
- **Human-Computer Interaction**
- **Information Systems**
- **IT Project Management**
- **Network Engineering and Management**
- **Predictive Analytics**
- **Software Engineering**

*Some courses in some concentrations are not available online. Please consult faculty advisor for determining suitable alternative coursework.*

Graduate students who wish to complete their degree through online learning do not register for a special online degree. Rather, they apply for one of our regular degree programs and then sign up for online learning courses. The degree earned by an online learning student is identical to the degree earned by an on-campus student.

---

**Combined Degrees**

Students who meet the admission requirements below may choose to apply to a combined degree program. Interested students should consult their faculty advisor regarding the application procedure. This program allows students to combine many CDM bachelor's degrees with a CDM master's degree following the structure outlined below.

**Admission Criteria**

- Minimum of 44 quarter hours earned
- Minimum of 12 quarter hours earned at DePaul
- GPA of 3.3 or higher in courses taken at DePaul
- Endorsement of faculty advisor

In order to apply for the combined degree program, your faculty advisor must send an e-mail recommendation to the CDM Academic Success Center. The recommendation should include your full name, student ID number, and the bachelor's and master's degrees you wish to combine.

Bachelor of Arts in Computing students who are enrolled via the School for New Learning are eligible for this program. Interested students who meet the admission criteria for a combined degree should contact Kenn Skorupa at SNL for more information.

**Program Structure**

Students in the combined degree program take a maximum of three graduate level courses that count toward both their bachelor's and master's degree requirements. Students may enroll in graduate level coursework in the junior and senior year only. Students in the combined degree program will receive the bachelor's degree after meeting all graduation requirements including the minimum credit hours required for graduation.

To earn the master's degree, the student must earn as many additional graduate credit hours as needed to reach the minimum number of graduate credit hours required in that master's degree.

Only CDM courses can be taken as part of this program. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

**Maintaining Good Standing**
Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter.

The student and faculty advisor will be notified when the student's cumulative GPA falls below 3.3 or when the students receives less than a C- in graduate level course.

If a student's cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional B.A./B.S./B.F.A.

If dismissed from the combined degree program after graduate courses have been passed, the graduate courses may only apply to the undergraduate degree. Should the student later be admitted to a graduate program, graduate courses applied to the undergraduate degree many not apply to the graduate program and may not be repeated if they are required in the declared graduate curriculum. Other graduate courses may be substituted in this case.

**Designing a Course of Study**

It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program.

This course of study should include the graduate courses to be taken and the undergraduate courses that are replaced by the graduate courses. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

It is advisable for the student and the faculty advisor to enter the proposed plan of study in the student communication record on the CDM intranet so it is available to the student and CDM faculty and staff.

**Registering for Master's Degree Courses**

Combined degree students must meet regularly with their faculty advisors. The faculty advisor will initiate the registration process for all graduate level courses taken during the undergraduate career.

**Bachelor's Degree to Master's Degree Transition**

In order to be fully admitted to the designated master's program, the student must meet all admission requirements for that program. When preparing to complete the undergraduate portion of the combined degree, students must submit the application for degree conferral for the undergraduate degree by the application deadline. At this time, the students should contact the CDM Academic Success Center about the procedure required to be formally admitted to the declared graduate program.

**About**

The School of Cinema and Interactive Media (CIM) houses CDM's creative degrees. With an emphasis on all aspects of production, students can earn degrees that prepare them for work in cinema, animation, computer game development, and interactive media.

**Undergraduate Majors**

- Animation BA
- Animation BFA
- Computer Game Development BS (Joint program)
- Digital Cinema BS
- Digital Cinema BA
- Graphic Design BFA
- Interactive and Social Media BS (Joint program)

**Undergraduate Minors**

- Animation Minor
- Digital Cinema Minor
- Game Design Minor (Joint program)
- Game Programming Minor (Joint program)
- Graphic Design Minor
- Interactive and Social Media Minor (Joint program)
- Writing for Film and Television Minor
- Sound Design Minor
- Television Production Minor
- Visual Effects Minor

Graduate Programs

- Animation MA
- Cinema Production MS
- Computer Game Development MS (Joint program)
- Human-Computer Interaction MS (Joint program)
- Animation MFA
- Cinema MFA
- Screenwriting MFA

About

The School of Computing (SoC) houses CDM's technical degrees. With an emphasis on the theoretical as well as practical, students can earn degrees that prepare them for work in computing, programming, data storage, information processing, network security, and software development.

Undergraduate Majors

- Computer Game Development BS (Joint program)
- Computer Science BS
- Computing BA (Joint program)
- Information Assurance and Security Engineering BS
- Information Systems BS
- Information Technology BS
- Interactive and Social Media BS (Joint program)
- Mathematics and Computer Science BS
- Network Technologies BS

Undergraduate Minors

- Computer Science Minor
- Data Analysis and Data Mining Minor
- E-Commerce Technology Minor
- Game Design Minor (Joint program)
- Game Programming Minor (Joint program)
- Information and Computing in the Modern World Minor
- Interactive and Social Media Minor (Joint program)
- Information Systems Minor
- Information Technology Minor
- Network Technology Minor

Graduate Programs

- Applied Technology MS (Joint program)
- Business Information Technology MS
- Computer Game Development MS (Joint program)
- Computational Finance MS
- Computer Science MS
- Computer, Information and Network Security MS
- E-Commerce Technology MS
- Health Informatics MS
- Human-Computer Interaction MS (Joint program)
- Information Systems MS
- IT Project Management MS
- Network Engineering and Management MS
- Predictive Analytics MS
- Software Engineering MS
- JD/MS in Computer Science Technology (Joint program)
- PhD in Computer and Information Sciences

Faculty

David Miller, Ph.D.
Dean

Graduate Admission

Applicants to CDM graduate programs can choose from degrees that span the computing and digital media spectrum, including master's degrees, MFAs, and a PhD program. Information about admission requirements can be found on the CDM website, under Prospective Students: http://www.cdm.depaul.edu/Prospective%20Students/Pages/GraduateAdmissions.aspx

CDM does not permit admission to more than one graduate program at a time. Students wishing to pursue a second graduate program must complete the requirements for the first program (i.e., graduate) and then apply to the second program.

Domestic applications generally take one month to process while international applications take a minimum of three months to review.

About

DePaul University, founded on Judeo-Christian principles, continues to assert the relevance of these principles through higher education to our students. The University expresses these principles especially by passing on the heritage of St. Vincent DePaul: individual perfection manifested through purposeful involvement with other persons, communities and institutions. The College of Education manifests these principles in its purpose, and through its programs.

As an urban institution, the College of Education is committed to improving primary and secondary education in the metropolitan area and, in particular, in the city of Chicago. Framed within a commitment to promote and support diversity, the College of Education prepares all of its students to be "Urban Professional Multicultural Educators" who:

- Promote positive transformation
- Consider multiple perspectives
- Integrate inquiry, theory, and practice
- Exhibit Vincentian personalism
- Function as life long learners.

Academics

The College of Education is home to Undergraduate majors, Graduate programs, Licensures and Endorsements.

Combined Bachelors/ Masters

The TEACH Program provides students the opportunity to complete in five years an undergraduate degree in a core arts and science major and a Master's of Education degree with State of Illinois secondary education teaching certification in a content area related to their major. As a combined degree program of the College of Liberal Arts and Social Sciences, the College of Science and Health, and the College of Education, the Program is collaboratively governed and coordinated by faculty from all 3 units.

The Program is designed to draw on the expertise of LAS and CSH faculty who teach in the majors of English, Mathematics, History, the Sciences, and Social Sciences to ensure strong content knowledge preparation of students and facilitate the transition from being learners of content to teachers of content to diverse adolescent populations. The Program also draws on the expertise of faculty in the COE’s Secondary Education Program and Educational Policy Studies and Research Department to immerse students into essential issues and themes of education and theories and practices of teaching and learning. Such issues as educational inequality, politics of schooling, identity politics, social justice, identity development inside and beyond formal school settings, historical, cognitive, sociocultural, and sociopolitical nature of human development and society are integrated with issues of pedagogical content knowledge, critical pedagogy, constructivist teaching practices, theories of teaching and learning, curriculum development, and professional practice. Ensuring that students understand all
these issues is integral to the Program design and delivery and to the preparation of teachers.

The measure of the academic quality of the Program relies on clearly articulated features of exemplary teacher-education programs. These include:

- a “common, clear vision of good teaching that permeates all coursework and clinical experiences...”;
- a “well-defined standard of professional practice and performance...”;
- a “strong core curriculum taught in the context of practice” and including understanding of human development and learning, social and cultural contexts, curriculum assessment, and subject-matter pedagogy;
- an “extended clinical experience” that supports ideas presented in coursework;
- an “extensive use of case methods, teacher research, performance assessments, and portfolio evaluation...”;
- “explicit strategies” to help students confront their own beliefs and assumptions about learning and students and to learn about the experiences of diverse people; and
- “strong relationships, common knowledge, and shared beliefs among school- and university-based faculty.”

Students may apply to the Program during the spring of their junior year. They must complete the Junior Year Experiential Course TCH 320, Exploring Teaching in an Urban High School, and meet other application criteria prior to applying. The curriculum of the Program consists of three components:

- Courses necessary to satisfy requirements for a baccalaureate degree in the College of Liberal Arts and Social Sciences or College of Science and Health in one of the following state of Illinois secondary certification content areas: English; History; Math; Sciences (Biology, Chemistry, Environmental Science, or Physics); or Social Sciences.
- A set of five courses that will be taken by students in the Program while they are still undergraduates; three of these will also fulfill graduate degree requirements. These courses will serve as a bridge to the 5th year Master's coursework.
- A fifth year of graduate courses which, together with the three double-counted courses mentioned above, will satisfy the requirements for a College of Education Master’s in Education and a secondary-education certification in the student’s discipline.

A full description of Program requirements for each content area can be found in the College of Education catalog.

Admission & Aid

The College of Education offers several graduate programs at the master's and doctoral level as well as endorsement and licensure only programs. Admission to DePaul University College of Education is very competitive. We consider numerous factors in evaluating each applicant, including undergraduate academic performance, graduate academic performance (if applicable), professional work experience, writing ability, potential for leadership, professional and academic recommendations and the applicant’s special talents, qualities, interests and socioeconomic and cultural background. No single factor is dispositive.

Personal qualities that demonstrate intellectual depth, high ideals and diligence also are considered, as are economic, societal or educational obstacles that have been successfully overcome. Diversity in background and experience among the members of each entering class is a continuing objective. Having a diverse student body allows us to encourage and foster the exchange of different ideas. DePaul University has a nondiscriminatory admission policy; it does not discriminate on the basis of race, color, national origin, religion, sex, sexual orientation, age or disability.

General Admission Procedures

Application

You can apply online at: www.depaul.edu/apply. To request information about College of Education graduate programs, including endorsements, approvals and licensures, please email us at edgradadmissions@depaul.edu or call us at (773) 325-4405.
Supporting Credentials

We require official transcripts from all universities, colleges, and junior colleges you have attended. Please request that transcripts and other credentials be sent directly to the Office of Graduate Admission, College of Education, 2400 N. Sheffield, Chicago, IL 60614-2215. We recommend that you request transcripts in sufficient time to meet the programs deadline.

The College of Education graduate programs require additional supporting credentials before an application file is considered complete. Please consult the specific program listing on the College of Education website at http://education.depaul.edu/Admission/GraduateAdmission/AdmissionRequirements.asp to determine what additional materials are required for admission and the deadline by which applications and supporting materials should be submitted.

Application Fee

You can pay the $40 application fee online as part of the online application or send a check or money order payable to DePaul University. Consult the application instructions for specific information about amount of the fee. If paying by check or money order, send it along with your supporting credentials to the Office of Graduate Admission, 2400 N. Sheffield, Chicago, IL 60614-2215. Applications submitted without an application fee will not be processed. The fee is non-refundable.

Application Deadline and Entry Terms

Consult the College website for program-specific information about application deadlines and to which academic terms the program admits new students.

Admission Decisions: The graduate admission office will notify you of your admission decision by letter. Admission applications will be reviewed only after the application and all supporting credentials, along with the application fee, have been submitted.

International Student Admission

Students who require a student visa (I-20) in order to study at DePaul must meet all admission requirements and demonstrate adequate financial support. Applicants educated in a country in which the native language is not officially recognized as English must also submit proof of English proficiency. College of Education programs require a minimum TOEFL score of 590 (paper-based), 243 (computer-based), or 96 with no individual score less than 22 (internet-based). DePaul also accepts the IELTS (International English Language Testing System) with a minimum score of 7.5. However, students who otherwise have a strong overall academic record, but cannot demonstrate the necessary English proficiency, may be admitted conditionally. If granted a conditional admission, an applicant may enroll in DePaul’s English Language Academy (ELA). To formally begin studies in the College of Education, an applicant that has been conditionally admitted must either successfully complete ELA’s University Bridge Certificate or otherwise demonstrate the necessary English language proficiency.

The letter of admission and I-20 are issued only after admission. International students are encouraged to complete their applications at least one month prior to any published program deadline, or no later than three months before the start of the term, whichever date comes first to allow for enough time for processing the I-20.

Applicant for Five-Year B.A./B.S. to M.Ed Programs

The five-year B.A./B.S. to M.Ed. program is geared toward current DePaul undergraduate students who have reached junior status (88 or more quarter hours) who have declared Liberal Arts and Science major that will lead to certification (biology, chemistry, English, environment science, history, mathematics, physics or social sciences). Students must have an overall grade point average of 3.0 or higher. If students have transferred to DePaul they must have at least 16 quarter hours completed at DePaul. Students must complete the Graduate College of Education Application for teaching and learning secondary education program, meeting all of the requirements outlined at the time of application. In addition to their application, students are required to submit the five-year B.A./B.S. to M.Ed. supplemental form, available at http://www/education.depaul.edu.

Applicant for Subsequent Certificate

If you hold a valid teaching certificate in the state of Illinois, you may enroll in a program designed to help you obtain a subsequent certificate in the following areas: early childhood education; elementary education; secondary education; world languages education; and special education.

In order to be considered for admission, you must submit a completed application as specified by the admission requirements for the teaching and learning program or the special education for certified teachers program. In addition to the standard application materials, you must also submit a valid Illinois teaching certificate and a letter from your school principal providing evidence of prior teaching experience and teaching performance. (If you are currently not employed as a teacher, then other evidence of prior teaching experience must be provided.) In addition, evidence of having passed the Illinois Basic Skills Test must be submitted by the end of
the first quarter of completed course work.

**Non-Degree Applicants**

The College of Education may admit non-degree seeking students who wish to take a course(s) to complete prerequisites for admission, personal enrichment or professional development. To enroll a non-degree student, all you will need to submit is an application and a $40 application fee. Official transcripts are not required for admissions but will be required after the completion of two courses. Please note that course work completed in a non-degree status may or may not be applicable to a degree program and is subject to approval by the advisor and appropriate department chair.

**Readmission Applicants**

If you were previously admitted to DePaul but have been absent for more than one year, you must submit the application form, DePaul transcripts and transcripts of any courses taken elsewhere during your absence. To use materials from a previous application, you must indicate, in written form, which materials you would like to apply to your new application. If the original application has been destroyed (after an absence of two years), you will be required to resubmit the entire application and all supplemental materials. A $10 application fee is required.

**Deferring Admission**

If you do not enroll in the term to which you were admitted, you may request that your admission be deferred for up to one year after the term to which you were admitted. After one year, you must reapply to the program. Email edgradadmissions@depaul.edu to request a deferral.

**Scholarship Opportunities**

Please subscribe to the COE Advising weekly email to stay informed about COE scholarship opportunities that become available throughout the school year.

Any questions can be sent to coescholarships@depaul.edu.

**Double Demon Scholarship**

Alumni from any of DePaul’s colleges who are admitted into a graduate degree program or a select certificate program* in the College of Communication, the College of Computing and Media, the College of Education, the College of Liberal Arts and Social Sciences, the College of Science and Health, the School for New Learning or the Kellstadt Graduate School of Business will automatically qualify for the Double Demon Scholarship.

This scholarship covers 25 percent of the tuition for a master's degree or a select certificate program*. Both full-time and part-time students are eligible. No scholarship application is required; all alumni admitted to these programs beginning with the winter quarter of 2014 or thereafter qualify. This scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards.

DePaul University employees are eligible for other employee tuition benefits through the university, and therefore are not eligible for the Double Demon Scholarship.

To learn more details about this scholarship, please contact your college admissions office.

*Scholarship does not apply to all certificate programs. Please contact one of the college admissions offices above for more information.

For other DePaul University scholarships please visit the Admission & Aid section on the DePaul home page.
Financial Aid

For all information regarding Financial Aid, please visit the Financial Aid link under the Admission & Aid section on the DePaul home page.

Please also contact the DePaul Central (For help with Financial Aid, Student Accounts and Student Records) For quick answers regarding financial aid, payment processes and student records during business hours, (312) 362-8610 or e-mail them at dpcl@depaul.edu.

Counseling and Special Education

The vision of the Department of Counseling and Special Education is to advance knowledge, model effective practices, as well as promote advocacy both for our professions and for those whom we serve. We prepare professionals based on sound theory-guided and evidence-based practices to be socially responsible leaders who value the dignity and integrity of all people, particularly those who are historically under-served or under-represented.

The Department of Counseling and Special Education is a community of scholars who value the role of the practitioner in all roles of teaching, research and service. Faculty use student-focused methods to enhance engagement of future professionals in learning and applying their knowledge and skills in diverse settings. This commitment to theory-guided and evidence-based practices is also demonstrated through faculty’s teaching, scholarship and service endeavors. We seek to foster Vincentian Personalism and provide opportunities for advancement through education.

The Department is comprised of two programs from distinct yet related fields. Each program has the following distinct foci and needs:

Counseling Program

The program in Counseling provides professionals with theoretical frameworks and competencies that prepare them to provide counseling services. Within the Counseling Program, there are three degree programs. These are clinical mental health counseling, school counseling, and college student development. The concentrations in clinical mental health and school counseling integrate Illinois state requirements for licensure and all concentrations meet national standards for professional practice. School counseling and college student development programs are 72 credit hours and the clinical mental health program is 90 credit hours. All program include a 100-hour practicum and two 300 credit hour internships. These clinical experiences are mandatory and for the school and clinical mental health counseling concentrations are required by the state for licensure. A degree from this program gives rise to career opportunities such as school counseling in elementary, middle, and high schools; counseling in community agencies; counseling in higher education; career counseling through the lifespan; counseling in hospitals or institutional-care settings; group counseling; couples and family counseling; or counseling in private practice. All of the programs emphasize and are designed to foster leadership, advocacy, and social justice.

Special Education Program

The Special Education program currently offers three concentrations all leading to either an M.A or an M.Ed. The Special Education for Teachers program prepares currently licensed teachers to work in special education and results in a LBS1 license (K-12). Students in the Special Education for Teachers program may work in a variety of settings as special education teachers. Combining the disciplines of Learning Disabilities and Reading Education, the Reading and Learning Disabilities concentration leads to a Reading Specialist License (K-12) and prepares students to work as reading specialists within school as well as professionals in clinics or private practice. A third concentration, the Special and Elementary Education (Licensure) in Elementary Education and Special Education, is for individuals with a Bachelors Degree in an area other than education. This pre-service program leads to both a LBS1 and an Elementary Education license. Graduates of the Special and Elementary Education (License) program may teach in either general or special education settings.
The following graduate programs are offered at Lincoln Park:

- M.A or M.Ed. Counseling
- M.A or M.Ed. Literacy and Specialized Instruction

**Educational Policy Studies & Research**

The Department of Educational Policy Studies and Research (EPSR) studies the complex dynamic interplay between the individual, society, and sociocultural processes that unfold in multiple educational contexts. It offers courses examining educational theories, institutions, practices, policies, and human development across the life span, and issues in educational research. EPSR represents the foundational disciplines of history, philosophy, psychology, sociology and human development as they are related to the study of education. It also considers debates about investigative methodology in education, and the contribution of research to the understanding of educational and social problems. Accordingly, its courses examine questions of disciplined inquiry, theoretical discourse, educational and social development, inequality, economic and political change, and cultural identity in relation to formal and informal education, in schools and related settings. The study of these issues is informed by an ethical disposition that features a critical examination of assumptions regarding norms and standards, and the quest for social justice. The Department provides disciplinary and research course work for students in other programs of the College of Education, while also preparing students from EPSR for positions in, for example, government, service organizations, private foundations and institutes, adult education and training, cultural organizations, as well as for doctoral work in educational policy studies for a university teaching and research career.

The following graduate programs are offered at Lincoln Park:

- M.A in Social and Cultural Foundations in Education
- M.Ed. in Social and Cultural Foundations in Education

**Leadership, Language & Curriculum**

The Department of Leadership, Language and Curriculum is a multidisciplinary academic body that aims to fully prepare urban multicultural professional practitioners and leaders to work in a variety of educational and community settings. Practitioners who complete a course of study offered by our department will contribute to their respective fields, balance theory with practice, consider multiple points of view in decision making, promote positive transformations in the settings in which they are engaged, and continue to function as life long learners. The practitioner’s professional role is shaped by ongoing reflection and positive engagement with the individual, the community, and the larger sociopolitical realities. The preparation we offer practitioners demonstrates our commitment to social justice, critical pedagogy, and positive educational transformation. The disciplines in the Department address these themes from a variety of perspectives that include language and culture, curriculum theory and development, and educational leadership in administration and supervision.

The following graduate programs are offered at Lincoln Park:

- M.A or M.Ed. in Bilingual Bicultural Education
- M.A or M.Ed. in Curriculum Studies
- M.A or M.Ed. in Educational Leadership
Teacher Education

The Department of Teacher Education prepares Urban Professional Multicultural Educators through an integrated program of courses and field experiences. Programs offered are designed for the preparation of future educators. The programs of study center around our commitment to excellence in teaching in today's diverse society through the investigation of significant educational issues, inquiry into student learning and effective teaching practices, and the use of technology in teaching and learning. We engage teacher candidates in critical reflection upon their practice throughout the program. We foster engagement in schools through our Partnership Schools and other school and agency affiliations. Upon completion of the program, teacher candidates measure themselves against the values of our guiding conceptual framework through the completion of professional portfolios. Values that are part of this framework include: commitment to social justice, critical pedagogy, and positive educational transformation within the context of a Vincentian personalism that honors the dignity of each person.

The program includes five distinctive features:

1. Becoming a teacher is viewed as a developmental process continuing at least through the first year of teaching;
2. Multiculturalism is infused throughout the curriculum;
3. Field experiences are an integral part of the curriculum;
4. Students are exposed to a variety of educational theories;
5. The program includes a research component as a basis for further professional development.

Doctoral Program

The primary, though perhaps not the only audience for this Ed.D. program consists of educational professionals who wish to improve the quality of their work in their current roles or to prepare themselves for new roles. This Ed.D. program is uniquely designed to link theory with practice and is not based on traditional assumptions about the relationships of theory with practice or on conventional notions about the status of practitioners and theorists. To be a practitioner is to make decisions about what to do and to take action; but professional practitioners — in education as in other areas — make reasonable decisions and act responsibly and ethically in the light of theoretical and professional knowledge.

- Professional educators are leaders as well as managers; they are not limited to making decisions according to rule or "by the book." They must use discretion and judgment as they seek to find the most defensible course of action in specific, complicated, and perhaps idiosyncratic circumstances. These situations are not merely instances of abstract concepts.
- Although decisions are made in the light of theoretical knowledge, theoretical knowledge cannot be applied to practice in the same way as principles are applied to cases. No single theory is able to encompass the complexities of all aspects of learning or schooling. Professional educators understand the principles and terms that characterize and limit a variety of theories and can select amongst them in order to better understand the situations in which they are involved.
- Decisions also are made in the light of professional knowledge, learned on the job as well as from more formal sources. Professional educators can articulate the informal, often tacit knowledge that they develop from practice so that it engages with and modifies the more formal theories learned from other sources.
- Professional educators not only make decisions, they act upon them responsibly. They examine the value commitments implicit in their actions; they question the appropriateness of the ends that they seek; they connect their educational contexts to broader social contexts; and they assess the effects of their actions on the achievements, dispositions, and propensities of students, colleagues and community members.

The following graduate programs are offered at Lincoln Park:

- Ed.D. in Curriculum Studies
- Ed.D. in Educational Leadership
- Ed.D. in Early Childhood Education
Early Childhood Licensure

Admission Requirements

To be eligible for the Early Childhood Education Licensure program, students must hold a bachelor’s degree from an accredited college or university.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Two letters of recommendation from professors or employer
- Resume
- A brief statement that explains your reasons for wanting to enter the Early Childhood Education program at DePaul and discusses your potential for becoming a teacher.

Course Requirements

Pre-Education Introductory Courses: 16 quarter hours required

- SCG 404 CHILD GROWTH AND DEVELOPMENT
- T&L 421 CHILD AND FAMILY IN THE URBAN COMMUNITY
- T&L 423 FUNCTIONAL BEHAVIOR ASSESSMENT: POSITIVE BEHAVIORAL SUPPORT AND INTERVENTION METHODS
- T&L 406 LANGUAGE DEVELOPMENT OF THE YOUNG CHILD

Advanced Standing Courses: 32 quarter hours required

- T&L 434 LITERACY, LITERATURE, & THE YOUNG CHILD
- T&L 411 ASSESSMENT IN EARLY CHILDHOOD SPECIAL EDUCATION
- T&L 420 MATH AND SCIENCE IN EARLY CHILDHOOD
- T&L 427 YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS
- T&L 432 EARLY CHILDHOOD CURRICULUM STRATEGIES AND PHILOSOPHY (BIRTH-8)
- SCG 410 INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES
- T&L 481 INTERNSHIP IN PRESCHOOL SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE) (2qh)
- T&L 482 INTERNSHIP IN PRIMARY SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE) (2qh)
- One course from the following list:
  o SCG 408 EDUCATION AND SOCIETY
  o SCG 409 SOCIOLOGY OF EDUCATION
  o SCG 411 PHILOSOPHY OF EDUCATION

Health, Safety and Child Nutrition Requirement

Candidates should be prepared to document course or other experience that shows they meet the knowledge and skills to provide experiences for young, which appreciates the interrelationships among child, family and the areas of health, safety and nutrition. Candidates should demonstrate comprehension of the issues of health, safety and nutrition that affect young children from the ages of birth through age 8. In addition, candidates are expected to demonstrate understanding of cultural issues and special needs of children with health impairments. Finally candidates should be familiar with the knowledge and application of practices that promote good nutrition, dental health, physical, social and emotional well being of young children.

- Can be completed by ECE 298 CHILD HEALTH SAFETY AND NUTRITION, a transferred equivalent, or by individual competency experience with a full-time Early Childhood Program faculty member.

Student Teaching: 8 quarter hours required

Registration in student teaching requires completion of all requirements and procedures listed in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete.

- T&L 595 EARLY CHILDHOOD STUDENT TEACHING (6 hours, grade of B- or better required)
- T&L 596 EARLY CHILDHOOD STUDENT TEACHING SEMINAR (2 hours)
Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Early Childhood majors must complete the following tests:

- **Test of Academic Proficiency (TAP) (test #400)** - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.*
- **Early Childhood Content Area Test (test #107)** – assesses knowledge of language and literacy development, learning across the curriculum, diversity, collaboration, and professionalism in the early childhood program. Test is required before Student Teaching (deadlines apply).
- **Assessment of Professional Teaching (APT)** – assesses knowledge of teaching planning, delivery, assessment, professionalism, and technology. Test is required to be licensed; recommended that it be taken before Student Teaching.
- **EdTPA** – assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of age levels (birth-age 8), multicultural experiences, and a minimum of 15 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements. Two internship courses, T&L 481 and T&L 482, are associated with theory courses and should be taken concurrently or soon after successful completion of the related theory courses. FEDS entry of these clinical hours is not required. For details on requirements, expectations, documentation, & courses in your program that require hours, visit the College of Education website.

Additional Requirements

Please also view the college core requirements under the MA or MED for Early Childhood for additional requirements. Note that the Early Childhood Education Licensure program listed above does not lead to a degree.

Elementary Licensure

Admission Requirements

To be eligible for the Elementary Education Licensure program, students must hold a bachelor’s degree from an accredited college or university.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Two letters of recommendation from professors or employer
- Resume
- A brief statement which explains your reasons for wanting to enter the Elementary or Middle School program at DePaul and discusses your potential for becoming a teacher.

Content Area Prerequisites

Elementary Education teachers need to have an understanding of the subjects taught in classrooms at the
Elementary level. DePaul’s program requires that students in the Elementary program have a minimum of one course in the following areas: writing, fine arts or literature, mathematics*, science, social science, and either US history or American government. These courses may be taken at the undergraduate level and may have been included in the student's bachelor’s degree program. Elementary Education students will be evaluated by an academic advisor after admission to determine if additional coursework is needed. Completion of content area requirements are not prerequisites for admission, however coursework must be completed before student teaching. It is strongly encouraged that applicants meet with an advisor after admission and prior to taking content courses.

*DePaul alumni that have taken LSP 120 or ISP 120 can receive credit towards the math requirement.

Course Requirements

Pre-Education Introductory Courses: 17 quarter hours required

- T&L 404 INTRODUCTION TO ELEMENTARY EDUCATION
- SCG 403 HUMAN DEVELOPMENT AND LEARNING: ELEMENTARY
- T&L 583 FIELD EXPERIENCE LAB
- T&L 418 LEARNING THROUGH THE ARTS
- Choose one course from the following list:
  - SCG 408 EDUCATION AND SOCIETY
  - SCG 409 SOCIOLOGY OF EDUCATION
  - SCG 411 PHILOSOPHY OF EDUCATION

Advanced Standing Courses: 31 quarter hours required

- T&L 412 EMERGING READING AND LANGUAGE ARTS
- T&L 416 TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS
- T&L 583 FIELD EXPERIENCE LAB
- LSI 446 PSYCHOLOGY AND EDUCATION OF THE EXCEPTIONAL CHILD
- T&L 413 READING/LANGUAGE ARTS IN THE MIDDLE GRADES
- T&L 583 FIELD EXPERIENCE LAB (public school setting required)
- T&L 415 TEACHING AND LEARNING ELEMENTARY SCHOOL SCIENCE
- T&L 419 CURRICULUM AND STRATEGIES: SOCIAL STUDIES
- T&L 584 PRE-STUDENT TEACHING FIELD EXPERIENCE
- T&L 422 CLASSROOM ASSESSMENT

Student Teaching: 8 quarter hours required

Registration in student teaching requires completion of all requirements and procedures listed in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete.

- T&L 585 ELEMENTARY STUDENT TEACHING (6 hours, grade of B- or better required)
- T&L 586 ELEMENTARY STUDENT TEACHING SEMINAR (2 hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Recommended/Optional Course:

SCG 439 is required to be eligible for middle school endorsements but is not required for the license. If taking SCG 439 for endorsement purposes, a grade of C or better is required.

- SCG 439 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Elementary majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Elementary/Middle Grades Content Area Test (test #110) – assesses knowledge of language arts and literacy, mathematics, science, social sciences, the arts, health, and physical education. Test is required before Student Teaching (deadlines apply).
Assessment of Professional Teaching (APT) – assesses knowledge of teaching planning, delivery, assessment, professionalism, and technology. Test is required to be licensed, recommended to be taken before Student Teaching.

EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate lab settings in conjunction with education courses. Students are required to register for one lab for designated paired course. For example, during the first quarter of the program students must register for T&L 404 and SCG 403 plus one field experience lab. During the quarter when students take T&L 413 and LSI 446, a public school that services students with special needs is required. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 15 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements. For details on requirements, expectations, documentation, & courses in your program that require hours, visit the College of Education website.

Additional Requirements

Please also view the college core requirements under the MA or MED for Elementary Education for additional requirements. Note that the Elementary Education Licensure program listed above does not lead to a degree.

Special Education for Teachers (Learning and Behavior Specialist 1)

Admission Requirements

To be eligible for the Special Education for Teachers (Learning and Behavior Specialist 1) licensure program, students must hold a bachelor’s degree from an accredited college or university and a valid Illinois teaching license.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- Copy of a valid Illinois teaching license
- A bachelor’s degree conferred by an accredited, recognized institution
- A previous grade point average of 2.75 or above on a 4.0 scale
- Two letters of reference, one of which must be from persons familiar with your academic work
- One official transcript from each college or university attended
- Personal statement (see below)*
- Resume or curriculum vitae showing evidence of adequate background for the program.
- The admission process also may include an interview with program faculty.

*Personal statement

Write a personal statement that discusses your future goals and your thoughts about your career as a special educator. As part of your statement please consider the following: the possible tasks/roles of a special education teacher are multiple and include inclusion specialist, team teacher with general educators, specialized instruction for exceptional students, advocate for exceptional students, response to intervention (RTI) coordinator, case manager or provider of staff development. From your perspective, rank order the tasks/roles and discuss your rationale for the top ranked roles.
Course Requirements

LBS1 K-12 Endorsement-Only Requirements (40 hours)

Special Education Core Courses: 32 hours required, grade of B+ or better required

- LSI 440 SURVEY OF EXCEPTIONAL LEARNERS: PSYCHOLOGY AND EDUCATION
- LSI 443 PSYCHOLOGICAL TESTS AND METHODS IN DIAGNOSIS
- LSI 458 TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES I
- LSI 462 INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH DISABILITIES I: ACCESSING GENERAL EDUCATION CURRICULUM
- LSI 467 TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES II
- LSI 468 TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES I
- LSI 469 TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES II
- LSI 457 SEMINAR AND RESEARCH IN SPECIAL EDUCATION

Clinical Experience

The program requires two summer practicum experiences. Each practicum involves six full weeks of intensive supervised field experience in a cooperating school that operates an extended school year program. Candidates must apply for each practicum, and upon approval they are placed in appropriate summer practicum sites by the program. Practicum sites may also screen candidates prior to accepting them for placement. Candidates who will be admitted to the practicum will assume full teaching responsibility and will have weekly opportunities for feedback and discussion of issues and problems encountered. A grade of B+ or better is required for eligibility to participate in each summer practicum.

Practicum Courses: 8 hours required, grade of B+ or better required

- LSI 552 PRACTICUM EXPERIENCE WITH HIGH INCIDENCE DISABILITIES
- LSI 553 PRACTICUM EXPERIENCE WITH LOW INCIDENCE DISABILITIES

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

LBS1 K-12 Endorsement students must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- LBS1 Content Area Test (test #155) – assesses knowledge of working with students with disabilities and special needs. Test is required before Student Teaching (deadlines apply)
- Special Education General Curriculum Test (test #163) – assesses knowledge of reading & literacy, mathematics, natural science, and social science. Test is required for admission to Student Teaching.
- Assessment of Professional Teaching (APT) – assesses knowledge of teaching planning, delivery, assessment, professionalism, and technology. Test is required to be licensed; recommended to be taken before Student Teaching.
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Registration, testing schedules, and fees for ISBE licensure tests are available on the ISBE website.

Note that the LBS1 Licensure program listed above does not lead to a degree.
Principal Licensure

Admission Requirements

To be eligible for the Principal Preparation licensure program, students must hold a master’s degree from an accredited college or university. They must have a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level. Students must also possess at least two years of fulltime successful teaching experience, hold a valid Illinois teaching license, and possess proof of passing the basic skills or test of academic proficiency. At the time of program completion, students must have at least 4 years of full-time, successful teaching experience to apply for licensure.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
- A copy of valid Illinois teaching license
- Proof of passing Basic Skills Test or TAP Exam
- One official transcript from all colleges and/or universities attended
- Letters from district office recommending entrance into the principal preparation program
- Four letters of recommendation (two from a supervisor and two from colleagues)
- Resume showing evidence of adequate background for the program
- Statement of purpose indicating why you want to be a principal

Course Requirements

Licensure Only (Public School Strand)

The principal licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

This is a 44 quarter hour program, which leads to the State of Illinois’ principal licensure.

Educational Leadership Courses: 36 quarter hours required, grade of C or better required in all courses

- A&S 491 EFFECTIVE LEADERSHIP OF SCHOOLS
- A&S 492 THE PRINCIPALSHIP
- A&S 493 DATA DRIVEN DECISION MAKING
- A&S 494 SCHOOL FINANCE
- A&S 495 SCHOOL LAW
- A&S 496 STAKEHOLDER RELATIONSHIPS
- A&S 498 INSTRUCTIONAL SUPERVISION AND SUPPORT
- A&S 602 PRINCIPAL LICENSURE INTERNSHIP I (2 quarter hours)
- A&S 603 PRINCIPAL LICENSURE INTERNSHIP II (2 quarter hours)
- A&S 608 CAPSTONE IN EDUCATIONAL LEADERSHIP

Curriculum Studies Courses: 8 quarter hours required, grade of C or better required in all courses

- CS 492 CREATING AND SUSTAINING PROFESSIONAL LEARNING COMMUNITIES
- CS 493 CURRICULUM DEVELOPMENT AND ASSESSMENT IN K-12 SCHOOLS

Specific requirements for entrance into the principal licensure program may be obtained from the office of graduate admissions or the LLC department office.

Individuals seeking the principal licensure must:

1. Complete an approved principal licensure program at an Illinois institution
2. Complete all state-mandated training and examinations
3. Have successfully completed the internship experiences
4. Hold a Master's degree

Upon successful completion of all principal licensure program requirements and any additional requirements,
students must apply for their license. Students are to work with the College of Education's Licensure Officer when applying for the license.

Note: Courses in this program leading to the principal licensure are designed for practicing educators and are not open to students and any other program without the specific permission of the educational leadership program director.

Principal Licensure with a Concentration in Catholic Leadership

Admission Requirements

To be eligible for the Principal Preparation licensure program with Catholic Leadership Concentration, students must hold a master’s degree from an accredited college or university. They must have a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level. Students must also possess at least two years of fulltime successful teaching experience, hold a valid Illinois teaching license, and possess proof of passing the basic skills or test of academic proficiency. At the time of program completion, students must have at least 4 years of full-time, successful teaching experience to apply for licensure.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
- A copy of valid Illinois teaching license
- Proof of passing Basic Skills Test or TAP Exam
- One official transcript from all colleges and/or universities attended
- Letters from district office recommending entrance into the principal preparation program
- Four letters of recommendation (two from a supervisor and two from colleagues)
- Resume showing evidence of adequate background for the program
- Statement of purpose indicating why you want to be a principal

Course Requirements

Licensure Only (Catholic School strand)

The principal licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

This is a 48 quarter hour program that prepares candidates for state licensure and specifically prepares candidates for the Principalship or Assistant Principalship in Catholic schools.

Educational Leadership Courses: 40 quarter hours required, grade of C or better required in all courses

- A&S 491 EFFECTIVE LEADERSHIP OF SCHOOLS
- A&S 493 DATA DRIVEN DECISION MAKING
- A&S 494 SCHOOL FINANCE
- A&S 495 SCHOOL LAW
- A&S 496 STAKEHOLDER RELATIONSHIPS
- A&S 498 INSTRUCTIONAL SUPERVISION AND SUPPORT
- A&S 570 HISTORICAL, PHILOSOPHICAL AND THEOLOGICAL FOUNDATIONS OF CATHOLIC SCHOOL LEADERSHIP
- A&S 571 SPIRITUAL AND ADMINISTRATIVE LEADERSHIP IN CATHOLIC SCHOOLS
- A&S 602 PRINCIPAL LICENSURE INTERNSHIP I (2 quarter hours)
- A&S 603 PRINCIPAL LICENSURE INTERNSHIP II (2 quarter hours)
- A&S 608 CAPSTONE IN EDUCATIONAL LEADERSHIP
Curriculum Studies Courses: 8 quarter hours required, grade of C or better required in all courses

- CS 492 CREATING AND SUSTAINING PROFESSIONAL LEARNING COMMUNITIES
- CS 493 CURRICULUM DEVELOPMENT AND ASSESSMENT IN K-12 SCHOOLS

Specific requirements for entrance into the principal licensure program may be obtained from the office of graduate admissions or the LLC department office.

Individuals seeking the principal licensure must:

1. Complete an approved principal licensure program at an Illinois institution
2. Complete all state-mandated training and examination
3. Have successfully completed the internship experiences
4. Hold a Master's degree

Upon successful completion of all principal licensure program requirements and any additional requirements, students must apply for their license. Students are to work with the College of Education's Licensure Officer when applying for the license.

Note: Courses in this program leading to the principal licensure are designed for practicing educators and are not open to students and any other program without the specific permission of the educational leadership program director.

Reading Specialist Endorsement

Admission Requirements

To be eligible for the Reading Specialist endorsement only program, students must hold a bachelor's degree from an accredited college or university and a valid Illinois teaching license.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
- Copy of a valid Illinois teacher license
- A bachelor's degree conferred by an accredited, recognized institution
- A previous grade point average of 2.75 or above on a 4.0 scale
- Two letters of reference, one of which must be from persons familiar with your academic work
- One official transcript from each college or university attended
- Resume or curriculum vitae showing evidence of adequate background for the program
- The admission process also may include an interview with program faculty

Note: The Reading Specialist Endorsement requires a previously completed Masters degree.

Course Requirements

Social and Cultural Studies Courses: 12 quarter hours required, grade of C or better required.

- SCG 410 INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES
- One course from the following list:
  - SCG 401 ADVANCED LIFESPAN DEVELOPMENT
  - SCG 402 PSYCHOLOGY OF LEARNING
  - SCG 403 HUMAN DEVELOPMENT AND LEARNING: ELEMENTARY
  - SCG 406 HUMAN DEVELOPMENT AND LEARNING: SECONDARY
  - SCG 439 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION
- One course from the following list:
  - SCG 408 EDUCATION AND SOCIETY
  - SCG 409 SOCIOLOGY OF EDUCATION
Reading Specialist Core Courses: 20 quarter hours required, grade of C or better required.

- LSI 430 INTRODUCTION TO READING ASSESSMENT
- LSI 431 FOUNDATIONS OF LITERACY
- LSI 432 DEVELOPING LITERACY
- LSI 433 ASSESSMENT AND DIAGNOSTIC TEACHING OF READING
- LSI 438 LITERATURE-BASED AND CONTENT AREA LITERACY INSTRUCTION

Leadership Courses: 8 quarter hours required, grade of C or better required.

- LSI 435 LITERACY PROGRAMS: CURRICULUM AND COLLABORATION
- LSI 437 LEADERSHIP AND PROFESSIONAL DEVELOPMENT IN LITERACY

Clinical Experience

The practicum courses provide an opportunity to apply knowledge from course work to teaching struggling learners and those with disabilities. In these courses, students provide diagnostic and remedial services to children and adolescents from the Chicago area under the supervision of program faculty. These courses are offered in an on-campus facility.

Practicum Courses: 12 quarter hours required, grade of C or better

- LSI 542 PRACTICUM IN LITERACY ASSESSMENT
- LSI 543 PRACTICUM IN LITERACY INSTRUCTION AND ASSESSMENT
- LSI 544 PRACTICUM IN LITERACY INSTRUCTION, ASSESSMENT, AND COLLABORATION

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Reading Specialist students must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Reading Specialist Content Area Test (test #176) – assesses knowledge of language, reading, and literacy.
- Assessment of Professional Teaching K-12 (APT) – assesses knowledge of teaching planning, delivery, assessment, professionalism, and technology.

Endorsement in Special Education Option

Candidates may also have the option of pursuing an endorsement in special education while enrolled in or immediately following the Reading Specialist program. Interested candidates can discuss this option with a faculty advisor.

School Counselor Licensure

The Counseling program’s School Counseling concentration is an Illinois State Board of Education (ISBE) approved program for the School Counselor endorsement on an Illinois Professional Educator License. ISBE states the following guidelines:

Individuals seeking the School Counselor endorsement must:

1. complete an approved school counseling program at an Illinois institution
2. hold a Master’s degree in school counseling; counseling or a related field; or an educational field
3. pass the Basic Skills or Test of Academic Proficiency (TAP) and School Counselor content-area tests
To be eligible for the School Counselor only program, students must hold a bachelor's degree from an accredited college or university. It is recommended that you have at least one year of working experience.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Three letters of recommendation: one from a professor addressing your academic ability, one from an employer, and the third from either another professor or employer
- Resume
- A personal statement (see below for more information)

The admission process also may include an interview with program faculty.

Personal Statement

Please answer all of the following questions. Your entire response should not exceed 1,500 words (or approximately 300 words per question).

1. Discuss why you want to enter the counseling field. Demonstrate in your response that you have researched the field and have a basic understanding of what counseling professionals do.
2. Given what you have researched about the profession, discuss your short-term and long-term professional goals should you eventually graduate from our program. Integrate into your response why DePaul's counseling program will help you achieve your goals.
3. Discuss why self-awareness, self reflection and self-care are important skills for counselors. Explain ways in which you would attend to all of these should you be a student in our program.
4. Explain how your personal values and ethical beliefs will be an asset to you as a future counselor and explain any challenges you may face in future practice. Provide concrete examples from your personal or professional life to help illustrate your points.
5. Discuss your understanding of “multicultural proficiency” and “social justice.” Explain how you believe these play a role in the work of counseling professionals as well as how these fit with your own beliefs and values. Provide concrete examples from your personal or professional life to help illustrate your points.

Course Requirements

Counseling Courses: 52-56* quarter hours required, grade of B- or better required

- CSL 451 LEGAL AND ETHICAL ISSUES IN COUNSELING
- CSL 452 INTRODUCTION TO THE COUNSELING PROFESSION
- CSL 458 GROUP COUNSELING
- CSL 461 TESTING AND APPRAISAL
- CSL 467 COUNSELING THEORIES
- CSL 475 COLLEGE AND CAREER READINESS COUNSELING FOR SCHOOL COUNSELORS
- CSL 489 PSYCHOPATHOLOGY
- CSL 501 COUNSELING SKILLS
- CSL 510 MULTICULTURAL COUNSELING
- CSL 514 CRISIS INTERVENTION FOR SCHOOL COUNSELING
- CSL 519 SPECIAL EDUCATION: LEGAL AND PROFESSIONAL ISSUES FOR SCHOOL COUNSELORS
- CSL 520 COUNSELING CHILDREN AND ADOLESCENTS
- CSL 521 CONTEXTUAL DIMENSIONS OF SCHOOL COUNSELING
- CSL 522 DELIVERY OF COMPREHENSIVE DEVELOPMENTAL SCHOOL COUNSELING PROGRAMS
- CSL 523 LEARNING AND CLASSROOM MANAGEMENT FOR SCHOOL COUNSELORS (required only for students without a teaching certificate)

Social and Cultural Studies Courses: 8 quarter hours required, grade of B- or better required
Clinical Experience

Students complete their Clinical Experience during the last year in the program. The Clinical Experience Courses include the Practicum, Internship in Counseling I, and Internship in Counseling II. Students are enrolled in the Practicum course Autumn Quarter; Internship in Counseling I Winter Quarter; Internship in Counseling II Spring Quarter. Students must complete a formal application process to participate in the Clinical Experience courses. This includes attending a clinical orientation a full year before beginning the Clinical Experience, submitting an initial application, and securing a placement site. Consult academic advisor for additional information on application and course enrollment process.

Clinical Experience Courses: 12 quarter hours required, grade of B or better required

Prerequisites: All courses with the exception of CSL 512 must be completed prior to being enrolled in the Practicum courses.

- CSL 552 PRACTICUM IN COUNSELING
- CSL 553 INTERNSHIP IN COUNSELING I (300 clock hours)
- CSL 554 INTERNSHIP IN COUNSELING II (300 clock hours)

Upon completion of the School Counseling concentration’s coursework and the additional State requirements, students must apply for their certificate. Students are to work with the College of Education’s Licensure Officer when applying for the license/endorsement.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their professional license area.

School Counseling students must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. *Students should consult with an advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- School Counseling Content Area (test #181) – assesses knowledge of student development, assessment, the school environment and the school counseling profession.

Secondary Education Licensure

Admission Requirements

To be eligible for the Secondary Education Licensure program, students must hold a bachelor’s degree from an accredited college or university.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Two letters of recommendation from professors or employer
- Resume
A brief statement which explains your reasons for wanting to enter the Secondary Education program at DePaul and discusses your potential for becoming a teacher.

**Course Requirements**

**Pre-Education Introductory Courses: 12 quarter hours required**

- T&L 425 CURRICULUM AND INSTRUCTION IN SECONDARY EDUCATION
- SCG 406 HUMAN DEVELOPMENT AND LEARNING: SECONDARY
- One course from the following list:
  - SCG 408 EDUCATION AND SOCIETY
  - SCG 409 SOCIOLOGY OF EDUCATION
  - SCG 411 PHILOSOPHY OF EDUCATION

**Advanced Standing Courses: 20 quarter hours required**

- LSI 446 PSYCHOLOGY AND EDUCATION OF THE EXCEPTIONAL CHILD
- BBE 501 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM
- SCG 451 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION (Spans over two quarters and taken in conjunction with specified methods courses)
- T&L 525 READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM
- TCH 495 ASSESSMENT ISSUES IN SECONDARY EDUCATION

**Special Methods Courses: 8 quarter hours required**

Complete the course(s) listed that correspond to your content area

**Biology**

- TCH 474 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- TCH 484 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2

**Chemistry**

- TCH 474 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- TCH 484 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2

**Environmental Science**

- TCH 474 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- TCH 484 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2

**English**

- TCH 471 TEACHING ENGLISH IN THE HIGH SCHOOL 1
- TCH 481 TEACHING ENGLISH IN THE HIGH SCHOOL 2

**History**

- TCH 472 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1
- TCH 482 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2

**Math**

- TCH 473 TEACHING MATHEMATICS IN THE HIGH SCHOOL 1
- TCH 483 TEACHING MATHEMATICS IN THE HIGH SCHOOL 2

**Physics**

- TCH 474 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- TCH 484 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2

**Social Science**

- TCH 472 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1
- TCH 482 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2

**Visual Arts**

- T&L 465 ART AND PEDAGOGY
- T&L 466 TEACHER AS ARTIST

**Student Teaching: 8 quarter hours required**
Registration in student teaching requires completion of all requirements and procedures listed in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete.

- T&L 590 SECONDARY STUDENT TEACHING (6 hours, grade of B- or better required)
- T&L 591 SECONDARY STUDENT TEACHING SEMINAR (2 hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

**Recommended/ Optional Course**

SCG 439 is required for middle school endorsements but is not required for the licensee. If taking SCG 439 for endorsement purposes, a grade of C or better is required.

- SCG 439 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION

**Content Area Courses**

All students need to have sufficient knowledge of the subject they will be teaching. Illinois State Board of Education requires a minimum of 48 quarter hours (32 semester hours) in the content area subject. Students should meet with their designated Content Area advisor at the beginning of their program for an official written content evaluation and provide a copy to your academic advisor. Requirements can be satisfied by undergraduate coursework or courses taken elsewhere. Content courses must be completed before student teaching.

**Requirements for Secondary Education Biology**

Note: Effective for all individuals applying for licensure beginning February 1, 2012, all coursework in the content area must earn a grade of C or better.

- General Biology I
- General Biology II
- General Biology III
- Ecology
- Cell Biology
- Physiology
- Genetics
- Biology Elective
- Biology Elective
- Biology Elective
- Biology Elective with lab
- Biology Elective with lab
- College Algebra or Calculus I
- Trigonometry or Calculus II
- General Chemistry I
- General Chemistry II
- General Chemistry III
- General Physics I
- General Physics II

**Requirements for Secondary Education Chemistry**

Note: Effective for all individuals applying for licensure beginning February 1, 2012, all coursework in the content area must earn a grade of C or better.

Chemistry Core: 36 quarter hours required, grade of C or better required

- General Chemistry I
- General Chemistry II
- General Chemistry III
- Organic Chemistry I
- Organic Chemistry II
- Analytical Chemistry
- Physical Chemistry I
- Physical Chemistry II
- Applied Probability and Statistics (2 qh)
- Chemistry Seminar (2qh)
- Calculus I
- Calculus II
Calculus III
General Physics I
General Physics II
General Physics III

Choose three of the following Chemistry courses: 12 quarter hours

- Organic Chemistry III
- Air Chemistry
- Solid Waste Chemistry
- Physical Chemistry III
- Intermediate Inorganic Chemistry
- Intermediate Organic Chemistry
- Biochemistry I
- Biochemistry II
- Biochemistry III
- Nuclear Chemistry
- Biophysical Chemistry
- Medicinal Chemistry
- Drugs and Toxicology
- Nutrition
- Applied Spectroscopy

Requirements for Secondary Education English

All coursework in the content area must earn a grade of C or better and a minimum of 18 quarter hours (12 semester hours) must be coursework at an undergraduate upper level or graduate level.

- Introduction to Literature
- Reading Poetry
- Shakespeare
- Literary Research and Writing/Reading Prose
- Linguistics/Grammar/History of the English Language
- 3 British Literature courses
- Romanticism in American Literature
- 2 American Literature courses
- 300 level Literature elective

Requirements for Secondary Education Environmental Science

All coursework in the content area must earn a grade of C or better.

- General Biology I
- General Biology II
- General Biology III
- General Chemistry I
- General Chemistry II
- General Chemistry III
- General Physics I
- General Physics II
- General Physics III
- Ecology
- Earth System Science
- Human Impacts on the Environment
- Environmental Rhetoric and Politics
- Environmental Data Analysis
- Environmental Science Seminar
- Environmental Impact Analysis

Requirements for Secondary Education History

All coursework in the content area must earn a grade of C or better.

- T&L 455 (also a required graduate class)
- US History I
- US History II
- US History – upper level
- US History – upper level
- World History I
- World History II
Additional licensure requirements: (one course in each area required)

- Geography
- Economics
- Political Science
- Sociology/Anthropology

**Requirements for Secondary Education Mathematics**

All coursework in the content area must earn a grade of C or better and a minimum of 18 quarter hours (12 semester hours) must be coursework at an undergraduate upper level or graduate level.

- Calculus I
- Calculus II
- Calculus III
- Intro to Math Reasoning OR Discrete Math I and Discrete Math II
- Multivariable Calculus I
- Multivariable Calculus II
- Linear Algebra
- Programming Language
- Abstract Algebra I
- Theory of Numbers or Abstract Algebra II
- Geometry I
- Geometry II or Real Analysis I
- Probability & Statistics
- History of Mathematics

**Requirements for Secondary Education Physics**

All coursework in the content area must earn a grade of C or better.

- Physics I
- Physics II
- Physics III
- Physics IV
- Meth of Computational & Theoretical Phys I
- Meth of Computational & Theoretical Phys II
- Physics Elective
- Physics Elective
- Physics Elective
- Physics Elective
- Mechanics
- Calculus I
- Calculus II
- Calculus III
- Multivariable Analysis & Linear Algebra I
- Multivariable Analysis & Linear Algebra II
- General Chemistry I
- General Chemistry II
- General Chemistry III

**Requirements for Secondary Education Social Science**

All coursework in the content area must earn a grade of C or better.

- US History I
- US History II
- US History – upper level
- US History – upper level
- World History I
- World History II
- Non-US, World History – upper level
- Non-US, World History – upper level
- Secondary Field (6 courses minimum): Choose single field from Anthropology, Economics, Geography, Political Science, Psychology, or Sociology.
Additional licensure requirements

- One course in each area required
  - Geography
  - Economics
  - Political Science
  - Sociology/Anthropology

**Requirements for Secondary Education Visual Arts**

All coursework in the content area must earn a grade of C or better and a minimum of 18 quarter hours (12 semester hours) must be coursework at an undergraduate upper level or graduate level.

- Two Dimensional Foundation
- Three Dimensional Foundation
- Drawing
- Intermediate or Adv. Drawing
- Painting
- Sculpture
- Computer Graphics
- Printmaking
- Principles of Art History
- Photography
- Video
- Art & Design I
- Art & Design II

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education majors must complete the following tests:

- **Test of Academic Proficiency (TAP)** (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.*
- **Content Area Test** (test numbers below) – assesses knowledge of content area. Test is required before Student Teaching (deadlines apply).
- **Assessment of Professional Teaching (APT)** – assesses knowledge of teaching planning, delivery, assessment, professionalism, and technology. Test is required to be licensed; recommended to be taken before Student Teaching.
- **EdTPA** - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

**Biology**
- Science: Biology Content Area Test (test #105)

**Chemistry**
- Science: Chemistry Content Area Test (test #106)

**English**
- English Language Arts Content Area Test (test #111)

**Environmental Science**
- Science: Environmental Science Content Area Test (test #112)

**History**
- Social Science: History Content Area Test (test #114)

**Math**
- Math Content Area Test (test #115)

**Physics**
- Science: Physics Content Area Test (test #116)

**Social Science**
Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 15 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements. For details on requirements, expectations, documentation, & courses in your program that require hours, visit the College of Education website.

Additional Requirements

Please also view the college core requirements under the MA or MED for Secondary Education for additional requirements. Note that the Secondary Education Licensure program listed above does not lead to a degree.

Special and Elementary Education (SEE)

Admission Requirements

- A completed College of Education graduate application
- A bachelor’s degree conferred by an accredited, recognized institution
- A previous grade point average of 2.75 or above on a 4.0 scale
- Two letters of reference, one of which must be from persons familiar with your academic work
- One official transcript from each college or university attended
- Personal statement (see application for details)
- Writing sample (e.g., a term paper, seminar paper, or senior thesis or portion thereof)
- Resume
- Interview

Course Requirements

Content Area Prerequisites

A transcript evaluation will be completed upon admission to the program. If deficiencies exist, they must be completed prior to student teaching.

- College coursework in Writing
- College coursework in Fine Arts or Literature
- College coursework in Mathematics
- College coursework in Science
- College coursework in American Government or U.S. History
- College coursework in Social Science

Pre-Education Introductory Core: 20 quarter hours required, grade of C or better required

- LSI 442 SURVEY AND CHARACTERISTICS OF THE EXCEPTIONAL LEARNER
- SCG 401 ADVANCED LIFESPAN DEVELOPMENT
- SCG 408 EDUCATION AND SOCIETY
- T&L 409 PROFESSIONAL PRACTICE IN ELEMENTARY SCHOOLS
- T&L 418 LEARNING THROUGH THE ARTS

Advanced Standing
All Education students have a two stage admission process. Upon being admitted to the College of Education, students begin as a Pre-Education Teacher Candidate. Requirements must be met to progress in the major and take courses in the Advanced Standing category:

- All students must complete specific requirements in order to take the Advanced Standing courses. Requirements include:
  - Pass the Illinois Certification Basic Skills Test or Test of Academic Proficiency (TAP)
  - Cumulative GPA of 3.00
  - A minimum of 8 quarter hours completed at DePaul
  - Petition for Advanced Standing form

You can apply for advanced standing once you have completed the above requirements by submitting the Petition for Advanced Standing form.

**Advanced Standing Courses: 48 quarter hours required, grade of C or better required**

- LSI 443 PSYCHOLOGICAL TESTS AND METHODS IN DIAGNOSIS
- LSI 458 TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES I (BD)
- LSI 461 COLLABORATIVE PRACTICE AND SPECIAL EDUCATION
- LSI 462 INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH DISABILITIES I: ACCESSING GENERAL EDUCATION CURRICULUM
- LSI 467 TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES II (Reading/LD)
- LSI 468 TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES I (MR/Autism)
- LSI 469 TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES II (PH/Multiple)
- SCG 410 INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES
- SCG 439 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION
- T&L 413 READING/LANGUAGE ARTS IN THE MIDDLE GRADES
- T&L 415 TEACHING AND LEARNING ELEMENTARY SCHOOL SCIENCE
- T&L 416 TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements**

- Completion of all Content Area Prerequisites, Pre-Education, and Advanced Standing courses
- Overall cumulative G.P.A. of 3.00 or better
- Meet all other program requirements (e.g., residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area tests (see below)

**Clinical Requirements**

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education.

**Student Teaching Timeline and Deadlines**

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.

Academic requirements (above) due one quarter before expected quarter of student teaching.

Clinical requirements (above) are completed as course requirements. Field experience hours are entered by the student as the requirement is attached to coursework. Online Faculty Evaluations are entered by the instructor as attached to courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual school districts may have additional requirements (application, training, background check, etc.)

**Student Teaching: 12 quarter hours required, grade of B- or better required**
Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Special and Elementary Education (Licensure) students must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Elementary Content Area Test (test #110) – assesses knowledge of the content of what is taught at the elementary level. Test is required before Student Teaching (deadlines apply).
- LBS1 Content Area Test (test #155) – assesses knowledge of working with students with disabilities and special needs. Test is required before Student Teaching (deadlines apply).
- Special Education General Curriculum Test (test #163) – assesses knowledge of reading & literacy, mathematics, natural science, and social science. Test is required before Student Teaching (deadlines apply).
- Assessment of Professional Teaching (APT) – assesses knowledge of teaching planning, delivery, assessment, professionalism, and technology. Test is required to be licensed, recommended to be taken before Student Teaching.
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. 200 hours of non-paid pre-student teaching field experience are required. Special requirements include: regular and special education settings, experiences in inclusive settings, special education experiences at the high school level. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

Subsequent License

The State Board of Education authorizes higher education institutions with approved teacher preparation programs to offer subsequent licensure programs. Under the rules for licensure and assignment of educational staff, subsequent licensure are to be earned through passage of all relevant tests and completion of either a full or "focused" licensure program offered by an institution of higher education.

DePaul offers subsequent licensure programs in the following areas of teacher education:

- Early Childhood Education
- Elementary Education
- Secondary Education (English, Math, Science, History, Social Science, Visual Arts)
- World Languages Education (K-12)
- Special Education (LBS1)

Each institution is expected to provide candidates with information about how to apply for such a licensure program and how, in the case of focused programs, the institution will determine what prior coursework and experience can be counted toward the requirements for the subsequent licensure. Candidates who complete a full or focused subsequent licensure program will be recommended for the license by entitlement. The following
is a summary of the policies on focused programs at DePaul University.

**General Policies**

- These are licensure-only programs and do not lead to a degree. However, degree options are available, and candidates could subsequently apply to the appropriate degree program.
- All courses must be taken at DePaul; no transfer credit is allowed.
- General education courses are not required.
- Accepted candidates are admitted to the T&L or LLSI licensure-only program and upon admission have advanced standing (no additional requirements for admission to the Unit).
- Accepted candidates will initially meet with a program faculty member and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the license desired and that meets the minimum requirements (as set out below).
- These focused programs are subject to change during the course of the program. If assessments of the candidate's performance suggest that the program plan should have additional requirements, the program will be modified accordingly.
- Accepted candidates will be required to complete student teaching at the grade level and/or content area in which the license is sought OR complete an intensive internship that will include extended contact hours with students at the grade level in which the license is sought and will include a demonstration of teaching proficiency at this grade level. The candidate's faculty advisor will determine the nature of the internship.

**Admission Requirements**

If you hold a valid teaching license in the state of Illinois, you may enroll in a program designed to help you obtain a subsequent license in the following areas: early childhood education; elementary education; secondary education; world languages education; and special education.

In order to be considered for admission for a Subsequent Teaching, you must hold bachelor’s degree from an accredited college or university and hold a valid teaching license. To apply, please submit a completed application as specified by the admission requirements for the teaching and learning program or the special education for licensed teachers program. In addition to the standard application materials, you must also submit a valid Illinois teaching license and a letter from your school principal providing evidence of prior teaching experience and teaching performance. (If you are currently not employed as a teacher, then other evidence of prior teaching experience must be provided.) In addition, evidence of having passed the Illinois Basic Skills/TAP Test must be submitted by the end of the first quarter of completed course work.

In addition to the standard requirements for admission to graduate programs, candidates must submit:

- Valid Illinois Teaching License
- A letter from candidate's School Principal giving evidence of prior teaching experience and teaching performance (If the candidate is currently not employed as a teacher, then other evidence of prior teaching experience must be provided).
- Evidence of having passed the Illinois TAP Test (If a waiver was granted for this test by ISBE due to the candidate holding a license in another state or if a candidate does not have evidence of having passed the test, the candidate must provide evidence of passing before the end of her or his first quarter at DPU).

**Subsequent Licensure Requirements for the following programs are provided below:**

- Early Childhood Education
- Elementary Education
- Secondary Education (English, Math, Science, History, Social Science, Visual Arts)
- World Languages Education (K-12)
- Special Education (LBSI)

Besides meeting the following requirements, each program completer is expected to demonstrate the appropriate professional dispositions. A list of those dispositions are provided below.

**Subsequent Licensure Requirements for Early Childhood Education**

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the license desired and that meets the following minimum requirements:

**Course Requirements**

A minimum of 6 courses from:
- SCG 408/SCG 409/SCG 411 Social and Cultural Foundations
- T&L 431 EARLY LANGUAGE AND LITERACY DEVELOPMENT
- T&L 411 and T&L 481 (6 qh total); or a 4 qh Practicum and one internship experience course (6 qh total)
- T&L 432 and T&L 482 (6 qh total); or a 4 qh Practicum and one internship experience course (6 qh total)
- One of the following:
  - T&L 423 FUNCTIONAL BEHAVIOR ASSESSMENT: POSITIVE BEHAVIORAL SUPPORT AND INTERVENTION METHODS
  - T&L 410 CHILDREN'S LITERATURE AND FAMILY LITERACY
  - T&L 421 CHILD AND FAMILY IN THE URBAN COMMUNITY
- T&L 420 MATH AND SCIENCE IN EARLY CHILDHOOD
- T&L 427 YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION

**Student Teaching or Internship Requirements (to be determined by faculty advisor)**

- 12 weeks of student teaching in early childhood education
  or 1 candidate-specific internship, as defined by faculty advisor (T&L 615, Research and Internship in Education)

**Licensure Requirements**

- Illinois Test of Academic Proficiency (TAP)
- Early Childhood Content Area Test
- Early Childhood APT Test
- Health & Nutrition Competency

**Subsequent Licensure Requirements for Elementary Education**

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the license desired and that meets the following minimum requirements:

**Course Requirements**

A minimum of 6 courses from:

- SCG 408/SCG 409/SCG 411 Social and Cultural Foundations course
- T&L 412 EMERGING READING AND LANGUAGE ARTS
- T&L 413 READING/LANGUAGE ARTS IN THE MIDDLE GRADES
- T&L 415 TEACHING AND LEARNING ELEMENTARY SCHOOL SCIENCE
- T&L 416 TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS
- T&L 419 CURRICULUM AND STRATEGIES: SOCIAL STUDIES
- T&L 422 CLASSROOM ASSESSMENT
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- BBE 474 READING AND ELLS
- BBE 402 BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
- BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE
- LSI 430 INTRODUCTION TO READING ASSESSMENT
- LSI 431 FOUNDATIONS OF LITERACY
- LSI 433 ASSESSMENT AND DIAGNOSTIC TEACHING OF READING

**Student Teaching or Internship Requirements (to be determined by faculty advisor)**

- 10 weeks of student teaching in elementary education
  or 1 candidate-specific internship, as defined by faculty advisor (T&L 615, Research and Internship in Education)

**Licensure Requirements**

- Illinois Test of Academic Proficiency (TAP)
- Elementary Education Content Area Test
- Elementary APT Test

**Subsequent Licensure Requirements for Secondary Education**
Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the license desired and that meets the following minimum requirements:

**Course Requirements**

A minimum of 6 courses from:

- SCG 408 / SCG 409 / SCG 411 Social and Cultural Foundations course
- T&L 525 READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM
- BBE 501 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM
- TCH 495 ASSESSMENT ISSUES IN SECONDARY EDUCATION
- Content area theory & practice courses
  - English: TCH 421, TCH 471, TCH 481
  - Math: TCH 423, TCH 473, TCH 483
  - Science: TCH 424, TCH 474, TCH 484
  - History/Social Science: TCH 422, TCH 472, TCH 482
  - Visual Arts: T&L 465, T&L 466
- Graduate level content area courses Arts and Sciences

**Content Area Requirements**

A minimum of 32 semester hours is required in the subject area the candidate intends to teach. Deficiencies in the content area will be evaluated by program faculty. Secondary content area deficiencies may be taken at the undergraduate level and may require courses in addition to the minimum requirements above.

**Student Teaching or Internship Requirements (to be determined by faculty advisor)**

- 10 weeks of student teaching in secondary education
- or 1 candidate-specific internship, as defined by faculty advisor (T&L 615, Research and Internship in Education)

**Licensure Requirements**

- Illinois Test of Academic Proficiency (TAP)
- English, Math, Science, Social Science or Visual Arts Content Area Test
- Secondary APT Test

**Subsequent Licensure Requirements for World Language Education**

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the license desired and that meets the following minimum requirements:

**Course Requirements**

A minimum of 6 courses from:

- SCG 408/ SCG 409/ SCG 411 Social and Cultural Foundations course
- T&L 525 READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM
- BBE 560 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
- T&L 421 CHILD AND FAMILY IN THE URBAN COMMUNITY
- T&L 449 STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
- BBE 570 SECOND & WORLD LANGUAGE LITERACIES AND CULTURES
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- BBE 476 BILITERACY PRACTICES: SECONDARY/ADULT
- BBE 402 BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
- BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE
- Graduate level content courses in the world language to be taught

**Content Area Requirements**

A minimum of 32 semester hours is required in the world language the candidate intends to teach. Deficiencies
in the content area will be evaluated by program faculty. World language content area deficiencies may be taken at the undergraduate level and may require courses in addition to the minimum requirements below:

**Student Teaching or Internship Requirements (to be determined by faculty advisor)**

- 10 weeks of student teaching in world language education
  or 1 candidate-specific internship, as defined by faculty advisor (T&L 615, Research and Internship in Education)

**Licensure Requirements**

- Illinois Test of Academic Proficiency (TAP)
- ACTFL Oral Language Proficiency Interview Or DePaul Oral Language Proficiency Exam (Spanish only)
- Foreign Language Content Area Test
- Secondary APT Test

**Dispositions**

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions.
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others' perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

**Subsequent Licensure Requirements for Special Education (LBS1)**

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the license desired and that meets the following minimum requirements:

**Course Requirements**

- LSI 440 SURVEY OF EXCEPTIONAL LEARNERS: PSYCHOLOGY AND EDUCATION
- LSI 443 PSYCHOLOGICAL TESTS AND METHODS IN DIAGNOSIS
- LSI 467 TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES II
Content Area Requirements

Because special educators must be prepared to teach a variety of subjects at a variety of grades, candidates must have a solid foundation in the content areas below. Deficiencies in the content area will be evaluated as part of the application process. Deficiencies may be taken at the undergraduate level and may require courses in addition to the minimum requirements below.

1 college course in each of the following:

- Writing
- Fine Art of Literature
- Science
- Math
- US History or US Government
- Social Science

Practicum Requirements

- LSI 552 PRACTICUM EXPERIENCE WITH HIGH INCIDENCE DISABILITIES
- LSI 553 PRACTICUM EXPERIENCE WITH LOW INCIDENCE DISABILITIES

Licensure Requirements

- Illinois Test of Academic Proficiency (TAP)
- General Education Content for Special Educators
- Special Education Content Area Test
- K-12 APT Test (if not passed already)

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality
World Language Education Licensure

Admission Requirements

To be eligible for the World Language Licensure only program, students must hold a bachelor’s degree from an accredited college or university.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Two letters of recommendation from professors or employer
- Resume
- A brief statement which explains your reasons for wanting to enter the World Language Licensure program at DePaul and discusses your potential for becoming a teacher.

Course Requirements

Education Courses: 40 quarter hours required, grade of C or better required.

- SCG 406 HUMAN DEVELOPMENT AND LEARNING: SECONDARY
- T&L 425 CURRICULUM AND INSTRUCTION IN SECONDARY EDUCATION
- Choose one course from the following list:
  - SCG 408 EDUCATION AND SOCIETY
  - SCG 409 SOCIOLOGY OF EDUCATION
  - SCG 411 PHILOSOPHY OF EDUCATION

Education Elective Course: 4 quarter hours are required, grade of C or better required.

Open elective credit also is required to meet the minimum graduation requirement of 60 quarter hours. Choose an Education course in consultation with the Academic Advisor or Content Advisor. Courses must be approved by the WLE Program Director prior to registration and requires graduate level registration.

- Elective Course

Student Teaching: 8 quarter hours required

Registration in student teaching requires completion of all requirements and procedures listed in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete.

- T&L 592 WORLD LANGUAGES STUDENT TEACHING (6 hours, grade of B- or better required)
- T&L 593 WORLD LANGUAGES SEMINAR (2 hours)
- EDU 95 EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Recommended/Optional Course

SCG 439 is required for middle school endorsements but is not required for the license. If taking SCG 439 for endorsement purposes, a grade of C or better is required.

- SCG 439 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION
Content Area Courses

All students need to have sufficient knowledge of the subject they will be teaching. Illinois State Board of Education requires a minimum of 48 quarter hours (32 semester hours) in the content area subject. Students should meet with their designated Content Area advisor at the beginning of their program for an official written content evaluation and provide a copy to your academic advisor. Requirements can be satisfied by undergraduate coursework or courses taken elsewhere. Content courses must be completed before student teaching.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. World Language Education majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. It is recommended to be taken during the first or second quarter in the program. Test is required before Student Teaching (deadlines apply). Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Content Area Test (test numbers below) – assesses knowledge of the language and culture. Test is required before Student Teaching (deadlines apply).
- OPI Test (see below).
- Assessment of Professional Teaching (APT) – assesses knowledge of teaching planning, delivery, assessment, professionalism, and technology. Test is required to be licensed; recommended to be taken before Student Teaching.
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Arabic

- Foreign Language: Arabic Content Area Test (test #137)

Chinese

- Foreign Language: Chinese(Mandarin) Content Area Test (test #126)

French

- Foreign Language: French Content Area Test (test #127)

German

- Foreign Language: German Content Area Test (test #128)

Italian

- Foreign Language: Italian Content Area Test (test #130)
Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 15 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements. For details on requirements, expectations, documentation, & courses in your program that require hours, visit the College of Education website.

Oral Proficiency Interview (OPI) Test

Pursuing licensure in the teaching of a foreign language (Arabic, Chinese, French, German, Italian, Japanese, Latin, Russian, or Spanish) requires the oral proficiency test – an Interview – before you begin student teaching. You must earn a rating of “intermediate high” or better on the test.

For additional information about the OPI and a link to the test, please consult the OPI section of the College of Education website.

Additional Requirements

Please also view the college core requirements under the MA or MED for World Language Education for additional requirements. Note that the World Language Education Licensure program listed above does not lead to a degree.

Bilingual Education (BE) Endorsement

Admission Requirements

To be eligible for the Bilingual Bicultural Education endorsement program, students must hold a bachelor's degree from an accredited college or university and hold a valid teaching license.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40.00)
- One official transcript from all colleges and/or universities attended
- A copy of valid professional educator license
- A résumé or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements
28 quarter hours, grade of C or better required in all courses

Illinois target language proficiency (TLP) test required in addition to the coursework and field experience hours below:

- BBE 402 BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
- BBE 404 LANGUAGE, LITERACY AND CULTURE
- BBE 406 SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION
- BBE 407 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- BBE 425 BILINGACY PRACTICES IN BILINGUAL EDUCATION AND ESL
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- BBE 524 METHODS OF TEACHING ESL
- BBE 97 100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED (PA grade required)

Licensure Test

Individuals seeking a bilingual endorsement must complete the Target Language Proficiency (TLP) test in the non-English language.

Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Early Childhood English as a Second Language Endorsement / Early Childhood Bilingual Endorsement

Admission Requirements

To be eligible for the Early Childhood Bilingual/ESL endorsement program, students must hold a bachelor’s degree from an accredited college or university as well as a valid professional educator license that includes an early childhood endorsement.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40)
- One official transcript from all colleges and/or universities attended
- A copy of a valid professional educator license
- A résumé or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

28 quarter hours, grade of C or better required in all courses:

- BBE 408 BILINGUAL EARLY CHILDHOOD DEVELOPMENT THEORETICAL FOUNDATIONS
- BBE 409 ENGLISH AS A SECOND LANGUAGE INSTRUCTIONAL FOUNDATIONS IN EARLY CHILDHOOD SETTINGS
- T&L 440 EARLY CHILDHOOD EDUCATION CROSS-CULTURAL STUDIES
- T&L 441 EARLY CHILDHOOD METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS
- T&L 442 EARLY LITERACY DEVELOPMENT AND SECOND LANGUAGE ACQUISITION
- T&L 443 ASSESSING YOUNG BILINGUAL/ESL LEARNERS
- T&L 444 EARLY CHILDHOOD BILINGUAL/ESL PRACTICUM
Licensure Test

Individuals seeking a bilingual endorsement must complete the Illinois State Board of Education (ISBE) Target Language Proficiency (TLP) test in the non-English language.

Endorsement Application

Individuals who are simultaneously enrolled in the Early Childhood Graduate Education Program may apply for their endorsement as part of the degree award process. Those who are not part of the program must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

English as a Second Language (ESL) Endorsement

Admission Requirements

To be eligible for the English as a Second Language (ESL) endorsement program, students must hold a bachelor’s degree from an accredited college or university and hold a valid teaching license.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40.00)
- One official transcript from all colleges and/or universities attended
- A copy of valid professional educator license
- A resume or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

28 quarter hours, grade of C or better required

Must complete the coursework and field experience hours below:

- BBE 402 BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
- BBE 404 LANGUAGE, LITERACY AND CULTURE
- BBE 407 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- BBE 425 BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- BBE 524 METHODS OF TEACHING ESL
- BBE 526 THEORETICAL FOUNDATIONS OF ESL AND WLE
- BBE 97 100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED (non-credit)

Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.
Special Education for Teachers (Learning and Behavior Specialist 1) Endorsement

Admission Requirements

To be eligible for the Learning and Behavior Specialist 1 (LBS1) endorsement only program, students must hold a bachelor’s degree from an accredited college or university and a valid Illinois teaching license.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
- Copy of a valid Illinois teacher license
- A bachelor's degree conferred by an accredited, recognized institution
- A previous grade point average of 2.75 or above on a 4.0 scale
- Two letters of reference, one of which must be from persons familiar with your academic work
- One official transcript from each college or university attended
- Personal statement (see below)*
- Resume or curriculum vitae showing evidence of adequate background for the program.
- The admission process also may include an interview with program faculty.

*Personal statement

Write a personal statement that discusses your future goals and your thoughts about your career as a special educator. As part of your statement please consider the following: the possible tasks/roles of a special education teacher are multiple and include inclusion specialist, team teacher with general educators, specialized instruction for exceptional students, advocate for exceptional students, response to intervention (RTI) coordinator, case manager or provider of staff development. From your perspective, rank order the tasks/roles and discuss your rationale for the top ranked roles.

Course Requirements

Endorsement-Only Requirements 24 hours required, grade of B+ or better required

- LSI 440 SURVEY OF EXCEPTIONAL LEARNERS: PSYCHOLOGY AND EDUCATION
- LSI 443 PSYCHOLOGICAL TESTS AND METHODS IN DIAGNOSIS
- LSI 458 TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES I
- LSI 467 TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES II
- LSI 468 TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES I
- LSI 469 TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES II

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. LBS1 Endorsement students must complete the following tests:

- LBS1 Content Area Test (test #155) – assesses knowledge of working with students with disabilities and special needs.

Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.
Reading Teacher Endorsement

The Illinois State Board of Education (ISBE) requirements for the Reading Teacher Endorsement include:

1. Hold a valid 0-3, K-9, or 6-12 teaching license
2. Complete 24 semester hours or 36 quarter hours, including a practicum, of reading and literacy courses in the following areas:
   a) Foundations of reading,
   b) Content area reading,
   c) Assessment and diagnosis of reading problems,
   d) Developmental and remedial reading instruction and support,
   e) Developmental and remedial materials and resources, and
   f) Literature appropriate to students across all grade ranges
3. Pass the Reading Teacher content test (#177)

Students can pursue the Reading Teacher Endorsement by either:

1. Completing courses that are a subset of the Reading Specialist program (see below), or
2. Applying for a Reading Teacher endorsement evaluation through ISBE. Once a statement of area deficiencies is received, the student will meet with an advisor to determine the required outstanding coursework.

Admission Requirements

To be eligible for the Reading Teacher endorsement only program, students must hold a bachelor’s degree from an accredited college or university and a valid Illinois teaching license.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
- Copy of a valid Illinois professional teaching license
- A bachelor's degree conferred by an accredited, recognized institution
- Two letters of reference, one of which must be from persons familiar with your academic work
- One official transcript from each college or university attended
- Resume or curriculum vitae showing evidence of adequate background for the program.

The admission process also may include an interview with program faculty.

Course Requirements

Reading Teacher Endorsement Coursework: 36 quarter hours required, grade of C or better required

- LSI 430 INTRODUCTION TO READING ASSESSMENT
- LSI 431 FOUNDATIONS OF LITERACY
- LSI 432 DEVELOPING LITERACY
- LSI 433 ASSESSMENT AND DIAGNOSTIC TEACHING OF READING
- LSI 435 LITERACY PROGRAMS: CURRICULUM AND COLLABORATION
- LSI 438 LITERACY-BASED AND CONTENT AREA LITERACY INSTRUCTION

Practicum Courses

- LSI 542 PRACTICUM IN LITERACY ASSESSMENT
- LSI 543 PRACTICUM IN LITERACY INSTRUCTION AND ASSESSMENT
- LSI 544 PRACTICUM IN LITERACY INSTRUCTION, ASSESSMENT, AND COLLABORATION

The practicum courses provide an opportunity to apply knowledge from course work to teaching struggling learners and those with disabilities. In these courses, students provide diagnostic and remedial services to children and adolescents from the Chicago area under the supervision of program faculty. These courses are offered in an on-campus facility.
Teacher Leader Endorsement Only

Admission Requirements

To be eligible for the Teacher Leader endorsement program, students must hold a bachelor’s degree and master’s degree from an accredited college or university and hold a valid teaching license.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40.00)
- 2 years of full-time teaching on a valid standard teaching Licensure at the time of application
- One official transcript from all colleges and/or universities attended
- A resume or curriculum vitae
- Proof of passing Basic Skills Test or TAP Exam
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

This non-degree program allows students who already have a Master’s degree to obtain an ISBE Teacher Leader Endorsement. Candidates already holding a Master’s degree (M.Ed. or M.A.) and a professional educator license may enter the program seeking the Teacher Leader Endorsement. Students not holding a Master’s degree must complete either the existing Educational Leadership or Curriculum Studies Master’s program and obtain their professional educator license before they can obtain the Teacher Leader Endorsement.

40 quarter hours, grade of C or better required in all courses

Educational Leadership Courses: 20 quarter hours required

- A&S 491 EFFECTIVE LEADERSHIP OF SCHOOLS
- A&S 493 DATA DRIVEN DECISION MAKING
- A&S 496 STAKEHOLDER RELATIONSHIPS
- A&S 498 INSTRUCTIONAL SUPERVISION AND SUPPORT
- A&S 499 PLANNING FOR PROFESSIONAL DEVELOPMENT

- CS 470 TEACHERS AS LEADERS
- CS 473 ASSESSMENT
- CS 482 THE HISTORY OF CURRICULUM PRACTICE
- CS 488 CURRICULUM DESIGN

Bilingual/ Bilcultural Education Courses Required: 4 quarter hours required

- BBE 599 SCHOOLWIDE APPROACHES TO EDUCATING ELL
Licensed Professional Counselor

State Licensure Information

The State of Illinois requires that those who wish to work as a counselor have licensure as either a Licensed Professional Counselor (LPC) or an advanced Licensed Clinical Professional Counselor (LCPC). The Counseling program’s Clinical Mental Health Counseling concentration meets the educational requirements for the Licensed Clinical Professional Counselor. However, there are further requirements that must be met. For more information, contact the State of Illinois Department of Professional Regulation in Springfield, Illinois.

Admission Requirements

To be eligible for the Licensed Professional Counselor program, students must hold a bachelor’s degree from an accredited college or university. It is recommended that you have at least one year of working experience.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Three letters of recommendation: one from a professor addressing your academic ability, one from an employer, and the third from either another professor or employer
- Resume
- A personal statement (see below for more information)

The admission process also may include an interview with program faculty.

Personal Statement

Please answer all of the following questions.
Your entire response should not exceed 1,500 words (or approximately 300 words per question).

1. Discuss why you want to enter the counseling field. Demonstrate in your response that you have researched the field and have a basic understanding of what counseling professionals do.
2. Given what you have researched about the profession, discuss your short-term and long-term professional goals should you eventually graduate from our program. Integrate into your response why DePaul’s counseling program will help you achieve your goals.
3. Discuss why self-awareness, self-reflection and self-care are important skills for counselors. Explain ways in which you would attend to all of these should you be a student in our program.
4. Explain how your personal values and ethical beliefs will be an asset to you as a future counselor and explain any challenges you may face in future practice. Provide concrete examples from your personal or professional life to help illustrate your points.
5. Discuss your understanding of “multicultural proficiency” and “social justice.” Explain how you believe these play a role in the work of counseling professionals as well as how these fit with your own beliefs and values. Provide concrete examples from your personal or professional life to help illustrate your points.

Academic Advising

About

DePaul University College of Law educates tomorrow's lawyers with innovative programs of instruction that include both traditional classroom theory and professional skills training. We are distinguished by our highly successful centers and institutes, which emphasize collaborative learning among students and faculty in advancing the law and serving justice, and by our strong clinical and field placement programs. Located in a vibrant urban environment, the College of Law brings together students, faculty, staff and alumni committed to serving the public and the legal profession in ways that enhance the social, economic, cultural and ethical values in the broader community. The College of Law is part of a university that derives its fundamental mission from St. Vincent de Paul, who advocated the acceptance of all people and devoted his life to helping the disadvantaged lead dignified lives. We seek diversity in students' special talents, qualities, interests and socioeconomic backgrounds, and we aim to create a culture in which student learning is central.

Academics

At DePaul University College of Law, tradition underlies everything: our deep roots, our enduring values and our commitment to service.

The College of Law provides theoretical instruction as well as offers creative approaches to professional skills training. Law students can earn academic credit by working with real clients on real cases in every type of legal environment. Through our Legal Clinics, Field Placement Program and Trial Advocacy Program, students gain valuable first-hand experience and insight working side-by-side with distinguished faculty members and practicing attorneys.

In addition to the core Juris Doctor curriculum, students also can choose from a variety of joint degrees, graduate programs and certificate options in a number of concentrations.

Professional Degrees

- Health Law (LLM)
- Intellectual Property (LLM)
- International Law (LLM)
- Law - Joint Degree (JD/LLM)
- Law (JD)
- Law/Business- Joint Degree (JD)
- Law/Computer Science - Joint Degree (JD/MS)
- Law/Public Service - Joint Degree (JD)
- Taxation (LLM)
Admission & Aid

Electronic Application Process

All applicants to the College of Law must submit all materials electronically through the Law School Admission Council (LSAC) and register with the LSAC Credential Assembly Service (CAS). We only accept applications submitted through LSAC. Please read the application instructions included with the LSAC Electronic Application and follow them carefully. You can access the LSAC Electronic Application at law.depaul.edu or lsac.org.

We will not accept any paper application materials or paper updates to your application. Paper materials and updates will not be retained or reviewed by the Admissions Committee and will be discarded. You are welcome to submit updates to your file electronically. Application update materials may be submitted to lawinfo@depaul.edu. Please include your name and LSAC identification number on each attachment.

Disabled applicants in need of a reasonable accommodation to complete the application process, or other applicants who require a paper application, should contact the Office of Law Admissions at (312) 362-6831 or email lawinfo@depaul.edu with their request.

Admission Policy

Admission to DePaul University College of Law is very competitive. We consider numerous factors in evaluating each applicant, including undergraduate academic performance, Law School Admission Test (LSAT) scores, advanced degrees, professional work experience, writing ability, potential for leadership, professional and academic recommendations and the applicant's special talents, qualities, interests and socioeconomic and cultural background. No single factor is dispositive when determining admission.

Personal qualities that demonstrate intellectual depth, high ideals and diligence also are considered, as are economic, societal or educational obstacles that have been successfully overcome. Diversity in background and experience among the members of each entering class is a continuing objective. Having a diverse student body allows us to encourage and foster the exchange of different ideas. In addition, a candidate's prior relations with the DePaul University community and her or his potential for furthering DePaul's institutional goals are considered.

Because applications are reviewed on a rolling basis, early application is highly recommended, especially for those who desire merit scholarship and financial aid consideration. For first-year applicants with no previous law school credit, admission is granted only for the fall semester. First-year applicants should ensure that their application and all necessary documents are on file in the Office of Law Admission prior to the suggested application deadline of March 1.

Prospective applicants who have received their baccalaureate degrees from accredited institutions or who have received degrees prior to July of the year for which admission is sought are eligible to apply. In no event will anyone who has yet to receive a baccalaureate degree be permitted to enroll in the College of Law. No specific fields of study are prescribed at the baccalaureate level.

DePaul University has a nondiscriminatory admission policy; it does not discriminate on the basis of race, color, national origin, religion, sex, sexual orientation, age or disability.

Application Instructions

Letter of Recommendation

One LSAC applicant evaluation or one letter of recommendation is required for all applicants. Additional letters and evaluations are welcome. Letters of recommendation must be submitted through CAS.

Evaluations from an applicant's college professors are particularly useful. Evaluations also may be submitted by employers or colleagues who are in positions to make critical and informed appraisals of an applicant's qualifications.

Personal Statement

A personal statement is required and must be electronically attached to the application for admission. It should not exceed two pages, and may provide the Admissions Committee with information regarding such matters as intellectual interests and pursuits; personal, family or educational background; experiences and talents of special interest; reasons for applying to law school as they may relate to personal goals and professional expectations; or any other factors that will assist the committee's evaluation of the applicant's candidacy for admission. Applicants also may describe, either within the personal statement or as an addendum, how their admission
would contribute to the diversity of the College of Law.

Resume

A current resume is strongly recommended and may be electronically attached to the application for admission. It should not exceed two pages. It should include a complete employment record and identify honors, scholarships and commendations received; membership in any scholastic, honorary and professional associations; as well as community, volunteer and extracurricular activities.

Law School Admission Test / Credential Assembly Service

All applicants must take the LSAT. LSAT scores earned prior to June 2009 will not be accepted. In addition, all applicants must register with CAS. Please visit the LSAC website (lsac.org) for additional information.

Application Fee

There is no application fee for the JD program.

International Applicant Information

Applicants who have earned degrees or received diplomas from foreign institutions must submit all materials required of first-time JD applicants.

In addition, applicants who have completed coursework or earned degrees from foreign institutions should submit their foreign transcripts through LSAC’s CAS. Foreign transcripts received will be sent to the American Association of Collegiate Registrars and Admissions Officers (AACRAO) where the transcript will be authenticated and analyzed. This service is included in the standard CAS fee. The data will be assembled into a foreign credential evaluation document that contains AACRAO’s summary, copies of the transcripts (and translations, as necessary) and a TOEFL or IELTS score, if applicable.

Applicants who were educated in foreign countries at institutions where English is not the primary language must also register for the TOEFL (toefl.org) or IELTS (ielts.org). Applicants who register for the TOEFL must advise Educational Testing Service (ETS) to send their TOEFL score to DePaul University College of Law (institution code 1165).

LSAC will incorporate the applicant's foreign credential evaluation, TOEFL or IELTS score and associated documents into the regular CAS report.

While the College of Law strongly encourages international applicants to submit their foreign transcripts to the CAS, we will also accept detailed evaluation reports from Educational Credential Evaluators (ece.org), World Educational Services (wes.org) or from any other member of the National Association of Credential Evaluation Services.

International applicants who have graduated from foreign law schools may receive up to 28 credit hours toward the JD degree. The determination of applicable credit is made upon admission. For additional information, including a copy of the Financial Affidavit of Support Form for International Students, please visit international.depaul.edu/admission.

Joint Degree Programs

DePaul offers five joint degree programs: the JD/MBA degree with the Kellstadt Graduate School of Business; the JD/MS in Public Service Management and the JD/MA in International Studies, both with the College of Liberal Arts & Social Sciences; the JD/MS in Computer Science Technology with the College of Computing and Digital Media; and the JD/Masters in International and European Business Law with the Pontificia Universidad Comillas (Madrid, Spain).

Those seeking a joint degree first must apply and be accepted for admission to the College of Law. Admission is made to the appropriate joint degree program only after completion of the first-year core curriculum in the College of Law with above average academic achievement. Thereafter, if accepted into the joint degree program, law students begin their joint degree studies.

A separate application may be required for each program and should be submitted during the first year of law school. In addition, an entrance exam such as the GRE or GMAT may be required depending on the requirements of the program to which the applicant is applying.

More information about joint degree programs is available at law.depaul.edu.

Transfer Applicant Information

DePaul University College of Law welcomes applications from students who will have completed, within the
preceding two years, at least one year of study at another ABA-accredited law school. Transfer applicants may apply for admission to the day and evening programs during the fall and spring semesters. Transfer applicants admitted to the College of Law may receive up to 30 hours of credit toward the JD degree. The determination of applicable credit is made upon admission. DePaul University does not have an articulation agreement with any university or law school program regarding transfer admission.

Students applying for transfer admission complete a different online application than first-year applicants. Transfer applicants are required to submit the following: transfer student application form, one letter of recommendation from a law school professor, resume, personal statement and current LSAC CAS report. In addition, transfer applicants must submit directly to the Office of Law Admissions: (1) a letter of good standing indicating eligibility to return from all previously attended law schools and (2) law school transcripts from all previously attended law schools. Law school transcripts must provide grades for all coursework attempted. While a transcript showing spring grades generally is required to review the application, the Admissions Committee may make an exception and grant a conditional admission based upon an applicant's strong academic performance in the fall semester. Class ranks are not required to evaluate an applicant's transfer application.

In evaluating transfer applicants, the Admissions Committee will consider the applicant's undergraduate academic record, LSAT score, law school grades, personal statement, letter of recommendation and other information requested in the application.

Financial Assistance

DePaul University and the College of Law provide a range of financial assistance in the form of loans and scholarships. Should you wish to apply for financial assistance, indicate your intent in the application for admission. Financial aid applications will be available shortly after January 1.

Scholarship Assistance

All admitted students are automatically considered for applicable scholarship awards. No separate application is required. Dean's Scholarships are awarded to entering law students based upon their achievements, personal qualities and potential to contribute to the DePaul law community. Scholarship recipients are notified of their award in the acceptance letter.

Need-Based Assistance

To apply for loans and other need-based assistance, the Free Application for Federal Student Aid (FAFSA) is required and can be obtained after January 1 at colleges and universities or at the FAFSA website (fafsa.ed.gov). The FAFSA code for DePaul University College of Law is 001671. The FAFSA must be complete and on file in the Office of Financial Aid on or before March 1 in order to receive full consideration for DePaul-administered financial aid.

For additional financial aid and scholarship information, visit the DePaul University College of Law website at law.depaul.edu.

About

The College of Liberal Arts and Social Sciences is committed to providing all of its students with an education that balances in-depth study in certain areas with a breadth of experience in the various disciplines that form the core of human knowledge. Its 28 degree-granting programs and disciplines share a commitment to the highest standards of academic quality, to a mode of study that nurtures critical thinking skills, to a self-conscious examination of questions of value and meaning, and to the development of those habits of the heart and mind intrinsic to a life-long and independent learner.

Our commitment is reflected in a faculty that is as strongly committed to teaching as it is to research. It is reflected in curricular practices that discourage students from concentrating in one subject area to the exclusion of all others. And it is reflected in the College's encouragement of interdisciplinary areas of study that underline the connections and unities among the various areas of knowledge.

The College values and nurtures the Catholic, urban, and Vincentian mission of the University. The interactions among its faculty and between its faculty and its students are characterized by personalism. Significant portions of the curriculum speak to questions of social responsibility, ethical standards for behavior, and an active
engagement with the people and the challenges of the Chicago community.

Academics

The College of Liberal Arts and Social Sciences offers a wide range of Undergraduate majors, Graduate programs and Certificates.

Admission & Aid

Candidates interested in admission to the College of Liberal Arts and Social Sciences should direct all inquires to the Office of Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu, or (312) 362-8300.

Application for admission begins with an online application, found in the Admission and Aid section of the DePaul University website.

Scholarship Opportunities

Information about the majority of scholarships for undergraduates is found at: http://www.depaul.edu/admission-and-aid/Pages/default.aspx

The College awards a handful of targeted, one-off, and relatively small ($500 - $3000) scholarships annually. Some academic departments have similar scholarships for their eligible majors. These opportunities will be posted at: http://las.depaul.edu/CurrentStudents/ScholarshipsOff/index.asp

Graduate students may also be eligible for graduate assistantships, which package tuition waivers with a stipend, or full or partial tuition waivers. Contact Graduate Admission (GradDePaul@depaul.edu) or the graduate program of interest for more information about what opportunities exist.

Double Demon Scholarship

Alumni from any of DePaul's colleges who are admitted into a graduate degree program or a select certificate program* in the College of Communication, the College of Computing and Media, the College of Education, the College of Liberal Arts and Social Sciences, the College of Science and Health, the School for New Learning or the Kellstadt Graduate School of Business will automatically qualify for the Double Demon Scholarship.

This scholarship covers 25 percent of the tuition for a master's degree or a select certificate program*. Both full-time and part-time students are eligible. No scholarship application is required; all alumni admitted to these programs beginning with the winter quarter of 2014 or thereafter qualify. This scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards.

DePaul University employees are eligible for other employee tuition benefits through the university, and therefore are not eligible for the Double Demon Scholarship.

To learn more details about this scholarship, please contact your college admissions office.

*Scholarship does not apply to all certificate programs. Please contact one of the college admissions offices above for more information.
Financial Aid

Information about financial aid is found at: http://www.depaul.edu/admission-and-aid/Pages/default.aspx

Graduate Admission

Applicants are admitted to the College of Liberal Arts and Social Sciences on the basis of their ability to complete programs of study and research prescribed for the master's and doctoral degrees. Specifically, admission qualifications are measured by academic criteria. In accord with these criteria, applicants are admitted in one of three major categories: degree-seeking, non-degree-seeking, and student-at-large.

The admission process begins with an online application, found at: http://www.depaul.edu/admission-and-aid/Pages/default.aspx

Degree-Seeking Students

Applicants are admitted as degree-seeking students in either of two ways: full or conditional.

Full Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies satisfying all requirements for entering a specific graduate program.
- Submission of all required supporting credentials.
- Unconditional approval by the department or program director of the applicant's proposed course of graduate study.

Please note these are minimum requirements for full admission. The departmental and program sections of this Catalog provide additional, more specific and selective, criteria for admission to specific programs.

Conditional Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies indicating a capacity to pursue successfully a specific program of graduate study.
- Submission of all required supporting credentials.
- Conditional approval by the department or program director of the applicant's proposed course of graduate study.

A conditionally admitted applicant is eligible for reclassification to full, degree-seeking status when the conditions of his or her admission have been satisfied.

Non-Degree Seeking Students

The dean may admit as students those applicants who do not wish to pursue an advanced degree. Non-degree-seeking students may, at some future date, make application to a graduate program, but they are not accorded special consideration for admission. Students should consult the intended degree program's website for information about application requirements.

Non-Degree Seeking Status
The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution
- Academic achievement in undergraduate studies indicating a capacity to succeed in graduate course work (minimum of 2.50/4.00)
- Submission of official transcript from bachelor's degree granting college or university
- Approval by the director of graduate admission.

Students admitted as non-degree graduate students are eligible to enroll in graduate-level courses only.

When such students apply to a graduate program, the departmental or program director of their specific graduate course of study may recommend, in writing, to the dean that a maximum of three courses (12 quarter hours) completed by the student under the non-degree-seeking status be counted toward fulfillment of the advanced degree requirements.

### Student-at-Large Status

The College of Liberal Arts and Social Sciences may admit as a student-at-large a graduate student currently enrolled in a graduate program in another accredited institution upon the recommendation, in writing, of his or her own graduate dean.

A student-at-large must submit a graduate application. The supporting credentials required are an official transcript from the bachelor's granting college or university and a letter from the dean of the graduate school where the student is in good standing. This letter should state in general terms the course or courses the student is authorized to take.

Under no circumstances does this classification constitute admission to a degree program at DePaul University.

### DePaul Students and Five-Year Programs

Students in any of the undergraduate colleges or schools of DePaul University are eligible to apply for admission to the College of Liberal Arts and Social Sciences while completing their undergraduate program. Some programs of study offer an accelerated master’s degree that can be started in an undergraduate's senior year and completed in a minimum of one additional year. Further information about these "5-year programs" can be found within specific program descriptions in this Catalog.

---

**About**

The purpose of the African & Black Diaspora Studies Program is to provide DePaul students with a systematic, interdisciplinary, and integrated course of study of Africa & the Black Diaspora. The Program provides students with an opportunity to earn a Bachelor of Arts degree in African & Black Diaspora Studies with a concentration in Africa, Black America, and/or Afro-Caribbean and Latin America. African & Black Diaspora Studies will also train students in comparative analysis of regions (e.g., peoples, religions, philosophies) through an incorporation of the study of history, power, identity, gender, and race. The Program’s offerings provide students with opportunities to learn about and develop expertise in the cultures, epistemologies, histories, sciences, and societies of Africans and peoples of African descent. The Program prepares students to pursue professions and careers that require a systematic knowledge of Africa and its Diaspora.

About

American Studies courses are methodologically grounded in many different areas of cultural studies including historiography, media studies, material culture, visual literacy, critical race theory, and gender/sexuality studies. Students are expected to gain competency in American cultural studies by mastering the theoretical and intellectual frameworks of their concentration and by learning to interpret and analyze primary documents.

About

Anthropology is the comparative study of humanity, focusing on people in all places and throughout history and prehistory. Courses engage students in the analysis of beliefs, values, and practices from a perspective that understands societies on their own terms. This perspective includes comparing the similarities and differences among different groups and appreciating and valuing different ways of living. Students study other cultures in order to learn more about their own. This curriculum affords students the opportunity to see the interaction between “what we know” and “what we do” that lies at the heart of the study of humanity.

Our curriculum combines the best parts of a critical, creative, liberal arts education with practical, professional preparation. The major courses direct the student toward the subfields of cultural anthropology, biological anthropology, and archaeology, with a focus on applied research in these sub-fields. As part of the major, students engage in several research projects, including those that expose them to the application of anthropological knowledge for non-academic audiences, and to our archaeological field school. Out-of-class research projects in the City of Chicago are integral components of several courses. They graduate with an extensive knowledge of how anthropology is actually done. We bring students farther into this practical side of the discipline than any other B.A. program in the country.

Academic careers are attractive to some graduates, but more than half of all professional anthropologists work outside of academic institutions. Some of these careers include research for public and private organizations, administration and/or public policy on the local, regional, federal, or international level; research and work in museums; intercultural communication; advertising, marketing, and public relations; forensics; human resources; public health; health care; and law. They also contribute to non-governmental and international organizations. Within the context of administration or public policy, anthropologists are engaged in cultural resource management (CRM), monitoring the preservation of cultural resources for national parks, museums, and state or municipal cultural institutions (i.e., parks and historical societies). Anthropology enhances other career paths, such as modern languages, international studies, international relations, cultural studies, and international business. Students will have completed at least four ethnographic research projects and be certified in archaeological research skills by the time they graduate.

The extensive ethnographic research experience qualifies students with B.A. degrees to work in both non-profit (social service agencies) and for-profit (marketing, design, user-based) research settings. The archaeological certification opens avenues for careers in cultural resource management (CRM), and monitoring the preservation of cultural resources for national parks, museums, and state or municipal cultural institutions.

About

The Department of Art, Media, and Design (AMD) offers a general curriculum which identifies and promotes continuing contact with the enduring values of our artistic heritage and the application of these values to the future. The educational aim of the department is to provide, through individualized instruction, a broad foundation in art practice and art history. The curriculum emphasizes fundamental artistic concepts through problem solving and experimentation.

Students can take advantage of the small class sizes and personalized instruction from studio and media art faculty. Among area universities, the department now boasts two of the finest digital computer laboratories dedicated solely to studio and media arts. Our newly renovated facility features two darkrooms, two computer digital laboratories, a teaching exhibition space, wood and metal sculpture studios, and dedicated studios for video, photography, digital imaging, sculpture, printmaking, painting and drawing.

About

The Department of Catholic Studies is intellectual in focus and interdisciplinary in nature. Rigorous intellectual study, a deepened critical understanding and an appreciation of the Catholic contribution to human civilization are its main goals. The program explores Roman Catholicism as a religious and cultural reality that expresses and motivates multiple forms of human expression. All members of the university are invited to participate in the scholarly examination of Catholicism and the development of Catholic thought. True to DePaul's tradition, no religious test is applied to either students or faculty participating in the department. In addition to the offerings of DePaul University, upper-level students in the program in Catholic Studies are able to take selected courses at the Catholic Theological Union at Chicago. The cooperative relationship between DePaul and CTU opens to students in the program the resources of the largest Catholic school of theology and ministry in North America. The Catholic Studies major is designed to give students with differing learning objectives and career goals maximum flexibility in the design of their Bachelor of Arts degree. In order to ensure intellectual coherence in their program, all students are expected to meet quarterly with their academic advisor to design a course of study, refine their learning goals, and select classes that meet their educational and professional objectives.

About

The Community Service Studies (CSS) Minor is a multidisciplinary program that provides a framework for understanding and engaging in critical social issues at the level of community. While the notion of community is increasingly complex, the program explores the nuances of community as defined through the lens of groups with common affiliation, identity, or grievance that may be geographically or nongeographically-based. The curriculum relies heavily on community-based service learning courses and is designed to provide students with a foundation of analytical, reflective, interpersonal, and leadership skills. Through supporting university partnerships with Chicago-area community-based organizations, students gain a local perspective on social justice issues, including those built on race, class, and gender inequalities and other forms of social, economic and political exclusion.

The practice of service is often shaped by particular economic and cultural circumstances related to power, privilege, and identity. A central component of CSS is the importance of viewing communities through an asset lens and thus working to support existing community strengths rather than responding to needs. Students minoring in CSS therefore develop strong critical self-reflection skills that guide them as future leaders in making ethical and socially responsible decisions.
About

The Comparative Literature minor is designed for students who combine the drive and the ability to master foreign languages with a strong commitment to theoretical and interdisciplinary approaches to literature. Students must do a substantial portion of their work in at least one foreign language.

Although students will take many of their courses in the departments of their elected literary fields, the program in comparative literature is distinguished from national literature departments by its comparative scope and by the requirement of seminars that focus on fundamental theoretical questions regarding the nature of literature and literary inquiry. The requirements for the minor are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests.

About

Economics is both a social science discipline and a framework for analyzing production, consumption, and distribution decisions. The goal of the undergraduate curriculum is to offer students the theoretical background necessary to understand business and policy issues, as well as the quantitative and analytical skills necessary to evaluate these issues independently. The Economics Department offers courses that explore topics such as unemployment, inflation, production and distribution, economic growth, environmental issues, poverty, urban and regional development, international trade, labor issues, economic history, and international economic relations.

Courses emphasize the need for accurate knowledge of business institutions and economic phenomena, for theories capable of explaining these phenomena, for estimating relationships among economic variables, and for testing explanations.

Graduates with a major in economics are solidly prepared for employment in the private, public, and non-profit sectors, or for advanced studies in business, law, and economics.

DePaul offers Economics as both a major and minor field of study through both the College of Liberal Arts and Social Sciences and the Driehaus College of Business. An Honors Track option is available to economic majors in both colleges. In addition, the Department of Economics offers the Accelerated Bachelor-Master of Science in Business and Economic Policy Analysis.

About

The study and practice of reading and writing literature are central to a liberal arts education and foster skills that are critical to success in virtually all professional and personal contexts. The English department at DePaul boasts an innovative and engaging curriculum, a faculty of highly accomplished teacher-scholars, friendly and efficient staff, committed advisors, outstanding students, and exciting opportunities for internships and other co-curricular involvement.

The department's curriculum unites historical and theoretical perspectives in literary study with sustained practice in creative and analytical writing. It encourages critical and creative thought, fosters research and communication skills, and develops a student's ability to negotiate diverse perspectives and points of view.

The English major undergraduate program--one of the largest in the College--offers two concentrations, Literary Studies and Creative Writing, as well as two minor programs, English Literature and Creative Writing. Junior English majors interested in graduate study may apply to the combined bachelor's/master's programs in English or Writing and Publishing, and those interested in teaching high school English may apply to the TEACH...
Program, a combined bachelor's/master's program developed and taught with faculty in the College of Education.

The department also houses two graduate programs, the Master's in English and the Master's in Writing and Publishing. Students in these two programs can elect to complete certificates in Teaching English in Two Year Colleges, Teaching English as a Second Language (TESOL), Women's and Gender Studies, or Digital Humanities.

Special Programs

Internships

English students may qualify for a variety of internships, receiving significant on-the-job experience in such areas as research, writing, editing, publishing, law, corporate communications, non-profit work, and library science. Sophomores, juniors, and seniors may receive as many as 4 hours of credit toward their major (junior-year experiential-learning credit is also possible). Students might locate an internship on their own or receive assistance from Chris Green, Coordinator of Internships in Writing and Publishing. To earn credit, students will need Prof. Green's approval to register for ENG 392/509, an online class designed to complement their internship work. Quarterly Career Nights (featuring panels of professionals) and Career Workshops (emphasizing internship- and job-finding skills) will also enhance students' opportunities and experience.

Certificate in Teaching English in Two-Year Colleges

The Certificate Program in Teaching English in Two-Year Colleges is an interdisciplinary program housed in the Department of English and taught by faculty in both English and the Department of Writing, Rhetoric, & Discourse. The program is designed to prepare prospective teachers of introductory classes in English, Writing, and the Humanities in city and community college settings. Participants in the Certificate Program will learn to teach critical and analytical reading, the processes and disciplines of writing, and other aspects of the arts, humanities, or communication curriculum in two-year colleges.

The Certificate is comprised of 16 hours of credit: three classroom-based courses and a teaching internship, enrolled as an Independent Study.

Application

To be admitted to the Certificate Program, students must have completed or be currently pursuing a master's degree in English; Writing and Publishing; Writing, Rhetoric, and Discourse; or a related field.

Applications are accepted at any time. It is strongly recommended that the prospective applicant contact the
program director, Dr. Carolyn Goffman, before applying (cgoffman@depaul.edu; 773-325-8688). Please email all application materials directly to Dr. Goffman (not to Graduate Admissions).

Application materials:
- Cover letter describing interest in teaching in a two-year college
- Current CV (résumé)
- Undergraduate and graduate academic transcripts
- Sample of recent academic or professional writing
- Names of two faculty references

Certificate Requirements:
- ENG 474 TEACHING LITERATURE
- WRD 540 TEACHING WRITING
- One course from the following list:
  - ENG 407 LANGUAGE AND STYLE FOR WRITERS
  - ENG 473 TEACHING CREATIVE WRITING
  - ENG 478 TOPICS IN TEACHING
  - WRD 506 MULTICULTURAL RHETORICS
  - WRD 550 TOPICS IN TEACHING WRITING AND LANGUAGE (when topic is appropriate)
  - WRD 582 WRITING CENTER THEORY AND PEDAGOGY
  - Or another graduate course approved by the Program Director
- ENG 509 INTERNSHIP: Community College Teaching

Two-Year College Teaching Internship

Graduate students who are not pursuing the Certificate are also eligible to apply for the internship. Please contact Dr. Goffman about applying for an internship.

Also, please note: Chicago-area two-year colleges operate on the semester system; therefore, the internship's duration does not correspond to DePaul's academic calendar. The intern should expect to complete the work for ENG 509 some time after the end of the quarter in which registered. A grade of “R” (indicating work in progress) will be assigned temporarily, to be changed to a letter grade when work is completed.

About

Located in the Lincoln Park neighborhood on Chicago's north side, DePaul's Department of Geography was founded in 1948. Over the last sixty-five years, the Department has grown and developed to reflect changes in the geographic discipline, in technology, and in the labor market. Today, the Department includes seven full-time faculty members and five contingent faculty instructors, teaching a wide variety of courses within several sub-disciplinary and topical areas. Geography offers courses in every Liberal Studies Program Learning Domain, making it an ideal program of study for students interested in double majoring, or adding a 6-course minor.

As the largest geography department in the Chicago metropolitan region, we are positioned extremely well to be the major provider of post-secondary and professional Geography degrees and certificates. With our commitment to critical human geography and to strong specializations in Urban Geography, Geotechnologies (Geographic Information Systems and Remote Sensing), Cultural, and Environmental Geography, we offer high quality programs that lead to careers in government, GIS, community and international development, environmental management, and intelligence, to name a few. Many Department of Geography alumni continue their studies at the graduate level in geography, planning, and other natural and social sciences. Recent graduates have joined M.A. or Ph.D. programs in geography, urban planning, urban studies, and international relations at universities such as Syracuse University, Rutgers University, University of Illinois at Chicago, the University of Maryland, UCLA, University of Kentucky and the University of Colorado at Boulder.

University of Illinois Urbana-Champaign
Certificate in Geographic Information Systems

The Certificate Program requires 20 hours of instruction. It provides sophisticated education in GIS, remote sensing and cartography and serves as a basis for entry-level employment in the geotechnology industry. There are five required courses to complete the certificate:

- GEO 241 GEOGRAPHIC INFORMATION SYSTEMS I
- GEO 242 GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS
- GEO 243 REMOTE SENSING
- GEO 343 REMOTE SENSING II
  or GEO 344 GEOGRAPHIC INFORMATION SYSTEMS III: SPATIAL ANALYSIS FOR SUSTAINABILITY
- GEO 391 STATISTICAL DATA ANALYSIS FOR GIS

GEO 241, 242 and 344 must be taken in sequence. GEO 241 is a pre-requisite for GEO 391. GEO 243 can be taken at any time. Please contact the Department if you are considering pursuing the GIS Certificate, even if you are a declared geography major.

In order to earn a certificate in GIS, a student must:

- Earn at least a grade of C- in each Certificate course.
- Earn at least a cumulative GPA of 2.0 for all courses applied to the Certificate.
- Earn a letter grade. The pass / fail option may not be selected for courses in the Certificate.

A student completing a GIS Certificate is eligible to simultaneously complete a Geography minor. No more than 3 GIS Certificate courses can be applied to a Geography minor. A student wishing to complete a GIS Certificate and a Geography minor will complete a minimum of 8 Geography courses. Please see a faculty advisor in the Department of Geography for further details.

About

Our program in Global Asian Studies at DePaul University is the only one of its kind in the United States. Courses offer an in-depth, challenging and critical thinking based perspective on ancient societies, cutting edge technology and current events in Asian countries, the Asian region, Asian diaspora and Asian American communities.
Our faculty teach more than 100 courses in the arts, humanities, languages and social sciences. We also offer a number of Study Abroad trips to Asia and the Americas, as well as host events and workshops for students.

Drawing from our leading expertise in China and Japan, our program also reflects growing expertise in India and Southeast Asia.

From ancient cultures to modern technology, DePaul’s Global Asian Studies program provides an important foundation for students to prepare to have a leading role in the 21st “Pacific” Century.

To learn more about our current activities email us at globalasianstudies@depaul.edu

About

The Department of History offers an innovative curriculum that emphasizes student research and that allows students to tailor concentrations to meet their interests and goals. The History major teaches students how to research, write, and engage with other students and scholars about the processes of historical change in a global context. The curriculum culminates in an annual Student History Conference that highlights student achievement.

Currently home to more than 35 full and part-time faculty, and approximately 300 majors and minors, the History Department serves as a robust center for talks, campus activities, and intellectual life in the College of Liberal Arts and Social Sciences. The department’s faculty are teacher-scholars who specialize in virtually every region of the world—American, African, Asian, European, Latin American, and World History—and who specialize in a broad range of subfields that allow students to understand a wide range of topics and methods.

The undergraduate program offers a variety of concentrations including the standard concentration, public history, pre-law, and secondary education in history. Students can also apply for one of our joint degree programs. The TEACH program combines history courses with those necessary for specialization in secondary education. TEACH students receive both B.A. and M.A. degrees. The Department of History, in conjunction with Journalism, offers another innovative joint degree program. Students combine a B.A. in History with an M.A. in Journalism. These joint degree options allow students to acquire the valued skills and broad knowledge a history education provides while working towards a professional program and certification in five years. Plus, students received discounted graduate tuition.

The Department offers day and at night courses on the Lincoln Park and Loop Campuses. The history major offers a foundation for any number of career paths. DePaul History students have an excellent track record of acceptance at leading professional programs and graduate schools.

About

The Department of the History of Art and Architecture offers a curriculum that identifies and promotes continuing contact with the enduring values of the world’s artistic heritage and the application of these values to the future. It provides a broad foundation in the history of art and architecture that emphasizes the exquisitely diverse ways that peoples across time and place have inscribed their most cherished cultural traditions into their material world.

About

The Interdisciplinary Studies Program (IDS) is an innovative, flexible, and highly individualized graduate program designed to meet students' academic and professional goals. The program gives students the opportunity to design a program of study tailored to their own needs and interests. When students choose IDS, they take on the exciting challenge of creating their own curriculum and unique plan for learning. Creating an individualized program requires maturity, self-motivation, and independence. Students seeking a combination of flexible options and academic challenges are natural IDS candidates. IDS is a creative alternative to more rigid traditional, discipline-specific programs. Students can build their particular academic or professional interests and concentrate on specialized fields that are not available in traditional graduate programs.

The program offers students individualized cross-disciplinary majors, incorporating courses drawn from social sciences, humanities, business, computer and information science, and public service.

The program offers the following:

- Individual, self-designed graduate program of study that builds on specific academic and professional interests.
- Ability to combine various academic disciplines in chosen areas of study.
- Choice of courses in most colleges and schools.

About

The Department of International Studies offers a Bachelor of Arts (B.A.) degree and a Master of Arts (M.A.) degree within the College of Liberal Arts and Social Sciences. Our programs are designed to equip students with the interdisciplinary approach, critical thinking skills, and international perspectives necessary to address real world challenges. Our faculty and affiliated faculty come from diverse academic backgrounds and share a commitment to fostering critical thinking through a rigorous interdisciplinary curriculum founded in critical social theory and international political economy.

The B.A. and M.A. curricula are unique within the Midwest and far beyond for their interdisciplinary approach to international studies and their commitment to placing the themes of power and inequality at the heart of academic inquiry. Unlike conventional programs that focus on international security and economy, our program addresses the economic in conjunction with the political and social. Moreover, all students are expected to develop and maintain proficiency in a language other than English. Students learn to think in more international and interdisciplinary contexts, to value social and cultural complexity, and to question conventional wisdom. As a result, our students often engage in activism and social justice work in Chicago, nationally, and internationally.

For more detailed and up to date information, please visit the International Studies Department Website.

Faculty

The department houses six core faculty and two adjunct faculty whose research and teaching interests include postcolonial theory, Middle East politics, critical social theory, migration and diaspora studies, gender and sexuality, critical development studies, international law, international political economy, and social movements. As an interdisciplinary program, we involve faculty from across the university in teaching classes, hosting events, and advising students. Affiliated faculty come from Political Science, History, Geography, Modern Languages, Latin American and Latino Studies, Anthropology, African and Black Diaspora Studies, Religious Studies, Educational Policy Studies, Environmental Sciences, and Women's and Gender Studies. Despite the varied teaching and research interests, faculty members share a commitment to examining the world critically through an interdisciplinary and international lens.

About

The Irish Studies Program is an interdisciplinary field of study, offering an undergraduate minor to students interested in studying Ireland along with the worldwide Irish Diaspora and the contemporary integration of Ireland within globalized systems of political economy, international relations, travel and communication.

The Irish Studies Minor familiarizes students with a wide range of courses that explore Ireland and develop critical perspectives on its place in history and the contemporary world. Our faculty provides an interdisciplinary approach on a wide range of Irish topics from various fields of inquiry including History, Geography, Digital Media, Religious Studies, Women's and Gender Studies, Environmental Science, and English. Several study abroad programs offer courses that fulfill requirements towards the Minor as well. It takes six courses to meet the requirements for the Irish Studies Minor.

About

Our program grounds students in a study of Islam as a worldview/civilization and living reality. The program engages students in exploring primary texts, history, global Muslim communities and regional issues of the Islamic world. Three assumptions undergird the philosophy of this program: Islam is a religious tradition, an historical civilization and a living reality; it has interacted with all known forms of government and thus produced varied cultural expressions; and the religious core ties all of these cultural expressions together.

Students will not only investigate the history of Islam, major texts and ideas and sources in their coursework, but will also focus intensively on specific aspects of global Islamic experiences. Included in this coursework are the opportunities to take a closer look at the various histories of Islam in places such as the Middle East, Africa, South Asia, Central Asia, Europe and the Americas. Central to this project is a focus on specific contexts, local communities and individuals that continue to shape the legacies of Islam in their unique contexts.

This approach to the study of Islam is currently unmatched anywhere else in the United States and perhaps the world.

About

The Latin American and Latino Studies Program explores the cultural contributions of Latin Americans to the global community and highlights perspectives and traditions that have developed in the region. It analyzes the multicultural character of the peoples of Latin America by calling attention to the complex interplay among Indigenous, European, Semitic, Arab, Asian and African societies in the region. It explores the profound linkage that has emerged between Latin America and the United States, particularly through the construction of Latino communities in the U.S.

The LGBTQ Studies program posits sex and sexuality as central analytical categories within many different fields of inquiry. This emerging discipline scrutinizes the cultural production, dissemination, and vicissitudes of sexuality while attempting to decipher the meanings inscribed in the practices and discourses of sex. We may say that LGBTQ Studies does for sex and sexuality what women’s studies does for gender. It has grown out of women’s and gender studies, cultural studies, and the post-1969 discourse on the politics of sexuality both in the public sphere and the more limited arena of scholarly endeavor.

  Professor (Religious Studies)
About

The Military Science Department offers students, as an adjunct to their major field of study, the opportunity to achieve commissions as Army officers in either the active Army, the U.S. Army Reserve, or National Guard through the Reserve Officers’ Training Corps (ROTC) program. The program develops leadership, managerial potential, and the qualities of self-discipline, confidence, personal integrity, and individual responsibility. Emphasis is on learning through doing. The department’s program prepares the student for a period of service as a commissioned officer in the United States Army, a service that can ultimately lead either to a military career or to a more responsible place in the civilian world. The curriculum is divided into two parts: Basic and Advanced. The Basic course normally encompasses the freshman and sophomore academic years. Basic-course students are under no obligation to enter into a contractual agreement with the U.S. Government. The advanced course encompasses juniors and seniors who have successfully completed the on-campus basic course. Students who have attended a special six-week summer training program, students who have previous Junior ROTC training, and qualified veterans may also be admitted into the advanced course. Upon enrollment in the Advanced Course, the student enters into a contractual agreement with the United States Government, whereby the student agrees to accept a commission in the United States Army for a period of active or reserve duty after his graduation. The government, in return, provides a monthly stipend of $300-500 for up to ten months of the school year.

Students may compete for ROTC two-year and three-year scholarships during their freshman or sophomore year. Scholarships can pay full tuition and fees, annual book allowance of $1,200, and $300-500 monthly during the remainder of the winner’s undergraduate education. A Leaders Training Course summer program is available to selected students who have been unable to complete the normal two-year progression of Military Science. Students attend a six-week program at Fort Knox, Kentucky. This program, in conjunction with the normal two-year advanced program of Military Science, is designed to prepare the student for a period of service as a commissioned officer in the United States Army. The program provides an introduction to a variety of military-related topics. It involves instruction in map reading, marksmanship, first aid, tactics, fundamentals of leadership, and basic military skills.

Faculty

Sergeant First Class Marc A. Westenbarger
Assistant Professor and Director
Loyola University
The programs in Modern Languages seek to develop a student's ability to speak, understand, read, and write another language and to foster an appreciation of its literature and civilization. The department regularly offers courses in American Sign Language, Arabic, Chinese, French, German, Ancient Greek, Italian, Japanese, Latin, Russian, and Spanish.

**Graduate Programs**

The Department of Modern Languages offers the following graduate programs:

- Master of Arts in Arabic
- Master of Arts in Chinese
- Master of Arts in French
- Master of Arts in German
- Master of Arts in Italian
- Master of Arts in Japanese
- Master of Arts in Spanish

**Undergraduate Programs**

Major programs are available in Arabic Studies, Chinese Studies, French, German, Italian, Japanese Studies, and Spanish; these consist of advanced courses at the 200- and 300-levels. Students may begin their Modern Language major upon completion of elementary and intermediate courses (100-level courses) or successful placement testing.

Minor programs are available for all languages, including:

- American Sign Language
- Arabic Language
- Arabic Studies
- Chinese Language
- Chinese Studies
- Classical Studies
- Commercial French
- Commercial Spanish
- French
- French Translation
- German
- German Studies
- Italian
- Japanese
- Japanese Studies
- Russian Language
- Russian Studies
- Spanish
- Spanish Linguistics
- Spanish Translation

All students are strongly encouraged to participate in DePaul's Study Abroad Programs in China, France, Germany, Greece, Italy, Japan, Mexico, Spain, Poland, and other locations. Consult the Study Abroad Office for current offerings.

About

New Media Studies is an interdisciplinary field that studies the processes and platforms through which digitally-encoded media (photographs, text, audio, film) operate and circulate. New media studies is also the study of how digitally-encoded media products are combined into “new” media forms, such as web sites, webcasts, interactive games, graphic designs, and sales and technical information. The Master of Arts in New Media Studies combines critical interpretation and situated practical action in coursework to prepare its graduates to function as productive and responsible individuals in the evolving social contexts created by the new media.

The Master of Arts in New Media Studies will prepare students to engage the new media by building:

- The ability to gather, process, and communicate information on the Internet
- An understanding of the historic role of new media in shaping contemporary consciousness
- An ability to identify appropriate technologies to accomplish a specific communication need using the Web and other online delivery systems
- An ability to edit and manage content for web sites and social media platforms
- An ability to apply rhetorically sophisticated strategies for writing, editing, and producing new media content
- A capacity to work well as part of a team charged with solving a communication problem using new media technologies
- An understanding of the relationship between "new" and "old" media
- An understanding of rhetoric and visual design—how visual, image-based communication differs from and interrelates with text- or language-based communication
- An understanding of the technical and practical logistics (planning, budgeting, scripting) of moving a project from idea to completion

The M.A. in New Media Studies is interdisciplinary in focus; although NMS is housed in Writing, Rhetoric, & Discourse, students are able to take courses from a wide variety of other units as well.

About

The Peace, Justice, & Conflict Studies Program offers students a B.A. major curriculum that helps them reflect on the origins and causes of conflict, violence, and social injustice as well as the wide spectrum of conflict intervention, from armed conflict, through governmental and organizational peacebuilding, to local and interpersonal conflict resolution. The Program also introduces students to strategies for resolving interpersonal, communal and international conflicts peacefully, as well as tactics that promote the common good in a way that addresses the structural origins of violence. The Peace, Justice, and Conflict Studies Program addresses the need for a critical examination of the origins and root causes of violence and conflict. The Program includes frank debate about the efficacy of nonviolent in comparison with violent approaches to social change. The inclusion of conflict theory and intervention as part of this program is a distinctive aspect of this program; the arena of conflict resolution offers many potential career options. The Program emphasizes hands-on, experiential components in the introductory course, the final seminar/internship and the workshops which emphasize skill training.

Students and faculty in Peace, Justice, & Conflict Studies question what constitutes a just society and world, what peace and peacebuilding can accomplish in a world full of conflict, and how attitudes toward social justice, violence, and peace reflect and reveal American and other cultures' values, beliefs, prejudices, assumptions, and perceptions.

Students are expected to gain competency in dealing with situations of conflict and injustice by mastering the theoretical and intellectual frameworks related to peacebuilding, human rights advocacy, and justice development, by learning to interpret and analyze real life situations in their complexity, by understanding how to build strategies for negotiation, consensus-building, advocacy, partnership development, and other intervention tools, and by understanding various research methodologies and the use of media and creative outlets.

Students majoring in many social science, humanities, and other interdisciplinary programs will find it beneficial to double major or minor in Peace, Justice, & Conflict Studies. Students who pursue the major are well prepared for graduate work in the humanities or social sciences, and specifically in peace, justice, or conflict studies, as well as for professional training in law, public service, or business.

About

The Department of Philosophy serves the needs of the student who seeks an understanding of philosophical issues for personal enrichment, the student who desires a more fundamental appreciation of philosophy in support of law, medicine, business, and various academic disciplines, and the student who wishes to continue the study of philosophy at the graduate level.

Through its courses and programs, the department acquaints students with various philosophical approaches and with basic problems posed by diverse thinkers. Courses have been designed to highlight both the humanistic and technical features of philosophy.

The department also recognizes the important need for skills and training. Its courses in logic and analysis have been designed to help students become more perceptive in their experiences and more critical in their thinking.

Further, the department is aware that, in our age of rapid change, society often tends to neglect the meaning and worth of the person. Courses are therefore offered that investigate and emphasize the dignity of the person. By helping students understand the nature and grounds of ethical judgments, these courses aim to promote an appreciation and ordering of human values.

The department has designed all of its course offerings with the aim of both ensuring that our Liberal Studies courses remain responsive to the needs of the student who does not plan to specialize in philosophy and offering the student who chooses to major or minor in philosophy a rich and diverse curriculum.

The department is particularly proud of its "Philosophy Circle," an undergraduate philosophy club which provides a forum for the exchange of ideas between faculty and students.

About

Political Science is the study of the organization and behavior of people, groups, and institutions which make up our government and the larger political system. The program is designed to introduce students to questions, perspectives, and arguments about the political forces that shape their lives. As such, the program has value for Liberal Studies students as well as for those who may choose the discipline as a major field of study. Students find the substance and the methods of the discipline useful in the legal, business, civic, communications, governmental, and academic professions, as well as any endeavors that draw them into public service.

About

Master of Public Health (MPH)

The Master of Public Health (MPH) program prepares public health leaders to work collaboratively with diverse communities to prevent disease and ill-health, prioritize and investigate health concerns, achieve lasting social change, and foster health equity to promote the health and well-being of all people. The MPH program has one focus, community health practice, and students will master the breadth of public health subject matter necessary for practice in this field.

Features unique to the MPH Program include a cohort-based learning model (including admitting students once per year); small class sizes; integrated field work and classroom learning in the practicum and capstone course sequence; ideal for working professionals--courses are offered in the evening; students can complete the degree in two, three or four years; and a multidisciplinary perspective that prepares students to address the complexities of community health.

Students gain practical experience during the final year of the program in their community-based practicum. The practicum constitutes nine months of professional community health-focused practice and provides students with a structured, comprehensive and integrated application of their MPH course work. This experience culminates in the creation of the MPH capstone, project, and formal presentation through a three-course capstone sequence.

Certificate in Global Health

The certificate in Global Health prepares professionals to work collaboratively with communities to prioritize and investigate health concerns to achieve lasting social change, and foster health equity to promote the health and well-being of populations in diverse global contexts. The four-course certificate trains students in key aspects of global health, using a multidisciplinary approach to analyze the underlying determinants of health, the relationship between public health and development, and public health practice.

Course Requirements
Admission Requirements

Applications are accepted at any time, and students may begin the program at the start of any academic quarter. The program is open to both non-degree seeking students and students concurrently enrolled in a DePaul graduate degree program. All applicants must hold a bachelor's degree. To apply to the program, prospective students must submit the following materials:

- An LAS graduate admission on-line application [application fee is waived for current DePaul students]
- Transcripts from all schools attended
- A personal statement of 300-500 words describing their professional interests and goals in the certificate.

About

Public Policy Studies is a discipline that explores the role and impact of decision-making by governments. The discipline includes knowledge of both process and substance of a particular policy area. Thus, a student in public policy must have both generalist and specialist skills to apply to a particular public problem. In terms of political process, the study of public policy examines questions of how public policy is formulated, implemented, and evaluated over time. It also explores notions of agenda-setting and framing of issues that lead to a problem gaining the attention of the government. Public policy specialists and analysts are hired by all levels of government. During the past several years in addition to the government sector, the nonprofit and private sectors have sought public policy analysts for employment. Therefore, the curriculum prepares students for being public policy specialists in both the private and nonprofit sectors in addition to the public sector. The curriculum also is tailored to prepare students who would like to continue their education in graduate programs or law schools. The faculty members of the department work closely with students to place them in internships, and when possible, employment positions.

The Public Policy Studies Department (PPS) offers an undergraduate degree (B.A.) that allows majors the option to pursue concentrated work in the areas of Environmental or Urban Studies. Students take a common core of courses dealing with public policy theories, processes, methods of public policy analysis, and important environmental and urban policy issues. In addition, a data analysis course is required that the student selects from a list of approved courses. Microeconomics or statistics is strongly encouraged.

Beyond the core curriculum, students choose either the Environmental Studies or Urban Studies track, selecting from a group of courses within these specializations. A capstone course reconvenes the students at the end of their curriculum to study a public policy problem in-depth under the direction of a public policy professor. The capstone changes approximately every three years, to reflect a current issue on the public policy agenda.

The department is in the process of making a number of changes to the curriculum that will make it more exciting, more flexible for students, and responsive to suggestions from students. Until these innovative changes are established, the current curriculum shall be followed.

About

While remaining intensely personal, the resurgence of religion in the public sphere is a characteristic of our era. Religion has become central to contemporary culture, politics, identity, and conflict in every part of the globe. At the same time, our world is marked by an emerging pluralism, as globalization, migration and technology bring diverse religious traditions into closer proximity and creates new religious communities.

The Department of Religious Studies offers DePaul students the opportunity to engage in the academic study of religion. The study of religion includes not only the traditional areas of sacred texts, myths, rituals, mystical experiences and doctrines, but also the ways in which political, social and economic forces shape these phenomena for religious communities. Drawing on a host of academic disciplines, religious studies challenges students to encounter the traditions of the world in all their rich diversity. Given the complexity of the subject matter, members of the department draw upon several other academic disciplines -- anthropology, art history, biblical studies, economics, environmental studies, ethics, gender studies, history, linguistics, literature and literary criticism, political science, philosophy, psychology, sociology, and theology -- as they do their work.

Beyond work with texts, students may also study religion through the media of film and video, music, the visual and dramatic arts, and the internet. The department emphasizes comprehensive learning in writing, synthetic and analytic thinking, and oral communication skills. Students can go beyond their course work with further learning opportunities, such as the senior thesis, independent study, study abroad and internships, and service learning, both locally and internationally.

A truly interdisciplinary field, religious studies at DePaul helps students broaden cultural literacy and deepen critical skills. The study of religion also prepares students to engage important conversations of our day. Further, students may find that the study of religions can help them respond not only to political, social and
environmental challenges, but also to address the existential questions they face and that are encountered by other thoughtful men and women.

A religious studies major or minor is positioned to pursue a wide variety of careers. A bridge between the specialist's perspectives on religion and a wider world that is often in need of these perspectives, religious studies majors have worked in the fields of law, social work, regional and international business, governmental and non-governmental service, secondary school teaching, and service in religious communities. A religious studies major is also well-prepared for further studies in graduate programs leading to careers in academia.

Religious studies at DePaul expresses the university's distinct identity, which respects engaged pluralistic inquiry in all religious issues and traditions. The department is committed to DePaul's Catholic, Vincentian and urban heritage, mission, and identity, and to its goal of establishing the university as a model of diversity. The department's course offerings reflect the diversity of the city of Chicago and of the students who attend DePaul.

The twenty-two full-time faculty constitute one of the largest and most diverse undergraduate departments of religious studies in the United States. This size and diversity enables us to offer courses in a wide range of geographical regions and historical periods. The research and teaching interests of the faculty include American religious history as well as South and East Asia, the African diaspora, North and Meso-America, the Middle East and Europe. The faculty and curriculum includes specialists in Judaism, Christianity, Islam, Hinduism, Buddhism, Confucianism, Taoism, Shinto, as well as Native American, African American, and Latino/a religious traditions.

In addition to excellence in teaching, the faculty also maintain high standards for research, and are actively engaged in presenting at major academic conferences and publishing their work in high-ranking professional journals.

The Department of Religious Studies sponsors the Center for Interreligious Engagement and is fully engaged with Center for Intercultural Theology and World Catholicism and other centers and institutes of the University. It has a close working relationship with the Department of Catholic Studies and the Islamic World Studies Program. Religious Studies is a vital part of the First Year, Liberal Studies and Honors Programs.

The Department encourages students in all major concentrations and minors to engage various questions related to the study of religion, such as (but not limited to):

- What is religion?
- How do religious communities come into being and define themselves?
- How do religious communities form worldviews, doctrines, and practices, and how does the study of religion help us to understand their change over time?
- How do sacred texts come into being, and what do they communicate to us?
- How does religion shape culture, and how does the wider culture define religion?
- What is the role of religion in the contemporary world?
- How do religion or religious sensibilities help us to relate (or hinder us from relating) to each other?
- How can an informed student of religion evaluate the rival claims to truth and moral rightness of different religious and secular ideologies?
- How do religious traditions and texts treat issues of sexuality and gender, race and class?
- How have religious traditions interacted with each other in the past, and how do they continue to do so today?

About

We educate women and men to be effective public service leaders in the global community guided by the values of St. Vincent de Paul.

The School of Public Service promotes effective management of nonprofit organizations and government agencies, and fosters the development of sound public policies affecting the delivery of social services. Programs of instruction, research, and community involvement prepare adult learners to pursue administrative careers in a broad range of public service organizations. Following the tradition of St. Vincent de Paul, the School of Public Service devotes special attention to policies and practices that promote social equity through the delivery of affordable, quality services to those in greatest need.

While the knowledge and skills required to manage organizations in the public sector are becoming indistinguishable from the best practices used in the private and nonprofit sectors, the ultimate goals of these organizations provide a sharp distinction. The School of Public Service keeps this distinction firmly in view in its course offerings. Degree and certificate programs are interdisciplinary, drawing primarily upon the knowledge bases of sociology, economics, political science, law and the human-service professions. The curriculum carefully balances theoretical and applied approaches to contemporary challenges of administration and policy analysis.

The School emphasizes ethical leadership in all aspects of its curriculum but especially by offering short-term, executive-style, study-abroad experiences for working professionals. Faculty encourage all students to take advantage of more than a dozen courses to developed and developing countries. Consistent with its mission, the
School of Public Service purposefully strives to build an academic community that is racially, ethnically, religiously, and otherwise diverse. Part-time and full-time students are equally welcome.

Certificate in Community Development

This program offers community development specialists skills in organization planning, leadership development, and program evaluation. The program allows established and emerging professionals to broaden their perspective on urban-development programs in an inter-disciplinary learning environment by including knowledge from psychology, public service, sociology, geography and liberal studies.

Students must successfully complete a minimum of 16-quarter hours of graduate credit. Each course carries four-quarter hours. Students then must participate in a non-credit research colloquium. Each participant of the colloquium makes a presentation before a small group of students and faculty members. No more than two courses earned toward the certificate shall come from one department. Please note that the list of courses is
subject to change.

Certificate in Metropolitan Planning and Development

This certificate program is designed for individuals who want to develop analytical skills and stay current on issues of regional land use, transportation, and economic development. It provides students with a perspective on the institutions of municipal and metropolitan planning and issues affecting the delivery of public services, and it explores innovative solutions to urban and suburban development problems. This certificate is offered in conjunction with The Chaddick Institute for Metropolitan Development. The Institute offers a variety of programs regarding land use, infrastructure and transportation in the region.

Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select two from the following:
  - MPS 526 LOCAL GOVERNMENT ADMINISTRATION
  - MPS 529 STRATEGIC MANAGEMENT AND PLANNING
  - MPS 541 ECONOMIC FOUNDATIONS OF PUBLIC SERVICE
  - MPS 543 POLICY IMPLEMENTATION
  - MPS 546 ADVOCACY AND LOBBYING
  - MPS 573 URBAN AND COMMUNITY DEVELOPMENT
About

The Master of Social Work (M.S.W.) degree program is designed to prepare students for advanced social work, with an emphasis on community practice. The M.S.W. degree prepares its graduates for work and leadership in broad and varied human service organizations which span child welfare, health and mental health, community planning, family services and the like.

About

The Department of Sociology consists of 20 full-time faculty, 350 undergraduate majors, and over 50 graduate students. Founded in 1922, the department has a long tradition of inspiring students to apply sociology to the world around them.
Sociology is the study of groups, social interaction, and social institutions. To study these, the department has developed a core curriculum centered on sociological methods (how we know) and sociological theory (how we explain). Beyond these core courses, faculty areas of interest are wide-ranging, which is reflected in the variety of courses and undergraduate concentrations we offer.

Our location in the Lincoln Park neighborhood in Chicago gives students access to a remarkable range of community service opportunities, field experiences, and internships. With its ethnic communities, economic development, and urban concerns, Chicago serves as a rich laboratory for research and observation.

Certificate in Social Research

The Certificate in Social Research familiarizes students with the choices they can make in designing social science research and to help them select the research tools that are right for the types of questions they are asking. The four-course program provides knowledge of current research designs, methods, and practices; quantitative and statistical skills; and the logic of inquiry.

A number of Sociology M.A. students may wish to obtain the certificate as part of their degree program. It will also be useful for students in fields such as women’s and gender studies, professional writing and publishing, public service, ethnic studies, journalism, and environmental science. Professionals in and students preparing for careers in the non-profit sector, public policy and administration, and the production of media content, will find the certificate valuable as well.

Course Requirements

Core Courses

Two core courses are required:

- A statistics or quantitative analysis class. This requirement is met by taking at least one of the following courses:
  - SOC 402 STATISTICS FOR THE SOCIAL SCIENCES
  - SOC 412 DATA ANALYSIS
  - SOC 450 ADVANCED STATISTICS I

- SOC 411 SOCIAL RESEARCH (This class also includes the requirement of obtaining an online certificate in the protection of human subjects - currently offered through the DePaul Institutional Review Board [IRB] and Collaborative Institutional Training Initiative [CITI].)

* Students will be placed in the appropriate quantitative/statistics class on the basis of their graduate and undergraduate work.

Elective Courses

Choose two courses from the following:

- SOC 412 DATA ANALYSIS
- SOC 413 QUALITATIVE METHODS
- SOC 417 ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
- SOC 418 DOCUMENTARY FILMS IN SOCIAL SCIENCES *
- SOC 422 URBAN AND COMMUNITY ANALYSIS
- SOC 423 RESEARCH ON URBAN CULTURES
- SOC 451 HEALTH POLICY ANALYSIS: INTERNATIONAL PERSPECTIVES
- SOC 493 VISUAL SOCIOLOGY

* For elective credit for SOC 418 (Ethnographic Documentary Film) in the Social Research Certificate Program, the student should submit the syllabus to the Graduate Program Director or Sociology Department Chair for review to confirm that the specific section of the course is oriented towards research methodology.

About

Women’s and Gender Studies is an interdisciplinary department offering an undergraduate major and a minor, a 5-year B.A./M.A., a Master of Arts (M.A.), and a 4-course Graduate Certificate. Women’s and Gender Studies courses examine women’s lives, conditions, and contributions within their historical, social, cultural, national and transnational contexts and they explore how gender is constructed and negotiated within and across societies. Women’s and men’s identities and experiences are examined through the constructs of gender, race, class, age, etc.
ability, sexuality, culture, religion, nation, etc. within broader historical, social, and global contexts, such as colonialism, globalization, among others.

Through feminist and gender-based theories and methodologies, the Department of Women’s and Gender Studies offers critical analyses, reflections, and contributions to knowledge regarding interlocking systems of oppression and privilege, thereby addressing issues of power, resistance, and social transformation. In addition, the emphasis on critical theory and analysis allows for work that interrogates feminist discourses as well as those of other disciplines in the arts, humanities, social sciences, and natural sciences.

The interdisciplinary Women’s and Gender Studies major and minor combine courses taken in the Department of Women’s and Gender Studies with approved elective courses offered in other departments and programs around the university. Courses are offered regularly by many departments in the college of Liberal Arts and Social Sciences—in the social sciences, and in the humanities—as well as by the other colleges and schools throughout the university.

In addition, many students decide to combine a Women’s and Gender Studies major with a second major in another discipline. A double major is a rich educational experience and is actually easy to accomplish. To do so, you can double count courses that fulfill both Women’s and Gender Studies and Liberal Studies requirements, and you can double count half of the courses that fulfill the requirements of both majors. We now have a 5 Year B.A./M.A. Program that allows you to get both an undergraduate and graduate degree in five years. Students must apply their junior year for the program.

A major, double major, minor, and/or M.A. in Women’s and Gender Studies prepares students for graduate study in many fields (law, social work, sociology, psychology, history, art and art history, communication, Latin American/Latino Studies, African and Black Diaspora Studies, International Studies, among many others) as well as for careers in the public and private sectors, including social services, social justice, public policy, education, media and popular culture, advocacy, creative arts, counseling, and more.

Students who would like to know more about the Department of Women’s and Gender Studies are invited to speak with the department chair, and other faculty members of the department (5th Floor of Schmitt Academic Center) and/or visit the Department of Women’s and Gender Studies website.

**About**

The Master of Arts in Writing and Publishing program offers advanced training in the art and craft of writing poetry, fiction, and nonfiction. The program is specifically designed for students interested in careers in creative and literary writing, publishing, and editing, as well as for those seeking to expand their knowledge of writing for the purpose of teaching.

Special Programs

Internships
Writing & Publishing students can qualify for a variety of internships, receiving significant on-the-job experience in such areas as research, writing, editing, publishing, law, corporate communications, non-profit work, and library science. Students might locate an internship on their own or receive assistance from Prof. Chris Green, Coordinator of Professional Internships in Writing & Publishing. Quarterly Career Nights (featuring panels of professionals) and Career Workshops (emphasizing internship- and job-finding skills) will also enhance students' opportunities and experience.
About

The department of Writing, Rhetoric, and Discourse (WRD), one of the largest departments at DePaul, is dedicated to studying the history and theory of literate activity and helping students excel as writers in a wide range of academic, professional, and public settings. WRD is home to DePaul's First-Year Writing program; in addition, the department offers the Minor in Professional Writing and the major in WRD. At the graduate level, the Master of Arts in WRD addresses writing in professional and technical contexts, the preparation of postsecondary teacher-scholars in writing, and the study of language for writers. The Combined B.A./M.A. in WRD allows undergraduates to begin taking graduate courses in their senior year. The department's Master of Arts in New Media Studies prepares graduates to function as productive and responsible individuals in social contexts created by new media through both critical interpretation and situated practical activity. The department also offers a Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL), which prepares students to teach English as a Second Language (ESL) to adult learners in the United States or abroad. Undergraduates who choose the B.A./M.A. option may complete the TESOL Certificate within the M.A. portion of the program.

The act of writing in general and each student's writing in particular are of central concern in all WRD courses. Theories of language, rhetoric (how to make effective choices as writers), and discourse (the way writing structures human activity) develop students' understanding of how the individual act of writing is bound up in broader contexts of institution and culture.

WRD is made up of more than 70 faculty members, all of whom teach at the undergraduate level. The department's Graduate Faculty comprises nationally recognized researchers in rhetorical theory and practice, composition theory, writing pedagogy, applied linguistics, second language writing, professional and technical writing, and writing program administration.

Certificate in Teaching English to Speakers of Other Languages

The WRD department offers a Graduate Certificate in TESOL, which may be completed by students in an existing DePaul graduate program or by students who wish to complete only the Certificate. Made up of courses in the programs of Writing, Rhetoric, & Discourse, Bilingual-Bicultural Education, English, and Modern Languages, the Certificate prepares students to teach English as a Second Language (ESL) to adult learners in the United States and abroad. The Certificate may also be attractive to faculty at non-U.S. institutions who wish to come to the U.S. for education in working with second language learners.

Course Requirements

- One Theory course from the following list:
  - BBE 526 THEORETICAL FOUNDATIONS OF ESL AND WLE
  - MOL 454 THEORETICAL FOUNDATIONS/CURRENT RESEARCH SECOND/FOREIGN LANGUAGE ACQUISITION
  - BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
  - BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE (when topic is relevant)
  - BBE 560 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
  - WRD 512 TOPICS IN LANGUAGE (when topic is relevant)
- One Methods course from the following list:
  - WRD 543 TEACHING ESL WRITING
  - WRD 544 TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE
  - WRD 550 TOPICS IN TEACHING WRITING AND LANGUAGE (when topic is relevant)
- One Sociolinguistics course from the following list:
  - WRD 507 GLOBAL ENGLISHES
  - WRD 514 SOCIOLINGUISTICS
  - BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE (when topic is relevant)
- One Language Structure course from the following list:
  - ENG 400 STRUCTURE OF MODERN ENGLISH
  - ENG 401 HISTORY OF THE ENGLISH LANGUAGE
  - ENG 408 STYLISTICS
  - ENG 478 TOPICS IN TEACHING: GRAMMAR FOR TEACHERS *
  - WRD 512 TOPICS IN LANGUAGE (when topic is relevant)
  - WRD 546 PEDAGOGICAL GRAMMAR
- 20 hours of field experience working with adult language learners. Field experience will be arranged individually with the Coordinator of the Certificate program.

* ENG 478 counts for TESOL credit only with this subtitle.

Students completing the Master's in Bilingual-Bicultural Education can complete the Certificate program by taking their Theory and Sociolinguistics courses in BBE and their Methods and Language Structure courses in WRD; they must complete all requirements for the BBE program to receive the Master's degree. Students in the Master of Arts in English (MAE) may complete their Language and Structure requirement in English; any two additional courses form the list above will count for credit in both MAE and the TESOL Certificate. For Students in the M.A. in WRD, a maximum of two courses (8 credits) from MOL or BBE may be counted as credits toward the M.A. in WRD degree.

Students who are concurrently completing any other graduate degree program at DePaul must work with their program director/advisor to determine if TESOL Certificate courses will count toward their degree requirements.

Admission Requirements

Applications are accepted at any time, and students may begin the program at the start of any academic quarter. The program is open to both non-degree seeking students and students concurrently enrolled in a DePaul graduate degree program. All applicants must hold a bachelor's degree. To apply to the program, prospective students must submit the following materials:

- an LAS graduate admission on-line application [application fee is waived for current DePaul students]
- transcripts from all schools attended
- a personal statement of 300-500 words describing their interest in the program, prior experience in TESOL or related fields, and professional goals for pursuing the certificate
Modern Language Option

The Modern Language Option (MLO) is available to any student in the Liberal Studies Program of any College major who studies a modern language beyond what is necessary to meet the College's Modern Language Requirement (MLR). Students selecting the MLO may substitute up to two language courses for two Learning Domain requirements*. The MLO is applied according to the following combinations of Learning Domains: Philosophical Inquiry OR Religious Dimensions; Understanding the Past OR Self, Society, and the Modern World; Arts and Literature OR Scientific Inquiry (cannot substitute for the lab science requirement.)

*Students must have the MLO approved by an academic advisor because conditions and variations are too numerous to list here.

Pre-Law Study

The Association of American Law Schools does not consider it appropriate to prescribe certain undergraduate degree programs for students who are planning to study law at the professional level. The Association does, however, consider certain skills and knowledge essential for later success in law and appropriate for study on the undergraduate level.

Pre-law study in the College of Liberal Arts and Social Sciences entails advanced course work that further develops the capacities and skills essential for satisfactory performance in law school. Specifically, pre-law study sharpens: (1) the ability to use the English language skillfully and effectively in oral and written advocacy situations; (2) the power to think clearly, critically, and independently in situations requiring problem-solving ability and sound judgment; and (3) the ability to use and understand statistical calculations. Moreover, pre-law study is intended to promote an understanding of the psychological processes, economic systems, political organizations, and social structures essential to the study and practice of law. Students who are considering applying to law school should fulfill their open elective requirements with challenging, upper-level courses that expand the knowledge areas and skills mentioned above.

Admission to law school is based on scores achieved on the Law School Admissions Test (LSAT), collegiate performance, extracurricular activities, work experience, and letters of recommendation.

Students who want to prepare for law school should, whatever their academic major, consult with Dr. David Barnum (dbarnum@depaul.edu) in the Department of Political Science, or contact the Department of History (historyadvising@depaul.edu), where there is a pre-law concentration in the History major.

Study Abroad Program

A study abroad experience is an important part of a liberal education. The opportunity to live, study, and work with people from around the world provides students with a way to not only gain international competence and skills, but also helps them to more clearly understand their own identities and agency within a global context. Study Abroad programs are designed to emphasize social, political, historical, and cultural understanding through immersion in other cultures and societies.

Program lengths range from one year to one week. In traditional programs lasting one quarter or more, students live and take courses on site. Short-term programs are topic-focused tours led by DePaul faculty exploring specific aspects and issues of a country or society. These programs typically last 2-3 weeks and are...
offered during breaks between terms. First Year Abroad programs are for first-year students and combine on-campus study of a location prior to a one-week trip to that area.

Program fees ordinarily cover local transportation associated with course excursions, accommodations, and some meals. Short-term program fees also cover round-trip airfare. In addition students pay regular DePaul tuition for the credit received while abroad.

Courses taken through the Study Abroad Program may be used to fulfill Liberal Studies domain requirements (including experiential learning), modern language requirements, major field requirements, or open electives.

Please visit the Study Abroad Program’s website for current offerings: http://studioabroad.is.depaul.edu/

TEACH Program

This program provides students the opportunity to complete in five years an undergraduate degree in a core arts and sciences major and a Master’s of Education degree with State of Illinois secondary education teaching certification in a content area related to their major. As a combined degree program of the College of Liberal Arts and Social Sciences and the College of Education, the program is collaboratively developed, governed, and taught by faculty from both units.

Students may apply to the Program during the spring of their junior year. They must complete the Junior Year Experiential Learning course TCH 320, Exploring Teaching in an Urban High School, and meet other application criteria prior to applying; these include completion of at least 16 hours at DePaul and a 3.0 GPA. During their Senior Year, students are required to complete a program capstone course and three 400-level courses that count toward both their undergraduate and graduate degrees. The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois Certification requirements (which may require some additional coursework in the student’s major and related fields), students are eligible to be certified to teach English, History, or Social Science at the 6th-12th grade levels.

A full description of the Program can be found in the College of Education graduate course catalog.

Certificates

A bachelor’s degree is required for admission to all of these certificate programs except for Geographic Information Systems.

Graduate Certificate in Digital Humanities

The Graduate Certificate in Digital Humanities requires 16 credit hours. The certificate program provides hands-on knowledge and guided experience with DH projects, tools, and methods. It is an interdisciplinary program taught by faculty from across the university. The certificate can broaden, and strengthen, employment prospects of students in all humanities fields. From public history and journalism to website development and all levels of teaching, real-world experience with state-of-the-art software makes digital humanities training stand out in a
Course Requirements

- DHS 500 INTRODUCTION TO DIGITAL HUMANITIES
- NMS 580 MARKUP AND TEXT ENCODING IN THE HUMANITIES
- GEO 440 PLACES, HUMANITIES, AND GEOGRAPHIC INFORMATION SYSTEMS
- One course selected from the following:
  - ENG 469 TOPICS IN AMERICAN LITERATURE: Digital Humanities in 19th Century American Literature
  - ENG 475 TOPICS IN LITERATURE: Digital Humanities Tools and Methods for Literary Study
  - HAA 402 DIGITAL MAPPING AND ART HISTORY
  - HST 438 COLLOQUIUM: SPECIAL TOPICS IN HISTORY: Digital History
  - NMS 540 DIGITAL ARCHIVES
  - WRD 520 COMPUTERS AND WRITING

Community Development

This program offers community development specialists skills in organization planning, leadership development, and program evaluation. The program allows established and emerging professionals to broaden their perspective on urban-development programs in an inter-disciplinary learning environment by including knowledge from psychology, public service, sociology, geography and liberal studies.

Students must successfully complete a minimum of 16-quarter hours of graduate credit. Each course carries four-quarter hours. Students then must participate in a non-credit research colloquium. Each participant of the colloquium makes a presentation before a small group of students and faculty members. No more than two courses earned toward the certificate shall come from one department. Please note that the list of courses is subject to change.

Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select three (3) from the following:
  - GEO 441 GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT
  - MLS 404 THE CITY
  - MPS 526 LOCAL GOVERNMENT ADMINISTRATION
  - MPS 572 URBAN POVERTY SEMINAR
  - MPS 573 URBAN AND COMMUNITY DEVELOPMENT
  - PSY 654 COMMUNITY PSYCHOLOGY
  - PSY 680 INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
  - SOC 426 URBAN DEVELOPMENT POLICIES
  - SOC 424 THE SOCIOLOGY OF HOUSING

Students may also enroll in the following elective courses, with permission of the program director and often the approval of the instructor. Generally, participants will be limited to one (1) of these courses:

- MPS 529 STRATEGIC MANAGEMENT AND PLANNING
- PSY 495 GRANT WRITING IN PSYCHOLOGY
- PSY 520 PRINCIPLES OF HUMAN DIVERSITY
- PSY 567 SPECIAL TOPICS IN COMMUNITY PSYCHOLOGY
- PSY 569 SEMINAR IN PROGRAM EVALUATION
- SOC 423 RESEARCH ON URBAN CULTURES
- SOC 360 SOCIAL SERVICES IN CONTEMPORARY SOCIETY
- SOC 444 POLICING INEQUALITY
Geographic Information Systems

The Certificate Program requires 20 hours of instruction. It provides sophisticated education in GIS, remote sensing and cartography and serves as a basis for entry-level employment in the geotechnology industry. There are five required courses to complete the certificate:

- GEO 241 GEOGRAPHIC INFORMATION SYSTEMS I
- GEO 242 GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS
- GEO 243 REMOTE SENSING
- GEO 343 REMOTE SENSING II
  - or GEO 344 GEOGRAPHIC INFORMATION SYSTEMS III: SPATIAL ANALYSIS FOR SUSTAINABILITY
- GEO 391 STATISTICAL DATA ANALYSIS FOR GIS

GEO 241, 242 and 344 must be taken in sequence. GEO 241 is a pre-requisite for GEO 391. GEO 243 can be taken at any time. Please contact the Department if you are considering pursuing the GIS Certificate, even if you are a declared geography major.

In order to earn a certificate in GIS, a student must:

- Earn at least a grade of C- in each Certificate course.
- Earn at least a cumulative GPA of 2.0 for all courses applied to the Certificate.
- Earn a letter grade. The pass / fail option may not be selected for courses in the Certificate.

A student completing a GIS Certificate is eligible to simultaneously complete a Geography minor. No more than 3 GIS Certificate courses can be applied to a Geography minor. A student wishing to complete a GIS Certificate and a Geography minor will complete a minimum of 8 Geography courses. Please see a faculty advisor in the Department of Geography for further details.

Certificate in Global Health

The certificate in Global Health prepares professionals to work collaboratively with communities to prioritize and investigate health concerns to achieve lasting social change, and foster health equity to promote the health and well-being of populations in diverse global contexts. The four-course certificate trains students in key aspects of global health, using a multidisciplinary approach to analyze the underlying determinants of health, the relationship between public health and development, and public health practice.

Course Requirements

- MPH 551 GLOBAL HEALTH
- MPH 554 INTRODUCTION TO GLOBAL PUBLIC HEALTH
- MPH 555 EPIDEMIOLOGY IN A GLOBAL CONTEXT
- Choose one from the following:
  - MPH 552 MATERNAL AND CHILD HEALTH
  - MPH 553 PUBLIC HEALTH AND FORCED MIGRATION
  - MPH 595 SPECIAL TOPICS IN PUBLIC HEALTH
  - MPH 599 INDEPENDENT STUDY IN PUBLIC HEALTH

Admission Requirements

Applications are accepted at any time, and students may begin the program at the start of any academic quarter. The program is open to both non-degree seeking students and students concurrently enrolled in a DePaul graduate degree program. All applicants must hold a bachelor’s degree. To apply to the program, prospective students must submit the following materials:

- An LAS graduate admission on-line application [application fee is waived for current DePaul students]
- Transcripts from all schools attended
- A personal statement of 300-500 words describing their professional interests and goals in the certificate.
Metropolitan Planning and Development

This certificate program is designed for individuals who want to develop analytical skills and stay current on issues of regional land use, transportation, and economic development. It provides students with a perspective on the institutions of municipal and metropolitan planning and issues affecting the delivery of public services, and it explores innovative solutions to urban and suburban development problems. This certificate is offered in conjunction with The Chaddick Institute for Metropolitan Development. The Institute offers a variety of programs regarding land use, infrastructure and transportation in the region.

Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select two from the following:
  - MPS 526 LOCAL GOVERNMENT ADMINISTRATION
  - MPS 529 STRATEGIC MANAGEMENT AND PLANNING
  - MPS 541 ECONOMIC FOUNDATIONS OF PUBLIC SERVICE
  - MPS 543 POLICY IMPLEMENTATION
  - MPS 546 ADVOCACY AND LOBBYING
  - MPS 573 URBAN AND COMMUNITY DEVELOPMENT

Social Research

The Certificate in Social Research familiarizes students with the choices they can make in designing social science research and to help them select the research tools that are right for the types of questions they are asking. The four-course program provides knowledge of current research designs, methods, and practices; quantitative and statistical skills; and the logic of inquiry.

A number of Sociology M.A. students may wish to obtain the certificate as part of their degree program. It will also be useful for students in fields such as women’s and gender studies, professional writing and publishing, public service, ethnic studies, journalism, and environmental science. Professionals in and students preparing for careers in the non-profit sector, public policy and administration, and the production of media content, will find the certificate valuable as well.

Course Requirements

Core Courses

Two core courses are required:

- A statistics or quantitative analysis class. This requirement is met by taking at least one of the following courses:
  - SOC 402 STATISTICS FOR THE SOCIAL SCIENCES
  - SOC 412 DATA ANALYSIS
  - SOC 450 ADVANCED STATISTICS I*
- SOC 411 SOCIAL RESEARCH (This class also includes the requirement of obtaining an online certificate in the protection of human subjects - currently offered through the DePaul Institutional Review Board [IRB] and Collaborative Institutional Training Initiative [CITI].)

* Students will be placed in the appropriate quantitative/statistics class on the basis of their graduate and undergraduate work.)

Elective Courses
Choose two courses from the following:

- SOC 412 DATA ANALYSIS
- SOC 413 QUALITATIVE METHODS
- SOC 417 ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
- SOC 418 DOCUMENTARY FILMS IN SOCIAL SCIENCES *
- SOC 422 URBAN AND COMMUNITY ANALYSIS
- SOC 423 RESEARCH ON URBAN CULTURES
- SOC 451 HEALTH POLICY ANALYSIS: INTERNATIONAL PERSPECTIVES
- SOC 493 VISUAL SOCIOLOGY

* For elective credit for SOC 418 (Ethnographic Documentary Film) in the Social Research Certificate Program, the student should submit the syllabus to the Graduate Program Director or Sociology Department Chair for review to confirm that the specific section of the course is oriented towards research methodology.

Teaching English in Two-Year Colleges

The Certificate Program in Teaching English in Two-Year Colleges is an interdisciplinary program housed in the Department of English and taught by faculty in both English and the Department of Writing, Rhetoric, & Discourse. The program is designed to prepare prospective teachers of introductory classes in English, Writing, and the Humanities in city and community college settings. Participants in the Certificate Program will learn to teach critical and analytical reading, the processes and disciplines of writing, and other aspects of the arts, humanities, or communication curriculum in two-year colleges.

The Certificate is comprised of 16 hours of credit: three classroom-based courses and a teaching internship, enrolled as an Independent Study.

Application

To be admitted to the Certificate Program, students must have completed or be currently pursuing a master's degree in English; Writing and Publishing; Writing, Rhetoric, and Discourse; or a related field.

Applications are accepted at any time. It is strongly recommended that the prospective applicant contact the program director, Dr. Carolyn Goffman, before applying (cgoffman@depaul.edu; 773-325-8688). Please email all application materials directly to Dr. Goffman (not to Graduate Admissions).

Application materials:

- Cover letter describing interest in teaching in a two-year college
- Current CV (résumé)
- Undergraduate and graduate academic transcripts
- Sample of recent academic or professional writing
- Names of two faculty references

Certificate Requirements:

- ENG 474 TEACHING LITERATURE
- WRD 540 TEACHING WRITING
- One course from the following list:
  - ENG 407 LANGUAGE AND STYLE FOR WRITERS
  - ENG 473 TEACHING CREATIVE WRITING
  - ENG 478 TOPICS IN TEACHING
  - WRD 506 MULTICULTURAL RHETORICS
  - WRD 550 TOPICS IN TEACHING WRITING AND LANGUAGE (when topic is appropriate)
  - WRD 582 WRITING CENTER THEORY AND PEDAGOGY
  - Or another graduate course approved by the Program Director
- ENG 509 INTERNSHIP: Community College Teaching

Two-Year College Teaching Internship
Teaching English to Speakers of Other Languages

The WRD department offers a Graduate Certificate in TESOL, which may be completed by students in an existing DePaul graduate program or by students who wish to complete only the Certificate. Made up of courses in the programs of Writing, Rhetoric, & Discourse, Bilingual-Bicultural Education, English, and Modern Languages, the Certificate prepares students to teach English as a Second Language (ESL) to adult learners in the United States and abroad. The Certificate may also be attractive to faculty at non-U.S. institutions who wish to come to the U.S. for education in working with second language learners.

Course Requirements

- One Theory course from the following list:
  - BBE 526 THEORETICAL FOUNDATIONS OF ESL AND WLE
  - MOL 454 THEORETICAL FOUNDATIONS/CURRENT RESEARCH SECOND/FOREIGN LANGUAGE ACQUISITION
  - BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
  - BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE (when topic is relevant)
  - BBE 560 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
  - WRD 512 TOPICS IN LANGUAGE (when topic is relevant)

- One Methods course from the following list:
  - WRD 543 TEACHING ESL WRITING
  - WRD 544 TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE
  - WRD 550 TOPICS IN TEACHING WRITING AND LANGUAGE (when topic is relevant)

- One Sociolinguistics course from the following list:
  - WRD 507 GLOBAL ENGLISHES
  - WRD 514 SOCIOLINGUISTICS
  - BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE (when topic is relevant)

- One Language Structure course from the following list:
  - ENG 400 STRUCTURE OF MODERN ENGLISH
  - ENG 401 HISTORY OF THE ENGLISH LANGUAGE
  - ENG 408 STYLISTICS
  - ENG 478 TOPICS IN TEACHING: GRAMMAR FOR TEACHERS *
  - WRD 512 TOPICS IN LANGUAGE (when topic is relevant)
  - WRD 546 PEDAGOGICAL GRAMMAR

- 20 hours of field experience working with adult language learners. Field experience will be arranged individually with the Coordinator of the Certificate program.

* ENG 478 counts for TESOL credit only with this subtitle.

Students completing the Master’s in Bilingual-Bicultural Education can complete the Certificate program by taking their Theory and Sociolinguistics courses in BBE and their Methods and Language Structure courses in WRD; they must complete all requirements for the BBE program to receive the Master's degree. Students in the Master of Arts in English (MAE) may complete their Language and Structure requirement in English; any two additional courses form the list above will count for credit in both MAE and the TESOL Certificate. For Students in the M.A. in WRD, a maximum of two courses (8 credits) from MOL or BBE may be counted as credits toward the M.A. in WRD degree.

Students who are concurrently completing any other graduate degree program at DePaul must work with their program director/advisor to determine if TESOL Certificate courses will count toward their degree requirements.

Admission Requirements
Applications are accepted at any time, and students may begin the program at the start of any academic quarter. The program is open to both non-degree seeking students and students concurrently enrolled in a DePaul graduate degree program. All applicants must hold a bachelor’s degree. To apply to the program, prospective students must submit the following materials:

- an LAS graduate admission on-line application [application fee is waived for current DePaul students]
- transcripts from all schools attended
- a personal statement of 300-500 words describing their interest in the program, prior experience in TESOL or related fields, and professional goals for pursuing the certificate

Women's and Gender Studies

Graduate Certificate Program

The Women's and Gender Studies Graduate Certificate Program at DePaul University is available both to non-degree seeking students and to students in other DePaul graduate degree programs.

The Program's requirements are

- WGS 400 FEMINIST THEORIES (offered Fall Quarter only)
- Three graduate-level elective courses

It is highly recommended that students take the foundational course, WGS 400, prior to the other required three WGS electives. The elective courses may be taken from the Women's and Gender Studies offerings and/or from courses in other departments and programs in the College of Liberal Arts and Social Sciences that have been approved by the Department of Women's and Gender Studies.

To be considered for the certificate program, please follow the directions below.

Non-degree seeking students

Applications are accepted on an ongoing basis. Complete a DePaul University Liberal Arts and Social Sciences graduate admission online application; submit undergraduate and (if applicable) graduate transcripts and a personal statement of 300-500 words (describing your interest in Women's and Gender Studies, any prior experience in the field, and personal or professional goals for pursuing the certificate), and a letter of recommendation from a current or previous professor.

Students enrolled in other DePaul graduate degree programs

Applications are accepted on an ongoing basis. Complete a DePaul University Liberal Arts and Social Sciences graduate admission online application. Submit undergraduate and (if applicable) graduate transcripts, a personal statement of 300-500 words (describing your interest in Women's and Gender Studies, any prior experience in the field, and personal or professional goals for pursuing the certificate), a letter of recommendation from a current or previous professor, and a letter from the Director of Graduate Studies in the degree granting department indicating whether interdisciplinary courses in Women's and Gender Studies may be counted toward departmental degree requirements. Submit transcripts, personal statement and letter from the other graduate program.

Completed applications are reviewed by the Department of Women's and Gender Studies. Admission decisions are based on the prospective student's ability to complete the academic requirements of courses in the program. The Graduate Director may use the personal statement as a basis for advising certificate students on the selection of courses and on any academic skills development that would aid successful participation in and completion of WGS graduate courses.

Descriptions of courses offered through the Department of Women's and Gender Studies can be found in Campus Connect through the "Search for Classes" function.

For more information please contact the Women's and Gender Studies Graduate Program Director, Dr. Ann Russo (773-325-1774 or arusso@depaul.edu), or visit the Department of Women's and Gender Studies website, http://las.depaul.edu/wms/
Academic Advising

Academic advising is an essential part of student success. The College is committed to helping each student form a unique and coherent academic plan from the three components of the undergraduate career: the Liberal Studies or General Honors program; the major field of study; and open electives.

Students declare majors, concentrations, and minors through Campus Connection.

Once a student has declared a major, a faculty member from that department is assigned to the student as an academic advisor. The faculty advisor helps the student understand the requirements of the major and how to choose non-major course work to meet the student's needs and interests. In addition, the faculty advisor may inform the student about internships, studying abroad, and preparing for graduate or professional school.

Faculty advisors work closely with staff professional advisors in the Undergraduate College Office and in the larger academic departments (see Advising Staff). Each student is also assigned a staff professional advisor from whom they can receive holistic advising.

Students can find the name and contact information for their academic advisors on Campus Connection.

Academic Advisor
Student Support

The Graduate Student Services Office assists graduate students throughout their academic careers. Providing administrative support to the academic programs, the Graduate Student Services Office facilitates orientations, transferring academic credit, awarding of assistantships and tuition waivers, registering for independent study, and completing graduation requirements.

In addition, the Coordinator of Graduate Student Services in the Graduate Office provides supplementary advising on administrative, policy, and procedural matters. Generally, the Coordinator may serve as a first point of contact for any questions students may have about life in the College of Liberal Arts and Social Sciences and at DePaul University.

Graduate students should become familiar with the resources on the Graduate Student Services Office webpages (see URL below) as well as the content of the Graduate Student Handbook (see left menu, Academics > Graduate).

Assistant Director and Coordinator of Graduate Student Services
About

The College of Science and Health provides students with innovative, science-based curricula with a strong liberal arts foundation. Our departments represent the natural sciences, mathematics, psychology, nursing, and health sciences, each of which is committed to providing the highest quality education. The College of Science and Health educates students with a strong Vincentian commitment to social justice and civic engagement. The college provides mathematical and scientific education/literacy for all undergraduate students within the University and participates in all aspects of DePaul's distinctive Liberal Studies Program.

The College of Science and Health is dedicated to helping members of DePaul’s diverse student body reach their full academic and professional potential. The innovative curricula supported by the college encourages active participation in research, internships and other opportunities that further prepare students for successful careers and as life long learners. Faculty in the college embody the commitment to student academic and professional development through their quality instruction and by conducting meaningful, student accessible research.

Academics

Focusing on the disciplines of allied health technologies, biology, chemistry, environmental science, health sciences, mathematics, nursing, physics, psychology, and science education; the College of Science and Health’s undergraduate and graduate programs prepare students to meet the demands of the growing fields of science and health.

The College of Science and Health offers undergraduate majors in seven departments and graduate programs in six departments and one school. Courses are offered in the day, evenings and on weekends, primarily on our Lincoln Park Campus.

Admission & Aid

Candidates interested in admission to the College of Science and Health should direct all inquires to the Office of Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu, or (312) 362-8300.
For general information on the types of admission and possibility of financial aid, see University Information, Admission.
Financial Aid
Applicants interested in financial aid options should direct all inquiries to the Office of Financial Aid. They are located in DePaul Central in the Schmitt Academic Center, Suite 101 on the Lincoln Park Campus. You may phone them at their Loop location at 312-362-8610.

Graduate Admission
Applicants are admitted to the College of Science and Health on the basis of their ability to complete programs of study and research prescribed for the master's and doctoral degrees. Specifically, admission qualifications are measured by academic criteria. In accord with these criteria, applicants are admitted in one of three major categories: degree-seeking, non-degree-seeking, and student-at-large.

Degree Seeking Students
Applicants are admitted as degree-seeking students in either of two ways: full or conditional.

Full Degree-Seeking Status
The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies satisfying all requirements for entering a specific graduate program.
- Submission of all required supporting credentials.
- Unconditional approval by the department or program director of the applicant's proposed course of graduate study.

Please note these are minimum requirements for full admission. The departmental and program sections of this Catalog provide additional, more specific and selective, criteria for admission to specific programs.

Conditional Degree-Seeking Status
The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies indicating a capacity to pursue successfully a specific program of graduate study.
- Submission of all required supporting credentials.
- Conditional approval by the department or program director of the applicant's proposed course of graduate study.

A conditionally admitted applicant is eligible for reclassification to full, degree-seeking status when the conditions of his or her admission have been satisfied.

Non Degree-Seeking Students
The dean may admit as students those applicants who do not wish to pursue an advanced degree. Non-degree-seeking students may, at some future date, make application to a graduate program, but they are not accorded special consideration for admission. Students should consult the intended degree program's website for information about application requirements.

Non-Degree Seeking Status
The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution
• Academic achievement in undergraduate studies indicating a capacity to succeed in graduate course work (minimum of 2.50/4.00)
• Submission of official transcript from bachelor's degree granting college or university
• Approval by the director of graduate admission.

Students admitted as non-degree graduate students are eligible to enroll in graduate-level courses only.

When such students apply to a graduate program, the departmental or program director of their specific graduate course of study may recommend, in writing, to the dean that a maximum of three courses (12 quarter hours) completed by the student under the non-degree-seeking status be counted toward fulfillment of the advanced degree requirements. The application of any or all recommended credit is at the discretion of the dean.

**Student-at-Large Status**

The College of Science and Health may admit as a student-at-large a graduate student currently enrolled in a graduate program in another accredited institution upon the recommendation, in writing, of his or her own graduate dean.

A student-at-large must submit a graduate application. The supporting credentials required are an official transcript from the bachelor's granting college or university and a letter from the dean of the graduate school where the student is in good standing. This letter should state in general terms the course or courses the student is authorized to take.

Under no circumstances does this classification constitute admission to a degree program at DePaul University.

**DePaul Students and Combined Programs**

The combined Bachelor's/Master's degree program allows students to complete a maximum of 12 graduate credit hours as three courses while still an undergraduate student. These three graduate level courses will count toward both the undergraduate and graduate degree programs.

Students must formally apply to a combined program in spring of their junior year; interested students should meet with the Graduate Program Director of the program. Students formally accepted into this program take a maximum of twelve graduate credit hours as three courses in their senior year. Students must formally apply for undergraduate degree conferral via Campus Connection and be awarded their bachelor's degree in anticipation of continuing with their master's level coursework.

Please note that except for student participating in an approved Bachelor's/Master's program at DePaul, graduate courses taken while an undergraduate will not apply toward a graduate degree at DePaul.

**Scholarship Opportunities**

**Double Demon Scholarship**

Alumni from any of DePaul's colleges who are admitted into a graduate degree program or a select certificate program* in the College of Communication, the College of Computing and Media, the College of Education, the College of Liberal Arts and Social Sciences, the College of Science and Health, the School for New Learning or the Kellstadt Graduate School of Business will automatically qualify for the Double Demon Scholarship.

This scholarship covers 25 percent of the tuition for a master's degree or a select certificate program*. Both full-time and part-time students are eligible. No scholarship application is required; all alumni admitted to these programs beginning with the winter quarter of 2014 or thereafter qualify. This scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards.

DePaul University employees are eligible for other employee tuition benefits through the university, and therefore are not eligible for the Double Demon Scholarship.

To learn more details about this scholarship, please contact your college admissions office.
*Scholarship does not apply to all certificate programs. Please contact one of the college admissions offices above for more information.

About

The Department of Chemistry has several fundamental responsibilities. They are (a) to train students to understand, to criticize meaningfully, and to carry out scientific investigations, (b) to provide instruction and laboratory experience for those who wish to make chemistry their livelihood and/or pursue advanced study in chemistry, (c) to provide instruction and laboratory experience for those who wish to use chemistry as a background in an allied profession, and (d) to provide students not majoring in chemistry with up-to-date instruction in the principles of chemistry and methods of scientific inquiry.

In meeting these responsibilities, the department offers four tracks of study, each of which lead to a Bachelor of Science that is certified by the American Chemical Society, the department's accrediting body. The tracks include Standard Chemistry, Analytical and Physical Chemistry, Biochemistry and Medicinal Chemistry, and Synthetic Chemistry. The department also offers a Bachelor of Arts degree. This option allows students to get a firm educational foundation in chemistry along with the ability to develop specialization in another field not necessarily related to chemistry.

In addition to its baccalaureate degrees, the department offers several combined degree programs. Students may pursue a degree in chemistry and chemical engineering through a joint program with the Illinois Institute of Technology. The department has teamed with the College of Education to develop a combined B.S./M.Ed. program that allows students to earn an undergraduate degree in chemistry and a graduate degree in secondary education. Finally, the department hosts its own combined B.S./M.S. program. This option allows students to earn a B.S. and M.S. in chemistry.

Department of Health Sciences

The mission of DePaul University's Department of Health Sciences is to educate and train students who will collaboratively address human health from interdisciplinary natural and social scientific perspectives in order to promote health and to improve the lives of individuals and communities.

The Department of Health Sciences offers a BS in Health Sciences, a minor in Public Health Studies, combined BS+Master's Degree (MA in Health Communications or Master of Public Health) programs, and several 3+ program that combine undergraduate studies at DePaul with graduate health professions studies at Rosalind Franklin University of Medicine and Science.

The Health Sciences major offers concentrations in BioScience and Public Health Studies that will enable future health care professionals to begin this cross-disciplinary conversation even earlier. In addition to General tracks, each concentration offers tracks that help students focus their interests and prepare for future careers. In BioScience students can choose from tracks in Medicine and Pre-nursing; while in Public Health Studies, students can choose tracks in Health Education, Community Health or Health Policy and Administration. This degree a) provides students interested in pursuing a career in one of many health-related professions with a common core of knowledge; b) provides a general track in each concentration but also articulates additional tracks that meet requirements for entry into graduate programs; c) provides enough flexibility to enable students to move among those tracks as their interests evolve, and d) brings students headed for multiple health-related professions into on-going conversation with each other. The curriculum is built on the principle that, in order to be effective, health care professionals need to understand both the factors that impact the health of individuals and the factors that impact the health of populations.

About

The Department of Mathematical Sciences offers courses in pure and applied mathematics to help students reach a wide variety of intellectual, academic, and career goals.

Many students come to the department to obtain the mathematical background needed to be successful in programs in the natural sciences, computer science, social sciences, and business. Such students may choose to supplement their major in their home department by obtaining a minor in mathematics. Other students come to the department seeking a program leading to an undergraduate or graduate degree in one of the mathematical sciences.

Certificate in Applied Statistics

Course Requirements

The certificate program requires successful completion of six courses in Applied Statistics.

- MAT 441 APPLIED STATISTICS I
- MAT 442 APPLIED STATISTICS II
- MAT 443 APPLIED STATISTICS III
- Three courses selected from:
  - MAT 456 APPLIED REGRESSION ANALYSIS
  - MAT 457 NONPARAMETRIC STATISTICS
  - MAT 528 DESIGN AND ANALYSIS OF EXPERIMENTS
  - MAT 526 SAMPLING THEORY AND METHODS
  - MAT 458 STATISTICAL QUALITY CONTROL

Students in the Certificate in Applied Statistics program must apply for degree conferral via Campus Connection in advance of their final quarter in the program in order to have their coursework audited for the awarding of their certificate.

Certificate in Mathematics for Community College Teaching

Course Requirements

- MAT 304 DIFFERENTIAL EQUATIONS
- MAT 470 ADVANCED LINEAR ALGEBRA
- MAT 609 TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
- MAT 641 MULTIVARIABLE CALCULUS WITH LINEAR ALGEBRA FOR MATHEMATICS TEACHERS
- MAT 680 REAL ANALYSIS FOR CALCULUS TEACHERS

Certificate seekers can only be recent graduates of DePaul University's Master of Arts in Mathematics Education (MAMEd) program. The purpose of the Certificate is to fortify the MAMEd degree for students who wish to teach at the community college level.

The Certificate is comprised of five courses, those of which are part of DePaul's Master of Science in Mathematics Teaching (MSMT) degree but which are not part of the MAMEd degree. Students are restricted from earning both the Certificate and the MSMT.

Students in the Certificate in Mathematics for Community College Teaching program must apply for degree...
conferral via Campus Connection in advance of their final quarter in the program in order to have their coursework audited for the awarding of their certificate.

About

Physicists study and apply the laws of nature to answer fundamental questions about the evolution of the universe, the nature of light and matter, and the behavior of the natural world. The Physics department at DePaul offers a full, rich curriculum in undergraduate and graduate education. Currently the home to more than 10 full and part-time faculty and approximately 50 majors and minors, the department offers courses on the Lincoln Park Campus. In addition to its strong undergraduate program with concentrations in standard physics and computational physics, the department offers dual engineering degrees in conjunction with the Illinois Institute of Technology, and a Master's degree in Applied Physics.

About

The Department of Psychology is committed to providing excellent teaching, mentoring and advising for undergraduates, masters, and doctoral students in our six undergraduate major concentrations, two masters programs and five doctoral programs. Moreover, the Department of Psychology is committed to making meaningful contributions to the science of psychology and encourages students to do likewise, and to serve our university, community, and profession so as to enact and realize the mission of DePaul.

The goal of the Department of Psychology is to provide students with an understanding of the methods and content of scientific and applied psychology.

Nursing is a learned profession with a distinct science and art. Students learn the practice of nursing through research and the study of diverse human and environmental patterns of health behavior as they affect individuals, families, and communities. Students incorporate scientific knowledge and the nursing process in their delivery of safe, ethical and quality care with deep regard for the differences along the dimensions of race/ethnicity, gender, class, sexuality, religion, heritage and language.

The focus of the faculty of the School of Nursing is the education and preparation of students for leadership roles in healthcare. Education is centered on providing care for persons and communities in both health and illness while conducting scientific research to generate knowledge that strengthens these endeavors. Critical thinking is emphasized, along with an insightful examination of society, thus affording students the opportunity to apply the science and art of nursing to promote and maintain health while upholding human dignity for the betterment of the community and society.

In keeping with the Vincentian values of DePaul University, students treat all human beings equally and with respect, and by doing so, are acting in the interest of the common good. The School of Nursing faculty is committed to education that will provide the foundation for a professional career as a caregiver, educator, leader, servant and scholar.

The Science, Technology, Engineering, and Mathematics (STEM) Studies Department offers innovative, interdisciplinary programs and courses spanning the sciences, mathematics, and technology at DePaul. The Department works in close collaboration with the DePaul STEM Center. The Department administers the Master of Science in Science Education, a program to prepare master teachers in science at the middle school level. The program addresses a great need for content-based graduate study to enhance the teaching of science at the middle school level. The program integrates content with pedagogy, is inquiry-based, and integrates mathematics and technology with science. The STEM Studies Department also offers innovative science courses and special programs for undergraduates to engage highly diverse audiences in rich, contemporary science content.
Special Programs

Modern Language Option Program
Undergraduate College of Science and Health students may take advantage of pursuing a Modern Language Option to advance their language skills and, at the same time, apply the additional language coursework toward their Liberal Studies Program requirements.

TEACH Program and Combined Programs
Qualified undergraduate College of Science and Health students may pursue a combined program that would enable them to earn a bachelor degree and master degree within a shortened timeframe. Combined programs are offered through the College of Science and Health and through a partnership between the College of Science and Health and the College of Education's TEACH Program.

Accelerated Degree Program
DePaul University and Rosalind Franklin University of Medicine and Science joined forces to create The Alliance for Health Sciences. Through the alliance, the College has developed an innovative Accelerated Degree Program for qualified undergraduate students interested in popular and fast-growing health-related careers requiring graduate-level education, including medicine, pathologists' assistant studies, pharmacy, physical therapy, physician assistant studies, and podiatric medicine.

Bachelor of Arts (BA) in Psychology - Online Degree Program
The BA in Psychology can be completed online, by transfer students, if certain prerequisites and additional degree requirements are met. This online degree program is available for two concentrations within the psychology major: the Standard BA Concentration and the Human Development BA Concentration.

Pre-health Program and Pathways Honors Program
The Pre-Health Program is a pre-professional program designed to help students explore their interests and identify which health career might be the best fit for them.

The Pathways Honors Program is designed for highly qualified and motivated pre-professional students pursuing a health career. Students who are part of the Pathways Honors Program will enter as a cohort during their first-year at DePaul.

Modern Language Option Program
The Modern Language Option is available to all B.A. students who wish to study a modern language beyond the level necessary to meet the College’s modern language requirement and to B.S. students who wish to study a Modern Language at any level. Students selecting the option may substitute a three-course language sequence for two domain courses and one open elective. Students may use the Modern Language Option by applying two
of the modern language courses toward two different learning domain combinations. Here are the available combinations: Philosophical Inquiry or Religious Dimensions; Understanding the Past or Self, Society, and the Modern World; or Arts and Literature or Scientific Inquiry (cannot substitute for the lab science requirement.). Students majoring in one modern language may use the Modern Language Option for study of a second language at the intermediate level or above. Please see your advisor for additional information about Modern Language Option course placement.

**TEACH Program**

This program provides students the opportunity to complete in five years an undergraduate degree in a core science major and a Master of Education degree with State of Illinois secondary education teaching certification in a content area related to their major. As a combined degree program of the College of Science and Health and the College of Education, the program is collaboratively developed, governed, and taught by faculty from both units.

Students may apply to the Program during the spring of their junior year. They must complete the Junior Year Experiential Learning course TCH 320, Exploring Teaching in an Urban High School, and meet other application criteria prior to applying; these include completion of at least 16 hours of four courses at DePaul and a 3.0 GPA. During their Senior Year, students are required to complete a program capstone course and three 400-level courses at 12 quarter hours that count toward both their undergraduate and graduate degrees. The Master's year comprises teacher-preparation coursework that culminates with student teaching during the Spring quarter. Upon graduation and the fulfillment of State of Illinois Certification requirements (which may require some additional course work in the student's major and related fields), students are eligible to be certified to teach Math, Biology, Chemistry, Environmental Science, or Physics at the 6th-12th grade levels.

A full description of the Program can be found on the College of Education website and in the College of Education graduate course catalog. Students interested in the TEACH Program may consult with an associate dean in the College of Science and Health or an associate dean in the College of Education.

**Combined Programs**

The combined Bachelor's/Master's degree program allows students to complete a maximum of 12 graduate credit hours as three courses while still an undergraduate student. These three graduate level courses will count toward both the undergraduate and graduate degree programs.

Students must formally apply to a combined program in spring of their junior year; interested students should meet with the Graduate Program Director of the program. Students formally accepted into this program take a maximum of twelve graduate credit hours as three courses in their senior year. Students must formally apply for undergraduate degree conferral via Campus Connection and be awarded their bachelor's degree in anticipation of continuing with their master's level coursework.

Please note that except for the 12 graduate credit hour limit as three courses for students participating in an approved Bachelor's/Master's program at DePaul, graduate courses taken while an undergraduate will not apply toward a graduate degree at DePaul.
Accelerated Program

The Accelerated Program will offer qualified health sciences students an opportunity to apply to a selective 3+4 pre-professional program in medicine, 3+4 pre-professional program in pharmacy, 3+2 pre-professional program in physician assistant studies, 3+2 pre-professional program in pathologists' assistant studies, 3+3 pre-professional program in physical therapy, or 3+4 pre-professional program in podiatric medicine at Rosalind Franklin University of Medicine and Science (RFUMS).

The Accelerated Program will offer qualified chemistry students (BA-seeking) an opportunity to apply to a selective 3+4 pre-professional program in pharmacy at RFUMS.

Please visit the College's Alliance for Health Sciences website for details.

Online Degree Programs

Bachelor of Arts (BA) in Psychology

The BA in Psychology can be completed online, by transfer students, if certain prerequisites and additional degree requirements are met. This online degree program is available for two concentrations within the psychology major: the Standard BA Concentration and the Human Development BA Concentration.

Admission criteria for online programs

In order to be eligible for the BA in Psychology online format, students must meet the following requirements:

- Be a transfer student with a minimum of 45 quarter hours/30 semester hours of transfer credit
- Have a minimum cumulative 2.0 GPA
- Be in good standing at the last school attended

Prerequisites

Transfer students are encouraged to complete writing courses equivalent to DePaul's WRD 103 and WRD 104 Composition & Rhetoric I and II (i.e. English Composition 101, and 102) requirements prior to beginning the online courses. Additionally, students will need to complete college algebra equivalent to DePaul's MAT 100 or MAT 101 (or a higher math course) before enrolling in the online program. Students who have successfully completed Statistics and/or Calculus will not need to take the math placement test.

Students should plan to complete all, or almost all, of their psychology courses at DePaul. Some elective and liberal studies courses may be completed with transfer credits. Consult the Transfer Course List for transferrable courses that may apply to Liberal Studies Program (LSP) and elective course requirements.

Bachelor of Arts Degree Requirements

The following degree requirements will need to be fulfilled in addition to the online course offerings:

- Complete the lab science course requirement through transfer course work, or credit by exam (CLEP/AP/IB). (Students may earn college level credit through taking College Level Equivalency Exams (CLEP) to validate knowledge previously acquired.)
- Complete the Modern Language requirement through transfer course work, proficiency, or credit by exam. (Proficiency may be documented by a satisfactory rating in a language proficiency examination administered, or accepted, by DePaul University.)

Graduation requirements for the BA in Psychology online degree program are identical to those for all psychology majors in the Standard Psychology or Human Development concentrations (see the Degree Requirements). DePaul bachelor's degrees require 192 quarter hours.
To complete the degree requirements online in a timely fashion, students will need to follow the recommended online degree plan. Degree plans are available through the Psychology department.

Transfer students should select the Psychology Online Degree Program as their major when submitting a transfer application for admission to DePaul.

**Pre-health Program**

At DePaul University any student from any major who is considering a professional degree in a health profession can enter the Pre-Health Program. The Pre-Health Program is a pre-professional program designed to help students explore their interests and identify which of the health careers might be the best fit for them.

If a currently enrolled DePaul student is interested in a professional health program upon graduation, the student can register to become part of the Pre-Health Program regardless of major, minor, or concentration.

**Pathways Honors Program**

Pathways Honors Program is designed for highly qualified and motivated pre-professional students pursuing a health career. Students who are part of the Pathways Honors Program will enter as a cohort during their first-year at DePaul. They will receive the same benefits as any Pre-Health Program student at DePaul, but they will also receive:

- the chance to enroll in special sections of some science courses
- ability to meet regularly with faculty advisors and staff at Rosalind Franklin University of Medicine and Science (RFUMS)—a rare benefit for undergraduates in pre-professional programs
- network with RFUMS students
- participate in onsite learning opportunities at RFUMS
- the chance to be part of a smaller learning community
- take courses at DePaul co-taught or taught by RFUMS faculty
- exclusive pre-professional workshops for Pathways Honors students
- a special notation on official transcript denoting participation in the Pathways Honors Program
- priority course registration

The Pathways Honors Program is separate from the University Honors Program, but some students might be part of both programs.

**Certificates**

The College of Science and Health (CSH) offers certificate programs through our Mathematical Sciences Department.

The CSH also participates in an interdisciplinary program offered through the School of Public Service in the College of Liberal Arts and Social Sciences.
Certificate in Applied Statistics

Course Requirements

The certificate program requires successful completion of six courses in Applied Statistics.

- MAT 441 APPLIED STATISTICS I
- MAT 442 APPLIED STATISTICS II
- MAT 443 APPLIED STATISTICS III
- Three courses selected from:
  - MAT 456 APPLIED REGRESSION ANALYSIS
  - MAT 457 NONPARAMETRIC STATISTICS
  - MAT 528 DESIGN AND ANALYSIS OF EXPERIMENTS
  - MAT 526 SAMPLING THEORY AND METHODS
  - MAT 458 STATISTICAL QUALITY CONTROL

Students in the Certificate in Applied Statistics program must apply for degree conferral via Campus Connection in advance of their final quarter in the program in order to have their coursework audited for the awarding of their certificate.

Certificate in Community Development

This program offers community development specialists skills in organization planning, leadership development, and program evaluation. The program allows established and emerging professionals to broaden their perspective on urban-development programs in an inter-disciplinary learning environment by including knowledge from psychology, public service, sociology, geography and liberal studies.

Students must successfully complete a minimum of 16-quarter hours of graduate credit. Each course carries four-quarter hours. Students then must participate in a non-credit research colloquium. Each participant of the colloquium makes a presentation before a small group of students and faculty members. No more than two courses earned toward the certificate shall come from one department. Please note that the list of courses is subject to change.

Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select three (3) from the following:
  - GEO 441 GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT
  - MLS 404 THE CITY
  - MPS 526 LOCAL GOVERNMENT ADMINISTRATION
  - MPS 572 URBAN POVERTY SEMINAR
  - MPS 573 URBAN AND COMMUNITY DEVELOPMENT
  - PSY 654 COMMUNITY PSYCHOLOGY
  - PSY 680 INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
  - SOC 426 URBAN DEVELOPMENT POLICIES
  - SOC 424 THE SOCIOLOGY OF HOUSING

Students may also enroll in the following elective courses, with permission of the program director and often the approval of the instructor. Generally, participants will be limited to one (1) of these courses:

- MPS 529 STRATEGIC MANAGEMENT AND PLANNING
- PSY 495 GRANT WRITING IN PSYCHOLOGY
- PSY 520 PRINCIPLES OF HUMAN DIVERSITY
- PSY 567 SPECIAL TOPICS IN COMMUNITY PSYCHOLOGY
- PSY 569 SEMINAR IN PROGRAM EVALUATION
Certificate in Mathematics for Community College Teaching

Course Requirements

- MAT 304 DIFFERENTIAL EQUATIONS
- MAT 470 ADVANCED LINEAR ALGEBRA
- MAT 609 TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
- MAT 641 MULTIVARIABLE CALCULUS WITH LINEAR ALGEBRA FOR MATHEMATICS TEACHERS
- MAT 680 REAL ANALYSIS FOR CALCULUS TEACHERS

Certificate seekers can only be recent graduates of DePaul University's Master of Arts in Mathematics Education (MAMEd) program. The purpose of the Certificate is to fortify the MAMEd degree for students who wish to teach at the community college level.

The Certificate is comprised of five courses, those of which are part of DePaul's Master of Science in Mathematics Teaching (MSMT) degree but which are not part of the MAMEd degree. Students are restricted from earning both the Certificate and the MSMT.

Students in the Certificate in Mathematics for Community College Teaching program must apply for degree conferral via Campus Connection in advance of their final quarter in the program in order to have their coursework audited for the awarding of their certificate.

Student Resources

The College of Science and Health (CSH) provides a broad range of advising and student services to help undergraduate and graduate CSH students reach their academic and co-curricular goals and enhance their personal, intellectual and professional development. The CSH also provides specialized advising to students interested in pre-health and exploring research opportunities.

Depending upon the extent of the student need, the CSH is also equipped to refer students to the expert department within the University to best address it.
Academic Advising

Undergraduate Advising

Academic advising is a valued component of the student experience within the College of Science and Health (CSH). It provides students with the opportunity to develop an academic plan that best fits their interests, strengths, and academic and career goals under the guidance of a knowledgeable and supportive advisor.

Upon declaring a major field of study in the CSH via Campus Connection, students are assigned to either a faculty academic advisor or staff advisor in the corresponding department or program. Students who have declared a major should meet regularly with their assigned advisor within their program in order to complete their courses in a timely and efficient manner, discuss internship or career opportunities, learn of research opportunities, and plan for pursuing graduate or professional school. Faculty advisors and staff advisors in departments collaborate closely with staff professional advisors in the CSH’s Office of Advising and Student Services.

Taking courses without consulting an advisor may lead to credits that will not satisfy CSH requirements for graduation. Those students who have not yet declared a major are highly encouraged to meet with either a staff advisor in the CSH’s Office of Advising and Student Services or a staff advisor in DePaul’s Office for Academic Advising Support prior to registering for classes each quarter.

Pre-health Advising

The CSH provides pre-health advising to DePaul University students - regardless of their undergraduate major or graduate program of choice - who are interested in pursuing a pre-professional program. The CSH’s Office of Advising and Student Services has a dedicated pre-health staff advisor who works in conjunction with the CSH’s Pre-health Advising Committee (PAC), a committee comprised of CSH faculty and staff who mentor pre-health students in anticipation of completing and submitting their applications to professional schools. The PAC is also charged with writing committee letters of recommendation for students who are in the midst of applying to programs.

Research Advising

The CSH provides specialized advising to undergraduate students interested in exploring research opportunities. A dedicated advisor works directly with students to help them identify a research match with a faculty member, to coach them on presenting and publishing their research, and to assist them with navigating the graduate school application process.

Graduate Advising

Academic advising is an essential component of student success. Program directors and other faculty work with graduate students not only on course selection and to monitor progress toward degree, but, more importantly, to serve as mentors and advocates through students’ programs of study and research.

Degree-seeking students can find the name of their advisor in Campus Connection. Non-degree seeking students and students-at-large should contact the CSH’s Office of Advising and Student Services.

Office of Advising and Student Services

The Office of Advising and Student Services partners with faculty and staff in the College of Science and Health (CSH) to provide academic advising and student services to undergraduate and graduate CSH students. The office serves all DePaul University pre-health students who are interested in pre-professional programs, and provides specialized advising to students interested in exploring research opportunities. Advising and student services include, but are not limited to, pre-health advising, guiding new and continuing students on course selection, providing consultation on academic policy interpretation, coordinating graduation, assisting with advising and course registration technology, and providing other forms of academic and extracurricular support.
About SNL

Why We're Distinctive

The School for New Learning (SNL) provides a unique approach to learning for adults, with customized programs that build upon abilities and experiences, add knowledge, and develop skills to help achieve personal and professional goals.

A fundamental idea behind SNL is learning from experience. We believe mixing experiences and interpretations results in lasting knowledge.

SNL programs are designed to recognize and develop competence. Our students are assessed on their problem-solving knowledge.

SNL values individualized learning. Students move at their own pace with personalized guidance.

Mission

Mission

The DePaul University School for New Learning (SNL) is a college designed particularly for adults, who bring rich experience to their desire to advance, enhance, or change their careers and personal lives. Every element of the college, from curricula to support services, acknowledges the constant interaction of school, work, community and family, and empowers the student to reflect, so that experience becomes a source of knowledge and learning becomes a way of life. Rooted in Vincentian traditions of human dignity and social responsibility, SNL provides highly personalized opportunities and emphasizes the integrity, individuality, and responsibility of each student to develop competence and put learning to ever-new use.

The School for New Learning defines eight commitments as essential to its mission.

A Commitment to Learning as a Way of Life

For all of its learners SNL cares about the substance and process of learning – the knowledge, abilities and values they acquire, as well as the educational goals they attain. The School believes that adults learn deeply by reflecting, particularly on experience, drawing meaning and transferable knowledge from all they have done. When we are most successful, students refine their habits of learning, and experience the excitement of expanding their curiosity, of using formal inquiry, of developing as independent lifelong learners.

A Commitment to Competence
Curriculum design and assessment practices at SNL focus on the outcomes of learning – the student’s demonstrated knowledge and abilities, learned in a variety of ways. This focus on competence leads faculty to pursue excellence in curricular design, advising strategies, and teaching methods. It enables students to integrate classroom learning with learning from life and work, and to apply continuously what they are learning in other contexts.

**A Commitment to Partnership with Students**

In collaboration with learners, faculty and staff design, implement and assess individualized educational programs. This learning-centered partnership, based on mutual respect for each participant’s expertise, prior learning, and decision-making power, deepens and broadens learning.

**A Commitment to Diversity**

SNL faculty develop teaching, advising and assessment practices that value human differences in the broadest sense. SNL seeks, in particular, to present a welcoming environment for those who have historically been excluded from higher education, and to enable all to benefit from the richness that diversity brings to a learning community.

**A Commitment to an Evolving, Developing Organization**

SNL is a continuously evolving organization, open and responsive to the emerging educational needs of individuals and groups in a constantly changing world. SNL's response includes ongoing research in effective teaching, mentoring, and assessment, resulting in imaginative design of programs, structures, systems, courses and materials.

**A Commitment to Community in Service of Learning**

SNL students, faculty, and staff work and learn in a community that fosters the mutual regard and support necessary for learning. Individuals creatively address challenges caused by multiple locations, asynchronicity, and varying areas and levels of knowledge. Members commit themselves to the Vincentian personal regard for the dignity of individuals, respectfully dealing with conflict, setting goals which benefit individuals as well as DePaul and its urban, and global communities, and celebrating achievements.

**A Commitment to Social Justice**

SNL deliberately works to shape a more just, livable world; to ensure that those who have historically been ignored, excluded, marginalized, oppressed and economically disenfranchised benefit from the many learning opportunities available through SNL and beyond. In its curriculum, its classroom environments, its assessment practices, its advising strategies, and its formal advocacy, SNL creates an intellectual and social milieu where a plurality of worldviews, cultures and value systems are respected, understood, encouraged and appreciated.

**Commitment to Adult Learning**

The active, reflective practice of established and emerging principles of adult learning is central to the School for New Learning. Faculty and staff, who come from many formal disciplines, enable and encourage colleagues to develop, apply, and disseminate knowledge in the practice of adult education—continuously.

Contact Us
The School for New Learning office is located in suite 1400 of the Daley Building at 14 E. Jackson Blvd. in Chicago. Website: http://snl.depaul.edu
Office hours are 8:30 am - 6 pm, Monday-Thursday, and 8:30 am - 5 pm on Friday. Telephone: 312-362-8001. Fax: 312-476-3220. General Email: snl@depaul.edu
Mailing Address: DePaul University, School for New Learning, 1 East Jackson Blvd., Chicago, IL 60604.
Academics

Founded in 1972, the School for New Learning (SNL) is an internationally recognized leader in education for adults. The School for New Learning offers both Undergraduate and Graduate degrees.

Admission

The School for New Learning offers adults (age 24 and above) customized and accelerated undergraduate degrees and unique, individualized graduate programs.

Undergraduate Admission

Candidates interested in admission to the School for New Learning should direct all inquires to the Office of Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu, or 312-362-8300.

Applicants must have a GPA of 2.0 from the last school attended. This requirement may be waived for a transcript more than three years old.

Graduate Admission

As indicated, the following process and components apply to all of the School for New Learning’s (SNL) graduate programs and certificates.

Application Steps

Step 1: Basic Information.

Applicant becomes knowledgeable about a particular SNL graduate program/certificate. Various options are available for this purpose, e.g., viewbooks, information sessions, advising appointments, etc.

Step 2: Application and Required Materials.

Applicant submits required application materials including:

- a completed Application form and Application fee* (*The application fee is waived for DePaul alumni.);
- a current resume;
• an Application Essay* (writing sample) that addresses key questions pertinent to assessing the “fit” of the particular program to the student and vice versa (*Application Essay is waived for certificate applicants.); and,
• official, sealed transcripts documenting all prior college/university coursework including demonstration of a completed undergraduate degree from a regionally accredited institution. An cumulative GPA of 3.0 is required for all prior coursework.

NOTE: Standardized test scores are not required; however, applicants who have taken tests such as the GRE, GMAT, Miller Analogies, etc., within the previous three years are encouraged to submit their scores. International students are advised to consult the International Programs Office to learn of further University requirements that may apply.

Step 3: Interview.

Upon initial review of application materials, a representative of the SNL Graduate Admissions Committee invites qualified applicants to an admissions interview. The purpose of this interview is to enable both the particular program and the applicant to further ascertain the match or alignment between what the particular graduate program/certificate offers and what the applicant is seeking in terms of his/her graduate-learning or certificate-learning experience.

Step 4: Review.

Information gleaned from each applicant’s materials and interview is reviewed and assessed by the SNL Graduate Admissions Committee in accordance with the particular program’s admission considerations. See admissions considerations below.

Step 5: Decision.

An admission decision is rendered and communicated to the applicant in writing. As necessary, SNL Graduate Programs reserve the right to admit particular applicants conditionally. In such cases, the terms (conditions and timeline) of the conditional status are noted in the student’s acceptance letter. Failure to satisfactorily adhere to or fulfill these terms may result in academic dismissal/withdrawal from the particular program.

Admission Considerations

The following areas are considered in making admission decisions:

• applicant’s professional background including, for graduate program applicants, his/her possession of at least three years of experience, or equivalent, relevant to the particular SNL graduate program/certificate under consideration;
• applicant’s possession of a practice-site (worksite or relevant application setting in which to apply learning from the particular SNL graduate/certificate program);
• applicant’s educational goals/objectives and the congruence between those goals and the graduate/certificate program under consideration;
• applicant’s learning values and skills (willingness and ability to conduct self-managed/independent learning; participate positively in peer-group learning; engage in self-assessment; engage in reflection to increase understanding and improve practice; and, organize areas of knowledge and skill into themes and describe evidence in support of such);
• applicant’s access to, and ability to use, e-mail, the Internet, and necessary computer-based software; and,
• applicant’s undergraduate cumulative GPA of no less than 3.0.

NOTE: The School for New Learning/DePaul University considers students on the basis of individual merit and without regard to race, color, religion, gender, sexual orientation, age, national or ethnic origin, handicap, or other factors irrelevant to participation in its programs.

Admission Status

Students are to matriculate in the quarter for which they are admitted. Students failing to do so (and who later wish to start) are responsible to update their admissions materials and, if necessary—depending on changes to those materials—reapply. The Graduate Programs Office maintains an admission file/status for one year from the date of admission.

Students reactivating and/or readmitted after a period of absence are subject to University and program materials in effect at the time of reactivation/readmission and may be assigned to a new Faculty Mentor.
International Admission

In addition to the Admissions Requirements above, International Students must also submit the following:

- Proof of English Language Proficiency.
- English Proficiency Test. Applicants educated outside of the U.S., at an institution where English is not the primary language, must present proof of English proficiency to be considered for admission. DePaul University accepts the TOEFL, IELTS, or Pearson Test of English. Most scores are valid for two years only. Expired test scores will not be accepted.

  The minimum scores considered for graduate admission to SNL are:
  - 80 on the iBT of the TOEFL with a minimum score of 17 on each section
  - 550 on the paper-based TOEFL test
  - 213 on the computer-based TOEFL test
  - 6.5 on the IELTS test
  - 53 on the Pearson Test of English

- Credential Evaluation. DePaul University requires that applicants educated outside of the U.S. submit official educational credentials and evaluation fee directly to one of the following companies:
  - One Earth International Credit Evaluation
  - Educational Credential Evaluators, Inc. (ECE)
  - Educational Perspectives (EP)

  Applicants must request a course by course evaluation. Please direct any questions about required credentials to the evaluation company. DePaul University will not accept evaluations from any evaluation company not listed here.

Upon admission, regarding student visa information, please see http://international.depaul.edu.

Financial Aid

Information about applying for financial assistance is available on the SNL website: http://snl.depaul.edu.

Scholarships and Financial Aid

SNL has scholarship opportunities for undergraduate and graduate students. To be considered for an SNL departmental scholarship, please apply on the DePaul Online Scholarship Tool. We also highly recommend that you complete a FAFSA Application before applying for scholarships.

Information about financial aid is found at: http://www.depaul.edu/admission-and-aid/Pages/default.aspx

Liberal Learning for Professionals

SNL awards a Certificate of Achievement in Liberal Learning for Professionals to graduate students who successfully complete the Liberal Learning portion (18 credit hours) per graduate program (MAAPS, MAEA, MSAT). This portion includes:

- LLS 410 PERSONAL EFFECTIVENESS
- LLS 420 INTERPERSONAL EFFECTIVENESS
- LLS 430 ORGANIZATIONAL EFFECTIVENESS
Educating Adults

SNL awards a Certificate of Achievement in Educating Adults to graduate students or non-degree-seeking professionals who successfully complete three core courses (12 credit hours) that relate directly to the effective design, implementation and assessment of learning programs in any setting. The three courses include:

- EA 516 DESIGNING EDUCATIONAL OFFERINGS
- EA 517 FACILITATING ADULT LEARNING
- EA 526 ASSESSING LEARNING AND EVALUATING PROGRAMS

About

The DePaul University School of Music prepares students to excel in a variety of professional careers. Located in one of the most vibrant musical cities in the world, the School of Music provides opportunities for students to study with working professionals who are committed to teaching excellence. In a supportive and collaborative atmosphere, students learn from distinguished faculty who are prominent conductors, composers, performers, recording engineers, teachers, and arts managers.

Through a highly selective admissions process, the School of Music selects undergraduate and graduate students for its seven undergraduate, four graduate programs, and two certificate programs. At DePaul, the faculty priority is on teaching, with a strong commitment to providing quality education. The School of Music embraces the diversity of Chicago’s urban society, and draws upon the resources of the city in all its programs. In keeping with DePaul’s Catholic and Vincentian heritage, the School of Music is committed to service of others. We seek to enrich the lives of the members of the DePaul community and Chicago area through musical performances and outreach activities.

Three basic tenets are central to the School of Music’s mission: nurture, engage, and elevate. The School strives to nurture students in a healthy learning environment, engage students in meaningful learning experiences, and elevate students onto successful career paths.

Academics

The School of Music is home to Undergraduate, Graduate and Non-Degree Certificate programs.

Music Teacher Certification Program

Admissions

Applicants to the DePaul music teacher certification program must meet the following standards:

- Undergraduate degree in music
- Grade Point Average of 2.75 or higher
- Recommendations from two individuals familiar with the candidate’s potential as a teacher
- Music audition

Program of Study

All teacher certification students must meet the core requirements of the undergraduate students in music education. Teacher certification students take courses in four basic areas: music, liberal studies, music education, and education. A transcript review will be done by the music education department, to determine any deficiencies in any of these areas of study. Substitutions will be determined by the Associate Dean for Academic Affairs where appropriate.

Music courses:

- Applied music study (2 years)
- Musicianship/music theory and history (2 years)
- Aural training (2 years)
- Keyboard skills (2 years)
- Conducting (1 course)
- Music Traditions (world music and jazz)
- Ensemble (4 years)

Liberal Studies:

- Writing (8 credits)
- Math (4)
- Science, lab or quantitative (4)
- American government (4)
- American history (4)

Music education (V=vocal specialization only, I=instrumental specialization only)

- MED 306, Introduction to Music Education (2 credits)
- MED 303, Elementary Vocal General Music Methods (4)
- MED 304 Middle School Vocal General Music Methods (2), V
- MED 300, Elementary Instrumental Music Methods (4)
- MED 305, Secondary Vocal Music Methods (2), V
- MED 308, Accompanying for the Music Educator (2), V
- MED 301, Secondary Instrumental Music Methods (2), I
- MED 310, Music for the Exceptional Child (4)
- MED 325, Conducting for the Music Educator (2)
- MED 340, Technology for the Music Educator (2)
- MED 121, Class Guitar (1)
- MED 196, Class Voice (1)
- Instrumental techniques classes (4 for V, 8 for I):
Certificate in Performance Program

Certificate In Performance

The purpose of the program is to provide an intensive post-master’s degree performance experience for a small number of highly accomplished performers. Entry into the program is based on evidence of ability to be successful in post-graduate level performance study. Other criteria include:

- Completion of a Master of Music in performance degree or equivalent from an accredited institution.
- Three letters of recommendation.
- An entrance audition which demonstrates performance ability at the post-master’s level.
- Voice applicants must demonstrate competence in Italian, French and German diction by audition and written IPA exam.

There are two primary components to the certificate in performance program. First, applied music (private instruction), and second, related studies. Related study will often consists of participation in the appropriate ensembles and additional academic classes in the School of Music. The course requirements for the certificate in performance appear below:

- Applied Music (24 credits)
- Related Study (12 credits)
- Recital (0 credits)

Admission and Aid

Undergraduate Admission

Admission as a degree-seeking student in the School of Music is contingent upon a superior high school record and successful completion of a performance audition. Entering freshman and transfer applicants are required to audition before March 4 for admission the following September. Transfer students are required to validate credits.
earned in musicianship studies (theory, music history and literature, aural skills, and keyboard) through a placement examination prior to initial registration.

All students are required to audition regardless of their intended major and are encouraged to schedule their dates and times after October 15 for auditions to be held from January 29 through March 3. For audition requirements and a list of scheduled audition dates, please visit our website, contact the Director of Admission, DePaul University School of Music, 804 West Belden Avenue, Chicago, IL 60614, or call (773) 325-7444.

Scholarship Opportunities

**Undergraduate**

Incoming freshmen majoring in music are automatically considered for music performance awards at the time of their entrance audition. The number and amount of these music awards vary each year. Please contact the School of Music for further information.

Financial Aid

Students may apply for financial assistance based on family need through the Office of Financial Aid, DePaul University.

Graduate Admission

**Admission**

The first charter of DePaul University included a statement on nondiscrimination, and the policy has been enforced vigorously for over 114 years. It is the policy of the School of Music to make admission decisions without regard to the race, color, religion, age, gender, sexual orientation, national origin or handicap of the candidate.

**Procedures for Admission**

Applicants for graduate admission should submit an application online at http://www.depaul.edu/. The application deadline is December 1. Applicants should submit official college transcripts and three letters of recommendation to support their application. Applicants to the master's degree program for performance and jazz studies must take an entrance audition, usually held in February of each year. Audition requirements are specified at the following website: http://music.depaul.edu/Admissions/Auditions/AuditionsGraduateCertificate.asp. Applicants to the master's degree program for music education must interview with the Music Education department. Applicants to the master's degree program for composition must submit a composition portfolio of three pieces. A nonrefundable
application fee is required of every student applying for admission to the University as a degree-seeking student. When admission has been approved, the applicant will be notified of the diagnostic examination schedule and new student orientation, which usually take place before the start of the academic year.

Certificate in Performance

The School of Music also offers a program leading to the Certificate in Performance. The Certificate in Performance is a post-masters program for classical or jazz musicians who intend to pursue careers as professional performers. Applicants should submit an application online at http://www.depaul.edu/. The application deadline is December 1. Applicants should submit official college transcripts and three letters of recommendation to support their application. Applicants must take an entrance audition, usually held in February of each year. Audition requirements are specified at the following website: http://music.depaul.edu/Admissions/Auditions/AuditionsGraduateCertificate.asp

Non-Degree Seeking Students

DePaul School of Music does not normally admit applicants as non-degree seeking students. A student who has earned a bachelor's degree or its equivalent from an accredited institution and does not intend to work for a master's degree may, on the written recommendation of the Associate Dean of Academic Affairs, be admitted as a non-degree seeking student. Only the first 12 quarter hours earned as a non-degree-seeking student at DePaul may subsequently be applied toward a degree when the student is accepted as a degree-seeking student.

Student-At-Large

A student completing a graduate program at another accredited institution may, on the written recommendation of the Associate Dean of Academic Affairs, be admitted as a student-at-large.

International Students

All international students and any student who has been educated outside of the United States should complete the application requirements for their desired program (see above), submit their educational credentials to a third-party organization for evaluation, and demonstrate a proficiency in English. The application deadline is December 1. Please see the following website for further information on applying to DePaul School of Music as an international graduate student: http://music.depaul.edu/Admissions/ApplicationProcess/ApplicationProcessInternational.asp.

To demonstrate English proficiency, international graduate music students must pass a TOEFL examination with a written score of 550 or an internet-based score of 80, with no section lower than 17. If a student has met all other music admissions criteria and taken a TOEFL examination, but not yet achieved a passing score, they may be considered for admission to the joint English Language Academy-School of Music program. (For further information on this program, students should contact the School of Music Admissions Office.) Those who request student visas also must show evidence of adequate financial support. A formal letter of admission and/or form 1-20 will be issued only after all admission requirements have been fulfilled.

Diagnostic Examinations

Students who have been admitted to the master’s degree program for composition, performance, and music education must take a diagnostic examination in musicianship studies. These examinations, taken during new student orientation, will be used to guide course placement and identify areas for additional studies.

Music Teacher Certification Program

Admission Requirements

Applicants to the DePaul music teacher certification program must meet the following standards:

- Undergraduate degree in music
- Grade Point Average of 2.75 or higher
- Recommendations from two individuals familiar with the candidate’s potential as a teacher
**Program of Study**

All certification students must meet the core requirements of the undergraduate students in music education. Certification students take courses in four basic areas: music, liberal studies, music education, and education. A transcript review will be done by the music education department to determine any deficiencies in any of these areas of study. **Professional Education**

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
Certificate In Performance

The purpose of the certificate program is to provide an intensive post-master’s degree performance experience for highly accomplished classical and jazz musicians. The entrance criteria include:

- Completion of a Master of Music in performance degree or equivalent from an accredited institution.
- Three letters of recommendation.
- An entrance audition which demonstrates performance ability at the post-master’s level.
- Voice applicants must demonstrate competence in Italian, French and German diction by audition and written IPA exam.

The two-year certificate in performance program is comprised of applied lessons, ensembles, related studies, and a recital.

About

The Theatre School is the Midwest’s oldest theatre conservatory. Founded as the Goodman School of Drama in 1925, the school carries on an 87-year history as a leading drama school in the United States. The conservatory format provides for an intensive, highly disciplined training program. The central core of the program is an extensive production-oriented approach. The School produces more than 150 public performances each season for an audience of more than 50,000 people, featuring students in every aspect of the production. Programs of study are offered in acting, scene design, costume design, lighting design, sound design, theatre technology, costume technology, stage management, playwriting, dramaturgy/criticism, theatre management, and theatre arts. Graduate programs are offered in acting, directing and arts leadership. The objectives of the professional curricula are to prepare the student for creative participation in any form of theatre requiring a high level of technical competence, to provide the student with the aesthetic and cultural background requisite to an understanding of his/her art and of the world in which he/she works, and to develop the specific skills and disciplines necessary for competence in the student’s area of specialization. Theatre School students are not eligible for the Theatre Studies Minor.

Each Theatre School course builds and expands upon its predecessor. When the program is complete, the student will have been exposed to the necessary artistic tools and shown their proper usage in order to realize his or her goals. In addition, liberal education requirements are incorporated into all of the school’s programs so that the student may practice his/her craft with an awareness of history, literature, philosophy, and current and past cultural and social events.

Advanced students in the Theatre Studies and Design and Technical programs enhance their training experience by completing internships at local and national organizations. Internships have been conducted at the Brooklyn Academy of Music, Metropolitan Opera, Seattle Opera, Goodman Theatre, Guthrie Theatre, Arena Stage, Playwrights Horizons, the David Letterman Show, Chicago Shakespeare Theater, Disney Theatricals, Alabama Shakespeare Festival, Fox Theatricals, Oregon Shakespeare Festival, Berkshire Theatre Festival, The Second City, and Steppenwolf Theatre Company, among numerous others.
Faculty and Staff

In keeping with the school’s concept of the dual importance of theory and practice and of producing a superior quality of instruction, The Theatre School’s faculty and staff are highly qualified, both professionally and academically. The faculty is regularly supplemented by accomplished working professionals.

In addition, visiting artists and professionals appear in our guest speaker series, CHICAGO LIVE: THE ARTS. Among them have been playwright David Mamet; actresses Celeste Holm, Florence Henderson, and Julie Harris; actors Rip Torn, Charles Durning, Ray Liotta, Jonathan Pryce, Brian Dennehy, and Laurence Fishburne; Chicago’s nationally known Steppenwolf Ensemble including John Malkovich, Jeff Perry, and Gary Sinise; the late comedian Avery Schrieber; director JoAnne Akalaitis, Anne Bogart, Frank Galati, and Paul Sills; and alumni Gillian Anderson, Joe Mantegna, John C. Reilly, and Kevin Anderson, among scores of others.

The Theatre School is home to Undergraduate majors and minors and Graduate programs.

Admission

Candidates interested in admission to any of the undergraduate or graduate programs of The Theatre School should contact The Theatre School Admissions Office at (773) 325-7999 or (800) 4DEPAUL (Extension 7999). The office will provide each candidate with detailed instructions for the application and audition/interview process.

Theatre applicants are responsible for scheduling their own audition (for acting) or interview (for all other majors), which can be done on The Theatre School's website. If, for any reason, an applicant is unable to reserve a slot online, he or she should contact The Theatre School Admissions Office directly.

The Theatre School only admits students for entry into Autumn quarter each year. Enrollment in each area of concentration is limited by strict capacities. In all of The Theatre School's programs, students are evaluated annually by the faculty and formally invited to continue into the subsequent year. The evaluation, a professional and confidential process, is based on four key elements: discipline, collaboration, professional potential, and progress in the program. For more information about the School's policies about admission, retention, evaluations of students, invitations to return, and related matters, please see The Theatre School website.
Course Descriptions

A&S 491
EFFECTIVE LEADERSHIP OF SCHOOLS
Graduate
This course introduces students to the research base of organizational theory, the politics of education, and foundations of building level instructional leadership. Multiple theories are examined in light of the students' experience in educational settings. This examination of theory in light of experience provides the students with a framework for analyzing both familiar educational institutions and the theories that support educational institutions. Through a study of administrative and organizational theory using those settings with which students are most familiar, students will become more reflective of the theoretical base that will inform their future practice as administrators.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 492
THE PRINCIPALSHIP
Graduate
This course provides students with the tools needed to enter into a Pre-K-12 school setting and function effectively. Topics included in this course include: scheduling; managing resources; technology; issues of working with students and teachers; maintaining a safe and effective learning environment.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 493
DATA DRIVEN DECISION MAKING
Graduate
This course provides future administrators with the tools they need to critically examine demographic, financial, personnel and testing data and to use the insights gained in making well informed administrative decisions.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 494
SCHOOL FINANCE
Graduate
Major consideration will be given to problems relating to the preparing of a school budget, procuring revenue, financial accounting, capital outlays, insurance on property, taking of inventory, and the social and political implications of how schools are financed.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 495
SCHOOL LAW
Graduate
Authority, powers and liability of school personnel; rights and status of students; character of districts and school board control of curriculum, school property, finances. Special emphasis on recent state and federal court decisions as they affect Illinois and neighboring states.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 496
STAKEHOLDER RELATIONSHIPS
Graduate
This course draws on the literature about constructive conflict resolution and partnership building to address the important, inevitable, and sometimes stormy relationships among various education stakeholders both inside and outside of the school building. Educational administrators cannot fire tenured teachers, angry parents, or zealous community organizers. Thus, they must learn the paradigms and tools to not only resolve the inevitable conflicts that arise with these stakeholders but also to be able to work with them as key strategic partners.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.
A&S 498  
INSTRUCTIONAL SUPERVISION AND SUPPORT  
Graduate  
Instructional Supervision is examined from the perspective of both student and teacher learning, dealing with issues such as motivation, responsibility and increased proficiency. This course deals with issues of teacher observation and evaluation; clinical supervision; and professional development programming.  

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 499  
PLANNING FOR PROFESSIONAL DEVELOPMENT  
Graduate  
This course introduces students to the dynamics of adult learning and how to apply these learning theories to the development of meaningful professional development for teachers and adult staff that enhances student success. Goals: (1) Developing skills and developing a comprehensive plan for professional development, (2) Addressing the challenges of adult learners, (3) Developing mentoring and coaching skills, (4) Developing and understanding the importance of assessment and reflection.

A&S 570  
HISTORICAL, PHILOSOPHICAL AND THEORETICAL FOUNDATIONS OF CATHOLIC SCHOOL LEADERSHIP  
Graduate  
A survey of the history of Catholic K-12 education in the United States and the foundational documents of Catholic Education. Students will examine the history and philosophical/theological foundation of Catholic Schools in the United States and will be asked to reflect on the nature and mission of Catholic education in the multicultural, multiethnic milieu of Twenty-first Century America.  

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 571  
SPIRITUAL AND ADMINISTRATIVE LEADERSHIP IN CATHOLIC SCHOOLS  
Graduate  
Students will be asked to conceptualize leadership from the Transformational and Servant Leadership perspectives. Using these principles, students will examine the spirituality of Catholic School leadership, and its implications for them in their role as ministers and coordinators of ministries in the school setting. Students will then examine the unique administrative and managerial factors that impact Catholic schools from a leadership framework that is imbued with the spirituality of Servant Leadership.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 590  
ORGANIZATIONAL DEVELOPMENT  
Graduate  
A development approach used in combining theory, research, and applications for improving interpersonal effectiveness and to develop problem-solving capacity of the organization. The course is about change theory, people in organizations and the achievement of individual and organizational goals.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 591  
RESEARCH SEMINAR IN EDUCATIONAL LEADERSHIP  
Graduate  
This course is designed to help graduate students in Educational Leadership through the process of planning, organizing, drafting, and revising their Master's papers. Students will be expected to complete a literature review and to develop a strong proposal for an integrative paper as a prelude to selecting an advisor for their Master's papers.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.
A&S 593
PRACTICUM IN EDUCATIONAL LEADERSHIP
Graduate
The practicum provides opportunities for advanced students in administration and supervision to participate in and complete a research project in selected systems on a full-time or part-time basis. The experiences are intended to provide, under professional direction and supervision for (1) study for major factions, policies, and problems for administration and supervision, and (2) intensive study of certain critical administrative and supervisory practices.
Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 594
INTERNSHIP IN EDUCATIONAL LEADERSHIP
Graduate
The internship provides supervised experiences in selected organizations on a full-time or part-time basis. The student intern is cooperatively assigned to an organization under the immediate supervision of organizational personnel. The experiences provided are designed to enrich the student’s theoretical background with practical opportunities of participating in (1) overall contact with personnel and with the major functions and problems of certain critical administrative and/or supervisory activities, and (2) a detailed study and analysis of a particular administrative and/or supervisory function or activity.
Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 595
WORKSHOP IN EDUCATIONAL LEADERSHIP
Graduate
Topics of particular interest and concern to administrators and supervisors will be presented in a high-involvement seminar format. Primary reliance will be on written materials; however, audio-visual and role-playing mechanisms may also be used.
Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 596
HUMAN RESOURCE MANAGEMENT
Graduate
Theory, practice and relevant research in modern personnel administration. Recruitment, staff-development, interviewing, collective bargaining, conflict resolution and employee evaluation are emphasized. Human resource administration, induction programs, and in-service opportunities are touched upon.
Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 597
POLITICS OF EDUCATION
Graduate
Policy development in education as a political process; community power, state and national politics in educational decision-making and the role of leadership and pressure groups in the shaping of educational policy at local, state and national levels.
Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 598
INDEPENDENT STUDY IN EDUCATIONAL LEADERSHIP
Graduate
Independent study: Permission of instructor, department chair and Associate Dean are required.
Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 599
THESIS SEMINAR IN EDUCATIONAL LEADERSHIP
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. When the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.
SCG 410, an approved thesis and status as an Advanced Master's student is a prerequisite for this class.
A&S 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
(0 credit) Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 602
PRINCIPAL LICENSURE INTERNSHIP I
Graduate
This internship experience immerses the student into the world of the instructional leader in the contemporary Pre K-8th school setting. The student is to complete at minimum 100 clock hours of instructional leadership experiences in the PreK-8 setting by participating and taking the lead in concrete sustained leadership experiences under the supervision of both the building's principal (mentor) and the faculty supervisor.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 603
PRINCIPAL LICENSURE INTERNSHIP II
Graduate
This internship experience immerses the student into the world of the instructional leader in the contemporary 9-12 school setting. The student is to complete at minimum 100 clock hours of instructional leadership experiences in the 9-12 setting by participating and taking the lead in concrete sustained leadership experiences under the supervision of both the building's principal (mentor) and the faculty supervisor.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 606
REVIEW OF LITERATURE
Graduate
This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., by reviewing and synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching databases. In other words, students will need to be able to ask and answer such questions as "What is known about? What are major issues and themes?"

A&S 607
INTEGRATIVE PAPER
Graduate
Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of a theory, or, conversely, developing/refining a theory based on investigations made in the field. In other words, as graduates encounter new theories and practices they will need to be able to investigate and evaluate them, asking and answering questions about "how theories work."

A&S 608
CAPSTONE IN EDUCATIONAL LEADERSHIP
Graduate
Students who have completed the majority of the program will engage in an analysis of an urban school. Students will be given demographic, financial and testing data; a narrative of the school's history and recent past; photographs of the setting, and other pertinent data and artifacts. Using these artifacts, students will be asked to design their first year agenda as the chief administrator in the building. Using the ISLLC standards as a guideline, students will create a portfolio that clearly outlines, schedules, professional development plans, budgets, enrollment projections, and so forth.
A&S 625
CANDIDACY CULMINATING PROJECT
Graduate
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 640
LEGAL ASPECTS OF SPECIAL EDUCATION FOR CLASSROOM TEACHERS
Graduate
The course will include a discussion of the legal rights of students with disabilities and the corresponding responsibilities and obligations of schools and educational personnel for meeting their educational needs. The course will include specific legal components inherent with the identification and education of students with disabilities including adaptations of classroom instructional methodology for students with disabilities in the regular education classroom.

A&S 645
THE ADMINISTRATION AND SUPERVISION OF SPECIAL EDUCATION
Graduate
This course will examine the role and function of special education; special services within the school and community, including special classes for the mentally and/or physically handicapped; and various services, such as school psychology, school social work, speech correction, learning disabilities specialist, and others. The course includes specific models for administration of special education programs and procedures for supervision and evaluation of special education personnel.

A&S 694
SCHOOL FINANCE
Graduate
Major consideration will be given to problems relating to the preparation of a school budget, procuring revenue, financial accounting, capital outlays, insurance on property, taking of inventory, and the social, political, and ethical implications of how schools are financed.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 695
SCHOOL LAW
Graduate
Authority, powers and liability of school personnel; rights and status of students; character of districts and school board control of curriculum, school property, finances. Special emphasis on recent state and federal court decisions as they affect Illinois and neighboring states.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 700
REGISTERED DOCTORAL STUDENT IN GOOD STANDING
Graduate
Non-credit. This registration is required of all doctoral students who are not enrolled in a doctoral course, but are completing course requirements and/or dissertation research. It provides access to University facilities. Academic advisor approval required. After the third enrollment, dissertation chair approval required.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 706
CANDIDACY PAPER
Graduate
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook.

Status as a EDD student with a declared concentration is a prerequisite for this class.
A&S 801
LEADERSHIP: THEORY AND PRACTICE
Graduate
This course examines leadership theories from various social, psychological and philosophical perspectives both historical and contemporary. The student will also be called upon to reflect upon contemporary practice in K-16 educational leadership settings and evaluate the efficacy of the theoretical frameworks in light of practice.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 803
SCHOOL PROGRAMS, PLANT AND HUMAN RESOURCES
Graduate
The development of school programs, based on current research and school laws and regulations, will be explored. The focus will be on the core curriculum, Education and Secondary Education Act (ESEA), State Chapter I, Bilingual and Special Education mandates and opportunities as well as on other discretionary school programs. Responsibilities in relation to plant operation and management, staffing formulas for all staff, developing job descriptions, recruitment, and staff selection and evaluation are included.

Status as an EDD-Educational Leadership student is a prerequisite for this class. Other EDD students may enroll with permission of instructor.

A&S 811
ASSESSMENT AND ACCOUNTABILITY
Graduate
This course addresses the key role of leaders in educational systems for the development, articulation, implementation, and supervision of an assessment process that provides accountability for all stakeholders—students, parents, teachers, legislators, relevant communities, and governing authorities. Issues of philosophy, standards, outcomes, curricula, instrumentation, technology, and the interconnected nature of these factors are identified as they influence the leadership role in accountability compliance. Factors related to ethical practice and social justice anchor the philosophical and political parameters of the course.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 823
COMMUNITY AND CONSENSUS BUILDING FOR SCHOOL IMPROVEMENT
Graduate
Students will examine inclusive models for consensus building among school/community members that engage membership in processes and decision making through data collection, self-analysis, mission/vision development, goal setting and program planning, implementation and evaluation that leads to school and community improvement. Attention will be given to establishing linkages with local municipal, state, and federal resources, business and industrial resources, community services, and other community resources.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 843
THE POLITICS OF SCHOOLING
Graduate
Students will engage in analyzing educational policy and the political processes related to problem identification, problem solving, decision making, the underlying political processes and their impact on the school/community, students, parents, educators, staff, and community members. The role of such entities as, school boards, unions, professional associations, businesses, university preparation programs, book and test publishers, and local, state, and national policy makers in the education political arena will be analyzed. Attention will be given to the means by which support for change is developed with special emphasis on collaborative dialogue and teamwork for political action. Strategies for coalition building, and individual and collective action will be informed by the use of theory from applied behavioral science and political science.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 849
SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT
Graduate
Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.
A&S 859
INDEPENDENT DISSERTATION RESEARCH: EDUCATIONAL LEADERSHIP
Graduate
Students register for this course for the quarter in which they defend their dissertation. Permission of dissertation chair required.

A&S 873
CURRENT TRENDS IN BUDGETING AND FINANCE
Graduate
This course focuses on the priorities of school funding. Financial decisions undergird instructional programs and administrative decision making. Relating these to available money and funding, setting priorities and maximizing the impact on student achievement will be studied. A&S 494 or equivalent and status as an EDD student are a prerequisite for this class.

A&S 883
SCHOOL LAW
Graduate
This course examines the current legal requirements of schools and how changes impact schools. Administrators make decisions that respond to many realities, including the rules and regulations at the local, state, and national levels. The administrator works within a constantly changing system. The duties and liabilities of school administrators as determined by federal rules and regulations, state school codes, the policies of boards of education, and case law will be examined. A&S 495 and status as an EDD student are prerequisites for this course.

A&S 894
INTERNSHIP IN EDUCATIONAL LEADERSHIP
Graduate
(4-8 qh) The internship provides supervised experiences in selected organizations on a full-time or part-time basis. The student intern is cooperatively assigned to an organization under the immediate supervision of organizational personnel. The experiences provided are designed to enrich the student's theoretical background with practical opportunities of participating in (1) overall contact with personnel and with the major functions and problems of certain critical administrative and/or supervisory activities, and (2) a detailed study and analysis of a particular administrative and/or supervisory function or activity.
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 899
SUPERINTENDENT INTERNSHIP
Graduate
This course is intended for those seeking the Illinois State Board of Education (ISBE) Superintendent Endorsement. The experiences provided are designed to enrich the students' theoretical background with practical opportunities to participate in major functions and critical duties at the district, regional and/or central office level. The student will be cooperatively assigned to site(s) and be supervised by the on-site superintendent and a DePaul faculty member.
Status as a EDD student with a declared concentration is a prerequisite for this class.

AAS 200
ASIAN AMERICAN HISTORY
Undergraduate
This course examines the creation of Asian America by first and second-generation Asian migrants to the Americans from the 1840s to World War II. The course provides a historical, legal, social and cultural framework for understanding the resurgence of Asian migration since the 1960s.
AAS 202
ASIAN AMERICAN LITERATURE
Undergraduate
This course will serve as an overview of Asian American literature in a socio-historical context. Special emphasis will be placed on tracing the various paradigms through which these works have been produced, from texts written prior to the movement towards self-determination during the 1960s; to works identified with the "cultural nationalism" promoted during the 1960s and 1970s; to the pluralism of the 1980s which explored how gender, sexual orientation, and class complicate earlier essentialist conceptions of racial identity; and finally to the transnational and diasporic interests of the 1990s. Texts covered will include primarily fiction (novels and short stories), but also critical essays, plays, movies, and poetry.

AAS 203
ASIAN AMERICAN ARTS AND CULTURE
Undergraduate
This course will examine Asian American arts and cultural productions in relation to the histories of people and groups with roots in Asia and the Pacific. The course will focus on contemporary visual arts from the emergence of Asian American movements in the 1960's and 1970's, to the multiculturalism of the 1980's and 1990's to our present transnational moment. Formerly AAS 201.

AAS 205
INTRODUCTION TO GLOBAL ASIAN STUDIES
Undergraduate
This course examines contemporary experiences of Asians in America and the diaspora. The historical focus is post-1965 and encompasses immigrant groups such as: Chinese, Japanese, Filipinos, Indians, Koreans, Pakistanis, Bangladeshis, and Southeast Asians. Formerly AAS 100.

AAS 210
PRINCIPLES OF ASIAN ART
Undergraduate
An introduction to major developments of art and architecture across Asian cultures including South Asia, Southeast Asia, the Himalayas, and East Asia and their counterparts in America. This course examines not only painting, sculpture, and architecture, but also gardens, ceramics, and prints. Special emphasis will be placed on religious arts of Buddhism and Hinduism, along with landscape and figural painting. Cross-listed with HAA 115.

AAS 211
BUDDHIST ART
Undergraduate
This course explores the traditional visual culture of the Buddhist world, examining art as a reflection of religious belief and practice. The works come from South Asia, Southeast Asia, East Asia, and America. An emphasis is placed on painting, sculpture, and architecture made for or related to Buddhist practice. Cross-listed with HAA 220.

AAS 214
JAPANESE ART
Undergraduate
This is a chronological survey of premodern Japanese art, from the prehistoric era to the Meiji period (1868-1911). Topics covered include painting, sculpture, and architecture, as well as decorative arts, prints, and garden design. Special attention is given to Buddhist and Shinto religious arts, along with screen painting and woodblock prints. Cross-listed with HAA 216.

AAS 215
INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY
Undergraduate
This course charts the political, social and economic transformation of the developing countries (Africa, Asia, Latin America, Caribbean, Pacific Islands) into a global economy dominated by the 'developed' countries (North America, Europe and Japan). This process, termed 'GLOBALIZATION,' results from the operation of the global market mechanism, the activities of Transnational Corporations (TNCs) and the programs of the International Financial Institutions (IFIs). Cross-listed with GEO 215.
AAS 220
AMERICAN BUDDHISM
Undergraduate
This course critically analyzes the origins of Buddhism in the United States in order to fully understand how and why Buddhism has flourished in Asian and White American communities, and to understand the conflict and controversy surrounding the racial dynamics of religious choice. Cross-listed with AMS 220.

AAS 222
RELIGION AND POLITICAL CONFLICT: SOUTH ASIA
Undergraduate
An examination of the role of religions and religious movements in political conflicts. Particular sections will examine the relationship of religious violence and peacemaking in different areas of the world (in this case, South Asia).

AAS 223
TALES OF INDIA
Undergraduate
Before the modern nation-states of India and Pakistan came into being, the term "India" referred to the South Asian region, a region that has been and is the home of many cultures and societies. These cultures have also reached beyond the region to create rich and paradoxical diaspora experiences in Europe and the Americas. Tales of India will explore a variety of literatures, ancient and contemporary, that illuminate the worlds of South Asian peoples in their homelands and in the transnational life of the diaspora. Themes will include love, power, religious meaning/religious identity, and cultural difference.

AAS 224
HINDU THOUGHT AND CULTURE
Undergraduate
An exploration of Hinduism as a civilization whose key reference points are religious in the sense understood in the West (ritual and transcendence), yet which finds expression in a "high culture" of literary works, political and social theory, art and architecture, music and dance, and folk and popular stories, songs and plays. Cross-listed with REL 242.

AAS 225
RELIGION AND SOCIAL ENGAGEMENT: SOCIALLY ENGAGED BUDDHISM
Undergraduate
An investigation of the ways in which various religious traditions engage the social order. Traditions, persons and movements that form the focus of the course will vary from section to section (in this case the focus is on Buddhism). The course will integrate theory and practice in studying forms of religious engagement. All students will perform some service to a community or within a community organization or agency.

Sophomore standing is a prerequisite for this class.

AAS 226
ETHICAL WORLDS: MORAL ISSUES ACROSS CULTURES: ATOM BOMB DISCOURSE
Undergraduate
An exploration of religion and ethics from a comparative and international perspective. Ethical dimensions of diverse world traditions (in this case the development and use of atomic weaponry) will be investigated within their own particular historical and cultural contexts, and students will be asked to consider and evaluate their own ethical orientations in the light of these studies.

AAS 248
CHINESE CALLIGRAPHY
Undergraduate
An introduction to the art of Chinese calligraphy. Hands-on practice as well as history and theory of the art. This course is open to students with no background in Chinese calligraphy, language, literature, or culture. Cross-listed with MOL 248.
AAS 251
SOUTH ASIA TO 900
Undergraduate
The course follows the development of the history of the region from the earliest phases of human settlement, the first civilization in the Indus valley, and the formation of the Mauryan and Gupta empires. It will analyze the growth of different state structures from tribal/lineage based state to these great empires. It incorporates the rise of regional states and the growing importance of trade to linking South Asia with the West. It will also examine the development of different religious traditions from Vedic Brahmanism to Buddhism to Jainism and the very early days of Islam in the region. The central question of this course will be how to contextualize the relationship between structures like family, law, caste, community, state and the tumultuous changes in the subcontinent over this long period. Cross-listed with HST 151.

AAS 253
ASIAN POLITICS
Undergraduate
An introduction to contemporary government and politics in Asia, focusing on China and Japan, with comparative reference to other Asian and non-Asian political systems. Special attention will be made to the emerging political and economic role of the Pacific Rim. Cross-listed with PSC 253.

AAS 264
JAPAN, CA. 1200-1800
Undergraduate
Follows the emergence of the warrior class and the system of dual political authority until the 14th century, with the imperial court in Kyoto and the samurai elite in Kamakura. Continues with an examination of the early modern processes of urbanization and the growth of a monetary economy, changes in social organization, major cultural innovations, and religious/intellectual movements. Cross-listed with HST 264.

AAS 273
GLOBAL ASIAN LITERATURE
Undergraduate
Introduction to selected authors, genres, and topics in Asian American or Asian diasporic literature from the mid-nineteenth century to the present. Variable emphasis on different groups, genres, or historical periods. Cross-listed with ENG 273.

WRD 103 or HON 100 is a prerequisite for this course.

AAS 290
TOPICS IN ASIAN AMERICAN STUDIES
Undergraduate
This course, which varies from quarter to quarter, explores topics in Asian-American studies.

AAS 305
RELIGION AND CULTURE IN SOUTH ASIA
Undergraduate
This course examines the interplay between religion and society in pre-modern and contemporary South Asia. The course will use such materials as epic texts, poetry, novels, journalism, film, music and art to explore how religion, gender, social class and politics are experienced in the lives of people in India and Pakistan. Cross-listed with REL 305.

AAS 320
MODERN JAPANESE LITERATURE
Undergraduate
Covers modern Japanese literature in English translation from the Meiji era to the present. Themes for study include tradition and modernization, the individual and society, gender, and nostalgia. In addition, beginning with excerpts from Tsubouchi Shoyo's 1886 essay "The Essence of the Novel," students will trace the development of the novel in modern Japan. Cross-listed with MOL 320.
AAS 325
QUEER JAPAN
Undergraduate
This course surveys representations of same-sex sexuality from the 14th century to the present day in Japan. We will explore the intersection of history, politics, art, and culture through historiography, literature, film, photography, music, cartoons, and animation, examining "traditional" male-male sexuality, the emergence of the modern era of texts reflecting female-female sexuality, as well as the formation of new consciousness and subjectivities throughout the 20th century and into the 21st. Cross-listed with MOL 325.

AAS 337
ASIAN AMERICAN MEDIA REPRESENTATION
Undergraduate
This course examines the ways in which Americans of Asian descent are portrayed in popular media such as television, film, newspapers, and advertisement.

AAS 342
ASIAN POLITICAL ECONOMY
Undergraduate
This course offers an overview of the geopolitics, culture and history behind the "East Asian Miracle." It provides students with the tools to analyze the core theories, actors, and current and historical events in the study of the international relations, business, politics, and economy of Asia. Cross-listed with PSC 343.

AAS 343
JAPANESE AMERICAN HISTORY IN THE US/ CHICAGO
Undergraduate
The second course in a sequence of three content-based courses designed for advanced high learners and native speakers of Japanese to discuss authentic cultural, historical, or literary materials. Topics vary with offering: see current schedule for details. Recommended for students who have completed JPN 201-202-203 and JPN 311-312-313, or have equivalent proficiency in Japanese.

AAS 350
ETHNIC MINORITY YOUTH: ADAPTATION, IDENTITY AND DEVELOPMENT
Undergraduate
Utilizing an ecological systems perspective, this course examines the challenges and resiliencies faced and acquired by ethnic minority youth. This course will closely examine developmental issues during adolescence that are complicated by being an ethnic minority, or child of immigrant parents. Issues examining the intersection of socio-political power dynamics, with acculturation/cultural adaptation, ethnic identity formation, and intergenerational family conflict will particularly be examined.

AAS 351
JAPANESE POLITICS
Undergraduate
This course examines the meeting of the ancient and the modern in the context of 21st century politics in Japan. Exploring political, economic, and cultural practices and institutions, this class provides an in-depth understanding of Japan's political system from its origins in samurai traditions to current challenges facing Japan's democracy and economy. Cross-listed with PSC 350.

AAS 352
CHINESE POLITICS
Undergraduate
This course examines the political system of China and the major domestic issues in contemporary Chinese politics. The course explores the rise and early governance of the Chinese Communist Party, the economic and political developments since the start of the reform (post 1978) era, and the main political challenges facing Chinese society today. Cross-listed with PSC 352.

AAS 367
LITERATURE OF THE VIETNAM WAR
Undergraduate
This course examines novels, short stories, and essays on the Vietnam war and its aftermath, Vietnamese society, literature of the Vietnam Era.
AAS 395
INDEPENDENT STUDY IN ASIAN AMERICAN STUDIES
Undergraduate
Independent study. Variable credit.

ABD 100
INTRODUCTION TO AFRICAN AND THE BLACK DIASPORA STUDIES
Undergraduate
The objective of the course is two-fold: first, to introduce students to African and Black Diaspora Studies as a scholarly field rooted in a tripartite intellectual tradition (Africa, Pan-African, and African American Studies) and second, to ground the history of the field in the investigation of problems raised in African and Black diasporic public spheres. The course will show how the field formulates and investigates questions designed to critique existing knowledges and to expand knowledges in the interests of Black peoples.

ABD 144
AFRICAN RELIGIOUS EXPERIENCE
Undergraduate
A survey of the varieties of African religious practice and thought. Cross-listed as REL 144.

ABD 200
AFRICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS
Undergraduate
This is an introductory survey course on African politics. The organizing topic and focus of the course will be Africa's experience with democratic governance, especially its continuing vigor and popular appeal on the continent despite its elusive character. Our goal in this course is to gain a deeper understanding and appreciation of Africa: its rich political tradition, incredible diversity, its contradictions, achievements and failings. The objective is to be able to ask better questions, and develop some insights about why democracy, self-sustaining economic growth, equity and social justice have been so difficult to accomplish and sustain in the region.

ABD 202
AFRICA, 1750-1900
Undergraduate
The Age of Conquest. The origins of Afro-European relations and the political, economic and military causes of the European partition and occupation of the continent. Cross-listed with HST 132.

ABD 203
AFRICA, 1900-PRESENT
Undergraduate
The workings of the colonial system, the rise and course of independence movements, and the history of individual African states since independence. Cross-listed with HST 133.

ABD 206
AFRO-CARIBBEAN AND AFRO-LATIN AMERICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS
Undergraduate
This course has two objectives. First, to introduce the student to the study of peoples of African descent in the Caribbean and Latin America through lenses of history, politics, and culture. Second, to introduce students to the methods and knowledges of the field of Latin American Studies to enable students to pursue further research.

ABD 208
AFRICAN AMERICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS
Undergraduate
This course is intended to acquaint the student with a range of texts that illustrate some of the major themes in African American studies while emphasizing the development of students' critical reading, writing, and analytical skills. The course will serve as an introduction to African American historical, literary, political, and cultural study. This course is meant to introduce students to some of the issues, debates, and questions that have shaped the study and development of Black Americans in the United States and the broader world.
ABD 210
AFRICA ON FILM
Undergraduate
Africa is a continent with a rich and growing repertoire of film. This course explores this repertoire, focusing primarily on films made about Africa by filmmakers of African descent. This class will feature fiction and non-fiction films (full-length and shorts) by well-known filmmakers of African descent. In addition to screenings, students will read essays that illuminate the background necessary to intelligently interpret and critique film. Topics for discussion include the funding, distribution, and presentation of African Films as well as modes of criticism appropriate to film made by Africans and the relation of filmmaking to history. Film directors include Souleymane Cisse, Bassek ba Kobhio, Jean-Marie Teno, Djibril Dio Mambety, Mohamad Camara, and Ousmane Sembene.

ABD 211
AFRICA TO 1800: AGE OF EMPIRES
Undergraduate
A study of African history from earliest times, concentrating on the political, social and religious aspects of major African states and empires. Cross-listed with HST 131.

ABD 212
INTERCULTURAL COMMUNICATION
Undergraduate
Examines the role culture plays in interethnic and international communication. Explores differences and similarities in cultural values and communication behaviors between and among diverse cultures and develops cultural competence. Critiques stereotypes and increases cultural sensitivity.

ABD 214
ARCHEOLOGY OF THE AFRICAN DIASPORA
Undergraduate
Africans have been on the move since the dawn of humanity. Archaeology is one discipline that can inform us about the presence and influence of Africans throughout the world, beginning with our hominid ancestors and continuing through the 20th century. Prior experience with archaeology is not required. Topics include: the evolution and development of our species; migrations within the African continent and abroad; and the cultural insights to be gained from the rapidly-growing field of African-American archaeology.

ABD 215
THE AFRICAN AMERICAN RELIGIOUS EXPERIENCE
Undergraduate
This course will examine the religious experience of African Americans and its African precursors through historical and literary resources, reflecting African Americans' distinctive past and interaction with other elements of American culture.

ABD 218
AFRICAN AMERICAN POLITICS
Undergraduate
This course explores the evolution of African-American political participation from the mid-1800's to the present. Topical areas include black political leadership and involvement in social movements (including abolitionism, nationalism, civil rights and the black power movements), electoral politics, political parties, urban politics, public policies, political culture, and as elected officials. Special attention will also be given to the influence of laws and the courts on African-Americans' political participation.

ABD 220
BLACKS AND LOVE
Undergraduate
This course employs cultural criticism, race and ethnic studies, and women's and gender studies to examine the visual representations of blacks and love in art, film, and literature. The course begins by examining the construction of race in eighteenth, nineteenth, and early twentieth-century European and American philosophy and body politic and with an examination of art, art history, film, and literature. Section two explores the definition of love; it examines Christian definitions of love as well as secular definitions from black intellectuals, cultural critics, and scholars. Section three examines a range of genres in search of progressive, transformative, positive images that depict blacks in loving relationships,rediscovering what it means to love oneself and others in spite of/because of our human differences (in race/ethnicity, gender, class, sexuality).
ABD 230
STEREOTYPES AND BLACK IDENTITY
Undergraduate
Stereotypical representations of people of African descent have pervaded Western culture throughout the modern era. These images were disseminated along the trade routes of colonialism, from Africa to Europe, the Americas and Asia. Stereotypes of people of African descent have been a part of popular culture, commercial advertising, and scientific literature. This course will examine the origin and dissemination of the dehumanized image of "the Black body". We will discuss the perpetuation of Black stereotypes and how these images have shaped Black identity in the post colonial world.

ABD 231
PHILOSOPHY AND THE QUESTION OF RACE
Undergraduate
A philosophical inquiry into the history of the concept of race.

ABD 233
SURVEY OF AFRICAN DIASPORIC INTELLECTUAL THOUGHT
Undergraduate
This survey course examines the philosophical and critical thought from African American, Caribbean, and African philosophers, feminists, political, and radical intellectuals. The thinkers to be studied include, but are not limited to, Du Bois, Garvey, James, Lamming, Williams, Senghor, Fanon, Hodge, Wynter, Lorde, Soyinka, hooks, Emecheta, and Conde.

ABD 234
SURVEY OF BLACK AESTHETIC THOUGHT
Undergraduate
This survey course examines the history of the aesthetic thought that has emerged from the minds of Black creative intellectuals in the United States and globally. Figures to be examined might include: Du Bois, Locke, Hughes, Johnson, Hurston, James, Baraka, Piper, hooks, Julien, Mercer, and Wallace.

ABD 235
HARLEM RENAISSANCE AND NEGRITUDE
Undergraduate
This interdisciplinary course will examine the diasporic literary and cultural movements known as the Harlem (or New Negro) Renaissance and the Negritude Movement in literature, music, and visual arts. Specific attention will be given to the historical, economic, and political aspects which helped to form these movements. Figures to be examined include: Du Bois, Hughes, Locke, Larsen, Douglas, Cullen, Cesaire, Damas and Senghor.

ABD 239
PHILOSOPHIES OF AFRICA
Undergraduate
A study of the patterns of philosophical thinking from the African continent. Cross-listed with PHL 239.

ABD 241
RELIGIOUS DIMENSIONS OF THE AFRICAN DIASPORA
Undergraduate
This course explores the dynamics of African religions throughout the Diaspora and the Atlantic world. It will pay particular attention to the variety of historical experiences and sacred institutions of those of African descent. Questions of the course include: how were these religions and their communities created?; how have they survived?; and how are African-based traditions perpetuated through ritual, song, dance, drumming, and healing practices? Specific attention will be given to one or more of the following: Yoruba religion and its New World offspring, Santeria, Voodoo and Candomble; Africanisms in American religion; gospel music; Islam; urban religions; and/or Vodun and Voodoo.

ABD 244
AFRICAN WOMEN WRITERS
Undergraduate
This course examines fiction and criticism with the purpose of studying how African women configure themselves in literature and how they (re)define feminist theory. Authors to be studied include: El Saadawi, Emecheta, Alkali, Nzapa, Head, Ngcobo, Lessing, Gordimer, Aidoo, Ba, and Joyce.
ABD 245
RACE AND ETHNICITY IN LITERARY STUDIES
Undergraduate
This course examines various ways in which race is constructed and, concurrently, how race as a "fiction" operates in literary studies. Literature presents and explores the ways in which the world is viewed and experienced by individuals in a particular society or social group. Since literature provides unique insights into different historical and cultural movements, studying how race is understood and deployed (explicitly and implicitly) in a text provides a powerful way to examine the fluidity of race and to compare how it is understood in different parts of the Black diaspora.

ABD 246
PRINCIPLES OF AFRICAN ART
Undergraduate
This introductory-level course surveys the arts of select cultures from west and central Africa. The course will focus on the arts of royalty as a means by which to introduce basic concepts and larger issues within the field. The arts of groups who borrow from royal iconography, such as diviners, religious cults, societies of elders, and others, will also be investigated. Themes pertinent throughout the course include issues of gender, colonialism, cultural interaction, and historical change in both visual art and the nature of kingship. Cross-listed as HAA 101.

ABD 247
ANCIENT AFRICAN ART: PREHISTORIC TO THE EUROPEAN ENCOUNTER
Undergraduate
This course surveys a selection of artistic traditions from across the African continent beginning with the earliest attempts by humanity to visually represent complex thought until the Portuguese began trading along the coast of West Africa in the mid-fifteenth century. Emphasis is placed on demonstrating connectedness with a larger cultural environment, while also suggesting connections to future artistic traditions. Cross-listed with HAA 201.

ABD 248
MODERN AFRICAN ART: EUROPEAN ENCOUNTER TO INDEPENDENCE
Undergraduate
This course surveys a selection of artistic traditions from across the African continent beginning with the arrival of the Portuguese along the coast of West Africa in the mid-fifteenth century until the age of African independence in the 1960s. While the impact of a European presence helps define the boundaries of this course, artistic response to that presence is but one theme. Interactions between African cultures and the impact of Islam are equally important considerations. Cross-listed as HAA 202.

ABD 249
JAZZ AND THE DIASPORIC IMAGINATION
Undergraduate
This course will examine the role jazz has played in the cultural imagination of people across the African Diaspora. What does jazz symbolize for authors and artists, and how have they adapted jazz to fit their own aesthetic, ideological, and political needs? How has it been used in literature, visual art, politics, sociology (among others)? What are the different ways in which 'jazz' (itself a multifaceted idea) has been imagined, presented, and manipulated? Figures to be examined include: Amiri Baraka, Sonia Sanchez, Romare Bearden, Langston Hughes, Jackson Pollock, Billie Holiday, Ralph Ellison, Dizzy Gillespie, John Coltrane, among others.

ABD 250
CARIBBEAN MUSIC AND IDENTITIES
Undergraduate
In the Caribbean, music is tied to national identity: Jamaican reggae, Puerto Rican bomba and plena, Haitian compass, Brazilian samba, Dominican merengue. But how did a Cuban rhythm derived from the Kongo become thought of as a Spanish habanera? How did a related Kongo-derived rhythm popularized by Cuban sailors become the Argentine tango? By exploring genres of Caribbean music, we will learn about human and cultural migrations in the Caribbean, and the tremendous influence of music in national identity. Focus will be on African-derived forms in Cuba.

ABD 251
WORLD REFUGEE CRISIS
Undergraduate
This is a survey of global refugee crisis and internal displacement between 1945 and the present. The course will focus on the following issues and challenges: human rights, definitions and causes of crisis, internal/external displacements, ‘environmental’ refugees, protection and integration, refugee children, and conflict resolutions in post-war societies. Cross-listed with HST 241.
ABD 252
CONTEMPORARY AFRICAN ART: INDEPENDENCE TO THE PRESENT
Undergraduate
This course surveys African art from the age of African independence in the 1960s until the present day. The meaning of the term contemporary as it applies to African art is questioned in this course. The position of the artist between African artistic tradition and the global art market is also of vital importance. Cross-listed with HAA 203.

ABD 254
AFRICAN POLITICS
Undergraduate
An introduction to African politics. The course will focus on the basic concepts, issues, and theoretical models used in studies of the dynamics of government and politics in Africa from the pre-colonial era to the contemporary period.

ABD 256
AFRICAN-AMERICAN HISTORY TO 1800
Undergraduate
West African culture, the middle passage, development of the Slave trade, introduction of slavery into the American colonies, African-Americans in the Revolutionary War and the Constitution. Cross-listed as HST 246.

ABD 257
AFRICAN-AMERICAN HISTORY, 1800-1900
Undergraduate

ABD 258
AFRICAN AMERICAN HISTORY, 1900 TO PRESENT
Undergraduate

ABD 259
THE GREAT MIGRATION: BLACK RESETTLEMENT IN THE URBAN NORTH
Undergraduate
Between 1910 and the 1970s, as many as 6 million African Americans left the Southern states in order to escape the brutality, dehumanization and poverty of the Jim Crow South. These migrants crowded into urban centers of New York and Chicago where they faced new challenges; better educational and employment opportunities, but new forms of discrimination and racism. This course will examine the social, cultural, political and economic implications of the largest internal migration in US history through the study of autobiography, fiction, art, and film and other forms of material culture.

ABD 260
DIMENSIONS OF BLACK FAMILY LIFE
Undergraduate
This course will introduce students to the study of Black family life in Africa and its Diaspora. Special attention will be given to the ways in which values and patterns of living and thought are communicated across generations (time) and transported across geography (space).

ABD 272
MUSLIM WOMEN IN TEXTS
Undergraduate
This course aims to examine texts written on Muslim women by themselves, by non-Muslim women and by Muslim men. Several questions are raised by the subject itself. One such question focuses on what is intrinsically Islamic with respect to ideas about women and gender. Another question centers on what is the model Muslim woman given the diversity of cultural manifestations of Islam. This course emerges from these questions and others exploring who is writing what about Muslim women, for what audience.
ABD 274  
WOMEN IN AFRICAN RELIGION AND CULTURE  
Undergraduate  
A study of the role of religion and culture in the lives of women in Africa, introducing students to an "emic" (insider) interpretation of beliefs and practices of the triple religious heritage (Indigenous religions, Christianity and Islam), and critically evaluating their implications for women.

ABD 275  
BLACK FEMINIST THEORIES IN A U.S. CONTEXT  
Undergraduate  
This course surveys the major figures, statements, and movements that shape Black feminist thinking, writing and activism in the United States. Figures examined include: bell hooks, Ida B. Wells Barnett, Mary Church Terrell, Angela Davis, Michelle Wallace, Audre Lorde, and Mark Anthony Neal, among others. Cross-listed with WGS 275.

ABD 285  
AFRO-HISPANIC LITERATURE IN TRANSLATION  
Undergraduate  
This course explores how race, class, politics and culture find expression in Afro-Hispanic literature. We will read works that have been translated into English from their original Spanish versions and analyze how the use of language, imagery and narrative voice reflect the experience of people of African descent in the Spanish-speaking world.

ABD 290  
SPECIAL TOPICS  
Undergraduate  
This course, which varies from quarter to quarter, explores issues stemming from our being gendered and racialized subjects and examines the values underlying a variety of issues.

ABD 291  
BLACK METROPOLIS I: 1890-1950  
Undergraduate  
This course is part of a longitudinal research project titled The Black Metropolis: The Last Half-Century. The Black Metropolis Project (BMP) is an effort to examine changes in the original 'black belt' of Chicago since the publication of St. Clair Drake and Horace Caytons' monumental study of the Black Metropolis (1945). The BMP is part of a yearlong course sequence that offers a platform of three interrelated chronological time periods: 1890-1945 Black Metropolis I, 1945-1975 Black Metropolis II, and the period 1975- to the present Black Metropolis III. Through historical and contemporary readings, class discussions, student exercises and training, field experiences and student cooperative service learning activities the course will examine key events, circumstances, and situations.

ABD 300  
AFRICAN ISLAM: ISLAMIC ART & ARCHITECTURE IN SUB-SAHARAN AFRICA  
Undergraduate  
Focused study of the impact of Islam on the artistic traditions of sub-Saharan Africa. Rather than necessarily replacing previous art forms, this course investigates in what circumstances preexisting visual culture might be integrated with the requirements and needs of Islam. This approach necessitates an understanding that neither Islam nor African art are monolithic entities, but rather their interactions represent a wide variety of negotiations across the continent. Likewise, this course will consider specific historical circumstances to which Islamic art in sub-Saharan Africa has responded in terms of form and content. Cross-listed with HAA 302.

ABD 301  
AFRICAN ARCHITECTURE  
Undergraduate  
This course examines a wide variety of issues pertinent to the study of architecture in Africa, highlighting above all else the diversity of traditions across the continent. Weekly themes are defined at times by materials, technology, type, geographical region, culture, or specific architectural elements. Examples of subjects studied include: earthen mosques of Mali; subterranean residences in Burkina Faso; nomadic tents; impluvial and courtyard traditions of Nigeria and Senegal; mural painting in Burkina Faso, Nigeria, and South Africa; Ethiopian rock cut churches; imperialist exploitation of Great Zimbabwe's legacy; and coral architecture of the Swahili Coast. Art history and related disciplines. Cross-listed with HAA 301.
ABD 302
MODEL ARAB LEAGUE
Undergraduate
This course is centered around students’ participation in the Model Arab League as delegates from member-states. Students engage with each other from universities in the Mid-West region on the most important social, economic, environmental, cultural and political issues facing Arab leaders and ordinary citizens. The course also focuses on parliamentary procedures of African states represented. Cross-listed with IWS 302.

ABD 303
THEMES IN AFRICAN DIASPORA
Undergraduate
Where is Africa? In Spain, Africa is said to “begin in the Pyrenees”; in Italy, to begin in Naples. Recent scholarship argues that Africa is not limited to geography, but is found in the traditions and identities of many Caribbean peoples. After reviewing models of how Africa has been conceived of by Europeans from antiquity to the present, we will examine how Africans and their descendants have resisted these definitions, or used them, while struggling for self-determination. Topics include the cultural impact of Africans in Europe: ethnic identity of Africans in the Caribbean; organized resistance to American slavery; and Pan-Africanism.

ABD 305
PAN-AFRICANISM
Undergraduate
The upper level course will interrogate the often ambivalent place of Africa in the imaginations, cultures and politics of people in the African diaspora. We will examine the contributions of African, African-American and Caribbean intellectuals, including W.E.B. DuBois, C.L.R. James and Walter Rodney, in the formation of diasporic movements and Pan-African thought. We will ask, to what degree was the ideology of Pan-Africanism and the iconography of Africa employed to mobilize masses of black people around local and domestic issues? How important has a consciousness of Africa been to the construction of cultural identities in the diaspora, and how have class, gender, and race shaped or constrained those identities? Our goal is to develop further insights into the ways in which people of the African diaspora have continually reinvented and imagined the home of their ancestors, in turn reinventing and imaging themselves.

ABD 320
AFRICAN AMERICAN SCIENCE FICTION
Undergraduate
This course studies the science fiction by Black writers as well as critical responses to these novels and writers. The course explores the treatment of gender, oppression and empowerment, historical implications (past, present, future) of the middle passage, chattel slavery, and the struggle for freedom.

ABD 336
AFRICAN-AMERICAN POLITICAL THOUGHT
Undergraduate
Considers black political thought through a variety of ideological, political, legal and historical perspectives. First explores early efforts by blacks to challenge the racialized limitations of America's core principles of liberty, equality and democracy in the contexts of abolitionism, the women's suffrage movements, Manifest Destiny, and American industrialism. Then concentrates on the evolution of contemporary black political thought, with an emphasis on both conceptual diversity and continuity over time. Cross-listed with PSC 336.

ABD 345
THE LITERATURE OF IDENTITY
Undergraduate
Cross-Cultural Study of self-discovery and identity as manifested in the literatures of self-awareness and self-definition. Authors to be studied include: Michael Anthony, Frantz Fanon, Jamaica Kincaid, George Lamming, V. S. Naipaul, and Jane Rhys.

ABD 348
RELIGIONS IN AFRICA AND THE DIASPORA
Undergraduate
An advanced examination of the indigenous religions of Africa as they encounter other religious traditions throughout the world. Cross-listed as REL 348.
ABD 351
RECONSTRUCTION AND THE RISE OF JIM CROW
Undergraduate
Covers the problems of reunion between the North and the South after the Civil War, including the struggle for African-Americans' civil and political rights, the transition to a free labor economy in the South, and the eventual end of reconstruction and establishment of racial segregation in the South and the nation. Cross-listed with HST 379.

ABD 208 or consent of the instructor is a prerequisite for this course.

ABD 365
CONSTITUTIONAL HISTORY OF VOTING RIGHTS
Undergraduate
This course explores the struggles of African Americans and women, as individuals who were excluded from the franchise on the basis of their being an African American, a woman, or both, to gain access to the ballot. The relation of women and African Americans to the ballot is worthy of investigation for two reasons. First, with the exception of 18 year olds, women and Black Americans are the two groups who have required amendments to the Constitution to secure their right to vote. Second, they share a history, often contentious, of political struggle. In addition, the course will investigate what this history of political struggle can tell us about American law, politics, and society.

ABD 369
TOPICS IN PUBLIC LAW
Undergraduate
This course engages the research and analyses in the field of public law - how do political scientists, public policy analysts and others develop informed public policy and law. Topics vary from year to year.

ABD 370
FEMINIST THEOLOGIES
Undergraduate
An exploration of women's experience as a primary resource and norm for theology, focusing on themes of inclusion, exclusion, representation and liberation in particular social, political and historical contexts.

ABD 371
AFRICAN-AMERICAN FICTION
Undergraduate

ABD 372
AFRICAN AMERICAN DRAMA AND POETRY
Undergraduate
Survey of Black poetry and drama from 1865 to the present.

ABD 373
TOPICS IN AFRICAN AMERICAN POETRY 1940-1960
Undergraduate
African-American Poetry 1940 - 1960

ABD 374
THE BLACK ARTS MOVEMENT
Undergraduate
This course looks at the intersection between political and artistic movements of the Black Power and Black Arts Movements. We will survey the aesthetic and political aspects of this era, including poetry, novels, drama, music, visual arts and film.
ABD 375  
REPRESENTATION OF AFRICAN AMERICANS IN MEDIA  
Undergraduate  
A media analysis course that will analyze media coverage of African Americans from the 19th century to the present. Through lectures, guest speakers, readings and research, students will probe the ways in which the media has influenced and dictated the perceptions and destinies of African Americans, as well as its impact on America's ongoing challenge, as W.E.B. DuBois put it more than a century ago, to "conquer the color line."

ABD 379  
BLACK FEMINIST THEORY  
Undergraduate  
This course engages with the multiple versions of woman-centered theory and practice developed in the writings; activism, and other creative work of Black, particularly African American women, from the mid-nineteenth century to the twenty-first. While not all of these theorists would use the word feminist; all have in common the aim of empowering women's lives, advocating for women for equal economic, political, and cultural access.

ABD 380  
TOPICS IN AMERICAN STUDIES  
Undergraduate  
Representative texts, artifacts, cultural values in African American historical and contemporary perspective.

ABD 386  
BLACK WOMEN'S LIVES  
Undergraduate  
This course is a variable topics course directed to the examination of topics such as black women's cultural criticism, Black women in the arts, Black lesbian rights, Black women's participation in social movements, representation in the media, etc. Cross-listed with WGS 386.

ABD 390  
TOPICS IN POPULAR CULTURE IN THE BLACK DIASPORA  
Undergraduate  
This course would explore various topics in popular culture studies through the lens of the Black Diaspora, including music, film, television, popular literature and subcultural practices.

ABD 391  
CAPSTONE  
Undergraduate  
This senior seminar engages students in a synthesis of what they have learned through coursework. The capstone course will involve reading, writing, discussion, as well as the preparation by students of a substantive piece of work (e.g., a senior thesis, a research paper, or a creative work.)

ABD 398  
FRENCHNESS (RE) DEFINED: RACE & GENDER IN MODERN FRANCE  
Undergraduate  
The goal of this course, which will be taught in English, is to introduce to you the history of France in the late modern period (1789-present) through the critical lens of race and gender. We will also develop the tools for thinking critically about gender and race as categories of analysis.

FCH 101 and FCH 102 are a prerequisite for this class.

ABD 399  
INDEPENDENT STUDY  
Undergraduate  
Independent study. Variable credit.
ACC 100  
PRINCIPLES OF ACCOUNTING LAB  
Undergraduate  
This course is a mandatory lab component of ACC 101 Introduction to Accounting I and emphasizes supplementary material to reinforce accounting principles concepts. This course is graded on an audit basis and carries no credit hours.  
ACC 101 is a corequisite for this class.

ACC 101  
INTRODUCTION TO ACCOUNTING I  
Undergraduate  
Introduction to Accounting I provides an introduction to financial accounting as the means of recording, storing and summarizing economic events of the business enterprise to meet external reporting needs. Emphasis is placed on the preparation and analysis of financial statements and other financial reports to the public based on the accounting equation, accrual accounting concepts, and data gathering techniques. Topics include corporate accounting for current and long term assets and current liabilities, and the corporate income statement. ACC 100 is a mandatory lab component of ACC 101, except for Summer and Accountancy Honors sections.  
MAT 130 is a prerequisite for this class.

ACC 102  
INTRODUCTION TO ACCOUNTING II  
Undergraduate  
Introduction to Accounting II, a companion and sequel course to Accounting 101, continues to explore basic accounting fundamentals and concepts. The course provides an introduction to managerial accounting and internal reporting. Topics include financial accounting for long-term liabilities, the components of stockholders equity, the statement of cash flows, financial statement analysis, budgeting and variance analysis, job costing for the service sector and cost analysis for decision-making.  
ACC 101 is a prerequisite for this class.

ACC 250  
CAREER MANAGEMENT FOR ACCOUNTANTS  
Undergraduate  
This course is designed to explore and manage the professional expectations and career potential of an accountancy major. Students will participate in hands-on resume building activities, practice interviews and apply research and evaluation skills to execute job search and career management strategies. Students will learn about Career Center resources and internship opportunities as ways to prepare for successful job searches and to maximize their potential for long term professional growth.  
ACC 102 is a prerequisite for this class.

ACC 303  
MANAGERIAL ACCOUNTING  
Undergraduate  
Managerial Accounting provides a thorough grounding in manufacturing accounting, cost allocation techniques, and the evaluation of management control systems. Students will examine manufacturing cost systems including job order costing, process costing, and activity-based costing. Tools for management control systems will be covered to enable the student to evaluate and compare various systems.  
ACC 102 is a prerequisite for this class.

ACC 304  
FINANCIAL REPORTING I  
Undergraduate  
Financial Reporting I includes a study of U.S. and international accounting standards, the concepts of accounting and basic financial statements. Accounting for cash, receivables, inventories, depreciable assets and current liabilities will also be examined.  
ACC 102 is a prerequisite for this class.
ACC 305
FINANCIAL REPORTING II
Undergraduate
Financial Reporting II focuses on researching accounting issues, revenue recognition and financial statement analysis. The course also provides an understanding of complex issues such as accounting for investments, long term liabilities, derivatives, contributed capital, retained earnings and earnings per share.

(ACC 304 or ACC 307) and MIS 140 are prerequisites for this class.

ACC 306
FINANCIAL REPORTING III
Undergraduate
The third course in the financial accounting sequence, this course studies deferred taxes, pensions and other post-retirement benefits, leases, accounting changes and error analysis, statement of cashflows (advanced), and full disclosure, if time permits. Selected spreadsheet applications will be introduced through homework assignments.

ACC 305 or ACC 309 is a prerequisite for this class.

ACC 307
FINANCIAL REPORTING I FOR FINANCE HONORS STUDENTS
Undergraduate
Financial Reporting I includes a study of U.S. and international accounting standards, the concepts of accounting and basic financial statements. Accounting for cash, receivables, inventories, depreciable assets and investments will also be examined. This course takes a user of financial statements, rather than a preparer of financial statements, point of view.

ACC 101, ACC 102 and status as a Finance Honors student are a prerequisite for this class.

ACC 308
ADVANCED FINANCIAL ACCOUNTING
Undergraduate
Advanced Financial Accounting focuses on accounting for multi-corporate entities and acquisitions, accounting for state and local governments, accounting for non-profit organizations, foreign operations, partnership accounting, and segment reporting. Selected spreadsheet applications will be introduced through homework assignments.

ACC 305 or ACC 309 is a prerequisite for this class.

ACC 309
FINANCIAL REPORTING II FOR FINANCE HONORS STUDENTS
Undergraduate
Financial Reporting II focuses on researching accounting issues, revenue recognition and financial statement analysis. The course also provides an understanding of complex issues such as accounting for investments, long term liabilities, derivatives, contributed capital, retained earnings and earnings per share.

ACC 307 and status as a Finance Honors student are a prerequisite for this class.

ACC 350
INFORMATION FOR DECISION MAKING
Undergraduate
Information for Decision-Making is typically the final course in the curriculum in Accountancy. It is the course in the program that most emphasizes research using the FASB Accounting Standards Codification and documenting research results. There is also a focus on written and oral communication as well as teamwork. More specifically, the course addresses the standard setting process in financial accounting as well as the role that the Securities and Exchange Commission fills in that process. In addition, current financial accounting topics are covered including revenue recognition, fair value measurement and disclosures, and earnings quality. The course also provides an introduction to International Financial Reporting Standards.

(ACC 305 or ACC 309) and ACC 380 are a prerequisite for this class.
ACC 364  
**CPA REVIEW: REGULATION**  
Continuing Education  
This section reviews knowledge of federal taxation, ethics, professional and legal responsibilities, and business law, and the skills needed to apply that knowledge in preparation for the Illinois CPA Examination. This course will also review the application process, tips for exam preparation, and a database simulation. This course is not degree applicable.

ACC 365  
**CPA REVIEW: AUDIT/ATTESTATION**  
Continuing Education  
This course reviews knowledge of International Standards on Auditing (ISAs), U.S. generally accepted auditing standards (GAAS), PCAOB standards, and other standards related to attest and non-attest engagements, and standards relating to professional responsibilities issued by various bodies. This course will also review the application process, tips for exam preparation, and a database simulation. This course is not degree applicable.

ACC 366  
**CPA REVIEW: FINANCIAL ACCOUNTING AND REPORTING**  
Continuing Education  
This course reviews knowledge of International Financial Reporting Standards (IFRS) and U.S. generally accepted accounting principles (GAAP) for business enterprises, not-for-profit organizations, and governmental entities. This course will also review the application process, tips for exam preparation, and a database simulation. This course is not degree applicable.

ACC 367  
**CPA REVIEW: BUSINESS ENVIRONMENT AND CONCEPTS**  
Continuing Education  
This section reviews knowledge of the general business environment and business concepts that candidates need to know in order to understand the underlying business reasons for and accounting implications of business transactions, and the skills needed to apply that knowledge in preparation for the Illinois CPA Examination. This course will also review the application process, tips for exam preparation, and a database simulation. This course is not degree applicable.

ACC 370  
**PROFESSIONAL RESPONSIBILITIES & BUSINESS LAW**  
Undergraduate  
This course covers the aspects of the legal environment of special concern to accounting practitioners, including: the ethical standards of accounting practice, legal liability of accountants, contract law, property law, tort law, commercial paper, the laws of agency, sales laws, banking, agency, partnerships, corporations, trusts and wills, suretyships, secured transactions, bankruptcy, employment law, securities regulation, antitrust, and public regulation and disclosure laws.  
ACC 102 is a prerequisite for this class.

ACC 372  
**AUDITING I**  
Undergraduate  
Auditing I provides a conceptual introduction to the nature and value of assurance services. The course examines the organization of the accounting profession, Generally Accepted Auditing Standards (GAAS), professional ethics, and legal responsibilities including U.S. Securities laws. It focuses on financial audits by external auditors, including planning and acceptance, internal control, evidence, and reporting.  
ACC 305 or ACC 309 is a prerequisite for this class.

ACC 374  
**AUDITING II**  
Undergraduate  
Auditing II, a companion and sequel to ACC 372, emphasizes the implementation and application of generally accepted auditing standards to transaction cycles and classes of transactions. It includes the study of sampling techniques used in tests of controls and tests of details, internal control in computer-based systems.  
ACC 372 is a prerequisite for this class.
ACC 375  
FRAUD EXAMINATION & FORENSIC AUDITING  
Undergraduate
This course covers various aspects of fraud prevention and detection, including elements of fraud, costs of fraud, use of controls to prevent fraud, and methods of fraud detection. Guest speakers with expertise in fraud examination/forensic auditing will share their knowledge and experiences with the class.
ACC 304 or ACC 307 is a prerequisite for this class.

ACC 376  
INTERNAL AUDITING  
Undergraduate
This course covers a risk-based, process and controls-focused internal audit approach. Topics include internal audit standards, internal control, corporate governance, risk assessment, evidence and documentation, fraud risks and auditing techniques including sampling and the use of systems-based audit techniques. Professional ethics, emerging issues are discussed.
ACC 102 is a prerequisite for this class.

ACC 380  
TAX TREATMENT OF INDIVIDUALS AND PROPERTY  
Undergraduate
Tax Treatment of Individuals and Property covers the basic provisions of the Internal Revenue Code as they relate to the taxation of individuals. It focuses on concepts of gross income, exclusions, deductions, exemptions, and credits, as well as property transactions. It also includes tax research.
ACC 304 or ACC 307 is a prerequisite for this class.

ACC 383  
TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS  
Undergraduate
Tax Treatment of Corporations and Partnerships is a continuation of Accounting 380. The course covers the tax aspects of corporations and partnerships, including formation, operations, and distributions, as well as specially taxed corporations, ethics in tax practice, and an introduction to estate and gift taxation.
ACC 380 is a prerequisite for this class.

ACC 393  
INTERNSHIP IN ACCOUNTANCY  
Undergraduate
This course is designed for students who already have or will soon have a position in an accounting or accounting-related field. Internship in Accountancy provides students with academically supervised work experiences, improving linkages between classroom efforts and the business world. Students obtain valuable professional experience and begin the process of networking with area businesses and professionals.
ACC 102 is a prerequisite for this class.

ACC 398  
SPECIAL TOPICS  
Undergraduate
Special Topics courses provide in-depth study of current issues in accountancy. Content and format of this course is variable. Subject matter will be indicated in class schedule.

ACC 399  
INDEPENDENT STUDY  
Undergraduate
Independent Study is available to students of demonstrated capability for intensive independent work in accountancy.
ACC 500
FINANCIAL ACCOUNTING
Graduate
This introduction to financial accounting provides both a theoretical foundation and an opportunity to apply accounting logic in increasingly complex situations. The accounting model and information processing cycle are developed. The content of the income statement, balance sheet, and statement of cash flows are studied in detail and analyzed.

MS in Taxation and MACC students are restricted from registering for this class.

ACC 505
LANGUAGE AND BUSINESS CULTURE
Graduate
The objective of this course is to develop an understanding of how to be successful in the U.S., both academically and professionally. The course covers the concepts, methods and tools necessary to face the challenges of studying and working in the U.S. Students will improve their skills in oral communication, practical business writing, and delivering presentations. Students will also gain knowledge of the career search process. Recommended to be taken concurrently with ACC 500. Prerequisite: Approval of college office or department.

ACC 535
ACCOUNTING INFORMATION SYSTEMS
Graduate
Today's business person requires a fundamental knowledge of computer-based information systems and their role in accounting functions and financial decision-making. This course will enable the student to interface with accounting systems, and to participate in their design and audit. It will focus on the nature and flows of accounting information in organizations, security and internal controls and the use of information technology in accounting information systems and decision-making.

ACC 500 is a prerequisite for this course.

ACC 541
FINANCIAL ACCOUNTING THEORY & PRACTICE I
Graduate
Intermediate theory and preparation of financial statements; review of accounting concepts and development of accounting models; methods and problems in valuation and reporting; with emphasis on current assets and liabilities, property, plant and equipment, and intangibles, review of relevant authoritative literature.

ACC 500 is a prerequisite for this class. This class is not available for MACC students.

ACC 542
COST AND MANAGERIAL ACCOUNTING
Graduate
Introduction to cost and managerial concepts and techniques. Topics include cost accumulation (job, process, standard costing, and activity-based costing), cost behavior, breakeven analysis, budgeting, contribution approach to income measurement, joint and by-product costing, cost allocation methods, and their relevance for decision-making.

ACC 500 is a prerequisite for this class. This class is not available for MACC students.

ACC 543
FINANCIAL ACCOUNTING THEORY & PRACTICE II
Graduate
Continuation of intermediate theory and financial statement preparation with emphasis on the components of stockholder's equity; special problems such as earnings per share, accounting changes, income taxes, derivatives, and statement of cash flows; review of relevant authoritative literature and interpretation of financial statements.

ACC 541 is a prerequisite for this class.
ACC 545  
ADVANCED TOPICS IN ACCOUNTING THEORY  
Graduate  
This course is designed to provide comprehensive coverage of the following: consolidations, partnership accounting, foreign operations and not-for-profit accounting. Coverage of the topics emphasizes both theory and practice. Mastery of the material is obtained through problem-solving situations.

ACC 543 is a prerequisite for this class.

ACC 547  
AUDIT AND REGULATION OF CORPORATE FINANCIAL REPORTING  
Graduate  
This course covers the theory of the auditing function. Topics covered include generally accepted auditing standards; the profession's ethical and legal dimensions; audit planning; the internal control structure; audit evidence; and auditor's reports. The development of the professional judgment needed to apply generally accepted auditing standards is emphasized.

ACC 500, or equivalent, is a prerequisite for this course

ACC 548  
TAX TREATMENT OF INDIVIDUALS AND PROPERTY TRANSACTIONS  
Graduate  
This course provides detailed coverage of the federal income tax treatment of individual taxpayers. It includes coverage of inclusions, exclusions, deductions, credits, rates of taxation, special tax computations and the tax aspects of property transactions. It also includes tax research.

ACC 541 is a prerequisite for this class.

ACC 550  
ADVANCED TOPICS IN AUDITING  
Graduate  
Advanced Topics in Auditing, a companion and sequel to Accounting 547, emphasizes the implementation and application of generally accepted auditing standards to transaction cycles and classes of transactions. It includes the study of sampling techniques used in tests of controls and tests of details, internal control in computer-based systems, and introduces the use of Computer Assisted Audit Tools and Techniques. The role of internal auditors is also covered.

ACC 547 is a prerequisite for this class.

ACC 551  
TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS  
Graduate  
This course covers the federal income tax treatment of corporations and partnerships. It includes ethics in tax practice and an exposure to estate and gift taxation.

ACC 548 is a prerequisite for this class.

ACC 552  
PROFESSIONAL RESPONSIBILITIES AND BUSINESS LAW  
Graduate  
This course covers the aspects of the legal environment of special concern to accounting practitioners, including: the ethical standards of accounting practice, legal liability of accountants, contract law, property law, tort law, commercial paper, the laws of agency, sales laws, banking, agency, partnerships, corporations, trusts and wills, suretyships, secured transactions, bankruptcy, employment law, securities regulation, antitrust, and public regulation and disclosure laws. Formerly "Legal and Ethical Environment of Accounting Practice".  

Not Available to MST Students
ACC 554
MANAGEMENT ACCOUNTING AND CONTROL
Graduate
This course provides students with a conceptual understanding of basic cost management and managerial accounting knowledge and skills. Topics include cost behavior, cost-volume-profit analysis, cost accounting systems, budgeting and control, responsibility accounting, the basics of strategic performance measurement systems and analyzing performance. Emphasis is on the interpretation & use of accounting information rather than its creation & accumulation.

ACC 500 is a prerequisite for this class. This class is not available for MACC students.

ACC 555
MANAGEMENT ACCOUNTING FOR DECISION-MAKING
Graduate
This course addresses the financial, nonfinancial & ethical dimensions of decision-making. It provides students with a conceptual understanding of cost management and managerial accounting skills. Topics include cost behavior, cost-volume-profit analysis, cost systems, budgeting and control and decision-making. Emphasis is on the interpretation & use of accounting information rather than its creation & accumulation.

ACC 500 is a prerequisite for this class. This class is not available for MACC students.

ACC 557
GLOBAL STRATEGIC FINANCIAL ANALYSIS
Graduate
This course concentrates on each student's own career goals by focusing on cases of well-known financial successes and failures in the global business world. It enables students to become intelligent users (readers) of financial reporting in a global environment. Students will learn to identify key relationships in the statements to strategy of high performance companies and to make critical judgments underlying the elements and valuations in the financial statements. Students will study integrated reporting, corporate governance, and sustainability accounting. The course is a useful elective for MSA, MACC and MBA programs.

ACC 500, or equivalent, is a prerequisite for this course

ACC 558
TAX RESEARCH
Graduate
Tax research methods are taught in the classroom. The course begins with a study of the history of the body of tax law. A 'walk through' technique is employed to give the student firsthand experience in the use of a tax research service.

ACC 559
TOPICS IN INDIVIDUAL AND CORPORATE TAXATION
Graduate
This course deals with a variety of topics which are important in tax practice, such as alternative minimum tax, passive losses, interest limitations, the at-risk rules, hobby losses, use of a home, net operating losses. Depreciation and capital recovery including related credits, unearned income of a minor child, uniform capitalization rules and time value of money concepts are also covered. NOTE: This is a M.S.T. course.

ACC 551 is a prerequisite for this class.

ACC 560
TAXATION OF CORPORATIONS AND SHAREHOLDERS
Graduate
Emphasis is on the federal income taxation of distributions to corporate shareholders, including nonliquidating distributions and distributions in connection with liquidations. Collapsible corporations and the tax consequences of transfers of property to a corporation are also covered. NOTE: This is a M.S.T. course.

ACC 558 is a prerequisite for this class.
ACC 561  
CORPORATE REORGANIZATIONS  
Graduate  
Federal income tax implications of transfers of stock, securities and property in connection with corporate acquisitions, combinations and separations. This course is mainly concerned with the tax consequences to corporate parties, to reorganizations and to their shareholders. Emphasis is given to determining the taxability of transactions and asserting the availability of tax attributes to successors in interest. NOTE: This is a M.S.T. course.

ACC 558 and ACC 560 are prerequisites for this class.

ACC 562  
CONSOLIDATED RETURNS  
Graduate  
This course deals with the principles and mechanics of tax consolidations including eligibility, intercompany transactions, inventory adjustments, basis of property, net operating losses, earnings and profits and separate return limitations. NOTE: This is a M.S.T. course.

ACC 560 is a prerequisite for this class.

ACC 563  
PARTNERSHIPS  
Graduate  
An in-depth analysis of the federal income tax rules governing partners and partnerships. This course includes study of the aggregate and entity theories, partnership distributions and liquidations, dispositions of partnership interests, transactions concerning unrealized receivables and substantially appreciated inventory items and special basis adjustments. NOTE: This is a M.S. T. course.

ACC 551 and ACC 558 are prerequisites for this class.

ACC 564  
transactions in property  
Graduate  
This course is concerned mainly with the federal income tax implications of gains and losses derived from sales and other dispossession of property. Emphasis will be given to the determination and recognition of gain or loss, character of gain or loss (capital or ordinary), basis and holding period. NOTE: This is a M.S.T. course.

ACC 551 and ACC 558 are prerequisites for this class.

ACC 565  
TAX ACCOUNTING, PERIODS, AND METHODS  
Graduate  
This course deals with federal income tax planning as to determination of the proper periods for reporting income and deductions, overall methods of tax accounting and special elections available to taxpayers. Topics include the installment method, accounting method changes, accrual method, cash method, FIFO, LIFO and accounting periods. NOTE: This is a M.S.T. course.

ACC 551 is a prerequisite for this class.

ACC 566  
FEDERAL INCOME TAX PROCEDURES  
Graduate  
A study of the procedures which must be followed when dealing with the Internal Revenue Service and possible alternative courses of action. Included are such topics as the organization of the Internal Revenue Service, filing requirements, refund claims, closing agreements, examination procedures, protests, assessment, payment and collection of tax, statute of limitations, interest and penalties. NOTE: This is a M.S.T. course.

ACC 551 is a prerequisite for this class.
ACC 567
INTERNATIONAL ASPECTS OF U.S. TAXATION
Graduate
This course covers the federal income taxation of United States persons investing or doing business outside the United States and nonresident aliens and foreign corporations having nexus with the United States. Topics covered include, among others, the foreign tax credit, Subpart F income, controlled foreign corporations, sourcing rules and expatriate taxation. NOTE: This is a M.S.T. course.
ACC 551 and ACC 558 are prerequisites for this class.

ACC 568
TAXATION OF CLOSELY HELD CORPORATIONS
Graduate
This course deals with federal income tax planning in connection with the accumulated earnings tax, personal holding companies, S corporations, multiple corporations, transactions between related parties and small business corporation stock. NOTE: This is a M.S.T. course.
ACC 558 is a prerequisite for this class.

ACC 569
CONCEPTS OF DEFERRED COMPENSATION
Graduate
The nature, purpose and operation of the various forms of deferred compensation are examined and evaluated: employee pension; profit sharing and stock bonus plans, stock options; executive compensation plans; retirement plans for self-employed individuals; other plans. NOTE: This is a M.S.T. course.
ACC 551 and ACC 558 are prerequisites for this class.

ACC 570
STATE AND LOCAL INCOME AND FRANCHISE TAXATION
Graduate
This course identifies and examines the types of income and capital stock taxes imposed on corporations and pass-through entities by state governments. Topics include nexus and the impact of P.L. 86-272, conformity to the Internal Revenue Code, business and nonbusiness income, methods of reporting, and allocation and apportionment. NOTE: This is a M.S.T. course.
ACC 551 and ACC 558 are prerequisites for this class.

ACC 571
ESTATE AND GIFT TAXATION
Graduate
This course consists of a detailed review of the federal estate and gift tax laws. In the area of estate taxation, assets included and deductions allowed are reviewed in detail by reference to law, regulations and cases. Recognition of gifts and gift tax deductions and exclusions are also covered. NOTE: This is a M.S.T. course.
ACC 551 and ACC 558 are prerequisites for this class.

ACC 572
CONCEPTS OF STATE PROPERTY AND TRANSACTION TAXATION
Graduate
This course focuses on concepts of property and sales taxation, but will survey other state and local transaction taxes, including excise taxes, utility taxes, fuel taxes and escheat statutes. Property tax concepts include distinctions between real and personal property and valuation approaches. NOTE: This is a M.S.T. course.
ACC 558 is a prerequisite for this class.
ACC 573
INCOME TAXATION OF ESTATES, TRUSTS AND DECEDENTS
Graduate
This course deals with federal income taxation of estates, trusts and decedents with special emphasis on such concepts as income in respect of a decedent and estate and trust distributions. Also, included are such topics as the income and deductions included in the decedent's final return, death of a partnership member, the income and deductions of estate and trusts, the throwback rule, grantor trusts and the tax ramifications of the use of other special trusts. NOTE: This is a M.S.T. course.
ACC 548 and ACC 571 are prerequisites for this class.

ACC 574
ESTATE PLANNING
Graduate
This course will deal primarily with how to avoid and minimize federal estate taxes and estate administration expenses upon the subsequent demise of the client. Therefore, the student must have taken the estate and gift taxation, the use of outright gifts, the use of trusts. Generation skipping transfers and charitable gifts will also be considered. NOTE: This is a M.S.T. course.
ACC 571 is a prerequisite for this class.

ACC 576
FEDERAL TAX VALUATION
Graduate
Fair market value is referenced hundreds of times in the Internal Revenue Code, and many more times in the Regulations. In the initial part of this course the procedures and methods applicable to tax valuation are reviewed to heighten practitioner awareness of the range of potential valuation outcomes, and the reasons therefore. Tax cases are used extensively to achieve this objective. In the second part of the course presentations and discussions address more specific topics such as built-in gains, determination of carryover of net operating losses, valuation aspects of charitable giving, conservation easements, ESOPs, family limited partnerships, reasonable compensation. S-corporations, special use properties, and transfer pricing.

ACC 580
ACCOUNTING FOR INCOME TAXES
Graduate
Covers the financial accounting and reporting standards for the effects of income taxes that result from corporate activities. Topics include computation of current and deferred tax expense or benefit, temporary differences, carry-forwards, computation of deferred tax assets and liabilities, valuation allowances, business combinations, investments in subsidiaries and equity method investments, tax allocations, presentation and disclosure, and implementation of accounting for uncertainty in income taxes under FIN 48.
ACC 551 or admission to the MST or MACC programs are prerequisites for this course.

ACC 581
TAXATION OF REAL ESTATE
Graduate
An in-depth study of federal income taxation as it relates to real estate, including current issues and planning possibilities. Topics include consequences of acquisition and disposition, real estate development, leasing, mortgages and other financing devices and forms of ownership of real estate. NOTE: This is a M.S.T. course.
ACC 563 is a prerequisite for this class.

ACC 582
ADVANCED CONCEPTS IN INTERNATIONAL TAXATION
Graduate
This advanced course is a companion offering to the introductory international taxation course (Accountancy 567). In this course, planning issues and tax savings opportunities are emphasized in complex areas, including source of income considerations, foreign tax credit matters, Subpart F issues and the tax matters of foreign corporations. In addition, tax treaty matters, international bribes and boycott sanctions and foreign currency translation issues are addressed. NOTE: This is a M.S.T. course.
ACC 567 is a prerequisite for this class.
ACC 584  
INCOME TAX AND BUSINESS DECISIONS  
Graduate  
The study of the impact of federal income taxation on business decisions with emphasis on such areas as choice of business organization, acquisition planning, executive compensation & accounting for income taxes. This course is intended for students in the M.B.A. program and restricted to those who have not had undergraduate credit for ACC 548 or ACC 551 or their equivalents. (MSA students may not take this class)  
Not Available to MST Students  

ACC 591  
TAX EXEMPT ORGANIZATIONS  
Graduate  
Tax treatment of public charities and private foundations. The way exempt status is secured and retained, qualified exemptions, unrelated business income, the loss of exemption, prohibited transactions, deductibility of contributions and required reporting and auditing.  
ACC 558 is a prerequisite for this class.  

ACC 592  
OVERVIEW OF FEDERAL INCOME TAX FOR INDIVIDUALS  
Graduate  
This course introduces students to an overview of the Federal income tax system from a financial planning perspective. This course covers a review of the inclusions and exclusions from gross income, deductions therefrom in arriving at taxable income, and the characterization of transactions as capital or ordinary. The course will focus primarily on the taxation on individuals, with an emphasis on the impact of investments in the financial planning process.  
ACC 500 or status as an MS in Accountancy or MS in Taxation student is a prerequisite for this class.  

ACC 593  
OVERVIEW OF TRANSFER PLANNING FOR WEALTH MANAGEMENT  
Graduate  
This course introduces students to an overview of the transfer tax system from a financial planning perspective. The course will be divided into four areas of concentration: (1) transfer tax, (2) property law, (3) estate planning, and (4) insurance, charitable and retirement topics. The objective of the course is to analyze how each of the above areas of concentration impact the financial planning process.  
ACC 500 is a prerequisite for this course.  

ACC 594  
MULTIGENERATIONAL ADVANCED PLANNING STRUCTURES  
Graduate  
This course will involve a survey of the planning and structuring issues that high net worth families address when managing wealth for multiple generations. The course will be facilitated by one or two instructors who will direct eight different expert guest lecturers in the wealth management field. The topics include: introduction and review of federal wealth transfer tax concepts; generation-skipping transfer tax and structuring dynastic entities; charitable gifts and foundations utilized in large families; management and dispositions of family business and closely held entities; asset protection planning: domestic and international; international estate planning: offshore trusts and entities; creating and administering a family office; family governance, wealth education and private trust companies.  
ACC 592 and ACC 593 are prerequisites for this class.  

ACC 598  
SEMINAR ON CURRENT PROBLEMS IN TAXATION  
Graduate  
Covers recent significant developments in the future of legislation, regulations, administrative rulings and case law on federal income, estate and gift taxation. Emphasis is placed on specific tax planning in light of these current developments. Topics are discussed against background of leading Supreme Court cases. Recommended as final tax course in M.S.T. program. Required course for all candidates for Master of Science in Taxation degree.  
ACC 558, ACC 560, ACC 565 and ACC 566 are prerequisites for this class.
ACC 635  
PRINCIPLES OF FORENSIC ACCOUNTING 
Graduate  
This course will focus on fraud principles that relate to asset misappropriations, corruption and fraudulent financial statements. Emphasis will be on examination and review of major fraud schemes, investigative strategies and controls used to detect and prevent the impact fraud has on an organization.

ACC 636  
INTERNAL AUDITING, CORPORATE GOVERNANCE AND INTERNAL CONTROL  
Graduate  
This course addresses the overall role that internal audit plays as a critical part of an organization's control and governance structure. The content of the course includes a case that incorporates the complete internal audit process for a hypothetical company, including identification of risk, planning, execution of fieldwork and reporting using CCH TeamMate software. This course covers the strategic role and operations of an internal audit function from three key perspectives; the Chief Audit Executive, who is responsible for the functions, the chair of the audit committee, who oversees the function, and the CEO or CFO who is responsible for the function within the organization.  (Formerly ACC 536)

ACC 500 is a prerequisite for this course

ACC 637  
DATA MINING AND ANALYTICS  
Graduate  
The course will cover basic concepts, terminology, models and methods in the field of data mining. The auditing profession seeks to move toward CAATs, continuous auditing and continuous monitoring, which cover all or a large population of transactions rather than very limited sample sizes. The skills taught include data mining techniques such as traditional statistical analysis and machine learning. This course will illustrate the knowledge discovery process and how the technology works with sample applications of data mining. Students will analyze large datasets and develop modeling solutions to support decision making in accounting.

ACC 500 is a prerequisite for this course

ACC 638  
IT AUDITING  
Graduate  
This course prepares students to understand the sources of these risks and conduct IT audits by examining the key principles behind the auditing of IT processes, with a focus on gaining hands-on experience on analyzing and assessing IT risks and controls. The effective management of Information Technology (IT) assets in order to meet business objectives and of IT-related business risks is of critical importance to organizations today. The application of the COBIT framework and other professional IT audit standards is emphasized. In addition, this course aids in the preparation for the Certified Information Systems Auditor (CISA) exam.

ACC 500 is a prerequisite for this course

ACC 639  
ACCOUNTING INFORMATION SYSTEMS AND AUDITING  
Graduate  
This course builds on foundational knowledge of accounting information systems and internal auditing in order to develop advanced skills in these fields. In particular, heavy emphasis is placed on the use of hands-on projects and assignments that involve the learning and application of technologies and approaches similar to those used in professional practice. The course also introduces students to advanced and current topics at the intersection of accounting information systems and internal auditing.

ACC 535 is a prerequisite for this course.

ACC 640  
ACCOUNTING THEORY AND POLICY FORMULATION  
Graduate  
A study of the process by which accounting policies are formulated. The students are asked to make critical evaluations of basic issues such as income determination and current issues such as FASB agenda items in light of their theoretical, empirical, practical and political aspects. Students are expected to demonstrate an ability to use the accounting research literature. Students should plan to take this capstone course at the end of their degree program. This course is intended to be taken toward the end of the MSA program.

ACC 545 and ACC 550, or MACC status are prerequisites for this class.
ACC 645
FORENSIC AND INVESTIGATIVE ACCOUNTING
Graduate
This course focuses on skills used to detect and investigate accounting-based fraud. The course covers interpersonal skills such as interviewing, reading people, handwriting analysis, discourse analysis and team building. It also includes technical skills such as recognizing the red flags of fraud in context, net worth analysis, and how the elements of fraud combine in an actual fraud. The course is delivered using hands-on experience in a case-based setting.

ACC 646
FORENSIC ACCOUNTING AND VALUATION
Graduate
This course focuses on financial statement fraud. Skills taught in this course include using financial statement analysis to detect fraud in financial statements, and valuation skills that can be used to value both public and private firms in cases of shareholder and partnership disputes, divorce cases etc. Finally, students are given a chance to use their skills to detect and investigate fraud within a company's financial statements.

ACC 500 is a prerequisite for this course

ACC 690
GRADUATE INTERNSHIP
Graduate
Technical knowledge acquired in the classroom is applied in an actual business environment through varied assignments under supervision in industry, government or public accounting. Offered variably.

ACC 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. An in-depth study of current issues in accountancy. Subject matter will be indicated in class schedule. Offered variably.

ACC 799
INDEPENDENT STUDY
Graduate
Available for graduate students of demonstrated capability for intensive independent work in accountancy.

AHT 310
DIAGNOSTIC NUCLEAR IMAGING CLINICAL PRACTICUM I
Undergraduate
Supervised clinical education that gives the student the opportunity to perform a variety of patient procedures on both SPECT, SPECT/CT, PET and PET/CT imaging systems for all diagnostic, therapeutic, non-imaging in-vivo and in-vitro procedures. Clinical competencies developed in patient care, positioning techniques, analyzing images, and the selection of imaging parameters and collimators. Knowledge of integrated computer systems designed for use with clinical gamma cameras, Single Photon Emission Computed Tomography (SPECT), SPECT/CT, Positron Emission Tomography (PET), and PET/CT images. The clinical practicum is designed to promote independent critical thinking, balanced responsibility, organization and accountability in the student. Students will demonstrate competence in all procedures presented.

AHT 311
DIAGNOSTIC NUCLEAR IMAGING CLINICAL PRACTICUM II
Undergraduate
Supervised clinical education that gives the student the opportunity to perform a variety of patient procedures on both SPECT, SPECT/CT, PET and PET/CT imaging systems for all diagnostic, therapeutic, non-imaging in-vivo and in-vitro procedures. Clinical competencies developed in patient care, positioning techniques, analyzing images, and the selection of imaging parameters and collimators. Knowledge of integrated computer systems designed for use with clinical gamma cameras, Single Photon Emission Computed Tomography (SPECT), SPECT/CT, Positron Emission Tomography (PET), and PET/CT images. The clinical practicum is designed to promote independent critical thinking, balanced responsibility, organization and accountability in the student. Students will demonstrate competence in all procedures presented.
AHT 312
CLINICAL NUCLEAR MEDICINE PROCEDURES I
Undergraduate
Emphasis on theory and techniques of clinical procedures used in nuclear medicine imaging. Areas emphasized include patient care, developing acquisition parameters, imaging techniques, radionuclide identification, energies, half-lives, and principles of radionuclides in imaging and non-imaging procedures. Students will continue to develop an increased degree of competence in their performance of the skills related to critical thinking and problem solving.

AHT 313
CLINICAL NUCLEAR MEDICINE PROCEDURES II
Undergraduate
Emphasis on theory and techniques of clinical procedures used in nuclear medicine imaging. Areas emphasized include patient care, developing acquisition parameters, imaging techniques, radionuclide identification, energies, half-lives, and principles of radionuclides in imaging and non-imaging procedures. Students will continue to develop an increased degree of competence in their performance of the skills related to critical thinking and problem solving.

AHT 314
MANAGEMENT AND METHODS OF PATIENT CARE I
Undergraduate
Skills in problem solving, critical-thinking, and decision-making are developed as well as oral and written communication skills. Career skills are enhanced through the interview process, resume writing, and administrative duties including; budgeting, medical and legal considerations and political issues affecting health care. Special emphasis is placed on research methods, medical law and ethics, and scheduling guidelines. Focus on basic measures necessary to provide quality patient care. Basic principles of record keeping and maintaining confidentiality of information are explained.

AHT 315
MANAGEMENT AND METHODS OF PATIENT CARE II
Undergraduate
Skills in problem solving, critical-thinking, and decision-making are developed as well as oral and written communication skills. Career skills are enhanced through the interview process, resume writing, and administrative duties including budgeting, medical and legal considerations and political issues affecting health care. Special emphasis is placed on research methods, medical law and ethics, and scheduling guidelines. Focus on basic measures necessary to provide quality patient care. Basic principles of record keeping and maintaining confidentiality of information are explained.

AHT 316
RADIATION BIOLOGY
Undergraduate
Knowledge of cell structure and function as a basis for understanding cellular and organ responses to the effects of ionizing radiation, radionuclides and radiation oncology. Understanding units of exposure, organ dose calculation and body distribution.

AHT 317
MEDICAL TERMINOLOGY
Undergraduate
The medical terminology course consists of a study of root words, prefixes, and suffixes of medical vocabulary. Also included are medical abbreviations and applicable symbols. A combination of learning exercises and chapter quizzes are utilized. Emphasis is on application of terminology through the use of chapter objectives, learning exercises, and critical thinking exercises. As an independent study, students may choose to progress more rapidly than the assignment schedule outlines.

AHT 321
MANAGEMENT AND METHODS PATIENT CARE
Undergraduate
Content is designed to provide the student with foundational concepts and competencies in assessment and evaluation of the patient for service delivery. Psychological and physical needs and factors affecting treatment outcome will be presented and examined. Students will also get a better understanding of how race, gender, physical ability, sexual orientation, spirituality, healing and dying, and age play a role in cultural competence. Routine and emergency care procedures will be presented. Course will also include an orientation to hyperthermia, chemotherapy, body mechanics, nutrition for cancer patients, and an overview of radiation therapy patient side effects.
AHT 322
QUALITY MANAGEMENT
Undergraduate
Content is designed to focus on the evolution of quality management (QM) programs and continuing quality improvement in radiation oncology. Topics will include the need for quality assurance (QA) checks; QA of the clinical aspects and chart checks, film checks; the various types of evaluations and tests performed on simulators, megavoltage therapy equipment, and therapy planning units; the role of radiation therapists in quality management programs; legal and regulatory implications for maintaining appropriate guidelines; and the role computers and information systems serve within the radiation oncology department.

AHT 323
CLINICAL PRACTICUM I
Undergraduate
The overall objective of this course is to aid the student in achieving basic level technical skills through supervised practice of radiation therapy procedures on actual patients. Students will be required to complete some ARRT required clinical competency examinations during this course.

AHT 324
CLINICAL PRACTICUM II
Undergraduate
The overall objective of this course is to aid the student in achieving basic level technical skills through supervised practice of radiation therapy procedures on actual patients. This is a continuation of Clinical Practicum I. Students will be required to complete all remaining ARRT required clinical competency examinations during this course.

AHT 325
INTRODUCTION TO RADIOLOGIC SCIENCES
Undergraduate
This course provides the student therapist with the technical aspects of radiography equipment. Discussion will include orientation to the function and operation of radiography equipment.

AHT 326
RADIATION BIOLOGY
Undergraduate
This course introduces the student to the effects of ionizing radiation and chemotherapeutic agents on living tissue. Emphasis is placed on the concept of the therapeutic ratio and the manipulation of influencing factors in order to affect patient treatment outcomes.

AHT 327
RADIATION SAFETY AND PROTECTION
Undergraduate
The purpose of this course is to educate students regarding institutional, state and federal regulations controlling the safe use and disposal of radiation-producing equipment and sources. Emphasis is placed on ALARA principles to define the health professional's legal and ethical responsibility to minimize radiation dose to co-workers and patients, and oneself.

AHT 329
PATHOLOGY
Undergraduate
This course introduces the student to the field of pathology with an emphasis on the oncologic disease processes. Topics range from discussion of pathology from the cellular level through various organ systems. Students are introduced to terminology related to the field of pathology as a whole and to the subspecialty of oncology specifically.

AHT 330
RADIATION SAFETY AND PROTECTION
Undergraduate
Supervised practice and procedures for the receipt, handling, transporting, storage, usage, record keeping, disposal and decontamination of radioactive materials. Emphasis on licensing and regulations set forth by local, state and federal agencies. Academic and clinical instruction to provide the student with radiation safety techniques to minimize exposure to the patient, public, fellow workers and themselves. Regulations regarding therapeutic dosages and follow-up procedures. Focus on practical mathematics in nuclear medicine including radiation unit conversion, dose conversion, dose calculation, determination of specific activity, decay, and half-life calculation, counting efficiency, and statistics.
AHT 331
RADIATION DETECTION AND INSTRUMENTATION
Undergraduate
Evaluation, maintenance and function of instrumentation used in imaging and in the laboratory. Principles and theory of PET/CT and scintillation camera operation and performance. Radiation measurement, event counting activity, pulse height spectra, detection efficiency, resolving time and statistics. Flood field and bar phantom use for assessing camera uniformity, relative sensitivity, spatial linearity and resolution testing. Quality assurance procedures for the PET scanner include radial, tangential and axial resolution, sensitivity, linearity, uniformity, attenuation accuracy, scatter determination and dead time corrections. Knowledge of the operations and maintenance of computer hardware and software. Emphasis on data collection, analysis and processing used in clinical imaging. Application of computer devices and memory usage. Emphasis on SPECT, SPECT/CT, PET and PET/CT quality control procedures.

AHT 332
RADIATION PHYSICS AND INSTRUMENTATION
Undergraduate
Theory and physical principles associated with atomic structure, nuclear and quantum physics related to radioactive decay. Properties of the elements and the production of characteristic x and gamma rays, anger electrons and Bremsstrahlung. Instruction on the modes of decay, radiation dosimetry, and interaction of ionizing radiation with matter. Basic physics, instrumentation, and radiochemistry of SPECT (Single Photon Emission Computed Tomography), SPECT/CT, Positron Emission Tomography (PET), and PET/CT.

AHT 333
RADIONUCLIDE CHEMISTRY AND RADIOPHARMACY
Undergraduate
The chemical, physical and biological properties of radiopharmaceuticals used in diagnosis and therapy. Emphasis is given to the preparation, calculation, identification, administration, and disposal of radiopharmaceuticals. Performance of all radionuclide quality control and quality assurance procedures. Principles of decay and half-life, tissue localization, chemical impurities, generator systems, dose preparation and techniques of good laboratory practices and cell labeling.

AHT 334
CLINICAL CORRELATION - PATHOLOGY
Undergraduate
Focus on the study of the structure and function of human cells, tissues, organs and systems. Clinical interpretation of organ systems with emphasis on immunology, and anatomy and physiology, which will provide a basis for understanding abnormal or pathological conditions as applied to nuclear medicine. Causes, symptoms, and treatments of disease are discussed as well as their effect on the images. In addition, the student is scheduled to observe the interpretation of images with the physician staff.

AHT 335
COMPUTED TOMOGRAPHY AND CROSS-SECTIONAL ANATOMY
Undergraduate
Introduction to the fundamental concepts and principles of computed technology and its role in medical imaging. Specific topics include physics & instrumentation of CT scanning, image production, and cross-sectional anatomy of the head, neck, thorax, abdomen, and pelvis. Emphasis placed on patient considerations, patient safety, and radiation protection.

AHT 341
RADIATION PHYSICS I
Undergraduate
Students are introduced to the principles and practice of applying ionizing radiation to the human body. Topics include discussion of radiation therapy equipment, including treatment units and computer planning systems with an emphasis on how this equipment is used to produce proper treatment planning and dose calculations, according to the radiation oncologist's prescription. Topics also include fundamental concepts of general physics and radiation physics, including the production of x-rays interactions with matter.

AHT 342
RADIATION PHYSICS II
Undergraduate
Students are introduced to the principles and practice of applying ionizing radiation to the human body. Topics include discussion of radiation therapy equipment, including treatment units and computer planning systems with an emphasis on how this equipment is used to produce proper treatment planning and dose calculations, according to the radiation oncologist's prescription. Radiation protection and quality assurance will also be covered. This course is a continuation of Radiation Therapy Physics I.
AHT 343
MEDICAL IMAGING AND PROCESSING
Undergraduate
Procedure for imaging human structure and their relevance to radiation therapy; topographical anatomy, radiographic and cross sectional anatomy. Identification of anatomic structures as demonstrated through various imaging modalities.

AHT 344
OPERATION ISSUES IN RADIATION THERAPY
Undergraduate
Content is designed to focus on various allied health operational issues. Continuing Quality Improvement (CQI) project development, evaluation, and assessment techniques will be emphasized. Human resource issues and regulations impacting the radiation therapist will be examined. Accreditation agencies and the licensed practitioner's role in the accreditation process will be presented. Billing and reimbursement issues will be covered.

AHT 345
PRINCIPLES AND PRACTICE OF RADIATION THERAPY
Undergraduate
Content is designed to provide an overview of cancer and the speciality of radiation therapy. The medical, biological, and pathological aspect, as well as the physical and technical aspects, will be discussed. This course will also include content designed to provide the student with fundamental concepts, theories, and application of healthcare laws and ethical standards implemented and practiced in quality management for radiation therapy. Analysis of legal terminology, sources of law and the litigation process as applied to health professionals will be evaluated.

AHT 346
PRINCIPLE AND PRACTICE OF RADIATION THERAPY II
Undergraduate
This course is a continuation of principles and practice of radiation therapy I. Critical thinking and the basics of ethical and clinical decision making are fostered in the student. The epidemiology, etiology, detection, diagnosis, patient condition, treatment, and prognosis of neoplastic disease will be presented, discussed, and evaluated in the relationship to histology, anatomical site, and patterns of spread. The radiation therapist's responsibility in the management of neoplastic disease will be examined and linked to the skills required to analyze complex issues and make informed decisions while appreciating the character of the profession.

AHT 347
TECHNICAL RADIATION ONCOLOGY
Undergraduate
This course provides the student therapist with the technical aspects of radiation therapy. Discussion will include orientation to the function and operation of radiation therapy equipment. The clinical lab component of this course provides a hands-on, sequential application, and clinical integration of concepts and theories in the radiation therapy clinic and the didactic portion of this course. Concepts of team practice, patient-centered and clinical practice will also be discussed.

AHT 348
TECHNICAL RADIATION ONCOLOGY
Undergraduate
This course is designed to focus on discussions of various treatment and simulation procedures of different pathologies. The lab component will continue to provide a hands-on, sequential application, and clinical integration of concepts and theories in the radiation therapy clinic.

AI 102
CORPORATIONS, RESPONSIBILITY, AND THE HOLIDAYS
Undergraduate
American corporations often promote large scale relief efforts for their communities around the time of the December holidays. What motivates these efforts? Who benefits? Are corporations really responsible for the communities in which they do business? How can individuals participate in these efforts? In this course, students will examine contemporary theories of social ethics, and will apply them to the corporations we create, staff, and support. Students will also consider their individual roles in community relief efforts.
AI 103
LEADERSHIP AND APPLIED ETHICS
Undergraduate
This course explores a range of ethical issues that students will face in their ministries and the moral principles they can apply to those issues. It will examine the ethical responsibilities and challenges of good professional practice for those serving in ministry today. It will discuss ethical issues that arise in the leadership or management of congregations, communities and organizations. It will examine areas of social ethics that are particularly relevant to their African context. In this course, students will study the distinctive assumptions, methods and applications of different ethical systems drawn from traditions such as Christianity, Islam, and African traditional religion. Each student will design and complete an independent learning project for their Focus Area in which they will address an ethical issue they are likely to face in their future ministry. Through this course, therefore, students will develop and demonstrate their competence to analyze a problem using two different ethical systems and to apply the skills of ethical analysis to ministry.

AI 104
LEADERSHIP AND CREATIVITY
Undergraduate
Creative leaders recognize and express dimensions of the world and society that are often overlooked by others. They are able to respond effectively to new challenges and opportunities in their personal lives and in society. Artists, performers and creators have an essential vocation that enriches the whole community. In this course, students will expand their appreciation for the importance of creativity. They will look at how the arts provide a unique way to understand and interact with culture. They will study the arts in an African context. They will engage in creative activity or performance and reflect on these experiences. They will also explore ways in which they can be more creative in their lives and ministries. Through this course, therefore, students will develop and demonstrate their competence to define and analyze a creative process and to create an original work of art, explore its relationship to artistic form, and reflect on the creative process.

AI 105
VISUAL LITERACY AND CHICAGO’S MUSEUM OF CONTEMPORARY ART
Undergraduate
Have you ever been confused by the intentions of an artist or at a loss for words when trying to describe a work of art? How many times have you walked through a museum and while looking at a work of art said to yourself, “I could do that?” This course will introduce a series of skills ranging from simple identification to complex interpretation that will help us read both images and text and find meaning in a variety of contemporary art forms, from painting to sculpture, and photography to installation. The course will focus on the cultural, moral, and aesthetic value of art exhibited in Chicago’s Museum of Contemporary Art (MCA) present and past exhibitions. Art making activities will occur throughout the course to help us explore visual literacy through expressing thoughts and ideas in visual form. Throughout the course students will maintain a visual journal based upon some of the following activities: museum visits, classroom discussions, outside observations, and art making experiences. A culminating project will investigate a specific cultural, aesthetic, or moral topic that has been addressed by a contemporary artist.

AI 106
THE RESISTERS: LATINA QUEST FOR JUSTICE
Undergraduate
This course will introduce students to the issues of violence, oppression and abuse in the lives of U.S. Latinas, here after referred to as Latinas, and in Latin American women's lives with, for comparison purpose, consideration of the same issues as regards non-Latina women in the U.S. The course will look at the different types of violence, oppression and abuse these women experience as well as the factors that contribute to the situation, such as harmful traditions, discrimination, religion, politics, sexism and war. These factors will be reviewed and analyzed in order to have a better understanding of how they directly affect their lives and contribute to the violence, abuse and oppression they endure. Students will become familiar with the many ways of resistance expressed by Latinas and Latin American women. Because defiance has been demonstrated in various forms, students will therefore be introduced to Latina and Latin American female writers, journalists, artists and activist, who have resisted violence, abuse and oppression and, in their own way, have changed the culture that perpetrates the hostile behavior. Students will learn about women such as Guatemalan Noble Peace Prize winner Rigoberta Menchu, Mexican journalist Lydia Cacho, and Latina writers Gloria Anzaldua and Cheri Moraga, just to name a few. Students will be introduced to local resisters, as well. Students will also be encouraged to draw connections between their own experiences and that of the women about whom they will be studying. Finally, students will have an opportunity to compare and contrast methods of resistance that exists between these women and women in the U.S. who do not identify as Latinas.

AI 107
INTRODUCTION TO BUDDHIST MINDFULNESS MEDITATION
Undergraduate
In this course, you will be introduced to theories and practices of mindfulness meditation from the Buddhist tradition. We will explore in particular how mindfulness meditation can enhance creativity, address the ethical challenges of contemporary life, and foster collaborative learning. Class sessions will involve extensive practice in mindfulness meditation, listening and dialogue. You will be expected to maintain and reflect on a daily mindfulness meditation practice for the duration of the course. While the approach to mindfulness meditation we will use in this class is rooted in Buddhist philosophies of the mind, it does not require religious or spiritual interpretations.
AI 108
INTERNATIONAL RELATIONS: WEAPONS, WARS AND A WORLD IN TURMOIL
Undergraduate
Today, world politics is making an unpredictable turn and undergoing an historical transition. International relations in the 21st century are more complex and facing more pressing global challenges than the previous century. While the Western nations have enjoyed unparalleled prosperity in recent years, developing nations, mired in debt, burdened in poverty, riddled with diseases ranging from malaria to AIDS, plagued by wars and genocide, are struggling to overcome crisis. This course will examine the role of nation-states, international organizations like the United Nations, international law, international crimes court, treaties, and root causes and functions of war and peace in the making of foreign policies that have shaped and reshaped the relationships among nations. We will also focus on ethics in the context of a number of issues and practices in international relations ranging from global inequality, the promotion of human rights, foreign aid, immigration/forced deportation, humanitarian intervention, to terrorism, genocide, war crimes, and the use of torture. Bridge Course. Can be taken for up to 3 competences.

AI 109
THROUGH THE LOOKING GLASS: ADDRESSING DIFFERENCES THROUGH CONTEMPORARY LITERATURE
Undergraduate
Students will examine issues of discrimination and bias as we analyze several contemporary essays, speeches, short works of fiction, non-fiction, film, music and art. Among others, students will review some of the works of Martin Luther King, Jr., Abraham Lincoln, Cesar Chavez, Harvey Milk, Gloria Steinem, Malcolm X and Ernesto “Che” Guevara as a means to understand how certain groups attain power over other groups and how/why inequalities and injustice begin and persist. Students will work on several small group and collaborative assignments that will help them explore their own biases and those of others, and propose solutions. In addition, this course will give students the opportunity to learn about and practice several types of writing including journals, essays and a short research paper. These assignments will also help students develop critical reading and analysis skills. This class assumes a basic understanding of grammar and composition. Students should expect to write and rewrite extensively. Can be taken for up to 3 competences.

AI 110
THE BLUES IN MUSIC
Undergraduate
During this course, we will read about and listen to this musical heritage of Black Americans; this will include the origins of Blues in African music, the development of Blues in the US, and the fusion of Blues with various musics of Asia. We will hear musical examples from the text, as well as musical examples from the instructor’s personal library which will enhance our understanding of the importance of Blues and its culture in our present society.

AI 111
HEALTH CARE: RIGHT OR PRIVILEGE
Undergraduate
Nations across the globe provide their citizens with subsidized health care. In the contemporary political climate, many people are clamoring for the United States to do the same. What are the issues that define this decision? Does national health care work? Do we deserve subsidized health care? Who benefits? Who doesn’t? What will it cost? In this course, students will examine the notions of providing health care from philosophical, financial and social perspectives. Students should expect to walk away from this experience with facts, figures, and ideas that will help them make up their own minds about the American health care dilemma. Can only be taken for one competence.

AI 112
EXPLORING CHINA: THE LANGUAGE, THE CULTURE, AND THE VISUAL AND MARTIAL ARTS
Undergraduate
This is a course of active learning that requires a student to speak basic Chinese, explore the origin of Chinese characters, paint with brushes, and meditate in motion through Tai Chi. It introduces the fundamental structure of Chinese pronunciation and explores methods and techniques for English speakers to memorize the sound of Chinese words. By introducing students to the pictographic nature of Chinese characters, it engages students in a process of learning through visualizing the “image” of Chinese characters. In addition to language and culture exploration, students will be introduced to the Chinese philosophy of Yin Yang balance and apply it through their practice of Tai Chi, an ancient form of Chinese martial art for strengthening and relaxation of both body and mind. Can only be taken for one competence.

AI 113
URBAN COMMUNITY ETHICS
Undergraduate
Students will explore the ethical choices made by individuals, institutions, and communities as they make crucial decisions about who is and is not included in the new communities resulting from urban development. Issues of race, age, gender, national origin, religion, social class and other power relations or forms of exclusion are explicit and implicit considerations in the community development planning process. Particular emphasis will be placed on the values and visions of persons living in urban neighborhoods and how their values compare to the values of government agencies or private firms involved in planning the fate and future of neighborhoods.
AI 115
THE CULTURE OF CHRISTMAS
Undergraduate
This course will use examples of contemporary writing and popular art as our windows into the changes to 19th century Christmas Culture. We look at the influx of immigrant Christmas tradition (both in terms of religious and national origin practices that provided the rich selection of cultural choices. We look at the social setting of the wealthy vs. the poor and the urban dweller vs. the settler to see how these affected Christmas practices.

AI 116
BEING THERE: ADULT EXPERIENCE IN COMMUNITY ENGAGEMENT
Undergraduate
What are the various ways of becoming engaged in one's wider community, and how can we examine this experience fully? How can we use ethical systems to approach the human community through service, and what are the possible outcomes (known and unknown)? Students in this course develop a plan for active engagement with one or more areas of social life, and articulate a set of experiential outcomes to foster the shape of this commitment. Classroom and experiential, hands-on? learning are combined to provide a multi-layered ground for reflective thinking. Using writing and other forms of documentation, we work to connect past and present learning in this area. Special focus on models of human development to assist us in learning how to create a future securely rooted in engagement with diverse areas of the human community.

AI 117
FAST FICTION WRITING WORKSHOP
Undergraduate
Ursula LeGuin, the award winning author of Steering the Craft, begins her first chapter with this sentence: The sound of the language is where it all begins and what it all comes back to? (19). In this course, students will learn how listen to each other?s creative writing with a discerning, and respectful, ear. Following a standard workshop guide developed by Victoria Hudson, and drawing from exercises by LeGuin and Robert Olen Butler, we?ll journey with each other as we craft our fiction. This creative writing course is ideal for students who already have creative writing (short, flash fiction, or excerpts from longer work) to workshop; for students who have completed a month of fiction writing and want to start polishing that work; and, for those who are seasoned in and appreciate the collaborative writing environment a short fiction-writing workshop can offer. At the end of the course, students will create Digication portfolios to showcase their revised work.

AI 121
ART AND MEMORY: SCRAPBOOKING
Undergraduate
Art is appreciated in various forms. In homes all over America, dining room tables are filled with tiny metal hearts, pictures of adorable toddlers, bags of stickers, and 500 varieties of lettering. Scrapbooking is one of the nation's fastest growing artistic leisure time activities. Millions of dollars are invested in this peculiar pastime that focuses on not only recording family events, but making them pretty as well. Most of us do not consider ourselves artists, but give us a pair of scissors and some fancy paper and we will create an artistic masterpiece! Students in this experience will learn about the history of scrapbooks and will begin the process of decoding the relationships of creativity, art, and craft in this pursuit that is sweeping the nation. Topics will include the definition of scrapbooking and its development in American culture; the ways in which art and craft intersect in the scrapbook; how to get started with a scrapbook; the nature of creativity and its impact in scrapbooking; and the construction of meaningful works of art and craft. This course will meet on campus and online via D2L.

AI 142
IMAGES OF ETHNICITY: FAMILY HISTORIES AND PUBLIC PERCEPTIONS
Undergraduate
Students will examine the history of their own family against the backdrop of their ethnic and social identities as they understand it and how those identities are viewed by others. To do this we will gather genealogical information, visual images (family photographs, newspaper or magazine articles, possibly drawings, oral history (interviews with family members) which reflect both the particulars of your family and the forces behind cultural preservation and the pressures to assimilate. Personal investigations will be integrated with original research from local ethnic museums and institutions, the Chicago History Museum and other web-based archives. Access to Ancestry.com's vast database will be included with this class. This research will provide context for your tribe's experiences in Chicago, called "the most ethnically aware city in America."
AI 143
ROOTED IN THE CITY: WRITERS & WRITING IN CHICAGO
Undergraduate
What is the writing scene in Chicago? How can we better use Chicago resources to help with our own creative writing? In this class, you’ll explore the work of past and present Chicago authors, experience creative writing workshops and produce your own creative work, deepen your connection to Chicago through civic engagement with libraries, non-profit organizations in the literary arts, or other community-based literary events and resources. We’ll explore ideas about creativity and imagination and have plenty of opportunities to practice them. We’ll also think about what counts? are writing and why, exploring historical inequities and the ways these inequities have or have not been addressed.

AI 144
INTRODUCTION TO AMERICAN ART AND ARCHITECTURE
Undergraduate
This course will introduce students to the cultural heritage of a nation built on ethnic diversity. From its early European roots to a nation known as a leader in the contemporary art world, this course will examine significant works that have established themselves as representatives of the various periods in American art and culture. Selected works from the Colonial Period, Federal Period, Early Modernist and Postwar Modernist Periods will be introduced. Artists such as Samuel F.B. Morse, John Singleton Copley, John Singer Sargent and Jackson Pollock as well as architects such as Frank Lloyd Wright and Luis Sullivan will be introduced.

AI 145
DOCUMENTARY FILM
Undergraduate
Since the invention of the camera, people have used it to document and preserve a moment in history, and to reveal the tragedies and delights of the world around us. Enthusiasm for documentaries has grown tremendously in recent years, achieving a relevancy and popularity that would have been hard to imagine not long ago. This course is intended as an introduction to the documentary form while exploring its relationship to society. Each class session consists of lecture, film screenings, and discussion. Works screened survey the history and range of documentary expression including the classics, as well as examples of challenging work by independent film and videomakers. Along with a consideration of their artistic style, structure and subject content, we will explore the social and political relevance of the films and attempt to assess their historical impact. This course challenges students to develop a critical eye, and to deepen their appreciation of the documentary vision.

AI 146
IMAGISM AND POETIC VISION IN PLAYWRITING
Undergraduate
In this course, students will be inspired to write from within, from the depth of their core. The course will take students on a journey into a world where they will comprehend the incomprehensible, and hear the inaudible. Students will present their intellectual and emotional complexities through words. The result of the journey is a liberation from the limitations of time and space. Through introspective exercises, students will gain an aesthetic appreciation of life. The course will focus on the intensive writing and reading of plays.

AI 147
ETHICS: HOW GOOD PEOPLE MAKE TOUGH CHOICES
Undergraduate
Through life’s many lessons, we have learned how to make a decision between what is the right thing to do and what is simply wrong. We can differentiate between good and evil, truth and lies, etc. However, most of our dilemmas do not stem from deciding the correct path, when we are faced with right and wrong decisions. What most often puts us into a quandary is deciding between what is right and what is right. In other words when good people are faced with tough choices, on what basis do they make their decisions? In an era of perceived ethical incertitude and moral skepticism, students will examine how decisions are made based on one of many ethical systems. Students will learn about various ethical systems, and ethicists, such as utilitarianism, deontology, Kant, Aristotle, and Gillian, just to name a few. By the end of the course students should be able to apply their knowledge of moral, ethical and social issues, and have a better understanding of how the tough decisions they make could impact others.
AI 148
HOW TO BE A CULTURAL ACTIVIST
Undergraduate
Freedom of expression vs. censorship. The artist as agent of change or entertainer of the privileged. Intellectual property vs. freeware. The Slow Food movement vs. Globalization. Teaching evolution or creationism. Public education vs. home schooling. These are just a few of the controversies that swirl around the arena of American culture. There are many groups working to preserve the widest access to the arts, culture and means of expression. This course has a definite point of view: which is that creativity is an essential component of a vital democracy. If you believe that creativity should be a national value and national priority - then this course will show you several ways to translate your concern into meaningful action. During this course students will be given an introduction to community organizing strategies and tactics and will be exposed to a number of cultural policy controversies and the key players who are working to make a difference in those areas. We will hear firsthand from cultural activists and learn how to be effective organizers for cultural democracy. This class will combine readings, class exploration and an out-of-class research project where students will pick a cultural cause that is meaningful to them and organize a small event or action around that issue.

AI 149
CHINA/TIBET: VANISHING CULTURES
Undergraduate
China is the world's fastest growing economy. While economic benefits of its rapid development are clear, what risks are involved in such rapid cultural change? What happens when ancient traditional cultures are devastated by hasty development? What is the human cost of such losses? This course asks students to consider these questions as they encounter regions in China that recent economic development has not yet completely altered from their traditional state. Students will gain valuable understandings of religion, art, history and culture by engaging with present day China while unraveling its rich and complex past. Through visits to cultural centers and interactions with local people, we will experience ethnic minorities in the Kunming area of Yunnan Province, attend a major cultural festival in Ulan Bator, Mongolia, and end the journey with a train ride on the Trans Siberian Railway across the Great Wall into Beijing.

AI 150
IRANIAN WOMEN WRITERS AND FILMMAKERS
Undergraduate
In this course, students will read the fiction of Iranian women authors and watch films by women directors, who have confronted the censorship, by creating new ways of resistance. Students will respond to these works and research, discuss and reflect upon the social, political and gender context. They will be required to give an oral report on an author or a film of choice, or a written essay.

AI 151
EXPERIMENTAL PLAYWRITING
Undergraduate
The art of seeing has to be learned. In this course, students will explore the possibilities of looking at things differently. By the new way of seeing, they will have a chance to root and challenge BODY, DREAMS, and DEATH in order to find freedom, joy and life. The new language will be born by listening to the mysterious language and music of our body and dreams. The course will focus our body and our desires, and journeying into the origin of words, in order to challenge the old for the new. Students will write many exercises, read works by playwrights such as Helene Cixous and Marguerite Duras, and compose short dramatic pieces of their own.

AI 152
EXPLORING THE ART MUSEUM
Undergraduate
Museums have been a respected and trusted measurement of artistic accomplishment. In this course, the student will examine the museum's role as collector, conservator and educator. The student will investigate the traditional role of the art museum, its collection, practices and programs as well as its efforts to integrate new media into its collection. The course also investigates repatriation, which is the ownership of ancient and cultural heritage and other issues that affect the museum such as censorship and funding. Finally it will look at how we value art as a commercial commodity.

AI 153
THE ART OF SPEECHMAKING
Undergraduate
In our class, students will use tools based in the imagination, principles of design, and standard dramatic practice to create a unique, personal experience for an audience. The criteria for success is established through an examination of and critique of the content goals. Speech, whether we call it dramatic or declamatory, has the potential to move the masses. In this course, our students will discover their personal approaches and attributes, and construct effective presentations that harness the power of their voice and body.
Al 154
BANKS AS PATRONS OF THE ARTS
Undergraduate
In Banks as Patrons of the Arts, students will consider the larger role of banks and other corporation with respect to community, especially as provider, preserver, and procurator of the visual arts. Throughout history, banks have led the way in the commissioning, procurement, and dissemination of works of art. Money, power, spirituality and aesthetics have been important elements in the preservation of art in various cultures. The focus of this course is this dilemma. Who creates visual images? Who preserves them? How does the public come to know of them and appreciate them? Where does the corporation fit in this puzzle? How has this question been handled in history? Must commerce and aesthetics be opposed? Do powerful organizations such as banks have a responsibility to develop and protect our visual heritage? Is there a middle ground where beauty and profit can coexist?

Al 155
ANALYZING LEADERSHIP
Undergraduate
This course provides a framework from which to identify and analyze leadership. Leadership occurs in all aspects of life, including: business, politics, sports, society, religion, family, education, and culture. But what is leadership? The Merriam-Webster on-line dictionary defines leadership as "the act or an instance of leading," which provides us with little insight. On further investigation, however, the dictionary defines "lead" as [guide] on a way especially by going in advance. Where there is a leader, then, someone or something must follow. This course first explores the interrelationship between a leader and his or her followers and looks at the effect they have on each other. "Good" leadership traits (i.e., effective) and "bad" leadership traits (i.e., ineffective) are then studied from the perspectives of the leaders, the followers, and outsiders. Finally, this course takes a look at leadership from an international perspective.

Al 156
FILM COMEDY, AMERICAN STYLE
Undergraduate
Since the beginning of cinema, movies have made audiences laugh, and comedy is still the most prevalent film genre around the world. What were the earliest movie comedies like, and has film comedy gotten more "sophisticated"? Is comedy universal (does everyone laugh at the same things)? What lies beneath laughter? What does it mean for something to be funny? What forms of comedy lend themselves particularly well to movies? Do great movie clowns (e.g. Charlie Chaplin, Mae West, and Jim Carrey) or great comedy directors have anything in common? This course investigates film comedy from these various perspectives, based on American films ranging historically over the 20th century, and on readings from film critics, psychologists, and philosophers. Students who complete this course will have a good working knowledge of American film comedy-its history, its status as a genre, its social and psychological functions, and some of its landmark films and creators. Through readings, writing assignments, and lecture-discussions, students will also become conversant in a few key theories of comedy, and begin to consider them in the context of films.

Al 157
IN THE PATH OF THE PILGRIM: A LEARNING JOURNEY TO SACRED SITES (TRAVEL COURSE)
Undergraduate
Historical pilgrimages reflect many aspects of human civilization. Today we relate to it mostly in its religion and spirituality aspect, perhaps because the human desire for reflection and atonement is still very much with us. This program often appeals to students who seek a modern pilgrimage experience in their own lives. However, it is not a course about religion and spirituality alone because the footprint pilgrims made went even deeper and broader. More powerfully than books and photographs, an experiential examination of the pilgrimage sites selected for this program will illuminate the broad impact of the waves of pilgrims. As we add our footprints to those left by the countless pilgrims who walked before us, we will consider the provocative question: Did Medieval pilgrimage lay the foundation for many of the organizing social structures of our modern world? Students interested in major global issues of today may gain insight about our own times as they see how the link between pilgrimages and the Crusades linked organized religion to international politics and religious conflict in the early Middle Ages. Those interested in art will learn that pilgrims chose to go to the best shrines, so the growing towns on the roads leading to the Holy Land had more than religious motivations to beautify their shrines and churches with the works of art and architecture we see today. Students interested in business will see that the phenomenon of pilgrimage to centers of religious worship created bustling centers of culture and commerce. Was Medieval pilgrimage one of the first waves of globalization not solely caused by military expansion? These are just some of the many important topics that will be explored on this unique learning experience.
AI 158
A HISTORY OF PHOTOGRAPHY: CULTURAL RECORDS AND ARTISTIC EXPRESSIONS
Undergraduate
Photography is used for documentation, communication, persuasion and industry. We will pursue three goals. First, we will become familiar with the technical history of photography. Second, we will become acquainted with those photographs deemed most important. Third, we will come to know the major players, the photographers and their critics. We will show progress in reaching these goals mainly through analyses of the individual photographs found in the Image Reading Assignments (the IRAs). Assigned readings in the required text, course packet and books placed on reserve will supply the concepts, background information, examples of photographs (and of critical writing methodologies). The readings will be discussed in class and further examples (slide examples) will be provided. This class will present chronologically the development of the photograph, the technology and how we came to use it, and how it consumes us. We will study the great "cannon" of images enshrined in historical archives and art museums. We will also examine our dependency on pictures made with cameras. True projections of the world should be regarded given how their placement with words and how they are sequenced can alter their meaning. Long before the manipulations of Adobe PhotoShop people could lie with photographs. But they can also express metaphorically many truths, reinforced or new to the viewer, beyond the physical light that entered the lens. Is photography also an art? If it is what makes it so? The juncture of art, industry, persuasion, and record making is complicated, their boundaries overlap. For A2D students, this will be investigated through making original photographs as well.

AI 159
UNDERSTANDING THE WORLD'S GREAT MOVIES
Undergraduate
Cinema is a communication mode that warrants our attention. Through examination of great international artists and their films, much can be learned about cultures with which we are not familiar. Since our experience of film is mediated by our own experience and by our own curiosity about its creator, during this course our attention will focus not only on film as an artistic expression, but on the experiences of the director, and the circumstances that caused her/his films to be created. Most class time will be spent on viewing and discussing a film; preparation for each class will necessitate background knowledge and film analysis by the learner. Throughout this course the learner will become familiar with internationally known film directors, their works, and the historical background that inspired them to produce their art.

AI 160
IT'S ONLY ROCK AND ROLL: MAKING MUSIC THE OLD FASHIONED WAY
Undergraduate
For many, music is an integral part of everyday life. It is also deeply ingrained in most cultures. Music is used by individuals, businesses and societies to entertain, soothe, excite, and arouse. Music is basically a series or combination of pleasing sounds but how is music made? How do we know what is pleasing and what is not? The answers to these questions and others demonstrate that music is also a field where science and art meet. In this class, we will explore how sound is physically created and how specific sounds have been turned into music over the centuries. Through experimentation, we will examine the physical and mathematical properties of sound and musical instruments. We will also create simple musical instruments and share the experience of creating musical pieces. No musical experience is needed to take this class.

AI 161
EXPLORING THE CULTURE OF ADOLESCENT MUSIC
Undergraduate
Adolescents have chosen their own music to listen to for many generations, and those decisions have affected their own children's and grandchildren's musical choices. Teenagers often listen to the same music as their peers, but why? And is this always the case? In this course we will explore, compare, and differentiate social and other factors that mold teenagers' musical decisions. What are their thought processes when they choose music? Are they always trying to be rebellious toward their parents or society in general? Are they simply seeking individuality? Is 21st century adolescents' music any more distasteful than adolescents' music from earlier decades? How has technology and the social media impacted teenagers' music choices and enabled greater musical autonomy? Through listening exercises, discussions, and readings, we will describe and analyze our own musical tastes in the context of our own adolescence in an attempt to better understand teenagers' choices in music from various time periods and what choices might look like for future adolescents. We will develop a broader perspective on how and why various cultures appeal to adolescents. In a final project you will analyze and present on an aspect of adolescent music culture which will include a creative component such as a mix of audio samples illustrating your analysis.

AI 162
THE GOSPEL OF LUKE
Undergraduate
What is the role of compassion and of justice in American society? How can the New Testament help Americans to interpret their responsibilities in an economy that is marked by increasing inequalities of reward and risk? Hundreds of millions of Christians hear readings from the Gospel of Luke when they go to church on Sundays. Other Christians attempt individually and in small groups to relate Luke's Gospel to the social, economic, political, and spiritual realities of their lives. This five-session course will provide conceptual tools for understanding this Gospel and for applying its message to today's challenges. Can only be taken for one competence.
AI 163  
**BEYOND THE PEARLY GATES: FACING DEATH IN THE MODERN WORLD**  
Undergraduate  
As part of being an adult we encounter death all around us. It is one of the only guarantees in life after taxes. How to accept it or deny it is what this course will address. One view that we will explore is one which comes out of our religious belief systems. The other view we will look at comes out of our need, as humans living in an economy driven western world, to measure the cost benefits of choosing life over death. By exploring issues of great debate such as abortion, mercy killing, self defense, just war, and others, we will use the topic of death to identify and analyze how we make ethical decisions in life. Five session course. May only be taken for one competence.

AI 164  
**CREATIVITY**  
Undergraduate  
What is creativity? Where does it come from? Do we all have it? Can we cultivate it? These questions and more will be explored as we define the concept of creativity; identify, analyze, and describe the components of a creative process in varied fields; and, explain how engaging in a creative process affects our perception of the world.

AI 165  
**PRAIRIE CHRISTMAS**  
Undergraduate  
This class will feature a participative look back at Christmas in America in the 19th century (primarily) in the Chicago area. Five three-block class hours will lead students through a discussion of 19th century Christmas tradition. The class will be channeled through some lecture and discussion, though the focus will be on making Christmas decorations and gifts of the period. The class will decorate a communal tree, create a Christmas annual and make small gifts. The annual will be comprised of short Christmas writings from class participants. The course will examine how traditions are changed over time. May be taken for only one competence.

AI 166  
**PRODUCING THE LIVE PERFORMING ARTS EVENT**  
Undergraduate  
This class will transform itself into a mini-production unit and actually produce a live event for the general public. The class will learn the basics of producing a live event, including planning, casting, production logistics, publicity, sponsorship, and audience development. The class will choose what it wants to produce, and then it's nine weeks to opening night!

AI 167  
**DIGITAL PHOTOGRAPHY**  
Undergraduate  
Students learn in this course to take artistic digital photos. They will analyze photos they have taken prior to the course and discuss if they fulfill criteria to be seen as art. Several theories of artistic expression will be discussed. Rules of composition, light, exposure, colors, etc. will be reflected upon. In a second step the students will develop the competence to alter their digital photos with a program like "Photoshop Elements". They will be able to change the expression of their photos and combine different shots, creating their personal piece of art. As a final product, students will create a portfolio with about 5 photos including detailed descriptions of their work.

AI 168  
**ART AND MEMORY SCRAPBOOKING II: THE ART JOURNAL**  
Undergraduate  
This is the second course on the art and craft of scrapbooking offered in the SNL curriculum. This course focuses on a specific aspect of the scrapbooker's art, the production of embellished personal diaries. Throughout this experience, students will critically examine the artistic aspects of journaling and collage artwork, investigate movements in the art world, chronicle events in their lives through photographs and narrative, and create works of art and craft that illustrate the experience. This is a hands on art making course. While faculty will discuss various techniques and information about assessing works of art and putting them in the context of art movements, students should expect to be introduced to art making materials and to use them during class time.
**AI 169  
ETHICS, LAW AND JUSTICE  
Undergraduate**

We will first assess and discuss two Platonic dialogues in a collective effort to familiarize ourselves with the interplay between reason and ethical questions. We will pay particular attention to Plato's method of reaching conclusions to questions raised in the dialogues, whether and how those conclusions are ethical in nature, and the relative success Plato has in supporting his conclusions. Concepts discussed include the attainment of virtue, whether virtue or knowledge is teachable, the use of persuasion, and statesmanship. We will then apply our familiarity with logical inquiry to a group of United States legal cases, and focus our attention on understanding the reasoning that underpins decisions encompassing Fourteenth Amendment due process and equal protection issues. We will look particularly at how our Supreme Court Justices employ reasoning to reach conclusions of law that many view as de facto moral issues. In addition, during the course of the class, we will assess a variety of historical, political, and literary readings with the hope that they may enhance our understanding of the concepts of liberty and equality.

---

**AI 170  
CREATIVITY AND ENTREPRENEURSHIP  
Undergraduate**

Successful entrepreneurs face many challenges, but the chief among them is to create 'the new'. The process of imagining, conceptualizing and articulating this 'new' requires skills we often label 'creative'. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. Topics will include the relationship between creativity and accountability, understanding creativity within the context: of self, teams, organizations, and society-at-large, and the role of risk in creative settings.

---

**AI 171  
EXPLORATIONS IN INTERNATIONAL CINEMA: ISSUES OF CULTURE AND DIVERSITY  
Undergraduate**

This class offers students a chance to examine and critique outstanding films from a wide variety of cultures. The learning experience and critique will focus on acting, design and direction in addition to the cultural and social issues explored in the films. Students will be asked to enhance each other's knowledge about the artistic and technical aspects of the films as well as the themes in global culture they examine.

---

**AI 172  
MAKING POEMS: AN INTRODUCTION TO VERSE  
Undergraduate**

Making poems will be a creative writing offering that teaches metrics and verse forms, poetry the old-fashioned way. Topics will include metric feet, rhyme, lines, and verse forms. For example, students will learn about the iambic foot, write some iambic lines of various lengths, and finally use the iambic line to write a sonnet. Rap poetry with its structured rhythms and elaborate rhyming is another possibility. This “formalist” approach promotes a kind of creativity that is strongly infused with craft and discipline in contrast to the “spoken word” or confessional approaches to making poems. This class involves making audio recordings of your poems; students will be required to purchase a headset/microphone and download and install free software. Competences: A1C, A2A, A5. Faculty: Tom Sullivan

---

**AI 173  
WESTERN FILMS  
Undergraduate**

Interested in learning to write about film? The Western is a particularly creative and powerful medium for exploring dynamic social and cultural issues. It is particularly open to examining the nature of creative expression, social and historical contexts, and power relations among different groups. The Western provides wonderful and exciting topics for learning about the arts of analyzing and writing about film. We are going to saddle up and ride out, approaching the Western from viewpoints of how one can write about film, exploring various rich issues of creativity, society, history and power. Possible examples of films are High Noon (1952), Shane (1953), Sergeant Rutledge (1960), Cheyenne Autumn (1964), Valdez is Coming (1971), Pale Horse, Pale Rider (1985), Unforgiven (1992).

---

**AI 174  
WORLD LITERATURE  
Undergraduate**

In this team-taught Bridge course, we will examine masterpieces of world literature, including principal works from selected literary periods and traditions. The first half of the course meets at Truman College and the second half at the Loop Campus and lasts a total of approximately 15 weeks. You may register for up to three competencies for this course.
AI 175
PLATO ON LOVE AND JUSTICE
Undergraduate
This seminar is devoted to the analysis of the great dialogues written by Socrates’ famous student, Plato. In these works lie many of the keys to understanding the western world. They also illuminate much about ancient Greek culture. An appreciation for these great dialogues and their cultural significance is an essential part of higher education. The next time someone mentions Plato’s Cave, you’ll be in-the-know!

AI 176
CREATIVE WRITING
Undergraduate
Designed to help you explore the art of writing stories, either stories that are “made-up” or stories based on lived experience. You will be required to complete six fiction-writing exercises, and either one short story, one autobiographical story, or one story based on an oral history collected by the you. In addition, you write a final essay in which you reflect on your learning and experience in the course.

AI 177
DREAMSDeferred: LAW AND SOCIAL JUSTICE IN AMERICAN THEATER
Undergraduate
Drama is an ideal vehicle for portraying conflict. And the courtroom is often the place where such conflicts come to a head. In this course, we will read various courtroom and law-related contemporary American plays and use them as a lens for exploring issues of law, justice, fairness and the distribution of power in American society (H4). We will also explore how the playwright’s creative process makes these works exciting theatrical pieces and analyze how the various design elements (lights, set, costumes, music) bring each work to life (A5). Students who register for A2B will perform scenes and monologues from these plays. The class will attend various live theatrical performances in the Chicago area. Plays under consideration include: Twelve Angry Men, A Raisin in the Sun, The Laramie Project, The Execution of Justice, Permanent Collection, To Kill A Mockingbird, and Twilight, Los Angeles: 1992.

AI 178
THE ART OF LIVING: ACHIEVING FULFILLMENT DURING LIFE’S TRANSITIONS
Undergraduate
Achieving fulfillment during life’s transitions can be a daunting task. This course is intended to help students understand, address and take advantage of planned and unplanned career and lifestyle changes and opportunities. Special attention is given to methods for achieving personal fulfillment goals. Students examine the views of philosophers, spiritual leaders, and artists, both historical and contemporary, including Blaise Lao-tzu, Cicero, Thoreau, Emerson, Shaw, Lewis, Peck, Angelou, Fulghum, Dychtwald, Sher, and Dyer. Students create their own mission statement for work and life. A primary objective of the course is to expose students to resources that can be used in their own self-discovery process. Multi-media activities include small and large group discussions and presentations, research, and report writing, video and audiotapes. Students are encouraged to use the Internet in their research.

AI 179
LEADERSHIP LESSONS IN LITERATURE AND CREATIVE MEDIA
Undergraduate
In this Bridge course, students will examine issues of leadership and self-leadership as we analyze several short works of fiction and non-fiction, and other creative media including film, plays and music. Students will study authors of various genres along with contemporary political and 20th century historical figures who exhibit leadership qualities that are worth exemplifying. In so doing, students will learn the structure and concepts of the academic research paper. For the research paper, students will select a topic that is personally or professionally relevant. The course assumes a basic understanding of grammar and the structure of academic papers. Students should expect to write and rewrite extensively.

AI 180
BACK TO THE FUTURES: A BRIEF HISTORY OF FUTURES TRADING IN CHICAGO
Undergraduate
This class will examine the futures industry in Chicago from mid-19th century to the present. We will examine how the fledgling city provided fertile soil for the growth of futures trading and continues to support trading today. Commodity futures trading has a long history throughout the civilized world, with products from rice to wheat to tulips having been "forward priced" for centuries; however, it wasn't until the middle of the 19th century that futures or derivatives trading as we know it begin in Chicago. We will look at contemporary news accounts and literary portrayals of the marketplaces. In particular, we will read works by Frank Norris, an early critic of the industry and of late 19th century capitalism in general. The class will be organized around a schedule of lecture, discussion, and small group work. A series of readings will be assigned each week, and these will be discussed in detail. We will also see a few short films and have visits by guest speakers.
AI 181
CREATING ORIGINAL DIGITAL ART
Undergraduate
The course will focus on electronic visual art, and because of the amount of material to be covered, will not include audio or animation art. Student will look at what constitutes "art", then look at how original art could be created using technological tools, such as Microsoft Paint, Pixel-based art, such as Microsoft Graphics in PowerPoint; Digital Photography and PhotoShop; digital short-movies, and Digital Animation using Freeware GIF Animation software.

AI 182
TALKING BACK TO MEDICINE: WRITERS AND THE POLITICS OF HEALTH
Undergraduate
It is no secret that health care in the United States is in crisis. President Obama has pledged to work with the nation to rehabilitate our health care system. In this course, we will examine how fiction and non-fiction writers challenge such systems to rethink the notion of health as well as the politics of sickness. The writers we will study take on issues like access to health care, models of illness and healing, medicine and social justice, and others. In this course, readings, podcasts, wikis, and discussion board posts will help us explore the responsibilities of medicine as well as those of the community in which medicine is practiced, for a socially just and comprehensive understanding of illness, health and healing in the United States.

AI 183
THE 1960S
Undergraduate
The decade of the 1960s was a watershed period in the social, cultural, and political history of the United States. This course will examine the era from a variety of viewpoints in order to promote student understanding and analysis of key movement, episodes and personalities. The course will include investigation of John F. Kennedy's "New Frontier", The Cold War, The Space Race, the Civil Rights and Women's Liberation movements, Lyndon Johnson's "Great Society", the Vietnam War, popular culture, literature, student unrest, and the realignment of traditional political voting blocks. In addition, the course will demonstrate how the decade's music mirrored the changing times.

AI 184
WORDPLAY: DEMYSTIFYING POETRY
Undergraduate
This course sets out to demystify most forms of poetry with particular concentration on poetry composed to be read aloud or performed on a stage, and to allow the student to actually enjoy poetry! The student will be exposed to a great deal of popular poetry and will, perhaps, be a little surprised to find poetry to be accessible. The Oral Tradition, Folk Poetry, Open Mike, performance poetry, poetry read or performed with music or poetry just read aloud, Slam Poetry, rap, song lyrics - all of these often overlapping categories of poetry could be grouped under the title of Spoken Word, and probably, all would be considered popular poetry. The students will be exposed to much of this poetry; Slam Poetry in the home of the National Poetry Slam, The Green Mill, and performance poetry at the Guild Complex and at the Higher Ground Poets. Students will engage in a poetry workshop that is at once sage, gentle, and generous. The workshop will take place in the classroom. Known and not-so-well-known poets will visit the class to read or perform their poetry and students will become poets and read their works in class.

AI 185
THE BEATLES AND THE CREATIVE PROCESS
Undergraduate
The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition.

AI 186
SOCIAL RELATIONSHIPS FROM AN AFRICAN-CENTERED PERSPECTIVE
Undergraduate
This course will utilize an African-centered framework to examine the nature of social interactions within the African-American community. The following topics will be emphasized: female-male relationships, parenting, teacher-student relationships and the role of elders in the family. Students will examine the role of traditional and contemporary culture, racism and oppression in the historical development of these social relationships. Strengths, tensions and possible solutions to alleviate tensions experienced within the examined relationships will be identified and discussed.
AI 187
CAREERS IN THE HELPING PROFESSIONS
Undergraduate
This course will help you, the learner, identify which career path best fits your strengths, skills, and interests, as you pursue your desire “to help people.” It will also better prepare you for graduate and/or professional training by familiarizing you with the admissions process for various schools in the helping professions (e.g. social work, psychology, counseling, etc.).

AI 188
MAKING DIFFICULT DECISIONS: MORAL LIFE IN A MODERN CULTURE
Undergraduate
"It's not illegal." Is this statement a sufficient basis for moral decision-making? Do people have one set of values for their “private life” and another set of values for getting by at work? Is there a “public” morality? If yes, what is its basis? "Making Difficult Decisions" provides a window into the ways that people make some of the most difficult choices in their lives (for example, having an abortion, volunteering for military service or declaring conscientious objection, requesting "Do Not Resuscitate" orders for an ill and aged parent, etc.). The course readings, written exercises, and classroom activities will provide students with a framework that will help them to better understand their own moral decision-making. This framework will also help students to better understand the decisions that other people make. A major focus of the course will be the different moral languages that influence the decision-making of most modern Americans, but which many of us are not able to sort out. The course will also emphasize the role that social institutions play in our decision-making processes.

AI 189
SOCIAL CONFLICTS OF THE KENNEDY YEARS
Undergraduate
Popular images of the Sixties, think, say, of hippies, Black Panthers, soldiers fighting in Vietnam, protesters working en masse to stop the war—actually correspond to a span of years that stretches roughly from 1964 (when, for instance, the Beatles arrived in the US) to 1974 (when President Nixon resigned from office). This course will look closely at the lead-up to this period, concentrating on American political and cultural history from the late fifties moment through the assassination of President Kennedy in November 1963. We will examine selected events, movements and figures from this period who are key to understanding what came later. Topics to be studied include the Cold War, anti-communism and the atomic bomb; the Cuban revolution; the civil rights movement and Dr. Martin Luther King; the rise of protest singers and soul music; the administration and assassination of President Kennedy; and the beginnings of the USs full-fledged military incursion into Vietnam. We will read essays and excerpts by authors such as Howard Zinn, Frank Meyer, Dr. King, Bettie Friedan, and Barbara Ehrenreich. We will use a variety of learning tools, including lectures, discussions, journal reflections, and film screenings.

AI 190
AFRICAN AMERICANS IN THE ARTS
Undergraduate
The arts provide a lens through which we can more completely see, hear and understand the magic, mystery and challenge of the human experience. The story of African Americans in this country is one of perserverence and tranformation. In this course, students will explore how the social, political, historical and cultural journey of African Americans is reflected in the production of art. African Americans have a specific perspective on the American national experience. Where would America be without the artistic contributions of the African American cultural community? Furthermore, how does art make our lives better? Does it? In this course, learners will research, analyze, and define African American art and arts and assess their impact on culture. Arts such as theatre, literature, music, and visual and media arts will be discussed. Students should expect to attend several cultural/artistic events throughout the term. These might include poetry readings, musical concerts, theatre, gallery visits, and other local events.

AI 191
HOW THE WORLD DOESN'T END: SPECULATIVE MEDIA ABOUT DISASTER
Undergraduate
In this hybrid course, students will examine the ways depictions of disaster in art and literature influence the presentation of gender. We will explore these depictions through a combination of analytical and creative activities. Our readings will include Senseless Acts of Random Violence by Jack Womack and selected poems and creative writings by Adrienne Rich, Anne Waldman, Amiri Baraka, Quentin Crisp. Our readings of creative work will be supplemented with readings of cultural theory and philosophy including excerpts from Maurice Blanchot, Georges Bataille, Donna Haraway and Simone Weil. Students will also examine these issues as we analyze other contemporary media, including film, art and music. This course will give students the opportunity to learn about and practice several types of writing, including journals, essays and a short research paper. These assignments will also help students develop critical reading and analysis skills. Students will work online and in small groups on a collaborative project, which will help them explore and propose solutions for biases? their own and those of others.
AI 192
IMPROVISATION
Undergraduate
Students will learn the games that form a context with which, or from which, to improvise. Then they will improvise; they will play in their own and in each others' improvised sketches. They will learn to solve problems, find metaphors and examine improvisation as an excellent tool with which to monitor the process of learning. From the engagement in games and their analysis will come the most important outcome: the growth of confidence.

AI 193
LANGUAGE AND POLITICS
Undergraduate
The language that individuals and groups use to tell their stories creates their identities. This multi-disciplinary course examines how post-modern language, especially language in media, frames national and global politics and its underlying power relationships. Issues addressed include the politicization of language in the U.S. immigration debate and the role that English as global lingua franca plays in spreading American culture as well as the subsequent effects on self-expression in English among native speakers via political correctness, forbidden speech and code words. Other topics include gender roles, intellectual property rights, and even the overall need for virtually ceaseless verbal stimulation in a media/image driven world. Students will utilize intercultural communication theories to reflect upon their self-identity and its role in defining their relationship to their communities and institutions and will expand outward to understand national and ethnic identities from a global perspective. Students examine current events in the media and the ethical implications language-related biases impose upon discourse while using the Internet to create their own presentation about the topic.

AI 194
DOCUMENTARY PHOTOGRAPHY
Undergraduate
Documentary photography emerged in the middle of the 19th century as a means of defining, directing and/or transforming social opinion. From that time forward, photographs have been commissioned with the intention of building consensus for profound social change. Public and private agencies alike have used photographs to make the larger society aware of new thinking about problems such as immigration, poverty, war, political, ethnic or gender injustice. This course will examine the photographic images spawned by various social issues and movements that have affected American social thinking and guided social activism from the Civil War forward. Please note that no prior knowledge of the history of photography or of 19th or 20th century American history is expected nor is a working knowledge of any art-making discipline assumed.

AI 195
GENDER AND SEXUALITY IN BUSINESS AND ORGANIZATIONS
Undergraduate
Sexuality, Gender, Power and Organizations: these concepts and their interrelationships are the general focus of this course. Gender and gender relations and their relationship to power have long been deemed to be absent or relatively unimportant with in the study of organizations. The gendered nature of organizations and their management has not been part of dominate mainstream traditions of theorizing on organizational and business activity. Focusing on issues that are well known in our everyday life and work this course deconstructs issues such as affirmative action, gender discrimination, sexual harassment and violence in the workplace and ancillary organizations.

AI 196
WRITENOW: SNL WRITING MARATHON
Undergraduate
Anne Lamott said that the most important ingredient for writing is the act of “sitting”. In this course, students will focus on this seemingly simple act of the creative process. The focus of the course is on the generation of written material: the quantity rather than the quality. As such, students choose their own fiction or nonfiction writing topic(s) and project, and may use the material they create in a later effort (ILP, AP, etc.) To kick off one session, a group of professional writer panelists will reflect on their own creative processes as they have developed their latest works.

AI 197
WHAT WAS GOD THINKING WHEN HE INVENTED THE UNIVERSE
Undergraduate
We are all made of star dust. Find out how and why in this course. The moon is made up fragments of earth. Learn how we depend on each other. All life has been wiped out at least 6 times on this planet. Find out if God really likes us. We humans have only been around for 100,000 years, but we are rearranging our planet big time. Figure out if we know what we are doing.
GREAT AMERICAN SHORT FICTION

The short story is often thought of as the novel's poor stepchild. Descriptions of the former typically allude to its brevity as proof of its lesser literary value. This course will try to prove that great fiction is not judged by the number of words it comprises, but by its effect on the reader. Evidence will come in the form of short stories selected according to author Richard Ford for their creators' ability to “spell out so well for us where daring starts and where it leads, and exactly why it is the pure and indispensable and thrilling call that brings us all to stories.”

ELECTRONIC LANGUAGE

Shakespeare changed the English language. So did Winston Churchill, Mickey Mouse, and Ice T. Radio and television have certainly contributed. Some of these changes took years; some materialized over night. The most recent changes in how we communicate, and perhaps the greatest have come from the internet. Email, emoticons, and texting have all influenced our ability to say what we mean, and to comprehend what others are trying to tell us. In this course, students will examine the ways in which these new technologies are provoking alterations in our day to day speech. Spelling is certainly changing. Remember when we wrote through instead of thru? And who writes letters anymore? Through critical analysis of internet speak, learners will acquire skills for assessing the impact of electronic communication on literature. Looking at creativity and creative uses of technology, students will learn how to use electronic means of producing their own written work. Furthermore, students will examine how electronic communication has influenced our ability to be heard in the workplace.

GUIDED INDEPENDENT STUDY: ARTS AND IDEAS

This course offers a unique opportunity to directly reflect upon life's end at and individual and personal level. Doing so allows us to be most full present as we live and with others when dying and death touch their lives, as well as when either touches our own. While this exploration can be challenging, it can also be enlightening, enriching, uplifting, and even liberating. Most of all, the amazing adventure of facing mortality has significant implications for the choices we make today. Competences: A4, A3C, H3F, S3B.

LONDON ALIVE: IN THEATERS, MARKETS AND MUSEUMS

Join SNL in London for a course about performance and representation. Theater, live performance, museum collections and street markets are integral parts of English cultural history; they also represent Britain's international heritage. London theaters celebrate English history, culture and language, and carry the banner of the English artistic imagination into the future. London's museums make it one of the most visited cities in the world for the range of its collected artifacts and images. Outside the theater and museum doors, markets teem with life, creating a magical intersection of past with present and future, of art with life and politics, of cultural stasis with social change.

MEDITATION FOR INNER GUIDANCE AND GROWTH

How do we stop the treadmill and recreate a space and pace that gives us more balance in our lives? It is a challenge to live in a world that stresses productivity to the point that it often overrules personal and family needs. Societal and workplace expectations are negatively impacting our health, our personal relationships, and our communities at-large. This course will discuss and explore alternative ways of responding to these challenges, ways that seek to return us to a healthy balance between work and life. Students will learn to use meditation, journaling, and other practices that allow individuals to slow down and to explore their own inner spirituality and personal direction for their lives. We will discuss theories and philosophies that address work-life balance issues. A final product will be a personal "work-life" balance plan that would detail ways to practice balance between work, family, and self-care and re-creation on a regular basis. Students will also develop a written code of ethics which explains their philosophy of self-family-work balance.
AI 204
EXPRESSING INDIVIDUAL IDENTITY: POLITICS AND THE CREATIVE SELF
Undergraduate
An examination of personal identity and how it is imbedded in narrative. The course examines novels and non-fiction from a variety of sources to illustrate the formation of political identity. Students write about personal identity by using stories from one's own experience, stories derived from oral history, or stories transmitted from people with whom one has communicated. Students will use one or more of the various forms - short stories, journal, diaries, - to reconstruct stories of personal identity that constitute part of a larger narrative about how citizens understand and communicate the complexities of emotion and ideas connected to politics and political experiences in one's life.

AI 205
LEADERSHIP LESSONS IN LITERATURE AND CREATIVE MEDIA
Undergraduate
In this course students will examine issues of leadership and self-leadership as we analyze several short works of fiction and non-fiction, and other creative media including film, plays and music. Students will study authors or various genres along with contemporary political and 20th century historical figures who exhibit leadership qualities that are worth exemplifying. In so doing, students will learn the structure and concepts of the academic research paper. For the research paper students will select a topic that is personally or professionally relevant. The course assumes a basic understanding of grammar and the structure of academic papers. Because students will practice writing and revising academic papers, the course can serve as a gateway to other SNL courses.

AI 206
EXECUTIVE & MANAGERIAL ETHICS IN CORPORATE AMERICA
Undergraduate
This class will prepare students who are entering or enhance the skills of those already in the complicated and confusing world of corporate America. The course will look at some of the most historical ethical issues in the world of business and provide students with the tools they will need to become an ethical and successful manager or executive.

AI 207
BEHIND THE RAZOR WIRE: THE LITERATURE OF INCARCERATION
Undergraduate
The United States is the largest incarcerator in the world. Is this because we have more crime? More criminals? In this course we will explore questions about the prison industrial complex and the justice system through the words of incarcerated and formerly-incarcerated writers. We will be looking at poetry, short stories, essays, and memoirs. Employing a mix of discussion, guest speakers, film, class team reports, and close readings of the literary texts, this course will take us on an imaginative journey into a world most of us have few reasons to understand. We will explore questions about the prison industrial complex and the justice system through the words of incarcerated and formerly-incarcerated writers.

AI 208
STORYTELLING: EXPLORING THE ORAL TRADITION IN OUR LIVES
Undergraduate
Everyday we use stories to communicate. This course provides students with an overview of the art and practice of storytelling. Throughout the learning experience, students are encouraged to nurture their voices as writers and storytellers. Students will create and adapt tales focusing on both personal experience and traditional folklore. Storytelling is an oral art form. Students will learn by actively participating in storytelling and critique of story performance. The creative experience in this course will enable students to further their skills in: Oral presentation, story construction, performance, artistic critique and analysis. Students will develop and perform stories from at least three distinct areas, including personal experience, folklore, and history. This class will enhance the work of business professionals, teachers, artists and anyone who is interested in how stories communicate ideas.

AI 209
ETHICS AND IDENTITY: THE PRESSURE OF INSTITUTIONS ON INDIVIDUALS
Undergraduate
This course explores the tension between the individual and the institution in theory (through books and films) and practice (through participation in collaborative groups) and offers the student real tools for working with integrity inside the corporate culture. Using current events as a modern morality play upon which to turn the lens of historical and contemporary analysis, we will ask of ourselves what it means to be a good and ethical citizen. This course will enable students to recognize the inherited belief systems and their contradictions which have fueled the moral crisis of the last decade.
THE MINDSET OF INNOVATION: BUILDING YOUR CREATIVITY COMPETENCES

Undergraduate

More than ever we hear that creativity and innovation are essential: to save the U.S. economy, to adapt to a greater speed of change, to advance our own careers. In the 21st century we indeed need to raise a different IQ: Our Innovation Quotient. In this course we'll do just that by drawing water from three wells: 1. Psychological research on individual and collaborative creativity, 2. Organizational innovation case studies and practices, 3. Experiential challenges and personal creative development. Students will explore three key creativity competencies: fluency, flexibility and originality and gain insight into the mindset and practice of innovation required to take on the challenges and uncertainties facing us right now, both personally and professionally.

ANALYZING AUSTEN'S PRIDE AND PREJUDICE

Undergraduate

Jane Austen must have known something about universal truths. Her novel, Pride and Prejudice, which begins with the sentence quoted above, was first published in 1813. Still in print today, it has also been made into at least eleven movies, four of which were released since 2000, including a Mormon and a Bollywood version. In this class, we will read the novel in the context of the gender and class norms at the time Austen wrote her book and then consider how Austen’s exploration of universal truths is reinterpreted in more contemporary film versions of this novel. In exploring Austen’s creation and the many reinterpretations of her work, we will use both analytic and creative writing assignments as well as class discussion to examine how context informs creativity and how creativity informs analysis. You most definitely do not need to be a creative writer to take this class.

GLOBALIZATION OF MODERN BRAZIL IN ART, LITERATURE AND MUSIC

Undergraduate

This course will study globalization in Modern Brazil through the representation of race, culture and religion in the arts of Brazil. Particular attention will be paid to indigenous cultures and the influence of Africa on Brazil. Can be taken for up to 3 competences.

CULTURAL BRIDGES: ART BEYOND THE WEST

Undergraduate

This course is intended to provide students with an overview of the visual arts and architecture of the people of China, Japan, Africa, India, the Americas and Oceania. Emphasis will not be placed on learning names, dates and titles, but instead, on understanding how each culture reflects the religious beliefs, myths and creative expressions of the people with the sole purpose of building bridges to cultural understanding. The course will include illustrated lectures, research, discussions and visits to museums and galleries in the Chicago area which house non-European works of art.

ETHICS IN BUSINESS

Undergraduate

This course is about doing the "right thing." To some degree, laws dictate what is right or wrong. But you can perform an act that is perfectly legal, but is morally wrong. Does one out weigh the other? In this course the student will find the answer to the question, "Why should one be ethical?" We will focus on ethics from an organizational and personal perspective and discuss some of the common problems associated with both. We will discuss philosophical and psychological approaches to solving some of these problems.

FILM NOIR

Undergraduate

In this course we will screen and discuss select noir films and develop skills of viewing and analyzing them closely. Highlighted topics will include the concept of genre in film; the relationship of genre codes to creativity; the dynamics of form and content; the tension between commerce and art; the auteur theory; psychologies of the divided self; representations of masculinity and femininity; and the question of what these films say about American society, post-World War II.
PHOTOGRAPHY AS ART IN THE MODERNIST ERA
Undergraduate
Why is it that certain 20th century photographs from amateur, commercial, documentary or news sources are now studied and have become collectable as art? In most cases their makers did not see themselves as artists. The ones who did often struggled to define what their machine-made picture medium uniquely had to contribute to a changing and increasingly mechanized secular world. Their answers and those of later arbiters read like a chronicle of Modernist thought. Indeed this class might be termed a history of Modernism as expressed through five distinct periods (or themes) within 20th century art photography. Abstraction, a 20th century invention in the visual arts, does have a component in art photography. These we will study. But most photography we would call creative including those from the time period 1918-1977 is solidly connect to realistic presentations from life and provide their viewers a lens for societal interpretation. They will be our main area of study. Although primarily a study of 20th century Modernist photography, the class will also examine the logic of an earlier artistic model from the Pictorialist Era. Likewise in the final weeks, we will examine some recent works and re-readings of older photographs using criteria of Postmodernism. Two field trips will be scheduled: The Art Institute of Chicago and The Museum of Contemporary Photography (Columbia College).

MINDFULNESS MEDITATION
Undergraduate
Mindfulness mediation provides many different ways to broaden our awareness of the world around us, heighten our powers of concentration, deepen our under-standing of our experience, and cultivate creative and transformative ways of being in the world. Many approaches to mindfulness mediation draw on ancient religious and spiritual traditions from around the world. So mindfulness meditation is compatible with and can enhance whatever religious or spiritual commitments you may have. But mindfulness meditation does not require religious or spiritual interpretations. It can be practiced as a very powerful path to becoming a creative, healthy and effective adult. In this course, you will learn what mindfulness mediation is and various ways in which it can be practiced. We will explore in particular how mindfulness meditation can enhance creativity, address the ethical challenges of contemporary life, and foster collaborative learning. Class sessions will involve extensive practice in mindfulness mediation, listening and dialogue. You will be expected to maintain and reflect on a daily mindfulness mediation practice for the duration of the course.

IMPACT OF NONGOVERNMENTAL ORGANIZATIONS LOCALLY AND GLOBALLY
Undergraduate
In a world characterized by polarization and fragmentation, how can solidarity be built? This course explores the role and impact of international nongovernmental organizations (NGOs) within different countries and across countries. Students will take a systemic approach in analyzing the country contexts within which NGOs operate, considering various factors—historical, political, ethical, social (cultural, religious), economic, and environmental. They will examine how effectively NGOs with their distinctive missions and values are able to operate within these country contexts and accomplish their mission. Students will investigate the local and global impact of one NGO in addressing a particular issue or problem in one or more countries.

SPACE, SPIRITUALITY, AND HUMAN IDENTITY
Undergraduate
The course will examine the architecture and context of the sacred spaces of the ancient and medieval world. Different perspectives will be used to study the spaces, including art historical, historical, anthropological and religious. This class will look at how sacred spaces are affected by a variety of factors in each society. These include the religious and social beliefs of the society, the availability of materials, the technical skills of the artists and builders and the world view of the people. Students will also consider how these issues are manifested in our own culture and how they are seen and experienced in their individual lives. The class will use multimedia resources to experience the monuments more fully.

THE POWER OF THOUGHT & EMOTION IN PERSONAL EXPERIENCE
Undergraduate
This course addresses the question, "What is the role of thought and emotion in personal experience?" and attempts to answer it through a series of experiments in creative writing, observation and self-reflection. Drawing upon a wide range of controlled studies, like the ones described below that suggest the possibility of a causative function in emotions and their correlative belief systems, students will examine their own inner and outer worlds and find where they meet.
AI 221
COLOMBIA: CULTURAL IMPLICATIONS OF LEISURE
Undergraduate
This pioneering course will provide SNL students with the first opportunity to travel and study in South America. Cartagena, Colombia is the destination. Cartagena is one of the most visited cities in Colombia and a must see city in South America. Considered by many as one of the world's most beautiful, fascinating and romantic cities, Cartagena offers a rich sense of history, beautiful beaches, excellent food, cultural events, competitive sports, superior natural areas, and a vibrant nightlife. Its heterogeneous ethnic and racial make-up is unmatched in the world making it a perfect environment to study and experience leisure. You will be immerse in the culture, history, and leisure practices of Colombia enabling you to develop a greater understanding of the role of leisure in improving and protecting our global community.

AI 222
DISCOVERING THE LEADER WITHIN: EXPLORING TRANSFORMATIONAL LEADERSHIP
Undergraduate
We are living in a world of constant change, a world in which change is often viewed as the only constant. When we think about change we typically are talking about incremental change. This course will explore a much more difficult change process: the process of deep change. The primary focus of this course will be to examine the values, goals, and operating methods of the internally-driven leaders engaged in the process of deep change: the transformational leaders. The course is designed to give students a practical understanding of the ways in which transformational leaders are having a lasting impact on a wide array of organizations ranging from major corporations, to nonprofits, to international institutions. In the process, students will learn leadership lessons that can contribute to their personal and professional growth and development. The principles of deep change can apply to people at every level of an organization regardless of its size. The class is interactive and will include case studies as well as movies portraying transformation leaders who have pursued the vision of deep change. Multimedia activities will include small and large group discussions and presentations, research, report writing, and video and audio tape presentations.

AI 223
LITERATURE OF RESISTANCE
Undergraduate
The pen is mightier than the sword. Why do authors take the time to write down their objections to society's conflicting ideas about life? What impact can words, rather than arms, actually have? In this course, students will examine the work of various authors who have felt the need to express their opposition in writing. As well as the work of those who have emerged as leaders because of their historical opposition to the status quo. What has inspired resistance movements? Much has been written about independence movements of the early to middle Twentieth Century, their significance in providing both spark and fodder for resistance movements all over the globe, including the Black Power Movement and the Feminist/Womanist Movement here in the United States. This course will offer students the basic knowledge and tools to understand the historical contexts for many political, economic, and social justice issues affecting people, especially women in the Twenty-First Century. Students will be able to identify and distinguish various forms of political resistance and societal oppression, and will acquire the vocabulary to discuss these moments and their impact on contemporary politics.

AI 224
WHAT IS JUST?
Undergraduate
Is it fair that our tax dollars support the uninsured? Should we punish those with limited capabilities who hurt us? Is it just that my colleague is rewarded for my work? In this class, we look at these questions (and more) of justice in ancient and modern literature and philosophy. Our readings will include: the Code of Hammurabi, The Bible, Aeschylus' Oresteia, Sophocles' Philoctetes, selections from Plato's Republic, Dostoevsky's Crime and Punishment, Euripides' Medea, Toni Morrison's Beloved, selections from Jonathan Swift's Gulliver's Travels, Margaret Atwood's The Handmaiden's Tale and various handouts (Rawls, Kant and others) from the instructors. May be taken for a maximum of three (3) competencies.

AI 225
GREAT MUSIC IN CHICAGO
Undergraduate
The course introduces people to three of the most exciting and rewarding institutions in Chicago music: the world-famous Chicago Symphony Orchestra at Symphony Center downtown; the fabulous training orchestra of the Chicago Symphony Orchestra, known as the Civic Orchestra, also downtown; and live top-name jazz at the Jazz Showcase. We learn the background of these institutions, the nature of the arts they perform, and the terms used to describe and appreciate these forms. Most importantly, we experience, in person, the great music that they play!
AI 226
ECOLOGY, THE GIFT ECONOMY, AND OUR SEARCH FOR A LIVABLE WORLD
Undergraduate
In this course we will focus on different economic, cultural, and ethical paradigms of ‘nature’ and ‘economic relations’. We will place the notion of a ‘gift economy’ at its center, comparing it with the predominant notion of the ‘exchange economy’. The logic of ‘gift giving’ implies distributing goods and services according to needs, placing a high social value on carework and on the ethics of care. The logic of exchange transforms giving as a direct response to needs into giving in order to receive its equivalent in return. By exploring the many ways the ‘exchange paradigm’ dominates our thinking, acting, and relating to each other and to the natural world, this course will investigate how the ‘gift paradigm’ has been practiced by different populations and different cultures in the past, where it is still alive today, and what it teaches us about creating a livable world, one that is guided by an ethics of care and environmental justice.

AI 227
VALUES BASED LEADERSHIP
Undergraduate
Who are values based leaders? How can we differentiate who a values based leader is and who is not? How can we explore what our personal values are and how these values influence the leaders we are or can be? Values based leadership includes both process and outcomes. Although in this course we will study various historic and modern day leaders, such as Moses, Jesus, Gandhi, Martin Luther King, Evita, Richard Daley and others, the most important work we will do in this course is learn that it is people showing leadership in everyday tasks of everyday life that in the long run will make the world a better place to live. We will learn that moral values and leadership come from within, therefore if we want to make an impact on the environment that we live in we must have a better understanding of who we are and what we believe in. In this course we will use various texts, videos, engage in small and large group discussions and spend some time in self reflection in order to explore values based leadership and the leadership potential within all of us.

AI 228
FOOD AND IDENTITY
Undergraduate
Food is a component of individual identity. In this course, students reflect on and research their personal food histories from multiple perspectives. Students explore the connection to family and the impact of ethnicity, nationality, race and socioeconomic status on food selection, preparation and consumption; the connection of foods to socialization, holidays and gender roles; and the connection between food trends such as shifting definitions of “healthy eating” and the influence of corporate agriculture with the choices individuals make to cultivate tradition or redefine their food legacy. As a result of participating in this course, students gain insight into their own food experiences and appreciation for those of people from different backgrounds; document a personal food history; and understand the influences on their own food choices.

AI 229
CONFLICT, COLONIALISM AND COMMERCE: ENCOUNTERING THAILAND AND ITS NEIGHBORS
Undergraduate
Drawing on local resources, students will gain valuable understanding of some of the minority cultures in the region and their tenuous relationship to the dominant ‘host’ culture. By engaging with present-day Thailand, participants will also gain insight into its rich and complex past. Through visits to cultural centers and interactions with local people, participants will experience life among ethnic groups in the Chiang Mai province such as the ‘Long-Necked’ sub-group of the Karen people, as well as in the border regions of Cambodia and Burma (Myanmar). In Bangkok, we will experience its modern and ancient faces culminating in cultural activities with DePaul alumni living in Thailand.

AI 230
MEMOIR WRITING: A JOURNEY FROM THE INSIDE OUT
Undergraduate
Socrates famously said, “The unexamined life is not worth living for a human being.” Join Carolyn and Caralyn, who believe there is nothing more compelling than the well-told story of a person’s life, to examine a portion of yours. In this class, as a community of learners, we will explore the creative process, consider principles of memoir-writing styles, and assess how human experience and transformative events drive the construction of a personal philosophy. Course prerequisite: curiosity. Class sessions will revolve around reading, writing, and telling. We will read and discuss excerpts from full-book memoirs to understand how everyone has a sense of being “other” in the world, while still being connected to the greater human experience. We will write in a structured format, both in-class and individually, to learn how to focus the lens of memory onto specific life experiences. Peer editing, using guided techniques to give constructive feedback, will enable all students, regardless of their starting point, to become better writers. At the end of the course, we will tell the stories that have been written as we partner our small learning community with a larger community organization. The final take-away of sharing will be a class memoir in the form of an e-book to which everyone contributes.
AI 231
THE MEANING OF WORK
Undergraduate
What is work? Does our work alone give us happiness? How is creativity connected to our work? Why do we make things? How is our self-worth tied to our work and to the things we produce? This course examines these questions and the tensions between work and leisure activities, between craft and technology in modern times, between mass production and handmade articles, and between techniques and materials. It is a hands-on lab class that emphasizes techniques and materials which enrich our understanding of work and its production; it also focuses on creativity in the 21st century and the tensions between mass production and handmade materials. Can be taken for up to 3 competences.

AI 232
THEATER IMPROVISATION
Undergraduate
In this course we will play on the classroom stage as we might have played on the playground as kids. The difference between these forms of play is one of degree rather than one of kind. A theater game provides a structure in which we can play spontaneously. In other words, we improvise. Improvisation aids in the developing of public speaking skills and comfort and confidence as well as other social and theatrical skills. May be taken for only one competence.

AI 233
GAIA: THE EARTH MYTH
Undergraduate
Among the world's great myths are many which embody cultural wisdom about the relationship of humanity to the planet it inhabits. This class examines a number of exemplary myths in order to compare and contrast visions of human/natural interaction. Myths from Japan, Ireland, Native America, Africa and classical Greece will be among those studied. Students will be asked to compare one to the foundational myth of their own culture.

AI 234
CHRISTIANS, MUSLIMS AND JEWS IN MEDIEVAL SPAIN
Undergraduate
This course will study "la convivencia" or how Muslims, Jews and Christians created a culture of tolerance in Medieval Spain. It will explore the contributions of each culture to the sciences, arts and literature that have had an impact in contemporary society. Finally, it will examine the reasons why this world tragically vanished and the lessons to be learned from this. Truman Bridge course. Can be taken for up to 3 competences.

AI 235
THE DRAMA OF THE COURTROOM
Undergraduate
Trials are often the apex of legal proceedings, the dramatic moment where justice and truth hopefully come together. They are also fraught with a significance that often goes beyond the facts of the particular case being decided and reflect the hopes, fears, dreams and divisions of the broader community involved. The Rodney King and O.J. Simpson trials are two such modern examples. We will begin by discussing the various meanings attributed to trials throughout history. However, the major focus of the course will be to read plays in which trials occupy a central place. Possible titles include "Twelve Angry Men", "To Kill A Mockingbird" and "The Crucible". Depending on the competence for which you are registered, you will analyze and evaluate the system of justice portrayed in each play, the protection afforded the accused and the playwright's creative process in bringing the particular trial to life. We will accomplish these tasks through essays, class discussions and reading scenes. We will also go to a couple of Chicago theaters, view some plays and discuss what we have seen in light of what we have studied in class.

AI 236
ONE WORLD: GLOBALIZATION IN HISTORICAL, LITERARY, AND PHILOSOPHICAL PERSPECTIVE
Undergraduate
In this course we will review the history of the idea of a united, confederated, or culturally interconnected world-community - tracing it from its earliest beginnings in myth, prophecy, and imaginative literature to its current practical incarnation in the form of the world as we know it today (a world of free-trade treaties, international corporations, instant communication, increasing cultural homogeneity, rapid transportation, and an edgy, suspicious opposition between traditional cultures, each anxious about preserving its identity in the new global order.). The course will conclude with a modest attempt to glimpse and assess the likely future path and consequences of globalization while maintaining a primary focus on the moral, economic, and political issues at stake.
**AI 237**  
**MULTICULTURAL DISCOURSE: THE RHETORIC OF OUR COMMUNITIES**  
**Undergraduate**  
In this 10-week course, students will identify, analyze, compare, and write rhetorical works that demonstrate cultural values in different communities. The course will also have a foundation in community-based learning, wherein students will spend time outside of class working with a community partner to focus on cultural development, awareness, and support in Chicagoland.

**AI 238**  
**THE RIGHT TO SPEAK: EFFECTIVE INTERACTION IN THE WORKPLACE AND IN THE WORLD**  
**Undergraduate**  
In this class, the students will master skills for effective interaction in everyday communication as well as in public speaking. The skills of sound production, as well as the different formats of public speaking and the different communications needs they present, will be explored. This course will provide skills in strengthening the articulation muscles to produce clear and precise sounds. The skills thus obtained will allow you to explore effectively and take ownership of your voice. These skills are needed in ordinary everyday communication, and most importantly in your professional career, whether it is business, teaching, broadcasting, public relations, politics, human resource, customer service or sales.

**AI 239**  
**DANCE AS EXPRESSION OF CULTURE: SALSA DANCING**  
**Undergraduate**  
Ever since the foundational work of Margaret Meade in the 1950s, cultural anthropologists prefer to leave the library and go into the field to experience a new culture by engaging with its language, arts, and/or customs. People who travel to new places and respond to the local art in its natural setting know the power of experiential engagement with another culture. This course offers students a similar opportunity to embrace and express the values of other culture in an enjoyable way but without the need of a passport. Since the beginning of recorded history and almost certainly before, cultural groups around the world have produced some sort of rhythmically structured physical movement, often but not always set to music, in order to express essential things about themselves and their values. Dance is one of the oldest of art forms. As an eternal and universal mode of expression, dance is one of the most powerful conduits for cultural values. In this class students will be exposed to forms of the art of salsa dancing and the Latin American cultural contexts that produced those forms. They will study and also express the values of the cultures that gave us salsa as they participate in culture infused medium of dance.

**AI 240**  
**ITALIAN AMERICANS IN FILM AND LITERATURE**  
**Undergraduate**  
This course will address the roles Italian Americans have played in the cultural development of the United States from the mass immigration of the end of last century to the present, and the subsequent friction between Italian American lifestyles and the values of the dominant American culture. Students will read and analyze fiction by Italian American writers from a range of materials including the well known works of Mario Puzo and Gay Talese, and the less commonly appreciated short stories of Helen Barolini. Films which deal with Italian American issues and modes of living will also be discussed. Film discussion topics include immigration, assimilation, religion and society, and the concept of home among Italians and Italian Americans. Students will examine how history shapes culture, and how ancient ideas influence our ability to analyze problems in the new world.

**AI 241**  
**WRITING MOJO**  
**Undergraduate**  
Blending critical thinking with creative thinking is where the Mojo happens in writing. The goal of this class is to help students produce works of creative nonfiction that are academically sound as well as reflective and captivating. It integrates research, personal/social relevance, and creative expression. This course could be taken as a companion to Advanced Elective, Advanced Project, Externship or Research Seminar, since the final product can be designed to comprise all or part of the written component of those courses.

**AI 242**  
**THE FILMS OF WOODY ALLEN**  
**Undergraduate**  
This course uses the films of Woody Allen to explore the distinctive aspects of the filmmaker's world view, his attitudes about women, and his influence by and upon American popular culture since the 1970s. The class features weekly film screenings, discussion, and projects.
AI 243  
LAUGHING MATTERS  
Undergraduate  
Humor, in this course, students will trace Humor types, effects and styles, and how they can enrich, strengthen, and heal. We will review various Humor concepts and models, including early instructional/educational, bio-psychological, birth order, special talents, and socio/community-based theories. We will profile various types and timing of identifiable Humorists (such as Billy Crystal, Bob Newhart, Steve Allen, Bernie Mac, Lucille Ball, Charley Chaplin, Richard Pryor, Lily Tomlin, Steve Martin, Chris Rock, David Letterman, Whoopie Goldberg, Carol Burnett, Jonathon Winters, Judi Drench and others).

AI 244  
CATHOLIC SOCIAL ETHICS  
Undergraduate  
Students in this course will learn about ethics by examining the shifts in Catholic ethics during the twentieth century and by comparing and contrasting Catholic social thought with conventional wisdom. Students will study what church leaders and theologians are saying today about human dignity and human rights, about the common good and our individual and collective moral responsibility and this will be contrasted with Catholic teaching a century ago as well as with the conventional order (the dominant ethical perspective on social issues today). We will consider the dynamics of power and justice in America from the critical perspective of the tradition of Catholic social justice, examining the tradition of Catholic social teaching emergent late in the 19th century and spanning the 20th century: labor rights (trade unions, just wages, safe working conditions), religious freedom, racism, a consistent ethic of life, liberation theology, war and peace, economic justice, sexism, ecology. We will discuss Catholic social teaching in the context of the religious pluralism and American public life. You may register for only one competence.

AI 245  
PERFECT WORLDS: UTOPIAS IN LIFE AND ART  
Undergraduate  
What would the world be like if you could do a full makeover? How would you like life to be for you personally and what would you like to see institutionally? How should the world be governed? Who should care for children? How should housing be arranged? How should work be structured and valued? What is the role of religion and spirituality? Utopias? are attempts to create in a unified vision the perfect answer to these questions. They have been written about and attempted for centuries. But no two have been the same. We will examine how others have envisioned a perfect world and reflect upon our own preferences. We will look first through the lens of Utopian literature commencing with Sir Thomas Mores’ Utopia (1515) and then at the landscape of several Utopian experiments. We will discuss the merging of scientific and philosophical analysis in the 19th and 20th centuries that led to a revived and animated focus on the potential perfectibility of human societies from Saint Simon to Marx. And then we will look at the great Utopian experiments of the 19th Century, the Transcendentalists, Owenites, Mormons and Shakers. We will look at the concepts and pitfalls of Utopias as a set of philosophical questions about shaping the future of human societies. Utopian thought helps as to focus on the critical and often unarticulated issues at stake in social planning. It raises provocative questions for those involved in civic professions, as well as for armchair philosophers and futurists.

AI 246  
CLOTHING, FLESH AND BONE: THE HUMAN BODY ABOVE AND BELOW THE SKIN  
Undergraduate  
This course examines the human body in all its aspects. Topics include: the religious body, the body in medicine and science, the cyber body and other technologies, the presentation of self/class/gender/culture/race through the body, the body as art and the images of the body in art. We devote 25% of the class to hands-on project work in the art studio and another 25% spent at the Art Institute, the Field Museum, and the Museum of Science and Industry.

AI 247  
STAGE IMPROVISATION AND GAME PLAYING  
Undergraduate  
Improvisational comedy is social commentary or personal expression made immediate by spontaneous dramatization. Students will learn the games that form a context with which, or from which, to improvise. Then, they will improvise; they will play in their own and in each others’ improvised sketches. They will learn to solve problems, find metaphors and examine improvisation as an excellent tool with which to monitor the process of learning. Additionally, students will acquaint themselves with the history of this freest of forms. From the engagement in the games and their analysis will come the most important outcome: the growth of confidence.
**AI 248**

**BOB DYLAN'S BACK PAGES**

*Undergraduate*

During the 1960s, Bob Dylan produced a body of work that has, for forty-odd years, been widely regarded as extraordinary. Dylan made his mark as a new kind of songwriter, one who eschewed Tin Pan Alley professionalism in favor of rootsy grit and rhapsodic versifying; as a singing star who made a virtue out of not having a "good voice" or a pretty face; and as a performer who, in both live and studio settings, could charm, inspire and outrage audiences (sometimes all within the span of the same few minutes). In addition, Dylan's sixties music was adopted by political activists and bohemian youth as the soundtrack of social change, such that, in the words of critic John Rockwell, "his albums...defined a community." Meanwhile, Dylan cheekily described himself as just "a song and dance man" and soon traded the role of generational spokesperson for a series of enigmatic personae that called into question many of the assumptions informing popular, high and mass-media culture of the period. In this course we will examine Dylan’s sixties output closely and in cultural context. Moreover, we will use it as a lens to focus on questions such as: What is 'folk' music and can it exist in a consumer culture? When we call certain musical sounds, gestures or textures 'authentic', what do we mean? Can popular music be a vehicle for politics? Are rock lyrics poetry? Can you tell the truth through a mask? Along the way, we will encounter thinkers, poets and pickers such as Woody Guthrie, Oscar Wilde, Hieronymus Bosch and Blind Lemon Jefferson. We have Bob Dylan to thank for making a syllabus like that possible.

**AI 249**

**AFRO-AMERICAN CULTURAL HISTORY**

*Undergraduate*

From the days of slavery to the present, the cultural contributions of the African-American in the areas of literature and folklore, music, art, and theatre have helped shape and define the American identity. The impact of their creativity on American life has been, and continues to be, far-reaching. This course will illuminate the cultural history of the Afro-American. It will follow a lecture/discussion format, using slides, recordings, and selected readings. In addition, students will supplement their learning through individual research and documentation of approved topics.

**AI 250**

**CHINA: CHANGING ROLES OF INDIVIDUALS**

*Undergraduate*

For two millennia, the philosophy of Confucius (551-449 BCE) had provided the moral and intellectual basis for the roles of individuals and the educational system in Chinese society. In the formative years of the current Communist regime, a serious attempt was made to rid China of its cultural foundation, which was exemplified in Mao's Cultural Revolution (1966-1976). With the recent economic development in modern China, the study of Confucius School is back in vogue, with the full backing of the current government. This course will introduce the students to the basic teachings of Confucius and evaluate how they define individuals and their roles in society for more than 2000 years. A flavor of the Chinese Cultural Revolution and how individuals were treated during that period of political persecution and chaos will be obtained through readings and video clippings. The course will also examine the comeback of Confucius ideology to the mainstream and compare the current Chinese educational system with our American system. Through class discussions, students are encouraged to explore the function of education in preparing the roles of individuals in society and how globalization today is changing them both in China and the U.S.

**AI 251**

**F.A.I.L.: FUNDAMENTALLY, ABSOLUTELY, INTEGRAL TO LEARNING**

*Undergraduate*

Do you ever feel as though "FAIL" is a four-letter word? Is "FAIL" one of those bad words that you were taught never to say? Is it a word you dare not experience? Do you go through life trying to avoid this four-letter word at all costs? If so, is there a dream, a value or a vision for your life that your fear of failure has prevented you from achieving? If you answered yes to any of the above questions, then this is the course for you. As John Maxwell notes in his book Failing Forward, we are not properly taught to effectively fail. In most circumstances the only thing we learn about failure is that it is something that must be avoided. And yet success, in most occasions, cannot be attained without experiencing failure along the way. Instead of offering more ways to avoid failure, in this class you will learn to see and use failure as a stepping stone, rather than a roadblock, to success.

**AI 252**

**TODAY’S SUCCESSFUL BUSINESS MANAGER**

*Undergraduate*

This course will provide students with a foundation that will help them deal with ethical issues arising in business today. It will first provide an overview of where ethics fits within philosophy, examine some of the important ethical frameworks, and describe how to apply them. It will then describe best practices for how companies and managers can excel in today’s business climate, and illustrate them via relevant corporate examples. All of this will provide students with the skills they need to deal with ethical issues as managers.
AI 253
DIGITAL STORYTELLING
Undergraduate
Students analyze examples of digital storytelling on the web and discuss the role digital forms of storytelling play in historical, social, political, educational, professional, and personal change and memory. Students explore storytelling first through writing and then through use of image, audio, and/or video. They will learn the creative process of digital storytelling, which involves planning, story development, audio/visual/textual design, editing, and presentation on the web. This course does not require prior knowledge of audio/visual/video/web editing software or html.

AI 254
RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II
Undergraduate
This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today.

AI 255
SELF EXPLORATION: INSIDE OURSELVES, OUTSIDE WITH OTHERS
Undergraduate
Exploring the self can be a very personal and satisfying experience, but can also provide clues as to how you interact with others, accomplish daily tasks and become a more happy, productive and respected individual. This course guides you through a self reflection process in a collaborative learning mode where you will learn about yourself, share the process with a learning partner and observe the trends and conclusions of the class. This course will operate in a unique blended format with three required meetings which will link students in the classroom to other students taking the course online in a synchronis chat format. You will have the option to attend either on campus or online for the scheduled meetings.

AI 256
WORKPLACE AND PROFESSIONAL ETHICS
Undergraduate
This hybrid-learning course is open to all DePaul undergraduates. It provides a thorough grounding in the theoretical and applied nature of work-based ethical decision-making. We engage the tenets and assumptions of four major ethical perspectives, using them to examine the meanings and implications of morality in professional life. Using the tools of reason, we investigate obstacles to ethical decision-making in one?s and others? professional behavior, and apply our learning in the writing of a personal ethical code.

AI 257
ENGAGE FOR CHANGE: GET INFORMED, INVOLVED AND CONNECTED
Undergraduate
Name your cause. Whether it is the death penalty, reproductive rights, cancer advocacy, heart disease, homelessness, social security, welfare reform, marriage equality or the environment most people would like to see the world change in some way. The reality is that not everybody has found a way to engage in their community and make their voice heard. Students will engage in personal and collective reflection to explore their own learning styles and the experiential learning process. They will learn how everyday citizens can organize to make sure the issues that matter to them can be addressed at city, state, and national levels. The course will utilize speakers, discussion, learning journals, readings, action assignments and small group exercises to provide an environment where students can explore their own beliefs and perspectives on social change, democracy, citizenship and the process of government in the United States.

AI 258
GLOBAL MOVEMENTS IN THEATRE: MODERN, AVANT-GARDE, POSTMODERN AND CONTEMPORARY TRENDS
Undergraduate
This Bridge course explores theatre practice and theory from 1850 to the present. Topics include the rise of independent theatre, play censorship, popular entertainment, avant-garde theatre and contemporary theatre. Through readings of dramatic literature, viewing of video and attendance at live performances, this course examines eclectic forms of global theatre, linking current practice and theory with enduring theatre traditions. Reading and in class videos encompass a diverse selection of eastern and western plays. Included in this course are engaging field trips to local theatres to view live theatre performances. Can be taken for up to 3 competences. Faculty: Patrizia Acerra
AI 259
WORK IN THE FUTURE: HOW SCIENCE FICTION HAS PREDICTED OUR WORKING LIFE
Undergraduate
In this course, we will explore what Science Fiction says about our world. We will cover how our futurists project human ethics, workplaces, economic issues, government, individuals, gender, race, environment, and technology. We will also ask ourselves what purpose the futurist writing serves and how various predictions made by past writers of Science Fiction have stood the test of time. In considering the future through the lens of literature, learners will draw analogies to today's workplace and world, and will consider how we might begin to shape the future ourselves. After all, if science fiction is providing a snapshot of the future, should we be behaving differently today?

AI 260
SHARPENING THE SAW: CREATIVITY AND THE WRITER'S TOOLBOX
Undergraduate
Stephen Covey, author of Seven Habits of Highly Effective People coined the phrase, ?Sharpening the Saw,? which ?means preserving and enhancing the greatest asset you have--you. It means having a balanced program for self-renewal.? https://www.stephen Covey.com/7habits/7habits-habit7.php. For writers, no matter how new or experienced they may be, there's always a need to ?self-renew.? Every blank page is an invitation to enhance one's writing asset, for with each blank page or new assignment the writing process begins again. What, then, are the tools successful writers use to enhance their writing abilities, sustain their momentum, refresh their creativity and renew their resolve? What writing tools are better suited for creative writing, business writing, journaling, or memoir? What tools do we already have that may only need repurposing or remembering?

AI 261
PERMEABLE BORDERS: REPRESENTATIONS OF GENDER IN THE 20TH CENTURY
Undergraduate
In this Bridge course we will examine the ways depictions of gender in art and literature are indicative of changes in the way we perceive gender. We will explore these depictions through a combination of analytical and creative activities. Our readings will include Orlando by Virginia Woolf, selected poems and creative writings by Gertrude Stein, Langston Hughes, T. S. Eliot, Quentin Crisp. Our readings of creative work will be supplemented with readings of cultural theory and philosophy including excerpts from Lyotard's Libidinal Economies, Deleuze and Guattari's Anti-Oedipus and Judith Halberstam's In a Queer Time and Place. This course will give students the opportunity to practice several types of writing, including journals, essays, research papers and creative writing (including flash fiction and poetry.) The class assumes a basic understanding of English grammar and composition. Students can register for up to 3 competences.

AI 262
GLOBALIZATION AND THE IMPACT OF TECHNOLOGY
Undergraduate
This course focuses on current affairs regarding globalization as a world system of operation in society. The course aims to clarify our notion and understanding of globalization by looking at the impact that technology has had in the way we conduct our lives. Throughout this course students are asked to read and reflect upon different technologies that we have seen affecting the way in which people communicate. The central idea to broaden our perspective about globalization is that one of the most important and significant activities that we do as humans is to communicate. Therefore, our focus of study will be centered around communication technologies widely used in the world, potentially continuing to change our lives even more.

AI 263
THEIR EYES WERE WATCHING GOD: THE LIFE AND WORK OF ZORA NEALE HURSTON
Undergraduate
Zora Neale Hurston, adult learner, writer, folklorist, playwright, and storyteller, was an amazingly gifted woman. Her novel, Their Eyes Were Watching God, is a recognized classic. A legend in her own right who Alice Walker ranks with Bessie Smith and Billy Holiday, Zora Neale Hurston has been a beacon for students interested in learning about Black life and culture. Students in this class will immerse themselves in the literature by and about Zora Neale Hurston and will create research projects that connect their learning with their own scholarly interests.

AI 264
PASSING ON TRADITIONS
Undergraduate
In this course, we will investigate our perceptions, understandings and feelings about the world. will reveal connections to the past by emphasizing non-traditional ways of knowing and learning. Students will examine how traditions or collections of beliefs are passed on by researching an individual or groups of people from the past or present. Working individually or in groups, students will create an oral presentation and research paper. Source material can include diaries, journals, or historical books. This experience will help students to reflect on the traditions in their lives in order to come to terms with past and present realities.
Is the love of money, the root of all evil? Why is so much of the world's population living in poverty? What is the difference between ethics and morality? What do the world religions say on the acquisition and use of money? Are Capitalism and free markets in conflict with moral business practices? In this class, we will explore all the above issues and related topics, such as the treatment of the poor in every country. Students will be encouraged to suggest research topics within the scope of the class. Our concentration will be on United States and Western Europe's monetary practices and the effects that they have on social and governmental policies. Since we live in a global world, the influence of other countries on our monetary system and economy will be examined. The wars in Iraq and Afghanistan, as well as the European debt crisis of the PIIGS (Portugal, Italy, Ireland, Greece and Spain), clearly show how our stock markets react to problems in Europe. The Middle East conflicts affect the price of our oil. All of these activities are driven by the lack of or acquisition and choice in spending money. The definition of just what is morality will be our starting point. This class is a combination of philosophy of money as well as the practical application of its use.

Ethical decisions are often difficult to make, not because there are no right choices, but because there may be several right choices. This course will go beyond WHAT is right or wrong to examine WHY we say something is right or wrong. In the first part of the course, students will gain the intellectual tools and insights to lay bare their own reasoning processes and those of others. In the second part of the course, students will apply these tools to a consideration of the ethical issues raised by the high technology of current health care.

"The unexamined Life is not worth living," exclaimed the Greek philosopher Socrates, setting the tone for philosophical quests that have shaped out thought and civilizations. "Neither is the examined one," retorted German philosopher Schopenhaurer 2,300 years later after surveying the prospects of the modern world. This course will outline the philosophical tradition of rational thought that stretches in between these thinkers. Students will focus on how the great thinkers and traditions East and West considered ethical, metaphysical, epistemological, political, and aesthetic problems. And they will engage in a philosophical examination of their own life and beliefs.

Chicago has earned a varied international reputation for its gangsters, architecture, railroads, political machines, stockyards and industries. But for many around the world, Chicago is best known for its writers and literature. By the turn of the 20th century, Chicago was heralded as the "literary capital of the United States" and it is still home for great writers. Students will read two novels or books of poetry to explore Chicago's history, characters, problems, and images. The class will trace literary movements and explore elements of structure, character, plot and style in fiction and poetry.

This course is designed to engage students in the art of playwrighting in order to discover the essential nature of drama on stage and in life. By reading and viewing plays, students will be encouraged to reflect on the apparent contradiction between "universal truth" and individual experience. In addition to appreciating the structure and ethos of drama, students will learn to identify the "why" behind any play and to use drama as a means of creating and telling stories.

The purpose of this course is to develop an awareness, understanding and analysis of the Chicago-area built environment. Architectural, public art, urban design and urban planning elements, techniques and issues will be presented with downtown Chicago as the primary study area. Specific architectural and development plans will be analyzed from various perspectives, such as: historical, social, technical, functional, aesthetic and symbolic. The development of Chicago's commercial architecture, and its contribution to modern architectural theory and practice, will receive special emphasis.
AI 271
THE ART OF PAPERMAKING
Undergraduate
Paper is everywhere. We use it to read about the latest news, to wrap birthday presents, and to leave ourselves little sticky reminders. You can find paper almost anywhere and chances are, you have a lot of it lying around your house, lurking in drawers and clogging up your recycling bin. It is one of those commodities that we take for granted. Can paper be art? Can it be the result of creative thinking? Can it be beautiful? Learners in this experience will learn about paper and its history, and will participate in the ancient art of papermaking. While examining the definitions of art and creativity, students will experiment with papermaking techniques, and will create their own works of paper art. The Art of Papermaking focuses on creative processes and art making. This will be, necessarily, an experiential process. Most of the class time will be taken up with experimenting with art materials and with employing the roles of color and design in works of art. Students should prepare by wearing old clothes to class and should expect to get their hands dirty.

AI 272
SUPREME COURT DECISIONS
Undergraduate
In this course, students will be challenged to research the factors contributing to major Supreme Court decisions. This will include a study of the ethical systems which run throughout the court’s history which we categorize as a liberal or conservative court. In looking at our government structure and the three branches of government, most people select the presidency as the most powerful branch. This class will allow students to see the effects that Supreme Court Decisions have on society for many generations and even centuries. One needs only to think of Brown vs. The Board of Education and Roe vs. Wade to realize the huge amount of power resting in the Supreme Court. Supreme Court judges are appointed for life. Their influence can span many decades. They are not accountable to the average citizen. They retire at their will and have tremendous power. After this class students will have a different outlook on which branch of the government affects society the most. The course will include a study of the structure of our judicial system leading up to the Supreme Court. We will begin with local courts in cities or counties, progress to state courts and then federal district courts culminating in the Supreme Court. Students will have a much better understanding of this branch of our government. At a macro level, the students will be able to trace ethical systems back to our founding fathers and explain how the systems and values have changed since then.

AI 273
JUSTICE AND POLITICS: THE TRADITIONS OF POLITICAL PHILOSOPHY
Undergraduate
Are politics ever just? Should they be? What is justice? Throughout the ages, philosophers and statesmen have provided different answers to these fundamental questions. This course will explore the role of justice in politics, using as a guide the best known works of two great thinkers in the tradition of political philosophy. Plato’s Republic and Machiavelli’s The Prince appear to offer two very different answers to the questions of justice, and politics. By exploring their works, students will grapple with these questions, probe Plato’s and Machiavelli’s differing approaches to the role of justice in politics, explore their own conceptions of these critical issues and wrestle with the role of justice in current political events. Students will also gain an introduction to the tradition of western political philosophy as reflected by two of its most influential thinkers.

AI 274
WRESTLING WITH THE ANGEL: GOD, SEX, AND THE GUILTY CONSCIENCE IN LITERATURE
Undergraduate
Humans have always had an impulse to worship a God (or Gods). Humans have always been irresistibly drawn to sexual self-expression. Pervasive throughout history is this fascinating paradox: the God whom we worship condemns the sex we crave. Guilt is our link between the sacred and the profane. The triangulation of religion, sexual desire, and guilt has long been the concern of artists and writers. This course examines this phenomenon in such literary masterpieces as Nathaniel Hawthorne’s The Scarlet Letter, Tony Kushner’s Angels in America (Parts 1 and 2), and William Shakespeare’s Measure for Measure. We will also study poetry, literary criticism, and relevant excerpts from sociological, theological, and psychological texts. In addition to participating in class discussions and presentations, students will be required to submit a final paper and a ten-entry journal.

AI 275
INTRODUCTION TO CREATION SPIRITUALITY
Undergraduate
This course provides an overview of Creation Spirituality, a movement that draws on ancient spiritual traditions and contemporary science to awaken authentic mysticism, revitalize Christianity and Western culture, and promote social and ecological justice. Creation Spirituality teaches that God permeates all things and that humanity is an original blessing to the earth. In this paradigm, Christ is God’s liberating and reconciling energy, transforming individuals and society’s structures into conduits of compassion. As we embody God’s love, we become the Creation that God intends. Topics to be explored include differences with fall-redemption attitudes, relationships to post-modern world views, and applying insights to personal life and work dynamics.
AI 276
CREATIVE INK: THE ART OF WRITING
Undergraduate
This course will carry students through a series of creative writing experiments aimed at stimulating their imaginations and discovering their literate voices. Students will be exposed to a variety of techniques for story writing, poetry, and avant garde experiments. The course will combine in-class group writing and critical sessions, and individual consultation with the instructor for personal development. Students will also learn how to find outlets for their completed creative work.

AI 277
WRITING FROM THE INSIDE
Undergraduate
A series of dovetailing activities and exercises expose students to an increasingly broadened range of experience with the foundational elements of the writing process. Thus students arrive at an understanding of the creative process in the art of writing through their own writing experiences, as well as through reading and discussion of the writings of others. The context for writing understood as an art will be an interdisciplinary one that will also involve drawing. The students' explorations will take advantage of an arena of peers all sharing the process of personal discovery, and reading and discussing their own work as well as the works of literature together. Students produce a finished writing product of their own in an artistic form which meets the criteria of "art" explored by the class, present the work to the class, and explain their process. They will also produce a written evaluation of one or more writings of their choice in terms of this same criteria.

AI 278
THE LITERATURE OF INCARCERATION
Undergraduate
The U.S. incarcerates well over 2 million people. Proportionally, no other democratic country in the world comes close to this level. Locked away, out of sight and hearing from most of us, this population of women and men is represented by the media in lurid, predatory images. The writing that has emerged from prisoners paints an altogether different picture, however. In this class, we will study several literary texts—short stories, essays, poems—written by women and men who have been or are currently incarcerated. The class will be offered for one competence only and will meet the first five weeks of the quarter.

AI 279
EXPLORING WORLD LITERATURE: THE INTERNAL HISTORY OF HUMAN EXPERIENCE
Undergraduate
This course is about exploration, about discovery, about meaning. Together we will explore remarkable stories of world literature, and together we will discover remarkable worlds that open our lives with meaning. By means of consummate storytelling and remarkable language, respected masters and new and emerging writers, chosen for their literary excellence, will transport us to South America and to the Caribbean to North America; Europe; and Russia to the African Diaspora to the South Pacific to Mexico, Central America and to the Middle East to Mississippi and to Harlem to South Asia and to East Asia. The course will also include short stories from acclaimed Native American writer, Sherman Alexie, who also wrote the screenplay for the academy award-winning movie, Smoke Signals. This course's chosen classic and contemporary masterpieces of short fiction will reflect thematic, aesthetic, and cultural variety: different styles, points of view, and rich diversity of cultural, historical, and gender perspectives. The stories draw us in by powerful images garnered not only from our own backyard, but from the many yards across the globe. Competencies: L7, A1X, A5, H3X, FX. Faculty: Susan F. Field

AI 280
TRADITIONS AND TRANSITIONS: PROFILES IN ADULT LEARNING
Undergraduate
This course is designed to assist learners in investigating the perceptions, understandings and feelings about their lives and the contexts in which they are lived. It will help to reveal connections to the past and conditions shaping the future with special emphasis on non-traditional ways of knowing and learning. Students will choose persons from the past or present and examine how a family and/or cultural tradition is passed on through time, including forces shaping its future form.

AI 281
RITUAL AND EVERYDAY LIFE
Undergraduate
This class will delve into ritual as an experiential, expressive performance of self, culture, spirituality, and ethics. We will be reading, viewing and discussing various examples of ritual forms, both religious and secular, Euro-American and non-Western, and looking at works about ritual performance by anthropologists and performance theorists like Ronald Grimes, Richard Schechner, and Victor Turner. We will also be experimenting with the role of ritual in our daily lives, creating our own rituals and ritual performances. This process will highlight what it means to endow everyday objects and events with sacred significance, and how such an expression of self establishes an essential relationship with community.
AI 282
LEISURE FOR WELL-BEING
Undergraduate
The pursuit of happiness for most people is an important aim in life. A personal feeling of well-being includes "emotional happiness" and the rational satisfaction with one's own life. In this course you will attempt to define the term "well-being" and discover its relationship with other concepts such as mental health and life satisfaction. How does physical exercise influence well-being? How do positive and negative life events influence well-being? Do good social relationships guarantee happiness? Do the expectations one has in life with regard to income influence well-being? Is it important to set goals to achieve a high level of well-being? These and other questions will be addressed in this course. You will try to define some of things a person can do to increase his or her level of well-being. Others' ideas serve as common course content, as presented in the material assigned to this course. You will be asked to participate actively and critically, to work individually and in study groups, using your own experience as a field of analysis and reflection. Active group participation will foster a harmonic, interactive environment, which might increase positive relationships among students and foster a feeling of well-being throughout this course.

AI 283
MEXICO: A PILGRIM'S JOURNEY TO THE CULTURES OF MEXICO
Undergraduate
Participants in this program will travel to one of the most significant centers of Catholic pilgrimage in the Americas: the Basilica of Our Lady of Guadalupe, the most visited Catholic shrine in the world. They will join countless numbers of other pilgrims from all over the world who come to Mexico City around December 12th for the festival of Our Lady of Guadalupe. In addition, the group will tour other major sites of this great world city such as El Zocalo, the Metropolitan Cathedral, and the Dolores Olmedo art gallery. In the Templo Mayor and National Archeological museums, students will learn to recognize and interpret symbolism in these collections of the most important works of Pre-Hispanic Art and artifacts in the world. To provide immediate context for the variety of sites visited, expert guides will accompany the group to introduce students to the historical and cultural context of what they have seen. Added to this rich immersion into Catholic Mexico's religion, culture, and history will be an exploration of the cultures of much older residents of this region: the mighty Aztecs and their mysterious predecessors, the civilization known only as ?the Elders? that built and used the famous pyramids of Teotihuacan (?The Land of the Gods?). Our modern pilgrimage to Mexican culture past and present will culminate in a visit to the Fiesta de la Virgen de Guadalupe. The combination of experiential learning and history, of homestays and pilgrimage, makes this program a brief but rich encounter with some of the great cultures of central Mexico, past and present. At the conclusion of the program, students will be invited to reflect on the rise and fall of civilizations, on vibrant living communicates, and on the search for meaning in all its manifestations. The group will be hosted by faculty and staff at Mexico City's Universidad de Panamericana, and accompanied by SNL faculty member.

AI 284
THE BRAVE NEW WORLD OF MARKETING COMMUNICATIONS
Undergraduate
This course will help students understand and successfully navigate through the brave new world of marketing communications and advertising: a world of segmented audiences, fragmented media channels, technology and interactivity, online communities, and on-demand media, where brand building has emerged as a business imperative. Students will learn which principles of traditional marketing communications are in, which are out, and the new ones that have emerged. We will read books and articles and examine the Internet, e-commerce, experiential marketing, consumer-generated content, branded entertainment, search, music and mobile channels. Through the process of creating marketing communications programs utilizing these channels, students will also gain skills in collaborative learning and creativity. Competencies Offered: A5, H2G, S3F, FX

AI 285
WORK, PLAY AND REST: INTEGRATING THE FRAGMENTS
Undergraduate
Life has become fragmented. In our modern lives, we strive to maintain work, play and rest in separate realms, within which we work hard, play hard, and even rest hard, all in the hope of finding balance. But when work invades play, and rest is sacrificed for either one, it might be time to shift the paradigm of separateness we have sought to maintain. This course will explore ways we can integrate the fragments of our lives in order to find more fulfillment, balance, satisfaction, and consequently relief both within these three arenas and in the "gray areas" in between. Learning will occur in two modalities, each of which will enhance the other: experientially-based guided movement, storytelling and vocal activities from the improvisational practice of InterPlay?, and the study of literature (articles, books, websites and videos) concerning mind-body awareness. Through the in-class practices of InterPlay?, students will explore how stressors are held in the body, and define for themselves which aspects of creative expression help to release what no longer serves. Basic movement, storytelling and vocal activities will be introduced in an incremental way, with no prior experience necessary. The focus will be on both individual expression and collaborative possibilities, and personal as well as community and organizational applications will be explored. In our study of the science behind mind-body awareness through class discussions and written assignments, students will explore the application of concepts in conjunction with the experiential model offered by the InterPlay? practice. Part practical activities, part reflection, and part synthesis of defined concepts and models, students will be asked to come to this class as willing participants and identify what methods and systems are applicable to their own lives, and what from their unique vantage point? could constitute elements toward a new model of health and wholeness.
AI 286
NEW ORLEANS IN SONG, STORY & STRUGGLE
Undergraduate
The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, r&b, zydeco and funk. We will situate these art forms in social and historical context and examine the complex creative processes which have shaped them. We will become familiar with innovators and icons such as Louis Armstrong, Professor Longhair, Clifton Chenier, the Neville Brothers and Dr. John. We will also read works by literary artists who have a background in and/or fascination with New Orleans, including The Awakening by Kate Chopin; A Streetcar Named Desire by Tennessee Williams; and Mumbo Jumbo by Ishmael Reed. Moreover, we will consider the role played in American history and imagination by New Orleans as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level.

AI 287
THE PRACTICE AND SPIRIT OF CREATIVE WRITING
Undergraduate
When I teach writing, I often interchange the word "writing" with the word "life." Writing is life. But many have forgotten. Author Georgia Heard writes in her book Writing Toward Home, "There are many times when I've felt that I had nothing valuable to say. That real writers were other people. It has taken me a while to believe that the way I feel each day, and the way others speak when we're least self-conscious, is where writing comes from. When we speak in a language that is ours and tell our own stories and truths - - this is where writing comes from."

AI 288
POWER AND LEADERSHIP IN PUBLIC SPEAKING: MANAGERIAL COMMUNICATIONS
Undergraduate
When you are trying to sell an idea or product, your presentation must be specific and detailed, convincing and authoritative. This course will teach students to develop and deliver exciting and effective presentations. Through numerous individual short presentations and one final major presentation, students will learn how to overcome such speaking problems as nervousness, eye contact, understanding the audience and its culture, questions and answers, effective use of graphics, distractions, time control and how to handle troublemakers. Through the use of flip charts, overheads and computer-generated graphics and videos, students will learn to effectively organize their material to communicate their subject material to the audience. Students will need a basic understanding of computer software such as PowerPoint, database spreadsheets and access to the Internet for research. Students will develop an appreciation of the complexity of the communication process and the choices facing the communicator.

AI 289
ACTION FILMS: HONG KONG AND HOLLYWOOD
Undergraduate
In this course students will compare and contrast action films completed in Hong Kong and Hollywood.

AI 290
MEN AND MASCULINITY
Undergraduate
This class is an introduction to the history, roles, and social expectations of masculinity in the United States. Its starting point is the social construction of gender, and the origins of ideas about "masculine" and "feminine" behaviors. We look deeply into the social, economic, political and cultural forces that shape views of gender. The class draws upon a wide array of literature, poetry and perspectives on boys, men, social roles and masculinity. Just as the feminist movement showed girls and women the vast array of possibilities in a "feminine" world, so, too, does this course consider the possibilities of the "masculine" world. We will particularly explore research that addresses the experience of contemporary boys; their struggles and the painful issues they must face on their journey to manhood in American society.
AI 291
TRAINING DEVELOPMENT
Undergraduate
This five week course will address the development of instructional methods and materials consistent with the purpose, audience, and context of a specific training need. Students will learn how characteristics of adult learning and adult learners can converge with principles of instructional design to create effective and dynamic training materials. Students will demonstrate competence through the design of training methods and materials. * Successful completion of Training Design is required prior to registration. Students may register for only one competence.

AI 292
EONS AND ARTS II: MANIFESTATIONS OF CULTURE
Undergraduate
This course will connect specific historical eras in Western culture with representative art forms so students can gain cultural insights. Particular attention will be paid to artifacts in the Chicago area. Students will analyze the relationship between popular art and movements in history through lecture, readings and discussion. We will also address contemporary cultural issues, including how later peoples will judge our values based on our arts.

AI 293
THE HORROR FILM
Undergraduate
The horror film has introduced and popularized many of the cinema's most unique stylistic innovations, especially in the areas of camerawork, lighting, color, sound, point-of-view, and editing. The genre also helps us to understand how filmmakers construct surprise and suspense to maximize the viewer's emotional involvement and response to film narratives. This course introduces students to the language of film analysis by studying a number of representative films in the horror genre. We will also examine the social and cultural dimensions of the "fear" response that horror films exploit so strategically. We will read exciting theoretical work discussing the reasons for the genre's widespread appeal. Weekly in-class film screenings include the following: Psycho (Hitchcock version), The Texas Chainsaw Massacre, Halloween, Scream, The Cabinet of Dr. Caligari, and Suspiria. Students will give class presentations and write papers on topics tailored to their interest in the genre.

AI 294
THE PRACTICE OF PEACE
Undergraduate
In the midst of war, what does it mean to practice peace? How might you and I work to practice peace? We will explore some of the principles, practitioners and practices of nonviolent peacemaking, allowing for debate and discussion. We will explore personal, interpersonal and political peacemaking. We will examine power relationships and dynamics inherently at tension in the practice of peace. We will read the works of contemporary peacemakers, such as Maread Corrigan Maguire, Jodi Williams, and Thich Nhat Hanh, as well as seminal figures in the peace movement, such as Martin Luther King, Jr., Mahatma Gandhi and Dorothy Day. We will have guest lectures from local and international peace practitioners and discuss various ways of practicing peace on personal, local and global levels.

AI 295
SHADES OF GRAY: MORALITY AND ETICS IN FILM
Undergraduate
In the early days of movies, people flocked to the theater to see the good guys (white hats) triumph over the bad guys (black hats). As the art of cinema evolved, the characters and the ethical issues they faced became more challenging and complex. Through in-class screenings and related readings, this course will examine films whose themes strongly concern the depiction of ethical and moral choice. We will discuss the ways in which the film makers create meaningful ethical dilemmas; how the characters' choices are portrayed; and how these portrayals may influence our own formulation of value systems and ethical choices.

AI 296
STAGE PLAY(ING)
Undergraduate
The plays the thing... A play is action, play, conflict, resolution, motion, emotion, live now. A play is crafted for the stage, not for the page. What we find on the page is a script, a guide to the play, not the play itself. The course will explore the play (and playing) in as many of its dimensions as we can discover. Students will read about reading scripts, and then read them to see the play as it could come to be. We will put together scenes, sketches, stories, and/or short plays; as well as improvise, role play, and act in our own work as well as in the work of established playwrights. Students will take the study to the theater to see what works and what doesn't work on the stage. The class will work and play together and apart and let the creative imagination take us where it will.
AI 297
WOMEN'S WISDOM AND THE POWER OF PERSUASION
Undergraduate
In this course of fulfilling our private and public lives, we draw on combinations of our knowledge and experience (wisdom) and capacities to be persuasive. The alliance of wisdom and persuasion goes back to early Greek philosophers who formulated them as subjects for men, but not for women. More contemporary perspectives suggest that men and women may bring differing palettes to the artistry which weaves persuasion and practical wisdom. This course will examine emerging theories on the stages of “knowing,” and their philosophical roots, and the application of this developing knowledge to many facets of professional and personal life. Students will utilize case studies, discussions, readings, self-explorations and other activities to analyze systems of thought regarding the development of values, knowledge, and persuasive skills with a particular emphasis on women's perspective and experiences. The role of media shaping attitudes, motivation, and decision-making processes will be explored through the images and metaphors conveyed to and about women. The course will offer and opportunity for understanding the roots of many of our values and perspectives on women's approaches to knowledge and persuasion.

AI 298
THE ITALIAN RENAISSANCE
Undergraduate
From the thirteenth to the sixteenth centuries, the Italian peninsula was the center of a new age of human discovery and expression. With the unfolding of ancient philosophies, the Catholic Church's temporal and spiritual control over Western Europe faltered. This age changed the meaning of political power, art, literature, science, and religious life. New perspectives lifted the horizons of thought and artistic expression. What meaning and value do these issues have for the contemporary person? By exploring the richness of Renaissance culture, this course attempts to answer the following questions: What happened on the Italian peninsula during the Renaissance? Who were the principal players? How did this period influence western civilization, particularly with respect to learning? What does the Renaissance mean today? Why, indeed, does it play such a major role in contemporary consciousness of the arts, literature, politics, and science? While the general focus of the material is the Renaissance in the Italian city states, the course concentrates on the rise and fall of the Medici family in Florence. Cosimo, Lorenzo, Piero and Giovanni de' Medici (Pope Leo X) were instrumental in the development of this spectacular age in Western Civilization. Learners will also confront our own time with respect to issues raised in the Italian Renaissance.

AI 299
ELEMENTS OF FILM AND TELEVISION: AN AESTHETIC APPROACH
Undergraduate
There's more going on in a film or TV show than the story! Understanding aesthetics principles allows both consumers and creators to experience film and television on deeper levels—both intellectual and emotional. While aesthetics classes in the philosophy department are concerned with the connection between “beauty” and “truth”, this course will be primarily concerned with basic visual language. Students will learn how to interpret the medium's aesthetic elements by decoding its visual language, thereby building strategies for their own creative visual thinking. By exploring a variety of genres--- narrative films, television dramas, documentaries, even commercials--- we will develop criteria to help us see beyond the obvious text. Working within the limitations of the medium, we will learn how to manipulate and exploit the aesthetic elements at our command to obtain desired effects. The course will culminate with each student producing an integrated project.

AI 313
RACE AND IDENTITY IN AMERICAN THEATER
Undergraduate
This course will explore issues of race and racial identity in American society through the medium of theater. Students will examine a diverse range of theatrical pieces and consider the social and political context for each work as well as the impact each has had on American culture. The class will also view a play on these themes at a Chicago theater.

AI 314
ART: INSIGHTS FROM THE INSIDE
Undergraduate
Understanding art and artists is the result of gaining insight into the artist and his/her relationship to the society in which he/she lives, as well as the process of artistic creation itself. The production of contemporary Western art is the result of over three thousand years of evolution within a framework which can be traced to the ancient Greeks. This course will trace that evolution and engage the student in opportunities to experiment with various media to provide insights into artist's work. With the help of a series of videotapes, students will be taken on a "journey" from the earliest Greek monuments to the art of the present day to explore artistic styles, forms, and subjects as they have changed through the ages. Students will do hands-on creating with pen and ink, water colors, and clay as a means of experiencing the role of media and the decisions which artists have to face in the course of their work.
AI 315
CREATIVITY AND IMAGINATION
Undergraduate
Is there a specific mental procedure that gives rise to the making of new inventions, new scientific and mathematical discoveries, new philosophical systems, and new works of art? If so, it remains as mysterious today as a thousand years ago. In this course we will compare and critically evaluate a range of theories about human invention and creativity, both classic and modern - from ancient conceptions of divine inspiration and “creative madness” to recent hypotheses in the fields of evolutionary psychology, cognitive science, and artificial intelligence. We will test these theories by (a) applying them to our own past experience with creative endeavors and (b) by determining to what extent the theories can adequately explain the emergence of particular inventions, scientific or mathematical breakthroughs, or works of art. The course will introduce the thought of a range of important theorists on the creative process - from Plato to Freud - and also weigh the contributions and examples of prominent artists, scientists, and inventors, including Archimedes, Newton, Mozart, Milton, Poe, Van Gogh, Poincaré, Edison, and others.

AI 316
SPIRITUALITY AND HOMELESSNESS
Undergraduate
This course will examine the broad issue of homelessness by providing students the opportunity to reflect upon a service learning experience at a community-based organization that serves the homeless population in Chicago. Students will explore what can be learned about themselves as reflective practitioners, service learners, and spiritual human beings when reflecting upon this experiential learning process. Through the class discussions, assigned readings, invited speakers, and journal assignments, students will reflect on their own beliefs and perceptions of homelessness and analyze the history, causes, and policy associated with this societal problem.

LL 302 is a prerequisite for this class.

AI 317
EONS AND ARTS I: MANIFESTATIONS OF CULTURE
Undergraduate
This course will connect specific historical eras in Western culture with representative art forms so students can gain cultural insights. Particular attention will be paid to artifacts in the Chicago area. Students will analyze the relationship between popular art and movements in history through lecture, readings and discussion. We will also address contemporary cultural issues, including how later peoples will judge our values based on our arts.

AI 318
GRASSROOTS THEOLOGY
Undergraduate
This course offers students the tools needed for a critical reflection of their own assumptive world view of various churches and to probe methods of change which can be applied to these churches enabling them to better serve their people. We will not compare religions; the focus is on the theology behind religions. Once students examine their assumptive worldview, through theological reflection, they will compare values with other class members as well as those of various churches. Each student will choose a given church and engage in critical reflection to examine potential changes needed within that institution. Students will learn about theological reflection, explore skills needed to make changes within a community or church and engage in small group work. Students will also assess and critique themselves and each other.

AI 319
UNDERSTANDING SOCIAL RELATIONSHIPS FROM AN AFRICAN-CENTERED PERSPECTIVE
Undergraduate
This course will utilize an African-centered framework to examine the nature of social interactions within the African-American community, with a focus on female-male relationships, parenting, and the place of elders in the family. Students will examine the role of culture and racism in the historical development of these social relationships while identifying possible solutions to alleviate tensions experienced within the examined relationships. Guest lecturers, readings, discussions and written assignments, a learning journal, and individual paper or project will comprise the learning experience.

AI 320
NONFICTION WRITING: THE MEMOIR
Undergraduate
Your own memories and experiences can be the basis of the nonfiction memoir, but to be effective such writing must do more than just recite facts or label feelings. How do you create a vivid, exciting piece of writing from the events of your life? This class explores the nonfiction memoir, with special emphasis on the spiritual autobiography. Students will read selections from contemporary memoirs as well as a full-length book of their choosing; the final project is a short personal memoir.
AI 321
AMERICAN WRITERS AND TECHNOLOGY
Undergraduate
This course will examine American attitudes toward nature, industrialization, technology, our character as a people, and our national destiny, especially as reflected in recent films, science fiction, and classic literature like Walden and Leaves of Grass. In addition to the views of popular fiction writers (e.g. Twain and Vonnegut), students will also sample the responses of American poets and painters to a remarkable series of cultural innovations and technical breakthroughs - from the first railroad and telecommunications networks to the development of computers and nuclear arms.

AI 322
PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS
Undergraduate
An introduction to moral philosophy with emphasis on the conflict between "moral relativism" (or "subjective" ethics) on the one hand and "moral realism" (or "objective" ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world.

AI 323
ART AND PERSONAL TRANSFORMATION
Undergraduate
Adults often go through periods of profound transition. Many of us search for answers, models, or mentors to help us make sense of the changes. This course deals with ways in which art can be a means of personal transformation, a vehicle for helping us understand the deeper dimensions of our life journeys. Through exposure to artistic representations of significant turning points in human experience, and by studying perspectives on change drawn from various disciplines, we will explore ways in which art both mirrors and facilitates the process of transformation. Students will approach selected works of art (literature, music and visual art) to explore ways artists have represented themes of transformation. In addition to developing competence in art analysis, we will investigate whether our own personal values are reflected in the works studied, and what role art plays in our lives. Students will keep learning journals recording their impressions and reflections about class readings, discussion and multi-media presentations.

AI 324
CREATORS AND CREATIVITY
Undergraduate
Creative energy, application and results are prized and sought in our culture, yet are rarely understood clearly or analyzed systematically. In this course, students will explore various creativity concepts and models, including early instructional and educational, bio-psychological and socio / community-based theories. We will analyze creativity conditions in the expressive domains of art, architecture, music, literature, science, and invention. We will profile identifiable creators such as Picasso, Frank Lloyd Wright, Mozart, Virginia Woolf and Einstein, along with contemporary geniuses such as novelist Toni Morrison, activist Barry Commoner, sculptor Nina Holton, playwright Arthur Miller, and astrophysicist Subrahmanyan Chandrasekhar, and review their creativity over successive life stages. As a result, students will gain creative insight and develop strategies to incorporate creativity in their academic, occupational, and personal lives.

AI 325
"MAKE `EM LAUGH!": HOLLYWOOD FILM COMEDY
Undergraduate
This class delves deeply into the history of Hollywood comedy as well as theories of comedy, and is divided into two parts. Part one explores theories of comedy, both formal/aesthetic (the elements of artistic form) and socio-cultural (philosophical and psycho-social theories of comedy). The second part of the course explores historical developments in Hollywood comedy in terms of the development of artistic form (performance, verbal and visual gags, narrative structure, visual style), the film industry, and questions of socio-historical impact. Students can also opt to learn how to write a comedic screenplay. Films and artists to be discussed include the Marx Brothers, Mae West, Mel Brooks, Blazing Saddles, The Royal Tenenbaums, The Seven Year Itch, Charlie Chaplin, Buster Keaton, The Philadelphia Story, Hairspray, and There's Something About Mary.

AI 326
LIVING FROM THE INSIDE OUT
Undergraduate
In this course, students design practices to create space in their busy lives through leisure, spirituality, and creativity. It helps the adult growth and development that occurs as people change throughout adulthood. This course makes time to think in order to experience how our outer and inner worlds interact to help us make meaning for our lives. Students will use a combination of reading, practices, small group work, guided imagery, journaling, and reflection papers to articulate and demonstrate understanding of the competences.
AI 327
MYTHS, SIGNS AND SYMBOLS
Undergraduate
Students will be encouraged to understand their own relationship to myths, signs and symbols and to see how these have shaped their lives in the past and how they can be sources of empowerment for the future. Topics will include: archetypes and private symbols; language as symbolic action; myths of creation and fall; the hero's quest; myths of death and resurrection; myths and the process of individuation, that is, the integration of the self. Students will have assigned readings, keep a journal, and create a final project.

AI 328
THE PERSONAL JOURNAL
Undergraduate
This course will provide participants the opportunity to experience and explore journal writing as a creative activity that contributes to the quality of one's life. While the primary model of expression for most journals is writing, participants will be encouraged to experiment with sketches and other media. Participants will choose topics and readings consistent with their registered competencies. Key approaches to understanding adult growth and development will provide a framework for much of the writing done in the course. Participant journals will be laboratories for examining the creative process, the contribution of leisure to quality of life, and various theories of adult development. Through keeping a personal journal intensively through the course, participants will gain insights into their own creative processes and their understanding of leisure as they compose their individual lives.

AI 331
LEARNING TO LOOK THROUGH DRAWING AND DISCUSSION
Undergraduate
The purpose of the class is to connect the making of art with the study of art history, so that an understanding of the elements, concepts and vocabulary of art connect directly to the student's experience as he or she learns to draw. Students will learn basic skills of drawing and become familiar with a range of drawing media. They will gain an experiential understanding of the elements of line, form, value, color, and composition. Students will also examine drawings and paintings of artists working in France between 1800 and 1930, covering the art movements of Romanticism, Realism, Impressionism, Post Impressionism, and Fauvism. Each student will choose two artists to research, and will write a paper comparing biographical and historical issues of those artists' work.

AI 333
ARTISTIC ISSUES IN INSTANT IMAGE PHOTOGRAPHY
Undergraduate
The aesthetic, cultural, intellectual, historical, and technical issues that animate contemporary photography will be explored through the use of Polaroid pictures created by class members using their own Polaroid cameras. Photographic ideas will be presented, discussed, and addressed in classroom critiques of the images created. Personal artistic visions will be explored, encouraged and revealed. Students will learn a language for discussing these pictures and develop the necessary personal and intellectual distance from their own artistic creations in order to critically analyze them.

AI 334
WORLD ART AND CULTURE: A MUSEUM BASED EXPLORATION
Undergraduate
Most people who visit the art museum gravitate to those galleries where the art is familiar and in some ways comfortable, like the Impressionists or the Renaissance. Yet, the art museum can be a repository for so much more, if only we knew where to look and what to look for. This course is designed to introduce students to the art and cultures of societies outside of western civilization using the resources of such institutions as The Art Institute of Chicago, the Field Museum, the Mexican Fine Arts Center Museum and others. Students will be introduced to objects from China, Japan, Africa, India and the Middle East, as well as Native America. In a world which continues to grow increasingly smaller because of technology, one of the best ways to understand it people is to study their art and their culture. Student will demonstrate competence through reading and writing assignments and are required to attend field trips.
**AI 335
MIDSUMMER RITUALS: SCIENCE AND MYTH**

**Undergraduate**

Using the language of cultural anthropology, this course explores the diverse myths, rituals and festivals of the ancient world that begin with the tilling of soil in early spring and end with the great harvest in late fall. Of particular interest will be the lingering manifestations of these old rites as they have endured into contemporary life and the meaning they still hold in the modern psyche. We will be looking very closely at the long history of metaphoric, personified depictions of the life-force of planet Earth, including its most recent incarnation from scientist James Lovelock in the guise of "the Gaia Hypothesis". The class will address itself to the following questions: 1. In what ways does the natural world influence the narrative structure of meaning? 2. How does the scientific description of reality shift mythic metaphor? 3. How does scientific "meaning" differ from religious "meaning"? 4. What is the function of these seasonal celebrations the psychic maintenance and renewal of society? 5. What is the pedagogical and psychological function of these types of celebrations to the individual within society? 6. How has science impacted the ability of the community to sustain its mythic, religious and ethnic holiday traditions? Can only be taken for one competence.

**AI 336
CONTEMPORARY MUSIC AND ART IN AMERICA**

**Undergraduate**

The artist stands between the world in which she/he lives and the product of his/her work - while using a particular medium to grasp and communicate an image and vision of that world. This course will survey and compare seminal ideas and trends that have taken place in music and the visual arts during the past forty years. Emphasis will be on how these two art forms responded to the same set of social circumstances and how artists in different media realized both parallel and divergent concerns. Some of the artists that will be compared and discussed include John Cage and Robert Rauschenberg, Earle Brown and Alexander Calder, and Philip Glass and Donald Judd. Wherever possible illustrations will be drawn from film, literature, dance, and other arts. Students will develop the tools and confidence to compare works in different media in order to gain insights into how artists, through similar formal concerns, arrive at results which are appropriate to their media. The course will try to develop the student's awareness of artist's social concerns primarily through their own perceptions and inferences and, secondarily, through reading artists' statements and writings.

**AI 337
FROM REVERENCE TO RAPE: THE DEPICTION OF WOMEN IN AMERICAN FILM**

**Undergraduate**

This film course will examine the portrayal of women in Hollywood films from early silent films to the present and will attempt to understand those roles against the norms of society at the time. It will begin with the virgins, vamps, and flappers of the silent era as played by Lilian Gish, Mary Pickford, Theda Bara, Gloria Swanson, Greta Garbo; transition to the strong roles of the 1930s and 1940s as played by Mae West, Bette Davis, Katherine Hepburn, Joan Crawford, and Barbara Stanwyck; continue with the 1950s and 60s contrast between sex kittens and external virgins; show the breakdown of the Production Code in the 1960s and 70s; and watch the resurgence of strong women in the 80s as exemplified by Sally Field, Jessica Lange, Jane Fonda, Meryl Streep. Close attention will be played to the conflict between box office and the struggle for women - actresses, writers, directors, and producers to gain control of the screen.

**AI 338
RACE, RACE RELATIONS, RACISM: BREAKING BARRIERS AND BUILDING BRIDGES**

**Undergraduate**

How do we as an ethnically and racially diverse country go about the business of understanding and healing the wounds of racism and building bridges that will allow the gift of diversity to flourish in the United States? Further, what are the connections among U.S. racism and other forms of racism such as ethnic cleansing and "pacification programs" aimed at indigenous peoples around the world? In this course, we will explore the historical, economic and political roots of racism globally and nationally. In addition, we will look at the changes brought about by the civil rights movement, and ongoing work in the nation and in Chicago aimed at bridging the gaps caused by racism. Through discussion, readings, films, debate, guest panels, and field excursions, students will study a variety of topics. Because the course will focus not only on analysis, but on building bridges, the instructors hope to enroll an ethnically and racially diverse class membership.

**AI 339
A HISTORY OF PHOTOGRAPHY**

**Undergraduate**

This course uses photography since its invention in 1839 to give form to the social and historical ideas that have shaped our time. By discussing large picture-making areas like portraiture, images of war, the natural or constructed landscapes, scientific documentation and personal expression, the class will examine those ideas and technologies that have shaped photography and, conversely, events shaped by their depiction as photographs. Students will study and actually enjoy the history of the medium via slide and textbook. The class, as a group, will visit gallery and/or museum exhibitions to enhance classroom work. The photographs will be linked to the social, political and intellectual currents of the time and place that surround the art to give that work added meaning and enhanced viewer understanding. Through the art seen in this course and the historical facts gained from the lecture and text, the student will refine and advance their understandings and interpretations of past and recent global history. No prior formal or academic knowledge of 19th or 20th century history, the history of photography or painting is necessary nor is a working knowledge of any art-making discipline assumed.
FROM SOUNDS TO SCIENCE: CLASSICAL MUSIC THROUGH THE AGES  
Undergraduate
The history of music is a history of changing values and patterns. What values societies foster are directly correlated to perceivable uses of melody, rhythm, and timbre. This course will survey and compare major periods of Euro-American music, beginning with Gregorian Chant and ending with John Cage. Historical documents and readings in aesthetics will supplement musical examples presented in class. Students will be presented with a listener's guide to major works of the most prominent composers, as well as a bibliography for further reading. Students will also be informed of relevant concerts in the Chicago area. Through listening, background reading, and discussion, students will learn to “read” music. Pattern perception is a skill in its own right. Statement, variation, and contrast are means of structuring the physical, verbal, and temporal world around us. Students will develop pattern perception in music in order to translate this skill into life's other media.

ETHICS AND ARGUMENTS  
Undergraduate
This course introduces the main traditions in ethical thinking and provides students with moral reasoning skills to take and defend ethical positions on concrete issues. Students will examine various traditional bases for morality, among them virtue, duty, rights, contract, utility, and religion. They will learn to distinguish ethical from other values, and be able to justify the distinction. But in a world of action, merely knowing what is ethical is not enough. Students will select current ethical issues of personal interest, developing theory-based strategies for addressing those issues in a morally responsible way.

PERSPECTIVES ON AMERICA  
Undergraduate
This course explores a variety of perspectives on what it means to be an American in the modern world, looking through polarities such as: urban and suburban life, localism and globalism, high culture and mass culture, corporate society and populism. Considerations of various media such as television, movies, and newspapers, as well as study of artifacts.

INTRODUCTION TO AMERICAN SOCIAL HISTORY AND CULTURE  
Undergraduate
This course will provide an overview of American History designed to provide a one-quarter overview of American history and culture. It will provide an overview of the central themes of American History from the colonial period to the present with a focus on social, popular, and cultural history.

AMERICAN EXPERIENCE I: EARLY AMERICA TO 1860  
Undergraduate
The first of the three-course sequence that forms the American Studies core. Like all the courses in the sequence, it focuses on how to do American Studies by using a variety of materials and projects that center on a particular historical period (in this case, early America before the Civil War). The course utilizes multiple methodologies, primary sources, a range of texts, and material and visual culture to examine the competing themes and diverse voices that form American experience during the era. Formerly AMS 201.

AMERICAN EXPERIENCE II: FROM 1860 TO 1941  
Undergraduate
The second of the three-course sequence that forms the American Studies core. Like all the courses in the sequence, it focuses on how to do American Studies by using a variety of materials and projects that center on a particular historical period (in this case, from the Civil war to just before World War II). The course utilizes multiple methodologies, primary sources, a range of texts, and material and visual culture to examine the competing themes and diverse voices that form American experience during the era.

DePaul University  Winter/Spring/Summer 2014-2015  Page 349 of 1563
AMS 215
AMERICAN EXPERIENCE III: FROM 1941 TO PRESENT
Undergraduate
The third of the three-course sequence that forms the American Studies core. Like all the courses in the sequence, it focuses on how to do American Studies by using a variety of materials and projects that center on a particular historical period (in this case, World War II to the Present). The course utilizes multiple methodologies, primary sources, a range of texts, and material and visual culture to examine the competing themes and diverse voices that form American experience during the era. Formerly AMS 202.

AMS 220
AMERICAN BUDDHISMS: RACE AND RELIGIOUS DIVERSITY
Undergraduate
This course critically analyzes the origins of Buddhism in the United States in order to fully understand how and why Buddhism has flourished in Asian and White American communities, and to understand the conflict and controversy surrounding the racial dynamics of religious choice.

AMS 230
ASIAN AMERICAN HISTORIES
Undergraduate
This course introduces the pre-1965 comparative histories of people of Chinese, Japanese, Korean, Indian, Filipino, and Southeast Asian ancestry from their arrival in significant numbers in the United States beginning in the 19th century. Two questions orient this course: 1) whether there is an historical validity to the category of Asian American, and if so, the extent to which the category is relevant today in light of differences across gender, sexuality, class, ethnicity, and religion, among others; and 2) how the Asian Pacific American experience challenges and redefines American race relations to provide a more complex understanding of existing structures of power. Cross-listed with AAS 200.

AMS 250
IN THEIR OWN VOICES: AMERICAN AUTOBIOGRAPHY
Undergraduate
This course presents a range of American autobiographies, from different places and from times ranging from Colonial to modern. The selected authors represent varying backgrounds and races.

AMS 261
AMERICAN ETHNICITIES 1800-1945
Undergraduate
This course will be an exploration of the development of American ethnic communities and identities in the 19th and early 20th centuries. Students will examine the American experience through the lens of ethnic groups and racialized ethnic populations and consider how ethnicity has shaped and influenced American history. We will study the experiences of American ethnic groups based on historical, social, and poltical factors such as immigration and citizenship, slavery and racialization, gender and patriarchy, religion and family, and the relationships between and among ethnic groups.

AMS 265
PACIFIC WORLD: NORTH AMERICA AND THE PACIFIC, 1776 - 1945
Undergraduate
This course will examine the nature of American identity in the west. Hawai'i and California represent the extreme edge of the American frontier. The focus will be on the shifting meanings of "native" and "stranger:" How did the status of indigenous peoples foster a sense of identity and place for migrants? How did immigrants understand their role in the political economy? How did racial discourses on the frontier shape the shifting definitions of citizenship? How did race affect America's ambivalent approach to imperialism?

AMS 275
HISTORY OF SEX IN AMERICA 1: COLONIAL TO LATE NINETEENTH CENTURY
Undergraduate
This course will provide an overview of the history of American sexuality from the colonial period to the late 19th century.

AMS 276
HISTORY OF SEX IN AMERICA 2: LATE VICTORIANS TO THE PRESENT
Undergraduate
This course will provide an overview of the history of American sexuality from the late nineteenth century to the present.
AMS 280
POLITICS AND HISTORY OF THE VIETNAM WAR
Undergraduate
This course examines both the history of American involvement in Vietnam and the lasting effect on American politics and culture.

AMS 290
AMERICAN VOICES I: TO 1860
Undergraduate
Part one of a two course sequence, this course provides an integrated, multidisciplinary view of American culture and ideas, addressing the questions: "What is America? What does it mean to be an American?" The courses are focused on primary sources, mostly first person narratives and fiction, developing methods for analyzing and interpreting these sources. Students write a series of papers on the narratives; students taking the two course sequence substitute a research paper for some of the narratives papers in the second course, American Voices II.

AMS 291
AMERICAN VOICES II: FROM 1860
Undergraduate
Part two of a two course sequence, this course continues the approach and method of American Voices I.

WRD 104 or HON 100 or HON 101 is a prerequisite for this class.

AMS 295
SPECIAL TOPICS IN AMERICAN STUDIES
Undergraduate
Special Topics in American Studies. Consult schedule for topic.

AMS 300
DOMESTIC STUDIES
Undergraduate
Travel/study courses to various regions of the U.S., combining pre- and post- trip classroom sessions with 7-14 day excursions. Travel portion includes hands on and/or behind the scenes experiences and consideration of how Americans use and understand their national history.

AMS 301
SENIOR SEMINAR
Undergraduate
The Senior Seminar is an integrative course conducted primarily as a colloquium. Emphasis will be placed on discussion and independent research and writing.

AMS 211, AMS 213 and AMS 215 are prerequisites for this class.

AMS 340
AMERICAN POPULAR CULTURE
Undergraduate
This course will focus on the industrial developments, cultural significance and social effects of American Popular Culture institutions and products at the dawn of the 20th century, including the rise of corporate nationalism in live performances such as vaudeville and radio, as well as the development of mass media industries including sheet music, advertising, records, and film. Discussions will include attention to industrial practices, textual properties, and audience reception of these cultural products.

AMS 360
AMERICAN FILM
Undergraduate
Analyzes cultural and cinematic histories and film as a social practice circulating cultural values as well as critiquing ideologies. Students will gain understanding of major critical and theoretical approaches and engage in research, critical thinking, and writing on topic areas. Variable specific topics. e. g. assimilation narratives, war in film, sports in film, Asian American film.
AMS 370
THE MATERIAL CULTURE OF MODERN AMERICA
Undergraduate
AMS 370 combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity in the nineteenth and twentieth centuries.

AMS 371
MATERIAL CULTURE OF EARLY AMERICA
Undergraduate
Combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity in the colonial period and early nineteenth century.

AMS 380
TELEVISION AND AMERICAN IDENTITY
Undergraduate
This course is about how television represents Americans and how Americans have responded to these representations. The course engages in close textual analysis of several television texts, to familiarize students with television industry narrative structures and strategies, examines several specific representational struggles, and surveys and discusses the many ways in which television viewers and fans engage with the text.

AMS 392
INTERNSHIP
Undergraduate
Internship. Majors and minors only. Variable credit.
An American Studies major or minor is a prerequisite for this class.

AMS 395
TOPICS IN AMERICAN STUDIES
Undergraduate
Topics in American Studies.

AMS 396
AMERICAN STUDIES COLLOQUIUM
Undergraduate
These courses are conferences or series on selected topics. Class participants attend and participate in events, keep a reflective journal connecting the events, do related readings, and a reflective summary on the colloquium as a whole. Variable credit.

AMS 398
STUDY TOUR
Undergraduate
An on-site overview of the historical, political, social and economic connections between the United States and a foreign country. Credit variable.

AMS 399
INDEPENDENT STUDY
Undergraduate
Independent Study. Majors only. Variable credit.
An American Studies Major is a prerequisite for this class.
ANI 101
ANIMATION FOR NON-MAJORS
Undergraduate
Course introduces a variety of basic animation techniques for cinema and gaming, such as hand-drawn, cutout, stop-motion and (very basic) 3D, with an emphasis on the use of computer technology. Examples of diverse animation genres and styles (experimental, cartoon, anime, special effects, computer games) from different cultures will be screened and discussed. Students will explore the unique qualities of the medium through a series of hands-on projects that can be adapted to their own personal interests. They will learn about professional animation process (storyboard and animatic) during the production of a final project that encourages them to consider the role and potential of animation in our society.

ANI 105
INTRO TO VISUAL DESIGN
Undergraduate
This course introduces the basic concepts of design for time-based digital media. Students study the principles of composition and color theory, and how these are affected by movement, duration and display. Vector and bitmap manipulation tools are explored in relation to game design, video and Internet production.

ANI 150
AFTER EFFECTS WORKSHOP
Undergraduate
This class will introduce students to the fundamentals of After Effects, including key-framing, compositing and rendering. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects.

ANI 151
FLASH ANIMATION WORKSHOP
Undergraduate
This class will introduce students to the fundamentals of creating animation using Flash, including tweening and frame-by-frame drawn animation. This class does not cover Action Script programming. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects.

ANI 201
ANIMATION I
Undergraduate
This course is an introduction to the art and practice of animation. It is a studio-based class, which will emphasize learning through process, experimentation and creation. Students will explore the limitless possibilities of animated motion in the context of cinema, computer games and the Internet. All genres and styles are within the scope of this class, including Anime, cartoons, computer game art, experimental art and special effects. In addition to how, we will also explore and discuss why, as well as the role and potential of animation in our society and its place in other cultures. This course is designed for the student who wishes to pursue further study in the field, and provides intensive practice of the basic skills and methods through production. PREREQUISITE(S): ANI 105 or GPH 211 or ART 105 or GD 105

ANI 206
HISTORY OF ANIMATION
Undergraduate
This course is an introduction to the history and development of the field of animation. We will explore this subject from various perspectives: by chronology, from its prehistory before the invention of film to the present day; by form, including method and medium; by culture, comparing the US to Japan, Russia, Europe and others; by subject; and by personality, concentrating on the figures who have shaped the art form and continue to influence it through their example. Students are expected to bring an enthusiastic interest in the medium, and to devote serious effort to reading about, viewing, researching and discussing animation and the artists who have created it.

ANI 207
ANIME HISTORY
Undergraduate
This course is an Introduction to the history, development and cultural significance of Japanese animation. We will explore how historical and cultural concepts of Japan have translated to the screen, as well as the influence of economic forces and changing technology. Students will gain an insight into anime's origins and cultural influences through an examination of the World War II, post-war, mid- and late-twentieth-century historical periods of Japan. This class will analyze particular examples of anime and anime artists in their historical context, emphasizing the use of primary sources.
ANI 220
STORYBOARDING AND NARRATIVE DEVELOPMENT
Undergraduate
This class will focus primarily on storyboarding and the aesthetic and practical uses of research, treatments, drawings, and found images as tools in the production of animations, films and game cinematics. Students will complete a series of assignments that will utilize different methods of finding inspiration to make a cohesive, narrative work. Various methods used in both commercial and independent productions will be presented as examples, and pre-production work from both live action and animated films will be viewed throughout the quarter. Students will create several storyboards for short films, write treatments, and research design options. PREREQUISITE(S): ANI 101, ANI 201 or DC 110

ANI 222
ILLUSTRATION FOUNDATIONS
Undergraduate
This course will focus on improving the basic skills needed for creating concept art and storyboards for animation and games. Areas of focus include practical perspective, technical rendering, observational drawing and color theory. These skills will be applied in basic prototyping projects. PREREQUISITE(S): GD 105 or ANI 105

ANI 225
GRAPHIC NARRATIVE
Undergraduate
This course introduces students to the components of graphic narrative, including superhero and alternative comics, comic strips, manga, and graphic novels. Students will learn fundamental materials and techniques, including penciling and inking, digital painting and coloring, and publishing, and create their own graphic narratives. The course will also provide an overview of the history of comics and graphic storytelling, and their relation and importance to the art of animation. PREREQUISITE(S): ART 106

ANI 230
3D DESIGN & MODELING
Undergraduate
Students will use computer modeling to explore the principles of 3-dimensional design. Projects involving object, character and architectural modeling will emphasize the aesthetic concepts of spatial proportion (scale, angle and position), silhouette, negative space, rhythm, balance, light/shadow and texture. Students will emerge with the ability to create well designed 3D models, and be familiar with the basics of polygonal modeling, texturing, lighting and rendering for animation, computer games and cinema. PREREQUISITE(S): None

ANI 231
3D ANIMATION
Undergraduate
This is an introductory course in 3D animation. It will emphasize traditional animation principles as applied to 3D animation. Topics will include: principles of animation, storyboarding, transformations and deformations of 3D objects, rigging, camera and light animation. PREREQUISITE(S): ANI 230

ANI 240
ANIMATION PRODUCTION I
Undergraduate
This course will concentrate on facilitating the student's production of animation projects. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the student's work, with the choice of animation technique, content and form left to the individual. Students will learn the importance of bringing projects to completion. PREREQUISITE(S): ANI 101 or ANI 201 AND sophomore standing

ANI 260
MOTION GRAPHICS
Undergraduate
This course will introduce the student to effective communication using motion graphics, including its application in the areas of film titles, broadcast and commercial design, interactive media, and gaming. The combination of music, visuals and typography will be explored following the basic theories of kinetic composition and aesthetics. Students will study the history of the field, including the work of pioneers such as Norman McLaren, Saul Bass and Len Lye. PREREQUISITE(S): Sophomore Standing and one of the following: ANI 105, ANI 101, GD 105, ART 105, GPH 211, DC 205
ANI 300
3D CHARACTER ANIMATION
Undergraduate
This course applies traditional animation principles to creating stylized 3d characters. Topics will include: anatomy, character modeling, skeletons, skinning, kinematics, rigging, walk cycles, facial animation, and muscle deformations. PREREQUISITE(S): ANI 231 or GPH 338

ANI 301
ADVANCED 3D CHARACTER ANIMATION
Undergraduate
This course introduces advanced concepts in 3D character animation that are necessary for achieving professional quality results. Students will hone their skills through the study of advanced techniques for animating multiple characters, creating continuity, and building character through performance. An emphasis will be placed on the exploration of movement for developing personal style. PREREQUISITE(S): ANI 300

ANI 310
MOTION CAPTURE
Undergraduate
This course is a workshop focusing on realistic character motion obtained through motion capture. Students will learn the motion capture pipeline, including character skinning and mapping, planning and directing motion capture sessions, applying motion to a character and motion editing. PREREQUISITE(S): ANI 231 or GPH 338

ANI 315
AUDIO FOR ANIMATION
Undergraduate
This class will explore concepts and practical techniques students need in order to address many of the unique challenges associated with creating audio for animated films. Students will begin with an introduction to audio production before moving on to build practical skills for both field and studio recording. Lectures, readings, and hands on projects will give students a working knowledge of how to approach and create the immense range of styles of audio for animated films, from classic cartoon soundtracks to the live action style mixes of many of today's animated Hollywood blockbusters. Students will complete several audio projects including a multi-track mix for an animated short. PREREQUISITE(S): ANI 240

ANI 320
HAND-DRAWN ANIMATION
Undergraduate
This course is devoted to the complex aspects and techniques of classical drawn animation required to create convincing movement, frame to frame consistency, and character acting. Beginning with a review of the fundamentals and progressing to more complicated techniques, students will learn how to create unique and technically accomplished drawn animation as well as methods for its eventual clean-up, inking and coloring. Contemporary uses of digital technology to enhance production will be emphasized. PREREQUISITE(S): ANI 201 (or ANI 101) and ART 106

ANI 321
ANIMATION MECHANICS
Undergraduate
Students in this course will rigorously investigate the foundational aspects of animation through traditional and digital methods. Basic principles, including timing, spacing and the abstraction of movement, will be analyzed and questioned through experimentation. Students will experience how the process of making work can be used to generate emergent ideas, and be challenged to push the art form beyond the accepted conventions. PREREQUISITE(S): None

ANI 322
ANIMATION STYLES & TECHNIQUES
Undergraduate
The history of animation is explored with a focus on inspiring the students' own work. Students will be involved in an intense study of animation throughout history and around the world, and are required to view a large amount of work outside of class. Animations will be grouped by time period, theme, and/or technique. Through writing and group discussions they will examine the significance of the technique and subject matter. They will put this study into practice by creating short animated films based on their reactions to the films. PREREQUISITE(S): ANI 240
ANI 324
STORY DEVELOPMENT
Undergraduate
Students will elaborate on the skills from ANI 220 to create sophisticated pre-production for their own films, game cinematics and animations. Emphasis is placed on advanced story development, professional artistry and pre-visualization techniques such as converting a script to visual story reels or animatics. Students will complete the course with a fully-developed animatic for the story of their choosing. PREREQUISITE(S): ANI 220

ANI 325
VISUAL STORYTELLING
Undergraduate
This class focuses on storyboarding and animatics as key pre-production tools for animation, film, and game development projects. Areas of focus include narrative development, drawing, performance, and editing. Students will apply these techniques to create an animatic: a comprehensive time-based draft for a short film. PREREQUISITE(S): ANI 240

ANI 326
VISUAL CONCEPT DEVELOPMENT
Undergraduate
This course focuses on visual development and style guides for animation, cinema and game projects. Coursework involves character design, environmental design, prop design, lighting, color, texture and layout. Students will practice visual research, drawing and an array of digital tools to build the skills necessary to create an immersive world with a cohesive look and feel. PREREQUISITE(S): ILL 200 and ANI 230

ANI 330
3D CHARACTER MODELING
Undergraduate
This course will instruct students in the process of 3D polygonal based character modeling. Students will learn professional techniques for building quad-based polygon meshes with an extra emphasis on proper topology to help prepare their model for rigging. Students will learn complete UV unwrapping for the entire figure as well as effective techniques for advanced texturing. PREREQUISITE(S): ANI 230 or GPH 250

ANI 332
3D RIGGING
Undergraduate
Students will study the processes and techniques for creating professional quality character rigs. Following a professional production workflow, students will create character skeletons, learn aesthetic and technical considerations for skinning, learn techniques for optimal parameterization, and learn to construct character animation controls. PREREQUISITE(S): ANI 231

ANI 333
ADVANCED 3D RIGGING
Undergraduate
This course will teach students inorganic rigging of vehicles and machines as well as advanced techniques for characters such as blend shape facial expression setups and squash and stretch. Additional topics will include quadruped rigging and 3D scripting for creating user interfaces and automating complex processes. PREREQUISITE(S): ANI 230 and ANI 231

ANI 336
3D MODELING STUDIO
Undergraduate
Students in this course will broaden and improve their overall skill set by learning a range of modeling techniques. Students will complete several smaller projects that cover topics including speed modeling, efficient low-poly modeling, hard surface modeling, projection texturing, and advanced UV unwrapping techniques. The course will culminate in a final project in which the student will propose and complete an advanced model of their own design. PREREQUISITE(S): ANI 230 or GPH 250

ANI 337
ENVIRONMENT MODELING
Undergraduate
This course covers the planning, production and implementation of environment models for games. The term "environment model" includes landscape, exterior architecture, interior architecture, and both organic and man-made props. Topics include visual art direction, setting mood, developing narrative and cinematic lighting strategies. After creating assets in a modeling program, students will implement them in a game engine editor to learn about game engine requirements, limitations and pipeline. Prerequisite: ANI 230
ANI 338
3D ORGANIC MODELING
Undergraduate
In this course students will learn to create highly detailed creatures, characters, and props for both film and games. Students will learn a variety of techniques for working with high density polygon meshes and 3D painting in order to generate detailed texture and normal maps. This course will combine a traditional approach to sculpting and a foundation in human anatomy for quick generation of concepts for 3D models. An emphasis will be placed on developing efficient pipelines to streamline the entire process from modeling to rendering. PREREQUISITE(S): ANI 230

ANI 339
3D TEXTURING AND LIGHTING
Undergraduate
Students will study the processes and techniques for texturing and lighting in 3D. Procedures including preparing models for texturing, creating and manipulating shading networks, laying out UV's, and painting textures will be explored. Topics in lighting will be approached from the foundation of traditional cinematography with a focus on driving both mood and story. Students will utilize complimentary skills in lighting and texturing to create high quality renders for both still and moving images. PREREQUISITE(S): ANI 230 or GPH 250

ANI 340
ANIMATION PRODUCTION II
Undergraduate
Students will build on the skills learned in Animation II, and produce more ambitious projects. They will be expected to exhibit sophisticated technique, storytelling and content, and work to develop as creative artists through self-critique. The successful planning and completion of projects on time is essential. PREREQUISITE(S): ANI 220 and ANI 240 and junior standing

ANI 341
ANIMATION PRODUCTION III
Undergraduate
This course asks students to create a short animated film. Students are expected to demonstrate a high level of technical skill with animation and to exhibit maturity in concept development and storytelling. Successful planning and project management is critical. PREREQUISITE(S): ANI 340

ANI 344
VISUAL DESIGN FOR GAMES
Undergraduate
The stages of development in the visual direction of a video game will be identified and detailed, and students will participate in the creation of the visual art direction of a product, giving special attention to the design of 3D models and animation. Visual Design for Games topics include: creating visual direction, concepting, art bibles, art production, and post-production strategies. Students will create proposals, create concepts, iteratively create artwork, and analyze competitive products. PREREQUISITE(S): ANI 105, GD 105, GPH 211 or ART 105 (or equivalent 2D design experience)

ANI 345
CHARACTER DESIGN
Undergraduate
Students will be introduced to various methods of creating interesting and original character designs for animated films and games, and then put these approaches into practical use. Methods of creative concepting will include drawing, collage, sculpture and 3D mock-ups. Fundamental visual design and color principles will be stressed, along with the basics of caricature. Students will utilize their character designs in an animated short. PREREQUISITE(S): ANI 230

ANI 350
ANIMATION PRODUCTION STUDIO
Undergraduate
This course uses the animation studio model to create a group project from start to finish. Students learn about the division of labor needed to produce larger projects as they experience working with others on a team. PREREQUISITE(S): ANI 240
ANI 351
ADVANCED MOTION CAPTURE STUDIO
Undergraduate
This course will enable students with motion capture experience to advance their technical skills and gain experience with practical application in the motion capture studio. Emphasis will be placed on advanced skinning and mapping techniques as well as complex motion capture sessions involving sets, props, and multiple actors. Students will be required to plan, arrange, and direct their own sessions in the motion capture studio. PREREQUISITE(S): ANI 310 or ANI 450

ANI 352
3D SCRIPTING
Undergraduate
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. PREREQUISITE(S): ANI 230 and ANI 231

ANI 353
ADVANCED 3D SCRIPTING
Undergraduate
In this course, artists and game designers will learn to use scripting to develop advanced tools and to automate complex processes for animation, modeling, and pipeline development. Through weekly projects students will learn to read, modify, and author scripts in order to bridge the artistic and technical features of a high end 3D software package. PREREQUISITE(S): ANI 352

ANI 355
STOP MOTION ANIMATION
Undergraduate
The principles of stop motion character animation in real space are the emphasis of this intermediate level course. Students are introduced to basic armature building, lighting and scene composition, and the designing and fabrication of characters with a variety of materials. Contemporary uses of digital technology to enhance stop motion production will be explored. PREREQUISITE(S): ANI 201 (or ANI 101)

ANI 356
EXPERIMENTAL ANIMATION
Undergraduate
This course introduces strategies for an experimental approach to animation. Students will study how experimentation relates to both concept and technique, and examine the work of classic experimental animators. This is a production class that requires students to produce a series of short animations in a variety of processes and styles. PREREQUISITE(S): ANI 201 or ANI 101

ANI 360
ADVANCED MOTION GRAPHICS
Undergraduate
This course builds on motion graphics fundamentals covered in ANI 260 Motion Graphics. In Advanced Motion Graphics, students will work to develop a better understanding of how to develop a distinct visual style in both personal work and in work for clients. The course also focuses on gaining familiarity with contemporary styles and trends in professional motion graphics, and an awareness of Chicago-based motion graphics production. PREREQUISITE(S): ANI 260

ANI 364
ANIMATION RESEARCH SEMINAR
Undergraduate
This seminar introduces students to animation in the context of interdisciplinary thinking and creativity. Students will discuss their learning experiences across disciplines in the University, and practice making connections between this learning and their study of animation. PREREQUISITE(S): None
ANI 365
CINEMA, ANIMATION, AND ART
Undergraduate
This seminar course focuses on animation and cinema from the standpoint of Modern and Contemporary art. Students study the major styles and themes of historical experimental film and video, and relate these topics to contemporary animation and independent cinema practices. Emphasis is placed on theory and criticism, and how it informs experimental work. Students are expected to discuss work and theory in a seminar setting, and to engage the class material in several research papers. PREREQUISITE(S): DC 233

ANI 366
3D MOVIE PRODUCTION
Undergraduate
This course provides an introduction to stereoscopy which is the creation of a 3D effect in still images and movies. The course covers the history of stereoscopy, the perceptual theories that make 3D images possible, and the technologies that can be used to create the effect of stereoscopic depth. Designed for both animators and live-action filmmakers, students taking this course will get hands-on experience producing stereoscopic images and movies using a variety of tools. PREREQUISITE(S): ANI 230 or DC 275

ANI 370
ACTING FOR ANIMATORS
Undergraduate
This is acting training designed specifically for the needs of animators, as opposed to stage actors. Utilizing lecture/discussion, examination/deconstruction of animated and live-action film clips, home assignments and a few simple in-class improvisations, this course provides the animator with the skills necessary to deliver dynamic animated character performance. Assessment measures include oral and written reflective analysis, short animated character sketches and class participation. PREREQUISITE(S): ANI 240

ANI 375
DEMO REEL AND PORTFOLIO WORKSHOP
Undergraduate
Students review previous course projects and prepare a final portfolio/demo reel and a resume in preparation for job interviews and/or graduate school. Students will also learn presentational techniques and methods for career development. PREREQUISITE(S): ANI 340 or DC 310 or GAM 392

ANI 376
POST-PRODUCTION WORKSHOP
Undergraduate
This 2 credit course guides students through the final stages of post-production and completes the Animation Capstone sequence. Students will work closely with faculty to meet the needs specific to their Capstone projects. This workshop will also focus on distribution for completed films, including film festivals, online forums, and gallery exhibition. PREREQUISITE(S): ANI 395

ANI 378
3D DYNAMICS
Undergraduate
This course will provide an introduction to dynamic simulation and effects in 3D animation. Topics to be covered include hair & fur, fluid dynamics, smoke & fire, particles and cloth. An emphasis will be placed on how these effects can enhance an idea or narrative, establish mood, or even be used as a basis for experimental animation. Students will use traditional animation and visual design principles as a basis for creating several small projects. PREREQUISITE(S): ANI 230 and ANI 231

ANI 379
3D COMPOSITING
Undergraduate
This course is designed to allow advanced compositors and animators to merge the 2D, 3D and/or live-action video worlds, drawing from a combination of techniques such as motion tracking, compositing, rotoscoping, hand-drawn, cut-out and 3D animation. The goals are to go beyond simply achieving technical proficiency, as we will also focus on learning principles of good animation in preparation for both artistic and commercial endeavors. PREREQUISITE(S): ANI 231
ANI 390
TOPICS IN ANIMATION
Undergraduate
Advanced study in animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 101 or ANI 201 or consent of the instructor.

ANI 393
TOPICS IN 3D ANIMATION
Undergraduate
Advanced study in 3D animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 230 or consent of the instructor.

ANI 394
ANIMATION PROJECT I
Undergraduate
This production-based course is the first half of a two-course sequence that provides the student with an Animation capstone experience. These courses connect the student's Animation coursework with their overall Liberal Studies coursework through three components: class lectures and discussions, independent analysis and reflection, and the creation of a significant animation project. Students will employ the knowledge they have learned and the skills they have acquired in all their Animation courses to date to produce a significant animation project. The course sequence is designed to be taken in two consecutive quarters. PREREQUISITE(S): ANI 340 and Senior standing

ANI 395
ANIMATION PROJECT II
Undergraduate
Continuation of ANI 394. This production-based course is the second half of a two-course sequence that provides the student with an Animation capstone experience. These courses connect the student's Animation coursework with their overall Liberal Studies coursework through three components: class lectures and discussions, independent analysis and reflection, and the creation of a significant animation project. Students will employ the knowledge they have learned and the skills they have acquired in all their Animation courses to date to produce a significant animation project. The course sequence is designed to be taken in two consecutive quarters. PREREQUISITE(S): ANI 394

ANI 399
INDEPENDENT STUDY
Undergraduate
Independent study form and consent of instructor required. PREREQUISITE(S): Consent of dean.

ANI 420
HAND-DRAWN ANIMATION
Graduate
This course is devoted to the complex aspects and techniques of classical drawn animation required to create convincing movement, frame to frame consistency, and character acting. Beginning with a review of the fundamentals and progressing to more complicated techniques, students will learn how to create unique and technically accomplished drawn animation as well as methods for its eventual clean-up, inking and coloring. Contemporary uses of digital technology to enhance production will be emphasized. PREREQUISITE(S): ANI 201 (or ANI 101)

ANI 421
ANIMATION MECHANICS
Graduate
Students in this course will rigorously investigate the foundational aspects of animation through traditional and digital methods. Basic principles, including timing, spacing and the abstraction of movement, will be analyzed and questioned through experimentation. Students will experience how the process of making work can be used to generate emergent ideas, and be challenged to push the art form beyond the accepted conventions. PREREQUISITE(S): None
ANI 422
ANIMATION STYLES & TECHNIQUES
Graduate
The history of animation is explored with a focus on inspiring the students' own work. Students will be involved in an intense study of animation throughout history and around the world, and are required to view a large amount of work outside of class. Animations will be grouped by time period, theme, and/or technique. Through writing and group discussions they will examine the significance of the technique and subject matter. They will put this study into practice by creating short animated films based on their reactions to the films. PREREQUISITE(S): ANI 421

ANI 423
3D ANIMATION SURVEY
Graduate
This course is intended as an intensive overview for graduate students with NO prior 3D experience. Topics include polygonal modeling tools, texturing, principles of 3D animation, basic rigging, camera, lighting and rendering. Animation graduate students with proof of previous 3D experience should consult their advisor to substitute any Major Elective for this course. PREREQUISITE(S): None

ANI 425
VISUAL STORYTELLING
Graduate
This class focuses on storyboarding and animatics as key pre-production tools for animation, film, and game development projects. Areas of focus include narrative development, drawing, performance, and editing. Students will apply these techniques to create an animatic: a comprehensive time-based draft for a short film. PREREQUISITE(S): None

ANI 430
3D CHARACTER ANIMATION
Graduate
This course concentrates on the acting techniques of classical character animation as applied to 3D animation technology, both for cinema and game design. We will examine the history of the field in hand-drawn, stop-motion and 3D, focusing especially on the principles developed at the Disney and Warner Brothers studios. The student will explore the technical aspects of translating these ideas to 3D models, including basic modeling, skinning, bone systems, rigging and kinematics, but the main focus will be on creative performance. Exercises will cover communicating the illusion of intelligence, mood through movement, staging, acting basics, the feeling of weight, and progressing dialogue. PREREQUISITE(S): ANI 231 or ANI 405 or GPH 438.

ANI 431
ADVANCED 3D CHARACTER ANIMATION
Graduate
This course introduces advanced concepts in 3D character animation that are necessary for achieving professional quality results. Students will hone their skills through the study of advanced techniques for animating multiple characters, creating continuity, and building character through performance. An emphasis will be placed on the exploration of movement for developing personal style. PREREQUISITE(S): ANI 300 or ANI 430

ANI 432
3D RIGGING
Graduate
Students will study the processes and techniques for creating professional quality character rigs. Following a professional production workflow, students will create character skeletons, learn aesthetic and technical considerations for skinning, learn techniques for optimal parametrization, and learn to construct character animation controls. PREREQUISITE(S): ANI 231 or ANI 405

ANI 433
ADVANCED 3D RIGGING
Graduate
This course will teach students to rig organic and inorganic objects. Students will learn to rig a "stretchy spine" along with a more detailed facial set up for a character. Other topics will include inorganic object rigging, quadruped rigging and the use of 3D scripting in rigging. PREREQUISITE(S): ANI 230 and ANI 231
ANI 435
3D CHARACTER MODELING
Graduate
This course will instruct students in the process of 3D polygonal based character modeling. Students will learn professional techniques for building quad-based polygon meshes with an extra emphasis on proper topology to help prepare their model for rigging. Students will learn complete UV unwrapping for the entire figure as well as effective techniques for advanced texturing. PREREQUISITE(S): ANI 230 or ANI 405 or GPH 250

ANI 436
3D MODELING STUDIO
Graduate
Students in this course will broaden and improve their overall skill set by learning a range of modeling techniques. Students will complete several smaller projects that cover topics including speed modeling, efficient low-poly modeling, hard surface modeling, projection texturing, and advanced UV unwrapping techniques. The course will culminate in a final project in which the student will propose and complete an advanced model of their own design. PREREQUISITE(S): ANI 230 or ANI 405 or GPH 250

ANI 437
ENVIRONMENT MODELING
Graduate
This course covers the planning, production and implementation of environment models for games. The term “environment model” includes landscape, exterior architecture, interior architecture, and both organic and man-made props. Topics include visual art direction, setting mood, developing narrative and cinematic lighting strategies. After creating assets in a modeling program, students will implement them in a game engine editor to learn about game engine requirements, limitations and pipeline. Prerequisite: ANI 230 or ANI 405

ANI 438
3D ORGANIC MODELING
Graduate
In this course students learn a variety of modeling tools specially geared toward creating highly detailed and complex organic models for games or films. Various sculpting and texturing techniques available in organic modeling will be discussed as well as proper UV and polygon modeling methods. Students will also gain an understanding of how to build proper human anatomy structures. Students will learn how to create a proper art pipeline between modeling, sculpting, texturing and rendering software packages. PREREQUISITE(S): ANI 230 or ANI 405

ANI 439
3D TEXTURING AND LIGHTING
Graduate
Students will study the processes and techniques for creating shaders and lighting setups for both cinematic and gaming environments. Techniques in UV mapping and projection mapping will be explored for both environments and character creation. Lighting will be approached from the foundation of traditional cinematography. Additional topics, including negative lighting and global illumination, will also be covered. PREREQUISITE(S): ANI 230 or ANI 405 or GPH 250

ANI 440
COLLABORATIVE SHORT ANIMATED FILM
Graduate
Students will work in small groups to produce short animated films from concept to completion using the media of their choice. Emphasis is placed on a collaborative environment for pitching ideas, visual development and creative problem-solving during production. Different studio methodologies and techniques will be discussed. Each team will face various technical and aesthetic challenges to complete a finished film. PREREQUISITE(S): ANI 421 or ANI 453

ANI 444
VISUAL DESIGN FOR GAMES
Graduate
The stages of development in the visual direction of a video game will be identified and detailed, and students will participate in the creation of the visual art direction of a product, giving special attention to the design of 3D models and animation. Visual Design for Games topics include: creating visual direction, concepting, art bibles, art production, and post-production strategies. Students will create proposals, create concepts, iteratively create artwork, and analyze competitive products. PREREQUISITE(S): ANI 446, ANI 425, ANI 105, GD 105, GPH 211 or ART 105 (or equivalent 2D design experience)
ANI 445
CHARACTER DESIGN
Graduate
Students will be introduced to various methods of creating interesting and original character designs for animated films and games, and then put these approaches into practical use. Methods of creative concepting will include drawing, collage, sculpture and 3D mock-ups. Fundamental visual design and color principles will be stressed, along with the basics of caricature. Students will utilize their character designs in an animated short. PREREQUISITE(S): ANI 230 or ANI 405

ANI 446
GAME ART PIPELINE
Graduate
This course is an introduction to the game technical artist's job. Students learn how to design, engineer, and troubleshoot the game art production pipeline. They study good practices and successful strategies for streamlining at different stages of production process. Projects include analyzing problems and then spec'ing out solutions, creating a workflow for producing and exporting assets to several platforms/engines, and creating instructional documentation. PREREQUISITE(S): (ANI 230 or ANI 405) and (ANI 231 or ANI 405)

ANI 450
MOTION CAPTURE
Graduate
This course is a workshop focusing on realistic character motion obtained through motion capture. Students will learn the motion capture pipeline, including character skinning and mapping, planning and directing motion capture sessions, applying motion to a character and motion editing. PREREQUISITE(S): ANI 231 or ANI 405 or GPH 438.

ANI 451
ADVANCED MOTION CAPTURE STUDIO
Graduate
This course will enable students with motion capture experience to advance their technical skills and gain experience with practical application in the motion capture studio. Emphasis will be placed on advanced skinning and mapping techniques as well as complex motion capture sessions involving sets, props, and multiple actors. Students will be required to plan, arrange, and direct their own sessions in the motion capture studio. PREREQUISITE(S): ANI 310 or ANI 450

ANI 452
3D SCRIPTING
Graduate
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. PREREQUISITE(S): (ANI 230 or ANI 405) and (ANI 231 or ANI 405)

ANI 453
ADVANCED 3D SCRIPTING
Graduate
This is an intermediate course in scripting for a 3D production environment. Students will go beyond the introductory course to learn more advanced scripting techniques and practices. Students will learn how to assess a problem/ opportunity in the production pipeline, spec out tools, build an effective tool and produce simple interfaces. PREREQUISITE(S): ANI 452

ANI 455
STOP MOTION ANIMATION
Graduate
The principles of stop motion character animation in real space are the emphasis of this intermediate level course. Students are introduced to basic armature building, lighting and scene composition, and the designing and fabrication of characters with a variety of materials. Contemporary uses of digital technology to enhance stop motion production will be explored. PREREQUISITE(S): ANI 201 (or ANI 101)
ANI 456
EXPERIMENTAL ANIMATION
Graduate
This course introduces strategies for an experimental approach to animation. Students will study how experimentation relates to both concept and technique, and examine the work of classic experimental animators. This is a production class that requires students to produce a series of short animations in a variety of processes and styles. PREREQUISITE(S): ANI 201 or ANI 101

ANI 460
ANIMATION GRADUATE SEMINAR
Graduate
This seminar will explore the animator's role in contemporary culture, including careers in entertainment, art, game development and education. A combination of guest speakers, critical readings, animation analysis and group discussion will help students lay a foundation for their graduate study in the field.

ANI 466
CINEMA, ANIMATION AND ART
Graduate
This seminar course focuses on animation and cinema from the standpoint of Modern and Contemporary art. Students study the major styles and themes of historical experimental film and video, and relate these topics to contemporary animation and independent cinema practices. Emphasis is placed on theory and criticism, and how it informs experimental work. Students are expected to discuss work and theory in a seminar setting, and to engage the class material in several research papers.

ANI 470
ACTING FOR ANIMATORS
Graduate
This is acting training designed specifically for the needs of animators, as opposed to stage actors. Utilizing lecture/discussion, examination/deconstruction of animated and live-action film clips, home assignments and a few simple in-class improvisations, this course provides the animator with the skills necessary to deliver dynamic animated character performance. Assessment measures include oral and written reflective analysis, short animated character sketches and class participation. PREREQUISITE(S): 421

ANI 478
3D DYNAMICS
Graduate
This course will provide an introduction to dynamic simulation and effects in 3D animation. Topics to be covered include hair and fur, fluid dynamics, smoke and fire, particles, and cloth. An emphasis will be placed on how these effects can enhance an idea or narrative, establish mood, or even be used as a basis for experimental animation. Students will use traditional animation and visual design principles as a basis for creating several small projects. PREREQUISITE(S): (ANI 230 or ANI 405) and (ANI 231 or ANI 405)

ANI 479
3D COMPOSITING
Graduate
This course is designed to allow advanced compositors and animators to merge the 2D, 3D and/or live-action video worlds, drawing from a combination of techniques such as motion tracking, compositing, rotoscoping, hand-drawn, cut-out and 3D animation. The goals are to go beyond simply achieving technical proficiency, as we will also focus on learning principles of good animation in preparation for both artistic and commercial endeavors. PREREQUISITE(S): ANI 231 or ANI 405

ANI 480
ANIMATION PRODUCTION
Graduate
Students study the traditional processes used for the production of animation for cinema and games. Topics include pre-production, sound, planning and scheduling, the division of labor, and post-production. Students will apply these methods to their own projects, using the medium of their choice. PREREQUISITE(S): ANI 101 or ANI 201
ANI 481
AUDIO FOR ANIMATION
Graduate
This class will explore concepts and practical techniques students need in order to address many of the unique challenges associated with creating audio for animated films. Students will begin with an introduction to audio production before moving on to build practical skills for both field and studio recording. Lectures, readings, and hands on projects will give students a working knowledge of how to approach and create the immense range of styles of audio for animated films, from classic cartoon soundtracks to the live action style mixes of many of today's animated Hollywood blockbusters. Students will complete several audio projects including a multi-track mix for an animated short. PREREQUISITE: None

ANI 490
TOPICS IN ANIMATION
Graduate
Advanced study in animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 101 or ANI 201 or consent of the instructor.

ANI 493
TOPICS IN 3D ANIMATION
Graduate
Advanced study in 3D animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 230 or ANI 405 or consent of the instructor.

ANI 540
ANIMATED SHORT FILM PART I
Graduate
This course and its continuation, ANI 541, will concentrate on facilitating the graduate students' production of a short, independently animated project. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the students work, with the choice of animation technique, content and form left to the individual. We will have technical demonstrations on an as-needed basis, depending on the nature of your animations. This course must be taken consecutively with ANI 541 Animated Short Film Part II. PREREQUISITE(S): ANI 440

ANI 541
ANIMATED SHORT FILM PART II
Graduate
This course is a continuation of ANI 540 Animated Short Film Part I. Throughout the quarter students will continue working on their films, meeting with the instructor for advising, and other students for group critiques. Students will also learn effective post-production strategies as they near completion of their first film. This course must be taken consecutively with ANI 540. PREREQUISITE(S): ANI 540

ANI 560
GRADUATE TEACHING SEMINAR
Graduate
This seminar exposes students to effective methods and professional practices of teaching undergraduate and graduate students. A variety of approaches to course materials and projects will be introduced and discussed in detail. In addition to work in class, students will work closely with a faculty member in order to gain first-hand knowledge, including class observation, of practical aspects of creative and academic instruction. PREREQUISITE(S): none

ANI 599
INDEPENDENT STUDY
Graduate
Independent study form. PREREQUISITE(S): Consent of dean and consent of instructor required.

ANI 639
MFA PRE-THESIS
Graduate
In this course the MFA student will develop the concept and pre-production of their thesis animation through workshops, critiques and assignments. Students will create inspiration and concept art, write a treatment, create a storyboard and animatic as well as research design options to be used on their final film project in ANI 640 MFA Thesis Animation. PREREQUISITE(S): ANI 442
ANI 640
MFA THESIS ANIMATION
Graduate
This course is a three quarter class that will concentrate on the graduate students' production, post-production and completion of their final thesis project. Students will have regular critique sessions with their three Thesis Advisors from the animation faculty. The student's project will be presented to the committee upon completion. PREREQUISITE(S): ANI 639

ANT 102
CULTURAL ANTHROPOLOGY
Undergraduate
An introduction to current anthropological theories and methods for understanding human cultures from a comparative perspective; includes an analysis of human institutions such as religion, politics, and kinship, and the forces that change them in a variety of societies, small and large scale.

ANT 103
ARCHAEOLOGY
Undergraduate
An exploration of the science of archaeology, the study of past human behavior through material remains. Examines the ways archaeologists gather data and the methods used to analyze and interpret these data to learn about the past and how human societies evolved.

ANT 104
INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY
Undergraduate
This course will examine the biological history of the human species culminating with an exploration of human biological variation in the modern world. Principles of evolutionary theory and genetics will first be presented to provide a framework for the study of human evolutionary biology. The fossil evidence for human evolution will then be considered using comparative data from nonhuman primate ecology to help reconstruct prehistoric lives. Finally, features of biological modernity will be discussed. Particular attention will be given to how human populations utilized biological and behavioral mechanisms to adapt to their environments throughout evolutionary history. The course includes labs.

ANT 105
ANTHROPOLOGY THROUGH FILM
Undergraduate
This course is an introduction to cultural anthropology, the sub-discipline of anthropology concerned with contemporary human cultures, through film. The aim is to convey the anthropological perspective on behaviors and systems that people create. The course will emphasize fundamental concepts, methods, and theories used to study culture.

ANT 106
LANGUAGE AND CULTURE
Undergraduate
Definitions and features of language and communication, and their relationship to thought and culture. Topics include the classification of languages, language acquisition, linguistic variation, language communities, multilingualism, performance, and variability of language use.

ANT 107
CULTURAL DIMENSION OF BUSINESS
Undergraduate
The focus of the course revolves around this question: What difference does it make when people who participate in different systems of meaning-making buy and sell goods and services to each other? We do not have to juxtapose buyers and sellers from the ends of the earth to see the implications of this question. Even within our own society there are cultural boundaries between buyers and sellers that we can observe. Through the readings and discussions, this course will explore these grey areas of business in cross-cultural environments.

ANT 109
FOOD AND CULTURE
Undergraduate
Explores the concept of culture by focusing on people's knowledge of food; it examines the local sameness and global peculiarity of people's food preferences, considering tastes and environmental impacts, health implications, dietary restrictions, and other social impacts.
ANT 120
SCIENCE OF ARCHAEOLOGY
Undergraduate
Archaeology spans the academic worlds of the physical sciences and the social sciences. In this course, the physical science qualities of the discipline are introduced. Students explore the various ways archaeologists use model building, statistical inference, and evidence analysis to reconstruct past human experiences. The course includes two hours of lab and two hours of lecture/discussion per week.

ANT 201
ETHNOGRAPHIC RESEARCH METHODS
Undergraduate
This course focuses on practicing data collection techniques used by qualitative researchers in the social sciences. Under the supervision of the instructor, students will design and implement a collaborative research project. The techniques to be used may include (but are not limited to) observation, structured and semi-structured interviewing, network analysis, and focused group interviewing. The experience gained in this course prepares students for research activities in future course work, graduate school and professional life. In addition to the practical hands-on training, the course also addresses issues of the relationship of theory to method, ethical concerns in research with human subjects, reflexivity and inter-subjectivity in qualitative research.

ANT 202
ARCHAEOLOGICAL FIELD METHODS
Undergraduate
This course introduces students to the basic field and laboratory methods used in archaeological research through hands on experience. Students will receive intensive field training in archaeological field methods including excavation, survey, mapping, record keeping, and illustration. The course introduces basic laboratory techniques such as artifact processing, identification, and curation. The methodological training will be integrated through emphases on the place of data collection in the archaeological research process, and the relationship between archaeological data and questions of historical and anthropological importance. This course will provide students with the essential basic field training in archaeology required for both applied work in cultural resource management and continued education in archaeology.

ANT 203
PROFESSIONALISM AND ETHICS IN ANTHROPOLOGY
Undergraduate
This class explores the many dimensions of what it means to be a professional anthropologist in both applied and academic areas. Students will learn about specialized resources for anthropologists (web resources, library resources, funding resources, career resources), and become familiar with the professional structure of the discipline. A large portion of the course will be devoted to the debate/discussion/exploration of ethical issues that challenge anthropologists through the use of real cases that have confronted researchers in the field, and through an evaluation of the ethical codes of conduct adopted by the primary professional organizations in anthropology.

ANT 204
LINEAGES OF CULTURE THEORY
Undergraduate
This course provides the student with a history of the culture concept tracing the lineages of thought about culture from the nineteenth century to the present. Readings and seminar discussions will present an explicit discussion of how ideas and understanding about culture have changed over time and will introduce students to the main branches of cultural theory. Students will develop the skills and confidence to work with the abstractions and concepts that underlie anthropological research. The course is reading and writing intensive.

ANT 206
WORLD PREHISTORY
Undergraduate
Placing an emphasis on both theory and the latest archaeological and multidisciplinary approaches this overview of world prehistory will look at a series of interesting problems and case studies that provide a taste of the richness of human creativity. Topics include the evolution from foraging lifestyles, through the increased control of nature by early farmers, to the rise of states and empires: this is an examination of the deep and tangled roots of today's societies.

ANT 210
AFRICAN CULTURES
Undergraduate
Survey of the people and cultures of Africa. Analysis of beliefs, customs, and social organization of traditional African cultures, and the forces of sociocultural change that have affected traditional patterns of life and are necessary to understand contemporary African societies. Formerly SOC 300.
ANT 215
ARCHAEOLOGY OF AFRICAN DIASPORAS
Undergraduate
Africans have been on the move since the dawn of humanity. Archaeology is one discipline that can inform us about the presence and influence of Africans throughout the world, beginning with our hominid ancestors and continuing through the 20th century. Prior experience with archaeology is not required. Topics include: the evolution and development of our species; migrations within the African continent and abroad; and the cultural insights to be gained from the rapidly-growing field of African-American archaeology.

ANT 220
CULTURES OF EUROPE
Undergraduate
Explores the cultural features of the European experience using ethnographic sources. Focuses on European life at the local level, examines the implications of European Community integration on peoples' lives in various countries, and explores causes of conflict within and between national boundaries. (formerly SOC 300 Regional Ethnology: Peoples of Europe).

ANT 226
HEMISPHERIC ETHNOGRAPHY : PEOPLES IN THE AMERICAS
Undergraduate
This course attempts to understand the cultures that live and interact in our continent. We will look at the historical, economic, political, and social processes that integrate the hemisphere and how cultures and identities spread over many different countries. This will enable us to analyze how local realities can not only be understood in relation to larger historical contexts and transnational processes, but also in relation to ideologies and cultural understandings that shape common experiences.

ANT 230
CULTURES OF THE PACIFIC
Undergraduate
Explores traditional and contemporary cultures of the Pacific. A survey of Oceanic cultures from Australia, Melanesia, Micronesia, and Polynesia; consideration of the geography and geology of Pacific islands; and analysis of the history of contact between Pacific island peoples with Westerners and the consequences for life in the contemporary Pacific. (formerly SOC 300 Regional Ethnology: The Pacific Islands).

ANT 240
CULTURES OF THE MIDDLE EAST
Undergraduate
Explores the cultures and societies of the contemporary Middle East. Focuses on everyday life and practices, such as religion, social organization, art and popular culture. Uses ethnographic sources to examine the historical influence of various civilizations and religions on contemporary Middle Eastern societies from North Africa to Iran.

ANT 241
WOMEN IN MIDDLE EASTERN SOCIETIES
Undergraduate
Explores the experience of women in the Middle East using ethnographic sources from North Africa, the Levant, Arabian Peninsula, Turkey, and Iran. Focuses on the cultural and historical influences on women's lives in this area, and the strategies Middle Eastern women use to negotiate and affect sociocultural change today.

ANT 250
MATERIAL CULTURE OF MODERN AMERICA
Undergraduate
This course combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity. The course will take an historical approach beginning in the 17th century when most Americans wore homespun clothing and produced their own food, and continue to the 21st century and a time when Americans wear the national colors of Tommy Hilfiger and eat fast food lunches. Often such changes in material culture are characterized as the process of "modernization," and as such, the course will be centered on the relationship between material culture, American identity and conceptions of modernity. Cross-listed with AMS 370.
This course explores the social, and economic dynamics of households through material culture. Specifically, this course looks at how material goods structure domestic life, reflect values surrounding family and kinship, and mediate the relationship between individual households and broader levels of social organization such as community, society, and culture.

ANT 254
HISTORICAL ARCHAEOLOGY OF CHICAGO
Undergraduate
Students will be participating in an archaeological research project focusing on Chicago's past. The course will include an introduction to the concept of an archaeological research design. Students will engage in historical research using primary documents and analyze archaeological data to address specific research questions about Chicago's recent past.

ANT 202 is a prerequisite for this course.

ANT 256
MATERIAL CULTURE OF THE OLD WORLD
Undergraduate
This course combines archaeology and material culture studies to examine how material goods both shape and reflect human experience in Asia, Africa and Europe. The course will be centered on the relationship between material culture, technology, subsistence patterns and societal complexity. The rise of cities and states in the old world will also be examined.

ANT 260
HISTORY, MYTH AND RELIGION IN PRECONQUEST MESOAMERICA
Undergraduate
An exploration of the history of Mesoamerica before Columbus and the conquistadores from the perspectives of the indigenous peoples, their conquerors, and contemporary scholars, with special emphasis upon the religious and cultural dimensions of Mesoamerican civilization. Cross-listed with REL 360

ANT 260
HISTORY, MYTH AND RELIGION IN PRECONQUEST MESOAMERICA
Undergraduate
An exploration of the history of Mesoamerica before Columbus and the conquistadores from the perspectives of the indigenous peoples, their conquerors, and contemporary scholars, with special emphasis upon the religious and cultural dimensions of Mesoamerican civilization. Cross-listed with REL 360

ANT 270
HUMAN EVOLUTION
Undergraduate
Principles of evolutionary theory and genetics will first be presented to provide a framework for the study of human evolutionary biology. Beginning with the earliest fossil evidence, the course will trace human evolution. Particular attention will be given to the forces of environment and sexual selection at work at various points in time. Data from nonhuman primate ecology will be used to help reconstruct prehistoric lives.

ANT 272
INTRODUCTION TO MEDICAL ANTHROPOLOGY
Undergraduate
This course explores the interrelationships between culture and human health for the purposes of understanding the biosocial origins of disease, systems of treatment, and the global inequalities that shape disease patterns and access to health care resources.

ANT 274
FORENSIC ANTHROPOLOGY
Undergraduate
This course separates fact from media fantasy in the application of anthropological knowledge to determining the cause of death. Specific case studies are presented that show the range of situations confronted by anthropologists who consult with law enforcement agencies.
ANT 280
ARCHAEOLOGICAL FIELDWORK
Undergraduate
This course introduces students to the basic field and laboratory methods used in archaeological research through hands on experience. Students will receive intensive field training in archaeological field methods including excavation, survey, mapping, record keeping, and illustration. The course introduces basic laboratory techniques such as artifact processing, identification, and curation. The methodological training will be integrated through emphases on the place of data collection in the archaeological research process, and the relationship between archaeological data and questions of historical and anthropological importance. This course will provide students with the essential basic field training in archaeology required for both applied work in cultural resource management and continued graduate education in archaeology.

ANT 290
SPECIAL TOPICS IN REGIONAL ETHNOLOGY
Undergraduate
Compares the patterns of sociocultural life in different societies within a particular geographic region in order to gain a general understanding of cultural themes, trends, and historical developments. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change.

ANT 314
ANTHROPOLOGY OF GENDER
Undergraduate
This course exposes students to a variety of topics that address gender cross-culturally and from an anthropological perspective. We shall explore the cultural processes that shape the lives of men, women and transgendered people across time and space.

ANT 317
LANGUAGE, POWER AND IDENTITY
Undergraduate
Explores how communication patterns vary cross-culturally. Examines how the language people speak shapes their worldview and their ways of interacting with each other. Students learn basic techniques of analyzing conversations.

ANT 320
HUMAN VARIATION
Undergraduate
Explores the interrelationships between culture, biology, and the environment in the shaping of social life, including human evolution, sexual differences, skin color, "race," body shape, and other aspects of human variation.

ANT 322
COMMUNITY-BASED APPLIED PRACTICE
Undergraduate
This laboratory course in the applied anthropology sequence introduces students to the range of anthropological practice in the public and not-for-profit sector. Students will learn about the ways that anthropology has been and can be applied to initiate practical change in communities. In addition to learning the professional and ethical responsibilities of practicing anthropologists, students will also gain a practical experience working on an applied project. Human Subjects Research certification and an ethnographic methods is required for this class.
ANT 201, ANT 203 and senior standing are a prerequisite for this class.

ANT 324
COLONIALISM TO GLOBAL SOCIETY
Undergraduate
This course examines long-term trends in the development of capitalist society in terms of both material and social organization from the 15th century to the present. Modeled on the core text, Europe and the People without History by Eric Wolfe, the course seeks to ground students in long-term processes of cultural development and change. These issues will be explored through a combination of archaeological and ethnographic perspectives and evidence.
ANT 326  
**TRANSNATIONAL CULTURES**  
*Undergraduate*  
This course examines the emergence of transnational culture in the modern world. The focus is on relationships and processes that link communities, such as trade, migration, and tourism, and the local experience of these global processes. While classroom discussion will be structured around critical readings of texts, selfreflection and value consciousness will be encouraged. To this end, assignments will combine critical readings and guided experiential activities. Students will be tutored in techniques for giving professional style presentations. The course may vary according to faculty interest. Possible foci include labor migration, media, tourism, and/or global consumption.

ANT 328  
**INTERNATIONAL APPLIED PRACTICE**  
*Undergraduate*  
Examines various processes of sociocultural change, with emphasis on peoples undergoing or emerging from cultural, political, or economic oppression.

ANT 330  
**CLIENT-BASED APPLIED PRACTICE**  
*Undergraduate*  
This laboratory course introduces students to the use of anthropological methods and theories in the private, for-profit sector. Students will learn about the type of work anthropologists are performing in the corporate world such as design and marketing research, product usability studies, and cultural resource management. In addition to learning the professional and ethical responsibilities of practicing anthropologists, students will also gain a practical experience working on an applied project. Formerly ANT 316.

ANT 203 is a prerequisite for this course.

ANT 346  
**URBAN ANTHROPOLOGY**  
*Undergraduate*  
Theories and methods of contemporary anthropology and other fields are used to analyze cities and urban life. Cross-culturally explores the processes of urbanization, urbanism (urban culture, subcultures, and ethnic lifestyles), and the notion of images of cities. Recommended for sophomore level or above.

ANT 356  
**URBAN ETHNOGRAPHY**  
*Undergraduate*  
Examines the city as a type of human settlement, focusing on the different forms, functions, images, and ideological perceptions of cities over time and across a number of different cultures. Formerly SOC 356.

ANT 358  
**ARCHAEOLOGY OF CITIES**  
*Undergraduate*  
This class provides a general overview of the archaeology of urban settlements. We will begin by asking the question "What is a city?" and look at the different theories that address the nature and origins of early urban settlements. To further examine this question we will focus on Cahokia, the largest prehistoric settlement in North America north of Mexico, and the city of Chicago, a well established urban, industrial center. The second portion of the class will take an even broader comparative approach towards the archeology of cities by applying the theories and insights gained in the first portion of the course to different world areas. Through these comparisons students will gain a deeper understanding of the diversity of urban forms across time and space, and consider the possibilities of cross-cultural similarities among prehistoric and early historic urban populations.

ANT 360  
** ISSUES IN GLOBAL HEALTH**  
*Undergraduate*  
This course focuses on a specific health issue or set of issues in our world. The interrelationships between culture and health in this issue are examined.
ANT 372
CURRENT ISSUES IN ARCHAEOLOGY
Undergraduate
Expressions of culture and heritage are found in museums, public spaces, public events, and other activities such as public archaeology and history programs. This course examines the debates that surround recent developments in the elaboration of heritage as an industry and a practice. Explores issues relating to cultural heritage, Indigenous rights, ethics, museum and material culture studies.

ANT 374
ANTHROPOLOGY AND MUSEUMS
Undergraduate
The course examines the evolving relationships between anthropology and museums. From functional, historical, material and aesthetic perspectives, the relationships between the cultural contexts of objects and museums will be explored. Case studies, guest lectures and site visits (virtual and real) will be used to demonstrate evolving theory, practice, law and ethical implications of collecting objects. Many of the logistical aspects of the museum including the laws and mission statements will also be examined.

ANT 380
INTERNSHIP IN ANTHROPOLOGY
Undergraduate
This course affords credit toward graduation for students involved in department approved internships.

ANT 384
ARCHAEOLOGICAL ANALYSIS
Undergraduate
The course is an introduction to the analysis of archaeological data, the interplay between the knowledge people have of the world and the remains and traces of their actions in it. We review the relevant culture theory needed to draw distinctions between analytical stances. We examine how the rhetoric of the research report changes as different analytical stances are selected.

ANT 386
CULTURAL ANALYSIS
Undergraduate
Introduction to cultural analysis, the interplay between the knowledge people have of the world and their actions in it; explores the rudiments of culture theory needed to draw distinctions between analytical stances; examines how the rhetoric of the research report changes as different analytical stances are selected. Cross-listed with INT 204.

ANT 388
PROFESSIONAL RESEARCH TUTORIAL
Undergraduate
This course helps anthropology majors prepare for professional presentations at conferences, research exposition, publications and theses. It uses data collected in another class. The student focuses on developing the communication techniques necessary to meet a professional standard. Honors program students complete the honors program in anthropology with this course. The course is registered using the independent study procedure on Campus Connect. The course is taken normally for 2 credits. Students writing an honors program thesis can take the course for 4 credits.

ANT 390
SPECIAL TOPICS IN ANTHROPOLOGY
Undergraduate
Variable topics in anthropology intended for advanced students. Explores special aspects or areas of anthropology based on particular interests and expertise of the instructor; course content and title will vary with the instructor. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change.

ANT 395
SEMINAR IN ANTHROPOLOGY
Undergraduate
In-depth examination of selected topics in sociocultural anthropology, based either on a geographic area or theoretical theme. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change.

ANT 102 is a prerequisite for this course.
ANT 396
SENIOR CAPSTONE SEMINAR
Undergraduate
A course for senior anthropology majors, which satisfies the Senior Year Capstone requirement of the Liberal Studies Program. Objectives of the course are: to afford students the opportunity to reflect on the influences in their lives (both in and outside of academics) that directed them toward anthropology as a field of study; to formulate ideas regarding the affect anthropology has on their way of viewing themselves in the world around them; and to pursue research on an anthropologist or anthropological topic.

ANT 397
TRAVEL/STUDY
Undergraduate
Foreign study tours with lectures and research by special arrangement with sponsoring programs. May be taken for multiple credit when courses are not duplicated.

ANT 399
INDEPENDENT STUDY
Undergraduate
Independent Study.

AP 501
LEARNING PLAN RESEARCH AND DEVELOPMENT
Graduate
This course explores the aims of graduate education with particular focus on the program of study leading to the Master of Arts in Applied Professional Studies: its purpose, scope, philosophy, key roles, and processes. Special emphasis is placed on developing a working draft of the Learning Plan for the individualized portion of the program (i.e., the Focus Area), attaining a fuller understanding of individual fields of professional study, and applying Liberal Learning skills and perspectives in professional practice. The process is initiated for establishing an academic committee consisting of the student, the Faculty Mentor, and a Professional Advisor (an established practitioner in the student's professional Focus Area).

Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 502
LEARNING PLAN REVIEW
Graduate
Throughout the second quarter, students finalize their Learning Plans, convene their Academic Committees (comprised of themselves, their Professional Advisor, and their Faculty Mentor) to review their Learning Plans, and upon initial approval, submit their Learning Plans to the Graduate Student Program Review Committee (GSPRC) for approval.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 505
FINDING AND MANAGING INFORMATION
Graduate
This MAAPS/MSAT foundational course provides participants with skills in collecting, analyzing and synthesizing literature and resources in their respective area(s) of practice. Among these skills are: searching and accessing various sources; discerning credibility of sources; storing and retrieving information for oneself; constructing thematic literature reviews; and, citing sources using APA style.

Status as a MAAPS or MSAT student is a prerequisite for this class.

AP 510
MAIN THEORIES
Graduate
This area addresses knowledge and understanding of theories, models and/or theoretical frameworks - including implications for practice - that are most relevant to the student's focus area.

Status as a MAAPS student or departmental permission is a prerequisite for this class.
This area addresses the systematic gathering of data and interpretation of findings as practiced within the student's focus area and/or related fields.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This session provides opportunity for students to meet with their Faculty Mentors for purposes of ongoing assessment and integration regarding all aspects of the program. Prior to each session, the Faculty Mentor informs students regarding the agenda for the upcoming session, its assignment and the criteria for assessment by which the assignment and session participation will be evaluated.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This area involves identifying skills that are particular to the student's focus area and the context(s) in which these skills are applied. The emphasis is on actual demonstration of specialized skills used in practice.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This area involves facility with communication modes relevant to professional practice in the student's focus area. It requires an understanding of the relationship among key communication variables (the message, the method, the audience, and the context), a repertoire of communication strategies, and a dexterity or ease of access permitting the professional to adapt communication strategies to changing situations as necessary.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This session provides opportunity for students to meet with their Faculty Mentors for purposes of ongoing assessment and integration regarding all aspects of the program. Prior to each session, the Faculty Mentor informs students regarding the agenda for the upcoming session, its assignment and the criteria for assessment by which the assignment and session participation will be evaluated.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This area addresses the human and structural issues that professionals encounter within practice (work) environments, providing students with the opportunity to consider how their professional role in the focus area affects and is affected by systems, technology, structure and other people within their practice settings.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This session provides further opportunity to integrate and apply dynamics of reflective practice, self-assessment, liberal learning, and ongoing collaboration.

Status as a MAAPS student or departmental permission is a prerequisite for this class.
This area addresses the issues and problems of the student's focus area within a context that includes at least one of the following: the historical development of the profession over time and its future direction (temporal); the relationship between the profession and the society within which it exists (social, multi-cultural); and/or, the nature of the profession globally (international).

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This area addresses the relationship between beliefs and assumptions regarding humanity, good/evil, right/wrong, etc., and behavioral outcomes (including conflicts) relevant to the student's focus area.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This area addresses the interplay between thinking, doing and reflecting in the often-ambiguous and complex contexts of daily practice in the student's focus area.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This session provides opportunity for students to meet with their Faculty Mentors for purposes of ongoing assessment and integration regarding all aspects of the program. Prior to each session, the Faculty Mentor informs students regarding the agenda for the upcoming session, its assignment and the criteria for assessment by which the assignment and session participation will be evaluated.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

Student selects a second area from among Theories, Research, Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues, and Reflection on Practice in which to develop and demonstrate competence.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

As an option to the Integrating Project, students may elect to develop and demonstrate an additional four areas of professional competence from among Theories, Research, Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues, and Reflection on Practice.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

As an option to the Integrating Project, student may elect to develop and demonstrate an additional four areas of professional competence from among Theories, Research, Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues, and Reflection on Practice.
As an option to the Integrating Project, student may elect to develop and demonstrate an additional four areas of professional competence from among Theories, Research, Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues, and Reflection on Practice.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

As an option to the Integrating Project, student may elect to develop and demonstrate an additional four areas of professional competence from among Theories, Research, Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues, and Reflection on Practice.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

As an option to the Integrating Project, student may elect to develop and demonstrate an additional four areas of professional competence from among Theories, Research, Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues, and Reflection on Practice.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

A concise, well-honed document that clearly delineates the student's readiness to engage in the Final Integrating Project as well as the project's nature and scope. The topic under investigation should be supported by relevant literature in the field and the use of appropriate methods of inquiry.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

The Integrating Project is an original, independently-conducted project that incorporates elements of theory and practice and demonstrates integration of liberal learning and graduate focus area competencies. It serves as the culminating learning activity of the program and is intended to make an original contribution to the student's professional field. The topic of the integrating project is chosen by the student with the approval of the Professional Advisor and the Graduate Students Program Review Committee (GSPRC).

Status as a MAAPS student or departmental permission is a prerequisite for this class.

Advanced individual instruction in euphonium performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

Advanced individual instruction in French horn performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.
APB 165
TROMBONE
Undergraduate
Advanced individual instruction in trombone performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APB 170
TRUMPET
Undergraduate
Advanced individual instruction in trumpet performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APB 175
TUBA
Undergraduate
Advanced individual instruction in tuba performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APB 410
EUPHONIUM
Graduate
Advanced individual instruction in euphonium performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APB 430
FRENCH HORN
Graduate
Advanced individual instruction in french horn performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APB 465
TROMBONE
Graduate
Advanced individual instruction in trombone performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APB 470
TRUMPET
Graduate
Advanced individual instruction in trumpet performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.
APB 475
TUBA
Graduate
Advanced individual instruction in tuba performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APK 150
PIANO
Undergraduate
Advanced individual instruction in piano performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APK 160
HARPISHORD
Undergraduate
Advanced individual instruction in harpsichord performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APK 450
PIANO
Graduate
Advanced individual instruction in piano performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APK 460
HARPISHORD
Graduate
Advanced individual instruction in harpsichord performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APM 125
ITALIAN DICTION I
Undergraduate
Beginning level Italian and English diction for singers, and an introduction to the international phonetic alphabet.

APV 100 is a corequisite for this class.

APM 126
GERMAN DICTION I
Undergraduate
Beginning level German diction for singers.

APM 125 is a prerequisite and APV 100 is a co-requisite for this class.
APM 127
FRENCH DICTION I
Undergraduate
Beginning level French diction for singers.

APM 126 is a prerequisite and APV 100 is a co-requisite for this class.

APM 160
LATIN ACCESSORIES TECHNIQUES
Undergraduate
Class playing techniques for bongos, congas, and other Latin accessories.

Status as an Undergraduate Music student is a prerequisite for this class.

APM 170
PERCUSSION CONCERT ACCESSORIES TECHNIQUES CLASS
Undergraduate
Class playing technique for cymbals, triangle, tambourine, and other percussion accessories.

Status as an Undergraduate Music student is a prerequisite for this class.

APM 201
INTRODUCTION TO BRASS PLAYING
Undergraduate
This course is designed to introduce basic playing techniques for all brass instruments.

Status as an Undergraduate Music student is a prerequisite for this class.

APM 204
VOCAL COACHING I
Undergraduate
The musical and dramatic performance of select vocal repertoire with special regard to recital material, integrating stylistic considerations, ornamentation, and cadenzas.

An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 205
JUNIOR RECITAL
Undergraduate
A short, 30-60 minute, public recital performance of solo and/or chamber repertoire to be completed in the Junior year.

AP 110, APB 130, APB 165, APB 170, APB 175, APK 150, APK 160, APP 100, APS 127, APS 160, APS 180, APS 185, APS 190, APW 115, APW 120, APW 125, APW 135, or APV 100 is a corequisite for this class.

APM 225
ITALIAN DICTION II
Undergraduate
Intermediate level Italian diction for singers.

APM 125 is a prerequisite for this class.

APM 226
GERMAN DICTION II
Undergraduate
Intermediate level German diction for singers.

APM 126 is a prerequisite for this class.
APM 227
FRENCH DICTION II
Undergraduate
Intermediate level French diction for singers.
APM 127 is a prerequisite for this class.

APM 242
ACCOMPANYING CLASS I
Undergraduate
An introduction to the role of the piano accompanist in vocal repertoire, and development of basic vocal coaching skills. A year-long sequence of courses.
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 300 is a corequisite for this class.

APM 244
ACCOMPANYING CLASS II
Undergraduate
An introduction to the role of the piano accompanist in wind instrumental repertoire, and development of basic vocal coaching skills. A year-long sequence of courses.
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 301 is a corequisite for this class.

APM 245
ACCOMPANYING CLASS III
Undergraduate
An introduction to the role of the piano accompanist in string instrumental repertoire, and development of basic vocal coaching skills. A year-long sequence of courses.
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 302 is a corequisite for this class.

APM 253
INTRODUCTION TO ACTING FOR SINGERS
Undergraduate
An introductory course in stage terminology and methods of preparation for stage performance. Class activities include reading assignments, discussions, and performances such as singing, spoken monologues and poems, and improvisation.
Status as an Undergraduate Music student is a prerequisite for this class.

APM 254
INTRODUCTION TO ACTING FOR SINGERS II
Undergraduate
A course in stage terminology and methods of preparation for stage performance. Class activities include reading assignments, discussions, and performances such as singing, spoken monologues and poems, and improvisation.
Status as an Undergraduate Music student is a prerequisite for this class.

APM 300
ACCOMPANYING PRACTICUM FOR PIANISTS I: VOICE
Undergraduate
An exploration of different styles of vocal repertoire, and the practice of accompanying vocalists in both studio and performance formats.
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 242 is a corequisite for this class.
APM 301
ACCOMPANYING PRACTICUM FOR PIANISTS II: WINDS
Undergraduate
An exploration of different styles of wind repertoire, and the practice of accompanying wind players in both studio and performance formats.

Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 244 is a corequisite for this class.

APM 302
ACCOMPANYING PRACTICUM FOR PIANISTS III: STRINGS
Undergraduate
An exploration of different styles of string repertoire, and the practice of accompanying string players in both studio and performance formats.

Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 245 is a corequisite for this class.

APM 303
MUSICAL COACHING FOR SINGERS
Undergraduate
Students meet in a masterclass format for musical and diction coaching in their current repertoire.

APV 100 is a corequisite for this class. Students must have passed petition to major.

APM 304
VOCAL COACHING II
Undergraduate
The musical and dramatic performance of select vocal repertoire with special regard to recital material, integrating stylistic considerations, ornamentation, and cadenzas.

An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 305
SENIOR RECITAL
Undergraduate
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed in the Senior year. This recital is required as partial fulfillment of the degree of Bachelor of Music in Performance.

APB 110, APB 130, APB 165, APB 170, APB 175, APK 150, APK 160, APP 100, APS 127, APS 160, APS 180, APS 185, APS 190, APW 115, APW 120, APW 125, APW 135, or APV 100 is a corequisite for this class.

APM 306
HARPSICHORD PERFORMANCE PRACTICE
Undergraduate
A practical introduction for pianists to the harpsichord, harpsichord repertoire from the late Renaissance to early Classical eras, and relevant performance practice and stylistic considerations.

Status as an Undergraduate Music student is a prerequisite for this class.

APM 308
BAROQUE PERFORMANCE PRACTICE-INSTRUMENTAL
Undergraduate
This course focuses on the interpretation and performance of music from the Baroque era, concentrating primarily on 18th century literature. Open to all instrumentalists, students will study Baroque performance practice based on the treatises and various writings of the time, as well as current scholarly research of early music specialists.

Status as an Undergraduate Music student is a prerequisite for this class.
APM 309
AN ENTREPRENEURIAL APPROACH TO PRESENTING MUSIC IN TODAY'S MARKETPLACE
Undergraduate
Through opportunity creation, case study, discussion and peer evaluation, this course analyzes and simulates the professional performing arts marketplace, providing collaborative hands-on experience for performers and arts managers-in-training. In this course, performers will hone their musical point-of-view and create an original, self-produced performance opportunity in the DePaul community, with marketing materials and a business structure to support their project. Arts Management students will collaborate with performers on these projects, providing support to their colleagues in a way that models their future professional activities. Each student will also be responsible for analyzing a current successful model, identifying keys to success. This course is intended to bridge the transition from college to career, providing the artistic, career development and entrepreneurship training that have become essential in today's professional environment. Crosslisted with PAM 309.

Status as an Undergraduate Music student is a prerequisite for this class.

APM 311
WOODWIND PEDAGOGY
Undergraduate
This course is designed to provide students with an overview of the important aspects of woodwind pedagogy. Students will gain the necessary knowledge and skills to teach woodwind students of all ages and ability levels.

Status as a Undergraduate Woodwind student who has passed the petition to major is a prerequisite for this class.

APM 315
THE BUSINESS OF MUSIC FROM THE PERFORMER'S PERSPECTIVE
Undergraduate
Explorations of the business aspects of the performing musician. Topics will include unions, networking, freelancing, audition preparation, taxes, and ethics.

Status as an Undergraduate Music student is a prerequisite for this class.

APM 328
ORCHESTRAL REPERTOIRE FOR WOODWINDS I: LITERATURE PERFORMANCE
Undergraduate
Detailed study of significant woodwind orchestral literature, with special emphasis on improving ensemble skills. Each week will feature new repertoire to be rehearsed and performed during the class.

Status as a Undergraduate Woodwind student who has passed the petition to major is a prerequisite for this class.

APM 329
WOODWIND ORCHESTRAL REPERTOIRE II: AUDITION PREPARATION
Undergraduate
An overview of orchestral woodwind audition repertoire with special emphasis on audition preparation and audition practice. Students will take several mock auditions over the course of the quarter to improve their understanding of the audition experience.

Status as a Undergraduate Woodwind student who has passed the petition to major is a prerequisite for this class.

APM 332
PIANO PEDAGOGY I
Undergraduate
Introduction to the field of piano teaching at the beginning through advanced elementary levels, with an emphasis on learning theories, instructional techniques, curriculum planning, studio organization and teaching materials. The first of a two course sequence.

Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite for this class.
APM 333
PIANO PEDAGOGY II
Undergraduate
An exploration of all aspects of intermediate level piano study, with emphasis on long/short term goals for musical/technical development, instructional techniques, teaching of functional and musicianship skills, survey of intermediate level teaching materials, grading and repertoire selection. The second of a two course sequence.
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite for this class.

APM 336
VOICE PEDAGOGY
Undergraduate
An introduction to basic concepts of vocal pedagogy and the physiology of the singing voice. Through listening, evaluation, study, discussion, observation, and teaching, students will gain a better understanding of how to approach teaching beginning through advanced vocal students.
An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 337
ALEXANDER TECHNIQUE
Undergraduate
Introduction to the Alexander Technique as applied to musical performance.
Status as an Undergraduate Music student is a prerequisite for this class.

APM 340
ORCHESTRAL REPERTOIRE FOR STRINGS I
Undergraduate
Study of standard orchestral repertoire for string instruments. A year-long sequence of courses.
Status as a Undergraduate String Performance student who has passed the petition to major is a prerequisite for this class.

APM 341
ORCHESTRAL REPERTOIRE FOR STRINGS II
Undergraduate
Study of standard orchestral repertoire for string instruments. A year-long sequence of courses.
Status as an Undergraduate String Performance Major and APM 340 are a prerequisite for this class.

APM 342
ORCHESTRAL REPERTOIRE FOR STRINGS III
Undergraduate
Status as an Undergraduate String Performance Major and APM 341 are a prerequisite for this class.

APM 343
ORCHESTRAL REPERTOIRE FOR STRING BASS
Undergraduate
Study of standard orchestral repertoire for string basses.
Status as a String Bass student is a prerequisite for this class.
APM 346  
PERCUSSION PEDAGOGY  
Undergraduate  
This course presents teaching techniques of all the major percussion instruments, for students of beginning through advanced levels of proficiency. The course includes an in-depth examination of pertinent published teaching materials, e.g. as method books and collections, as well as an exploration of techniques for motivating young students.

An Undergraduate Percussion Performance major and a completed petition to major is a prerequisite for this class.

APM 347  
ORCHESTRAL REPertoire FOR PERCUSSION  
Undergraduate  
Study of standard orchestral repertoire for percussion instruments.

An Undergraduate Percussion Performance major and a completed petition to major is a prerequisite for this class.

APM 350  
INTERPRETATION OF VOCAL LITERATURE I  
Undergraduate  
Study and demonstration of performance practices (16th-century to present), with a focus on vocal literature in German.

An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 351  
INTERPRETATION OF VOCAL LITERATURE II  
Undergraduate  
Study and demonstration of performance practices (16th-century to present), with a focus on vocal literature in French.

Status as an Undergraduate Vocal Performance major and APM 350 is a prerequisite for this class.

APM 352  
INTERPRETATION OF VOCAL LITERATURE III  
Undergraduate  
Study and demonstration of performance practices (16th-century to present), with a focus on vocal literature in Italian and English.

Status as an Undergraduate Vocal Performance major and APM 351 are a prerequisite for this class.

APM 353  
TECHNIQUES OF THE MUSIC STAGE I  
Undergraduate  
Study, coaching, rehearsal and performance of music drama and opera.

An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 354  
TECHNIQUES OF THE MUSIC STAGE II  
Undergraduate  
Study, coaching, rehearsal and performance of music drama and opera.

APM 354 is a prerequisite for this class.

APM 356  
OPERA WORKSHOP  
Undergraduate  
An advanced course in opera repertoire; scenes of operas will be presented for public performance.

APM 354 is a prerequisite for this class.
APM 357  
A HISTORY OF SINGING THROUGH SOUND  
Undergraduate  
Using guided listening from the dawn of recording, this course will explore the history and evolution of vocal technique and performance practice. Diverse genres and periods of classical song, opera, and oratorio will be studied and a precise vocabulary for discussing and evaluating will be developed.

Status as an Undergraduate Music student is a prerequisite for this class.

APM 360  
TOPICS IN PERFORMANCE  
Undergraduate  
Indepth investigation of a topic in performance studies.

Status as an Undergraduate Music student is a prerequisite for this class.

APM 361  
PIANO LITERATURE I: RENAISSANCE, BAROQUE & CLASSICAL  
Undergraduate  
An in-depth study of the long-established tradition of pianists and pianism, from Liszt and his disciples in the 19th century through Rachmaninoff, Horowitz and the great pianists of the 20th century, and how the role of the pianist has evolved to the present day.

Status as a piano performance student who has passed the petition to major is a prerequisite for this class.

APM 362  
PIANO LITERATURE II: ROMANTICISM  
Undergraduate  
The purpose of this course is to give piano majors an in-depth look at the role that the piano has played throughout history, not only as a solo instrument but also as a crucial element of any collaborative music making.

Status as a piano performance student who has passed the petition to major is a prerequisite for this class.

APM 363  
PIANO LITERATURE III: LATE 19TH - 21ST CENTURY  
Undergraduate  
The purpose of this course is to give piano majors an in-depth look at the role that the piano has played throughout history, not only as a solo instrument but also as a crucial element of any collaborative music making.

Status as a piano performance student who has passed the petition to major is a prerequisite for this class.

APM 372  
ORCHESTRAL REPERTOIRE FOR BRASS  
Undergraduate  
Study of standard orchestral repertoire for brass instruments.

An undergraduate brass performance major and a completed petition to major is a prerequisite for this class.

APM 373  
BRASS CONCEPTS  
Undergraduate  
A study of brass literature, performance, and pedagogy. An introduction to professional career responsibilities and opportunities.

An undergraduate brass performance major and a completed petition to major is a prerequisite for this class.
APM 374
BRASS INSTRUMENT PERFORMANCE STYLE
Undergraduate
Survey of solo and orchestral performance styles through the principal composers of the 19th and 20th centuries. Analysis of new demands placed on performers in the 21st century. Study of stylistic concepts based on historical, technical, national, and aesthetic considerations.
A petition to major is a prerequisite for this class.

APM 377
GUITAR HISTORY AND LITERATURE I
Undergraduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses.
Status as a Undergraduate Guitar Performance student who has passed the petition to major is a prerequisite for this class.

APM 378
GUITAR HISTORY AND LITERATURE II
Undergraduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses.
Status as a Guitar Performance Major and APM 377 are prerequisites for this class.

APM 379
GUITAR HISTORY AND LITERATURE III
Undergraduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses.
Status as a Guitar Performance Major and APM 378 are a prerequisite for this class.

APM 384
STRING PEDAGOGY I
Undergraduate
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses.
Status as a String Performance, Guitar Performance, or Music Education Major is a prerequisite for this class.

APM 385
STRING PEDAGOGY II
Undergraduate
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses.
Status as a String Performance, Guitar Performance, or Music Education major and APM 384 is a prerequisite for this class.

APM 386
STRING PEDAGOGY III
Undergraduate
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses.
Status as a String Performance, Guitar or Music Education major and APM 385 is a prerequisite for this class.
APM 387
STUDIO TEACHING AS A PROFESSION
Undergraduate
Strategies and techniques for the professional studio teacher.

A petition to major is a prerequisite for this class.

APM 398
INDEPENDENT STUDY
Undergraduate
An in-depth study of an applied music topic under the supervision of a faculty member. (Departmental permission required).

Status as a Music student is a prerequisite for this class.

APM 400
OPERA WORKSHOP
Graduate
An advanced course in opera repertoire; scenes of operas will be presented for public performance.

Status as a Graduate Music student is a prerequisite for this class.

APM 403
MUSICAL COACHING FOR SINGERS
Graduate
Students meet in a masterclass format for musical and diction coaching in their current repertoire.

APV 100 or APV 400 is a corequisite for this class.

APM 405
GRADUATE RECITAL
Graduate
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed during the graduate residence. This recital is required as partial fulfillment of the degree of Master of Music in Performance and for the post-Masters Certificate in Performance.

APM 406
HARPSICHORD PERFORMANCE PRACTICE
Graduate
A practical introduction for pianists to the harpsichord, harpsichord repertoire from the late Renaissance to early Classical eras, and relevant performance practice and stylistic considerations.

Status as a Graduate Music student is a prerequisite for this class.

APM 408
BAROQUE PERFORMANCE PRACTICE - INSTRUMENTAL
Graduate
This course focuses on the interpretation and performance of music from the Baroque era, concentrating primarily on 18th century literature. Open to all instrumentalists, students will study Baroque performance practice based on the treatises and various writings of the time, as well as current scholarly research of early music specialists.

Status as a Graduate Music student is a prerequisite for this class.
APM 409
AN ENTREPRENEURIAL APPROACH TO PRESENTING MUSIC IN TODAY'S MARKETPLACE
Graduate
Through opportunity creation, case study, discussion and peer evaluation, this course analyzes and simulates the professional performing arts marketplace, providing collaborative hands-on experience for performers and arts managers-in-training. In this course, performers will hone their musical point-of-view and create an original, self-produced performance opportunity in the DePaul community, with marketing materials and a business structure to support their project. Arts Management students will collaborate with performers on these projects, providing support to their colleagues in a way that models their future professional activities. Each student will also be responsible for analyzing a current successful model, identifying keys to success. This course is intended to bridge the transition from college to career, providing the artistic, career development and entrepreneurship training that have become essential in today's professional environment.
Status as a Graduate Music student is a prerequisite for this class.

APM 411
WOODWIND PEDAGOGY
Graduate
This course is designed to provide students with an overview of the important aspects of woodwind pedagogy. Students will gain the necessary knowledge and skills to teach woodwind students of all ages and ability levels.
Status as a Graduate Music student is a prerequisite for this class.

APM 414
THE BUSINESS OF MUSIC FROM THE PERFORMER'S PERSPECTIVE
Graduate
Explorations of the business aspects of the performing musician. Topics will include unions, networking, freelancing, audition preparation, taxes, and ethics. Seminar format.
Status as a Graduate Music student is a prerequisite for this class.

APM 415
ITALIAN DICTION/ LANGUAGE LAB
Graduate
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of Italian texts.
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 416
GERMAN DICTION/ LANGUAGE LAB FOR GRADUATE STUDENTS
Graduate
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of German texts.
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 417
FRENCH DICTION/ LANGUAGE LAB FOR GRADUATE STUDENTS
Graduate
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of French texts.
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 428
ORCHESTRAL REPERTOIRE FOR WOODWINDS I: LITERATURE PERFORMANCE
Graduate
Detailed study of significant woodwind orchestral literature, with special emphasis on improving ensemble skills. Each week will feature new repertoire to be rehearsed and performed during the class.
Status as a Woodwinds Performance student is a prerequisite for this class.
APM 429
ORCHESTRAL REPERTOIRE FOR STRINGS
Graduate
Study of standard orchestral repertoire for string instruments.
Status as a Graduate String Performance student is a prerequisite for this class.

APM 432
ORCHESTRAL REPERTOIRE FOR STRING BASS
Graduate
Study of standard orchestral repertoire for string instruments.
Status as a Graduate String Bass Performance student or Music Performance certificate student is a prerequisite for this class.

APM 433
WOODWIND ORCHESTRAL REPERTOIRE II: AUDITION PREPARATION
Graduate
An overview of orchestral woodwind audition repertoire with special emphasis on audition preparation and audition practice. Students will take several mock auditions over the course of the quarter to improve their understanding of the audition experience.
Status as a Woodwinds Performance student is a prerequisite for this class.

APM 437
ALEXANDER TECHNIQUE
Graduate
Introduction to the Alexander Technique as applied to musical performance.
Status as a Graduate Music student is a prerequisite for this class.

APM 441
ACCOMPANYING PRACTICUM
Graduate
A practical examination of different styles of instrumental repertoire, and the art of accompanying vocalists (Fall Quarter) and instrumentalists (Winter and Spring Quarters) in both studio and performance formats.
Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 442
ACCOMPANYING CLASS
Graduate
An in-depth study of the development of the specific skills necessary to effectively accompany vocal (Fall Quarter) and instrumental repertoire (Winter and Spring Quarters).
Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 446
PERCUSSION PEDAGOGY
Graduate
This course presents teaching techniques of all the major percussion instruments, for students of beginning through advanced levels of proficiency. The course includes an in-depth examination of pertinent published teaching materials, e.g. as method books and collections, as well as an exploration of techniques for motivating young students.
Status as a Graduate Music student is a prerequisite for this class.
APM 447  
**ORCHESTRAL REPERTOIRE: PERCUSSION**  
Graduate  
Study of standard orchestral repertoire.  
Status as a Graduate Percussion student is a prerequisite for this class.

APM 453  
**ADVANCED TECHNIQUES OF THE MUSIC STAGE**  
Graduate  
Study, coaching, rehearsal, and performance of music and opera.  
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 457  
**A HISTORY OF SINGING THROUGH SOUND**  
Graduate  
Using guided listening from the dawn of recording, this course will explore the history and evolution of vocal technique and performance practice. Diverse genres and periods of classical song, opera, and oratorio will be studied and a precise vocabulary for discussing and evaluating will be developed.  
Status as a Graduate Music student is a prerequisite for this class.

APM 460  
**TOPICS IN PERFORMANCE**  
Graduate  
An in depth investigation of a topic in performance studies.  
Status as a Graduate Music student is a prerequisite for this class.

APM 461  
**PIANO LITERATURE**  
Graduate  
An in-depth study of the long-established tradition of pianists and pianism, from Liszt and his disciples in the 19th century through Rachmaninoff, Horowitz and the great pianists of the 20th century, and how the role of the pianist has evolved to the present day.  
Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 471  
**BRASS CONCEPTS**  
Graduate  
A study of brass literature, performance, and pedagogy. An introduction to professional career responsibilities and opportunities.  
Status as a Graduate Brass student is a prerequisite for this class.

APM 472  
**ORCHESTRAL REPERTOIRE FOR BRASS**  
Graduate  
Study of standard orchestral repertoire for brass instruments.  
Status as a Graduate Brass student is a prerequisite for this class.

APM 474  
**BRASS INSTRUMENT PERFORMANCE STYLE**  
Graduate  
Survey of solo and orchestral performance styles through the principal composers of the 19th and 20th centuries. Analysis of new demands placed on performers in the 21st century. Study of stylistic concepts based on historical, technical, national, and aesthetic considerations.  
Status as a Graduate Music student is a prerequisite for this class.
APM 477
GUITAR HISTORY AND LITERATURE I
Graduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses.

APM 478
GUITAR HISTORY AND LITERATURE II
Graduate
Guitar History and Literature II. Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses.

APM 479
GUITAR HISTORY AND LITERATURE III
Graduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses.

APM 486
STRING PEDAGOGY
Graduate
A study of the concepts and philosophies of teaching string instruments for beginners through advanced levels. In addition, approaches to coaching chamber music will be reviewed.

APM 488
STUDIO TEACHING AS A PROFESSION
Graduate
Strategies and techniques for the professional studio teacher.

APM 496
VOICE PEDAGOGY
Graduate
An introduction to basic concepts of vocal pedagogy and the physiology of the singing voice. Through listening, evaluation, study, discussion, observation, and teaching, students will gain a better understanding of how to approach teaching beginning through advanced vocal students.

APM 498
INDEPENDENT STUDY
Graduate
An in-depth study of an applied music topic under the supervision of a faculty member.

Status as a Graduate String or Graduate Guitar student is a prerequisite for this class.
APP 100
PERCUSSION
Undergraduate
Advanced individual instruction in percussion performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APP 400
PERCUSSION
Graduate
Advanced individual instruction in percussion performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 127
GUITAR
Undergraduate
Advanced individual instruction in guitar performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 160
STRING BASS
Undergraduate
Advanced individual instruction in string bass performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 180
VIOLA
Undergraduate
Advanced individual instruction in viola performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 185
VIOLIN
Undergraduate
Advanced individual instruction in violin performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 190
VIOLONCELLO
Undergraduate
Advanced individual instruction in violoncello performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.
APS 427
GUITAR
Graduate
Advanced individual instruction in guitar performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 460
STRING BASS
Graduate
Advanced individual instruction in string bass performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 480
VIOLA
Graduate
Advanced individual instruction in viola performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 485
VIOLIN
Graduate
Advanced individual instruction in violin performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 490
VIOLONCELLO
Graduate
Advanced individual instruction in violoncello performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APV 100
VOICE-STUDIO
Undergraduate
Advanced individual instruction in voice performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APV 400
VOICE-STUDIO
Graduate
Advanced individual instruction in voice performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.
APW 115
BASSOON
Undergraduate
Advanced individual instruction in bassoon performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APW 120
CLARINET
Undergraduate
Advanced individual instruction in clarinet performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APW 125
FLUTE
Undergraduate
Advanced individual instruction in flute performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APW 135
OBOE
Undergraduate
Advanced individual instruction in oboe performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APW 155
SAXOPHONE
Undergraduate
Advanced individual instruction in saxophone performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APW 415
BASSOON
Graduate
Advanced individual instruction in bassoon performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APW 420
CLARINET
Graduate
Advanced individual instruction in clarinet performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.
APW 425
FLUTE
Graduate
Advanced individual instruction in flute performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.
Status as a Graduate Music student is a prerequisite for this class.

APW 435
OBOE
Graduate
Advanced individual instruction in oboe performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.
Status as a Graduate Music student is a prerequisite for this class.

APW 455
SAXOPHONE
Graduate
Advanced individual instruction in saxophone performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.
Status as a Graduate Music student is a prerequisite for this class.

ARB 101
BASIC ARABIC I
Undergraduate
Arabic 101 is the first in a series of Arabic courses taught at DePaul. Students will be taught the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Basic grammar will be introduced to facilitate communication. Students will be exposed to authentic Arabic materials from different Arab countries according to the students' language skills and interests.

ARB 102
BASIC ARABIC II
Undergraduate
Arabic 102 is the second in a series of Arabic courses taught at DePaul. Students learn the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Instruction will build on skills taught in Arabic 101. The main focus of the course will continue to be communicative skills, and grammar will be introduced to facilitate communication. The course will be taught mainly in Arabic using Modern Standard Arabic.

ARB 103
BASIC ARABIC III
Undergraduate
Arabic 103 is the third in a series of Arabic courses taught at DePaul. Students learn the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Instruction will build on skills taught in Arabic 101 & 102. The main focus of the course will continue to be communicative skills, and grammar will be introduced to facilitate communication. The course will be taught mainly in Arabic using Modern Standard Arabic.

ARB 104
INTERMEDIATE ARABIC I
Undergraduate
Intermediate Arabic I is the first course of three intermediate Arabic courses that focus on taking students to the advanced level of proficiency by expanding students knowledge of Arab culture, building their vocabulary, and developing their grammar skills. Intermediate Arabic will focus on broadening students' knowledge of the Arabic language beyond the daily life topics. Students will be introduced to examples of authentic materials of Arabic Literature that include topics of general and professional interests, in order to increase students' comprehension skills and prepare them to understand the literary and cultural context of the Arabic language. In addition, this course will emphasize two main points: (1) how mastering grammar concepts is crucial for understanding Arabic texts as well as for communicating clearly in speech and writing; and (2) how the derivation system is key for developing vocabulary. ARB 103 or equivalent, including placement test or permission of instructor, is recommended.
ARB 105
INTERMEDIATE ARABIC II
Undergraduate
Intermediate Arabic II is the second course of three intermediate Arabic courses that focus on taking students to the advanced level of proficiency by expanding students' knowledge of Arab culture, building their vocabulary, and developing their grammar skills. Intermediate Arabic will focus on broadening students' knowledge of the Arabic language beyond the daily life topics. Students will be introduced to examples of authentic materials of Arabic literature that include topics of general and professional interests, in order to increase students' comprehension skills and prepare them to understand the literary and cultural context of the Arabic language. In addition, this course will emphasize two main points: (1) how mastering grammar concepts is crucial for understanding Arabic texts as well as for communicating clearly in speech and writing; and (2) how the derivation system is key for developing vocabulary. ARB 104 or equivalent, including placement test or permission of instructor, is recommended.

ARB 106
INTERMEDIATE ARABIC III
Undergraduate
Intermediate Arabic III is the third course of three intermediate Arabic courses. The course will focus on using the skills the students developed to effectively communicate in Modern Standard Arabic orally and in writing. Students will be introduced to authentic Arabic text and audio material from different Arab countries. The instruction will be provided mainly in Arabic using Modern Standard Arabic as the means of instruction. Students are expected to speak and respond to questions in Arabic. This is an effective approach to language learning that emphasizes communicative abilities and helps to successfully transition students into upper level Arabic courses. ARB 105 or equivalent, including placement test or permission of instructor, is recommended.

ARB 197
SPECIAL TOPICS IN ARABIC
Undergraduate
See schedule for current offerings.

ARB 198
STUDY ABROAD
Undergraduate
Variable credit.

ARB 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

ARB 201
ADVANCED ARABIC I
Undergraduate
Advanced reading and comprehension, with emphasis on recognizing and understanding the perspectives and patterns of Arabic culture.

ARB 202
ADVANCED ARABIC II
Undergraduate
Advanced practice in writing and composition, with emphasis on grammatical accuracy, text development skills, and vocabulary expansion.

ARB 203
ADVANCED ARABIC III
Undergraduate
Advanced practice of oral skills in both formal and informal usage, with emphasis on correct pronunciation, sentence structure, appropriate vocabulary, and cultural context.
ARB 297
SPECIAL TOPICS IN ARABIC
Undergraduate
See schedule for current offerings.

ARB 298
STUDY ABROAD
Undergraduate
Variable credit.

ARB 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

ARB 300
ARABIC GRAMMAR
Undergraduate
A comprehensive review of Arabic grammar with focus on its application to the development of communicative competence.

ARB 301
ARAB BROADCAST MEDIA
Undergraduate
This course improves students' competence in listening, reading comprehension, writing, and presentation skills in the content of Arab media. The main language of instruction will be Modern Standard Arabic (MSA), the language of Arab news. Both instructor and students will be using MSA as the main language for communication. Classroom instruction will assist students in acquiring and using Arabic vocabulary needed for understanding and analyzing authentic Arabic media material. The course will focus on five main topics: (1) Meetings and Conferences, (2) Demonstrations, (3) Elections, (4) Courts and Trails, and (5) Finance and Business. In addition to topics and vocabulary covered in the required textbooks, students will listen and discuss authentic news items. They will also be exposed to Egyptian dialect. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 302
ARABIC PRINT MEDIA
Undergraduate
The course consists of intensive exposure to vocabulary and expressions characteristic of language used in Arab media. The course will rely on newspaper articles and authentic material in addition to the Media Arabic textbook. The focus of the course will be on enforcing vocabulary learned in ARB 301 that will assist students in understanding the content of Arab print Media and translating text into English. Presentations and discussions will be used to enforce meaning and increase vocabulary retention and proper use. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 311
ARABIC SHORT STORIES
Undergraduate
A survey of the history and development of short stories in Arabic literature from various Arab countries with focus on language, content analysis, forms, and cultural content relevant to major elements of Arab culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 313
ARABIC FILM
Undergraduate
Survey of the development of Arabic films in the Arab world with examination of sample works from various periods that allow reflection on Arab culture and the social, political, and religious issues that define that culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.
ARB 320
BUSINESS ARABIC
Undergraduate
Content-based instruction with focus on business vocabulary, syntax, and basic linguistic skills necessary for functioning in an Arab business context. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 330
ARABIC TRANSLATION
Undergraduate
Focuses on the thorough introduction to translation (including theory) and the latest technologies available to translators: web-based dictionaries, thesauruses, etc. Introduces students to various translation techniques and emphasizes the need for technical knowledge as required by specific fields. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 350
ARABIC LITERATURE
Undergraduate
This course introduces the students to Modern Arabic Literature in form, language, and content. It provides a survey of modern Arabic literature and will focus on various genres including poetry, drama, the novel, and short stories. Works by major Arab writers and poets representing various regions and content will be examined and analyzed to develop an appreciation for Arab literature and a deeper understanding of their portrayal of Arab culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Arabic. Students must have the equivalent of 106 or higher ability in Arabic to take this two credit component. Please contact the Department of Modern Languages if you have questions about this courses or about language placement.

ARB 397
SPECIAL TOPICS IN ARABIC
Undergraduate

ARB 400
ARABIC GRAMMAR
Graduate
A comprehensive review of Arabic grammar with focus on its application to the development of communicative competence. Cross-listed with ARB 300.
This course improves students' competence in listening, reading comprehension, writing, and presentation skills in the content of Arab media. The main language of instruction will be Modern Standard Arabic (MSA), the language of Arab news. Both instructor and students will be using MSA as the main language for communication. Classroom instruction will assist students in acquiring and using Arabic vocabulary needed for understanding and analyzing authentic Arabic media material. The course will focus on five main topics: (1) Meetings and Conferences, (2) Demonstrations, (3) Elections, (4) Courts and Trials, and (5) Finance and Business. In addition to topics and vocabulary covered in the required textbooks, students will listen and discuss authentic news items. They will also be exposed to Egyptian dialect. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

The course consists of intensive exposure to vocabulary and expressions characteristic of language used in Arab media. The course will rely on newspaper articles and authentic material in addition to the Media Arabic textbook. The focus of the course will be on enforcing vocabulary learned in ARB 301 that will assist students in understanding the content of Arab print Media and translating text into English. Presentations and discussions will be used to enforce meaning and increase vocabulary retention and proper use. Cross-listed with ARB 302. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

A survey of the history and development of short stories in Arabic literature from various Arab countries with focus on language, content analysis, forms, and cultural content relevant to major elements of Arab culture. Cross-listed with ARB 311.

Survey of the development of Arabic films in the Arab world with examination of sample works from various periods that allow reflection on Arab culture and the social, political, and religious issues that define that culture. Cross-listed with ARB 313.

Content-based instruction with focus on business vocabulary, syntax, and basic linguistic skills necessary for functioning in an Arab business context. Cross-listed with ARB 320.

Focuses on the thorough introduction to translation (including theory) and the latest technologies available to translators: web-based dictionaries, thesauruses, etc. Introduces students to various translation techniques and emphasizes the need for technical knowledge as required by specific fields. Cross-listed with ARB 330.

This course introduces the students to Modern Arabic Literature in form, language, and content. It provides a survey of modern Arabic literature and will focus on various genres including poetry, drama, the novel, and short stories. Work by major Arab writers and poets representing various regions and content will be examined and analyzed to develop an appreciation for Arab literature and a deeper understanding of their portrayal of Arab culture. Cross-listed with ARB 350.
ARB 496
PRACTICUM IN ARABIC INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

ARB 497
SPECIAL TOPICS IN ARABIC
Graduate
See schedule for current offerings.

ARB 498
STUDY ABROAD
Graduate
Variable credit. Permission required.

ARB 499
INDEPENDENT STUDY
Graduate
Variable credit. Permission of chair and instructor required.

ART 101
DIGITAL TOOLS FOR VISUAL THINKERS
Undergraduate
As digital media become a requisite aspect of the artist and designer's professional preparation, this foundation level course focuses on building basic skills in the most common digital imaging tools. The course will cover two applications, one pixel-based imaging (Photoshop), and one vector-based imaging (Illustrator). It is designed to give students an introduction to how these applications can be used as ideational tools for exploring visual problems, possibilities and solutions, how they can be used to create digital images for output and how they can be integrated with traditional analog media and tools.

ART 104
CREATING ART
Undergraduate
A studio course that uses visual problems and critical discussions to develop creative and perceptual abilities; relates these abilities to the principles of art in cultural and historic contexts (non-art majors).

ART 105
TWO-DIMENSIONAL FOUNDATIONS
Undergraduate
Development of perceptual ability through the analysis of two dimensional concepts of line, shape, value texture, color, space and organization.

ART 106
BEGINNING DRAWING
Undergraduate
Introduction to composition, line and rendering in black and white drawing media. Basic techniques for descriptive and expressive use of drawing media.

ART 107
THEATRE DRAWING I
Undergraduate
The first in a three quarter sequence of general drawing courses exclusively for students enrolled in the Theater School.
ART 108
THEATRE DRAWING II
Undergraduate
ART 107 and a student in the Theatre School or consent of instructor is a prerequisite for this course.

ART 109
THEATRE DRAWING III
Undergraduate
ART 110
BEGINNING PAINTING
Undergraduate
An introduction to basic organizational and technical concepts in painting. The preparation and proper use of materials is also stressed.

ART 107 or consent of instructor is a prerequisite for this class.

ART 113
THREE DIMENSIONAL FOUNDATIONS
Undergraduate
Development of perceptual ability through the analysis of three-dimensional concepts of line, shape, material, light, movement, and organization.

ART 114
FOUR DIMENSIONAL FOUNDATIONS
Undergraduate
This course is an introduction to the shared elements and principles of time-based art forms. The course will examine those elements and principles with examples from three time-based mediums: performance (body art), video, and one of the interactive art forms that uses Flash software. At the beginning of each three-week session, students will be introduced to one of the three mediums with gradual project development and execution at the end of the three-week period. Lectures, demonstrations, exercises, and class and home assignments and readings about the process, form and content specific to time-based art forms will be main the vehicles for delivering the course.

ART 115
BEGINNING SCULPTURE
Undergraduate
An introduction to traditional and contemporary approaches to sculpture with an emphasis on clay modeling, plaster casting and carving. Studio core course.

ART 118
THINKING PHOTOGRAPHY
Undergraduate
This is a required course for Media Arts majors taking a critical and historical look at "the arts of mechanical reproduction" and lens-based image making. As a lecture class, it may include some very basic shooting exercises assigned that could easily be carried out by "snapshot" or disposable cameras - either film or digital.

ART 200
ART & ARTISTS IN CONTEMPORARY CULTURE
Undergraduate
This course will use a mixed lecture/discussion format and thematic approach to consider works on art and design produced in the last 30 years as a means of contextualizing recent works of art. The primary approach to this material will be from the perspective of the artmaker (artist or designer), for whom art theory, criticism and history are crucial tools for developing effective and meaningful work. For that reason, this class will be taught by studio faculty. The class will make extensive use of the city's contemporary museums, galleries, exhibitions and works of public art to emphasize the social, economic and political context from which works of art and design emerge as indicators or signposts of contemporary cultural concerns. Students cannot receive credit for both ART 200 and ART 222.

ART 204
VISUAL COMMUNICATION
Undergraduate
A studio course applying visual principles of communication to written presentations using the most common PC graphics programs, mainly Photoshop and Illustrator.
ART 205
COLOR THEORY AND APPLICATION
Undergraduate
Explorations into the use of color in both paint and computer applications.
ART 105 or consent of instructor is a prerequisite for this class.

ART 206
INTERMEDIATE DRAWING
Undergraduate
Continued development and exploration into the rendering of space with an introduction to a wider range of drawing media and contemporary art applications in drawing.
ART 106 or consent of instructor is a prerequisite for this class.

ART 210
INTERMEDIATE PAINTING I
Undergraduate
A development of skills and concepts beyond the basic level. Problems that stress advanced concepts of theme, color and spatial design are studied.
ART 105 and 110 or consent of instructor are a prerequisite for this class.

ART 211
INTERMEDIATE PAINTING II
Undergraduate
Intermediate Painting II.
ART 105, ART 106 and ART 110 or consent of instructor is a prerequisite for this class.

ART 212
WATERCOLOR PAINTING
Undergraduate
The investigation of aqueous medium in thin transparent washes, using a variety of subjects. Spontaneity of medium is stressed in order to capture the nuance of color and light.
ART 105 or ART 106 or instructor permission is a prerequisite for this course.

ART 213
SPACE DESIGN
Undergraduate
Application of three-dimensional principles to basic issues of space and object design. Introduction to professional presentation techniques.
ART 113 and ART 115 or consent of instructor is a prerequisite for this class.

ART 214
CERAMIC SCULPTURE
Undergraduate
An exploration of ceramic techniques for constructing and firing expressive sculptural forms.
ART 113 or consent of instructor is a prerequisite for this class.
ART 215
INTERMEDIATE SCULPTURE
Undergraduate
Introduction to basic wood and metal working techniques for producing constructed sculpture. Focuses on modern and contemporary issues in sculpture.

ART 115 or consent of instructor is a prerequisite for this class.

ART 217
ADVANCED THREE-DIMENSIONAL DESIGN
Undergraduate
Advanced investigation of three dimensional design concepts. Course is a sequel to ART 213.

ART 113, ART 115 and ART 213 or consent of instructor is a prerequisite for this class.

ART 218
FIGURE DRAWING
Undergraduate
A study of the human figure through an exploration of anatomy combined with various drawing processes.

ART 106 or consent of instructor is a prerequisite for this class.

ART 219
BEGINNING FIGURE SCULPTURE
Undergraduate
This course provides opportunities for learning how to represent the dynamic human figure in three dimensions and welcomes students with no experience in figure studies as a first introduction to the figure. All class work will be done from a nude model. Home assignments will consist of figure drawings either from departmental Open Studio Figure Drawing sessions or from assigned figure drawings of great masters. Students will be taught basic technical and eye/hand coordination skills necessary to depict the human figure three dimensionally as well as basic understanding of the proportions of the human figure and ability to implement them. This course will also introduce to students the concept of the human figure as a dynamic three dimensional entity. Students will have an opportunity to work from a nude model for nine weeks, examining human anatomy, body proportions and different gesture poses.

ART 106 or ART 115 or instructor permission is a prerequisite for this course.

ART 223
LIGHT, COLOR, AND PHOTOGRAPHY
Undergraduate
Principles of image making with lenses, mirrors and photographic processes. Discusses the physical properties of light and color including those used in laser and holography.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

ART 224
BEGINNING DIGITAL PHOTOGRAPHY
Undergraduate
This course introduces students to the digital camera (DSLR) and editing platforms as tools for creative and expressive use of the photographic medium. Proper use of camera functions and file management will be learned in tandem with editing strategies using adobe software. Lighting strategies and inkjet printing will be introduced in a fully equipped Mac lab. This course emphasizes the concepts, theory, and history of the photographic medium within the context of contemporary art. Students will produce their own photographs by digital means and engage in discussion and critical analysis of images and image aesthetics. No prerequisite. Suggested prior course: Art 101: Digital Tools for Visual Thinkers.
ART 225
BEGINNING PHOTOGRAPHY
Undergraduate
This course is an introduction to the aesthetics, processes, and theory of black & white film photography. Techniques of chemical-based film development, darkroom printing, and image editing will be introduced. Strategies of exposure, framing and lighting will be explored as means for developing a meaningful photographic language. Emphasis will be given to understanding and using the camera as a tool for personal inquiry and experimentation. Additionally, this course will focus on the role and impact of the photographic image in both historical and contemporary contexts. Suggested prior course: Art 105: 2D Foundations.

ART 226
VIDEO ART
Undergraduate
An introductory level course designed to familiarize students with the uses of video in a variety of artistic practices. These encompass non-narrative treatments in a multiple forms including single and multi-use of monitors and projection, installation, and performance. Students will learn to use PremiereCS6, an industry-standard video editing program, in this class. The department provides video and audio equipment.

ART 227
DIGITAL ART
Undergraduate
Students will develop dexterity and finesse for digital imaging within the context of contemporary art. The primary focus will be on analytic problem solving and developing students’ abilities to create complex images, illustrations and icons that effectively convey content and create context. Coursework will utilize Adobe Photoshop and Adobe Illustrator to support and enhance a student’s artistic vision; this course encourages a variety of artistic production.

ART 101 or consent of instructor is a prerequisite for this class.

ART 228
COMPUTER APPLICATIONS FOR DESIGN II
Undergraduate
This course will introduce students to professional layout techniques including page templates, formatting and preparing files per industry-specific guidelines for spot and process color offset printing. Students will design complex, multi-page documents utilizing intermediary layout, typographic and illustration skills. A broad range of conceptual layout principles and additional procedural preparations and “pre-flighting” expectations will be examined. Adobe InDesign will be the layout software utilized. ART 260 is highly recommended.

ART 101, ART 105, ART 227, and ART 264 or consent of instructor is a prerequisite for this class.

ART 229
BEGINNING PRINTMAKING
Undergraduate
Training in the artistic possibilities of a variety of techniques, including wood-cut, intaglio and mono-print, used in the production of limited edition prints.

ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 230
ISSUES IN ENVIRONMENTAL DESIGN
Undergraduate
Issues in Environmental Design is an introductory course that will examine concepts, theories and practices across multiple scales of design, including graphic, product, architecture, landscape architecture and urban design. We will explore the history and practice of eco-design as well as sustainable design in modern cultures. The environmental impact of design will be examined in relation to everyday products, as well as the consumer culture that feeds their mass production. Examples of excellence will be explored through the examination of case studies; local demonstrations will illustrate the theme of restorative design; and artists' projects that address environmental issues will also be studied. The underlying theme is the connection between culture and nature, and how we must reduce our negative impact on systems that support all life while building positive systems that support all life.

ART 231
SCREEN PRINTING
Undergraduate
A beginning level course designed to teach students the essential equipment, materials, and processes, for screen printing artworks. Printing methods utilize hand-cut stencils, screen filler, and photo-emulsion techniques. ART 101 or ART 105 recommended.
ART 245
PAINTING: MIXOLOGY
Undergraduate
This is an intermediate course utilizing varied 2D media and processes including digital imaging. This will allow students to explore contemporary means and sensibilities through media that reflect a broader range of visual, material and conceptual interests. This will give students a larger repertoire to choose from when making images. Building on the knowledge of oil painting materials and techniques that students gain in the ART 110 Beginning Painting course, ART 245 will also utilize water-based painting materials such as watercolor, gouache, acrylic polymers and gel media. Students will explore techniques such as collage, frottage, stamping, stenciling, relief printing, found image transfer and digital print output in combination with painting and drawing media.

ART 105, ART 106 and ART 110 or consent of instructor is a prerequisite for this class.

ART 260
INTERMEDIA STUDIO
Undergraduate
This course introduces the practices of Intermedia in a social and historical context. Students will learn to articulate concepts through the production of artworks that span a variety of media. The goals are to explore formal structures and research methods with emphasis on the role of analysis, historical and conceptual thinking as essential skills of a multi-media or Intermedia artist. The course includes basic time-based software instruction.

(ART 101 and ART 105) or ANI 105 or consent of instructor is a prerequisite for this class.

ART 264
TEXT IN THE VISUAL ARTS
Undergraduate
Students are introduced to the fundamentals of text including layout, hierarchy and the basic characteristics of letter-forms and type families; in addition to conceptually driven experimentation with typographic form in relation to the fine and media arts, including painting, drawing, photography (digital and analog), photomontage as well as video and time-based arts. Projects employ both handwork and computer technology and address the two-dimensional surface as well as type in three-dimensional space and time-based art.

(ART 101 and ART 105) or ANI 105 or consent of instructor is a prerequisite for this class.

ART 289
EXPERIMENTAL VIDEO ART
Undergraduate
This course is designed to investigate avant-garde film and video theory, and studio practices. Class will be devoted to the viewing and study of film and video work from Europe, Asia, and the US. Students will learn to use PremiereCS6, an industry-standard video editing program, in this class. The department provides video and audio equipment.

ART 290
STUDIO WORKSHOP
Undergraduate
Off campus training in specific studio processes by noted Chicago artists in ceramics or wood working. May be repeated up to 8 hours credit.

ART 291
MURAL PAINTING
Undergraduate
This class has a central focus on the art of mural making. Students will have hands on experience as they design and execute a mural at a predetermined site. The mural will be executed as a small scale illustration board piece in the classroom during the last part of the quarter and installed at a real venue. The students will also learn the strategy and design factors of planning a mural piece of their own. The class functions as a studio class as it meets for 6 hours weekly. A minimum of 25 service hours is required. Drawing or painting experience at the collegiate level is highly recommended for this class. This class is certified for cbSL and JYEL credit.
ART 292
COMMUNITY VIDEO PRODUCTION
Undergraduate
The heavy emphasis on experiential learning of this course will combine classroom instruction on documentary video production with student fieldwork. Over the course of the term, students will plan, produce and substantially complete a videotape project for a community client. Through the production of a video project specifically designed for a community organization, students will be able to practice production techniques that they learn in the classroom while gaining insight about how video can bring attention to community needs and thus make an impact on communities (outside the classroom). Our goal for this course is to bring students to the point of understanding and mastering the technical elements of video production and understanding these processes within an experiential and service learning context, such that through working on documentary projects, students will come to a point of understanding the history and contemporary needs of a particular community group and how the creation of a finished video can address some of those needs. Students will work to produce projects that are thoughtful, important and technically polished. This class is certified for cbSL and JYEL credit.

ART 293
CHINA IN TRANSITION: SOCIAL PERSPECTIVES IN FILM & PHOTOGRAPHY IN CONTEMPORARY CHINA
Undergraduate
The course content will engage a wide range of issues such as the tension and history of the women's rights movement, the reconstruction of values in gender and sexuality, and the ever-changing urban infrastructures in the economically driven culture. Film and photography are the rising new media for documenting and responding to social issues by scholars, filmmakers and artists expressing the Chinese experience. The methodology of this class will deconstruct and decode three common cultural stereotypes: American representations of China, Chinese official representations of itself, and universal representations of one's experiences as a traveler. Through dialogue and cross-reading materials, we compare films, photography, sites/field trips, interviews and journalistic materials to search for the reality and social issues beneath the visual representation. This course emphasizes the aesthetic, the theory and the hands-on experience of using video and photography during the trip (including a brief lecture on composition, framing and digital photography and/or possible video shooting techniques). We will share finished assignments in group critiques and reading discussions - in both cases, they will be the primary means of evaluation in class. In a critique, students will present their work for response and analysis in relation to the given assignment through a class discussion. This dialogue is intended to be evaluative, to provide constructive criticism and to develop critical thinking skills.

ART 294
GENIUS LOCI: ROMAN ARCHETYPES OF PLACE IN VISUAL CULTURE
Undergraduate
This is a semester long study trip to Rome that offers a thematic studio/art history experience concerned with the role that Rome has played in shaping our understanding of place as expressed in visual culture. This course will include such topics as: the influence of Roman approaches to urban organization and development; the influence of national academies in Rome on Western developments in art and architecture, Piranesi and the articulation of utopic and dystopic models derived from Roman culture; the spatial collage of Roman architectural enveloping and fragmentation; illusion and perspective as perceptual puzzle and ideological signifier; and Pasquino and the expression of vox populi in public space. The unique circumstance of urban Rome, where 2500 years of building activity are embedded in the fabric of contemporary life, offers an opportunity to involve students in an interdisciplinary examination of how human needs and desires shape our built environment and are shaped by it.

ART 302
TOPICS IN THE HISTORY OF CINEMA
Undergraduate
Courses on the history of cinema that explore the form, content and historical significance of the media. Taught in the College of Communication with cross-list in Art.

ART 306
ADVANCED DRAWING
Undergraduate
An advanced course in historical and contemporary approaches to issues and techniques of drawing.

ART 206 or ART 218 or instructor consent is a prerequisite for this class.

ART 309
DIGITAL SCULPTURE
Undergraduate
Creating computer models of sculpture and their execution using digital cutters.

ART 113 and ART 115 or consent of instructor is a prerequisite for this class.
ART 310
ADVANCED PAINTING I
Undergraduate
Development of advanced skills in painting with work in a more independent approach to concepts and techniques.

ART 105, ART 106, ART 110 and ART 210 or consent of instructor is a prerequisite for this class.

ART 311
ADVANCED PAINTING II
Undergraduate
Advanced Painting II.

ART 105, ART 106, ART 110, ART 210 and ART 310 or consent of instructor is a prerequisite for this class.

ART 312
FIGURE PAINTING
Undergraduate
An introduction to the study of the painted figure in environmental settings. Light, color and spatial illusion are stressed.

ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 313
PERFORMANCE/INSTALLATION ART
Undergraduate
In this upper level course students will utilize their previously acquired skills and background from their respective areas of specialty (painting, drawing, sculpture, photo, video, sound, web and computer application etc) in a new conceptual and spatial context by creating specific environments (installation) and using their bodies in those environments (performance). These hybrid art projects will be presented in a real space and live performance format. Additionally using video and photo documentation as sources, students will create another project in digital format. Students will have the option to concentrate on only one aspect of the course; either installation or performance using either digital or non digital (or combined) formats for their projects.

One 200-level studio course or instructor permission is a prerequisite for this course.

ART 315
ADVANCED SCULPTURE
Undergraduate
Exploration of advanced sculptural themes and techniques determined by the student in consultation with the instructor.

ART 106, ART 115 and ART 215 or consent of instructor is a prerequisite for this class.

ART 316
ADVANCED SCULPTURE II
Undergraduate
Sequel course to ART 315 to allow the completion of extensive projects.

ART 106, ART 113, ART 115, ART 215 and ART 315 or consent of instructor is a prerequisite for this class.

ART 317
ADVANCED FIGURE SCULPTURE
Undergraduate
This course will provide an expansion and enrichment of skills in modeling the human figure for students with a basic background in the figure. All class work will be done from a nude model. Home assignments will consist of figure drawings either from departmental Open Studio Figure Drawing sessions or from assigned figure drawings of great masters. Students in this course will further develop their technical and eye/hand coordination skills necessary to depict the human figure three dimensionally in a more professional manner as well as full understanding of the proportions of the human figure and the ability to implement them freely in a dynamic human figure. Course will also point towards the potential possibility of the exploration, conceptualization and interpretation of the human figure within the contemporary art context or other applications related to the students' interests.

ART 215 or ART 218 or ART 219 or instructor permission is a prerequisite for this course.
ART 318
ADVANCED FIGURE DRAWING
Undergraduate
Encourages the application of perceptual and media skills gained in figure drawing to more advanced and personal works on paper.

ART 106 and ART 218 or consent of instructor is a prerequisite for this class.

ART 321
INTERMEDIATE DIGITAL PHOTOGRAPHY
Undergraduate
This course builds on Art 224, further emphasizing the aesthetic and conceptual possibilities of digital photography. Through project-based experimentation, students deepen their critical engagement with photographic tools while producing conceptually driven bodies of work. Refined use of the DSLR camera and editing tools takes place through hands-on image production and process-oriented critique. Additionally, this course explores historically established uses of the photographic medium and their relation in the digital context.

ART 224 or instructor permission is a prerequisite for this course.

ART 323
INTERMEDIATE PHOTOGRAPHY
Undergraduate
This course continues the aesthetic development and processes of film-based, black & white photography through a refinement of techniques and conceptual practices. Large and medium-format cameras are introduced along with fiber-based printing, additional lighting and exposure strategies, and darkroom print finishing techniques. Emphasis is on developing and enhancing critical approaches to subject matter through project-based, hands-on experimentation and critical discussion.

ART 225 or consent of instructor is a prerequisite for this class.

ART 324
INTERMEDIATE PRINTMAKING I
Undergraduate
An advanced course designed for students who have had previous technical experience with the various printmaking media. The goal of this course is to enable students to investigate personal concerns and objectives through an ambitious and concentrated body of work. An emphasis is placed on the development of personal imagery and aesthetic goals.

ART 229 or instructor permission is a prerequisite for this course.

ART 325
ADVANCED PHOTOGRAPHY PROJECTS
Undergraduate
Advanced Photography Projects is a course emphasizing individual artistic practice through project-driven approaches to photography. Students will generate conceptually challenging and visually refined photographs using analog and/or digital means. Coursework incorporates student presentations of their artwork, critical discussion and analysis, and the creation of a refined, edited and complete body of work or portfolio. Additional forms such as the photographic book, large-scale printing, and hybrid film/digital approaches may be explored.

Two photography courses, at least one of which at the 300 level or instructor permission are prerequisites for this course.

ART 326
SPECIAL TOPICS IN EXPERIMENTAL VIDEO ART
Undergraduate
Advanced explorations of video as a form of artistic expression. Each course will have a unique focus, such as installation art, video and performance, experimental narrative or experimental documentary. This course may be repeated for credit assuming a change in topic. HD Digital cameras will be provided by the art department. Hands-on skills will be developed and projects will be edited in Final Cut Express.

ART 226 or instructor permission is a prerequisite for this course.
ART 328
DOCUMENTARY PHOTOGRAPHY
Undergraduate
Exploration of photographic concepts and techniques used in artistic, journalistic and sociological documentation.
ART 225 or consent of instructor is a prerequisite for this class.

ART 329
ADVANCED DIGITAL PHOTOGRAPHY
Undergraduate
Advanced Digital Photography focuses on artistic practice through inventive use of the photographic medium and refined engagement with digital tools. Students will focus on self-directed, in depth projects culminating in a high quality portfolio. Additionally, students will be engaging in large-scale inkjet printing and advanced digital workflow. This course also encourages experimentation with unconventional approaches to the photographic object. Students in this course should be prepared to work with their chosen topic independently, create thesis projects for presentations, and participate in group discussions and critiques.
ART 224 and ART 321 or instructor consent are prerequisites for this class.

ART 330
INTERMEDIATE PRINTMAKING II
Undergraduate
An introduction to the various methods and techniques in the century old process of etching, with an emphasis on both traditional and modern approaches.
ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 331
INTERMEDIATE PRINTMAKING III
Undergraduate
A beginning level course designed to teach the student the basic screen printing techniques, materials and equipment and their proper usage.
ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 332
TOPICS IN PHOTOGRAPHIC PRACTICE
Undergraduate
Focused investigations of specific aesthetic, technical or conceptual issues in the practice of photography.
ART 224 or ART 225 or consent of instructor is a prerequisite for this class.

ART 333
COMPUTER APPLICATIONS FOR DESIGN: PRE-PRESS
Undergraduate
Builds on skills learned in ART 228. Explores specific areas of graphics and design focusing on pre-press, and exposes students to advanced software. It is highly recommended students take ART 358 before taking this class.
ART 227, ART 228, ART 260, and ART 264 or consent of instructor is a prerequisite for this class.

ART 334
PORTFOLIO
Undergraduate
In this course students review previous course projects and prepare a final portfolio of their own artistic identity and presentation in preparation for artistic practice, graduate study, and related career opportunities. Visiting professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development.
ART 227, ART 228, ART 260, ART 264, and ART 358 or consent of instructor is a prerequisite for this class.
ART 345
ADVANCED MIXED MEDIA
Undergraduate
This course is the sequel to ART 245 Mixed Media Painting and as such is a content driven course with emphasis on understanding medium and material as symbol and idea. The course will offer students a more in-depth understanding of materials and techniques studied in ART 245 as well as prepare them for more conceptually advanced work in painting.

ART 105, ART 106, ART 110 and ART 245 or consent of instructor is a prerequisite for this class.

ART 348
GRAPHIC ART IN THE PUBLIC REALM
Undergraduate
This course enables students to research varied communities, complex information systems, processes, tools, and materials involved in visual communications. Students establish working relationships as individuals and in teams that utilize their skills to effectively communicate to an audience beyond the classroom. Objectives of the course include: creating awareness of current local community social issues, supporting students' development of independent and collaborative work habits, examining issues of social responsibility of the artist, integrating research-based learning and production skills, and assessing the social impact of a completed project. This is a JYEL accredited course.

ART 227, ART 260, ART 264, and ART 358 or consent of instructor is a prerequisite for this class.

ART 358
GRAPHIC ART
Undergraduate
This course explores word and image within the realm of visual art, including analysis of meaning and structure, layout and composition, and format and production. Students are introduced to theory, history and analysis of graphic art through studio projects, readings, writing and critiques.

ART 227, ART 260 and ART 264 or consent of instructor is a prerequisite for this class.

ART 359
PRINT MEDIA
Undergraduate
Students are introduced to concepts of layout, composition, printing and production of multi-page documents including magazines, artists' books, posters and various other forms of printed matter. Emphasis is placed on research methodology, critical thinking and visual communication.

ART 227, ART 228, ART 260, and ART 264 are a prerequisite for this class.

ART 363
ADVERTISING DESIGN
Undergraduate
Explores the function and practice of design in advertising in both social and art historical contexts. It is highly recommended students take ART 358 before taking this class.

ART 227, ART 260 and ART 264 or consent of instructor is a prerequisite for this class.

ART 364
COMPUTER APPLICATIONS IN ART
Undergraduate
Use of Photoshop and Illustrator in the design and execution of paintings, drawings, and prints.

ART 101, ART 105, ART 106 and ART 110 or consent of instructor is a prerequisite for this class.

ART 369
TYPOGRAPHY II
Undergraduate
Advanced investigation into typography and text for verbal and visual expression.

ART 227, ART 260, ART 264 and ART 358 or consent of instructor is a prerequisite for this class.
ART 377
PHOTOJOURNALISM
Undergraduate
Introduction to the theoretical and technical foundations of photography with exploration of the medium's aesthetic, documentary and narrative purposes within the context of photojournalism. Cross-listed as JOUR 276.

ART 382
INTEGRATING ART INTO THE CURRICULUM AND THE COMMUNITY
Undergraduate
This course brings DePaul students into a Chicago grade school to incorporate art into the curriculum. It is a hybrid course that involves some Independent Study in which the students organize their schedule in conjunction with a grade school classroom teacher, and some required classes that they must attend on campus at a prescribed time and day. Students are off campus for approximately 10 class sessions. At the start of the quarter, students are given a theoretical background in community-based art education, ethical issues, and social engagement. Working in teams, students will observe in the classrooms to gain a sense of the grade school community and the existing curriculum. DePaul students will then develop and teach a specific lesson plan in collaboration with the classroom teacher. The objective will be to produce a creative learning experience that co-mingles art and a core subject such as science or social studies. Teaching this art integrated lesson will be an essential aspect of the learning experience. Students will meet back at the DePaul classroom at designated intervals for information, reflection, and the analysis of their experience and their impact on the grade school community, in relation to the theoretical examples from the beginning of the course. These reflections take varied forms: discussion, role-playing exercises, presentations, and papers. Approved for JYEL and cbSL credit. Formerly ART 283.

ART 383
SERVICE LEARNING IN THE ARTS INTERNSHIP
Undergraduate
Each student will be matched with a not-for-profit art-related organization, based on the student's interests and abilities in the visual arts as well as the organization's needs, which will provide the student with a practical and career-centered experience. An interview with the instructor at least one week prior to the beginning of the quarter is required (email the Instructor).

ART 384
ART-RELATED INTERNSHIPS WITH FOR-PROFIT ORGANIZATIONS
Undergraduate
This is a four credit hour supervision class for any Art major or minor that has arranged for an internship with a For-Profit organization to do art-related activity. The class would be viewed as Independent Study, and the students do many of the same activities as in Art 383. This class can be taken for JYEL credit.

ART 385
WEB ART & DESIGN I
Undergraduate
This course is an introduction to web-based art through a series of studio projects utilizing Adobe Dreamweaver. Students learn the basic skills and processes needed to develop functional multimedia web pages that combine image, time, motion and sound to produce conceptual and experimental works of art that can only exist online.

ART 114 or ART 224 or consent of instructor is a prerequisite for this class.

ART 386
WEB ART & DESIGN II
Undergraduate
Students will analyze and produce web art projects with an emphasis on the psychological, social and cultural framework of a web based environment. Students will develop focused and independent research methods and technical skills specific to their web art practice that will expand on the fundamental principals of user interaction and an integration of image, time, motion and sound.

ART 227, ART 228, ART 264 and ART 385 or consent of instructor is a prerequisite for this class.

ART 390
ADVANCED STUDY: PROBLEMS
Undergraduate
Intensive studio experience for students who have completed the requirements in their media specialty.

Junior or Senior standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.
ART 392
SENIOR STUDIO SEMINAR
Undergraduate
An intensive capstone seminar of contemporary art theory and studio practice in the student's area of concentration. Required for graduation in Studio Art and in Media Arts.

Senior standing and status as an Art, Media and Design major or Art Minor are a prerequisite for this class. Juniors may attend with instructor's consent.

ART 393
SENIOR DESIGN SEMINAR
Undergraduate
The goals of this capstone class are to research, discuss and critique contemporary design issues as the culmination of the liberal studies coursework with an emphasis on the concentration of art and design. Design methodology and analysis will be surveyed by examining key texts in the field. A different central question and/or project will organize the class each time it is offered. Each question and/or project will be geared towards grappling with communication to diverse audiences, contemporary historical and cultural trends that affect communication, and the use of digital technologies to communicate. This course aims to ensure a familiarity with the ethical, pragmatic, philosophical, theoretical, and aesthetic issues and culture that face designers as they enter the workforce, to aid in their responsible participation in the field.

ART 394
PROFESSIONAL PRACTICE IN THE STUDIO
Undergraduate
An intensive capstone experience in the professional, business, and legal skills needed to manage a career in Studio Art or Media Arts. Required for graduation with a Studio Art or a Media Arts concentration.

Senior standing and status as an Art, Media and Design major or Art Minor are a prerequisite for this class. Juniors may attend with instructor's consent.

ART 395
SPECIAL TOPICS IN STUDIO PRACTICE
Undergraduate
Focuses on studio specialties and techniques not encompassed by the general art curriculum.

ART 396
INTERNSHIP
Undergraduate
Arranges fieldwork or employment in the student’s field of study. Utilizes the extensive professional studios and art institutions of Chicago and other international art facilities as well. Up to 12 hours of credit.

Junior or Senior standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.

ART 399
INDEPENDENT STUDY
Undergraduate
Independent work in the student’s field of study under faculty supervision. Available only to upper-level students with demonstrated capacity for self-motivated study.

ART 405
ADVANCED COLOR
Graduate
Advanced color applications in Studio Art and Media Arts.

ART 105 or consent of instructor is a prerequisite for this class.
ART 427
DIGITAL ART
Graduate
Digital art applications in Studio Art and Media Arts

ART 101 and ART 105 or consent of instructor is a prerequisite for this class.

ART 460
WEB ART AND DESIGN
Graduate
Web Art and Design study and explorations.

ART 101 and ART 105 or consent of instructor is a prerequisite for this class.

ART 461
ART AND PHOTOGRAPHY
Graduate
Selected Topics in Art and Photography.

ART 489
VIDEO ART
Graduate
An advanced level course designed to introduce students to the uses of video within a variety of artistic practices including installation, projection and performance as well as linear, single-channel non-narrative, non-documentary pieces. This course will take a "theory/practice" approach. Instruction will combine a study of the historical uses of video in the art world as well as the theoretical and critical perspectives on the practices of a wide range of artists who use video. Hands-on application of these concepts will be applied to the students' own work, culminating in a finished project by the end of the term which will be edited in the computer applications Dreamweaver, Flash and Fireworks. Basic literacy with Macintosh platform is required.

ART 490
ADVANCED TOPICS IN STUDIO ART
Graduate
Intensive studio art experience in the student's media of choice. May be taken for variable credit (1-4).

ASL 101
AMERICAN SIGN LANGUAGE I
Undergraduate
This course is a basic introduction to American Sign Language (ASL), the language used by Deaf people in the United States and most of Canada. This course will help students develop their expressive and receptive ASL skills. Students will also learn about Deaf culture since a language cannot be separated from its culture.

ASL 102
AMERICAN SIGN LANGUAGE II
Undergraduate
This is the second of Basic American Sign Language courses in a series of ASL courses. Students will develop expressive and receptive ASL skills through discussions of topics such as living situations, family and occupations, and daily routines or activities. In addition, students will develop storytelling skills. Throughout the session, readings about Deaf culture will also be incorporated since a language cannot be separated from its culture.

ASL 103
AMERICAN SIGN LANGUAGE III
Undergraduate
This is the third of Basic American Sign Language courses in a series of ASL courses. Students will develop expressive and receptive ASL skills through discussions of such topics as giving directions, describing others, making requests, talking about family and occupations, attributing qualities to others, and talking about routines. Students will also learn about Deaf culture, since a language cannot be separated from its culture.
ASL 104
INTERMEDIATE AMERICAN SIGN LANGUAGE I
Undergraduate
Intensive practice in the use of American Sign Language, expanding from beginners' skills acquired in Basic American Sign Language (ASL) courses. It involves intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. ASL 103 or equivalent, including placement test or permission of instructor, is recommended.

ASL 105
INTERMEDIATE AMERICAN SIGN LANGUAGE II
Undergraduate
This course is a continuation of American Sign Language (ASL), Level Two. It includes vocabulary-building and mastery of grammar through rigorous receptive and expressive language activities. Topics discussed in ASL include exchanges of personal information or life events, description of abstract objects, and continued enhancement of the cultural awareness intrinsic to those skills. ASL 104 or equivalent, including placement test or permission of instructor, is recommended.

ASL 106
INTERMEDIATE SIGN LANGUAGE III
Undergraduate
Intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. Continuation of ASL 105. ASL 105 or equivalent, including placement test or permission of instructor, is recommended.

ASL 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

ASL 201
ADVANCED COMMUNICATION I
Undergraduate
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. ASL 106 or equivalent recommended.

ASL 202
ADVANCED COMMUNICATION II
Undergraduate
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. Continuation of ASL 201. ASL 106 or equivalent recommended.

ASL 203
ADVANCED COMMUNICATION III
Undergraduate
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. Continuation of ASL 202. ASL 106 or equivalent recommended.

ASL 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

ASL 305
AMERICAN SIGN LANGUAGE LITERATURE
Undergraduate
This course will focus on selected ASL videotapes and films ranging from the early 1900's to the present. It shares similar elements and functions with any literature in any language. Students will study the historical background of deaf actors and actresses in silent films, analyze the content of stories, discuss grammatical features in ASL or ASL expressions signed by deaf people, and discuss the various signing registers and styles revealed in these contents. ASL 106 or the equivalent, including placement test or permission of instructor, is recommended.
ASL 306
ARTS IN THE DEAF COMMUNITY
Undergraduate
A study of arts in the deaf community including the history and movement of De’VIA. Students will develop awareness and recognition of Deaf professional artists and the respective meaning behind their work. ASL 106 or equivalent is recommended.

ASL 310
DEAF CULTURE
Undergraduate
This course is an introduction to concepts and issues in Deaf culture and the Deaf community. Emphasizes the Deaf community as a linguistic and American cultural minority, the importance of language and education of the deaf people, as well as values, traditions, political activism and diversity in this group. ASL 106 or the equivalent, including placement test or permission of instructor, is recommended.

ASL 311
DEAF-BLIND COMMUNITY
Undergraduate
An introduction to various aspects of the deaf-blind community including cultural norms and modes of communication used with deaf-blind communities. Students will develop an understanding of the role of Support Service Provider (SSP) or sighted guide. Opportunities for hands-on experience and interaction with the deaf-blind community will be provided. This course will be open to students who may or may not have had prior experiences with the deaf-blind community. ASL 106 or equivalent is recommended.

ASL 321
ART OF TRANSLATION
Undergraduate
This course focuses on development of written English translations from ASL and verbal translation from ASL into English. This course will train students to focus on the meaning expressed in ASL concepts and provide proper translations. Students who have taken and passed intermediate ASL classes are encouraged to sign up. ASL 106 or equivalent is recommended.

ASL 352
ASL LINGUISTICS
Undergraduate
This course will help students understand the basic concepts of linguistics as they think critically about ASL structure, including the fundamental areas of phonology, morphology, syntax, semantics, and language in use. Also, it will help students compare and contrast ASL and English structures. Additionally, it will provide students with the ability to understand how people can communicate through different kinds of systems, including languages which have several features. ASL 106 or the equivalent, including placement test or permission of instructor, is recommended.

ASL 353
FINGERSPELLING
Undergraduate
This course will teach the theory behind fingerspelling and will train students on how to process serial information. Students will be able to identify invisible allophones and improve their receptive fingerspelling skills. ASL 106 or equivalent is recommended.

ASL 354
SOCIOLINGUISTICS FOR THE DEAF COMMUNITY
Undergraduate
This course focuses on issues affecting the Deaf community and studies the use of ASL in society, along with its policies and attitudes. Students will broaden their understanding of the Deaf community by engaging in discourse analysis as well as interacting with the different populations in the Deaf community. ASL 106 or equivalent is recommended.

ASL 395
FOREIGN LANGUAGES ACROSS CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and signing activities in ASL. Students must have the equivalent of 106 or higher ability in ASL to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.
AT 580
PROSEMINAR I: INTRODUCTION TO APPLIED TECHNOLOGY
Graduate
Through small group meetings and/or individualized tutorials, this seminar explores the aims of graduate education with particular focus on the program of study leading to the MASTER OF SCIENCE IN APPLIED TECHNOLOGY?its purpose, scope, philosophy, key roles and processes. Special emphasis is placed on developing a baseline context for graduate study including a literature-based initial exploration into one's specialized Applied Technology track (applied information systems, applied network technology, applied IT project management, applied information technology or applied human-computer interaction).

Status as an MSAT student or departmental permission is a prerequisite for this class.

AT 585
PROSEMINAR II: APPLYING INDEPENDENT LEARNING IN PROFESSIONAL PRACTICE
Graduate
Through small group meetings and/or individualized tutorials, this seminar outlines the purpose and process of moving graduate learning into self-initiated, self-designed and self-managed application beyond the classroom. Students are guided in identifying independent projects associated with work-based problems/issues related to their specialized tracks as well as learning opportunities related to their reflective practices. Special emphasis is placed on developing (and seeking approval for) project proposals for the culmination phase of the MSAT Program including implementation plans for translating proposals into execution strategies and eventual deliverables.

Status as an MSAT student or departmental permission is a prerequisite for this class.

AT 587
INDEPENDENT WORK-BASED PROJECT I
Graduate
As one of two independent work-based opportunities, this project enables students to enhance and demonstrate their ability to investigate and contribute to (and/or problem-solve regarding) a work-based challenge applicable to their professional practice and specialization within applied technology. In so doing, students deepen their self-managed inquiry, resourcefulness, initiative-taking and disciplined follow-through as advanced professionals. While pursued as an independent learning activity, the scope, details and evaluation of this project are guided by the program's coordinators or designates.

Status as an MSAT student or departmental permission is a prerequisite for this class.

AT 588
INDEPENDENT WORK-BASED PROJECT II
Graduate
As one of two independent work-based opportunities, this project enables students to enhance and demonstrate their ability to investigate and contribute to (and/or problem-solve regarding) a work-based challenge applicable to their professional practice and specialization within applied technology. In so doing, students deepen their self-managed inquiry, resourcefulness, initiative-taking and disciplined follow-through as advanced professionals. While pursued as an independent learning activity, the scope, details and evaluation of this project are guided by the program's coordinators or designates.

Status as an MSAT student or departmental permission is a prerequisite for this class.
AT 589
REFLECTION ON PRACTICE PROJECT
Graduate
This independent project enables students to engage and expand their professional practice as reflective practitioners. Specifically, students enhance their ability to describe and analyze a particular method or process of reflection and apply it, or, describe and analyze a particular aspect of their professional practice and demonstrate improved functioning through focused/applied reflection. In so doing, students deepen their self-managed inquiry, resourcefulness, initiative-taking and disciplined follow-through as advanced professionals. While pursued as an independent learning activity, the scope, details and evaluation of this project are guided by each student's faculty mentor.

Status as an MSAT student or departmental permission is a prerequisite for this class.

AT 598
CURRENT TOPICS IN APPLIED TECHNOLOGY
Graduate
Current Topics in Applied Technology

Status as an MSAT student or departmental permission is a prerequisite for this class.

BBE 96
100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED
Undergraduate
(non-credit) Required of all Bilingual Bicultural students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses.

BBE 97
100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED
Graduate
(non-credit) Required of all Bilingual Bicultural students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses.

BBE 301
TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM
Undergraduate
This course provides educators across disciplinary content areas foundational knowledge for teaching and assessing adolescent English language learners (ELLs) and speakers of non-dominant varieties of English. Especial focus is placed on identifying and augmenting students' various (oral and written) proficiencies and inter- and intra-linguistic varieties of English toward increased academic English proficiency. This course also engages educators in realizing in curriculum and instruction the multifaceted aspects of fostering academic proficiency among adolescent ELLs and speakers of non-dominant varieties of English, such as theories of first, second, and heritage language sociolinguistics; language policy and planning; cross-disciplinary collaboration; parental/family language practices; family and community participation and involvement; informed decision making and advocacy; school/community discourses; learner accommodations; WIDA and Common Core standards; and culturally and linguistically appropriate assessment.

SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.

BBE 302
BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
Undergraduate
Reviews theory and application of curriculum development to bilingual instructional programs, such as design, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal bilingual education program models are examined and analyzed. Includes a review of multiethnic literature and literacy that advocates for students' self-concept, acceptance, and sense of identity (includes 15 clinical hour requirement).
BBE 304  
LANGUAGE, LITERACY AND CULTURE  
Undergraduate  
This course examines the linguistic, cultural, and social contexts in which culturally and linguistically diverse communities operate and their relation to educational practices. The class addresses sociolinguistic and multicultural perspectives on language and cultural diversity within and outside the U.S. Case studies examined in class readings provide the conceptual framework for multicultural education in the context of language and literacy development. This course is designed to assist future and current teachers in attaining an expanded understanding on the linguistic, cultural, and sociocultural theoretical frameworks that are at the core of educational transformation and social justice in the U.S. The course also aims to examine educators' roles in creating culturally and linguistically responsive curricula for diverse students. Topics include language and ethnicity, language and identity, language and social class, literacy practices, language standardization, language discrimination, dialects, language loss, and heritage languages.

BBE 305  
THEORETICAL FOUNDATIONS IN BILINGUAL EARLY CHILDHOOD DEVELOPMENT  
Undergraduate  
This course is designed to equip bilingual childhood teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, socio-political and legal foundations of bilingual education programs in the United States. It will examine different models of language education programs: immersion, ESL pullout, transitional bilingual education, maintenance bilingual, enrichment or dual language. It will also address psycholinguistic and sociolinguistic principles upon which they are based.

BBE 306  
FOUNDATIONS OF ENGLISH AS SECOND LANGUAGE INSTRUCTION IN EARLY CHILDHOOD EDUCATION  
Undergraduate  
Candidates explore English as a Second Language (ESL), theory and practice as it applies to young children and their families. Candidates also study the sociocultural, pedagogical, linguistic, and political issues underlying current models of education for non-English speaking children, as well as models for ESL instruction in early childhood settings. Critical emphasis is placed upon theories that support young learners in second language acquisition.

BBE 307  
EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS  
Undergraduate  
Examines assessment procedures, including standardized and performance-based, as well as ethical standards and practices used in the assessment of culturally and linguistically diverse students. Equity and legal issues related to assessment practices, research, first and second language acquisition, bilingualism, cultural and sociopolitical issues related to assessment are discussed. Emphasizes existing biases in assessment and non-discriminatory assessment practices and policies. National, state, and local assessment policies are examined (includes 15 clinical hour requirement).

BBE 310  
SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE  
Undergraduate  
This course is designed to explore a specific area of study in the field of linguistics, such as sociolinguistics, psycholinguistics, applied linguistics, language planning and policy, and cognitive bilingualism, among other related topics. The particular focus of study will vary and change as the course is offered.

BBE 311  
FUNDAMENTALS OF ENGLISH LANGUAGE LEARNER EDUCATION  
Undergraduate  
This introductory course offers candidates a foundation in the critical elements in the education of ELLs: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Teaching practices, curriculum development, selection of instructional materials, use of appropriate language and content assessments are examined. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.
BBE 316
SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION
Undergraduate

Presents theoretical constructs of bilingual schooling in the U.S. and other multilingual societies from historical, theoretical and sociocultural perspectives. Emphasizes issues in bilingual education related to the sociocultural and legal aspects of language policy and bilingual education in the U.S. The historical trajectory of language policy and bilingual education in the U.S. is discussed in reference to Native American languages and early European settlers' language schooling practices. The focus shifts to 20th and 21st century bilingual education and immigration policies that have influenced both the advocacy for and opposition to bilingual education as well as the movement to make English the official language in the U.S.

BBE 320
ANALYZING RESEARCH ON IDENTITY, CULTURE & LANGUAGE EDUCATION
Undergraduate

Introduces students to, and engages them in reading, research design within the context of bilingual-bicultural education and second language learning and instruction. Students will consider important linguistic and sociocultural issues in language education as examined with various research methods, including quantitative, qualitative, and mixed methods. Students will conduct and present a mini-action research project about their own learning and development, and will write a cogent review of literature about a personally meaningful topic, problem, or issue related to language and culture education. (Includes 15 clinical hour requirement.)

BBE 310 and at least 4 BBE courses (or equivalent) is a prerequisite for this class.

BBE 324
METHODS OF TEACHING ESL
Undergraduate

Course examines the relationship of reading and writing development to second language acquisition in ESL contexts. Discusses various learning and teaching approaches that effectively extend English language learners' literacy and language skills. Explores the literacy progress of native and non-native speakers of English by examining the theoretical perspectives of language and literacy development (includes 15 clinical hour requirement).

BBE 325
BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
Undergraduate

Analyzes and evaluates methods and materials used in bilingual education and ESL programs. Stresses effective instructional strategies and best practices in first and second language literacy development and content learning. Reviews language teaching approaches and cooperative models of learning relating to development of reading and writing in the first and second language. Presents the acquiring language through content learning versus learning language programs. Investigates appropriate first language usage in bilingual classrooms, focusing on the different content areas, appropriate terminology for native language instruction, and the study of language distribution issues (includes 15 clinical hour requirement).

BBE 326
THEORETICAL FOUNDATIONS OF ESL AND WLE
Undergraduate

Presents an introduction to the field of second and world language, with attention to basic concepts of second language acquisition in various language learning contexts. Discusses interdisciplinary perspectives of second and world language acquisition and their application to classroom practices. Topics include interlanguage, communicative competence, D/discourses, investment/motivation, sociocultural approaches to language learning, universal grammar, etc. The different factors influencing the acquisition of ESL and WLE are examined as well as current research in applied linguistics and different approaches to language teaching.

BBE 330
LATINOS AND EDUCATION
Undergraduate

This course examines historical and current issues related to the education of Latinos in the US that includes PK-12 and higher education. The course explores the sociolinguistic, theoretical, historical, sociocultural, legal, and political contexts that shape the educational experience of Latinos in the US. Demographic trends and data are examined in light of the various characteristics that make up the diverse Latino population. The course also analyses the theoretical, historical, and political constructs of bilingual schooling and the underlying assumptions and implications for Latino students. Current research conducted by prominent scholars in the field are presented and examined. The course considers factors that influence, positively or negatively, the educational attainment of Latino students. The readings and class discussions emphasize how power relations in the wider society influence patterns in Latino education outcomes and policy-making. The course also examines arguments, assumptions, and interpretations of current and past legislation in regards to the education of Latinos in the US.
BBE 360
SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
Undergraduate
This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective at the K-12 levels. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and SLA; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second and world language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences (20/15 hours; level 2).

BBE 366
FIRST AND SECOND LANGUAGE ACQUISITION
Undergraduate
This course examines principles, processes, theories, and research in first and second language acquisition and bilingualism with implications for language teaching. The course provides an introduction to the fields of first and second language acquisition (SLA) that include universal, individual, and social features and dimensions of the second language learning process that determine the nature and path of acquisition. These features include age and critical periods; cross-linguistic influences; role of the environment; cognitive contributions; interlanguage variability; linguistic features; motivation; and affect. Socio-cultural and sociopolitical aspects of second language acquisition and bilingualism are also discussed. Includes clinical hour requirement.

BBE 370
SECOND & WORLD LANGUAGE LITERACIES AND CULTURES
Undergraduate
This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the word. Special focus is placed on these topics as they pertain to the extant research on language, literacy, and culture represented in the WLE certification language communities, as well as in the literature, art, music, and popular culture of those communities as a means of advocating students' sense of identity as global citizens (20/15 hours; level 1).

BBE 402
BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
Graduate
Reviews theory and application of curriculum development to bilingual instructional programs, such as design, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal bilingual education program models are examined and analyzed. Includes a review of multiethnic literature and literacy that advocates for students' self-concept, acceptance, and sense of identity. Includes clinical hour requirement.

BBE 404
LANGUAGE, LITERACY AND CULTURE
Graduate
This course examines the linguistic, cultural, and social contexts in which culturally and linguistically diverse communities operate and their relation to educational practices. The class addresses sociolinguistic and multicultural perspectives on language and cultural diversity within and outside the U.S. Case studies examined in class readings provide the conceptual framework for multicultural education in the context of language and literacy development. This course is designed to assist future and current teachers in attaining an expanded understanding on the linguistic, cultural, and sociocultural theoretical frameworks that are at the core of educational transformation and social justice in the US. The course also aims to examine educators' roles in creating culturally and linguistically responsive curricula for diverse students. Topics include language and ethnicity, language and identity, language and social class, literacy practices, language standardization, language discrimination, dialects, language loss, and heritage languages.

BBE 406
SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION
Graduate
Presents theoretical constructs of bilingual schooling in the U.S. and other multilingual societies from historical, theoretical and sociocultural perspectives. Emphasizes issues in bilingual education related to the sociocultural and legal aspects of language policy and bilingual education in the U.S. The historical trajectory of language policy and bilingual education in the U.S. is discussed in reference to Native American languages and early European settlers' language schooling practices. The focus shifts to 20th and 21st century bilingual education and immigration policies that have influenced both the advocacy for and opposition to bilingual education as well as the movement to make English the official language in the U.S.
BBE 407
EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
Graduate
Examines assessment procedures, including standardized and performance-based, as well as ethical standards and practices used in the assessment of culturally and linguistically diverse students. Equity and legal issues related to assessment practices, research, first and second language acquisition, bilingualism, and cultural and sociopolitical issues related to assessment are discussed. Emphasizes existing biases in assessment and non-discriminatory assessment practices and policies. National, state, and local assessment policies are examined. Includes clinical hour requirement.

BBE 408
BILINGUAL EARLY CHILDHOOD DEVELOPMENT THEORETICAL FOUNDATIONS
Graduate
This course is designed to equip bilingual and second language teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, political and legal foundations of bilingual education programs in the United States. It will examine different models of bilingual programs and the psycholinguistic and sociolinguistic principles upon which they are based.

BBE 409
ENGLISH AS A SECOND LANGUAGE INSTRUCTIONAL FOUNDATIONS IN EARLY CHILDHOOD SETTINGS
Graduate
Candidates explore English as a Second Language (ESL), theory, and practice as it applies to young children and their families. Candidates also study the socio-cultural, pedagogical, linguistic, and political issues underlying current models of education for non-English speaking children, as well as models for ESL instruction in early childhood settings. Critical emphasis is placed upon theories that support young learners in second language acquisition.

BBE 425
BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
Graduate
Analyzes and evaluates methods and materials used in bilingual education and ESL programs. Stresses effective instructional strategies and best practices in first and second language literacy development and content learning. Reviews language teaching approaches and cooperative models of learning relating to development of reading and writing in the first and second language. Presents the acquiring language through content learning versus learning language programs. Investigates appropriate first language usage in bilingual classrooms, focusing on the different content areas, appropriate terminology for native language instruction, and the study of language distribution issues. Includes clinical hour requirement.

BBE 466
FIRST AND SECOND LANGUAGE ACQUISITION
Graduate
This course examines principles, processes, theories, and research in first and second language acquisition and bilingualism with implications for language teaching. The course provides an introduction to the fields of first and second language acquisition (SLA) that include universal, individual, and social features and dimensions of the second language learning process that determine the nature and path of acquisition. These features include age and critical periods; cross-linguistic influences; role of the environment; cognitive contributions; interlanguage variability; linguistic features; motivation; and affect. Socio-cultural and sociopolitical aspects of second language acquisition and bilingualism are also discussed. Includes clinical hour requirement.

BBE 474
READING AND ELLS
Graduate
This course examines current theories of second language acquisition, literacy teaching and learning for English language learners (ELLs), and explores the relationships between the first and second language as it relates to the approach to teaching for transfer with ELLs. This course links theory and practice by examining pedagogical approaches that most effectively promote ELLs reading and writing development. Multicultural and multilingual characteristics of ELLs are also discussed as they relate to their literacy development. Other factors that impact the academic achievement of ELLs in relation to literacy include sociocultural, sociolinguistic, and sociopolitical dimensions of teaching ELLs. This course is designed to assist teachers with a specialization in reading to develop expanded understandings of theoretical and pedagogical perspectives related to the literacy and language processes of students learning English as a new language. In addition, literacy assessment in the first and second language represented by standardized testing as well as authentic performance-based evaluations are also presented.
BBE 476
BILITERACY PRACTICES: SECONDARY/ADULT
Graduate
Analyzes and evaluates current research and pedagogical approaches used in second language programs in relation to literacy instruction in the secondary and adult classroom settings. The course focuses on effective instructional strategies and best practices in first and second language literacy development. Special attention is given to content area learning in relation to acquiring literacy skills in a second language for secondary students. The course reviews language and literacy instructional approaches and cooperative models of learning related to the development of reading and writing in the first and second language. Discussions center on issues of acquiring language and literacy skills through content instruction as well as authentic and performance-based assessment. Investigates appropriate first and second language development in bilingual, ESL and foreign language classrooms, focusing on the different aspects of literacy and subject matter learning (includes 15 clinical hour requirement).

BBE 490
MULTICULTURAL AND MULTILINGUAL CHILDREN'S LITERATURE
Graduate
This course will use multicultural and multilingual children's books to survey pluralism and linguistic diversity. Students will analyze folk and modern literature, including application of literary and culturally responsive criteria to these selections. Students will explore means of teaching using multicultural literature to encourage diverse learners and learning styles. Students will evaluate literature for its literary value as well as cultural acceptability. Students will read a broad variety of current multicultural literature for children and young adults. Students interested in specializing in one specific age group or grade level may focus their literature selections on literature appropriate for specific ages. Genres of children's and young adult literature will be examined and criteria for selection and renewing collections for school and public libraries will be discussed. Notable authors, poets, and illustrators of children's and young adult literature will be studied with an emphasis on those who contribute to bilingual, multilingual, and multicultural, and multiethnic collections. The use of children's and young adult literature to develop literacy, particularly for ELLs will be studied and the use of children's and young adult literature in meeting national, state, and district standards will be discussed. Children's and young adult literature will be examined from diverse perspectives in particular literature reflecting African American, Asian, Latino, and Native American cultures. However, students will read literature from all cultural groups including traditional children's and young adult literature.

BBE 501
TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM
Graduate
This course provides educators across disciplinary content areas foundational knowledge for teaching and assessing adolescent English language learners (ELLs) and speakers of non-dominant varieties of English. Special focus is placed on identifying and augmenting students' various (oral and written) proficiencies and inter- and intra-linguistic varieties of English toward increased academic English proficiency. This course also engages educators in realizing in curriculum and instruction the multifaceted aspects of fostering academic proficiency among adolescent ELLs and speakers of non-dominant varieties of English, such as theories of first, second, and heritage language sociolinguistics; language policy and planning; cross-disciplinary collaboration; parental/family language practices; family and community participation and involvement; informed decision making and advocacy; school/community discourses; learner accommodations; WIDA and Common Core standards; and culturally and linguistically appropriate assessment.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

BBE 510
SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE
Graduate
This course is designed to explore a specific area of study in the field of linguistics, such as sociolinguistics, psycholinguistics, applied linguistics, language planning and policy, and cognitive bilingualism, among other related topics. The particular focus of study will vary and change as the course is offered. Includes clinical hour requirement.

BBE 520
ANALYZING RESEARCH ON IDENTITY, CULTURE & LANGUAGE EDUCATION
Graduate
Introduces students to, and engages them in reading, research designed within the context of bilingual-bicultural education and second language learning and instruction. Students will consider important linguistic and sociocultural issues in language education as examined with various research methods, including quantitative, qualitative, and mixed methods. Students will conduct and present a mini-action research project about their own learning and development, and will write a cogent review of literature about a personally meaningful topic, problem, or issue related to language and culture education. For many students, this paper forms the beginning stages of their BBE Masters thesis or M.Ed. paper. (Includes 15 clinical hour requirement.)

SCG 410 or SCG 610 and at least 5 BBE courses (or equivalent) is a prerequisite for this class.
BBE 524  
METHODS OF TEACHING ESL  
Graduate  
Course examines the relationship of reading and writing development to second language acquisition in ESL contexts. Discusses various learning and teaching approaches that effectively extend English language learners’ literacy and language skills. Explores the literacy progress of native and non-native speakers of English by examining the theoretical perspectives of language and literacy development. Includes clinical hour requirement.

BBE 526  
THEORETICAL FOUNDATIONS OF ESL AND WLE  
Graduate  
Presents an introduction to the field of second and world language, with attention to basic concepts of second language acquisition in various language learning contexts. Discusses interdisciplinary perspectives of second and world language acquisition and their application to classroom practices. Topics include interlanguage, communicative competence, D/discourses, investment/motivation, sociocultural approaches to language learning, universal grammar, etc. The different factors influencing the acquisition of ESL and WLE are examined as well as current research in applied linguistics and different approaches to language teaching.

BBE 530  
LATINOS AND EDUCATION  
Graduate  
This course examines historical and current issues related to the education of Latinos in the US that includes PK-12 and higher education. The course explores the sociolinguistic, theoretical, historical, sociocultural, legal, and political contexts that shape the educational experience of Latinos in the US. Demographic trends and data are examined in light of the various characteristics that make up the diverse Latino population. The course also analyses the theoretical, historical, and political constructs of bilingual schooling and the underlying assumptions and implications for Latino students. Current research conducted by prominent scholars in the field are presented and examined. The course considers factors that influence, positively or negatively, the educational attainment of Latino students. The readings and class discussions emphasize how power relations in the wider society influence patterns in Latino education outcomes and policy-making. The course also examines arguments, assumptions, and interpretations of current and past legislation in regards to the education of Latinos in the US.

BBE 554  
METHODS OF TEACHING ESL: ELEMENTARY  
Graduate  
The course provides an in-depth study of instructional approaches and curricular designs for the second language elementary classroom setting. Presents reviews and critiques specific methods and strategies for teaching second language learners, as well as comparative methods of learning the first and second language. Emphasizes methods for implementing constructivist strategies such as cooperative learning, thematic approach, flexible grouping, and sheltered instruction. The course provides guidelines for planning effective lessons using both thematic units and content-based subject matter. A critical focus of this course is on teaching and learning ESL through the content areas for elementary students (includes 15 clinical hour requirement).

BBE 556  
METHODS OF TEACHING ESL: SECONDARY/ADULT  
Graduate  
The course explores the theoretical underpinnings and the applications of second-language theories and cultural knowledge to ESL teaching methodology and curriculum design in secondary and adult classroom settings. In addition, various approaches to second language teaching and learning as well as methods for modifying lessons to suit the needs of second-language learners to enhance their acquisition and use of English are presented. Concentrates on assisting educators in the development of appropriate strategies for teaching speaking, listening, reading, writing, and grammar in ESL environments. A major focus of this course is on teaching and learning ESL within the content areas through effective lesson planning using both thematic units and content-based subject matter. The course explores constructivist approaches such as sheltered language instruction (includes 15 clinical hour requirement).

BBE 560  
SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12  
Graduate  
This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective at the K-12 levels. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and SLA; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second and world language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences (20/15 hours; level 2).
BBE 570
SECOND & WORLD LANGUAGE LITERACIES AND CULTURES
Graduate
This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the word. Special focus is placed on these topics as they pertain to the extant research on language, literacy, and culture represented in the WLE certification language communities, as well as in the literature, art, music, and popular culture of those communities as a means of advocating students’ sense of identity as global citizens (20/15 hours; level 1).

BBE 588
INDEPENDENT STUDY IN BILINGUAL BICULTURAL EDUCATION
Graduate
Permission required.

BBE 589
THESIS RESEARCH IN BILINGUAL-BICULTURAL EDUCATION
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. When the thesis research and writing of the thesis are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

BBE 599
SCHOOLWIDE APPROACHES TO EDUCATING ELL
Graduate
The course is designed for educators who currently are or will be serving in a leadership capacity involving linguistically and culturally diverse learners. The purpose of this course is to develop foundational knowledge of the theories, research, policies, and practices related to the education of English language learners. The aim is to support current and future education leaders in constructing a well-informed basis of the critical elements of ELL education that include: second language acquisition, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. An ELL education framework provides the basis for developing sound organizational practices in schools, districts, and agencies. Topics include: cross-program collaborations, engaging in informed and shared decision-making, increasing family and community participation, building advocacy, implementing appropriate instruction and assessment, and engaging in ongoing program evaluation. The course examines various pedagogical and assessment constructs related to teaching ELLs, including state mandated standards and assessments such as ACCESS and WIDA standards. Particular attention is given to content-based language education framed within transactional approaches to teaching and learning. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students' backgrounds and experiences. Teaching practices, curriculum development, selection of instructional materials, and use of appropriate language and content assessments are examined. Family/community relations and partnerships, as well as engagement of advocacy are also explored. Current federal and state policies related to ELLs are addressed, including Plyler vs. Doe, Lau vs. Nichols, DREAM Act, etc. Course Goals: (1) Understanding the demographics and backgrounds of linguistically and culturally diverse learners, (2) Understanding cultural diversity and the immigrant experience, (3) Understanding current policies and laws regarding ELLs, (4) Understanding theory and practice of educating ELLs, (5) Ability to develop schoolwide plans for teaching ELLs, (6) Ability to interact with families and communities to develop schoolwide plans, (7) Understanding administrative responsibilities towards ELLs.

BBE 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

BBE 608
CAPSTONE IN BILINGUAL-BICULTURAL EDUCATION
Graduate
Culminating experience(s) that help(s) students acquire the qualities of professionalism and leadership needed to play a significant role in one's professional education community. Students are expected to situate and understand educational issues in a larger context; keep current in and be able to organize and present a body of research on an education-related question; connect research with practical, professional activity; demonstrate mastery of a sub-field of a discipline; write in a format that meets accepted scholarly criteria and participate in an ongoing professional conversation. A final product such as master's paper(s), comprehensive exam, or collection of professional work products is required.
BBE 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

BIO 115
INTRODUCTION TO BIOLOGY
Undergraduate
Deals with the scientific method, biological chemistry, structure, function, and heredity of cells and organisms, evolution and ecology. Cannot receive credit for both BIO 115 and BIO 155, No credit for Biology majors or minors.

BIO 118
MARINE BIOLOGY
Undergraduate
Study of marine diversity, marine ecosystems, and connections between oceans and humans. Student cannot receive credit for both BIO 118 and 160, No credit for Biology majors or minors.
LSP 120 is a prerequisite for this class.

BIO 120
THE SCIENCE AND ART OF VISION
Undergraduate
Provides an introduction to the form and function of the human visual system, including its evolutionary origins and the nature of visual anomalies. Basic knowledge of visual processing is applied to perception of the visual arts and exploration of how artists employ various techniques to represent the visual world on canvas. No credit for Biology majors or minors.

BIO 121
INFECTIOUS DISEASES AND IMMUNITY
Undergraduate
This course is designed to introduce students to the world of microorganisms, especially those which cause infectious diseases and to explain how the immune system protects the body against these organisms. Cannot receive credit for both BIO 121 and BIO 161, No credit for Biology majors or minors.

BIO 122
INTRODUCTION TO PALEOBIOLOGY
Undergraduate
This course focuses on the concepts and practices of paleobiology, the scientific study of the biology of extinct organisms preserved as fossils. No credit for Biology majors or minors.

BIO 123
INHERITANCE IN HUMANS
Undergraduate
An examination of genetics in the human species, including the inheritance of ordinary traits, genetic diseases, and those complex attributes to which inheritance contributes, such as behavior and intelligence. Formerly BIO 203. No credit for Biology majors or minors.

BIO 124
VERTEBRATES: DIVERSITY AND EVOLUTION
Undergraduate
Examines vertebrate diversity and the interrelationships among vertebrate groups including humans. The quantitative component will include several data processing exercises that address: 1) how vertebrates are related and how those relationships are determined using phylogenetic trees, 2) species descriptions and analyzing morphological differences among species and 3) graphical interpretations. Formerly BIO 204.
BIO 126
BRAIN AND BEHAVIOR
Undergraduate
Examines basic concepts in neurobiology. Specifically how the brain is organized, how it sends messages throughout the body, and how these messages turn into daily activities such as seeing, eating, and walking. How these behaviors are altered due to disease or injury of the brain is also discussed. Cannot receive credit for both BIO 126 and BIO 162. Formerly BIO 206. No credit for Biology majors or minors.

BIO 128
STRESS, HORMONES AND THE NERVOUS SYSTEM
Undergraduate
A study and discussion of the basic concepts of stress and stressors, and their effects on the functioning of the Nervous System, the Endocrine System and the Immune System; the feedback influence of hormones and neurochemicals on cerebral processing, and the relation of these phenomena to health and behavioral medicine. Formerly BIO 208. No credit for Biology majors or minors.

BIO 132
MEDICAL TESTS AND TRIALS
Undergraduate
Is fiber good for you? Are cell phones bad? Participants in this course will learn how to analyze popular health claims and medical studies using a computer spreadsheet (Excel). Topics include: design of health studies, data collection, statistical analysis, common biases and errors, and sources of health data on the World Wide Web. Formerly BIO 212. No credit for Biology majors or minors.

LSP 120 is a prerequisite for this class.

BIO 134
HOW THE HUMAN BODY WORKS
Undergraduate
Fundamentals of human body functions through an examination of organs and organ systems. The quantitative component of this course will explore the concepts of scientific discovery through structured out-of-class projects. Cannot receive credit for both BIO 202 and BIO 134. Formerly BIO 224. No credit for Biology majors or minors.

BIO 155
INTRODUCTION TO BIOLOGY WITH LABORATORY
Undergraduate
This lecture-laboratory course deals with the scientific method, biological chemistry, structure and function of cells, organs, and organ systems, heredity, evolution and ecology. Course includes a laboratory experience involving biological concepts discussed in class. Cannot receive credit for both BIO 115 and BIO 155. No credit for Biology majors or minors.

BIO 156
FOOD, FUEL FOR LIFE
Undergraduate
Food from a biological perspective: defined at the chemical and biochemical level and as it fuels life through metabolism and nutrition. Other topics include improving foods by traditional breeding and new genetic engineering technology, food production, sustainable agriculture; food safety issues, and feeding world populations. No credit for Biology majors or minors.

BIO 160
MARINE BIOLOGY WITH LAB
Undergraduate
Study of marine diversity; marine ecosystems; and connections between oceans, the atmosphere, and humans. Lecture-Laboratory. Cannot receive credit for both BIO 118 and BIO 160. No credit for Biology majors or minors.

LSP 120 is a prerequisite for this class.
BIO 161
INFECTIOUS DISEASES AND IMMUNITY WITH LABORATORY
Undergraduate
This course is designed to introduce students to the world of microorganisms with particular emphasis on how microorganisms cause disease and the actions of the human body in fighting disease. This course includes a laboratory experience to reinforce concepts and introduce students to practical aspects of disease causing microorganisms. Cannot receive credit for both BIO 121 and BIO 161. No credit for Biology majors or minors.

BIO 162
THE BRAIN: BIOLOGY AND BEHAVIOR
Undergraduate
Explores basic concepts in neurobiology, including the organization and evolution of the vertebrate system, how the nervous system sends messages through the body and how these messages are translated into the variety of human behaviors. Alterations in behavior due to brain disease or injury is also discussed. The laboratory elaborates on lecture material and provides insight into how scientific reasoning and testing can help to discover how the brain works. Cannot receive credit for both BIO 126 and BIO 162. Formerly BIO 239. No credit for Biology majors or minors.

BIO 163
PRINCIPLES OF BIOLOGY
Undergraduate
The course is designed to introduce the student to several important principles of Biology, including aspects of cell biology, genetics, ecology, development, and evolution. The course will involve labs on each of these topics as they are addressed, requiring the student to accumulate and analyze data and to be involved in summarizing and presenting this data to the class. Formerly BIO 256. No credit for Biology majors or minors.

BIO 164
AVIAN BIOLOGY
Undergraduate
A foundation in the study, knowledge, and appreciation of birds. Use of field techniques to monitor and measure free-ranging bird populations in an experiential learning situation. Contributes to understanding of interaction and interdependency of nature through study of avian life. No credit for Biology majors or minors.

Junior or Senior standing is a prerequisite for this class.

BIO 166
INTRODUCTION TO PLANT BIOLOGY WITH LAB
Undergraduate
This course deals with the characteristic features of higher plants, plant products that are beneficial to humans, structure, physiology and ecology of cultivated plants, and modern horticultural and genetic approaches to the improvement of plants and plant productivity. No credit for Biology majors or minors.

BIO 191
GENERAL BIOLOGY I FOR SCIENCE MAJORS
Undergraduate
Focuses on the unity of life: its biochemical and cellular makeup and functions, the acquisition and utilization of energy, and the storage and utilization of genetic information. Lecture-laboratory. CHE 130 and CHE 131 are recommended as corequisites.

MAT 130 is a prerequisite for this class.

BIO 192
GENERAL BIOLOGY II FOR SCIENCE MAJORS
Undergraduate
Introduction to evolution, ecology, organismal development and diversity. Lecture-laboratory.

MAT 130 and BIO 191 are a prerequisite for this class.
BIO 193
GENERAL BIOLOGY III FOR SCIENCE MAJORS
Undergraduate
Deals primarily with diversity and development within the plant and animal kingdoms including basic principles of physiology. Lecture-laboratory.

MAT 130 and BIO 192 are a prerequisite for this class.

BIO 201
HUMAN ANATOMY
Undergraduate
Structure of the human body with an emphasis on gross anatomy. Lecture-laboratory. Lecture covers human anatomy; laboratory emphasis on feline dissection.

At least Sophomore Standing is a prerequisite for this course.

BIO 202
HUMAN PHYSIOLOGY
Undergraduate
Introduction to concepts and mechanisms of human organ system function including respiratory, cardiovascular, renal, muscular, nervous, endocrine and digestive systems. Lecture-laboratory. Primarily for Health Science majors. No credit for Biology majors or minors. Cannot receive credit for both BIO 202 and BIO 134.

At least Sophomore Standing is a prerequisite for this course.

BIO 206
BIOSTATISTICS
Undergraduate
A survey of a variety of statistical methods used to analyze biological data.

BIO 193 or instructor consent is a prerequisite for this class.

BIO 209
PLANT BIOLOGY
Undergraduate
A study of plant evolution, diversity, reproduction, developmental plant anatomy, regulation of plant growth and development, and plant physiology.

BIO 193 is a prerequisite for this class.

BIO 210
MICROBIOLOGY
Undergraduate
Biology of microorganisms with emphasis on viruses, bacteria, fungi, and protozoa. Lecture-laboratory.

BIO 191 and MAT 130 are a prerequisite for this class.

BIO 215
ECOLOGY
Undergraduate
Study of organismal interactions; responses of individuals, populations and natural communities to their external environment. Lecture-laboratory.

BIO 193 is a prerequisite for this class.
BIO 220
PRINCIPLES OF BIOTECHNOLOGY
Undergraduate
This course will address aspects of the research and methodologies used in Modern Biotechnology, and place the field in the context of current societal and ethical concerns. Lecture-laboratory.

BIO 210 and BIO 250 or consent of instructor are a prerequisite for this class.

BIO 230
EPIDEMIOLOGY
Undergraduate
This course will involve the study of the frequency and distribution of human disease. Students will learn how the health of a population is measured, and how medical interventions are quantitatively evaluated. Students will analyze data from historical and modern health studies, including population surveys, case-control studies, cohort studies, and clinical trials for prevention and treatment.

BIO 206 is a prerequisite for this class.

BIO 235
EVOLUTION
Undergraduate
This lecture/laboratory course will examine basic selection, population genetics, development, speciation, extinction, systematics, and the history of evolution. In the lab, students will learn some of the modern research methods used in the study of evolution.

BIO 193 is a prerequisite for this class.

BIO 250
CELL BIOLOGY
Undergraduate
Fundamentals of cell form and function studied at the molecular and organelle level, including basic cellular biochemistry, ultrastructure and physiology. Lecture-laboratory.

BIO 193 and (CHE 134 or CHE 138) are a prerequisite for this class.

BIO 260
GENETICS
Undergraduate
Transmission of heritable traits, nature of genetic material, manner of its expression, its mutability, and its significance with respect to organismal and species variation. Lecture-laboratory.

BIO 191 and BIO 193 are a prerequisite for this class.

BIO 270
COMPARATIVE VERTEBRATE ANATOMY
Undergraduate
This lecture-laboratory course explores the diversity, anatomy, and evolution of vertebrates. The laboratory portion includes dissection and observation of various vertebrates.

BIO 192 and BIO 193 are a prerequisite for this class.

BIO 290
TOPICS IN BIOLOGY
Undergraduate
Occasional courses offered at intermediate levels. See the schedule of classes for current offerings. 2 or 4 quarter hours.

Sophomore standing is a prerequisite for this class.
BIO 301
ANIMAL BEHAVIOR
Undergraduate
An exploration of the types of animal behavior and modifiers of behavior as based on neuroendocrine function, with special emphasis on Felids. Lecture - Field Studies. Laboratory required.

BIO 191, BIO 192, BIO 193, BIO 206 and (BIO 215 or BIO 235) are a prerequisite for this class.

BIO 302
STUDENT LABORATORY INSTRUCTION
Undergraduate
Student Laboratory Instruction. Completion of course requires student to serve as teaching assistant for biology laboratory course in the following quarter.

BIO 303
INTRODUCTION TO SCIENTIFIC RESEARCH
Undergraduate
Introduction to Scientific Research. Course requires that student has had (or currently having) experience in scientific research.

BIO 304
FIELD METHODS FOR BIOLOGISTS
Undergraduate
The course will focus on the methods needed to initiate and undertake observations on Midwest ecosystems. Students will learn methods and put into practice the tools required to begin a site inventory and to assess population characteristics. The data gathered by the class will be archived and used as a starting point for subsequent studies. Each student will have an original research project involving extensive field work in nature.

Junior Standing or above is a prerequisite for this class.

BIO 309
PLANT PHYSIOLOGY
Undergraduate
A study of the functional and developmental aspects of flowering plants. Lecture-laboratory.

BIO 250 or instructor consent is a prerequisite for this class.

BIO 310
VERTEBRATE PHYSIOLOGY
Undergraduate
Functions and regulatory mechanisms of vertebrate cells, organs and organ systems with special emphasis on mammals. Lecture-Laboratory.

BIO 250 or instructor consent is a prerequisite for this class.

BIO 311
HISTOLOGY
Undergraduate
A Lecture/Laboratory course covering the microscopic structure of the tissues that make up animal organs. The development of these tissues as well as their relationship to the principles of gross anatomy, physiology, cell biology and molecular biology is stressed.

BIO 250 is a prerequisite for this class.

BIO 315
TOPICS IN ECOLOGY
Undergraduate
The focus of this course is to read and critique classic papers in ecology and to connect their foundational ideas with modern research and understanding.

BIO 191, BIO 192, BIO 193 and BIO 215 are a prerequisite for this class.
**BIO 316**
**PHYCOLOGY**
**Undergraduate**
Introduction to algae with emphasis on taxonomy, morphology, ultrastructure, physiology, life histories of freshwater and marine species. Lecture-laboratory. Cross-listed as BIO 416.

BIO 193 is a prerequisite for this class.

**BIO 317**
**AQUATIC BIOLOGY**
**Undergraduate**
The study of biological, physical and chemical phenomena in freshwater environments. Emphasis on organisms and their ecology. Lecture-laboratory.

BIO 191, BIO 192, BIO 193 and BIO 215 are a prerequisite for this class.

**BIO 318**
**FIELD STUDIES IN MARINE AND ESTUARINE BIOLOGY**
**Undergraduate**
This course is designed for science majors with an interest in marine and estuarine biology and will examine this subject from an ecological perspective. The primary objectives of the course are: 1) to explore the diversity of marine and estuarine life; 2) to understand the manner in which physical and biological factors influence biological diversity in marine systems; 3) to understand the role that humans play in shaping these dynamics; and 4) to develop professional connections and gain real-life experiences in marine science.

BIO 191, BIO 192, BIO 193 and (BIO 215 or BIO 235) or instructor consent are a prerequisite for this class.

**BIO 320**
**MICROBIAL ECOLOGY**
**Undergraduate**
This course will explore key roles that microorganisms play in life on earth. This course will also address how these microorganisms are being used in current areas of research in microbiology. This is a lab course, which will enable students to study processes used in the enrichment, isolation, and identification of microorganisms from various environments.

BIO 210 and Junior standing are a prerequisite for this class.

**BIO 321**
**MOLECULAR METHODS IN ECOLOGY AND EVOLUTION**
**Undergraduate**
This course will provide hands-on experience in methods of detecting and analyzing molecular variation in nature. By the end of the course, students should be competent employing molecular markers to answer a wide variety of basic questions in ecology and evolution.

BIO 215 or BIO 235 is a prerequisite for this class.

**BIO 325**
**PALEOBILOGY**
**Undergraduate**
This lecture/laboratory course will introduce students to various principles of paleobiology and to provide a broad survey of important taxonomic groups. This course will cover topics such as: the concept of geologic time, evolution, extinction, morphology, taxonomic classification, fossilization, paleoecology, biogeography, and biostratigraphy. The laboratory portion of the course will reinforce the lecture topics and offer an opportunity to examine fossil specimens and compare them with modern forms.

BIO 192, BIO 193 and (BIO 215 or BIO 335) or instructor's consent are a prerequisite for this class.

**BIO 330**
**DEVELOPMENTAL BIOLOGY**
**Undergraduate**
A survey of developmental phenomena in animals from fertilization to sexual maturity. Students will gain a current understanding of the genetic, cellular, and environmental mechanisms that shape the body and its major organs.

BIO 250 and BIO 260 are a prerequisite for this class.
BIO 331
TOPICS IN DEVELOPMENTAL BIOLOGY
Undergraduate
This seminar course examines the current embryological literature using both evolutionary and molecular perspectives. Previous student-led topics include: how early embryos are organized, the signals controlling left-right asymmetry, the evolutionary origin of feathers and the development of the retina.

BIO 330 or 360 is a prerequisite for this class.

BIO 333
MYCOLOGY
Undergraduate
This course provides an opportunity for students to integrate their knowledge of cell biology, genetics, ecology and physiology at the organismal level by focusing on fungi. Students will gain an appreciation of the biological diversity within the major groups of fungi and their role in the environment, research and biotechnology. Lecture-laboratory.

BIO 215, BIO 250, and BIO 260 are a prerequisite for this class.

BIO 335
CONCEPTS IN EVOLUTION
Undergraduate
Study of evolution and diversity in the living world. Lecture only.

BIO 235 or (BIO 215 and BIO 260) are a prerequisite for this class.

BIO 339
CELLULAR NEUROBIOLOGY
Undergraduate
A study of the cellular and molecular mechanisms of the nervous system and the role they play in neural signaling, learning and memory. Cross-listed as BIO 439.

BIO 250 or PSY 377 is a prerequisite for this class.

BIO 340
SYSTEMS NEUROBIOLOGY
Undergraduate
Explores the organization of the nervous system on a gross anatomical level and based on functional units. The emphasis is on understanding how individual behaviors are produced by different neural systems and how these individual behaviors integrate into the activities of whole organisms. Cross-listed as BIO 440.

BIO 310 or PSY 377 is a prerequisite for this class.

BIO 341
TOPICS IN NEUROBIOLOGY
Undergraduate
A seminar course examining current topics in neurobiology. Original readings will include both current review and classic neuroscience articles.

BIO 340 or BIO 339 or PSY 377 is a prerequisite for this class.

BIO 342
COGNITIVE NEUROSCIENCE
Undergraduate
This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

BIO 339 or BIO 340 or BIO 341 or PSY 377 is a prerequisite for this class.
BIO 345
TOPICS IN PALEOBIOLOGY
Undergraduate
A seminar course examining various topics in paleobiology (the study of ancient life) including morphological concepts, macroevolutionary processes, extinction events, phylogenetic systematics, paleoecology, paleoecobiogeography, and the adequacy of the fossil record. Readings include classic and recent articles in the fields of paleobiology.

BIO 192, BIO 193 and (BIO 215 or BIO 235) or instructor's consent are a prerequisite for this class.

BIO 347
TOPICS IN MEDICAL BACTERIOLOGY
Undergraduate
This course will address current topics of concern and research in medical bacteriology. Students participating in this course will explore key concepts used in bacterial pathogenesis and learn how to critically appraise recent research papers in the field.

BIO 210, BIO 250 and Junior/Senior Biology standing are prerequisites for this class.

BIO 348
THE BIOLOGY OF INFECTION
Undergraduate
This course will provide students with detailed knowledge of medically important bacteria. The course will first examine common events in infections and the body's responses to infection. We will highlight in these studies the changes in both hosts and pathogens as strategies of infection and immunity evolve relative to one another. Within this framework we will examine a spectrum of infectious diseases in detail.

BIO 210 and BIO 370 are a prerequisite for this class.

BIO 350
ANIMAL ADAPTATIONS
Undergraduate
An introduction to the ecological concept of adaptation. Adaptation is defined and illustrated using specific animal examples. Discussion will focus on how these specializations in structure and function equip the animal for survival.

Status as a Biology major with Junior or Senior standing or consent of the instructor is a prerequisite for this class.

BIO 352
ADVANCED COMPARATIVE PHYSIOLOGY
Undergraduate
Comparative and environmental approach to the functions and mechanisms of vertebrate organ systems. Selected topics will be addressed using a lecture/discussion/seminar format. Cross-listed as BIO 452.

BIO 310 or instructor consent is a prerequisite for this class.

BIO 354
PROBLEMS IN CELL MOTILITY
Undergraduate
Analysis of contemporary problems in cellular movements, with emphasis on the biochemistry, biophysics and regulation of cell and organelle movements. Lecture, seminar, discussion.

BIO 250, (PHY 152 or PHY 172 or PHY 156) and (MAT 149 or MAT 152 or MAT 162 or MAT 172) are a prerequisite for this class.

BIO 355
GENETIC TOXICOLOGY
Undergraduate
This course will deal with the study of agents that damage the genome or alter the proper functioning of the genome that can lead to disease in humans. Topics covered will include basic spectrum of genetic damage and chromosomal effects, mechanisms of mutations, DNA repair, genetic assays used for evaluation of genetic toxicology, health consequences of genetic damage, including cancer and inheritable mutations, and the current position of US government and global regulatory agencies on the issues of genetic toxicology.

BIO 260 is a prerequisite for this class.
BIO 360
MOLECULAR BIOLOGY
Undergraduate
Study of biology at the molecular level, focusing on the regulation of gene expression and the principles of genetic engineering. Lecture-laboratory.

BIO 250, BIO 260, and (CHE 234 or CHE 238) are a prerequisite for this class.

BIO 361
TOPICS IN MOLECULAR BIOLOGY
Undergraduate
Discussion and seminars in selected areas of molecular biology. Cross-listed as CHE 461.

BIO 360 is a prerequisite for this class.

BIO 362
BIOINFORMATICS FOR BENCH SCIENTISTS
Undergraduate
Study how high-throughput technologies like whole-genome sequencing have changed biological research, and learn to use computers in real research tasks such as primer design, DNA sequencing, homology searches, sequence alignment, and more. Cross-listed with BIO 462.

BIO 191, BIO 192, BIO 193 and BIO 260 are a prerequisite for this class.

BIO 365
PRINCIPLES OF TOXICOLOGY
Undergraduate
A study of the adverse effects of chemicals on living organisms, including the chemical natures, kinetics, dose-response relationships, metabolism, and mechanisms of action of various toxins and toxicants.

BIO 193 and (CHE 234 or CHE 238) are a prerequisite for this class.

BIO 370
IMMUNOBIOLOGY
Undergraduate
Basic factors governing immune phenomena and antigen-antibody reactions. Lecture-laboratory. Cross-listed as BIO 471.

BIO 250 or BIO 260 is a prerequisite for this class.

BIO 375
INTRODUCTION TO PHARMACOLOGY
Undergraduate
Introduction to Pharmacology will explore the relationships between an organism and its response to an administered drug. This will include: 1) How drugs are administered to the body. 2) What is their fate once in the body, i.e. Pharmacokinetics. 3) What their mechanisms actions are - i.e. Pharmacodynamics, and 4) Adverse reactions to drugs. We will explore these relationships in different physiological systems of the human body including (but not limited to) the nervous system, circulatory system, digestive system and endocrine system. Lastly, this course will provide an understanding of the pharmaceutical system by providing a framework to explore how drugs are discovered, produced, tested, and regulated.

BIO 250 and 310 or instructor consent is a prerequisite for this class.

BIO 380
CANCER BIOLOGY
Undergraduate
This course will explore the cellular and molecular aspects of cancer. Topics will include the pathology and epidemiology of cancer, the origin and spread of cancer, hereditary and familial cancers, cancer associated genes and strategies of cancer therapy.

BIO 250 and BIO 260 are a prerequisite for this class.
BIO 385  
MAMMALIAN REPRODUCTION  
Undergraduate  
Molecular, cellular, physiological, and behavioral aspects of mammalian reproduction. Mechanisms and strategies used by mammals in reproductive processes including sexual differentiation, gamete production, puberty, reproductive hormone cyclicity, neuroendocrine control mechanisms, pregnancy, parturition, and reproductive behavior. Cross-listed with BIO 485.

BIO 250 and BIO 310 or instructor consent are a prerequisite for this class.

BIO 386  
INTRODUCTION TO ENDOCRINOLOGY  
Undergraduate  
A study of hormones as chemical regulators of development, growth, metabolism, homeostasis, reproduction, response to stress, and behavior; as well as hormone synthesis, chemistry, mechanisms of action, and endocrine gland structure.

BIO 250, BIO 260 and BIO 310 are a prerequisite for this class.

BIO 390  
SPECIAL TOPICS  
Undergraduate  
Occasional courses offered at an advanced level. See the schedule of classes for current offerings. Cross-listed as BIO 490.

Junior or Senior standing is a prerequisite for this class.

BIO 392  
EXTRAMURAL INTERNSHIP  
Undergraduate  
An opportunity for students to integrate their academic experience with real-world work situations; supervision is provided by a member of the DePaul Faculty in the Biological Sciences and the private or public enterprise. 0-4 credit hours.

At least Sophomore standing and a declared Biological Sciences major, or by arrangement with the Biology internship director or department permission are prerequisites for this class.

BIO 395  
BIOLOGY CAPSTONE SEMINAR  
Undergraduate  
The aim of this course is to integrate current biological view(s) of humanity with the perspectives of the liberal studies curriculum. Students will develop and debate topics that demonstrate mastery of the biology core curriculum (cell biology, genetics, physiology and ecology) while touching on history, philosophy, ethics and the law.

BIO 399  
INDEPENDENT STUDY  
Undergraduate  
independent Study. 1-4 quarter hours.

BIO 400  
DEVELOPMENT OF TOPICS FOR RESEARCH  
Graduate  
The purpose of this course is to help graduate students in formulating research questions and design methods while improving written expression and oral presentation skills. Students will, with the guidance of a faculty member, undertake a detailed investigation of a topic, formulate a potential research project in that area, and present their proposal orally to the faculty at the end of the quarter.

BIO 401  
INDEPENDENT STUDY  
Graduate  
Two or four quarter hours. Experimental and/or Library study of selected topics in the life sciences. A-Cell Biology, B-Immunobiology, C-Developmental Biology, D-Physiology, E-Endocrinology, F-Genetics, G-Structural Biology, H-Ecology, I-Molecular Biology, J-Neurobiology. Offered in the Autumn, Winter, Spring and Summer quarters. Two or four quarter hours.
BIO 409
PLANT PHYSIOLOGY
Graduate

BIO 412
TOPICS IN EXERCISE PHYSIOLOGY
Graduate
This course provides an introduction to exercise physiology to enable exploration of current research topics in the field. Weekly discussion and presentation of articles from peer-reviewed journals will reinforce and elaborate on concepts covered in lecture. Topics include: muscle structure and bioenergetics, cardiovascular and respiratory responses to exercise, human evolution and endurance, training and adaptation, nutrition and ergogenic aids, and the relationships between exercise, health, and longevity.

BIO 415
TOPICS IN ECOLOGY
Graduate
The focus of this course is to read and critique classic papers in ecology and to connect their foundational ideas with modern research and understanding.

BIO 416
PHYCOLOGY
Graduate
Introduction to algae with emphasis on taxonomy, morphology, ultrastructure, physiology, life histories of freshwater and marine species. Lecture-laboratory.

BIO 417
AQUATIC BIOLOGY
Graduate
The study of biological, physical and chemical phenomena in fresh water and marine environments. Emphasis on organisms and their interactions. Lecture-laboratory.

BIO 420
MICROBIAL ECOLOGY
Graduate
This course will explore key roles that microorganisms play in life on earth and how they are being used in biotechnology. This is a lab course, which will enable students to study processes used in the enrichment, isolation, and identification of microorganisms from various environments.

BIO 421
MOLECULAR METHODS IN ECOLOGY AND EVOLUTION
Graduate
This course will provide hands-on experience in methods of detecting and analyzing molecular variation in nature. By the end of the course, students should be competent employing molecular markers to answer a wide variety of basic questions in ecology and evolution. Cross-listed with BIO 321.

BIO 425
CELLULAR EVENTS IN THE IMMUNE RESPONSE
Graduate
Analysis of cellular and subcellular interactions in the immune response. Lecture, seminar, discussion. BIO 470 recommended.

BIO 430
DEVELOPMENTAL BIOLOGY
Graduate
A survey of developmental phenomena in animals from fertilization to sexual maturity. Topics include gametogenesis, early cell divisions, organ formation, metamorphosis, regeneration, birth defects, stem cells, reproductive technology and mammalian cloning. Lecture-laboratory.
BIO 431
TOPICS IN DEVELOPMENTAL BIOLOGY
Graduate
This seminar course examines the current embryological literature using both evolutionary and molecular perspectives. Previous student-led topics include: how early embryos are organized, the signals controlling left-right asymmetry, the evolutionary origin of feathers and the development of the retina. BIO 430 or BIO 460 recommended.

BIO 433
MYCOLOGY
Graduate
This course provides an opportunity for students to integrate their knowledge of cell biology, genetics, ecology and physiology at the organismal level by focusing on fungi. Students will gain an appreciation of the biological diversity within the major groups of fungi and their role in the environment, research and biotechnology. Lecture-laboratory.

BIO 435
CONCEPTS IN EVOLUTION
Graduate
Study of evolution and diversity in the living world. Lecture only.

BIO 439
CELLULAR NEUROBIOLOGY
Graduate
A study of the cellular and molecular mechanisms of the nervous system and the role they play in neural signaling, learning and memory.

BIO 440
SYSTEMS NEUROBIOLOGY
Graduate
An examination of the ways in which neural systems underpin behavior with an emphasis on vertebrates. In this course, behavior is understood in its broadest sense, from the functioning of organs and organ systems to the activities of whole organisms. Lecture-Laboratory.

BIO 441
TOPICS IN NEUROBIOLOGY
Graduate
A seminar course examining current topics in neurobiology. Original readings will include both current review and classic articles in the fields of neurobiology, neuroethology and the related neurosciences. BIO 439 or BIO 440 is recommended.

BIO 442
COGNITIVE NEUROSCIENCE
Graduate
This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

BIO 445
TOPICS IN PALEOBIOLOGY
Graduate
A seminar course examining various topics in paleobiology (the study of ancient life) including morphological concepts, macroevolutionary processes, extinction events, phylogenetic systematics, paleoecology, paleobiogeography, and the adequacy of the fossil record. Readings include classic and recent articles in the fields of paleobiology.

BIO 447
TOPICS IN MEDICAL BACTERIOLOGY
Graduate
This course will address current topics of concern and research in medical bacteriology. Students participating in this course will explore key concepts used in bacterial pathogenesis and learn how to critically appraise recent research papers in the field.
BIO 448
THE BIOLOGY OF INFECTION
Graduate
This course will provide students with detailed knowledge of medically important bacteria. The course will first examine common events in infections and the body's responses to infection. We will highlight in these studies the changes in both hosts and pathogens as strategies of infection and immunity evolve relative to one another. Within this framework we will examine a spectrum of infectious diseases in detail. BIO 470 is recommended.

BIO 450
PROBLEMS IN CELL MOTILITY
Graduate
Analysis of contemporary problems in cellular movements, with emphasis on the biochemistry, biophysics and regulation of cell and organelle movements. Lecture, seminar, discussion.

BIO 452
ADVANCED COMPARATIVE PHYSIOLOGY
Graduate
Comparative and environmental approach to the function and mechanisms of vertebrate organ systems. Selected topics in comparative physiology will be addressed using a lecture/discussion/seminar format.

BIO 455
GENETIC TOXICOLOGY
Graduate
This course will deal with the study of agents that damage the genome or alter the proper functioning of the genome that can lead to disease in humans. Topics covered will include basic spectrum of genetic damage and chromosomal effects, mechanisms of mutations, DNA repair, genetic assays used for evaluation of genetic toxicology, health consequences of genetic damage, including cancer and inheritable mutations, and the current position of US government and global regulatory agencies on the issues of genetic toxicology.
BIO 260 is a prerequisite for this class.

BIO 460
MOLECULAR BIOLOGY
Graduate
Study of biology at the molecular level, focusing on the regulation of gene expression and the principles of genetic engineering. Lecture-laboratory. Cross-listed as BIO 360.

BIO 461
TOPICS IN MOLECULAR BIOLOGY
Graduate
Discussion and seminars in selected areas of molecular biology.

BIO 462
BIOINFORMATICS FOR BENCH SCIENTISTS
Graduate
Study how high-throughput technologies like whole-genome sequencing have changed biological research, and learn to use computers in real research tasks such as primer design, DNA sequencing, homology searches, sequence alignment, and more. Cross-listed with BIO 362.

BIO 465
PRINCIPLES OF TOXICOLOGY
Graduate
A study of the adverse effects of chemicals on living organisms, including the chemical natures, kinetics, dose-response relationships, metabolism, and mechanisms of action of various toxins and toxicants.
BIO 471
IMMUNOBIOLOGY
Graduate
Basic factors governing immune phenomena and antigen antibody reactions. Lecture-laboratory.

BIO 475
INTRODUCTION TO PHARMACOLOGY
Graduate
Introduction to Pharmacology will explore the relationships between an organism and its response to an administered drug. This will include: 1) How drugs are administered to the body 2) What is their fate once in the body, i.e. Pharmacokinetics 3) What their mechanisms actions are - i.e. Pharmacodynamics, and 4) Adverse reactions to drugs. We will explore these relationships in different physiological systems of the human body including (but not limited to) the nervous system, circulatory system, digestive system and endocrine system. Lastly, this course will provide an understanding of the pharmaceutical system by providing a framework to explore how drugs are discovered, produced, tested, and regulated. Cross-listed with BIO 375.

BIO 480
CANCER BIOLOGY
Graduate
This course will explore the cellular and molecular aspects of cancer. Topics will include the pathology and epidemiology of cancer, the origin and spread of cancer, hereditary and familial cancers, cancer associated genes and strategies of cancer therapy.

BIO 485
MAMMALIAN REPRODUCTION
Graduate
Molecular, cellular, physiological, and behavioral aspects of mammalian reproduction. Mechanisms and strategies used by mammals in reproductive processes including sexual differentiation, gamete production, puberty, reproductive hormone cyclicity, neuroendocrine control mechanisms, pregnancy, parturition, and reproductive behavior. Cross-listed with BIO 385.

BIO 486
INTRODUCTION TO ENDOCRINOLOGY
Graduate
A study of hormones as chemical regulators of development, growth, metabolism, homeostasis, reproduction, response to stress, and behavior; as well as hormone synthesis, chemistry, mechanisms of action, and endocrine gland structure.

BIO 488
ADVANCED ENDOCRINOLOGY
Graduate
Analysis of non-hypothalamic-hypophyseal pathways for hormonal regulation of the structure, function and biochemistry of hard tissues, calcium metabolism, and regulation of glucose metabolism. Lecture-seminar. BIO 486 is recommended.

BIO 490
SPECIAL TOPICS
Graduate
Occasional courses offered at the graduate level. See schedule for current offerings. Two or four quarter hours.

BIO 491
MASTER OF ARTS SEMINAR
Graduate
A seminar course dealing with current readings in the biological sciences. Students will evaluate and interpret these readings both orally and in writing.

BIO 495
INTRODUCTION TO GRADUATE STUDY
Graduate
Presents the biology faculty and facilities. Various research and teaching methods in biology will be explored. Required of all graduate students.
BIO 496
RESEARCH
Graduate
Experimental work in selected areas of biology. These studies do not necessarily relate to a thesis. Autumn, Winter, Spring, Summer. Laboratory. Two or four quarter hours.

BIO 498
RESEARCH FOR MASTER'S THESIS
Graduate
Original study of a specific biological problem leading to a thesis.

BIO 500
SEMINAR
Graduate
Non-credit. Presentation, throughout the academic year, of their research by practicing scientists from a variety of institutions. Required of first year graduate students.

BIO 501
SEMINAR CONTINUATION
Graduate
Non-credit. Presentation, throughout the academic year, of their research by practicing scientists from a variety of institutions. Required of second year graduate students.

BIO 502
CANDIDACY CONTINUATION
Graduate
Students who have completed their coursework but who must take extra time to complete the requirements for the Master's thesis (MS), or final project (MA), must enroll in candidacy continuation each quarter of the academic year until the Master's requirement has been completed. This course carries part-time student status. Non-credit.

BIO 503
CANDIDACY MAINTENANCE
Graduate
Placeholder course for students NOT actively working on their thesis. This course is meant only to maintain university student status, it will not give the student full- or part-time student status and will not permit deferment of student loans. Non-credit.

BLW 201
LEGAL & ETHICAL ASPECTS IN THE BUSINESS ENVIRONMENT
Undergraduate
Legal and Ethical Aspects in the Business Environment. Study of the nature and philosophy of law including ethical perspectives and fundamental concepts and legal principles of sales contracts, product liability, business organizations, and employment law including ethical and social responsibilities in the managerial process.

Sophomore standing is a prerequisite for this class.

BLW 202
COMMERCIAL PAPER AND SALES
Undergraduate
History of negotiable instruments and sales law from the days of the Law Merchant through Articles II and III of the Uniform Commercial Code; discussions of promissory notes, drafts, sales, bulk sales, and recent trends.

BLW 201 or ACC 370 is a prerequisite for this class.
BLW 203
BUSINESS ORGANIZATIONS
Undergraduate
Types of business organizations; emphasis on Partnership and Corporation. Relations of parties to one another, and to third parties; comparisons between the two types and mechanics of forming and operating each.

BLW 201 or ACC 370 is a prerequisite for this class.

BLW 398
SPECIAL TOPICS
Undergraduate
Content and format of this course are variable. An in-depth study of current issues in legal studies. Subject matter and prerequisites will be indicated in class schedule.

BLW 201 is a prerequisite for this class.

BLW 399
INDEPENDENT STUDY
Undergraduate
Independent Study. Available to students of demonstrated capability for intensive independent work in business law.

Junior standing with at least 88 cumulative units is a prerequisite for this class.

BLW 500
LEGAL AND ETHICAL ENVIRONMENT
Graduate
This is an introduction to the nature and sources of law, including an analysis of ethical perspectives present in the judicial process. Students will learn how legal and ethical issues influence the decision-making process of managers. Students will explore the relationship between personal values and business decisions, and whether there exists a social responsibility of managers. This course will cover legal concepts relevant to business including basic concepts of public law (constitutional and administrative law) and private laws (sales and product liability). Students will examine business organizations and issues in employment law.

MS in Taxation and MACC students are restricted from registering for this class.

BLW 508
LEGAL ASPECTS OF BUSINESS-TOTAL PERSPECTIVE FOR THE EXECUTIVE
Graduate
Personal and professional legal liability of officers and directors has received considerable attention in recent years, thus highlighting the need for a view of the totality of his or her legal environment. It demands an integrated understanding and planning of the reciprocal aspects of his or her legal, social and ethical responsibilities and rights encountered in his or her office, outside and at home. From the end of the spectrum focusing on possible criminal and civil liabilities to the personal responsibilities of proper estate planning; the "socio-legal world of the executive" is presented. Successful completion of BLW 500 is recommended prior to registration for this course.

BLW 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. Subject matter will be indicated in class schedule.

BLW 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in business law.
CSES 401
CRITICAL ETHNIC STUDIES
Graduate
This core seminar will serve as an introduction to key issues and methods in the comparative study of ethnicity and race. The course highlights an interdisciplinary approach to the studies of systematic oppression in the United States, and the global implication of these structures. We will consider how Ethnic Studies presents a progressive intellectual challenge to global and local configurations of power in the name of global justice. Among our methods will be an intersectional theoretical analysis of the identities of race, gender, class, nation, sexuality, ability and religion. Readings will cover Kimberle Crenshaw’s and others theories of intersectionality, black feminist standpoint epistemology, postcolonial theory, mestiza feminism and other critical mixed race theories, queer critical theory, settler racism and state violence, as well as creative and political movements of resistance and social change.

CSES 402
MOBILITY AND THE STATE
Graduate
In this course we explore the history, culture, and politics of migration along with an examination of the expanding borders of the United States. We analyze the varied mythology of the border as a danger zone, an intermediary zone, and a place of contact and conflict. We also look to the theorizations of the border as a site of cultural exchanges, resistance and critical negotiation; interchanges that impact the construction of race, ethnicity, sexuality and gender from both sides of the border. We examine issues relating to U.S. policies of immigration and labor movements as well as the economic and political consequences of globalization along the border region. Finally, we examine how the U.S. border has shifted and changed over time, critically challenging issues of political, cultural, and legal belonging.

CSES 403
CITIES AND RACIAL FORMATION
Graduate
One of the required courses for the MA in Critical Ethnic Studies is in the area of Cities and Racial Formation. The group of courses in this area would cover urban issues, whether related to Chicago or other city/cities, or issues of race and ethnicity. These courses might cover topics on space, planning, and history of cities; or labor, work, and employment in urban contexts; or racial identity formation. As the majority of people living in the world today inhabit cities, this category of courses considers the many factors that transform racial make-up of urban areas. Courses might ask such questions as: What is the effect of rapid economic change on different races and their jobs in cities? What environmental features of cities affect race relations? What processes involving resource and energy consumption concern racial groups in different ways?

CHE 100
OUR CHEMICAL WORLD
Undergraduate
A course for non-science majors that develops the essential concepts of chemistry with some focus on applications of these methods and ideas toward a particular aspect of human activity or condition. Only one of series 100-102 may be taken for credit.

CHE 101
EXPLORING MATTER
Undergraduate
A course for non-science majors that develops the fundamental concepts of chemistry with experimental exploration to complement the methods and ideas encountered in reading and discussion in class. Only one of series 100-102 may be taken for credit.

CHE 102
ATOMS AND MOLECULES
Undergraduate
A course for non-science majors that develops the basic concepts of chemistry with discussion of some applications of chemical methods to the study of nature and the modification of the circumstances of human beings. The course may include a quantitative special project to enhance understanding of a particular application of chemistry. Only one of series 100-102 may be taken for credit.

CHE 103
ENVIRONMENTAL CHEMISTRY
Undergraduate
A discussion and laboratory exploration of the technological origins, effects, and control of environmental pollutants.
CHE 104
CHEMICALS, DRUGS AND LIVING SYSTEMS
Undergraduate
A discussion of the molecular basis of the interaction of specific chemical compounds (chiefly pharmaceuticals and drugs) with living organisms.

CHE 105
EXPLORING NUTRIENTS/SCIENCE OF NUTRITION
Undergraduate
A discussion and laboratory exploration of the chemical molecules which supply nutrients for living organisms. This course also includes a quantitative project, applicable to the individual student, to enhance the understanding of the principles of nutrition.

CHE 106
GEOCHEMISTRY
Undergraduate
This course for non-science majors that introduces students to basic chemical and geological concepts through a discussion of the chemical principles and scientific laws governing the composition and chemical transformation of the components making up the Earth. Major topics include the scientific method, reporting and treatment of quantitative data, introduction to the basic principles of matter, chemical reactivity, and radioactive decay.

CHE 107
PROTEINS AND THEIR GENES
Undergraduate
A discussion and laboratory introduction to many aspects of proteins: their chemical structures, biological functions, how genes store the information to make them, and how changes in genes can lead to changes in proteins, and to cancer and other diseases.

CHE 109
FORENSIC CHEMISTRY
Undergraduate
Discussion and laboratory exploration of the application of modern science to problems in criminology, evidence, art, and archaeology.

CHE 128
BASIC CHEMICAL CONCEPTS
Undergraduate
This course develops the fundamental concepts of chemistry and basic quantitative reasoning. This course is suitable to prepare students to take General Chemistry I (CHE130 or CHE 136).

CHE 129 and MAT 130 or higher are a corequisite for this class.

CHE 129
BASIC CHEMICAL CONCEPTS LABORATORY
Undergraduate
Laboratory course to be taken in conjunction with CHE128.

CHE 128 and MAT 130 or higher are a corequisite for this class.

CHE 130
GENERAL CHEMISTRY I
Undergraduate
This introductory course for science majors emphasizes the composition of matter, atomic and molecular structure, bonding and chemical reactions. It is the first in the three-course sequence of General Chemistry. This course meets for three hours of lecture and one hour of discussion per week. Students must coregister for CHE 131, the laboratory course.

MAT 130 and (a grade of C- or higher in CHE 128 and CHE 129 or placement by Chemistry Assessment exam) is a prerequisite for this class.
CHE 131  
GENERAL CHEMISTRY I LABORATORY  
Undergraduate  
Laboratory course to be taken in conjunction with CHE 130. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE130. CO-REQUISITE(S): CHE130  
MAT 130 and (a grade of C- or higher in CHE 128 and CHE 129 or placement by Chemistry Assessment exam) is a prerequisite for this class.

CHE 132  
GENERAL CHEMISTRY II  
Undergraduate  
Second course of three in the General Chemistry series. Topics discussed include: common states of matter, phase transitions, properties of solutions, kinetics and equilibrium. This course meets for three hours of lecture and one hour of discussion per week.  
A minimum grade of C- in CHE 130 and CHE 131 is a prerequisite for this class.

CHE 133  
GENERAL CHEMISTRY LABORATORY II  
Undergraduate  
Laboratory to be taken in conjunction with CHE 132. The Course meets weekly for three hours. The experimental techniques learned in lab provide hands-on experience with the course material in CHE 132.  
A minimum grade of C- in CHE 130 and CHE 131 is a prerequisite for this class.

CHE 134  
GENERAL CHEMISTRY III  
Undergraduate  
Third of three courses in the General Chemistry sequence. Topics included in lecture: chemical equilibrium in aqueous solution (acids and bases, solubility, complex ion formation), Thermodynamics (entropy and free energy), electrochemistry, chemistry of d-block elements and descriptive chemistry.  
A minimum grade of C- in CHE 132 and CHE 133 is a prerequisite for this class.

CHE 135  
GENERAL CHEMISTRY LABORATORY III  
Undergraduate  
Laboratory to be taken in conjunction with CHE 134. The Course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 134.  
A minimum grade of C- in CHE 132 and CHE 133 is a prerequisite for this class.

CHE 136  
GENERAL CHEMISTRY I  
Undergraduate  
This course is a rigorous introductory course in general chemistry covering topics such as composition of matter, atomic and molecular structure, bonding and chemical reactions, common states of matter, properties of solutions, phase transitions. Students must coregister for CHE 137, the laboratory course.  
MAT 130 and (a grade of C- or higher in CHE 128 and CHE 129 or placement by Chemistry Assessment exam) is a prerequisite for this class.

CHE 137  
GENERAL CHEMISTRY I LABORATORY  
Undergraduate  
Laboratory course to be taken in conjunction with CHE 136. This laboratory course introduces students to basic chemical laboratory techniques.  
MAT 130 and (a grade of C- or higher in CHE 128 and CHE 129 or placement by Chemistry Assessment exam) is a prerequisite for this class.
CHE 138
GENERAL CHEMISTRY II
Undergraduate
This course is a continuation of CHE136 covering topics including kinetics, chemical equilibrium in aqueous solution (acids and bases, solubility, complex ion formation), thermodynamics (entropy and free energy), electrochemistry, chemistry of d-block elements and descriptive chemistry. Students must coregister for CHE 139, the laboratory course.

A minimum grade of C- in CHE 136 and CHE 137 is a prerequisite for this class.

CHE 139
GENERAL CHEMISTRY II LABORATORY
Undergraduate
This laboratory course is a continuation of CHE137, emphasizing additional quantitative and qualitative laboratory techniques to coincide with CHE138 content.

A minimum grade of C- in CHE 136 and CHE 137 is a prerequisite for this class.

CHE 140
UNIVERSITY CHEMISTRY I
Undergraduate
The subject matter and sequence of topics are similar to that of the General Chemistry sequence (CHE 130-132-134), however this course is designed for students who are prepared for a more thorough, systematic, and mathematically rigorous study of chemistry including increased emphasis on the connection between chemical and physical topics. This is the first of a three-course sequence of University Chemistry. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 141. CO-REQUISITE(S): CHE 141

MAT 131 and completion of the Chemistry Assessment Examination is a prerequisite of this class.

CHE 141
UNIVERSITY CHEMISTRY LABORATORY I
Undergraduate
Laboratory course to be taken in conjunction with CHE 140. This course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE140. Students must co-register for the lecture companion course, CHE140.

MAT 131 and completion of the Chemistry Assessment Examination is a prerequisite of this class.

CHE 142
UNIVERSITY CHEMISTRY II
Undergraduate
Second course of three in the University Chemistry sequence. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 143.

A grade of C- or higher in CHE 140 and CHE 141 is a prerequisite for this class.

CHE 143
UNIVERSITY CHEMISTRY LABORATORY II
Undergraduate
Laboratory course to be taken in conjunction with CHE 142. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 142. Students must co-register for the lecture companion course, CHE142.

A grade of C- or higher in CHE 140 and CHE 141 is a prerequisite for this class.

CHE 144
UNIVERSITY CHEMISTRY III
Undergraduate
Third course of three in the University Chemistry sequence. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 145.

A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class.
CHE 145  
UNIVERSITY CHEMISTRY LABORATORY III  
Undergraduate  
Laboratory course to be taken in conjunction with CHE 144. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 144. Students must co-register for the lecture companion course, CHE144.

A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class.

CHE 202  
APPLIED PROBABILITY AND STATISTICS  
Undergraduate  
This is a lecture course that introduces students to concepts related to the statistical analysis of experimental data, covering material from uncertainty, significant figures, and propagation of error through least squares fitting to descriptions and applications of several statistical distributions.

(CHE 134 and CHE 135) or (CHE 138 and CHE 139) are a prerequisite and CHE 204 is a corequisite for this class.

CHE 204  
ANALYTICAL CHEMISTRY  
Undergraduate  
Use of equilibrium chemistry to solve problems of chemical analysis in acid-base, solubility, metal-ligand complex, and electrochemical systems. CO-REQUISITE(S): CHE 202 and CHE205.

(CHE 134 and CHE 135) or (CHE 138 and CHE 139) are prerequisites for this class.

CHE 205  
ANALYTICAL CHEMISTRY LABORATORY  
Undergraduate  
Laboratory to be taken in conjunction with CHE 204. Methods include wet chemistry and instrumental techniques of analysis. CO-REQUISITE(S): CHE 204.

(CHE 134 and CHE 135) or (CHE 138 and CHE 139) are prerequisites for this class.

CHE 228  
SURVEY OF ORGANIC CHEMISTRY  
Undergraduate  
This one-quarter course gives students an overview of the fundamentals of organic chemistry and its applications in health and environmental sciences. This is a survey course meant for students who do not need to learn a full year of organic chemistry. Emphasis is on the structure, function, and reactivity of the major classes of organic compounds. This course meets for six hours per week: three hours of traditional lecture and three hours of lab. The course is suitable for nursing and environmental science students; it does not substitute for any traditional organic chemistry course. CO-REQUISITE(S): CHE 229.

(CHE132 and 133) or (138 and 139) are prerequisites for this course.

CHE 229  
SURVEY OF ORGANIC CHEMISTRY LABORATORY  
Undergraduate  
Laboratory to be taken in conjunction with CHE 229. CO-REQUISITE(S): CHE 228.

(CHE132 and 133) or (138 and 139) are prerequisites for this course.

CHE 230  
ORGANIC CHEMISTRY I  
Undergraduate  
First in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecule and the language and fundamental concepts of organic chemistry, including: structure and bonding; acid-base reactions; functional groups; thermodynamics and kinetics of organic reactions; stereochemistry; substitution and elimination reactions of alkyl halides.

A minimum grade of C- in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) is a prerequisite for this class.
CHE 231
ORGANIC CHEMISTRY LABORATORY I
Undergraduate
Laboratory to be taken in conjunction with CHE 230.

A minimum grade of C- in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) is a prerequisite for this class.

CHE 232
ORGANIC CHEMISTRY II
Undergraduate
Second in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules. Specific topics investigated include the reactivity and synthesis of alcohols, ethers, epoxides, alkenes, alkynes, alkanes, conjugated, and aromatic compounds. To be taken in conjunction with CHE 233.

A minimum grade of C- in CHE 230 and CHE 231 is a prerequisite for this class.

CHE 233
ORGANIC CHEMISTRY LABORATORY II
Undergraduate
Laboratory to be taken in conjunction with CHE 232.

A minimum grade of C- in CHE 230 and CHE 231 is a prerequisite for this class.

CHE 234
ORGANIC CHEMISTRY III
Undergraduate
Third in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules. Specific topics investigated include the reactivity and synthesis of carbonyl compounds, amines; and bio-molecules. To be taken in conjunction with CHE 235.

A minimum grade of C- in CHE 232 and CHE 233 is a prerequisite for this class.

CHE 235
ORGANIC CHEMISTRY LABORATORY III
Undergraduate
Laboratory to be taken in conjunction with CHE 234.

A minimum grade of C- in CHE 232 and CHE 233 is a prerequisite for this class.

CHE 236
ORGANIC CHEMISTRY I
Undergraduate
First in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules, and the language and fundamental concepts of organic chemistry. Specific topics that are covered include the following: structure and bonding; acids and bases; functional groups; thermodynamics and kinetics of organic reactions; alkanes; stereochemistry; alkyl halides and nucleophilic substitution; elimination reactions; alcohols, ethers and epoxides; alkenes; alkynes; oxidation and reduction. CO-REQUISITE(S): CHE 237.

(CHE 134 and CHE 135) or (CHE 138 and CHE 139) are a prerequisite for this class.

CHE 237
ORGANIC CHEMISTRY I LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 236. CO-REQUISITE(S): CHE236.

(CHE 134 and CHE 135) or (CHE 138 and CHE 139) are a prerequisite and CHE 236 is a corequisite for this class.
CHE 238
ORGANIC CHEMISTRY II
Undergraduate
Second in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules, and the language and fundamental concepts of organic chemistry. Specific topics that are covered include the following: conjugation, resonance, and dienes; benzene and aromatic compounds; electrophilic aromatic substitution; carboxylic acids; organometallic reagents; carbonyl substitution and addition reactions; aldehydes and ketones; carbonyl condensation reactions; amines; bio-molecules. To be taken in conjunction with CHE 239.

A minimum grade of C- in CHE 236 and CHE 237 is a prerequisite for this course.

CHE 239
ORGANIC CHEMISTRY II LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 238.

A minimum grade of C- in CHE 236 and CHE 237 is a prerequisite for this course.

CHE 264
ATMOSPHERIC CHEMISTRY
Undergraduate
Atmospheric chemistry with a focus on physical and chemical processes in the troposphere and stratosphere. CO-REQUISITE(S): CHE265.

CHE 204 and CHE 205 are prerequisites for this course.

CHE 265
ATMOSPHERIC CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 264, with emphasis placed on gas phase and particulate measurements. CO-REQUISITE(S): CHE 264.

CHE 204 and CHE 205 are a prerequisite for this course.

CHE 268
SOLID WASTE CHEMISTRY
Undergraduate
Fundamental chemical processes involved in the processing of solid wastes. CO-REQUISITE(S): CHE269.

CHE 204 and CHE 205 are prerequisites for this course.

CHE 269
SOLID WASTE CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 268. CO-REQUISITE(S): CHE 268.

CHE 204 and CHE 205 are prerequisites for this course.

CHE 302
QUANTUM CHEMISTRY
Undergraduate
Quantum mechanics. CO-REQUISITE(S): CHE303

CHE 204 and CHE 205 and (MAT 149 or MAT 152 or MAT 162 or MAT 172) and PHY 172 are prerequisites for this class.
CHE 303
EXPERIMENTAL PHYSICAL CHEMISTRY I
Undergraduate
Laboratory to be taken in conjunction with CHE 302. Introduction to essential skills and techniques of experimental physical chemistry. Topics include the use of data analysis software, computational methods, basic spectroscopy, and technical writing. CO-REQUISITE(S): CHE 302.

CHE 204 and CHE 205 and (MAT 149 or MAT 152 or MAT 162 or MAT 172) and PHY 172 are prerequisites for this course.

CHE 304
THERMOCHEMISTRY
Undergraduate
Thermochemistry. CO-REQUISITE(S): CHE305.

CHE 302 and CHE 303 are a prerequisite for this class.

CHE 305
EXPERIMENTAL PHYSICAL CHEMISTRY II
Undergraduate
Laboratory to be taken in conjunction with CHE 304. The goal of this laboratory course is to teach students essential skills and techniques of physical chemistry. Experimental work will focus on electronic spectroscopy and thermodynamics. CO-REQUISITE(S): CHE 304.

CHE 302 and CHE 303 are a prerequisite for this class.

CHE 306
KINETICS AND MOLECULAR DYNAMICS
Undergraduate

CHE 302 and CHE 303 are a prerequisite for this class.

CHE 307
EXPERIMENTAL PHYSICAL CHEMISTRY III
Undergraduate
Laboratory to be taken in conjunction with CHE 306. The goal of this laboratory course is to teach students essential skills and techniques of physical chemistry. Experimental work will focus on thermodynamics at the outset and then kinetics for the final two experiments of the quarter. Formerly CHE 211LAB. CO-REQUISITE(S): CHE 306.

CHE 302 and CHE 303 are a prerequisite for this class.

CHE 310
NUCLEAR CHEMISTRY
Undergraduate
This is a course for advanced undergraduates and graduate students. The course emphasizes the theory of radioactive decay, nuclear properties, mass-energy systematics, and nuclear applications.

CHE 202 and PHY 172 are a prerequisite for this course.

CHE 318
BIOPHYSICAL CHEMISTRY
Undergraduate
This course is designed for advanced undergraduate students with an interest in the interdisciplinary field of biophysics. The course will focus on several subfields of biophysical chemistry, including: fluorescence as a tool in biophysics; protein folding; biophysical applications of single molecule fluorescence, atomic force microscopy, X-ray crystallography, mass spectrometry, and NMR spectroscopy. Additional topics will be selected by students from a list of possible choices.

CHE 302 or CHE 340 is a prerequisite for this course.
CHE 320
INTERMEDIATE INORGANIC CHEMISTRY
Undergraduate
Lecture course emphasizing synthesis, structure and reactions of metal ligand compounds of general and biological interest. CO-REQUISITE(S): CHE321.

(CHE 234 and CHE 235) or (CHE 238 and CHE 239) are a prerequisite for this class.

CHE 321
INTERMEDIATE INORGANIC CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 320. CO-REQUISITE(S): CHE 320.

(CHE 234 and CHE 235) or (CHE 238 and CHE 239) are a prerequisite for this class.

CHE 326
INTERMEDIATE ORGANIC CHEMISTRY
Undergraduate
This one-quarter course is designed to develop the chemical intuition necessary for advanced work in organic chemistry through a review of general organic chemistry, with emphasis on the following more advanced topics: reaction mechanisms and why reactions occur; heteraromatic chemistry; curved-arrow formalism and multi-step reactions; molecular orbitals and symmetry-controlled reactions; Hammett equation and structure-activity relationships; functional group interconversions; carbon-carbon bond-forming reactions; more advanced treatment of structure and mechanism; introduction to design and planning of synthesis of organic compounds. CO-REQUISITE(S): CHE327

(CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 327
INTERMEDIATE ORGANIC CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 326. This course is designed to provide the student with a thorough introduction to the experimental techniques utilized by practicing chemists in the synthesis, isolation, and characterization of organic compounds. CO-REQUISITE(S): CHE 326.

(CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 330
SENIOR CAPSTONE IN THE PHYSICAL SCIENCES
Undergraduate
Capstone in the Physical Sciences. A course for graduating chemistry and physics majors to integrate physical science experience with non-scientific fields.

CHE 340
BIOCHEMISTRY I
Undergraduate
First in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers the structures and functions of the four major macromolecules, concentrating on enzyme kinetics and regulation. CO-REQUISITE(S): CHE341. The general biology sequence is strongly recommended.

(CHE232 and 233) or (CHE238 and 239) are prerequisites for this course.

CHE 341
EXPERIMENTAL BIOCHEMISTRY I
Undergraduate
Laboratory to be taken in conjunction with CHE 340. This course will introduce classic and modern techniques for isolating and characterizing biological molecules. Topics covered will include buffer preparation; amino acid analysis; detection, quantification, and purification of proteins; enzyme kinetics; purification, amplification, and analysis of DNA; protein stabilization; and molecular interaction analysis. CO-REQUISITE(S): CHE 340.

(CHE232 and 233) or (CHE238 and 239) are prerequisites for this course.
CHE 342
BIOCHEMISTRY II
Undergraduate
Second in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers energy metabolism and biosynthetic pathways, with emphasis on their coordinated regulation. CO-REQUISITE(S): CHE343.

CHE 340 and CHE 341 are a prerequisite for this class.

CHE 343
EXPERIMENTAL BIOCHEMISTRY II
Undergraduate
Laboratory to be taken in conjunction with CHE 342. Applications of basic techniques from CHE 341: DNA cloning and transformation; protein expression, purification, and characterization; and advanced biophysical methods. CO-REQUISITE(S): CHE 342.

CHE 340 and CHE 341 are a prerequisite for this class.

CHE 344
BIOCHEMISTRY III
Undergraduate
Third in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers metabolism, nucleic acid structure and replication, transcription and translation. Also included are methods of biotechnology and an introduction to reading the primary literature. CO-REQUISITE(S): CHE345.

CHE 342 and CHE 343 are a prerequisite for this class.

CHE 345
EXPERIMENTAL BIOCHEMISTRY III
Undergraduate
Laboratory to be taken in conjunction with CHE 344. This course will introduce students to bioinformatics methods including protein function prediction and structure analysis, DNA/protein sequence analysis and alignment, and special topics laboratory techniques. CO-REQUISITE(S): CHE 344.

CHE 342 and CHE 343 are a prerequisite for this class.

CHE 346
SURVEY OF BIOCHEMISTRY
Undergraduate
This course covers the key topics in biochemistry. These include non-covalent interactions, acid/base chemistry, chemical and three-dimensional structures of proteins/nucleic acids/lipids, hemoglobin oxygen binding, cytoskeletal and motor proteins, enzyme mechanisms/kinetics, membrane and membrane proteins/transport, signaling, energy metabolism and biosynthesis. Formerly CHE 240.

CHE 232 or CHE 238 is a prerequisite for this class.

CHE 348
CHEMICAL BIOLOGY
Undergraduate
This course introduces students to a new discipline spanning the fields of chemistry and biology in which chemical techniques and tools, often compounds produced through synthetic chemistry are used to study and manipulate biological systems in an effort to unravel biological problems and systems. The course will take a case study approach. Techniques encountered in the case study will be studied in depth. Primary literature will be used extensively in the in depth case study.

CHE 344 is a prerequisite for this course.
CHE 360
MEDICINAL CHEMISTRY
Undergraduate
This course emphasizes organic chemical principles and reactions vital to drug design and drug action in the human body. Medicinal chemists design molecules that alter phenomena operating at the overlap of chemistry, biochemistry, cell biology, and pharmacology. This course introduces the conceptual frameworks and methods employed in drug development using case histories and mechanisms of clinically important drugs as illustrative examples.

CHE 234 or CHE238 are prerequisites for this course.

CHE 362
DRUGS AND TOXICOLOGY
Undergraduate
This course covers the chemical and biological analysis of the metabolism and distribution of drugs, toxins and chemicals in animals and humans, and the mechanism by which they cause therapeutic and toxic responses. Metabolism and toxicity as a basis for drug development, metabolic polymorphisms and biomarkers of exposure are also covered.

CHE 234 or CHE 238 is a prerequisite for this class.

CHE 364
NUTRITION
Undergraduate
This is a one-quarter course focused on the advanced chemical aspects of human nutrition. The topics include the nutritive and toxic content of foods and health effects, a review of basic metabolic processes, nutrient transport and storage systems, cell signaling and regulation, and hormonal regulation and fuel utilization.

CHE 234 or CHE 238 and CHE 340 are a prerequisite for this class.

CHE 378
APPLIED SPECTROSCOPY
Undergraduate
Organic structure determination through the interpretation of spectral information.

(CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 392
INTERNSHIP
Undergraduate
Experiential learning experience in a government agency, industrial firm, business, or non-profit organization.

CHE 234 and CHE 235 and at least Junior year standing) or instructor permission is a prerequisite for this course.

CHE 394
SEMINAR
Undergraduate
This course is required for all chemistry majors. This course is designed to enhance your ability to: critically read and summarize scientific literature, thoughtfully listen to a scientific seminar, articulate questions regarding a scientific seminar, and orally present a scientific paper.

(CHE 234 and CHE 235 and at least Junior year standing) or instructor permission is a prerequisite for this course.

CHE 397
RESEARCH
Undergraduate
This course allows a student to work with a faculty member on a research project. Faculty consent and research contract are required to register for the course. This course is typically completed in one to four quarters at the discretion of the research advisor. The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project.

Junior standing is a prerequisite for this class.
CHE 398
CHEMISTRY THESIS
Undergraduate
This course requires faculty-guided experimental exploration of a research topic and both written (thesis) and oral (seminar and defense) presentation of results. This course is typically completed in two or three quarters (though it may be completed in one quarter at the discretion of the research advisor). The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project. The student will choose a faculty mentor and a project. The project may be based on lab or field research. The grade for the thesis will be based on the written document as well as on the oral seminar and defense presented to the Chemistry students and faculty and the student will graduate “with honors” from the department. This course may be taken more than one time for credit.

CHE 399
INDEPENDENT STUDY
Undergraduate
Independent study of chemistry on an informal basis by an individual in consultation with a department faculty member. Variable credit. Department consent required.

CHE 422
INORGANIC STRUCTURE AND REACTIVITY
Graduate
One of two courses in inorganic chemistry for advanced undergraduates and graduate students in the M.S. program. The course emphasis is variable, but topics covered will include the structure of inorganic compounds and inorganic reaction chemistry.

CHE 424
GROUP THEORY
Graduate
One of two courses in inorganic chemistry for advanced undergraduates and graduate students in the M.S. program. The course emphasis is variable, but the primary topics will be group theory and its application to inorganic compounds.

CHE 430
POLYMER SYNTHESIS
Graduate
This course focuses on the key synthetic organic chemistry methods for making polymers and coatings. A detailed consideration is given to the three types of polymerization reactions: step, chain, and ring-opening polymerizations. Practical application of polymer chemistry in society is a theme throughout the course.

CHE 431
POLYMER SYNTHESIS LABORATORY
Graduate
The goal of this lab course is to expose students to experimental polymer chemistry. This course focuses on the key synthetic methods for making polymers and basic structural characterization techniques. Practical application of polymer chemistry in society is a theme throughout the course.

CHE 432
PHYSICAL CHEMISTRY OF POLYMERS
Graduate
This course looks at the broad subject of the physical chemistry of polymers and coatings. A detailed consideration is given to the role of molecular conformation and configuration in determining the physical behavior of polymers. Practical application of physical polymer chemistry in society is a theme throughout the course.

CHE 434
POLYMER CHARACTERIZATION
Graduate
This course looks at the broad subject of polymer characterization. A detailed consideration is given to major methods of analysis of chemical structure, molecular weight, morphology, and rheology. Practical application of polymer characterization in society is a theme throughout the course.
CHE 435
POLYMER CHARACTERIZATION LABORATORY
Graduate
The goal of this lab course is to expose students to hands-on polymer characterization techniques. This course will focus on the basic characterization techniques for determining structure and physical properties of polymers. Practical application of polymer characterization is a theme throughout the course.

CHE 436
POLYMER TECHNOLOGY
Graduate
This course looks at the broad subject of the polymer and coatings technology. A detailed consideration is given to polymerization processes, and polymer and coatings processing. Practical application of polymer and coatings technology in society is a theme throughout the course.

CHE 438
MATERIAL SCIENCE
Graduate
This course looks at the broad subject of the materials science with emphasis on theory and applications of metals, ceramics, polymers, coatings and composites from atomic and macroscopic points of view. Practical application of materials science is a theme throughout the course.

CHE 442
PROTEIN STRUCTURE AND FUNCTION
Graduate
One of two courses in biochemistry for advanced undergraduates and graduate students in the M.S. program. An in-depth exploration of protein structure and function, this course surveys the common experimental and bioinformatics methods used by modern biochemists to study protein structure, folding, evolution, engineering, conformational dynamics, and enzymatic reactivity. Students will gain experience with and working knowledge of online databases and tools used by biochemists to formulate and test hypotheses related to the topics of the course.

CHE 444
ADVANCED TOPICS IN PROTEIN BIOCHEMISTRY
Graduate
One of two courses in biochemistry for advanced undergraduates and graduate students in the M.S. program. Discussion and seminars in selected areas.

CHE 450
ADVANCED MECHANISTIC ORGANIC CHEMISTRY
Graduate
One of two courses in organic chemistry for advanced undergraduates and graduate students in the M.S. program. This course emphasizes physical organic chemical models and experimental methods that are used to understand, predict, and control the outcomes of reactions in organic chemistry.

CHE 452
ADVANCED SYNTHETIC ORGANIC CHEMISTRY
Graduate
One of two courses in organic chemistry for advanced undergraduates and graduate student in the M.S. program. This course emphasized classic and modern synthetic methods.

CHE 470
STATISTICAL THERMODYNAMICS
Graduate
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE470 is a course designed to provide an in-depth presentation of thermodynamics from a molecular perspective. The course builds upon foundations given in undergraduate courses on quantum chemistry, and thermochemistry. Starting with some basic principles of probability and probability distribution, it proceeds to the Boltzmann distribution law, and an introduction to microcanonical ensembles; then using the expressions of the quantum energy levels of some simple models, a systematic exploration of the proper formulation, evaluation, and application of partition functions is given. In short, this course develops a methodology to compute thermodynamic properties of macroscopic systems from knowledge of the quantized energies of individual molecules.
CHE 472
MOLECULAR DYNAMICS
Graduate
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE472 builds upon topics covered in a typical undergraduate-level course on chemical kinetics. Here, focus is placed on kinetics at the molecular level with an aim to understand how a reaction system behaves as it passes over a potential energy surface. Depending on time and student interest, specific topics in this course may include reaction rate theory, scattering theory, and surface interactions. Computer simulations may also be incorporated in this course.

CHE 474
ADVANCED QUANTUM CHEMISTRY
Graduate
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE474 is focused on quantum mechanics and will build on fundamental principles introduced in undergraduate quantum chemistry, including an examination of the particle-in-a-box, rigid rotor, and harmonic oscillator models. More advanced quantum mechanical topics such as the Dirac representation, wave packet motion, and time-dependent perturbation theory may also be explored. These topics can be used to understand phenomena such as coherent control of reactions, vibrational energy redistribution, and electronic energy transfer. The primary goals of this course are to: 1) increase students' understanding of quantum mechanical principles; 2) apply quantum mechanics to spectroscopic problems; and 3) expose students to modern literature related to quantum mechanics.

CHE 476
COMPUTATIONAL CHEMISTRY
Graduate
This course is designed to provide an accessible and practical introduction to computational chemistry. The course provides an overview of different methods commonly used in the field ranging from classical to quantum mechanical ab initio and density functional methods. PREREQUISITE(S): CHE302.

CHE 480
SPECIAL TOPICS IN ANALYTICAL CHEMISTRY
Graduate
This course may be any topic related to chemical analysis, such as mass spectroscopy, electrochemical analysis, principles of chromatography, polymer properties, coatings, sampling methods, design of experiments, etc. This course may be repeated if the topics are different.

CHE 482
SPECIAL TOPICS IN BIOCHEMISTRY
Graduate
This course may cover any topic related to biochemistry or medicinal chemistry. This course may be repeated if the topics are different.

CHE 484
SPECIAL TOPICS IN INORGANIC CHEMISTRY
Graduate
This course may cover any topic related to inorganic chemistry. This course may be repeated if the topics are different.

CHE 486
SPECIAL TOPICS IN ORGANIC CHEMISTRY
Graduate
This course may cover any topic related to organic chemistry. This course may be repeated if the topics are different.

CHE 488
SPECIAL TOPICS IN PHYSICAL CHEMISTRY
Graduate
This course covers specific topics in the area of physical chemistry. Examples of topics include single molecule techniques, molecular electronic spectroscopy, interaction of electromagnetic radiation with particulate matter, and hydrogen bonding. This course may be repeated if the topics are different.
CHE 490
ADVANCED PROBABILITY AND STATISTICS
Graduate
This course introduces students to statistical methods that can be used in error analysis of experimental data. Computers are used to apply concepts discussed in lecture to actual data sets. Offered: Winter of even-numbered years. Familiarity with Excel or a modern programming language is strongly recommended.

CHE 497
RESEARCH
Graduate
This course requires independent experimental exploration under the supervision of a faculty member. Thesis students must write a thesis based on their research project and successfully complete a two-part oral exam. The first part of the examination consists of the thesis presentation and defense; the second part is an oral examination concerning the student's general knowledge of chemistry.

CHE 502
CANDIDACY CONTINUATION
Graduate
Required of all students who are not registered for regular courses but who occasionally utilize university facilities during completion of course requirements and/or research. This course carries no credit.

CHN 101
BASIC CHINESE I
Undergraduate
This course is an introduction to the study of Chinese language, which is often referred to as Mandarin in the United States. It teaches standard modern Chinese, the one commonly used in mainland China. Therefore, with phonology, this course adopts the modern Chinese phonetic system, hanyupinyin, while with morphology, it chooses the simplified characters. The methodology of this course is based on the assumption that each of the two major methods in the field of second language teaching has its own merits and demerits. This course aims at functional proficiency by developing the four aspects of your communicative capabilities -- listening, speaking, reading, and writing -- through intensive practice arranged as true-to-life as possible. It also strives to improve students' structural accuracy, which in turn will increase functional proficiency, by dealing with the grammatical rules in the way that you can internalize them. As language and culture interact with each other, this course will also help students gain the insights of the Chinese people, their life, culture, customs and habits.

CHN 102
BASIC CHINESE II
Undergraduate
This course is the second part of the three-quarter sequence on Basic Chinese. It is offered to help students having taken CHN 101 or equivalent to develop basic conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. The simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course.

CHN 103
BASIC CHINESE III
Undergraduate
This course continues to broaden and strengthen the foundation of Chinese language in both written and spoken formats. Based on knowledge gained in Basic Chinese I and II in terms of the origin and the elements of Chinese characters, the course expands students' collection of Chinese words and phrases to apply in both reading and writing. It introduces more grammars including sentence structure and express patterns. With the understanding of the phonetics systems of spoken Chinese as well as the structure of Chinese characters, students will continue to reflect on their learning and will share methods used to retain what they have learned in the class. The course combines language study with the exploration of Chinese culture and history.

CHN 104
INTERMEDIATE CHINESE I
Undergraduate
This course is the first part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. The simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 103 or equivalent, including placement test or permission of instructor, is recommended.
CHN 105
INTERMEDIATE CHINESE II
Undergraduate
This course is the second part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin Chinese. Simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 104 or equivalent, including placement test or permission of instructor, is recommended.

CHN 106
INTERMEDIATE CHINESE III
Undergraduate
This course is the third part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. The simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 105 or equivalent, including placement test or permission of instructor, is recommended.

CHN 110
INTENSIVE BASIC CHINESE I (FOR PARTICIPANTS IN STARTALK PROGRAM)
Undergraduate
An intensive introduction to reading, writing, and speaking Mandarin in a cultural context for the beginning student. For participants in the STARTALK PROGRAM.

CHN 111
INTENSIVE BASIC CHINESE II (FOR PARTICIPANTS IN STARTALK PROGRAM)
Undergraduate
An intensive introduction to reading, writing, and speaking Mandarin in a cultural context for the beginning student; continues CHN 110. For participants in the STARTALK Program.

CHN 117
INTENSIVE BASIC CHINESE I
Undergraduate
This is part I of a two-course sequence of hybrid Basic Chinese which is equivalent to the 1st-year sequence CHN101-102-103. The hybrid course is offered in two modules: Online Learning Module (OLM) in which you self-learn the online content on our course website and finish on-line assignments during the weekdays and the Face-to-Face Module (FtFM) in which you take tests and have conversational practices in a weekly class meeting every Friday afternoon. The class will focus on developing students' basic conversational and literary proficiency in mandarin Chinese.

CHN 118
INTENSIVE BASIC CHINESE II
Undergraduate
This is part II of a two-course sequence of hybrid Basic Chinese which is equivalent to the 1st-year sequence CHN101-102-103. The hybrid course is offered in two modules: Online Learning Module (OLM) in which you self-learn the online content on our course website and finish on-line assignments during the weekdays and the Face-to-Face Module (FtFM) in which you take tests and have conversational practices in a weekly class meeting every Friday afternoon. The class will focus on developing students' basic conversational and literary proficiency in mandarin Chinese. CHN 117 or equivalent, including placement test or permission of instructor, is recommended.

CHN 141
INTENSIVE CHINESE
Undergraduate
Students will be encouraged to engage in primary research and field work, visiting local Asian American communities and community-based organizations. While the course will provide students with an introduction to issues linked to community-rooted research in Chicago, it will also enhance an awareness of the challenges of integrating: media or popular representations with reality; theory with practice, and "objective" research with social advocacy. Gaining new perspectives, students will be empowered to apply such knowledge and research skills in conducting a study of any community, particularly those that are least understood, such as the Asian American communities. Through such studies, students will take active roles in bringing such communities from the margins to the center of investigation, contributing to academic and popular interests.
CHN 197
SPECIAL TOPICS IN CHINESE
Undergraduate
See schedule for current offerings.

CHN 198
STUDY ABROAD
Undergraduate
Variable credit.

CHN 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

CHN 201
ADVANCED CHINESE I
Undergraduate
This is the first course of third year Chinese. Students will improve their communicative competence in all four areas of listening, speaking, reading, and writing. Emphasis will be on expansion of vocabulary, the mastery of more complex structural patterns and grammatical concepts, as well as the students' ability to apply in actual communication what they have learned in the classroom. CHN 106 or the equivalent, including placement test or permission of instructor, is recommended.

CHN 202
ADVANCED CHINESE II
Undergraduate
This course is the 2nd part of the three-quarter sequence in Advanced Chinese. It is offered to help students having taken the series of CHN 104-105-106 or the equivalent to develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. The simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course.

CHN 203
ADVANCED CHINESE III
Undergraduate
This course is the 3rd part of the three-quarter sequence in Advanced Chinese. It is offered to help students having taken the series of CHN 104-105-106 or the equivalent to develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. The simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course.

CHN 211
LANGUAGE AND SOCIETY IN MODERN CHINA
Undergraduate
This course explores contemporary society and culture through readings and discussions about the features and history of languages spoken in Mainland China, Taiwan, and Hong Kong; the mutual influence between language and cultural traditions including, social practices and values; the recent economic boom, the Internet, and English. The course is designed as a companion course to the intensive Chinese language study in the Chinese Summer Abroad program in Shanghai. The pre-travel portion of the course helps to prepare students for their stay in Shanghai by introducing them to the general features of the society, culture and history. The on-site and post-travel portions will engage students in reflection, analysis and understanding of the experience. CHN 106 or the equivalent, including placement test or permission of instructor, is recommended.

CHN 252
INTRODUCTION TO COMMERCIAL CHINESE
Undergraduate
This course will help students develop basic interpretive, presentational, and interactive skills that are needed in business-related Chinese social contexts. Students will learn pertinent vocabulary, idiomatic expressions, cultural information and etiquette in four conversational contexts as presented in four units in this course. Mandarin Chinese is used in the majority of instruction, although English is also employed to explain certain cultural information and relevant business etiquette. CHN 106 or equivalent recommended.

CHN 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

CHN 301
ADVANCED SPEAKING
Undergraduate
This course is designed to help students who already completed at least three years of basic Chinese language learning or equivalent to develop advanced-level Mandarin speaking skills. You will acquire new vocabulary, structural patterns and language registers that will allow you to comprehend and discuss about issues in Chinese in various social contexts. You are required to present the knowledge and skills you acquire in class in various in-class activities and homework including pronunciation drills, role plays, real-life interviews, and presentations. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication.

CHN 302
ADVANCED READING
Undergraduate
This course is designed to help students who already completed at least three years of basic Chinese language learning or equivalent to develop reading and writing skills in standard (Mandarin) Chinese, dealing with intermediate to advanced texts with carefully designed exercises to guide comprehension, and to strengthen reading and writing strategies. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication.

CHN 303
ADVANCED WRITING
Undergraduate
This course is the 3rd section of the 4th-year Chinese sequence with an aim to help students who already completed at least three years of basic Chinese language learning and received training in formal reading to develop advanced-level reading and writing skills in standard (Mandarin) Chinese. This course will focus on developing students’ writing skills on formal and abstract topics. Students will also be exposed to various genres of written Chinese such as newspaper, magazines, and contemporary novels. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication.

CHN 305
TANG DYNASTY LITERATURE AND CULTURE
Undergraduate
This is an introductory course to the history, art and interpretation of Tang Poetry, the zenith of classical Chinese poetry. All the introductory readings are in English, and original poems in simplified and traditional Chinese will be selected to read and discuss. Our attention will also be given to the ways of intermedia and transcultural rewriting of Chinese literature in the age of globalization. Chinese 106 or equivalent recommended. Cross listed with Chinese 405.

CHN 319
CONTEMPORARY CHINESE LITERATURE
Undergraduate
This is a survey course to the Chinese literary history of the past seven decades in the contexts of Chinese historical and cultural circumstances. We will examine representative works of the major literary genres such as poetry, novel (in excerpt), short story, drama (in excerpt), and the most recent online writings, such as blog essay. Chinese 106 or equivalent recommended. Cross listed with Chinese 419.
CHN 320
CHINESE FOR BUSINESS
Undergraduate
This course aims to develop advanced-level oral and literary skills that are needed in business-related Chinese social contexts. Cultural information will be covered as an integral part of business communication. CHN 106 or equivalent recommended. Cross-listed with CHN 420.

CHN 321
CHINESE TRANSLATION
Undergraduate
Boosted by globalization and the Internet, the demand for translators is on the rise. This demand creates career opportunities for people with the knowledge of a second language. Chinese 321 - Translation Practice and Theories - is designed to help Chinese-language students grasp the skills and theories needed to render qualified Chinese-to-English and English-to-Chinese translations. Through hands-on practice, a survey of major theories of translation, group and class discussions, and lectures, this course will teach you how to comprehend source texts accurately and deeply from both linguistic and cultural perspectives; how to express faithfully, fully, and coherently in the target language the idea of a source text; how to apply grammatical rules, rhetoric devices, diction, etc. in translation; how to use editing skills to enhance translation results; and how to use different language styles to render different materials. CHN 106 or the equivalent, including placement test or permission of instructor, is recommended.

CHN 330
MODERN CHINESE LITERATURE: 1919 - 1949
Undergraduate
This course studies some of the highlights of modern Chinese literature since the May 4th Movement in 1919 to the pre-Mao era in 1949--a literature produced during a period of unprecedented historical upheavals and a literature that itself has been an arena for political, cultural, and aesthetic conflicts. Through a close study of some of the significant fiction, drama, and poetry writers students will not only gain a keen understanding of the central themes of modern Chinese but also a better understanding of modern Chinese society. CHN 106 or the equivalent, including placement test or permission of instructor, is recommended.

CHN 360
CHINESE POPULAR CULTURE AND SOCIAL MEDIA
Undergraduate
The course aims to survey contemporary Chinese pop culture in city life as well as social, cultural, and political dynamics shaped by and reflected in Chinese social media. Print and online media reports, excerpts from popular TV shows, films, documentaries, and literature will be used as reading and class discussion materials. Language use in various media genres will be discussed as well. Students are expected to use Mandarin Chinese as the primary language in the classroom. Chinese 106 or equivalent recommended. Cross listed with Chinese 460.

CHN 370
CHINESE CULTURE THROUGH FILM
Undergraduate
This course is a survey course in which a selection of films from the internationally acclaimed "new Chinese cinema" are used to help students better understand the history, politics, society and economy of China in different decades of the twentieth century. Students will place each film in its historical context, considering both its aesthetic form and sociopolitical content. Although both English and Mandarin will be used in class, students need to have good command of the Chinese language to understand and discuss sociolinguistic issues in certain films. CHN 106 or the equivalent, including placement test or permission of instructor, is recommended.

CHN 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Chinese. Students must have the equivalent of 106 or higher ability in Chinese to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

Undergraduate
Variable credit.

CHN 401
ADVANCED SPEAKING
Graduate
Advanced practice of speaking skills in Mandarin, focusing on expanding vocabulary and information needed for the discussion of topics to full capacity in the target language. Three years of college study or equivalent knowledge recommended.

CHN 402
ADVANCED READING
Graduate
Advanced practice of reading skills in Mandarin, focusing on increase in vocabulary and reinforcement of their grammatical knowledge, using textual clues to find the meanings of unknown words. Cross-listed with CHN 302.

CHN 403
ADVANCED WRITING
Graduate
Advanced practice of writing skills in Mandarin, focusing on standardized formal writing practices ranging from the writing of letters to the writing of essays including both descriptive and expository styles. Students in this course will develop vocabulary, expressions, and reading and writing strategies through working with historical texts. They are also expected to develop deeper understanding of the content, as well as the special historical and cultural contexts, of the selected texts. All assignments will be submitted in mandarin Chinese. Cross-listed as CHN 303.

CHN 405
TANG DYNASTY LITERATURE AND CULTURE
Graduate
This is an introductory course to the history, art and interpretation of Tang Poetry, the zenith of classical Chinese poetry. All the introductory readings are in English, and original poems in simplified and traditional Chinese will be selected to read and discuss. Our attention will also be given to the ways of intermedia and transcultural rewriting of Chinese literature in the age of globalization. Chinese 106 or equivalent recommended. Cross listed with Chinese 305.

CHN 419
CONTEMPORARY CHINESE LITERATURE
Graduate
This is a survey course to the Chinese literary history of the past seven decades in the contexts of Chinese historical and cultural circumstances. We will examine representative works of the major literary genres such as poetry, novel (in excerpt), short story, drama (in excerpt), and the most recent online writings, such as blog essay. Chinese 106 or equivalent recommended. Cross listed with Chinese 319.

CHN 420
CHINESE FOR BUSINESS
Graduate
This course aims to develop advanced-level oral and literary skills that are needed in business-related Chinese social contexts. Cultural information will be covered as an integral part of business communication. CHN 106 or equivalent recommended. Cross-listed with CHN 320.
CHN 421
CHINESE TRANSLATION
Graduate
Boosted by globalization and the Internet, the demand for translators is on the rise. This demand creates career opportunities for people with the knowledge of a second language. Chinese 321 - Translation Practice and Theories - is designed to help Chinese-language students grasp the skills and theories needed to render qualified Chinese-to-English and English-to-Chinese translations. Through hands-on practice, a survey of major theories of translation, group and class discussions, and lectures, this course will teach students how to comprehend source texts accurately and deeply from both linguistic and cultural perspectives; how to express faithfully, fully, and coherently in the target language the idea of a source text; how to apply grammatical rules, rhetoric devices, diction, etc. in translation; how to use editing skills to enhance translation results; and how to use different language styles to render different materials. Cross-listed with CHN 321.

CHN 430
MODERN CHINESE LITERATURE: 1919 - 1949
Graduate
This course studies some of the highlights of modern Chinese literature since the May 4th Movement in 1919 to the pre-Mao era in 1949—a literature produced during a period of unprecedented historical upheavals and a literature that itself has been an arena for political, cultural, and aesthetic conflicts. Through a close study of some of the significant fiction, drama, and poetry writers students will not only gain a keen understanding of the central themes of modern Chinese but also a better understanding of modern Chinese society. CHN 106 or the equivalent, including placement test or permission of instructor, is recommended.

CHN 454
INTRODUCTION TO CHINESE LINGUISTICS
Graduate
This course is aimed to introduce students to modern Mandarin Chinese linguistics. Students will explore the historical evolution of Chinese and understand the basic characteristics of Mandarin. CHN 106 or equivalent recommended. Cross-listed with CHN 354.

CHN 460
CHINESE POPULAR CULTURE AND SOCIAL MEDIA
Graduate
The course aims to survey contemporary Chinese pop culture in city life as well as social, cultural, and political dynamics shaped by and reflected in Chinese social media. Print and online media reports, excerpts from popular TV shows, films, documentaries, and literature will be used as reading and class discussion materials. Language use in various media genres will be discussed as well. Students are expected to use Mandarin Chinese as the primary language in the classroom. Chinese 106 or equivalent recommended. Cross listed with Chinese 360.

CHN 470
CHINESE CULTURE THROUGH FILM
Graduate
Survey of major twentieth-century Chinese films illustrating the history, politics, society and economy of modern China, with special attention to the continuity between tradition and modernity. Cross-listed with CHN 370.

CHN 496
PRACTICUM IN CHINESE INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

CMN 101
INTRODUCTION TO HUMAN COMMUNICATION
Undergraduate
This course provides an introduction to the field of relational, group and organizational communication. Students become acquainted with the basic terms, concepts and theoretical perspectives used to examine communication in dyadic, group and organizational contexts.

CMN 102
INTRODUCTION TO MASS COMMUNICATION
Undergraduate
This course offers students a broad overview of the mass media (print, film, video, recorded music, radio, television and the internet) with a particular focus on how these media impact our everyday lives. Students will develop critical frameworks for understanding how power operates across the media spheres of production, circulation, representation and reception. Attention is placed on how the social categories of race, class, gender, sexuality, ethnicity, age and nationality inform each of these media spheres. The course also considers how recent developments in digital technologies, media convergence and globalization have transformed our media culture.

CMN 103
INTERCULTURAL COMMUNICATION
Undergraduate
Examines the role culture plays in interethnic and international communication. Explores differences and similarities in cultural values and communication behaviors between and among diverse cultures and develops intercultural competence. Critiques stereotypes and increases cultural sensitivity.

CMN 394
ADVANCED COMMUNICATION INTERNSHIP
Undergraduate
This course is for communication majors and minors who meet eligibility requirements. Students will learn career planning skills, explore the organizations in which they work, gain an understanding of how they contribute to their organizations, and discuss societal and world issues, as they affect their workplaces.

CMN 395
COMMUNICATION INTERNSHIP SPECIAL TOPICS
Undergraduate
This course is for students who wish to receive academic credit for a second or third internship. Must be a Communication major or minor who has completed CMN 394 or UIP 250 and meets eligibility requirements. Must be taken concurrently with an internship. Topics include building and managing a communication career, workplace communication skills, effective networking, and leadership development.

CMN 396
CAPSTONE IN COMMUNICATION
Undergraduate
Making a difference: Communication Senior Capstone. Exploration of student skills, knowledge and interests, as well as how these might have a concrete contribution to contemporary society.

Senior Standing is a prerequisite for this class.

CMN 398
STUDY ABROAD
Undergraduate
Expand international learning opportunities that effectively prepare students to be successful, innovative leaders and community members in a diverse global society. NOTE: CMN 398 meets the Junior Year Experiential learning requirement. To count for MCS credit, topic of Study Abroad must be approved by program director to count for History/Criticism elective.
CMN 399
INDEPENDENT STUDY
Undergraduate
PREREQUISITE(S): Written permission of supervising faculty member and of the departmental chair is necessary before registration.

CMN 591
INTERNSHIP
Graduate
This graduate level course is designed to integrate the student's work experience at the internship site with a career-management curriculum that enhances internship success and increases employability. Students must attend a Graduate Communication Internship orientation workshop prior to enrolling in this class.

Status as a Graduate Communications student is a prerequisite for this class.

CMN 592
GRADUATE INTERNSHIP II
Graduate
This graduate level course is designed to integrate the student's work experience at a second approved internship site with an advanced career-management curriculum that increases employability. In addition to the prerequisite, students must meet eligibility requirements. Must be taken concurrently with an approved internship.

Status as a Journalism or Public Relations student and CMN 591 is a prerequisite for this class.

CMNS 101
METHODOLOGICAL TOPICS
Graduate
This course is a special topics course in research methods, wherein students study and practice a specialized approach to data collection and knowledge generation. Students will engage the philosophical foundations and practical methodological operations of the study of human communication from a specific research perspective.

CMNS 290
COMMUNICATION WORKSHOP (VARIABLE TOPICS)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups.

CMNS 291
RESEARCH METHODS
Undergraduate
This course is an introduction to the study of communication through the observation and analysis of empirical (i.e. aspects of the observable world) data. It will stress how to form appropriate questions from the theories (or hunches, dreams etc.) and rigorously test these propositions (quantitatively and qualitatively) to see how well they correspond to the world outside ourselves. An added benefit of the course will be to show how to be a more informed judge of the claims of others. The format of the course is lecture/discussion.

CMNS 305
PERFORMANCE STUDIES
Undergraduate
The course traces the shift from the field of Oral Interpretation to the emergence of Performance Studies as a discipline, with particular attention to the primary theorists and practitioners who have set the foundation and scope of the field of Performance. Taking an historical approach to the development of the field, the course will explore performance epistemologies, performative methodologies, and performative theories, offering students the opportunity to study and engage contemporary approaches to performance research.

CMNS 306
TOPICS IN PRESENTATION
Undergraduate
Courses offer advanced analysis of presentational forms. Students will enact presentational theories in relational, small group, or public communication contexts.
CMNS 315
HEALTH COMMUNICATION
Undergraduate
This course surveys the theory and practice of communication in the health care setting. Topics include the dynamics of doctor-patient interaction and the cursory nature of health care campaigns. (Organizational, Relational)

CMNS 360
RELATIONAL, GROUP, AND ORGANIZATIONAL THEORY
Undergraduate
This course surveys relevant theoretical developments in the field of communication. While exploring the major theoretical paradigms that inform and guide the study of human communication, students receive insight into the significance and meaning of their own day-to-day communication activities and discover how theories provide complementary and viable explanations for analyzing as well as assessing the impact of communication in relational, group and organizational contexts.

CMNS 392
INDEPENDENT STUDY
Undergraduate
Independent Study.

CMNS 500
FOUNDATIONS IN GRADUATE COMMUNICATION STUDIES
Graduate
This course provides an orientation and introduction to the Communication Studies Graduate Programs (Health, Relational, Organizational/Multicultural) in the College of Communication, as well as the larger field of communication studies. The course provides an orientation into graduate program policies, program faculty, DePaul resources, the broader academic discipline of Communication and potential career opportunities for graduates and resources in the field. In addition, the course provides a survey of research paradigms and methodologies, while offering students an introduction to areas of faculty specialization. Students will develop a personalized study plan and a literature review related to their area of research interest. This class will be primarily lecture/discussion based, emphasizing student participation, active learning, and diverse disciplinary perspectives. The course will take the form of several guest lectures, critical reading and reflection of research, and discussion. Students will be required to participate in small group discussions, and submit papers and other written assignments.

Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

CMNS 501
COMMUNICATION IN CULTURAL CONTEXTS
Graduate
Analyzes theories of the interaction between culture and communication. Investigates the facets of culture that influence communication in a variety of settings, ranging from corporate and educational realms to social and familial domains, particularly among people from different cultures. Examines how communication can serve to bridge gaps in a multicultural setting. Formerly CMN 501.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 502
INTERCULTURAL COMMUNICATION THEORIES
Graduate
The course provides an overview of different theories of intercultural communication. The course also prepares students to conduct pure theoretical inquiry and theory-driven research into intercultural communication practices, processes, and patterns.

Status as a Graduate Communication student or department consent is a prerequisite for this class.
CMNS 503
COMMUNICATION AND CULTURES IN TRANSITION
Graduate
Explores the role of communication in facilitating and inducing cultural change on a national and international scale. Examines the interaction between culture and communication and the impact of interaction on cultural transition and transformation in contemporary societies. The course takes a case study approach to one international culture (eg. China, India, Latin American countries, Russia, Saudi Arabia) or of social issues and social movements in the United States (eg. women's liberation, civil rights, pop cultures). Formerly CMN 503.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 504
LANGUAGE, THOUGHT AND CULTURE
Graduate
This course examines the interrelationship among language, thought, and culture. Reviews and critiques theories and research of how language or the use of symbols reflects culture and shapes reality for certain cultural/ethnic groups and organizations. Explores how language influences thought and action of the collective and of individuals in social, political and organizational settings.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 505
LATINO COMMUNICATION IN CULTURAL CONTEXTS
Graduate
This seminar surveys theories of the interaction between culture and communication in specific Latino contexts. Investigates the facets of culture that influence Latino communication intra- and inter-culturally in a variety of settings, ranging from corporate and educational realms to socio-political and family domains. Provides students with theoretical, analytical and practical skills to understand, communicate with, and engage with diverse Latino populations in professional and social settings.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 509
SPECIAL TOPICS IN MULTICULTURAL COMMUNICATION
Graduate
Course covers a variety of topics that address theories about multicultural communication such as culture, gender, sexual orientation, race, and ethnicity.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 521
LANGUAGE AND POWER
Graduate
Reviews the role of language and representation as social power. Topics include rhetorical form as strategy, semiotic analysis of power relations, language and the construction of subjectivity, and discursive structures of empowerment.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 522
COMMUNICATING IDENTITY
Graduate
Focuses on the rhetorical theories and practices through which various cultural groups within the US. construct a sense of identity. The course examines different rhetorical forms and strategies through an analysis of the rhetorical situations, texts and artifacts of various cultural groups.

Status as a Graduate Communication student or department consent is a prerequisite for this class.
CMNS 523
GENDERED COMMUNICATION
Graduate
Examines research into the ways the various aspects of communication are affected by and affect the social construction of gender. Topics covered include language and language usage differences, interaction patterns and perceptions of the sexes generated through language and communication. (Cross-listed as MLS 445/WMS 440).

Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 525
COMPARATIVE MANAGEMENT COMMUNICATION
Graduate
Examines and contrasts the management philosophies of different cultures around the world, paying special attention to how European and Asian organizational practices influence structure, culture and communication within American corporations.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 526
COMMUNICATION IN ORGANIZATIONAL ASSIMILATION
Graduate
This class introduces students to the processes by which individuals join, become a part of, and exit organizations. The course structure closely parallels the popular organizational assimilation stage model outlined below, but takes an explicit multicultural perspective throughout. Specifically, in addition to discussing the traditional body of work on this subject, which often ignores issues of diversity, this course examines the organizational assimilation experiences for women, gays/lesbians, and ethnic minorities in the United States. Revealed here are some of the subtle and not-so-subtle ways which employees can be discriminated against at different stages of the assimilation process.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 527
ASSESSMENT AND INTERVENTION IN ORGANIZATIONS
Graduate
Organizations are symbolic realities constructed by humans in communication. In other words, organizations are creations, and both organizational members and observers need to comprehend them as such. Communication 527 is devoted to preparing you to become communication professionals able to understand organizations through the analysis of organizational patterns of meaning and expectations. Communication professionals help organizations to improve communication by (1) identifying differences between actual and desired conditions of communication and (2) devising ways to close the gap between actual and desired states. The first function involves organizational communication evaluation (gathering, analyzing, and interpreting data about an organization's communication processes). The second function is referred to as intervention (actions taken to improve organizational communication). People who perform organizational communication evaluation and intervention may be members of the organization or outside agents brought in to perform specific projects. This class will focus on the role of the communication professional in the maintenance and change of organizational communication functions, structures, and the communication processes that occur at various systems levels, including dyads, groups, intercultural and multicultural relations, and organization-wide network processes.

Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 529
TOPICS IN ORGANIZATIONAL AND MULTICULTURAL COMMUNICATION
Graduate
This course offers students a variety of special topic areas related to organizational and multicultural communication. Students will have opportunities to delve more deeply into each topic area working with instructors who have specialized expertise in that area. Typical topics include but are not limited to Global Workplaces and International Management, Organizational Identity, Critical Theory, and Latino(a) Representation. When this course is taken as an elective for the MA-RELC program, the topic must be approved by the MA-RELC Program Director.

Status as a Graduate Communication student or Director consent is a prerequisite for this class.
CMNS 530
INSTRUCTIONAL DEVELOPMENT
Graduate
This course is designed to assist in understanding the principles necessary for effective design, delivery and evaluation of instruction based on awareness of differing learning styles, subject content, the educational setting, and learning outcomes. This course examines issues related to instructional development by emphasizing the components that are critical in the development, delivery, and assessment of quality teaching and learning experiences in both academic and organizational settings. Students will have the opportunity to implement instructional strategies in the class setting.

Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 531
INSTRUCTIONAL DEVELOPMENT PRACTICUM
Graduate
After completing CMNS 530, students have the option of taking CMNS 531. The course allows students to apply concepts learned in Instructional Development as they partner with a College of Communication instructor to prepare assignments, conduct teaching sessions, and grade.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 532
INTRODUCTION TO TRAINING AND DEVELOPMENT
Graduate
This course provides an introduction to training and its relationship to organizational problem solving. Basic and advanced training strategies are taught within the context of developing organizations. Organizations often have in house training and development specialists that facilitate on-going organizational change processes. The functions of such human relations specialists are explored and the kinds of communication knowledge, competencies and skills needed to enact such functions are examined.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 535
ENVIRONMENTAL RHETORIC AND POLITICS
Graduate
The idea of nature and the way in which we relate with the environment are intertwined with human communication. Our social constructions of nature and environment ultimately result in a material reality when these ideas directly influence environmental policy (e.g. the Endangered Species Act) and environmental practices (e.g. recycling). The purpose of this course is to analyze the discourse that has influenced environmental policy and practice in the public and private sphere. We will examine key rhetorical documents that have laid the groundwork for sustainability literacy from a social, scientific, economic, and philosophical perspective. We will explore the more formal aspects of environmental communication (government and corporate policy) as well as the commonplace (representations of nature in mediated contexts, social movement rhetoric, and corporate communication about the environment). Students should leave this course with a heightened critical sensibility about the ways in which our language not only shapes our understanding of the environment but also influences political, corporate and personal action.

CMNS 541
ORGANIZATIONAL COMMUNICATION AND CULTURE
Graduate
The central purpose of this course is to introduce students to the role communication plays in organizational life. Throughout the quarter, attention will be devoted to examining the various theoretical perspectives from which organizational communication can be viewed, and selectively surveying major content topics and current issues in the organizational communication literature.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 542
MULTICULTURAL COMMUNICATION IN THE WORKPLACE
Graduate
Multicultural issues affect the communication of organizational members on a day-to-day basis. This course examines multicultural issues in professional settings. It provides students with knowledge about co-cultural communication patterns, which will enhance their own ability to interact. Further, it demonstrates how multicultural communication can be an organizational asset.

Status as a Graduate Communication student or department consent is a prerequisite for this class.
CMNS 543
COMMUNICATION AND ORGANIZATIONAL CHANGE
Graduate
Change in an organization implies change in communicative processes at the individual, dyadic, group and systemic levels. Communication variables that define patterns of interaction within these organizational contexts will be examined as well as key issues that might cause communication difficulties.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 544
POLITICS AND POWER IN ORGANIZATIONS
Graduate
Examines political activities sanctioned and encouraged by organizations, subjective political activities initiated by individuals, bases of power within organizations (influence strategies), living and working with organizational politics (coping mechanisms).

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 545
COMMUNICATION AND TECHNOLOGY
Graduate
Communication and Technology explores the process through which technological and social systems co-create or invent each other. As such, this course not only examines the role that new communication technologies play in shaping our social systems and the organizations within them, but also looks at how social, cultural, economic and legal contexts influence the development and emergence of these technologies.

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 546
BUSINESS AND PROFESSIONAL COMMUNICATION
Graduate
Explores presentational skills, interviewing skills, bargaining and negotiating skills, and small group communication skills. Surveys topics critical to effective managerial communication in a corporate environment. (Cross-listed with PRAD 510).

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 547
COMMUNICATION IN CUSTOMER SERVICE
Graduate
America's economy is currently driven by service industries. In this course we will explore the communicative dimensions of customer service. By reviewing the theory and research of customer service and exploring the research methods available for assessing service, students will be both better able to appreciate the service process and diagnose and change ineffective service systems.

Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 548
TEAMS AND LEADERSHIP
Graduate
Modern organizations are increasingly interested in shifting their organizational structures toward the goal of creating self-managed work teams. Therefore, the current communication graduate greatly benefits from knowledge and experience with two interdependent aspects of group dynamics: decision-making under conditions of uncertainty, and the philosophy and practice of developing groups into self-managed teams. The December quarter version of this course will combine a relatively brief period of lecture/discussion with a teamwork intensive action learning component towards the goal of making each student competent to either spearhead a change to self-managed work teams in their own organization (if called upon to do so), or to understand and weather this change in work mode without stress.

Status as a Graduate Communication student or department consent is a prerequisite for this class.
CMNS 549  
SPECIAL TOPICS IN ORGANIZATIONAL COMMUNICATION  
Graduate  
Course covers a variety of topics that address theories about organizational communication such as group processes, conflict management, and leadership.  

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 550  
ORGANIZATIONAL DIVERSITY & LEADERSHIP  
Graduate  
Organizational Diversity and Leadership provides students with a conceptual framework of the strategies and systems required to design, implement, and manage a comprehensive diversity initiative spanning various functions in various business sectors. This course addresses issues relating to diversity philosophy, organization and administration of diversity initiatives as well as the development and implementation of a comprehensive diversity strategy within the business enterprise.  

Status as a Graduate Communication or Health Communication student or department consent is a prerequisite for this class.

CMNS 552  
STRATEGIC COMMUNICATION  
Graduate  
This course explores the process by which communicators attempt to accomplish their goals. In particular, this course covers theories of persuasion, strategic message design (creating messages that take into account multiple audiences and goals), and how the inferential process influences decision-making.  

Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 553  
COMMUNICATION AND DIVERSITY TRAINING FOR LEADERS  
Graduate  
Diversity of organizational members provides a larger pool of resources for creativity and innovation in organizational and teams performances. However, it also presents unique challenges to collaborative processes, integration of multiple view points and interest groups, and employee's socio-emotional well-being. This course asks what it means to be an effective leader and a member of a diverse workplace and how to further develop our knowledge, skills, and abilities for diversity management. Particularly, the course examines leaders' and managers' roles in better facilitating multicultural processes in the workplace and identifies theoretical and practical tools for the development of leadership.  

Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 556  
INTERCULTURAL CONFLICT AND NEGOTIATION STRATEGIES  
Graduate  
This course focuses on the role of communication strategies in conflict negotiation, mediation, and resolution within a globalized society. Students will be introduced to core concepts in intercultural communication in order to understand differing value systems and communication strategies between cultures. The course will examine conflict situations in a variety of cross cultural contexts, e.g., conflict in interpersonal relationships between members of different cultural groups, conflict in multicultural organizations, and conflict at global political levels. Students will apply intercultural communication theories to various cross cultural conflict scenarios in order to obtain practical and theoretical understanding of conflict negotiation and resolution between cultures.  

Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 557  
SPECIAL TOPICS IN TRAINING AND DEVELOPMENT  
Graduate  
This course varies on topics related to issues in training and development.  

Status as a Graduate Communication student or department consent is a prerequisite for this class.
CMNS 561
INTERNATIONAL MEDIA
Graduate
Examines the political economy of the global media, with attention to institutional, historical, and contemporary questions of ownership and program content, as well as representations by the U.S. commercial news media of the foreign other and the representation of Western culture and institutional life in non-Western contexts. Includes examination of issues in the mass media now debated within the international community, pursuing questions about the New World Information Order, the international marketplace of images, cultural imperialism and national culture, and types of programming aimed at an international audience.
Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 563
MULTICULTURAL MEDIA REPRESENTATIONS
Graduate
This course examines both representational practices and theories that are informed by multicultural perspectives. It explores ways in which scholars and media practitioners have dealt with the epistemological problem of “difference” The course may take up topics such as race, class, age, and sexual orientation as categories of difference that have informed and continue to inform academic inquiries. The course also looks at historical and/or contemporary media texts, and analyzes them through these methods.
Status as a Graduate Communication student or department consent is a prerequisite for this class.

CMNS 570
INTRODUCTION TO DIGITAL CMN
Graduate
This course will provide students with a detailed critical introduction to the field of digital communication. Topics will include practical applications of digital communication across disciplines: communication studies, journalism, public relations, advertising, media and cinema studies, and communication technology. This class will offer students a glimpse of those disciplines and allow them to integrate them all together. Additionally, this course will provide an entry point for students into the program who have had little experience with either digital technology or communication courses. Ideally, this course would be a critical introduction to the field.
Status as a MA-DCMA or a MA-MCS student or department consent is a prerequisite for this class.

CMNS 581
QUALITATIVE RESEARCH METHODS
Graduate
Introduction to qualitative approaches to research in communication. The course includes a systematic review and application of ethnography, unstructured interviewing, personal document analysis, historical research, and critical practice. Addresses the rationale, method, and theory of each qualitative approach to research in addition to placing emphasis upon data collection and interpretation.
Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 582
QUANTITATIVE RESEARCH METHODS
Graduate
Introduces students to quantitative approaches to research and basic statistics. Topics include research design and control, survey construction, measurement and other general research issues, nonparametric statistics, correlation, the t-test and analysis of variance.
Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 583
RESEARCH METHODS
Graduate
Focuses on developing an understanding of appropriate quantitative and qualitative research methodologies and relevant descriptive and inferential statistics for the investigation of both practical and theoretical problems in the study of communication. By considering the nature, concepts, and logic of the research enterprise, permits a critically informed assessment of published research, including data gathering and data analysis procedures.
Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.
CMNS 584
METHODOLOGICAL TOPICS
Graduate
This course is a special topics course in research methods, wherein students study and practice a specialized approach to data collection and knowledge generation. Students will engage the philosophical foundations and practical methodological operations of the study of human communication from a specific research perspective.

CMNS 590
COMMUNICATION WORKSHOP (VARIABLE TOPICS)
Graduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups.

Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

CMNS 592
INDEPENDENT STUDY
Graduate
Students will be guided in the development of a special project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member.

Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

CMNS 596
GRADUATE CAPSTONE
Graduate
The graduate capstone course is designed to accompany the completion of an exit project, an option to fulfill the requirements for an M.A. in the following programs: Organizational and Multicultural, Relational Communication, and Health Communication. Under the mentorship of a faculty member, students will design and create an exit project as guided by their chosen committee. The students in the course will serve as peer collaborators for one another, providing resources throughout the exit project process. The purpose of an exit project is to allow students the flexibility to create a meaningful work product that integrates the graduate coursework, which is distinctly separate from the thesis and comprehensive exam options. To enroll in this course, students must complete and submit the requisite paperwork with the signature of their exit project committee members along with a proposal of the exit project.

Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

CMNS 599
RESEARCH THESIS
Graduate
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.

Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

CMNS 601
ACTIVE DEGREE COMPLETION
Graduate
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans.

Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.
CMNS 602
CANDIDACY CONTINUATION
Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans.

Status as a Graduate Communication student is a prerequisite for this class.

CNS 228
LEGAL, ETHICAL AND SOCIAL ISSUES IN INFORMATION SECURITY
Undergraduate
This course is designed to acquaint students with electronic privacy, security and ethics. Students will gain an understanding of information ethics, existing and emerging cyber-laws, organizational liability issues, and explore several Codes of Ethics. Students will learn about real and potential security issues, steps that can be taken to create environments of trust, how to evaluate the strengths and weaknesses of a firm's information resource environment, and risk management and operation feasibility issues. Formerly CNS 330.

CNS 320
COMPUTER FORENSIC AND INCIDENT RESPONSE
Undergraduate
Introduction to the topics of computer forensic, computer crimes, response to security incidents, Cybercrime investigation and prosecution. Students will learn how an organization can setup a security response team, prepare for Security incidents and manage these incidents. PREREQUISITE(S): (CSC 301 or CSC 393) and CSC 373

CNS 340
FUNDAMENTALS OF INFORMATION ASSURANCE
Undergraduate
This course is a survey of the fundamental elements of computer security and information assurance. Topics may include confidentiality, integrity, and availability; security policies; authentication; access control; risk management; threat and vulnerability assessment; common attack/defense methods; ethical issues. Formerly CSC 390.

CNS 355
PHYSICAL AND IT SECURITY CONVERGENCE
Undergraduate
This course introduces students to the fundamental processes associated with the Physical Security discipline. This course will present the convergence of IT Security and Corporate Physical Security, focusing on where convergence takes place - at the technology, process and function level. Students will look at real-world illustrations of implementation and analyze perceived efficiencies and cost-savings. This course is designed for students who desire to understand physical and IT security in the framework of Enterprise Risk Management.

CNS 366
CRITICAL INFRASTRUCTURE AND CONTROL SYSTEMS CYBERSECURITY
Undergraduate
This class will focus on the security risks of critical infrastructure systems (such as Electrical, Pipelines, Water/Wastewater and transportation) and methods to protect them. PREREQUISITE(S): CNS 340 or TDC 377 or IT 263

CNS 378
HOST BASED SECURITY
Undergraduate
Principles of host based security. Review of security methods used to ensure the confidentiality, integrity, and availability of the information stored on a host. The class will cover OS configuration, access control, anti-malware, public facing application security, host-based intrusion detection/prevention, host-based firewalls and audit & compliance. Course includes laboratory work with both the Linux and Windows operating systems. PREREQUISITE(S): CSC 374 or TDC 311
CNS 388
SECURITY TESTING AND ASSESSMENT
Undergraduate
Vulnerability assessment and ethical security testing; review of ethical concerns and legal issues associated with security testing activities; study and analysis of the defensive mechanisms used to mitigate such threats. There will be extensive hands-on laboratory exercises.
PREREQUISITE(S): TDC 377

CNS 389
CYBER DEFENSE EXERCISES AND ATTACK RESPONSES
Undergraduate
This is a hands-on, lab based applied security course in which students will work in teams to defend against cyber-attacks and implement services in a hostile cyber environment. Most activities will be derived from Cyber Dense and Cyber League competitions and will prepare students to participate and excel in these competitions. This course is open to all students, including students inexperienced in Cyber Defense competitions. Repeat enrollment is encouraged. PREREQUISITE(S) None

CNS 394
INFORMATION SYSTEMS SECURITY ENGINEERING I
Undergraduate
This course requires students to apply Information System Security Engineering methods and processes to design, document and implement comprehensive security infrastructures in realistic scenarios. Students will work in teams through the entire life cycle of a Security infrastructure project from needs discovery, threat assessment, architecture design, implementation, effectiveness assessment and auditing. The course is designed to span two quarters. In this first quarter, students will learn the Information Systems Security Engineering process and perform asset identification, threat assessment and system requirement specification. PREREQUISITE(S): CNS 378 (formerly IT 378) and TDC 377 and TDC 379.

CNS 395
INFORMATION SYSTEMS SECURITY ENGINEERING II
Undergraduate
This senior project capstone course requires students to apply Information System Security Engineering methods and processes to perform the design and implementation of Information Systems Security infrastructures. The human and sociological impacts of Information Security will be studied with a particular focus on privacy issues, ethical use of Security tools and cultural and legal difference that exist in a globally connected but diverse world. PREREQUISITE(S): CNS 394

CNS 397
TOPICS IN COMPUTER, INFORMATION AND NETWORK SECURITY
Undergraduate
May be repeated for credit.

CNS 399
INDEPENDENT STUDY
Undergraduate
Variable credit. PREREQUISITE(S): Consent of dean.

CNS 418
INTRODUCTION TO HOST SECURITY
Graduate
Principles of host based security. Review of security methods used to ensure the confidentiality, integrity, and availability of the information stored on a host. The class will cover OS configuration, access control, anti-malware, public facing application security, host-based intrusion detection/prevention, host-based firewalls and audit & compliance. Course includes laboratory work with both the Linux and Windows operating systems. PREREQUISITE(S): TDC 411

CNS 440
SECURITY MANAGEMENT
Graduate
Survey of information security considerations as they apply to information systems analysis, design, and operations. Topics include information security vulnerabilities, threats, and risk management; security policies and standards; security audits; access controls; network perimeter protection, data protection; physical security; risk management, security education training and awareness. Laboratory exercises will be used to illustrate concepts and security tools widely used by professionals.
CNS 450  
COMPUTER FORENSICS  
Graduate  
This course focuses on the forensic analysis of data from computer systems. This course covers: preservation and interpretation of evidence; file systems, e.g., Ext3 and NTFS; storage behavior of applications; forensic tools; tool development and automation; indexing documents; reporting and testimony. Optional topics include: anti forensics; data mining; data recovery; intrusion detection; software forensics.  
PREREQUISITES: CSC 403 and CSC 406

CNS 455  
PHYSICAL AND IT SECURITY CONVERGENCE  
Graduate  
This course introduces students to the fundamental processes associated with the Physical Security discipline. This course will present the convergence of IT Security and Corporate Physical Security, focusing on where convergence takes place - at the technology, process and function level. Students will look at real-world illustrations of implementation and analyze perceived efficiencies and cost-savings. This course is designed for students who desire to understand physical and IT security in the framework of Enterprise Risk Management.  
PREREQUISITE(S): None

CNS 466  
CRITICAL INFRASTRUCTURE AND CONTROL SYSTEMS CYBERSECURITY  
Graduate  
This course is an introduction to the cybersecurity challenges for control systems present in industry, homes and traditional businesses such as manufacturing. Topics covered include the design and setup of Supervisory Control and Data Acquisition (SCADA) systems, Distributed Control Systems (DCS), and Programmable Logic Controller (PLC) systems. As these systems are typically designed without any intrinsic security mechanism, we will study the challenges of protecting them and how to employ a defense-in-depth methodology to secure them. This class will focus on the security risks of critical infrastructure systems (such as Electrical, Pipelines, Water/Wastewater and transportation) and methods to protect them.  
PREREQUISITE(S): CNS 440 or TDC 477

CNS 477  
LEGAL ISSUES IN INFORMATION ASSURANCE  
Graduate  
This graduate course is a survey of legal issues arising under information security and control frameworks such as COBIT and ISO17799. Topics include the basics of trademark, copyright, patent and trade secrets and protection strategies for each of them; software licensing issues; data privacy under state, federal and international law; evidence and digital forensic practices; ethics; the Computer Fraud and Abuse Act's boundaries for illegal access to computers; electronic surveillance and cyber traps; information security measures mandated by select federal statutes (HIPAA, Gramm-Leach-Bliley and Sarbanes-Oxley); and practical techniques on how to find and keep abreast of legal issues affecting information security.  
PREREQUISITE(S): CNS 440 or IS 433

CNS 487  
INTRODUCTION TO GOVERNANCE, RISK, AND COMPLIANCE  
Graduate  
This course provides an introduction to IT governance, including examining the differences between governance and management, IT governance standards and frameworks, risk management practices and techniques, value in IT investments, and regulatory compliance. Issues such as strategic alignment, risk optimization and benefits realization will be explored. Students will learn how IT relates to the business and how the outcomes of good governance will benefit the organization.  
PREREQUISITE(S): None

CNS 488  
SECURITY TESTING AND ASSESSMENT  
Graduate  
Methodologies and tools for performing vulnerability testing; management of security testing initiatives and activities; review of the different types of assessments, legal issues, ethical concerns. Defensive mechanisms to mitigate the risks illustrated by the assessment using Defense-In-Depth architectures. Concepts illustrated using hands-on lab exercises.  
PREREQUISITE(S): TDC 477
CNS 489
ADVANCED CYBER ATTACK RESPONSES AND DEFENSES
Graduate
This lab-based applied security course introduces students to advanced cyber defense and cyber-attack response. Students manage an organize teams to defend against cyber-attacks and implement services in a hostile cyber environment. Most activities will be derived from Cyber Defense and Cyber League competitions and will prepare students to participate and excel in these competitions. This course is open to all students, including students inexperienced in Cyber Defense competitions. Repeat enrollment is encouraged. PREREQUISITE(S): None.

CNS 533
ENTERPRISE SECURITY INFRASTRUCTURE CONTROLS AND REGULATORY COMPLIANCE
Graduate
Design, implementation, support and management of control methods in enterprise environments. Focus is on how these controls can help organizations achieve regulatory compliance. Review of Sarbanes-Oxley and its impact on IT systems. Detailed study of how risk assessment methods, information security program management and ERP systems can be used to fulfill regulatory and legal requirements. Control Objectives for Information and related Technology (COBIT) guidelines and best practices for SOX compliance. Security management standards (ISO 17799, BS 7799 and ISO 27001). PREREQUISITE(S): CNS 440 or IS 433.

CNS 594
COMPUTER INFORMATION AND NETWORK SECURITY CAPSTONE
Graduate
Design, setup and configuration of realistic enterprise computing and networking environments. Securing the infrastructure and integration of different services and technology in efficient, secured and redundant manners. Technologies will include: open-source and commercial products, firewalls, Virtual Private Networks (VPNs), authentication systems, Intrusion Detection Systems (IDS), advanced routing mechanisms (OSPF, BGP, IS-IS), highly redundant and robust networking. PREREQUISITE(S): TDC 477 or CNS 533.

CNS 597
TOPICS IN COMPUTER INFORMATION AND NETWORK SECURITY
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor.

CNS 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None.

COM 300
ORCHESTRATION I
Undergraduate
Ranges, sonorities and characteristics of woodwind, brass, percussion and string instruments; orchestral studies of representative works through the 19th century; arrangements for orchestral ensembles. Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 301
16TH CENTURY COUNTERPOINT
Undergraduate
Species counterpoint in two and three parts; melodic, formal and "harmonic" practices in Renaissance polyphony; free composition in the style; analysis and in-class performances of Renaissance motets and mass settings as well as original student compositions. Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.
COM 302
18TH CENTURY COUNTERPOINT
Undergraduate
Contrapuntal techniques of Bach and Handel; analysis, composition, and in-class performances of solo and ensemble works in the style. Assignments include composition of inventions and fugues.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 303
20TH CENTURY COUNTERPOINT
Undergraduate
Exploration of contrapuntal techniques using 20th century vocabularies; analysis of selected compositions from the 20th-century, including works of Ives, Schonberg, Webern, Bartok, Hindemith, Ligeti and others as well as music of very recent times.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 305
ANALYTICAL STUDIES
Undergraduate
Use of various analytical techniques for detailed studies of selected compositions from the common-practice period through the present day.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 313
INTRODUCTION TO COMPOSITION
Undergraduate
Basic composition. Recommended as preparatory for intended composition majors. This course may be repeated for credit.

Status as an Undergraduate Music student is a prerequisite for this class.

COM 315
COMPOSITION
Undergraduate
Exploration of 20th and 21st century techniques through creative projects and possible analytical assignments. Projects are designed to lead to the completion of compositions for a variety of performance media, culminating in the senior composition project.

Status as a Composition student is a prerequisite for this class.

COM 320
ORCHESTRATION II
Undergraduate
A survey of orchestral practices and techniques from the last 100 years. Assignments include analysis, notation, and orchestration.

Status as an undergraduate composition major, MUS 230, and COM 300 are a prerequisite for this class.

COM 326
ELECTRO-ACOUSTIC MUSIC I
Undergraduate
Introduction to the history and literature of electro-acoustic music. Introduction to electronic tools and techniques, including MIDI sequencing, timbral manipulation, and digital sampling.

Status as an Undergraduate Music student is a prerequisite for this class.
COM 327
ELECTRO-ACOUSTIC MUSIC II
Undergraduate
Introduction to digital video and multimedia composition and delivery. Further study in the history, literature, and analysis of electro-acoustic music.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 398
INDEPENDENT STUDY
Undergraduate
An in-depth study of a composition topic under the supervision of a faculty member. (Departmental permission required).

Status as an Undergraduate Music student is a prerequisite for this class.

COM 405
GRADUATE ANALYTICAL STUDIES
Graduate
The study and practice of specific analytical techniques as related to specific works from the common practice period through the present day.

Status as a Graduate Music student is a prerequisite for this class.

COM 415
COMPOSITION
Graduate
The study of advanced compositional issues at the graduate level which will culminate in quarterly projects as well as a final composition project.

Status as a Graduate Composition student is a prerequisite for this class.

COM 416
COMPUTER ASSISTED COMPOSITION
Graduate
The purpose of this course is to offer composition majors an introduction to the use of computers in the implementation of generative and formal strategies for music composition.

Status as a Graduate Composition student is a prerequisite for this class.

COM 420
ORCHESTRATION II
Graduate
The study of significant notation, orchestration and instrumentation practices and techniques from the last 75 years. Course activities include consistent score analysis as well as demonstrations of extended instrumental techniques. Projects include orchestral transcriptions and the creation of short works for specific instrumental combinations.

Status as a Graduate Composition student is a prerequisite for this class.

COM 444
NOTATIONAL SEMINAR: NOTATION, COMPOSITION, & SOUND STRUCTURES
Graduate
A study of some of the most relevant notational issues that have emerged in western music since WWII.

Status as a Graduate Music student is a prerequisite for this class.
COM 445
TWENTIETH CENTURY MUSIC TOPICS
Graduate
A review of significant 20th century literature and techniques as partial preparation for the comprehensive exam.
Status as a Graduate Composition student is a prerequisite for this class.

COM 446
NEW MUSIC COMPOSITION SEMINAR
Graduate
Analysis of compositional and notation techniques as found in significant new works from the last twenty-thirty years for chamber ensembles or orchestral ensembles. Students will develop weekly presentations on specific works that will eventually be presented at the department's weekly meeting sessions and will also develop a minimum 10 page paper on one-two works.
Status as a Graduate Composition student is a prerequisite for this class.

COM 447
NON-WESTERN SOUND AND CONCEPT IN CONTEMPORARY MUSIC
Graduate
This class will consist of two major elements: one is a survey of the non-western influences in question and the second is the application of non-western influences to actual composition. The final goal of the class is to produce a small scale composition, which demonstrates the application of non-western music ideas.
Status as a Graduate Composition student is a prerequisite for this class.

COM 498
INDEPENDENT STUDY
Graduate
An in-depth study of a composition topic under the supervision of a faculty member. (Departmental permission required).
Status as a Graduate Music student is a prerequisite for this class.

CPL 210
GREAT IDEAS, THE INDIVIDUAL AND SOCIETY I
Undergraduate
Classical Antiquity and the Middle Ages Representative works from the Bible, ancient Greek and Roman literature, and European literature of the Middle Ages. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Homer, Sappho, Aeschylus, Sophocles, Euripides, Hippocrates, Aristophanes, Plato, Aristotle, Cicero, Lucretius, Ovid, Seneca, Plutarch, Augustine, Maimonides, Dante. Formerly ISP 210.

CPL 211
GREAT IDEAS, THE INDIVIDUAL AND SOCIETY II
Undergraduate
From Renaissance to Enlightenment Representative works of European literature from the Renaissance to the Enlightenment. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Pico della Mirandola, Machiavelli, Erasmus, Rabelais, Bacon, Las Casas, Montaigne, Shakespeare, Descartes, Hobbes, Milton, Pascal, Locke, Defoe, Voltaire, Hume, Rousseau, Kant, Sade. Formerly ISP 211.

CPL 212
GREAT IDEAS, THE INDIVIDUAL AND SOCIETY III
Undergraduate
The Modern Era Representative works of European literature from the French Revolution to the modern period. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Hegel, Kierkegaard, Marx, Melville, Flaubert, Nietzsche, Freud. Formerly ISP 212.
CPL 240  
**VOICES OF WAR AND PEACE; ART, LITERATURE AND FILM**  
*Undergraduate*

This course is an overview of the ways in which the arts, including literature and film, portray warfare and the attempts to end violence and build reconciliation and peace. Cross-listed with PAX 240.

---

CPL 301  
**EPIC AND ROMANCE**  
*Undergraduate*

Study of examples of heroic literature from a variety of cultures, including Western and non-Western civilizations.

---

CPL 302  
**COMEDY**  
*Undergraduate*

Study of important examples of dramatic comedy; selections may range from ancient times to the present day with some attention to the relevant theories of comedy (Aristotle, Freud, Bergson, Frye, etc.).

---

CPL 303  
**TRAGEDY**  
*Undergraduate*

Study of important examples of dramatic tragedy; selections may range from ancient times to the present day with some attention to the relevant theories of tragedy.

---

CPL 304  
**THE NOVEL**  
*Undergraduate*

Study of the novel, any period or subgenre (historical, picaresque, romantic, realist etc.) from any given area or country with some attention to the literary theory of the particular novels in question.

---

CPL 305  
**AUTOBIOGRAPHICAL/CONFESSIONAL LITERATURE**  
*Undergraduate*

Study of autobiographical/confessional literature; selections may range from ancient times to the present day from any given area or country with some attention to the relevant theories of these genres.

---

CPL 306  
**UTOPIAN LITERATURE**  
*Undergraduate*

Study of utopian literature; selections range from the Renaissance to the present day. Readings are discussed within the context of relevant political and social theory.

---

CPL 311  
**REVOLUTIONARY LITERATURE**  
*Undergraduate*

Study of revolutionary literature in any of its manifestations and genres in specific areas and periods.

---

CPL 312  
**THE LITERATURE OF IDENTITY**  
*Undergraduate*

Cross-cultural study of self-discovery and identity as manifested in the literatures of self-awareness and self-definition (African-American, Hispanic, gay/lesbian, etc.).
CPL 313  
FEMINIST LITERATURE  
Undergraduate  
Cross-cultural synchronic or diachronic study of feminist literature.

CPL 319  
TOPICS IN COMPARATIVE LITERATURE  
Undergraduate  
Selected topics on any theme from comparative literature.

CPL 355  
CONTEMPORARY CRITICISM  
Undergraduate  
An overview of contemporary criticism from Russian formalism to post-modernism.

CS 447  
CURRICULUM DESIGN FOR THE MIDDLE GRADES  
Graduate  
This course is designed to provide students with a comprehensive understanding of the history of and rationale for middle level education as well as the curricular and pedagogical knowledge needed to meaningfully engage middle level students in learning within and across the content areas. Important considerations and strategies for disciplinary and interdisciplinary learning in the middle school classroom, as well as the importance of reading and writing across the curriculum with regard to these, will be addressed.

CS 460  
LEARNING IN A TECHNOLOGY-SUPPORTED CLASSROOM  
Graduate  
An examination of current theories about instructional technology and of recent literature in the field. Students will become familiar with particular technology appropriate for their areas of interest and will learn to evaluate this technology for a variety of instructional purposes. The course includes: frameworks for classifying educational uses of the technology; an analysis of selected research on educational technology; theories and practices of using technology in classrooms; and the advantages and disadvantages of distance learning. Emphasis throughout will be on why and how technology can be used to enhance the learning process.

CS 461  
LITERACY PROCESSES AND PRACTICES  
Graduate  
Foundational theoretical perspectives and practices for teaching and learning language and literacy in a diverse, changing, and political world. Background of knowledge in the area of learning and exposure to the controversies that surround the teaching of literacy will be used to develop an understanding of literacy learning in action. Students will be invited to participate in the current conversations around literacy learning and teaching in order to inform their everyday curricular decisions.

CS 463  
ASSESSMENT, DIAGNOSIS, DEVELOPMENTAL/REMEDIAL MATERIALS & RESOURCES: EMERGENT & DEVELOPING READING  
Graduate  
Assessment, diagnosis and instructional planning for early and emergent learners. Building on a knowledge base of emergent reading processes and literacy practices, teachers will explore the ways in which young learners construct meaning and use language purposefully in their unique social worlds, even before beginning school. Participants in this course will learn to use performance based assessments as well as more formal standardized measures of achievement to support emerging and struggling readers with appropriate materials and theoretically sound instructional practices.

CS 461 is a prerequisite for this class.
ASSESSMENT, DIAGNOSIS, DEVELOPMENTAL/REMEDIAL MATERIALS & RESOURCES: MIDDLE SCHOOL/ADOLESCENT READING
Graduate
Assessment, diagnosis and instructional planning for middle school students. Building on a knowledge base of reading processes and literacy practices, teachers will explore the ways in which students construct meaning and use language purposefully in their unique social worlds. Participants in this course will learn to use performance based assessments as well as more formal standardized measures of achievement to support middle school and adolescent readers with appropriate materials and theoretically sound instructional practices.

CS 461 is a prerequisite for this class.

TEACHING READING IN THE CONTENT AREAS
Graduate
This course focuses on teaching reading in various subject (content) areas and emphasizes non-fiction reading process, strategies, and theories for grades K-9. The course will examine what it means to be literate in the elementary content areas (e.g. science, math, social studies, arts). Emphasis will be placed on learning effective literacy strategies for different subject areas. There will also be a focus on how one uses reading and writing to think, act, speak, question, and apply the tools of each content/subject area in ways that are unique to that discipline. Additionally, as teachers it is important to remember that students will bring various literacies from their homes and communities. An important emphasis will be on creating learning environments that honor student diversity, and learning about multiple ways of knowing, acting, and communicating.

CS 461 is a prerequisite for this class.

TEACHERS AS LEADERS
Graduate
Assists teachers in becoming leaders for positive change in schools and districts. Provides overview of major theoretical models in research on teaching and teacher leadership, historical perspectives on the teaching profession, and overview of select best practice in teacher collaboration, mentoring and coaching. Specific topics addressed may include: developing leadership among existing teaching staff; fostering professional collaboration; improving instruction school-wide; organizing colleagues, administrators, parents and students to improve achievement; fostering sustainability in teaching/fitting teacher attrition; teaching standards; team teaching; and curriculum mapping.

DIVERSITY IN THE CLASSROOM
Graduate
Examines issues related to diversity that result when students from diverse socioeconomic, cultural, linguistic, and academic backgrounds are in the same classroom. Explores the impact of inclusion, ESL, bilingual, and bicultural programs on instruction. Emphasis on developing strategies to meet individual student needs within the regular classroom.

ETHICS, CURRICULUM AND SOCIAL CHANGE
Graduate
Explores some major issues impacting curriculum, including cultural and socioeconomic factors, legal issues, conflicting values, pressures for assessment, and the push to include technology. Examines the historical development and current state of education in the U.S. as compared to education in other cultures. Emphasis on ways that educators can work as change agents within the competing demands of these forces.

ASSESSMENT
Graduate
Explores current theory and practice regarding alternate forms of assessment, including formal, standardized, and informal tests and inventories; selection, evaluation, and interpretation of tests used in educational settings; portfolio assessment, video performances, and presentations; preparation and use of teacher-made tests; evaluating outcomes; and utilizing data to improve instruction. The critical examination of multiple perspectives of assessment theories, policies and practices center around the emphasis on developing strategies to evaluate student progress.
A selective survey and analysis of research on teachers and teaching. Particular emphasis will be placed on the assumptions which are built into various forms of research and the effect these assumptions have on how results should be interpreted and used in supervision and curriculum development. Each student will be expected to become familiar with alternative ways of studying teachers and the teaching process in his/her area of expertise. While many school settings will be utilized because of the many studies done in this area, research in non-school settings will be given a good deal of emphasis.

A survey of trends and movements in curriculum practice. Particular emphasis will be placed on the recurrent nature of curriculum practices and the reasons for this. The class will consider underlying models of curriculum practice in their historical settings as possible methods for meeting contemporary social needs as well as the assets and liabilities of these models.

This course will analyze the role of multimedia materials in instruction. A variety of media will be explored (including software, internet, audio, video, and film). Students will be expected to manipulate a variety of images and produce sample materials for critique and analysis. The primary focus will be on enhancing learning in elementary and secondary schools.

Evaluation is essential for curriculum/program development and implementation. Hence, understanding evaluation methods, technologies, and quality criteria is particularly relevant to educational leaders, curriculum/program designers, and technology specialists. In this course, students will critically examine a variety of current evaluation models, instruments, and resources. Students will also conduct a comprehensive analysis of a significant evaluation study relevant to their specific professional interest. Registration is restricted to students in Advanced Master's programs.

Status as an Advanced Masters Education student is a prerequisite for this class.

An introduction to systematic and collaborative deliberation on curriculum problems. A pattern for deliberation (including situation analysis, problem discrimination and formulation, development of alternative courses of action, and anticipation of consequences) will be developed and exemplified. This pattern will be contrasted with other descriptions of curriculum planning. Each student will complete a project which describes his/her systematic formulation of a curriculum problem and a plan of action for resolving it.

Status as an Advanced Masters Education student is a prerequisite for this class.

Provides a project-based opportunity to develop curriculum that promotes student understanding, student voice, and student involvement in school or community change. Encourages educators to think carefully about what does and should constitute the curriculum and why, who and what is served and who/what is marginalized by current curriculum arrangements, and how collaboration in curriculum design can assist in organizing classrooms, schools, and communities.
CS 489  
CREATIVITY AND CRITICAL THINKING - VYGOTSKY, BAKHTIN, MAKIGUCHI, IKEDA  
Graduate  
Introduces students to the educational philosophies of Russian thinkers Lev Vygotsky (1896 - 1934) and Mikhail Bakhtin (1895 - 1975) and Japanese thinkers Tsunesaburo Makiguchi (1871 - 1944) and Daisaku Ikeda (1928 - ). Students will locate confluences in these thinkers' philosophies and apply them to current curriculum or curriculum theorizing in their chosen discipline(s) (e.g., mathematics, social studies, language education, etc.), context(s) (e.g., policy, gender, socioeconomics, identity, etc.) and K-12/adult level(s). Topics covered include, among others, cultural-historical theory, socially constructed meaning making, zone of proximal development, dialogism, carnival, value and value-creating pedagogy, humanitarian competition, and human revolution.

CS 492  
CREATING AND SUSTAINING PROFESSIONAL LEARNING COMMUNITIES  
Graduate  
This course will provide the framework for the creation, development and sustainability of a professional learning community. Professional learning communities have at their core three guiding principles: 1) a focus on learning, 2) the creation of a collaborative culture and 3) a results-orientation. Within the professional learning community, members are committed to working collaboratively in an ongoing process of collective inquiry and action research in order to achieve better results for the students and community they serve. Professional Learning Communities operate under the assumption that the key to improved learning for students is continuous, job-embedded learning for educators.

CS 493  
CURRICULUM DEVELOPMENT AND ASSESSMENT IN K-12 SCHOOLS  
Graduate  
This course prepares future school leaders with knowledge; understanding; and application of planning, assessment, and instructional leadership for roles in the K-12 school setting at the supervisory or administrative level. The emphasis of the course will be planning, implementation, and refinement of standards-based curriculum aligned with instruction, assessment, and instructional decisions as they affect the teaching and learning environment of the school with diverse cultural, ethnic, linguistic, and special needs populations.

CS 579  
RESEARCH IN TEACHING READING: DEVELOPMENTAL & REMEDIAL READING INSTRUCTION & SUPPORT: BEST PRACTICES  
Graduate  
In this course, students will explore and analyze current literacy research through the critical lenses of educational practitioners. Students will: identify meaningful questions about literacy practices in their classrooms and schools; create a plan for addressing the identified research question(s); collect and analyze data relevant to the research question(s); and organize and present the research findings. This inquiry project, or an extension of it, may subsequently become the basis for the student's Master's paper or thesis.  

CS 461 is a prerequisite for this class.

CS 580  
RESEARCH SEMINAR IN CURRICULUM STUDIES  
Graduate  
This course is designed to help graduate students in Curriculum Studies through the difficult process of planning, organizing, drafting, and revising their Master's papers. Students will be expected to complete a literature review and to develop a strong proposal for an integrative paper as a prelude to selecting an advisor for their Master's papers. For M.Ed. students only.

SCG 410, 6 additional graduate courses and status as an Advanced Masters student is a prerequisite for this class.

CS 582  
PRACTICUM IN CURRICULUM STUDIES: READING  
Graduate  
This course provides directed experiences in decision-making for curriculum, participation, and leadership in the planning and management of reading curricula. Students will: assess students' reading capabilities; make informed curricular choices to address students' needs; identify and implement short and long-term learning goals for students; manage instructional materials needed to guide students; develop curriculum based on assessments of the needs of students. It is designed to offer students an opportunity to put into practice, in a summer school classroom, previous learning about the teaching of reading, especially their beliefs and understandings regarding literacy as social practice. Provides students with multiple opportunities to share their thinking with each other in a supportive community of learners.

CS 461 is a prerequisite for this class.
CS 588
INDEPENDENT STUDY IN CURRICULUM STUDIES
Graduate
Independent Study in Curriculum Studies.

CS 589
THESIS RESEARCH IN CURRICULUM STUDIES
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

SCG 410 and CS 580 are prerequisites for this class.

CS 591
CURRICULUM THEORIZING: MULTIPLE LENSES
Graduate
This course examines diverse curriculum discourses, historical as well as contemporary, within a broader context of issues related to education and schooling. It is designed to engage students critically in the study of curricular frameworks, their assumptions, values, and implications for education, schooling, teaching and learning. Major topics include frameworks for defining and conceptualizing curriculum and curricular visions; social, political, and historical contexts of curriculum construction; issues of gender, race, class, and the media; and the curriculum as socially constructed and historically contextualized discourse(s) about what is and what should be taught. Particular content areas will be used as examples.

CS 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
(0 credit) Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

CS 606
REVIEW OF LITERATURE
Graduate
Review of Literature. This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., reviewing and synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching databases. (See the student handbook for additional information about completing Master's papers.)

CS 607
INTEGRATIVE PAPER
Graduate
Integrative Paper. Non-credit. Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of a theory, or, conversely, developing/refining a theory based on investigations made in the field. (See the student handbook for additional information about completing Master's papers.)

CS 608
CAPSTONE IN CURRICULUM STUDIES
Graduate
Students who have completed the majority of the Curriculum Studies coursework will engage in a thorough analysis of a school or other educational institution (e.g., museum, community organization) and develop an action plan for: professional development; mentoring and inducting new teachers; teacher evaluation and training; instructional coaching; curriculum development, assessment, or alignment; using assessments or other data to improve student learning; or building collaboration with teachers and stakeholders. Students will gather and analyze demographic, financial and testing data, develop a narrative to tell the story of a school's (or educational institution's) history and recent past, capture the school by way of photographs and interviews, and collect documents or other pertinent artifacts to support their action plan.
CS 625  
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)  
Graduate  
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

CS 700  
REGISTERED DOCTORAL STUDENT IN GOOD STANDING  
Graduate  
Non-credit. This registration is required of all doctoral students who are not enrolled in a doctoral course, but are completing course requirements and/or dissertation research. It provides access to University facilities. Academic advisor approval required. After the third enrollment, dissertation chair approval required.

Status as an EDD student with a declared concentration is a prerequisite for this class.

CS 704  
CURRICULUM DISCOURSES/PERSPECTIVES OVER TIME  
Graduate  
This course focuses on the examination of the ways in which curriculum as a field has developed over time: attention to changes in terms of how it has been defined, conceptualized; theoretical and philosophical issues; assumptions and values; as well as implications for teaching and learning. These topics will be addressed within different historical and social contexts. Readings will include primary texts by major theorists as well as secondary material including commentary and critique. A primary goal of the course is to provide students with an overview of major movements in curriculum history as a foundation for further study. This course will serve as a prerequisite for all other curriculum courses in the doctoral program.

Status as an EDD student with a declared concentration is a prerequisite for this class.

CS 706  
CANDIDACY PAPER  
Graduate  
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook.

Status as an EDD student with a declared concentration is a prerequisite for this class.

CS 751  
CURRICULUM FOR HUMAN AND COMMUNITY DEVELOPMENT  
Graduate  
This course provides a framework for thinking about how education can and cannot facilitate both human development (that is, healthy growth, learning, and maturation of individuals) and community development (that is, the creation or maintenance of healthy, safe, connected, literate, & politically enfranchised neighborhoods). The course explores contemporary theories and models of curriculum reform, school improvement, and youth and community development, notably: project and community based learning, asset-based development, participatory action research (PAR), full-service community schools, and university-assisted community schools. Additional topics explored may include: the kinds of schools, curricula, and teaching needed to best prepare all students for meaningful participation in an increasingly interconnected world; the explicit and implicit goals of current school reform efforts and how these (re-)shape civic and democratic goals of schools; how universities, schools, and communities can collaborate to push school improvement and community development; and the benefits and liabilities of hybrid school improvement/community development projects (e.g., the Harlem Children's Zone and Promise Neighborhoods).

Status as an EDD student with a declared concentration is a prerequisite for this class.
CURRICULUM THEORIZING: MULTIPLE LENSES
Graduate
Curriculum Theorizing: Multiple Lenses. This course examines diverse curriculum discourses, historical as well as contemporary, within a broader context of issues related to education and schooling. It is designed to engage students critically in the study of curricular frameworks, their assumptions, values, and implications for education, schooling, teaching and learning. Major topics include: frameworks for defining and conceptualizing curriculum and curricular visions; social, political, and historical contexts of curriculum construction; issues of gender, race, class ability, and the media; the curriculum as socially constructed, and historically contextualized discourse(s) about what is and what should be taught. Particular content areas will be used as examples.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ASSESSING SCHOOL CURRICULUM
Graduate
This course develops a framework for assessing the content, characteristics, and outcomes of the curriculum in a school. The framework will include the collection, organization and analysis of both quantitative and qualitative measures of effective instruction. Particular attention will be given to local, state, and national standards for content, teaching and outcomes. Attention will also be given to the qualities of the lived experiences of students in school and thus to the unintended as well as intended outcomes of schooling. Each student will be expected to begin assessing the curriculum in his or her school and to outline a proposal for a more complete assessment of the school's curriculum.

Status as a EDD student with a declared concentration is a prerequisite for this class.

YOUTH DEVELOPMENT,IDEOLOGY, CULTURE, AND SOCIETY
Graduate
This course examines the ideological significance of “youth,” youth development, and education in societies characterized by structural inequalities based on class, race, ethnicity, and sexual/gendered relations of domination and subordination. Texts from a range of academic disciplines -- psychology, sociology, cultural studies, social work -- are studied to show the influence these perspectives have had in shaping discourse about youth, youth development, and education as a vehicle for social reproduction and social change. Youth and education are looked at as the locus of arguments about social crises and social change and the impacts of framing social problems as educational and youth problems are explored.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ENGAGING IN CURRICULUM DELIBERATION
Graduate
This course engages students in systematic and collaborative deliberation on curriculum problems. A pattern for deliberation -- including situation analysis, problem discrimination and formulation, development of alternative courses of action, and anticipation of consequences -- will be developed, exemplified, and contrasted with other descriptions of curriculum development. The importance and role of alternative conceptions of learners, of situation, and of knowledge structures within disciplines will be emphasized. After engaging in stimulated deliberations, each student will be asked to examine the intellectual commitments underlying this approach to curriculum change, to reconsider his or her role as a curriculum leader in a school or other educational setting, and to develop realistic plans for engaging a particular school community in collaborative curriculum deliberation.

Status as a EDD student with a declared concentration is a prerequisite for this class.

CURRICULUM AND PROGRAM DESIGN
Graduate
This course studies principles underlying the design of effective, coherent, and comprehensive instructional programs. Topics include: the design and organization of core courses of study and related curricular components; the associated staff development program; and alignment with local, state, and national mandates. Particular attention will be given to planning for diversity, including differences in learning styles, special needs, culture and language.

Status as a EDD student with a declared concentration is a prerequisite for this class.
CS 794  
SPECIAL TOPICS IN CURRICULUM  
Graduate  
In order to assure that the program remains flexible, responsive to the needs of students, and inclusive of the areas of interest of both faculty and students, this variable topics course will provide an opportunity for critical examination of compelling topical issues related to education. Topics could include: issues in educational reform; special education; controversies in curricular discourse; current issues such as the education of homeless children; or legal and constitutional issues in education and schooling. The course will be conducted in a seminar format.

Status as a EDD student with a declared concentration is a prerequisite for this class.

CS 849  
SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT  
Graduate  
Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

CS 859  
INDEPENDENT DISSERTATION RESEARCH: CURRICULUM STUDIES  
Graduate  
Students register for this course for the quarter in which they defend their dissertations. Permission of dissertation chair required.

CSC 200  
SURVEY OF COMPUTING  
Undergraduate  
This introductory course explores various careers in the field of information technology. A hands-on component will deal with state of the art personal computer operating systems, applications, database systems, Internet, email, and basic website construction. The structure of the course utilizes both classroom lectures and computer classroom labs. This course is geared toward the non-major and assumes no prior knowledge or experience in Computer Science.

CSC 202  
DISCRETE STRUCTURES FOR COMPUTER SCIENCE  
Undergraduate  
This course introduces basic mathematical tools essential for solving problems in computer science. The mathematical topics are presented through their applications in computer science: logic and set theory in the context of relational databases, arithmetic, number theory, and algebra through cryptography; graph theory and discrete structures through puzzles and games. Optional subjects include fractals (recursion and rewriting systems), computer graphics (linear algebra), and Artificial Intelligence (first-order logic).

CSC 208  
ETHICS IN TECHNOLOGY  
Undergraduate  
Information Technology and the rapid pace in which it has advanced have had a tremendous impact on our lives. Changes have been swift and the human capacity to deal with them is limited. It has been said that our technology has outpaced our humanity. This course will research the new responsibilities technology presents and our ability to deal with these changes in an ethical manner. Students will employ ethical frameworks, which integrate computer science and ethics, to develop the skills required to examine different sets of assumptions and question them. Case studies will provide a historical perspective for analysis.

CSC 211  
PROGRAMMING IN JAVA I  
Undergraduate  
Introduction to programming in Java and problem solving. Variables, data types, input/output, using objects and methods from the standard classes (such as String and Scanner), control structures, writing methods, arrays. Solving problems with algorithms and implementing algorithms in Java. (Not for CS majors)
CSC 212
PROGRAMMING IN JAVA II
Undergraduate

CSC 223
THE IMPACT OF COMPUTING TECHNOLOGY ON OUR LIVES
Undergraduate
This course will introduce students to an overview of social analysis techniques and the theories of social change. These tools will be used to explore social impact issues of computing technology. Counts for Liberal Studies SSMW credit.

CSC 224
JAVA FOR PROGRAMMERS
Undergraduate
Object-oriented programming using Java for students that already know how to program. Students will learn how to design, code and test multi-class Java programs. Topics covered include: Variables, Operators, Arrays, Classes, Inheritance, Abstract classes, Interfaces, Inner classes, Exception Handling, File I/O, User Interfaces, and Event Handling. PREREQUISITE(S): Experience in at least one high-level programming language.

CSC 231
BASIC COMPUTATION FOR BIOLOGY
Undergraduate
This course is an introduction to the art of computational modeling of biological phenomena. It is primarily concerned with teaching basic skills needed to model a well-defined subset of our Universe. Modeling software like Matlab and spreadsheets will be the primary tools and no programming experience will be needed. (Other specialized software may be introduced and used as is economically feasible.) An important component of this course will be field trips to modern science and computational labs to ground students' knowledge in the phenomena being modeled and the art of modeling. PREREQUISITE(S): One quarter of Calculus or Graduate standing

CSC 233
CODES AND CIPHERS
Undergraduate
This course is an introduction to the science and history of secret writing (cryptography) and how codes and ciphers can be broken (cryptanalysis). In historical settings we will encounter the main ideas and methods devised to secure communication channels. Possible topics include: substitution ciphers, transposition ciphers, the Vigenere cipher, statistical methods in cryptanalysis, public-key cryptography, and quantum cryptography. PREREQUISITE: LSP 120.

CSC 235
PROBLEM SOLVING
Undergraduate
How do you solve a problem? In this course we discuss different problem solving techniques and strategies such as modeling, establishing subgoals, and searching and pruning. The techniques will be presented as part of a theoretical framework, but there will be significant emphasis on solving problems in familiar domains such as games, newspaper articles, philosophy, and simple geometry and logic. At the end of the course, students will have built a repertoire of problem solving tools that will allow them to make an informed choice of approach towards new problems.

CSC 239
PERSONAL COMPUTING
Undergraduate
Students will learn how to develop Excel workbooks for computing elementary statistics and compute simple statistical inference (confidence intervals, hypothesis testing and linear regression models) using the data analysis toolkit. A variety of statistical, mathematical, logical, and text functions in Excel as well as the Excel Chart and Data features will be presented. Further, students will gain an introduction to web publishing, as the world wide web currently offers fast access to a huge audience for the presentation of research results. PREREQUISITE(S): Students are assumed to be familiar with Windows. MAT 130 or equivalent
CSC 241
INTRODUCTION TO COMPUTER SCIENCE I
Undergraduate
An introduction to problem solving, algorithms and structured programming using a higher-level programming language. The course will focus on skills for developing algorithms, and for writing and debugging programs. Students will learn how and when to use loops, conditionals, and functional abstractions in the context of problems motivated by real world applications. PREREQUISITE(S): MAT 130 or Mathematics Diagnostic Test placement into MAT 140.

CSC 242
INTRODUCTION TO COMPUTER SCIENCE II
Undergraduate
An intermediate course in problem solving, algorithms and programming. Programming skills are further strengthened through more complex and larger programming assignments. The assignments will also be used to introduce different Computer Science areas (e.g. a Client/Server application for the Distributed Systems area). Classes and object oriented programming are motivated and introduced. PREREQUISITE(S): CSC241

CSC 243
PYTHON FOR PROGRAMMERS
Undergraduate
An accelerated course covering the essentials of programming, with a focus on problem-solving, structured programming, and algorithm design. The concepts covered include collection types, conditional and iterative structures, functions, file input/output, exceptions, namespaces, recursion, and Internet client programming. PREREQUISITE(S): MAT 130 or equivalent

CSC 250
COMPUTERS AND HUMAN INTELLIGENCE
Undergraduate
Students taking this course will study human problem-solving and its simulation by computers. Artificial intelligence, pattern recognition and learning programs will be discussed. PREREQUISITE(S): Familiarity with basic computer productivity tools and the Web.

CSC 261
PROGRAMMING IN C++ I
Undergraduate
This is an introductory course in computer programming covering basic data types, variables, flow of control, functions, and parameter passing, pointers and pass by reference, arrays, c strings and the C string library, basic input/output and structures. Examples in this course will concentrate on basic procedural algorithms for manipulating data.

CSC 262
PROGRAMMING IN C++ II
Undergraduate
This is an intermediate programming course in C++, intended as a follow-up course to CSC 261. Topics include object-oriented programming, user-defined classes and objects, constructors, C++ memory management including pointers and dynamic allocation, copy constructors, destructors, and operator overloading. The course will also cover inheritance and polymorphism. Optional topics, as time allows, will include templates and the C++ Standard Template Library. PREREQUISITE(S): CSC 261

CSC 270
FROM FIREFLIES TO FACEBOOK: THE SCIENCE OF NETWORKS
Undergraduate
This course explores complex systems both natural and man-made, characterized by the relationships between interacting entities. Network structures can be found in the Internet and its many applications, but also in social relationships, marketplaces, ecosystems, even cells. We will examine a wide range of networks including technological, social, and natural. Students will learn basic concepts from graph theory, algorithms and network analysis, apply tools for extracting, analyzing and visualizing network properties, using data sets drawn from a variety of areas. PREREQUISITE(S): LSP 120
CSC 298  
**INTERNSHIP**  
Undergraduate  
In cooperation with local employers, this course offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Admission to the program requires consent of internship course instructor. Current work experience plus classroom time is required. Supervisor evaluation will contribute to the final grade. This course satisfies the junior year experiential learning requirement.

CSC 299  
**SOPHOMORE LAB IN APPLIED COMPUTING**  
Undergraduate  
In this course, students investigate a particular application of computing. Students learn tools, methodologies, and formalisms used in a particular computing area, and apply them to develop working systems. Courses stress student initiative in investigating the application context, learning new tools (including languages and APIs), studying algorithms and code examples, and working on projects. Topics will vary by the faculty member's interest and perspective. PREREQUISITE(S): CSC 242 or CSC 243

CSC 300  
**DATA STRUCTURES IN JAVA I**  
Undergraduate  
This is the first course in a two-course sequence on data structures using Java. The course introduces basic Java programming, reviews recursion, introduces asymptotic notations, and focuses mainly on linear data structures including arrays, linked lists and their variants, stacks and queues, and data structures supporting disjoint-set operations. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. The applications covered highlight and exploit the unique characteristics of the data structures, and emphasize problem solving and recursive thinking. Prerequisite(s): CSC 242 or CSC 243

CSC 301  
**DATA STRUCTURES IN JAVA II**  
Undergraduate  
This is the second course in a two-course sequence on data structures using Java. The course focuses mainly on the following data structures, their analysis, and their applications: trees (search trees, balanced search trees), heaps, associative arrays, hash tables, and data structures for representing graphs. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. The applications discussed highlight and exploit the unique characteristics of the different data structures, and emphasize problem solving and recursive thinking. Prerequisite(s): CSC 300

CSC 308  
**FRAMEWORKS FOR WEB APPLICATION DEVELOPMENT**  
Undergraduate  
This course introduces concepts, techniques, technologies and APIs for web application development. The main focus of the course is on the Model-View-Controller design pattern employed by modern full-stack web frameworks. Concepts and techniques covered include client/server programming, database abstraction APIs, and asynchronous JavaScript. Examples of full-stack MVC frameworks include Ruby-on-Rails (written in Ruby), Django and TurboGears (written in Python). PREREQUISITE(S): CSC 374

CSC 309  
**C++ FOR PROGRAMMERS**  
Undergraduate  
This course covers the essentials of C and C++ programming, focusing primarily on the topics of memory management and object-oriented programming. Topics include pointers and dynamic allocation, operator overloading, copy constructors and destructors, inheritance and polymorphism. PREREQUISITE(S): CSC 242 or CSC 243 or CSC 224 or proficiency in another programming language.

CSC 321  
**DESIGN AND ANALYSIS OF ALGORITHMS**  
Undergraduate  
Techniques for designing algorithms including: analyzing algorithms (big-O, recurrence relations) and divide-and-conquer (quicksort, mergesort). Additional topics chosen from: the greedy method, dynamic programming, backtracking, branch-and-bound and string matching. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and MAT140. MAT141 Recommended.
**CSC 324**
**DATA ANALYSIS & STATISTICAL SOFTWARE II**
**Undergraduate**
Continuation of IT223. Multiple regression and correlation, residual analysis, analysis of variance, and robustness. PREREQUISITE(S): IT 223 or MAT 351.

**CSC 325**
**TIME SERIES ANALYSIS AND FORECASTING**
**Undergraduate**
The course introduces students to statistical models for time series analysis and forecasting. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, volatility models (GARCH-type, GARCH-M type, etc.), forecasting evaluation and diagnostics checking. The course will emphasize applications to financial data, volatility modeling and risk management. Real examples will be used throughout the course. PREREQUISITE(S): (CSC 212 or CSC 224 or CSC 262 or CSC 390) and (CSC324 or MAT356) or consent of instructor.

**CSC 327**
**PROBLEM SOLVING FOR CONTESTS**
**Undergraduate**
This course prepares students to compete in programming contests. More broadly, it covers problem solving techniques in an informal, fun, and hands-on setting. This course will improve your analytical and programming skills and is thus recommended for all students and not just the competitors among us. This course can be taken for credit twice. PREREQUISITE(S): CSC 301 or CSC 383

**CSC 328**
**DATA ANALYSIS FOR EXPERIMENTERS**
**Undergraduate**
The use of statistical software in conducting an analysis of variance in a variety of settings and the interpretation of generated results. Analysis of variance for completely randomized, randomized block, and Latin square designs; for factorial experiments; for incomplete block designs; with missing data; for fixed-effects, random-effects, and mixed-effects models; and for experiments with repeated measures. The analysis of covariance. PREREQUISITE(S): CSC324 or MAT 353.

**CSC 331**
**SCIENTIFIC COMPUTING**
**Undergraduate**
This course presents fundamental numerical algorithms for solving problems in scientific computing and computational finance. Areas covered include: error analysis, computer arithmetic, linear algebra, optimization problems, numerical integration (solvers), ordinary differential equations (ODE). The emphasis of the course is on the design of the algorithms, and their analysis. Algorithms will be implemented using mathematical software. PREREQUISITE(S): (CSC 212 or CSC 262 or CSC 224 or CSC 300) , and 2 course calculus sequence or instructor's permission.

**CSC 333**
**CRYPTOLOGY**
**Undergraduate**
Introduction to the methods of cryptography and cryptanalysis. Topics include classical cryptography (codes, substitution ciphers, transposition ciphers), block and stream ciphers (Feistel networks, DES), and public key cryptography (RSA, Key agreement, signature schemes). Optional topics include zero-knowledge protocols, quantum cryptography, and history. PREREQUISITE(S): (CSC 211 or CSC 241 or CSC 243) and MAT 140

**CSC 334**
**ADVANCED DATA ANALYSIS**
**Undergraduate**
The course will teach advanced statistical techniques to discover information from large sets of data. The course topics include visualization techniques to summarize and display high dimensional data, dimensional reduction techniques such as principal component analysis and factor analysis, clustering techniques for discovering patterns from large datasets, and classification techniques for decision making. The methods will be implemented using standard computer packages. PREREQUISITE(S): CSC 324 or consent of instructor.
CSC 343
INTRODUCTION TO OPERATING SYSTEMS
Undergraduate
An advanced course on operating system design and implementation. Process management and scheduling, memory management, file systems, device drivers, access control, and virtualization will be covered. The emphasis of the course will be on implementing components of a functional operating system. PREREQUISITE(S): CSC373 and CSC374

CSC 344
AUTOMATA THEORY AND FORMAL GRAMMARS
Undergraduate
An introduction to the most important abstract models of computation and their applications: finite state machines and pushdown automata. Explores the relationship between regular expressions and formal grammars and automata. PREREQUISITE(S): (CSC 301 or CSC 383) and MAT 141

CSC 347
CONCEPTS OF PROGRAMMING LANGUAGES
Undergraduate
Syntax of programming languages: regular expressions, finite automata, context-free grammars, parsing. Scoping, binding, parameter passing, exception handling. Declarative programming languages. Typing, polymorphism. Runtime systems: dynamic loading, byte-code verification, security managers, garbage collection, versioning. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 373

CSC 348
INTRODUCTION TO COMPILER DESIGN
Undergraduate
An overview of the design of a compiler for a general purpose programming language; tools for designing the components of the compiler; implementing the compiler; run time environments. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 373

CSC 352
DATABASE PROGRAMMING
Undergraduate
Programming in a large-scale relational database environment using procedural languages. Topics covered in the course include: procedural extension of query languages, runtime error handling, subprograms (procedures and functions), packages, database triggers, dynamic query language. Optional topics include transaction management, reliability, and security. PREREQUISITE(S): IT240 and (CSC 212 or CSC 242 or CSC 243 or CSC 262 or CSC 224 or CSC 300 or CSC 309).

CSC 353
ADVANCED DATABASE CONCEPTS
Undergraduate
An introduction to advanced selected topics in databases. Possible topics include: object-oriented databases, distributed databases, intelligent and deductive databases, temporal databases, multimedia databases, spatial and geographic databases, fuzzy databases, mobile databases, data mining and data warehousing, as well as emerging issues and concepts in database design, implementation and management. PREREQUISITE(S): IT 240.

CSC 355
DATABASE SYSTEMS
Undergraduate
An introduction to modern database systems; the course covers the traditional concepts and techniques of database systems including the relational model, SQL, indexes and normalization as well as a selection of advanced topics such as constraints and triggers, transactions, database programming, semi-structured data, and recursive SQL. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

CSC 357
EXPERT SYSTEMS
Undergraduate
A study of the development of expert systems. Students will use commercial packages to develop standalone and embedded expert systems. Topics will include rule-based systems, decision trees, forward and backward chaining, inference, reasoning with uncertainty, and intelligent agents. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393.
CSC 358
SYMBOLIC PROGRAMMING
Undergraduate
Concepts of symbolic programming as embodied in the language LISP. Basic data and control structures of LISP: symbolic expressions, the interpreter, functions, recursion, iteration. Techniques for prototyping and building conceptually advanced systems in an environment that encourages procedural and data abstraction. Advanced topics may include Prolog, intelligent tutoring systems, intelligent agents, and natural language processing. Assignments will focus on basic AI techniques, but the class is intended for anyone who will need to rapidly develop large complex systems. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393.

CSC 360
USER INTERFACE ARCHITECTURE AND DEVELOPMENT
Undergraduate
Fundamentals of design and implementation for graphical user interfaces (GUIs). Students design a GUI-based application following the user-centered design process and implement it using the Model-View-Controller architecture. Topics include usability engineering, event dispatching, multi-threaded programming, GUI widget toolkits, frameworks and customization. PREREQUISITE(S): SE 350

CSC 361
OPTIMIZED C++ (Formerly GAM 371)
Undergraduate
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374

CSC 362
C++ MULTITHREADING
Undergraduate
Applied C++ concurrency and multithreading fundamentals. Basic threading concepts: process model, threads, stacks, fibers, mutexes, semaphores, atomic, and events. Understanding synchronous/ asynchronous interactions and behavior of threads. Using managed thread pools and queues in applications. Understanding advanced C++ language features relating to the memory model and the threading support. PREREQUISITE(S): GAM 371 or CSC 361

CSC 367
INTRODUCTION TO DATA MINING
Undergraduate
The course is an introduction to the Data Mining (DM) stages and its methodologies. The course provides students with an overview of the relationship between data warehousing and DM, and also covers the differences between database query tools and DM. Possible DM methodologies to be covered in the course include: multiple linear regression, clustering, k-nearest neighbor, decision trees, and multidimensional scaling. These methodologies will be augmented with real world examples from different domains such as marketing, e-commerce, and information systems. If time permits, additional topics may include privacy and security issues in data mining. The emphasis of this course is on methodologies and applications, not on their mathematical foundations. PREREQUISITE(S): IT 223

CSC 371
MOBILE APPLICATION DEVELOPMENT FOR IOS
Undergraduate
This course introduces the core issues associated with application development for mobile devices using the iOS platform. Students will learn the Objective-C language, the XCode, IDE, UIKit and other frameworks, the elements and architecture of the user interfaces, and more. Students will be exposed to the iOS system architecture including memory management, MVC, delegates and threads. Topics will also include understanding and handling of multi-touch events, gestures, and motion events. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374

CSC 372
MOBILE APPLICATION DEVELOPMENT FOR ANDROID
Undergraduate
This course introduces the core issues associated with application development for mobile devices using the Android platform. Students will learn the Eclipse IDE, frameworks, the elements and architecture of user interfaces, graphics, and more. Students will be exposed to the Android system architecture, including Views, Widgets, Resources, Adapters, Intents and Activities. Topics will also include understanding and handling of threads, multi-touch events, gestures, and motion events. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374
CSC 373
COMPUTER SYSTEMS I
Undergraduate
A course on computer systems topics, focusing on machine-level programming and architecture and their relevance for application programming. Information representations, assembly language, C programming, and debuggers, processor architecture. PREREQUISITE: (CSC 383 or CSC 393 or CSC 300) and Math 140

CSC 374
COMPUTER SYSTEMS II
Undergraduate
A course on computer systems topics, focusing on operating systems components and their relevance for application programming. Caching, memory hierarchy, performance optimization, linking, processes, virtual memory, dynamic memory allocation, system level I/O. PREREQUISITE: CSC 373

CSC 375
INTRODUCTION TO ROBOTICS
Undergraduate
An introduction to the field of Robotics. Topics include history of robotics, kinematics, control theory, and sensor theory. A large portion of class time will be lab based, building and programming robots using the Lego Mindstorms NXT Robotics Kit. The programming will be using a C derivative and knowledge of C and general systems concepts is required. PREREQUISITE(S): CSC 373 and CSC 374

CSC 376
DISTRIBUTED SYSTEMS
Undergraduate
An introduction to distributed systems. Topics may include: architecture of distributed systems; networking; datagram-oriented and stream-oriented protocols; network programming (for example, the sockets API); remote procedure call and remote method invocation; processes and threads; code migration; software agents; naming of non-mobile and mobile entities; cryptography and security. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.

CSC 378
SOFTWARE PROJECTS FOR COMMUNITY CLIENTS
Undergraduate
This is the first course in a two-quarter sequence (winter/spring) for CTI students that satisfies both the Senior Year Capstone requirement and the Junior Year Experiential Learning requirement. The second quarter will be a special section of CSC 399. You will earn four quarter hours of credit for each quarter for a total of eight quarter hours of credit. You must complete both quarters to receive any credit. We work with a community service organization, chosen with help of the Steans Center for Community-based Service Learning. As a community-based service learning course, students will have the opportunity to assess urban community needs in technology, and use problem-solving methods and strategies to make a substantial difference in an inner-city community group, usually by developing an application or a web site.

CSC 379
TECHNOLOGY PARTNERSHIPS IN URBAN SCHOOLS
Undergraduate
Students in this course will have the opportunity to assess urban community needs in the technology arena and develop skills in assisting and developing methods for “bridging the digital divide” that exists. As a result, the student will be able to make a substantial difference in an underprivileged academic community group. This course is a CDM-sponsored community-based service learning course. Any student enrolled in this course can also satisfy the junior year experiential learning requirement.

CSC 380
FOUNDATIONS OF ARTIFICIAL INTELLIGENCE
Undergraduate
An in-depth survey of important concepts, problems, and techniques in artificial intelligence, including search, knowledge representation, logical reasoning, and reasoning with uncertainty. A particular focus and a unifying theme of the course will be the concept of intelligent agents. No prior knowledge of AI is required. The course is particularly suitable for graduate and advanced undergraduate students who want to gain the technical background necessary to build intelligent systems, or who want to prepare for more advanced work in AI. The concepts and techniques learned in this course will be directly applicable to many other areas of computer science including software design, distributed systems, databases, and information management and retrieval. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393.
CSC 381
INTRODUCTION TO DIGITAL IMAGE PROCESSING
Undergraduate
Components of an image processing system and its applications, elements of visual perception, sampling and quantization, image enhancement by histogram equalization, color spaces and transformations, introduction to segmentation (edge detection algorithms), and morphological image processing. PREREQUISITE(S): Calculus or Linear Algebra

CSC 382
APPLIED IMAGE ANALYSIS
Undergraduate
Fundamentals of computational image analysis will be explored in terms of its two most important components, image information extraction and modeling of image patterns. These components will be studied in the context of image representation, segmentation, classification, retrieval and recognition. The course will be useful for students interested in image analysis related to areas such as image databases, multimedia management, animation, GIS, computer graphics, medical imaging, remote sensing and robotics. Specific topics include, but are not limited to segmentation, multi-scale representation, shape analysis, texture analysis, Fourier analysis, wavelets, Gabor and fractal analysis, template matching, and object recognition. PREREQUISITE(S): CSC 381

CSC 383
DATA STRUCTURES AND ALGORITHMS IN JAVA
Undergraduate
Design, implementation, application, and analysis of algorithms on a variety of data structures, including stacks, queues, lists, trees, binary heaps, hash tables, and graphs. Algorithmic analysis includes computation of running times and asymptotic analysis. PREREQUISITE(S): CSC 212 or CSC 224 or CSC 300

CSC 387
OPERATIONS RESEARCH I: LINEAR PROGRAMMING
Undergraduate
The Linear Programming problem and its dual; the simplex method; transportation and warehouse problems; computer algorithms and applications to various fields. PREREQUISITE(S): MAT 220 and any introductory programming course.

CSC 389
THEORY OF COMPUTATION
Undergraduate
Advanced topics in the mathematical foundations of computation. Topics may include random access and Turing machines, recursive functions, algorithms, computability and computational complexity, intractable problems, NP-complete problems. PREREQUISITE(S): CS321 or CS344.

CSC 393
DATA STRUCTURES IN C++
Undergraduate
This course covers the design, implementation, application and analysis of algorithms on a variety of data structures, including lists, stacks, queues, trees, heaps, hash tables and graphs. Implementation is done in C++, in particular with the use of templates and the C++ standard template library (STL). PREREQUISITE(S): CSC 262 or CSC 309

CSC 394
SOFTWARE PROJECTS
Undergraduate
Students will be provided with experience in team design, implementation and testing of a large software project. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393 or IM 360

CSC 395
RESEARCH COLLOQUIUM
Undergraduate
The research colloquium series features informal talks by a variety of speakers including DePaul faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly works that encompass the disciplines and areas of interest of the School of Computing. The talks are free and open to all who are interested, though only students who register can obtain academic credit. Every quarter, a different set of speakers will be invited. PREREQUISITE(S): WRD 204 and (CSC 321 or CSC 376 or CSC 355)
CSC 397
TOPICS IN COMPUTER SCIENCE
Undergraduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit.
PREREQUISITE(S): Consult the instructor

CSC 398
INTERNSHIP
Undergraduate
In cooperation with local employers the computer science program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Academic credit is variable and admission to the program requires consent of internship advisor. Supervisor evaluation will contribute to the final grade.

CSC 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit.
PREREQUISITE(S): None.

CSC 400
DISCRETE STRUCTURES FOR COMPUTER SCIENCE
Graduate
This course covers the basic mathematical tools essential for solving problems in computer science. The mathematical topics are presented with emphasis on their applications in computer science. The topics covered include: logic and set theory, relations, functions, graphs, and counting and probability.

CSC 401
INTRODUCTION TO PROGRAMMING
Graduate
An introduction to programming with a focus on problem solving, structured programming, and algorithm design with a gentle introduction to efficiency. Concepts covered include data types, expressions, variables, assignments, conditional and iterative structures, functions, file input/output, exceptions, namespaces, and recursion. PREREQUISITE(S): None

CSC 402
DATA STRUCTURES I
Graduate
A first course on data structures in Java for graduate students. The course introduces Java programming from within the context of data structures. The course covers arrays, linked lists, stacks and queues, data structures supporting disjoint-set operations, and discusses recursion and performance analysis. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. PREREQUISITE(S): CSC 401

CSC 403
DATA STRUCTURES II
Graduate
This is the second course on data structures in Java for graduate students. The course covers trees, heaps, associative arrays, hash tables, tries, and data structures for representing graphs. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. PREREQUISITE(S): CSC 402

CSC 404
ACCELERATED C++
Graduate
This introductory graduate course covers the essentials of C++ programming. Topics include encapsulation, inheritance, polymorphism, dynamic memory allocation, casting, pointer arithmetic, operator overloading, templates, and the Standard Template Libraries. PREREQUISITE(S): None
CSC 406
SYSTEMS I
Graduate
An introductory graduate course on computer systems topics, focusing on machine-level programming and architecture and their relevance for application programming. Information representations, assembly language and debuggers, processor architecture, program optimization, memory hierarchy and caching. Students are recommended to finish CSC 400 before enrolling in this course. PREREQUISITE(S): CSC 401

CSC 407
SYSTEMS II
Graduate
An introductory graduate course on computer systems topics, focusing on operating systems components and their relevance for application programming. Linking, processes, virtual memory, dynamic memory allocation, system level I/O, networking and network programming, concurrent servers and web services. PREREQUISITE(S): CSC 406 and CSC 402

CSC 412
TOOLS AND TECHNIQUES FOR COMPUTATIONAL ANALYSIS
Graduate
Use of mathematical software to explore basic concepts in linear algebra and calculus. Scripting for symbolic and computational processing. Emphasis is on applications in computer science, finance, data mining, and computer vision. PREREQUISITE(S): None

CSC 421
APPLIED ALGORITHMS AND STRUCTURES
Graduate
This course covers techniques for designing and analyzing algorithms and structures in the context of computer application development. Examples will come from Internet, WWW, database, and computer system applications. Fundamental topics such as running-time analysis, searching and sorting within various structures, divide-and-conquer and dynamic programming will be covered. PREREQUISITE(S): CSC 400 and CSC 403

CSC 423
DATA ANALYSIS AND REGRESSION
Graduate
Multiple regression and correlation, residual analysis, analysis of variance, and robustness. These topics will be studied from a data analytic perspective, supported by an investigation of available statistical software. PREREQUISITE(S): IT 403

CSC 424
ADVANCED DATA ANALYSIS
Graduate
The course will teach advanced statistical techniques to discover information from large sets of data. The course topics include visualization techniques to summarize and display high dimensional data, dimensional reduction techniques such as principal component analysis and factor analysis, clustering techniques for discovering patterns from large datasets, and classification techniques for decision making. The methods will be implemented using standard computer packages. PREREQUISITE(S): CSC 423 or consent of instructor.

CSC 425
TIME SERIES ANALYSIS AND FORECASTING
Graduate
The course introduces students to statistical models for time series analysis and forecasting. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, volatility models (GARCH-type, GARCH-M type, etc.), forecasting evaluation and diagnostics checking. The course will emphasize applications to financial data, volatility modeling and risk management. Real examples will be used throughout the course. PREREQUISITE(S): CSC 423 or MAT 456 or consent of instructor.

CSC 426
VALUES AND COMPUTER TECHNOLOGY
Graduate
The impact of computerized technologies on society with particular attention paid to the ethical issues raised by these social effects. The course will require of all Ph.D. students research leading to a paper of publishable quality. Techniques for this type of research and writing will be discussed. An oral presentation of the research of that paper will also be required. PREREQUISITE(S): PhD status or consent of instructor.
CSC 428
DATA ANALYSIS FOR EXPERIMENTERS
Graduate
The analysis of experiments in the computing science with special emphasis on the use of statistical software and interpretation of generated output. PREREQUISITE(S): CSC 423.

CSC 431
SCIENTIFIC COMPUTING
Graduate
This course presents fundamental numerical algorithms for solving problems in scientific computing and computational finance. Areas covered include: error analysis, computer arithmetic, linear algebra, optimization problems, numerical integration (solvers), ordinary differential equations (ODE). The emphasis of the course is on the design of the algorithms, and their analysis. Algorithms will be implemented using mathematical software. PREREQUISITE(S): CSC 402 and 2 course calculus sequence or consent of instructor.

CSC 433
SCRIPTING FOR DATA ANALYSIS
Graduate
Data access and transformation with modern statistical software such as SAS and R. Report writing, data graphing and visualization, writing macros and functions to automate tasks and statistical analyses. PREREQUISITE(S): IT 403 and (CSC 401 or IT 411)

CSC 435
DISTRIBUTED SYSTEMS I
Graduate
An introduction to distributed systems. Topics may include: architecture of distributed systems; networking; datagram-oriented and stream-oriented protocols; network programming (for example, the sockets API); remote procedure call and remote method invocation; processes and threads; code migration; software agents; naming of non-mobile and mobile entities; cryptography and security. PREREQUISITE(S): CSC 403 and CSC 407

CSC 436
WEB APPLICATIONS
Graduate
This course covers the design and development of modern web applications and their interaction with web services. The primary focus is on client-side web applications using AJAX-techniques to access web services. Topics include: JavaScript; programming and security models for browsers; client-side web applications with local storage; offline clients; data synchronization; designing for mobile devices; HTTP, proxies, and caching; RESTful web services. PREREQUISITE(S): CSC 435 and SE 450

CSC 438
FRAMEWORK FOR WEB APPLICATION DEVELOPMENT
Graduate
This course introduces concepts, techniques, technologies and APIs for web application development. The main focus of the course is on the Model-View-Controller design pattern employed by modern full-stack web frameworks. Concepts and techniques covered include client/server programming, database abstraction APIs, and asynchronous javascript. Examples of full-stack MVC frameworks include Ruby-on-Rails (written in Ruby), Django and TurboGears (written in Python). PREREQUISITE: CSC 407

CSC 439
COMPUTER SECURITY
Graduate
This course covers core principles of computer security. Topics include: user authentication; access control (discretionary, mandatory, role-based); security auditing; database security; software security, common vulnerabilities, and secure coding practices; malicious software; and operating system security. Prerequisite(s): CSC 407

CSC 440
CRYPTOLOGY
Graduate
Introduction to the methods of cryptography and cryptanalysis. Topics include classical cryptography (codes, monoalphabetic and polyalphabetic substitution ciphers, transposition ciphers), modern block ciphers (such as DES, AES), and public key cryptography (such as RSA). Optional topics include zero-knowledge protocols, information theory, coding theory, error-correcting codes, steganography, stream ciphers, hashing algorithms, quantum cryptography, elliptic curve cryptography, and history. PREREQUISITE(S): CSC 403
CSC 443
INTRODUCTION TO OPERATING SYSTEMS
Graduate
An advanced course on operating system design and implementation. Process management and scheduling, memory management, file systems, device drivers, access control, and virtualization will be covered. The emphasis of the course will be on implementing components of a functional operating system. PREREQUISITE: CSC 407

CSC 444
AUTOMATA THEORY AND FORMAL GRAMMARS
Graduate
An introduction to the most important abstract models of computation and their applications: finite state machines and pushdown automata. Explores the relationship between regular expressions and formal expressions and automata. PREREQUISITE(S): CSC 400 and CSC 403

CSC 447
CONCEPTS OF PROGRAMMING LANGUAGES
Graduate
Programming paradigms and language concepts: functional programming; comparison of object-oriented languages; type systems for functional and object-oriented languages; runtime systems for functional and object-oriented languages. A variety of programming languages will be used to illustrate concepts, e.g., JavaScript, Ruby, Scala, Scheme. PREREQUISITE(S): CSC 403 and CSC 406

CSC 448
COMPILER DESIGN
Graduate
Design and structure of high level languages. Lexical scan, top down and bottom up syntactic analysis. Syntax directed translation and LR(k) grammars. PREREQUISITE(S): CSC 447

CSC 451
DATABASE DESIGN
Graduate
Requirement analysis, conceptual design, logical design and implementation of relational databases. Emphasis will be on E-R modeling and E-R mapping, along with basic normalization and SQL for database implementation. PREREQUISITE(S): None

CSC 452
DATABASE PROGRAMMING
Graduate
Programming in a large-scale relational database environment using procedural languages. Topics covered in the course include: procedural extension of query languages, runtime error handling, subprograms (procedures and functions), packages, database triggers, dynamic query language. Optional topics include transaction management, reliability, and security. PREREQUISITE(S): (CSC 453 or CSC 451 or CSC 455) and (CSC 401 or IT 411)

CSC 453
DATABASE TECHNOLOGIES
Graduate
A core graduate course in database design and implementation. Topics include database implementation and queries in SQL, logical design or relational databases, storage and indexes, database programming, and emerging database models. PREREQUISITE(S): CSC 403

CSC 454
DATABASE ADMINISTRATION AND MANAGEMENT
Graduate
This course is designed to give students a comprehensive foundation in database administration and management. The course provides a conceptual understanding of the database architecture and how its components work and interact with one another. Topics covered in this course include: database architecture, capacity planning, installation and maintenance, network configuration, security management, utilities and tools, industry standards and guidelines, database management techniques and practices. PREREQUISITE(S): CSC 451 or CSC 453 or CSC 455
CSC 455
DATABASE PROCESSING FOR LARGE-SCALE ANALYTICS
Graduate
The course covers core concepts of database systems with focus on applications in large-scale analytics. Topics include relational databases, scheme normalization, SQL queries for data integration and data cleaning, database programming for ETL, and nontraditional database systems for unstructured data. PREREQUISITE(S): CSC 401

CSC 457
EXPERT SYSTEMS
Graduate
A study of the development of expert systems. Students will use commercial packages to develop standalone and embedded expert systems. Topics will include rule-based systems, decision trees, forward and backward chaining, inference, reasoning with uncertainty, and intelligent agents. PREREQUISITE(S): CSC 403

CSC 458
SYMBOLIC PROGRAMMING
Graduate
Concepts of symbolic programming as embodied in the language LISP. Basic data and control structures of LISP: symbolic expressions, the interpreter, functions, recursion, iteration. Techniques for prototyping and building conceptually advanced systems in an environment that encourages procedural and data abstraction. Advanced topics may include Prolog, intelligent tutoring systems, intelligent agents, and natural language processing. Assignments will focus on basic AI techniques, but the class is intended for anyone who will need to rapidly develop large complex systems. PREREQUISITE(S): CSC 403

CSC 461
OPTIMIZED C++
Graduate
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): CSC 400 and CSC 403 and CSC 407

CSC 462
C++ MULTITHREADING
Graduate
Software architecture of applied C++ concurrency and multithreading fundamentals. Basic threading concepts: process model, threads, stacks, fibers, mutexes, semaphores, atomics and events. Leveraging advanced C++ language features relating to the memory model and the threading support in large multithreaded architectures. Architecting lock-based and lock-free concurrent data structures in applications. Designing a threaded management system to control the access and reuse of threads in applications. Designing multithreaded architecture for real-time performance. PREREQUISITE(S): GAM 471 or CSC 461

CSC 465
DATA VISUALIZATION
Graduate
An in-depth introduction to a wide range of visualization techniques focusing on medical and scientific and engineering applications. Introduction to programming using a visualization package, use of color for feature extraction and enhancement, false color mapping techniques, reconstruction techniques, isosurface generation, stream lines and ribbons, spatial set operations, volumetric techniques and projections of higher-dimensional datasets. PREREQUISITE(S): IT 403 and (CSC 401 or IT 411)

CSC 471
MOBILE APPLICATION DEVELOPMENT FOR IOS
Graduate
This course introduces the cores issues associated with application development for mobile devices using the IOS platform. Students will learn the Objective-C language, the XCode IDE, UIKit and other frameworks, the elements and architecture of the user interfaces, and more. Students will be exposed to the iOS system architecture including memory management, MVC, delegates and threads. Topics will also include understanding and handling of multi-touch events, gestures, and motion events. PREREQUISITE(S): CSC 403 and CSC 407
CSC 472
MOBILE APPLICATION DEVELOPMENT FOR ANDROID
Graduate
This course introduces the core issues associated with application development for mobile devices using the Android platform. Students will learn the Eclipse IDE, frameworks, the elements and architecture of user interfaces, graphics, and more. Students will be exposed to the Android system architecture, including Views, Widgets, Resources, Adapters, Intents and Activities. Topics will also include understanding and handling of threads, multi-touch events, gestures, and motion events. PREREQUISITE(S): CSC 403 and CSC 407

CSC 475
INTRODUCTION TO ROBOTICS
Graduate
An introduction to the field of Robotics. Topics include history of robotics, kinematics, control theory, and sensor theory. A large portion of class time will be lab based, building and programming robots using the Lego Mindstorms NXT Robotics Kit. The programming will be using a C derivative and knowledge of C and general systems concepts is required. PREREQUISITES: CSC 407

CSC 478
PROGRAMMING DATA MINING APPLICATIONS
Graduate
The course will focus on the implementations of various data mining and machine learning techniques using a high-level programming language. Students will have hands on experience developing both supervised and unsupervised machine learning algorithms and will learn how to employ these techniques in the context of popular applications including automatic personalization, recommender systems, searching and ranking, text mining, group and community discovery, and social media analytics. PREREQUISITE(S): IT 403 and CSC 401

CSC 480
ARTIFICIAL INTELLIGENCE I
Graduate
An in-depth survey of important concepts, problems, and techniques in artificial intelligence, including search, knowledge representation, logical reasoning, and reasoning with uncertainty. A particular focus and a unifying theme of the course will be the concept of intelligent agents. No prior knowledge of AI is required. The course is particularly suitable for graduate and advanced undergraduate students who want to gain the technical background necessary to build intelligent systems, or who want to prepare for more advanced work in AI. The concepts and techniques learned in this course will be directly applicable to many other areas of computer science including software design, distributed systems, databases, and information management and retrieval. PREREQUISITE(S): CSC 403

CSC 481
INTRODUCTION TO IMAGE PROCESSING
Graduate
The course is a prerequisite for more advanced Visual Computing (VC) courses and the students will be challenged to implement VC algorithms for real world applications. The topics covered in the course include: components of an image processing system and its applications, elements of visual perception, sampling and quantization, image enhancement by histogram equalization, color spaces and transformations, introduction to segmentation (Edge detection), and morphological image processing. PREREQUISITE(S): Calculus or Linear Algebra.

CSC 482
APPLIED IMAGE ANALYSIS
Graduate
Fundamentals of computational image analysis will be explored in terms of its two most important components, image information extraction and modeling of image patterns. These components will be studied in the context of image representation, segmentation, classification, retrieval and recognition. The course will be useful for students interested in image analysis related to areas such as image databases, multimedia management, animation, GIS, computer graphics, medical imaging, remote sensing and robotics. Specific topics include, but are not limited to segmentation, multi-scale representation, shape analysis, texture analysis, Fourier analysis, wavelets, Gabor and fractal analysis, template matching, and object recognition. PREREQUISITE(S) CSC 481

CSC 485
NUMERICAL ANALYSIS
Graduate
CSC 487
OPERATIONS RESEARCH I: LINEAR PROGRAMMING
Graduate
Linear Programming. The Linear Programming problem and its dual; the simplex method; transportation and warehouse problems; computer algorithms and applications to various fields. PREREQUISITE(S): CSC 400 and Linear Algebra

CSC 489
THEORY OF COMPUTATION
Graduate
Advanced topics in the mathematical foundations of computation. Topics may include random access and Turing machines, recursive functions, algorithms, computability and computational complexity, intractable problems, NP-complete problems. PREREQUISITE(S): CSC 444 or CSC 421.

CSC 495
SOCIAL NETWORK ANALYSIS
Graduate
This course is an introduction to the concepts and methods of social network analysis. Students will learn to extract and manage data about network structure and dynamics, and to analyze, model and visualize such data. Students will use software tools to model and visualize network structure and dynamics. Specific network applications to be discussed include online social networks, collaboration networks, and communication networks. PREREQUISITE(S): CSC 423 or CSC 400 or SOC 412

CSC 500
RESEARCH COLLOQUIUM
Graduate
The research colloquium consists of weekly talks by a variety of speakers including faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly works that encompass the disciplines and areas of interest of the School of Computing. Student evaluation is based on attendance as well as an online journal with reflections on each of the presentations. The educational objectives are to expose students to creative and scholarly research at DePaul and elsewhere, and to engage students in the thought process of identifying and solving challenging research problems. PREREQUISITE(S): None

CSC 503
PARALLEL ALGORITHMS
Graduate
Development, implementation, and applications of parallel algorithms. Models of parallel computation. Parallel sorting, searching and graph algorithms, as well as other parallel algorithms, will be studied and implemented on both simulated and actual parallel machines. PREREQUISITE(S): CSC 421

CSC 521
MONTE CARLO ALGORITHMS
Graduate
A course about the use of random numbers for numerical computation with particular emphasis on implementation issues and applications in science and finance. Covered topics include: pseudo random number generators, the inversion method, the accept-reject method, discrete event simulations, multi-dimensional integration, the Metropolis and the Bootstrap algorithms. PREREQUISITE(S): (CSC 402 or CSC 404) and CSC 423 or consent of instructor

CSC 525
COMBINATORIAL OPTIMIZATION
Graduate
This course defines and introduces the concepts and techniques needed to formulate and model optimization problems. A set of fundamental problems in combinatorial optimization will be covered together with their applications. The emphasis will be on the design and analysis of algorithms for such problems. The computational complexity of this set of problems (easy/hard to solve/approximate) will be discussed, and techniques for coping with intractable problems will be introduced. PREREQUISITE(S): CSC 421.
CSC 528
COMPUTER VISION
Graduate
Computer Vision techniques for analysis of patterns in visual images and videos of 2D and 3D scenes will be explored with the goal of interpreting, understanding, and reconstructing 3D scenes. Topics to be covered include image formation and representation, 2D and 3D feature extraction, camera calibration, reconstruction of depth based on stereo, shading, focus, texture, and geometry, object detection and tracking, motion analysis, analytical performance characterization, and 3D recognition of objects and scenes using statistical and model-based techniques. The course will be useful for students interested in computer vision related areas such as robotics, remote sensing, and medical imaging. A significant part of the course will be dedicated to the discussion of articles recently published in the literature. PREREQUISITE(S): CSC 481

CSC 529
ADVANCED DATA MINING
Graduate
The course is for students with prior background in data mining or machine learning techniques, and covers more advanced modeling techniques, including ensemble learning, extended linear models such as support vector machines, probabilistic graphical models, mixture and latent variable models, matrix factorization and link analysis. Application of the models will be presented in popular domains such as Web and social media analytics, text mining, crime analysis, community discovery, and health informatics. PREREQUISITE(S): CSC 424 and (IS 567 or ECT 584 or CSC 578)

CSC 531
INTRODUCTION TO BIOINFORMATICS
Graduate
An introduction to the field of Bioinformatics, which is computational modeling of biological and biochemical processes. Some programming in Java will be involved. Little biological knowledge will be assumed: any required will be taught in the course. Topics will include genomics, biological databases, sequence alignment (longest common subsequence), phylogenetic trees, and protein folding. Prerequisites: CSC 421 and SE 450

CSC 534
SOFTWARE DEVELOPMENT FOR LIMITED AND EMBEDDED DEVICES
Graduate
This course will focus on the unique aspects, tools, and techniques of developing software applications for limited and embedded devices, such as set-top boxes and smart cards. Formerly CSC 542. PREREQUISITE(S): SE 450.

CSC 535
FORMAL SEMANTICS OF PROGRAMMING LANGUAGES
Graduate

CSC 536
DISTRIBUTED SYSTEMS II
Graduate
An intermediate course on distributed systems. Topics may include: clock synchronization; mutual exclusion; distributed transactions; consistency models; distribution and consistency protocols; failure models; achieving fault tolerance; distributed object-based systems; distributed file systems. PREREQUISITE(S): CSC 435

CSC 538
VISION SYSTEMS
Graduate
Vision Systems will cover the geometry of computer vision as well as a survey of working vision systems to include 1) Content-based Image Retrieval Systems; 2) Object Detection and Tracking Systems; 3) Medical Visual Systems; 4) Robotic Navigation Systems. PREREQUISITE(S): CSC 528
CSC 540
MOBILE APPLICATION DEVELOPMENT II
Graduate
This course will cover advanced topics in mobile and wireless application development. The topics covered will be made explicit by the course instructor when the course is offered. PREREQUISITE(S): CSC 471

CSC 541
INTRODUCTION TO PROTEOMICS
Graduate
An introduction to the field of Proteomics, continuing in more depth and detail from the prerequisite course Introduction to Bioinformatics. Proteomics is computational modeling of biological and biochemical processes related to the Proteome. The Proteome is the set of proteins expressed by a cell in a specific tissue at a specific point in its life. Some programming in Java will be involved. The only biological knowledge required is that taught in the prerequisite course. Topics will include mass spectrometry analysis of proteins, protein folding, and proteomic databases PREREQUISITE(S): CSC531

CSC 542
RESEARCH PRACTICUM IN COMPUTATIONAL BIOLOGY
Graduate
An advanced course in Bioinformatics that draws on and enhances the information learned in CSC 531 Introduction to Bioinformatics, CSC 541 Introduction to Proteomics, and on all computer science classes. The student will spend 15 hours each week during the quarter in the laboratory of a biological or biochemical research scientist at a suitable research laboratory determined by the instructor. The student will work in the biology research group performing the computational components. The student will be able to take this course several times, working in different types of laboratories. The course title in the transcript will reflect the work performed, and will be different each time this course is taken. PREREQUISITE(S): CSC 531, CSC 541 AND permission of instructor

CSC 543
SPATIAL DATABASES & GEOGRAPHIC INFORMATION SYSTEMS
Graduate
This course considers how spatial databases work within a GIS, how data is structured, stored, indexed, retrieved, and displayed. Other topics may include fuzzy spatial databases, temporal spatial databases, and multiple criteria spatial decision making. The class will consist of hands-on work with commercial products, as well as investigating the state-of-the-art research in the field. Prerequisites: CSC 453 or CSC 455

CSC 546
OPERATING SYSTEMS DESIGN
Graduate
A project/seminar oriented course examining the details of the design of operating systems. The ideas from CSC 446 will be extended and incorporated into the design details. PREREQUISITE(S): CSC 443.

CSC 547
ADVANCED TOPICS IN PROGRAM LANGUAGES
Graduate
A project-based course on advanced topics related to programming languages and programming environments. The course does not have any formal exams or homework assignments, but participants are expected to read papers on current research, actively participate in discussions, and complete a significant course project. PREREQUISITE(S): Permission of the instructor.

CSC 548
ADVANCED COMPILER DESIGN
Graduate
Emphasis on practical problems in implementing compilers, data flow analysis, code optimization, error analysis. Discussion of compiler generators. As a class project, students will write a compiler. PREREQUISITE(S): CSC 448.

CSC 549
DATABASE SYSTEM IMPLEMENTATION
Graduate
This is an advanced database course that covers issues in DBMS implementation. Topics covered in this course include: physical data organizations, indexing and hashing, query processing and optimization, database recovery techniques, transaction management, concurrency control, and security. PREREQUISITE(S): CSC 453
CSC 550
OBJECT-ORIENTED DATABASES
Graduate

CSC 551
DISTRIBUTED DATABASE SYSTEMS
Graduate
Distributed database architecture, distributed database design, distributed query processing, query decomposition and optimization of distributed queries, distributed transaction management and concurrency control, distributed DBMS reliability, distributed database operating systems. Distributed multidatabase systems. Client/Server database systems. PREREQUISITE(S): CSC 453 and (CSC 435 or TDC 405 or TDC 463)

CSC 552
CONCURRENT SOFTWARE DEVELOPMENT
Graduate
Fundamentals and techniques of developing concurrent object-oriented applications, using a patterns-based approach. Concepts covered include: threads, synchronization and object locking, thread blocking and deadlock, safety and liveness, state-dependent action and concurrency control. Formerly SE 552. PREREQUISITE(S): SE 450 and CSC 407

CSC 553
ADVANCED DATABASE CONCEPTS
Graduate
An introduction to advanced selected topics in databases. The topics include: intelligent and deductive databases, temporal databases, multimedia databases, spatial and geographic databases, fuzzy databases, mobile databases, data mining and data warehousing, as well as emerging issues and concepts in database design, implementation and management. PREREQUISITE(S): CSC 453.

CSC 554
ADVANCED DATABASE MANAGEMENT
Graduate
In this class, we will discuss concepts, technologies, guiding principles, processes and best practices in managing database environment to meet high availability, scalability, and compliance needs. Organizations with business critical applications must reduce their risk of downtime, manage database environment efficiently and ensure data meets compliance requirements effectively. IT now has additional responsibilities to secure and manage information in alignment with legal, records management and regulations. This class explores methods and techniques to achieve the availability needs and also focuses on how to protect the database against disasters by maintaining multiple copies of the databases in separate locations, synchronized in real-time. Students learn to design and manage key business resumption functions including disaster recovery plans and business continuity plans. Data governance challenges will be discussed along with solutions including data life cycle management, preservation, retention, and disposition. Prerequisite(s): CSC 453 or CSC 454

CSC 555
MINING BIG DATA
Graduate
Introduction to fundamentals of distributed file systems and map-reduce technology (e.g., Hadoop); tuning map-reduce performance in a distributed network. Algorithms and tools for mining massive data sets and discussion of current challenges. Applications in clustering, similarity search, classification, data warehousing (e.g., Hive), machine learning (e.g., Mahout). PREREQUISITE(S): (CSC 451 or CSC 453 or CSC 455) and (IS 567 or CSC 478)

CSC 557
FOUNDATIONS OF COMPUTER SECURITY
Graduate
This course provides an overview of foundational techniques in the specification and verification of computer systems in the presence of malicious attackers. Topics may include: formal models of interaction, attacker models, robust safety properties such as confidentiality and authenticity, information flow properties such as noninterference, and tools such as model checkers, type checkers and theorem provers. Formerly 557. PREREQUISITE(S): CSC 439
CSC 559
SOFTWARE ENGINEERING FOR FINANCIAL MARKETS
Graduate
This course focuses on software engineering issues in creating a financial engine that drives automation and execution in a financial market. The course will cover different types of financial engines from back-office to front-office, exchange matching engines, data gathering engines, trading engines and straight through processing. The emphasis will be on the engines themselves rather than the financial models beneath them. Students will be required to work individually and/or in teams and create a financial engine. This is a project course and it will put students in the role of a domain architect who will need the skills required to communicate with financial traders and software engineers at the same time. PREREQUISITE(S): CSC 404 and (CSC 431 or CSC 521 or CSC 425)

CSC 575
INTELLIGENT INFORMATION RETRIEVAL
Graduate
Examination of the design, implementation, and evaluation of information retrieval systems. The focus is on the underlying retrieval models, algorithms, and system implementations. Also examined is how an effective information search and retrieval is interrelated with the organization and description of information to be retrieved. Topics include: automatic indexing; thesaurus generation; Boolean, vector-space, and probabilistic models; clustering and classification; information filtering; distributed IR on the WWW; intelligent information agents; IR system evaluation; information visualization; and natural language processing in IR. Throughout the course, current literature from the viewpoints of both research and practical retrieval technologies both on and off the World Wide Web will be examined. PREREQUISITE(S): CSC 403

CSC 578
NEURAL NETWORKS AND MACHINE LEARNING
Graduate
A study of the basic structure of neural networks and how machines may learn. This will include analyses of decision trees, Bayesian learning, genetic algorithms, PAC, analytical and reinforcement learning. Neural networks to be studied include Hopfield, backpropagation, Kohonen, ART, and Neuro-Fuzzy. Students will explore current applications and design several learning systems. No prior background in artificial intelligence is assumed. PREREQUISITE(S): (MAT 220 or MAT 262 or MAT 151) and CSC 401

CSC 580
DESIGN OF OBJECT-ORIENTED LANGUAGES
Graduate
This course covers issues in the design and specification of object-oriented programming languages. Sample topics include the use of patterns in program representation, static and dynamic semantics, subject reduction, subtyping, inheritance, polymorphism, genericity and concurrency. Formerly SE 580. PREREQUISITE(S): SE 450.

CSC 582
MACHINE LEARNING
Graduate

CSC 583
ARTIFICIAL INTELLIGENCE II
Graduate
The course provides an in-depth coverage of advanced topics in Artificial Intelligence, including planning, reasoning with uncertainty, decision theoretic agents, constraint satisfaction and optimization problems, as well as selected topics of interest in knowledge representation, machine learning, and natural language processing. These topics are discussed in the context of design and implementation of real-world intelligent agents. This course is suitable for advanced students with interest in further study in artificial intelligence and related topics, as well as those interested in the application of AI techniques in building systems with intelligent components. PREREQUISITE(S): CSC 480

CSC 587
COGNITIVE SCIENCE
Graduate
A study of the relationships between our knowledge of human and computer intelligence. Levels of analysis of intelligent system, examples of cognitive models, and exposure to current publications, with an emphasis on those related to human computer interaction. Students will participate in the design and testing of models of human intelligence, both experimentally and using computer models. PREREQUISITE(S): CSC 403 or HCI 460.
CSC 589
TOPICS IN DATABASE
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit.
PREREQUISITE(S): For specific prerequisites, see syllabus or consult with course instructor.

CSC 590
TOPICS IN USER INTERFACES
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit.
PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor.

CSC 591
TOPICS IN ALGORITHMS
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit.
PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor.

CSC 592
TOPICS IN COMPUTER VISION AND PATTERN RECOGNITION
Graduate
This is an independent study course. May be repeated for credit. PREREQUISITE(S): Completion of the corresponding visual computing core sequence or consent of instructor.

CSC 594
TOPICS IN ARTIFICIAL INTELLIGENCE
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit.
PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor.

CSC 595
TOPICS IN COMPUTER SCIENCE
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit.
PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor.

CSC 598
TOPICS IN DATA ANALYSIS
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit.
PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor.

CSC 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit.
PREREQUISITE(S): None.

CSC 601
MASTER'S RESEARCH CONTINUATION
Graduate
Non-credit. This course is intended for master's degree students who have completed all course registration requirements and who are regularly using the facilities of the University for study and research, thesis or project completion. These students are required to be registered in this course each quarter of the academic year until all requirements have been completed. PREREQUISITE(S): Completion of required courses. Independent Study form required.
CSC 672
PREDICTIVE ANALYTICS CAPSTONE
Graduate
The capstone course provides an opportunity for students to integrate and apply the analytics skills and knowledge learned in the classroom to real world data. Students work in teams on a large scale analytics project. At the end of the course, students submit a report summarizing their analyses and study outcomes, and present results to the class. PREREQUISITE(S): Consent of the instructor.

CSC 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. PREREQUISITE(S): Consent of the instructor.

CSC 695
MASTER'S RESEARCH
Graduate
Students interested in a more in-depth study of a particular area will register for this course and work with a faculty member (not necessarily their academic advisor) on a research project. The work involved may include system development, empirical studies, or theoretical work. 4 credit hours of CSC 695 replaces one 500-level elective course in student's degree program. This course can be taken for 1-4 credit hours for up 8 credit-hours. PREREQUISITE(S): Consent of research advisor. Independent study form required. Students must successfully complete the foundation courses prior to their first enrollment in CSC 695.

CSC 696
MASTER'S RESEARCH
Graduate
A student who has made a significant contribution to a research project, through work done in two quarters of CSC 695 (8 credit-hours), may choose to complete the Master's Research option. At the end of the two quarters, the student must submit a technical report detailing the results of the research project. This report must be approved by the student's research supervisor and the faculty advisor, at which point it will be made available to the public as a CDM Departmental Master's Research Technical Report. In that case, the student will be allowed to register for this course. The transcript will show the Research project title as the course topic. PREREQUISITE(S): CSC 695 taken twice and approval of report by student's research supervisor and faculty advisor.

CSC 697
GRADUATE INTERNSHIP
Graduate
In cooperation with local employers, the graduate program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. This course is variable credit and may be taken for one to four credits. This course may be repeated for a maximum of four credits total. Admission to the internship program requires consent of the Instructor and a Student Services Advisor. International students may complete curricular practical training (CPT) through this class provided they first obtain CPT authorization from the Office for International Students and Scholars (OISS) before beginning the internship.

CSC 698
MASTER'S THESIS
Graduate
A student who has made an original contribution to the area (typically through 8 credit-hours' worth of work done in CSC 695, but not necessarily) may choose to complete a Master's Thesis. The student and the student's research advisor form a Master's Thesis Committee. The student submits to the committee a thesis detailing the original results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for this course and the transcript will show the thesis title as the course topic. PREREQUISITE(S): Successful defense of a Master's Thesis.

CSC 699
RESEARCH
Graduate
PREREQUISITE(S): Research course supervised by an instructor. Independent Study Form required. Variable credit. Can be repeated for credit.
CSC 701
RESIDENT CANDIDACY CONTINUATION
Graduate
Non-credit. Students admitted to candidacy for the doctoral degree who have completed all course and dissertation registration requirements and who are regularly using the facilities of the University for study and research are required to be registered each quarter of the academic year until the dissertation and final examination have been completed. PREREQUISITE(S): Admission to Candidacy. Independent Study form required.

CSC 702
NON-RESIDENT CANDIDACY CONTINUATION (PREREQUISITE: ADMISSION TO CANDIDACY)
Graduate
Non-credit. This registration provides for doctoral candidates who have been admitted to candidacy who are not in residence and need only occasional use of University facilities, including the libraries. PREREQUISITE(S): Admission to Candidacy. Independent Study form required.

CSL 95
CLINICAL ORIENTATION
Graduate
Students will be oriented to the expectations and requirements of the practicum and internship experiences in Human Services and Counseling.

CSL 96
CLINICAL APPLICATION
Graduate
This milestone course ensures that all students have met the requirements for clinical placement.

CSL 97
CLINICAL PLACEMENT
Graduate
This milestone course ensures that students have secured a clinical placement that fulfills all requirements for Human Services and Counseling Program.

CSL 200
LEADERSHIP AND SOCIAL CHANGE
Undergraduate
This is an advanced course exploring how leadership theory interacts with organizational structures, advocacy, and social justice. The class is structured to expand from the individual to the group/organization/school level to the societal macro view of leadership. The topics of leadership development and leadership education in P-16 settings will be included. Contemporary topics in leadership will be addressed to coincide with social change and leadership. (Cross listed with CSL 200 & 500)

CSL 451
LEGAL AND ETHICAL ISSUES IN COUNSELING
Graduate
Professional counseling involves an interplay of ethics, personal values and legal implications of practice. This course initially attempts to focus on personal values and allows for the student to reflect upon his/her personal value systems. Several ethical codes related to the profession are studied so that the students will have the knowledge of professional ethical practice. An examination of local and federal laws regarding the interplay of these three components will be examined. The students, in the course, will engage in small groups, value clarification exercises, role-playing with lectures, video technology and guest speakers.

Admission to the Counseling Masters Program is a prerequisite for this course.
Upon completion of this course each student will be able to: 1) analyze human service organizations in terms of their mission, vision, beliefs, current goals and strategies, organizational culture, organizational structures and leadership; 2) utilize visionary, strategic and operational planning processes to develop and organize a human services organization; 3) design various assessments of service outcomes of human services organizations; and 4) judge his or her effectiveness as a member of both a learning community and planning team.

Admission to the Counseling Masters Program is a prerequisite for this course.

Ways to assist the individual to choose, prepare for and progress in a career. Vocational testing and sources for occupational information are described. Computer guidance programs designed for career exploration will be studied. Also, the study of vocational behavior in relation to career patterns will be considered, with special attention to the analysis of empirical data and theories pertaining to vocational choice.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 501 are prerequisites for this course.

Study and ethics of group process, group theories, problems such as conflict resolution, leadership and membership styles will be re-examined. The class engages in a regular group experience. Opportunity to observe and participate in group work is provided. Criteria and formulation for conducting workshops with group process is considered.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467, 501, and 510 are prerequisites for this course.

Detailed analysis of intelligence, aptitude, personality, and achievement tests used with groups and individuals. The course is intended to familiarize students with various appraisal procedures and their utilization. Attention is given to the development of the institutional testing program.

Admission to the Counseling Masters Program and SCG 410 are prerequisites for this course.

This course seeks to develop skills and understanding relevant to the assessment and treatment of chemical dependency. The major alternative assessment approaches and treatment interventions for chemical dependency are surveyed and analyzed.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467, 501, and 510 are prerequisites for this course.

The purpose of this course is to review counseling theories from affective, non-directive approaches to cognitive and behavioral approaches. The humanistic and existential frameworks in counseling will be reviewed. Techniques and process derived from these various counseling frameworks will be used in classroom laboratory experiences with follow-up videotaping assignments. Models of normalcy as well as knowledge and use of the DSM IV-R (2000) and review of psychopathology, highlighting neurotic personality disorders will be considered. In counseling children, play and art therapy processes will be applied.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 and 452 are prerequisites for this course.
CSL 475
COLLEGE AND CAREER READINESS COUNSELING FOR SCHOOL COUNSELORS
Graduate
This course will provide an introduction to career counseling in a school context. Focus will be on increasing students' knowledge of the world of work, career theories, and related life influences. The ASCA model for K-12 programs and interventions will be integrated throughout this course.

CSL 501 (B- or better required) and status as Advanced Masters Education (Counseling) student, Counseling Licensure student or School Counselor student are prerequisites for this course.

CSL 480
SPECIAL TOPICS IN COUNSELING
Graduate
Content and format of this course are variable. In-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule.

A grade of B- or better in CSL 451, CSL 452, CSL 467, CSL 501 and CSL 510 is a prerequisite for this class.

CSL 481
SPECIAL TOPICS IN COUNSELING:
Graduate
Content and format of this course are variable. In-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule.

A grade of B- or better in CSL 451, CSL 452, CSL 467, CSL 501 and CSL 510 is a prerequisite for this class.

CSL 482
SPECIAL TOPICS IN COUNSELING:
Graduate
Content and format of this course are variable. In-depth study of a specific topic in counseling. Subject matter will be indicated in the class schedule.

A grade of B- or better in CSL 451, CSL 452, CSL 467, CSL 501 and CSL 510 is a prerequisite for this class.

CSL 483
COUNSELING INTERVENTIONS AND TREATMENT PLANNING
Graduate
This course will provide students with an introduction to empirically supported treatments for specific disorders occurring across the lifespan. Opportunities for hands-on practice with several treatments will be required.

A grade of B- or better in CSL 484 and CSL 489 is a prerequisite for this class.

CSL 484
ISSUES IN CLINICAL MENTAL HEALTH COUNSELING
Graduate
This course will provide students with a review of up-to-date information on the issues related to community and clinical mental health counseling including but not limited to outcome evaluation, prevention and wellness strategies, advocacy strategies, counselor roles, reimbursement, paperwork, and referral processes.

A grade of B- or better in CSL 451, CSL 452, CSL 467, CSL 501 and CSL 510 is a prerequisite for this class.

CSL 485
SEXUALITY COUNSELING
Graduate
This course will provide students an overview of sexuality development and the assessment and treatment of various sexual issues and disorders. Topics covered include common development of sexuality, sexual concerns, sexual behavior, diagnostic and assessment techniques, treatment planning, and therapeutic interventions for individuals and couples.

A grade of B- or better in CSL 451, CSL 452, CSL 467, CSL 501 and CSL 510 is a prerequisite for this class.
This course will focus on a continuum of mental health with an emphasis on neurotic and psychotic deviations. Specific models and methods for assessing mental status and identification of abnormal, deviant or psychopathological behavior will be presented. The use of DSM IV-R (2000) ad Zero to Three Diagnostic Classification with its diagnostic categories will be utilized for assessment methodology. Specific attention will be given to diverse cultural perspectives in diagnosis and assessment.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467 and 501 are prerequisites for this course.

The course examines historical and philosophical elements relative to the role of student affairs in higher education as well as the impact of changing demographics on current trends pertinent to the management of student affairs. The course also provides students with theoretical and practical knowledge about organization structure, services, and faculty/staff/administrative functions in student affairs.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 are prerequisites for this course.

This course will examine the impact of institutional mission and state and national policies on access, retention and graduation rates. Organizational change, decision making and conflict resolution strategies will be explored within the context of strategic planning, organizational structure and leadership style and management. Personnel selection, management theories and performance evaluations will also be studied. Various assessment practices will be reviewed and analyzed. Within this framework, student demographics, campus culture and student development theory (traditional and contemporary) will be examined.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 490 are prerequisites for this course.

This course will explore models for designing, managing, and evaluating student affairs programs, including the use of technological applications. Students will become familiar with models and methodologies of program development and implementation in higher education and will understand how to use professional standards and other resources for program development.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 491 are prerequisites for this course.

This is an advanced course exploring how leadership theory interacts with organizational structures, advocacy, and social justice. The class is structured to expand from the individual to the group/organization/school level to the societal macro view of leadership. The topics of leadership development and leadership education in P-16 settings will be included. Contemporary topics in leadership will be addressed to coincide with social change and leadership. (Cross listed with CSL 200 & 500)

This course examines oral communication skills as a dynamic in human relations. Through videotapes, role-playing and a variety of activities and experiences, students will explore ways to improve their own communication and counseling skills using the Ivey intentional interviewing approach. Feedback is given to the students, both in laboratory classroom exercises and in viewing videotape sessions. Skills emphasized include perception, verbal and nonverbal language, accurate and empathetic listening skills, focusing, thematizations, confrontation, conflict resolution and a process of directionality for change.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 are prerequisites for this course.
CSL 510  
MULTICULTURAL COUNSELING  
Graduate  
This course will assist students in understanding the need for formulating and implementing counselor/consultant roles with diverse communities. Attention will be on the students' integration of awareness, knowledge, attitudes, insights, and cultural identities. Moreover, students will develop the skills and expertise necessary for effective counseling and collaboration in a multicultural milieu.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 452 are prerequisites for this course.

CSL 511  
SUPERVISION  
Graduate  
This course will be an introduction to the theory and practice of supervision in the counseling profession. There will be a focus on the basic skills necessary for effective supervision of counselors.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467 and 501 are prerequisites for this course.

CSL 512  
CRISIS INTERVENTION  
Graduate  
This course will provide students with an understanding of the individual in crisis. Focus will be on the common characteristics and manifestations of crisis and address methods and techniques of crisis intervention.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467 and 501 are prerequisites for this course.

CSL 513  
CONSULTATION FOR COUNSELORS  
Graduate  
This course will focus on the theory, techniques, practice and skill development needed to effectively provide consultation in communities and schools. Emphasis will be on the application of consultation and the role of the consultant.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467 and 501 are prerequisites for this course.

CSL 514  
CRISIS INTERVENTION FOR SCHOOL COUNSELING  
Graduate  
This course will provide students with an understanding of principles of crisis intervention and crisis management with a focus on the school setting. Working with individuals and groups in crisis is significantly different than typical counseling situations, both in the characteristics of the clients and in the types of intervention strategies employed. Graduates working in community, school, and higher education settings will encounter many situations where crisis intervention skills are necessary. This training will increase their skills and knowledge of crisis intervention strategies.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467 and 501 are prerequisites for this course.

CSL 515  
CRISIS INTERVENTION AND TRAUMA COUNSELING  
Graduate  
This course will provide students with an understanding of the individual in crisis and the impact of trauma. Student will develop knowledge and skills needed to access and treat both the acute and long-term effects of trauma. Subjects such as disaster response, psychological first aid, and evidence-based treatment models are examined and students explore perspectives on the causes and prevention of trauma as it applies to the individual, family, local, national, and international community. The role of power and oppression in the experience of trauma within family, socio-political, and ethno-cultural systems is also addressed.
CSL 519
SPECIAL EDUCATION: LEGAL AND PROFESSIONAL ISSUES FOR SCHOOL COUNSELORS
Graduate
This course will introduce students to special education law including relevant statutes, cases, and regulations. Students will also learn about the development, monitoring, and implementation of IEPs. In addition, this course will address the student counselor's potential role in the evaluation, referral, monitoring, and consultation of students with special needs.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451 are prerequisites for this course.

CSL 520
COUNSELING CHILDREN AND ADOLESCENTS
Graduate
This course will consider the theoretical foundations of working with children and adolescents. It will address developmentally appropriate counseling perspectives and interventions. Emphasis will be on the child/adolescent in various systemic contexts, family as consultant and collaborator, multicultural factors, specific child/adolescent problems, and resiliency. In addition, professional issues will be addressed.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467 and 501 are prerequisites for this course.

CSL 521
CONTEXTUAL DIMENSIONS OF SCHOOL COUNSELING
Graduate
This course will address the role of the school counselor and provide an understanding of the coordination of counseling program components as they relate to the school and the wider communities. Students will explore the various roles of the school counselor as advocate, coordinator, teacher, programmer, consultant, information and referral agent, and counselor. The ASCA developmental approach to school counseling will be introduced and integrated throughout.

CSL 451, CSL 452 (B- or better required) and Advanced Masters Education (Counseling) student or Counseling (Licensure) student are prerequisites for this course.

CSL 522
DELIVERY OF COMPREHENSIVE DEVELOPMENTAL SCHOOL COUNSELING PROGRAMS
Graduate
This course will focus on the comprehensive development, delivery, and evaluation of school counseling programs based on the "Best Practices" model of the state and the three ASCA model domains: academic development, career development, and personal/social development. Students will learn strategies to integrate school counseling programs into the total school curriculum, to promote the use of counseling activities and programs, to plan for and present school counseling-related educational programs, and to gain knowledge of prevention and crisis intervention strategies.

CSL 521 (B- or better required), and status as an Advanced Masters Education (Counseling) student or Counseling (Licensure) student are prerequisites for this course.

CSL 523
LEARNING AND CLASSROOM MANAGEMENT FOR SCHOOL COUNSELORS
Graduate
This course will explore learning frameworks in education such as constructivist approaches, social-cultural learning, and the zone of proximal development as well as behavioral learning contracts. The history of learning approaches will be covered particularly in the 19th and 20th centuries to assist the school counselor in relationship to educators in the school community. Classroom management models and theories of inner discipline and consistency management will be discussed so that the school counselor will be able to assist educators and parents in home-school management of youth.

Advanced Masters Education (Counseling) or Counseling (Licensure) student is a prerequisite for this course.

CSL 552
PRACTICUM IN COUNSELING
Graduate
The practicum course is the initial clinical experience for the CSL student. The student begins to see her- or himself as a counselor-in-training in an actual counseling setting and will develop and continue to work on mastery of counseling skills in a clinical setting. The practicum requires a minimum of 100 clock hours during the quarter.

A B- or better in CSL 451, CSL 452, CSL 458, CSL 467, CSL 501, and CSL 510 and status as an Advanced Masters Education (Counseling) student are prerequisites for this course.
CSL 553  
**INTERNSHIP IN COUNSELING I**  
*Graduate*

After the completion of require courses, and consultation with one's advisor, the student-intern is assigned to a professional practice setting including but not limited to schools, community agencies, colleges, and universities. The student-intern functions under the joint supervision of a professionally qualified setting supervisor and a University clinical experience director for 150-300 clock hours of internship experience. A structured contract will include structured experiences expected of the student from both the setting and the University, signed by all parties, and used as an evaluative tool for the internship. Ongoing reflective seminars will be part of the internship experience related to concentration specific topics and counseling skills and processes.

Admission to the Counseling Masters Program and a grade of B or better in CSL 454 or 475, and CSL 552 are prerequisites for this course.

CSL 554  
**INTERNSHIP IN COUNSELING II**  
*Graduate*

This course is a continuation of Internship I. The student-intern continues with 150-300 clock hours experience under supervision of the setting supervisor and University clinical experience director using a structured contract.

Admission to the Counseling Masters Program and a grade of B or better in CSL 553 are prerequisites for this course.

CSL 555  
**INTERNSHIP IN COUNSELING III**  
*Graduate*

This course is a continuation of Internship II. The student-intern continues with 150-300 clock hours experience under supervision of the setting supervisor and University clinical experience director using a structured contract.

Admission to the Counseling Masters Program and a grade of B or better in CSL 553 are prerequisites for this course.

CSL 556  
**COUPLES AND FAMILY COUNSELING**  
*Graduate*

This course focuses on providing theoretical formulations and practical illustrations applicable to the practice of marriage and family counseling. Students engage in role-playing, case study, and observation of counseling techniques. Skills expected in this course include understanding the process of marriage and family counseling and understanding the role of the counselor in the marriage and family setting. Students will learn to develop effective marriage and family strategies, and to conduct complete case analysis.

Admission to the Counseling Masters Program and a grade of B- or better in CSL 451, 452, 467, 501, and 510 are prerequisites for this course.

CSL 558  
**INDEPENDENT STUDY IN COUNSELING**  
*Graduate*

Permission of instructor, department chair and associate dean required.

CSL 559  
**THESIS RESEARCH IN COUNSELING**  
*Graduate*

A student writing a thesis registers for this non-credit course. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

SCG 410, an approved thesis and status as an Advanced Master's student is a prerequisite for this class.

CSL 600  
**REGISTERED STUDENT IN GOOD STANDING**  
*Graduate*

(0 credit) Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.
CSL 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including these, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

CSS 101
CATHOLIC SOCIAL TEACHING AND REFLECTION
Undergraduate
CSS 101 is a mandatory year-long course sequence for all students serving as tutors at San Miguel schools and Visitation Catholic Elementary through the Stean's Center Catholic Schools Initiative. Utilizing the pastoral cycle of "See, Judge, and Act" within the Catholic Social tradition, students will critically reflect on their tutoring experience as it relates to local economic, cultural and political issues surrounding the Englewood and Back of the Yards neighborhoods. In addition they will explore a variety of domestic and global justice issues through the lens of Catholic Social Teaching. Through this hermeneutic, they will gain a familiarity with terms and concepts to more thoroughly analyze and critique social systems. The students will also learn more about the Dominican and LaSallian charism towards marginalized populations and reflect on their own personal responsibility as members of a community bound to their religious mission. As a service-enhanced course, students will actively engage in critical reflection and dialogue on their tutoring experience through the use of readings, videos, guest speakers, group projects/presentations, and designated field trips to related organizations. Variable credit.

CSS 201
CRITICAL COMMUNITY ENGAGEMENT
Undergraduate
This course explores the relationship between social justice movements and non-profit organizations in the U.S. by providing a structure within which students can learn about issues and theory and the organizational settings in which they are serving.

CSS 300
INTRODUCTION TO NON-PROFIT MANAGEMENT
Undergraduate
This course provides students with an understanding of the functioning of the organizations that conduct the vital work of the non-profit sector. Students will complete the course with the knowledge base to be effective program managers and board members in these organizations.

CSS 310
RESTORATIVE JUSTICE: ENGAGEMENT WITH THE PRISON
Undergraduate
This course will provide an opportunity for students to 1.) reflect deeply on the meaning of justice, 2.) examine institutionalized forms of justice, and, above all, 3.) explore alternative models of justice. Using a dialectic process, students will actively scrutinize theories of justice and investigate issues and movements of social justice. Additionally, they will be asked to consider how each of these areas informs the other, since theories often influence as well as emerge from issues and movements. Assumptions about crime and justice will be considered by comparing and contrasting retributive and restorative paradigms. The role of offender, victim and community will be analyzed in the context of crime and justice. Students will also look into programs in restorative justice to discern their outcome effectiveness.

CSS 320
COMMUNITY FOOD SYSTEMS
Undergraduate
This course offers a critical analysis of the concept of community food systems as they have been employed as an alternative to the global agro-food system. Readings, lectures, films, guest speakers, site visits, and field projects will provide students with an overview of emerging community-driven efforts at producing, distributing and consuming food. Emphasis will be placed on (1) local, community-based food projects within urban contexts in North America; (2) whether or not these projects constitute more environmentally, socially, and economically sustainable approaches to provisioning households, neighborhoods, towns and cities; and (3) the degree to which such projects enhance the control over, accessibility to, and healthiness of food. Students will gain an understanding of the current global food system in relation to producing, processing, packaging, transporting, marketing, and eventually discarding food. Comparisons will be drawn with emerging local production, distribution and procurement processes driven by the interests of community groups and organizations concerned with health and nutrition, the environment and social justice. There will be a specific focus on the application of community food systems in urban sectors where access to fresh food is challenged, for example, as a result of historical patterns of racial segregation and social exclusion. Students will gain an understanding of such challenges through engaging in field projects in support of local food production and distribution within Chicago communities.
CSS 390
SPECIAL TOPICS IN COMMUNITY SERVICE STUDIES
Undergraduate
Special topics in Community Service Studies are designed to cover emerging or specialized issues in community service, development, nonprofit management, and/or social and global responsibility.

CSS 395
COMMUNITY INTERNSHIP
Undergraduate
Community Internship exposes students to career potentials in non-profit and government agencies through an intensive internship experience in a community organization.

CSS 399
INDEPENDENT STUDY
Undergraduate
Independent study. Enrollment by instructor and/or with approval by program director. Variable credit.

CTH 110
THE CHRISTIAN EXPERIENCE
Undergraduate
An introductory course surveying the range of traditions that have emerged within the Christian movement, and offering an historical perspective on the life and thought of Christian communities, and their prospects for the future. Cross-listed as REL 110.

CTH 180
INTRODUCTION TO CATHOLICISM
Undergraduate
An examination of the breadth of the Catholic experience from a 1st-century Jewish religious movement to a 21st-century global religion.

CTH 182
THE LATINO RELIGIOUS EXPERIENCE IN THE UNITED STATES
Undergraduate
An examination of the diverse nature of Latino religion, from its indigenous roots to its institutional forms, within the social and political context of American culture. Cross-listed with REL 113.

CTH 183
THEMES IN CATHOLIC SOCIAL THOUGHT
Undergraduate
An initial, systematic examination of major themes in modern Catholic social thought. Cross-listed as REL 183.

CTH 190
CATHOLICISM AND BIBLICAL INTERPRETATION
Undergraduate
An historical and theological study of the ways in which the Scripture have been interpreted in the Catholic Tradition. In addition to the historical survey, the interpretation of particular texts (creation, resurrection, miracle stories, moral discourses, etc.) will be examined. Formerly CTH 225.

CTH 201
THE EXPERIENCE OF CATHOLICISM IN CHICAGO
Undergraduate
An experience-centered introduction to the Catholic Church in Chicago. Includes site visits.
CTH 202
CATHOLICS AND SCRIPTURE
Undergraduate
This course serves as an introduction to the content of the Old and New Testaments and to Catholic ways of reading Scripture in relation to the history of the early Church. The course will cover, for example, passages from Genesis, Exodus, the historical writings, the prophets, the Gospels, and the letters of Paul. The course will also treat questions of canon, interpretation, and the relation of Scripture to tradition.

CTH 203
WHAT CATHOLICS BELIEVE
Undergraduate
This course will cover the basic elements of Catholic belief, following the pattern of the Nicene Creed. The course will deal with God, Jesus Christ, salvation, the Holy Spirit, the Church, sacraments, and the afterlife, as these ideas have been discussed and debated in classical, modern, and contemporary periods.

CTH 205
CATHOLICISM IN WORLD HISTORY I: JESUS TO 1500
Undergraduate
A study of the development of the Catholic Church from the time of Jesus to the Renaissance. Religious movements, piety and art as well as theology and ecclesiastical history will be examined.

CTH 206
CATHOLICISM IN WORLD HISTORY II: MODERN & POST-MODERN TIMES
Undergraduate
A study of the development of Catholicism since 1500 exploring the Catholic Reformation, Catholicism's encounter with the Enlightenment, the missionary movement and the Catholic Church in the United States.

CTH 209
THEORIES OF THE CHURCH: CONCEPTS AND CONTROVERSIES
Undergraduate
Introduction to several ecclesiologies that co-exist in Catholicism. Both historical and contemporary ecclesiologies will be considered. Cross-listed as PSC 335.

CTH 210
CATHOLIC SOCIAL TEACHING
Undergraduate
This course will introduce students both to the development of Catholic Social Teaching (CST) and the lived witness of social engagement by a variety of Catholics in varied contexts. The course will cover essential passages from Scripture (e.g., the Beatitudes, key sections of the Hebrew Bible), as well as the ongoing development of Catholic thought and practice in modern papal encyclicals and the Second Vatican Council. Witnesses who embody, challenge and contribute to Catholic Social Teaching will be explored; these may include, for example, Catherine of Siena, Bartolome de las Casas, Vincent DePaul, Louise DeMarillac, Dorothy Day, and Oscar Romero.

CTH 212
ANCIENT ISRAEL: HISTORY, LITERATURE AND RELIGION
Undergraduate
The development of Judaism from Moses to the Rabbinic era with special attention to social and historical questions. Cross-listed with REL 232.

CTH 213
THE NEW TESTAMENT
Undergraduate
A critical investigation of the New Testament. Topics include the earliest Christian writings (letters of Paul), the production of "gospels" about Jesus, and the development of early churches in the context of ancient history and society. Cross-listed with REL 233.
CTH 214
THE HISTORICAL JESUS
Undergraduate
An investigation of the early Christian Gospels and other sources for reconstructing the life of Jesus of Nazareth. The relation of historical reconstruction and religious interpretation, and the significance of conflicting interpretations of Jesus, will also be considered. Cross-listed as REL 238.

CTH 215
VARIETIES OF EARLY CHRISTIANITY
Undergraduate
An examination of multicultural diversity in early Christianity through a study of materials excluded from the New Testament canon; Christian apologists defending the church against pagan intellectuals and Roman imperial magistrates; comparisons of early Christian fiction and ancient Greek novels; and an examination of Gnostic writings. Cross-listed as REL 234.

CTH 216
PAUL AND HIS INFLUENCE IN EARLY CHRISTIANITY
Undergraduate
A critical study of Paul's literary remains as primary sources for reconstructing the development of the Christian movement, focusing on Paul's communities, ethics and theology. Early interpretations and assessments of Paul will also be considered. Cross-listed as REL 235.

CTH 220
CATHOLIC EXPERIENCE I: EARLY CHURCH - 1200
Undergraduate
This course is an introduction to the history of the Catholic Church and the evolution of Christian thought and practices, from the early Church to the thirteenth century. The course will include not only institutional history but also ecclesiastical, cultural, and social history of Catholicism in relation to foundational theological and spiritual texts written in this period. Main topics: The Early Church; Councils and Heresies; Missions in Northern Europe; Charlemagne, Carolingians and a new Roman Empire; Monasticism; Eastern Orthodoxy; Christianity and Islam (the Age of the Crusades); the Mystical Tradition; the Investiture Controversy.

CTH 221
CATHOLIC EXPERIENCE II: 1200 - FRENCH REVOLUTION
Undergraduate
This course provides an overview of the history of Catholicism and its interactions with institutional, political, and social history from 1200 to the French Revolution. The main topics of the class are the origin of the Universities and Scholasticism; Mendicant Orders and their impact on the Medieval Society; the Challenges to Papal Monarchy; Humanism and Erasmus; the impact of the Age of the Reformation; the Council of Trent; the geographic discoveries and the New Worlds; the Enlightenment and the Scientific Revolution; the Catholic Church and the French Revolution.

CTH 222
CATHOLIC EXPERIENCE III: FRENCH REVOLUTION - PRESENT
Undergraduate
This course will offer a survey of the political, cultural and intellectual history of the Catholic Church from 1789 through the early twenty-first century. It will include discussions of the Catholic Church in relation to the French Revolution; the Catholic Church and the formation of modern nation-states (including, inter alia, the unification of Italy and the German Kulturkampf); the relation between the Church and Liberalism; intellectual movements like theological Modernism and ressourcement theology; the First Vatican Council; the Church, Fascism and Communism; the Second Vatican Council; the Emergence of a Global Church, Latin American Liberation Theology, and more.

CTH 223
THE SECOND VATICAN COUNCIL
Undergraduate
A detailed exploration of the history, issues, personalities, theologies and results of Vatican II studied against the backdrop of modernity and post-modernity.
CTH 224
CHRISTIAN PREACHING AS COMMUNICATION
Undergraduate
Rooted in Catholic tradition but inclusive of the call for all Christians to proclaim the Good News. This class explores preaching as a graced communication and, in addition to transactional and theological communication theory, examines the preacher's call, spiritual formation, present mandates and future potentials, scripture study fundamentals and presentational approaches. The course provides opportunities for in-class, on-campus, and off-campus preaching and observation experiences as well as listener feedback and diversity education.

CTH 226
ROMAN CATHOLIC SPIRITUAL LITERATURE
Undergraduate
A study of the foundational religious experiences that underlie the Roman Catholic tradition, of the narratives they generate, and of their representations in various media such as poetry, music, myths, sacred legends and apologetic stories. Cross-listed with REL 282.

CTH 228
MEDIEVAL MYSTICS IN EUROPE: 1000-1600 A.D.
Undergraduate
The evolution of theories and experiences of human union with God, and of varied Christian spiritual paths and practices as described in mystical literature, saint's lives, religious art and music. Emphasis on the monastic, urban and courtly institutional context of the documents. Cross-listed with HST 213.

CTH 229
CATHOLICISM AS A SPIRITUAL PATH
Undergraduate
An experience-centered study of the relationship between contemplation and action, prayer and service, liturgy and social justice, personal religious experience and the wider experience of Catholics. Both historical as well as contemporary spiritualities will be explored. Cross-listed as REL 284.

CTH 230
THINKING ABOUT GOD
Undergraduate
This course centers on the question of the relationship between reason and faith, between as it were "thinking" and "God." According to the Catholic tradition, reason's search for wisdom initiated by such classical thinkers as Plato and Aristotle is fulfilled in Christian faith. As such, it regards philosophy "as a mode of reflection that holds God as the source of all being and action and brings multiple disciplines together into a lived synthesis" (Vision Statement, Department of Catholic Studies). This holistic vision entails theses regarding the character of reason as open to theology and faith as an extension of reason. It entails the Christian doctrines of the Logos, the Trinity, revelation, and sin. It requires careful considerations of the human person's powers of intellect and will. It extends to considerations of the relationship between the theological virtues of faith, hope, and charity that in turn extend to all of the moral life. And it must offer an account of reasonableness that begins to answer the challenges of Nominalism, the Reformation, the Enlightenment, and postmodernity. Possible topics of a more interdisciplinary nature include the public/private distinction, the compatibility of science and religion, and the validity of truth claims in a pluralistic world.

CTH 231
ROMAN CATHOLIC LITURGY
Undergraduate
A study of the emergence, meaning and dynamics of community, and of the interaction between community and ritual in the Roman Catholic tradition. Cross-listed as REL 281.

CTH 232
INTRODUCTION TO LITURGY
Undergraduate
Basic issues and elements of Christian liturgy with special attention given to the liturgical documents of the Roman Catholic Church. Required lab sessions on dates announced at the beginning of the quarter. Taught at Catholic Theological Union.
The course will enable the students to "read" the image of Our Lady of Guadalupe in distinct contexts, especially in the light of the struggle of the Mexican Catholic community in Chicago and will allow them to think and write about the image of la Morenita de Chicago (an affectionate term used by Mexican-Americans to refer to the image that literally translates as "the brown-skinned woman of Chicago"). The learning process will lead to an integration of varied personal experiences, guided theological reflection, and the common study of history, art, culture, and politics.

CTH 238
ANCIENT PHILOSOPHY
Undergraduate
A study of selected thinkers and issues from ancient Greece. Cross-listed with PHL 293.

CTH 239
MEDIVAL PHILOSOPHY
Undergraduate
A study of selected thinkers and issues from the Medieval period. Cross-listed as PHL 294.

CTH 240
TOPICS IN CATHOLIC THOUGHT
Undergraduate
A study of selected topics and controversies.

CTH 241
ROMAN CATHOLIC MORAAL TRADITIONS
Undergraduate
This course examines various moral topics within a Roman Catholic framework. Papal pronouncements, Magisterial statements, Episcopal texts, the works of influential theologians, and critical voices both within and beyond the Church will be critically examined. Special attention will be paid to the method of moral argumentation. Cross-listed as REL 287.

CTH 242
PHILOSOPHY CAL THEOLOGY
Undergraduate
A survey of the interaction between philosophy and Christian theology. Cross-listed as PHL 244.

CTH 243
ROMAN CATHOLIC THEOLOGICAL THINKING
Undergraduate
A study of the Roman Catholic tradition of "faith seeking understanding" examining the content and the process of emergence of Catholic beliefs about such matters as God, sin, Jesus Christ, revelation, the church and eschatology. Cross-listed with REL 280.

CTH 244
DEBATES ABOUT GOD
Undergraduate
A study of classical and contemporary arguments regarding the existence and meaning of "God" as developed in a variety of theistic traditions. Cross-listed as REL 200.

CTH 245
INTRODUCTION TO THEOLOGY
Undergraduate
A consideration of the nature, sources and methods of theology from a study of several case histories. Special emphasis on historical revelation in Christianity and the developing awareness of faith in relation to shifting horizons. Taught at Catholic Theological Union.
CTH 246  
INTRODUCTION TO CHRISTIAN ETHICS  
Undergraduate  
This course is an introductory study of the basic themes of Christian ethics. Particular attention will be paid to the Roman Catholic moral tradition, including such topics as the virtues, the natural law, moral decision-making and narrative.

CTH 247  
ROMAN CATHOLIC SOCIAL THOUGHT IN CONTEXT  
Undergraduate  
A study of Roman Catholicism’s understanding of its relation to the social world, including such matters as the relation between Church and state, and the moral authority of the Church, and of its teaching on such issues as social ethics, politics and economics. Cross-listed with REL 283.

CTH 248  
CONTEMPORARY MORAL ISSUES  
Undergraduate  
A study of the relations between religious beliefs and moral action to be carried out through an examination of the ethical and moral response of Catholicism to selected moral issues such as war and peace, sexual behavior, etc.

CTH 249  
NATURE, COSMOS AND GOD: CATHOLICM AND SCIENCE  
Undergraduate  
A constructive correlation of Catholic thought and contemporary scientific theory about the origins and development of the universe. Modern and contemporary cosmologies will be put into dialogue with Christology, Trinity and Incarnation. A particular concern will be today’s environmental crisis and an authentically Christian response.

CTH 250  
ART IN THE SPANISH AMERICAN EMPIRE  
Undergraduate  
This course offers a critical survey of the art of colonial Latin America (circa 1520s-1820s), from the Caribbean to Mexico, Central America, and South America. Framed by the Spanish Conquest of the 16th century and Independence in the early 19th century, lectures will survey state-sanctioned arts of the Iberian colonizers, including the foundations of the Catholic Church across the “New World” landscape. Race will be a frequent issue of discussion as we consider both indigenous American and African participation in social realities and artistic practice in this colonial context. Cross-listed with HAA 246.

CTH 251  
CATHOLIC THEMES IN CONTEMPORARY CINEMA  
Undergraduate  
This course will explore and examine the interaction of Catholic themes, symbols, and images through Hollywood and foreign films. Students are required to analyze films outside of class, give oral presentations, and compose papers on selected films.

CTH 252  
BYZANTINE ART  
Undergraduate  
This course will explore the art of the Byzantine Empire from the founding of Constantinople in A.D. 330 to the fall of the city to the Ottomans in 1453. Lectures and readings will primarily focus on how contemporaries understood and interacted with a diverse group of monuments and objects now classified as Byzantine art. Significant attention will be devoted to how works of art functioned in the service of imperial and ecclesiastical ideology. Discussions will analyze how Byzantine art was appreciated and appropriated in both the medieval Mediterranean and in modern scholarship. Cross-listed with HAA 234.

CTH 253  
EARLY MEDIEVAL ART  
Undergraduate  
This course explores the art of the Medieval period from a broad range of cultures: Early Christian, Byzantine, Islamic, Carolingian, and Ottonian. We will discuss major stylistic trends and explore the relationship between art, culture, and religion. Works of art will be evaluated in terms of their social functions in the societies that produced them and our analysis will incorporate the perspectives of both the producers (patrons, artists) and consumers of art. Cross-listed as HAA 231.
CTH 254
LATE MEDIEVAL ART
Undergraduate
This course will explore the art of the late Medieval period from a broad range of cultures and styles: Byzantine, Romanesque, Gothic, and Islamic. We will discuss major stylistic trends and explore the relationship between art, culture, and religion. Works of art will be evaluated in terms of their social functions in the societies that produced them and our analysis will incorporate the perspectives of both the producers (patrons, artists) and consumers of art. Cross-listed as HAA 232.

CTH 255
ANCIENT AND MEDIEVAL ART
Undergraduate
A survey of the principal works of architecture, sculpture, painting and the industrial arts created in the Mediterranean basin and in Europe from the Byzantine through the Gothic age.

CTH 256
ITALIAN RENAISSANCE ART
Undergraduate
This course provides an overview of the history of Italian Renaissance art and architecture in Italy's primary centers of artistic production. Cross-listed as HAA 237.

CTH 257
BAROQUE ART
Undergraduate
Starting in 1600, from the vantage point of the Counter-Reformation and the rise of modern European states, Baroque Art covers the principal works of art & architecture; artists and patrons; and a wide sweep of social, religious, and political, conditions that impacted cultural thinking and production in the 17th century. Attention is focused on the most prominent artistic centers in Italy, the Spanish Netherlands, England, Spain, the Dutch Republic, and France. The in-class lectures with discussion are accompanied by field work to the Baroque collections of the Art Institute of Chicago. Cross-listed as HAA 238.

CTH 258
NORTHERN RENAISSANCE ART
Undergraduate
This course features the most significant works of art, their artists & patrons, the social and economic aspects of artistic production, and the dominant cultural issues that flowed brilliantly in Northern Europe - above all, in France, the Netherlands, Bohemia, and German-speaking lands - between 1300 and 1600, during the volatile period of the Renaissance and the outbreak of the Protestant Reformation. Although Flemish oil painting offers the most evident legacy of the Northern Renaissance to the casual museum visitor, this course also introduces the most important outputs in printmaking, sculpture, and the industrial arts, as in tapestry weaving and the fabrication of luxury articles in metalwork. Cross-listed with HAA 236.

CTH 259
THE ART AND ARCHITECTURE OF CATHOLICISM IN CHICAGO
Undergraduate
An experience-centered study of Catholic art and architecture. The history, ethnic origins and theology of the pieces will be considered.

HAA 130 is a prerequisite for this course.

CTH 260
ART, LITURGY AND LIFE
Undergraduate
This class examines how beauty and its antithesis, ugliness, permeate Catholic life and thought. Students will be introduced to the topic by considering examples from a variety of media, including ritual, painting, sculpture, architecture, crafts, and mural art. The students will learn not only how works of art accompany the performance and celebration of worship but also how Christians have learned to discern the living presence of the incarnate form of the divine Word within both art and liturgy. This course will demonstrate with concrete examples how art in Catholicism is the nexus that joins spirituality and liturgy. Theoretical orientation can be gleaned from the Christian theological tradition (St. Augustine, Hans Urs von Balthasar), Christian aesthetic theory (Jacques Maritain, Flannery O'Connor, Walker Percy, or Alejandro Garcia Rivera), liturgical reformers (Odo Cassel, Louis Bouyer, or Virgil Michel), or the document of Vatican II on liturgy, namely, Sacrosanctum Concilium.
CTH 261
CATHOLIC FAITH AND MUSICAL EXPRESSION
Undergraduate
An investigation of the relationship between Catholic life and music. The development of Catholic service music (masses, canticles, hymns, motets, etc.) as well as religious choral works may be studied.

CTH 264
CATHOLICISM AND LITERATURE
Undergraduate
This course will offer a broad introduction to some of the most important works of Catholic literature over an expansive temporal and geographic ambit. The course introduces poetry, fiction and essays by men and women from diverse cultural, political, linguistic and social points of departure. The students will think through the various ways in which Catholicism has engaged the creative faculties of diverse artists - most of whom are Catholic, but some of whom (e.g., Dostoevsky, Fermor) are not, even as they write extensively about Catholicism. As a result of the course, the students will be able to think about diverse literary genres and traditions in relation to Catholic faith, history and practice. They will also be given instruction in the terminology and techniques most useful for the textual analysis of literature, from the terms used to describe prosody to learning about the various novelistic genres presented in the course.

CTH 265
LITERATURE AND THE SACRED
Undergraduate
How human beings across cultures express their intimations of ultimate meaning in a variety of genres ranging from aphorisms and autobiographies to mythic and fictional narratives. Cross-listed with REL 223.

CTH 270
JESUS ACROSS CULTURES
Undergraduate
A study of the multiple and diverse (primarily theological, but also literary, artistic and philosophical) historical and contemporary images of Jesus, as a way of understanding the diversity of the Christian tradition and its impacts on society, and of understanding the issue of plurality or diversity itself in religious traditions. Cross-listed with REL 273.

CTH 271
ROMAN CATHOLICISM’S ENCOUNTER WITH OTHER RELIGIONS
Undergraduate
A study of how Roman Catholicism understands and responds to other religious traditions, other ways of being religious, and how the encounter with those other traditions affects Roman Catholicism’s understanding of itself and its teachings. Cross-listed with REL 285.

CTH 273
HISTORY OF THE CATHOLIC CHURCH IN THE U.S.
Undergraduate
This course traces the developments of the Catholic Church from the missionary enterprise to the position of a major social, political and economic institution. The course will examine the manner in which the hierarchical institution of the Catholic Church has related to the Liberal ideal of American Democracy. Cross-listed with HST 243.

CTH 274
IRELAND: RELIGION AND THE CONTEMPORARY “TROUBLES”
Undergraduate
An examination of the role of two Christian denominations (Protestant and Roman Catholic) in the more recent “Troubles” in the north of Ireland. Attempts to discover the contributions of religious differences in fueling and resolving the animosities between the Unionist and Republican sides; studies the social-historical dimension of the troubles and the Protestant and Catholic religious activities and official responses to them.

CTH 275
MEDITERRANEAN PEOPLE: 400 TO 1400 A.D.
Undergraduate
The important components of European society during the Middle Ages, including rulers, knights, and peasants, churchmen and nuns, urban merchants, intellectuals, and artisans. Who were these Medieval people, what differentiated them, how did they interact with each other, and how and why did these interactions change over time? Cross-listed with HST 210.
CATHOLICISM IN AFRICA
Undergraduate
An exploration of issues regarding the inculturation of Catholicism in Africa. Theological (Christology, authority, gender, the nature of marriage) and pastoral (style of worship, education, sacramental theology) issues may be examined.

CATHOLICISM AND THE FAMILY
Undergraduate
An historical and theological study of the family in Catholic life and thought. Images of family life in contemporary film and literature will be given special consideration.

RELIGION AND EDUCATION IN WESTERN CULTURE
Undergraduate
A study of the relationship between Catholicism and education in Western culture. The historical relationship between Catholic faith and educational institutions will be studied. A major part of the course will explore the theological meaning of education with special attention to the issues of freedom and indoctrination, moral education, authorities in education and issues of the modern Western university.

GOD, JUSTICE AND REDEMPTIVE ACTION
Undergraduate
A practicum and seminar combining student participation in social outreach programs with an examination of the theological and ethical issues raised therein. Students will volunteer at a field site for the quarter.

THE SOCIALLY ECONOMY OF CATHOLICISM
Undergraduate
An examination of selected economic and sociological aspects of Catholics and Catholic institutions. Problems in the sociological definition of Catholicism will be explored as a prerequisite to the study of Catholic demographics, patterns of financial contributions, the economic impact of Catholic schools and other institutions, international economic development and other social and economic issues.

IRELAND, 1450-1800, CONQUEST, COLONIZATION & REBELLION
Undergraduate
This course offers a survey of Irish history from the end of the middle ages to the union of Ireland and Great Britain in 1800. It traces the ways in which Ireland was brought under great English (later British) control through processes of agreement, conquest and colonization; and the ways in which various groups within Ireland sought to resist such developments.

IRELAND, 1800 - 2000
Undergraduate
Survey of Irish history from 1800 to 2000. Examines the course of Irish history from the Act of Union (creating the United Kingdom), through the struggles and reforms of the 19th century (Catholic Emancipation, the Famine and Irish diaspora, Fenianism, Land Reform and Home Rule), to the creation of the modern nation-state of the 20th century (the Easter Rising, partition and civil war, the role of Eamon deValera, the Republic, and the Troubles). Topics include the contributions of Irish culture and its influence in Europe and the world.

THE LIFE AND TIMES OF VINCENT DE PAUL
Undergraduate
A study of Vincent de Paul in his cultural and religious context.
The changing roles of women in 17th century France, the importance of women in Vincent de Paul's life, the key relationships of Vincent with Madame de Gondi, Jane de Chantel and Louise de Marillac will be studied in depth. The flowering of Vincent's new conception of possibilities for women in the Ladies of Charity, the Daughters of Charity and other groups of women will be explored.

An historical study of the Daughters of Charity from their foundation to the present.

An examination of the history of the Congregation of the Mission from 1816 to the present.

A study of the context, structure and major motifs of the Gospel of Matthew. Particular attention will be given to the evangelist's role as an interpreter of tradition and history for a community in transition. (Taught at Catholic Theological Union.)

A study of the Gospel of Mark with attention to its structure, major themes and key. (Taught at Catholic Theological Union.)

A study of the Third Gospel and its major theological themes. Particular focus on Luke's Christology and portrayal of discipleship for women and men followers of "the Way". (Taught at Catholic Theological Union.)

A study of the Gospel of John with attention to its distinctive style and theology, its overall structure and content. Key sections will be used to highlight such major Johannine motifs as religious symbolism, sacraments, community and spirituality. (Taught at Catholic Theological Union.)

A survey of traditional and contemporary practices of prayer, community, service, discernment and spiritual guidance, with the aim of assisting development of an integrated vision of the Christian spiritual life. (Taught at Catholic Theological Union.)
CTH 327
THEOLOGY AND PRACTICE OF PRAYER
Undergraduate
A survey of traditional and contemporary Christian prayer styles, the development of a life of prayer and the role of prayer in individual and ecclesial life. (Taught at Catholic Theological Union.)

CTH 328
RELIGIOUS EXPERIENCE AND THE LIFE CYCLE
Undergraduate
Using Erikson's eight stages of the life cycle as a framework, explores aspects of psychological development undergirding the experience of religion. Aspects covered include faith, symbolism, ritual, conscience, commitment, humility and mysticism. (Taught at Catholic Theological Union.)

CTH 329
SPIRITUAL CLASSICS OF THE EARLY CHURCH
Undergraduate
Study of selections from the most influential spiritual writings of the second to the sixth centuries: Ignatius of Antioch, Origen, Gregory of Nyssa, Athanasius, Desert Fathers and Mothers, Benedict, Augustine, Pseudo-Dionysius and others. (Taught at Catholic Theological Union.)

CTH 335
SPECIAL TOPICS IN RELIGIOUS EXPERIENCE, PRAYER AND LITURGY
Undergraduate
SPECIAL TOPICS IN RELIGIOUS EXPERIENCE, PRAYER AND LITURGY

CTH 336
THEORIES OF INTERPRETATION
Undergraduate
Philosophical hermeneutics and biblical interpretation. Cross-listed with PHL 355.

CTH 337
GREEK AND MEDIEVAL THOUGHT
Undergraduate
A study of selected thinkers and issues from the ancient Greek and Medieval periods. Cross-listed as PHL 310.

CTH 338
EARLY MODERN PHILOSOPHY
Undergraduate
A study of some of the main philosophers and philosophical movements from the 17th to the 19th centuries. Cross-listed as PHL 295.

CTH 339
PHILOSOPHY SINCE KANT
Undergraduate
A study of some of the most influential thinkers of the last 150 years.

PHL 100 or HON 105 is a prerequisite for this course.

CTH 340
ISSUES IN CONTEMPORARY THEOLOGY
Undergraduate
A study of methods, issues and movements in 20th-century theology. Specific topics vary and are noted in the current schedule.
CTH 341
LIBERATION THEOLOGY: THEORY AND PRACTICE
Undergraduate
Focuses upon the ideas and practices of a radical movement for the transformation of Christianity and for social justice that originated in the "Basic Christian Communities" of Latin America and spread from there to North America and the Third World. Cross-listed as REL 351.

CTH 346
THE PROBLEM OF GOD IN CONTEMPORARY SOCIETY
Undergraduate
Analysis of why God has become problematic for contemporary society is followed by a critical review of representative Christian attempts to respond. The course helps students evaluate their experience and respond intelligently to the modern problem of God. (Taught at Catholic Theological Union.)

CTH 347
ORIGINS AND ESCHATOLOGY
Undergraduate
A study of the notion of myth, mythic consciousness and the way myths are used in the Bible and in various cultures to express the origin of the world and humankind, the origin of evil and the individual and collective end. (Taught at Catholic Theological Union.)

CTH 348
CHRISTOLOGY
Undergraduate
A study of the foundational questions of Christology in the light of the critical, historical study of the Scriptures and theological tradition. (Taught at Catholic Theological Union.)

CTH 349
CHRISTOLOGY AND CULTURES
Undergraduate
A study of how the confession of Jesus Christ interacts with cultural processes. Special attention is given to the New Testament and patristic periods and also to contemporary movements in the world Church today. (Taught at Catholic Theological Union.)

CTH 351
NATURAL LAW AND CHRISTIAN ETHICS
Undergraduate
A study of the relevance of some Western and non-Western Natural Law traditions in view of arriving at a vision of a universal common good that can generate a Christian ethical discourse capable of intercultural and interreligious communication. (Taught at Catholic Theological Union.)

CTH 352
THE ETHICS OF THOMAS AQUINAS
Undergraduate
This course is a study in the moral theology of Aquinas. Particular attention is given to his treatment of happiness, charity, the passions, the virtues and the gifts of the Spirit. (Taught at Catholic Theological Union.)

CTH 354
SPECIAL TOPICS IN CATHOLIC THOUGHT
Undergraduate
Special topics in Catholic Thought; see schedule for current offerings.

CTH 355
THEOLOGICAL IDEAS AND ARTISTIC EXPRESSION
Undergraduate
An advanced study of various theological ideas (creation, martyrdom, death, resurrection, love, eschatology, etc.) as expressed in the arts.
CTH 369
SPECIAL TOPICS IN THE ART, MUSIC AND LITERATURE OF CATHOLICISM
Undergraduate
Special topics in the Art, Music and Literature of Catholicism; see schedule for current offerings.

CTH 370
THE CULTURES OF EARLY CHRISTIANITY
Undergraduate
Late Antique and early Medieval intellectual history in social context. Focus on Patristic theology and hagiography in the eastern and western Mediterranean, German oral epic, monastic exegesis and history and the Carolingian Renaissance. Cross-listed with HST 323.

CTH 376
GOD, SELF, AND SOCIETY IN MEDIEVAL CULTURE
Undergraduate
The roots of Western thought in medieval education, literature, philosophy, and science. The interactions between high theology, mysticism, and popular culture. History and autobiography. Cross-listed with HST 316.

CTH 377
INDIVIDUAL AND SOCIETY IN RENAISSANCE ITALY
Undergraduate
The flowering of culture, humanism and the arts in fourteenth and fifteenth-century Italy. Renaissance politics, patronage and diplomacy. Religion and the Papacy. Cross-listed with HST 317.

CTH 378
THE AGE OF REFORMATIONS
Undergraduate
Late medieval religion and society; the Reformations of Luther and Calvin, and the Catholic reform movements. Nationalism and the state in sixteenth-century Europe. The expanding world. Cross-listed with HST 318.

CTH 384
THE CULTURE OF AMERICAN CATHOLICS
Undergraduate
A sociological and historical investigation of the culture of American Catholics, with special attention to the literary works of contemporary American Catholic writers including Flannery O'Connor, Mary Gordon and Walker Percy. Cross-listed with REL 384 and MLS 464.

CTH 386
THE CATHOLIC CHURCH IN WORLD POLITICS
Undergraduate
Catholicism as it affects (and is affected by) world politics. Various topics might include war and peace, global economy, immigration, nationalism, etc. Cross-listed with PSC 345.

CTH 388
FOREIGN STUDY IN RELIGION
Undergraduate
Under this number, students taking courses in religion or theology as part of a DePaul-sponsored program of study abroad may receive Catholic Studies credit when approved in advance by the Director of the Foreign Study Program and the Director of the Program in Catholic Studies.

CTH 389
SPECIAL TOPICS IN THE SOCIAL DIMENSION OF CATHOLICISM
Undergraduate
SPECIAL TOPICS IN THE SOCIAL DIMENSION OF CATHOLICISM
CTH 391
VINCENT DEPAUL: THE MAN AND THE SAINT
Undergraduate
In this course, students will study St. Vincent de Paul in his cultural and religious context, including a trip to Vincentian locations in France. Students will reflect upon their time abroad, linking their experiential activity to a detailed academic exploration of St. Vincent’s life.

CTH 395
SPECIAL TOPICS IN VINCENTIAN STUDIES
Undergraduate
SPECIAL TOPICS IN VINCENTIAN STUDIES

CTU 410
TOPICS IN RELIGIOUS STUDIES
Graduate
Select Topics in Religious Studies. Course Taught at the Catholic Theological Union

DC 100
INTRODUCTION TO CINEMA: THE ART OF MAKING MOVIES
Undergraduate
This lecture-based course will introduce students to the art of cinema, from the point of view of the filmmaker. Through screenings of contemporary and classic films, students will gain an appreciation of the various crafts involved in the making of movies, such as: acting, directing, producing, screenwriting, cinematography, production design, editing, sound, or visual effects. This course is not intended for students who intend to major or minor in Digital Cinema. PREREQUISITE(S): None

DC 101
SCREENWRITING FOR MAJORS
Undergraduate
This course introduces digital cinema majors to dramatic writing for motion pictures. The topics covered include theme, plot, story structure, character, and dialogue. Emphasis is placed on telling a story in visual terms. Students are expected to develop and write a short screenplay. PREREQUISITE(S): None
DC 104
STAND-UP COMEDY
Undergraduate
Students will analyze and practice stand-up comedy as an art form, both onstage and as a foundation for film and television work. Students will learn about the history of stand-up comedy, particularly about the comedians who parlayed success on the stage into success in television and films, such as Bob Hope, Bill Cosby, Richard Pryor, Jerry Seinfeld, Dave Chappelle, Ellen Degeneres, Louis C.K., etc. The process of how comedians create material and hone it on stage will be analyzed. Additionally, students will mine their own lives for material, creating original stand-up comedy routines and work-shopping them in class. Finally, these routines will be performed in public, at venues such as the Main Stage at the world-renowned Zanies Comedy Club.

DC 105
DIGITAL MEDIA LITERACIES
Undergraduate
This course is designed to help students develop an informed, critical and practical understanding of new communication media, including ways to read, write and produce in a digital environment. We will explore implications of these technologies and their uses in schools, communities, and workplaces. The course also focuses on practices involving current and future technologies that hold promise for the creation and distribution of all media.

DC 110
FOUNDATIONS OF CINEMA FOR MAJORS
Undergraduate
This course deals with visualization and cinema literacy skills. Drawing heavily on a wide array of historical examples, the course will examine the many expressive strategies potentially usable in the creation of moving image art forms: image construction and manipulation, editing, composition, sound, narrative, and performance. An emphasis will be placed on story and storytelling. In addition to analyzing the works of others, students will also produce their own projects - putting theory into practice. Prerequisite(s): None

DC 111
VIDEO FOR SOCIAL MEDIA
Undergraduate
An introduction to video production for social media. Students learn how to produce videos with consumer-grade equipment (including cell phones). The course covers the basic principles of shooting, editing and uploading to social media sites. The course offers students an opportunity to create media specifically targeted for social websites such as: Facebook, MySpace, Twitter, etc. Students will learn the production process from idea execution to distribution. PREREQUISITE(S): None

DC 113
AUDIO FOR PODCASTS AND OTHER MEDIA
Undergraduate
This course is an introduction to the uses and practical applications of sound for multimedia. Students will study various uses of sound and music on the Internet from creative to professional websites. Using free or inexpensive hardware and software, students will learn to create and edit podcasts and attach audio files to programs and web pages such as Facebook, Itunes, Keynote, PowerPoint and other sites. The course will cover both Mac and PC applications so all students will be able to work on projects from their home computers. The course will also cover current legalities of digital media. PREREQUISITES: NONE

DC 120
VIDEO EDITING
Undergraduate
Students analyze and assemble dramatic scenes under a variety of conditions and narrative strategies. Editing theories, techniques and procedures, issues of continuity, effects, movement and sound are examined as they relate to the fundamentals of cinematic montage and visual storytelling. This class presents a variety of topics and experiences that are designed to broaden the student's understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means to an understanding of advanced editing tools and techniques. PREREQUISITE(S): NONE

DC 121
THE ART OF PRODUCTION DESIGN
Undergraduate
This course explores production design and art direction as a narrative art form in cinema and examines the collaborative relationship between director, production designer and cinematographer. Using films, observational readings, screenplays, lectures, research, and discussion, students will study the fundamentals of a production designer's approach towards visualizing and conceptualizing story. Students will also gain a historical perspective of how the role of production design has evolved and how advances in technology have influenced the various crafts.
**DC 125**  
**DIGITAL STILL PHOTOGRAPHY FOR NON-MAJORS**  
Undergraduate  
This course is an introduction to the history and aesthetics of still photography and to the concept of photography as a descriptive and interpretive artistic medium. Students studying photographs in this context will discover relationships between individual photographers’ choices and their own understanding of meaning. Discussions of the photos’ cultural contexts and meanings will deepen their understanding of the role of still photography as a conduit for cultural values. Students will learn the fundamental concepts necessary to shoot, edit, manipulate, and print digital still photographs. Also, students will acquire the knowledge needed to analyze and critique existing work. Students will be required to use their own digital still cameras for this course.

**DC 200**  
**MEDIA LITERACIES**  
Undergraduate  
This course is designed to help students develop an informed, critical and practical understanding of new communication media, including ways to read, write and produce in a digital environment. We will explore implications of these technologies and their uses in schools, communities, and workplaces. The course also focuses on practices involving current and future technologies that hold promise for the creation and distribution of all media. Prerequisites: None

**DC 201**  
**INTRODUCTION TO SCREENWRITING**  
Undergraduate  
This course is an introduction to and overview of the elements of theme, plot, character, and dialogue in dramatic writing for cinema. Emphasis is placed on telling a story in terms of action and the reality of characters. The difference between the literary and visual medium is explored through individual writing projects and group analysis. Development of synopsis and treatment for a short theatrical screen play: theme, plot, character, mise-en-scene and utilization of cinematic elements. PREREQUISITE(S): None.

**DC 202**  
**HISTORY OF MOTION PICTURE EDITING**  
Undergraduate  
This course studies the origins and rise of film editing as an art form, an industry, a set of technological practices ranging from analog film to digital video. The course examines critical historical events that impacted film editing: the emergence of the studio system, the coming of sound, narrative, experimental and documentary film, MTV, and audience shifts. For many, editing is the unique source of the art of filmmaking. This course addresses this question. PREREQUISITE(S): NONE

**DC 204**  
**HISTORY OF DOCUMENTARY**  
Undergraduate  
Course explores the variety of styles and concerns that shape documentaries. Content covers the first outdoor films made at the beginning of film history, the lyrical documentaries of Robert Flaherty, and the institutional documentaries inspired by John Grierson. Course also examines the broad range of developments of the post-World War II era, including the television documentary, cinema verite movement, collective and personal documentaries of anti-war and women’s movements, role and impact of video in the ‘80s and ‘90s, and recent trend to incorporate narrative techniques. PREREQUISITE(S): NONE

**DC 205**  
**FOUNDATIONS OF CINEMA**  
Undergraduate  
This course will examine the craft, technology, and aesthetic principles of media production. Drawing heavily on a wide array of historical examples, the course will examine the many expressive strategies potentially usable in the creation of moving image art forms: the importance of story and controlling ideas, storytelling with images, the basics of composition and editing, and an examination of narrative, documentary, and experimental approaches. In addition to analyzing the works of others, students will also produce their own projects thus, putting theory into practice.

**DC 206**  
**HISTORY OF CINEMA PRODUCTION**  
Undergraduate  
This course studies the origins and rise of cinema production from the perspective of a filmmaker. The course examines critical historical events that impacted the industry and the craft of filmmaking: the emergence of the studio system, the coming of sound, audience shifts, emergence of other media and the rise of digital technology. PREREQUISITE(S): NONE.
DC 207
HISTORY OF CINEMA I, 1890-1945
Undergraduate
This course examines the history of cinema as one of the most influential cultural forms of the 20th Century. We will study the aesthetic and technological developments of cinema during its first 50 years, as well as examine the social and economic factors shaping its history. Initially influenced by other art forms (theater, literature, painting) filmmaking quickly acquired its own formal system, language, and traditions. We will trace the changing styles, techniques, content, and methods of filmmaking as an art form, as popular culture, and as an industry. We will consider how cinema is bound to its social context via audience relations, economics, technology, and ideology. The limited scope of this course will cover primarily feature-length, narrative films as the dominant mode of filmmaking, although we will also look at the development of documentary and experimental filmmaking. The class will consist of lectures, screenings, and discussions.

DC 208
HISTORY OF AMERICAN CINEMA, 1946-1975
Undergraduate
From Film Noir to Hitchcock, an examination of post war Hollywood, film noir, wide screen and epic films, the development of the star system, the director as auteur, and the influence of international film movements and directors. Screenings, lecture, and discussion. PREREQUISITE(S):NONE

DC 209
HISTORY OF CINEMA III, 1975-PRESENT
Undergraduate
This final course in the film history sequence is designed to introduce students to a sense of modern film history and the multiple permutations of cinema around the modern film history and the multiple permutations of cinema around the globe. It presents film history from a global perspective, concentrating primarily on the development of new national and transnational cinemas. The course continues to chart the development of the American studios since the mid-1970s while examining the effects of media consolidation and convergence. Moreover, the course seeks to examine how global cinemas have reacted to and dealt with the formal influence and economic domination of Hollywood filmmaking on international audiences. Class lectures, screenings, and discussions will consider how cinema has changed from a primarily national phenomenon to a transnational form of communication in the 21st century.

DC 210
DIGITAL CINEMA PRODUCTION I
Undergraduate
This course is a beginning workshop in narrative film production. The course provides an introduction to the fundamentals of cinema, including camera and lens technology, composition, lighting, directing and sound recording. Utilizing digital technology, students will produce several films with an emphasis on visual storytelling and personal expression. PREREQUISITE(S): DC 220

DC 212
SAFETY TRAINING CERTIFICATION WORKSHOP
Undergraduate
This workshop will take students through a safety program that mirrors OSHA/I.A.T.S.E. Union standards in the industry. Students will be informed on all aspects of safety issues that arise everyday on the film set. Students will learn the safety protocols of lighting gear, safe storage on set, and working with electricity. Students will need this class in order to reserve CIM stage space and CIM equipment.

DC 214
INTRODUCTORY PRO TOOLS WORKSHOP
Undergraduate
This workshop course offers introductory training on Pro Tools software. Topics include recording, editing, mixing, and processing functions. No experience necessary. PREREQUISITE(S): None

DC 215
INTRODUCTION TO SOUND DESIGN
Undergraduate
This course is an introduction to sound editing and sound design. The course examines the place of sound in cinema, both artistic and technological. The course will cover the basics of sound, microphones, and analogue-to-digital conversion. Lectures, readings, and film clips will be used to illustrate the language of film sound, as practiced by film directors, sound designers, and editors. Students will learn to edit sound assignments with Pro Tools and current technologies. PREREQUISITE(S): None
DC 220
EDITING I
Undergraduate
Students analyze and assemble dramatic scenes under a variety of conditions and narrative strategies. Editing theories, techniques and procedures, issues of continuity, effects, movement and sound are examined as they relate to the fundamentals of cinematic montage and visual storytelling. PREREQUISITE(S): NONE.

DC 222
CLASSIC HOLLYWOOD FILM STRUCTURE
Undergraduate
Critical analysis of successful Hollywood films and their narrative structures. Films of various genres and eras will be examined. Students will learn how to recognize classical three-act structure in finished films and scripts. Students will develop a cinematic language with which to discuss films as well as a toolbox of techniques to use when making films. Key story concepts to be discussed include: protagonist, antagonist, want versus need, elements of the future, poetic justice, planting and payoff, catalyst, climax, and Aristotelian terminology. PREREQUISITE(S): NONE

DC 224
SCRIPT TO SCREEN
Undergraduate
This analytical course examines the screenplay's evolution to the screen from a writer's perspective. Students will read feature length scripts of varying genres and then perform a critical analysis and comparison of the text to the final produced versions of the films. Storytelling conventions such as structure, character development, theme, and the creation of tension will be used to uncover alterations and how these adjustments ultimately impacted the film's reception.

DC 225
DIGITAL STILL PHOTOGRAPHY
Undergraduate
This course is an introduction to the history and aesthetics of still photography and to the concept of photography as a descriptive and interpretive artistic medium. Students will learn the fundamental concepts necessary to shoot, edit, manipulate, and print digital still photographs. Students will learn to scan, capture, correct and enhance digital images and prepare files for output on black and white and color printing devices. Introduces students to theories, terminology, and applications of digital imaging technologies. Students will acquire the knowledge needed to analyze and critique existing work. In addition, students will involve themselves in hands-on exercises with digital still photography, manipulation and printing. Demonstrations will facilitate learning software techniques and systems of working. Use of Adobe Photoshop will be extensively covered in this course.

DC 227
FILM PHILOSOPHY
Undergraduate
An introduction to philosophy, using film as a lens through which philosophical ideas are examined. In discussion and writing, students analyze narrative or documentary films (classic or contemporary) on enduring philosophical questions such as: what is truth; what is right; or what is the meaning of life.

DC 228
ETHICS IN COMPUTER GAMES AND CINEMA
Undergraduate
Societies function based on normative ethics utilizing common sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment, in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded in games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact particularly on children will be discussed.
**DC 229**
**TELEVISION GENRES**
**Undergraduate**
Students will analyze and discuss some of the most important and influential shows in television history. Students will learn all about the writer-centric form of scripted television, where it's been and where it's heading. Students study serials and procedurals, network and cable shows, principal leads, partnerships and ensembles, comedy and drama, prevalent themes, innovations in content and form, the impact of DVR, and the impact of the internet.

**DC 232**
**CINEMA AND SOCIAL CHANGE**
**Undergraduate**
This course explores cinema that is created with the primary intention of effecting social, cultural or political change. Forms as varied as propaganda, documentary, narrative feature films, and music video will be discussed. In conjunction with this study, students will make a film or animation with the primary intention of effecting some measure of social change.

**DC 233**
**CINEMA & ART**
**Undergraduate**
This course will provide an overview of avant-garde film, video, animation and installation, and the relationship of these cinematic forms to Modern and Contemporary art. Students will be introduced to the major styles and themes of alternative and experimental moving image work from the past hundred years. Cinema & Art places emphasis on moving image work that is not usually included in a survey of mainstream cinema or film history. A major concern for the class is first-hand exposure to these original sources, and an examination of the relationship of these works to mainstream cinema and other types of popular culture. Topics covered in the class include the avant-garde and kitsch, Surrealism, experimental film, abstract animation, video art, camp, and video installation. In addition to lectures by visiting artists and viewing films, videos, and installation work, students will produce a short creative work in the style of their choice that responds to the work studied during the quarter.

**DC 235**
**ADAPTATION: THE CINEMATIC RECRAFTING OF MEANING**
**Undergraduate**
This course explores contemporary cinematic adaptations of literature and how recent re-workings in film open viewers up to critical analysis of the cultural practices surrounding the promotion and reception of these narratives. What issues have an impact upon the borrowing and reinterpreting of narratives of film? How, when, and where can we identify such borrowings and reinterpretations in multiple contemporary iterations of the same narrative? PREREQUISITE(S): NONE

**DC 237**
**RELIGION IN THE MOVIES**
**Undergraduate**
The purpose of this class is to provide a forum for students to examine various religions and how they are portrayed in the movies. Students will have the opportunity to learn about multiple religions, as well as the opportunity to study the different ways each religion is represented in film. Different genres of films will be used to facilitate discussions about various dimensions of and issues in religion. PREREQUISITE(S): None

**DC 238**
**CINEMATIC DEPICTIONS OF GOD**
**Undergraduate**
The purpose of this class is to provide a forum for students to examine various interpretations and portrayals of a "God" figured in contemporary cinema. Students will reflect upon the way that cinematic depictions of "God" have changed, challenged, or helped shape their own personal perception of a "God" figure, or whether film/media has shaped their beliefs on the existence of (or lack of) a "God". PREREQUISITE(S): None
**DC 250**  
**THE ART OF SCREEN ACTING**  
*Undergraduate*

This course will examine the role of acting, actors, and actor-director collaboration in the development of narrative cinema. The screen demanded a new approach to acting which differed markedly from the theatrical traditions which proceeded it. Seminal practitioners of actor training such as Constantin Stanislavski and his American interpreters Lee Strasberg, Sanford Meisner, and Stella Adler and their students (such as Brando, Pacino, DeNiro, Hoffman, and Duvall) have had an incalculable influence on how screen actors prepare for a role and work with directors. This course will survey the major acting techniques and approaches, examine major films as case studies, and explore contemporary approaches to screen acting and actor-director collaboration in the cinema.

**DC 251**  
**ACTING FOR THE CAMERA**  
*Undergraduate*

This course is designed for acting and directing students who want to develop skills and gain experience in acting and directing for the camera. Course sessions include lecture, practical exercises and preparation for analyzing and blocking a scene and working on a set. Students will screen select film clips to evaluate performances, explore methods to prepare for an audition, discuss the actor/director relationship and examine the professional requirements of relating to a crew. The final project will include directing or acting in a short dialogue scene for analysis and critique. Prerequisites: DC 250 and DC 310 or PRF 313

**DC 261**  
**FIRST FILMS**  
*Undergraduate*

This course will explore the first feature films of contemporary filmmakers, studying the roots of their respective styles of filmmaking, the obstacles they faced in making their first films and their respective filmmaking styles that have evolved in later films. Prerequisites: none

**DC 269**  
**DOCUMENTARY STORY AND DEVELOPMENT**  
*Undergraduate*

The course is designed to further develop the skills needed for creating compelling and dramatic non-fictional storytelling. The class will focus on the Development/Pre-Production stage of documentary production and will help students learn how to research and focus their story, define their audience, develop a proposal and budget, and plan for production. The class will investigate various approaches to documentary and analyze the basic narrative principles in various media. Regular viewing of documentary films will encourage discussion on topics of finding original stories, research and development of narratives, developing characters, story structure, the ethics of representation, and the question of 'what is truth?'

**DC 270**  
**TOPICS IN DIGITAL CINEMA**  
*Undergraduate*

Advanced study in cinema focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. Please check the CDMI website for description of specific quarter offering.

**DC 271**  
**INTRODUCTION TO TELEVISION PRODUCTION**  
*Undergraduate*

An introduction to the basic principles, procedures, and techniques of television production. The course heavily utilizes Digital Cinema's TV studio. Students are organized in teams and create various TV broadcasts. Students learn how to operate TV switchers, TV cameras, sound, and graphic equipment. The course covers the fundamentals of producing, scripting, directing, and editing for television.

**DC 272**  
**INTRODUCTION TO TELEVISION WRITING**  
*Undergraduate*

The primary objective of this course is to learn how to write for television, for both network and cable, focusing on fiction and non-fiction TV programs including news, talk, documentaries, dramas and comedies. The course will assist students in improving their writing skills as well as help them understand the basic approaches and techniques in writing for television. Prerequisites: DC 201
DC 273
FILM/VIDEO AESTHETICS I
Undergraduate
Course covers basic concepts and terminology of film and video as forms of art and mass culture. This course covers the aesthetic systems that constitute film and video: plot structures, sets, costumes and makeup, acting, lighting, cinematography, editing, and sound. We consider how the interaction of these elements produces meaning in film and video. We also examine how these concepts are practiced in film production. After mastering the aesthetic concepts, students also examine their use in three different modes of film communications: fiction, documentary, and the avant-garde. PREREQUISITE(S): NONE

DC 274
IMAGE, OPTICS AND CINEMATIC MOTION
Undergraduate
Cinematography is the scientifically grounded discipline of making lighting and camera choices in order to record moving images. This course deals with the basic mathematics, physics, and photochemistry that underlie cinematography and that motivate camera design and construction. A student who masters the foundations of cinematography through a mixture of lectures, readings, exercises, and labs will be able to evaluate and understand how motion based recording choices affect perception of moving images they see every day.

DC 275
CINEMATOGRAPHY
Undergraduate
This course is an intensive exploration of the craft, technologies and aesthetic principles of cinematography and lighting techniques. Lectures and in-class demonstrations will cover film and video formats, film stocks, film and digital cameras, exposure, lenses and optics, lighting units, lighting placement, lighting control, camera support, and camera movement. Class sessions will consist of lectures, demonstrations, hands on with cameras and lighting units, exercises, and screenings of selected film clips which demonstrate specific cinematography and lighting techniques. PREREQUISITES: DC 210, DC 220

DC 280
STORYTELLING WITH MACHINIMA
Undergraduate
The course will focus on two areas: the craft and technology of Machinima filmmaking and the use of Machinima in storytelling. Within the context of learning the craft of Machinima, students will explore character and character development, production design, and the fundamentals of visual storytelling.

DC 298
INTERNSHIP IN MEDIA PRODUCTION/POST-PRODUCTION
Undergraduate
This course offers students the opportunity to reflect on an internship while gaining professional experience, industry contact, and referrals while still in school. The class fulfills the Junior Year Experiential Learning credit and must be taken concurrently with an approved internship. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can qualify for the course. Classroom time is required. Admission to the program requires consent of internship course instructor after the verification of the student's internship. Prerequisites: Internship

DC 299
INTERNSHIPS IN MEDIA AND DESIGN (NON-JYEL)
Undergraduate
This course is an internship/independent study course for students who have already fulfilled their JYEL credit. This course offers students the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for this course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student's internship. PREREQUISITE(S): Internship

DC 301
ADVANCED SCREENWRITING I
Undergraduate
In this course, students study, analyze and produce motion picture scripts. This course emphasizes the use of traditional storytelling, classic mythology and how these devices apply to contemporary screenplays. Students will move from concept/treatment to a completed first act of a feature length screenplay of their own. This script will be completed, revised, and polished in DC 302 and DC 303. PREREQUISITE(S): NONE
DC 302
ADVANCED SCREENWRITING II
Undergraduate
This course focuses on the writing of the second and third acts of feature length screenplays. Students finish and begin revising the first draft of the script started in DC 301. Emphasis is placed on proper character development, effective use of conflict, and adherence to the three act structure. PREREQUISITE(S): DC 301

DC 303
REWIRITING THE FEATURE FILM SCRIPT
Undergraduate
This class focuses on practical ways to approach the rewriting process for feature film screenplays. Through group workshops and assignments, students isolate issues with plot, character development, dialogue and pacing in their script and work on addressing them in a full draft rewrite. Student must possess a complete feature length script in order to enroll in the course. PREREQUISITE(S): DC 302

DC 304
TOPICS IN SCREENWRITING
Undergraduate
Advanced study in screenwriting focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. May be repeated for credit. PREREQUISITES: DC 101, DC 201 or by consent of the instructor

DC 305
PITCHING SEMINAR
Undergraduate
Students will learn about various forms of pitching, including pitching existing spec scripts, new ideas, and developing takes on existing properties. They will learn tips and techniques for having successful meetings, including how to prepare and how to read the dynamics of a room. They will write, practice, and workshop their own pitches. PREREQUISITE(S): DC 101 or DC 201

DC 306
WRITING THE SITCOM
Undergraduate
This course focuses on the fundamentals of writing the half-hour situational comedy. Creating comedic characters, situations, and developing multiple storylines are covered. Students will create an original sitcom pilot. PREREQUISITE(S): DC 272

DC 307
WRITING THE EPISODIC DRAMA
Undergraduate
This course examines the storytelling techniques necessary to write an hour long television dramatic series with an emphasis on characterization and structure. Students will create an original hour long pilot. PREREQUISITE(S): DC 272

DC 308
WRITING ON ASSIGNMENT
Undergraduate
Modeled after professional writing assignments, this advanced course challenges students to complete a feature length screenplay in ten weeks. Lectures and strict weekly page submission deadlines provide a practical framework on how to write quickly without sacrificing quality. Constructive analysis will be used in discussing produced scripts, weekly assignments and group workshops to reveal the writer's unique voice and perspective. It is imperative students possess a viable concept and outline before enrolling. PREREQUISITE(S): DC 301

DC 309
FEATURE DEVELOPMENT
Undergraduate
This course offers a practical approach to the screenwriter's role in the development of a feature film. Emphasis will be placed on obtaining a greater understanding of narrative conventions, script analysis and the film market. From agents to studio executives, we will examine the varying points of view that comprise the development process. Constructive analysis will be used to break down feature length produced screenplays and student work. The assignments and class discussions are designed to expose the inner workings of Hollywood and provide a framework for what it takes to succeed in the entertainment industry. PREREQUISITE(S): DC 101 or DC 201
DC 310
TV PRODUCTION WORKSHOP
Undergraduate
In this workshop, students will produce projects for internal and external clients. Students will learn professional practices and work with clients to create projects such as promos, documentaries, commercials, short series and live events from concept inception to finished product. Through this process, students will examine different professional roles involved in the TV production process. PREREQUISITE(S): None

DC 310
DIGITAL CINEMA PRODUCTION II
Undergraduate
This course expands on topics covered in DC 210 Production I. Students will refine their skills in the areas of line-producing, pre-production, cinematography, lighting, sound recording, post production workflow. PREREQUISITES: DC 210, DC 220, DC 275

DC 311
MUSIC VIDEO PRODUCTION
Undergraduate
In this course, we will analyze ways in which artists combine visual imagery with music as with MTV-style music videos. The music business and how it relates/effects music videos. Each student will develop his or her own music video project from script to final edit with a local band of their choice, through their own scheduling process. PREREQUISITE(S): DC 210, DC 220

DC 312
SCORING FOR FILM AND VIDEO
Undergraduate
Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances the visual statement. Course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score for their own film or video as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied. PREREQUISITE(S): DC 215

DC 313
PRODUCTION SOUND
Undergraduate
This workshop based course offers production recording and mixing techniques. Subjects include microphone selection, basic acoustics, boom techniques, dual system recording practices, and mixing. Several projects will be completed throughout the quarter. PREREQUISITE(S): DC 215

DC 314
ADVANCED PRO TOOLS WORKSHOP
Undergraduate
This workshop course offers advanced training on Pro Tools software. Topics include advanced recording, editing, mixing, and processing functions. This course is appropriate for undergraduate and graduate students who have taken a sound class but need a refresher on Pro Tools before taking DC 315/415, DC 317/417, DC 318/418, or DC 319/419. PREREQUISITE(S): Some Pro Tools or other digital audio workstation experience necessary.

DC 315
POST-PRODUCTION SOUND DESIGN
Undergraduate
This course expands on topics covered in DC 215. Emphasis will be on mixing and editing techniques for music and sound effects. Coursework also includes the recording of natural sounds and special effects to reinforce images and the story. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound tracks for traditional as well as interactive narratives. PREREQUISITE(S): DC 215

DC 316
TOPICS IN POST-PRODUCTION SOUND
Undergraduate
Advanced study in post-production sound focusing on a specific area each quarter such as: A.D.R., Foley, Scoring, Sound Effects, Mixing, etc. May be repeated for credit. PREREQUISITES: DC 215 or by consent of the instructor.
DC 317
ADVANCED SOUND MIXING
Undergraduate
This workshop based course offers advanced mixing techniques for Stereo and Surround Sound. Subjects include mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of Surround Sound and contemporary surround techniques will be covered. Several projects will be completed throughout the quarter. PREREQUISITE(S): DC 315

DC 318
ADVANCED DIALOGUE EDITING
Undergraduate
This workshop based course offers dialogue recording and editing techniques. Subjects include voice processing, basic acoustics, room tone matching, proximity processing, frequency analysis and dialogue mixing. Several projects will be completed throughout the quarter. PREREQUISITE(S): DC 315

DC 319
ADVANCED SOUND EFFECTS RECORDING AND EDITING
Undergraduate
This workshop based course offers sound effects recording and editing techniques. Subjects include hard effects, backgrounds, room tone, Foley, basic acoustics, sound processing, layering and mixing. Several projects will be completed throughout the quarter. PREREQUISITE(S): DC 315

DC 320
EDITING II
Undergraduate
This course expands on topics covered in DC 220. Emphasis is on developing the student’s understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means of mastering advanced editing tools and techniques. PREREQUISITE(S): DC 220

DC 321
PRODUCTION DESIGN
Undergraduate
In this course students will analyze the collaborative relationship between production designer, director and cinematographer as it relates to the role of production design. By the end of the term students will be able to demonstrate a comprehensive understanding of a production designer's role, critique the synthesis of stagecraft, set decoration, prop, costume, and make-up choices as narrative tools, and evaluate existing works as well as their own work. PREREQUISITE(S): DC 121

DC 322
EDITING STYLES AND TECHNIQUES
Undergraduate
This course is designed for editors looking for innovative ways to tell stories, by exploring how editing techniques have been pushed by artists working in the margins. Cutting edge editing techniques are a co-opting of historical and experimental styles, repackaged and used in a narrative context. A series of practical exercises and a freeform final project using found footage allow editors to explore the array of editing techniques adopted from experimental work while discovering their personal style as editors and storytellers. Editors will consider how form affects content and will reinvent techniques in ways to surprise modern audiences. PREREQUISITE(S): DC 220

DC 323
PRE-PRODUCTION FOR CINEMA
Undergraduate
This course will cover the pre-production phase of short and feature-length filmmaking, including fundraising, breaking down scripts, scheduling, budgeting and pre-visualizing. Professional scheduling, budgeting and pre-visualization software will be utilized. Additionally, the roles of the creative producer, line producer and assistant director will be examined. Prerequisite(s): DC 210

DC 324
LOGIC PRO MIDI SEQUENCING WORKSHOP
Undergraduate
This course offers training on all aspects of MIDI sequencing in Logic Pro software. All aspects of MIDI will be covered including recording, programming, editing, mixing and processing functions. PREREQUISITE(S): None
DC 325
COLOR CORRECTION
Undergraduate
Students acquire a working knowledge of the aesthetics and technical aspects of the post-production phase of color correction. Content addresses theory and application of color correction, image control, and manipulation techniques. Principles of color theory and the tools available to filmmakers engaged in the processes of electronic media and image manipulation are explored through lecture, interactive computer exercises, and hands-on experience with professional color correction software. PREREQUISITE(S): DC 320

DC 326
ADVANCED COLOR CORRECTION
Undergraduate
This class expands on topics covered in DC 325. Students will refine their skills in the areas of Primary, Secondary and Color FX room advanced grading techniques used by professional colorists. This class will explore more in detail colorist strategies, grading workflows, aesthetics and technical aspects of color correction for the digital cinema. Students will explore color correcting trends that are popular in feature films and national television commercials. Through a series of three short projects and a final project, students will practice using the techniques they study in class. PREREQUISITE(S): DC 325

DC 328
WRITING THE Web SERIES
Undergraduate
Students will examine various webisode structures, pitch original concepts for a web series, and ultimately write a complete season consisting of one dozen 5-10 minute episodes. PREREQUISITE(S): DC 101 or DC 201

DC 331
ADVANCED PRODUCTION DESIGN
Undergraduate
In this course, students will construct a set from a prepared script. Beginning with the written page, students will synthesize through all the stages of construction including visualizing, drafting, constructing, painting and finishing. PREREQUISITE(S): DC 321

DC 333
CINEMATIC SPACE
Undergraduate
This seminar mixes theory and practice to expose students to an in-depth exploration of different techniques and possibilities concerning cinematic space. Beginning with an introduction to the fundamental differences between montage and mise-en-scene, the course will teach students the art and craft of designing, blocking and executing plan sequences, starting with static camera shots and ending in complex 3D camera moves. PREREQUISITE(S), DC 210 and DC 275

DC 340
EDITING III
Undergraduate
This course provides an advanced workshop for students to edit their own narrative or documentary projects. Students will be expected to bring in their own footage, and will take their projects from logging, through rough cut, to picture lock. Post-production workflow, and basic sound design and color correction for picture editors will also be emphasized. PREREQUISITE(S): DC 320

DC 341
STORYTELLING FOR VIDEO GAMES
Undergraduate
This course examines the writer's role in the game development process and how storytelling conventions like character, conflict, and plot are utilized to enhance gameplay. Emphasis will be placed on building an understanding of game narratives, interactivity, and working with design teams. Students will develop a design document highlighting characters, locations, dialogue scripting, and overall gameplay for an original video game idea. PREREQUISITE(S): DC 101 or DC 201
DC 342  
ADVANCED TOPICS IN EDITING  
Undergraduate  
This class will be an in-depth examination of an editor, editing style, or editing theory that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and editing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Editing projects will be assigned through the quarter. Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): DC 220

DC 343  
WRITING THE SHORT FILM FOR PRODUCTION  
Undergraduate  
Students will study the essential elements and conventions for writing the short film including but not limited to character, structure, and tension. Students will write a polished short film (no longer than 25 pages) designed to be produced. Students will learn how to put together a professional proposal to apply for internal or external production funds and financing. PREREQUISITE(S): DC 101 or DC 201

DC 344  
ADVANCED SCREENWRITING LAB  
Undergraduate  
This advanced course is designed to take existing writing projects (including but not limited to features, pilots, television specs, web series, short scripts) at various stages of development and provide the practical means to move forward through constructive workshop sessions. Stories will be broken down to examine concept viability and the overall execution of the narrative. Instructor and peer critiques will challenge the writer to enhance their voice on the page with the goal of creating work that is unique, engaging, and commercial. PREREQUISITE(S): DC 101 or DC 201

DC 345  
EXPERIMENTAL FILMMAKING  
Undergraduate  
This production-based course explores breaking the boundaries of conventional cinema through experimental formal approaches, techniques and content. Students will create projects in the modes of key figures form the history of experimental and avant-garde film and video, such as Kenneth Anger, Stan Brakhage, Luis Bunuel, Maya Deren, Dana Hodgdon, David Lynch, Bill Viola, or Andy Warhol. Additionally, students will be encouraged to capture, edit and process material through non-traditional means, and to explore unconventional content. Screenings of experimental works may be tailored to the specific interests of students as projects develop. The influences of experimental cinema on conventional media such as Hollywood movies, commercials, and music video will also be analyzed. PREREQUISITE(S): DC 220 and DC 210

DC 349  
ACTING FOR FILMMAKERS  
Undergraduate  
This course is designed to provide students who plan to work with actors in any aspect of cinema or interactive media, with a foundation in the actor's craft. This will be a hands-on, practical class in which all students will be required to participate fully in the exercises and scene work. Topics to be covered include: relaxation, concentration, trust, listening, sensory work, physical actions, improvisation, imagination, needs, circumstances, objectives, obstacles, scene analysis and scene work. The course will culminate in a staged scene to be presented in class. PREREQUISITE(S): None

DC 350  
MODES OF DIGITAL DISTRIBUTION  
Undergraduate  
This course deals with the process of creating video for multiple modes of distribution, i.e.: DVD authoring, compression and streaming. It also covers the various outlets available for content distribution. Students will learn content creation, authoring, capture, encoding and serving with an emphasis on video compression and encoding. Students will also come to have a working understanding of codecs, DVD chapters, Easter eggs, region coding, and be able to create a working web page with embedded streaming content. PREREQUISITE: DC 320

DC 360  
3D MOVIE PRODUCTION  
Undergraduate  
This course provides an introduction to stereoscopy which is the creation of a 3D effect in still images and movies. The course covers the history of stereoscopy, the perceptual theories that make 3D images possible, and the technologies that can be used to create the effect of stereoscopic depth. Designed for both animators and live-action filmmakers, students taking this course will get hands-on experience producing stereoscopic images and movies using a variety of tools. PREREQUISITE(S): ANI 230 or DC 275
DC 361
COMMERCIAL PRODUCTION
Undergraduate
This course will study the commercial production industry and the production techniques and processes of televised commercials and public service announcements. Industry standards for creating commercials for a client will be discussed. Additional topics include copywriting, style guides, casting, media, and client-relations.

DC 370
ADVANCED TOPICS IN CINEMA
Undergraduate
This class will be an in-depth examination of a filmmaker, film genre, or film movement that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and critical writing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): None

DC 371
DOCUMENTARY PRODUCTION
Undergraduate
This course covers all phases of documentary filmmaking including interview techniques, storytelling with interviews and B roll, and documentary cinematography. For the final project each student will produce a completed documentary film. PREREQUISITE(S): DC 210, DC 220

DC 372
TOPICS IN TV PRODUCTION
Undergraduate
This course is a hands-on experience in television production of news and public affairs programs. Students learn through theory and practice the role TV Producers and their teams play in creating various TV programs.

DC 373
ADVANCED DOCUMENTARY PRODUCTION
Undergraduate
This advanced course in documentary production is designed for students who already have experience with making documentaries. In this course, each student will direct and produce a substantial short subject documentary and serve as a crew member on at least one other student project. Topics covered will include choice of subject matter, filmmaker's POV, dramatic structure, proposal writing, and a variety of technical, aesthetic, practical, and ethical concerns related to producing professional documentary projects. PREREQUISITE(S): DC 371/471

DC 374
ADVANCED TOPICS IN DOCUMENTARY
Undergraduate
This class will be an in-depth examination of a documentary filmmaker, film movement, production style or technique that has had a significant influence on the development of documentary storytelling and expression. Through lectures, screenings, readings, discussions, and creative assignments, students will analyze the distinctive traits of the selected topics within the broader context of cinema history and culture and apply them to their own projects. Specific topics will be selected by the instructor and will vary with each quarter.

DC 375
ADVANCED CINEMATOGRAPHY
Undergraduate
This class explores the emerging HDTV/HDV technologies along with advanced production techniques of camera movement, lighting, rigging, camera filtration and shot composition. Students will be given hands on training in the use of the latest High Definition Video cameras and then create a short script which they will shoot and edit in High Definition. PREREQUISITE(S): DC 275

DC 376
VISUAL DESIGN
Undergraduate
Definition, analysis, and structure of visual components that cinema employs to support and emphasize the story. Theory of visual design will be applied through student still photos, as well as an original, visually-oriented, narrative or documentary short film, animation or game design. PREREQUISITES: DC 220
DC 377
LIGHTING I
Undergraduate
Introduction to safe and established practical operation of studio lighting and grip equipment. Students will learn a variety of basic lighting techniques, set electrical distribution, dolly set up, grip and lighting equipment. PREREQUISITE(S): DC 210

DC 378
COMPOSITING AND SPECIAL EFFECTS
Undergraduate
Layering of live action and rendered 3D graphics to produce special effects. Includes such techniques as layered texturing / rendering, depth-based effects, motion tracking, and camera matching. Prerequisite: DC 210.

DC 379
PRE-PRODUCTION WORKSHOP
Undergraduate
This two-credit course will provide valuable pre-production work on targeted productions, such as Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Professional scheduling, budgeting and pre-visualization software may be utilized. PREREQUISITE(S): By instructor permission only.

DC 380
PROJECT BLUELIGHT
Undergraduate
Production of a feature-length digital motion picture written by students or faculty within the Digital Cinema program. Students will work as crew under supervision of faculty members heading each of the various production areas. Goal is to produce a completed digital motion picture suitable for festivals or distribution.

DC 381
DISTRIBUTION AND EXHIBITION
Undergraduate
This course explores the commercial and economic structure of the contemporary film industry. Topics to be covered include: the development of “Hollywood” as a distribution mechanism; the subsequent emergence of an independent commercial sector; the revenue stream from “box office” and ancillary markets, through distributors and to producers; the history and current state of theatrical exhibition; and emerging modes of content delivery.

DC 382
POST-PRODUCTION WORKSHOP
Undergraduate
This two-credit course will provide an opportunity for students to apply their post-production skills and work collaboratively on projects happening during the academic year. These projects can be Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Students will work under faculty supervision and gain valuable experience collaborating as part of post-production team. Professional post-production applications, equipment, and facilities will be utilized. PREREQUISITE(S): By instructor permission only.

DC 383
COMEDY, JOKE, AND SKETCH WRITING
Undergraduate
Students will learn techniques and formulas for joke writing, writing sketch comedy packages, and writing for news driven comedy shows. Students will apply these skills to their existing scripts as well as to developing new material. PREREQUISITE(S): DC 101 or DC 201

DC 384
LIGHTING II
Undergraduate
Continuation of Lighting for Cinema 1 with introduction to more advanced lighting setups. Students will learn a variety of lighting techniques - night exterior, practical location, complex lighting cues, etc... Advanced lighting and grip equipment will be utilized - Hmi, LED, theatrical and fluorescent.
DC 385  
PRODUCING  
Undergraduate  
This course focuses on the role of the producer from idea origination and script development to financing and physical production and, finally, to distribution and exhibition. Students master the concepts of revenue streams, constructing deals (gross and net point participation), copyright, marketing, and box office analysis. Production management and line producing are also covered. From script breakdown and production preparation to post-production supervision and delivery, the physical production process is defined. PREREQUISITE(S): None

DC 386  
DOCUMENTARY PRODUCING  
Undergraduate  
The course will cover the key areas of producing for documentaries, which encompasses pre-production, production, marketing, fundraising, and community outreach and engagement. Students will gain knowledge of the ways in which producers engage with writers, directors, editors, grant making institutions, individual donors, festival marketplaces, exhibitors and broadcasters. This course will be project-based and include developing a fundraising and distribution plan, identifying audiences, grant writing and developing a proposal.

DC 387  
HOLLYWOOD HISTORY  
Undergraduate  
Students will gain a deep understanding of the history and foundation of the film industry through behind-the-scenes access to working studios, historical readings and discussions of the material, and the unique opportunity to have access to the Warner Brothers Archives, the largest single studio collection in the world, housing all of the WB materials from 1918 (the release of the studio's first feature film) through 1968 (when the studio was sold to Seven Arts). Note: Students must be participating in the DePaul LA program to be eligible to enroll.

DC 388  
FILMMAKERS SEMINAR  
Undergraduate  
Each week, students will be given the rare opportunity to speak directly with some of the industry's biggest players. Hollywood directors, writers, cinematographers, editors, producers, agents, managers, entertainment lawyers, development executives and others will come to class, discuss their journeys, offer advice, and answer questions. The class will culminate with an industry mixer, where these professionals, along with dozens more, will join the students for a relaxed evening of networking. This is an invaluable opportunity for students to begin to form meaningful relationships that can help them as they transition from student to filmmaker. Note: Students must be participating in the DePaul LA program to be eligible to enroll.

DC 389  
THE BIG PICTURE: THE ENTERTAINMENT INDUSTRY  
Undergraduate  
This course introduces students to vital information about the industry in which they will work. Students will learn industrial analysis of production, distribution, and exhibition sectors, including mastering concepts of revenue streams, constructing deals (gross points and net point participation), copyright, marketing, and box office analysis. Students will also study the structure of organizations and groups crucial to the entertainment industry: studios, talent, agents, exhibition (markets: theatrical, virtual and ancillary), professional organizations including guilds like ASC, and media licensing firms like ASCAP and BMI. There will be an emphasis on global industry. Prerequisite: DC 205

DC 390  
DIRECTING  
Undergraduate  
This is a course in directing motion pictures. Topics include casting, rehearsals, the basic relationship between the director, actor, and script, script breakdown, camera placement, and shooting for continuity editing. Each student will produce and direct a scene study and a short narrative film. PREREQUISITE(S): DC 220, DC 310

DC 391  
POST-PRODUCTION SEMINAR  
Undergraduate  
This course is an introduction and overview of Post Production, from the end of principle photography, through editing, to final delivery. Students will learn workflows, technical aspects, the online environment, and the best way to finish and deliver a film. PREREQUISITE(S): DC 220
DC 392
DIRECTING II
Undergraduate
Advanced study of directing for cinema. Students will continue exploration of directing concepts including: casting, rehearsing, analyzing script, blocking and working with actors, blocking and moving camera, and re-directing through editing and sound. Course will culminate in a final project directed by each student, using professional actors, professional equipment and/or facilities, and an original screenplay. PREREQUISITE(S): DC 390

DC 393
FILM FESTIVALS WORKSHOP
Undergraduate
An introduction to film festivals and their role in independent cinema and the Hollywood studio system. The global proliferation of film festivals will be examined from the perspective of both film studies scholars and filmmaking professionals. Students will research the history of major festivals, develop festival strategies for student or independent films, and attend film festival screenings, panels, and/or networking events. PREREQUISITE(S): None

DC 395
TOPICS IN PRODUCTION
Undergraduate
This course allows advanced students to work in close conjunction with a faculty member to develop a digital media project. Topics focus on a specific genre or medium each quarter such as: traditional movie production (horror, comedy, action/adventure, documentary, experimental, etc.), animation (narrative, non-narrative, web-based, cinematic, etc.), and advanced digital game design (story, strategy, graphics, etc.). Students work to produce a five to ten minute project. PREREQUISITE(S): DC 310, DC 315 AND DC 320

DC 396
TOPICS IN STUDY ABROAD
Undergraduate
This practical course offers students an intensive experience studying cinema and/or television production abroad. Students will be introduced to the cultural context, practices, philosophies, styles and business of film and TV. Facility tours, screenings and cultural experiences may be used to supplement the classroom activities in order to deepen the understanding of the experience abroad. PREREQUISITE(S): None

DC 398
DIGITAL CINEMA CAPSTONE
Undergraduate
This course provides a Digital Cinema-specific capstone experience for the student. Students must have completed at least one of the three Topics in Production courses before they enroll in this course. The capstone course will connect the students' Digital Cinema course work with the University courses s/he has taken through three components: student-generated production packages, class/instructor discussions, and the actual creation/production of the student's proposal. The production piece is the primary focus of this course. PREREQUISITE(S): DC 303 OR DC 310 OR ANI 350

DC 399
INDEPENDENT STUDY
Undergraduate
Variable credit. PREREQUISITE(S): Consent of dean.

DC 400
WRITING THE TELEVISION SPEC SCRIPT
Graduate
In this class, students will learn the basic teleplay structures for both half-hour and hour-long television shows. Students will choose an existing show and write a spec episode, practicing the skills of matching character voice, structure, and tone. PREREQUISITE(S): DC 101, DC 201, or DC 501

DC 401
WRITING THE SHORT MOTION PICTURE
Graduate
Students will study the essential elements and conventions for writing the short film including, character, structure, and tension; they will examine the fundamental differences between a feature script and short form. Students will write a polished short film designed to be produced as the student's MFA thesis or other route of production.
DC 402
WRITING THE FEATURE I
Graduate
This course focuses on creating a well-vetted original concept, step outline, and first act for a feature length screenplay. Students will analyze the conventions of plot and character-driven narratives and participation in workshop sessions in an effort to develop their unique voice on the page. This script should be completed, revised and polished in DC 403 and DC 404. PREREQUISITE(S): DC 501

DC 403
WRITING THE FEATURE II
Graduate
This course focuses on completing the second and third acts of the feature length screenplay that was developed in DC 402. Class discussions and workshop sessions will help students support the main conflict of their narrative through the use of rising action, character development and adherence to three-act structure. Students must possess a completed first act for a feature length screenplay in order to enroll in the course. PREREQUISITE(S): DC 402 or DC 405

DC 404
REWRITING THE FEATURE
Graduate
This class focuses on rewriting the feature film screenplay. Through workshops and course discussions, students will learn how to identify missteps in their writing and develop a practical means to efficiently address these issues moving forward. Students must possess a complete feature length script to rewrite in order to enroll in the course. PREREQUISITE(S): None

DC 405
TOPICS IN SCREENWRITING
Graduate
Advanced study in screenwriting focusing on a specific genre each quarter such as: Science Fiction, Film Noir, Comedy, Action-Adventure, Nonfiction, etc. May be repeated for credit. PREREQUISITE(S): DC 201

DC 406
WRITING THE SITCOM
Graduate
In this course, students analyze half hour situational comedy teleplays. The course will feature a specific focus on story-telling styles and techniques of successful sitcom predecessors, various formats of sitcom teleplays, and methods for pushing original projects out into the world. Students will create an original sitcom pilot. PREREQUISITE(S): DC 400

DC 407
WRITING THE EPISODIC DRAMA
Graduate
In this course, students analyze hour-long dramatic teleplays. This course features a specific focus on story-telling styles and techniques of successful dramatic predecessors, various formats of hour-long drama teleplays, and the definition and significance of "show bibles". Students will create an original hour long pilot. PREREQUISITE(S): DC 400

DC 408
WRITING ON ASSIGNMENT
Graduate
This course provides a framework for students to complete a feature length screenplay in ten weeks. Using techniques and deadlines modeled after professional writing assignments, students learn how to meet the expectations of studio executives and producers without sacrificing their unique voice. It is imperative students possess a viable concept and outline before enrolling. PREREQUISITE(S): DC 501

DC 409
DIGITAL CINEMA PROSEMINAR
Graduate
In this course, students develop basic proficiency in the areas of cinematography, editing, and sound. This course is intended for all incoming graduate students in cinema. PREREQUISITE(S): None
DC 410
DIGITAL CINEMA PRODUCTION II
Graduate
This course expands on topics covered in DC 210 Production I. Students will refine their skills in the areas of line-producing, pre-production, cinematography, lighting, sound recording, post production work flow. PREREQUISITES: (DC 210 and DC 220 and DC 275) or DC 460 or DC 409

DC 411
MUSIC VIDEO PRODUCTION
Graduate
In this course, we will analyze ways in which artists combine visual imagery with music as with MTV-style music videos. The music business and how it relates/effects music videos. Each student will develop his or her own music video project from script to final edit with a local band of their choice, through their own scheduling process. PREREQUISITE(S): (DC 210 and DC 220) or DC 460 or DC 409

DC 412
SCORING FOR FILM AND VIDEO
Graduate
Students are introduced to elements of music and ways in which these elements may be used to create a musical style that enhances the visual statement. Course emphasizes understanding the function of the score and how it relates to texture, color, and drama in music. Students explore their creativity using the tools available, work on projects of increasing complexity, and complete a score of their own film or video as a final project. Listening skills, music vocabulary, and business and legal aspects of the profession are also studied. PREREQUISITE(S): DC 215

DC 413
PRODUCTION SOUND
Graduate
This workshop based course offers production recording and mixing techniques. Subjects include microphone selection, basic acoustics, boom techniques, dual system recording practices, and mixing. Several projects will be completed throughout the quarter. PREREQUISITE(S): DC 215 or DC 460 or DC 409

DC 415
POST-PRODUCTION SOUND DESIGN
Graduate
This course expands on topics covered in DC 215. Emphasis will be on mixing and editing techniques for music and sound effects. Coursework also includes the recording of natural sounds and special effects to reinforce images and the story. The course is intended for advanced students who wish to develop their skills and gain more experience in preparing and mixing sound tracks for traditional as well as interactive narratives. PREREQUISITE(S): DC 215

DC 417
ADVANCED SOUND MIXING
Graduate
This workshop based course offers advanced mixing techniques for Stereo and Surround Sound. Subjects include mixing philosophies, techniques, advanced digital signal processing, and monitoring. A history of Surround Sound and contemporary surround techniques will be covered. Several projects will be completed throughout the quarter. PREREQUISITE(S): DC 315

DC 418
ADVANCED DIALOGUE EDITING
Graduate
This workshop based course offers dialogue recording and editing techniques. Subjects include voice processing, basic acoustics, room tone matching, proximity processing, frequency analysis and dialogue mixing. Several projects will be completed throughout the quarter. PREREQUISITE(S): DC 315

DC 419
ADVANCED SOUND EFFECTS RECORDING AND EDITING
Graduate
This workshop based course offers sound effects recording and editing techniques. Subjects include hard effects, backgrounds, room tone, Foley, basic acoustics, sound processing, layering and mixing. Several projects will be completed throughout the quarter. PREREQUISITE(S): DC 315
DC 420
EDITING
Graduate
Emphasis is on developing the student's understanding of the art of cinematic storytelling and montage. Work on more advanced projects is integrated into the class as a means of mastering advanced editing tools and techniques. PREREQUISITE(S): DC 220 or DC 460 or DC 409

DC 421
PRODUCTION DESIGN
Graduate
Analysis of production design and art direction in motion pictures.

DC 422
EDITING STYLES AND TECHNIQUES
Graduate
This course is designed for editors looking for innovative ways to tell stories, by exploring how editing techniques have been pushed by artists working in the margins. Cutting edge editing techniques are a co-opting of historical and experimental styles, repackaged and used in a narrative context. A series of practical exercises and a freeform final project using found footage allow editors to explore the array of editing techniques adopted from experimental work while discovering their personal style as editors and storytellers. Editors will consider how form affects content and will reinvent techniques in ways to surprise modern audiences. PREREQUISITE(S): DC 220 or DC 460 or DC 409

DC 423
PRE-PRODUCTION FOR CINEMA
Graduate
This course will cover the pre-production phase of short and feature-length filmmaking, including fundraising, breaking down scripts, scheduling, budgeting and pre-visualizing. Professional scheduling, budgeting and pre-visualization software will be utilized. Additionally, the roles of the creative producer, line producer and assistant director will be examined. Prerequisite(s): DC 210 or DC 460 or DC 409

DC 424
SCRIPT TO SCREEN FILM ANALYSIS
Graduate
This analytical course examines the evolution of a story from screenplay to final film. Students will read screenplays of varying genres and perform a critical analysis and comparison to the produced versions of the films. Storytelling conventions such as structure, character development, theme, and the creation of tension will be used to examine alterations and how these adjustments ultimately impacted the film's reception both critically and at the box office.

DC 425
COLOR CORRECTION
Graduate
Students acquire a working knowledge of the aesthetics and technical aspects of the post-production phase of color correction. Content addresses theory and application of color correction, image control, and manipulation techniques. Principles of color theory and the tools available to filmmakers engaged in the processes of electronic media and image manipulation are explored through lecture, interactive computer exercises, and hands-on experience with professional color correction software. PREREQUISITE(S): DC 420

DC 426
ADVANCED COLOR CORRECTION
Graduate
This class expands on topics covered in DC 425. Students will refine their skills in the areas of Primary, Secondary and Color FX room advanced grading techniques used by professional colorists. This class will explore more in detail colorist strategies, grading workflows, aesthetics and technical aspects of color correction for the digital cinema. Students will explore color correcting trends that are popular in feature films and national television commercials. Through a series of three short projects and a final project, students will practice using the techniques they study in class. PREREQUISITE(S): DC 425
DC 427
LOGIC PRO MIDI SEQUENCING WORKSHOP
Graduate
This course offers training on all aspects of MIDI sequencing in Logic Pro software. All aspects of MIDI will be covered including recording, programming, editing, mixing and processing functions. Advanced functions such as impulse response capture/programming, expression/velocity programming and digital signal processing automation will also be covered. Students will evidence their learning via programming and film scoring projects. PREREQUISITE(S): None

DC 428
WRITING THE WEB SERIES
Graduate
Students will examine various webisode structures, pitch original concepts for a web series, and ultimately write a complete season consisting of one dozen 5-10 minute episodes. PREREQUISITE(S): DC 501

DC 429
TELEVISION GENRES AND ANALYSIS
Graduate
The purpose of this class is to enable you to study scripted television from the professional's point of view. The course involves critical analysis of successful scripted television shows, their narrative structures and themes. Programs of various genres and eras will be examined. Students will learn how to recognize basic structural elements in finished episodes. Students will develop a language with which to discuss television as well as a toolbox of techniques to use when creating television. Key concepts to be discussed include: basic structure, types of shows, character tropes, means of creating and sustaining tension, themes and advancements in form.

DC 430
VISUAL EFFECTS
Graduate
Exploration of the expanding field of visual effects. Students explore contemporary concepts and approaches to production in the current stage of film and video effects work. Digital and traditional methodologies will be covered, with a concentration on digital exercises illustrating modern techniques.

DC 431
FILM THEORY AND PRACTICE
Graduate
A study of film movements or periods that have articulated their own theoretical origins, and then implemented or investigated these theories through cinema praxis. Movements as diverse as Soviet montage, neo-realism, French New Wave, feminist film, Dogme 95 and punk cinema will be explored. In the same mode of these historical movements, students will make a film or animation rooted in one of these theoretical frameworks. PREREQUISITE(S): DC 460 or DC 409

DC 433
CINEMATIC SPACE
Graduate
This seminar mixes theory and practice to expose students to an in-depth exploration of different techniques and possibilities concerning cinematic space. Beginning with an introduction to the fundamental differences between montage and mise-en-scene, the course will teach students the art and craft of designing, blocking and executing plan sequences, starting with static camera shots and ending in complex 3D camera moves. PREREQUISITE(S), DC 460

DC 440
ADVANCED EDITING
Graduate
This course provides an advanced workshop for students to edit their own narrative or documentary projects. Students will be expected to bring in their own footage, and will take the projects from logging, through rough cut, to picture lock. Post-production workflow, and basic sound design and color correction for picture editors will also be emphasized. PREREQUISITE(S): DC 420
**DC 441**  
**STORYTELLING FOR VIDEO GAMES**  
Graduate  
This course examines the writer's role in the game development process and how storytelling conventions like character, conflict, and plot are utilized to enhance gameplay. Emphasis will be placed on building an understanding of game narratives, interactivity, and working with design teams. Students will develop a design document highlighting characters, locations, dialogue scripting, and overall gameplay for an original video game idea.

**DC 444**  
**SCREENWRITING LAB**  
Graduate  
This course focuses on instructor led workshop sessions to help writers take existing projects (including but not limited to features, pilots, television specs, web series, short scripts) at various stages of development and provide a means to move forward. Story will be deconstructed, from concept to individual scene work, in an effort to craft a viable narrative for the screen. PREREQUISITE(S): None

**DC 449**  
**ACTING FOR FILMMAKERS**  
Graduate  
This course is designed to provide students who plan to work with actors in any aspect of cinema or interactive media, with a foundation in the actor's craft. This will be a hands-on, practical class in which all students will be required to participate fully in the exercises and scene work. Topics to be covered include: relaxation, concentration, trust, listening, sensory work, physical actions, improvisation, imagination, needs, circumstances, objectives, obstacles, scene analysis and scene work. The course will culminate in a staged scene to be presented in class. PREREQUISITE(S): None

**DC 450**  
**DIRECTING ACTORS FOR THE CAMERA**  
Graduate  
This course will consist of scene studies emphasizing the actor/director relationship, the relationship between the camera and performer, casting, blocking for the camera, and scene analysis. Each week students will shoot and edit short dialogue scenes. The scenes will be analyzed for the quality of the performance and effectiveness of direction. Students will work toward the creation of a final, polished short film. Digital Cinema students are expected to enter the class with a shoot-able five to ten minute script they can use as their final project. Prerequisites: DC 460, DC 461, DC 462

**DC 451**  
**MODES OF DIGITAL DISTRIBUTION**  
Graduate  
This course deals with the process of creating video for multiple modes of distribution, i.e.: DVD authoring, compression and streaming. It also covers the various outlets available for content distribution. Students will learn content creation, authoring, capture, encoding and serving with an emphasis on video compression and encoding. Students will also come to have a working understanding of codecs, DVD chapters, Easter eggs, region coding, and be able to create a working web page with embedded streaming content. PREREQUISITE(S): DC 320 or DC 420

**DC 455**  
**WORKING WITH ACTORS**  
Graduate  
This course is an introduction and examination of the collaborative process between the actor and director. The class will examine the fundamentals of the craft of acting, provide students with a basic understanding of acting terminology, script analysis, the creative process, and explore effective ways to communicate with the actor. Methods of study include lecture, discussion, assignments, and in-class acting exercises. PREREQUISITE(S): None

**DC 460**  
**DIGITAL CINEMA PROSEMINAR**  
Graduate  
In this course, students develop basic proficiency in the areas of cinematography, editing, and sound. This course is intended for all incoming graduate students in cinema.
DC 461
PRODUCTION WORKSHOP
Graduate
Students work in teams to produce a completed project every two weeks. Each team will be assigned a specific genre or medium of cinema/media production. Students will be exposed to every aspect of media production from live action shooting to visual effects. Students will also learn how to work well in a team environment and be forced to adhere to deadlines, time constraints and medium limitations. PREREQUISITE(S): DC 460 or DC 409

DC 462
DIRECTING WORKSHOP
Graduate
Emphasis on directing actors, with production skills such as camera, lighting, editing and sound used in service of the performance. Topics covered include objectives, beats, script analysis, casting, rehearsal, and actor/director relationships. Students will cast working actors or actors from the Theatre School, in short films from adapted screenplays, and produce sample reel material for both actors and directors. PREREQUISITE(S): DC 461

DC 470
ADVANCED TOPICS IN CINEMA
Graduate
This class will be an in-depth examination of a filmmaker, film genre, or film movement that has had a significant influence on the development of cinematic storytelling and expression. Through lectures, screenings, readings, discussions, and critical writing assignments, students will analyze the distinctive traits of the selected topic within the broader context of cinema history and culture. Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): None

DC 471
DOCUMENTARY PRODUCTION
Graduate
This course covers all phases of documentary filmmaking including interview techniques, storytelling with interviews and B roll, and documentary cinematography. For the final project each student will produce a completed documentary film. PREREQUISITE(S): (DC 210 and DC 220) or DC 460 or DC 409

DC 472
TOPICS IN TELEVISION PRODUCTION
Graduate
This course is a hands-on experience in television production of news and public affairs programs. Students learn through theory and practice the role TV Producers and their teams play in creating various TV programs.

DC 473
ADVANCED DOCUMENTARY PRODUCTION
Graduate
This advanced course in documentary production is designed for students who already have experience with making documentaries. In this course, each student will direct and produce a substantial short subject documentary and serve as a crew member on at least one other student project. Topics covered will include choice of subject matter, filmmaker’s POV, dramatic structure, proposal writing, and a variety of technical, aesthetic, practical, and ethical concerns related to producing professional documentary projects. PREREQUISITE(S): DC 371/471

DC 475
CINEMATOGRAPHY
Graduate
In this course, students learn advanced production techniques of camera movement, lighting, rigging, filtration and shot composition. Students will be given hands on training in the use of the latest high definition cameras and then create a short script which they will shoot and edit. PREREQUISITE(S): DC 275 or DC 460 or DC 409

DC 476
VISUAL DESIGN
Graduate
Definition, analysis, and structure of visual components that cinema employs to support and emphasize the story. Theory of visual design will be applied through student still photos, as well as an original, visually-oriented, narrative or documentary short film, animation or game design. PREREQUISITE(S): DC 460 or Permission of Instructor
DC 477
LIGHTING I
Graduate
Introduction to safe and established practical operation of studio lighting and grip equipment. Students will learn a variety of basic lighting techniques, set electrical distribution, dolly set up, grip and lighting equipment. PREREQUISITE(S): None or instructor permission.

DC 478
SPECIAL EFFECTS AND COMPOSITING
Graduate
Special effects for motion pictures including stop motion, motion control, green screen, and compositing.

DC 479
PRE-PRODUCTION WORKSHOP
Graduate
This two-credit course will provide valuable pre-production work on targeted productions, such as Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Professional scheduling, budgeting and pre-visualization software may be utilized. PREREQUISITE(S): By instructor permission only.

DC 480
PROJECT BLUELIGHT
Graduate
Production of a feature-length digital motion picture written by students or faculty within the Digital Cinema program. Students will work as crew under supervision of faculty members heading each of the various production areas. Goal is to produce a completed digital motion picture suitable for festivals or distribution. In addition to production work, graduate students are required to write a 7-10 page paper which analyzes the experience and how it relates to their MS/MFA course of study.

DC 481
DISTRIBUTION AND EXHIBITION
Graduate
Conventional and emerging modes of motion picture distribution with special emphasis on digital streaming and exhibition.

DC 482
POST-PRODUCTION WORKSHOP
Graduate
This two-credit course will provide an opportunity for students to apply their post-production skills and work collaboratively on projects happening during the academic year. These projects can be Project Bluelight (faculty or student-led), large-scale class projects, faculty creative projects, or independent and/or professional productions. Students will work under faculty supervision and gain valuable experience collaborating as part of post-production team. Professional post-production applications, equipment, and facilities will be utilized. PREREQUISITE(S): By instructor permission only.

DC 483
COMEDY, JOKE, AND SKETCH WRITING
Graduate
Students will learn techniques and formulas for joke writing, writing sketch comedy packets, and writing for news driven comedy shows. Students will apply these skills to their existing scripts as well as to developing new material. PREREQUISITE(S): DC 501

DC 484
LIGHTING FOR CINEMA II
Graduate
This continuation of Lighting for Cinema I is a hands-on, experiential class exploring advanced lighting techniques with an emphasis on engaging the audience visually. Students will learn night exterior lighting techniques, practical location lighting approaches, Hollywood gag and moving lights applications. The proper, efficient and safe use of advanced lighting and grip equipment will be demonstrated - Hmi, LED, theatrical, large tungsten, fluorescent, overheads, rigging and dollies. Students will work together in groups to accomplish visual tasks in class each week. PREREQUISITE(S): DC 477
DC 485
PRODUCING
Graduate
This course focuses on the role of the contemporary producer from idea origination and script development to financing and physical production and, finally, to distribution and exhibition. Students master the concepts of revenue streams, constructing deals (gross and net point participation), copyright, marketing, and box office analysis. Production management and line producing are also covered. From script breakdown and production preparation to post-production supervision and delivery, the physical production process is defined.

DC 486
DOCUMENTARY PRODUCING
Graduate
The course will cover the key areas of producing for documentaries, which encompasses pre-production, production, marketing, fundraising, and community outreach and engagement. Students will demonstrate a knowledge of the ways in which producers engage with directors, editors, grant making institutions, individual donors, festival marketplaces, exhibitors and broadcasters. This course will be project-based and students will develop a proposal for a documentary, identify target audiences, identify relevant funding organizations and foundations, write grants, and develop a fundraising and distribution plan. Prerequisite(s): none

DC 487
HOLLYWOOD HISTORY
Graduate
Students will gain a deep understanding of the history and foundation of the film industry through behind-the-scenes access to working studios, historical readings and discussions of the material, and the unique opportunity to have access to the Warner Brothers Archives, the largest single studio collection in the world, housing all of the WB materials from 1918 (the release of the studio’s first feature film) through 1968 (when the studio was sold to Seven Arts). Note: Students must be participating in the DePaul LA program to be eligible to enroll.

DC 488
FILMMAKERS SEMINAR
Graduate
Each week, students will be given the rare opportunity to speak directly with some of the industry's biggest players. Hollywood directors, writers, cinematographers, editors, producers, agents, managers, entertainment lawyers, development executives and others will come to class, discuss their journeys, offer advice, and answer questions. The class will culminate with an industry mixer, where these professionals, along with dozens more, will join the students for a relaxed evening of networking. This is an invaluable opportunity for students to begin to form meaningful relationships that can help them as they transition from student to filmmaker. Note: Students must be participating in the DePaul LA program to be eligible to enroll.

DC 489
THE BIG PICTURE: THE ENTERTAINMENT INDUSTRY
Graduate
This course introduces students to vital information about the industry in which they will work. Students will learn industrial analysis of production, distribution, and exhibition sectors, including mastering concepts of revenue streams, constructing deals (gross points and net point participation), copyright, marketing, and box office analysis. Students will also study the structure of organizations and groups crucial to the entertainment industry: studios, talent, agents, exhibition (markets: theatrical, virtual and ancillary), professional organizations including guilds like ASC, and media licensing firms like ASCAP and BMI. There will be an emphasis on global industry.

DC 490
DIRECTING
Graduate
This is a course in directing motion pictures. Topics include casting, rehearsals, the basic relationship between the director, actor, and script, script breakdown, camera placement, and shooting for continuity editing. Each student will produce and direct a scene study and a short narrative film. PREREQUISITE(S): (DC 220 and DC 310) or DC 460 or DC 409

DC 491
POST-PRODUCTION SEMINAR
Graduate
This course is an overview of Post Production, from the end of production, through editing, to final delivery. Topics covered will include workflows, technical aspects, and the online environment. The focus will be on the best way to finish and deliver a film. PREREQUISITE(S): DC 460 or DC 409
DC 493
FILM FESTIVALS WORKSHOP
Graduate
An introduction to film festivals and their role in independent cinema and the Hollywood studio system. The global proliferation of film festivals will be examined from the perspectives of both film studies scholars and film making professionals. Students will research the history of major festivals, develop festival strategies for student or independent films, and attend film festival screenings, panels, and/or networking events. PREREQUISITE(S): None

DC 495
DIRECTING THE SHORT MOTION PICTURE
Graduate
The penultimate production course for directors. Students must enter with a finished, producible, short film script with some principal pre-production elements in place. Advanced pre-production skills and topics to be covered include: prepping and breaking down the shooting script, schedule and budget, pre-visualization and storyboards, casting, rehearsals and directing actors, blocking, continuity, shot design, locations, aesthetics and visual design, working with crew, set procedures, the production binder, and directing from prep through post-production and delivery. PREREQUISITE(S): DC 462 and DC 423

DC 496
TOPICS IN STUDY ABROAD
Graduate
This practical course offers students an intensive experience studying cinema and/or television production abroad. Students will be introduced to the cultural context, practices, philosophies, styles and business of film and TV. Facility tours, screenings and cultural experiences may be used to supplement the classroom activities in order to deepen the understanding of the experience abroad. PREREQUISITE(S): None

DC 499
INTERNSHIPS IN MEDIA AND DESIGN
Graduate
This is an internship/independent study course for graduate students, which offers the opportunity to reflect on an internship while gaining professional experience, industry contact and referrals while still in school. Opportunities in post-production, motion picture production, advertising, television, animation, game design, graphic design, motion graphics and interactive media can all qualify for the course. Students will work independently on class assignments. Assignments will be determined by the instructor and based on the number of credits in which the student is enrolled. Admission to the program requires consent of the internship course instructor after verification of the student's internship. PREREQUISITE(S): Internship

DC 501
STORYTELLING FOR THE SCREENWRITER
Graduate
Students begin their screenwriting journey with a strong foundation in the basic building blocks of solid, engaging storytelling. Students will mine their own lives in order to create memorable stories, characters, and settings. Additionally, students will learn basic screenwriting skills such as character development, constructing atmosphere, and the fundamental components of a scene. PREREQUISITE(S): None

Status as a MFA Screenwriting student is a prerequisite for this class.

DC 502
STORY STRUCTURES
Graduate
Advanced critical analysis of multiple film structures beginning with a solid understanding of classically structured linear narratives told in three acts and ultimately exploring non-traditional feature film structures including but not limited to: ensemble, multiple protagonist, non-linear and episodic. Films will range from classic Hollywood films to contemporary independent films. Students will learn various theorists' approaches to terminology (which may include Snyder, Field, Campbell, and Howard) in order to develop a language with which to discuss scripts and finished films, both other people's work as well as in developing their own. PREREQUISITE(S): None

DC 503
STUDIO DEVELOPMENT
Graduate
This advanced course examines the development process that enables the screenplay's journey from draft to screen. By crafting professional coverage and development notes, the class will deconstruct feature length scripts and student work in an effort to forge them into cinematically viable properties. The assignments and class discussions are designed to expose the inner workings of Hollywood and provide a framework for what it takes to succeed in the entertainment industry. Enrollment is only open to MFA students. PREREQUISITE(S): None
DC 504
**REWRITING YOUR FEATURE OR TV SCRIPT**
Graduate
This class will focus on rewriting one completed feature film script, or rewriting one television pilot plus an additional future episode. Students will walk away from this class with a polished writing sample ready to be shown to agents, managers, and producers as they enter the professional screenwriting world. PREREQUISITE(S): DC 402, DC 403, DC 408

DC 505
**INDUSTRY AND PITCHING SEMINAR**
Graduate
Students will learn the art and craft of pitching including the differences between pitching new or existing ideas, shaping pitches based on your audience, and pitching a take on existing source material. Students will also learn not only how to pitch projects, but to pitch themselves, focusing on what makes them unique as a writer/director/producer, the themes that connect their work, and how to present themselves as a brand. Industry professionals will visit class (live or via Skype) when appropriate. Students will also learn how to create pitches for existing material that is either in the common domain or material that the students have acquired the rights to work on. PREREQUISITE(S): DC 222 or DC 224 or DC 424 or DC 502

DC 506
**WRITING FOR FILM THESIS I**
Graduate
Students will complete an outline and first draft of their feature length screenplay. In a workshop environment, students will get extensive feedback from their instructor and peers. PREREQUISITE(S): Students must be in their final year of the MFA Screenwriting program.

DC 507
**WRITING FOR FILM THESIS II**
Graduate
Students will revise their thesis feature script. In a workshop environment, students will receive notes to help revise their project. Students will also be expected to meet with their thesis committee to receive additional notes to be applied to the rewrite. PREREQUISITE(S): DC 506

DC 508
**WRITING FOR TV THESIS I**
Graduate
Students will complete a show bible, pilot, and future episode of an original television concept. In a workshop environment, students will get extensive feedback from their instructor and peers. PREREQUISITE(S): Students must be in their final year of the MFA Screenwriting program.

DC 509
**WRITING FOR TV THESIS II**
Graduate
Students will revise their television thesis scripts. In a workshop environment, students will receive notes to help revise their project. Students will also be expected to meet with their thesis committee to receive additional notes to be applied to the rewrite. PREREQUISITE(S): DC 508

DC 510
**WRITING FOR FILM AND TELEVISION PORTFOLIO**
Graduate
MFA Screenwriting students in their last quarter will polish their portfolios, making sure they are ready for submission to agents and managers. The students will do scene writing exercises to strengthen their existing scripts. They will create and workshop loglines and one-page synopses for all of their projects. Students will write and workshop query letters. They will research agents, managers, and producers that represent or make work similar to their own and send the query letters to these professionals. PREREQUISITE(S): DC 507 or DC 509

DC 525
**DIGITAL MEDIA PRACTICUM Digital Media Practicum**
Graduate
This practicum provides all students with a foundation in digital media practices. Students work with still images, moving images and sound using integrated digital media applications. Students learn how to use different media forms to express creativity and ideas across interactive media settings. The course focuses on the technical, social and cultural competencies required to traverse media in online convergence environments.
DC 560
GRADUATE TEACHING SEMINAR
Graduate
This seminar exposes students to effective methods and professional practices of teaching undergraduate and graduate students. A variety of approaches to course materials and projects will be introduced and discussed in detail. In addition to work in class, students will work closely with a faculty member in order to gain first-hand knowledge, including class observation, of practical aspects of creative and academic instruction. PREREQUISITE(S): none

DC 561
THESIS I
Graduate
In this class, students complete a feature length outline and first act of their thesis script. Extensive feedback from in-class workshops and thesis advisors provide a viable framework for the completion of the project, which is completed in Thesis II and III. PREREQUISITE(S): Instructor permission

DC 562
THESIS II
Graduate
In this class, students complete the second and third acts of their thesis script. Extensive feedback from in-class workshops and thesis advisors provide a viable framework for the completion of the project, which is completed in Thesis III. PREREQUISITE(S): DC 561

DC 563
THESIS III
Graduate
In this class, students complete a polish of their thesis script. Extensive feedback from in-class workshops and thesis advisors provide a viable framework for the completion of the project. PREREQUISITE(S): DC 562

DC 565
CINEMA THESIS I
Graduate
In this class, students work intensively on a thesis project proposal based on responses from the instructor, their classmates, and from graduate faculty thesis advisors. For narrative work, the goal is to finalize a shooting script for the thesis project. PREREQUISITE(S): Faculty permission

DC 566
CINEMA THESIS II
Graduate
In this class, students work intensively on a thesis project proposal based on responses from the instructor, their classmates, and from graduate faculty thesis advisors. For narrative work, the goal is to finalize pre-production for the thesis project. PREREQUISITE(S): DC 565

DC 567
CINEMA THESIS III
Graduate
In this class, students work intensively on a thesis project proposal based on responses from the instructor, their classmates, and from graduate faculty thesis advisors. For narrative work, the goal is to finalize production of the thesis project. PREREQUISITE(S): DC 566

DCM 301
EFFECTIVE LEADERSHIP IN A CHANGING PROFESSIONAL ENVIRONMENT
Undergraduate
In this leadership course, students will use the text, behavior/trait surveys, and case studies to understand leadership theories and models. Participants will learn to create, establish, and reinforce cultural rules of engagement designed to increase communication effectiveness and get the most out of the current human dynamic in their respective environments. Understanding these various leadership models allows students to reflect on their own style in today's culturally changing environments.
DCM 302
PROJECT MANAGEMENT: DESIGN AND ASSESSMENT
Undergraduate
Project Management is an important discipline that can benefit students in their careers as well as personal life. This course will explore project management methodologies, their common steps and tools. The course translates Project Management theory into a practical and effective methodology, starting with working definitions of Project and Project Management, the course examines project initiation, evaluation and organization using analytic techniques such as discounted cash flow and PERT/CPM. In addition, the course examines project execution and control, along with the documentation and communications skills needed to keep a project on track. The course concludes with an overview of project management applied to computer information systems development.

DCM 303
LEADERSHIP MODELS FOR STRONG ORGANIZATIONS
Undergraduate
This course is designed to explore the research, practices, purposes and scope of leadership as a tool to develop leadership skills that will influence and inspire others. Both individual and organizational aspects will be presented and will include such areas as behaviors, ethics, communications, cultures and current practices. Emphasis will be on application of leadership theories and skill building through self-assessment exercises and cases.

DCM 304
EVOLVING PROFESSIONAL ETHICS
Undergraduate
Evolving Professional Ethics analyzes and weighs ethical issues in the professions in relationship to pressing values of social responsibility and quality of life seen through lenses of moral philosophers and incisive thinkers. It places business ethics and moral philosophy in juxtaposition. In a time of tumultuous choices, the pursuit of self interest is questioned in the light of changing, evolving awareness of values in humanity, community, environment, including race and gender, as they influence business context and holistic awareness of professional ethics.

DCM 305
ENTREPRENEURSHIP BASICS
Undergraduate
Entrepreneurship is a powerful force that stimulates economic growth, promotes employment, and allows for self expression by turning ideas into tangible reality. Entrepreneurial thinking can be developed as can be the skills needed to successfully start and manage new enterprises. But entrepreneurship is not without risk and every person must assess risk in light of their own personality and life situation. This course leads students through a realistic understanding of entrepreneurship as an economic force and a way of life, its impact on involved persons and practices most likely to promote success. Learning is accomplished through a combination of lecture, discussion, reading and homework. Students are encouraged to bring their own personal experiences to class for discussion.

DCM 306
PRODUCTIVE APPLICATIONS OF WORK BASED INFORMATION TECHNOLOGY
Undergraduate
In this course, students will learn about work-based information technology by exploring Windows PC and Mac operating systems. Students will be introduced to common work-based applications software in MS Office: Word, Excel, Power Point, Access and Outlook. Students will learn the basics, intermediate, and advanced level of MS Word, Excel, and Power Point. Students will explore the use and security of Internet applications for both Windows and Mac operating systems.

DCM 307
ANALYZING HUMAN BEHAVIOR
Undergraduate
This course targets the link between the physical environment and social behavior. Every physical space is also a social space; its organization contains a "code" of responsive behavior for people to understand. We focus on these "codes," and examine the ways they provoke conformity and deviance from individuals and groups. Students are expected to enter the social environment and gather publicly-observable data for analysis in the classroom setting. The ethics of social research, and of an observer's interaction with the environment, are key points of inquiry during the quarter. Students in this course work at a "pre-ethnography" level, and are primed by its conclusion to enter and analyze any social group and its physical surroundings.
DCM 308
INTRODUCTION TO STATISTICS
Undergraduate
This course will teach students the basic concepts of statistics. As a group, we will investigate topics in descriptive statistics, correlation, normal distributions, probability, sampling distributions and hypothesis testing. By the end of this course, students will be able to complete a statistical analysis of datasets using Microsoft Excel as the primary tool. We will also devote considerable time to discussing how statistics are used and abused.

DCM 309
APPLIED RESEARCH
Undergraduate
This course allows the student to develop competence in the process of systematic, academic inquiry. The Applied Research course requirements focus on key aspects of inquiry. Students create a research proposal responding to a purpose, problem, and question each chooses to target (but do not actually carry out the data collection or analysis during this particular quarter). Students will explore research methodologies “quantitative and qualitative” and create a research design proposal based on a literature review and carefully constructed question, hypothesis, and methodology.

A major in Leadership Studies, Applied Behavioral Sciences or Professional Communication is a prerequisite for this class.

DCM 310
THINKING CRITICALLY
Undergraduate
This course strengthens students' analytical thinking ability through practice in the skills and strategies of critical thinking and reading, and in the construction and evaluation of logical arguments. In pursuing these goals, we encounter principles of logic, strategies of persuasion, and techniques of propaganda. The course presents a variety of readings, exercises, and projects designed to help students develop learning and skill in the following areas: identifying assumptions, connecting assertions to evidence, stating generalizations, analyzing arguments, and bringing multiple perspectives to bear on complex issues and questions.

A major in Leadership Studies, Applied Behavioral Sciences or Professional Communication is a prerequisite for this class.

DCM 311
CONFLICT MANAGEMENT AND NEGOTIATION
Undergraduate
This course will examine several aspects of communication. We will examine perception, assumption, language and sensitivity in the workplace and beyond, applying strategies drawn from theory to actual workplace situations. Successful collaboration and teamwork are the result of clear interpersonal communication. Done well, collaborative problem solving stimulates new ideas and more sophisticated approaches. To this end, we will consider the issues of empathy and personal style in the workplace and beyond. The question of conflict will be examined from several angles, and defined in several practical ways. We will analyze the differences and similarities between (among others) status-based, ego-based and issue-based conflicts in the workplace and beyond, and apply the theory of principled negotiation to identify and resolve these conflicts.

DCM 313
LEARNING FROM EXPERIENCE AND SELF-ASSESSMENT
Undergraduate
Students will explore the nature of learning from experience and self-assessment. They will develop a reflective learning autobiography and read about theories of adult learning. Students will also be introduced to the DePaul Library, taking the online library tutorial. Time management issues and tools, as well as life stages and learning interests will also be explored.

A major in Leadership Studies, Applied Behavioral Sciences or Professional Communication is a prerequisite for this class.

DCM 314
LEARNING AND TRANSFORMATION
Undergraduate
Building on last quarter's seminar, students will look closely at the notion of transformative learning. Additionally, using learning style inventories, they will reflect on ways to exercise various learning styles in their work, and capitalize on their strengths.

A major in Leadership Studies, Applied Behavioral Sciences or Professional Communication is a prerequisite for this class.
DCM 315
EXPLORING THE FIELD
Undergraduate
Students will work on professional goal setting and action plans by conducting research on their chosen field, exploring trends, ethical issues, controversies, best preparation strategies, and other salient matters. In addition, the concept of “good work” and what that means for one’s own career will be debated and discussed.

A major in Leadership Studies, Applied Behavioral Sciences or Professional Communication is a prerequisite for this class.

DCM 316
WORK IN A GLOBAL ENVIRONMENT
Undergraduate
Globalization of the world’s economy has dramatically changed the interactions of people from different cultures. As a result, the importance of understanding cultural difference has increased significantly. This seminar will introduce students to the challenges and opportunities associated with living, working and learning in a global environment. This will be done through discussion, reading, case studies, films and exercises to increase cultural self awareness as well as cross-cultural sensitivity.

DCM 317
ETHICS IN THE PROFESSIONS
Undergraduate
Students will explore various approaches to determining right, morally acceptable, behavior. Epistemology and several ethical frameworks will be examined. Students will write, discuss, and debate case studies from their workplaces or field.

DCM 318
SOCIAL JUSTICE IN THE PROFESSIONS
Undergraduate
Students will look at the nature of social justice, creating a working definition of the widely used term. Readings will guide examination of issues of social justice in students' fields or disciplines.

DCM 319
CREATIVITY AND INNOVATIVE THINKING
Undergraduate
Connections among such varied disciplines as physics, politics, and poetry will be examined and investigated within students' own discipline/profession. Using a variety of approaches to integrative and innovative thinking, students will explore interconnectedness, expanding possibilities, creativity, and decision-making.

DCM 320
PROFESSIONAL PORTFOLIO DEVELOPMENT
Undergraduate
In this class, students will study the concept and use of professional portfolios and create criteria by which they will choose work to include in their own portfolios. They will assess and evaluate their professional goals using the portfolio as a tool in that assessment. Networking and sharing of information and experience will be emphasized.

DCM 321
CAPSTONE PLANNING
Undergraduate
Students will begin the research for their capstone project, one that is directly related to the major and meant to be the final entry in the professional portfolio. Project ideas and topics will be discussed, refined, and formally proposed. Students will complete a review of the appropriate literature and construct a methodology by which they will carry out the capstone project in the final quarter.

A major in Leadership Studies, Applied Behavioral Sciences or Professional Communication is a prerequisite for this class.
DCM 322
CAPSTONE PROJECT/PORTFOLIO REVIEW
Undergraduate

Students complete the capstone project in this course and also will review their learning portfolio selections thus far and make strategic choices for their (1) professional and (2) learning portfolios. In addition, this quarter will provide students the opportunity to wrap-up and reflect on their learning overall.

A major in Leadership Studies, Applied Behavioral Sciences or Professional Communication is a prerequisite for this class.

DCM 323
THE PSYCHOLOGY OF AGING AND THE AGED
Undergraduate

This course provides an overview of the current theories, themes and issues of adult development and aging. In addition to understanding these theories and issues, students will explore questions such as: Does wisdom come with increasing age? Do people really change over time? What are the keys to positive aging?

DCM 324
EFFECTIVE GROUP AND PERSONAL DYNAMICS
Undergraduate

This course design unifies two levels of human behavior and motivation: group and personal. Processes leading to decision-making and other actions rest in articulate patterns on both corporate and individual dimensions. We seek, in this educational arena, to activate and analyze this set of motives and to apprehend, and perhaps predict, this bi-lateral source of human motivation. In so doing, the group-level patterns leading to appreciable action and those emanating from each individual will more easily be understood, and their root patterns put to beneficial use.

DCM 325
WORK & SOCIETY
Undergraduate

We will consider work from the perspective of our needs and values, but also from the perspective of the needs of society. We will also consider the value that society assigns to different types of work (and the impact of that valuation on us as individuals and as members of various social groups). Other topics will include how work affects our family and social lives, the impact of modern values on how we view our work, and the role of technology in how we do our work and in how we view our work.

DCM 326
LEADERSHIP LESSONS FROM LITERATURE
Undergraduate

This Structured Independent Study provides a critical analysis of ancient literature, writers and thinkers. Examining leaders and leadership situations from these early writings, students will compare and contrast contemporary leadership approaches. Through reading, reflection, and written exercises students will uncover relationships and insights to their current leadership practices and situations. A variety of knowledge and ideas focused on acting ethically, thinking independently, listening closely, taking responsibility, and finding balance are among the tools that students will develop in this course. Close reading of Sophocles and Aeschylus along with various articles about these famous ancient playwrights will allow students to bring the works of these early thinkers to their current leadership situations. This study will also include a research component.

DCM 328
PLAN & DELIVER: IMPLEMENTING TRAINING PROGRAMS
Undergraduate

In this Structured Independent Study, students will learn about the strategic process of effectively implementing a corporate training program based on business drivers. It requires a broad understanding of the business in the context of corporate goals and initiatives that influence an organization's success. In other words, training programs must consider what is important to the organization. This process includes defining requirements and success criteria, designing the process, implementing and powerfully communicating the program to the learners, and then understanding how to measure the success of the program. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation, communication, and measurement to ensure success in their future training program implementations. The focus for this study will be to identify organizational problems that can be addressed through training and will discover the importance of a "learning organization" in this process.
DCM 329
GETTING THE WORD OUT: HOW TO IMPLEMENT TRAINING PROGRAMS
Undergraduate
In this Structured Independent Study, students will learn about the strategic process of effectively implementing and communicating a corporate training program based on business drivers. It requires a broad understanding of the business in the context of corporate goals and initiatives that influence an organization’s success. In other words, training programs must consider what is important to the organization and then communicate it powerfully. This process includes defining requirements and success criteria, designing the process, and implementing and effectively communicating the program to the learners. Students will be introduced to how to measure the success of the program. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation and communication to ensure success in their future training program implementations. The focus for this study will be to create and design a functional process and develop the communication tools to deliver a training program in a corporate business community environment.

DCM 330
PROFESSIONAL COMMUNICATION IN THE WORKPLACE
Undergraduate
This course consists of 10 modules and provides an overview of the fundamentals of professional writing. Through engaging in and reflecting upon a variety of professional writing tasks, you will learn the rhetorical theory and practice necessary for effective written communication in professional contexts.

DCM 331
LEARNING HOW TO LEARN
Undergraduate
Learning is something we begin as soon as we are born. We usually think about what we learn more than how we learn, however. In this course, you'll engage in hands-on activities to help you explore yourself as a learner. Additionally, you'll be exploring time-management, your motivation as a learner, keeping a learning journal, and strategies for applying your learning to assignments. Research and experience tell us that adult learners tend not to finish their degree programs in higher numbers than traditional-aged students. There are many reasons, among them the complications of adult life with jobs, families, and life changes. This course exists to help adult learners understand themselves better as learners and to map out strategies of support and resources to help them achieve graduation.

DCM 332
APPLIED STATISTICS
Undergraduate
In this class, students will look at how numerical knowledge is created and interpreted, and how these processes give us tools to critically analyze ideas, policies, and scientific conclusions. Some knowledge of mathematics is essential to understanding statistics. Thus, completion of a standard course in quantitative reasoning or college algebra will be of great help in succeeding in this course of study.

DCM 333
ADDICTIONS AND RECOVERY
Undergraduate
This course seeks to explore and understand alcohol and drug addiction from a biological, psychological, and social approach. Students will learn about the different causes of addiction, understanding addiction as both a disease and a behavioral phenomenon. In addition, the societal effects of addiction will be explored, highlighting in particular the impact on mental health centers, hospitals and prison systems. Students will then study the most common drugs of addiction. Finally, a variety of treatments for drug addiction will be explored, and the class will culminate with students developing a treatment plan for a hypothetical case study.

DES 141
PRINCIPLES OF DESIGN
Undergraduate
First course of a 3-quarter sequence of courses for the appreciation and experience of design as an aesthetic distinct from the other arts, and awareness of design considerations as manifested in theatrical productions.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 142
PRINCIPLES OF DESIGN
Undergraduate
Second course of a 3-quarter sequence of courses for the appreciation and experience of design as an aesthetic distinct from the other arts, and awareness of design considerations as manifested in theatrical productions.

DES 141 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 143
PRINCIPLES OF DESIGN
Undergraduate
Third course of a 3-quarter sequence of courses for the appreciation and experience of design as an aesthetic distinct from the other arts, and awareness of design considerations as manifested in theatrical productions.

DES 142 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 208
SOUND DESIGN I
Undergraduate
First course in a 3 course sequence. This is an introduction class to the artistry of sound design through understanding the physics behind sound and the tools by which you will manipulate it. The students will also learn basic ideas behind how to approach placing sound to a visual theatrical element.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 209
SOUND DESIGN I
Undergraduate
Second course in a 3 course sequence. In this class the students will learn the history of sound design, as well as how music and the recording of sound has changed throughout the years. Students will also learn how to approach a script and apply sound design to it.

DES 208 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 210
SOUND DESIGN I
Undergraduate
Third course in a 3 course sequence. This class goes more into depth with the process of sound design. In this class the students will learn how to approach a specific play, and design it within the process that you will come to learn as The Theatre School's standard production practice.

DES 209 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 240
LIGHTING TECHNOLOGY
Undergraduate
Technical and mechanical aspects of lighting. A detailed study of standard equipment, lamps, connectors, control systems, hanging positions, procedures and practices for the lighting designer.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 241
SCENE DESIGN I
Undergraduate
First of a 3-course sequence. An introduction to the methods of scenic design, with exposure to both historical and contemporary practice. Students become familiar with the mechanical aspects of scenery and stages, and assimilate the principles of design and the technical requirements of a script into a fully developed scene design.

DES 143 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 242
SCENE DESIGN I
Undergraduate
Second of a 3-course sequence. An introduction to the methods of scenic design, with exposure to both historical and contemporary practice. Students become familiar with the mechanical aspects of scenery and stages, and assimilate the principles of design and the technical requirements of a script into a fully developed scene design.

DES 241 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 243
SCENE DESIGN I
Undergraduate
Third of a 3-course sequence. An introduction to the methods of scenic design, with exposure to both historical and contemporary practice. Students become familiar with the mechanical aspects of scenery and stages, and assimilate the principles of design and the technical requirements of a script into a fully developed scene design.

DES 242 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 244
COSTUME DESIGN I
Undergraduate
First of a 3-course sequence. An introduction to costume. Students will explore the design process, costume silhouette and detail, and scripts and character analysis within the context of historical theatrical costuming.

THE 381 is a corequisite and status as an Undergraduate Theatre student is a prerequisite for this class.

DES 245
COSTUME DESIGN I
Undergraduate
Second of a 3-course sequence. An introduction to costume. Students will explore the design process, costume silhouette and detail, and scripts and character analysis within the context of historical theatrical costuming. CO-REQUISITE: THE 382.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 246
COSTUME DESIGN I
Undergraduate
Third of a 3-course sequence. An introduction to costume. Students will explore the design process, costume silhouette and detail, and scripts and character analysis within the context of historical theatrical costuming. CO-REQUISITE: THE 382.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 247
LIGHTING DESIGN I
Undergraduate
First course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 143 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 248
LIGHTING DESIGN I
Undergraduate
Second course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 247 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 249  
LIGHTING DESIGN I  
Undergraduate  
Third course in a 3 course sequence. The development and communication of lighting ideas. Script analysis, images, visual research, lighting concepts. The observation of light, and the development of oral, written and visual communication of lighting ideas.

DES 248 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 250  
MATERIALS AND PROCESSES  
Undergraduate  
The objective of this course is to familiarize the student set designer with the architectural and construction conventions that impact scene design. Students study a variety of standard stage environments, as well as the specialized vocabulary and equipment commonly used in theatrical production spaces. Students will also be introduced to the most common scenic construction materials, their strengths, their limitations, and the tools used to manipulate these materials. Whenever possible, a hands-on approach will be used to acquaint the student with the machinery, materials, hardware, and tools regularly used in theatrical production.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 252  
SCENOGRAPHIC DRAFTING  
Undergraduate  
Second course in a 3 course sequence. With an emphasis on practical work in substantial projects, students learn the organization of the technical documentation of scenery. Scenic drafting conventions are studied and applied to the comprehensive communication of a design.

TEC 113 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 253  
SCENOGRAPHIC DRAFTING  
Undergraduate  
Third course in a 3 course sequence. With an emphasis on practical work in substantial projects, students learn the organization of the technical documentation of scenery. Scenic drafting conventions are studied and applied to the comprehensive communication of a design.

DES 252 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 271  
DESIGN PRODUCTION PRACTICE I  
Undergraduate  
First course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 272  
DESIGN PRODUCTION PRACTICE I  
Undergraduate  
Second course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 273  
DESIGN PRODUCTION PRACTICE I  
Undergraduate  
Third course in a 3 course sequence. Design students do practical work on planning, constructing, rigging, painting, crewing, and running of productions. Areas may include scenery, costumes, lighting, or sound.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 284
MODEL BUILDING
Undergraduate
The course focuses on creating professional quality scale models of stage scenery. Students will learn to work with a variety of materials (foamcore, board, paper, wood, and metal, and appropriate glues), will find sources for scale furnishings, and will learn a variety of techniques such as soldering and casting.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 285
MEDIA FOR DESIGNERS
Undergraduate
Students will gain experience with a variety of color media that will be useful in illustrating and rendering their designs for the stage. Media covered will include watercolor, acrylics, oil pastel, colored pencil, and others.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 286
LIFE DRAWING
Undergraduate
By creating drawings from live models, students will learn about body structure and musculature, and will develop their skills in figure drawing, and ‘drawing what you see’.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 308
SOUND DESIGN II
Undergraduate
First course in a 3 course sequence. Students will learn both simple and advanced methods of music composition using MIDI, hardware and software samplers and keyboards. Students will create several pieces of composed music including scores for theatre and film and integrate other learned skills to create sound designs for both published and new plays.

DES 210 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 309
SOUND DESIGN II
Undergraduate
Second course in a 3 course sequence. Students will learn both simple and advanced methods of music composition using MIDI, hardware and software samplers and keyboards. Students will create several pieces of composed music including scores for theatre and film and integrate other learned skills to create sound designs for both published and new plays.

DES 308 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 310
SOUND DESIGN II
Undergraduate
Third course in a 3 course sequence. This is a more in depth look at sound design and the actual programming and tech process. Students will learn how to quickly adapt and manipulate sound cues as if they are in a technical rehearsal. This class will help aid the student in their collaboration and communication skills.

DES 309 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
In this course students will design a character makeup involving both facial prosthetics and ventilated hair. Three types of facial prosthetics are produced: silicone, foamed latex and slush molded latex. Face casting, clay sculpting and mold making are taught as steps to creating the final prosthetic. A ventilated hair piece is produced with attention to techniques of pattern making, hair processing, ventilating and hair dressing. Painting techniques are reviewed as final makeup is put together. Each year the class will choose one "extra" technique to pursue. Past pursuits have been: Kabuki Makeup with Kabuki master Shozo Sato, Tooth casting and stage teeth.

PRF 214, 215 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

First course in a 3 course sequence. Basic techniques are incorporated into a comprehensive approach to scene design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of stage designs.

DES 243 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Second course in a 3 course sequence. Basic techniques are incorporated into a comprehensive approach to scene design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of stage designs.

DES 342 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Third course in a 3 course sequence. Basic techniques are incorporated into a comprehensive approach to scene design with the emphasis on aesthetics. The analysis of scripts in visual terms, visual research methods, style in the theater, and the development of a design concept, are studied through projects in contrasting styles of stage designs.

DES 343 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

First course in a 3 course sequence. Lectures and projects in costume design for the modern drama, specifically from realism through the 20th century styles. Design projects include script interpretation, rendering techniques, budgets, and fabric selections.

DES 246 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

Second course in a 3 course sequence. Lectures and projects in costume design for the modern drama, specifically from realism through the 20th century styles. Design projects include script interpretation, rendering techniques, budgets, and fabric selections.

DES 344 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 346
COSTUME DESIGN II
Undergraduate
Third course in a 3 course sequence. Lectures and projects in costume design for the modern drama, specifically from realism through the 20th century styles. Design projects include script interpretation, rendering techniques, budgets, and fabric selections.

DES 345 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 347
LIGHTING DESIGN II
Undergraduate
First course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 249 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 348
LIGHTING DESIGN II
Undergraduate
Second course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 347 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 349
LIGHTING DESIGN II
Undergraduate
Third course in a 3 course sequence. The implementation of lighting ideas. Practice in the translation of lighting ideas into actual designs. Light pads, lighting paperwork, Vectorworks, the use of equipment and the exploration of realistic lighting styles.

DES 348 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 361
THEATRICAL COLLABORATION
Undergraduate
An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects.

Status as a 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

DES 362
THEATRICAL COLLABORATION
Undergraduate
An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects.

Status as a 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

DES 371
DESIGN PRODUCTION PRACTICE II
Undergraduate
First course in a 3 course sequence. For all design students. Through demonstration, discussion, lecture, and projects, students explore assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 372
DESIGN PRODUCTION PRACTICE II
Undergraduate
Second course in a 3 course sequence. For all design students. Through demonstration, discussion, lecture, and projects, students explore assignments will be commensurate with ability and experience.

DES 371 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 373
DESIGN PRODUCTION PRACTICE II
Undergraduate
Third course in a 3 course sequence. For all design students. Demonstration, discussion, lecture, and projects. Assignments will be commensurate with ability and experience.

DES 372 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 384
RENDERING FOR DESIGNERS I
Undergraduate
First course in a 3 course sequence. The course consists of exercises, studies and renderings using values of gray to achieve the illusion of 3-dimensional form. With a variety of drawing and painting materials, students work from gradually more complex still-life set ups, under controlled lighting, and form a clipping file of research which they compile.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 385
RENDERING FOR DESIGNERS II
Undergraduate
Second course in a 3 course sequence. The course consists of exercises, studies and renderings using values of gray to achieve the illusion of 3-dimensional form. With a variety of drawing and painting materials, students work from gradually more complex still-life set ups, under controlled lighting, and form a clipping file of research which they compile.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 386
RENDERING FOR DESIGNERS III
Undergraduate
Third course in a 3 course sequence. The course consists of exercises, studies and renderings using values of gray to achieve the illusion of 3-dimensional form. With a variety of drawing and painting materials, students work from gradually more complex still-life set ups, under controlled lighting, and form a clipping file of research which they compile.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 387
SCENE PAINTING
Undergraduate
First course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale leads to fully developed illusionistic and pictorial stage scenery.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 388
SCENE PAINTING
Undergraduate
Second course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale leads to fully developed illusionistic and pictorial stage scenery.

DES 387 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 389
SCENE PAINTING
Undergraduate
Third course in a 3 course sequence. Discussion of the formulation and handling of scene paints and dyes, brushes and tools, and techniques. Practical laboratory work in problems of the realistic representation of a variety of textures and materials at scenic scale leads to fully developed illusionistic and pictorial stage scenery.

DES 388 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 399
INDEPENDENT STUDY
Undergraduate
Independent Study
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 408
SOUND DESIGN III
Undergraduate
This course incorporates the full design of a show using the students' own compositions. The students will complete an entire play start to finish without using any found music.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 409
SOUND DESIGN III
Undergraduate
This class will help the student prepare their own specific branding for their freelance career so that they will have a complete packaging of their artwork. In addition they will be working on 2 plays simultaneously in order to jump-start into the multi-tasking that is involved in Sound Design.

Status as Graduate Theatre student is a prerequisite for this class.

DES 410
SOUND DESIGN III
Undergraduate
Each week will be an introduction to different careers that are possible within the field of Sound Design. This class will contain guest lectures from the professional designers who specialize in each field. This will help the student narrow their focus to what they wish to achieve after they graduate. In addition, the students will be working on 3 plays simultaneously to continue their multi-tasking ability.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 441
SCENE DESIGN III
Undergraduate
First course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres, including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 343 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 442
SCENE DESIGN III
Undergraduate
Second course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres, including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 441 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 443
SCENE DESIGN III
Undergraduate
Third course in a 3 course sequence. Students complete assignments in the conceptual analysis and fulfillment of projects covering a wide variety of genres, including designs for the classical and modern drama, opera, and the ballet. As a corollary, portfolios of a professional caliber are developed.

DES 442 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 444
COSTUME DESIGN III
Undergraduate
First course in a 3 course sequence. Costume design for the diverse styles of the pre-modern drama evolving through lecture and project work. Projects will include script interpretation, developing a professional portfolio, discussions on career planning, and the exploration of costume design within the areas of musical theater, opera, dance, film, television and commercials.

DES 346 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 445
COSTUME DESIGN III
Undergraduate
Second course in a 3 course sequence. Costume design for the diverse styles of the pre-modern drama evolving through lecture and project work. Projects will include script interpretation, developing a professional portfolio, discussions on career planning, and the exploration of costume design within the areas of musical theater, opera, dance, film, television and commercials.

DES 444 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 446
COSTUME DESIGN III
Undergraduate
Third course in a 3 course sequence. Costume design for the diverse styles of the pre-modern drama evolving through lecture and project work. Projects will include script interpretation, developing a professional portfolio, discussions on career planning, and the exploration of costume design within the areas of musical theater, opera, dance, film, television and commercials.

DES 445 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 447
LIGHTING DESIGN III
Undergraduate
First course in a 3 course sequence. Complete lighting design projects in a variety of styles and methods of presentation including unit set, multi-set, musicals, operas. Cuing, scenery and backdrop design will also be covered.

DES 349 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 448
LIGHTING DESIGN III
Undergraduate
Second course in a 3 course sequence. Complete lighting design projects in a variety of styles and methods of presentation including unit set, multi-set, musicals, operas. Cuing, scenery and backdrop design will also be covered.

DES 447 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 449
LIGHTING DESIGN III
Undergraduate
Third course in a 3 course sequence. Complete lighting design projects in a variety of styles and methods of presentation including unit set, multi-set, musicals, operas. Cuing, scenery and backdrop design will also be covered.

DES 448 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 471
DESIGN PRODUCTION PRACTICE III
Undergraduate
For all design students. Assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 472
DESIGN PRODUCTION PRACTICE III
Undergraduate
For all design students. Assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 473
DESIGN PRODUCTION PRACTICE III
Undergraduate
For all design students. Assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 484
PHOTOSHOP FOR DESIGNERS
Undergraduate
This class will take students through the process of creating professional renderings of stage scenery, costumes, and lighting, by using Photoshop to manipulate and transform their original sketches. Through this process, the students will master the tools available in Photoshop, and will create portfolio-ready rendering works.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 485
PROJECTION DESIGN
Undergraduate
This is a one quarter course that provides students with basic design concepts, techniques and skills in the use of projection design for theatre. The classes combine lecture-discussion and studio work, and are project based to apply learned skills to the projection design process. The course focuses on conceiving motion and still images for projection, communicating those ideas to the design team through story boards, and realizing those ideas through the use of Isadora video control software. The instructor will work with students individually to focus on techniques that support each student's specific design discipline. Every effort will be made to bring students into working theaters to see professional theatre productions using projections. No pre-requisite; a working knowledge of Adobe Photoshop is recommended.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 486
PORTFOLIO PREPARATION
Undergraduate
Students will work on developing a professional portfolio that showcases their design work to best advantage. Students will develop a consistent presentation style and will rework projects as necessary to increase the quality of their portfolio.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

DES 490
DESIGN INTERNSHIP
Undergraduate
The internship provides the student with an opportunity to learn by working with experienced professionals in an area related to his/her area of study at The Theatre School.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
DES 641
THEATRICAL COLLABORATION
Graduate
An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects.

Status as a 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

DES 642
THEATRICAL COLLABORATION
Graduate
An investigation, through research and discussion, of the conceptual problems of physically mounting specific, assigned scripts from the classic and modern theatre, covering a broad stylistic range. Students will submit proposals for designs and justify their ideas through literary and pictorial research. The directorial and collaborative problems of arriving at a production concept, up to, but not including fully-realized design documentation, is emphasized through a series of projects.

Status as a 3rd or 4th year BFA Lighting, Scenery, Costume Design and Dramaturgy students, or MFA students is a prerequisite for this class.

DHS 500
INTRODUCTION TO DIGITAL HUMANITIES
Graduate
An introduction to tools and methods in digital humanities.

DMA 410
DESIGN WORKSHOP
Graduate
This course is an intensive study of the world of visual design with a specific focus on contemporary graphic design theories and practices expressing ideas and messages to specific audiences. It expands on the design skills developed in the introductory class (GD 200) including communication, conceptualization, typography, color, form, and structure. Students will study both commercial and artistic approaches producing projects that integrate designed graphics, photographs, illustration and text, and their intersection with moving technologies. Students will have the opportunity to produce sophisticated printed matter on state-of-the-art printing equipment or digital presentation for the web, screen or mobile devices. PREREQUISITE(S): None

DMA 415
AUDIO WORKSHOP
Graduate
This course is an introduction to the world of interactive audio communication for multimedia. Students will study various uses of sound and music on stand-alone applications, mobile devices, and the internet. Students will learn to create and edit podcasts, deliver multimedia presentations, upload audio in various standard formats and attach audio files to social media platforms. Emerging hardware and software technologies will also be introduced. The course will also cover current trends and legalities of digital media. PREREQUISITE(S): None

DMA 425
STILL IMAGE WORKSHOP
Graduate
This course develops and expands the digital imaging skills introduced in the introductory class (DC 225), with a specific focus on their application in contemporary photographic practice. Advanced color correction, retouching, and compositing techniques are covered and complemented by further development of digital capture (scanning and digital cameras) and printing techniques. Assignments incorporate the technical aspects of specific skills while emphasizing their conceptual application. Digital acquisition and output utilizes ever-changing technology providing an understanding of advanced digital workflow and new processes as they apply to individual artistic practice. Students gain a wealth of technical understanding on topics such as color calibration and device profiling, file types and file management, and advanced color correction terms and techniques (gamma, color space, raster image processing and profile printing). Output methodologies and materials, including dye-based and pigment-based color inkjet prints, carbon-based black and white inkjet prints, digital color coupler printing, and a variety of experimental materials are explored. Assignments facilitate students' research and exploration of new techniques in the conception and production of their own work. PREREQUISITE(S): None
DMA 475
MOVING IMAGE WORKSHOP
Graduate
This course introduces students to more sophisticated forms of image/sound manipulation, editing, and theory. Pre-production planning (storyboards, scripting, budgeting), further refinement of digital editing techniques, and basic post-production/visual effects are covered, as well as studio production techniques, such as chroma-keying and work with advanced cameras. Students are expected to achieve a level of technical competence and confidence necessary to undertake more ambitious independent work. The class views and discusses key contemporary works and related critical writings. PREREQUISITE(S): None

DMA 480
WEB/MEDIA DELIVERY WORKSHOP
Graduate
This course is an intensive exploration of the opportunities and constraints of social media platforms for the distribution and curation of digital media artifacts. We will explore both commercial and academic platforms to develop an understanding of how different designs support different models of curation and distribution. As a project, students will select 2 platforms and create original digital installations using media they have authored in order to examine how the design of a social media platform influences how audiences interact with their installations. PREREQUISITE(S): None

DMA 490
PORTFOLIO
Graduate
This course assists students preparing to enter the job market and emphasizes assembling a professional quality portfolio through workshops on advanced modeling and rendering techniques, visual composition, portfolio layout, design communication and presentation skills. Portfolio reviews by invited professionals are an integral component of this course. PREREQUISITE(S): None

DMA 525
FOUNDATION OF DIGITAL MEDIA
Graduate
This introductory course will provide students with a detailed practical introduction to the technological practices, skills, and tools of digital communication. Students will engage with digital technology with the goals of learning and practicing technical skills across a range of technologies, including video, audio, graphic design, and human-computer interaction. Students work with still images, moving images and sound using integrated digital media applications. The course focuses on the technical, social and cultural competencies required to traverse media in online convergence environments. This class provides students a hands-on approach to digital communication. This course will also prepare students to work with digital technology at future jobs. PREREQUISITE(S): None

DMA 527
DIGITAL MEDIA ARTS SURVEY
Graduate
Introduces the field of Digital Media and the faculty who teach it. Each week a different CIM faculty member will present his or her research and relate that topic to the wider field of Media Arts. Encourages students to clarify their course of study and build alliances with faculty and students with similar interests. PREREQUISITE(S): None

DMA 555
DIGITAL MEDIA STUDIO
Graduate
Students explore studio-based collaborative creation of media arts projects and work processes. The course will include different methods and approaches rather than a discipline-specific focus. Depending on student interest, the projects will include image production and design through animation, film, sound, design, interactivity and photography. The computer is used as a creative solution to producing innovative projects emphasizing the construction of a portfolio of work. PREREQUISITE(S): None

EA 505
APPLIED INQUIRY PROJECT PROPOSAL I
Graduate
Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project Advisor. Proposal I emphasizes selecting a project topic/focus and conducting a literature review. Status as an MAEA student or departmental permission is a prerequisite for this class.
EA 506
APPLIED INQUIRY PROJECT PROPOSAL II
Graduate
Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project Advisor. Proposal II emphasizes the purpose and design of the inquiry project, and audience(s) for dissemination.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 507
APPLIED INQUIRY PROJECT PROPOSAL I
Graduate
Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project Advisor. Proposal I emphasizes selecting a project topic/focus and conducting a literature review.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 508
APPLIED INQUIRY PROJECT PROPOSAL II
Graduate
Each student will design his/her EA 528 Applied Inquiry Project, in consultation with the faculty mentor and a project Advisor. Proposal II emphasizes the purpose and design of the inquiry project, and audience(s) for dissemination.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 515
DEVELOPING PROFESSIONAL IDENTITY
Graduate
In this foundation course, students will situate their own area of practice in broader contexts of adult learning and adult education. Students will systematically reflect on their professional identity(ies), examine their practice in the context of philosophical traditions, and construct their own philosophy of education to guide their practice. They will expand their academic sources and professional networks. Students will begin work on their individual Program portfolios, which will be constructed throughout their program.

EA 516
DESIGNING EDUCATIONAL OFFERINGS
Graduate
In this course, students will be introduced to major components involved in designing educational offerings for adult learners in various face-to-face settings. Students will develop (or revise) a design plan for an educational offering appropriate to their selected adult clientele. In particular, they will articulate learning outcomes around which to build their design plan (backward design). They will apply theories, concepts, and principles of adult learning while making design decisions. While the design principles addressed in this course are relevant to on-line environments, students who wish to delve further into on-line learning/teaching technology are encouraged to do so through the MAEA Electives option.

EA 517
FACILITATING ADULT LEARNING
Graduate
In this course, students will develop and hone skills to facilitate adult learning in a variety of settings. Students will learn about concepts that inform learner-centered methods and techniques of facilitating learning. Throughout the course, they will apply various methods and techniques in various settings and reflect on how these methods influence learning. The repertoire of skills that students develop as facilitators of learning will have both immediate and future application. While the concepts, methods, and techniques covered in this course are relevant to on-line learning, students who wish to delve further into facilitating on-line learning are encouraged to do so through the MAEA Electives option.

EA 518
ENHANCING PRACTICE WITH THEORY IN ADULT LEARNING
Graduate
In this capstone course, students' practices in helping adults learn will be grounded in relevant theories, models, and principles of adult learning and development. Students will examine various strands of research and theory that support, challenge, and enhance their practices in working with adult learners in their selected settings. Students will have many opportunities to explore and share new ideas and approaches through the various perspectives studied, thereby enhancing one another's theoretical foundations.
EA 525
PRACTICE-BASED INQUIRY
Graduate
In this course, students will be introduced to approaches, concepts, and tools within the realm of qualitative research. Students will select a topic of inquiry that concerns issues or problems in their practice settings and choose methods of gathering data that can be used to address these matters. This focus on methods will be set within the larger context of research design and methodologies. Students will investigate the literature related to their topic of inquiry, extending an annotated bibliography to a thematic literature review. The planning students do in this course may be a springboard for their independent learning projects. Students who wish to augment qualitative research with quantitative approaches are encouraged to do so through the MAEA Electives option.

EA 526
ASSESSING LEARNING AND EVALUATING PROGRAMS
Graduate
In this course, students will learn about and apply various approaches, strategies, and tools for assessing learning outcomes of individuals. Students will select and apply assessment models relevant to their practice settings, and gain skills in designing assessment instruments. Students also will be introduced to basic approaches and concepts involved in evaluating educational programs, with particular attention to how assessing learning can connect with program evaluation. Students who wish to delve further into program evaluation are encouraged to do so through the MAEA Electives option.

EA 527
FINDING AND MANAGING INFORMATION
Graduate
This MAEA foundational course provides participants with skills in collecting, analyzing and synthesizing literature and resources in their respective area(s) of practice. Among these skills are: searching and accessing various sources; discerning credibility of sources; storing and retrieving information for oneself; constructing thematic literature reviews; and, citing sources using APA style.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 528
APPLIED INQUIRY PROJECT
Graduate
In consultation with the faculty mentor and a project advisor, each student will design and carry out a project that addresses a significant question/issue in the student's area of practice. Knowledge and skills gained in EA 525 will be implemented with the aim of enhancing practice informed by relevant frameworks and ideas. The final product must be approved by GPSRC.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 536
REFLECTIVE PRACTICE SEMINAR II
Graduate
After the third quarter, students come together for group reflection and review of their progress in the program. This seminar assists students in planning their electives, reflecting on applications of their learning, and assessing growth in the Elements of Better Practice.

Status as an MAEA student or departmental permission is a prerequisite for this class.

EA 537
REFLECTIVE PRACTICE SEMINAR III
Graduate
Seminar offers students an opportunity to get feedback on plans for the Applied Inquiry Project, to conduct an informal mid-program review, to examine ways in which students are applying the three elements of Better Practice, and to identify significant "threads" across the curriculum.

Status as an MAEA student or departmental permission is a prerequisite for this class.
At the end of the program, students join in a summit to review their program, engage in discussion on their next steps, to review their credo of educating adults, reflect again on the three Elements of Better Practice, and present their program portfolio.

Status as an MAEA student or departmental permission is a prerequisite for this class.

This course focuses on designing and delivering educational experiences using the web, digital video, animation, gaming and mobile delivery formats. Students explore instructional design theory and bridge its application into/through basic training in each of these technological applications, including consideration of relevant examples of best practices and instructions regarding when to employ each application. This course does not have prerequisites; however, students are expected to be familiar with basic learning design principles.

This online course (six-modules) for teachers in any discipline focuses on making the most of writing as a tool for teaching and learning in undergraduate and graduate courses. In the course, teachers will explore practical ideas for in-class writing assignments that initiate discussions and provide quick input regarding student learning. Teachers will also learn strategies for developing assignments and providing feedback while maximizing efficiency and minimizing frustration. Opportunities to share ideas and receive coaching on current writing assignments and ways of giving feedback are included. This course does not have prerequisites; however, those taking it should have undergraduate or graduate courses that they wish to develop or revise and experience teaching at the college level that they can draw upon for discussions.

This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Each student designs a plan for outcome-based program evaluation, along with evaluation tools, that are relevant to his/her practice setting. This evaluation approach is then considered in relation to other models and approaches to evaluation of education, training and professional development programs. Illustrations of current program evaluation practices are included.

This course functions as a Graduate Faculty-Directed Independent Study/GFDIS. (See MAEA Guidebook for general GFDIS details.) Students participate in SNL's Adult Learning Innovation Institute (Module: Innovative Strategies for Facilitating Adult Learning), learn innovative strategies for engaging and motivating adult learners in various educational and training settings and subsequently apply their learning in specific ways within their practice settings. Students also receive feedback and coaching from instructors and institute peers. (Questions? For information regarding the Institute, contact caea@depaul.edu. For information regarding the GFDIS-course, contact its instructors.)

This is a faculty mentor-guided session, which follows EA 515. Students revisit their selected area of practice, select purposes for their program portfolio, and plan for development of these Elements of Better Practice.

Status as an MAEA student or departmental permission is a prerequisite for this class.

Candidates will observe and interact with infants and toddlers (25 clock hours) and attend a weekly seminar in which they will be required to reflect on their experiences in relation to the development and learning processes of infants and toddlers. Appropriate early childhood lesson planning and assessment techniques and tools will be emphasized. COREQUISITE: ECE 290.
ECE 92
CLINICAL EXPERIENCES WITH YOUNG CHILDREN AND FAMILIES
Undergraduate
Candidates will observe and interact with young children and their families in school and child care settings with family/parent education programs; family conferences and home visits will be included in the options. (25 clock hours). Candidates will meet once a week in a seminar to reflect and discuss topics around parental involvement, parental support, and building communities through connections between schools and homes. COREQUISITE: ECE 302.

ECE 93
CLINICAL EXPERIENCES WITH PRE-SCHOOLERS
Undergraduate
Candidates will observe and interact with preschool age children (25 clock hours) and attend a weekly seminar in which they will be required to reflect on their experiences in relation to the development and learning processes of preschool age children. Appropriate early childhood assessment and instructional methodologies will be emphasized. COREQUISITE: ECE 310.

Advanced Teacher Candidate Standing is a prerequisite for this class.

ECE 94
CLINICAL EXPERIENCES IN PRIMARY GRADES
Undergraduate
Candidates will observe and interact with primary age children (25 clock hours) and attend a weekly seminar in which they are required to reflect on their experiences in relation to the development and learning processes in the primary years (K-3). Appropriate assessment and instructional methodologies for children in the primary grades will be emphasized. COREQUISITE: ECE 311.

Advanced Teacher Candidate Standing is a prerequisite for this class.

ECE 175
EDUCATING THE TWENTY-FIRST CENTURY YOUNG CHILD
Undergraduate
Course is for students with interests in early childhood programs in the United States. Course explores issues influencing early childhood education, such as socio-historical factors, family policy, diversity, and federal/state regulations. Students examine programs using readings from the Vincentian Collection, child psychology, social theories and the current media. Students compare Vincentian Heritage, current and past federal policies, applying this study to their understanding of social justice to modern childcare practices. To guide students deeper into understanding the lives of young children, the course offers an option for service learning with Jumpstart, Chicago-area Head Start, and other early childhood education centers.

ECE 280
INTERNSHIP WITH INFANTS AND TODDLERS
Undergraduate
Candidates conduct 75 hours of intense supervised fieldwork in an infant/toddler center where they are observing and documenting behavior and interactions, planning activities, and assessing development in children ages birth to 3. Candidates will also participate in a twice a quarter, hour and a half, seminar to reflect and discuss aspects of infant/toddler development and care, making connections between theory and practice. Onsite meetings with groups of candidates will be held weekly for supervision and reflection on practice. Co-requisite ECE 290.

ECE 286
ART, MUSIC, AND MOVEMENT FOR THE YOUNG CHILD
Undergraduate
This course will focus on the theory, research, methods, and activities of art, music, and movement for young children birth through age 8. Emphasis will be on the integration of developmental domains, creative and critical thinking as developmental domains are integrated.

ECE 290
CHILD GROWTH AND DEVELOPMENT
Undergraduate
This course examines human growth and development of the child from pregnancy through age eight, including cognitive, language, physical, social, spiritual, creative, and emotional areas of development. Learning and development theories of young children, including those of Freud, Erikson, Bowlby, Piaget, Vygotsky, Bronfenbrenner, and other modern developmental theorists are explored. Pedagogical implications of these developmental theories are embedded in class discussions and course activities. COREQUISITE: ECE 280.
ECE 298
CHILD HEALTH SAFETY AND NUTRITION
Undergraduate
This course focuses on the interrelationships among child, family and the areas of health, safety and nutrition. Special emphasis will be placed upon the issues of health, safety and nutrition that affect young children from the ages of birth through age 8. Understanding cultural issues and special needs of individual children are addressed, as are aspects of health and safety. Central to this course is the acquisition of knowledge and application of practices that promote good nutrition, dental health, and the physical, social and emotional well being of young children. The course includes information on common diseases and health problems.

ECE 302
CHILD AND FAMILY IN THE URBAN COMMUNITY
Undergraduate
This course focuses on understanding the diversity of children and families in approaches to development, learning, and disability. Strategies in developing positive and supportive relationships with families of young children with special needs, including family-centered practices, will be explored. Particular attention is given to the challenges faced by teachers and other professionals in early intervention in assessing children's needs and providing services, which are reflective of the child's development within his/her diverse cultural and community context. In addition, the course examines ways to develop and maintain productive and collaborative relationships among professionals and families, communities, and other professionals across the range of support systems in the IFSP and IEP planning processes.

ECE 303
INTRODUCTION TO EARLY CHILDHOOD EDUCATION
Undergraduate
This course will introduce students to the professional ethics of early childhood education and the critical role of federal policy in the evolution of the field. Historical, sociological, philosophical, and psychological foundations of early childhood education are explored. Of special interest is a review of key theories and research that inform the development of early childhood education goals and practices, as well as administrative, pedagogical, and ethical professional standards for working with children from diverse communities. The course includes foci on Developmentally Appropriate Practice (DAP), inclusive pedagogical practice, appropriate use of technology with young children, and various curricular models: Montessori, Reggio Emilia, High Scope, and Creative Curriculum.

ECE 306
FUNCTIONAL BEHAVIOR ASSESSMENT: POSITIVE BeckHAvIORAL SUPPORT AND INTERVENTION METHODS
Undergraduate
This course is designed to prepare early childhood pre-service teachers to work with children who present a variety of challenging behaviors in the classroom. Grounded in principles of Applied Behavior Analysis, the philosophy of the course is based on the premise that understanding the underlying causes of children's externalizing and internalizing behavior enables the teacher to utilize appropriate techniques in conducting behavior intervention and classroom management. Using Positive Behavioral Support and Functional Behavior Analysis (a competency required for all teachers under the provisions of IDEA), students will learn how to design and develop a Behavior Intervention Plan. Diverse methods for addressing a variety of behaviors are explored and practiced through field-based assignments that also include application of behavioral assessment and intervention tools, as well as techniques.

ECE 290 and Advanced Teacher Candidate Status is a prerequisite for this class.

ECE 307
SPEECH AND LANGUAGE DEVELOPMENT OF THE YOUNG CHILD
Undergraduate
This course examines the development of speech and language in young children. The course will explore assessing children's language development, as well as providing techniques for supporting and enhancing language growth. Attention will be given to dialectal issues as these apply to growth and development of linguistic competencies through the early childhood years.

ECE 290 and (Advanced Teacher Candidate Standing or a declared ECE minor) are a prerequisite for this class.

ECE 309
YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS
Undergraduate
This course is a survey of the field of early childhood special education, including the Early Intervention System. Characteristics of infants, toddlers, and young children with special needs are examined in this course. Methods of working with different disabilities during children's early years will be explored. Strengths and needs of families of young children with disabilities and collaboration with family members will be emphasized. Understanding the impacts of current legislation, policy, and research on practice is fostered and developed. Completing 15 hours of field experience in an early childhood special education setting is a part of this course's requirements.

ECE 290 is a prerequisite for this class.
ECE 310
PREPRIMARY PROGRAMS: CURRICULUM AND STRATEGIES
Undergraduate
Candidates will plan, implement, and evaluate activities that promote the physical, emotional, social, spiritual, cognitive, and creative development of preschool children from diverse cultural and socioeconomic backgrounds. Emphasis will be placed on creating learning environments that facilitate children’s learning through play. Developmentally appropriate practices, with a particular emphasis on social studies, use of technology, and learning centers will be thoroughly investigated. COREQUISITE: ECE 381.

ECE 311
CURRICULUM AND INSTRUCTION IN PRIMARY GRADES
Undergraduate
This course provides an examination of the objectives, content methods and materials used in the primary grades of elementary schools (K-3). A variety of teaching methods and classroom management strategies will be discussed and illustrated, including teacher-led and student-centered instruction. Candidates will be encouraged to reflect upon their own emerging educational philosophies and teaching styles as they take part in laboratory and clinical experiences. Many opportunities for planning, using and evaluating a variety of teaching methods will be offered. Each student will develop at least one teaching unit on a primary social studies theme. COREQUISITE: ECE 382.

ECE 312
BILINGUAL THEORY IN EARLY CHILDHOOD DEVELOPMENT
Undergraduate
This course is designed to equip bilingual and second language teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, political and legal foundations of bilingual education programs in the United States. It will examine different models of bilingual programs and the psycholinguistic and sociolinguistic principles upon which they are based.

ECE 313
CROSS CULTURAL STUDIES IN EARLY CHILDHOOD EDUCATION
Undergraduate
The course will discuss the historical, philosophical and cultural foundations of education of young children in a multicultural society, emphasizing the role of ethnicity and cultural variables in development of young children within the context of families, childcare centers, and educational systems. Topics include: history of immigration and predictions for the future; the effects of population shifts on the education of English Language Learners and their families; the impact of laws, litigation and executive orders on bilingual/English-as-a-Second-Language education; understanding cultural and linguistic differences regarding locating and using educational resources.

ECE 314
METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS IN EARLY CHILDHOOD EDUCATION
Undergraduate
This course focuses on best practices in teaching English Language Learners, helping them to learn English while maintaining their native language, in bilingual/ESL early childhood classrooms, from birth through age 8. Candidates will demonstrate competencies with different approaches and methodologies currently used to support the development of listening, speaking, reading, and writing in social and academic contexts in learners’ first and second language. Curriculum- based assessment, cultural awareness, and self-reflective practice will also be addressed.

ECE 325
SECOND LANGUAGE ACQUISITION AND EARLY LITERACY DEVELOPMENT
Undergraduate
This course will examine the process of learning and using a second language. Research in second language acquisition (SLA) is multi-disciplinary in nature, reflecting the complexity of language learning and use. Linguistic, psychological and social processes that underlie language learning and use will be introduced and applied to the understanding of this learning in young children. Language acquisition theory concerning relationships between early literacy and oral language development in first and subsequent languages will be explored. Understanding developed through this exploration will then be applied to the classroom in the form of strategies and literacy development activities.
ECE 326  
PRINCIPLES AND STRATEGIES FOR FAMILY ADVOCACY AND ACTION IN EARLY CHILDHOOD  
Undergraduate  
This course develops knowledge and skills to assist families of young children who face the stress of living in poverty. The focus will be on developing empathetic relationships with families so that family service and education can be optimized. Candidates will be assisted in learning to identify community resources and ways to support families in accessing resources. A focal point will be on ways to empower families, recognizing family strengths and respect for cultural variables, as they apply.

ECE 302 is a prerequisite for this class.

ECE 327  
IMPACT OF PUBLIC POLICY ON FAMILIES OF YOUNG CHILDREN  
Undergraduate  
This course is grounded in social justice practice and designed to promote an understanding of the ethical principles, legal issues, policies, and law influencing the well-being of families, including those families of young children with disabilities and those who are English Language Learners. A particular focus will be on how federal childcare and education policy affects and shapes early childhood practice and service delivery to families. This course explores historical development of laws and public policy affecting families. Ethics and ethical implications of social change will be explored.

ECE 328  
WORKING WITH FAMILIES OF CHILDREN WITH DISABILITIES AND CHRONIC ILLNESS  
Undergraduate  
This course will strengthen the knowledge and skills of early childhood educators and other professionals working with young children in cultural competency (at the individual and institutional level), family-centered care, family-professional partnerships, family-directed practices, and family empowerment. Candidates will develop best practices to assure the health and well-being of children and their families and to honor the strengths, cultures, traditions and expertise that everyone brings to this relationship.

ECE 329  
YOUNG CHILDREN’S LITERATURE AND FAMILY LITERACY  
Undergraduate  
This class explores the joys of reading and provide strategies for candidates to awaken and encourage the joy of reading in the children and families with whom they work. It focuses on how early childhood educators are uniquely positioned to foster literacy in children and their families through thoughtful, theoretically based programming and activities.

ECE 331  
BEGINNING MATH AND SCIENCE INSTRUCTION  
Undergraduate  
This course applies child development principles to the planning of science and mathematics experiences for both typically and atypically developing young children. Emphasis is placed on understanding how children develop problem-solving skills, and on recognizing how teachers can facilitate inquiry-discovery experiences for young children with diverse learning styles and needs. Course assignments include participation in experiments and field-based experiences in mathematics and sciences. Teacher candidates are required to develop and provide developmentally and culturally appropriate activities in science and mathematics activities for young children.

ECE 290 and Advanced Teacher Candidate Standing are a prerequisite for this class.

ECE 332  
EARLY LITERACY AND ASSESSMENT FOR YOUNG CHILDREN WITH DISABILITIES  
Undergraduate  
This course focuses on the nature of the reading process, current literacy theory and practices, and research-based instructional strategies to develop literacy skills in emergent and developing readers and young children with reading/learning disabilities. Emphasis is placed on understanding the reading process, analyzing and applying research-based instructional practices, administering, analyzing, and interpreting formal and informal reading assessments, and making informed instructional decisions to meet the unique needs of individual readers. Differences in reading abilities will be examined in light of providing appropriate, effective, and meaningful literacy instruction for young children with disabilities.
ECE 333
EARLY CHILDHOOD EDUCATION FOR LOW INCIDENCE DISABILITIES
Undergraduate
This course focuses on an examination of the developmental and learning characteristics of young children with low incidence disabilities. A specific focus is on educating early childhood students with Autism Spectrum Disorders and those with Intellectual Disabilities. A primary goal of this course is to understand the learning needs of these children, and to examine and evaluate various educational and therapeutic methods of working with them. A major part of this course is devoted specifically to the characteristics associated with and interventions for children with Autism Spectrum Disorders.

ECE 334
SPECIAL EDUCATION CURRICULUM AND STRATEGIES FOR YOUNG CHILDREN
Undergraduate
Study of the theoretical and practical approaches to instruction for young children with high incidence disabilities. Emphasis is placed on the development of supportive learning environments, using special curricular and behavioral management strategies for all early childhood settings; application of collaborative practices with multiple service providers and families to meet the needs of diverse learners with high incidence disabilities. Strategies and materials for improving the social, emotional, and academic adjustment and functioning of young children with high incidence disabilities are examined. Includes teaching social and emotional curricula; implementing functional behavioral assessment; and monitoring growth and development in targeted areas. Strategies to increase the young child's self-awareness, self-management, self-control, self-reliance, and self-esteem are considered. Application of diagnostic information into teaching strategies and implementation of an instructional plan (IEP) is a central tenet of the course. It is recommended for students to take ECE 290 and ECE 309 and to have 25 clock hours of Level II Experience prior to taking this class.

ECE 375
EARLY CHILDHOOD ASSESSMENT
Undergraduate
Students will study, use and evaluate early childhood assessment methods and tools that are appropriate for use with young children with diverse cultural and socioeconomic experiences. Ways of involving families in early childhood assessment will be stressed. How to observe and assess children individually, in groups and in their family systems and networking with community services will be explored.

ECE 377
ASSESSMENT OF YOUNG BILINGUAL/ ESL STUDENTS
Undergraduate
This course will focus on the discussion of basic principles and current approaches to assessment of language learning students in ESL and bilingual early childhood and early elementary educational settings. Candidates will learn about the different purposes of process and product assessment tools, authentic and curriculum-based forms of assessment, issues in the assessment of English Language Learners (ELLs), and assessment in academic areas for early elementary ELLs. Research on language and literacy acquisition in multilingual learners vis a vis instruction and assessment will be discussed. Candidates will have opportunities to critically examine and learn how to administer assessment tools used in current practice.

ECE 380
EARLY CHILDHOOD SPECIAL EDUCATION PRACTICUM
Undergraduate
Supervised teaching in a cooperating school serving young children with disabilities for 150 clock hours; arranged in collaboration with supervising faculty member and the Field Experience Office. Candidates will reflect upon their teaching experiences with young children with disabilities and collaborate with colleagues and instructor to identify alternative strategies for problematic situations. Application and approval required prior to registration. Open only to DePaul students.

ECE 381
INTERNSHIP IN PRESCHOOL SETTING
Undergraduate
Candidates conduct 75 hours of intense supervised field work in preschool during the winter quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have taken ECE 310: Preprimary Programs: Curriculum and Strategy.

Advanced Teacher Candidate Standing is a prerequisite for this class.
ECE 382  
INTERNSHIP IN PRIMARY SETTING  
Undergraduate  
Candidates conduct 75 hours of intense supervised field work in a primary grade (K-3) during the spring quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have taken ECE 311: Curriculum and Instruction in Primary Grades.

Advanced Teacher Candidate Standing is a prerequisite for this class.

ECE 383  
LINGUISTIC PRACTICUM IN EARLY CHILDHOOD EDUCATION  
Undergraduate  
This course will focus on application of the theories of effective teaching practices and assessment procedures appropriate for young English Language learners. It will emphasize an application of knowledge gained from previous ESL/ELL courses and demonstration of skills necessary to work collaboratively and effectively with families of young English Language Learners. Professional behaviors that respect, value, and support all children's native language and culture will be reinforced. (150 clock hours)

ECE 313, ECE 314, ECE 325, ECE 377, BBE 305, and BBE 306 or permission of the ECE Program Director are prerequisites for this class.

ECE 384  
EARLY CHILDHOOD EDUCATION CAPSTONE  
Undergraduate  
The senior capstone course is designed to help Candidates integrate the central emphases of their liberal learning studies curriculum with their professional behavior. It will provide prospective early childhood educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to early childhood education. Candidates will develop a professional portfolio that reflects the standards of the various guiding professional organizations. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program. This course is taken before student teaching.

ECE 385  
EARLY CHILDHOOD STUDENT TEACHING  
Undergraduate  
This course requires students to participate in supervised teaching at a cooperating school, five full days per week, for an academic quarter. Part of the teaching will be in a preprimary setting and part will be in a primary setting. Feedback and discussion of issues encountered in student teaching as well as new materials and techniques of student teaching will be included. Application and approval are required. Open only to DePaul students.

ECE 387  
CAPSTONE SEMINAR IN EARLY CHILDHOOD EDUCATION  
Undergraduate  
This course is designed to help candidates integrate the central emphases of their Liberal Studies curriculum with their professional knowledge and behavior. It provides opportunities and activities to prospective educators that engage them in being analytic and reflective upon their major and related disciplines; guide them in further considering their value commitments and how they relate to their chosen profession; apply critical and creative thinking in addressing ‘real-time’ professional issues and needs; and examine extant practices from multicultural perspectives. Candidates develop a professional teaching portfolio that reflects the standards of the various guiding professional organizations and the Illinois State Board of Education (ISBE). The course is grounded in the College of Education’s framework for an Urban Professional Multicultural Educator as well as the goals of the Liberal Studies program. The course is taken simultaneously with student teaching.

COREQUISITE(S): ECE 385.

ECE 399  
INDEPENDENT STUDY IN EARLY CHILDHOOD EDUCATION  
Undergraduate  
(1-4 Credits) PREREQUISITE(S): Permission from instructor, program chair and associate dean.
The focus of the seminar is to introduce the doctoral students to major research questions and issues in child development. The doctoral students will lead discussions on the most current and seminal research in the field of child development. In addition, the students will participate in analyses of existing US Policies in regards to child development. The seminar will have the following objectives: 1) Examination, analysis, and evaluation of the seminal and contemporary research and research methodologies in child development. 2) Examination and analysis of major theories of child development through a study of the original literature. 3) Examination and analysis of contemporary issues regarding maternal health and early development. 4) Examination, analysis, and evaluation of US policy approaches to maternal health and early child development and education.

Status as a EDD student with a declared concentration is a prerequisite for this class.

This seminar will examine the concept of risk and its influence on child development within various frameworks such as environment, genetics and neurobiology, psychopathology, family, public policy and education. An issue of interest will be the development of children who are at-risk due to environmental factors. The U.S. policies in addressing this population will be examined. The seminar will have the following objectives: 1) In-depth analysis of the concepts of risk and resilience through examination of the original research literature. 2) Examination and analysis of various risk factors (e.g.: genetics, biology, poverty, family, socio political influences) with attention given to neurobiological risk factors, including disabilities. 3) Examination and analysis of factors of resilience (including implications for intervention and early childhood education). 4) Examination and analysis of U.S. Policies in relationship to promotion of resilience via early childhood intervention and education programs.

Status as a EDD student with a declared concentration is a prerequisite for this class.

This seminar will examine issues related to curriculum in early childhood education and intervention, including assessment and other contemporary schooling issues. An in-depth analysis of various theoretical approaches influencing curriculum design in early childhood and family intervention will be conducted, as well as a review of the most influential and current educational models guiding curriculum in current early childhood settings. Through participation in this seminar candidates will meet the following objectives: 1) Examination of theoretical approaches influencing early childhood curriculum design. 2) Examination and analysis of contemporary curricular and assessment issues in early childhood education. 3) Examination and analysis of current early childhood educational models guiding curriculum. 4) Observation and analysis of model early childhood programs. 5) Exploration of other relevant contemporary early childhood education issues.

Status as a EDD student with a declared concentration is a prerequisite for this class.

Doctoral students will examine the design and goals of various nationally funded early childhood programs from their philosophical and policy perspectives. Doctoral students will devote the major part of this seminar to conducting a research evaluation of one selected national early childhood program as a class team project. The research may require utilizing field research methodologies of one or more centers belonging to the selected program. When feasible the students will present their research findings in a local or national conference. The seminar will have the following objectives: 1) Understanding program design. 2) Developing program evaluation to match questions and address stakeholder needs. 3) Acquiring hands-on experience conducting a program evaluation on a selected early childhood program. 4) Written and oral dissemination of study.

Status as a EDD student with a declared concentration is a prerequisite for this class.
ECE 744  
SEMESTER IN CULTURE, LANGUAGE AND LEARNING  
Graduate

This seminar will focus on examining the influences of culture and language in development and education of children. Current cross-cultural, cross-lingual educational research will be examined in detail. The seminar will have the following objectives: 1) In-depth examination and analysis of influences of race and culture on development based on current research. 2) Examination and analysis of multicultural issues, and implications for early education method and practices. 3) Examination and analysis of issues related to the education of interracial children. 4) Examination of bilingual issues and implications for early education methods and practices. 5) Examination and evaluation of current educational policies in relationship to bilingual and bicultural children in the US.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 759  
TEACHING INTERNSHIP IN EARLY CHILDHOOD EDUCATION  
Graduate

This teaching internship, which spans across two quarters, is designed to respond to the growing need for training high quality teaching professionals in the field. The doctoral students acquire hands-on experience in the field of college level teaching in early childhood education. The doctoral candidates will take on teaching two college level early childhood education courses for the duration of two quarters under the supervision of an early childhood program faculty. The courses to be taught are recommended by the supervising faculty. The major objectives of this internship are: 1) Demonstrating mastery of content. 2) Demonstrating abilities and skills in teaching university level students and pre-service early childhood professionals from diverse backgrounds.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 769  
RESEARCH INTERNSHIP IN EARLY CHILDHOOD EDUCATION  
Graduate

This research internship, which spans across two quarters, is designed to provide hands-on experience for doctoral students in the field of research in early childhood education. With the approval of the ECE program faculty, the candidates will work either with a faculty from the College of Education, from another college at DePaul University, or with a research associate or scientist at DePaul or in another institution to assist on a research project in one of the following areas: child development, early childhood education, child and family studies, developmental psychology or another closely related field. The research internship will take place for the duration of two quarters (Fall through winter quarter, or spring through summer quarter). The student's progress will be followed up by an early childhood advising faculty. The internship has the following objectives: 1) Understanding DePaul's IRB protocol and application process to acquire a certification for conduct of research. 2) Acquiring first hand experience while assisting a research faculty in conducting various phases of research. 3) Collecting, analyzing, and interpreting data under supervision. 4) Understanding various methodologies employed in the field of early childhood education.

Status as a EDD student with a declared concentration is a prerequisite for this class.

ECE 849  
SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT  
Graduate

Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

ECE 859  
INDEPENDENT DISSERTATION RESEARCH: EARLY CHILDHOOD EDUCATION  
Graduate

Students register for this course for the quarter in which they defend their dissertations. Permission of dissertation chair required.

ECO 101  
INTRODUCTION TO ECONOMIC ISSUES  
Undergraduate

This course will introduce students to basic concepts from both micro- and macroeconomics. The goal is for students to gain an appreciation of how economics can be used to understand the world. Students will enhance their analytical skills by using basic economic concepts to examine current domestic and international issues. Students will improve their oral communication skills during class discussions and debates. This course is intended for non-Commerce students and cannot be counted toward a major or minor in economics.

LSP 121 or MAT 130 is a prerequisite for this class.
ECO 105  
PRINCIPLES OF MICROECONOMICS  
Undergraduate
Principles of Microeconomics. Basic theories of micro (or individual) economic units; the theory of consumer demand, the firm, and distribution; pricing and production in competitive, monopolistic and oligopolistic industries.
MAT 130 or equivalent is a prerequisite for this class.

ECO 106  
PRINCIPLES OF MACROECONOMICS  
Undergraduate
Principles of Macroeconomics. Fundamental theories of macro (or aggregate) economics: supply and demand, national income accounting and analysis, and international trade. Analysis of unemployment, and inflation, and policies designed to combat these and other current problems.
MAT 130 or equivalent is a prerequisite for this class.

ECO 250  
CAREER PREPARATION FOR ECONOMICS MAJORS  
Undergraduate
Students will explore possible career options for economics majors while addressing three competency areas: self-management skills, career building skills, and general business skills. The course will focus on further developing students’ quantitative skills as they research career options and will include the development of a portfolio as a final assignment.
MAT 137, ECO 105, ECO 106, junior standing, and an intended or declared ECO major is a prerequisite of this class.

ECO 305  
INTERMEDIATE MICROECONOMICS  
Undergraduate
Continuation of topics treated in Economics 105, especially consumption and production theory. Marginal analysis and indifference curves are major tools used in discussion of demand for products, pricing output, wages, and distribution of output.
ECO 105 and MAT 135 or equivalent are a prerequisite for this class.

ECO 306  
INTERMEDIATE MACROECONOMICS  
Undergraduate
The purpose of this course is to develop macroeconomic models that assist in understanding the myriad economic problems facing us today, both domestic and foreign, and in evaluating proposed solutions. These static and dynamic models are used to understand interactions in the macroeconomy, and will serve as a tool in predicting the level of GDP, inflation, unemployment and interest rates. Models included are: traditional short-run Keynesian analysis; the New Classical market-clearing approach; and the recent work in Neo-Keynesian thought.
ECO 105, ECO 106 and MAT 135 or equivalent are a prerequisite for this class.

ECO 310  
URBAN ECONOMICS  
Undergraduate
This course discusses the economic rationale for the existence of cities and urban areas. Location decision-making by both firms and households is analyzed with attention given to the resulting land values, land rents, population density gradients, and urban land use patterns. We study models of the supply and demand for housing, the measurement and determination of house value, and the corresponding problems of segregation, housing abandonment, property taxation, and public housing. Other urban problems such as poverty, crime, and transportation are also discussed.
ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.
ECO 311
BUSINESS AND ECONOMIC FORECASTING
Undergraduate
Students will learn forecasting tools for microeconomic variables such as sales and profits and macroeconomic variables such as interest rates and GDP growth rates.

ECO 375 is a prerequisite for this class.

ECO 312
THE CHICAGO ECONOMY
Undergraduate
The first part of this course will focus on changes in the Chicago metropolitan economy over time. Topics to be covered will include the development of the Chicago economy in the 19th Century, modern economic development, land use, and suburbanization. The second part of the course will focus on selected policy issues including poverty, housing, pollution, crime, education, transportation, and taxes.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 313
ECONOMICS OF REGULATION & ANTI TRUST LAWS
Undergraduate
Social Control of Business. Relationships between government, business and society. Both the institutional and theoretical aspects of governmental intervention in economic life examined.

ECO 305 is a prerequisite for this course.

ECO 314
ECONOMICS OF THE PUBLIC SECTOR
Undergraduate
This course discusses market failures and the economic role of government. Topics covered will include: government interventions that correct market failures, the efficiency of government policies, collective decision-making and voting, as well as the theory of optimal taxation and the incentive effects of taxes. Specific government programs such as Social Security and welfare programs are also analyzed. The emphasis is on the revenues, expenditures and policies of the federal government.

ECO 305 is a prerequisite for this course.

ECO 315
INTRODUCTION TO MONEY AND BANKING
Undergraduate
Introduction to Money and Banking. The structure of the American banking system; role of the Federal Reserve System; private financial markets and institutions; the effectiveness of monetary policy, and international finance.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 316
EUROPEAN ECONOMIC HISTORY
Undergraduate
European Economic History. Major factors and institutions which have influenced the economic development of European nations. Impact of these nations on U.S. development is also discussed.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 317
AMERICAN ECONOMIC HISTORY
Undergraduate
This course addresses the major factors and institutions which have influenced the economic development of the United States, including differences in regional development, slavery, transportation improvements, western expansion, the rise of large scale business, and government policy responses.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.
ECO 318
LABOR ECONOMICS AND ORGANIZATION
Undergraduate
Historical and theoretical analysis of labor groups and labor market problems (including wage determination, unemployment and discrimination), with particular reference to the dynamic economy of the United States.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 319
ECONOMICS AND GENDER
Undergraduate
This course covers economic trends concerning women in the economy and examines economic analyses of gender issues, with special emphasis on gender issues in the workplace. The increase in the number of women in the work place has been a major change in labor markets, affecting workers, employers and families. Different economic perspectives are examined to give students an understanding of the range of contributions by economists to this field. The course also examines feminist economics which raises concerns about economic analysis in general and as it is applied to this field.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 320
ECONOMICS OF RELIGION
Undergraduate
This course examines selected economic and sociological aspects of religion in society. Some of the topics that are covered include marriage and divorce, fertility and population growth, schooling, church contributions and work.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 321
LAW & ECONOMICS
Undergraduate
The overall goal of this course will be to demonstrate how businesses and government interact by surveying the economic and legal aspects of this relationship. This course is designed to prepare students to engage in methods of formal inquiry. The students will examine the American historical aspects of this relationship from the industrial revolution to the present. All topics are discussed with an emphasis on real-world applications and will include: a review of microeconomic theory pertaining to market structures with an emphasis on oligopolies; the history of antitrust; a review of the US legal and political framework; government regulation and key judicial decisions affecting businesses and industries concentrating on the legal and economic logic of those decisions. Class will begin with a discussion of current events once a week and it is expected that each student will attempt to participate and be knowledgeable of what is occurring locally, nationally and internationally.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 322
ECONOMICS AND FINANCIAL POLICY
Undergraduate
This class explores policy approaches to regulating the financial system and the macroeconomy. The recent financial crisis has spurred interest in financial reform, culminating in the passage of the Dodd-Frank Wall Street Reform and Consumer Protection Act in 2010. Students examine the current and historical issues facing the US financial system and economy. They draw on their Business core curriculum (Money & Banking, ECO315 or FIN320) to critically evaluate reform proposals.

ECO 315 or FIN 320 is a prerequisite for this class.

ECO 325
THE ECONOMICS OF POVERTY
Undergraduate
This class addresses society’s view of poverty. It begins with an introduction to theories of economic justice for perspective. The introduction is followed by empirical issues related to the measurement of poverty and identification of its causes. An assessment of programs designed to ameliorate the effects of poverty also is covered.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.
Taking a microeconomic perspective, this course provides a comprehensive overview of the field of health economics building on economic principles, recent research, and problem-based learning. Students will consider conceptual and empirical analyses of: supply of and demand for health and medical services; role of insurance; influence of physicians and hospitals on price, quantity, and quality of services; factors that distort the market; and the impact of technological change on health care cost. The recent changes in federal law regarding health insurance coverage are considered as well.

ECO 105 and ECO 106 are prerequisites for this class.

The origin of socialist economic theory and its relationship to modern economic analysis. Socialist critiques of capitalist economies and capitalist economic theory are developed and related to the theoretical basis for socialism in modern economic theory.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

This course provides an introduction to the major changes in the global economy in the twentieth century. It will devote particular attention to comparative analysis of national economic institutions and performance and business conditions, as well as prominent international institutions such as the International Monetary Fund, World Bank, and World Trade Organization. Knowledge of microeconomic and macroeconomic analysis (Economics 105 and 106) will be presumed and applied to global economic flows and national institutions. Selection of countries and case studies from advanced and developing countries will vary according to recent economic developments.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

The expansion of relations between China and foreign enterprises continues to entwine China's economy with those of the world. This course will analyze China's continuing evolution into a global market economy. We will examine China's impact on the world economy and the problems that must be overcome for China to continue its dynamic growth. We will further discuss the characteristics of China's evolution and how they can be extrapolated to other nations undergoing similar transitions.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

The fundamental problems of resource depletion and environmental deterioration. Alternative methods to achieve an optimal ecological system. Methods of economic analysis include cost-benefit techniques, the role of effluent fees, government subsidies, and legislative action.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

The main objective of this course is to have students use and understand economics analysis. It covers many of the basic principles/theories in microeconomics, using the sports industry to illustrate these topics. Students use concepts from Business core courses (microeconomics and statistics) to analyze questions such as 'Do large-city professional sports franchises have a competitive advantage over their small-market counterparts?' or 'Why did Chicago and the State of Illinois use $463 million of public money to refurbish Soldier Field?'

ECO 105, ECO 106 and (MAT 137 or equivalents) are a prerequisite for this class.
ECO 340
DEVELOPMENT OF ECONOMIC THOUGHT
Undergraduate
A study of the most influential contributions to our understanding of political economy broadly understood. An historical examination of the development of economic theories with special emphasis placed upon their relevance to present economic and political issues.

(ECO 105 or ECO 106), ECO 306 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 341
BEHAVIORAL ECONOMICS
Undergraduate
Behavioral Economics incorporates insights from psychology to expand the standard models of economic choice. This course will examine the findings from the psychology literature that inform the issue of decision making, explore how these findings have challenged standard economic models, and examine how the findings are being incorporated into economic thinking about choice. In addition to an introduction to the Behavioral Economics literature, students will have the opportunity to develop a project of their own using behavioral economics to examine a current economic issue.

ECO 305 is a prerequisite for this course.

ECO 359
DEVELOPMENT ECONOMICS
Undergraduate
By some estimates, approximately 1.4 billion people live on less than $1.25 a day. When the world's per capita GDP is $10,000, why do so many people live on so little? Life expectancy in many parts of sub-Saharan Africa is less than 50 years, and in Burundi the average adult has less than three years of schooling. Why does this happen, and what can be done to change this? Students will learn how to objectively measure levels of poverty and development. Students will come to understand and analyze which types of interventions lead to improvements in people's lives. Using Stata, students will also learn techniques that researchers use to identify causal relationships between interventions and outcomes.

ECO 305 is a prerequisite for this course.

ECO 360
ECONOMICS OF LOW-INCOME COUNTRIES
Undergraduate
This course analyzes economic development issues in low-income countries. Attention is given to several key issues including agricultural and rural development, population growth, human capital, international trade, foreign resource flows, the role of the public sector, and environmental quality.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 361
INTERNATIONAL TRADE
Undergraduate
This course deals primarily with the trade side of international economic relations. The main objective is the development of analytical tools required for an understanding of the gains from trade and barriers to trade. Particular emphasis is placed on currently pressing issues including the impact of trade on domestic employment and income, international trade tensions, and the rise of regional trade blocks.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 362
INTERNATIONAL MONETARY ECONOMICS
Undergraduate
How do fiscal and monetary policy choices change as a country's economy opens more and more to international trade and capital flows? This question and others of international importance will be analyzed with an open-economy, macroeconomic framework. Topics to be explored will include: the foreign exchange market under both fixed and floating exchange rate regimes; the balance of payments, output, prices, and income in an open economy; the international monetary system; and the macro issues of economic development and transition.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.
ECO 375
INTRODUCTION TO ECONOMETRICS
Undergraduate
Techniques of estimation and testing of economic relationships. Probability theory, probability distributions, least squares estimation and correlation.

ECO 105, ECO 106 and (MAT 137 or equivalents) are a prerequisite for this class.

ECO 379
GAME THEORY
Undergraduate
The primary purpose of the course is to learn and apply the tools of game theory in order to understand important economic phenomena. Game theory is widely applicable within the realm of economics, to areas such as: industrial organization, international trade, and corporate finance (not to mention, macroeconomics, law and economics, money and banking, public choice, and environmental economics).

ECO 105 and ECO 106 are prerequisites for this class.

ECO 380
MATHEMATICAL ECONOMICS
Undergraduate
Review of various mathematical functions useful in formulating economic theories followed by elements of Matrix algebra and its application to concepts of micro and macro economic equilibrium. Particular emphasis will be placed on differential calculus, including the use of partial derivatives. These mathematical tools will be applied to optimization problems in micro and macro economic theory.

ECO 105, (MAT 135 or equivalent) and (MAT 136 or equivalent) are a prerequisite for this class.

ECO 395
CAPSTONE SEMINAR IN ECONOMICS
Undergraduate
A seminar in which students explore how the discipline of economics addresses issues from a different perspective than other disciplines within and beyond the social sciences. This course is the Liberal Studies Capstone Requirement for the LA&S Economics major and is restricted to LA&S economics majors with senior standing.

ECO 305, ECO 306 and status as an LAS Economics major with Senior standing is a prerequisite for this class.

ECO 398
SPECIAL TOPICS
Undergraduate
Special Topics. Content and format of this course are variable. All topics will include an in-depth study of current issues in Economics. Subject matter will be indicated in class schedule.

ECO 105, ECO 106 and (MAT 130 or equivalent) are a prerequisite for this class.

ECO 399
INDEPENDENT STUDY
Undergraduate
An Independent Study may be available to students of demonstrated capability for intensive independent work in economics. Written permission of supervising faculty member, chair, and director of undergraduate programs is required prior to registration.

ECO 423
ENVIRONMENTAL ECONOMICS AND PUBLIC POLICY
Graduate
This course is designed to give the student an understanding of economic theory as it applies to the environment and how we use natural resources. We will look at situations where self-interest, government regulation, and market conditions affect our decisions as they relate to environmental conditions and issues. Remember, economics is a discipline of understanding choices and how different incentives affect those choices, and that remains true when dealing with the environment and natural resources.
ECO 424
MICROECONOMIC THEORY
Graduate
This course further develops the basic theories of individual economic agents: the consumer and the firm. However, unlike ECO 105, this course will place a lot of emphasis on algebra and calculus.

ECO 425
PUBLIC ECONOMICS
Graduate
In this course we will apply the tools of microeconomics to analyze the economic functions of government, including expenditure and tax policies. We will devote considerable time to understanding the role of government in market economics. In particular the tradeoff between efficiency and equity is analyzed in various contexts. You have already learned what markets can do in your ECO 105 course. In this course we will learn what markets cannot do and where governments must step in.

ECO 435
REAL ANALYSIS I
Graduate
This course covers real number system, completeness, supremum, and infimum, sequences and their limits, lim inf, lim sup, limits of functions, continuity.

(MAT 149 or MAT 152 or MAT 162 or MAT 172) and (MAT 141 or MAT 215) are a prerequisite for this class.

ECO 436
REAL ANALYSIS II
Graduate
This course follows ECO 435 and covers properties of continuous functions, uniform continuity, sequences of functions, differentiation, integration.

ECO 500
MONEY AND FINANCIAL SYSTEMS
Graduate
This course examines both the role of money in the economy from a functional and macroeconomic perspective as well as the structure and function of the most important financial institutions and financial markets. Topics covered include the role of the Federal Reserve as monetary policymaker, interest rate and exchange rate determination, the relationship between money and economic activity, and the organization and importance of money markets, capital markets, markets for derivative securities, commercial banks and other intermediaries in a well-functioning financial system.

MS in Taxation and MACC students are restricted from registering for this class.

ECO 501
CONCEPTS OF MICRO AND MACRO ECONOMICS
Graduate
This course investigates the basic elements of the economic way of thinking. Students will begin with models of the consumer and the producer, looking specifically at demand and supply, elasticity, measures of efficiency, production and cost theory, and the determination of price and quantity under different market structures. The remainder of the course is devoted to analyzing the economy as a whole, focusing on the determination of Gross Domestic Product, the role of money and monetary policy, labor markets and unemployment, price stability, and short-run fluctuations in output.

Status as a graduate accountancy student is a prerequisite for this class.

ECO 502
SELECTED TOPICS IN MACROECONOMICS
Graduate
This brief two credit hour course in macroeconomics will cover the nature of macroeconomic activity including the component parts of aggregate expenditures and the nature of key indicators of the economy's performance. The roles of fiscal and monetary policy makers will be examined as well as the structure of the central bank.

MS in Taxation and MACC students are restricted from registering for this class.
ECO 505
ADVANCED MICROECONOMICS
Graduate
An advanced course in microeconomic theory. This course will present a systematic and rigorous analysis of price determination and the allocation of specific resources to particular uses.

ECO 555 or admission to the MS-EPA program is a prerequisite for this class.

ECO 506
ADVANCED MACROECONOMICS
Graduate
An advanced course in macroeconomic theory that examines the determination of income, employment, and prices, and their interrelations. Covers traditional Keynesian as well as alternative models of output, consumption, investment, money demand, inflation and unemployment. The dynamic character of income determination is emphasized, along with effects of government policy, economic institutions, and social goals.

ECO 509 or admission to the MS-EPA program is a prerequisite for this class

ECO 507
RESEARCH METHODS FOR POLICY ANALYSIS I
Graduate
This course focuses on the tools and techniques used to statistically analyze economic data. We will focus on both theoretical understanding (why do we use such tools and how do they work) and applied understanding (the ability to carry on a research project using these tools). Students will learn Stata, which is the most widely used statistical analysis programming language in Economics. Students will learn the practical skills of how to choose the right tools for the analysis, how to prepare and inspect the data, and how to run an analysis that is robust, can be replicated, and can be understood and used by others - all extremely valuable qualities in real life work.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 508
RESEARCH METHODS FOR POLICY ANALYSIS II
Graduate
This course focuses on advanced techniques used to statistically analyze economic data. We will focus on both theoretical understanding (why do we use such tools and how do they work) and applied understanding (the ability to carry on a research project using these tools). Topics to be covered include the analysis of time series and panel data, discrete choice models, simultaneous equations, forecasting and experimental methods. Students will learn statistical Stata commands that apply to the advanced topics covered.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 509
BUSINESS CONDITIONS ANALYSIS
Graduate
This course teaches students how to use available economic data to assess business conditions. This is done by: (1) evaluating the sources and usefulness of data periodically released by government and private sources and (2) developing a macroeconomic framework that the student can use to analyze business conditions. Completion of this course will allow students to understand economic news and relate it to their business or job.

MS in Taxation and MACC students are restricted from registering for this class.

ECO 510
ECONOMETRIC METHODS FOR BUSINESS ANALYSIS
Graduate
This course is designed to provide the student with more advanced methods in quantitative analysis. Topics covered include hypothesis testing, probability, correlation analysis and multiple regression. This course will be offered every Winter quarter.

ECO 555 or equivalent is a prerequisite for this class.
ECO 511
BUSINESS AND ECONOMIC FORECASTING
Graduate
This course surveys a number of quantitative techniques commonly used to forecast business and economic variables. Emphasis will be on techniques, their relative strengths and weaknesses and real-world economic applications. Topics include smoothing techniques, regression and econometric analysis and Box-Jenkins time series.

GSB 420 or ECO 375 or equivalent is a prerequisite for this class.

ECO 512
APPLIED TIME SERIES FORECASTING
Graduate
Theory and computer implementation of the Box-Jenkins Techniques with emphasis on forecasting business and industrial activity. Cross-listed as MAT 512.

ECO 509 and ECO 510 are prerequisites for this class.

ECO 513
DEMYS TIF YING THE FEDERAL RESERVE BANK
Graduate
This is a course about monetary policy. The Federal Reserve has (and other central banks have) the capacity to directly control interest rates and the monetary base (money supply) with an impact on real output growth, unemployment, inflation and financial stability. The expected movement in these variables is important for business and consumer decisions. The Fed has been criticized as of late for policies that put us into the recent financial crisis and for policies that do not appear to be getting us quickly out of the current slowdown, but instead are setting the country up for higher inflation. This course will focus on the theory and evidence of what the Fed does (and other central banks do), why they do it and how they do affects our well-being. It is meant to demystify their policies by providing a rationale behind their statements and actions. Unlike most courses that rely on textbooks, this course will have numerous topics and readings that do not yet appear in traditional texts. Consequently, it will include some of the latest (over the last couple of years or months) ideas on what central banking is and should be about.

ECO 502 or ECO 509 or ECO 506 is a prerequisite for this class.

ECO 514
INDUSTRIAL ORGANIZATION
Graduate
This course is concerned with how the market system directs production decisions under varying deviations from the competitive environment. The links between market structure, conduct and performance are examined. Topics include determinants of market structure, various theories of imperfect competition, price discrimination, predatory pricing, and antitrust policy.

ECO 555 or ECO 505 is a prerequisite for this class.

ECO 515
MICROECONOMICS OF MARKET ORGANIZATION
Graduate
Imperfectly competitive markets are more common than perfectly competitive markets. This course is about the effects of imperfectly competitive market structure on the organization, pricing, product choice, and entry of firms. We will study the acquisition and use of market power, strategic competition across firms, private sector sources of market failure, and the role of government competition policy. Factor markets will also be discussed.

ECO 505 is a prerequisite for this class.

ECO 516
ECONOMICS OF THE PUBLIC SECTOR I
Graduate
Application of microeconomic analysis to the role of government in society. The theoretical foundation for the design of an efficient and equitable tax and expenditure program is presented and the impact of such a program on the economy is explored through general equilibrium analysis. Students must have a solid foundation in basic calculus.

ECO 555 or ECO 505 is a prerequisite for this class.
Businesses are becoming more involved in deal making both in the public and private sector. Individuals now sit on the boards of public and private companies and are being asked to provide business analysis and networking skills. Moreover, many firms have established PACS and have set-up governmental practice sections. These firms are also becoming more dependent on the government for business opportunities and are more involved in fundraising on behalf of public officials in order to gain access and to influence the regulatory and legislative process. In fact many business people have raised money for both political parties with the hope of leveraging their contributions for future work or political appointments.

ECO 555 or equivalent is a prerequisite for this class.

A study of the American labor force: measurement, characteristics and behavior under changing income, employment and technology. An examination of recent labor market developments provides the basis for a critical analysis and appraisal of contemporary wage theory. Topics include changes in the labor force, unemployment, wage determination, the minimum wage, internal labor markets, productivity, discrimination, unions and collective bargaining.

ECO 555 or ECO 505 is a prerequisite for this class.

This course covers public finance and is the second course in a two course sequence on public Economics. Its focus is on the role of government in public expenditure and taxation. It is assumed that previous course work in economics has been satisfactorily completed, and the student has a basic understanding of basic microeconomic theory.

ECO 517
THE PUBLIC POLICY, BUSINESS, AND ETHICAL ENVIRONMENT OF GOVERNMENT
Graduate

ECO 518
LABOR ECONOMICS AND LABOR RELATIONS
Graduate

ECO 520
ECONOMICS OF THE PUBLIC SECTOR II
Graduate

ECO 521
POLICY & REGULATION IN FINANCIAL MARKETS
Graduate

ECO 522
CURRENT POLICY ISSUES
Graduate

ECO 505 or ECO 555 is a prerequisite for this class.
ECO 525
STRATEGIC DECISION MAKING AND GAME THEORY
Graduate
The goal of this course is to introduce students to game-theoretic way of thinking and show its usefulness in understanding various problems arising in business, economics, as well as many other disciplines and every day life. The tools used in game theory are analytical in nature, and hence the building blocks of the course will necessarily draw on analytics. The instructor's job will be to make these analytics accessible to students without using too much mathematics. Once students grasp these tools, a variety of applications will be presented, discussed, and illustrated using experiments. These applications will be mainly in the fields of business and economics, but will often span to other areas like law, politics, biology, and ethics. In this way, students will get a broad perspective of the multiple applications of game-theoretic reasoning.

ECO 525 or ECO 505 is a prerequisite for this class

ECO 526
BUSINESS STRATEGY
Graduate
This class deals with firms' business plans and policies and how they change in response to various incentives and stimuli. We will discuss frameworks used to analyze and formulate business strategies. We will introduce tools and techniques for diagnosing a firm's competitive position, identifying managerial and organizational issues, evaluating plans of action, and anticipating the consequences of alternative decisions.

ECO 526 or ECO 505 is a prerequisite for this class

ECO 527
BUSINESS REGULATION AND ANTITRUST
Graduate
This course examines the rationale for and efficiency of government regulation of business in the United States. Various forms of government regulation are evaluated to determine their effectiveness in promoting market efficiency. We will emphasize the importance of market structure and industrial performance, including the strategic interaction of firms. We will examine the behavior of individual markets in some detail, focusing on cost analysis, the determinants of market demand, investment behavior, market power, and the implications of government regulatory behavior.

ECO 527 or ECO 505 is a prerequisite for this class

ECO 528
STRATEGIES AND PROCESSES OF NEGOTIATIONS
Graduate
This course is geared towards developing negotiation skills that are important in both the business world as well as day to day life. We will consider both practical and theoretical aspects of negotiations. In the theoretical part, we will learn what factors affect negotiations success. For example, what is the alternative if an agreement is not reached? In the practical part, we will practice negotiations in class using relevant case studies.

ECO 528 is a prerequisite for this class

ECO 530
HISTORY OF ECONOMIC THOUGHT
Graduate
A study of the evolution of the science of economics. Emphasis is on the important contributions made to the field by the great thinkers, starting with the Physiocrats and extending to the work of contemporary institutional and post-Keynesian economists.

ECO 530 or ECO 505 is a prerequisite for this class

ECO 550
REGIONAL AND URBAN ECONOMICS
Graduate
The course investigates the spatial character of an economic system. The first part of the course is concerned with theories in regional economics, including business and household location theory, urbanization, and regional development. The latter part of the course deals with urban economics, a specialized area concerned with the economic forces behind many urban problems. Topics include the economics of housing, transportation, poverty, crime and urban public finance.

ECO 550 or ECO 505 is a prerequisite for this class
ECO 555  
ECONOMICS FOR DECISION-MAKING  
Graduate  
This course provides students with an opportunity to apply microeconomic principles to managerial decision-making. These principles include those underlying the theories of consumer choice, production and cost as they relate to decisions made by firms and households. Specific topics include consumer demand analysis and estimation; elasticity; production theory; cost structure and estimation; profit maximization; and the effect of market structure on pricing, output and profit.

GSB 420 is a prerequisite for this class.

ECO 557  
INTERNATIONAL TRADE THEORY & POLICY  
Graduate  
Modern theories of international trade: classical theory of comparative advantage, factor proportions theory, factor price equalization, application of welfare economics to international trade, including regional economic integration, commercial policy and tariff problems. Cross-listed with IB 520.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 558  
INTERNATIONAL MACROECONOMICS  
Graduate  
Analyzes traditional macroeconomic issues in a framework that allows for international trade and capital flows. Cross-listed as IB 521.

ECO 506 or ECO 509 is a prerequisite for this class.

ECO 560  
DEVELOPMENT OF THE AMERICAN ECONOMY  
Graduate  
This course describes the economic development of the United States by examining topics such as: colonial settlement patterns, the impact of the railroad, the development of the financial system and the Great Depression.

(ECO 505 or ECO 555) and (ECO 506 or ECO 509) are prerequisites for this class.

ECO 561  
ECONOMICS OF DEVELOPING COUNTRIES  
Graduate  
Introduction to the economist's analytical skills applied to problems of developing and newly industrialized countries. Studies economic theory of development, development policy, and decision-making in the developing world; several case studies are examined. Cross-listed with IB 525.

ECO 555 or ECO 505 is a prerequisite for this class

ECO 576  
ADVANCED ECONOMETRICS  
Graduate  
The fundamental problems in the application of statistical procedures to econometric estimation will be studied: multicollinearity, identification, serial correlation, and nonhomogeneity of error variance. In addition, more sophisticated estimation techniques will be studied, e.g., reduced-form and multiple-stage regression techniques.

ECO 510 or (ECO 507 and ECO 508) are prerequisites for this class.

ECO 600  
THESIS RESEARCH  
Graduate  
Thesis Research
ECO 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. An in-depth study of current issues in economics. Subject matter will be indicated in class schedule.

ECO 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in economics.

ECT 250
INTERNET, COMMERCE, AND SOCIETY
Undergraduate
An introduction of Internet technology, its application for commerce, and its social impact. This course surveys Internet technology, collaboration and commerce activities, digital media distribution, online communities, and social networking in the Internet environment.

ECT 310
INTERNET APPLICATION DEVELOPMENT
Undergraduate
Development of Internet-based applications using client and server-side scripting. Students will design and build an Internet application that accesses a database. PREREQUISITE(S): CSC 211 or IT 231 or CSC 241

ECT 330
ADVANCED INTERNET APPLICATION DEVELOPMENT
Undergraduate
This is a programming course focusing on advanced Internet technologies such as tiered design of Internet applications, transactions, creating components, and Web services. PREREQUISITE(S): CSC 212 or CSC 242 or CSC 243 or CSC 262.

ECT 355
INTERNET SYSTEMS: COLLABORATION, COMMERCE, AND MEDIA
Undergraduate
This course examines the application of Internet technology to support collaboration, commerce, and digital media distribution activities. It will focus on the latest technologies, new development models and their social impact. Students will explore different models and develop applications to support collaborative commerce. Prerequisites: ECT 330

ECT 359
E-COMMERCE TECHNOLOGY SENIOR PROJECT
Undergraduate
Students will build complex web information systems using both client-side and server-side technology. Project teams will apply web engineering methodology to produce the final project with deliverables including strategy and requirement statement, site information architecture, interface design, prototyping, testing, promotion and measurement, feasibility study, and final presentation of team project. PREREQUISITE(S): ECT355 AND IT215.

ECT 360
INTRODUCTION TO XML
Undergraduate
An introduction to Extensible Markup Language (XML) and XML transformations. XML syntax, processing and validation. Namespaces. Transformations using XSLT and XPath. XML applications such as XHTML, RDF, SVG, XSL. PREREQUISITE(S): CSC 211 or CSC 241 or CSC 261.
ECT 372
SOFTWARE PROJECT DEVELOPMENT AND MANAGEMENT
Undergraduate
(Cross-listed with IS 372) In-depth study of the development and implementation process for both traditional and e-commerce software projects of all sizes. Project structuring, tools and techniques for scheduling and control, including project management software. Emphasis on working within an organizational context. PREREQUISITE(S): IT 215

ECT 410
DEVELOPMENT OF WEB-BASED BUSINESS APPLICATIONS
Graduate
Development of web-based business solutions using client-side and server-side technologies. Major topics include analysis and design of web projects for a business, web application design patterns, server-side programming, and access to databases. PREREQUISITE(S): CSC 401 or IT 411

ECT 424
ENTERPRISE INFRASTRUCTURE
Graduate
Introduction to modern infrastructure and the evolving technology environment. Major topics include: computer networks, Internet infrastructure, Web 2.0, Enterprise 2.0, social media and networking, software as a service, content management systems, cloud computing, and portal.

ECT 433
SURVEY OF WEB PROGRAMMING TECHNOLOGIES
Graduate
Survey of server-side scripting technology with emphasis on information search in a Web site. Projects include development of product catalogs and information search system of a Web site. For non-ECT and non-IS major only. PREREQUISITE(S): HCI 430

ECT 435
SURVEY OF E-COMMERCE STRATEGIES AND TECHNOLOGY
Graduate
A survey of business models, value propositions, and e-commerce value chains for consumer-oriented, business-to-business, and collaborative e-commerce applications. Marketing, security, digital money, e-business infrastructure, basics of Web site engineering process, e-commerce technology and tools. This is a service course. Students with server-side programming skills should take ECT 455. Prerequisites: ECT 250 and IS 421.

ECT 436
SOCIAL MARKETING AND SOCIAL NETWORKING APPLICATIONS
Graduate
Online social media and culture, online social marketing concepts, online social networking applications and their design/development. Students develop dynamic web sites and applications on social networking platforms using server-side programming technology to meet strategic marketing goals. PREREQUISITE(S): None

ECT 441
USABILITY ISSUES FOR ELECTRONIC COMMERCE
Graduate
(Cross-listed with HCI 441) Design, prototyping and evaluation of e-commerce web sites. Context of usability in the project development life cycle. User/task analysis with emphasis on the first time and the infrequent user. Content organization. User testing with low fidelity prototypes. Issues of perceived privacy and security. Student's projects involve design and/or evaluation of actual electronic commerce sites. PREREQUISITE(S): ECT 455.
ECT 455
E-COMMERCE WEB SITE ENGINEERING
Graduate
(Formerly ECT 555, cross-listed with HCI 513) An introduction to Web site engineering methods and processes to support e-commerce development. Web site engineering life cycle and user-centered design, including site goals, business models, value propositions, user analysis, information architecture, interface and navigation design, usability guidelines, database, testing, hosting strategies, usage metrics, and collaborative development. Technologies for e-commerce, shopping cart, digital payments, promotion strategies, and security issues. Students will build fully functional Web sites using database and client- and server-side technologies. PREREQUISITE(S): ECT 410 or HCI 430 or proficiency in programming.

ECT 480
INTRANETS AND PORTALS
Graduate
Intranet development methodology. Data warehousing concept and On-Line analytic processing (OLAP) for information management. Enterprise information portals (EIP). Transforming information into knowledge. Major applications involve: decision support, customer applications and content personalization for intranet. Students will conduct case studies and projects. PREREQUISITE(S): ECT 424

ECT 481
INTERNET SUPPLY CHAIN MANAGEMENT
Graduate
This course examines system architectures, technologies, approaches, and infrastructure requirements in the context of supply chain systems. The focus is on the design, development and implementation of systems that facilitate the collaboration of an enterprise with its buyers and suppliers. Topics include development of messaging-based collaboration framework with web services. Students will design and implement a collaborative extranet system component in team projects. PREREQUISITE(S): ECT 410

ECT 556
ENTERPRISE ARCHITECTURE AND DESIGN
Graduate
This is an advanced course on the design and planning of enterprise architecture that enables intra-/multi-enterprise collaboration and interoperability. The emphasis is on the alignment between IT and organizational objectives through the integration of business architectures, data and information architecture, application architecture, technology architecture, interfaces and infrastructure. Topics include: frameworks, tools, and methodologies for enterprise architecture design; data and process modeling, application integration, implementation fundamentals, adaptability to changing organizational needs, and managing costs of implementation. Students will conduct case studies and develop architecture plans. Prerequisites: ECT 424 and SE 450

ECT 557
PEER-TO-PEER TECHNOLOGY
Graduate
Peer-to-Peer (P2P) e-commerce is a paradigm for programming distributed e-commerce systems characterized by an increasing decentralization and autonomy of components. This course reviews the technical and business issues regarding P2P e-commerce. Topics include: P2P architecture and interoperability; P2P systems in use today; P2P content management issues; P2P collaboration applications: chat, white boards, file sharing, games, and synchronization; and P2P security and monitoring. Also addressed are: P2P application and business models for business to business and to consumer e-commerce; supply chain and collaborative planning, forecasting and replenishment; intellectual property concerns, management issues, and programming P2P applications. Prerequisites: ECT 424, ECT 480, and ECT 481.

ECT 565
MOBILE ENTERPRISE
Graduate
Mobile enterprise information systems are becoming increasingly complex and consist of existing systems with enabling middleware to achieve end-to-end enterprise mobile solutions. Mobile infrastructure performs content adaptation, data synchronization, bridging corporate and mobile messaging systems and support mobile information portals. The course will discuss web services oriented component architecture and system integration with Adaptive Application Architecture (AAA) with Wireless application gateway (WAG) and Multi-channel Access Gateways (MAG) supporting mobile and wireless access for heterogeneous devices. Such concepts as content distribution, connectivity and security, scalability and load balancing, device management will be discussed. Additional topics include Location-aware applications supporting mobile knowledge workers, business process for value contribution, and investment decisions on mobile technologies. Students will become familiar with mobile enterprise tool suites, mobile messaging delivery platforms, wireless Web portals. Students will be implementing mobile enterprise solution components. PREREQUISITE(S): Completed foundation phase.
ECT 582
SECURE ELECTRONIC COMMERCE
Graduate
This course studies security requirements, threat modeling, and appropriate safeguards for e-commerce systems. Major topics include web application security, web service security, and web server security. PREREQUISITE(S): ECT 424

ECT 583
ADVANCED SCRIPTING TECHNOLOGIES
Graduate
This course focuses on applying advanced scripting technologies in the design and development of large Web applications. Major topics include tiered application design, transacted Web applications, components, and Web services. Prerequisites: Proficiency in programming.

ECT 584
WEB DATA MINING FOR BUSINESS INTELLIGENCE
Graduate
An in-depth study of the knowledge discovery process and its applications in Web mining, Web analytics and business intelligence. The course provides coverage of various aspects of data collection and preprocessing, as well as basic data mining techniques for segmentation, classification, predictive modeling, association analysis, and sequential pattern discovery. The primary focus of the course is the application of these techniques to Web analytics, user behavior modeling, e-metrics for business intelligence, Web personalization and recommender systems. Also addressed are privacy and ethical issues related to Web data mining. Students can choose from three types of final course projects: implementation projects, research papers, or data analysis projects. Throughout the course, the students will learn and use a variety of data mining tools to analyze sample data sets as part of class assignments. PREREQUISITE(S): IT 403 AND (CSC 451 or CSC 453)

ECT 585
LEGAL ASPECTS OF E-COMMERCE
Graduate
This course is focused on how the law affects e-commerce. Topics include: electronic contracts, privacy issues associated with the use of the Internet, security issues including digital signatures, encryption and biometrics, intellectual property issues including trademark/domain name conflicts, copyrights, patents for business methods, taxation of internet transactions. Students will also gain an understanding of the issues involved in taking a company public (IPO), what information venture capitalists (VC) require in order to make decisions regarding financing startup companies. Prerequisite: ECT 455.

ECT 586
CUSTOMER RELATIONSHIP MANAGEMENT TECHNOLOGIES
Graduate
An in-depth study of customer relationship management (CRM) technologies and applications. The special focus will be on the application of CRM technologies for managing the customer lifecycle across Internet and offline channels. Topics include customer identification, data integration, personalization technologies, web and email interaction techniques; sales force automation applications; call centers, field service and logistics applications; customer self-service and customer knowledge management technologies. Students will review and compare specific eCRM technologies and develop an Internet customer interaction system to support an eCRM strategy in group project. PREREQUISITE(S): ECT 424

ECT 587
MOBILE COMMERCE TECHNOLOGY
Graduate
This course examines leading wireless and mobile technologies for consumer and enterprise mobile commerce. This course discusses how mobile technologies have changed the business community with an emphasis on major mobile platforms. Major topics include analysis and design of business applications in a mobile environment, and wireless user interface design. Students will develop mobile applications using a prominent mobile technology. PREREQUISITE(S): ECT 455

ECT 588
E-MARKETPLACE TECHNOLOGY
Graduate
This course concentrates on system development for online trading applications supporting complex interactions and transactions. Theoretical models of online information exchanges supporting negotiations such as: auctions, brokerages and exchanges/marketplaces will be discussed. Server/client side applications utilizing the models and distributed data access will be developed. Assignments will include system design as well as application development projects using Java. PREREQUISITE(S): ECT 424.
ECT 589
E-BUSINESS STRATEGIES
Graduate
Designed for ECT majors and IS majors in ECT concentration, this course focuses on the deployment of Internet and enterprise technologies to support organization’s e-business initiatives and collaborative commerce. Conducted in the format of seminar, case analysis, and dialogue with industry practitioners, this course requires students to actively participate in the study of models and approaches for e-business technology implementation and transformation. Topics include: the impact of Internet on industry structure and organizational transformation, enterprise application architecture, planning and implementation of technology and process to support an increasingly collaborative and integrated environment for e-commerce. Students have to complete an organization case study of e-business technology implementation to fulfill the requirement of this capstone course. This course should be taken at the conclusion of the ECT program. PREREQUISITE(S): Completion of all other required courses.

ECT 590
E-BUSINESS TECHNOLOGY PRACTICUM
Graduate
This practicum course is aiming at exposing e-commerce students to distributed multi-platform, multi-language, multi-tier application development. Besides the heavy programming emphasis, the students will analyze design and implementation issues in such an environment. The course content involves design and development of an e-commerce system that includes business to business, customer facing, and information portal applications. Students will work on projects using different platforms and different programming languages in a lab environment. Topics include design of e-commerce systems, distributed database development, multi-web server environment development, application of distributed object technologies. This course fulfills the capstone/practicum requirement for ECT majors and should be taken at the conclusion of the program. Prerequisites: ECT 480 or ECT 481

ECT 596
TOPICS IN E-COMMERCE TECHNOLOGY
Graduate
Independent study form required. PREREQUISITE(S): Consent of instructor.

ECT 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. Students may register for this course no more than twice. PREREQUISITE(S): Consent of the instructor.

ECT 696
MASTER’S PROJECT
Graduate
Four credit hours. Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. (PREREQUISITE(S): Consent of advisor).

ECT 698
MASTER’S THESIS
Graduate
(2 credit hours) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. Independent study form required. PREREQUISITE(S): Consent of advisor.

EDU 25
BASIC TECHNOLOGY LITERACY
Undergraduate
This online course provides students with a knowledge about assembling, using, and troubleshooting basic technology hardware and software. In this course, students demonstrate understanding of basic computer setup and the use of peripheral devices such as printers, speakers, flash drives, scanners, digital cameras, videos, and computer software.
EDU 95  
CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH  
Undergraduate  
Required of all students. Observations and participatory experience with children and youth in a school or agency. This course is a prerequisite for student teaching and related professional courses.

EDU 100  
INTEGRATIVE KNOWLEDGE E-PORTFOLIO  
Undergraduate  
This course provides an introduction to the Digication e-portfolio platform and the development of integrative knowledge e-portfolios. Prerequisite: Permission of instructor.

EDU 499  
LANGUAGE AND LITERACY PRACTICES ACROSS THE ACADEMY  
Graduate  
This course addresses issues related to the use of English in the Academy, particularly (1) in classrooms where English is not the native language of the instructor or students but is the language of instruction and/or (2) in scholarship written in English by non-native speakers of English. Topics include but are not limited to academic writing, curriculum development, classroom pedagogy, content pedagogical knowledge, globalization and international education, 21st century technologies, and English as a medium of instruction. Registration with permission of instructor only.

EE 281  
INTRODUCTION TO EDUCATIONAL PRACTICE  
Undergraduate  
This is the first in a sequence of theory and practice courses that serves to familiarize teaching candidates with the world of elementary and middle schools. Through observation and participation in schools, self-reflection, independently created assignments, cooperative learning assignments and classroom discussion, candidates will acquire familiarity with schools and classrooms including: social/cultural context, classroom climate, classroom management, curricular coherence, standards-based instruction, and teacher professional beliefs and practices. Written critical reflections and papers serve as initial foundation for the development of teaching philosophies. Required field experiences are integrated into this course.

EE 317  
PHYSICAL EDUCATION AND CLASSROOM MANAGEMENT IN THE ELEMENTARY SCHOOL  
Undergraduate  
The course is designed to promote an understanding of the contribution that Physical Education makes to the elementary school curriculum and the development of the whole child. Lesson planning, instructional delivery, and classroom management will be focused as students engage in 15-20 hours of supervised field experience teaching whole classes of children in local schools.

EE 324  
READING/LANGUAGE ARTS IN THE EARLY YEARS  
Undergraduate  
This course focuses on the curriculum content and sequence, instructional and assessment strategies as well as considerations integral to the creation of authentic, effective emergent literacy environments and engagements for pre-kindergarten through third grade. Theory and practice principles are woven into course assignments and required field experiences designed to observe, teach, and reflect upon instructional decisions made for individual as well as groups of children. Prevailing curricular and instructional models (e.g., code-based, meaning-oriented, balanced) and their histories are compared and contrasted. The influences of development, home language(s) and dialect(s) (especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidate instructional planning and teaching. Case studies and lesson planning facilitate the application of course content.

(EE 281 or ECE 290) and status as an Advanced Teacher Candidate is a prerequisite for this class.
EE 326
READING/LANGUAGE ARTS IN INTERMEDIATE AND MIDDLE GRADES
Undergraduate
This course extends Emerging Reading and Language Arts to facilitate increased independence in students as strategic readers and competent writers. It focuses on the further development of reading comprehension and writing abilities in the intermediate grades and middle school. Emphasis is placed on the complex nature of literacy addressing issues such as content-area literacies, learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Application of course material is facilitated through the design, teaching, and reflection on literacy lesson(s) for intermediate learners in required field experiences.

EE 281, EE 324, and Advanced Teacher Candidate Standing are prerequisites for this class.

EE 333
TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS
Undergraduate
This course is an introduction to materials, processes for developing, and strategies for mathematical literacy in grades K-8. Particular attention will be given to the theoretical views about how children learn mathematics, the proper use of manipulative materials, the development of mathematical thinking, e.g., skills in estimation, pattern recognition, or spatial perception; the use of technology, and ways to assess student progress. Daytime clinical hours are required. Note: MAT 111 may be taken as a prerequisite OR it may be taken concurrently with EE 333.

MAT 110, EE 281, and Advanced Teacher Candidate Standing are a prerequisite for this class.

EE 334
ELEMENTARY SCIENCE INQUIRY TEACHING STRATEGIES
Undergraduate
This course is an introduction to instructional strategies for helping students in grades K-8 become science literate: i.e., to understand the nature of science and its impact on the world. Particular attention will be given to theoretical views about how children learn science and develop scientific process skills, e.g., skills in observing, classifying, collecting and interpreting data and questioning strategies, and ways to assess student progress. Daytime clinical hours are required.

EE 281 and status as an Advanced Teacher Candidate are a prerequisite for this class.

EE 335
PSYCHOLOGY OF BILINGUALISM
Undergraduate
This course will focus on psychological factors that affect learning such as attitudes towards language learning, self-esteem, cognitive style, identity and motivation.

EE 344
ART AND MUSIC IN THE ELEMENTARY SCHOOL
Undergraduate
This course focuses on the arts (visual art, music, drama and dance) as an integral component of teaching and learning in the elementary school curriculum. Students will explore a variety of art forms and disciplines to develop a critical aesthetic and artistic vocabulary. Students learn to help children utilize artistic media in the exploration and expression of thoughts and feelings. Emphasis is placed on design, construction, and implementation, and assessment of authentic conceptual classroom arts activities that integrate the arts with other classroom curricula. Daytime clinical hours (10) are required during this course.

EE 281 and status as an Advanced Teacher Candidate are a prerequisite for this class.

EE 347
CHILDREN’S LITERATURE
Undergraduate
This course familiarizes students with quality children’s literature for infancy through young adulthood. Students will select, discuss, critique, and share books appropriate for this age span, focusing primarily on ages 5-14 years. The influences of child development, culture, technology, and education stakeholders (i.e., parents, students, teachers, administrators, and their community) on literature selection are emphasized. Students will develop skills in evaluating books, responding to books, and using literature across the curriculum.
EE 355
METHODS: CONTEMPORARY TEACHING OF SOCIA STUDIES
Undergraduate
This course is an introduction to an integrated view of social studies for engaged citizenship. Through the study of strategies such as concept formation, historical inquiry, and role-play, and materials, such as primary sources, teacher candidates will apply principles of curricular integration to create curriculum/units that engage elementary learners in the exploration of issues, ideas, and perspectives that impact our world. Daytime clinical hours are required.

EE 281 and status as an Advanced Teacher Candidate are a prerequisite for this class.

EE 356
ASSESSMENT IN THE ELEMENTARY CLASSROOMS
Undergraduate
This course focuses on study, use, and evaluation of assessment practices in diverse, K-8 contexts. Assessment is addressed as part of instructional systems, attending to issues including: the appropriate use of standardized measures, formal and informal classroom assessment, portfolio development, as well as reporting to all stakeholders. This course also emphasizes ways of involving students and parents in assessment processes, how to observe and assess children individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system.

EE 281, SCU 337 and (EE 324, EE 333, EE 334 or EE 355) and status as an Advanced Teacher Candidate is a prerequisite for this class.

EE 384
CAPSTONE IN ELEMENTARY EDUCATION
Undergraduate
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to be reflective, to consider value commitments, to engage in critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific to elementary education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies Program. COREQUISITE(S): EE 385.

EE 385
ELEMENTARY STUDENT TEACHING
Undergraduate
Five school days a week supervised teaching in a cooperating school for a full academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. Application and approval required. Open only to DePaul students.

EE 399
INDEPENDENT STUDY IN ELEMENTARY EDUCATION
Undergraduate
(1 to 4 credits) Permission of program chair required.

ELA A030
ADVANCED WRITING AND WORD PROCESSING
Continuing Education
An advanced-level course in English-as-a-second-language writing. Students learn to write 3-to-5 page compositions including a research paper.

ELA A031
ADVANCED READING AND VOCABULARY DEVELOPMENT
Continuing Education
An advanced-level course in English-as-a-second-language reading. Students build on their reading skills by identifying intended audience, source and tone of a reading, acquire more literary terms, read longer newspaper articles, editorials, plays, and novels.
An advanced-level course in English-as-a-second-language grammar. Students build on the work from previous levels with the future perfect and future perfect progressive tenses, negative and past forms of modals, passive voice, causative verbs, conditionals, and gerunds and infinitives.

An advanced-level course in English-as-a-second-language spoken English. Among other skills, students learn to manage small group discussions, defend positions, speak persuasively, deliver a formal presentation, draw inferences from authentic speech, and take notes from short lectures.

A university bridge-level course in English-as-a-second-language writing. Students learn to write first-person narrative and a research essay through participation in community service.

A university bridge-level course in English-as-a-second-language reading. Students build on their reading skills by comparing points of view, paraphrasing and outlining ideas, acquiring higher-level literary terms, and reading more complex articles, novels, plays, or several short stories.

A university bridge-level course in English-as-a-second-language grammar. Students build on the work from previous levels with more complex uses of such structures as auxiliary verbs, noun modifiers, adjective and adverb clauses, and unreal conditionals.

A university bridge-level course in English-as-a-second-language spoken English. Students master previous functions at the highest level, such as persuading, negotiating, and debating; deliver formal presentations; demonstrate skill at note taking and comprehending regional dialects.

University Experience Research and Writing provides non-native speaking students authentic experiences preparing and writing papers using American academic standards and styles. This course teaches students to select and effectively evaluate scholarly sources appropriate to their discipline, to organize their research and to present a thesis logically using American academic styles. Ideally, the course is taken in conjunction with CP052 University Experience Reading or other similar academic English reading course.

University Experience Reading & Survey of Texts provides university level reading instruction and prepares non-native speaking students to evaluate and categorize university level texts within their chosen discipline. The course focuses on using reading strategies that maximize reading efficiency and comprehension and is designed specifically for students who are preparing to enroll in university degree programs. The course is an ideal complement to CP050 University Experience Research and Writing.
University Experience Academic and Classroom Culture prepares non-native speaking students for success in American university classrooms. The course focuses on becoming an effective oral communicator in university environments. Instruction helps students develop effective strategies for note taking, classroom participation, and successful interaction with other students and instructors in a variety of teaching modes that are common in American universities.

University Experience Advanced English Practice offers students a selection of options that allows them to address individual English language development needs from pronunciation to interviewing skills to advanced topics within their proposed discipline of study. The exact structure of this module is determined by individual student needs and each student works with an ELA advisor to select options that will provide maximum individual language growth. The individual student plan requires approval of the ELA director.

A beginning-level course in English-as-a-second-language writing. Students learn basic paragraph structure, topic sentences and how to support them. (Students should have an active vocabulary of 200-400 words in English.)

A beginning-level course in English-as-a-second-language reading. Students practice various reading skills, such as locating the main idea; study vocabulary acquisition; and read ESL specific readings and newspaper articles. (Students should have an active vocabulary of 200-400 words in English.)

A beginning-level course in English-as-a-second-language grammar. Students work on basic grammar, such as simple tenses, modals, and articles, as well as nouns, pronouns, adjectives and adverbs. (Students should have an active vocabulary of 200-400 words in English.)

A beginning-level course in English-as-a-second-language spoken English. Students learn many basic practical functions, such as asking for and giving opinions and leaving a simple message. (Students should have an active vocabulary of 200-400 words in English.)

A high intermediate-level course in English-as-a-second-language writing. Students learn to write academic compositions using specific organizational patterns.

A high intermediate-level course in English-as-a-second-language reading. Students build on their reading skills by learning the difference between fact and opinion, understanding inferences, acquiring more literary terms, reading newspaper articles, short stories and novels.
ELA H022
HIGH INTERMEDIATE GRAMMAR
Continuing Education
A high intermediate-level course in English-as-a-second-language grammar. Students build on the work from previous levels with perfect progressive tenses, adjective clauses, reflexive pronouns, and more advanced modals, adjectives and adverbs.

ELA H023
HIGH INTERMEDIATE SPOKEN ENGLISH AND LISTENING
Continuing Education
A high intermediate-level course in English-as-a-second-language spoken English. Students practice such functions as supporting opinions, expressing empathy and compromise, reporting and summarizing; make a presentation; and listen effectively to authentic speech.

ELA I010
INTERMEDIATE WRITING AND WORD PROCESSING
Continuing Education
An intermediate-level course in English-as-a-second-language writing. Students begin connecting paragraphs into longer essays.

ELA I011
INTERMEDIATE READING AND VOCABULARY DEVELOPMENT
Continuing Education
An intermediate-level course in English-as-a-second-language reading. Students build on the work in the Foundations level and learn to restate the author's point of view, acquire literary terms, and read stories.

ELA I012
INTERMEDIATE GRAMMAR
Continuing Education
An intermediate-level course in English-as-a-second-language grammar. Students build on the work in Foundations grammar and learn progressive and past tenses, question formation, noun clauses, and comparative and superlative forms of adjectives and adverbs.

ELA I013
INTERMEDIATE SPOKEN ENGLISH AND LISTENING
Continuing Education
An intermediate-level course in English-as-a-second-language spoken English. Students practice such functions as giving advice, apologizing, complaining, asking for explanations and make a simple presentation.

ELA T200
GRAMMAR FOR TOEFL WRITING
Continuing Education
An English-as-a-second-language course that reinforces and reviews the grammar skills necessary to excel on the Writing portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as in future academic pursuits.

ELA T201
TOEFL READING AND READING LAB
Continuing Education
An English-as-a-second-language course that prepares students for the Reading portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice reading strategies and the variety of reading skills tested on the TOEFL iBT. In addition, students expand their academic vocabulary and knowledge of word roots. Moreover, students get valuable exposure to the testing lab environment by doing practice computerized tests in this skill area.
ELA T202
TOEFL WRITING AND INTEGRATED SKILLS
Continuing Education
An English-as-a-second-language course that prepares students for the Writing and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the writing skills necessary to produce the high-quality essays required during the writing portion of the test. They also practice and learn the skills necessary to synthesize and summarize information in a written format, as required in the Integrated Skills portion of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional practice writing and integrated skills computerized tests in this skill area.

ELA T203
TOEFL SPEAKING AND INTEGRATED SKILLS
Continuing Education
An English-as-a-second-language course that prepares students for the Speaking and Integrated Skills portions of the TOEFL (Test of English as a Foreign Language) iBT (Internet Based Test) as well as for future academic study. Students learn and practice the speaking skills and strategies which must be applied during the Integrated Skills portion of the test. Students also practice useful idioms that can be applied in both the listening and speaking portions of the test. Moreover, students get valuable exposure to the testing lab environment by doing occasional integrated skills computerized tests in this skill area.

ELA T204
TOEFL PRACTICE TESTS
Continuing Education
An English-as-a-second-language lab that allows students to apply the skills they have been learning and check their progress in a timed, self-testing environment.

ELA T205
TOEFL LISTENING AND LISTENING LAB
Continuing Education
An English-as-a-second-language course that prepares students for the listening portion of the TOEFL (Test of English as a Foreign Language) iBT (Internet-Based Test) as well as for future academic study. Students learn and practice the listening skills and strategies which must be applied during the listening portion of the test. Moreover, students get valuable exposure to the testing lab environment through computerized practice tests in this skill area.

ELA 100
PRONUNCIATION WORKSHOP: A COURSE IN ACCENT REDUCTION
Continuing Education
An English-as-a-second-language course designed to help students improve their pronunciation.

ELA 101
TOEFL (TEST OF ENGLISH AS FOREIGN LANGUAGE) PREPARATION
Continuing Education
An English-as-a-second-language course designed to help students prepare for the TOEFL (Test of English as a Foreign Language).

ELA 102
GMAT/ MBA (GRADUATE MANAGEMENT ADMISSIONS TEST/MASTERS IN BUSINESS ADMINISTRATION) PREPARATION
Continuing Education
An English-as-a-second-language course designed to help students prepare for the GMAT (Graduate Management Admissions Test).

ELA 109
VOCABULARY DEVELOPMENT FOR NON-NATIVE SPEAKERS OF ENGLISH
Continuing Education
This class is designed to expand students' vocabulary by reinforcing ability to use vocabulary accurately, by use of new vocabulary-learning skills, and by acquisition of word decoding skills and strategies. Students will be introduced to approximately 25-40 new words per class. (Students in this class should have at least high intermediate proficiency in English.)
ELA 110
TALKING BUSINESS
Continuing Education
Talking Business is an intensive course for non-native English speakers preparing for business school or expanding their careers in the business world. The course will focus on improving students' vocabulary, knowledge of key concepts in business and economics, and listening and speaking skills related to those concepts. Each day, students will have the opportunity to read and listen to authentic materials as well as to engage in lively, informative discussion.

ELA 300
ELA TOPICS
Continuing Education
Special courses and workshops offered by the English Language Academy.

ELA 301
SIT TESOL PROGRAM
Continuing Education
A 130-hour TESOL/TEFL certificate course during which students learn how to teach English-as-a-Second-Language, including 36 hours of practice teaching with ESL students. Taught by the School for International Training at DePaul's English Language Academy.

ENG 120
READING LITERATURE
Undergraduate
Study of the elements and construction of literary texts, of the vocabulary of literary criticism, and of various literary modes and genres. WRD 103 or HON 100 is recommended.

ENG 130
THEMES IN LITERATURE
Undergraduate
Introduction to the study of literature through selected literary texts focused on a particular theme. Variable topics. May not be repeated. WRD 103 or HON 100 is recommended.

ENG 201
CREATIVE WRITING
Undergraduate
Experience in writing and analyzing poetry and prose. May not be taken pass/fail.
WRD 103 or HON 100 is a prerequisite for this course.

ENG 209
TOPICS IN WRITING
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics. WRD 103 or HON 100 is recommended.

ENG 211
GRAMMAR AND STYLE
Undergraduate
An introduction to elements of the linguistic structure of English as they are employed to create stylistic effects in writing. The course aims at clarifying ways that language can affect audiences' perceptions and responses to writing.
WRD 103 or HON 100 is a prerequisite for this course.
ENG 218
READING AND WRITING FICTION
Undergraduate
An introduction to the art of fiction through analysis and criticism of fiction by established writers and through writing and revising the student's own stories. WRD 103 or HON 100 is recommended.

ENG 219
READING AND WRITING POETRY
Undergraduate
An introduction to the art of poetry through analysis and criticism of poems by established poets and through writing and revising the student's own poems. WRD 103 or HON 100 is recommended.

ENG 220
READING POETRY
Undergraduate
Introduction to poetry, poetic forms and meters, and the vocabulary of poetic study.
WRD 104 or HON 100 is a prerequisite for this course.

ENG 221
READING PROSE
Undergraduate
An introduction to close analytical reading of the fundamental prose genres that students will encounter in the English major, for example short stories, novels, folktales, literary nonfiction, and criticism. Students will study examples drawn from the history of prose as well as contemporary narrative.
WRD 104 or HON 100 is a prerequisite for this course.

ENG 227
STUDIES IN DRAMA
Undergraduate
Introduction to the appreciation and analysis of drama as a cultural form, with attention to both text and performance. Readings vary, including plays from different dramatic genres, historical periods, and cultures. WRD 103 or HON 100 is recommended.

ENG 228
INTRODUCING SHAKESPEARE
Undergraduate
Introduction to the basic structures and conventions of representative plays by William Shakespeare, emphasizing film and stage interpretations. May not be taken by students who have completed ENG 328. WRD 103 or HON 100 is recommended.

ENG 231
THE GOTHIC
Undergraduate
Introduction to Gothic narratives. Emphasis on characteristics of Gothic narratives and methods of interpreting the Gothic. Variable emphasis on particular genres or historical periods. (See schedule for current offerings.) WRD 103 or HON 100 is recommended.

ENG 232
THE ROMANCE
Undergraduate
Introduction to the genre of the romance. Emphasis on characteristics of the genre in particular historical moments. Variable emphasis on particular historical periods or topics. (See schedule for current offerings.) WRD 103 or HON 100 is recommended.
ENG 235
SCIENCE FICTION
Undergraduate
Introduction to science fiction as a literary genre. Variable topics, including history of the genre, multi-media adaptations, cyberpunk, global variants. WRD 103 or HON 100 is recommended.

ENG 245
THE BRITISH NOVEL
Undergraduate
Studies in the British novel. Variable emphasis on particular historical periods or topics from 1700 to present. WRD 103 or HON 100 is recommended.

ENG 265
THE AMERICAN NOVEL
Undergraduate
Studies in the American novel. Variable emphasis on the historical development, regional expression, multicultural scope, ethical engagement, and/or recurring thematic concerns of the genre. WRD 103 or HON 100 is recommended.

ENG 272
LITERATURE AND IDENTITY
Undergraduate
Studies in the literary expression and representation of identity. Variable emphasis on different groups, genres, themes, or historical periods. (See schedule for current offerings.) This course is not repeatable. WRD 103 or HON 100 is recommended.

ENG 273
GLOBAL ASIAN LITERATURE
Undergraduate
Introduction to selected authors, genres, and topics in Asian American or Asian diasporic literature from the mid-nineteenth century to the present. Variable emphasis on different groups, genres, or historical periods.

WRD 103 or HON 100 is a prerequisite for this course.

ENG 275
LITERATURE AND FILM
Undergraduate
Introduction to the comparative study of literature and film. Emphasis on construction of narrative, development of character, point-of-view, and adaptation across genres and mediums. (See schedule for current offerings.) This course is not repeatable. WRD 103 or HON 100 is recommended.

ENG 280
WORLD LITERATURE TO 1500
Undergraduate
Introduction to selected examples of world literature to 1500, focusing on mythology, epic, and drama. WRD 103 or HON 100 is recommended.

ENG 281
WORLD LITERATURE SINCE 1500
Undergraduate
Introduction to examples of world literature since 1500. Focuses primarily on explorations of self and the world in drama, poetry, and the novel from the Renaissance through the Modern eras. WRD 103 or HON 100 is recommended.

ENG 284
THE BIBLE AS LITERATURE
Undergraduate
Introduction to the major stories, genres (e.g., poems, parables, prophecies) and intra-textual echoes of the Bible. WRD 103 or HON 100 is recommended.
ENG 286
TOPICS IN POPULAR LITERATURE
Undergraduate
Studies in the forms and functions of popular fiction. Variable emphasis. (See schedule for current offerings.) WRD 103 or HON 100 is recommended.

ENG 288
AUTOBIOGRAPHY AND BIOGRAPHY
Undergraduate
Introduction to the forms, functions, problems and purposes of life-writing. WRD 103 or HON 100 is recommended.

ENG 290
INTERMEDIATE CREATIVE NONFICTION WRITING
Undergraduate
Writing and analyzing creative nonfiction. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 291
INTERMEDIATE FICTION WRITING
Undergraduate
Writing and analyzing short prose fiction. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 292
INTERMEDIATE POETRY WRITING
Undergraduate
Writing and analyzing poems. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 300
COMPOSITION AND STYLE
Undergraduate
Advanced instruction in invention, arrangement, and style, toward developing clear and effective prose styles.
WRD 104 or HON 100 is a prerequisite for this course.

ENG 306
ADVANCED CREATIVE NONFICTION WRITING
Undergraduate
Writing and analyzing creative nonfiction, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 307
ADVANCED FICTION WRITING
Undergraduate
Writing and analyzing short prose fiction, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.
ENG 308
ADVANCED POETRY WRITING
Undergraduate
Writing and analyzing poems, for students with prior workshop experience. May be taken twice. May not be taken pass/fail.
ENG 201 is a prerequisite for this class.

ENG 309
ADVANCED TOPICS IN WRITING
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.
ENG 201 is a prerequisite for this class.

ENG 310
ENGLISH LITERATURE TO 1500
Undergraduate
Survey of English literature from the beginnings to 1500.
(ENG 220 and ENG 221) or (THE 204, 205, and 206) are a prerequisite for this class.

ENG 311
CHAUCER
Undergraduate
Study of selected poetry and prose by Geoffrey Chaucer.
A literature course is a prerequisite for this course.

ENG 319
TOPICS IN MEDIEVAL LITERATURE
Undergraduate
See schedule for current offerings
A literature course is a prerequisite for this course.

ENG 320
ENGLISH RENAISSANCE LITERATURE
Undergraduate
Survey of English literature from 1500 to 1660.
(ENG 220 and ENG 221) or (THE 204, 205, and 206) are a prerequisite for this class.

ENG 327
MILTON
Undergraduate
Study of selected poetry and prose by John Milton.
A literature course is a prerequisite for this course.

ENG 328
SHAKESPEARE
Undergraduate
Study of selected plays and poetry of William Shakespeare in relation to early modern English culture.
(ENG 220 and ENG 221) or (THE 204, 205, and 206) is a prerequisite for this course.
ENG 329  
TOPICS IN RENAISSANCE LITERATURE  
Undergraduate  
See schedule for current offerings.

A literature course is a prerequisite for this course.

ENG 330  
RESTORATION AND 18TH CENTURY LITERATURE  
Undergraduate  
Survey of English literature from 1660 to 1780.

(ENG 220 and ENG 221) or (THE 204, 205, and 206) are a prerequisite for this class.

ENG 339  
TOPICS IN RESTORATION AND 18TH CENTURY ENGLISH LITERATURE  
Undergraduate  
Selected authors, genres and topics in English literature, 1660 - 1780.

A literature course is a prerequisite for this course.

ENG 340  
NINETEENTH CENTURY BRITISH LITERATURE  
Undergraduate  
Survey of British literature from 1780 to 1900.

(ENG 220 and ENG 221) or (THE 204, 205, and 206) are a prerequisite for this class.

ENG 346  
NINETEENTH CENTURY IRISH LITERATURE  
Undergraduate  
This course focuses on some of the important works of nineteenth-century Irish literature. It sees them as engaging with the often traumatic political and social changes of their time.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 349  
TOPICS IN NINETEENTH CENTURY BRITISH LITERATURE  
Undergraduate  
Selected authors, genres and topics in British literature, 1780 - 1900.

A literature course is a prerequisite for this course.

ENG 350  
MODERN BRITISH LITERATURE  
Undergraduate  
Survey of British literature in the twentieth century.

(ENG 220 and ENG 221) or (THE 204, 205, and 206) are a prerequisite for this class.

ENG 354  
THE IRISH REVIVAL  
Undergraduate  
The course invites a study of the cultural ferment of the decades from the 1890's to the 1920's in Ireland. Particular attention will be given to an introduction to the work of canonical writers such as Yeats and Joyce who emerged from it.

WRD 104 or HON 100 is a prerequisite for this course.
ENG 355
MODERN IRISH LITERATURE
Undergraduate
This course provides an introduction to Irish literature, including some poems in the Irish language with English translations on facing pages, written from the Literary Revival to the late twentieth century. It emphasizes the transitions from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 357
TOPICS IN IRISH STUDIES
Undergraduate
Selected authors, genres, and topics in Irish literature and culture.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 359
TOPICS IN MODERN BRITISH LITERATURE
Undergraduate
Selected authors, genres, and topics in twentieth-century British literature.

A literature course is a prerequisite for this course.

ENG 360
AMERICAN LITERATURE TO 1830
Undergraduate
Survey of American literature from the beginnings to 1830.

(ENG 220 and ENG 221) or AMS 200 or AMS 211 or AMS 213 or AMS 215 is a prerequisite for this class.

ENG 361
AMERICAN LITERATURE 1830 TO 1865
Undergraduate
Survey of American literature from 1830 to 1865.

(ENG 220 and ENG 221) or AMS 200 or AMS 211 or AMS 213 or AMS 215 is a prerequisite for this class.

ENG 362
AMERICAN LITERATURE FROM 1865 TO 1920
Undergraduate
Survey of American literature from 1865 to 1920.

(ENG 220 and ENG 221) or AMS 200 or AMS 211 or AMS 213 or AMS 215 is a prerequisite for this class.

ENG 363
AMERICAN LITERATURE SINCE 1920
Undergraduate
This survey focuses on twentieth- and twenty-first century American literary works, authors, and movements. Coverage will explore several genres, and expose students to the diversity of some major American literary movements and authors since high modernism.

(ENG 220 and ENG 221) or AMS 200 or AMS 211 or AMS 213 or AMS 215 is a prerequisite for this class.

ENG 364
TOPICS IN GENRE STUDIES
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics.

A literature course is a prerequisite for this course.
ENG 365
MODERN AMERICAN FICTION
Undergraduate
Major American writers of fiction in the twentieth century.

A literature course is a prerequisite for this course.

ENG 366
MODERN POETRY
Undergraduate
Study of selected twentieth-century poetry.

ENG 220 is a prerequisite for this class.

ENG 367
TOPICS IN AMERICAN STUDIES
Undergraduate
Selected authors, genres, and topics in American literature and culture.

A literature course or an AMS course is a prerequisite for this course.

ENG 369
TOPICS IN AMERICAN LITERATURE
Undergraduate
See schedule for current offerings. This course is repeatable with different topics.

A literature course is a prerequisite for this course.

ENG 370
HISTORY OF THE ENGLISH LANGUAGE
Undergraduate
Examination of the development of vocabulary and structure of English from its beginnings to contemporary British and American English usage.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 371
AFRICAN-AMERICAN FICTION
Undergraduate
Selected novels and short fiction by African-American writers.

A literature course is a prerequisite for this course.

ENG 372
AFRICAN-AMERICAN POETRY AND DRAMA
Undergraduate
Survey of poetry and drama by African-American writers.

A literature course is a prerequisite for this course.

ENG 373
MULTIETHNIC LITERATURE OF THE U.S.
Undergraduate
Readings in recent literature, primarily fiction, by American writers of various ethnic backgrounds, exploring the evolving concept of ethnicity in literature.

A literature course is a prerequisite for this course.
ENG 374
NATIVE AMERICAN LITERATURE
Undergraduate
Study of literature by Native-American writers.

A literature course is a prerequisite for this course.

ENG 375
STUDIES IN SHORT FICTION
Undergraduate
The development of European, English, and American short fiction.

A literature course is a prerequisite for this course.

ENG 376
CREATIVE WRITING AND SOCIAL ENGAGEMENT
Undergraduate
Study and practice of creative writing in the contexts of community service. (See schedule for current offerings.) This course is repeatable with different topics.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 377
TOPICS IN EDITING AND PUBLISHING
Undergraduate
Variable emphasis. (See schedule for current offerings.) This course is repeatable with different topics. WRD 103 or HON 100 is recommended.

ENG 378
LITERATURE AND SOCIAL ENGAGEMENT
Undergraduate
Study of selected literary works in the contexts of community service. See schedule for current offerings. This course is repeatable with different topics.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 379
TOPICS IN LITERATURE
Undergraduate
See schedule for current offerings.

A literature course is a prerequisite for this course.

ENG 380
MASTERPIECES OF WORLD LITERATURE
Undergraduate
Selected works in translation from Classical Antiquity to the present. Variable emphasis. (See schedule for current offerings.)

A literature course is a prerequisite for this course.

ENG 381
LITERARY THEORY
Undergraduate
Study of the major approaches to analyzing literature, including formalist, historicist, psychoanalytic, post-structuralist, and feminist readings.

ENG 220 and ENG 221 or instructor permission is a prerequisite for this course.
ENG 382
MAJOR AUTHORS
Undergraduate
Study of one or two major writers. This course is repeatable with different authors. (See schedule for current offerings.)

A literature course is a prerequisite for this course.

ENG 383
WOMEN AND LITERATURE
Undergraduate
Study of literature by women, with attention to the traditions of women's literature, historical and theoretical perspectives on women as writers and readers, and issues of feminist literary history and criticism.

A literature course is a prerequisite for this course.

ENG 386
POPULAR LITERATURE
Undergraduate
Studies in selected forms of popular literature. Variable emphasis. (See schedule for current offerings.)

A literature course is a prerequisite for this course.

ENG 387
TOPICS IN CONTEMPORARY LITERATURE
Undergraduate
Study of selected late twentieth- and twenty-first century literary works, authors, and movements. Variable emphasis. (See schedule for current offerings.)

A literature course is a prerequisite for this course.

ENG 388
TOPICS IN TRANS ATLANTIC LITERATURE
Undergraduate
Study of transatlantic or circum-atlantic literary production and consumption. Variable emphasis. (See schedule for current offerings.)

A literature course is a prerequisite for this course.

ENG 389
TOPICS IN COMPARATIVE LITERATURE
Undergraduate
See schedule for current offerings.

WRD 104 or HON 100 is a prerequisite for this course.

ENG 390
SENIOR CAPSTONE SEMINAR
Undergraduate
Variable emphasis. See schedule for current offerings. This course is not repeatable.

Senior status and ENG 220 and ENG 221 are prerequisites for this class

ENG 391
TEACHING ENGLISH
Undergraduate
Strategies for teaching composition, literature, and language skills to secondary-school students.

ENG 220 and ENG 221 are a prerequisite for this class.
ENG 392
INTERNSHIP
Undergraduate
Internship in such fields as writing, editing, and publishing supplemented by readings and assignments. Junior standing or above and permission of the internship coordinator are a prerequisite for this class.

ENG 397
NEWBERRY LIBRARY SEMINAR
Undergraduate
Newberry Library Seminar

ENG 398
LITERARY AND CULTURAL HERITAGE
Undergraduate
Study tours - locations, topics, fees, and credit vary.

ENG 399
INDEPENDENT STUDY
Undergraduate
Written permission of supervising faculty member and of department chair required before registration.

ENG 400
STRUCTURE OF MODERN ENGLISH
Graduate
A systematic outline of modern English from both traditional and contemporary linguistic perspectives. Examines descriptive grammars, word and phrase structure, syntax and semantics, and formal issues of style and rhetoric. Formerly ENG 416.

ENG 401
HISTORY OF THE ENGLISH LANGUAGE
Graduate
A systematic study of the nature, history and usage of the English language. The course traces the language from its origin to its present status in England and America.

ENG 402
HISTORY OF ENGLISH PROSE STYLE
Graduate
A survey of alternative theoretical approaches to the study of style, followed by intensive study of changes in the conventions of English prose from the Renaissance to the present.

ENG 407
LANGUAGE AND STYLE FOR WRITERS
Graduate
A comprehensive examination of structural elements and stylistic devices that experienced writers use across a number of creative and professional genres. Topics include components of style, sentence rhythm and prosody, diction choices, rhetorical punctuation, and the development of one's personal writing voice.

ENG 408
STYLISTICS
Graduate
Theory and practice in examining features of prose style, including linguistic, rhetorical and literary perspectives on style.
ENG 411
CHAUCER
Graduate
Chaucer's works in context of his milieu.

ENG 412
STUDIES IN ARTHURIAN LITERATURE
Graduate
Geoffrey of Monmouth, Wace, Layamon and Malory.

ENG 413
STUDIES IN MEDIEVAL LITERARY FORMS
Graduate
Alternating emphasis on poetic, narrative and dramatic genres of the 14th and 15th centuries.

ENG 419
TOPICS IN MEDIEVAL LITERATURE
Graduate
See schedule for current offering.

ENG 421
STUDIES IN ENGLISH RENAISSANCE PROSE
Graduate
Major prose works, including More's Utopia, Sidney's Apology for Poetry, Bacon's Essays, and Milton's Areopagitica.

ENG 422
STUDIES IN ENGLISH RENAISSANCE POETRY
Graduate
Alternating emphasis on the English epic, the 16th-century lyric, and the 17th-century lyric.

ENG 423
STUDIES IN ENGLISH RENAISSANCE DRAMA
Graduate
Tudor-Stuart drama, including works by Kyd, Marlowe, Jonson, Webster and Ford.

ENG 426
THE ESSAY: HISTORY, THEORY, PRACTICE
Graduate
Explores the history of the essay as genre from the Renaissance to the present, compares and contrasts literary essays with those written in most school settings, and offers students the opportunity to write their own extended essays on personal and professional topics. Formerly ENG 488.

ENG 427
MILTON
Graduate
Major poems and selected prose.

ENG 428
STUDIES IN SHAKESPEARE
Graduate
Study of selected plays through various critical and scholarly perspectives.
ENG 429
TOPICS IN RENAISSANCE LITERATURE
Graduate
See schedule for current offering.

ENG 431
STUDIES IN THE EIGHTEENTH CENTURY NOVEL
Graduate
Representative English prose fiction, including Defoe, Richardson, Fielding, Sterne and the Gothic novel.

ENG 432
STUDIES IN RESTORATION AND 18TH CENTURY DRAMA
Graduate
Studies in the comedy of manners, sentimental comedy, heroic drama, and bourgeois tragedy.

ENG 434
STUDIES IN RESTORATION AND EIGHTEENTH CENTURY AUTHORS
Graduate
Alternating emphasis on, for example, Dryden, Pope, Swift, Johnson or other authors.

ENG 439
TOPICS IN RESTORATION AND EIGHTEENTH CENTURY LITERATURE
Graduate
See schedule for current offerings.

ENG 441
STUDIES IN ENGLISH ROMANTIC PROSE
Graduate
Major Romantic nonfiction prose writers, including Burke, Coleridge, Hazlitt, DeQuincey and Lamb.

ENG 442
STUDIES IN ENGLISH ROMANTIC POETRY
Graduate
Alternating emphasis on major Romantic poets, including Blake, Wordsworth, Coleridge, Byron, Shelley and Keats.

ENG 443
STUDIES IN VICTORIAN PROSE
Graduate
Major Victorian nonfiction prose writers, including Carlyle, Newman, Ruskin, Mill, Arnold and Pater.

ENG 444
STUDIES IN VICTORIAN POETRY
Graduate
Major Victorian poets, including Tennyson, Browning and Arnold.

ENG 445
STUDIES IN 19TH CENTURY BRITISH FICTION
Graduate
Alternating emphasis on major novelists including Dickens, Thackeray, the Brontes, Eliot, Trollope and Hardy.
ENG 446
NINETEENTH CENTURY IRISH LITERATURE
Graduate
This course surveys a broad range of literature from nineteenth-century Ireland. It reads literature within the social and historical context of its day; in terms of the formation of individual, social and national identities; and within today's debate about Ireland's status at the time.

ENG 449
TOPICS IN 19TH CENTURY BRITISH LITERATURE
Graduate
See schedule for current offering.

ENG 451
STUDIES IN THE MODERN BRITISH NOVEL
Graduate
Alternating areas of emphasis, including Woolf, Joyce, Forster and Conrad.

ENG 452
STUDIES IN MODERN BRITISH POETRY
Graduate
Alternating areas of emphasis, including Yeats, Auden, Lawrence, Dylan Thomas, Eliot and Larkin.

ENG 453
STUDIES IN MODERN BRITISH DRAMA
Graduate
Representative British and Irish plays from World War I to contemporary times.

ENG 455
MODERN IRISH LITERATURE
Graduate
This course uses both historical and theoretical approaches to Irish literature written from the Literary Revival to the late twentieth century. It emphasizes the transition from a colonized to a postcolonial society and the slow validation of the voices of Irish women writers.

ENG 456
CONTEMPORARY IRISH LITERATURE
Graduate
This course relates contemporary Irish literature to recent Irish history and to social and cultural change. It charts the ways in which patterns of individual, social and national identity have been challenged and renegotiated.

ENG 459
TOPICS IN MODERN BRITISH LITERATURE
Graduate
See schedule for current offering.

ENG 464
STUDIES IN AMERICAN AUTHORS
Graduate
Alternating emphasis on major writers, including Hawthorne, Melville, Poe, Whitman, Dickinson, Twain, Chopin, Crane, James, Wharton and Cather.

ENG 465
STUDIES IN THE MODERN AMERICAN NOVEL
Graduate
Alternating emphasis on major 20th-century writers, including Fitzgerald, Hemingway, Stein, Faulkner, Steinbeck, Porter, Penn Warren, Bellow, O'Connor, Oates and Morrison.
ENG 466
STUDIES IN MODERN AMERICAN POETRY
Graduate
Introduction to a wide range of twentieth-century American poetries, with alternating emphasis on modernists such as Frost, Eliot, Pound, Stevens, Williams, Moore, HD., Hughes, and Rukeyser as well as more recent figures and trends.

ENG 467
STUDIES IN AMERICAN DRAMA
Graduate
American dramatists and dramatic movements.

ENG 469
TOPICS IN AMERICAN LITERATURE
Graduate
See schedule for current offering.

ENG 471
BIBLIOGRAPHY AND LITERARY RESEARCH
Graduate
Principles and methods of literary research.

ENG 472
STUDIES IN LITERARY CRITICISM
Graduate
Study of the theoretical foundations of literary criticism, exemplified by major texts from ancient Greece to the present.

ENG 473
TEACHING CREATIVE WRITING
Graduate
Prepares English teachers to teach creative writing at the secondary and college undergraduate levels. Models the planning and directing of effective workshops in poetry, creative nonfiction, and fiction writing. Formerly ENG 485.

ENG 474
TEACHING LITERATURE
Graduate
Prepares English teachers to teach literature at the secondary and college undergraduate levels. The course develops methods of teaching all literary genres, addresses problems in literacy, and focuses on the transactional nature of reading and writing.

ENG 475
TOPICS IN LITERATURE
Graduate
See schedule for current offering.

ENG 476
TOPICS IN GENRE AND FORM
Graduate
See schedule for current offerings. Formerly ENG 479.

ENG 477
TOPICS IN PUBLISHING
Graduate
See schedule for current offerings.
ENG 478
TOPICS IN TEACHING
Graduate
See schedule for current offerings.

ENG 484
WRITING WORKSHOP TOPICS
Graduate
See schedule for current offerings.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 487
TRAVEL WRITING
Graduate
Writing travel essays: history and forms of the literary travel essay; writing about travel for the book and magazine market.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 488
WRITING THE PERSONAL ESSAY
Graduate
Focuses on studying and writing creative nonfiction essays, with particular attention paid to voice, style, form and structure, narration and exposition, scene, and narrative distance.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 489
SCREENWRITING
Graduate
An introduction to the craft of screenwriting. Covers principles of plot, dramatic conflict, characterization, dialogue, and screenplay form. Students develop short dramatic and documentary screenplays.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 490
WRITING FOR MAGAZINES
Graduate
Covers the range of skills necessary for magazine writing. Discussion of the elements of style, humor, research, concept and imagery that characterize the literature of fact. Students investigate, compose and edit finished magazine articles to be submitted for publication.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 491
SCIENCE WRITING
Graduate
An introduction to the creative career of science writing. Students research, write, and market articles on such subjects as astronomy, genetics, health, and technology for newspapers, magazines, e-zines, and innovative journals. No prior science background required.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 492
WRITING FICTION
Graduate
A course in writing short stories. Emphasis is placed on class discussion of student writing.

Status as a MAWP or MAE student is a prerequisite for this class.
ENG 493
WRITING POETRY
Graduate
A course in writing and reading poetry. Emphasis is placed on class discussion of student writing.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 496
EDITING
Graduate
An introduction to editing principles and practices in professional and technical fields.

ENG 497
WRITING THE LITERATURE OF FACT
Graduate
An advanced course in reading and writing true-life stories in the nonfiction tradition exemplified by such writers as Dickens, Agee, McPhee, and Didion.

Status as a MAWP or MAE student is a prerequisite for this class.

ENG 500
INDEPENDENT STUDY
Graduate
Written permission of supervising faculty member and of the program director is necessary before registration. Variable credit.

ENG 501
THESIS RESEARCH
Graduate
Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

ENG 502
CANDIDACY CONTINUATION
Graduate
Non-credit. Required of all students who are not registered for regular courses but who occasionally utilize University facilities during completion of course requirements and/or research.

ENG 509
INTERNSHIP
Graduate
Internship: Written permission of supervising faculty member and of the program director is necessary before registration. Limited to four credits.

ENV 101
INTRO TO ENVIRONMENTAL SCIENCE WITHOUT LAB
Undergraduate
ENV 101 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Students cannot receive credit for both ENV 101 and ENV 102.
ENV 102
INTRO TO ENVIRONMENTAL SCIENCE WITH LAB
Undergraduate
ENV 102 provides an overview of how the natural world works, how we interact with it and how we can work to protect, restore and sustain it for the future. Topics include an overview of basic ecological principles, population, biodiversity, energy, natural resources and pollution. The course emphasis is on the science behind current environmental concerns. Social, ethical, economic, and political perspectives are considered in order to provide perspective and a fuller understanding of the issues and their solutions. Lab investigations further develop scientific and environmental understandings. Students cannot receive credit for both ENV 101 and ENV 102.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 115
ENVIRONMENTAL GEOLOGY
Undergraduate
An examination of the earth's materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic resources and the geological aspects of waste disposal and pollution. The course includes a three-hour lab. Students cannot receive credit for both ENV 115 and ENV 116.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 116
GEOLOGY OF THE ENVIRONMENT
Undergraduate
An examination of the earth's materials and structures, and the processes responsible for their formation; how geologic processes and hazards influence human activities (and vice versa); and a discussion of geologic aspects of waste disposal and pollution. Students cannot receive credit for both ENV 115 and ENV 116.

ENV 117
EARTH THROUGH TIME WITH LABORATORY
Undergraduate
A general introduction to the 4.6 billion-year geologic history of planet Earth. The course scientifically explores the history of the earth from its formation to present day, the origin and transformation of rocks, internal and external geologic processes and structures, evolution and extinction of organisms, and patterns of Earth's environmental conditions through time. The course includes a three-hour lab.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 150
FOUNDATIONS OF ENVIRONMENTAL STUDIES
Undergraduate
The purpose of this course is to introduce students to environmental studies. It presents students with an overview of the intersections between ecology, the social sciences, and the humanities that inform our vision of the rigor and power of interdisciplinary environmental studies. It draws upon the natural sciences, communication, geography, religion, history, literature, art and design, and public policy to stress the interrelationships between human society and the natural world. Students will study the effects of the human use of the natural world and the interactions of culture, society, resources, and the environment. We will examine the social, political, and economic institutions that impact the environment. Particular attention will be paid to how the role of power and inequality contribute to environmental problems and how those problems in turn, impact certain groups more than others (e.g. citizens of undeveloped nations, people of color in urban areas).

ENV 151
INTRODUCTION TO SUSTAINABILITY
Undergraduate
This course provides an interdisciplinary introduction to sustainability and examines the essential interdependence between environmental, human, and economic systems. The class focuses on the theories and practices that respect the Earth's ecological limits so that these systems remain viable now and into the future. Students will explore the interrelated environmental, social, and economic problems that we currently face at the local, national, and global scale and the solutions that individuals, governments, and institutions are implementing in an effort to ensure a sustainable future.
ENV 152  
ECOLOGICAL AND SOCIAL ECONOMICS  
Undergraduate  
In this course, students examine the role of the environment and natural resources in neoclassical, environmental and ecological economics. First, students study mechanisms for efficiently allocating scarce resources among specific alternative ends and take a brief foray into environmental economics and learn methods of resource/environmental valuation. We also discuss aspects of macroeconomics as it pertains to ecological economics. Students come away able to critically assess the benefits and drawbacks of these three ways that the economy incorporates the environment. It also encourages ethical reasoning as we discuss distribution of environmental benefits over generations and globally.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 160  
IDEAS OF NATURE  
Undergraduate  
This course is an introductory history of the ideas of nature that emerged over the last two and a half centuries in Europe and the United States. We examine how the conceptions, meanings, and values of nature today have been influenced by the Scientific and Industrial Revolutions, Romanticism, and evolutionary theory; notions of the sublime, the frontier, and wilderness; and the practices of conservation, preservation, and restoration. Also discussed are the ideological commitments of current environmentalisms, in particular sustainability.

ENV 170  
ENVIRONMENTAL ETHICS  
Undergraduate  
The environmental issues that confront us are both global and local; they involve political, economic and ethical decision-making by governments, corporations and citizens. Students will explore and evaluate diverse approaches to a range of such issues, as well as the ways different thinkers and different cultures have envisioned the relationship between human beings and the natural world-all with a view to understanding their own relationships to the natural world, their own environmental ethics.

ENV 180  
ISSUES IN ENVIRONMENTAL DESIGN  
Undergraduate  
Issues in Environmental Design is an introductory course that will examine concepts, theories and practices across multiple scales of design, including architecture, landscape architecture and urban design. Students will discuss and evaluate the design decisions that compose our built environment with a focus on contemporary ideas of ecological sustainability. Examples of excellence will be explored through the examination of case studies. The underlying theme is the connection between culture and nature, and how we may reduce our negative impact on systems that support all life while building positive systems that support all life.

ENV 181  
LANDSCAPE AND MEANING  
Undergraduate  
In this course students will engage issues central to the design of landscapes, examining the complex exchange between social perception, ecological function and physical form in landscape architecture. Students will evaluate the formal character of particular landscapes and how this expression contributes to the overall experience of a place. The literary perspective of the course will focus on the rich tradition of associations between landscape design and social ideologies. Students will be asked to apply concepts from the literature to landscapes from their own personal experience to understand how meaning is both deeply personal and culturally derived. Students will extend this interpretation to creating their own landscape design for transforming an existing site in Chicago.

ENV 200  
CITIES AND THE ENVIRONMENT  
Undergraduate  
This course focuses on the interactions between urban areas and the environment. It is a discussion of the physical setting of cities; the water, energy, air and waste disposal needs of urban areas; and the effects of urban areas on the air, water and land environment.
ENV 202
RESOURCES, POPULATION, AND THE ENVIRONMENT
Undergraduate
A course on the relationship between the exploitation of the biological, mineral and energy resources of the earth to support an increasing population, and the environmental effects of this development. To provide an overview of the current debate on the relationship between the growing human population worldwide, the natural resources required to sustain this population, and the consequences of resource exploitation for managing environmental quality. We will integrate the ecological, economic, and policy factors involved in natural resource management.

ENV 204
ENERGY AND THE ENVIRONMENT
Undergraduate
This course is designed to provide students with the scientific tools necessary to understand and critically evaluate both personal and policy decisions regarding the variety of options (e.g. fossil fuel, solar, wind, etc.) for energy generation and use. The course also focuses on the environmental impacts of all forms of energy, from the extraction of fossil fuels and mineral resources from the earth, to the generation, distribution and consumption of energy, and ultimately emission of fossil fuel combustion products, notably carbon dioxide and other heat trapping gases, to the atmosphere.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 216
EARTH SYSTEM SCIENCE
Undergraduate
This course focuses on three of the great spheres of the Earth (lithosphere, hydrosphere and atmosphere) and how they interact with the biosphere to create an integrated Earth system with an emphasis on how human activities impact important earth system cycles. Students should have a basic understanding of how living organisms interact with their physical environment. Laboratory activities provide experience with the tools and methodology of systems thinking.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 217
HUMAN IMPACTS ON THE ENVIRONMENT
Undergraduate
A science-based course that examines the interface between humans and the living and non-living environment, the consequences of these interactions, and options for mitigating environmental impacts.

ENV 222
TOPICS IN ENVIRONMENTAL STUDIES
Undergraduate
Variable topics in environmental studies.

ENV 230
GLOBAL CLIMATE CHANGE
Undergraduate
This course introduces the student to the general principles of climate change and how it affects weather, agriculture, ocean levels, etc. In recent years, the problem of global climate change became one of the most important issues in science and politics. This course will cover topics like natural and human made climate changes, the handling of proxy data and data methods, and social behavior.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 235
ENVIRONMENTAL EDUCATION AND STEWARDSHIP
Undergraduate
This unique J EYL course is for junior level students with diverse majors interested in experiential learning within the field of environmental education. In partnership with the Chicago Academy of Sciences' Peggy Notebaert Nature Museum, students will not only gain valuable content knowledge on the region's natural history, but also apply that knowledge via service learning in a museum setting. Enrolling in this course is an opportunity to witness and interact with the professionals, pedagogy, science, and practice of promoting environmental literacy.
ENV 240
INTRODUCTION TO HORTICULTURE
Undergraduate
This course introduces the principles and core practices involved in the culture of plants. Topics include the uses of plants and horticultural practices throughout history; the botanical and horticultural classification of plants; plant structure and function, growth and regulation; environmental requirements for plant growth; genetic modification of plants; plant reproduction and propagation; and plant pests and diseases. The course also considers environmental issues in horticulture including xeriscaping, biodiversity and the use of native plants, water management and rain gardens and hydroponics and container gardens.

ENV 245
URBAN AND COMMUNITY AGRICULTURE
Undergraduate
This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, case-study approach, this course will explore issues such as food security, community gardening, farmers markets, the locavore food movement, entrepreneurial aspects of urban agriculture, methods of urban food production, and food consumption patterns. The course will meet in the classroom and on-site at the DePaul urban farm and greenhouses. In addition, students are expected to spend several hours each week outside of class time engaged in hands-on experience in urban farming at DePaul or at local sites arranged with the instructor.

ENV 250
APPLIED ECOLOGY
Undergraduate
An examination of how ecological principles are applied in order to understand and improve the relationship between humans and the natural environment. Cannot receive credit for both ENV 250 and BIO 215.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 260
ENVIRONMENTAL DATA ANALYSIS
Undergraduate
This course provides an overview of the biometrical techniques employed in the analysis of environmental data. Topics include: handling of data, experimental designs, testing for differences between an experimental and a control group, testing for differences among many groups, and determining trends in data. Data from the environmental sciences is used throughout, and students are introduced to appropriate software for data analysis.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 294
SECOND YEAR SEMINAR
Undergraduate
The purpose of this course is to advance ecological literacy. The seminar presents the study of the environment to students in a philosophical, cultural, and historical context, and in addition makes them aware of some foundational ideas of the discipline through a selection of new and classic literature.

ENV 300
PLANT IDENTIFICATION
Undergraduate
An in-depth overview of plant families and species in the Chicagoland area. Lectures will focus on morphology of plants, evolutionary relationships among plant families, and terminology of plant structures. Students will use botanical keys and manuals for the area to identify plants and will learn collection techniques. Plant species will be collected in their natural habitats during field trips.

ENV 250 or BIO 215 is a prerequisite for this class.
ENV 310
ENVIRONMENTAL SOIL SCIENCE
Undergraduate
An examination of the physical, chemical, biological and engineering properties of soils, their genesis and classification, how they function as sites of waste disposal, and their role in global agricultural production. The course includes a three-hour lab and a mandatory Saturday field trip.

LSP 120 or LSP 121 or MAT 130 or above is a prerequisite for this class.

ENV 315
PLANT ECOLOGY
Undergraduate
This course focuses on how plants are affected by abiotic factors in the environment and interactions with other organisms. Goals are to improve students' abilities to understand research papers, present overviews of current research, design experiments, and analyze data. The course includes weekly labs with greenhouse experiments or field trips followed by data analysis. Topics include germination ecology, pollination biology, competition between plants, and effects of herbivory.

ENV 250 or BIO 215 is a prerequisite for this class.

ENV 316
CHEMISTRY OF EARTH SYSTEMS
Undergraduate
This class focuses on the impact of pollution on the Earth's ability to provide clean air, water and food for human consumption. The industrialization of the economy during the last 150 years has greatly increased the amount of waste that is sent into the four Earth spheres: the atmosphere, hydrosphere, lithosphere and biosphere. These emissions directly harm organisms and also cycle back to pollute essential ecosystem services provided by the Earth. This class will consider the source, transport, transformation and ultimate fate of pollution emitted into the air, water and solid Earth. Examples will include relatively simple cases (agricultural pesticides harming birds) and range to more complex interactions (depletion of stratospheric ozone by CFCs and the increase in harmful ultraviolet radiation). The laboratory component will be project-based and some work can be completed outside of the assigned lab time.

ENV 216 and CHE 132 are a prerequisite for this class.

ENV 320
CONSERVATION BIOLOGY
Undergraduate
Conservation biology is an interdisciplinary endeavor concerned with the protection and management of biodiversity. It employs insights from the biological sciences, from the theory and practice of natural resource management, as well as from the social sciences and humanities. The reach of the discipline is vast, ranging across all organismal groups and the landscapes and processes that sustain them. We will therefore restrict ourselves to a general overview and draw upon a series of case studies in the Chicagoland area.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 322
ECOSYSTEM ECOLOGY
Undergraduate
This course will introduce students to the conceptual and methodological tools of ecosystem ecology. The course will focus on understanding the fundamental structure and function of ecosystems but will also address very recent debates on the economic value of ecosystem services, the role of biological diversity in maintaining ecosystem processes, and the consequences of stressed and degraded ecosystems for human welfare. Finally, we assess the role of ecosystem ecology in designing sustainable restoration projects. The course includes a weekly lab.

BIO 215 or ENV 250 is a prerequisite for this class.

ENV 340
URBAN ECOLOGY
Undergraduate
In this course we examine the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more habitable - cleaner, healthier and more biodiverse. We will pay considerable attention to the ways in which ecology can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, economics, demography, architecture and planning. This course has a required lab; some Saturday field trips.

BIO 215 or ENV 250 is a prerequisite for this class.
ENV 344
ENVIRONMENTAL JUSTICE AND ADVOCACY
Undergraduate
This course explores the roles of individuals and organizations in advocacy through the lens of environmental justice, particularly as power arrangements facilitate or impede consensus building. The course examines how legislation is written and how this process has impacted communities of color. Special attention is paid to advocacy techniques such as lobbying, movement-building, public education and litigation.

ENV 217 is a prerequisite for this class.

ENV 345
URBAN AGRICULTURE
Undergraduate
This course will acquaint students with the challenges, opportunities, practices, and transformative potential of urban agriculture. Taking an interdisciplinary, integrative, case-study approach, this course will explore issues such as food access, food security, food deserts, community gardening, farmers markets, locavore food movement, entrepreneurial aspects of urban agriculture, method of food production, community nutrition, and food consumption patterns. The course will meet both in the classroom and on-site at an urban farm, where students will work in all aspects of the farm as well as learn to organize communities in an effort to help them create food security and access to healthy food systems.

ENV 350
ENVIRONMENTAL SCIENCE AND STUDIES CAPSTONE
Undergraduate
This course examines basic core concepts of and current issues in environmental science drawing on perspectives of the liberal studies curriculum, including reflectiveness, value consciousness, critical and creative thinking, and a multicultural perspective.

Status as a senior Environmental Studies or Environmental Science major is a prerequisite for this class.

ENV 355
INTRODUCTION TO ENVIRONMENTAL HEALTH
Undergraduate
Study of the environment factors that influence health. Topics include air and water pollution, global population and local community dynamics, toxicology, infectious and chemical agents, radiation, and management.

ENV 250 or BIO 215 is a prerequisite for this class.

ENV 359
ECOLOGICAL AND ENVIRONMENTAL MODELING
Undergraduate
Introduction to mathematical models commonly used in ecological and environmental science. Students will learn the basics of modeling with sufficient depth to critically evaluate models in the literature and to construct and analyze novel models of ecological or environmental phenomenon of their choosing.

ENV 360
RESEARCH METHODS
Undergraduate
ENV 360 is intended for junior year Environmental Science majors who are preparing for their senior research projects. Topics include nature and philosophy of science, experimental design, statistical analysis and scientific writing, focusing on common concerns and pitfalls of the environmental science researcher. Students develop a literature base and thesis proposal on a topic to be determined in the first weeks of the course.

Status as an Environmental Science major with junior standing or above is a prerequisite for this class.

ENV 361
RESEARCH IN ENVIRONMENTAL SCIENCE
Undergraduate
ENV 361 is for students who are currently working with an ENV faculty mentor on a research project. Restricted to students majoring in Environmental Science or Environmental Studies; permission of instructor required.
ENV 362
SENIOR THESIS
Undergraduate
ENV 362 is designed for Environmental Science students working on their senior thesis. 2 quarter credits.

ENV 360 is a prerequisite for this class.

ENV 390
SPECIAL TOPICS IN ENVIRONMENTAL SCIENCE
Undergraduate
Variable topics.

ENV 398
TRAVEL/STUDY
Undergraduate
Foreign and domestic study tours by special arrangement with sponsoring programs: Variable credit.

ENV 399
INDEPENDENT STUDY
Undergraduate
Variable credit. Permission of instructor and chair required.

ENV 440
URBAN ECOLOGY
Graduate
In this course we examine the way ecological ideas can increase our understanding of cities in ways that assist us in making cities more habitable - cleaner, healthier and more biodiverse. We will pay considerable attention to the ways in which ecology can be broadened by its encounter with disciplines that have historically paid more attention to the city: urban sociology, anthropology, economics, demography, architecture and planning. This course has a required lab; some Saturday field trips.

ENV 506
EARTH RESOURCES AND HUMAN SOCIETY
Graduate
This course will provide an overview of the relationship between the growing human population worldwide, the natural resources required to sustain this population, and the consequences of resource exploitation for managing environmental quality. We will integrate the ecological, economic, and policy factors involved in natural resource management. For graduate students in sustainable management.

Graduate standing is a prerequisite for this class.

FA 105
ESSENTIALS OF COMPENSATION MANAGEMENT
Undergraduate
This course will examine the strategic use of compensation systems by management to attract, motivate, retain, and reward employee performance. This course will explore the factors of job analysis, job description, and job evaluation as the basis of compensation strategy offering students an opportunity to develop competencies in making equitable compensation decisions.

FA 108
SMALL BUSINESS TAX PLANNING
Undergraduate
This course will examine how the Internal Revenue Service (IRS) deals with small businesses and entrepreneurs. It will help students (prospective entrepreneurs) understand the policies and procedures of the IRS and how to defend themselves in audits, appeals and hearings. Upon completion students should have a clearer understanding of how to avoid common tax traps and unnecessary fines and penalties assessed in the areas of federal income, payroll and investment planning. Additionally, students will be able to recognize differences between IRS policies and tax laws passed by Congress.
FA 109
TAX PLANNING FOR A SECURE RETIREMENT
Undergraduate
The Internal Revenue Service (IRS) administers tax laws which affect retirement income. What investment options are sheltered against taxes? What are some of the growth funds that have historically kept pace with economic growth in spite of taxes? These are some of the questions which will be addressed in this course. Students will learn to describe, differentiate, and explain form, function, and variation within functional business processes. More specifically, this course examines: 1. Social security, medicare, defined benefit plans and defined contribution plans. 2. Quantitative methods to determine the amount of retirement money you may need in the future.

FA 110
ESSENTIALS OF TRAINING AND DEVELOPMENT
Undergraduate
This is a 5-week, 1-competence course on Employee Training and Development. Students will learn the basic processes of employee training and development, including needs assessment, theories of learning and behavior change, training design to support appropriate selection or development of training, delivery of training, issues of transfer, and assessment of results.

FA 111
SNL AND CAREER PATHWAYS
Undergraduate
Are you trying to decide on a career path, or want to change careers and are not sure in which direction to head? Career Pathways is a one-competence hybrid course designed to complement a student's plan of study. It is an exploration of the academic, cognitive and interpersonal skills that a liberal arts education fosters, with an emphasis on the practical value of a liberal arts education in today's workplace. Students will explore the career potential of their education, examine a variety of career pathways and determine the important role careers can play in contributing to society and the global workplace. During the course students will assess their personalities, interests and leveraging their skill set into a matching career. Under close examination, students will study their own individual skills, values and interests; learn how to manifest these skills, values and interests effectively; and begin to articulate possible career pathways which are mindful of society and workplace needs. Can only be taken for one competence.

FA 112
EXPLORING SUCCESS TECHNIQUES FOR ENHANCING CAREER SKILLS
Undergraduate
This course will address challenges that individuals encounter as they seek to advance in the job market as well as the problems faced within the workplace. The purpose of the course is to refresh and increase your effectiveness and preparation as a job seeker in your chosen field. The course will cover areas such as resume and cover letter writing, interviewing techniques, and effective job searches. Meets first five weeks of the quarter. May only be taken for one competence.

FA 113
MANAGING CHANGE FOR ORGANIZATIONAL LEADERSHIP
Undergraduate
If change were simple, all organizations would be effective and thrive in the presence of great challenges. Implementing change involves complex skills combining visionary leadership with project and other management skills. This 5-week class provides an introduction into the management and leadership skills change agents use on a regular basis as they implement organizational change. The focus of the class will be departmental or division change to be most relevant to SNL students. It will provide skill development of both managerial and interpersonal skill elements crucial to the success of change implementations.

FA 114
IS OBAMACARE HEALTHY FOR AMERICA?
Undergraduate
The Patient Protection and Affordable Care Act (better known as Obamacare), passed by Congress in 2010 and deemed constitutional by the Supreme Court of the United States, has been called the most sweeping government program of our time. Everyone has an opinion about it. Few understand the law itself. Perhaps even fewer understand how we got the health care system that we have had for generations. It is a system that many fear will be irreparably harmed by Obamacare. It is a system rife with opposing outcomes. It provides some of the world's highest quality health care and worst accessibility. It works well for the majority of the American population but fails to cover 40 to 50 million or more of its people. It is a system that is affordable for some but has led to the inability to pay medical bills as the number one reason for bankruptcy in the United States. What about Obamacare? Will it make our national health dilemma better or worse? Is it affordable? Will it improve healthcare access? Will it save lives or lower medical standards? Will it economically harm individuals and businesses in the short and long term? Is it a product worth having and a price worth paying? Is Obamacare healthy for America? This course will actively engage the student in finding their own answer to this question and sharing their findings with the greater community in which we live.
Prosperous local economies are built upon the foundation of strong communities. Community economic vitality is largely determined by the quantity of leaders in a community and how, individually and collectively, they talk, decide, act, and interact with one another. While businesses certainly play important roles in the economic development of their communities, so do the school teacher, the store clerk, the plant manager, the girl scout troop leader, and the citizen who organizes a block party. Community leadership and engagement is the cornerstone for building strong and prosperous local economies. Business retention and expansion, small business, retail and commercial development, and tourism, for example, are also important components of a diverse economic development strategy. In this course, students will analyze the interaction between small business and local civic engagement in their community, and identify opportunities for everyday citizens and small local businesses to become a more responsible civic partner. The course will include discussions, group exercises and speakers to explore various aspects of civic engagement at the local level for both individuals and small businesses.

This course satisfies a degree requirement in the Focus Area. Competence: F1 - Statement: Can design a plan in one's focus area based on an analysis of elements that comprise that area.

This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX - Individual Focus Area Elective

This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. F3 /Experiential Learning Evaluation: Individual Focus Area Elective
FA 128
FX / EXPERIENTIAL LEARNING EVALUATION: INDIVIDUAL FOCUS AREA ELECTIVE
Undergraduate
This non-credit hour course satisfies a degree requirement in the Focus Area as part of SNL's independent study options. FX /Experiential Learning Evaluation: Individual Focus Area Elective

FA 133
EDITING YOURSELF AND OTHERS: A COLLABORATIVE APPROACH TO WRITING AT WORK
Undergraduate
In a professional or business setting, writing is not only a main means of communicating but also a tool for getting things done. It is through writing that an organization demonstrates its worth and achieves its goals. Anyone with good writing skills is at an advantage in the workplace. Unfortunately, when people lack good writing skills, their overall abilities and performance may be questioned. It is not surprising that many professionals, no matter how accomplished they are in their area of expertise, are anxious when they have to write. And, writing often becomes a point of contention when people on the job don't agree on whether a piece of writing is effective or how to go about improving it. Those who delegate responsibility for writing to others often feel frustrated that they end up having to do the work themselves - a situation that invariably leads to their employees feeling criticized and insecure in their job. Needless to say, the duplication of work effort, the loss of productivity, and the inevitable bad feelings undermine the work environment, often leading to individuals resigning or being dismissed. In fact, according to a recent survey of Fortune 500 executives, poor reading and writing skills is the most frequent reason for dismissal of first-year employees.

FA 134
ESSENTIALS OF MANAGING INTERNATIONAL RELATIONS - A CROSS-CULTURAL PERSPECTIVE
Undergraduate
This course will examine main subject areas in cross-cultural management and will bring together important research findings related to International Relations. As globalization shapes the role of managers, managers' responsibilities in the international business affairs become the norm rather than the exception, and as such, establishing and maintaining contacts with other cultures becomes commonplace. In this course you will examine cross-cultural management issues from a predominantly psychological perspective, as opposed to being country specific. Thus, the focus will be placed on interactions of people from different cultures in organizational settings. This approach helps you understand the effect of culture that can be applied to a wide variety of cross-cultural interactions in a number of organizational contexts. Students of organizational behavior, industrial and organizational psychology, and social psychology will find many of the topic areas familiar; however, the focus of this course is on application of these concepts to managing international affairs.

FA 135
PROPERTY: LAW, POLICY AND EVERYDAY IMPLICATIONS
Undergraduate
This course will examine how the American legal system defines and handles transactions and disputes related to real estate and personal property. Simulations and written exercises will help to explain in practical terms how law surrounding property issues was made, and how it evolves. Topics to be addressed in this course will include: finance & sale of real property, how the title system works, zoning and government taking by eminent domain, the intersection of civil rights and the U.S. Constitution with property law, landlord-tenant issues, and disputes related to personal property. Whether you are interested in learning about how law and public policy are made, or simply wish to know more about real-life issues that arise when you buy or sell a home or must default on a mortgage, this course will advance your understanding and arm you with useful information.

FA 136
THE LANGUAGE AND LEADERSHIP OF ORGANIZATIONAL CHANGE
Undergraduate
This class would explore the impact of language on an individual's ability to learn and change him/herself as well as the human systems or organizations we are in. Using as a primary text "How the way we talk can change the way we work" by Robert Kegan and Lisa Laskow Lahey, students will examine the inclination not to change (or equilibrium) that is inherent in each individual and organization and how language impacts this. Students will also examine individual learning and bottom up change in the context of organizational learning and change. In addition to providing learning around the content of the class, students will work collaboratively in small groups to support each others' efforts thereby functioning as learning communities.
FA 137
WHO IS #1? TODAY'S SUPER POWERS
Undergraduate
History tells us that sooner or later, empires fall. There has been a good bit of activity on this front in the last few decades. It all makes you wonder: What is a super power? What influence do super powers exercise over our economic and social lives? Is the US a super power? How are Americans viewed across the globe? and...what about our ability to deal with economic and social equality right here at home? In this course, students will examine international economics, the effects of globalization on us and on the world, and the ways in which our lives might or might not be changed by our place in the global network. Students will look at these issues from the global perspective, and will also examine them from national and personal perspectives.

FA 195
CAPITALISM IN CRISIS
Undergraduate
The recent financial crisis has taught us that we must become literate in economics. What do we know about derivatives, bubbles, collateralization of debt, no doc loans, and open market operations? How do these things influence us? The recent debate and implementation of universal health care raises many ethical issues. Does every citizen have the right to health care? Is it the government's role to ensure that this happens? What economic rights does a citizen have? Should the government foster entitlement programs? How does the current US health care system compare with other industrialized nations' systems? In this course, students will study the major components of our economic system and will review its current stressors and weak points.

FA 196
MANAGING A SUCCESSFUL BUSINESS
Undergraduate
The intent of business planning is to set the foundation for business success. More than one business has been put out of business when it experienced unplanned rapid growth. Students learn the financial and management aspects of business along with techniques for defining financial tracking methodologies that uncover and deal with potential problems at an early stage. Special emphasis is placed on merger and acquisition as a forward-looking method for creating new business opportunities and success. Students will work in groups to understand the detailed realities associated with being on the seller and buyer side of a business sale/purchase. Methods of post sale business integration are also discussed. It is strongly recommended but not required that students take "Starting a Successful Business" before taking this class.

FA 197
DEVELOPING SUPERVISORY SKILLS FOR THE 21ST CENTURY
Undergraduate
As we enter the 21st Century, a change is occurring with respect to the age and the make-up of the working population, which can have a significant impact on the management of people. Furthermore, American managers today must not only face the challenges of profit/loss-oriented business decision-making, but must also improve their skills in working with people. Topics that will be covered not only prepare managers for change, but also guide and position them for the future. Workforce 2020 offers the best ideas about what lies ahead and what Americans - collectively and individually, in large and small firms, in federal agencies and in small-town development commissions - should do to prepare for the journey to Workforce 2020. This course will examine how fundamental changes are altering the workforce of tomorrow and address the seemingly intractable issues and concerns managers face today and offer a new way of dealing with them.

FA 198
FINANCIAL PLANNING FOR RETIREMENT
Undergraduate
This course concentrates on the financial issues of retirement: income, savings, pensions, annuities, portfolios, health care, and taxes. We look carefully at the range of decisions facing adults in the U.S. as they plan for their post-working years. Learning focuses on best models of collaborating with financial experts, and planning for balance in life expectancy and assets (including real estate). The culmination of our course lies in the question of whether to remain employed for life; to resist retirement. We examine that possibility in the light of current labor market practices and the potential benefits of elder entrepreneurship.

FA 201
HELPING CHILDREN SUCCEED
Undergraduate
This course is designed to teach strategies to adults for helping children in school, regardless of age. We will explore the various ways people learn and discover techniques used to enhance learning. This course combines lecture, discussion, small group work, student presentation, and student participation in class discussion.
EMOTIONAL COMPETENCE FOR ADULTS
Undergraduate
We’ve all known people who were brilliant but ineffective because they couldn't manage themselves or learn to interact with others. It is nearly impossible to be successful at work or beyond without balancing thinking and feeling and developing skills in self-awareness, self-regulation, and interpersonal communication. This course will examine a framework of emotional competence and its application to a variety of settings, with special emphasis on abilities required to work effectively in teams. Readings will be drawn from emotional intelligence as it relates to the workplace, to parenting and public education, and to personal growth. In addition, film will be used to demonstrate these abilities and to inspire us to work toward our own development.

MANAGING CAREER TRANSITIONS
Undergraduate
We live in times of dramatic change and unprecedented challenges and opportunities. Changing demographics, new technology, a global economy, and new demands on workers will bring sweeping change to the world of work of the 1990s and beyond. Through lecture, discussion, and small group research and presentation, students will develop an understanding of how the social, political, and economic trends impact society as well their individual area of specialization.

WHO OWNS YOUR IDEAS? LEVERAGING CREATIVITY IN BUSINESS AND CULTURE
Undergraduate
The abundant supply of goods and services on the market makes the business environment challenging for any business. There are several regulations and laws to protect both the business owner and the consumer. Businesses try to differentiate their products through innovation and by effectively marketing their products with strategic branding. In order to be successful, it is imperative that business leaders understand the laws pertaining to their business, and that they rely on one or more types of intellectual property. Business leaders and managers must have an understanding of the intellectual property tools at their disposal, and how to exploit these tools when marketing and promoting their business. This class provides an introduction to business law and an overview of the various types of intellectual property that exist with an emphasis on copyrights and trademarks. Students will gain an understanding of how to use these laws to successfully promote, market, develop, and grow their business.

TEAMWORK FOR PERSONAL AND PROFESSIONAL DEVELOPMENT
Undergraduate
Teamwork is a highly valued and often misunderstood means of getting something accomplished through a collective effort. It is the most complex competence in Goleman's emotional intelligence constellation because it relies on the personalities, histories, preferences, skills and other attributes of individuals who comprise the group. This hybrid course will explore the variety of skills and abilities of individuals that contribute to effective teamwork. Our sessions will explore the learning dimension through a structured simulation and will discuss other approaches to teamwork based on readings from the text and readings drawn from the literature of organizational development and emotional intelligence.

HUMAN RESOURCES CASE STUDIES
Undergraduate
HR professionals will tell you that liking people is not a good reason to go into their field. In fact, it sometimes seems likely that HR decisions are made with anything but the human element in mind. Is business in general a field which fits into the human community or is it something which exists outside our social structures and social rules? In this course, students will examine a variety of examples of how people act at work, and how the vicissitudes of the workplace influence their lives.

BUSINESS DECISIONS: MONEY AND BANKING
Undergraduate
In this course, students will learn that the Federal Reserve System, our national bank is a privately held corporation and not part of the national government. Who controls the Fed? How well do we understand the institution that influences so much of the average American's financial security as well as the American economy through interest rates? This course will explore the history of the Federal Reserve System and its historical effects on the American and global economic systems.
FA 208
SUCCESSFUL SALES AND MARKETING MANAGEMENT FOR BUSINESS TODAY
Undergraduate
Sales Management is one of the most important jobs in business today. It is the focal point for managing customer relations, and is critical for sustaining profitability and growth. It draws on a broad spectrum of skills and offers many desirable career paths for both entry level as well as experienced workers. Sales Management techniques are applicable in a wide variety of business settings, and the basic framework and details apply in all of them. The purpose of this course is to present a practical, contemporary framework for Sales Management. It starts with basic sales analysis techniques for determining company position in the market. From there it explores modern sales techniques for facilitating the customer's buying decision. It then covers the major Sales Management job functions, such as Territory Management and Sales Training. The course concludes with a discussion of leadership and psychological skills that make for Sales Management excellence. Students will learn Sales Management via course lectures, textbook reading, Internet searches and independent research on the company they work for.

FA 209
CONSUMER BEHAVIOR INSIGHTS
Undergraduate
In this course, students will explore the processes that consumers use to make decisions. Understanding of consumer segments is developed and applied to create communication strategies. Through coursework, students demonstrate an understanding of various topics including how market intelligence is collected, market segmentation, the impact of various cultural influences on behavior, elements of persuasive communication and development of consumer-oriented strategies. Cultural norms influence receptivity to marketing communication messages. In-depth consumer knowledge of a sub-cultural segment is learned and applied as students conduct market research. Based on analysis, students develop communication objectives, positioning statements and strategies for consumer communication. The role of mass media is examined in two distinct areas. Mass media influence cultural values by reinforcing norms for consumer needs and wants. Mass media are also important means for communication of targeted advertising messages. Students are placed in decision-making roles through exercises and case analyses. Strategic skills are developed through assessment of effective means for communication with consumers based on consumer insights.

FA 210
CRIMINAL JUSTICE
Undergraduate
This course provides an overview of the American criminal justice system. Examines the history, functions, structures, processes and interactions of the three principal components of American criminal justice: police, courts, and corrections. This includes an analysis of the major components of criminal justice and their inter-relationship in the administration of justice.

FA 211
DEVELOPMENT OF PRODUCTS AND SERVICES
Undergraduate
The design of new products and services that exceed customer expectations with quality is a key competitive advantage in today's markets. The course will provide students with an overview of the Total Design Process Methodology, as well as an introduction to tools and techniques that enable the integration of marketing, design and other supply chain elements to develop successful projects. Students will apply the tools and ideas described in the course in the generation of a consumer product or service concept that will be developed throughout the term.

FA 212
CONFLICT, WORK PERFORMANCE, AND EMPOWERING EMPLOYEES
Undergraduate
The empowered employee is the successful employee. This course will provide students with real world techniques for creating high performing organizations. Effectively addressing inevitable workplace conflicts is an essential skill for any leader who wants the maximum productivity. Students will study proven interpersonal communication and negotiation concepts that can be used to create win/win solutions for any workplace conflict. The utilization of interest based conflict management and crucial conversation concepts will fundamentally alter the student's perception of conflict. In turn, they will see conflict as an opportunity. This course will also provide learners with key leadership concepts that are essential for developing strong collaborative teams.
FA 214
ENTREPRENEURIAL ACCOUNTING
Undergraduate
Entrepreneurial Accounting is a thorough coverage of financial and management accounting topics in an economically challenging business environment. Clear principles and procedures are used to demonstrate the complete accounting cycle in any type of organization: For-Profit or Non-Profit. General purpose financial statements are prepared and examined from a fundamental understanding of how for-profit and non-profit businesses operate in a dynamic and changing business marketplace. Specifically, the reach of this course will be on a global environment that is characterized by a high degree of uncertainty. We will examine a variety of accounting challenges faced by business from an international perspective. This will have important implications on the way a company becomes more competitive and thus profitable. As such each of you will be assigned a company on day one of class to manage through a series of accounting dilemmas often both inside and outside our borders. As you acquire the requisite skills (throughout the term) to meet those challenges you'll execute decisions that will change the management course of the company. It is through this individual decision making that you'll learn what works and what doesn't and why. This is not a static accounting course. Your decisions will have an impact on the direction of the company. We will also cover a series of topics that will enhance your understanding of financing techniques and options through detailed ratio-analysis. This will advance your ability to understand and seek creative financing for any ideas you might have in the future. This is essential if you have that entrepreneurial spark that just needs some financial backing and support to get started. As this is an accounting course we would expect some proficiency in basic quantitative/mathematical ability. You should also be able to use a calculator reasonably well.

FA 217
NEW SOCIAL MEDIA MARKETING AND CULTURE
Undergraduate
This course discusses how digital media technology has changed marketing and examines the strategic use of digital and social media for business on platforms such as Facebook, YouTube and Blogs. Students will learn how to integrate these new technologies in marketing campaigns to enhance branding and create product awareness. Students will be able to use new media applications and conduct a digital media analysis. This course is designed to teach how to use new media to create a marketing and communications strategy; special technology skills such as HTML or programing are not required, but internet skills are necessary. Students are encouraged to use multimedia tools in the production of final work.

FA 218
MARKET RESEARCH, CORPORATIONS, AND YOU
Undergraduate
In this class, students will learn fundamental market research concepts and methodologies, apply them to both the business world and their personal world, and become "intelligent consumers" who can more consciously navigate the relationship between those worlds. In doing so, students will also develop perspectives on market research processes and practices related to the field's three guiding participants: Market researchers, who want to use the tools at their disposal to present information they can trust and support; Businesses, which need to translate these findings into real-world decision making that helps sell consumer products and services; and Consumers, whose purchasing behavior and arguably much of their everyday existence is influenced significantly by market researchers and businesses intent on accessing their wallets. To gain these perspectives, students will learn and apply quantitative and qualitative research tools and methodologies used by businesses to identify, build, and leverage their relationships with consumers. Examples include secondary research assessment and synthesis; survey design; ethnography; and focus groups. Statistics and advanced math are not required for this course and will not be taught during the course. Building blocks for success include logical reasoning and critical thinking skills, a strong spirit of inquiry, inquisitiveness about human behavior, and analytical creativity.

FA 219
NEGOTIATIONS FOR BUSINESS SUCCESS
Undergraduate
Negotiation techniques are applicable in a wide variety of personal or business settings, and the basic framework and details apply in all of them. The purpose of this course is to emphasize business negotiation and cover those practical and contemporary techniques that work. It starts with a basic framework for negotiation and its components. From there it explores negotiation from a global perspective. This has become increasingly important as a result of the rapidly developing world economy, offshore outsourcing and the power of multinational corporations. The topic is even more vital as business negotiations, particularly on the global front, can be expected to toughen in the wake of the economic crisis that emerged in 2008. The course concludes with a discussion of personal and psychological skills for persuading and influencing others.

FA 220
DEVELOPING CONSULTING SKILLS
Undergraduate
This course will help students learn how to start and operate a consulting business enterprise. Materials will address consulting purposes, skills, and techniques. Through class discussions and exercises, readings and assignments, students will learn how to create, organize, and operate a consulting enterprise. Students will review detailed analyses of consulting proposals, contracting, client needs and expectations, needs analyses and evaluation, project planning, data collection and analysis, resistance, client relationships, change management, feedback, pricing, presentation and facilitation skills, and ethical considerations.
FA 221
ENTREPRENEURSHIP: FROM START-UP TO SUCCESS
Undergraduate
In this course, students learn the essential attributes of an entrepreneur and the stages one goes through in taking the seed of an idea and growing it into a successful business. But it also takes more than a good business plan and money to succeed - entrepreneurs must understand that all too often, the strengths that helped them be successful as a start-up become liabilities to overcome in order to take their business to the next level. This course provides practical insights into the differences between effective leadership and management by exploring the concepts of Emotional Intelligence in the workplace and how to identify and develop human capital - the lifeblood of every business. Competences: L7, H2C, H3D, FX.

FA 223
EVALUATING ACCOUNTING & FINANCE PRINCIPLES: A GLOBAL PERSPECTIVE
Undergraduate
This course introduces the basic principles and quantitative methods which embody the fields of finance and accounting. Moreover, the course demonstrates how the two disciplines complement each other to facilitate various types of sensitivity analyses in a global environment. The students will learn (1) the fundamental framework of accounting; (2), the criteria used for making finance decisions related to investing, forecasting, and planning; and (3) the financial tools applied to evaluate the financial performance of a business. Additionally, students will be given an introduction to the international financial markets, the international flow of funds and exchange and interest rate determinations. We will also discuss the challenges behind recent plans to integrate International Financial Reporting Standards (IFRS) with U.S. GAAP (Generally Accepted Accounting Principles) and why it is such a hot topic among accounting professionals today. There is no accounting or finance background required for this course. Students should have an understanding of basic algebra and ratios.

FA 224
HOMELAND SECURITY IN THE 21ST CENTURY
Undergraduate
An overview of the evolution of the Department of Homeland Security (DHS) in the U.S. and surveys the major policies, practices, concepts and challenges confronting the field. An analysis of various organizations under the authority of DHS and an assessment of the current threats from international and domestic terrorism will be examined. Examination of government, private organizations, and citizens involvement in protecting against and responding to terrorist threats.

FA 226
FUTURE AMERICAN WORKPLACE
Undergraduate
This course will examine social, political and economic trends and their potential impacts on society and individual lives. This course meets for five weeks during the December Term. Through lecture, discussion, small group work, and individual research and presentation, students will develop an understanding of how the social, political, and economic trends impact society as well as their individual World of Work area of specialization or Individual Focus Areas, and will apply those understandings to their own decision-making process.

FA 228
THE MARKETING MINDSET
Undergraduate
How customers are created and kept is the function of marketing. How marketing functions within an organization is the focus of this course. It is designed to give students an understanding of the marketing process that covers everything from advertising to warranties. Through simulation exercises, students will learn about the strategies available for marketing products and how a given strategy affects decisions. Students will also explore how advertisements have become a part of our popular arts, transmitting culture and values while creating cultural stereotypes and influencing our language.

FA 229
FINANCIAL MANAGEMENT
Undergraduate
Most people have heard about the Federal Reserve System, but few would be able to describe its structure, its purposes or the tools it uses to influence our economy. But it has a vast impact on every individual's economic health and wealth. Understanding the structure of the various investment markets, what causes them to move one way or the other, the individual types of investments and their tax implications is key to managing one's financial future.
FA 230
ONLINE PROJECT MANAGEMENT
Undergraduate
In this online class, students will learn the fundamentals of creating and managing web-related projects. Topics will include website design, graphics, fonts, colors, links, frames, HTML, and Java.

FA 231
PERSONAL FINANCIAL PLANNING
Undergraduate
This course will help students organize their financial lives by learning and implementing selected principles of accounting, finance, and management. The course will address value and risk determination by dealing specifically with the analysis of one's financial status, goal setting and planning, and decision making. Risk analysis, savings and investment principles, taxes, debt management, retirement, and estate considerations are areas which guide the financial management of individuals and businesses alike.

FA 233
BUSINESS CONTINUITY MANAGEMENT
Undergraduate
The main goal of the course is to provide students with a comprehensive overview of Business Continuity Management impacts that threaten an organization and provides a framework for building resilience with the capability for an effective response that safeguards the interests of its key stakeholders, reputation and value creating activities. The primary objective of Business Continuity Management is to allow the Executive to continue to manage business operations under adverse conditions, by the introduction of appropriate resilience strategies, recovery objectives, business continuity, operational risk management considerations and crisis management plans. The sections within subject area overview are not presented in any particular order of importance or sequence, as it may be necessary to undertake or implement sections in parallel during the development of the BCM Program.

FA 234
PROBLEMS IN MARKETING AND ADVERTISING
Undergraduate
In this course, students will examine the roles of marketing not only in the selling of products and ideas, but also as a vehicle for the dissemination of public information and socially relevant developments. Students will discuss how marketing might be viewed as a social institution and will analyze how advertising can change attitudes. Specific attention will be paid to television commercials and other forms of advertising.

FA 235
MANAGING ORGANIZATIONAL BEHAVIOR
Undergraduate
While no organization will ever achieve functional perfection (organizational nirvana), employees possessing an understanding of performance necessities will be empowered to make incremental, and possibly radical, change. This course is designed to give students a fundamental understanding of the organizational components, systems, and behaviors that must be in place to ensure optimal performance. Topics will include organizational vision, mission and structures; employee motivation; team behavior; and performance management. In addition, students will apply the tools introduced in the course to real or realistic situations.

FA 236
MARKETING YOU: COMMUNICATING YOUR PROFESSIONAL IDENTITY ON AND OFFLINE
Undergraduate
In the emerging world of cloud computing and in the context of a competitive global economy, communicating one's personal brand effectively either virtually or offline will become increasingly important. In this hybrid course, students use innovative tools and approaches to assess their unique strengths and weaknesses, passions and prior learning, and expertise and experience to identify their personal brand, plan career goals, and create or add to a career ePortfolio. Theoretical frameworks that address opportunities and risks associated with hyperconnectivity as well as concerns about managing personal, professional, and social identities are also explored.

FA 237
CONFLICT MANAGEMENT, NEGOTIATION, AND CLIENT RELATIONS
Undergraduate
This course will introduce students to a variety of strategies for conflict management and negotiation. Students will engage in a number of hands-on activities to develop skills that will benefit them in and beyond the workplace.
Marketing campaigns are being conducted by hospitals, churches, and the U.S. government. Marketing consultants help sell political candidates, public policies, even countries. And the professionals - lawyers, doctors, and dentists - are discovering marketing. You market yourself when you look for a job. Marketing is not just an activity restricted to corporations. It is all around us. Using marketing case studies, students will analyze various situations and make recommendations on appropriate marketing strategies. Each student will research a selected marketing topic of personal interest.

Fundraising is very competitive among nonprofit organizations, so the ability to target the right foundations and to write proposals that sell your program or organization is important. This course will teach the basics of good proposal writing. It will also explore the tools and resources available to organizations trying to identify which foundations can best respond to their funding needs. Students will learn how to use proposal writing to market programs to potential funders and to increase the chances that their proposals will be read and approved for funding.

One of the realities of the business world in which we find ourselves is the speed and frequency with which strategies, markets, products, programs, leadership, and even entire companies change. This course explores the field of organization development, the discipline that applies behavioral science knowledge and practices to help organizations achieve greater effectiveness through the change and development process. Using case studies, simulations, role plays, and individual work experiences, students will examine how and why organizations change and develop and the implications and consequences of various strategies and activities directed toward that effort. Topics include the nature of planned change, change management, transformational change, organization diagnosis, intervention design, and human process interventions. Students will also explore the relationship between organization and personal change and strategies and methods designed to effectively manage that relationship.

This course is designed for participants to examine how organizations can motivate their employees to become fully engaged and committed to their workplace. Apart from the benefit and moral value of an altruistic approach to treating employees and colleagues with human dignity, research has shown that well motivated employees are more productive and creative.

The purpose of this course is to understand the nature of groups, the ways in which small groups come together and behave, and the principles that govern the behavior of small groups. The class will combine experiential learning with reading and discussions about the theories of small group development and group dynamics. Course content will include: 1) the nature of small groups and group dynamics; 2) feedback and good interaction; 3) the process of group development, i.e. forming, storming, norming, performing, adjourning; 4) factors that interfere with optimal group performance; 5) leadership and leader effectiveness; 6) problem solving techniques. Teaching methods include "ice breaker" exercises, self-assessment forms, such as LEAD and FIRO B, some lecture, discussions and experiential learning.

This course will introduce a method of using interviews to assess the characteristics of employees in order to make more strategic choices in selection, training and development. In addition to learning how to conduct behavioral interviews, participants will become familiar with the structure of competence models used to guide assessment. Students will work on gaining an understanding of the various applications of interview assessment and be able to apply one specific model of behavioral interviewing. You may only register for one competence.
FA 246
DIVERSITY IN THE WORKPLACE
Undergraduate
The purpose of this course is to heighten the students' awareness of diversity. This may take the form of critical self-assessment of one's knowledge of diversity and/or identifying prejudices, what they are and how they began. Through group discussions, analyzing case studies and lectures, students will be provided with opportunities to gain a deeper understanding of their own prejudices and to develop a rationale for valuing human differences in their respective lives.

FA 247
THINKING AND WRITING ABOUT WORK
Undergraduate
At work, we often learn how to use another language. That is, we learn to speak about technology, or about marketing, finance, or human resources with a specific vocabulary and referring to particular ideas. However, we also bring our own unique perspectives to the workplace. Our individual approaches to problem solving and to human relations at work define our contributions. In this course, students will use short story and journal writing to define and assess their contributions to the workplace. Students will produce written accounts of their lives at work. Students will assess their work not only for the clarity of the stories told, but also for elements which contribute to good writing. Looking at the literature of work will help students see their own work in the context of this literary genre.

FA 248
HISTORY OF AMERICAN BUSINESS
Undergraduate
American business and the free enterprise system developed together with the nation itself. All three phenomena have their roots in the knowledge, skills and values that the earliest Europeans brought to this country. This course provides an overall view of the relationship between American history and culture, the development of its central business system, and contemporary implications for business environments.

FA 251
CORPORATE TRAINING DELIVERY: PLANNING AND EVALUATION
Undergraduate
In this course, students will delve deeply into corporate training programs, learning strategies for identifying specific training needs and ways to target training to appropriate organizational levels. This is especially important in firms undergoing significant structural change. Next, students gain knowledge of the way to create effective training programs to directly address organizational and role-based needs. The culmination of competence is the development of expertise in testing, assessing, and evaluating training outcomes. Students work in groups, reviewing prize-winning video and web training programs.

FA 252
INTRODUCTION TO ORGANIZATIONAL LEARNING: PRINCIPLES AND PRACTICES
Undergraduate
This course provides an overview of the concept of organizational learning and an opportunity to gain hands-on experience with two communication practices related to it: collaborative learning and storytelling. The class will be highly experiential and focused on immediate application of learning. It will consist of in-class activities in groups of two and larger and will draw heavily on students' workplace experiences and environments. Collaborative learning results when two or more people help each other create or enhance their knowledge relative to specific challenges or opportunities. Its goal is to stimulate new insights and support changes in assumptions, beliefs and/or behaviors. The ancient oral tradition of storytelling is a powerful practice used in virtually all societies to pass on a tribe's culture, values, and the knowledge that permitted survival. It's no different in today's organizations. Stories can ground people in the organization's culture, capture and transmit knowledge, and promote change.

FA 253
CONTRACT LEARNING
Undergraduate
SNL courses are designed specifically to focus on the competencies of the SNL curriculum. Courses are competence-based, and revolve around particular content. Students who are interested in a specific content area might not always find these interests addressed through SNL courses. Furthermore, students, particularly those nearing the completion of the SNL BA degree, find that they have some competencies which are not addressed by SNL courses in the time frame necessary. Contract Learning is designed to address the needs of these students. In this course, students can address a variety of competencies from the SNL competence framework, and can focus their work around content of their choice. By means of detailed and comprehensive contracts, learners will work with faculty to develop materials addressing their chosen competencies. Students will work with David Kolb's Learning Styles Inventory first introduced in the Learning Assessment Seminar, to revisit their preferred methods of discovering and absorbing information. In class discussions, learners will also analyze their topics, and their competencies to develop ways of expanding their knowledge and meeting the requirements of the competence statements.
FA 254
STRATEGIC MANAGEMENT
Undergraduate
This is a ten week course on strategic management in organizations. Students will learn the basic concepts of strategic formulation including understanding the competitive forces, competitive advantage, strategic decisions, and the impact of the internet on strategy. Next students will look at how strategy can be applied to business, governmental, societal and global issues. Students may focus on developing a strategy for an organization for the F-X competence, or look at strategy from a governmental or societal prospective with the H-1-I competence, or analyze the strategy of a country or global issue for the H5 competence.

FA 256
DESIGNING TRAINING FOR ADULTS
Undergraduate
Everyone has had the delightful experience of learning by accident - of being surprised by insights and skills that emerge from experience. But accidental learning can be time consuming and therefore costly to organizations and individuals in organizations that have specific learning goals to meet. Engaging and effective learning in organizational settings is most often the product of systematic analysis and planning. This course will prepare participants to design and deliver training in a variety of adult learning settings. Principles of adult learning theory and best practices in adult learning will be examined to derive criteria for sponsoring learning experiences of adults. In addition, a five stage training design protocol (analysis, design, development implementation, evaluation) will provide a context for participants to address the following questions and understand their implications: 1) Who is the audience and what is the training context? 2) What is to be learned and why? 3) What methods are best suited to the target learning outcomes? 4) What resources are available and appropriate to the learning outcomes and methods?

FA 259
INTERNATIONAL MARKETING
Undergraduate
This course concerns marketing in a global context. We will understand and examine the difficult problems facing many companies from U.S. and international perspectives. This course will introduce key concepts in marketing, and it will use a variety of frameworks to steer your way through many of today's critical marketing issues.

FA 260
ESSENTIALS OF PROJECT MANAGEMENT
Undergraduate
This course provides an overview of the fundamentals of Project Management for non-Project Managers. It introduces the four phases of the project management process: Initiating, Planning, Managing, and Closing; the role of the Project Manager; tools, techniques and deliverables associated with successful project management; and troubleshooting techniques.

FA 262
CHANGING WORLDS OF WORK IN AN ECONOMIC DOWNTURN
Undergraduate
In an economic downturn, how do we navigate the changing worlds of work? This class will investigate current theories and models as well as offer students first hand experience observing and analyzing changes in the organization of work. We will approach issues concerning work from a number of perspectives--history, gender, technology, ethics, environmental, and global. As a way to explore the multiple issues related to the reorganization of work, ethics, culture, and technology, we will read texts, analyze websites, and view films to assist you in class assignments and projects toward fulfilling course competencies. You will also learn several qualitative research methods and approaches by becoming an apprentice and using them first hand. The culmination of our individual and collective work will be a public educational event, paralleling Trump's "Apprentice" show. First, each student will investigate and study issues of work/business by conducting an investigation of a workplace of your choice. Then, as a team, each group will devise a vision, plan, marketing, and publicity educational campaign about one aspect of work reform.

FA 267
TAKING CONTROL: MANAGING THROUGH EXPERIENCE
Undergraduate
The purpose of this course is to help students develop skills in organization building--skills that they can use to make good decisions in the business environment as well as in personal life. Students learn to take control of their own decision-making processes, rather than resorting to perceiving their experiences passively as the result of "chance" or luck. The course focuses on the process of building an organization through human resources, but the skills taught and learned in the course are helpful to all members of the business community in their personal and professional lives.
FA 268
HUMAN DIMENSIONS OF PROJECT MANAGEMENT
Undergraduate
An understanding and an ability to apply the basic disciplines of project management can boost your success in work and personal endeavors. Project management as a discipline provides the tools for accomplishing complex objectives - ones that may require different resources applied over extended periods of time. However, there is a danger in following a set of empty procedures, in hopes that adherence to guidelines can substitute for content expertise, common sense, and an understanding of human motivation. There is considerable evidence that projects fail for human and organizational reasons, not mechanical or procedural ones. The key ingredient in project success is this personal dimension, and that is the main theme for our course. We will use the mechanics of the project management process as the platform for exploring how to recognize and deal with the real underlying issues in managing projects - recognizing and managing people and organizational issues.

FA 269
ENTREPRENEURSHIP: HOW TO FIND AND FUND YOUR DREAM
Undergraduate
Did you know that 90% of new restaurants are doomed to fail? Have you always wanted to be your own boss? Are you presently conducting a small business from your garage that you'd like to make bigger and more profitable? Who makes a great entrepreneur? Are businesses easier to manage in the age of technology? In this course, Students will learn how to identify an appropriate small business for their talents and time restrictions. Learners will also consider methods of financing their dream work lives, and review the pitfalls awaiting new businesses in today's economic climate. Students need not have a business in mind, but must be willing to consider how they might go about putting together a plan for a successful venture. Ideas about the definition of business in modern society, of entrepreneurship, about the psychological make up of the successful small business owner, and about the long term view for small businesses will also be covered.

FA 270
STARTING UP AND RUNNING YOUR OWN BUSINESS
Undergraduate
This course will help students learn how to start and operate an independent business enterprise. We will address entrepreneurship, defining your markets, accounting basics, business plans, financing, establishing the business, hiring employees, business equipment, software, and marketing. Through readings, discussion, and home assignments, students will learn how to increase the probability of reaching their business goals while minimizing risks and costs. By applying management, financial, and software concepts and practices, students will have the knowledge to start and run a new business.

FA 274
APPLYING ORGANIZATIONAL BEHAVIOR TO TODAY'S BUSINESS ENVIRONMENT
Undergraduate
A conceptual and practical look at the discipline, nature and scope of organizational behavior and its importance in today's global and diverse business environment. This course is designed with a management focus that will offer knowledge of and applications, challenges and opportunities for diverse viewpoints, teamwork, group dynamics and problem solving in organizations in order to enhance and achieve productivity, performance and satisfaction in the workplace.

FA 276
MANAGING AN INVESTMENT PORTFOLIO
Undergraduate
This course will discuss how some top money managers build diversified investment portfolios (past performance is no guarantee of future performance), as well as the Nobel Prize winning theory behind their decisions. This will not be a "how to invest" type of course but rather a forum for ideas to consider. It will touch upon other important subjects that an informed investor should be aware of, such as: load vs. no-load mutual funds, active investment managers vs. passive indexes, the money management industry, behavioral finance, market efficiency, and valuation techniques. This class is meant to be accessible to all students, so there are no prerequisites; only an interest in the subject is required. Knowledge of financial math or spreadsheets is not needed, though examples of both will be demonstrated in class.

FA 278
HIGH PERFORMANCE WORK TEAMS
Undergraduate
Today's business environment frequently requires groups of individuals to work together as a team, but usually without the training to understand what this really means. This course focuses on the skills needed to develop a business work group into a High Performance Team. It details the definition and requirements for good team development and concentrates on facilitation and negotiation techniques for team meetings, as well as on the communication and conflict resolution between team members. Since the purpose of most teams is to resolve problems, a scientific approach to problem-solving is also introduced. This is a highly interactive course which actively involves the students, encouraging the sharing of practical ideas and techniques. The course has sufficient flexibility to allow for the exploration and analysis of many typical team situations that are of interest to the students: what is discussed during class can be applied the next day at work.
FA 279 
WRITING FOR MANAGEMENT AND BUSINESS 
Undergraduate
Developed to serve in the creation of compelling business communications designed to be clearly understood, this course instructs corporate writing that communicates with certainty and conviction. Every type of corporate writing is covered, ranging from resumes and cover letters, through business reports, to the creation of short and long proposals, good-news and bad-news letters, memorandums, direct requests, and other persuasive business expression. Special attention is paid to the technique of unearthing valid and reliable research supported with modern document design.

FA 281 
BUSINESS WRITING 
Undergraduate
Business Writing provides students with an opportunity to develop concise, articulate, and actionable written business documents. Students will learn to plan, organize and write effective business documents such as business letters, memoranda, e-mail, business reports, abstracts, executive summaries, cover letters, and resumes. In addition, students will learn to examine and write to a specific audience, to select the most effective wording and phrasing, to analyze and revise written works (either their own, or the work of others), to identify logical fallacies, to write within a specific context, and to unearth valid and reliable research.

FA 283 
A CRISIS IN CREDIT: READING AND INTERPRETING FINANCIAL STATEMENTS 
Undergraduate
The record collapses of first home builders, such as Levitt and Sons, WCI Communities, and Matrix Development Corp., then financial giants Lehman, Fannie Mae, Freddie Mac, Wachovia, and Merrill Lynch beg the question, how did we get here? More importantly, how do we avoid repeating this "crisis" in the future? This course will examine these questions in light of corporate balance sheets and income statements. Students will learn to read and interpret financial statements. In addition to the technical details related to financial reporting, the course will examine the political and social implications of the U.S. Treasury addressing the problems of the housing and credit sectors. This will involve a historical review of the roles of government and the private sector in the development of financial systems in the United States.

FA 286 
THE ART OF THE INTERVIEW 
Undergraduate
An interview is just a conversation with a purpose and in this class we will look at all kinds of interviews: entertainment, investigatory, forensic, structured and freeform, research, medical, diagnostic, job, group, etc. We will examine some venerable sources: The Proust Questionnaire, Chicago's own Studs Terkel, and a variety of well-known current practitioners of the art. The class will look at oral arguments before the US Supreme Court, which are just interviews by the members of the court with presenting legal counsel. We will also briefly evaluate the use of interrogation and torture to gather intelligence. Students should expect to perform, document and analyze a variety of simple interviews in this class: simple job interviews, interviews to gather family history, patterned and freeform interviews, questionnaires, etc. Students will also analyze the techniques used in a variety interviews, using audio streamed recordings and transcripts.

FA 288 
MARKETING FOR THE SOCIAL GOOD 
Undergraduate
This is a ten week course on the nonprofit and public organizational issue of social marketing. Generally social marketing techniques are used to influence individuals, or groups to change their behavior in order to improve a social good such as: individual health, the environment, and the community. Students will develop an appreciation for the principles of social marketing and will be taught the techniques for conducting social marketing programs. Students will also learn how to develop social marketing plans and meaningful promotions, including utilizing imagery/art to understand and create advertisements.

FA 289 
BUSINESS WRITING AND INTERNET COMMUNICATION 
Undergraduate
E-mail has flooded the information highway allowing us to communicate on an immediate basis. But has this immediacy caused us to drop our guard so that our communications are not as effective? This course will give students a solid foundation in business writing so all communications - business-to-business, business-to-consumers, in-house memos to instant messages - can be clear and concise. Students will also review written etiquette and explore the impressions created by the spoken word compared with the written word.
FA 290  
**USING FINANCIAL DATA**  
*Undergraduate*

In this course, students will learn practical applications of the fundamentals for making financial and investment decisions. Students will work with cases and problems drawn from business experience. They will work with economic and philosophical theory, as well as economic data, and learn to understand such concepts as supply and demand, competition and monopoly, and the money supply. Students will become familiar with financial information, learn how to assess financial risks and rewards, and become conversant with the terms, symbols, and abbreviations that are used in current business publications.

FA 291  
**THE BUSINESS DOCUMENT: FROM INCEPTION TO EXECUTION**  
*Undergraduate*

This course reviews the process of creating, planning, developing and analyzing a business document. Students will learn how to structure, write and control such demanding projects to relate information, interpret data and recommend solutions to business problems. Students are expected to possess writing skills that enable concentration to be placed on developing a clear, concise and consistent writing style in complex and sophisticated documents. Class discussions will cover pros and cons of using certain document formats and what, in turn, makes them effective. Upon completion, students are expected to possess the necessary skills and confidence to develop sophisticated, highly professional business documents.

FA 292  
**LEADING OUT LOUD: PUBLIC SPEAKING FOR BUSINESS AND LIFE**  
*Undergraduate*

One of the most sought-after business skills is public speaking ability. We all have equal access to high-technology; high-touch skills give us the competitive advantage. Through discussions, exercises and presentations, students will have many opportunities to build their skills in both casual and formal speech. Each student will prepare presentations in a variety of styles, including impromptu, persuasive and informative. Through regular feedback from the instructor and peers, students will build their presentation skills in organization, topic development, use of visuals and delivery. Students will be video-taped regularly so that they can chart their progress and participate in self-assessment.

FA 293  
**EFFECTIVE PUBLIC SPEAKING**  
*Undergraduate*

This is an introductory course that assumes no previous experience on the student's part. The class seeks to familiarize you with some basic principles of effective and ethical public speaking, to give you experience in enacting those principles through practice, and to instill a sense of the importance of public communication in shaping our lives. Through class feedback and videotapes of your own speeches as well as critiques of other communicators, you will discover how personal style, appearance and body language impacts the message.

FA 294  
**DESIGNING BUSINESS STRATEGIES FOR B-WEB MODELS**  
*Undergraduate*

Thriving in the internet economy requires rapid adaptation, technological excellence and motivated personnel. Using a detailed case study, students will learn strategies for optimal organizational development in this new world economy. We will investigate its various historical bases, the elements of its uniqueness, and analyze several theoretical models of structure and process in organizational function.

FA 295  
**CONTEMPORARY LEGAL ISSUES**  
*Undergraduate*

This course will examine basic ideas in the practice of law. It will also examine contemporary legal issues in the world of work. Students will examine the structures of the legal community and the impact it has on how business is conducted, and on the economic system in which we live and work. Through readings, discussion, and group projects, students will investigate current issues which have evolved as the practice of law has become a big business itself. Students will develop and evaluate plans individually or through group interaction for applying new insights to effecting change in their own working environments. May be taken for only one competence.
FA 296
INTRODUCTION TO FINANCIAL SYSTEMS
Undergraduate
Remember when things were simple? It was a long, long time ago. These days, issues in finance are complex to the point that many of us feel excluded. How can we make and use money if we don't understand how it works? How can we educate ourselves enough? In this course, students will examine how money works in contemporary society. Furthermore, students will discuss how developing technology has changed the flow and focus of money matters in our time.

FA 297
COMMUNICATING IN A GLOBAL BUSINESS ENVIRONMENT
Undergraduate
Effective and efficient communication is a challenge in our own culture, but this is compounded when we face communicating in a culture other than our own. This course will begin by examining and practicing communication formats that are accepted in the Western world. Following this we will examine the historical background and sample presentations of leaders other than those from the United States and Europe. In addition, learners will have opportunity to format their own presentations using those of the world's great leaders as models. Learners will be encouraged to incorporate their own professional situation as a place to begin experimenting with their newly acquired knowledge.

FA 300
PROJECT MANAGEMENT
Undergraduate
Project Management is a business concept which has received a great deal of attention over the last few years. Business managers are discovering that the complexity of human and technological systems forces workers to organize, prepare, and monitor project development in a way which was not necessary in simpler times. In this course, students will discuss and discover methods of project organization and execution which will help them achieve efficacy and success in the workplace. This course will cover concepts in describing project goals, setting priorities, identifying needs, and designing realistic time lines. Students will learn how to execute successful projects from start to finish.

FA 303
INDEPENDENT ADVANCED PROJECT
Undergraduate
This required course is a problem-solving experience which represents the culmination of an SNL student's learning in a specific area. Students, guided by their academic committee, design and execute an independent project which demonstrates the integration of theory and practice, and the ability to pursue and document avenues of inquiry with excellence. * Successful completion of Research Seminar is required before registration.

LL 300 is a prerequisite for this class.

FA 304
ADVANCED PROJECT COURSE
Undergraduate
The main purpose of this course is to guide you through the various steps involved in designing and carrying out an Advanced Project (AP) on a subject that is related to your particular focus Area (FA). Whether you want to address a practical problem or a theoretical question, in this course you will be guided through the process of investigating a problem or issue in depth, and establishing clear links between the definition of the problem or issue, discussion of conceptual issues, methods of investigations, analysis of findings, and practical applications. Successful completion of the Advanced Project will satisfy the F-11 and F-12 competences.

LL 300 is a prerequisite for this class.

FA 309
STARTING A SUCCESSFUL BUSINESS
Undergraduate
In this class, you will learn evaluation techniques for determining the business feasibility of a new idea, methods of performing a market analysis with special focus on spotting marketing and demographic trends. You will learn the details associated with forming and managing a functional new business with the ultimate goal of this course being the writing of a 10-page business plan for a new product or service idea. It is strongly recommended but not required that you have taken "Understanding Financial Statements" if you do not already have an accounting or financial background.
WOMEN IN BUSINESS AND LEADERSHIP
Undergraduate
Women's work is never done. Not only are women mothers and wives, but these days the expectation is that women will take on leadership roles outside the home as well. What makes a woman a leader? How did the workplace differ when women were not corporate leaders? Who are today's prominent female leaders and how are they shaping our future? In this course, learners will study the lives and contributions of various important women from business, politics, and social action. Students will assess equality in management and leadership, the psychological make up of the woman leader, and the ways in which women's contributions to leadership differ from men's. Furthermore, the class will endeavor to define leadership, its consequences, and its personal ramifications. Students should expect to read extensively about the lives and characteristics of contemporary women who have surfaced in leadership roles. Learners will also identify women leaders in their own workplaces and communities and assess their involvement in the corporation and/or general public. Competences: A3X, FX, H3X, H4.

BUILDING QUALITY INTO PROJECT MANAGEMENT
Undergraduate
Today's business environment is time-based and cost-conscious with expectations for quality and excellence. An understanding of project management processes and developing the essential skills and tools can optimize time, cost and quality. This course will provide an introduction to the theories and concepts of project management and how those theories and concepts apply to today's business practices.

FINANCIAL LITERACY
Undergraduate
The purpose of this class is to learn the language of business and the "grammar rules" required to apply this language to different scenarios and our own lives. We will discover who the audience for financial information is and develop the ability to see how financial activities affect and are relevant to this audience. We will explore the topic of financial literacy both from the global and the personal perspective. Big corporations, small businesses and we the individual have something in common. All must ask the question: How do we control, organize and communicate financial situations and information in a way that is meaningful to us and that will help accomplish long term goals. Simply having money does not guarantee that we know how to manage it or that resources are being used effectively or appropriately to realize our goals. In this class, we will first establish a common framework and terminology for financial literacy and then explore questions such as "Why is financial planning important?"; "What are common budgeting systems and tools?"; "How can a budget or financial plan be used to help identify and achieve monetary goals?"; "Why do such plans often fail?" By considering the economy, assessing our own individual financial situations, by applying financial concepts learned to real world situations, students should be able to apply skills learned within both a personal and global context.

PROCESS MANAGEMENT AND DESIGN
Undergraduate
From erecting an architectural monument to developing training materials to planning an international seminar, it's all process. Process Management and Design begins with an examination of the origins of work systems and process design, ranging from the principles of Frederick Taylor to the philosophies of Deming, Duran, and Cosby. The course of study then moves into an unfettered exploration of process within the context of organizations and leadership, as well as an experiential consideration of the manner in which process applies in non-traditional contexts. Class participants will learn to create, define, analyze and classify processes; develop and apply process measures, and determine customer and consumer needs and expectations. Other topics covered include process re-engineering, continuous process improvement, process benchmarking, and systems thinking. Class participants are encouraged to engage in this learning experience with fresh perspectives about process, and its potential meaning in unconventional settings.

THE BUSINESS OF RETAIL
Undergraduate
The famous business theorist Peter Drucker has called American culture a unique combination of materialism and idealism. These qualities have combined to make America a consumer based society unlike any other culture. What is it about American stores and the American shopper that makes both so unique? Super stores, the consolidation of regional stores into multinational conglomerates, online shopping, the emergence of an-ever-more savvy and demanding consumer, economic cycles, international monetary values and the demographics of American shoppers have combined to transform the experience of shopping in the last twenty years. How do stores entice consumers to buy? That question will be answered in this class. This class will look at a variety of store environments and will feature student-based discussion of weekly store visits. Using the science of shopping (as defined by Paco Underhill and others) the class will visit and evaluate, time and scheduling permitting, a wide range of retail options.
FA 315
CORPORATE COMMUNICATIONS: BEYOND THE BUZZWORDS OF BUSINESS
Undergraduate
A successful business leader's actions are underscored by efficient and effective skills in communication. This course will position you to move forward with the respect of others and a heightened sense of self worth. We will focus on looking at communications in contemporary business contexts; determining your skill in presentation/platform applications, and ways to advance; and effectively demonstrating your increased understanding and application level.

FA 316
MAKING BUDGETS: FINANCIAL AND ETHICAL INTERPRETATIONS
Undergraduate
This course examines the process and responsibilities of the manager in the budget formation, interpretation and implementation process. Students will learn to read and interpret financial budgets and understand the practical and ethical implications that budget implementation has on managers and workers. The class consists of case studies with analytical problem solving, introductory lectures on basic financial concepts and theoretical frameworks. Students will develop and analyze financial budgets, participate in discussions of current ethical implications of budget implementations, and write reflective papers addressing their competencies.

FA 317
CAREER VS CALLING: LIFE IS ALL ABOUT THE HYPHEN
Undergraduate
When we die, our tombstones record our birth date and our death date, with a hyphen in between. How we live our lives is represented by that hyphen. This course is intended to help students identify what they want their hyphen to represent and how that applies to their career and life choices. Special attention is given to methods of identifying personal calling and for achieving personal fulfillment goals. Students also examine the views of philosophers, spiritual leaders, and artists, both historical and contemporary. Students create their own mission statement for work and life. A primary objective of the course is to expose students to resources that can be used in their own self-discovery process. Multi-media activities include small and large group discussions and presentations, research, and report writing, video and audiotapes. Students are encouraged to use the Internet in their research.

FA 318
UNDERSTANDING FINANCIAL STATEMENTS
Undergraduate
Business managers as well as investors must have a basic understanding of financial statements as not only a management tool but also as a way of communicating the financial and operational well-being of a company. This course teaches students the essential elements of financial statements, their interpretation and their impact on investors and society. This is a particularly important topic and skill in light of the recent corporate financial reporting scandals plaguing Wall Street and the nation.

FA 319
THE VALUE OF STATISTICS
Undergraduate
In this class, students will look at how numbers add up to give us reasons to be for or against ideas. This course will center on how to create, decode, and analyze statistics. Some knowledge of mathematics is essential to understanding statistics so prior completion of the Quantitative Reasoning course or it's equivalent would be very beneficial to having success in this class.

FA 320
BUILDING AN INVESTMENT MODEL THAT FLIES
Undergraduate
Investors range in age from newborn babies to centenarians. Population as a whole can be segmented according to various attributes, some of which have a decided influence on one's spending and investment proclivities. Identifying those attributes is essential in determining the appropriate types of investments for the individual investor. Understanding the role of the economic, interest rate, and inflation cycle are also critical to putting together an efficient, effective, and suitable investment portfolio. Prerequisite: Completion of Risk vs. Reward in Investing. Building on what was learned in the prerequisite class, we will examine the segments of the population and what causes them to make their investment decisions. We will then put together sample portfolios for hypothetical investors for different points in the economic cycle. This course can be taken for only one competence.
FA 321
BUSINESS AND PROFESSIONAL WRITING
Undergraduate
As contemporary American business continues to move toward internet- and web-based communication, and with increasing demands on business managers to communicate key messages quickly and effectively, the ability to write clearly and effectively becomes an increasingly valuable skill. Business and Professional Writing offers students practical experience in developing cogent, concise and articulate written products. Students will learn to plan, organize and write effective business documents such as, business letters, memoranda, E-mail, business reports, abstracts, executive summaries, cover letters, and resumes. In addition, students will learn to examine and write to a specific audience, to select the most effective wording and phrasing, to analyze and revise written works (either their own, or the work of others), to identify logical fallacies, to write within a specific context, and to work collaboratively in creation and modification of business and professional written documents.

FA 322
SINO-AMERICAN RELATIONS: A BUSINESS PERSPECTIVE
Undergraduate
In this class, students will analyze contemporary Sino-American relations from a cross-cultural perspective, with an emphasis on developing an understanding of how particular issues impact the business climate through the interplay of macroeconomics and geopolitics. Additionally, students in this class will identify and analyze those specific issues in contemporary Sino-American relations that have the greatest potential to impact the present and future operations.

FA 323
SURVIVING RAPID BUSINESS GROWTH
Undergraduate
A successful new business often experiences tremendous revenue, personnel and financial growth. Ineffective management of this growth with all of its opportunities as well as pitfalls can put a successful business out of business. This course covers the areas of concern, shows methods of monitoring financial and operational information to highlight potential problem areas before they become major problems and then shows methods of effectively dealing with these challenges.

FA 324
INTERVIEWING FOR EMPLOYEE POTENTIAL
Undergraduate
What are the obligations of the workplace to the worker and vice versa? Does the individual worker matter more or does the organization? How can the organization honor both words in "human capital" and be fiscally responsible? The ways that organizations approach selection, hiring, and training express their answers to these questions, intended or not. This course will examine ways to assess the competence and potential of individuals and to create avenues for individual development in the context of organizational effectiveness. Participants will learn skills of behavioral interviewing, interpreting interview data, and developmental feedback and will devise strategies for the ethical use of assessment results.

FA 325
CONNECTING THOUGHT AND BEHAVIOR IN THE WORKPLACE, THE COMMUNITY, AND IN YOUR PERSONAL LIFE
Undergraduate
This course introduces students to practical concepts of Cognitive Behavioral Psychology and offers them new perspectives on how to observe and understand the interaction between thoughts and behaviors in their daily lives. Students will evaluate the tendencies and correlations between what a person "thinks" and what that person "does" through observation and interpretation of their own experiences. A report will be generated for each competence that will include an analysis of the student's own cognitive behavioral tendencies and a plan for personal development.

FA 326
GENDER, SEX AND LATER LIFE
Undergraduate
This course will compare the aging experiences of men and women in later life and the relevancy of gender roles to the aging process across ethnic, racial and cultural diversity differences. Although this course is sociological, we will examine the physiological/psychological differences and similarities between older adult men and women. Specific topics of analysis will include gender, politics and power, the gender gap in longevity, why aging women have a longer life expectancy than men, but experience more chronic illnesses and report less physical and mental well-being in advanced ages. This course will explore society's attitudes and myths about sexuality in later life, as well as presenting realistic information on ongoing research into the physiological and emotional changes affecting sexuality and intimacy.
FA 327
TECHNIQUES OF BUSINESS REPORT WRITING
Undergraduate
Most training programs are created as the result of a report, and reports also document the effect of the training on the trainees. Either way, the report is a legitimate component of all training programs. Learn the procedures used in creating detailed reports that can be implemented in your workplace. Examine the “voice” of a business report, and learn ways to turn reports into RFPs for further programs. A five-week, close examination of the steps involved in creating detailed reports for business is encountered in this class. This course can be taken for only one competence.

FA 328
APPRECIATIVE INQUIRY, POSITIVE ACTION: UNDERSTANDING THE POWER OF STORY TELLING
Undergraduate
Traditional approaches to organizational change place the practitioner (manager, consultant, or other change agent) in the role of diagnostician or problem-solver. This approach is based on the concept that organizations are like machines: when they break down, the expert simply needs to find the source of the problem and repair it. Organizational developers have discovered that organizations rarely act as predictably as machines, and repairs led by experts rarely have lasting impact. In the early 1980's a new model for organizational development began to emerge in response to the frustration with traditional approaches. Appreciative Inquiry, founded by David Cooperrider and colleagues provides a new theoretical and practical approach to change that engages the positive energy of the organization. In this course, you will learn how Appreciative Inquiry evolved in the relatively new field of organizational development, understand its core concepts and learn how to use the process to unleash the power of positive change in your organization. This course is excellent for anyone working in a management, leadership, consulting or supportive role in an organization (or who aspires to).

FA 329
DEVELOPING AND MANAGING A MARKETING COMMUNICATIONS PROGRAM
Undergraduate
This course will provide the student with the understanding of the principles of marketing communication, the marking communication vehicles most commonly employed by corporations in America and Western Europe, and the situations in which each marketing communication vehicle may be most effectively used in an ethical manner. The students will learn both the principles of marketing communication and how to target a market demographically, geographically, and psychographically, to ensure that the marketing communication strategy developed and program executed are consistent with the "best in class" principles of marketing communications.

FA 330
FUNDAMENTALS OF GLOBAL MARKETING
Undergraduate
This course will help students to understand the basic concepts and practices necessary to market products and services in the global marketplace. The major outcomes of this learning experience will be: identifying activities, principles, and challenges of the marketing process, as applied domestically and internationally; understanding market segmentation, target marketing, and market research and their applications; applying the "4 Ps" of marketing - product, price, promotion, and place/distribution - to domestic and global business; and becoming familiar with key issues and international situations encountered when marketing products and services globally.

FA 331
COMMUNICATION, PRESENTATIONS, PUBLIC SPEAKING
Undergraduate
According to The Book of Lists, fear of speaking in public ranks ahead of fear of dying and disease. While it might not be this extreme for everyone, this course addresses "speaker-fear" and provides learners with both theory and practical experience in the art and science of getting their point across clearly. We will examine personal learning styles and social styles and also work on developing presentations and actually delivering the message. Ice breakers, difficult situations, pacing and diction, openings and closings, and other tools and techniques are explored.

FA 332
INVESTMENTS AND THE ECONOMY: A WELL-OILED MACHINE
Undergraduate
In this class, we will review major economic theories and determine what factors were in play when the theories were conceived, and how each has been used in the 20th century (and thus far in the 21st) to structure investment decisions. We will determine the various economic variables, as well as tax consequences, and how they impact choices we make for our investment portfolios. This course can be taken for only one competence.
FA 333  
SELF, WORK AND FAMILY: CHALLENGES AND CHOICES IN A CHANGING WORLD  
Undergraduate  
This course is designed for everyone who has experienced the challenge of managing a multi-faceted life in a rapidly changing world. It begins with an analysis of the definitions of “self,” “work,” and “family” across cultures, and examines recent research into generational theory to identify some of the psychological and historical antecedents of contemporary attitudes about these concepts. We then explore the dynamics among these concepts, including conflict, balance, integration, and boundary setting, paying particular attention to the impacts of technological change and the growing number of women in the workforce. Finally, we examine various models for adult development and engage in activities that allow for each student to articulate his or her personal priorities and to develop life and work strategies that enhance workplace performance, productivity, and personal fulfillment.

FA 334  
FINDING BUSINESS IDEAS THAT WILL WIN  
Undergraduate  
Not all new ideas are good ones. This course teaches students evaluation techniques for determining the business feasibility of a new idea, with the ultimate goal being the writing of a feasibility study for a new product or service idea. This course can be taken for only one competence.

FA 335  
FREE TRADE, FREE MARKETS: THE WORLD TRADING BLOCKS  
Undergraduate  
This course addresses how large financial institutions organize and control the flow of international trade. In this course, students will study the organizational set up of NAFTA, The European Union, and the smaller Asian trade associations. The World Trade Organization will also be studied and analyzed. Students will explore the various roles of regional exchanges for larger trading blocks. This course will be helpful for all students working in or considering careers in finance, in commercial analysis, or in international business.

FA 336  
DESIGNING PROFESSIONAL TRAINING PROGRAMS  
Undergraduate  
Training is one thing; training that’s really used is the thing. This course prepares the student to identify and select design elements that vary training rhythm in order to maintain interest. Next, the training program content -video clips, role-playing exercises, quizzes, and round-table discussion-fosters behavioral change in those being trained. This course can be taken for only one competence.

FA 337  
FOCUSING ON ASSESSMENT OF TRAINING NEEDS  
Undergraduate  
To put it simply: who needs training and why? Needs Assessment is the third key step in the creation of business training programs. It unearthes areas for training and identifies groups who should receive it. A five-week, close examination to help recognize and prioritize essential information.

FA 338  
EVALUATION AND VALIDITY OF TRAINING RESULTS  
Undergraduate  
Discover how your training benefits both student and the company. Sophisticated evaluation techniques currently in use by the most respected training organizations are analyzed and tested in this class. In addition, we examine ways to support your own training designs with proof of their validity and reliability. This course can be taken for only one competence.

FA 339  
PROFESSIONAL BUSINESS WRITING  
Undergraduate  
This course develops writing skills used in a business setting. Effective writing skills are directly related to a person's ability to successfully maintain and grow in a career. And as our world continues to shrink globally, being able to produce clearly written communication across all cultures is a skill that is not only desirable but also essential. Through a process-oriented approach, you will learn to plan, investigate, organize, write, and revise successful business reports and correspondence. Emphasis is given to principles of effective professional writing, especially as they pertain to memos, letters, reports, proposals, e-mails and employment messages. You will also be introduced to collaborative writing and intercultural communications within a business context. Finally, you will learn to correctly use one of three different “styles” for documentation: AP (Associated Press), MLA (Modern Language Association) and APA (American Psychological Association).
FA 340
IMPLEMENTING CORPORATE TRAINING PROGRAMS
Undergraduate
In this course, students will learn about the strategic process of effectively and efficiently implementing a corporate training program based on business drivers from design stages through measurement of results. This process includes defining requirements and success criteria, designing the process, implementing and powerfully communicating the program to the learners, and then understanding how to measure the success of the program. It is imperative to measure and report on the trends of the program and to understand why it is important. Using methodology and models that have been successful in numerous global and domestic companies, students in this course will create their own plan for implementation, communication, and measurement to ensure success in their future training program implementations.

FA 341
MANAGING THROUGH TRANSITION: CHANGE MANAGEMENT FOR FIRST-LINE LEADERS
Undergraduate
An examination of the initiation and management of change processes in today's corporate environment. Special emphasis is placed on managing the effects of organizational change on the work group. Students learn to introduce, implement, and drive change. Additionally, students will learn to recognize and overcome resistance to change. Classes will contain videos and leading edge management techniques.

FA 342
MARKETING MOVIES IN TODAY'S HOLLYWOOD
Undergraduate
The course will study in depth the art and science of motion picture marketing for both the major studio films as well as the smaller independent films that are released today. Film marketing encompasses different areas of responsibility and expertise including advertising, publicity, promotion, market research and merchandising, and we will study how they all work together in bringing a movie into the marketplace. The course will examine how a marketing campaign is created, how strategies differ for studio and independent films, and how the movie trailer and poster are created, as well as the costs of advertising, the power of publicity, and the importance of finding the right hook and target audience for niche films. This course provides an inside look into the economic and power structures behind the scenes that help determine which movies are made, distributed and marketed to the public.

FA 343
TEAM LEARNING THROUGH PROJECTS
Undergraduate
This course focuses on both theory and practice of how teams learn. Related to theory, participants will review the text of various authors who have written about team learning. Each participant reads the required text and reviews a second book of their choice related to team learning. The participants then learn from each other the key points of the authors. In practice, participants immerse themselves in a project team that follows a sequence of problem solving steps from analysis through solutions.

FA 344
UNDERSTANDING AND ADDRESSING CONFLICT AT WORK: A LEADER’S GUIDE
Undergraduate
In the workplace differences of opinion are an important source of change, innovation and creativity. Yet when differences are not dealt with effectively, they can grow into conflicts that shatter important working relationships and require precious resources to resolve. Leaders need to be adept at dealing with differences respectfully and creatively to maintain the interdependent relationships that are replacing command and control power structures in today’s decentralized, fast-paced organizations. This five-week course will introduce the skills needed to address conflicts in a constructive way and provide an opportunity to practice them. It provides an overview of skills and techniques that help leaders identify and address workplace differences that can lead to conflict as well as help them resolve conflict productively when it occurs so that relationships are preserved. Students will be able to distinguish between the methods of addressing conflict including arbitration and mediation; will identify potential sources of conflict in their own workplace; use skills associated with conflict resolution to facilitate change in non-conflict situations; identify archetypal roles associated with conflict and the story framework associated with the conflict resolution process.

FA 345
THRIVING FROM BUSINESS SUCCESS
Undergraduate
Once an idea is proven feasible, time must be put into creating a business entity within which that idea can become a reality. This course teaches students the details associated with writing a business plan and forming and managing a functional business, and creates a deeper appreciation for what goes into starting and running a business. This class can only be taken for one competence.
FA 346
LEADING FROM WITHIN: TAPPING YOUR INTERNAL WISDOM
Undergraduate
This course looks at leadership as a process of understanding the internal building blocks of effective leadership, whether you are a sole-entrepreneur or the CEO of a fortune-100 firm. It enables students to experience and learn the skills/tools necessary for an innovative approach to leading. The format is largely experiential, with emphasis on exercises, techniques and readings through which the students will investigate the creative process and how it is integral to all aspects of the business. The course is designed to open students to the creativity within themselves and their organizations, and to the tools that promote innovation and enhanced organizational effectiveness.

FA 347
WRITING PERSUASIVE BUSINESS PROPOSALS
Undergraduate
The first step in the creation of effective training programs for in-house or out-sourced clients, this course probes deeply into the art and craft of creating persuasive proposals. It may be a surprise to learn that proposals are written to an effective, sensible formula.

FA 348
UNDERSTANDING ORGANIZATIONS AND OURSELVES
Undergraduate
Organizations play an enormous role in our personal, business, and community development. At the same time organizations are shaping us, our participation in these organizations shapes their structure, values and behavior. In this course you will begin to understand the dynamic relationship between the individual and the organization, using your own experience as a starting point. This highly participatory seminar format course will give you many opportunities to learn from your own experience of organizations, and those of your colleagues. You will learn to frame your experience in terms of existing and emerging organization theory from the modernist and post-modernist perspective. While this course will be relevant to many, it will be particularly useful to those interested in working with or influencing organizations, including business people, managers, human resource and organizational development practitioners, and those working in the non-profit sectors.

FA 349
TRAINING, TEACHING AND TEAMS IN THE WORKPLACE
Undergraduate
What is workplace learning? Why do employers want to train employees instead of hiring people already skilled, and how is the teaching task accomplished? Is workplace learning different from classroom learning? Do people learn better in groups? Do people accomplish more in groups? Less? Who is the best workplace teacher? Why? In this course, students will address the many concepts and problems raised by the acquisition of skills and knowledge in the workplace. By examining texts, case studies, and experience, we will uncover theories and methods of teaching and will define productive workplace education.

FA 350
EFFECTIVE COLLABORATION: SKILLS, STRUCTURE AND CULTURE
Undergraduate
Collaboration or working in teams is part of most 21st century workplaces. It is intended to be a way to tap into the creativity, problem-solving skills and diverse perspectives of today's organizations in an effort to be competitive through creating and sharing knowledge. Collaboration is encouraged in traditional settings “face-to-face” as well as virtually. What does it mean to collaborate effectively? What are the skills, structures/tools and organizational cultures that promote collaboration? During this class students will take a very hands-on approach to exploring these questions while practicing the individual skills that support collaborative work. They will also explore and discuss the types of organizational structures and organizational cultures that support effective collaborative work. Working in groups they will document their shared understanding of these concepts using a free tool for creating a knowledge model of their collaborative efforts.

FA 352
BUSINESS ETHICS AND SOCIETY
Undergraduate
In this class, we will explore major issues in business ethics related to labor, equal employment opportunity, worker safety and health, environmental quality, financial disclosure, and the role of government and free enterprise in preserving and enhancing our society and market operations. We will examine accepted business practices in light of human needs, justice, rights, and dignity. By exploring a variety of ethical frameworks and perspectives, we will consider the questions of whether or how moral imperatives and values work in the conduct of business.
FA 353
SYSTEMS CHANGE AND CHAOS THEORY
Undergraduate
This course focuses on the phenomenon of organizational change. It examines the natural environment as an example of the ways chaos can be a healthy, and often necessary, aspect of an organization's identity. As organizations continually reinvent themselves, chaos models are useful tools for assessing this change strategically. We address the following specific issues: (1) the complexities of inside, and outside, collaboration; (2) reinvention of the organizational relationship; (3) building a shared vision; (4) systems thinking; (5) Strategies for team-based learning and related leadership skills.

FA 355
USING PERFORMANCE METRICS TO ANALYZE AND ENHANCE BUSINESS RESULTS
Undergraduate
Business performance cannot be viewed in a vacuum. It must be viewed in terms of past performance, current results, and where performance levels need to be in order to achieve desired outcomes. This course will explore the use of performance metrics as a strategic tool to enhance business results. Without an accurate, quantitative assessment of what is being done from an actions to outcome perspective, it is difficult to set a course for positive change. Establishing a set of integrated performance metrics involves numerous business processes. In this context, the course will also examine mission statements, business plans, databases, the creation of key tasks, and the establishment of good employee relations through leadership initiatives. The importance that each of these elements has in the business process, as well as how they need to be integrated to produce optimum business results, will be discussed.

FA 357
INTERNATIONAL BUSINESS IN THE GLOBAL ECONOMY
Undergraduate
The advances in communications technology have changed the global economy and have shaped communities throughout the world. The advent of the Internet, email systems, worldwide shipping capabilities and the pressure for profit production have contributed to the erosion of political and national lines in favor of international trade. Global trade agreements, the World Trade Organization, and the European Union illustrate the new era of cross-national trade taking precedence over tradition nationalistic interests. As the economy becomes more global, it becomes essential for all participants to understand emerging trends in order to thrive, sustain or survive. This course examines the resources used in international business and analyzes movements in the global economy. The process will include a study on how these economic changes affect global communities and redefine ethical systems. Students will learn to identify the underlying factors that move the global economy and what affects those movements have on various ethical, social and economic systems. New economies, economic processes and implementation, as well as political, social and ethical systems construct the global community of today. This globalization affects all in the workforce, regardless of level or perceptions. Each member of the global society should be able to recognize, adapt and interpret current trends in this new economy in order to make appropriate business, social and ethical decisions. This class consists of discussions focused on global systems, economic and ethic, introductory lectures on basic global economic concepts and theoretical frameworks. Students will participate in discussions of current events related to economic globalization and write reflective papers addressing their competencies.

FA 359
ETHICAL BUSINESS BEHAVIOR
Undergraduate
Ethical Business Behavior explores the ethical issues that business decision-makers face and examines the moral principles that are used to help resolve these issues. Ethical decisions in the workplace can have tremendous influence on the individuals and the corporations involved. The outcomes of unethical behavior can affect reputations, trust and career path. Results have been as severe as loss of employment, physical harm to individuals, corporate bankruptcy and even impacts to the economy. Students are placed in decision-making roles through exercises, case studies and role-playing. Reasoning skills are honed through identification of ethical issues and alternative means to analyze these issues. Ethical behavior is evaluated using analytical skills to apply ethical concepts to business situations.

FA 360
UNDERSTANDING TRAINING AND DEVELOPMENT BASICS
Undergraduate
Both in a stable and unstable economy, employers are compelled to make the best use of their human resources. With globalization of business, widespread and ever changing use of technology, and the ever-increasing demand by employees for work/life stability, employers are seeking ways to keep talented individuals a part of their workforce. One way in which they go about doing this is through training and development. As a manager, supervisor or HR specialist, it is important to understand the basic principles of employee training. Whether you are the initiator or consumer of training instruction, this course will help you develop an awareness of opportunities and challenges in employee training such as assessment of needs, training objectives, needs priorities, training methods and evaluation. This course has been designed as an overview course, and it is not intended for students who have extensive training and development experience.
**FA 361**
**TEAM BUILDING**
**Undergraduate**
No matter what our expertise, discipline, or area of interest, we are and will continually become members of teams, work groups, task forces and committees in both our work and personal lives. What we once did in isolation, we now do with others. This awareness has required truly effective organizational leaders to examine, understand, and master the ways in which individuals interact in group and team settings. Team Building utilizes an experiential format to focus on a variety of concepts and practices associated with developing and managing effective teams. Different approaches to management, motivation and performance are addressed, along with barriers to effective team efforts. Participants will experience the roles of team member and team leader as they develop their understanding of the "whats" and "whys" of effective teams. Expected student outcomes include mastering the basic concepts, theories, and fundamental techniques in team development and maintenance, identifying current challenges and issues that exist in a variety of settings, including "virtual" teams, and identifying positive team management strategies and their application to those situations.

**FA 362**
**CHICAGO: AN ENVIRONMENTAL HISTORY**
**Undergraduate**
This course will explore the history of Chicago from an environmental perspective. From the city's first days, its geographic location amidst surrounding natural resources has been key to the city's development. In this class, we will trace the historical relationship between Chicago and its environs. We will examine the transition of Chicago from a rising industrial power to its position as a burgeoning green urban center. We will study environmental movements of the last century and a half, from early urban reformers to more modern efforts to clean up the city's air, water, and land resources. We will also consider issues of environmental justice, in terms of the distribution of living, working, and waste spaces. Finally, we will investigate contemporary environmental problems and solutions. Students will be expected to attend lectures, participate in class discussions, and research and present their findings on a current environmental issue in Chicago. Competencies: S3C, H4, H1H.

**FA 363**
**ACHIEVING WORK AND LIFE GOALS**
**Undergraduate**
You will study the process of goal achievement from goal definition through development of a vision, review of resources and obstacles, strategic ordering of tasks and steps, effective communication and problem solving and development of an action plan. You will consider theories of goal setting, planning, communication, and negotiation, and engage in practical exercises that will require the application of theory. You will produce a completed action plan for a defined career or personal goal.

**FA 364**
**STATISTICS FOR MANAGERIAL DECISION, SOCIAL AND BEHAVIORAL SCIENCES**
**Undergraduate**
This course introduces the fundamental concepts and methods of statistics with emphasis on real world applications to a wide variety of fields. Statistical methods constitute valuable analytical tools for decision and policy makings in the twenty first century. The apprehension of such techniques should enable business managers, policy makers, educators, behavioral scientists, and other social scientists to reach an informed and well presented conclusion that is based on real-life trackable phenomena. The course begins with a survey of basic descriptive statistics, data sources, and data collection and presentation. It then covers elementary probability theory, sampling, estimation, hypothesis testing, and linear regression. Those statistics and characteristics will be easily computed using the Microsoft Excel, Minitab, or other software. The course focuses not on mathematical proofs of theorems, but rather on practical issues involved in the collection, treatment, and interpretations of historical data from a wide variety of areas of interest, including finance, economics, education, psychology, public opinion, demography, immigration, and data in the related fields using the techniques of statistical inference. More importantly, it is crucial to keep in mind throughout this course that the reliability of any decision or policy making based on historical data depends on well constructed statistical inference.

**FA 365**
**THE LEADERSHIP EDGE**
**Undergraduate**
The course is designed to give students a practical understanding of the ways transformational leaders are having a lasting impact on a wide array of organizations ranging from major corporations, to nonprofits, to international institutions. In the process, students will learn leadership lessons that can contribute to their personal and professional growth and development. The principles of deep change can apply to people at every level of an organization regardless of its size. The class is interactive and will include case studies as well as movies portraying transformational leaders who have pursued the vision of deep change. Multi-media activities will include small and large group discussions and presentations, research, report writing and video and audio tape presentations. Students prepare a paper based on personal experience, class activities and independent research to demonstrate their understanding of the competency chosen.
FA 366
CULTURAL PERSPECTIVES ON THE GLOBAL ECONOMY
Undergraduate
This course explores economic globalization from the perspective of the ethical and religious values of the world's major cultural traditions. For all their differences, the religious traditions of the world have one thing in common: the poverty, suffering and violence that afflict a tremendous number of people in our global economy. This course will explore how the world’s religious and spiritual traditions can help us collaborate to reduce economic injustice and promote environmentally responsible development. In particular, we will focus on the unique perspective that Buddhism can bring to economics. The goal is to promote an intercultural dialogue that will help us learn collaboratively about some of the most important and practical issues of our day.

FA 367
INTEGRATED MARKETING COMMUNICATIONS
Undergraduate
This course introduces the concept of Integrated Marketing Communications (IMC) which is the approach that more and more marketing and communications professionals are using to face the challenges of the contemporary market place. An increased rate of advertising clutter in most traditional media, the rapid growth of the internet, a more product knowledgeable and demanding consumer with an increased variety of options to choose from, higher pressures from manufacturers to retail chains and a global economy are only a few characteristics of today's business environment. We will use real examples of companies and industries to analyze the concepts of advertising, sales promotion, direct marketing, interactive/internet marketing, public relations and personal selling and the most common techniques for understanding consumer behavior and create an effective promotional campaign that integrates some of these tools to target specific markets. Additional skills for the creation of visual layouts and global market penetration analysis will be developed for some students depending upon their selected competences.

FA 368
COMPASSIONATE BUSINESS: STRESS REDUCTION IN THE WORKFORCE
Undergraduate
A system of spiritual growth, a system of stress relief. In the business world, the stress on a person's life and health has a direct impact on their productivity and creativity. Studies have shown that as stress increases in someone's life, their productivity at work goes down. The current state of humanity and technology has created a world with a new type of stress; the pace and speed of interaction has increased to a rate where a person has to deal with an influx of information and, often, interactions with hundreds of people per day via different technologies. In this course we will study another worldview in order to develop survival skills that reduce our stress. This different world view is the Yogic tradition from India called Kundalini Yoga. By taking this course, students will develop stress relief techniques and a sense of great purpose in their business lives. We will lower the stress level in our lives by participating in Kundalini Yoga stress reduction techniques from a video, weekly meditation exercises and textbooks.

FA 369
HUMAN RELATIONS IN THE WORKPLACE
Undergraduate
In this career analysis and development course, students examine the six key Human Resource functions with their accompanying principles, then examine and practice key Human Relations skills and roles in order to develop their competence in understanding how people perform in the workplace. Specifically, students will be involved in understanding the interrelated functions of: workforce planning, design of productive work systems, structure and process of labor law, development of flexible compensation/benefits programs, design of effective employee safety/security/health programs, and construction of intelligent information systems for the human resources environment. Students will witness and measure the practice of the key skills and roles including goal-setting, communicating, and negotiating. Students will also practice assessing performance, retention, and other human resource functions. Competences: FX, L7, H3X, S3X.

FA 370
STRATEGIC APPROACHES TO PROJECT MANAGEMENT
Undergraduate
Project management can be broadly defined as planning, scheduling of non-routine tasks, and allocation of resources to complete a specific project deliverable within a given time period. Today, global economic competition, limited resources, tight deadlines, and the complexity of projects demand knowledge of systematic project management techniques and applications of project management tools. This course is designed to provide a general framework to assist you in developing fundamental project management skills and the application of strategic approaches to successful project management. Topics include concepts and techniques in developing a project plan, budgeting, cost management, and scheduling. Project scheduling topics will address scheduling techniques (PERT- Program Evaluation Review Technique and CPM- Critical Path Method), methods to assess risk, resource allocation, and project acceleration. Additional topics include project monitoring, control, evaluation, and project termination processes. To demonstrate a basic knowledge of project management concepts, individual project case studies for this course will build upon competencies and utilize basic project management tools.
FA 371
WORK AND THE MODERN SELF
Undergraduate

Our identities are shaped by the work that we do (and by the work that we do not have the opportunity to do). This course will address the impact of working and of the products of our work on our sense of self. For some people, "work" refers to one's job, the means of one's livelihood. Others use the word to describe volunteer work, housework, or other productive activities. Some people associate "work" with drudgery and compulsion, while others think of the word in terms of productivity and stimulation. We will consider work from the perspective of our needs and values, but also from the perspective of the needs of society. We will also consider the value that society assigns to different types of work (and the impact of that valuation on us and on various social groups). Other topics will include how work affects our family and social lives, how our private lives affect our experience of work, and the impact of technology on our work.

FA 372
GENDER, MIGRATION AND THE NEW WORLD ORDER
Undergraduate

All over the world more and more women are migrating to different countries or parts of the world. The majority of these migrants are employed as "nannies, maids, and sex workers." The global restructuring of national or regional economies results in massive unemployment and the destruction of traditional sources of livelihood. Women therefore migrate to other countries or parts of the world in order to secure their own and their family members' livelihoods, and an array of national policies and institutions propagate, mediate, and benefit from the global free trade of domestic or sex workers. In this course we address these issues by asking to what extent the traditional gender-based values of the old world order remain intact in this new economy while crossing divisions based on class, racial-ethnic, geopolitical, or cultural differences. Migrant women's experiences, voices, and individual and collective acts of resistance or organization are at the center of this course.

FA 373
IRELAND FROM THE INSIDE OUT
Undergraduate

The Irish can lay claim to shaping and exporting to the larger world the work of musicians, poets, novelists, screenwriters and directors and the re-emergence of Celtic spirituality. All of this is an outgrowth of the tremendous social, economic and political changes occurring over the past twenty years in Ireland. This course examines the economic, social and political history of Ireland, as well as the forces shaping recent changes within the society. While the island's total size is only 52,341 m2 or approximately the size of Alabama with close to 4 million people living in the Republic of Ireland, it has been at the center of historic change and a crossroads for many shifts in European and world history. Students will demonstrate the competencies through class participation, field work, research and other assignments that will allow them to apply course readings, guest speakers, videos and discussion to their own interests.

FA 374
LITERATURE AND CINEMA AND THEIR IMPACT ON THE HUMAN EXPERIENCE
Undergraduate

How does literature and film transform the human experience? Through fiction, drama, and film from different cultures, in this course, students will explore how these art forms shape the individual, and have the ability to transform us mentally, emotionally and physically. Through international literature and films, this course will emphasize the study of different cultures, different views, different systems of thought and values. The goal of this course is to learn that in spite of differences, there is a universality and sameness in humanity's emotions and needs. This course will focus on screening a variety of films, reading different forms of literature, and will require students to discuss and analyze films and books.

FA 375
NARRATIVE FOR FREEDOM: THE LITERATURE OF AMERICAN ABOLITIONISM
Undergraduate

This course facilitates discussion and learning about a challenging subject in American history. Through literary writings from the Abolitionist Movement, we will study the oppressive nature of the American system of slavery as we read stories of resistance. Autobiographies are powerful sources-- they animate life experiences and bring the past to life. The Narratives of slavery and freedom we will read in this class galvanized their 19th Century readers, as men and women bore witness to the violence and injustice they experienced under the slave system. They explicitly called upon the conscience of the nation-- to abolish slavery and to live up to the ideals of freedom, equality, and democracy. In addition to rooting these Narratives in history, we will also explore how and why they were created, their rhetorical styles, as well as their place in black literary history.
FA 376
PERSONAL MASTERY AND THE ORGANIZATION
Undergraduate
Peter Senge says, "Personal mastery goes beyond competence and skills...it means approaching one's life as a creative work, living life from a creative as opposed to a reactive viewpoint." This course starts with an introspective look into managing oneself, then moves into using tools to provide data on oneself and lastly, integrating the information into one's personal and professional life. Various personal development theories and models will be explored and used to build a Personal Development Plan. This course is for students who wish to engage in continual learning and self-reflection, and will provide an opportunity to identify ways for improving personal effectiveness, both at life and at work.

FA 377
A LIVING MOVEMENT: TOWARD A WORLD OF PEACE, SOLIDARITY AND JUSTICE
Undergraduate
How can we make sense of the enormous changes taking place in our world? From the Egyptian victory to overthrow a dictator to the struggle of Wisconsin union members, non-violent actions are spurring more peace, solidarity and justice. How do we take part in building a movement of peace, solidarity and justice? Join the Living Movement course and travel to Memphis, TN for the joint conference of the Peace and Justice Studies Association and the Gandhi-King Conference. Over 1,000 people will attend to share stories from the front lines of the struggles for peace and justice and listen to evidence from scholars on the victories of non-violent action. Meet national leaders and network with activists from all over the country.

FA 378
THE UNDERGROUND RAILROAD
Undergraduate
This course focuses on the geographic region of west central Illinois, specifically Jacksonville, the seat of Morgan County, Illinois. The engaging learning questions are: What does Jacksonville have to teach us about the Underground Railroad and why is that important? The activities of a developing nation coming to grips with the institution of slavery, manifest destiny, expansion and growth are the sources of present day identity. How these giant issues made an impact in a small town that was growing along with the rest of the nation serve as a metaphor for development of the west. Though we will deal with the real lives of real people and their experiences of daily life, we will also consider Jacksonville as an example for all those places that were equally active on the stage of national development and the pathway that led inevitably to the Civil War. We cannot consider all of the issues with which these early settlers contended, but we will focus our attention more narrowly and peer into the lives and times of these pioneers through the lens of "...our peculiar institution..." now known as slavery and the flight for freedom. We will consider the experiences associated with this flight from the perspectives of those who fled and those who helped the freedom seekers flee. We will consider a thirty-year time frame from 1830 to 1860 and we will inquire into the political, theological, educational, agricultural, and motivational traits and attitudes that brought people to this place and influenced their actions. We will draw connections between important personal values and why people came to this frontier of the national western boundary of the U.S., as well as how the institutions they built continue to transform our lives.

FA 379
WAR PRESIDENTS/ PEACE PRESIDENTS
Undergraduate
Presidents of the United States have been analyzed from various perspectives over the years: as Federalists or Anti-Federalists; as Whigs, Democrats or Republicans; as activists or conservatives; as friendly to business or labor or consumers; as good campaigners or bad; as popular or unpopular; successful or unsuccessful, and so forth. This course will look at the history of the U.S. presidency through the lens of War and Peace. Presidents have been entrusted by the People with enormous powers, but none so solemn and vital as those of "Commander-in-Chief." During the nation's 229 years, which Presidents have been primarily known for their roles as War Presidents? Which wars were "major" and which "minor"? Which wars were initiated by which Presidents? Which were wars in response to attacks on the United States? Which were wars initiated by Congress? Were all of these wars "Just Wars"? What is a "Just War"? Does it matter whether or not it is just or just that we win? Which Presidents pursued diplomacy to avert war? Which Presidents were known for their dedication to Peace? Which were both? How did the various Presidents handle tough times of war or peace? How did they perform as leaders and react to public dissent or support? What was the impact of their decisions on the nation's well-being? What lessons can we learn from these histories? Each student will individually study one President from the 18th or 19th century during the first five weeks of class; and a 20th century President during the final five weeks, by reading from various biographical sources. Each week students will bring their reading and research results to share with the class, so we gain an even broader perspective. We also will follow the unfolding events of the current U.S. overseas wars and the actions of the current President of the United States, Congress and Press.

FA 380
ARTISTIC EXPRESSION THROUGH DIGITAL PHOTOGRAPHY
Undergraduate
A photographer is someone who combines the compositional skills of an artist, the analytical mind of a scientist and the observational soul of a poet. In this introductory course you will become all three as you study traditional photographic composition and interpret the images you captured with your digital camera in the darkroom of Adobe PhotoShop.
FA 381
CONFLICT AND COOPERATION AMONG NATIONS: BUILDING DEMOCRACY AND A FREE MARKET IN IRAQ
Undergraduate
This course is an introduction to international relations, the analysis of the actors, institutions, and events, which influence the processes of international politics, the market, and the development of strategy. The context of the course is based on the changes caused by 9-11 to international politics, markets, strategies, and the consequences of those changes. This course will use the effort to construct a democracy and a free market in Iraq as a case study to explore the larger changes occurring in the international system in the post-9-11 era. Every student will be expected to know the substance and controversies attendant to political, economic, and military developments in Iraq. Each of these areas is fundamentally critical in assessing whether building democracy in Iraq can succeed. A critical analysis of democracy in Iraq is a major goal of this course.

FA 382
DESIGNING ORGANIZATIONS
Undergraduate
While examining theories of organization and organizational behavior, students will: 1) Explore the raison d'être of modern organizations and how they evolve. 2) Learn the core variables and processes that determine an organization's structure and capacity for achievement. 3) Consider the accelerating and transformational changes in current organizational design, including the impact of digital technology on organizational form, from classic forms to distributed and virtual organizations; the shift from organizations being risk averse to taking risks to enhance innovation; virtual work environments and shared offices; and how emphasis on collaboration has changed the organizational landscape.

FA 383
CONTEMPORARY ETHICS
Undergraduate
This course briefly examines the ethical responses to problems in contemporary society. The main emphasis will be to establish basic competence in the comparison of systems of ethics in an effort to assist dialogue in our pluralistic world. The goal of this course is to assist students in making decisions in today's highly charged socio-political world characterized and fueled by competing ethical tenets, and to consider their roles in the development of a tolerant society.

FA 384
THE ROLE OF GLOBAL BUSINESSES IN ERADICATING POVERTY
Undergraduate
In this course, students will explore globalization and the role of international businesses in creating jobs and making a profit as perhaps the best way to eradicate poverty in developing countries. We will also examine the role of the Millennium Development Goals (MDGs) in reducing poverty, promoting human rights, safeguarding the environment, and creating new global business partnerships.

FA 385
THE AMERICAN DREAM: MAKING IT OR NOT IN THE USA
Undergraduate
Throughout our country's history, our culture has embraced the notion of the Great American Dream. Rags-to-riches heroes have fascinated and inspired us; have shaped a cultural belief system which teaches that anyone can be anything in America if they demonstrate the talent, the intelligence, and the willingness to work hard for financial success. Critics of the American Dream argue that it is simply not possible for everyone to prosper through determination and hard work alone. Our continued belief in the American Dream, they suggest, blinds us to the structural factors that influence individual success or failure such as class privilege and institutional discrimination. In this class we will examine the American Dream in detail. How and why did it develop in our culture? How is it taught and shared by members of our culture? How does the American Dream compare to cultural messages regarding individual capabilities in other countries? Does our belief in the American Dream empower or restrict individual potential? Through an examination of interdisciplinary readings, film and television material, and lively in-class discussions, students in this course will critically examine the American Dream and its impact on our culture, and on individual life experience.
FA 386
EXPLORING THE NONPROFIT WORKPLACE
Undergraduate
Working in a non-profit organization can be a very rewarding experience. But how do you know what would be a good fit based on what you can offer? This exploratory course provides students with an overview of what ingredients make a non-profit successful. The lessons provide students with an understanding of how a social issue can be conceptualized into a program to form a non-profit organization. Students learn the basic operational components of an effective non-profit, explore best practices, determine how institutions impact social problems and evaluate their effectiveness. Students also reflect upon their own skills and abilities as they research or interact with non-profits to help guide them into an environment that matches their interests. The course is interactive and consists of a film, reflection, group and individual exercises, readings, discussion, research and writing. The final paper may consist of examining a social issue from an ethical perspective, analyzing the challenges faced by urban, suburban or rural settings, evaluating the effectiveness of how a social institution addresses a social problem or designing an individualized transition plan to volunteer or work in a non-profit organization.

FA 387
AFRICAN-AMERICAN STUDIES IN CRITICAL PERSPECTIVE
Undergraduate
This course is important for students who seek to gain a comprehensive understanding of African-American history in the United States. It will begin with discussions of African culture, the Atlantic Slave Trade, and early forms of slavery/indenturing. It will pay particular attention to the colonial and Revolutionary experience, delving into the mass exodus of Africans during the Revolutionary War, and African-American's role and position in the country's formative years. Enslavement, the Civil War and Reconstruction will follow as key areas of study. In every discussion, students will be asked to look for parallels between the contemporary and 18th and 19th century African-American experience and, where appropriate, to identify key social and cultural thinkers and leaders of the various historical periods. The primary texts for the course will be John Hope Franklin's From Slavery to Freedom, articles and readings written by scholars and important early African-American artists and intellectuals, and video presentations.

FA 388
PUBLIC/COMMUNITY RELATIONS
Undergraduate
Public relations is a tool for promoting an activity, an event, a company, a product, or a person. Students will learn about the various contexts where public and community relations activities can be used to increase the public's awareness of the value and worth of a particular product, person, or activity. Case studies will be used to illustrate how public relations can enhance one's image and visibility, especially in the fundraising or marketing world. Students will learn: 1) the overall purpose of public and community relations, 2) its use as a strategic marketing/promotional tool, and 3) how to develop a public relations plan that can be implemented. They will also learn the importance of knowing their audience and appropriately communicating messages to different groups. The course will examine the role that media, as both a social institution and a technological tool, plays in communicating a wide range of messages and information.

FA 389
INTRODUCTION TO RESTORATIVE PEACEMAKING PRACTICES
Undergraduate
The course will provide an introduction to the emerging field of restorative justice and its application in the criminal justice system, schools, workplaces, communities, families and organizational settings. Restorative approaches are based on aboriginal and indigenous practices and traditions to build community, problem solve, resolve conflict, decision make, develop consensus, reconcile, celebrate and possibly heal. It is a growing movement that explores how relationships can be restored or built by recognizing the capacity of the individuals and community to identify, address and resolve their issues in a manner that meets their needs and allows them to move forward. We will examine various approaches to implementing restorative principles as well as the challenges of creating and sustaining restorative environments, initiatives and resources to support communities in developing safer and healthier relationships. The underlying dynamics that are usually at the root of conflict and alienation will also be considered to better understand and appreciate the possibilities and promise of restorative processes.

FA 390
DIVERSITY: IN AND BEYOND THE WORKPLACE
Undergraduate
Diversity, Multiculturalism, Affirmative Action, Equal Opportunity Employer: these are all words that have historical significance and power in today's workplace. This course will examine how the United States workplace has attempted to address diversity and what have been the challenges along the way. Other aspects of life in the United States such as families, schools, churches and neighborhoods have functioned with less of an effort to represent the pluralism of society. This course will explore these differences and evaluate the experiences of the individual, organizations, and institutions from a multitude of perspectives. Students will demonstrate the competencies through class participation, group projects, journal entries and other assignments that will allow them to apply course readings, films, and discussion to their own personal experience.
THE POLITICS AND HISTORY OF THE VIETNAM WAR

Undergraduate

The Vietnam War was the longest and, perhaps, the most controversial of American Wars. This course will briefly examine Vietnamese society and the First Indochina War as introduction to discussing the Second Indochina War. This course has four main objectives: 1.) to examine why and how the Second Indochina War was fought; 2.) to analyze the portrayal of the war in literature and film; 3.) to analyze what has been learned, and what should have been learned, from this war and 4.) examine how such lessons influence contemporary policy and perceptions, (i.e. the significance of the Vietnam War in assessing the wars in Iraq and Afghanistan, the effect of the war on the decision making calculus of the media, public, and politicians).

FCH 101
BASIC FRENCH I
Undergraduate

First quarter of beginning French. Listening, speaking, reading and writing French in a cultural context for the beginning student. This course is an introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

FCH 101S
BASIC FRENCH FOR SUMMER
Undergraduate

(Covers the equivalent of FCH 101 and the first half of FCH 102.) The first half of beginning French. Listening to, speaking, reading, and writing French in a cultural context for the beginning student.

FCH 102
BASIC FRENCH II
Undergraduate

Second quarter of beginning French. Continued emphasis on the four skills in culturally-authentic situations. This course is a continued introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

FCH 103
BASIC FRENCH III
Undergraduate

Third quarter of beginning French. Completion of the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression. This course completes the introduction to the study of the French language and the culture of Francophone countries. Its methodology is based on two assumptions. The first assumption is that language and culture are inseparable. As students learn the French language, they will also gain insights about the French and francophone people and their culture. The second assumption is that language is for communication. Studying a foreign language does not mean memorizing grammar rules, but internalizing these rules so that learners can use them as guidelines when they attempt to express themselves in spoken and written French. The course also centers on the explanation of cultural aspects of French life, especially as they differ from American life. In-class work is devoted to intensive communication practice, so that students are able to put the rules they study to use in talking about themselves and their personal interests in French.

FCH 103S
BASIC FRENCH III FOR SUMMER
Undergraduate

(Covers the equivalent of the second half of FCH 102 and all of FCH 103.) The second half of beginning French. Further work on the basic elements of the French language, spoken as well as written, with due regard to the cultural context of French expression.
FCH 104
INTERMEDIATE FRENCH I
Undergraduate
First quarter of intermediate French. Intensive practice in the use of French through listening, speaking, reading, and writing, and continued enhancement of the cultural awareness intrinsic to those skills. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students' knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life.

FCH 105
INTERMEDIATE FRENCH II
Undergraduate
Second quarter of intermediate French. More concentration on the four language skills in an authentic cultural context. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students' knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life.

FCH 106
INTERMEDIATE FRENCH III
Undergraduate
Third quarter of intermediate French. Developing more fluency in speaking, understanding, reading and writing French with a concomitant heightened awareness of the cultural dimensions of the French language. This course emphasizes language as communication. It stresses the further development of listening, reading, speaking, and writing skills. It is designed to reinforce the students' knowledge of French grammar and vocabulary in realistic contexts. The course also incorporates information on many aspects of contemporary French/Francophone society since cultural awareness is essential for true communicative competence. All the material presented has a functional purpose so that it can be easily used in real-life language situations. Class activities are structured to give students the practice they will need in order to perform authentic communicative functions in real life.

FCH 197
SPECIAL TOPICS IN FRENCH
Undergraduate
See schedule for current offerings.

FCH 198
STUDY ABROAD
Undergraduate
Variable credit.

FCH 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

FCH 201
ADVANCED COMMUNICATION I
Undergraduate
This course is designed to help students develop linguistically and culturally appropriate speech through the study of oral and written documents dealing with current issues with a particular stress on lexical precision (Trouver le mot juste). Students will have to read and prepare orally all texts and questions assigned for each session. In class, time will be spent on oral communication activities. These activities will allow students to express their views and impressions with precise terminology and help students acquire greater fluency and accuracy.
FCH 202
ADVANCED COMMUNICATION II
Undergraduate
Second quarter of advanced French. Focus on the differences between speech and writing with an emphasis on the latter as expressed in compositions, editing, translation, and other writing activities. This course is designed to help students develop culturally appropriate speech, writing, and translation through the study of speech acts and written documents within the context of a systematic study and review of grammar. The course introduces sophisticated syntactical patterns of the language and increases students' vocabulary, thus enabling them to write more elaborate compositions and improve their oral communication skills in a culturally appropriate manner. All students become editors of DePaul's literary French magazine, Mille-Feuille and participate in all stages of its publication. The overarching theme of the course is the geography of France. Students will gain an in-depth understanding of France's geography, and be introduced to some of the regional characteristics of its literature and culture, economy, cuisine, music, and handicraft.

FCH 203
ADVANCED COMMUNICATION III
Undergraduate
Third quarter of advanced French. Developing a sophisticated spoken and written fluency using authentic texts as models for elaborated discourse. Written texts and writing exercises reinforce oral expression through extensive (journal) writing and intensive writing (individual and team compositions). The course includes advanced grammar work, occasional translation, and vocabulary enrichment. It utilizes Internet resources built into the textbook and creates a simulation: students assume the role of a character in a French apartment building and develop that character throughout the duration of the quarter. Students write collaborative chapters for a detective novel based on the characters developed in the apartment house.

FCH 204
ADVANCED COMMUNICATION IV
Undergraduate
Continued refinement of advanced speaking skills by focusing on oral texts discussed in their sociocultural context. Backup support provided through written texts and exercises.

FCH 297
SPECIAL TOPICS IN FRENCH
Undergraduate
See schedule for current offerings.

FCH 298
STUDY ABROAD
Undergraduate
Variable credit.

FCH 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

FCH 301
THE MIDDLE AGES
Undergraduate
This course is an overview of medieval literature such as Chanson de Roland and the poetry of Francois Villon. It looks at the diverse literary genres that characterize medieval literature and create its diversity. Some genres, such as the roman courtois, are given special attention because of their singular importance. Readings are placed within the cultural context of their times in order to understand the values they convey.
FCH 302
SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE
Undergraduate
This course follows themes developed across two centuries of French literature from 1600 to the end of the ancien regime. It looks at notions such as religion and disbelief as they move through philosophers like Descartes, the French moralistes and on to the philosophes; it presents conceptions of theater, the novel, and the essay as they evolve from the grand siecle to the siecle des lumieres. In short, it looks at the unfolding of classical French literature in a historical context that moves from royal absolutism to the demands of political and intellectual freedom that arise during the Enlightenment.

FCH 303
ROMANTICS, REALISTS, AND REBELS
Undergraduate
This course is an introduction to the writings of the French Realists and to nineteenth-century reactions against Romanticism. Readings might include works by Balzac, Baudelaire, Rimbaud and Flaubert. The course objectives are to familiarize students with Realist writers in the tradition of French literature and to examine ways in which Realism helped define French literary thought in the nineteenth century.

FCH 304
FRENCH CIVILIZATION I
Undergraduate
A survey of French civilization from its Gallic origins to the end of the ancient regime, this course focuses primarily on the history and culture of France, although it accords special attention to broader international developments such as the crusades. Beyond the tensions and exchanges between Islam and Christianity, some of the other key subjects this course addresses are feudalism, the Renaissance, the wars of religion, the centralized monarchy, and the Enlightenment.

FCH 305
RENAISSANCE
Undergraduate
This course provides an overview of the literature of the French Renaissance with strong emphasis on its most distinguished writers. These may include Rabelais (novel), Ronsard and Du Bellay (poetry), and Montaigne (essays). The course also may treat some lesser literary figures such as D'Aubigne, Marot (poetry) and Garnier (theater). The course conveys a sense of the unfolding Renaissance aesthetic and objectives, ranging from the early exuberance of Rabelais to the later skepticism and caution of Montaigne. It chronicles the self-conscious attempt of French authors to create a literature that rivaled that of Greco-Roman antiquity.

FCH 306
SEVENTEENTH-CENTURY FRANCE
Undergraduate
This course is an overview of French literature of the classical period, i.e., the literature largely written during the reign of Louis XIV. The course approaches materials by genre covering theater (Corneille, Racine, Moliere), poetry (La Fontaine, Malherbe, Regnier, Tristan l’Hermite), the novel (Mme de LaFayette, Sorel, Furetiere), literary theory (Boileau), and the moralistes (Pascal, La RocheFoucauld, La Bruyere).

FCH 307
THE AGE OF ENLIGHTENMENT
Undergraduate
This course presents the French Enlightenment as a period of multiple liberations: the promotion of political liberty (the revolt against the absolutist monarchy), the condemnation of human slavery (most particularly in the colonies where it was rampant), the rejection of religious authority and dogma in the secular sphere (critique of the Roman Catholic Church and the advocacy of deism and atheism in place of Christianity), the exaltation of sensuality and the passions (libertine literature and the contestation of monogamy). The course examines the new cultural ideal, the philosophe, who fills the salons of the period. The course ends with several texts from the French Revolution. Most of the readings come from key writers of the period such as Diderot, Montesquieu, Rousseau and Voltaire, though they also include other writers of lesser magnitude.

FCH 308
THE ROMANTIC MOVEMENT
Undergraduate
This course is a study of the works of Lamartine, Hugo, Vigny, and Musset, all major representatives of the Romantic movement in France.
FCH 309
THE FRENCH NOVEL
Undergraduate
Topics may include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel. This course examines the structures and situations that often typify the novel of apprenticeship and asks why the genre has enjoyed such a continuous popularity among readers over so many centuries. It treats topics such as the transformation of the hero/heroine, the relationship of the greater society to the protagonist, the trials of the protagonist, the cultural ideals embodied by the hero/heroine, and the implications of the fate of the main characters.

FCH 310
FRENCH DRAMA
Undergraduate
Topics include: classical drama; romantic drama; contemporary drama. This course examines theatre practices in France across several centuries looking at the various art forms that populated its stages: tragedy, comedy, existentialist theatre, theatre of the absurd and contemporary creations. In addition to reading plays spanning from the 17th to the 21st centuries and putting these in their social context students may view filmed productions of theatre performances and attend plays if possible. Authors might include Racine, Corneille, Moliere, Beaumarchais, Musset, Ionesco, Beckett and Reza.

FCH 311
FRENCH POETRY
Undergraduate
Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets. This course is an exploration of French poetry. It provides a history of French poetry while outlining the socio-historical and intellectual context for poetic creation. The course is also an introduction to the techniques of literary analysis as characterized by ?explication de texte,? a close reading that looks at the various components of texts: the imagery, the style, rhyme scheme, structure, characterization, tone, etc. leading to an understanding of the overall structure and meaning of the piece.

FCH 312
TWENTIETH CENTURY WRITERS
Undergraduate
This course introduces students to some of the most prestigious literary figures of the earlier period of the past century, such as Proust, Gide, Malraux, Camus, Sartre, and De Beauvoir. It explores their work in the novel and, when appropriate, in other genres. The course situates the texts and authors within an historical and stylistic framework that indicates major twentieth-century concerns.

FCH 313
THE SURREALIST REVOLUTION
Undergraduate
Nerval, Lautreamont, Breton, Aragon; Films of Man Ray and Bunel. This course takes an interdisciplinary approach to the surrealist movement because the European avant-garde of the early twentieth century used all modes of expression to convey their artistic theories. The course explores surrealist writings and art of all kinds to assess the totality of surrealistic modes of expression.

FCH 314
CONTEMPORARY FRENCH WRITERS
Undergraduate
This course is an exploration of texts written by French authors since the 1940?s. Students are taught to analyze a series of novels and short stories as well as the themes they develop and the narrative strategies they adopt. This course will also study the theories that have shaped the period: existentialism, the New Novel, feminism, the literature of transgression, the question of being and language, and Neo-Realism. Authors might include: Bataille, Perec, Blanchot, Yourcenar, Duras, Tournier, LeClezio, Guibert, Cixous, Ernaux, Tremblay, Conde, Ben Jelloun.

FCH 315
CONTEMPORARY FRENCH CRITICISM
Undergraduate
Topics include: structuralist critics; feminist critics; post-modernist critics.
FCH 316
FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN
Undergraduate
Classic and emerging writers of these regions. This course might include the well-known contemporary Haitian writer Dany Laferriere in a multi-faceted course examining the historical, cultural, and political background of the Haitian question. Other iterations of this course might include writings of authors from Francophone Africa or the Caribbean studied within the context of their nations and of the francophone world.

FCH 317
THE LITERATURE OF FRENCH CANADA
Undergraduate
Classic and contemporary French-Canadian writers. This course is an introduction to established authors of French Canada whose works are considered classics. Authors to be read might include Louis Hemon, Gabrielle Roy, Yves Theriault, Antonine Maillet, Anne Hebert, and Michel Tremblay. While acquainting students with several forms of Canadian literature, this course intends also to familiarize them with many aspects of French Canadian culture in all its diversity. Topics covered might include the way of life in the wilderness of the Eastern Canadian forest; the disenfranchised in Montreal; Eskimo life and the Inuit culture; < le grand derangement > ?the removal of the Acadians from their land, now known as Nova Scotia, to Louisiana.

FCH 319
FRENCH/FRANCOPHONE WOMEN WRITERS
Undergraduate
This course is an exploration of recent texts written in French by a variety of women across the globe. It gives students a chance to discuss not only the place of these women within their own society but also the specificity of their relationship to the French culture and language. From France, to Senegal, Benin, Congo, Algeria, Quebec, Egypt, Vietnam and Guadeloupe, the course will allow students to travel across socio-geopolitical borders and to explore the narrative strategies specific to these women. A few films might further contextualize the material.

FCH 320
FRENCH FOR BUSINESS
Undergraduate
Advanced preparation for the use of French in the business world. This course focuses on acquiring business vocabulary, skills for dealing with French business partners, and the ability to comprehend specialized business journals and reports. It prepares students for using their knowledge of French in a business context.

FCH 321
TRANSLATION
Undergraduate
Fundamental principles of translation and acquisition of practical skills involved in translating original documents from French into English and from English into French. Three years of college French recommended. The main objective of this course is to introduce the students to the fundamental principles of translation and to help them acquire the techniques for translating a whole range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of the latest technologies such as web-based dictionaries, and provides an introduction to translating technical documents in medicine, law, sports, travel, and business.

FCH 322
FRENCH GRAMMAR AND USAGE
Undergraduate
This course is an examination of French grammar as a linguistic system and of notions of "standard" in written and spoken French. Recommended for future teachers and students interested in grammatical analysis.
FCH 323
TRANSLATION II
Undergraduate
Continued introduction to fundamental principles of translation and acquisition of techniques for translating a range of texts from French into English and from English into French. The main objective of this course is to introduce the students to the fundamental principles of translation and to help them acquire the techniques for translating a whole range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of translation theory and provides an introduction to translating documents in theory, journalism, hotel management, psychoanalysis, literature, advertising, cooking and cinema.

FCH 324
TRANSLATION III
Undergraduate
Intensive practice of French-English and English-French translation. The course includes a major portfolio project requiring collaborative work. It aims to equip students with proficiency in translating at an advanced level, to train them to locate and make appropriate use of reference material from a variety of sources, to write introductions and footnotes as needed, to help them understand the importance of familiarity with a subject matter and distinguish between various lexical fields, to teach them to comprehend and effectively manage the linguistic and cultural aspects of language transfer. Furthermore, the course provides students with an understanding of professional expectations in the field of translation.

FCH 326
FRENCH STYLISTICS
Undergraduate
An intensive writing course, providing rhetorical, linguistic, and literary analysis of varied styles of writing.

FCH 329
FRENCH CINEMA
Undergraduate
Topics in French film from its origins to the present day. A course on iconic French filmmakers of the last fifty years and their contributions to a creative reorientation of cinema in the context of the history of French cinema and film criticism. Topics include: the New Wave and after, growing up in France and its colonies, love and eroticism, the representation of women in cinema, women directors and the deconstruction of female stereotypes, living on the margins, cinema of the suburbs, social renegades, the construction of the city. Through readings, class discussions, and film viewings, students gain an understanding of French films in light of their cultural and historical contexts. Directors studied might include: Francois Truffaut, Jean-Luc Godard, Diane Kurys, Claire Denis, Patrice Leconte, Andre Techine, Agnes Varda, Bertrand Blier, Matthieu Kassowitz and Sylvain Chomet. Students learn the basic concepts of film aesthetics necessary to an appreciation of cinema, along with a critical vocabulary in French for analyzing and discussing films.

FCH 332
FRENCH CIVILIZATION II
Undergraduate
Intellectual, political and social background from the rise of Napoleon to the current time. It describes the various political mutations of France from the Empire of the early nineteenth century to today?s Fifth Republic. The course presents critical social, literary, and artistic developments throughout the two centuries under consideration. A sample of cultural topics includes impressionism and cubism in art, and romanticism, realism and existentialism in literature. The course devotes significant attention to the creation of late-nineteenth century and early twentieth-century Paris?a time of French cultural pre-eminence in the West?when the city initially under Haussmann?s urban renovation projects began to take on the physical form that so many people associate with Paris today.

FCH 340
CONTEMPORARY FRANCE
Undergraduate
This course is an introduction to contemporary France through articles, books, films, web sites, and, when possible, direct interaction with French people via social networks. Although the course emphasizes France as it is today, it also seeks to point out underlying cultural/historical factors that govern French responses to particular situations. The course covers numerous topics from both high and popular culture. When timely, it makes comparisons between diverging French and American cultural perspectives.
FCH 341
INTRODUCTION TO FRENCH LITERATURE I
Undergraduate
(Required of all majors.) Taught in Autumn quarter every two years on a rotating basis with FCH 342. This course is a survey of French Literature from the Middle Ages through the seventeenth century (le grand siècle). It treats some of the major authors/texts of the medieval, renaissance and classical periods of French literature and offers readings from a variety of genres: poetry (epic, lay, ballad, sonnet), theater (religious, profane, farce, high drama), and prose (philosophical musings, aphorisms, essays, novel). The course provides an overview of approximately six hundred years of French literature.

FCH 342
INTRODUCTION TO FRENCH LITERATURE II
Undergraduate
Survey of French literature of the 18th and 19th centuries. (Required of all majors). Taught in Autumn quarter every two years on a rotating basis with FCH 341. By analyzing works and excerpts from major writings of the French canon, the course treats the progression from the Age of Enlightenment, putting an emphasis on the themes of love and virtue, to pre-Romanticism, and the libertine culture. The course then provides an overview of Romanticism and later nineteenth-century developments such as Symbolism in poetry and modernity. Authors to be read may include Rousseau, Sade, Laclos, Nerval, Hugo, Lamartine, Vigny, Balzac, Sand, Colet, Mme. d’Agouet, Mme. de Stael, and Flaubert.

FCH 345
THE AFRICAN PRESENCE IN FRANCE
Undergraduate
This course offers a cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. It is designed to increase students' understanding of immigration in France as experienced by a variety of African communities. Through sociological documentaries, literature, manifestoes, legal documents, music, films and cooking, students will learn about the experiences and reshaped identities of first and second generation immigrants from both Western and Northern Africa. A brief introduction to the history of immigration in France and to the French colonization and subsequent decolonization of Africa will be provided. Countries discussed include Algeria, Morocco, Tunisia, Senegal, Cameroun, and Mali.

FCH 350
FRENCH PHONOLOGY AND PHONETICS
Undergraduate
An in-depth study of the language's sound system and intensive pronunciation practice. (Required of all majors) This course is designed to introduce advanced students to the theory of the French language sound system and in practice, to help them improve their pronunciation. Lectures, discussions, practice sessions and group work are based on a main manual and various handouts as well as recordings of French speakers.

FCH 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in French. Students must have the equivalent of 106 or higher ability in French to take this two credit component. Please contact the Department of Modern Languages if you have questions about these courses or about language placement.

FCH 397
SPECIAL TOPICS IN FRENCH
Undergraduate
Courses on topics not covered by the traditional curriculum. Courses might include: the question of identity in literature; fables, fairy tales and short stories; Islam, racism and immigration; the literature of transgression; autobiography in literature; French film-making.

FCH 398
STUDY ABROAD
Undergraduate
Variable credit. Students participating in the Institute of European Studies will be allowed to count a total of three courses (semester program) or five courses (year program) towards their major or minor requirements.
FCH 399
INDEPENDENT STUDY
Undergraduate
Variable credit. Permission of chair and instructor required.

FCH 401
THE MIDDLE AGES
Graduate
This course is an overview of medieval literature such as Chanson de Roland and the poetry of Francois Villon. It looks at the diverse literary genres that characterize medieval literature and create its diversity. Some genres, such as the roman courtois, are given special attention because of their singular importance. Readings are placed within the cultural context of their times in order to understand the values they convey.

FCH 402
SURVEY OF 17TH AND 18TH CENTURY FRENCH LITERATURE
Graduate
This course follows themes developed across two centuries of French literature from 1600 to the end of the ancien regime. It looks at notions such as religion and disbelief as they move through philosophers like Descartes, the French moralistes and on to the philosophes; it presents conceptions of theater, the novel, and the essay as they evolve from the grand siecle to the siecle des lumieres. In short, it looks at the unfolding of classical French literature in a historical context that moves from royal absolutism to the demands of political and intellectual freedom that arise during the Enlightenment.

FCH 403
ROMANTI CS, REALISTS AND REBELS
Graduate
This course is an introduction to the writings of the French Realists and to nineteenth-century reactions against Romanticism. Readings might include works by Balzac, Baudelaire, Rimbaud and Flaubert. The course objectives are to familiarize students with Realist writers in the tradition of French literature and to examine ways in which Realism helped define French literary thought in the nineteenth century.

FCH 404
FRENCH CIVILIZATION I
Graduate
A survey of French civilization from its Gallic origins to the end of the ancien regime, this course focuses primarily on the history and culture of France, although it accords special attention to broader international developments such as the crusades. Beyond the tensions and exchanges between Islam and Christianity, some of the other key subjects this course addresses are feudalism, the Renaissance, the wars of religion, the centralized monarchy, and the Enlightenment.

FCH 405
RENAISSANCE
Graduate
This course provides an overview of the literature of the French Renaissance with strong emphasis on its most distinguished writers. These may include Rabelais (novel), Ronsard and Du Bellay (poetry), and Montaigne (essays). The course also may treat some lesser literary figures such as D'Aubigne, Marot (poetry) and Garnier (theater). The course conveys a sense of the unfolding Renaissance aesthetic and objectives, ranging from the early exuberance of Rabelais to the later skepticism and caution of Montaigne. It chronicles the self-conscious attempt of French authors to create a literature that rivaled that of Greco-Roman antiquity.

FCH 406
SEVENTEENTH-CENTURY FRANCE
Graduate
This course is an overview of French literature of the classical period, i.e., the literature largely written during the reign of Louis XIV. The course approaches materials by genre covering theater (Corneille, Racine, Moliere), poetry (La Fontaine, Malherbe, Regnier, Tristan l'Hermite), the novel (Mme de LaFayette, Sorel, Furetiere), literary theory (Boileau), and the moralistes (Pascal, La Rochefoucauld, La Bruyere).
FCH 407
AGE OF ENLIGHTENMENT
Graduate
This course presents the French Enlightenment as a period of multiple liberations: the promotion of political liberty (the revolt against the absolutist monarchy), the condemnation of human slavery (most particularly in the colonies where it was rampant), the rejection of religious authority and dogma in the secular sphere (critique of the Roman Catholic Church and the advocacy of deism and atheism in place of Christianity), the exaltation of sensuality and the passions (libertine literature and the contestation of monogamy). The course examines the new cultural ideal, the philosophe, who fills the salons of the period. The course ends with several texts from the French Revolution. Most of the readings come from key writers of the period such as Diderot, Montesquieu, Rousseau and Voltaire, though they also include other writers of lesser magnitude.

FCH 408
THE ROMANTIC MOVEMENT
Graduate
This course is a study of the works of Lamartine, Hugo, Vigny, and Musset, all major representatives of the Romantic movement in France.

FCH 409
THE FRENCH NOVEL
Graduate
Topics may include: 17th- and 18th-century novel; world of Balzac; Flaubert and Stendhal; Realism and Naturalism; contemporary novelists; survey of the novel. This course examines the structures and situations that often typify the novel of apprenticeship and asks why the genre has enjoyed such a continuous popularity among readers over so many centuries. It treats topics such as the transformation of the hero/heroine, the relationship of the greater society to the protagonist, the trials of the protagonist, the cultural ideals embodied by the hero/heroine, and the implications of the fate of the main characters.

FCH 410
FRENCH DRAMA
Graduate
Topics include: classical drama; romantic drama; contemporary drama. This course examines theatre practices in France across several centuries looking at the various art forms that populated its stages: tragedy, comedy, existentialist theatre, theatre of the absurd and contemporary creations. In addition to reading plays spanning from the 17th to the 21st centuries and putting these in their social context students may view filmed productions of theatre performances and attend plays if possible. Authors might include Racine, Corneille, Moliere, Beaumarchais, Musset, Ionesco, Beckett and Reza.

FCH 411
FRENCH POETRY
Graduate
Topics include: form and substance; Baudelaire, Rimbaud, Verlaine, Mallarme; contemporary poets. This course is an exploration of French poetry. It provides a history of French poetry while outlining the socio-historical and intellectual context for poetic creation. The course is also an introduction to the techniques of literary analysis as characterized by ?explication de texte,? a close reading that looks at the various components of texts: the imagery, the style, rhyme scheme, structure, characterization, tone, etc. leading to an understanding of the overall structure and meaning of the piece.

FCH 412
TWENTIETH CENTURY WRITERS
Graduate
This course introduces students to some of the most prestigious literary figures of the earlier period of the past century, such as Proust, Gide, Malraux, Camus, Sartre, and De Beauvoir. It explores their work in the novel and, when appropriate, in other genres. The course situates the texts and authors within an historical and stylistic framework that indicates major twentieth-century concerns.

FCH 413
THE SURREALIST REVOLUTION
Graduate
Nerval, Lautreamont, Breton, Aragon; Films of Man Ray and Bu?el. This course takes an interdisciplinary approach to the surrealist movement because the European avant-garde of the early twentieth century used all modes of expression to convey their artistic theories. The course explores surrealist writings and art of all kinds to assess the totality of surrealist modes of expression.
FCH 414
CONTEMPORARY FRENCH WRITERS
Graduate
This course is an exploration of texts written by French authors since the 1940s. Students are taught to analyze a series of novels and short stories as well as the themes they develop and the narrative strategies they adopt. This course will also study the theories that have shaped the period: existentialism, the New Novel, feminism, the literature of transgression, the question of being and language, and Neo-Realism. Authors might include: Bataille, Perec, Blanchot, Yourcenar, Duras, Tournier, LeCleuzio, Guibert, Cixous, Ernaux, Tremblay, Conde, Ben Jelloun.

FCH 415
CONTEMPORARY FRENCH CRITICISM
Graduate
Topics include: structuralist critics; feminist critics; post-modernist critics.

FCH 416
FRANCOPHONE LITERATURE OF AFRICA AND THE CARIBBEAN
Graduate
Classic and emerging writers of these regions. This course might include the well-known contemporary Haitian writer Dany Laferriere in a multi-faceted course examining the historical, cultural, and political background of the Haitian question. Other iterations of this course might include writings of authors from Francophone Africa or the Caribbean studied within the context of their nations and of the francophone world.

FCH 417
THE LITERATURE OF FRENCH CANADA
Graduate
Classic and contemporary French-Canadian writers. This course is an introduction to established authors of French Canada whose works are considered classics. Authors to be read might include Louis Hemon, Gabrielle Roy, Yves Theriault, Antonine Maillet, Anne Hebert, and Michel Tremblay. While acquainting students with several forms of Canadian literature, this course intends also to familiarize them with many aspects of French Canadian culture in all its diversity. Topics covered might include the way of life in the wilderness of the Eastern Canadian forest; the disenfranchised in Montreal; Eskimo life and the Inuit culture; < le grand derangement > ?the removal of the Acadians from their land, now known as Nova Scotia, to Louisiana.

FCH 419
FRENCH WOMEN WRITERS
Graduate
This course is an exploration of recent texts written in French by a variety of women across the globe. It gives students a chance to discuss not only the place of these women within their own society but also the specificity of their relationship to the French culture and language. From France, to Senegal, Benin, Congo, Algeria, Quebec, Egypt, Vietnam and Guadeloupe, the course will allow students to travel across socio-geopolitical borders and to explore the narrative strategies specific to these women. A few films might further contextualize the material.

FCH 420
FRENCH FOR BUSINESS
Graduate
Advanced preparation for the use of French in the business world. This course focuses on acquiring business vocabulary, skills for dealing with French business partners, and the ability to comprehend specialized business journals and reports. It prepares students for using their knowledge of French in a business context.

FCH 421
TRANSLATION
Graduate
Fundamental principles of translation and acquisition of practical skills involved in translating original documents from French into English and from English into French. Three years of college French recommended. The main objective of this course is to introduce the students to the fundamental principles of translation and to help them acquire the techniques for translating a whole range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. Through a variety of translation assignments, students will be able to review French grammar, work within different registers and learn appropriate vocabulary, expand their reading and writing abilities in French and develop a sense of responsibility for the text translated. This course presents a survey of the latest technologies such as web-based dictionaries, and provides an introduction to translating technical documents in medicine, law, sports, travel, and business.
This course is an examination of French grammar as a linguistic system and of notions of "standard" in written and spoken French. Recommended for future teachers and students interested in grammatical analysis.

Continued introduction to fundamental principles of translation and acquisition of techniques for translating a range of texts from French into English and from English into French. The main objective of this course is to introduce the students to the fundamental principles of translation and to help them acquire the techniques for translating a whole range of texts from French into English, and to a lesser extent, from English into French, thus equipping them with proficiency in translating at an advanced level. FCH 445
THE AFRICAN PRESENCE IN FRANCE
Graduate
This course offers a cultural studies perspective on the immigrant populations in France since the end of the colonial empire in Africa. It is designed to increase students' understanding of immigration in France as experienced by a variety of African communities. Through sociological documentaries, literature, manifestoes, legal documents, music, films and cooking, students will learn about the experiences and reshaped identities of first and second generation immigrants from both Western and Northern Africa. A brief introduction to the history of immigration in France and to the French colonization and subsequent decolonization of Africa will be provided. Countries discussed include Algeria, Morocco, Tunisia, Senegal, Cameroun, and Mali.

FCH 450
FRENCH PHONOLOGY AND PHONETICS
Graduate
An in-depth study of the language's sound system and intensive pronunciation practice. (Required of all majors) This course is designed to introduce advanced students to the theory of the French language sound system and in practice, to help them improve their pronunciation. Lectures, discussions, practice sessions and group work are based on a main manual and various handouts as well as recordings of French speakers.

FCH 491
FRENCH FOR READING
Graduate
Intensive review of basics of French grammar, vocabulary and sentence structure, for reading knowledge of scholarly articles in French.

FCH 496
PRACTICUM IN FRENCH INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.
FIN 202
QUANTITATIVE REASONING
Undergraduate
This course is designed to provide students with an overview of basic statistical tools of financial analysis. Students will become familiar with the design and application of spreadsheet models for the analysis of financial data and tests of hypotheses. FIN 310 is a prerequisite for this class.

FIN 290
FINANCE FOR NON-BUSINESS MAJORS
Undergraduate
This course will provide to non-business majors a foundation in the concepts and basic tools used in finance and financial management of the business firm, including time value of money, risk and return, interest rates and how companies raise money and reward their investors. Students will be able to understand at a basic level the financial statements, ratios and performance measures and financial markets and institutions they are likely to encounter in a general business environment. Students will also learn how to analyze and make more effective the operations of the firm from a financial perspective.

FIN 310
INTRODUCTION TO FINANCE
Undergraduate
This course introduces students to the logic, principles, institutions, and terminology of finance. The goal of the course is to provide students with a basic understanding of the role of finance and its functions. It is designed to familiarize the students with tools necessary for making sound financial decisions, both at a personal level and at an enterprise level.

ACC 101, ACC 102, ECO 105, ECO 106 and (MAT 135, MAT 136 and MAT 137 or equivalents) are prerequisites for this class.

FIN 311
CORPORATE FINANCE
Undergraduate
The goal of the course is to provide students with the basic tools and theoretical background necessary to understand the corporate financial decision making process. Emphasis is on valuation principles with application to bonds, stocks, and capital budgeting as well as issues involving the capital structure, working capital, and dividend policy.

FIN 310 and an intended or declared Finance major or minor is a prerequisite for this class.
FIN 313
INVESTMENT BANKING
Undergraduate
This course is designed to provide students with a broad overview of investment banking, the structure of the industry, and analytical tools commonly used in the profession. Students who successfully complete the course will develop the skills necessary for an entry-level analyst position with an investment bank. Spreadsheet skills, valuation methods, company, deal and market analysis will be emphasized. The course will also foster the development of presentation and writing skills through group analysis and preparation of case studies.

FIN 310 is a prerequisite for this class.

FIN 320
MONEY AND BANKING
Undergraduate
The study of money and banking as a means to understanding how operations of our financial institutions affect functioning of our economic system and evaluation of monetary policies and goals.

FIN 310 is a prerequisite for this class.

FIN 323
COMMERCIAL BANKING
Undergraduate
The purpose of this course is to analyze the role of commercial banks in the financial system in order to understand the problems and issues confronting bankers now and in the future. The nature of the business of banking will be discussed with particular emphasis on bank mergers and acquisitions; competition from non-banking firms; understanding government policy and how that policy could influence the behavior of banks; measuring and evaluating bank performance; using asset and liability management techniques to gain a greater understanding of the risks that banks face and how they attempt to manage those risks.

FIN 320 is a prerequisite for this class.

FIN 330
INVESTMENTS: THEORY & PRACTICE
Undergraduate
This course focuses on Investment principles and problems. It seeks to develop the student's perception of risks and opportunities in investment instruments and markets. It will inform their description of the markets and the operational effects of current financial events upon the various markets.

FIN 202 and 320 are a prerequisite for this class.

FIN 333
FINANCIAL STATEMENTS ANALYSIS
Undergraduate

FIN 311 is a prerequisite for this class.

FIN 335
PORTFOLIO MANAGEMENT
Undergraduate
Theories and techniques to achieve superior selection and management of securities portfolios. Review and evaluation of significant literature. Problems of timing and strategies in response to changing economic and financial conditions.

FIN 330 is a prerequisite for this class.
FIN 340
INTERNATIONAL FINANCE
Undergraduate
The objectives of this course include: understanding the effect of political and economic factors on the financial decision-making of the firm, determining the major factors influencing currency value; analyzing and managing the spectrum of risks arising from a firm's international operations; and acquiring knowledge of the international financial system and the major players in that system.

FIN 320 is a prerequisite for this class.

FIN 350
REAL ESTATE ANALYSIS
Undergraduate
This course introduces essential institutional, legal, regulatory, and financial aspects of real estate in the U.S. economy and financial system. The course incorporates demographic data for real estate market analysis and includes an exercise in land use planning. PREREQUISITE(S): Junior standing

FIN 310 is a prerequisite for this class.

FIN 360
IPOs & VENTURE CAPITAL
Undergraduate
IPOs and Venture Capital will explore equity financing alternatives for private companies, including their final funding step as a private company - their initial public offering or IPO, when they go public. Although the course has some quantitative elements, the focus will typically be on the analytics - on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest and optimize incentives. The main emphasis is on the U.S., but fund-raising methods and options in other countries also will be covered. This course should be useful for those interested in investment banking, venture capital, private equity, or securities law, or those that hope to have a start-up of their own someday.

FIN 310 is a prerequisite for this class.

FIN 362
RISK MANAGEMENT
Undergraduate
Theories and techniques of risk management that employ statistical techniques which enhance risk decision-making. This course develops a framework of analysis that can be applied by corporate or investment risk managers.

FIN 320 is a prerequisite for this class.

FIN 363
DERIVATIVES: PRICING & APPLICATIONS
Undergraduate
This is an advanced course that focuses on the pricing models for the four derivative instruments: forwards, futures, options and swaps. The first part of the course is devoted to the two general classes of derivative pricing models: discrete time and continuous time, with each model's properties discussed in detail. These models are then applied to a range of realistic pricing situations which include swaps, exotic options and fixed income derivatives. The course concludes with a detailed examination of value at risk.

FIN 330 is a prerequisite for this class.

FIN 365
PRINCIPLES OF RISK & INSURANCE
Undergraduate
This course surveys fundamental principles of risk, the risk management process, and insurance as a systematic approach to transfer and finance risk. It examines how insurance offers protection against major risks that firms and individuals face, how the insurance market is structured, and how and why the industry is regulated. This course also delves into theories and philosophies that provide insights into how the risk management industry functions in the larger society. Emphasis will be placed on understanding that insurance is just one of the techniques to be relied upon in planning a comprehensive risk management program.

FIN 317 is a prerequisite for this class.
FIN 366
FINANCIAL MODELING
Undergraduate
This course will focus on the use of EXCEL in implementing financial theory to solve practical, real world problems in finance.
FIN 311 and FIN 330 are a prerequisite for this class.

FIN 367
PROPERTY & LIABILITY INSURANCE
Undergraduate
This course identifies property and liability loss exposures that corporations commonly face and examines how they manage these exposures. The theories and principles governing insurance contracts addressing these risks are then discussed in detail. The course also offers cases and data for an analysis of the commercial property liability Insurance and Reinsurance industry and recent market performance.
FIN 365 is a prerequisite for this class.

FIN 368
INSURANCE INDUSTRY STRUCTURE & OPERATIONS
Undergraduate
The course provides a study of the industrial organization of the evolving Insurance and financial services markets. Students are exposed to the structure, conduct and performance of the US and selected non-US markets. Students also develop an understanding of the state of captive developments and other alternative market participants.
BLW 201, MAT 260, MAT 261, MAT 351, MAT 352, MAT 353, MAT 361, MAT 362, MAT 363, FIN 320, FIN 362, and FIN 365 are prerequisites for this class.

FIN 380
CASES IN FINANCIAL DECISION MAKING
Undergraduate
This is the capstone course for students majoring in Finance. The course applies the case study methodology to hone the student's analytical skills with applied finance issues, as well as to further develop verbal and written communication skills, the ability to work effectively within teams, and to engage in reasoned debate. This course will provide students the opportunity to apply and integrate the knowledge acquired in their previous finance courses.
FIN 311, FIN 330, FIN 333, FIN 362 and (WRD 202 or WRD 204 or WRD 206 or WRD 301) are a prerequisite for this class.

FIN 381
BEHAVIORAL FINANCE
Undergraduate
The primary objective of this course is to better understand investor behavior, return predictability in asset markets, and corporate decisions by considering behavioral aspects of decision making. We will discuss market efficiency, psychology of decision making, anomalies, investor behavior, limits of arbitrage, and behavioral corporate finance.
FIN 310 is a prerequisite for this class.

FIN 393
FINANCE INTERNSHIP
Undergraduate
An academically supervised working experience in a major financial institution. Registration in this program requires approval of the department internship director.
FIN 310 is a prerequisite for this class.
FIN 394
APPLIED INTERNATIONAL PORTFOLIO MANAGEMENT
Undergraduate
This class manages real-dollar scholarship endowment that focuses on investments in international stocks. The course setting is a real world, collaborative, interactive environment that reflects the decision making process of an institutional portfolio team. Students will gain direct exposure to the management of a long-term, institutional portfolio with a stated hurdle rate and cash flow objectives. The class will have an investment fund structure, complete with industry analysts, regional analysts and portfolio managers (from an organizational standpoint, students select from "professional job descriptions" each quarter. Students earn 4 credits over 2 continuous quarters. They can also inquire about staying on for a third quarter. In their first quarter, students choose between taking a Regional Analyst or Investment Analyst role. Different roles have different responsibilities and provide different experiences to the student. All analysts are provided with an analytical framework and professional level tools to conduct equity research. Investment Analysts value, recommend and defend their investment analysis and make equity recommendations to their peers. Regional Analysts focus on political, economic and cultural issues that might affect the investing environment in each region and industry. In their second quarter, students will be eligible to move to a Portfolio Management role, but they can also choose to remain an Analyst (subject to space fulfillment). Portfolio Managers take an active role in the selection of securities, asset allocation and portfolio analytics of the fund. They also serve as mentors to the new Analysts, guiding and facilitating the overall research. Each role is fully outlined in a separate document (called Roles & Responsibilities).

FIN 310 is a prerequisite for this class.

FIN 395
INVESTMENT SEMINAR
Undergraduate
Construction and management of an actual portfolio fund in a nine month seminar setting. Registration requires approval of the seminar director. By application.

FIN 320 and FIN 330 are a prerequisite for this class.

FIN 396
HONORS SEMINAR
Undergraduate
This a required course for all Honors Students in Finance. It is conducted on a year-long basis (Fall, Winter & Spring) for the benefit of the students in the program. Participants are required to attend all events sponsored by the class conductor. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the seminar's conductor.

Status as an Honors Finance student is a prerequisite for this class.

FIN 397
HONORS SEMINAR CONTINUATION
Undergraduate
This a required course for all Honors Students in Finance. It is conducted on a year-long basis (Fall, Winter & Spring) for the benefit of the students in the program. Participants are required to attend all events sponsored by the class conductor. These include, but are not limited to, distinguished speakers series, networking luncheons, current topics forums, communications and protocol workshops, field trips and community service programs. All students are required to complete an empirical analysis paper, utilizing databases available to the department, as assigned by the seminar's conductor.

Status as an Honors Finance student is a prerequisite for this class.

FIN 398
SPECIAL TOPICS
Undergraduate
Content and format of this course are variable. An in-depth study of current issues in finance. Subject matter will be indicated in class schedule.

FIN 310 is a prerequisite for this class.
FIN 399
INDEPENDENT STUDY
Undergraduate
Available to students of demonstrated capability for intensive independent work in finance.
Junior standing with at least 88 cumulative units is a prerequisite for this class.

FIN 400
FOUNDATIONS OF QUANTITATIVE ANALYSIS
Graduate
This course provides basic instruction in mathematical and statistical methods as a foundation for GSB 420 Applied Quantitative Analysis. This course will focus on strengthening students' algebra and calculus skills and provide basic instruction in statistical methods.

FIN 455
PRINCIPLES OF FINANCIAL MANAGEMENT
Graduate
This course provides an introduction to finance. The goal of the course is to provide students with the basic tools and the background necessary to understand and analyze the corporate financial decision-making process. The course is designed to familiarize accounting students with tools necessary for making sound financial decisions at the enterprise level. Topics covered include concepts in time value of money and their application to stock and bond valuation, capital budgeting, portfolio management, firm's capital structure, dividend policy, and derivative instruments.
Status as a graduate accountancy student is a prerequisite for this class.

FIN 500
UNIVERSITY EXPERIENCE: ACADEMIC AND BUSINESS CULTURE
Graduate
This course provides students with an understanding of how to be successful in the United States academically and professionally. The course covers concepts, methods, and tools necessary to face the challenges of studying and working in the U.S., paying particular attention to unique challenges faced by international students from Asia and other regions of the world.

FIN 501
ETHICS IN FINANCIAL MARKETS
Graduate
This seminar course will examine both ethical issues and conflicts of interest that face financial decision makers in today's business world. The class will feature case studies and guest speakers as the key teaching tools, supplemented by short lectures and student simulations/exercises. Each class period will be devoted to a different contest in which to consider topical issues. We will look at and discuss ethical issues facing financial services companies, corporates (both public and private), as well as not for profits. We will examine these issues, where applicable and relevant, from multiple perspectives: Board of Directors, Executive Management, Shareholders, Regulators, Suppliers and Customers, Competitors, Employees and Communities. Some of the discussion will purposefully consider the additional realities of differing culture and values in the international context.
FIN 523 is a prerequisite for this class.

FIN 510
ADVANCED MONETARY THEORY AND POLICY
Graduate
This course is designed to provide the analytical tools for a critical examination of monetary and fiscal policies together with their impact on economic activity in general, and on the commercial banking system in particular. Problems involving interest rates, the value of money and qualitative portfolio changes are examined in detail in the light of current theoretical contributions.
FIN 555 is a prerequisite for this class.
FIN 512
COMMERCIAL BANKING
Graduate
The objective of this course is to analyze the role of commercial banks in the financial system in order to understand the problems and issues confronting bankers now and in the future. The student will learn to measure and evaluate bank performance; understand how banking firms make their money and how this has been changing over time; understand the management of assets and liabilities, the valuation of bank mergers and acquisitions, and how government policy influences the behavior of commercial banking firms. The course applies traditional finance and strategic management concepts to the management of financial institutions. The emphasis will be on developing a toolkit to solve problems not only in commercial banks but also in other financial services firms. The student will develop proficiency in relevant financial concepts, analytical frameworks, data analysis, and techniques in the field of financial economics. The course consists of a blend of lectures, discussions, and case studies.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 513
MONEY AND CAPITAL MARKETS
Graduate
This course analyzes interest rates, foreign exchange rates, federal funds futures market, the operation and regulation of financial institutions, and the impact of Central Bank actions on securities markets and the economy. The educational objective of the course is to provide graduate business students with the opportunity to acquire a thorough understanding of the theoretical and applied concepts that determine the operations of the money and capital markets. When you finish this course you will be able to demonstrate how the release of economic news about the real sector and the conduct of monetary policy influence the pricing of assets (interest rates and foreign exchange rates); measure and evaluate the impact of central bank actions on securities markets and the economy; understand the importance of having an independent central bank for macroeconomic performance; measure and evaluate the price volatility of interest-bearing securities; and understand how central bank monetary and regulatory actions can affect the stability and soundness of financial institutions. This course is designed to achieve maximum student involvement in order to add the greatest amount of value to their graduate educational experience. The emphasis will be on developing a toolkit to solve problems that financial analysts and other researchers encounter in security markets and financial institutions. We desire to become proficient in certain financial market concepts, analytical frameworks, data analysis, and various techniques in the field of financial economics. Accordingly, the course is structured to include extensive reading, several written statistical assignments, and class discussions that are based on the readings. These written assignments have three objectives: to make sure that the reading material has been absorbed in full measure; to serve as the foundation for class discussions; and, to provide students with the opportunity to demonstrate their understanding of the substantive class material and the ability to apply this material in "real world" situations.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 523
INVESTMENT ANALYSIS
Graduate
This course provides an introduction to capital markets and financial instruments with an emphasis on security valuation. It is not a course on personal investing. The course builds on Fin 555 and covers relevant aspects of fixed-income markets, asset pricing, portfolio management, equity markets, and derivatives markets. The course provides background material for both Fin 662 (Derivatives Valuation) and Fin 675 (Cases in Investments and Financial Engineering).

FIN 555 and GSB 420 are prerequisites for this class.

FIN 524
FINANCIAL STATEMENT ANALYSIS
Graduate
This course provides an introduction to financial statement analysis from a global perspective by focusing on the International Financial Reporting Standards (IFRS). The emphasis is on the use of company financial reports to evaluate the historical, present, and prospective performance and financial soundness of a company for the purpose of financial decision-making.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 525
PORTFOLIO MANAGEMENT
Graduate
This course covers topics and techniques appropriate for institutional portfolio management. The course does not examine personal investment or personal portfolio management. The topics and readings are designed to be at the level of the portfolio management coverage in all the three levels of the CFA program.

FIN 523 is a prerequisite for this class.
This course provides an understanding of several topics that are important to successful completion of the CFA examination. The course will focus on equity valuation including valuation of closely held companies, real estate valuation, venture capital, behavioral finance, hedge funds, distressed debt, commodity futures, and benchmarks. The course will proceed from simple valuation models to those used to value assets wherein daily mark-to-market accounting is not available (e.g., real estate, venture capital, etc.).

FIN 523 is a prerequisite for this class.

Alternative investments are the fastest growing sector of the financial industry, and probably the least understood, including by many market professionals. Although the range of sophistication in people associated with alternative investments varies, it is more and more common to use them in investment strategies, either as direct investments, through funds of funds or structured products. The purpose of this course is to give students a good understanding and workable knowledge of the techniques that should be part of the toolkit of anyone investing in, analyzing and/or advising private and institutional clients on the inclusion of alternative investments in their portfolios. Because this course is geared for students wishing to pursue careers in Wealth Management or related fields, it will largely be taught from a practitioner's point of view. Throughout the course we will pay special attention to capital market trends as they relate to the various investment vehicles we discuss. We will also turn our attention to corporate governance issues as they pertain to alternative investment strategies.

FIN 523 is a prerequisite for this class.

Analysis of real estate investment opportunities and the characteristics that distinguish them from other assets. Emphasis is upon forecasting cash flows and estimating risk. Case analysis is an integral part of the course technique.

FIN 555 and GSB 420 are prerequisites for this class.

This course enables the student to apply the basic principles of corporate finance learned in Fin 555 and in Fin 553 to problems in corporate finance with the complexities encountered in practice. Through cases and discussion of topical issues, the course provides the student with an opportunity to analyze practical financial situations and problems. The course requires the student to be familiar with fundamental concepts such as valuation methods (WACC, Free Cash Flow and Capital Cash Flow, APV, Trading and Transaction Multiples), portfolio selection, CAPM, and analysis of capital structure. The course emphasis is sufficiently general so as to be of interest to a wide cross-section of students. At its most fundamental level, the course attempts to improve problem-solving skills that relate to problem definition, gathering and organizing the relevant information, developing feasible alternative courses of action, evaluating alternative choices, and recommending and defending the best course of action. In addition to analyzing specific problems or issues, the course will consider how these issues relate to the strategic objectives of the firm and examine the "big picture" assumptions that are used in the numerical calculations. FIN 553 is strongly recommended.

FIN 555 and GSB 420 are prerequisites for this class.

This is an experiential course focusing on investment analysis in the context of the hedge fund industry. The goal of this class is to give students working knowledge of the hedge fund industry by drawing upon the experience of simulated investment presentations to portfolio managers (in the classroom setting). It is designed to give students rigorous exposure to long/short equity strategies as a gateway to explore other fund strategies. Topics will include securities analysis, research strategies, short selling and portfolio management. The course will help students generate superior investment ideas by conducting creative, value-added research. Students will act as hedge fund analysts by working through the investment process: idea generation, analysis, and presentation, and should walk away with a working knowledge of the hedge fund industry.

FIN 523 is a prerequisite for this class.
FIN 553
ADVANCED CORPORATE FINANCE
Graduate

This course builds on Fin 555 and focuses on fundamental themes in corporate finance. Topics covered include the analysis of capital investments, valuation methods, cost of capital, real options, agency costs, corporate governance, payout policy, equity issues, hybrid forms of financing, and mergers and acquisitions. The main theme of the course is on valuation and the overall focus is on enhancing enterprise value. The course also uses several case studies to illustrate the application of finance theory to practical problems.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 555
FINANCIAL MANAGEMENT
Graduate

This course provides an introduction to concepts and techniques required to analyze and implement optimal financial decisions by firms and serves as the core course in the corporate finance sequence. The course focuses on the effect of time and uncertainty on investment and financing decisions. It develops a framework for corporate financial decision-making. Topics covered include basic discounting techniques, stock and bond valuation, capital budgeting, portfolio theory, asset pricing, and capital structure. The course uses several case studies to illustrate the application of finance theory to practical problems.

ACC 500 and ECO 555 and GSB 420, or equivalents, are prerequisites for this class.

FIN 557
INTERNATIONAL FINANCE
Graduate

This course examines the effect of political and economic factors on the financial decision-making of the firm. The objective of the course is to enable the student to i) utilize the knowledge of the determinants of currency values, and the mechanism through which they work, to forecast changes in currency values ii) to analyze and manage the spectrum of risks arising from a firm’s international operations and iii) to be familiar with how the international financial system works and with the major players in the system.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 558
MERGERS AND ACQUISITIONS
Graduate

The course provides an overview of common corporate restructuring strategies and the economic motives for undertaking them. Topics covered include mergers, acquisitions, friendly and hostile takeovers, financial re-capitalization, leveraged buyouts, management buyouts, going private, convertible securities, tracking-stock, spin-offs, split-ups, carve-outs and reorganization under bankruptcy, liquidation, and out-of-court restructuring. The course integrates corporate governance and agency dimensions, financial and strategic management aspects, and legal and accounting considerations into a unified framework. This framework is then used to investigate issues such as pre-merger planning, fact-finding, accounting and tax implications, anti-trust problems, post-merger integration, and the short-term and long-term shareholder wealth consequences of financial and organizational restructuring transactions. The course examines transactions that significantly affect a corporation’s assets, liabilities, and/or equity claims. Transactions will be examined from the perspectives of both the corporation (e.g. CFO and CEO) and the capital markets (e.g. investors). Common “arbitrage” trading strategies involving corporate transactions will also be discussed. A basic understanding of financial options and pricing is recommended.

FIN 555 and (FIN 551 or FIN 553) are prerequisites for this class.

FIN 559
SUSTAINABLE VALUE CREATION
Graduate

This course is designed to introduce the concept of sustainability to the process of value creation. The role of financial management has traditionally been defined as one of value maximization. A complex set of questions arises, however, as to whether such maximization is to be undertaken ‘unconstrained’ and from the perspective of the shareholders alone. For example, should the interests of others, including those of the customers, employees, society at large, the government, the environment, be regarded as constraints to such an endeavor? Some of the recent contributions to the field suggest that most assumptions of the traditionalists (those arguing that the only purpose of the firm is to serve the shareholders and maximize their wealth) do not hold in ‘the real world.’ Therefore, they conclude that it is necessary that all relevant interests be recognized and taken into account. However, the unanswered question is: ‘how does one do this?’ This course is designed to pave the way toward the answers to this question. Our goal therefore, is to develop the theoretical relationship that exists between finance and sustainability, and to explore the practical issues associated with its implementation. In plain language, we will learn how to make a business case for making investments in sustainable and socially responsible projects. More ambitiously, our objective will be to develop a framework for the evaluation of all long-term benefits and costs associated with a project.

DePaul University Winter/Spring/Summer 2014-2015 Page 686 of 1563
FIN 562
RISK MANAGEMENT
Graduate
This course examines risk management from a broad enterprise perspective by focusing on the various risks faced by a firm. The course covers various methods that can be used to minimize risk and its effect on firm value.

FIN 555 and GSB 420 are prerequisites for this class.

FIN 564
RISK MANAGEMENT FOR INDIVIDUALS, FAMILIES AND ENTITIES
Graduate
This course develops an analytical framework that employs the tools and techniques for managing risks that affect total wealth throughout the lifetime of an investor or throughout an extended period defined by a family's or entity's objectives. The course starts with insurance markets and insurance products. After the discussion on insurance as a risk management tool, the discussion shifts to topics in financial risk management, including risk tolerance and asset allocation in a mean-variance framework. The remainder of the course adopts an integrative framework for managing other risk factors; such as those generated by uncertain earnings, mortality and longevity - that are not present in an institutional investment setting and discusses the role of financial risk management and insurance products for hedging those risk factors. At the level of the individual, the course views total wealth as a combination of financial assets and human capital and develops portfolio allocations and strategies for risk management accordingly. For families and entities, the focus is on asset-liability management as a tool for portfolio allocation and risk management.

FIN 528 is a prerequisite for this class.

FIN 570
WEALTH MANAGEMENT BOOT CAMP
Graduate
This zero credit course is designed to familiarize the student with the depth and breadth of topics covered throughout the curriculum. The overriding theme of this boot camp is two-fold: (1) to instill and emphasize the importance of ethical conduct in a field best characterized by the element of trust. Entering students will receive a preview of the standards of practice and the importance of ethical conduct to their long-term success. (2) to provide the students a means of an in-depth evaluation of his/her decision to pursue the degree. The student will be provided the opportunity to evaluate suitability of the field and the degree for his/her future career goals. The course will be delivered over a Friday-Saturday period (9:00A.M. - 5:00P.M.) immediately prior to the start of the Fall and Spring quarters. It will be taught by the team of academic and industry directors of the program. Where appropriate, industry guest speakers will also be utilized.

FIN 571
FINANCING NEW VENTURES
Graduate
This course will focus on identifying, examining and evaluating various sources of original and growth capital. Emphasis will be on legal, financial and tax issues related to capital formation as well as specific problems experienced by the small-to-medium-sized firm undergoing rapid growth. Topics discussed will include financing startups, financial planning and strategy, going public, selling out and bankruptcy. A formal proposal for capital acquisition developed through field research will be required of each student. Cross-listed with MGT 571.

FIN 555 is a prerequisite for this class.

FIN 572
FINANCIAL PLANNING, CAPSTONE I
Graduate
This course serves as a capstone course for the multifaceted task of providing wealth management services to high net worth families. Wealth management encompasses assessing the changing financial needs of a family over time, providing financial services to help them achieve their goals, assisting in the implementation of the plans, the monitoring of the changing environment and family circumstances, and the periodic review of the financial plan. The course will review the general principles of financial planning, address the need for wealth management services, the objectives of the planning process and the analysis of personal financial statements. In addition, the marketing of wealth management services will be woven into the course, since knowledge of the subject matter is most valuable when it can be applied to actual families. Development of a strategy, utilizing the tools and techniques for managing risk, requires the use of many different components, which must be considered on a consolidated basis. The basic components can be broken down into: 1. General Principles of Financial Planning 2. Insurance Planning and Risk Management 3. Employee Benefits Planning 4. Investment Planning 5. Income Tax Planning 6. Retirement Planning 7. Estate Planning The course will emphasize the ethical and legal issues involved in maintaining and growing a wealth management services business. The course will be focused on a case study, in which financial plans, marketing plans, and revisions to those plans will be developed based on the changing needs of the family. Both written and oral presentations will be required. Can only be taken during the last quarter of study.
FIN 573
FINANCIAL PLANNING, CAPSTONE II
Graduate
This course serves as a capstone course for the multifaceted task of providing wealth management services to high net worth families. Wealth management encompasses assessing the changing financial needs of a family over time, providing financial services to help them achieve their goals, assisting in the implementation of the plans, the monitoring of the changing environment and family circumstances, and the periodic review of the financial plan. The course will review the general principles of financial planning, address the need for wealth management services, the objectives of the planning process and the analysis of personal financial statements. In addition, the marketing of wealth management services will be woven into the course, since knowledge of the subject matter is most valuable when it can be applied to actual families. Development of a strategy, utilizing the tools and techniques for managing risk, requires the use of many different components, which must be considered on a consolidated basis. The basic components can be broken down into: 1. General Principles of Financial Planning 2. Insurance Planning and Risk Management 3. Employee Benefits Planning 4. Investment Planning 5. Income Tax Planning 6. Retirement Planning 7. Estate Planning The course will emphasize the ethical and legal issues involved in maintaining and growing a wealth management services business. The course will be focused on a case study, in which financial plans, marketing plans, and revisions to those plans will be developed based on the changing needs of the family. Both written and oral presentations will be required. Can only be taken during the last quarter of study.

FIN 572 is a prerequisite for this class.

FIN 581
THE PSYCHOLOGY OF FINANCIAL DECISION MAKING
Graduate
This course studies the various behavioral strategies that people rely upon to make financial decisions. The course starts with a review of psychological research on intuitive judgment, belief formation, learning, memory, utility theory, risk attitudes, and choice over time. The course introduces concepts such as framing, heuristics, self-control, and conformity. These ideas are illustrated with practical applications to saving decisions, entrepreneurship, trust between financial advisors and their clients, and decision-making in groups. Class discussions are based on academic research.

FIN 555 is a prerequisite for this class

FIN 582
THE PSYCHOLOGY OF FINANCIAL MARKETS
Graduate
This course examines the structure and dynamics of asset prices in world financial markets from the perspectives of research in behavioral finance, portfolio management, and macroeconomic policy. Some prior learning in finance (preferably investments), economics and statistics, and a broad interest in the social sciences (psychology, sociology, history) are required. The course has use for investors and their advisors, as well as for anyone interested in financial history. Class discussions are based on academic research and accepted wisdom.

FIN 555 is a prerequisite for this class

FIN 583
BEHAVIORAL ASPECTS OF CORPORATE FINANCE
Graduate
This course examines selected aspects of investment and financing decisions made in corporations as well as some questions of corporate governance and organizational architecture. The course places special emphasis on corporate decision processes, i.e., on the psychological, sociological and organizational determinants of behavior (e.g., bureaucracy, management fads, or executive hubris). Class discussions are based on academic research.

FIN 555 is a prerequisite for this class

FIN 594
APPLIED INTERNATIONAL PORTFOLIO MANAGEMENT
Graduate
Students taking this class will analyze the economic, political and investing climate of each region and country that is available for investing outside of North America. This class is as much about asset allocation as stock selection. The portfolio should consist of investments in both developed and emerging markets with an overall goal of creating a diversified portfolio that is structured in a way to minimize risk and maximize returns. Investments can include common stock, and exchange traded funds. Students wishing to apply for admission to the course should send their inquiries to Jaimi Goodfriend at goodfriend.jaimi@gmail.com All MBA student of any concentration who have completed Finance 555 are encouraged to apply for entrance into the class. Prerequisite: FIN 555 (4 credit hours earned over 2 quarters)
FIN 595
INVESTMENT SEMINAR
Graduate
Construction and management of an actual portfolio fund in a nine month seminar setting. Registration requires approval of the seminar director based on applications due in the Spring quarter.

FIN 617
QUANTITATIVE METHODS
Graduate
This course provides the student with a comprehensive introduction to the mathematics of finance. The course will focus on applying mathematical concepts, quantitative tools, and modeling techniques to practical problems encountered in finance.
FIN 555 is a prerequisite for this class

FIN 660
IPOs AND VENTURE CAPITAL
Graduate
In IPOs and Venture Capital, we will explore equity financing alternatives for private companies, including their final funding step as a private company: their initial public offering or IPO, when they go public. Unlike many finance classes, this is not primarily a quantitative course. While there are some quantitative elements, the focus will typically be on the analytics: on contract design, optimal regulation, balancing various risks and objectives, and structuring a deal to minimize conflicts of interest and optimize incentives. Our focus will be largely on the U.S., but we will also cover fund-raising methods and options in other countries. We will work in part from Harvard Business School Case Studies. This course should be useful for those interested in investment banking, venture capital, private equity, or securities law, or those who hope to have a start-up of their own someday.

FIN 662
DERIVATIVES VALUATION
Graduate
This course focuses on the theory and practice of the valuation of derivative securities such as forward contracts, futures contracts, swaps, and options. The course also examines the underlying properties of each of these instruments and their use in managing the various risks faced by market participants.
FIN 523, FIN 555, and (GSB 400 or GSB 420) are prerequisites for this class.

FIN 675
CASES IN INVESTMENTS AND FINANCIAL ENGINEERING
Graduate
This course primarily uses case studies to illustrate the application of concepts learned in Fin 523 (Investment Analysis) and in Fin 662 (Derivatives Valuation). The topics covered in the course include the term structure of interest rates; portfolio management, asset pricing, and market efficiency; portfolio performance evaluation; option pricing; management of interest-rate risk, credit risk, foreign-exchange risk, and liquidity and basis risk with options, forwards, futures, and swaps; and enterprise risk management. The course will hone the student's analytical and writing skills through group analyses of case studies and preparation of (case) write-ups.
GSB 420, FIN 555, FIN 523, FIN 617 and FIN 662 are prerequisites for this class.

FIN 793
INTERNSHIP
Graduate
Knowledge acquired in the classroom is applied in an actual business environment through varied theoretical and basic assignments under supervision in industry, government or public finance.

FIN 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. In-depth study of current issues in finance. Subject matter will be indicated in class schedule. Offered variably.
FIN 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in finance.

FMS 401
ASYLUM AND REFUGEE LAW
Graduate

FMS 402
PRO-SEMINAR IN THE HISTORY OF FORCED MIGRATION
Graduate
This course covers the history of forced migration from the two world wars to contemporary waves of displaced people who flee as a result of environmental destruction, climate change, civil and military conflict. The course will also cover the evolution of global legal instruments that address different forms of displacement. The course ends with a look at protracted displacement and internally displacement.

FMS 403
HUMAN RIGHTS LAW
Graduate
This course specifically examines the legal instruments in place to help displaced people that arise not out of national or international multilateral law, but out of the principle of human rights; the principle that by virtue of being human, we deserve basic protection. The course will look at the historical evolution of this principle to legal principle, its challenges, and the ways in which it is being deployed to help displaced persons, internally and internationally.

FMS 450
SUMMER INTERNSHIP
Graduate
Students will spend part of their first summer either a) doing an internship at a local refugee-related organization or b) working at the Asylum clinic at DePaul University's Law School. Both these experiences will encourage them to ground their theoretical knowledge in the practice of working with refugee organizations and refugee populations.

FMS 490
PRACTICUM
Graduate
Year II. Student's personal choice will determine whether they work with a local organization or an international NGO. In both cases, the practicum will provide extensive field experience with and organization of diverse peoples in the US or overseas. The pedagogical intent is to enable them to use classroom theory learnt with their hands-on experiences. As with FMS 450, the choice of NGO will be with the approval of the Program Directory, they will work with selected point-persons, submit journal entries online and get online feedback with a designated RF&M faculty member.

GAM 200
PLAY
Undergraduate
Exploring the concept of "play" from a variety of disciplinary perspectives including sociology, anthropology, psychology, literary and theater studies and the arts, this course discusses "play" as a central force in cultural, social, artistic and personal development. It intends to raise awareness for the ways in which "play" can promote creativity, mental and emotional health, problem solving as well as personal and social change. It analyzes the role of "play" as an element of negotiation and reconciliation between disparate forces within the individual and with others.

GAM 201
HISTORY OF VIDEOGAMES
Undergraduate
This course provides an overview of the history of modern interactive entertainment starting with the early developments of the late 1940s up until the present day. The course covers five longitudinal perspectives, or themes. For each theme students will become familiar with notable game titles, events, people, technologies, game mechanics and genres.
This lecture course introduces students to the evolving forms, uses, and design of games. Topics covered include the relationship between game design and play, the role of games in fueling the technological imagination, the changing contexts in which games are designed and played (art, social impact, health, education), and the rise of the independent games sector. Students will produce weekly written responses to course material, lead a seminar discussion in small teams, and produce a final written or multimedia paper.

From "The Royal Game of Ur" (2500+ BCE) to "World of Warcraft" (2004), games have been a constant in human history. The forms of games, their experiential qualities, and their cultural significance have varied enormously from era to era and place to place. This class will examine particular games and game genres in their historical context using a case study format. We will focus on "indoor" games, those of chance and skill, as opposed to physical games and sports. The examples will be chosen (i) to have global scope and historic diversity, (ii) to relate to games that students will find familiar, and (iii) to raise particular issues in historical interpretation, the use of primary sources and changing concepts of leisure activity.

Environments such as social networking sites, multiplayer online games and other online communities are becoming an increasingly large part of how we work, play, and learn. This course introduces the fundamentals for the interdisciplinary study of cyberculture and online social behavior. By examining core scholarship in this area, together with analyzing an existing virtual world, game, or online community, students will learn to research and understand new technologically-enabled social forms as they are emerging. PREREQUISITE(S) WRD 104

This course approaches the study of computer games from three angles: first, as examples of media that can be analyzed and critiqued for their thematic elements, formal structure, plot and interactive appreciation; second, as complex software artifacts subject to technological constraints and the product of a labor-intensive design and implementation process; and third as a cultural artifact with behaviors and associations comparable in import to other popular art forms. Students will study the principles of game design and use them both to analyze existing games and to develop their own original game ideas. Students will also learn about the process of game development, starting from the game's narrative concept and moving to consideration of a game's components: the representation of the player, of artifacts, the virtual world that contains them and the interaction between them and the player.

This course provides students a practical foundation in game design with a focus on concept development, design decomposition, and prototyping. Using game design theory, analysis, physical prototyping, playtesting, and iteration students learn how to translate game ideas, themes, and metaphors into gameplay, game pitches, and design documents. Students will analyze and recognize play that exists in important games, stories, and other media.

Societies function based on normative ethics utilizing common sense to distinguish between ethical and unethical behavior. Most of us are not aware of the underlying theories when arriving at ethical judgments about right and wrong. However, the fast pace of progress in information technologies and digital entertainment creates an environment in which ethical challenges are particularly complex. In the eyes of many, games and movies are violent, offensive and immoral. This course will concentrate on analyzing the impact of digital entertainment on an individual and society. Implications of certain values embedded in games and movies will be discussed. Elements of the ethical code of conduct for a game or movie creator will be formulated. The issue of balancing individual creativity vs. cultural impact, particularly on children, will be discussed.
GAM 229  
**DESIGN WRITING AND PRESENTATION**  
Undergraduate  
This lecture course focuses on effective communication throughout the development process from writing game design documents to playtesting reports and postmortems. Special attention will be paid to the critical and analytical components of design writing and the clarity of articulation. A further emphasis is put on the preparation and delivery of engaging presentations, particularly game pitches.  
PREREQUISITE(S): GAM 226 and WRD 104

GAM 230  
**INTRO TO GAME PRODUCTION**  
Undergraduate  
Game development is a big business, and production teams can now exceed one hundred people. This course is an introduction to the production methods used in the game industry, and to the demanding role of the Producer on the game development team. Students will work to develop skills in team building, project presentation, organization, and dealing with people. Subjects covered include scheduling tools, collaborative software, project management, vendor relations, inter-departmental relations, and quality assurance. PREREQUISITE(S): none

GAM 231  
**HISTORY AND DESIGN OF ROLE-PLAYING GAMES**  
Undergraduate  
Students learn the history of role-playing games and the process of world-building to collaboratively design and develop their own games that advance the genre. Topics include the psychological and social opportunities unique to the genre, as well as its history from table-top, to live-action and massively multi-player. Class time consists of lectures, workdays, workshops, playtests, and critiques. PREREQUISITE(S): GAM 224 or GAM 226

GAM 240  
**PLAYGRAMMI NG**  
Undergraduate  
This workshop introduces computer programming to artists and game designers. Programming is an art, but before students can create masterpieces they first need to explore, play, and sketch with code. Students learn basic concepts and techniques of computation and apply these to craft gameplay experiences, improvisational experiments, and software toys. Students will author code from scratch and remix code to complete their weekly projects. No prior programming experience or knowledge is required. PREREQUISITE(S): None

GAM 244  
**GAME DEVELOPMENT I**  
Undergraduate  
This course provides students additional theory and practice with an emphasis on game design and storytelling for games. Students continue learning about game development processes and techniques and how to apply advanced game design principles to create components of a 2D game.

GAM 245  
**GAME DEVELOPMENT II**  
Undergraduate  
In this course students will develop skills in game design and development through the creation of a 2D digital game designed from a set of client based restrictions. Emphasis will be placed on teamwork and development pipelines for the design and creation of assets and systems. Students will use a combination of prototyping, storyboarding, user stories, character breakdowns, system breakdowns and flowcharts in the design portion of the game. We will be using Gamemaker Studio as the engine to develop and implement the game. The goals of all design done in this course will focus around designing for the needs of a client; solving problems identified by the client; and providing transparency via reports and milestone deliverables. PREREQUISITE(S): GAM 226 and (GAM 244 or CSC 241 or CSC 243)

GAM 250  
**DIGITAL SOUND FOR COMPUTER GAMES**  
Undergraduate  
Acquisition and computer representation of sound. Sound standards. Lossy and lossless compression. Synthesis and processing of acoustic signals. Acquisitions of physical acoustic signals. Microphone geometries. Introduction to Foley editing. Game specific topics include: game audio design patterns, interactive processing pipeline for digital audio, music sequencers for games, sound APIs.
GAM 312
GAME USABILITY AND PLAYTESTING
Undergraduate
The goal of game user research (GUR), which includes game usability and playtesting, is to collect unbiased game play data that will help design/development teams make better games. There are multiple GUR methods that work best at different points in the development cycle and it is the game user researcher's job to understand how and when to effectively use them. In this course students will learn a variety of methods for evaluating games, where in the development cycle they are applied, and perform common GUR evaluations including competitive reviews, heuristic evaluations, usability tests and playtesting. PREREQUISITE(S): IT 223 and GAM 244

GAM 329
PHYSICAL PROTOTYPING FOR GAMES
Undergraduate
This course will approach the study of Game Design with a focus on breaking designs into manageable elements and prototyping those elements in order to refine play. Students will learn how to develop game ideas and game systems with a focus on play procedures, rules, and designing for various types of possible players. Prototyping will involve various real world media in addition to paper write-ups and layouts. Students will engage in brainstorming exercises, develop game ideas and systems, and review and repurpose existing game mechanics. This course will help students find the balance between hard (planned logical) design and soft (more organic/emergent) design in order to develop compelling gameplay. PREREQUISITE(S): GAM 224

GAM 330
ADVANCED GAME PRODUCTION
Undergraduate
This course builds on the fundamentals covered in earlier courses (GAM230 or IS372/ECT372) by providing a practical, hands-on context in which students can learn the tools and techniques game producers use to manage and organize assets, workflows, tasks, bugs, resources, and personnel. In this course, students combine classroom lectures and lab time to learn production theory, tools, and techniques fundamental to successful game development. Through this experience, students learn the skills and knowledge needed to have an immediate, positive impact on game development. Topics include: the process to refine ideas for game concepts, gameplay, and narrative; quality assurance of subjective elements including gameplay and art; design and art outsourcing pipelines; and feedback strategies and community management. PREREQUISITE(S): GAM 230, IS 372 or ECT 372

GAM 333
THE BUSINESS OF GAMES
Undergraduate
This course gives an introduction to the business aspects of the game development industry, including development, publishing, distribution and marketing. Subjects covered include game development contracts, milestone-based development, management techniques, marketing, customer and community support, personnel, budgeting, outsourcing, pipelines, and external partnerships. PREREQUISITE(S): GAM 229

GAM 334
THE BUSINESS OF INDIE GAMES
Undergraduate
This class will explore how to successfully run an indie game company using an arsenal of best practices. Topics include how to write a game design document for marketability and a business plan for an indie studio, as well as how to build and maintain relationships with the media. Students will also gain an understanding of how indie games fit into the game industry as a whole. PREREQUISITE(S): GAM 229

GAM 340
PRACTICAL SCRIPTING FOR GAMES
Undergraduate
This workshop introduces game scripting to artists and game designers. A game script is a short list of commands that control something in a game, such as how a character moves, or an enemy's behavior. Students will learn to read, modify, and author scripts that generate and affect a variety of game elements over the course of weekly projects. PREREQUISITE(S): GAM 240 or CSC 241 or CSC 243

GAM 341
INTRODUCTION TO LEVEL DESIGN
Undergraduate
Level design is the art of creating believable environments, stages and missions for video games. This course explores topics including architecture, flow, pacing and puzzles. Using a 3D level editor, students will investigate technical design issues including the construction, texturing, lighting and scripting of modern game levels. The roles, duties and challenges of the level designer will also be discussed. PREREQUISITE(S): GAM 245
GAM 342
ADVANCED LEVEL DESIGN
Undergraduate
This class builds on topics covered in earlier courses, with a focus on creating believable worlds for videogames. This course emphasizes designing large exterior environments, advanced mission scripting, and integrated storytelling. Using a 3D level editor and formal level design process, students create fun, polished, memorable virtual worlds. PREREQUISITE(S): GAM 341 or GAM 392

GAM 350
PHYSICS FOR GAME DEVELOPERS
Undergraduate
The course concentrates on Newton's Laws of Motion, kinematics and kinetics. This theory will be applied to problems that a game programmer must understand e.g. collisions between objects, projectiles and their trajectories, real-time simulation of motion. Special objects such as cars, aircraft and ships will be discussed. Students will apply and implement laws of physics. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and MAT 150

GAM 351
EXPRESSIVE AUDIO SCRIPTING IN GAMES
Undergraduate
This workshop is for game designers, sound designers and programmers to learn how to creatively use audio in game engines. Students develop skills to effectively shape and manipulate game audio to achieve intended dramatic experiences. Topics include key terms and techniques, industry trends in game audio implementation, and how to advance the medium of games through audio. Students listen and critique each other's work, learning to assess game audio in terms of narrative, aesthetics and quality.

GAM 353
TOOL PROGRAMMING FOR GAME DEVELOPMENT
Undergraduate
Today's games are built with large amounts of data. The stability, usability, efficiency, and flexibility of the tools that process game data plays an enabling and critical role in game development. Topics include the content pipeline, processing or standard file formats, integration of external tools, file format design, command line and graphical user interfaces, and procedural content generation. PREREQUISITE(S): CSC 373

GAM 362
MAKING DEEP GAMES
Undergraduate
This workshop investigates the process of designing games about the human condition. It specifically focuses on the potential of games to tackle profound and abstract ideas (e.g. loyalty, dignity, courage and trust) by way of metaphor and analogy. Assignments will explore metaphorical games, games for persuasion and games for self-expression. Special emphasis is placed on the analysis of personal experiences and how they can be translated systematically into game designs that generate non-typical gameplay content. PREREQUISITE(S): GAM 226 or GAM 224

GAM 365
ADVANCED GAME DESIGN
Undergraduate
This is a studio course in which students work in teams to design and develop slices of polished small-scale gameplay experiences. The focus is on developing team-based creative and technical processes to produce innovative, engaging, and playable games. Teams will iteratively design and develop two distinct gameplay experiences or "vertical slices." Each slice will demonstrate an understanding of the role of game mechanics, game art, audio, and technology platform in creating a cohesive and compelling gameplay. PREREQUISITE(S): GAM 341

GAM 368
AUGMENTED REALITY GAME DESIGN AND DEVELOPMENT
Undergraduate
In this workshop students cultivate the skills to design, program and develop augmented reality (AR) games. Students learn about the unique affordances and design opportunities inherent to the platform. Based on the studio model, each student adopts a role on the development team, such as programmer, designer, and artist, and each is responsible for contributing professional work consistently each week. Because the platform of AR games presents unique challenges to developers (players often feel disoriented or over-tasked) teams first create a dozen AR toys, and build up the most promising experiences into games. Class time consists of lectures, workshops, workdays, playtests, critiques, and class discussions. PREREQUISITE(S): GAM 245
GAM 369
VIRTUAL REALITY GAME DEVELOPMENT
Undergraduate
In this workshop students cultivate the skills to design, program, and develop VR (virtual reality) games. Students learn about the unique affordances and design opportunities inherent to the platform. Topics include the history of VR, VR art, as well as toy design and development. Students collaboratively develop cutting-edge VR toys and games using the studio model in which each student adopts a professional role on the team such as programmer, designer, and artist. Class time consists of lectures, workshops, workdays, playtests, critiques, and class discussions. PREREQUISITE(S): GAM 245

GAM 372
OBJECT-ORIENTED GAME DEVELOPMENT
Undergraduate
Students will learn principles and techniques needed to build robust and efficient large scale game software systems. Principles of object-oriented modeling, design, implementation, and testing of large-scale game systems will be emphasized. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): CSC 393

GAM 374
FUNDAMENTALS OF GAME PROGRAMMING I
Undergraduate
Fundamental concepts of game programming using C/C++ and OpenGL. Students will learn how to implement simple 3D action games: 3D rendering operations including texture mapping, physical interactions including collisions, input / output management including game UI, analog controllers, and sound. Emphasis will be placed on the development of the coding skills needed for robust, efficient, and portable implementation. PREREQUISITE(S): GAM 372 and GPH 321

GAM 376
ARTIFICIAL INTELLIGENCE FOR COMPUTER GAMES
Undergraduate
Artificial Intelligence (AI) is one of the essential components of a computer game. The course introduces basic concepts of AI. Emphasis will be placed on applications of AI in various genres of computer games. In the implementation component of this course students will be exposed to the existing AI game engines (middleware), which contain implemented AI algorithms that are ready to be applied into game code. These algorithms include: decision trees, pathfinding, neural networks, and script-driven game object behaviors. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

GAM 377
FUNDAMENTALS OF GAME PROGRAMMING II
Undergraduate
The class moves beyond the basics of game programming and into advanced programming, architecture, and integration techniques. Topics include working with a production-quality content pipeline, integration of external digital content creation tools, scalability, complex animations, shaders, environment construction, gameplay techniques, controllers, camera theory, and collisions. PREREQUISITE(S): GAM 374

GAM 378
STRATEGY GAMES PROGRAMMING
Undergraduate
Turn-based and real-time strategy games. Abstract strategy games such as chess, backgammon, and bridge. Game themes and presentation of fantasy, historical and futuristic gaming scenarios. Ethically responsible content and social impact of different cultures, ethnicities, genders on the game play and game audience will be addressed. Game-player resource management. Implementation of strategy engines, 2D presentation and isometric projection. PREREQUISITE(S): GAM 376

GAM 380
CONSOLE GAME DEVELOPMENT ENVIRONMENTS
Undergraduate
Specialized computers for games with high-end graphics and sound capabilities and other specialized input and output devices form one of the largest game markets. In this advanced programming course students will gain hands-on experience writing and porting code for game consoles. PREREQUISITE(S): CSC 393 and CSC 374.
GAM 382  
SERIOUS GAMES  
Undergraduate  
Explores the role of computer games and simulations for education and training. Topics include: overview of the science of learning, analysis of games for different purposes and types of content, assessment of learning, and learning through game creation. Students will design, implement, and evaluate a serious game. Development of socially responsible and ethical behaviors will be a primary objective. PREREQUISITES(S): GAM 245

GAM 386  
GAME PROGRAMMING FOR MOBILE DEVICES  
Undergraduate  
In this course we introduce major mobile hardware platforms and their operating systems. Issues related to game design for handheld devices will be presented. The strong technical component of this course includes game programming for a handheld device with a wireless internet connection enabling multiplayer game architecture. Such concepts as: building a custom game library, multiplayer game programming, infrared, wireless and socket communication between devices will be discussed. PREREQUISITE(S): CSC 371

GAM 390  
MULTIPLAYER GAME DEVELOPMENT  
Undergraduate  
Multiplayer games were made possible by the advances in networking technology, increases in processor speed and data storage. Today, the majority of successful game titles are equipped with a multiplayer capability. This technical course discusses the fundamental aspects of multiplayer game development such as: design techniques, architectures, client and server side implementation, databases. PREREQUISITE(S): GAM 372

GAM 391  
GAME PERFORMANCE OPTIMIZATION  
Undergraduate  
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources that are found in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in game development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374

GAM 392  
GAME MODIFICATION WORKSHOP  
Undergraduate  
In this course, students will develop skills in game design and development through the construction of a "mod" of an existing game. Emphasis will be placed on the game development life cycle from concept through release, on productivity in a team environment, and on effective project management practices. PREREQUISITE(S): GAM 341

GAM 394  
GAME DEVELOPMENT PROJECT I  
Undergraduate  
Students work in teams to design and develop a videogame that demonstrates their mastery of game design and development. Additionally, students will reflect on ethical decision making and professional ethics in the game industry. This course and its continuation, GAM 395, must be taken consecutively. PREREQUISITE(S): GAM 377 or GAM 392

GAM 395  
GAME DEVELOPMENT PROJECT II  
Undergraduate  
Continuation of GAM 394. PREREQUISITE(S): GAM 394

GAM 397  
TOPICS IN GAME DESIGN  
Undergraduate  
Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): See syllabus
GAM 398
TOPICS IN GAME PROGRAMMING
Undergraduate
Specific topics will be selected by the instructor and will vary with each quarter. PREREQUISITE(S): See syllabus

GAM 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable credit. PREREQUISITE(S): None

GAM 424
GAME DESIGN WORKSHOP
Graduate
This course is an introduction to both the theory and practice of game design. Students will explore fundamental elements of game design and put these concepts to work in designing, prototyping, playtesting, and developing both physical and computer games. The course will cover formal elements of games, game dynamics, game narratives, and the dramatic components of games. Students will study the game design process including brainstorming, conceptualization, creation of design documentation, and play-testing. PREREQUISITE(S): none

GAM 450
PHYSICS FOR GAME DEVELOPERS
Graduate
