Survey of classical and instrumental conditioning, biological constraints, attention, memory, cognition, and practical applications. Major theoretical approaches include stimulus-response, early cognitive theories and information processing theory.

PSY 406
PHYSIOLOGICAL PROCESSES
Graduate
The functional role of neural systems important for the processes of motivation, emotion, sleep, memory, and cognition.

PSY 409
STATISTICS FOR THE BEHAVIORAL SCIENCES
Graduate
Applied inferential statistics.

PSY 240 is a prerequisite for this class.

PSY 410
ADVANCED STATISTICS I
Graduate
Brief review of introductory statistics, followed by a focus on Analysis of Variance and related techniques for data analysis. One way, factorial, repeated measures and ANCOVA with a priori and post hoc tests. Nonparametric alternatives to mean-comparison tests.
PSY 411
ADVANCED STATISTICS II
Graduate
Multiple linear regression, analysis of covariance, and logistic regression.

PSY 410 is a prerequisite for this class.

PSY 412
ADVANCED STATISTICS III
Graduate
Advanced Statistics III

PSY 411 is a prerequisite for this class.

PSY 413
ANALYSIS OF LONGITUDINAL DATA
Graduate
Analysis of changes and time-dependent data.

PSY 411 is a prerequisite for this class.

PSY 414
CATEGORICAL DATA ANALYSIS
Graduate
Analysis of contingency tables and count data logit, probit and loglinear models.

PSY 411 is a prerequisite for this class.

PSY 416
METHODS IN QUALITATIVE RESEARCH
Graduate
History and paradigms of qualitative research, the strategies and data collection methods used, and how to make sense of qualitative data once it is collected.

PSY 418
MULTIVARIATE STATISTICAL ANALYSIS
Graduate
Multivariate regression, principal component, cluster analysis and multidimensional scaling. Canonical correlation, multivariate analysis of variance, linear discriminant function analysis.

PSY 411 is a prerequisite for this class.

PSY 419
FACTOR ANALYSIS AND PATH MODELING
Graduate
Theoretical foundations, methods of analysis, and comparison of various factor analytic models. Structural equation and measurement models using the Mplus/ LISREL program.

PSY 411 is a prerequisite for this class.

PSY 420
QUANTITATIVE RESEARCH DESIGN
Graduate
Design and analysis of basic and applied psychological research with an emphasis on experimental and quasi-experimental design, and basic issues of measurement.

PSY 411 is a prerequisite for this class.
PSY 421
ADVANCED EXPERIMENTAL DESIGN
Graduate
None

PSY 420 is a prerequisite for this class.

PSY 422
COMPUTING FOR THE BEHAVIORAL SCIENTIST
Graduate
An introduction to computer programming, web development, and other computer-intensive techniques as applied to behavioral science research.

PSY 425
COGNITIVE PROCESSES
Graduate
Cognitive Processes

PSY 426
ADVANCED LANGUAGE SEMINAR: PSYCHOLOGY OF BILINGUALISM
Graduate
This course presents an introduction to how bilinguals produce and understand language by examining theoretical constructs and research in psycholinguistics. It also explores developmental and methodological issues in bilingualism research.

PSY 427
SENSORY PROCESSES
Graduate
Sensory Processes

PSY 430
ADVANCED SOCIAL PSYCHOLOGY
Graduate
Advanced study of social psychological methodology, ethics and deception, attitudes, altruism, aggression, and interpersonal processes and attraction.

PSY 432
ATTITUDE ANALYSIS
Graduate
Theory and research in attitude formation and organization, communication and persuasion, resistance to persuasion, and measurement techniques.

PSY 433
SOCIAL JUDGMENT
Graduate
Theory and research in judgment of social stimuli, perceiving and evaluating persons, and social comparison processes.

PSY 434
SMALL GROUP BEHAVIOR
Graduate
Theory and research in goal formation, conformity, power and communication structures, cohesion, and task performance. The emphasis is on the behavior of persons within groups.
PSY 435
PSYCHOLOGY OF INTERPERSONAL RELATIONSHIPS
Graduate
Theory and research on selected aspects of close relationships. Cross-level with PSY 317.

PSY 437
ADVANCED PERSONALITY
Graduate
Critical analysis of research in personality with emphasis on the development and testability of major constructs in contemporary research.

PSY 439
ADVANCED DEVELOPMENTAL PSYCHOLOGY
Graduate
Current research and theories in child development relating to the preschool child, elementary school child, and adolescent. Emphasis on cognitive, language, and social/emotional development.

PSY 440
PSYCHOLOGY OF WORK AND MOTIVATION
Graduate
Current research and theories in organizational psychology relating to motivation, job satisfaction, work attitudes, employee withdrawal, and counterproductivity.
PSY 448 is a prerequisite for this class.

PSY 441
PSYCHOLOGY OF LEADERSHIP
Graduate
Current research and theories in organizational psychology relating to leadership, supervision, job performance, and managerial training. Emphasis is on theoretical development and empirical evaluation of constructs in contemporary research.
PSY 448 is a prerequisite for this class.

PSY 442
PERSONNEL PSYCHOLOGY
Graduate
Major issues in the Human Resource area. Topics include job analysis, job evaluation, pay equity, benefits, incentive systems, and personnel selection methods, focusing on recruitment, biodata, references, testing, interviews.
PSY 448 or instructor consent is a prerequisite for this class.

PSY 443
PSYCHOLOGY OF DESIGN
Graduate
This course helps students understand how theoretical principles of psychology can be applied to the design of human-centered organizations, environments and technologies. Prior familiarity with psychology and experimental design is strongly recommended. Cross-level with PSY 383.
PSY 448 is a prerequisite for this class.

PSY 444
PERFORMANCE APPRAISAL
Graduate
Theory of criterion development, the evaluation process, and measurement in performance appraisal. Emphasis on design and development.
PSY 448 is a prerequisite for this class.
PSY 445  
ADVANCED TRAINING AND DEVELOPMENT IN ORGANIZATIONS  
Graduate  
In-depth exposure to issues related to training in industry and other organizations. Such topics as needs assessment, training program design, program evaluation, and relevant social and economic issues will be covered.  
PSY 448 is a prerequisite for this class.

PSY 446  
PSYCHOLOGICAL THEORIES OF ORGANIZATIONS  
Graduate  
Theory and research in the psychology of organizations relating to organizational design, analysis, systems, processes and change.  
PSY 448 is a prerequisite for this class.

PSY 447  
ORGANIZATIONAL CONSULTATION  
Graduate  
Applies behavioral science and managerial theories and methodologies to organizational consultation and change processes.  
PSY 448 is a prerequisite for this class.

PSY 448  
CONCEPTS, METHODS, AND ETHICS FOR INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY  
Graduate  
The major concepts and techniques relevant to I/O psychology. Topics include psychometrics, regression, validity generalization, utility, legal issues, affirmative action, and ethics.

PSY 450  
PSYCHOLOGICAL MEASUREMENT  
Graduate  
Logical and mathematical principles underlying test construction with emphasis on evaluating the reliability and validity of scores.

PSY 451  
APPLIED STATISTICAL PREDICTION  
Graduate  
Applications of statistics and psychological measurement to the problems of predicting human performance. Several computer programs will be used to analyze data.

PSY 454  
BEHAVIOR MODIFICATION  
Graduate  
Analysis of principles, practices and research related to learning theory and the modification of human behavior.

PSY 461  
HISTORY AND SYSTEMS OF PSYCHOLOGY  
Graduate  
A review of the history of modern psychology, including various theoretical systems. Topics covered will include contributions of important leaders in the field, specific trends throughout the history of psychology, and the major philosophical questions underlying psychological science. Cross-level with PSY 361.

PSY 469  
EMOTIONS AND EMOTIONAL DEVELOPMENT  
Graduate  
Emotions And Emotional Development
PSY 473
THE PSYCHOLOGY OF JUDGMENT AND DECISION-MAKING
Graduate

PSY 481
INDIVIDUAL INTELLIGENCE TESTING I
Graduate
Theories of intelligence and cognitive development. Introduction to the administration of verbal and various nonverbal tests including the Stanford Binet, Wechsler Intelligence Scale for Children and Wechsler Adult Intelligence Scale and the clinical use of these instruments.

PSY 482
PERSONALITY ASSESSMENT
Graduate
Administration and scoring of the Rorschach and Thematic Aperception Test and other tests. Evaluation of tests and related areas of research and development.

PSY 483
ADVANCED PSYCHODIAGNOSTICS
Graduate
Advanced study of projective techniques and other assessment methods, with emphasis on analysis, interpretation and integration of all pertinent clinical data, and report writing.

PSY 484
BEHAVIORAL ASSESSMENT
Graduate
Behavioral observation and recording. Self-report measures. Physiological measurement. Evaluation of behavioral measures and areas of research.

PSY 485
NEUROPSYCHOLOGICAL TESTING
Graduate
Introduction to theory and assessment techniques related to adult and child neurological functioning.

PSY 486
ADVANCED PSYCHOPATHOLOGY
Graduate
Review of the major diagnostic categories as outlined by the current Diagnostic and Statistical Manual. Current issues in psychopathology and related research are reviewed.

PSY 487
PSYCHOPATHOLOGY OF THE CHILD
Graduate
Introduction to the many categories of psychopathology affecting children and adolescents. Emphasis on the developmental and environmental contexts.

PSY 488
PRINCIPLES OF PSYCHOTHERAPY
Graduate
Analysis of theoretical approaches to psychotherapy.
PSY 489
GROUP PSYCHOTHERAPY
Graduate
Principles, theories and techniques of group psychotherapy. Problems of selection of group members and evaluation of progress.

PSY 491
TREATMENT METHODS WITH CHILDREN
Graduate
Consideration of a variety of treatment approaches used to help alleviate the psychological problems of children.

PSY 492
PRINCIPLES OF CONSULTATION
Graduate
Principles and dynamics in consulting with communities. Emphasis on collaborative and participatory approaches to consulting with communities in social change efforts, research/evaluation, organizational development, and systems issues. Gaining entree, assessing community context, and maintaining relationships with diverse community stakeholders.

PSY 493
ADVANCED COMMUNITY PSYCHOLOGY
Graduate
An advanced introduction to community psychology with an emphasis on major historical and contemporary themes such as prevention of psychological problems and promotion of wellness, empowerment and social justice, community research methods, diversity in gender, ethnicity, sexual orientation and disability status, community processes, and collaboration and intervention to address social problems.

PSY 495
GRANT WRITING IN PSYCHOLOGY
Graduate
This course will facilitate students' ability to transpose psychology principles and theory into practice by preparing them to be psychology entrepreneurs via the grant writing process. Class members will become familiar with public and private funding sources, searching for appropriate funding sources, and reviewing a proposal. Class members will create a grant proposal that can be submitted to a funding organization.

PSY 500
PROFESSIONAL ETHICS
Graduate
Introduction to ethical issues in the field of clinical psychology. Two quarter hours.

PSY 501
STATISTICAL APPLICATIONS SEMINAR
Graduate
Introduction to advanced applications of statistical packages for data analysis, data management, and simulation.

PSY 510
BEHAVIORAL MEDICINE
Graduate
Behavioral medicine approaches are introduced.

PSY 511
HEALTH PSYCHOLOGY
Graduate
A survey of the psychological factors involved in health and illness. Also explores the psychological issues in prevention of illness, and psychological considerations in treatment. Cross-listed as MPH 511.
PSY 520  
PRINCIPLES OF HUMAN DIVERSITY  
Graduate  
Considerations related to minority status and issues specific to diagnostics and interventions with minority populations.

PSY 521  
PSYCHOLOGY OF THE AFRI CAN-AMERICAN CHILD  
Graduate  
Development and socialization of African-American child from infancy to adolescence. Emphasis on psychological and cultural factors which influence these processes. Understanding the child, family, language and IQ, education and learning styles, and cultural identity are all emphasized. Cross-level with PSY 346.

PSY 550  
SEMINAR IN TEACHING PSYCHOLOGY  
Graduate  
This course exposes students to major pedagogical and classroom management considerations in higher education and familiarizes students with instructional support services across the university. This year-long, cohort-based course is required for graduate students prior to becoming instructors in the department. It begins each Winter Quarter and ends Autumn Quarter. Students who enroll should expect to complete all requirements for the master's degree prior to Autumn Quarter. Zero-credit hours.

PSY 551  
SEMINAR IN EXPERIMENTAL PSYCHOLOGY  
Graduate  
None

PSY 552  
SEMINAR IN NEUROPSYCHOLOGY  
Graduate  
None

PSY 553  
SEMINAR IN PERSONALITY RESEARCH  
Graduate  
None

PSY 554  
SEMINAR IN DEVELOPMENTAL PSYCHOLOGY  
Graduate  
This course focuses on special topics in developmental psychology and may cover social, emotional, language, and/or cognitive development during selected portions of the lifespan. Relevant theories and empirical research will be analyzed. Cross-level with PSY 378.

PSY 555  
SOCIAL AND EMOTIONAL DEVELOPMENT  
Graduate  
Focus on development of emotions, social relationships, and social interaction. Both theoretical perspectives and research findings are presented and analyzed. Topics covered may include: primary emotions and their development, nonverbal communication of emotions, socialization within the family, friendship and peer relations, aggression, moral development, sex role development, and attachment. Cross-level with PSY 370.

PSY 556  
SEMINAR IN SOCIAL PSYCHOLOGY  
Graduate  
None
PSY 557
SEMINAR IN LEARNING AND COGNITIVE PROCESSES
Graduate
Seminar in current issues in cognitive psychology.

PSY 558
SEMINAR IN ADVANCED STATISTICS
Graduate
PSY 411 and PSY 420 are a prerequisite for this class.

PSY 559
SEMINAR IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Four quarter hours.

PSY 448 or instructor consent is a prerequisite for this class.

PSY 560
SOCIAL COGNITION
Graduate
Theory and research addressing major aspects of social cognition, including how people subjectively understand and mentally represent themselves and others (e.g., in terms of unique versus applicable stereotypes), and how these representations influence self-regulation, person and group perception, and social behavior.

PSY 561
ADVANCED PSYCHOLOGY OF WOMEN AND GENDER
Graduate
A review of research and theory on women, including sexist biases in traditional research, feminist methodology, pedagogy and therapy, violence against women, gender differences in development, relationships, sexuality, and the interplay of gender, race and sexual orientation. Cross-listed with MLS 478 and WGS 470.

PSY 562
SEMINAR IN FAMILY THERAPY
Graduate
A review of systems theory and the assessment and treatment of families.

PSY 563
MENTAL IMAGERY
Graduate
Theory, research and practical applications of mental imagery are considered in lecture/discussion/student-report format. Variety of imagery techniques will be reviewed which have been found useful in research and practice. Special attention devoted to the differences between subjective approaches (consciousness and vividness ratings) versus objective approaches (memory measures) of studying imagery. Cross-listed with PSY 362.

PSY 564
SEMINAR IN CLINICAL RESEARCH
Graduate
PSY 488 is a prerequisite for this class.

PSY 565
PROFESSIONAL DEVELOPMENT SEMINAR
Graduate
An interactive seminar that provides guidance regarding master's thesis research, comprehensive examination or literature review, and/or dissertation plans. Attention to pathways for success in doctoral education, practica, internship, scientific research and careers. Selected topics vary with student needs and interests.
PSY 566
SEMINAR IN PSYCHOPATHOLOGY
Graduate
None

PSY 567
SPECIAL TOPICS IN COMMUNITY PSYCHOLOGY
Graduate
Explores topics of current interest in the area of Community Psychology and related fields for advanced graduate students, with emphases on theory, research and intervention.

PSY 568
SEMINAR IN PREVENTION AND INTERVENTION
Graduate
Analysis of theories of community and human behaviors from the standpoint of general systems principles.

PSY 569
SEMINAR IN PROGRAM EVALUATION
Graduate
Evaluation of social programs and policies (including needs assessment, logic models, process evaluation and outcome evaluation). Theories, methods, and practice of program evaluation.

PSY 570
SEMINAR IN PSYCHOTHERAPY RESEARCH
Graduate
None

PSY 572
PSYCHOBIOLOGY OF SOCIAL COGNITION
Graduate
Explores social cognition in the frame of evolutionary, neorophysiologial, and developmental biology. Comparison of human with other animal social-cognitive characteristics will be examined. Neuropsychological data and developmental psychobiology will be studied.

PSY 574
PRE-PRACTICUM IN CLINICAL PSYCHOLOGY
Graduate
Introduction to practica duties. May be repeated three times. No Credit.

PSY 577
PRACTICUM IN CLINICAL ASSESSMENT
Graduate
Supervised experience in intake interviewing, psychological evaluation, and case conference presentation in a clinic, hospital or community agency setting. Zero credit hours.

PSY 578
PRACTICUM IN CLINICAL PSYCHOLOGY
Graduate
Supervised experience in diagnostic assessment, intervention planning, psychotherapy and report writing through varied assignments to campus or community agencies. Zero credit hours.

PSY 579
PRACTICUM IN CHILD CLINICAL PROCEDURES
Graduate
Supervised practice in the diagnosis and treatment process of the problems of children and adolescents. May be repeated twice. Zero credit hours.
PSY 582
ADVANCED PRACTICUM-CLINICAL PSYCHOLOGY
Graduate
Zero credit hours.

PSY 583
PRACTICUM IN COMMUNITY MENTAL HEALTH
Graduate
Zero credit hours.

PSY 584
PRACTICUM IN SPECIAL AREAS IN PSYCHOLOGY
Graduate
Zero credit hours.

PSY 585
FIELDWORK IN COMMUNITY SETTINGS
Graduate
An applied experience which integrates skills of consultation, program development, advocacy, and program evaluation.

PSY 586
PRACTICUM IN APPLIED INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Supervised experience in the application of I/O Psychology and technical report writing.

PSY 587
PRACTICUM IN ADVANCED RESEARCH IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Supervised experience in I/O research and the preparation of research results for publication.

PSY 588
TOPICS IN PSYCHOLOGICAL SCIENCE I
Graduate
Consideration of topics of current interest to the faculty and graduate students. Includes readings and discussion of important current research, discussions of professional development and presentations by invited speakers.

PSY 589
TOPICS IN PSYCHOLOGICAL SCIENCE II
Graduate
Continuation of PSY 588. Consideration of topics of current interest to the faculty and advanced graduate students.

PSY 590
THESIS SEMINAR
Graduate
Zero-credit hours.

PSY 591
COLLOQUIUM IN INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Graduate
Required of all I/O students. Register in Fall term; continues throughout the year. Presentations on research and other topics by students, faculty, and invited speakers. Zero-credit hours.
PSY 592
DIRECTED RESEARCH
Graduate

PSY 593
PRE-DOCTORAL RESEARCH
Graduate
Graduate students in specific doctoral programs are required to register for this course for at least three quarters prior to registering for Psy 598 (Dissertation Seminar) or Psy 599 (Dissertation Research). This course requires full-time (at least 8-12 hours per week) work on research under the supervision of a faculty mentor. Zero-credit hours.

PSY 594
DIRECTED READINGS IN PSYCHOLOGY
Graduate
A course involving intensive readings in contemporary psychological literature. (Arranged by prior consultation with the chair). One to four quarter hours.

PSY 595
COLLOQUIUM
Graduate
Required of all graduate students each quarter until graduation. Lectures by psychologists and members of the faculty. Zero-credit hours.

PSY 596
INTERNSHIP IN CLINICAL PSYCHOLOGY
Graduate
Arranged with consent of director of clinical training. Zero-credit hours.

PSY 597
MASTER'S THESIS RESEARCH
Graduate
Original investigation of a specific research problem. Four hours required.

PSY 598
DISSERTATION RESEARCH SEMINAR
Graduate
Seminar for doctoral candidates working on their dissertation. Students will develop their proposals or write their results and discussion sections, depending on status of their dissertation research. Students will also review and critique work of other students. Zero credit hours.

PSY 599
DISSERTATION RESEARCH
Graduate
Four hours total required. One to four hours per quarter.

PSY 634
ADOLESCENT DEVELOPMENT
Graduate
Focus on normal processes in adolescent development as well as risk factors for maladaptive development.

PSY 639
ADVANCED DEVELOPMENTAL PSYCHOLOGY
Graduate
Focus on major theories and research in child development.
PSY 653
ABNORMAL PSYCHOLOGY
Graduate
Focus on the primary psychological diagnoses common today.

PSY 654
COMMUNITY PSYCHOLOGY
Graduate
Focus on systemic and ecological theories of human behavior, diversity, social support, community intervention and evaluation, empowerment, social change, and working with underserved populations. Community service project required. Cross-level with PSY 354.

PSY 663
ALCOHOLISM, DRUG ADDICTION, AND RECOVERY
Graduate
Research and theory on alcoholism, drug addiction, and recovery are the focus of this course. Cross-level with PSY 363.

PSY 678
CHILD ABUSE AND NEGLECT
Graduate
This course surveys the causes, consequences, and contextual factors associated with child maltreatment (abuse and neglect) and interventions for children and families. The course considers maltreatment within an ecological context and works to build sensitivity to diverse families and cultural patterns. It is designed for graduate students with some prior coursework or experience in child psychology, mental health, or child welfare. Cross-level with PSY 368.

Graduate standing is a prerequisite for this class.

PSY 680
INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
Graduate
Application of theories and methods of psychology to the study of human behavior in business, industry, and other organizations. Cross-level with PSY 380.

PSY 701
CANDIDACY CONTINUATION
Graduate
Students admitted to candidacy for the doctoral degree who have completed all course and dissertation registration requirements are required to be registered each quarter of the academic year until the dissertation and final examination have been completed. Zero-credit hours.

PSY 702
NON-RESIDENT CANDIDACY CONTINUATION
Graduate
Non-Resident Candidacy Continuation

RE 300
REAL ESTATE LAW
Undergraduate
This course provides an overview of legal principles including: ownership structures, transactions and title issues, land use regulation, environmental constraints, and income tax and property tax.
This course provides a systematic introduction to urban planning issues for students who have little background in this area. The course will explore both historical and contemporary urban planning concepts and will cover a wide variety of topics including land use regulation, economic development, environmental and energy planning, growth management and urban development issues, generally from a real estate and built environment perspective.

**RE 350**
**REAL ESTATE ANALYSIS**
**Undergraduate**
This course introduces essential institutional, legal, regulatory, and financial aspects of real estate in the U.S. economy and financial system. It is designed to facilitate personal decisions on home ownership and investment and it incorporates demographic data for real estate market analysis, exercises in land use planning and investment decisions.

Junior standing with at least 88 cumulative units is a prerequisite for this class.

**RE 352**
**REAL ESTATE FINANCE**
**Undergraduate**
Patterns of financing real estate property, including a general overview of the importance of real estate capital markets. Institutional analysis, including critique of alternative mortgage instruments, an analysis of installment financing, construction financing, convertible mortgages, and leases and sale-leaseback financing. Secondary mortgage markets and mortgage-related securities, risk and return analysis.

FIN 310 is a prerequisite and RE 350 is a corequisite for this class.

**RE 353**
**REAL ESTATE INVESTMENT**
**Undergraduate**
The course explores real estate investment risk and opportunity. Topics include commercial lease transactions and value; impact of taxation on the investment decision, asset development and acquisition analysis, and alternative investment vehicles.

FIN 310 is a prerequisite and RE 350 is a corequisite for this class.

**RE 354**
**REAL ESTATE VALUATION**
**Undergraduate**
Real Estate Valuation. Introduction to market analysis and the appraisal process. Basic approaches to valuation analysis including both residential and income properties. This course includes the income capitalization methods and complex valuation assignments.

RE 350 is a corequisite for this class.

**RE 398**
**SPECIAL TOPICS**
**Undergraduate**
Special Topics in Real Estate offers an in-depth study of current industry-related issues. Content, format, and prerequisites vary by section. Subject matter will be indicated in the class schedule.

**RE 399**
**INDEPENDENT STUDY**
**Undergraduate**
Available to students of demonstrated capability for intensive independent work in real estate.
RE 520
URBAN PLANNING AND PUBLIC POLICY
Graduate
This course introduces urban planning for students who have little background in this area. The course explores both historical and contemporary urban planning concepts and covers a wide variety of topics including land use regulation, environmental and energy planning, growth management/smart growth issues, legal and regulatory requirements and regional/national planning concepts, generally explored from a real estate perspective. The course concludes with a three class urban planning workshop, redeveloping a five block blighted neighborhood in a hypothetical city to create a well-designed, sustainable community.

RE 521
LEGAL ISSUES IN REAL ESTATE
Graduate
This is a survey course of real estate law and will be approached on both practical and theoretical levels, with an emphasis on the historical underpinnings of land law. Topics include contracts, landlord/tenant law, title, transactions, taxation, and land use.

RE 525
PROJECT MANAGEMENT: DESIGN AND CONSTRUCTION
Graduate
This course provides a systematic introduction to building design and construction for students who have little background in this area. The course explores both the conceptual and practical aspects of designing and constructing commercial buildings and covers a wide variety of topics including: site development, building design, building materials, systems and construction methods and practices, budgets, scheduling, overall pro forma feasibility, LEED Certification, Sustainability and Green Building issues. The course concludes with a major project that will allow each student to develop a conceptual building design, a construction budget, a construction schedule and a pro forma feasibility analysis.

RE 530
REAL ESTATE INVESTMENT AND FINANCE
Graduate
This course is designed to develop the vocabulary, concepts, and skills for rational real estate investment decisions. It will consider both the debt and equity side of private market real estate decision making. Topics include risk analysis, regional and sub-market economics, and property specific analysis. Case analysis is an integral part of the course.

Completion or concurrent enrollment in FIN 555 is required.

RE 531
REAL ESTATE CAPITAL MARKETS AND FINANCE
Graduate
Analysis of private and public institutions involved in real estate finance. A critical study of institutional arrangements facilitating real estate investment and development, and analysis of yields and risk in mortgages and mortgage backed securities.

RE 530 is a co-requisite for this class.

RE 533
REAL ESTATE MARKET ANALYSIS AND VALUATION
Graduate
Market analysis techniques and critical analysis of the appraisal process in the valuation of income producing properties. Exploration of both basic and innovative approaches to value employing computer databases and information technology.

RE 530 is a co-requisite for this class.

RE 535
INSTITUTIONAL REAL ESTATE INVESTMENT
Graduate
Analysis of complex ownership structures and the changing world of real estate capital markets. Case course with a focus on institutional investment portfolios including private equity, pension fund and REIT acquisition & disposition decisions.

RE 530 is a co-requisite for this class.
RE 570
ADVANCED REAL ESTATE ANALYSIS WITH ARGUS
Graduate
This course is designed to develop the vocabulary, concepts, and analytical skills necessary to make informed commercial real estate investment decisions at a very detailed level using the Argus software platform, as well as other software and database tools for research and analysis. RE530 is a prerequisite or may be taken concurrently with the permission of the instructor.

RE 596
REAL ESTATE SEMINAR
Graduate
The objectives of this course are to identify current, researchable topics pertaining to real estate and for students to perform independent research on selected topics approved by the seminar professor. Meetings will be held on both a class and an individual basis. Students will present both their proposals and the results of their preliminary investigations in class. A seminar research paper is required of each student.

RE 793
INTERNERSHIP
Graduate
This is a unique opportunity in which interns gain experience and apply their skills in the workplace. While building an impressive resume for further job opportunities, the intern will be immersed in a stimulating environment with a pool of established resources. The course may be taken multiple times for a total of 4 credit hours.

RE 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. In-depth study of current issues in Real Estate. Subject matter will be indicated in class schedule. Offered variably and may be taken multiple times provided the content is not duplicated.

RE 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in finance.

RE 325
PROJECT MANAGEMENT: DESIGN & CONSTRUCTION
Undergraduate
This course provides a systematic introduction to building design and construction for students who have little background in this area. This course is an introduction to this topic and is not for those students who have significant experience in building design or construction. The course will explore both the conceptual and practical aspects of designing and constructing commercial buildings and will cover a wide variety of topics including: site development and zoning issues, building design and layout, building materials, systems and construction methods and practices, construction budgets, project scheduling and overall proforma feasibility.

Junior Standing or above is a prerequisite for this class.

REC 200
INTRODUCTION TO SOUND RECORDING TECHNOLOGY
Undergraduate
Introductory course to acquaint students with concepts and techniques of sound recording technology. Open to all music students and required for SRT majors.

Status as an Undergraduate Music student is a prerequisite for this class.
**REC 201**  
**RECORDING TECHNOLOGY I**  
*Undergraduate*  
Basic studies in audio engineering with technological application in recording studio settings. Emphasis on acoustics, microphones, and microphone techniques. This is part of a two-year sequence of courses for sound recording technology majors.

REC 200 and MUS 230 and status as a Sound Recording Technology student are prerequisites for this class.

**REC 202**  
**RECORDING TECHNOLOGY II**  
*Undergraduate*  
Basic studies in audio engineering with technological application in recording studio settings. Emphasis on principles of digital recording and editing. This is part of a two-year sequence of courses for sound recording technology majors.

REC 201 and status as a Sound Recording Technology student is a prerequisite for this class.

**REC 203**  
**RECORDING TECHNOLOGY III**  
*Undergraduate*  
Basic studies in audio engineering with technological application in recording studio settings. Emphasis analog recording and signal processing. This is part of a two-year sequence of courses for sound recording technology majors.

REC 202 and status as a Sound Recording Technology student is a prerequisite for this class.

**REC 209**  
**ELECTRONICS FOR MUSICIANS**  
*Undergraduate*  
This course is designed to teach practical skills in analog electronics. Some basic theory will be outlined using as little mathematics as possible. Hands-on skills to be covered include soldering, testing, and modifying solid state circuitry.

Status as a Sound Recording Technology student is a prerequisite for this class.

**REC 216**  
**PRO TOOLS AND THE DEVELOPMENT OF THE RECORDING STUDIO**  
*Undergraduate*  
The goal of this course is to transform students from casual listeners of recorded music into educated critical analysts. Students will study the history and development of recording technology and recording studios. Lab exercises will teach the basics of recording and signal processing using Digidesign Pro Tools software. Arts and Literature.

**REC 300**  
**CONTEMPORARY FILM SCORING**  
*Undergraduate*  
Undergraduate level course designed for Music, CDM, Communication, and Theater majors who want an understanding of film music and the mechanics of scoring to picture. It will cover the basics of spotting films, writing with a click track, and utilizing synthesizers and samplers to realize film music.

Status as Undergraduate Music student, Undergraduate Theatre student, Undergraduate Communication student or Undergraduate CDM student is a prerequisite for this class.

**REC 301**  
**RECORDING TECHNOLOGY IV**  
*Undergraduate*  
Basic studies in audio engineering with technological application in recording studio settings. Emphasis on consoles and audio for film. This is part of a two-year sequence of courses for sound recording technology majors. COREQUISITE(S): REC 304.

REC 203 and status as a Sound Recording Technology student is a prerequisite for this class.
REC 302
RECORDING TECHNOLOGY V
Undergraduate
Basic studies in audio engineering with technological application in recording studio settings. Emphasis on music production and the capstone audio/video sound design project. This is part of a two-year sequence of courses for sound recording technology majors. COREQUISITE(S): REC 305.

REC 301 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 303
RECORDING TECHNOLOGY VI
Undergraduate
Basic studies in audio engineering with technological application in recording studio settings. Emphasis on surround sound mixing, and DVD authoring. This is part of a two-year sequence of courses for sound recording technology majors. COREQUISITE(S): REC 306.

REC 302 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 304
SOUND PRACTICUM I
Undergraduate
Practical experience with technological applications in the recording studio. CO-REQUISITE(S): REC 301.

REC 203 and status as a Sound Recording Technology student is a prerequisite for this class.

REC 305
SOUND PRACTICUM II
Undergraduate
Practical experience with technological applications in the recording studio. COREQUISITE(S): REC 302.

REC 304 and status as a Sound Recording Technology student is a prerequisite and REC 302 is a corequisite for this class.

REC 306
SOUND PRACTICUM III
Undergraduate
Practical experience with technological applications in the recording studio. COREQUISITE(S): REC 303.

REC 305 and status as a Sound Recording Technology student is a prerequisite and REC 303 is a corequisite for this class.

REC 307
COMMERCIAL MUSIC PRODUCTION
Undergraduate
For students with a music theory background who want to learn how to realize music using digital sequencing and sampling. This course will focus on creating tracks in pop genres for film, soundtracks, video games, and commercials.

Status as an Undergraduate Music student is a prerequisite for this class.

REC 398
INDEPENDENT STUDY
Undergraduate
Independent Study

Status as a Sound Recording Technology student is a prerequisite for this class.

REL 103
RELIGIOUS WORLDS IN COMPARATIVE PERSPECTIVE
Undergraduate
An examination of the nature and function of religion in human life. An exploration of common patterns underlying the variety of religious experience and expression.
REL 107
JUDAISM IN HISTORY: FROM THE BIBLE TO 1492
Undergraduate
The purpose of this course is to provide a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people. It seeks to provide students an entree into the world of Jewish religious and historical experience and to help them develop a conceptual understanding of the thought and practice that underlies the Jewish worldview. It also seeks to examine certain continuities and discontinuities in the conception of Judaism as reflected in selected texts which express the full range of Jewish religious and national creativity. Among the topics to be discussed are the complex relations of Jewish thinkers to the surrounding non-Jewish cultures, and how these interactions affected the Jews' understanding of Judaism. The approach to this material will be intellectual-historical. The course is designed as the first part of a two-course sequence on the history of Judaism from the Bible to the present. It focuses on the history of Jewish tradition from the earliest references to Ancient Israel circa 1200 BCE to the expulsion of Jews from Spain in 1492.

REL 108
JUDAISM IN HISTORY: FROM 1492 TO PRESENT
Undergraduate
The purpose of this course is to provide a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people. It seeks to provide students an entree into the world of Jewish religious and historical experience and to help them develop a conceptual understanding of the thought and practice that underlies the Jewish worldview. It also seeks to examine certain continuities and discontinuities in the conception of Judaism as reflected in selected texts which express the full range of Jewish religious and national creativity. Among the topics to be discussed are the complex relations of Jewish thinkers to the surrounding non-Jewish cultures, and how these interactions affected the Jews understanding of Judaism. The approach to this material will be intellectual-historical. The course is designed as the second part of a two-course sequence on the history of Judaism from the Bible to the present. It focuses on the history of Jewish tradition from the expulsion of Jews from Spain in 1492 to the present.

REL 109
THE JEWISH EXPERIENCE
Undergraduate
An introductory course offering a basic understanding of Judaism as the historic and evolving religious expression of the Jewish people, surveying the basic aspects of traditional Jewish life and thought as well as the people's many-sided experience of the modern world.

REL 110
THE CHRISTIAN EXPERIENCE
Undergraduate
An introductory course surveying the range of traditions that have emerged within the Christian movement, and offering an historical perspective on the life and thought of Christian communities, and their prospects for the future.

REL 111
THE AMERICAN RELIGIOUS EXPERIENCE
Undergraduate
Major religious movements in America with emphasis upon the development of religious pluralism. Impact of religious beliefs and values upon American culture.

REL 113
THE LATINO RELIGIOUS EXPERIENCE IN THE UNITED STATES
Undergraduate
An examination of the diverse nature of Latino religion, from its indigenous roots to its institutional forms, within the social and political context of American culture.

REL 115
THE AFRICAN AMERICAN RELIGIOUS EXPERIENCE
Undergraduate
An examination of the religious experience of African Americans and its African precursors through historical and literary resources, reflecting this people's distinctive past and its interactions with other elements of American culture. Formerly REL 215.
REL 116
THE ISLAMIC EXPERIENCE
Undergraduate
An introduction to major recurrent religious themes and alternative models of religious interpretation and authority in Islam's manifold expressions, from the life of Muhammad and the Qur'an, to popular ritual and spirituality and the Islamic humanities.

REL 142
HINDU EXPERIENCE
Undergraduate
A survey of the varieties of Hindu practice and thought. Hinduism in India and throughout the world will be examined.

REL 143
BUDDHIST EXPERIENCE
Undergraduate
A survey of the varieties of Buddhist practice and thought. Different forms of Buddhism throughout the world will be examined.

REL 161
INDIGENOUS RELIGIONS OF NORTH AMERICA
Undergraduate
An introductory exploration of the close ties particular religious traditions of Native North America have with their own distinctive historical realities, geographic-celestial topographies, and political and social structures. Considers variety of oral, written, ritual, visual and archaeological texts.

REL 162
POPULAR AND INDIGENOUS RELIGIONS OF MEXICO AND CENTRAL AMERICA
Undergraduate
An exploration of old and new religious traditions of Mexico and Central America and its diaspora. Our studies will focus on myths and stories as ancient as pre-Conquest times and as recent as today's movies; and we will examine them in written, oral, visual, ritualized, theatrical, musical and even electronic forms.

REL 180
INTRODUCTION TO CATHOLICISM
Undergraduate
An examination of the breadth of the Catholic experience from a 1st-century Jewish religious movement to a 21st-century global religion.

REL 183
THEMES IN CATHOLIC SOCIAL THOUGHT
Undergraduate
An initial, systematic examination of major themes in modern Catholic social thought. Cross-listed as CTH 183.

REL 190
INTERPRETING SACRED TEXTS
Undergraduate
A survey of the formation, use and interpretation of sacred texts by religious and secular communities.

REL 199
RELIGIOUS STUDIES - OFF CAMPUS
Undergraduate
Religious Studies credits earned off-campus. Topics vary.

REL 200
DEBATES ABOUT GOD
Undergraduate
A study of classical and contemporary arguments regarding the existence and meaning of "God," as developed in a variety of theistic traditions.
REL 201
RELIGION AND ETHICS I
Undergraduate
Analytic and normative approaches to ethics in Western philosophical and Christian traditions.

REL 202
ETHICAL WORLDS: MORAL ISSUES ACROSS CULTURES
Undergraduate
An exploration of religion and ethics from a comparative and international perspective. Ethical dimensions of diverse world religious traditions will be investigated within their own particular historical and cultural contexts, and students will be asked to consider and evaluate their own ethical orientations in the light of these studies.

REL 205
RELIGION AND ETHICS II
Undergraduate
Analytic and normative approaches to ethics in a non-Christian tradition, such as Judaism, Islam or African traditional religions.

REL 212
RELIGION AND POPULAR CULTURE
Undergraduate
An exploration of various forms of popular culture and their intersection with diverse religious traditions and ethical concerns. The course also examines the marketing in mass media of religious themes in popular culture.

REL 213
CHRISTIAN THOUGHT IN CLASSICAL AND MEDIEVAL TIMES
Undergraduate
A study of the development of Christian theologies in Western civilization from post-New Testament times to the Renaissance, with emphasis on St. Augustine and St. Thomas Aquinas.

REL 214
TRANSFORMATION IN CHRISTIANITY: THE REFORMATION TO THE PRESENT
Undergraduate
A study of the development of Christianity since 1500 C.E., exploring the Protestant and Catholic Reformations, the growth of Christianity in the United States, and its encounter with a variety of Enlightenment and post-Enlightenment themes and figures, especially concerning science, justice, relativity and religious pluralism.

REL 217
ISLAM IN GLOBAL Contexts
Undergraduate
A study of Islam's developments in various global contexts, including Arabian beginnings, the Middle East, Central, Eastern and Western Europe, China, the former Soviet States and South Africa, with a focus on the impacts that these cultures and Islam have had on each other.

REL 218
BLACK INTELLECTUAL TRADITIONS
Undergraduate
An introduction to Black intellectual traditions which emerge from and inform Black religious traditions and which have religious and/or liberation content. Thinkers and content vary.

REL 219
SLAVERY, RACE AND RELIGION
Undergraduate
This class examines religious arguments, from the 1500's through the 1700's, for and against slavery. Students will investigate different historical and theoretical definitions of slavery. Students will also gain an introduction to the relationship between slavery, evangelicalism, capitalism, and Enlightenment moral philosophy.
REL 220
PSYCHOLOGY AND RELIGION
Undergraduate
Psychological factors operative in acquisition, formation and development of religious expression and commitment.

REL 221
RELIGION IN SOCIETY
Undergraduate
Sociological study of religious groups, institutions, behavior, and belief systems in human life and society.

REL 222
CONTEMPORARY MORAL ISSUES
Undergraduate
A study of the relations between religious beliefs and moral action to be carried out through an examination of the ethical and moral response of various religious traditions to selected moral issues such as war and peace, sexual behavior, etc.

REL 223
LITERATURE AND THE SACRED
Undergraduate
Variable topics. How human beings across cultures express their intimations of ultimate meaning in a variety of genres ranging from aphorisms and autobiographies to mythic and fictional narratives.

REL 224
RELIGION AND POLITICS IN THE UNITED STATES
Undergraduate
Variable topics. Explores the interplay of religion, politics and culture in the United States, focusing on citizenship and religious identity in the USA's multicultural, multiethnic, multireligious society. Various sections will focus on different particular religious communities and themes, such as the Religious Right and the Religious Left, the political activities of particular communities, and the challenges of interreligious dialogue.

REL 225
RELIGION AND THE ARTS
Undergraduate
Variable topics. How human beings across cultures express their comprehension and experience of ultimate meaning in a variety of artistic forms.

REL 226
TECHNOLOGY/ETHICS AND SOCIETY
Undergraduate
An examination of the impact of modern technologies on society with particular attention paid to ethical issues.

REL 227
RELIGIOUS ETHICS AND PROFESSIONAL LIFE
Undergraduate
A study of the ethical dimensions of contemporary professional life from the standpoint of religious traditions and values, focusing primarily on medicine, law and business.

REL 228
BUSINESS, ETHICS AND SOCIETY
Undergraduate
This course will examine the nature and purpose of economic life and contemporary commerce as understood from the perspective of religious and secular communities, as well as the ethical implications that flow from the various worldviews. Sections of the course critically examine the thought of different religious traditions on specific business-related issues, placing a variety of religious discourses into direct conversation with secular voices regarding ethical business conduct. Cross-listed as MGT 228.

WRD 103 or HON 100 or HON 101 is a prerequisite for this class.
REL 229
MEDICINE, ETHICS AND SOCIETY
Undergraduate
A study of moral/ethical issues arising in health care in light of contemporary biomedical advances and social changes (cultural, religious, economic, etc.). The viewpoints of various religious traditions and their rationales will be examined and critiqued.

REL 232
ANCIENT ISRAEL: HISTORY, LITERATURE, AND RELIGION
Undergraduate
The development of Judaism from Moses to the Rabbinic era with special attention to social and historical questions. Cross-listed as CTH 212.

REL 233
THE NEW TESTAMENT
Undergraduate
An introduction to the historical-critical investigation of the New Testament. Topics include the earliest Christian writings (letters of Paul), the production of "gospels" about Jesus, and the development of early churches in the context of ancient history and society.

REL 234
VARIETIES OF EARLY CHRISTIANITY
Undergraduate
An examination of multicultural diversity in early Christianity through a study of materials excluded from the New Testament canon; Christian apologists defending the church against pagan intellectuals and Roman imperial magistrates; comparisons of early Christian fiction and ancient Greek novels; and an examination of Gnostic writings.

REL 235
PAUL AND HIS INFLUENCE IN EARLY CHRISTIANITY
Undergraduate
A critical study of Paul's literary remains as primary sources for reconstructing the development of the Christian movement, focusing on Paul's communities, ethics and theology. Early interpretations and assessments of Paul will also be considered.

REL 236
VARIETIES OF JUDAISM IN THE GREEK AND ROMAN WORLD
Undergraduate
An examination of Judaism from the Jews' return from Babylonian exile in 538 BCE to the promulgation of the Mishnah in 200 CE, with a focus on the Roman period. The Dead Sea Scrolls, as well as concepts of the Messiah, the resurrection of the dead, the final judgment and the idea of the "Bible" will be studied.

REL 237
GODS IN THE ROMAN EMPIRE
Undergraduate
This course examines the role of gods in the social, political, and economic world of the first four centuries of the Roman Empire. Topics will include: the role of gods in civic life; the imperial cult; the use of the categories religion, superstition, and magic to mark social status; gods, family, and social values; religious innovation and the emergence of new gods; and the rise of Christianity and the worship of Jesus as a god. This course will pay special attention to the social interactions that create and sustain the plausibility of the existence of unseen deities governing the affairs of humans.

REL 238
THE HISTORICAL JESUS
Undergraduate
An investigation of the early Christian Gospels and other sources for reconstructing the life of Jesus of Nazareth. The relation of historical reconstruction and religious interpretation, and the significance of conflicting interpretations of Jesus, will also be considered.
REL 239
THE BIBLE GOES TO THE MOVIES
Undergraduate
This course examines the interaction of the Bible and Hollywood movies by considering how stories, ideas, and themes from the Bible have been portrayed in movies. Specific biblical texts will be analyzed in their historical context and in relation to contemporary movies.

REL 241
RELIGION IN CHINESE HISTORY, SOCIETY AND CULTURE
Undergraduate
An exploration of the Chinese religious landscape, focusing on social and practical dimensions of Chinese religion, such as state rituals and private cults, liturgies and individual practices of Taoist priests and adepts, politico-religious ideas that inspired popular messianic movements throughout Chinese history, and interrelations of Buddhist and Taoist clergies and institutions in the state.

REL 242
HINDU THOUGHT AND CULTURE
Undergraduate
Hinduism is one of the world's oldest religions, but it is also the world's most diverse religion. Despite its variety, certain themes have remained throughout the ages--karma and ethical responsibility, liberation from the bonds of worldly existence through yoga and devotion, communication with the divine through ritual, and the many forms, male and female, that God can take. This course traces the development of Hinduism from 5000 years ago to the present, with emphasis on change and continuity in those themes.

REL 243
BUDDHIST THOUGHT IN CULTURAL CONTEXT
Undergraduate
An exploration of the Buddhist tradition, using original sources, from its beginnings in ancient India to a world religion with strong roots in the US. Students will discover how Buddhism interacts with cultures from Sri Lanka and Thailand to China, Japan and Tibet. Although this course is online, students in the region will have the opportunity to practice meditation at a Chicago zendo and tour the Buddhist art at the Chicago Art Institute.

REL 245
RELIGION IN JAPANESE HISTORY, SOCIETY, AND CULTURE
Undergraduate
Explores the specific interplay between religion and culture in Japan. Taking historical and cultural factors into account, it considers prehistoric Japanese religion, ancient imperial myths, the assimilation of Buddhism, Confucianism, and continental (Chinese/Korean) culture, the religious and aesthetic worlds of the court nobility and the warrior class, popular mountain cults, the revival and systematization of Shinto, the impact of western culture, Japanese ultranationalism, and the religious situation in the post-war period.

REL 246
TRADITIONS OF CHINESE POPULAR CULTURE
Undergraduate
Promotes an understanding of Chinese worldview and life in the perspective of the common Chinese people from ancient to modern times. Based on historical and modern texts in translation, some historical and ethnographic studies, as well as visual and aural materials, the course explores gender and generational relations and conflicts, ancestor veneration, the worlds of ghosts and gods, festivals, art, and entertainment, but also aspects of misery and social unrest. Although the course will draw largely on popular and entertaining sources, it will also pay attention to historical developments, the relationship between popular and elite traditions, as well as sociological and anthropological issues arising from these contexts.

REL 247
LITERATURE AND RELIGION IN JAPAN
Undergraduate
Focuses on the pervasive influence of religious thought and sentiment on Japanese literature from ancient to modern times and explores the intricate relationship between religion, aesthetics, and the arts in Japanese culture. Considers original works including ancient Japanese mythology and poetry, the memoirs of court ladies and Buddhist hermits, romance, epics, folktales and social satire, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them.
REL 248
LITERATURE AND RELIGION IN CHINA
Undergraduate
Focuses on the interpretation of literature and religion in China. Considers original works of literature and explores the religious origins of Chinese script and writing itself, poetry and mystical philosophy, cosmology and revealed scripture, popular tales, ballads, plays and novels, and the reworking of contemporary Chinese American authors of their literary and religious heritage, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them.

REL 250
MYSTICISM IN RELIGIOUS TRADITIONS
Undergraduate
This course will look at the phenomena of mysticism, its doctrines and practices, in various religious traditions. It will also look at how various forms of mysticism have influenced the religious traditions with which they associated, (e.g. how Sufism has impacted Islamic religion, civilization and society.) The course will then look at the present situation of mysticisms in regard to religious traditions and to broader societies.

REL 251
THE IDEA OF 'EVIL'
Undergraduate
This course will try and answer the question what is evil? In religious traditions is evil a relative term? Or is it a universal absolute? Does evil exist independently, or is it a result of the absence of good? How do religious traditions deal with the notion of evil? After we look at the religious, philosophical, historical, conceptualization of evil and how different religious traditions deal with it, the class will look at evil in popular culture (anthropological understanding of evil). How does the popular imagination understand evil? How do they depict and imagine evil (in film, and in literature)? Are these universalities or are they cultural relativism? How has popular culture dealt with evil? Finally the course tries to see if there is any connection with the popular imagination and religious traditions when it comes to evil.

REL 252
FORGIVENESS AND RECONCILIATION
Undergraduate
A study of various understandings of "forgiveness" and "reconciliation" in several religions and cultures. The nature and dynamics of forgiveness and reconciliation will be examined both theoretically and in relationship to specific conflicts. Cross-listed with PAX 252.

REL 254
THE BODY & HUMAN RELATIONSHIPS: DIVERGENT MEANINGS, CONFLICTING VALUES
Undergraduate
Love and sexuality in biblical and nonbiblical religions, examined cross-culturally, conceptually, and ethically.

REL 256
WELLNESS AND DISEASE IN RELIGIOUS PERSPECTIVE
Undergraduate
A study of notions related to human "health," "well-being" and "disease" in various religio-cultural situations. Physical, mental and spiritual health -- individual and communal -- will be considered. The significance of "plague," especially AIDS, as socio-religious and spiritual events will be critically examined.

REL 257
DEATH AND ITS BEYOND: EXPERIENCE, MYTH AND RITUALS
Undergraduate
Religious attitudes and practices responding to the phenomena of death and dying, studied cross-culturally, conceptually and ethically.

REL 259
RELIGION AND SOCIAL ENGAGEMENT
Undergraduate
An investigation of the ways in which various religious traditions engage the social order. Traditions, persons and movements that form the focus of the course will vary from section to section. The course will integrate theory and practice in studying forms of religious engagement. All students will perform some service to a community or within a community organization or agency.

Sophomore standing is a prerequisite for this class.
REL 260
RELIGION AND POLITICAL CONFLICT
Undergraduate
An examination of the role of religions and religious movements in political conflicts. Particular sections will examine the relationship of religions to violence and peacemaking in different areas of the world.

REL 262
RELIGION AND GLOBALIZATION
Undergraduate
An examination of the moral, religious, and social dimensions of the phenomenon of globalization. Through a critical assessment of both the positive and the negative dimensions of globalization, students will seek to understand more fully the ethical implications of globalization for economics, culture, and society.

REL 263
RELIGION AND POLITICS IN THE MIDDLE EAST
Undergraduate
An exploration of Judaism, Christianity and Islam as they develop and interact in the Middle East, historically and in terms of contemporary religious and political issues. Includes a study of personal narratives of people from Jewish, Christian and Muslim communities.

REL 264
COLONIZATION, RELIGION AND RESISTANCE
Undergraduate
This course will explore the religious traditions and cultural identities of some of the peoples native to the Americas, Africa, Asia and Oceania; problems they have with the "civilized" world and their potential solutions to them.

REL 265
REFORM MOVEMENTS WITHIN ISLAM
Undergraduate
This course will deal with the idea of "reform" within Islamic political movements in the modern period. The course will analyze various Islamic reform movements such as the Wahahabis, the Muslim Brotherhood, the Modernists, the Traditionalists, seeking a pattern in these movements. Cross-listed with IWS 265.

REL 266
ISLAM IN THE UNITED STATES
Undergraduate
An examination of the story of Islam in the United States in three historical periods: antebellum America, the first half of the 20th century, and the latter half of the 20th century. Explores Muslim slave life; the possibilities of retentions of Islam in slave culture; the religious, social/economic, and political life of Muslims at the beginning of the 20th century; the emergence of Islamic thought in the U.S. through an overview of the works of Ismail as-Faruqi, Seyyed Hossein Nasr and Fazlur Rahman. Cross-listed with IWS 266.

REL 268
MODERN JUDAISM
Undergraduate
An examination of central features of the modern Jewish experience including the transition from traditional to modern religious life and practice, American Judaism, the Holocaust, and the establishment of the State of Israel.

REL 269
JUDAISM IN ANTIQUITY
Undergraduate
This course traces the history of Israelite and Jewish culture and religion from their origins in the world of the Ancient Near East in the second millennium BCE until the rise of Islam in the seventh century CE. We will critically examine the meaning and mutual relationship of such categories as "ancient Israelite" religion, "biblical" religion, and "early Judaism." We will also discuss the history of religious institutions, texts, and practices, as well as the dynamics of continuity and change in ancient Israelite and Jewish society. This course will pay special attention to the complex relationship that exists between history and collective memory as constructed through texts and rituals.
REL 270  
WOMEN IN THE BIBLE  
Undergraduate  
An examination of the historical role of women in the Bible and the contemporary concerns of feminist theology, women’s spirituality and ethical issues arising from the contemporary application of these biblical texts to women's experiences.

REL 271  
THE QUR’AN AND ITS INTERPRETERS  
Undergraduate  
A study of the origin, transmission, and interpretation of the Qur’an. Cross-listed with IWS 271.

REL 272  
GENDER AND SEXUALITY IN MUSLIM CULTURES  
Undergraduate  
Explores historical and contemporary trends in writing on Muslim women along modern and contemporary narratives on gender and sexuality in Muslim majority and minority cultures. Cross-listed as IWS 272.

REL 273  
JESUS ACROSS CULTURES  
Undergraduate  
A study of the multiple and diverse (primarily theological, but also literary, artistic and philosophical) historical and contemporary images of Jesus, as a way of understanding the diversity of this tradition and of its impacts on society, and of understanding the issue of plurality or diversity itself in religious traditions.

REL 275  
COMMUNITY AND AUTHORITY IN MEDIEVAL JUDAISM  
Undergraduate  
An introduction to the history, religion and culture of the Jewish people under Christendom and Islam from the fourth through the end of the fifteenth centuries.

REL 278  
WOMEN AND RELIGION  
Undergraduate  
A study of the historical and contemporary roles and contributions of women within major religious traditions, especially Christianity and Judaism.

REL 280  
ROMAN CATHOLIC THEOLOGICAL THINKING  
Undergraduate  
A study of the Roman Catholic tradition of “faith seeking understanding” examining the content and the process of emergence of Catholic beliefs about such matters as God, sin, Jesus Christ, revelation, the church and eschatology. Cross-listed with CTH 243.

REL 281  
ROMAN CATHOLIC LITURGY  
Undergraduate  
A study of the emergence, meaning and dynamics of ritual in the Roman Catholic tradition. Cross-listed with CTH 231.

REL 283  
ROMAN CATHOLIC SOCIAL THOUGHT IN CONTEXT  
Undergraduate  
A study of Roman Catholicism's understanding of its relation to the social world, including such matters as the relation between Church and State, the moral authority of the Church, and of its teaching on such issues as social ethics, politics and economics.
REL 284
CATHOLICISM AS A SPIRITUAL PATH
Undergraduate
An experience-centered study of the relationship between contemplation and action, prayer and service, liturgy and social justice, personal religious experience and the wider experience of Catholics. Both historical and contemporary spiritualities will be explored. (Cross-listed as Catholic Studies 229)

REL 285
ROMAN CATHOLICISM'S ENCOUNTER WITH OTHER RELIGIONS
Undergraduate
A study of how Roman Catholicism understands and responds to other religious traditions, other ways of being religious, and how the encounter with those other traditions affects Roman Catholicism's understanding of itself and its teachings.

REL 286
PILGRIMAGE, RELIGION AND POPULAR CULTURE
Undergraduate
How has the role of pilgrimage evolved from antiquity to the present age, and how can the phenomenon of pilgrimage provide a modern window into how a people define what is spiritually significant? Might the phenomenon of pilgrimage, as it is found in nearly every religious tradition, provide a common language and thus a means for building bridges across boundaries of religious difference? This course examines pilgrimage as a religious, cultural, historical and ethical phenomenon. Using methodologies developed in the study of religion, ethics, anthropology and popular culture, this course will introduce students to pilgrimage as it is practiced in expressions of Judaism, Christianity and Islam. The aim of this course is to explore some of the competing typologies and events associated with the formal study of religious ritual and then apply these learnings to modern cultural phenomena, work that will prepare students for the project of constructing their own pilgrimages.

REL 287
ROMAN CATHOLIC MORAL THOUGHT
Undergraduate
This course examines various moral topics within a Roman Catholic framework. Papal pronouncements, Magisterial statements, Episcopal texts, the works of influential theologians, and critical voices both within and beyond the Church will be critically examined. Special attention will be paid to the method of moral argumentation.

REL 290
LATINO/A LIBERATION TRADITIONS
Undergraduate
What does liberation mean in the context of the Americas today? How have people of Latin American descent -- both in Latin America and the United States -- connected conceptions of liberation to related ideas of liberty and freedom, as well as to notions of political revolution, cultural identity, and prophetic forms of religious faith? This course examines how these questions have been theorized across the Latino/a Americas, especially as they relate to questions of religion. Topics include liberation philosophy, critical pedagogy, prophetic religion, cultural praxis, Latina feminism, and decolonial thought.

REL 291
LOOKING FOR GOD IN LATIN AMERICA
Undergraduate
An examination of religious traditions such as Catholicism, indigenous religions, and Protestantism in Latin America, with special focus on how these traditions have been transplanted and reshaped upon entry into varied Latino communities in the United States. Historical analyses of the Latin American roots of these traditions will provide contextualization for the ongoing examination of transnational religious cultures in the U.S.

REL 295
SECTARIAN MOVEMENTS WITHIN ISLAM
Undergraduate
This course will look at the various sects within Islam such as Shi’ism, Kharjism, etc. The course will also look at theological sects such as the Mu'taziliets. The course will be concerned with the history, the beliefs, and the present circumstances (if they still exist today) of these sects. Cross-listed with IWS 295.
REL 298
METHODS AND APPROACHES IN THE STUDY OF RELIGION
Undergraduate
A study of the methods, theories, and philosophical approaches used to describe what is termed "religion" in the West. The course will focus on the central questions, key authors, and historical movements that have influenced the field of religious studies. Formerly REL 208.

REL 299
RELIGIOUS STUDIES, OFF-CAMPUS
Undergraduate
Religious Studies credits earned off-campus. Topics vary.

REL 300
THEORIES OF CULTURE AND RELIGION
Undergraduate
An investigation of the cultural study of religion. Considers classical, modern and postmodern approaches from a variety of traditions and academic disciplines. Uses a variety of materials such as oral and written texts and visual artifacts, as well as the works of major theorists.

REL 301
THEORIES OF RELIGION AND SPIRITUALITY
Undergraduate
An interdisciplinary investigation into the nature of religious experience drawing on the fields of anthropology, psychology, sociology, and theology.

REL 305
TOPICS IN RELIGION AND CULTURE
Undergraduate
Examines particular issues in the relationship between religion and culture. Specific topics for current offering are noted in the current class schedule.

REL 311
SUSTAINABILITY AND RELIGIOUS WORLDVIEWS
Undergraduate
This course will analyze the nature of systemic change in the era of sustainability, considering the three dimensions of sustainability - social justice, economic viability, and environmental stewardship - from the perspective of one or more religious traditions, particularly the perspective of integral human development from Catholic social thought. It will use systems thinking to evaluate the economic, social, organizational, and personal contexts of promoting integral human development in a finite ecology. The course will ask students to identify a systemic change project that promotes integral human development, so that student learning is oriented toward, focused on, and expressive of their own interest relevant to a core challenge they have chosen. One key question will shape the trajectory of the course: How does one develop a systemic change project that promotes integral human development? The focus of this course is for the student to select a particular need or set of needs, to determine a sustainable way to deliver a product, service, or good, and to persuasively articulate the values and vision - personally and organizationally - driving their proposed solution. The systemic change project will also be a step toward answering some fundamental career questions: What need do I want to address that will lead to sustainable value for the organization I choose to join? How will this differentiate my organization from others? How should I understand this need in relationship to the natural world, and in relationship to my own place in the economy, in society? To address today's challenges, students must engage in new ways of thinking and new patterns of inquiry. This goal requires a new pedagogy - one that asks students to be conscious of their own assumptions, their own patterns of knowing.

REL 320
TOPICS IN RELIGIOUS ETHICS
Undergraduate
Examines methods and content of religious ethics. Specific topics for current offering are noted in the current schedule.

REL 322
FEMINIST ETHICS
Undergraduate
An investigation of theoretical issues regarding women's moral experiences and of feminist ethical arguments combatting various forms of oppression. Cross-listed with WGS 310/410 and MLS 477.
REL 324
ISLAMIC LAW (SHARIAH) AND AMERICAN CULTURE
Undergraduate
An intensive study of the many dimensions of religious liberties in a pluralist society. Explores the language of constitutional and political discourse generally, and the ways in which language affects an understanding of the First Amendment. Includes case studies on particular religious communities and their encounters with American law.

REL 340
INQUIRIES IN WORLD RELIGIONS
Undergraduate
Various topics within the comparative study of religions. Specific topics for current offering are noted in the current schedule.

REL 341
TAOISM: CHINA’S INDIGENOUS HIGH RELIGION
Undergraduate
A study of Taoist thought, imagination and expression, through sacred literature, the organization of clergy, and the nature and function of its institutions in interaction with the authority of the Chinese state, with Buddhism, and with the broader scheme of popular Chinese culture and religion.

REL 342
ZEN MIND
Undergraduate
A study of the thought and practice of Zen Buddhism, focusing on the role of Zen in shaping ideas, ethics and the arts in Japan and America.

REL 343
MORAL PHILOSOPHY AND ETHICS IN CHINA
Undergraduate
An exploration of Chinese ethics the philosophical, religious and socio-political traditions which shaped them and were formed by them. Considers the major philosophical schools of China's classical age--Confucianism, Monism, Taoism, and Legalism--with Han dynasty cosmology, the ethical orientations of the Taoist and Buddhist religions, neo-Confucianism, and also the traumatic encounter with western power and thought. Addresses comparative issues concerning traditional Chinese values in relation to western views, particularly in terms of modern relations between China (and East Asia) and the west.

REL 344
YOGA AND TANTRA
Undergraduate
An examination of the history, philosophy and cultural meaning of body-oriented liberative techniques as they developed on the Indian subcontinent and Himalayan region in Hinduism and Buddhism. Students registering for this course are expected to have studied one or both of these traditions in courses such as REL 142, 143, 242, or 243, or in other courses. Background in theory is also useful.

REL 350
TOPICS IN RELIGIOUS THOUGHT
Undergraduate
Examines specific methods, issues, and/or movements in religious thought. Specific topics for current offering are noted in the current class schedule.

REL 351
LIBERATION THEOLOGY
Undergraduate
Focuses upon the ideas and practices of a radical movement for the transformation of Christianity and for social justice that originated in the "Basic Christian Communities" of Latin America and spread from there to North America and the Third World. Entails either an Applied Research or Service Learning component.
REL 362
JEWS AND THEIR MESSIAHS
Undergraduate
This course will introduce students to the history of messianic beliefs in Judaism from biblical times to the present. It is often assumed that "messianism," i.e. the belief in a savior figure destined to come in the future to usher in a new age of redemption and moral goodness, has always been central to Judaism. The course will examine whether our modern concept of "messianism" can be used as a valid tool to describe Jewish religious experience. The course will also analyze the extent to which Jewish messianic beliefs varied over time by examining major messianic texts and movements in their historical, literary, and cultural contexts.

Sophomore standing is a prerequisite for this class.

REL 363
CLASSICAL TEXTS IN JUDAISM
Undergraduate
An advanced analysis of selected Jewish texts.

REL 365
TEXTS, HISTORY, AND ISLAM
Undergraduate
An advanced analysis of selected Islamic texts.

REL 370
FEMINIST THEOLOGIES
Undergraduate
An exploration of women's experience as a primary resource and norm for theology, focusing on themes of inclusion, exclusion, representation and liberation in particular social, political and historical contexts.

REL 372
SEXUALITY, GENDER AND RELIGION: CROSS-CULTURAL PERSPECTIVES
Undergraduate
A consideration of religion and feminism in differing cultural contexts using a comparative perspective. While the course will consider selected Western viewpoints, its emphasis will be on a sampling of different emerging feminisms of non-Western religious traditions.

REL 380
TOPICS IN RELIGIOUS TEXTS
Undergraduate
Examines methods and meanings in the study of religious texts. Specific topics for current offering are noted in the current class schedule.

REL 382
RELIGION IN THE CONTEMPORARY UNITED STATES
Undergraduate
An advanced examination of traditional communities and contemporary movements in the United States.

REL 384
THE CULTURE OF AMERICAN CATHOLICS
Undergraduate
How has the unique experience of immigration shaped the American Catholic Church from the colonial period to the 21st century? How did the idea of “the Church” as an authoritative hierarchy come about in the mid-20th century, and how has that notion been challenged by immigrant communities, as well as artists and intellectuals? Drawing on the disciplines of history, sociology, anthropology, cultural theory, literature and the arts, this course looks at those who built the church and those who challenged and changed it. (Course is cross-listed as REL 384, CTH 384 and MLS 464.)
REL 390
INTEGRATING SEMINAR
Undergraduate
A seminar for Religious Studies majors focusing upon the methods, classic texts and current issues in the study of religion.

Junior Standing or above is a prerequisite for this class.

REL 392
FOREIGN STUDY IN RELIGION
Undergraduate
Under this number, students taking courses in religion or theology as part of a DePaul-sponsored program of study abroad may receive Religious Studies credit when approved in advance by the director of the Foreign Studies Program and the chair of the Religious Studies Department.

REL 393
INTERNSHIP IN RELIGIOUS STUDIES
Undergraduate
Open only to students working on Religious Studies major or minor concentrations. For more information contact the department chair.

Junior Standing or above is a prerequisite for this class.

REL 397
SENIOR THESIS
Undergraduate
Religious Studies majors who wish to undertake a special project of independent study are encouraged to apply. Student works towards completion of a special project under the direction of a project coordinator and faculty committee of three. Student must have a cumulative GPA of at least 3.000 overall, 3.100 in Religious Studies courses, and permission of the department chair.

REL 398
INDEPENDENT STUDY
Undergraduate
A two-credit course done under the supervision of a faculty member with the permission of the Department Chair.

REL 399
INDEPENDENT STUDY
Undergraduate
Independent Study

Junior Standing or above is a prerequisite for this class.

RELC 211
INTERPERSONAL COMMUNICATION
Undergraduate
An introduction to the factors that shape communication between two people. Topics include self-concept formation, perception, message formation, verbal and nonverbal communication, active listening, and defensiveness. (Formerly CMNS 211)

RELC 290
COMMUNICATION WORKSHOP (VARIABLE TOPICS)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise.
COMMUNICATION AND ENTREPRENEURSHIP
Undergraduate
This seminar provides an overview of how theories and concepts of relational communication have and can be used to create business models. This course will also explore how entrepreneurial processes and frameworks can be used to create business models using a lean startup approach.

TOPICS IN RELATIONAL COMMUNICATION
Undergraduate
Explores specialized topic within the field of interpersonal communication. Past topics have included: emotions & communication, gender & its relation to interaction, the "social construction" of interpersonal realities, etc. (Formerly CMNS 311)

EVOLUTION AND COMMUNICATION
Undergraduate
This seminar explores how communication, across a variety of topics, can be understood with respect to the theory of evolution. Specifically, this course examines how millions of years of human evolution influences how people interact in their personal and social relationships. (Formerly CMNS 312)

NONVERBAL COMMUNICATION
Undergraduate
This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include: physical appearances, gestures, face and eye behavior, vocalics, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts. (Relational, Group, Organizational) (Formerly CMNS 313)

FAMILY COMMUNICATION
Undergraduate
This course surveys topics relevant to understanding communication phenomena in the setting of the family. Topics include: family systems, patterns, meaning, themes, roles and types, family life cycles, stressors and conflict, changing family forms and contexts. (Relational, Group, Organizational) (Formerly CMNS 314)

CLOSE RELATIONSHIPS
Undergraduate
This course examines the role of communication in the development, maintenance, and deterioration of romantic attachments. Topics include attraction, intimacy and self-disclosure, attachment beliefs, jealousy, satisfaction, commitment, trust, betrayal, conflict, autonomy, interdependence, etc. (Relational) (Formerly CMNS 318)

THE DARK SIDE OF PERSONAL RELATIONSHIPS
Undergraduate
This course explores the "dark side" of interpersonal communication by examining the growing literature on the troubling or problematic aspects of close relationships. Topics covered include relational dilemmas, relational control and dominance, hurtful messages, paradoxical communication, social predicaments, relational transgressions, privacy violations, physical abuse, verbal aggression, etc. (Formerly CMNS 319)

DECEPTIVE COMMUNICATION
Undergraduate
Explores the use of deceptive communication in social and personal relationships from a range of theoretical perspectives including ethics, evolutionary biology, linguistics, social and developmental psychology and jurisprudence. (Formerly CMNS 320)
RELC 329
PERSUASION
Undergraduate
Explores major theoretical assumptions of current persuasion research. Examines causes and effects of effective and ineffective persuasion. Analyzes persuasive skills and strategies for a variety of persuasion applications, e.g., political, interpersonal, intercultural, and advertising. (Formerly CMNS 329)

RELC 340
COMMUNICATING & DATING
Undergraduate
The goal of this course is to provide students with a research-based understanding of the role of communication within dating relationships. Accordingly, this course traces the life-cycle of a dating relationship. Specifically, this course begins by examining initial interactions that are potentially romantic and could turn into dating interactions. Next, the course focuses on how people engage in dating relationships and the factors that influence relationships. Finally, the course concludes with what happens after dating (i.e., long-term commitment/marriage, relational termination, or the death of a partner). (Formerly CMNS 340)

RELC 393
RELATIONAL COMMUNICATION PRACTICUM
Undergraduate
Structured and supervised student participation in collegiate debating, radio production or group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours.

RELC 500
RELATIONAL COMMUNICATION THEORIES
Graduate
Students will gain an understanding of the different meta-theoretical frameworks used to explain relational communication as well as an understanding of what theories are and how theories are developed. A wide range of relational theories will be used in explaining what constitutes relational communication. Students will be provided with opportunities to apply theoretical concepts to everyday personal and professional relations as well as given opportunities to critique and analyze the efficacy of those theories presented.

Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.

RELC 501
RELATIONSHIP MAINTENANCE
Graduate
This course will examine current research examining the communication processes that keep ongoing relations healthy, constructive and functions. Openness, accessibility and fairness all contribute to the health and maintenance of ongoing relationships. But other theories including social exchange theory, interdependence theory and theories of self-disclosure, uncertainty reduction and avoidance all contribute to understanding why some relationships continue while others falter. The concepts, theories and models pertinent to understanding mature relationships and why they remain vital, constructive and functional will constitute the foundation for this course. Students completing the course will understand strategies for strengthening ongoing relationships while simultaneously assessing key areas in need of development or remediation.

Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.

RELC 502
ATTACHMENT & RELATIONAL COMMUNICATION
Graduate
This course will explore the unique role that attachment styles play in the formation, maintenance, and deterioration of close relationships. Attachment theory will be used to examine how working models of self and other influence patterns of interaction among relational partners. Topics will include how attachment styles influence self-disclosure, conflict resolution, jealousy and deceptive communication. Students will also explore communicative strategies for dealing with attachment-related problems.

Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.
RELC 503
READINGS IN INTERPERSONAL COMMUNICATION
Graduate
This course is designed to provide students with a framework that offers the opportunity to choose and read a list of central texts in Relational Communication. Students will all read and discuss, together, at least one historical text and two books that were identified as seminal or central texts by a group of leading scholars in Communication Studies. Students will then identify a list of 3-5 additional central texts in their particular area of the discipline (e.g., emotion, relational dialectics, face work) and read those texts throughout the quarter, reporting their findings to colleagues in the seminar. Each student’s reading list must be compiled and approved by the professor. The seminar participants will complete outlines (which will be shared with all class participants), discussion questions, and facilitate class discussion about their chosen texts. Through reading and thinking about the material, this will produce high-quality and provocative discussion resulting in quality work that will be distributed to colleagues leading to a more holistic understanding about relationship studies.

Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.

RELC 504
RELATIONAL COMMUNICATION AND ENTREPRENEURSHIP
Graduate
This seminar provides an overview of how theories and concepts of relational communication have and can be used to create business models. This course will also explore how entrepreneurial processes and frameworks can be used to create business models using a lean start-up approach.

Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.

RELC 510
HEALTH AND RELATIONAL CMN
Graduate
THIS COURSE EXAMINES THE HEALTH IMPLICATIONS OF RELATIONAL COMMUNICATION. THE ULTIMATE GOAL OF THIS COURSE IS FOR STUDENTS TO UNDERSTAND THAT HEALTH IS PARTIALLY DEPENDENT ON COMMUNICATION, THAT COMMUNICATION INFLUENCES HEALTH, AND THAT WE OFTEN HAVE TO COMMUNICATION ABOUT HEALTH. TOPICS INCLUDE COMMUNIBIOLOGY, DEMAND-DRAW PATTERNSS, SEX, AVOIDANCE OF HEALTH INFORMATION, INVISIBLE ILLNESS, SUPPORT, AND HIV.

RELC 511
TOPICS IN INTERPERSONAL COMMUNICATION
Graduate
Explores specialized topics within the field of relational communication. Past topics have included emotions and communication, gender and its relationship to interaction, and the social construction of interpersonal realities.

Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.

RELC 513
NONVERBAL COMMUNICATION
Graduate
Nonverbal messages are important as we typically monitor our own nonverbal messages less, but believe others nonverbal messages more than their verbal messages. Likewise, research suggests that 65% of our communication is based on nonverbal messages and some estimates are as high as 93%. Clearly such messages are important, yet we spend little time examining such messages. That said, the goal of this course is to provide you with a research based overview of a variety of nonverbal messages, that is, everything we communicate without using our words. This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include physical appearances, gestures, face and eye behavior, vocalic, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts.

Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.
RELC 514
FAMILY COMMUNICATION
Graduate
This course surveys topics relevant to understanding communication phenomena in the setting of the family. Topics include: family systems, patterns, meaning, themes, roles and types, family life cycles, stressors and conflict, changing family forms and contexts. Students completing the course will understand the relationship between strong marital, parent child and sibling communication and relational satisfaction. Furthermore students will learn how to pay closer attention to the nonverbal manifestations of thoughts and feelings, be prepared for solving unavoidable family problems, be able to detect the conditions that contribute to excessive family conflict, understand how lack of intimacy weakens family structures, and distinguish between the need for instrumental and affective communication in strengthening family bonds.
Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.

RELC 519
DARK SIDE OF INTERPERSONAL COMMUNICATION
Graduate
This course explores the "dark side" of interpersonal communication by examining the growing literature on the troubling or problematic aspects of close relationships. Topics covered include relational dilemmas, relational control and dominance, hurtful messages, paradoxical communication, social predicaments, relational transgressions, privacy violations, physical abuse, and verbal aggression. Upon completion of the course students will understand the positive and negative consequences of avoiding topics for discussion, they will understand how uncertainty constitutes both an obstacle and an opportunity in a relationship, they will better understand the difficulties of transitioning from online to offline relationships, they will understand the kinds of events that people perceive to be hurtful as well as the consequences of complaining, bullying, whining and teasing.
Status as a Graduate Relational Communication student or department consent is a prerequisite for this class.

RELC 540
COMMUNICATION AND CONTEMPORARY COURTSHIP DYNAMICS
Graduate
This seminar focuses on communication processes relevant to the initiation, development, and management of non-platonic (i.e., sexual or romantic) relationships.

RELC 599
RESEARCH THESIS
Graduate
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.
Status as a Graduate Relational Communication student and Director Consent is a prerequisite for this class.

RELC 601
ACTIVE DEGREE COMPLETION
Graduate
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans.
Status as a Graduate Relational Communication student is a prerequisite for this class.

RELC 602
CANDIDACY CONTINUATION
Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans.
Status as a Graduate Relational Communication student is a prerequisite for this class.
**RUS 101**  
**BASIC RUSSIAN I**  
**Undergraduate**  
This is an introductory course in Russian which assumes no previous knowledge of the language. Students will learn Russian grammatical structures and vocabulary through the lens of culture, politics, media and the arts. Students will work on reading, writing, listening and speaking skills and by the end of the first year sequence should be able to use their Russian to communicate using simple structures.

**RUS 102**  
**BASIC RUSSIAN II**  
**Undergraduate**  
This is the second course in an introductory sequence of Russian which assumes no previous knowledge of the language. Students will learn Russian grammatical structures and vocabulary through the lens of culture, politics, media and the arts. Students will work on reading, writing, listening and speaking skills and by the end of the first year sequence should be able to use their Russian to communicate using simple structures.

**RUS 103**  
**BASIC RUSSIAN III**  
**Undergraduate**  
This is the third course in an introductory sequence of Russian which assumes no previous knowledge of the language. Students will learn Russian grammatical structures and vocabulary through the lens of culture, politics, media and the arts. Students will work on reading, writing, listening and speaking skills and by the end of the first year sequence should be able to use their Russian to communicate using simple structures.

**RUS 104**  
**INTERMEDIATE RUSSIAN I**  
**Undergraduate**  
Intensive practice in the use of Russian through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. Russian 103 or equivalent, including placement test or permission of instructor, is recommended.

**RUS 105**  
**INTERMEDIATE RUSSIAN II**  
**Undergraduate**  
Intensive practice in the use of Russian through listening, speaking, reading and writing, and continued enhancement of the cultural awareness intrinsic to those skills. Russian 104 or equivalent, including placement test or permission of instructor, is recommended.

**RUS 106**  
**INTERMEDIATE RUSSIAN III**  
**Undergraduate**  
Developing more fluency in speaking, understanding, reading and writing Russian with a concomitant heightened awareness of the cultural dimensions of the Russian language. Russian 105 or equivalent, including placement test or permission of instructor, is recommended.

**RUS 197**  
**SPECIAL TOPICS IN RUSSIAN**

RUS 201
ADVANCED RUSSIAN LANGUAGE I
Undergraduate
Third-year course covering oral and written communication, reading and writing, and grammar and syntax. Students will explore media, pop culture, literature and politics as they improve their language skills. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 202
ADVANCED RUSSIAN LANGUAGE II
Undergraduate
Third-year course covering oral and written communication, reading and writing, and grammar and syntax. Students will explore media, pop culture, literature and politics as they improve their language skills. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 203
ADVANCED RUSSIAN LANGUAGE III
Undergraduate
Third-year course covering oral and written communication, reading and writing, and grammar and syntax. Students will explore media, pop culture, literature and politics as they improve their language skills. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 205
ADVANCED RUSSIAN: LITERATURE AND CULTURE I
Undergraduate
Grammar, written composition and cultural readings for native speakers of Russian.

RUS 206
ADVANCED RUSSIAN: LITERATURE AND CULTURE II
Undergraduate
Continued emphasis on improved grammar and writing for native speakers of Russian with collateral cultural readings.

RUS 207
ADVANCED RUSSIAN: LITERATURE AND CULTURE III
Undergraduate
Advanced composition and writing course emphasizing standard and literary language with appropriate literary and cultural readings for native speakers of Russian.

RUS 297

RUS 306
WARRIORS, WITCHES, FIREFIRDS AND VAMPIRES: INTRODUCTION TO RUSSIAN FOLKLORE
Undergraduate
This course will introduce students to the rich and dynamic body of Russian folk texts and belief. Course readings will include epic poems, skazki (fairy tales), ballads, legends, incantations, and elements of popular culture. Students will learn and apply contemporary theories of folklore and traditional folk belief. The course will touch on the role of Russian folklore themes in literature and film. Emphasis on primary source materials with supplemental theory and history. Readings in Russian. Russian 106 or equivalent, including placement test or permission of instructor, is recommended. Cross-listed with MOL 306.

RUS 316
RUSSIAN NOVEL
Undergraduate
The course will allow students to read and analyze novels from important Russian authors such as Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, as well as other. Students will write essays and participate in individual and group projects in the format of Round-Table discussion. Cross-listed with MOL 316. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 317
RUSSIAN SHORT STORY
Undergraduate
The course will allow students to read and analyze short stories from important Russian authors such as Chekov, Bunin and Bulgakov. Students will write papers and present short stories on these authors as well as others. Cross-listed with MOL 317. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 318
MASTERPIECES OF RUSSIAN LITERATURE
Undergraduate
This course will explore masterpieces of Russian literature from a variety of genres: plays, novels, short stories and poetry. Works by authors such as Tolstoy, Chekhov, Dostoevsky, Gogol, Nabokov, Pushkin, Turgenev, Akhmatova, Mayakovsky, Pasternak and Yevtushenko will be read within their historical context to provide a basis for literary appreciation and analysis. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 360
REALISM IN RUSSIAN DRAMA
Undergraduate
Russian Theater of the 18-19th century appeared in parallel to the development of realism in Russian literature. The movement dominated from approximately 1845 to 1905. The course presents some of the greatest Russian plays of the 19th century by Alexander Pushkin, Nikolai Gogol, Alexander Griboedov, Alexander Ostrovsky, and Anton Chekhov. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 361
TWENTIETH CENTURY RUSSIAN DRAMA
Undergraduate
Russian plays by a selection of the most important authors. Readings may include Chekhov, Gorky, Bulgakov, Teffi and others. Some critical works will be included. The student will read, analyze and interpret the plays, comedies and dramas, both with respect to form and meaning. In the process they will develop greater insight into the social and multicultural issues of the time period in which the plays were written. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 364
MODERN RUSSIAN AUTHORS
Undergraduate
This course explores works of the most influential Russian authors of the Modern period. Authors might include Anton Chekhov, Vladimir Nabokov, Mikhail Bulgakov, Evgeny Zamyatin, and more. Students will explore several genres, including poetry, novel, short, story, and plays. These authors and works will be studied in the context of their times. Russian 106 or equivalent, including placement test of permission of instructor, is recommended. Cross-listed with MOL 364.
RUS 369
RUSSIAN LITERATURE AND FILM
Undergraduate
Greatest Russian short stories, plays, and novels of the 19-20th century, as presented in films by Soviet and Post-Soviet film-makers. Readings in the original (Russian) of Tolstoy, Dostoevsky, Ostrovsky, Chekhov, Bulgakov, and Pasternak's work. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 393
RUSSIAN FOR MASS MEDIA AND POLITICS
Undergraduate
Introduction to the structures and vocabulary of Russian news media with emphasis on politics and current events. Weekly readings and writing assignments from television, print media, and Internet news sources. Emphasis on building vocabulary and understanding of current political news and events. Individualized research/writing project. Russian 106 or equivalent, including placement test or permission of instructor, is recommended.

RUS 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Russian. Students must have the equivalent of 106 or higher ability in Russian to take this two credit component. Please contact the Department of Modern Languages if you have questions about this courses or about language placement.

EXCHANGE PROGRAM: AUSTRALIAN CATHOLIC UNIVERSITY

Undergraduate

Through this study abroad exchange program, students enroll full-time at Australian Catholic University (ACU), an Australian government-funded, public university open to students of all beliefs, nationalities and cultures. ACU offers a wide range of courses in six faculties - Arts and Sciences, Business, Education, Theology and Philosophy, Health Sciences, and Law across six campuses. DePaul students are take 3-4 units (courses) totaling 30-40 ACU credit points per semester.

SHORT-TERM PROGRAM: ARGENTINA AND CHILE

Undergraduate

This short-term December intercession program explores the history, culture, economics, and politics of Argentina and Chile. The program includes meetings with university students and faculty, representatives of the arts, domestic and foreign businesses, the U.S. expatriate community, and Consular officials, as well as visits to cultural and historical institutions. The Program includes two coordinated courses taken in the fall and winter quarters.

Graduate

This short-term December intercession program explores the history, culture, economics, and politics of Argentina and Chile. The program includes meetings with university students and faculty, representatives of the arts, domestic and foreign businesses, the U.S. expatriate community, and Consular officials, as well as visits to cultural and historical institutions. The Program includes two coordinated courses taken in the fall and winter quarters.

TERM PROGRAM: ATHENS, GREECE

Undergraduate

This term-long study abroad program in Athens is offered for Winter-Spring quarters through Greece's renowned College Year in Athens (CYA). Coursework and excursions juxtapose the history and contributions of ancient Greece with the Greece of today; a country situated geographically, socially and culturally at the confluence of Europe, Asia, Africa and the Middle East. Students earn a total of 32 credits for five courses through CYA. Two courses are required: a Modern Greek language course and an Art and Archaeology course. The remaining three electives are worth 6 credits each and may be chosen from CYA's wide range of disciplines, which include Art and Archaeology, Classical Languages, Environmental Studies, Ethnography, History, International Relations, Literature, Modern Greek Language, Philosophy, Political Science, and Religion.

TERM PROGRAM: BUDAPEST, HUNGARY (AY)

Undergraduate

The study abroad program at Corvinus University in Budapest, Hungary is offered in Autumn, Winter-Spring or for a full Academic Year. Students become part of a multinational and intercultural community of students from around the world, living and studying together in one of Europe's most beautiful cities. This program is appropriate for a broad range of majors, and is highly recommended for its International Business courses. DePaul students either live an apartment shared with international students or in a dormitory.

TERM PROGRAM: BUDAPEST, HUNGARY (W-S)

Undergraduate

Students become part of a multinational and intercultural community of students from around the world, living and studying together in one of Europe’s most beautiful cities. This program is appropriate for a broad range of majors, and is highly recommended for its International Business courses. Students receive a total of 18-22.5 credit hours in the fall. DePaul students either live an apartment shared with international students or in a dormitory.

SAP BJNG99  
**TERM PROGRAM: BEIJING, CHINA**  
**Undergraduate**  
This term-long study abroad program in China is offered during the Winter-Spring quarters at Tsinghua University in conjunction with Syracuse University. This program is designed to address the complexities of contemporary China and its languages. The academic program begins with a two-week field study seminar to Beijing, Xi'an and Shanghai, and is followed by classroom study at Tsinghua. Students live in single dormitory rooms on Tsinghua's modern campus.

SAP BONN98  
**TERM PROGRAM: BONN, GERMANY (AQ)**  
**Undergraduate**  
This term-long study abroad program is designed for students interested in German language and society. After successfully completing the winter and spring quarters students have the option of staying for the fall quarter. Students begin the program at DePaul University's Lincoln Park campus with a focus on learning about German history and society.

SAP BRUS01  
**SHORT-TERM PROGRAM: SPS BRUSSELS**  
**Graduate**  
This short-term graduate program to Belgium allows students to broaden their perspective on public-policy analysis and public service management in an international context. The course explores how globalization is affecting national governments and traditional cultures while encouraging the creation of international non-profits and supra-national governing agencies. Students will learn how large agencies, such as the European Union and NATO, are strengthening relationships and working more closely with grassroots organizations throughout the world.

SAP BRZL01  
**SHORT-TERM PROGRAM: BRAZIL**  
**Undergraduate**  
This short-term December intercession program to Brazil is designed for students from all colleges. Visiting three cities in Brazil, the course focuses on Information Technology (IT) in Brazil from multiple perspectives. Students learn about the history and development of IT in Brazil, the role it plays in economic development as well as its socio-cultural impact. In addition to seeing some of the highlights of the city, the participants will conduct a number of site visits to businesses, government offices, non-governmental organizations and institutions of higher learning. The program is open to graduate and undergraduate students from any college at DePaul. The program starts with several pre-departure sessions and continues through the winter quarter with meetings scheduled upon return.

SAP BRZL02

SAP BRZL03
SHORT-TERM PROGRAM: SPS BRAZIL
Graduate
This short-term program is designed to provide students with an understanding of social area analysis, neighborhood change, land use, and other topics by exploring the planning initiatives underway in Curitiba, Brazil, one of the most innovative urban areas in South America. The program site serves as an "urban laboratory" to evaluate a wide range of policies intended to enhance the efficiency and "livability" of a metropolitan region, improve public services, and support the development of critical infrastructure. At the host institution, the Pontificia Universidade Catolica do Parana (PUCPR), students critically evaluate how various strategies can be used to promote harmonious development and economic improvement in complex metropolitan areas involving many different units of government. They also compare the strategies used in Curitiba with those used in Chicago.

SAP CHNA02
SHORT-TERM PROGRAM: CHINA (COMMERCE)
Undergraduate
This business seminar to Beijing and Shanghai focuses on the evolution of ownership structures in China spurred by the country's membership in World Trade Organization (WTO). Through visits to majority-Chinese owned companies, Joint Ventures between Chinese and foreign companies, as well as wholly foreign owned companies, students have the opportunity to explore China's changing economic and regulatory structures and gain an understanding of how Chinese business culture varies across companies according to their different ownership structures.

SAP CHTB01
SHORT-TERM PROGRAM: CHINA AND TIBET (SNL)
Undergraduate
This short-term study abroad program to China and Tibet is offered by the School for New Learning during the summer. Focusing on ethnic minority cultures located mostly in and around Yunnan province, students examine China's current state as they encounter regions that practice traditional beliefs and customs despite the monumental changes that are occurring. By traveling in present-day China and Tibet, students gain insight into the balance between a society's rich and complex past and the present. Students can register for either 3 or 4 competencies (with committee permission). Non-SNL students may apply for credit for this course with the approval of their department advisors.

SAP CLMB01
SHORT-TERM PROGRAM: COLOMBIA (SNL)
Undergraduate
This short-term study abroad program to Cartagena, Colombia is offered by the School for New Learning during December intercession. Cartagena, Colombia provides the backdrop for this course which will stimulate your thinking about the meaning of leisure in your life and the interrelated nature of leisure in our global society. Cartagena offers a rich sense of history, beautiful beaches, excellent food, cultural events, competitive sports, and superior natural areas. Its heterogeneous ethnic and racial make-up is unmatched in the world making it a perfect environment to study and experience leisure. This program will be led by a faculty member of the School for New Learning.

SAP CLMB02
SHORT-TERM PROGRAM: COLOMBIA (SPS)
Graduate
The program to Bogota, Colombia, seeks to expose students to ethical management tools and issues in an international context. By engaging with and learning from local practitioners, students will enhance their intercultural understanding, communication skills, and examine alternative approaches to issues of ethics in public service management. Students will also learn about how issues of ethics cross borders and the cultural sensitivities that are often involved in public service management through an immersion in Bogota, organizational site visits, and intensive fieldwork.
This short-term seminar provides a comprehensive understanding of key elements of human rights law, which includes women’s rights, children’s rights and criminal procedure.

This short-term Summer program explores the ways in which Irish landscapes set aside for nature are influenced by both natural and cultural forces.

This study abroad program introduces the history, culture, economics, and politics of Cuba before and after the revolution of 1959. During their travels, participants will interact with Cuban students, professors, policy makers, artists, and average citizens. From a historical perspective on the Cuban Revolution, students will learn about its impact on Cuban society, Latin America, the “Third World,” and the United States, while focusing specifically on the contemporary international business environment and economic climate in Cuba.

This program seeks to expose students to comparative and foreign policy issues as they pertain to the bilateral relations between the United States and Cuba. By engaging with and learning from local practitioners, students will enhance their intercultural understanding, communication skills, and examine alternative approaches to issues in foreign policy. Students will learn about how policy issues cross borders and the cultural sensitivities that are often involved in foreign policy through an immersion in Havana, organizational site visits, and intensive fieldwork.

This short-term seminar to Prague and Vienna will broaden your general awareness of the international business climate of Central Europe. You will be provided with an understanding of the business, political and educational issues affecting this region’s transition from a centralized to a market driven economy.
This term-long study abroad program in Dublin, Ireland is offered in cooperation with Ireland's Institute of Public Administration. Upper level undergraduates have the outstanding opportunity to study and intern in the Irish Parliament or a non-governmental organization. During the winter and spring terms, students earn a total of 28 DePaul credits: 10 credits for the internship and 18 credits for the remaining courses.

This term-long study abroad program in Dublin, Ireland is offered in cooperation with Ireland's Institute of Public Administration. Upper level undergraduates have the outstanding opportunity to study and intern in the Irish Parliament or a non-governmental organization. During the fall, students earn a total of 22.5 DePaul credits: 9 credits for the internship and 4.5 credits for each of the three remaining courses.

These summer seminars in Dublin are offered by the School of Public Service in conjunction with All Hallows College in Dublin. The courses are taught by American and Irish faculty. There, they explore public service management and strategy as applied in non-government sectors, such as health care, social service, associations, education, and the arts. The program offers one-week, executive-style courses that may be taken in sequence. Additional program meetings are held on DePaul's campus prior to and after travel.

Each year spend the summer in Dublin, Ireland taking classes with an international student body taught by faculty from DePaul and All Hallows College. Here, you will explore public service management and strategy as applied in non-government sectors, such as health care, social service, associations, education, and the arts. The program offers one-week, executive-style courses beginning Sunday evening and concluding Friday at 1 pm with pre- and post-course meetings in the U.S. These courses are standard four-credit courses enhanced with international students, faculty, and perspective. The beautiful campus is conveniently located midway between the Dublin Airport and City Centre.

This, short-term December intercession program to Great Britain offered by the School of New Learning provides opportunities for students to gain valuable understandings of religion, art, and culture that endures in present day Britain while unraveling its rich and complex past. This program's structure is that of a pilgrimage, allowing students some time for reflection as well as learning as they encounter sacred space, respond to aesthetic artifacts and religious rituals, and engage in guided inquiry about the role of these institutions of religion, culture, and education in the past as well as the present.

Participants in this two-country study abroad course on cross-cultural communication will examine how language and interactions are used in various contexts in Estonia and Italy. They will observe communication dynamics in informal settings, such as cafes and piazzas, and in the formal setting of schools and universities. Using concepts from assigned readings, they will then analyze how different socio-cultural factors shape individuals and interaction patterns in both societies, as well as in the United States. A primary focus will be on Estonian and Italian schools and universities, where participants will compare these organizational structures and study their implications for cross-cultural communication among and between teachers and students.

This short-term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students examine how in ancient Greek poetry, history, and philosophy, we will find a certain tragic worldview at work. That is, a recognition of our human finitude, the potentially disastrous limitation of our understanding and power. Indeed, we will find here in their emergence many of the most fundamental concepts we use to make sense of our lives today. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.

This short term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students learn about the important scientific discoveries made by Johannes Kepler and Albert Einstein. Students learn about the people and the society these scientists lived in, apply their discoveries in lab activities, and investigate how science is presented by museums and science education centers in Germany and the U.S. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.

This short term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students explore Dublin's rich literary and cultural traditions. Students read and discuss travel writing and other literature and are coached in writing about place using a variety of styles and genres. With this foundation, students travel to Ireland to visit Dublin and neighboring areas. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.

This First Year Study Abroad Program in Rome and Assisi, Italy will explore the life and world of Saint Francis, study the power of pilgrimage, sharpen peacemaking skills, and experience the beauty and excitement of Italy.

This short-term program for first-year students combines a Focal Point Seminar with a short study tour. In the Focal Point Seminar, students use archaeology, anthropology, and geography to uncover past and present experiences of what is now Jordan. Students discuss the impacts that artifacts, key events, and important players had in shaping the region. During travel, students spend time in the capital city of Amman and various archaeological sites. Travel takes place either in spring break or in late June for 7-10 days and is worth an additional 2 credit hours.

This First Year Study Abroad Program in Peru will explore the global production of food, including issues of ethics, social practices, sourcing, trade, and the environment.

This short-term program will focus on immersion and deeper understanding of African traditional healing, colonial history, culture, and self-development. The other focus will primarily explore the opportunities and challenges of the current IT business environment, resulting in the launch of a media learning IT project with partner institution in Ghana.

Contact time is planned for each day so that students have ample opportunity to discuss differences in consumer behavior and preferences, impacts of culture in tourism behavior, forecasting issues, pricing strategies, ethical concerns, and service delivery variations.

Participants in this program will travel to one of the most significant centers of Catholic pilgrimage in the Americas: the Basilica of Our Lady of Guadalupe, the most visited Catholic shrine in the world. They will join countless numbers of other pilgrims from all over the world who come to Mexico City.

Universidad La Salle offers exchange students the opportunity to live and study in one of the world's greatest cities. Mexico City is a modern metropolis of over 25 million people with a fascinating blend of Aztec and Colonial roots. It is the capital of a country of 90 million inhabitants and the center for commerce, finance and the arts. La Salle has 27 undergraduate and graduate programs in various fields such as education, communication, law, medicine and philosophy among others. It is part of the LaSallian network and it has campuses in 15 cities in Mexico, all of them available for this exchange program. The Mexico City campus is located in the heart of the trendy Colonia Condesa, a neighborhood within walking distance of many restaurants, cafes, bookstores and museums.

Participants in this semester-long or year-long exchange program with Universidad Panamericana. Students enroll in a maximum of 6 courses or 24 credit hours per semester on this program. Universidad Panamericana in Guadalajara offers some courses in Business and Management taught in English.

This program will examine some of the foundations of Latino culture in Florida through an immersion experience in Miami. The focus of the course will be Latino Media and Communication through the lens of media outlets, Hispanic advertising agencies, and Latino communities and international agencies working with Latin America. Students will also tour key areas in Miami.

This term-long study abroad program is offered during Summer-Fall terms. Students enroll at world-class Monash University, located outside of Melbourne. Monash's extensive range of course offerings satisfies the interests of students from any college or major. All students enroll in a Contemporary Australia course with excursions to the outback, the Great Ocean Road and sites around Melbourne. While in Australia, students can take advantage of many activities including outdoor excursions throughout Victoria and activities in and around Melbourne including attending sporting and cultural events. Students earn a total of 24 credits distributed between summer and fall terms.
SAP MRCC01
SHORT-TERM PROGRAM: MOROCCO
Undergraduate
This short-term December intercession program explores the society and culture of Morocco and the ways in which Morocco has been written about in literature. The program begins in the cosmopolitan capital of Rabat and continues on to the imperial cities of Meknes and Fez. Students learn about Moroccan family life during homestays in Fez. These experiences, as well as the camel trek and desert camping trip provide material for student writing and reflections. Students enroll in two courses associated with this program, one in the fall and one in the winter.

SAP MRCC02
FEZ/ARABIC LANGUAGE
Undergraduate
This summer Arabic language program in Morocco provides seven weeks of intensive Arabic language study combined with cultural immersion and a home-stay experience. Students partake in intensive language study in the centuries-old city of Fez, Morocco at the Arabic Language Institute in Fez (ALIF). Private tutoring and cultural activities will be provided to strengthen language and cultural learning. Students enroll in a course about Moroccan society and culture taught by DePaul faculty members during the spring quarter prior to travel. 16 credits total.

SAP MRDA98
TERM PROGRAM: MERIDA, MEXICO (SQ-SERVICE)
Undergraduate
After successful completion of the Winter quarter program in Merida, a select number of students have the option of staying in Merida for the spring and conducting a service-learning internship. Students remaining for the spring enroll in Community Internship (CSS 395) in Merida and two Spanish courses.

SAP MRDA99
TERM PROGRAM: MERIDA, MEXICO
Undergraduate
This language intensive program in Merida, Mexico is offered during the Winter quarter. The activities, course work, and excursions highlight the ways in which the Yucatan Peninsula has developed cultural patterns and institutions quite different than the rest of Mexico. While in Merida for the winter, students enroll in two Spanish courses, Mayan Culture & Community (ANT 390/CSS 201), and a faculty director course.

SAP MXCY03
SHORT-TERM PROGRAM: MEXICO CITY
Undergraduate
This program focuses on three overlapping sites of analysis in Mexico City, the world’s fourth-largest megacity. First, students learn about the intense growth Mexico City has experienced over the past several decades and the ways that official urban planning efforts by federal and local officials have addressed the social, environmental, and infrastructural challenges that accompany a massive increase in population. Second, students study neighborhoods that have developed reputations as bohemian enclaves and subsequently experienced gentrification. Finally, field studies provide opportunities to learn about formal and informal spaces of leisure and popular culture. Visits to outdoor marketplaces in a variety of neighborhoods, alternative musical cultural centers, media outlets, and public squares and stadiums that serve as sites of national identity and local pride are included in the itinerary.
In this two-way cultural exchange program in hospitality leadership, students compare and contrast tourism industry operations in Mexico and the United States with their peers at Iberoamerican University in Mexico City, whose visit to Chicago is coordinated by DePaul. Next, the DePaul students travel to Mexico City and Puerto Vallarta to visit local hospitality and tourism businesses with the Iberoamerican students. Through these visits, DePaul students explore the challenges of managing hospitality operations in Mexico and discuss differences in consumer behavior and preferences, impacts of culture in tourism behavior, forecasting issues, pricing strategies, ethical concerns, and service delivery variations.

This short-term December intercession program takes students to visit communities, organizations and activists on both sides of the Mexico-US border. During course work and travel students explore changes affecting Nogales’ economic, social, political and religious life in light of recent immigration policies and the North American Free Trade Agreement (NAFTA). Students also examine firsthand the impact of national borders on populations and return with new perspectives for establishing workable guidelines for social justice. Students enroll in two courses, one in the fall and one in the winter.

The New York Way Program will provide Public Relations and Advertising (PRAD) students with a deeper understanding of the structure, operations and culture of agencies and media in Chicago and New York through a fast-paced, hands-on experience. During an intense two-week December session, students will spend three days conducting research and analysis of the Chicago advertising, media, and public relations industry environment; then travel to New York for four days of visits to major agencies, organizations, and media outlets, as well as meet and present to industry leaders and professionals on a special topic selected by a New York agency.

On this trip to Okinawa, Japan, students learn about how art and politics interact with everyday lives, history, and economics. Using photography and journals, students document their experiences as they explore and experience traditional Okinawan craft and contemporary art practices and learn about community based economic development against the backdrop of Okinawa’s colonial, post-colonial and militarized history. Upon return, students share and reflect on their findings which culminate in a final project.

Participants in this exchange program with Kansai Gaidai University take four courses, two of which are Japanese language classes. The remaining courses are taught in English and give students a broad understanding of Japanese culture, society, and economy. Students may choose electives from a variety of academic areas including art, international studies, political science, and sociology.

Participants in this year-long exchange program with Kansai Gaidai University take four courses each semester, two of which are Japanese language classes. All other courses are taught in English and give students a broad understanding of Japanese culture, society, and economy. Students may choose electives from a variety of academic areas including art, international studies, political science, and sociology.

This term-long program offered during Winter-Spring in Paris is designed for advanced French study with all courses taught entirely in French. The program is served by the Institute for the International Education of Students (IES). Students enroll in five courses at the IES Center and their choice of one of the French universities affiliated with IES.

This graduate study abroad program offers an opportunity for graduate students in Philosophy to study in Paris to increase proficiency in French. Courses are offered on PASS/FAIL basis.

SAP PARI99
TERM PROGRAM: PARIS, FRANCE (ALLIANCE FRANCAISE)
Undergraduate
This term-long study abroad program in Spring Quarter places students in French language classes at the Alliance Francaise, an international language school. Participants increase proficiency in French while experiencing the rich cultural and political life of Paris. Students live with French families. During the homestay, students are paired with roommates from the Alliance Francaise. Students enroll in a total of 16 credit hours: 8 credit hours for French language, 4 credit hours for HAA 397: French Art History, and 4 credit hours for a course taught by a DePaul faculty director.

SAP PERU01
SHORT-TERM PROGRAM: PERU
Undergraduate
This Summer study abroad program aims to introduce students to the history, culture, economics and politics of Peru within the context of Peru's post internal war process of reconstruction. Special emphasis will be given to social structure, gender issues and distribution of power. The purpose of this program is to immerse students in the culture of Peru, providing an experiential learning experience that complements academic and artistic learning, with intellectual investigations that concern the nature of service, social justice, democracy, globalization and human rights in contemporary Peru. This program responds to the College of Liberal Arts and Science's goals through the development of critical thinking and self-reflection while fostering social and cultural enrichment in an environment of respect and support. Students enroll in two courses associated with the program.

SAP QAT002
SHORT-TERM PROGRAM: QATAR
Graduate
This short-term, MBA cohort-specific seminar, compares and contrasts business industry operations and management in the rapidly growing market of Qatar in order to heighten student learning.
This program provides an opportunity to study how Italian culture and identity are portrayed through films from classics such as La Dolce Vita and Bicycle Thieves to acclaimed contemporary works like Romanzo Criminale. Visits to filming locations in Rome illuminate how cinema uses settings to shape a viewer's experience of a city, a nation, and a people. Furthermore, discussions with Italian film industry representatives provide a firsthand perspective on the filmmaking process, revealing how creative and practical choices affect the representation of cultural issues. The program includes a survival Italian course and a weekend excursion.

This term-long study abroad program in Rome is offered during the Autumn quarter. Students experience the culture and society of Italy while studying the language, art, history, and religious background of the city. They attend language classes at Italiaidea, a local language institute. Service placements are also arranged for students in advanced language classes. Students live with local host families in areas throughout the city. Students earn 18 credits during their stay: 9 credits through Italian courses at the students' appropriate levels, 4.5 credits for a faculty directed course and 4.5 credits for one elective course taught by a local professor.

This short-term summer program focuses on the medieval art and history of Imperial Russia. The program visits in Novgorod and St. Petersburg. These two cities, both designated UNESCO World Heritage Sites, offer one of the world's richest ensembles of urban planning, art, architecture, and historical treasures. Students participating in this program earn 8 credit hours for two 4 credit courses. They will select a course in the spring and summer session.

Students explore recent South African history, politics, economics, and social life through visits to relevant historical sites, lectures and interaction with academics and experienced professionals in the areas of South African history, law, politics, economic development and public health.

Founded in 1953, Universidad Adolfo Ibañez offers students the opportunity to study in a variety of disciplines in either the Santiago or Viña del Mar campus. With 6,300 undergraduate and 2,000 graduate students, UAI was founded as the first business school in Chile and in Latin America.

This short-term seminar explores the cultural and historical links between Singapore and Malaysia while analyzing the similarities and differences in their economic strategies. With the influence of colonialism and rapid economic growth after independence, the seminar provides insights into the economic and political development of two important South Asian societies. Students participate in meetings with government agencies, financial institutions, macro- and micro-businesses and media agencies to learn about a variety of issues.
SAP SHFF98
TERM PROGRAM: SHEFFIELD, ENGLAND (W-S)
Undergraduate
This term-long study abroad program is offered during the Winter-Spring quarters at the University of Sheffield in Northern England. Sheffield's student life is characterized by its diversity and a nationally-recognized student union. A wide variety of course offerings are available to DePaul students, including those in the humanities and social and physical sciences. Students attending Sheffield for winter and spring will enroll in 60 Sheffield credits, equivalent to 24 DePaul credits. These will be distributed evenly between the winter and spring quarters on their DePaul records.

This is a short-term immersion program for students from Symbiosis International University.
SAP TANZ01
SHORT-TERM: SPS TANZANIA
Graduate
This short-term study abroad program will bring graduate students together from different disciplines for an international, collaborative experience focusing on the interrelationship of social welfare, nonprofits management and economic development in general, and understanding the collaborative work of educational institutions, faith-based organizations, non-governmental organizations (NGOs) to effect positive social change.

SAP THAI01
SHORT-TERM PROGRAM: THAILAND (SNL)
Undergraduate
This program will introduce students to Thailand's rich past and changing present by tracing its complex relationships with the countries on its borders. Students will gain a deeper understanding of this land and its people, history, and culture. They will learn that Thailand has a history unique to that of its neighbors and that its culture is not homogeneously "Thai" but is in fact made up of many rich ethnic minorities attempting to coexist.

SAP VIEN01
SHORT-TERM PROGRAM: VIENNA
Undergraduate
This study abroad program introduces students to the peoples, locations, and traditions significant in Vienna of both the fin-de-siecle and today. Present-day Vienna still bears the stamp of the great personalities that shaped its culture and identity in the late nineteenth and early twentieth centuries, yet it is also a modernizing place, one that combines traditions of the past with innovations of the present, and exists as a global, multicultural center that straddles Western and Central Europe. It is also an ideal site for discovering how culture operates in people's lives by closely examining the things they eat, how those things are acquired in a large city, and how what people eat can tell us who they think they are. As a city of modern tastes, Vienna is shown through an exploration of music, visual arts, architecture, coffeehouse culture, as well as an examination of Viennese foods and systems of eating. VIET01

SAP VIET01
SHORT-TERM PROGRAM: VIETNAM
Undergraduate
This program offers students an opportunity to travel throughout Vietnam and explore multiple facets of its 1,000-year history, including its history of war in the twentieth century and its global emergence in the twenty-first. This program focuses on how Americans understand and interpret their encounters with other cultures, not only looking at how Americans have perceived Vietnam, but also how contemporary American culture has adopted, and been transformed by, its encounter with Vietnam. The trip features a variety of academic and cultural visits in locales such as Ho Chi Minh City, Hoi An, Hue, Hanoi, and Ha Long Bay.

SAP WADC99
TERM PROGRAM: WASHINGTON DC
Undergraduate
DePaul University, in collaboration with The Fund for American Studies (TFAS), offers students the opportunity to learn about the political process through a full time internship in Washington, D.C. for the fall semester. The program is designed for undergraduate students interested in American politics and provides internship opportunities in the areas of political journalism, lobbying, government offices and agencies, and the nonprofit sectors. Capital Semester allows students to earn 12 transferable course credits at Georgetown; essentially, students will participate in their internship during the day and take three required evening courses.
SAP
STUDY ABROAD COURSE INFORMATION
The list below displays study abroad opportunities at DePaul. Students participating in DePaul-sponsored term-long study abroad programs at partner institutions (identified by a title which begins with TERM PROGRAM: ) will register for equivalent courses at DePaul. In cases where there is not an equivalent course offered at DePaul, students will register for a Topics course in the appropriate discipline under the Study Abroad Program (SAP) subject.

SCG 25
BASIC TECHNOLOGY LITERACY
Graduate
(0 Credit) This online course provides students with a knowledge about assembling, using, and troubleshooting basic technology hardware and software. In this course, students demonstrate understanding of basic computer setup and the use of peripheral devices such as printers, speakers, flash drives, scanners, digital cameras, videos, and computer software.

SCG 401
ADVANCED LIFESPAN DEVELOPMENT
Graduate
Current research and theories in human development relating to motivation, personality, learning and socialization. Case studies and an analysis of various developmental problems.

SCG 402
PSYCHOLOGY OF LEARNING
Graduate
Study of the learning-teaching process with specific emphasis on the person as a learner, human capacity and potential, learning theories and materials, motivation, concept formation, and behavior.

SCG 403
HUMAN DEVELOPMENT AND LEARNING: ELEMENTARY
Graduate
This course will focus on the developmental processes of school-age children, kindergarten through middle school, by beginning with the study of the young child's social, emotional, cognitive, and physical growth and change. The theoretical and observational study of child development will be framed by an examination of culture, gender, and socio-economic factors as they inform assumptions about normative processes. The relationship between development and learning in a social context will be examined with particular attention to children's developing concepts in math, science, and language arts. Attention will also be given to the role of teachers and schools and other institutions in fostering the healthy development and learning of young people.

SCG 404
CHILD GROWTH AND DEVELOPMENT
Graduate
This course examines the growth and development of the young child in sociocultural context, from conception through age eight, including cognitive, language, physical, psychosocial, spiritual, creative, and emotional areas of development. Learning and development theories of young children, including those of Freud, Erikson, Garcia-Coll, Ainsworth, Bowlby, Piaget, Rogoff, Spencer, Vygotsky, Bronfenbrenner, and other modern developmental theorists, are explored. This course examines normative assumptions about children's processes of growth and change, and considers how learning and development occur through relationships in social contexts. The pedagogical implications of theories of development and of differences amongst children will be addressed throughout class discussions, child observations, and other course activities. This course requires 15 hours of field experience, working with infants and toddlers in a group care setting. Co-registration in T&L 480: Internship with Infants and Toddlers is recommended and encouraged.

SCG 406
HUMAN DEVELOPMENT AND LEARNING:SECONDARY
Graduate
This course focuses on the multiple factors that contribute to the period of adolescence, bridging childhood and adulthood. Particular attention is given to the intrapsychic, interpersonal, biological, and socio-cultural processes that are mediated by the meanings that youth give to their identity vis a vis race, class, and gender formations within the broader society. Students will engage in interdisciplinary study of theories to examine the implications for teaching and learning processes and the role of educational institutions in fostering the healthy development of youth in society. Forms of inquiry will include students' examination of their own lives and assumptions, critique of theory, and observations of young people in a variety of contexts.
SCG 408  
EDUCATION AND SOCIETY  
Graduate  
A study of social forces that impinge upon the educational enterprise and analysis of the relationship to major social problems in urban education with emphasis on their social, economic, political, historical and philosophical dimensions.

SCG 409  
SOCIOLOGY OF EDUCATION  
Graduate  
This course focuses on the relationship between school structures and culture, social relations of race, ethnicity, class, and gender, and ideologies organizing education in the United States. Students will explore a range of theories in the sociology of education that explore linkages between school structures and processes and broader social forces. Readings may examine the political economy of schooling, inequalities in educational practices, and student and teacher identities shaped by schools and the larger society.

SCG 410  
INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES  
Graduate  
(formerly CUG 400) This course will examine the basic questions, issues and theoretical frameworks central to the purpose, conceptualization, conduct, writing, reading and the use of educational research as a means for informing educational theory, practice and policy. Students will be exposed to the multiple frameworks which inform education research, the various methodologies employed in collecting and analyzing data and will examine the advantages, limitations and values implicit in conducting and evaluating research.

SCG 411  
PHILOSOPHY OF EDUCATION  
Graduate  
This course examines the relationship of education to the moral and ethical dilemmas or predicaments of the human condition. It will entail issues related to the nature of education's responsiveness, or lack there of, to the concerns of the human condition: for example, human alienation, suffering, success and failure, caring, freedom, responsibility, liberation and agency. Special attention will be given to how these concerns influence or have social, cultural and political implications for how teachers address them within the teaching and learning process.

SCG 435  
YOUNG ADOLESCENT DEVELOPMENT IN CONTEXT  
Graduate  
This course considers how race/ethnicity, gender, social class, and sexuality inform teachers' perceptions of early adolescent development. It also examines middle grades teaching practices and has students analyze how those practices shape the growth and educational/learning experiences of early adolescents. It promotes a broad understanding of social, cultural, and historical conceptions of adolescence, and critically examines the complexities of the physical, social, intellectual, and emotional processes of growth and change of young adolescents. It explores the range of social contexts, interpersonal relationships, and societal views, which influence and give meaning to the development and learning of middle grade youth. This course uses observational experiences, reflective inquiry and interdisciplinary theories to prepare middle grades teacher candidates to design classroom experiences that reflect and are sensitive to the socio-cultural contexts and realities of diverse middle grades learners. ***The course meets in the afternoon and integrates community and/or after school field experience with young adolescents into coursework. Co-requisite for this course is MGE 400. In this course, students will: 1. Analyze and assess middle grades teaching practices for their relevance to social contexts that affect middle grades learners. 2. Design classroom experiences that reflect and are sensitive to the socio-cultural contexts and realities of diverse middle grades learners. 3. Interact directly with middle grades learners from a variety of communities and backgrounds and assess and articulate the educational impact of their particular needs.

SCG 439  
PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION  
Graduate  
This course examines foundational and contemporary theories of youth and adolescent development. It considers how these theoretical ideas relate to contemporary questions of youth and middle level education. The course explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. This course seeks to develop in prospective educators a broader capacity to theorize about youth and schooling, and, hence, to act critically and reflectively in multiple contexts in which youth learn. 10 - 15 field experience hours are required as part of this course.
SCG 451
DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION
Graduate
This course introduces students to different approaches to education research and research methods with a focus on critical practitioner research. Students will become discerning readers of educational research and be able to design and conduct research related to teaching and learning in a variety of disciplinary areas (English, history/social sciences, mathematics, or science) at the secondary level. They will develop skills to critically examine and reflect on practice in the classroom through discipline-specific research projects. Taken concurrently with TCH 481, TCH 482, TCH 483, TCH 484.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class. SCG 451 has a co-requisite of TCH 481, or TCH 482, or TCH 483, or TCH 484.

SCG 527
GLOBAL ISSUES IN EDUCATION
Graduate
Studies of school systems outside the United States, their methods, curriculum and achievements.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 582
PRACTICUM IN EDUCATIONAL TECHNOLOGY AND NEW MEDIA
Graduate
This course provides directed experiences in decision-making for curriculum planning, instructional design and delivery, scholarship and leadership in instructional technology-supported learning contexts. Students will engage in co-teaching activities in technology-rich classrooms; develop an instructional technology plan; make field evaluation and use of educational hardware and software; review and discuss research and professional literature in instructional technology; evaluate and use instructional products; develop and present a multimedia-based project; learn and apply theories and principles of instructional and information message design; engage in collaborative, micro-teaching activities online; develop a technology-enhanced instructional program for the K-12 environment; create a staff development plan with focus on technology applications for administrative purposes; conduct an evaluation study on-site; observe and experiment face-to-face and virtually with a range of instructional technology applications; produce comparative reviews on the use of instructional technology in various school settings. The practicum will also provide students with multiple opportunities to reflect and share their thinking with each other in a supportive community of learners and researchers. (Prerequisites: SCG 402 & CS 460).

SCG 588
INDEPENDENT STUDY IN SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION
Graduate
Independent Study in Social and Cultural Foundations in Education. PREREQUISITE: Permission of instructor, program chair and associate dean.

SCG 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
(0 credit) Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

SCG 603
PROSEMINAR: CULTURE AND EDUCATION
Graduate
This course focuses on the relationship between education, pedagogy, and theories of culture framed by a concern for social justice. Topics may include the pedagogical and political dimensions of popular culture, questions of knowledge production, the relationship between knowledge and power of the political economy of culture production.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.
SCG 604
PROSEMINAR: IDENTITY CONSTRUCTIONS AND NEGOTIATIONS
Graduate
This course examines identity construction in educational contexts. Drawing on theoretical frameworks in the sociology of education, postmodernist, feminist and critical theories of education, and cultural studies literature, this course will explore identity as complex and multifaceted. It explores relations of class, race, ethnicity, gender, and sexuality and the implications of sociality for contemporary education.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 608
PROSEMINAR: IDEOLOGY, POWER AND POLITICS
Graduate
This course examines how power operates pedagogically and how domination and resistance get shaped in education. It considers power relations in society and how these power relations enter into educational discourse and practice. It also explores ways in which power produces various educational practices and ways in which power gets psychically configured. Students will examine major theories of power, analyze race, ethnicity, gender, class and sexuality as systems of power and consider the educational implications of such an analysis.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 610
INTRODUCTION TO RESEARCH METHODS
Graduate
(Special section of SCG 410, Introduction to Research: Purposes, Issues and Methodologies.) This course will examine the basic questions, issues and theoretical frameworks central to the purpose, conceptualization, conduct, writing, reading and the use of educational research as a means for informing educational theory, practice and policy. Students will be exposed to the multiple frameworks which inform educational research, the various methodologies employed in collecting and analyzing data and will examine the advantages, limitations and values implicit in conducting and evaluating research. Students will also begin exploring possible thesis topics as they begin defining their particular research purpose, methodology and issues.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 611
PROSEMINAR: PHILOSOPHICAL STUDIES IN EDUCATION, CULTURE AND ETHICS
Graduate
Examines both traditional philosophical questions in education from such perspectives as Africana, feminist, Latino/Hispanic thought and distinctively Africana, feminist, and Latino/Hispanic issues in a philosophical way. Some of the perspectives are, for example, the necessary conditions of a humanistic education, the relation between theory and practice, the relationship between individual and institutional/society, the role of education in the struggle for social justice, the role of aesthetics in human development and projects of political emancipation, the dialectics of history and experience in the development of liberatory ideas, and the moral and ethical dimensions of education.

Status as a Graduate Social & Cultural Foundations in Education student is a prerequisite for this class.

SCG 614
CRITICAL MEDIA LITERACY
Graduate
This course focuses on theories of media interpretation, cultural pedagogy, and cultural studies. Literature from critical media literacy, cultural studies, critical pedagogy, communication studies, sociology, and philosophy will inform student understanding of how media educates, how interpretations of media are struggled over, and how such practices relate to broader structures of power, identity formation, political economy of media, theories of communication and representation, and pedagogy.

SCG 615
THEORIZING IN EDUCATION, TECHNOLOGY AND SOCIETY
Graduate
This course explores philosophical and sociological theories of education, technology and society. Topics include the social, political, and pedagogical implications of educational technology and new media. The aim of the course is to introduce students to the history of critical theoretical perspectives on educative technologies through foundational texts in the humanities and social sciences as well as contemporary studies in the multiple educative aspects of technology. Course readings will draw on scholarship in philosophy, sociology, new media, educational foundations, and political theory.
SCG 617
SPECIAL TOPICS IN SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION:
Graduate
This course will provide students with an opportunity for critical examination of issues in the social and cultural foundations of education. Topics could include: educational theory; social context of education; education and social justice; education and social transformation, educational policy; and issues in educational reform.

SCG 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of thesis/capstone advisor required each term. Registration limited to three terms.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

SCG 635
ADVANCED QUALITATIVE RESEARCH METHODOLOGIES
Graduate
This course extends the fundamental principles of educational research first introduced in SCG 610. It provides students with theoretical and practical preparation in conceptual issues in qualitative research and research design. Students will explore a variety of methodological approaches to interpretive inquiry in social science research, research design, methods of data collection, research ethics, and critical analysis. This course will prepare students to undertake the capstone master's thesis requirement.

SCG 610 and status as a SCF Masters student is a prerequisite for this class.

SCG 636
THESIS RESEARCH
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit. Completion of this course is required to receive the MA Degree in Social and Cultural Foundations in Education.

SCG 637
CAPSTONE: SOCIAL AND CULTURAL FOUNDATIONS IN EDUCATION
Graduate
The SCFE Capstone allows students to explore substantive areas of scholarship within their areas of interest and to create a final project or paper of their own design under the mentorship of a faculty member in the program. The Capstone is an opportunity to engage in a synthesis of what has been learned through coursework, and to integrate and compare knowledge gained from students' own research with that which was learned in the program. The capstone course will involve preparation of a substantive piece of work. Upon completion of all coursework, students enrolled in this course will select and work with a Capstone Advisor (a faculty member in the SCFE program) to discuss possible paper topics. The paper will generally consist of library-based research and will typically be 20-25 pages in length. Completion of this course is required to receive the MEd Degree in Social and Cultural Foundations in Education.

SCG 701
PHILOSOPHY OF ETHICS IN EDUCATION
Graduate
This course is a philosophical investigation into the structure and meaning of ethics within education. Education, a condition for self-formation and self-other relations, is explored as a site of ethical inquiry. It is within this framework that education, which involves learning, teaching, response, and communication, is posed as a condition of ethical possibility and not merely as the vehicle through which a certain ethics gets carried out. Primary and secondary philosophical and non-philosophical literature and authors within and outside of philosophy of education will be used to study these issues.

Status as an EDD student with a declared concentration is a prerequisite for this class.
The purpose of this course is to facilitate the development of a critical understanding of the larger concept of culture within the notion of multiculturalism. This begins by recognizing that educational institutions such as schools and universities are cultural institutions engaged in the making of culture. While the focus of multiculturalism is about theorizing difference in relation to the particular cultural processes that go on in schools and universities, its focus does not address how educational institutions are shaped by broader cultural dynamics that are outside of the immediate context of educational institutions. It is in this context that doctoral students will examine how cultural processes are intimately connected with social relations, especially with class relations, with gender and ethnic divisions, and with the racial restructuring of social relations. They will also explore how culture involves power, which serves to produce inequalities in the abilities of individuals and social groups to define and realize their needs. In addition, culture will be analyzed as a site of social difference and struggle. The primary focus of the course will be to explore how the larger political economy, popular culture and politics of a society effect the dynamics of how culture is constructed within social life. Doctoral students from within this framework will analyze what we mean by culture; how it is produced and consumed; the relationship of everyday life are represented by dominant cultural and sub-cultural groups and institutions. It is in this context that the course also examines how relations of power, knowledge, social identity and pedagogy within educational institutions are conditioned and shaped by the educational practice that shapes and impinges upon the internal workings and purposes of educational institutions.

Status as a EDD student with a declared concentration is a prerequisite for this class.

This course will examine the process of human development and learning through the ages by critically examining cross-cultural research and developmental theories designed to describe and interpret the physical, social, emotional, intellectual, and psychological processes involved. Emphasis will be placed on the range of individual, familial, environmental, and cultural factors that may enhance or inhibit human growth and development, and on the critical role that human relationships play in the lifelong interactive processes of learning and growth. Considerable attention will be paid to the historical role of power, culture, class, gender and capability in defining and interpreting certain behaviors as indicators of normative development. These normative indicators will be critiqued with regard to underlying cultural assumptions and values, their function in fostering and maintaining current social, educational and political relations, and their contribution to the current crises in urban education and the development of children and youth. Class participants will examine their perspective on human development and learning and explore the socio-cultural and historical bases which contribute to their underlying values and assumptions. Through multifaceted inquiry utilizing self-reflection, case studies, theoretical analyses, and child assessment and observation, participants will consider the implications for their work as educational leaders in approaching current challenges with students, parents, community, and teachers and in creating schools that will foster societal change to support the healthy development of children and youth.

Status as a EDD student with a declared concentration is a prerequisite for this class.

This course is designed to provide doctoral level students with theoretical and practical preparation in quantitative research design including: instrumentation; data collection; statistical analysis; ethics and politics of the conduct of research; and development of analytical skills for critiquing quantitative research. Students will have the opportunity to work with real databases to conduct both univariate and multivariate analyses, including correlations, ANOVAS, and multiple regressions. Prerequisite: SCG 785.

SCG 785 and status as an EDD student is a prerequisite for this class.

This course is designed to provide doctoral level students with theoretical and practical preparation in qualitative methods including: data collection and analysis; ethics and the politics of the conduct of research; and development of analytical skills for critical analysis of qualitative research. Students will be introduced to a range of approaches to qualitative inquiry that may include: narrative inquiry; ethnography; case study; phenomenology; grounded theory; and participatory action research from a variety of theoretical perspectives. Prerequisite: SCG 785.

SCG 785 and status as an EDD student is a prerequisite for this class.
SCG 755  
**QUANTITATIVE RESEARCH METHODS II**  
Graduate  
A continuation of SCG 735. Students will prepare a methodology section of a research project and will learn how to write up quantitative results of their analyses. By the end of the course students should be able to: understand quantitative methodological approaches; select appropriate data collection strategies; conduct the appropriate analysis for the research question(s) proposed and the nature of the data; and be prepared to write a candidacy paper. Prerequisite: SCG 735.

SCG 755 and status as an EDD student is a prerequisite for this class.

SCG 765  
**QUALITATIVE RESEARCH METHODS II**  
Graduate  
A continuation of SCG 745. Students will conduct a pilot study on an issue of interest using a qualitative research design. By the end of the course students should be able to: understand qualitative methodological approaches; select appropriate data collection strategies; conduct the appropriate analysis for the research question(s) proposed and the nature of the data; and be prepared to write a candidacy paper. Prerequisite: SCG 745.

SCG 745 and status as an EDD student is a prerequisite for this class.

SCG 775  
**SEMINAR: FRAMEWORKS OF INQUIRY IN EDUCATIONAL RESEARCH I**  
Graduate  
This course offers doctoral students a general introduction to theory and practice in educational research. First, it is designed to help students develop an understanding of the assumptions that underlie multiple approaches to knowledge construction and the conduct of inquiry in education. Second, the course will introduce students to the structural organization of a research manuscript. By the end of the course students should be able to: understand key theoretical and methodological issues in educational inquiry; engage in the critical analysis of multiple educational frameworks; recognize the components of a research manuscript; and identify a general topic area for dissertation research.

Status as a EDD student with a declared concentration is a prerequisite for this class.

SCG 785  
**SEMINAR: FRAMEWORKS OF INQUIRY IN EDUCATIONAL RESEARCH II**  
Graduate  
Drawing upon the knowledge and skills developed in Frameworks of Inquiry I, this course is designed to enhance students' ability to critically analyze existing research as a crucial element in completing their own doctoral research. Emphasis will be placed on the preparation of a critical literature review. By the end of the course students should be able to: review the components of a research proposal; develop further the ability to evaluate research critically; conduct a literature review that will involve interpretation, evaluation, and synthesis of literature on a topic of their choice; refine a topic for dissertation research; and make an informed decision between the quantitative and qualitative sequences. Prerequisite: SCG 775

SCG 775 and status as an EDD student is a prerequisite for this class.

SCU 207  
**SOCIAL AND HISTORICAL ISSUES IN EDUCATION**  
Undergraduate  
This course examines through an interdisciplinary framework sociological and historical issues and concerns associated with the relationship between education and public life. The course analyzes education as a form of cultural power, addressing its political and ideological effects. Emphasis will be placed upon the social and historical meanings and purposes assigned to education, especially as it pertains to questions of race, gender, sexuality, and the political economy of class.
SCU 335
YOUNG ADOLESCENT DEVELOPMENT IN CONTEXT
Undergraduate
This course considers how race/ethnicity, gender, social class, and sexuality inform teachers’ perceptions of early adolescent development. It also examines middle grades teaching practices and has students analyze how those practices shape the growth and educational/learning experiences of early adolescents. It promotes a broad understanding of social, cultural, and historical conceptions of adolescence, and critically examines the complexities of the physical, social, intellectual, and emotional processes of growth and change of young adolescents. It explores the range of social contexts, interpersonal relationships, and societal views, which influence and give meaning to the development and learning of middle grade youth. This course uses observational experiences, reflective inquiry and interdisciplinary theories to prepare middle grades teacher candidates to design classroom experiences that reflect and are sensitive to the socio-cultural contexts and realities of diverse middle grades learners. ***The course meets in the afternoon and integrates community and/or after school field experience with young adolescents into coursework. Co-requisite for this course is MGE 300. In this course, students will: 1. Analyze and assess middle grades teaching practices for their relevance to social contexts that affect middle grades learners. 2. Design classroom experiences that reflect and are sensitive to the socio-cultural contexts and realities of diverse middle grades learners. 3. Interact directly with middle grades learners from a variety of communities and backgrounds and assess and articulate the educational impact of their particular needs.

Junior standing is a prerequisite for this class.

SCU 336
ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
Undergraduate
Theories of development throughout adolescence including current issues of problems and growth crises in attaining maturation. The course also includes adult and aging life span considerations. Emphasis is placed on the role of the early childhood professional in interaction with adults in the lives of young children (i.e., parents, grandparents).

The process involved in human learning is examined from alternative theoretical and research paradigms and perspectives. The roles of emotions, cultural differences, social realities, cognitive uniqueness, character and achievement tendencies are examined with respect to learner functioning. Alternative methods and techniques for evaluating learner development and academic achievement are surveyed and discussed. Emphasis is placed upon identifying the characteristics of individually and culturally responsive and responsible testing and assessment protocols in the school setting.

Advanced Teacher Candidate Standing is a prerequisite for this class.

SCU 337
HUMAN GROWTH AND DEVELOPMENT
Undergraduate
This course is an introduction to the study of the process of human development from conception to old age. Through a range of theories, the periods of childhood, adolescence, and adulthood are examined with particular attention to the role of culture, gender, and class as they inform the contextualized process of growth and change across the life span.

SCU 338
THE PROCESS AND EVALUATION OF LEARNING
Undergraduate
This course introduces foundational and contemporary theories of youth and adolescent development. It provides an investigation of how these theoretical ideas relate to contemporary questions of youth and middle level education. The course explores the historical invention of adolescence, changing ideas about the meaning of childhood, as well as some of the broader social, economic, political, and cultural implications of these changing ideas. This course seeks to develop in prospective educators a broader capacity to theorize about youth and schooling and, hence, to act critically and reflectively in multiple contexts in which youth learn. 10 - 15 field experience hours are required as part of this course.

Advanced Teacher Candidate Standing or status as an Exercise Science or World Language Education major is a prerequisite for this class.
SCU 351
DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION
Undergraduate
This course introduces students to different approaches to education research and research methods with a focus on critical practitioner research. Students will become discerning readers of educational research and be able to design and conduct research related to teaching and learning in a variety of disciplinary areas (English, history/social sciences, mathematics, or science) at the secondary level. They will develop skills to critically examine and reflect on practice in the classroom through discipline-specific research projects. Taken concurrently with SEC 381, SEC 382, SEC 383, SEC 385.

SEC 364 is a prerequisite for this class. SCU 351 has a co-requisite of SEC 381, or SEC 382, or SEC 383, or SEC 385.

SCU 399
INDEPENDENT STUDY
Undergraduate
(1 to 4 credits) Education core unit. Permission of Department Chair and Associate Dean is required.

SE 325
INTRODUCTION TO SOFTWARE ENGINEERING
Undergraduate
This course introduces students to the activities performed at each stage of the development process so that they can understand the full lifecycle context of specific tasks such as coding and testing. Topics will include software development processes, domain modeling, requirements elicitation and specification, architectural design and analysis, product and process level metrics, configuration management, quality assurance activities including user acceptance testing and unit testing, project management skills such as risk analysis, effort estimation, project release planning, and software engineering ethics. PREREQUISITE(S): CSC 212 or CSC 224 or CSC 396 or CSC 242 or CSC 262 or IM 330 or CSC 243

SE 330
OBJECT ORIENTED MODELING
Undergraduate
Object-oriented modeling techniques for analysis and design. Provides the tools and techniques needed to solve complex, real-world software engineering problems in an object-oriented manner, using the most effective elements of the Unified Process. The course covers the essential concepts and notation of the Unified Modeling Language (UML), the standard notation for object-oriented analysis and design. Team project. PREREQUISITE(S): CSC 212 or CSC 262 or CSC 300

SE 333
SOFTWARE TESTING
Undergraduate
This course is designed for the software engineering professional to gain a greater understanding of the key ingredients in creating and/or managing a successful testing program to meet project needs. Topics covered include test lifecycle planning, test design & coverage analysis, complexity, levels of testing such as unit, integration, system, performance and stress testing. Best practice strategies in software testing such as verification & validation, early lifecycle testing, risk based testing and automation will also be examined including exposure to test automation methods and tools. PREREQUISITE(S): CSC 383 or SE 330 or CSC 301

SE 350
OBJECT-ORIENTED SOFTWARE DEVELOPMENT
Undergraduate
Principles, techniques and tools of object-oriented modeling, design, implementation, and testing of large-scale software systems. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): CSC 301 or CSC 383

SE 352
OBJECT-ORIENTED ENTERPRISE APPLICATION DEVELOPMENT
Undergraduate
This course focuses on applying object-oriented techniques in the design and development of software systems for enterprise applications. Topics include component architecture, such as Java Beans and Enterprise Java Beans, GUI components, such as Swing, database connectivity and object repositories, server application integration using technologies such as servlets, Java Server Pages, JDBC and RMI, security and internationalization. PREREQUISITE(S): CSC 301 or CSC 383.
SE 356
SOFTWARE DEVELOPMENT FOR MOBILE AND WIRELESS SYSTEMS
Undergraduate
This course will focus on the unique aspects of developing software applications for mobile and wireless systems, such as personal digital assistant (PDA) devices and mobile phones. Topics will include user interface design for small screens with restricted input modalities, data synchronization for mobile databases as well as wireless programming and the use of web services. PREREQUISITE(S): SE 350

SE 357
CONCURRENT SYSTEM DEVELOPMENT
Undergraduate
Fundamentals and techniques of developing concurrent object-oriented applications, using a patterns-based approach. Concepts covered include threads, synchronization and object locking, thread blocking and deadlock, safety and liveness, state-dependent action and concurrency control. PREREQUISITE(S): SE 350.

SE 358
SOFTWARE DEVELOPMENT FOR LIMITED AND EMBEDDED DEVICES
Undergraduate
This course will focus on the unique aspects, tools, and techniques for developing software applications for limited and embedded devices, such as set-top boxes, micro-controllers and smart cards. Topics will include memory management for low-memory devices and efficient programming techniques for limited processors. Students will gain hands-on experiences in customizing and configuring embedded OS, handling various types of sensors and actuators such as barcode readers, RFID sensors, etc, and building software applications that meet the functional and non-functional requirements. PREREQUISITE(S): SE 350

SE 359
AGILE SOFTWARE DEVELOPMENT
Undergraduate
This course focuses on the fundamentals, principles, tools, and techniques in agile software development. Students will gain hands-on experiences in agile software development through projects dealing with various aspects of agile development, including planning, construction, testing, and integration. Students will be able to effectively participate in and manage agile software development as a result of their successfully completing this course. PREREQUISITE(S): SE 350

SE 368
SOFTWARE MEASUREMENT AND PROJECT ESTIMATION
Undergraduate
This course will discuss various software metrics and defect models. Productivity and effort estimation models as well as software cost estimation will also be discussed. PREREQUISITE(S): IT 223 and SE 330.

SE 371
PRACTICES OF GLOBAL SOFTWARE DEVELOPMENT
Undergraduate
This course studies the challenges and solutions for developing software in a global environment. Topics covered include strategic issues related to allocation of tasks; communication issues that arise due to distance, time zone differences, infrastructure support; geographical dispersion, and lack of information communication; coordination complexity; cultural issues, technical issues related to information and artifact sharing, and architectural design, and finally knowledge management issues. Some sections of this course will include a hand-on global development project in conjunction with teams of students at other universities, while other sections will focus on a more in-depth theoretical discussion of these issues and concepts. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393

SE 380
DESIGN OF OBJECT-ORIENTED LANGUAGES
Undergraduate
This course covers issues in the design and specification of object-oriented programming languages. Sample topics include the use of patterns in program representation, static and dynamic semantics, subject reduction, sub-typing, inheritance, polymorphism, genericity and concurrency. PREREQUISITE(S): SE 350.
SE 391
SOFTWARE ENGINEERING STUDIO I
Undergraduate
Students will work in small teams to develop realistic software systems in a master-apprentice environment. The instructor will serve as a master/mentor/project leader. Students will apply the knowledge and skills they have learned in previous course in solving real world problems. PREREQUISITE(S): SE 350.

SE 392
SOFTWARE ENGINEERING STUDIO II
Undergraduate
This course is a continuation of SE 391. SE 391 and SE 392 must be taken as a sequence in consecutive quarters. PREREQUISITE(S): SE 391.

SE 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None.

SE 430
OBJECT ORIENTED MODELING
Graduate
Object-oriented modeling techniques for analysis and design. Provides the tools and techniques needed to solve complex, real-world software engineering problems in an object-oriented manner, using the most effective elements of the Unified Process. The course covers the essential concepts and notation of the Unified Modeling Language (UML), the standard notation for object-oriented analysis and design. Team project. PREREQUISITE(S): CSC 403

SE 433
SOFTWARE TESTING AND QUALITY ASSURANCE
Graduate
This course is designed for the software engineering professional to gain a greater understanding of the key ingredients in creating and/or managing a successful testing program to meet project needs. Topics covered include test lifecycle planning, test design & coverage analysis, complexity, levels of testing such as unit, integration, system, performance and stress testing. Best practice strategies in software testing such as verification & validation, early lifecycle testing, risk based testing and automation will also be examined including exposure to test automation methods and tools. PREREQUISITE(S): CSC 403

SE 450
OBJECT-ORIENTED SOFTWARE DEVELOPMENT
Graduate
Principle, techniques and tools of object-oriented modeling, design, implementation, and testing of large-scale software systems. Topics include design patterns, application frameworks, architectural design, and the applications in the software development process to improve the extensibility, maintainability, and reliability of software systems. PREREQUISITE(S): CSC 403

SE 452
OBJECT-ORIENTED ENTERPRISE COMPUTING
Graduate
This course focuses on applying object-oriented techniques in the design, development, and integration of server-side enterprise applications using technologies such as servlets, Java Server Pages, and JDBC. Topics include web applications, multi-tier architecture, model-view-controller architecture, database connectivity, and security. PREREQUISITE(S): CSC 403

SE 453
ARCHITECTURE AND FRAMEWORKS FOR DEVELOPING CLIENT APPLICATIONS
Graduate
This course will focus on software architectures, frameworks, and techniques for developing web-based thin client applications as well as rich desktop client applications. Topics will include discussion on design and architectural patterns, such as model-view-controller pattern; survey of widely used development frameworks for building client applications, such as Struts, Java Server Face (JSF), Swing, and SWT, etc.; discussion of widely used techniques such as AJAX; evaluation of the strengths and weaknesses of these technologies for making technology decisions. Students will gain hands-on experiences in developing applications that utilizes these frameworks and techniques. Prerequisite: SE 452.
SE 456
ARCHITECTURE OF COMPUTER GAMES
Graduate
This course discusses the software architecture and the engineering of computer games. The topics include gaming platforms, libraries and frameworks for game development, techniques for accessing and managing low level devices and resources, and application of artificial intelligence. PREREQUISITE(S): CSC 403

SE 457
SERVICE-ORIENTED ARCHITECTURE
Graduate
An in-depth study of service oriented architecture (SOA) from the business, architectural, and technology perspectives. The business perspective will explain the imperatives behind SOA and discuss the significance of SOA in industry. The architectural perspective will discuss the different architectural models of software development and contrast these with SOA. The technology perspective will provide students with the opportunity to gain the required hands-on experience to analyze, design, implement and deploy SOA solutions that will meet both functional and non-functional requirements. Major topics include software architectures in practice, SOA development lifecycle, Enterprise Service Bus, SOA analysis and design methods, Web Services, and governance. Prerequisite: SE 450 or CSC 435

SE 459
AGILE SOFTWARE DEVELOPMENT
Graduate
This course focuses on the fundamentals, principles, tools, and techniques in agile software development. Students will gain hands-on experiences in agile software development through projects dealing with various aspects of agile development, including planning, construction, testing, and integration. Students will be able to effectively participate in and manage agile software development as a result of their successfully completing this course. PREREQUISITE(S): SE 450

SE 468
SOFTWARE MEASUREMENT/PROJECT ESTIMATION
Graduate
Software metrics. Productivity, effort and defect models. Software cost estimation. PREREQUISITE(S): IT 403 and (SE430 or SE450)

SE 475
MANAGING GLOBALLY DISTRIBUTED SOFTWARE DEVELOPMENT
Graduate
Managing Globally Distributed Software Development (GDSD) for IT projects. Issues associated with time zone differences, infrastructure support, geographical dispersion, and lack of centralized communication. The course will focus on the management, implementation and deployment of software within the context of outsourced, distributed development, and insourced projects. Additional topics include strategic management issues such as justification, vetting, consulting services and partnerships. Course will include several hands-on distributed development projects. PREREQUISITE(S): CSC 403

SE 477
SOFTWARE AND SYSTEMS PROJECT MANAGEMENT
Graduate
Project Management is presented from a practitioner's view. The four basic building blocks of software project management: people, process, tools, and measurements are covered. Special emphasis is placed on professional standards such as the Project Management Book of Knowledge and IEEE Software Engineering Standards. Specific topics include Managing People, Selecting Project Tools, Leadership & Motivation, Software Development Processes, Estimation, Risk Analysis, Scheduling and Tracking, Leveraging Measurements, and Project Completion. Consideration is given to rapid development and project cultural issues. PREREQUISITE(S): Knowledge of the Software development life cycle model, for example through courses such as SE430, ECT455, IS425, MIS555 or through appropriate work experience.

SE 480
SOFTWARE ARCHITECTURE I
Graduate
The Software Architecture process is concerned with describing, evaluating, and designing systems at the architectural level. This course will discuss the role of architecture and the architect in the software development cycle. It will introduce architectural patterns and tactics, architecture assessment techniques, architecture driven design, and techniques for documenting architectures. The course will involve design, development, and assessment activities. PREREQUISITE(S): SE 450
SE 482
REQUIREMENTS ENGINEERING
Graduate
Requirements Engineering (RE) plays a critical role in the software development process. This course will introduce related vocabulary, concepts, and techniques, and will examine the role of RE in software and systems engineering. The course will cover topics related to eliciting, validating, negotiating, analyzing, specifying, and managing requirements. Popular RE tools will also be introduced. Prerequisite: SE430 or SE450.

SE 491
SOFTWARE ENGINEERING STUDIO
Graduate
Students will work in small teams to develop realistic software systems in a master-apprentice environment. The instructor will serve as a master/mentor/project leader. Students will apply knowledge and skills they have learned in previous course in solving real world problems. PREREQUISITE(S): SE 450.

SE 511
PRACTICES OF GLOBAL SOFTWARE DEVELOPMENT
Graduate
This course studies the challenges and solutions for developing software in a global environment. Topics covered include strategic issues related to allocation of tasks; communication issues that arise due to distance, time zone differences, infrastructure support, geographical dispersion, and lack of information communication; coordination complexity; cultural issues, technical issues related to information and artifact sharing, and architectural design, and finally knowledge management issues. Some sections of this course will include a hands-on global development project in conjunction with teams of students at other universities, while other sections will focus on a more in-depth theoretical discussion of these issues and concepts. Prerequisite(s): SE 450 or SE 430 or IS 430 or PM 430. A student may not take both IS 540 and SE 511 for credit toward a degree.

SE 525
SOFTWARE SECURITY ARCHITECTURE
Graduate
Students in this course will learn architectural patterns for integrating security into software such as web applications. Topics include: an overview of software security; integration of authentication, access control, and auditing into software; programming with symmetric-key and asymmetric-key cryptography, including key distribution and key management, use of certificates, and SSL/TLS; security mechanisms in modern runtime environments, e.g., code signing, code verification, access control, and security policies. Students will get hands-on experience designing and implementing secure software. PREREQUISITE(S): CSC 435 and SE 450.

SE 526
SOFTWARE SECURITY ASSESSMENT
Graduate
Students in this course will learn how to conduct software security assessment to identify software vulnerabilities in software such as web applications and operating system services. Topics include: common software vulnerabilities and attack vectors; malicious payloads, including shellcode structure; and application review techniques, including fuzzing and code auditing. Students will get hands-on experience identifying vulnerabilities in software. Prerequisite(s): CSC 435.

SE 529
SOFTWARE RISK MANAGEMENT
Graduate
Identification, estimation, evaluation, planning, controlling, and monitoring of risk involved in the development, maintenance, operation and evolution of systems. PREREQUISITE(S): IT 403 and SE 430 or consent.

SE 533
SOFTWARE VALIDATION AND VERIFICATION
Graduate
Techniques, methods and tools for software inspection and testing. Theory and applications of formal verification of programs. Techniques and tools for automated analysis of programs. PREREQUISITE(S): SE 450.
SE 546
SOFTWARE ARCHITECTURE AND DESIGN FOR DESKTOP APPLICATIONS
Graduate
This course will introduce students to architecture, design and implementation issues for developing GUI-based desktop application. The goal is to understand the engineering aspect of user interface development -- that is the basic software architectures and designs that govern the development of graphical user applications including patterns like the Model-View-Controller and its derivatives, event-driven design, as well as addressing concurrency, performance, caching, and software packaging and distribution issues. The course will also provide an in depth exposure to the toolkits available in Java. Examples include JFC/Swing, JMF, JAF. Prerequisite(s): SE 450

SE 549
MODEL-DRIVEN SOFTWARE DEVELOPMENT
Graduate
Advanced methods and techniques in software specification, modeling, and model-driven development. Topics include approaches to software specification and modeling, formal specification languages, techniques for structural and behavioral modeling of software systems, and tools for analysis and transformation of software systems. PREREQUISITE(S): SE 430 or SE 450

SE 554
ENTERPRISE COMPONENT ARCHITECTURE
Graduate
This course will focus on object-oriented component architectures for enterprise applications. Topics include: Enterprise Java Beans (EJB), Java Naming and Directory Interfaces (JNDI), Java Mail and Messaging Services. PREREQUISITE(S): SE 450 or SE 452.

SE 556
ADVANCED ARCHITECTURE OF COMPUTER GAMES
Graduate
This course discusses the advanced issues in software architecture and the engineering of computer games. The topics include engineering and programming issues in graphics, scene management, kinematics, simulation, collision detection. Software design patterns and frameworks for computer games. Project management, configuration management, and quality assurance of computer game development projects. PREREQUISITE(S): SE 456 and CSC 407

SE 558
ARCHITECTURE AND DESIGN FOR MULTIPLAYER GAMES
Graduate
Multiplayer games were made possible by the advances in networking technology, increases in processor speed and data storage. Today, the majority of successful game titles are equipped with a multiplayer capability. This technical course discusses the fundamental aspects of multiplayer game development such as: design techniques, architectures, client and server side implementation, time and event synchronization, databases. PREREQUISITE(S): CSC 403 and CSC 407

SE 560
STRUCTURED DOCUMENT INTERCHANGE AND PROCESSING
Graduate
Document and data interchange among different applications is an extremely important aspect of software application development. This course will focus on emerging technologies associated with the Extensible Markup Language (XML), such as the Document Object Model (DOM), the Simple API for XML (SAX), the XML Stylesheet Language (XSL) and Transformation Language (XSLT), and XML Schema. Applications of these technologies will be discussed in conjunction with tools and techniques for parsing, transforming, and manipulating documents. PREREQUISITE(S): SE 450 OR (CSC 383 or CSC 301) and SE 430.

SE 579
ANALYTICS AND DATA MINING IN SOFTWARE ENGINEERING
Graduate
This course discusses the application of selected statistical analysis, data mining, and machine learning techniques to the area of Software Engineering. These techniques are used for purposes as varied as stakeholder analysis, mining software repositories, trace retrieval, bug prediction, recommender systems in Software Engineering domains, and software process improvement techniques. The course demonstrates how these techniques can be used to enhance project management and other software engineering activities in software intensive systems and provides students with hands-on experience using them on real project data. (No prior knowledge of data mining and knowledge management is assumed.) PREREQUISITE(S): SE 450

DePaul University
Autumn 2015-2016
Page 1379 of 1633
SE 581
SOFTWARE ARCHITECTURE II
Graduate
In this second Software Architecture course, students will be exposed to case studies of real-world software architectures for which reliability, performance, availability, scalability and other such concerns drive the architectural design. Students will gain hands-on practice in reverse engineering, designing, and assessing existing systems including performance testing. Students will build on their prior knowledge to design complex systems in principled and systematic ways. The course will involve designing and implementing a simulated high scalability, high reliability system. PREREQUISITE(S): SE 480

SE 582
SOFTWARE-INTENSIVE SYSTEMS ENGINEERING AND MANAGEMENT
Graduate
This course will introduce students to fundamental principles of systems engineering for large and complex software intensive systems. The course will include a study of systems engineering failures, and will cover topics related to problem frames; systems level modeling of hardware and software components, concept definition, design tradeoffs, risk assessment, interface definition and related systems engineering activities. Additional topics such as product line development, ultra-large scale systems, and engineering of safety critical systems will also be covered. PREREQUISITE(S): (SE 470 or PM 430 or IS 430) and (SE 430 or SE 482 or IS 485)

SE 591
SOFTWARE ENGINEERING STUDIO II
Graduate
This is the continuation of SE 491. SE 491 and 591 must be taken as a sequence in two consecutive quarters. PREREQUISITE(S): SE 491

SE 598
TOPICS IN SOFTWARE ENGINEERING
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor.

SE 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None.

SE 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. Students may register for this course no more than three times. PREREQUISITE(S): Consent of the instructor.

SE 691
RESEARCH SEMINAR CONTINUATION
Graduate
This course is intended for students not registering in either SE 696 or SE 698. After registering for SE 690, students register for this course in each subsequent quarter until they complete the research. Students who fail to do so will be required to re-enroll in SE 690 to meet the requirement for completing that course. Prerequisite: SE 690

SE 695
MASTER’S RESEARCH
Graduate
Students interested in a more in-depth study of a particular area will register for this course and work with a faculty member (not necessarily their academic advisor) on a research project. The work involved may include system development, empirical studies, or theoretical work. 4 credit hours of CSC 695 replaces one 500level elective course in student's degree program. This course can be taken for 1-4 credit hours for up to 8 credit-hours. PREREQUISITE(S): Consent of research advisor. Independent study form required. Students must successfully complete the foundation courses prior to their first enrollment in CSC 695.
SE 696
MASTER'S PROJECT
Graduate
(4 credit hours) Students may register for this course only after their advisor has approved a written proposal for their project. Independent study form required. PREREQUISITE(S): Consent of advisor.

SE 698
MASTER'S THESIS
Graduate
A student who has made an original contribution to the area (typically through 8 credit-hours' worth of work done in CSC 695, but not necessarily) may choose to complete a Master's Thesis. The student and the student's research advisor form a Master's Thesis Committee. The student submits to the committee a thesis detailing the original results of the research project. After a public defense, the committee will decide whether to accept the thesis. In that case, the student will be allowed to register for this course and the transcript will show the thesis title as the course topic. PREREQUISITE(S): Successful defense of a Master's Thesis.

SE 699
SOFTWARE ENGINEERING RESEARCH CONTINUATION
Graduate
Students register for continuation credit after registering for SE 698 in each subsequent quarter until they complete their thesis. Students who fail to do so will have to reregister for SE 698 to meet the requirement for completing that course. PREREQUISITE(S): SE 698.

SEC 309
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Undergraduate
Prepares teacher-candidates for teaching mathematics at the middle school and secondary school levels. Examines contemporary issues in teaching mathematics, methods of teaching secondary mathematics, and recent history in mathematics curriculum development. Emphasis on the development of alternative teaching strategies and the implementation of the NCTM Standards. Lesson and unit development, evaluation, and classroom management also will be discussed. 30 Level 2 Field Experience hours. SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 310
TEACHING, HISTORY, AND SOCIAL SCIENCES IN SECONDARY SCHOOLS
Undergraduate
Prepares teacher-candidates for teaching history and social sciences at the middle and secondary school levels. Examines the nature and purpose of history and social sciences curriculum within secondary schools, the current status of social studies materials and practices, and issues confronting today's secondary social studies teachers. Emphasis on alternative teaching strategies, resources for teaching and learning, teachers' responsibilities in curriculum development and decision making, and methods and materials for addressing cultural diversity. Lesson and unit development, evaluation, and classroom management also will be discussed. 30 Level 2 Field Experience hours. SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 311
THE NATURE OF ENGLISH
Undergraduate
This course is designed to help students to see that the field of English Studies is bigger than the component they probably identify as English (its Literature, Writing, and Linguistics/Grammar). Students will explore the formation of the discipline up to the current day, focusing on the shifting understanding of ways of reading, writing and thinking about language. They will strive to answer the questions: What does it mean to be a student of language and literature? and, What are the ways of knowing writing, literature, and language? In doing so, students will relate their disciplinary content to their daily lives and interests and to the larger framework of human endeavor and understanding, including identifying its importance to the personal lives of high school students. SEC 364 and Junior Status are prerequisites for this class.
SEC 312
THE NATURE OF HISTORY AND THE SOCIAL SCIENCES
Undergraduate
This course builds on the content course work students have done in the seven disciplines grouped under the heading "social sciences" (history, political science, geography, sociology, anthropology, economics, and psychology). In this class students will get further exposure to the basic concepts of the social science disciplines and consider the connections as well as differences between them. The course emphasizes how different disciplinary backgrounds lead students to bring different perspectives to their study of social phenomena and helps them see these phenomena from multiple vantage points. The course will employ a case study approach framed around social issues of interest to all seven disciplines (e.g. social control, threats, development, natural disasters). By the end of the course, students will have applied the knowledge and skills of multiple social science disciplines to evaluate social phenomena, considered the relationship and differences between those disciplines, and be prepared to enter SEC 322 where they will apply their content knowledge to inquiry and teaching in the field.

SEC 313
THE NATURE OF MATHEMATICS
Undergraduate
This course builds on students' mathematics understanding by emphasizing the universality of mathematics as a cultural endeavor. In it, students will explore the historical trends in mathematic and how those trends have been taught. Students will understand that, at its core, is deductive; however, it also requires intuition. Thus, the course examines the interaction among intuition, experimentation, conjecture, abstraction, and deductive reasoning not only in the classroom but also in the everyday use of mathematics. It also examines the interplay between concrete problem-solving and generalization.

SEC 314
THE NATURE OF SCIENCE
Undergraduate
This course is about the nature of science and the interactions between science and society. It will build on the foundation of understandings that students already have about the processes and conventions of science developed through their years as science students to create opportunities for deeper understandings of the beliefs and assumptions inherent to the creation of scientific knowledge. These opportunities will be developed through direct interactions with professional scientists as well as through case studies and readings that illustrate the strengths, limits and pitfalls of the scientific endeavor as well as provide opportunities for students to relate science to their daily lives and interests and to a larger framework of human endeavor and understanding (e.g., relationships among systems of human endeavor including science and technology; relationships among scientific, technological, personal, social and cultural values). Cases will be drawn from different scientific disciplines as well as from modern and historic times. In this way, science students will have a better understanding of what it means to be a scientist and how science interfaces with society. The course is a prerequisite for SEC 324.

SEC 321
INQUIRY & APPLICATION I IN DEVELOPING SECONDARY ENGLISH PEDAGOGY
Undergraduate
This course builds on SEC 311 by preparing teacher candidates to distinguish between what needs to be taught (content) and how it is taught (pedagogy), with an emphasis on understanding the historical shifts in the teaching of content and how these shifts inform teaching and learning in today's English language arts classrooms. The course also introduces students to methods of inquiry and reflection on content pedagogical knowledge. Student will examine their own educational experience through the lens of the historical trends, focusing on how they learned and what they understood their teachers to be doing. This initial case study will serve as an introduction into case study methods. Students will also develop expertise in one of the three historical trend areas -reading, writing, and language - and examine how the trend has informed teaching and learning and shaped curriculum, pedagogy, and assessment. Students will develop a case study of a practicing teacher using the lens of the historical trend in which they are developing expertise. 25 Level I Field Experience hours.

SEC 364, SEC 311 and Junior Status are prerequisites for this class.
SEC 322
LITERACY IN THE CONTENT AREAS
Undergraduate
The course explores the interrelationships between reading, writing, and other forms of communication (e.g., classroom talk, technology, visual arts) that are available to content area middle-level and high-school teachers. There will be an emphasis on the interrelationship of all aspects of language, oral and written, that result in literacy as a meaning-making tool in the construction of content-area knowledge. The course will discuss specific aspects of literacy processes from a multicultural, multilingual perspective as they apply to a variety of school settings in general and urban schools in particular. Students will become acquainted with theoretical issues as well as a wide range of literacy-teaching strategies including reading, writing, research, and study skills to be tailored to the needs of different students and to be applied across a variety of learning situations and text types. 30 Level 2 Field Experience hours.

Senior status and SEC 371 or SEC 372 or SEC 373 or SEC 374 or status as a music education student is a prerequisite for this class. Exercise Science (BS) students are restricted from taking this class.

SEC 323
INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY
Undergraduate
This course builds on the content knowledge students developed and reinforced in SEC 312. More, it asks them to make the shift from considering how a person prepared in the social sciences analyzes social phenomena to how such a person teaches the social sciences. Students will do this by developing two units of inquiry-based case studies that they could use in their own classrooms. The topics of these case studies will vary from section to section, depending on the needs of the students and expertise of the instructor. Possible topics include the Constitution, the Cold War, slavery, and the Iraq War. As students work on these projects, they will continue to reflect on the course work they have done in the content areas as well as the instruction they see teachers delivering in their field experiences. They will contemplate such questions as: “What are the connections between the social science disciplines? How can they be taught together, creating interdisciplinary courses at the high school level? What are the differences between the social science disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about social events but also the freedom to pursue their interests and make sense of the world on their own terms?” By the end of this course, students through readings and their projects will have advanced their learning about the nature of inquiry, its implementation in the classroom, and the connections and differences between the social science disciplines. 25 Level 1 Field Experience hours.

SEC 364, SEC 312 and Junior Status are prerequisites for this class.

SEC 324
INQUIRY & APPLICATION IN DEVELOPING SECONDARY SCIENCE PEDAGOGY
Undergraduate
Following SEC 314, this course transitions from asking “what does a scientist do?” to a consideration of why science literacy in the general public has been so difficult to achieve. The focusing questions for SEC 324 are: “How do we teach science? What is science literacy? Why is an understanding of science important to the general public? And What are the major obstacles and strategies to achieving science literacy?” The course begins by participants self-reflecting on their own educational experiences that led to their paths in science education: what have been their successful learning strategies, how have teachers influenced their education and what have been successful (and less than successful) classroom instructional strategies? From this, students will begin science classroom observation, discussing their observations with their peers, and speaking with educators about their experiences teaching high school science and about the goals and short-comings of science education. Throughout this process, students will read seminal literature on science literacy and explore cases challenging their notions of the teacher-learner relationship and the relationship between science and society. As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public. 25 Level 1 Field Experience hours.

SEC 364, SEC 314 and Junior Status are prerequisites for this class.

SEC 325
SEC 323
SEC 364, SEC 312 and Junior Status are prerequisites for this class.

INQUIRY & APPLICATION IN DEVELOPING SECONDARY MATHEMATICS PEDAGOGY
Undergraduate
This course builds on SEC 313 by introducing students to inquiry methods to understand the teaching and learning of mathematics. Students will explore how mathematics has been and is taught by examining major paradigm shifts in mathematics education and the impact those paradigms and shifts have on pedagogical content knowledge, or knowledge of how to teach disciplinary content. Students will use case study methods to look at instructional practices and begin to articulate their own mathematics teaching pedagogy. With the completion of this course, students will have a deeper understanding of mathematical literacy and the barriers to understanding and teaching mathematics, as well as being able to identify what makes an exceptional math teacher who is able to address the needs of all students. 25 Level 1 Field Experience hours.

SEC 364, SEC 313 and Junior Status are prerequisites for this class.

INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY
Undergraduate
This course builds on the content knowledge students developed and reinforced in SEC 312. More, it asks them to make the shift from considering how a person prepared in the social sciences analyzes social phenomena to how such a person teaches the social sciences. Students will do this by developing two units of inquiry-based case studies that they could use in their own classrooms. The topics of these case studies will vary from section to section, depending on the needs of the students and expertise of the instructor. Possible topics include the Constitution, the Cold War, slavery, and the Iraq War. As students work on these projects, they will continue to reflect on the course work they have done in the content areas as well as the instruction they see teachers delivering in their field experiences. They will contemplate such questions as: “What are the connections between the social science disciplines? As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public. 25 Level 1 Field Experience hours.

SEC 364, SEC 314 and Junior Status are prerequisites for this class.

SEC 322
LITERACY IN THE CONTENT AREAS
Undergraduate
The course explores the interrelationships between reading, writing, and other forms of communication (e.g., classroom talk, technology, visual arts) that are available to content area middle-level and high-school teachers. There will be an emphasis on the interrelationship of all aspects of language, oral and written, that result in literacy as a meaning-making tool in the construction of content-area knowledge. The course will discuss specific aspects of literacy processes from a multicultural, multilingual perspective as they apply to a variety of school settings in general and urban schools in particular. Students will become acquainted with theoretical issues as well as a wide range of literacy-teaching strategies including reading, writing, research, and study skills to be tailored to the needs of different students and to be applied across a variety of learning situations and text types. 30 Level 2 Field Experience hours.

Senior status and SEC 371 or SEC 372 or SEC 373 or SEC 374 or status as a music education student is a prerequisite for this class. Exercise Science (BS) students are restricted from taking this class.
SEC 326
TEACHING WRITING
Undergraduate
This course prepares teacher candidates for teaching writing and composition at the middle and secondary school levels. The course focuses upon methods of teaching composition, examination of literature and research about the composing process, the development of language and reading skills, and the assessment and evaluation of writing. The development of writing curriculums will also be explored. 30 Level 2 Field Experience hours.

SEC 326 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 328
TEACHING LITERATURE
Undergraduate
This course prepares teacher candidates for teaching literature at the middle and secondary school levels. Examines contemporary issues in the teaching of literature, explores methods of teaching major literary genres, addresses problems of literacy and focuses on the transactional nature of reading and writing. Emphasis on developing a repertoire of ways of teaching literature and a variety of literature curriculums.

SEC 328 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 329
TEACHING YOUNG ADULTS LITERATURE
Undergraduate
This course is devoted to the study of Young Adult Literature: an exciting, emerging genre of literature. Issues and ideas to be examined include the following: current debates regarding issues in curriculum and teaching; selecting, reading, evaluating, and teaching young adult literature; cultivation of life-long reading habits and literacy development. Students will become familiar with major writers of young adult literature, read diverse texts, explore major genres, review award winning novels, consider the role of the media, and develop creative projects. 20 Level 2 Field Experience hours.

SEC 329 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 339
TEACHING SCIENCE IN THE SECONDARY SCHOOL
Undergraduate
This course prepares teacher-candidates for teaching science in the middle school and high school. This involves reviewing the processes of science, theories of learning, and instructional strategies appropriate to laboratory science. This course also provides an update on the current trends and issues in science education as well as an analysis of successful science curricula programs. 30 Level 2 Field Experience hours.

SEC 339 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 363
ORIENTATION TO SECONDARY TEACHING AS A PROFESSION
Undergraduate
(6 credits) In this process-oriented course, students engage in critical reflection on the roles and expectations of secondary educators from both institutional and community perspectives. Questions considered will include: what is an educator, what is a professional, what are the attributes of effective teachers, what do effective teachers do? Students will examine their own values and begin to develop their own philosophies about education and teaching. 30 Level 1 Field Experience hours at arranged sites.

SEC 364
METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
Undergraduate
(4 credits) This course will examine materials, methods, and techniques appropriate for teaching in secondary schools. Topics include: educational goals; the development of a rationale and underlying assumptions; instructional goals and objectives; learning objectives; both cognitive and affective; classroom environment; classroom management principles and techniques; multicultural materials in various content areas; the development of appropriate methods and materials; current curriculum issues and controversies. 30 Level 1 Field Experience hours at arranged sites.

Junior standing is a prerequisite for this class.
SEC 365  
**ART AND PEDAGOGY**  
*Undergraduate*  
This course alongside SEC 366 is intended as a two course sequence each complimenting the other. As SEC 366 explores the source materials and major concepts of visual art's content, SEC 365 focuses on teaching visual art. Building from the content requirements from their program or experience, students will understand how the art studio (content) experiences where ideas are developed translate to the preparation of teaching. Students will do this through multiple curriculum based projects intended to use in their own classrooms, including a 6th - 12th grade general course reader to assist in introducing an art historical overview that influences and connects to general middle and high school studio practices. As students work on these projects, they will continue to reflect on the coursework they have done in the content area as well as watching and learning from classroom teachers and teaching artists in the field. They will contemplate such questions as: "What are the connections among the arts disciplines? How can they be taught together, creating interdisciplinary courses at the middle and high school levels? What are the differences among the arts disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about artists, artistic periods and the nature of how artworks are produced." 30 Level 2 Field Experience hours.

SEC 365 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 366  
**TEACHER AS ARTIST**  
*Undergraduate*  
This course builds on the work in SEC 365, which alongside SEC 366 is intended as a two course sequence each complimenting the other. As SEC 365 focuses on the art of teaching the visual arts, SEC 366 explores the source materials and major concepts of visual art content. Historically, artistic movements have shaped and currently identify the theories we use to define our most immediate environment. The major concepts can be connected to the artist studio and to the descriptions some artists make about the studio as a teaching space. In the course students will be introduced to a wide range of artists and their work, artistic movements and the individual artists who use teaching as a medium. How does an emerging artist or pre-service teaching artist draw on the understanding of their own work as a platform to build core principles of pedagogy? What is the link that combines a dynamic studio practice with an inspired methodology for teaching visual art. We will address these questions through creating a visual art teaching curriculum portfolio and writing a reflective artist monograph, produce a final exhibition of their work and work alongside teachers and artists in the field. 30 Level 2 Field Experience hours.

SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 371  
**TEACHING ENGLISH IN THE HIGH SCHOOL 1**  
*Undergraduate*  
This course introduces candidates to research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.

SEC 364, SEC 311, SEC 321, Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 372  
**TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1**  
*Undergraduate*  
This course introduces students to the theoretical and practical issues of teaching history and the social sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.

SEC 364, SEC 312, SEC 322, Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.
SEC 373
TEACHING MATHEMATICS IN THE HIGH SCHOOL 1
Undergraduate
This course introduces students to the theoretical and practical issues of teaching mathematics in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of mathematics in all its representations. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.

SEC 364, SEC 313, SEC 323, Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 374
TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
Undergraduate
This course introduces students to the theoretical and practical issues of teaching the sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.

SEC 364, SEC 314, SEC 324, Senior status and Advanced Teacher Candidate Standing are prerequisites for this class.

SEC 381
TEACHING ENGLISH IN THE HIGH SCHOOL 2
Undergraduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in SEC 321 and SEC 371. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities, with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in SEC 371, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken in conjunction with SCU 351.

SEC 371 is a prerequisite for this course.

SEC 382
TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2
Undergraduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in SEC 322 and SEC 372. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in SEC 372, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken in conjunction with SCU 351.

SEC 372 is a prerequisite for this course.
SEC 383
TEACHING MATHEMATICS IN THE HIGH SCHOOL 2
Undergraduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in SEC 323 and SEC 373. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of mathematics in all its representations with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in SEC 373, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.  COREQUISITE(S): Taken in conjunction with SCU 351.
SEC 373 is a prerequisite for this course.

SEC 384
CAPSTONE IN SECONDARY EDUCATION
Undergraduate
The senior capstone course is designed to help students integrate the central emphases of their liberal learning studies curriculum into their professional behavior. It will provide prospective elementary educators with opportunities to engage in activities requiring them to reflect, to consider value commitments, to use critical and creative thinking, and to examine their practice from a multicultural perspective as they discuss issues specific early childhood education. The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator, which also reflects the goals of the Liberal Studies program.  COREQUISITE(S): SEC 390.

SEC 385
TEACHING THE SCIENCES IN THE HIGH SCHOOL 2
Undergraduate
This course continues students' immersion into the pedagogical content knowledge development and practices that began in SEC 324 and SEC 374. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in SEC 374, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required.  COREQUISITE(S): Taken in conjunction with SCU 351.

SEC 374 is a prerequisite for this course.

SEC 387
CAPSTONE SEMINAR IN SECONDARY EDUCATION
Undergraduate
This course is designed to help candidates integrate the central emphases of their Liberal Studies curriculum with their professional knowledge and behavior. It provides opportunities and activities to prospective educators that engage them in being analytic and reflective upon their major and related disciplines; guide them in further considering their value commitments and how they relate to their chosen profession; apply critical and creative thinking in addressing 'real-time' professional issues and needs; and examine extant practices from multicultural perspectives. Candidates develop a professional teaching portfolio that reflects the standards of the various guiding professional organizations and the Illinois State Board of Education (ISBE). The course is grounded in the College of Education's framework for an Urban Professional Multicultural Educator as well as the goals of the Liberal Studies program. The course is taken simultaneously with student teaching.  COREQUISITE(S): SEC 390.

SEC 390
SECONDARY STUDENT TEACHING
Undergraduate
(12 credits) Five school days a week in supervised teaching in a cooperating school for a full academic quarter. Feedback and discussion of problems encountered in student teaching as well as new materials and techniques of student teaching. Application and approval required. Open only to DePaul students.
SEC 395
ASSESSMENT ISSUES IN SECONDARY EDUCATION
Undergraduate
This course introduces candidates to theoretical and philosophical issues related to educational assessment. It addresses the range of assessments teachers will encounter in school settings, including individual cognitive and social and emotional assessments; course material, curricula, and disciplinary program assessments; and large scale high-stakes testing. The course provides candidates opportunities to explore student, program, and curricular assessment issues, including assessment methods and tools; standardized, quantitative, and qualitative assessments; formal and informal assessments; formative and summative assessments; integrated, self-, and peer assessments; cultural, social, economic, and language influences on assessments; and issues of reliability and validity in assessment. COREQUISITE(S): Taken in conjunction with SEC 371/SEC 372/SEC 373/ SEC 374 OR SEC 381/SEC 382/SEC 383/SEC 384.
Exercise Science (BS) students are restricted from taking this class.

SEC 399
INDEPENDENT STUDY IN SECONDARY EDUCATION
Undergraduate
(1-4 credits) Permission of instructor, program chair and Associate Dean are required.

SEV 611
RETURN DRIVEN STRATEGY
Graduate
This course provides a framework and strategic skills that will enable Kellstadt students to make a significant impact on the future of their organizations and in their careers. The seminar course focuses on the Return Driven Strategy framework which describes the 11 tenets of successful business strategy, leveraging genuine assets, managing significant forces of change and understanding strategic valuation. This seminar course will focus on a deep analysis of the strategies and successful value creation of great companies. Each student will participate in a team project to apply the tenets of Return Driven Strategy to a high performance company. The Return Driven Strategy framework will be useful for MBA candidates working in various areas of corporate management, management consulting, investment banking, equity research, and for entrepreneurs. The seminar-driven course will include an executive seminar session for the morning session of the first day which will include presentations by executives and top thought leaders in strategy.
ACC 500 or its equivalent is a prerequisite for this course

SEV 621
STRATEGY EXECUTION
Graduate
The course focuses on strategy execution and strategic performance measurement, including the balanced scorecard and value-based management as frameworks for describing and executing strategy. The course includes the latest developments in Strategic Risk Management and the implications for strategy and performance measurement. The course will study how high performance companies measure and manage performance, strategic risk, and corporate sustainability performance, as well as the ethical dimensions of strategy and execution. The seminar-driven course will include an executive seminar session for the morning session of the first day which will include presentations by executives and top thought leaders in strategy execution.
ACC 500 or instructor's consent is a prerequisite for this class.

SEV 641
STRATEGIC VALUATION
Graduate
This course focuses on leading practices in valuation and practical methods for driving valuations from strategic corporate analysis. The course shows the link between strategic analysis and valuations - converting our qualitative understanding of company initiatives into quantitative forecasts and valuation models. The guiding principles for developing valuation models, and the tools and techniques for enhancing that analysis are introduced. This course builds a skillset for evaluating other valuation models and a first-hand experience in building valuation models for companies. The course differs from traditional treatments in its focus on the actual building of valuation models directly from financial performance and the valuation projects based on real-time data. This course is co-designed and co-taught by Dr. Mark L. Frigo, and Joel C. Litman, Clinical Professor of Business Strategy at DePaul's Kellstadt Graduate School of Business. They have been combining their efforts in the research, study, and development of business strategy models and frameworks for execution and value-creation and have assisted a wide range of public and private companies in the application of these concepts.
ACC 500 or its equivalent is a prerequisite for this course.
SNC 185
THE BEATLES AND THE CREATIVE PROCESS
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition. Arts and Literature.

SNC 186
SPIRITUALITY AND HOMELESSNESS
Undergraduate
This course will examine the broad issue of homelessness by providing students the opportunity to reflect upon a service learning experience at a community-based organization that serves the homeless population in Chicago. Students will explore what can be learned about themselves as reflective practitioners, service learners, and spiritual human beings when reflecting upon this experiential learning process. Through the class discussions, assigned readings, invited speakers, and journal assignments, students will reflect on their own beliefs and perceptions of homelessness and analyze the history, causes, and policy associated with this societal problem. Junior Year Experiential Learning.

SNC 187
RACE AND IDENTITY IN THE AMERICAN THEATER
Undergraduate
This course will explore issues of race and racial identity in American society through the medium of theater. Students will examine a diverse range of theatrical pieces and consider the social and political context for each work as well as the impact each has had on American culture. The class will also view a play on these themes at a Chicago theater. Arts and Literature.

SNC 188
PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. An introduction to moral philosophy with emphasis on the conflict between "moral relativism" (or "subjective" ethics) on the one hand and "moral realism" (or "objective" ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world. Philosophical Inquiry.

SNC 189
CONTEMPORARY NATIVE AMERICAN/AMERICAN INDIAN ISSUES
Undergraduate
Native Americans are part of our history and heritage, yet many Americans have little knowledge beyond stereotypes. While invisible to the mainstream, Native American cultures are surviving, striving and in some cases, thriving as we enter the new millennium. This course will explore the complex issues facing Native Americans today through discussions, films, readings, experiential learning activities and Native American news media to enable students to gain a cross-cultural perspective. Students will choose an area of focus on this subject and conduct independent research to present to their classmates. Self, Society and the Modern World.

SNC 190
AFRICAN-AMERICAN STUDIES IN CRITICAL PERSPECTIVE
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. This course is important for students who seek to gain a comprehensive understanding of African-American history in the United States. It will begin with discussions of African culture, the Atlantic Slave Trade, and early forms of slavery/indenturing. It will pay particular attention to the colonial and Revolutionary experience, delving into the mass exodus of Africans during the Revolutionary War, and African-American's role and position in the country's formative years. Enslavement, the Civil War and Reconstruction will follow as key areas of study. In every discussion, students will be asked to look for parallels between the contemporary and 18th and 19th century African-American experience and, where appropriate, to identify key social and cultural thinkers and leaders of the various historical periods. The primary texts for the course will be John Hope Franklin's From Slavery to Freedom, articles and readings written by scholars and important early African-American artists and intellectuals, and video presentations. Understanding the Past.
SNC 191
ISSUES IN SCIENCE AND RELIGION
Undergraduate
This course develops students' understandings of the scientific and religious constructions of self in the modern world (natural and social). The institutions and bodies of knowledge comprising science, religion, and their overlap are critically analyzed. Key historic debates are examined, for example: the Vatican's trial of Galileo for his teachings of a heliocentric universe; the controversial reception of Darwin's theory of evolution; and the 2001 U.S. policy on embryonic stem cell research. Through such analyses, the course develops students' skills in making ethically-informed decisions and thus recognizing their roles in the public debates involving the intersection of science and religion. Self, Society and the Modern World.

SNC 192
NEW ORLEANS IN SONG, STORY & STRUGGLE
Undergraduate
The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry: music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, rhythm and blues, zydeco and funk. We will situate these art forms in social and historical context and examine the complex creative processes which have shaped them. We will become familiar with innovators and icons such as Louis Armstrong, Professor Longhair, Clifton Chenier, the Neville Brothers and Dr. John. We will also read works by literary artists who have a background in and/or fascination with New Orleans, including The Awakening by Kate Chopin, A Streetcar Named Desire by Tennessee Williams, and Mumbo Jumbo by Ishmael Reed. Moreover, we will consider the role played in American history and imagination by New Orleans, as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level. Arts and Literature.

SNC 193
THE SCIENCE OF SEXUAL ORIENTATION
Undergraduate
This course will engage you in scientific inquiry on the nature of sexual orientation. You will be challenged to master the scientific content of leading programs of research on twins, brain and other anatomical structures, hormones, genetic linkages, birth-order, and animal behavior through assigned readings, lectures, and multimedia resources. Moreover, you will also engage in the scientific process through a collaborative research project concerning an aspect of sexual orientation that leads you through the steps of stating a question, designing a study, collecting and analyzing data, and interpreting the results. You will also develop skills in identifying the limits to particular forms of scientific inquiry by recognizing the constraints of methods, sources of bias, reliability of results, and certainty of conclusions. This course will encourage you to place the modern research within ethical and social contexts in which to make judgments about the potential relevance and impacts of scientific knowledge about sexual orientation. Scientific Inquiry [SI]

LSP 120 is a prerequisite for this class.

SNC 194
CHINA: MONEY, POWER AND THE 21ST CENTURY
Undergraduate
This online course analyzes the dramatic impact of the greatest migration of people in the history of the world, which is occurring right now, in China. Students will become more aware of the relationship between growth in China and the balance of power in the world. Understanding China's two economic systems, one country policy will help learners better understand diverse cultures, inequities and differing theories about self and society. Theory, current and projected economic and demographic data and academic research will equip students with the skills to analyze the institutions, societies and decisions that will shape the world in the 21st century.

SNC 195
UNDERSTANDING GLOBAL HEALTH CONCEPTS AND PRACTICES
Undergraduate
Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences and humanities, learners will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. We will explore the factors shaping the global distribution of disease and their connection with issues of social, economic and political development, as reflected in the Millennium Development Goals. We will also consider the impacts of globalization on health risks and availability of health resources.
SNC 196
BEAUTY POLITICS IN CULTURAL CONTEXT
Undergraduate
How can we celebrate our different skin tones, body sizes, hair textures, and cultures, and yet still acknowledge our similarities? How can hair/body stories help us understand each other and ourselves? This course explores the complex ways the body is portrayed, (mis)understood, and celebrated worldwide. The experiences of hair/body politics of African descended peoples are centered and Latin, Asian, and European cultures are also discussed. Critiques of scholarship, media, and applied research will afford students the opportunity to examine social constructs about gender, sexuality, race, class, ability, and emerging issues such as biracialism and multiculturalism in global, virtual and political contexts.

SNC 197
ANALYZING AUSTEN’S PRIDE AND PREJUDICE
Undergraduate
This course is offered in SNL’s online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings, Jane Austen must have known something about universal truths. Her novel, Pride and Prejudice, which begins with the sentence quoted above, was first published in 1813. Still in print today, it has also been made into at least eleven movies, four of which were released since 2000, including a Mormon and a Bollywood version. In this class, we will read the novel in the context of the gender and class norms at the time Austen wrote her book and then consider how Austen's exploration of universal truths is reinterpreted in more contemporary film versions of this novel. In exploring Austen's creation and the many reinterpretations of her work, we will use both analytic and creative writing assignments as well as class discussion to examine how context informs creativity and how creativity informs analysis. You most definitely do not need to be a creative writer to take this class.

SNC 198
MINDFULNESS MEDITATION RETREAT AT STARVED ROCK
Undergraduate
This online-offsite hybrid course includes a four-day mindfulness meditation retreat at Starved Rock State Park in Utica, IL as well as online learning activities throughout the quarter. Mindfulness meditation practices are powerful ways of regulating and investigating our awareness of our experience. They are rooted in Buddhist traditions and are being widely re-interpreted by neuroscientists, psychologists, philosophers and others. These practices have many benefits, such as improving health and well-being, deepening relationships, and enhancing engagement in learning, work, leisure and civic activities. Consent of instructor is a prerequisite for this class.

SNC 199
WORK, PLAY AND REST: INTEGRATING THE FRAGMENTS
Undergraduate
Life has become fragmented. In our modern lives, we strive to maintain work, play and rest in separate realms, within which we work hard, play hard, and even rest hard, all in the hope of finding balance. But when work invades play, and rest is sacrificed for either one, it might be time to shift the paradigm of separateness we have sought to maintain. This course will explore ways we can integrate the fragments of our lives in order to find more fulfillment, balance, satisfaction, and consequently relief both within these three arenas and in the “gray areas” in between. Learning will occur in two modalities, each of which will enhance the other: experiential guided movement, storytelling and vocal activities from the improvisational practice of InterPlay (http://www.interplay.org/) and the study of literature (articles, books, websites and videos) concerning mind-body awareness. Through the in-class practices of InterPlay, students will explore how stressors are held in the body, and define for themselves which aspects of creative expression help to release what no longer serves. Basic movement, storytelling and vocal activities will be introduced in an incremental way, with no prior experience necessary. The focus will be on both individual expression and collaborative possibilities, and personal as well as community and organizational applications will be explored. In our study of the science behind mind-body awareness through class discussions and written assignments, students will explore the application of concepts in conjunction with the experiential model offered by the InterPlay practice. Part practical activities, part reflection, and part synthesis of defined concepts and models, students will be asked to come to this class as willing participants and identify what methods and systems are applicable to their own lives, and what, from their unique vantage point, could constitute elements toward a new model of health and wholeness.

SNC 201
PSYCHOLOGY FROM AN AFRICAN-CENTERED PERSPECTIVE
Undergraduate
This course utilizes an African-centered theoretical framework to examine salient themes pertinent to the psychology of people of African descent, including child development, family functioning, identity, education, racial oppression, spirituality, and healing. It takes an historical and topical approach to foster greater understanding about the course content. Through this examination, the learner will become more knowledgeable about the psychological experiences of people of African descent, the role of history and culture in human development, and the subjectivity of research in the social and natural sciences. They will also reflect on the relevance of the course material to their personal lives.
SNC 202
GLOBAL BUSINESS, TECHNOLOGY AND THE UNITED NATIONS
Undergraduate
In this course, discussions focus on global business and technology issues U.S. and Mexican companies face today and UN experts in New York bring other countries into the global perspective via video conferencing. Topics include how corporations are using technology to facilitate their global operations; the work of the United Nations in helping implement corporate responsibility, international labor rules and human rights in businesses; best practices in cross-cultural business; and, other related global business issues. Several students outside of Chicago will participate via Scopia desktop video conference application. Students and professors at University Panamericana in Mexico City and in Guadalajara will participate in discussions with the UN experts and with DePaul students via video conferencing. UN discussions are videotaped and posted on DePaul iTunes for student review.

SNC 203
PARTICIPATION AND DEMOCRACY IN AMERICA
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. The course explores inequalities in American democratic participation, investigating why different groups do or do not engage with the political process. The course begins with some famous arguments about why participation matters. Trends in voter turnout then become the primary object of study, but we also consider other forms of participation including writing to members of Congress, attending political meetings, and contributing money. Different factors we explore over ten weeks include the impact of education, income, age, and knowledge about and psychological interest in politics. We also investigate legal-institutional barriers to participation, both historically and in the present day.

SNC 204
DEMOCRACY IN EVERYDAY LIFE
Undergraduate
Democracy may be described as a form of government in which the general public can participate in its decision making process. However, democracy is often used as a term to identify any system that is not patently a dictatorship. Democracy may be addressed not only as a political, but also as a social system with implications in everyday life. How does literature about social and private life define democracy? What criteria do democratic environments meet? How should people behave to foster democratic environments? How do democratic leaders behave? This course will foster a profound understanding of democracy and democratic behavior and identify criteria, which define democratic environments like equality, solidarity, positive human relationships, participation and commitment to each other. These and other criteria will be analyzed critically and applied to everyday contexts in the private sphere and the workplace. The role of authority, power and leadership in a democratic environment will be discussed. The course offers a wide range of activities like research for literature, critical reading and discussion of topics, analysis of cases, simulation of democratic and non-democratic environments and problem solving of real life issues. The ideas of others serve as a common course content, as presented in the material assigned to this course. Students are asked to participate actively and critically, to work individually and in study groups, using their own experience as a field of analysis and reflection. Active participation in group activities will make the course itself a model for a democratic teaching and learning environment.

SNC 205
RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II
Undergraduate
This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today.

SNC 206
THE FIGHT FOR HUMAN RIGHTS: ONE WOMAN'S CRUSADE
Undergraduate
Helen Prejean is a leading human rights activist in the United States. For the past 30 years, she has helped shape conversation about equal treatment for all within the criminal justice system, especially persons of color and the materially poor. Dead Man Walking, the eyewitness account of her experience accompanying condemned prisoners to execution, has had a major influence on discussion of violence, poverty, civil rights, criminal law, and social justice. In this course, we use her work and interact with her personally to study power inequities across race and class lines that perpetuate injustice and examine her strategies for reform.
SNC 207
URBAN DIRT
Undergraduate
This is a course designed for the student who desires to know the difference, complexity, and the diversity between soil and dirt. The benefits of learning about soil are multi-fold: understanding the Earth, understanding how and where your food grows, gardening, impact on water quality, and most of all understanding your role in improving overall environmental quality and sustainability. In addition, this class will offer introductory knowledge of soil and its dynamism. Although learning about soil can be very scientific, there are several social and artistic views of soils. If you ever wanted to know why soils are various colors, various fertility, uses, mapping, home to various organisms, then this is the course to take. Understanding the complexities of soil will aid in understanding Earth and its intricacy.

SNC 208
THE BILL OF RIGHTS IN CONTEMPORARY LIFE AND WORK
Undergraduate
The Bill of Rights is that part of the Constitution that protects you from undue and unwarranted governmental regulation and interference. Learn how your rights of free speech, privacy and association in the workplace, on the street and in your home are secured by the first ten amendments to the U.S. Constitution. What does the government allow you to say and do in the presence of fellow workers? How safe is your home from police searches? Are there limits to whom you are allowed to associate with on a public street or even in the privacy of your own home? This course will deal with these and similar questions. Along the way, we will learn about the history and theory behind the adoption of the Constitution, how judges and lawyers interpret the Constitution, in particular the Bill of Rights, and what role the Constitution plays in the debate over the significant legal and social issues of our day, such as abortion, the death penalty, gay marriage, and physician-assisted suicide. We will read and discuss political theory, the Bill of Rights and actual court cases.

SNC 209
EXPLORING EARTH’S PHYSICAL FEATURES
Undergraduate
This course advances student exploration of earth’s 4.5 billion year geologic record in order to evaluate the planet’s evolution and the interrelationships between humans and landforms. Through the application of scientific reasoning, mathematical inference, and prevailing technologies used by geologists, emphasis is on plate tectonics, geologic time, the rock cycle, weathering, earthquakes, fluvial features, rock structures, volcanoes, mountains, plateaus, plains, glacial features, deserts, caves, and coasts. Students also assess human reliance on landforms, the economics of landforms, and cases of earth pseudoscience. Learning is assessed through labs, fieldtrips, a scientifically-formatted research paper, an exam, and contributions to online discussions.

SNC 210
PREHISTORIC LIFE
Undergraduate
This course is offered in SNL's online program. Online course conform to University scheduling, but are conducted exclusively through Desire to Learn (D2L). There are no in person class meetings. This course promotes students’ investigation of fossils to interpret the character of 3.5 billion years of biological evolution and ecological change on earth. By way of scientific reasoning, mathematical inference, and applicable technologies, emphasis is on the exploration of the earliest evidence of life, development of multi-celled plants and animals, dinosaur evolution, mass extinction events, mammal diversification, human origins as well as appraisal of the societal reliance on fossil resources and the persistent debate over evolution versus creation. Learning is assessed through labs, a fieldtrip, an exam, video summaries, contributions to online discussions, and a research paper in a scientific format.

SNC 211
WRITE WHERE YOU ARE: WRITING ABOUT THE PLACES WE LIVE
Undergraduate
In “A Walk in Chicago: Never a City so Real,” Alex Kotlowitz, a “Chicagoan by accident,” claims, “An imperfect place, Chicago is America’s city; it dreams America’s dream.” In this course, students will investigate the ways in which location has shaped their own American dream. Place is an indispensable factor in any person’s negotiation of his or her dream, as Kotlowitz points out in his portraits of individuals who have shaped and been shaped by their city, Chicago. To understand ourselves, then, we must understand our cities. To understand our cities we must understand their influences from science (geology, biology, ecology), art (literature, film) and social science (history, psychology, sociology). To write about our cities, we must understand and synthesize the city and our selves. In the convergence of these experiences comes a new understanding of space, place and identity. This subject requires students to investigate how events of personal significance are affected by location and the disciplines. This class will meet in the classroom five times; students will also be required to complete four field trips to locations in and around their city and one “virtual” field trip. Sharing on D2L will complete the field trip experience. Students will grow to appreciate their home cities/towns for their evolution and current struggles; students will learn about themselves by placing themselves in the midst of this evolution and struggle. Writing the personal essay, which requires synthesis of one’s self-reflection, reflection on one’s surroundings, and research into the place we are located, is the medium for transformation and understanding to take place.
SNC 212
ROOTED IN THE CITY: WRITERS & WRITING IN CHICAGO
Undergraduate
Who are the writers rooted in Chicago? What were and are their concerns, themes, styles? How can they teach us about the city, but also about writing? In this class, students will read, discuss and write about work written by such Chicago writers as Nelson Algren, Gwendolyn Brooks, Stuart Dybek, Sandra Cisneros, Studs Terkel, Marc Smith, and Mike Royko. We will consider the nature of civic engagement and creativity in the literary arts, as well as pay close attention to the formal elements of the poems, short stories, and essays read in this class. We’ll also explore how these texts compel us to think about power and its circulation in cultural as well as social contexts.

SNC 213
FAMILY LIFE: THE PAST, PRESENT AND FUTURE OF FAMILIES
Undergraduate
In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, single parents, and blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1950s. What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality and religion? Is the two parent family necessary? What role do grandparents and great grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future? How do these changes impact individuals in society?

SNC 214
SOCIETY AND THE FAMILY, PLOTTING THE FUTURE
Undergraduate
In history, families have been defined as mother, father, and children. In our current experience, more families differ from that model than comply with it. Family structure is evolving. Missing fathers, single parents, and blended families are only a few of the changes to the family structure that have occurred with some significance beginning in the 1950s. What influences family structure? Do economics and education make a difference? Are race and ethnicity important factors? What about gender, personality and religion? Is the two parent family necessary? What role do grandparents and great grandparents play in the changing family? Perhaps the most important question we can ask about the family is what comes next. What are the many ways in which families might be redesigned in the future?

SNC 215
ISSUES IN HEALTH POLICY AND ADMINISTRATION
Undergraduate
The goal of this course is to provide a general overview of the American health care and health insurance systems. We will first discuss the debates over the enactment and framing of the American constitution, and the political institutions that the nation then developed. We then will analyze the health care system that emerged in this political context, focusing on 1) the rise of the private health insurance system; 2) the incentives provided by government to encourage employers to purchase such insurance on behalf of their employees; and 3) the debate over the role of government in providing coverage for those outside the employer-sponsored health insurance systems. We will examine in some depth the evolution and current context of the Medicaid Program, taking a close look at the politics that led to the 2003 Medicare Modernization Act, as well as the issues raised by the implementation of that law. The following questions will be examined in this course: Is it possible to provide coverage to the uninsured without increasing the national debt? What are the main drivers of rising health care costs and what are the options for cost-containment? What are the options for aiding the uninsured? What are the options for paying for any such initiatives? What are the longstanding obstacles to comprehensive reform proposals? What are the politics of the current, Affordable Care Act, reform initiative? Why is it that the American health delivery system suffers from specialty maldistribution (too many specialists and not enough generalists) and geographic maldistribution (too many providers in some communities and too few in others)? What is managed care? What does the managed care industry look like today? What is the difference between disease management, care management and the current efforts to create “medical homes?” What are provider profiles and how are they used to improve quality? Why is it that the nation does not have an effective long-term care insurance system? What are the alternatives to institutionalization for those in need of long-term care services?
SNC 216
LEISURE, RECREATION AND HEALTH
Undergraduate
This course will stimulate your thinking about the meaning of leisure in your life. Leisure today and historically has been central to the human experience. It is an elemental experience, essential to the total well-being of every person; it is a reflection and expression of the cultural values of a society; it is an important vehicle for medical treatment. Leisure and recreation services are also essential for healthy communities in terms of social climate, environmental quality, and economic stability. Leisure services comprise one of the largest and fastest growing industries in the world, whether measured in dollars spent, persons served, hours of time devoted, or resources used. The study of leisure and recreation is a broad discipline, combining diverse fields of study and professional practice. This course will (1) illustrate the importance of leisure to you and your loved ones, (2) contribute to your ability to become an informed consumer of leisure, (3) question the binary relationship of work and leisure, (4) teach you how to use leisure to increase emotional and physical health, resulting in a higher quality of life and, (5) demonstrate social injustice related to leisure behavior and administration. The course will be interactive and

SNC 217
SOUTH AFRICA AND THE QUEST FOR CHANGE: 25 YEARS AND COUNTING
Undergraduate
In 1990, sociopolitical forces in South Africa began formally dismantling the structure of racial segregation known as "apartheid" that had been in force since 1948. In 1994, the first bi-racial democratic elections were held, bringing the African National Congress (ANC) to power and Nelson Mandela to the presidency. Since then, the Republic of South Africa has faced considerable challenges on various fronts, which required careful calibration of the new governance system: providing social and economic equality for all races and groups; maintaining the country's economic strength while fostering social justice; and battling the largest HIV/AIDS epidemic in the world. Additionally, over the years, the ANC has seen challenges to its power both within its own ranks and from other parties and groups. a situation likely to intensify with the recent death of Mandela, its most prominent historical leader. This course seeks to give students a thorough grounding in the recent history of South Africa, with particular emphasis on the evolution of its Constitution, on the features that have made it one of the most advanced economies in the whole Africa, and on the country's struggles with the HIV/AIDS epidemic. Students will visit relevant sites and programs and interact with experienced professionals in these 3 domains in both Johannesburg and surrounding areas (Pretoria and Soweto), and Cape Town. Sites include the Apartheid Museum, the Constitutional Court, and Gold Reef City in Johannesburg, the Union Building in Pretoria, Soweto Township, and Robben Island and the District Six Museum in Cape Town. Side trips are also planned to a game reserve and other areas of natural beauty near these two cities.

SNC 218
THE HAPPIENESS PROJECT
Undergraduate
What is happiness? How do we know that we are happy? How can we become happier in our lives? In recent years, there have been an increasing number of college courses dedicated to the study of happiness, positive psychology, life satisfaction, etc. This course will be an introduction to how various fields and disciplines are examining topics relevant to the nature of happiness and well-being, while providing an opportunity for students to examine their own ideas and expectations for happiness. Using Gretchen Rubin's popular book, The Happiness Project, as a guide, we will review the latest scholarship, theories and research in psychology and the sciences, as well as religion, ancient wisdom and popular culture, to determine what is known and presumed about happiness. Participants in the course will develop and assess their own "happiness project" during the last several weeks of the course.

SNC 219
CONNECTING WITH AFRICA: CULTURAL AND SOCIAL ISSUES IN EAST AFRICA
Undergraduate
This travel course will introduce students to two East African countries, Kenya and Tanzania, where they will have the opportunity to investigate cultural and social issues in accordance with their particular interests for study. Students will have the opportunity to study and compare issues of cultural, economic, social, and political interest as they manifest themselves in the USA and in East Africa. Intensive study in Chicago and onsite in Kenya and Tanzania will give students a unique opportunity to reflect on and then compare and contrast what goes on in their own country and in these two East African countries. One of the main aims of this course therefore is to give students the opportunity to engage in passionate conversation with Kenyans and Tanzanians on issues of justice and peace, politics and social services in order to raise their consciousness on these global issues that face humanity in East Africa and in so many other parts of the globe today.

SOC 101
INTRODUCTION TO SOCIOLOGY
Undergraduate
Introduction to the language, theories, methods, and research findings of the sociologist at work.
SOC 105
SOCIAL PROBLEMS
Undergraduate
Examination of important societal problems and issues with attention to their causes, their impact, and the possibility of resolution. The course considers the role of social movements, government and the private sector.

SOC 200
SOCIAL WORK AND SOCIAL WELFARE
Undergraduate
The nature of social work with a focus on the delivery of a variety of human services like health care and welfare; emphasis on professional-client relationships; examination of government agencies and voluntary associations.

SOC 203
RACE AND ETHNIC RELATIONS
Undergraduate
Interpretation and understanding of relationships between religious, ethnic and racial groups. The course emphasizes racial conflict and its resolution as well as the need to eradicate racism.

SOC 205
SELF AND SOCIETY
Undergraduate
The course examines the relationship between individuals and the social and cultural environment. It introduces theories of the self and society (psychoanalytic theories, Weberian perspectives, symbolic interaction and social construction, feminist theories, existential perspectives, etc.). Readings include field studies and case studies. Students are introduced to research methods such as life narrative analysis and observation.

SOC 207
YOUTH AND SOCIETY
Undergraduate
Using an historical and cross-cultural perspective, this course examines the social position of youth in today's society; youth subcultures; key institutions within which youth are socialized and controlled.

SOC 208
LAW AND SOCIETY
Undergraduate
Examines the legal system in its social contexts; considers its moral and social roots, its continuity and contradictions, and its ability to deliver justice. Draws upon cross-national comparison.

SOC 209
SOCIOLOGY OF WOMEN
Undergraduate
Cross-cultural analysis of women's roles. How various social institutions the media, work, the family, education, religion treat sex-role distinctions and how the women's movement is attempting to confront them.

SOC 212
COMMUNITY AND SOCIETY
Undergraduate
An analysis of neighborhoods, cities, suburbs and utopian communities; the examination of major trends in urbanization and the evaluation of urban and community policies.

SOC 214
POLICE AND THE URBAN COMMUNITY
Undergraduate
The nature of police work, decision-making structures and processes, conflict and cooperation in police-community relationships.
The purpose of this course is to make a direct connection between the needs and strategies of individuals, companies, industries, and nations regarding work, and how they interact to create specific work environments and work outcomes for individuals in a globalized world. The course emphasizes how globalization, by creating an international labor market and an environment of competition between nations to attract jobs, has deeply transformed the work experience of individuals and the quantity and quality of jobs available in the United States, Latin America, Asia, and the rest of the world.

Analysis of theories of causes and control of crime and juvenile delinquency; examination of delinquency subcultures, and the distribution of crime and juvenile delinquency.

Examination of occupations and organizations in the U.S. health care system. Topics include: quality, access, and cost of health services; occupations and organizations involved in delivering health care; financing of care through health insurance and government programs. Recommended gateway course for all students in Health and Health Services concentration.

Examines how illness is related to sociological phenomena such as the social class of the patient or the organization of the health care delivery system. Formerly SOC 350.

Introduction to statistics including data description and statistical inference used in many scientific fields of knowledge. Introduces students to computers in statistical analysis with examples drawn from social and natural sciences.

Examines the role of sex, sexuality, and gender in urban life, their interaction in urban spaces, and the formation of related private and public social policies.

The social and cultural importance of urban ethnic communities and their interrelationships are investigated through a study of neighborhood development and change. Special emphasis on the major ethnic communities of Chicago.

An examination of the interaction between the process of globalization and urban areas throughout the world. Develops an understanding of the city as a critical location within a world that is growing ever more socially, politically and economically interconnected.
SOC 233
SOCIOLOGY OF SPORT
Undergraduate
This course examines sports as a societal microcosm and as an idealized world for both individuals and institutions. Sport is also viewed as a major element in the making of American mythology.

SOC 235
ADOLESCENT HEALTH
Undergraduate
Examination of social, political, geographic, and psychological forces affecting adolescent health in the U.S. Focus on occurrence, cause, and prevention of adolescent health risk behaviors, such as sexual behavior, violence, and substance use. Discussion of policy and community practice.

SOC 236
IMMIGRATION, HEALTH AND ILLNESS
Undergraduate
Examines linkage of immigration to health and illness, including health status of immigrants, differences in health outcomes in the host country and countries of origin, occupational health and injury patterns, eating habits, healing practices, and access to health care. Includes fieldwork and review of research findings.

SOC 245
URBAN SOCIOLOGY
Undergraduate
Study of urban growth and its impact. Topics explored include metropolitan development and change, population density, diversity and migration, urban life styles, urban institutions and important societal trends. Local, national and cross-national cases are examined. (Formerly taught as SOC 345)

SOC 248
WHITE RACISM
Undergraduate
This seminar is an introduction to white studies and white racism. White racism is a set of socially organized attitudes, behaviors and beliefs about differences between Blacks and other groups of color in the United States. The focus is on how the color White is constituted as dominant in social life throughout the United States and Western Europe.

SOC 253
SLAVERY AND RACIALIZATION
Undergraduate
Addresses both the coming of slavery in Western civilization and how the ideology of race is used to interpret historical events and situations. The course will consider how slavery created the formation of a racist color line.

SOC 254
ANCIENT GREECE AND ROME
Undergraduate
The course explores the society and culture of ancient Greece and Rome, including mythology, art, and social institutions. The impact of these cultures on contemporary popular culture and social thought is considered. Emphasis on primary materials.

SOC 256
SOCIAL CHANGE
Undergraduate
Examines changes in societies since 1800, including change in technology, culture, and social and political institutions. Topics include modernization, revolution and media. The course emphasizes comparative, global perspectives and use of primary sources.
SOC 271
POPULATION PROBLEMS
Undergraduate
Analysis of population characteristics and population policies. Topics include understanding population change, fertility and mortality patterns, population growth, patterns of illness and epidemics, migration, refugee issues, the impact of age structure, population policies, and methods for studying populations.

SOC 279
INTRO STATS FOR THE SOCIAL SCIENCES
Undergraduate
Data description and interpretation; table construction; correlation, regression and ANOVA; introduction to multivariate analysis; statistical inference and hypothesis testing. Cross-listed with MAT 242.

(MAT 095 and MAT 100) or MAT 101 or placement are prerequisites for this class.

SOC 280
MASS MEDIA AND CULTURE
Undergraduate
Analysis of the relations between modern society and the mass media such as TV, film, radio and the print media.

SOC 281
SOCIOLOGY OF ROCK MUSIC
Undergraduate
Rock music is studied as an object of culture, both as art and as mass culture. Attention is given to its creation, dissemination and appreciation.

SOC 290
SPECIAL TOPICS IN SOCIOLOGY
Undergraduate
In-depth examination of selected and timely social issues. Topics vary from quarter to quarter. Topics may be initiated by students.

SOC 101 or SOC 105 is a prerequisite for this class.

SOC 291
SPECIAL TOPICS IN SOCIOLOGY
Undergraduate
Two-credit-hour courses on special topics in Sociology.

SOC 292
COLLECTIVE ACTION
Undergraduate
The socio-legal implications of violent and nonviolent protest in bringing about social change. Emphases: social and historical causes that precipitate violence; court response to civil disobedience.

SOC 301
THE JUVENILE COURT SYSTEM: ITS OPERATIONS
Undergraduate
An introduction to the juvenile-court system. The interaction of police, judges and court officers. The role of discretion in disposition.

SOC 208 or SOC 220 or PSC 260 or BLW 201 is a prerequisite for this course.

SOC 304
SOCIAL DEVIANCE
Undergraduate
Comparison of theories and conceptual frameworks about deviance. Analysis of deviant life styles and careers. Examination of societal efforts to control deviance. Cross-listed with SOC 468.
SOC 305
POWER, DEVIANCE AND SOCIAL CONTROL
Undergraduate
This course employs a variety of theoretical paradigms to examine social constructions of deviance and conformity. It pays close attention to the relationship of such behaviors to conventional values, institutions, power, and mechanisms of social control.

SOC 306
FAMILIES
Undergraduate
Ideas, theories and research on families. Topics include change and variety in family patterns, fertility and child rearing.
SOC 101 or SOC 105 is a prerequisite for this class.

SOC 307
SOCIOLOGY OF SUBSTANCE USE AND ABUSE
Undergraduate
Sociological perspectives on substance use and abuse, related high-risk behavior, drug traffic, community impact, and prevention and public policy.

SOC 309
SOCIOLOGY OF SEXUALITY
Undergraduate
Explores social construction of sex and sexuality, the intersection of gender, race, and sexuality, sexual orientations, and major issues in sexual politics, such as the gay/lesbian movement, discrimination, abortion, and sterilization.
SOC 209 or 12 credits in SOC or 12 credits in WGS courses is a prerequisite for this class.

SOC 310
CRIMINAL-LEGAL SYSTEM: CRITICAL PERSPECTIVES
Undergraduate
In this course, students will explore the history and social meaning of "criminal justice" in the United States. Readings, reflections, and discussions will push students to examine the criminal justice system as a system of social control and will alert students to the raced and classed character of this system.

SOC 313
SOCIOLOGY OF EDUCATION
Undergraduate
Examines the structure of schooling in the United States and other societies. Topics include: Schools as organizations; teaching as a profession; peer cultures in schools; racial/ethnic, class, and gender inequalities in education.

SOC 315
LAW, POWER AND RESISTANCE
Undergraduate
In this course, students examine the law in its social context. Readings, reflections, and discussions will push students to explore the role of law both in the production and maintenance of inequality and in marginalized people's struggles for justice.

SOC 316
STREET GANGS
Undergraduate
Examines the problems associated with street gangs and "troublesome youth groups" in the United States and Europe. Classical and contemporary theories of gang formation and proliferation are reviewed. Both quantitative and qualitative gang research efforts are studied. Street gang reduction policies and programs (national and local) are scrutinized. Emphasis is placed on the street gang's relationship with other organizations and social actors in the same "habitat."
SOC 220 is a prerequisite for this class.
SOC 317
GENDER, CRIME AND JUSTICE
Undergraduate
In this course students explore the ways in which gender intersects with crime and justice in the U.S. and increasingly, globally. Using feminist and critical perspectives, this course interrogates the gendered and racial nature of the criminal justice system, examines the ways in which gender intersects with patterns of offending, victimization, survival, and resistance, and looks at the ways that criminal justice institutions and gender interact. It also asks students to think critically about alternatives to incarceration and other ways of establishing "justice".

SOC 321
HEALTH AND HUMAN SERVICE ORGANIZATIONS
Undergraduate
The work of health and human service organizations is examined; the origins of these organizations, their goals and the problems inherent in attaining the goals, are considered.

SOC 322
TREATMENT AND PREVENTION OF DELINQUENCY
Undergraduate
A review of traditional and current practices of programs designed to treat delinquents and prevent delinquency, with emphasis on the variety of available correctional facilities.

SOC 323
THE SOCIAL WELFARE INSTITUTION
Undergraduate
The evolution of social welfare as an urban institution and the creation of the welfare state are examined. An analysis of social welfare in the United States within the context of economic, political, social and philosophical developments.

SOC 326
AGING AND THE LIFE COURSE
Undergraduate
A look at the changing age composition of the population; meaning and societal definition of aging, the different types of responses to growing older and the various social programs designed for older people. Introduction to life course theories.

SOC 330
THEMES IN SOCIAL THOUGHT
Undergraduate
Consideration of the writings of social philosophers regarding the nature, origins and meanings of human society.

SOC 331
SOCIOLOGICAL THEORY
Undergraduate
Exploration of the nature of theory and an analysis of selected social theorists.

SOC 101 or SOC 105 is a prerequisite for this class.

SOC 340
SOCIAL INEQUALITY
Undergraduate
Examination of inequalities in wealth and power and their consequences for individuals and the society; for example, the institutions of law, health care, education and politics.

SOC 101 or SOC 105 is a prerequisite for this class.
SOC 342
ORGANIZATIONAL DYNAMICS
Undergraduate
Examination of the structure and process of organizations in the public and private sectors, life in organizations and the interrelationship of individuals and organizations.

SOC 343
SOCIAL DIMENSIONS OF RELIGION (CROSS-LISTED WITH REL 221)
Undergraduate
Analysis of the interplay of society and religion, the clergy as an occupational group, and the relationship of religious ideology to social change.

SOC 344
POLITICAL SOCIOLOGY
Undergraduate
Social and economic bases of the political system in a comparative perspective.

SOC 346
URBAN ETHNOGRAPHY
Undergraduate
An introduction to field research in an urban environment.

SOC 347
CLASS, POWER AND DECISION MAKING IN THE CITY
Undergraduate
Analysis of decision-making in urban settings. Considers the role of class disparities, power, citizen protest and community participation in urban outcomes.

SOC 348
THE CITY IN THE FUTURE
Undergraduate
Alternative views of urban structures and social life in the post-industrial age. Considerations of the implications of energy, different technologies, future shock and social trends.

SOC 351
HEALTH DISPARITIES
Undergraduate
Examination of persistent health disparities in the U.S. and the influence of social settings on morbidity and mortality, as well as the impact of social class, gender, and race/ethnicity on disease and illness patterns and access to health care.

SOC 353
SOCILOGY OF MENTAL ILLNESS
Undergraduate
Examines the social history of, and societal reaction to, the mentally ill. Review of contemporary social perspectives on mental illness and social research on mental hospital institutionalization; the dynamics of the therapist-patient relationship.

SOC 355
CHICAGO AS A SOCIAL SYSTEM
Undergraduate
This course draws upon the rich tradition of sociological work carried out in Chicago to exemplify, illuminate, and integrate a variety of sociological concepts, theories and methodologies.
SOC 356
THE CITY IN CROSS-CULTURAL PERSPECTIVE
Undergraduate
This course examines the city as a type of human settlement, focusing on the different forms, functions, images and ideological perceptions of cities across a number of different cultures.

SOC 358
REVOLUTIONS AND PEASANT REBELLIONS
Undergraduate
Analyzes the most important revolutions and peasant rebellions of the twentieth century as well as the most relevant cases from previous periods, such as the French Revolution.

SOC 360
SOCIAL SERVICES IN CONTEMPORARY SOCIETY
Undergraduate
Social services and welfare programs as developed in contemporary industrial societies. Comparison between European social services and the American social services provides a basis for considering the implications of social policy. Cross-listed with SOC 432.

SOC 365
HEALTH AND GLOBALIZATION
Undergraduate
Comparative approach to understanding changes in health and illness patterns, diet and consumption, and access to health care associated with economic expansion, global inequalities, and changes in local economies, occupations and cultures. Case studies of selected non-industrialized countries.

SOC 370
PEOPLE, PLACES, AND FOOD
Undergraduate
Exploration of community food resources and the relationship to chronic disease such as obesity, diabetes, and hypertension. Qualitative methods focus on meanings of eating habits and how people secure food. Analyzes barriers and supports for healthy eating habits in Chicago neighborhoods. Service-learning component.

SOC 372
HEALTH CARE SYSTEMS: A COMPARATIVE PERSPECTIVE
Undergraduate
Examines the variations in health care delivery systems across selected countries and analyzes social and cultural forces that influence these systems, with an emphasis on differences in health outcomes.

SOC 373
PUBLIC HEALTH AND HIGH RISK BEHAVIOR
Undergraduate
Explores problems in community and public health such as HIV/AIDS and injection drug use. Topics may vary.

SOC 380
RESEARCH METHODS IN SOCIOLOGY I
Undergraduate
The logic of procedures of social science methodology. Initiation of student research project: formulation of problem, design of research, data collection. Presentation of the range of methods available for various types of social research.

SOC 279 or PSY 240 or MAT 242 or MAT 137 is a prerequisite for this class.
SOC 381
RESEARCH METHODS IN SOCIOLOGY II
Undergraduate
Continuation of the research project begun in Sociology 380. Data manipulation and analysis with the use of computers; interpretation, write-up, and synthesis of the research experience.

SOC 279 and SOC 380 are prerequisites for this class.

SOC 382
QUALITATIVE METHODS
Undergraduate
Introduction to qualitative methods in sociology, grounded theory, data collection and analysis, field research, life histories, and unobtrusive measures.

SOC 383
VISUAL SOCIOLOGY
Undergraduate
Examines the history of the still photograph as a document of social problems and conditions, a cultural artifact with a linguistic structure of its own. Methodological issues involved in using photographs as research tools are studied. Students conduct own documentary research project.

SOC 384
ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
Undergraduate
This course imparts the art, craft, and discipline behind the making of sociological ethnographic documentary films. Throughout the course students learn ethnographic concepts and methods, develop film criticism faculties, and build a film production skill set.

SOC 386
POPULAR CULTURE AND THE ARTS
Undergraduate
Multiple perspectives, from modern to post modern, are applied to a range of forms of popular culture, both in historical context and in their current forms. Topics to be covered include examining the concept of popular culture, the analytic tools to understand it, and analyzing some of its manifestations (e.g. sports, mass media, gambling, holiday presentations, shopping, theme parks, theme restaurants, etc. Cross-listed with SOC 480.

SOC 387
SOCIOLOGY OF CELEBRITY
Undergraduate
"Celebrities are known for being well-known." The course explores the role of media and fans in the making of celebrity and considers celebrity as a key feature of contemporary society.

SOC 388
SOCIOLOGY OF CONSUMPTION
Undergraduate
Sociological perspectives on shopping, consumer culture, and social-psychology of consumer behavior.

SOC 390
SEMINAR IN SOCIOLOGY
Undergraduate
Selected topics form the basis of an in-depth consideration. Topics vary and may be initiated by students.

(SOC 101 or SOC 105) and Junior Standing or above is a prerequisite for this class.
SOC 391
SEMINAR IN SOCIOLOGY
Undergraduate
Two-credit-hour course on special topics in Sociology.

SOC 394
COMMUNITY BASED SOCIOLOGY
Undergraduate
Combines basic understanding of sociological principles with field experience.

SOC 395
CAPSTONE IN SOCIOLOGY
Undergraduate
A senior seminar course that enables students to conduct original research and integrate theory and methods.
Senior standing and a minimum of 12 hours in SOC classes is a prerequisite for this class.

SOC 397
TRAVEL/STUDY
Undergraduate
Foreign and domestic study tours with lectures and research by special arrangement with sponsoring programs

SOC 398
INTERNSHIP
Undergraduate
Placement of students in work-study situations relevant to careers in health and human services, social work, juvenile justice, law and society, urban and community services. Clinical and Experiential (can fulfill jr. yr. requirement). (1 to 4 credit hours).

SOC 399
INDEPENDENT STUDY
Undergraduate
Independent Study
Senior status and permission of the department chair are prerequisites for this course.

SOC 401
ADVANCED INTRODUCTION TO SOCIOLOGY
Graduate
A focused and intense introduction to the current state of the discipline of sociology: its basic concepts, theories, methodologies and research strategies. Students completing the course are expected to be able to engage successfully in the department's graduate program.

SOC 402
STATISTICS FOR THE SOCIAL SCIENCES
Graduate
Introduction to quantitative and statistical reasoning in the social sciences, quantitative data analysis, and computer software.

SOC 403
SOCIAL POLICY AND SOCIAL CHANGE
Graduate
Examines the process of policy-making and the effects of policies on individuals, organizations, and communities.

SOC 404
CLASSICAL AND MODERN THEORY
Graduate
Covers classical social theory (Marx, Durkheim, and Weber) and social theory through the 1960s.
SOC 405
SOCIOLOGICAL PERSPECTIVES
Graduate
Examines sociological theories, methods and concepts through a study of the work of contemporary sociologists.

SOC 411
SOCIAL RESEARCH
Graduate
This course focuses on the logic of sociological inquiry, ethical issues of research, the various methods social scientists use, and research in applied settings. For Sociology MA students only.

Status as a SOC Graduate student is a prerequisite for this class.

SOC 412
DATA ANALYSIS
Graduate
The implementation of a research project. Analytic techniques, data processing and the preparation of a written research report.

SOC 411 is a prerequisite for this class.

SOC 413
QUALITATIVE METHODS
Graduate
An examination of qualitative methods in sociology: data collection and analysis, field research, life histories, unobtrusive measures and visual methods employing video and film equipment are emphasized.

SOC 414
LITERATURE REVIEW WRITING PROJECT
Graduate
This course requires students to complete a paper reviewing the sociological literature on a topic of their choice. Successful completion of the literature review paper is one of the ways in which students may fulfill the final project requirement leading to the master's degree.

SOC 415
WRITING A RESEARCH PAPER
Graduate
This course is one of three options for fulfilling the MA-Sociology writing project requirement. The course focuses on original research. The final paper for the course is a draft of the research report that may be used to complete the program.

SOC 417
ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
Graduate
This course imparts the art, craft, and discipline behind the making of sociological ethnographic documentary films. Throughout the course students learn ethnographic concepts and methods, develop film criticism faculties, and build a film production skill set.

SOC 420
URBAN SOCIOLOGY
Graduate
Introduction to advanced level studies in applied urban sociology: contemporary urban theory, research, and policy issues.

SOC 422
URBAN AND COMMUNITY ANALYSIS
Graduate
Quantitative analysis of urban issues including social-area analysis, patterns of segregation, neighborhood change, and other selected topics.
SOC 423
RESEARCH ON URBAN CULTURES
Graduate
Ethnological approach to urban life stressing the qualitative analysis and evaluation of different types of urban communities, community organizations, and urban life styles.

SOC 426
URBAN DEVELOPMENT POLICIES
Graduate
Community agencies viewed as problem-solving organizations. Concentration on the impact of state and local government on community organizations and how community organizations influence social policy. Sequel to SOC 425.

SOC 431
SOCIOLOGY OF HEALTH, ILLNESS AND MEDICINE
Graduate

SOC 432
SOCIAL SERVICES IN CONTEMPORARY SOCIETIES
Graduate
Analysis of the concept of welfare, evaluation of the social organization of welfare and the problems of welfare service systems. The interrelationships between welfare and the family, employment, health and crime are explored. Cross-listed with SOC 323.

SOC 433
THE SOCIOLOGY OF EDUCATION
Graduate
Analysis of educational organizations and their effects-including characteristics of institutional structures, teaching as an occupation, and the relationship between educational attainment and social mobility.

SOC 434
YOUTH SERVICES: HEALTH AND WELFARE
Graduate
Review of research on various youth problems (eg., substance abuse, pregnancy, runaways) and consideration of efforts at amelioration and control.

SOC 438
SOCIOLOGY OF SUBSTANCE USE & ABUSE
Graduate
Sociological perspectives on substance use and abuse, related high-risk behavior, drug traffic, community impact, and prevention and public policy.

SOC 440
SOCIOLOGY OF LAW
Graduate
Analysis of the American legal system as an instrument of social control, social change, and social reform. The impact of social science research on public policy decisions.

SOC 441
PUBLIC HEALTH AND HIGH RISK BEHAVIOR
Graduate
This course brings sociological theory, concepts, and methods to bear on HIV/AIDS, hepatitis B and C (HBV, HCV), and other adverse health outcomes prevalent among injection drug users (IDUs), men who have sex with men (MSM), and "high risk heterosexuals" (HRHs).
SOC 442
CRIMINAL JUSTICE: HISTORY, THEORY, AND ANALYSIS
Graduate
Study of major criminological theories and their application to systems of corrections. Present trends at federal, state, city and private correctional institutions.

SOC 443
CRITICAL LEGAL THEORY
Graduate
Analysis of legal systems and their implementation; jurisprudence and its role in the development and change of legal systems; role of the courts and the police as related to community social problems.

SOC 447
SOCIAL CONTROL AND SOCIAL DEVIANCE
Graduate
Examines theories and research on the social organization of institutions that label and process deviants.

SOC 448
STREET GANGS
Graduate
Examines the problems associated with street gangs and "troublesome youth groups" in the United States and Europe. Classical and contemporary theories of gang formation and proliferation are reviewed. Both quantitative and qualitative research on gangs are studied. Gang reduction policies and programs (national and local) are scrutinized. Emphasis is placed on the street gang's relationship with other organizations and social actors in the same "habitat."

SOC 450
ADVANCED STATISTICS I
Graduate
Advanced Statistics I (cross-Listed As Psy 410)

SOC 455
CHILDHOOD, FAMILY, PUBLIC POLICY
Graduate
Examines contemporary public policy issues and relevant research concerning parenting, marriage, household structure, and family formation, with a focus on the U.S.

SOC 460
SOCIOLOGY OF THE FAMILY
Graduate
Examines demographic trends in this century, recent literature on women and men, wives and husbands, children and parents. Some comparative material is included.

SOC 461
SOCIOLOGY OF YOUTH
Graduate
Critical analysis of literature on nondelinquent youth; focus on the social contexts within which the transition to adulthood occurs.

SOC 463
SOCIAL PSYCHOLOGY
Graduate
The influence of group life on personality development, social interaction, and social behavior.
SOC 464
SOCIAL INEQUALITY AND STRATIFICATION
Graduate
An analysis of inequalities in power, wealth and prestige with an emphasis on the concept of social class, trends in social mobility, and relationships to current social topics such as housing, welfare and political participation.

SOC 465
RACE AND ETHNIC RELATIONS
Graduate
Theoretical perspectives on racial, ethnic, gender, sexual orientation and differentially abled groups emphasizing processes of group formation, patterns of prejudice and discrimination, and an evaluation of methods to reduce prejudice and discrimination.

SOC 466
SOCIAL MOVEMENTS
Graduate
Study of social trends, social movements, communications, and crowd behavior. Emphasis on processes of social change, includes examination of historical and cross-cultural case material.

SOC 467
ORGANIZATIONS
Graduate
The functioning, premises, and consequences of formal organizations will be considered using a variety of perspectives.

SOC 468
SOCIAL DEVIATION
Graduate
Research and theory in the sociology of deviant behavior, emphasis upon such topics as the labeling of deviants, the analysis of deviant careers, patterns of deviant socialization, and the roles of agents or agencies of social control. Cross-listed with SOC 304.

SOC 469
SOCIOLOGY OF LIFE CYCLE
Graduate
A look at the changing age composition of the population; meaning and societal definition of aging, the different types of responses to growing older, and the various social programs designed for the aged.

SOC 470
GENDER AND SOCIETY
Graduate
Theory and research on roles of men and women, sexual behavior and patterns of gender inequality. Cross-listed with MLS 447 and WGS 460.

SOC 471
SOCIOLOGY OF KNOWLEDGE
Graduate
An analysis of the social forms of knowledge and the social processes by which individuals acquire this knowledge. The institutional organization and social distribution of knowledge.

SOC 474
INTRODUCTION TO DEMOGRAPHY AND POPULATION STUDIES
Graduate
Introduction to the study of population characteristics including fertility, migration, illness and epidemics, age structure, and the social and economic causes and impact of population change. The course examines historical forces in population change, as well as quantitative methods, theories, and policy issues.
SOC 475
SOCIOLOGY OF WORK
Graduate
Examination of the nature, meaning and history of work and leisure in Western culture; and the relationship of work and leisure to issues associated with the contemporary concept of "quality of life". Cross-listed with MLS 443.

SOC 477
SEX, SEXUALITY AND POLITICS
Graduate
Focus on sexuality as one of the central organizing ideologies shaping the fabric of our social life. Topics covered include the medicalization of sex, sex and race, pornography, sex and globalization, and gay liberation movement, etc.

SOC 479
MEN, MASCULINITY AND POWER
Graduate
This course reviews the development of men's studies and its connection with the development of women's studies. It examines the construction of masculinity and the issue concerning gender inequality.

SOC 480
POPULAR CULTURE AND THE ARTS
Graduate
(Cross-listed as SOC 386) The course explores topics in popular culture and the arts from a sociological perspective. The focus includes specific arts (film, music, photography, etc), subcultures of artists and performers and the impact of the market on the arts and popular culture.

SOC 487
SOCIOLOGY OF CELEBRITY
Graduate
"Celebrities are known for being well-known." The course explores the role of media and fans in the making of celebrity and considers celebrity as a key feature of contemporary society.

SOC 493
VISUAL SOCIOLOGY
Graduate
A sociological view of documents that record social reality. These documents primarily include photographs but can also include paintings and sculpture.

SOC 494
RACISM AND RESISTANCE
Graduate
In this course, although we will be particularly interested in the way White Supremacy is created and maintained in the post-civil rights era, we will ground our examination in the histories that created our present. We will end the course with a frank discussion of what can be done to resist racism and racial oppression in our own lives.

SOC 495
SPECIAL TOPICS IN SOCIOLOGY
Graduate
Special courses will be offered as students and faculty identify selected topics of common interest.

SOC 498
INTERNSHIP
Graduate
Students may be placed with agencies where they will have the opportunity to participate in activities such as research and counseling. Credit may vary but is subject to the limit of eight quarter hours.
SOC 499
INDEPENDENT STUDY
Graduate
Independent Study

SOC 500
THESIS RESEARCH
Graduate
The thesis research should culminate in the acceptance of a thesis. Four quarter hours, one registration.

SOC 510
MA PROJECT COMPLETION
Graduate
Students may register for this class if they are engaged in work on a writing project (thesis or MA project). Registration requires certification by the chair that the student is engaged in research or writing. The course does not apply to completion of an IN in a class. This course may be taken at most 3 times.

SOC 601
ACTIVE STUDENT STATUS
Graduate
Registration in this course provides access to the library and other university facilities. There is no indication whether or not the student is working on the writing project. Non-credit.

SPN 101
BASIC SPANISH I
Undergraduate
This is the first course in a three-course introductory sequence that as a whole constitutes "first year college Spanish" (SPN 101, SPN 102, and SPN 103). The course has three main goals: to develop some basic knowledge of Spanish as a foreign language, to develop some communicative skills in that language, and to attain some basic knowledge of the cultures of the Spanish-speaking world and to learn some cultural differences between the U.S. and these cultures.

SPN 101S
BASIC SPANISH I FOR SUMMER
Undergraduate
(Covers the equivalent of SPN 101 and the first half of SPN 102.) The first half of beginning Spanish. Listening to, speaking, reading, and writing Spanish in a cultural context for the beginning student.

SPN 102
BASIC SPANISH II
Undergraduate
This is the second course in a three-course introductory sequence that as a whole constitutes "first year college Spanish" (SPN 101, SPN 102, and SPN 103). The course has various goals. The first one is to develop some basic communicative skills in Spanish as a second language. These include but are not limited to the following sample abilities: talking about pastimes and leisure activities, talking about activities in the past, describing typical household chores, using expressions associated with technology, and giving instructions.

SPN 103
BASIC SPANISH III
Undergraduate
This is the third course in a three-course introductory sequence that as a whole constitutes "first year college Spanish" (SPN 101, SPN 102, and SPN 103). The course has several goals. The first one is to develop some basic communicative skills in Spanish as a second language. These include but are not limited to the following sample abilities: taking about feelings and mood changes, talking about what people do to and for each other, expressing wishes and desires, talking about what someone is doing now and in the past, describing current events, using vocabulary related to professions and daily life.
(Covers the equivalent of the second half of SPN 102 and all of SPN 103.) The second half of beginning Spanish. Further work on the basic elements of the Spanish language, spoken as well as written, with due regard to the cultural context of Spanish expression.

This is the first course of the sequence of Intermediate Spanish (SPN 104, SPN 105 and SPN 106). The course follows a content-based approach where students learn about Hispanic culture through interaction and communication. The fundamental language learning goal of this course is to help students express, interpret, and negotiate meaning in context. SPN 103 or equivalent, including placement test or permission of instructor, is recommended.

This is the second course of the sequence of Intermediate Spanish (SPN 104, SPN 105 and SPN 106). The course follows a content-based approach where students learn about Hispanic culture through interaction and communication. The fundamental language learning goal of this course is to help students express, interpret, and negotiate meaning in context. SPN 104 or equivalent, including placement test or permission of instructor, is recommended.

This is the first course in a three-course intermediate sequence that as a whole constitutes “second year college Spanish” (SPN 124, SPN 125 and SPN 126). This course covers all the material of Spanish 104, but it offers students the unique opportunity to enhance knowledge of the Spanish-speaking world both INSIDE and OUTSIDE the classroom. Students will spend 25 hours per quarter (3 hours/per week) working with one of several organizations in Chicago’s Latino communities. These sites mostly serve new immigrants from Mexico and Central America who are in the process of integrating into new cultural environments. By participating in a language exchange on a weekly basis the student will be an active learner and teacher. SPN 103 or equivalent, including placement test or permission of instructor, is recommended.

See schedule for current offerings.

Variable credit.

This course provides transitional Spanish for intermediate Heritage Learners whose primary goal is to increase basic communication in the language and an expanded understanding of Hispanic culture. Listening, speaking, reading and writing skills continue to be developed with an emphasis on conversation, facilitated by the study of vocabulary and structure, exciting readings and films.
SPN 201
ADVANCED GRAMMAR AND COMMUNICATION
Undergraduate
In this class students will work toward improving their speaking, listening, reading, and writing skills in Spanish at the advanced level as they explore various topics related to the history and cultures of the Spanish-speaking world. Students will also focus on four major grammar points that typically cause difficulty for students of Spanish as a foreign language: the distinction between ser and estar, verb tense, verb aspect (preterite/imperfect), and verb mood (indicative/subjunctive). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 202
ADVANCED COMPOSITION AND COMMUNICATION
Undergraduate
Students will work on improving their speaking, listening, reading, and writing skills in Spanish at the advanced level as they explore various topics related to the history and cultures of the Spanish-speaking world. Students will focus a little more, however, on written expression. Readings for the class will serve as models for various types of writing (primarily exposition and argumentation), and students will analyze the structure of these models as well as discuss their content. The course will also place emphasis on the effective use of the dictionary and on mechanics (such as spelling and punctuation). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 203
ADVANCED CONVERSATION
Undergraduate
This course will focus on improving the student's oral skills in Spanish through intensive practice. Students will discuss a wide range of topics, and they will practice conversational strategies for a variety of situations. Upon completing this course, students should be able to do the following: 1) talk about the past in a coherent and fairly detailed manner; 2) deal effectively with unanticipated complications (e.g. a lost ticket); 3) adapt to formal and informal situations; 4) speak broadly on topics of personal interest; and 5) make themselves easily understood by Spanish speakers who are unaccustomed to dealing with non-native speakers. Class preparation will include readings (from various genres) and films. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 205
ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS I
Undergraduate
This course is the first in a series (SPN 205, SPN 206 and SPN 207) that offers a comprehensive, structural review of the Spanish language for heritage speakers. The course objectives include: 1) increasing the students' vocabulary in Spanish, 2) improving their reading and writing skills (students will read short stories and essays, and students will write guided compositions), 3) improving the students' oral proficiency (through presentations and discussions), and 4) exploring and fostering an appreciation of Latino culture and heritage. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 206
ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS II
Undergraduate
This course is the first in a series (SPN 205, SPN 206 and SPN 207) that offers a comprehensive, structural review of the Spanish language for heritage speakers. The course objectives include: 1) increasing the students' vocabulary in Spanish, 2) improving their reading and writing skills (students will read short stories and essays, and students will write guided compositions), 3) improving the students' oral proficiency (through presentations and discussions), and 4) exploring and fostering an appreciation of Latino culture and heritage. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 207
ADVANCED CONVERSATION FOR THE HERITAGE SPEAKER
Undergraduate
Spanish 207 is the continuation of 205 and 206. It is the third part of a comprehensive, structural review of the Spanish language for heritage speakers' college students. The purpose of this course is to improve and polish the student's fluency in Spanish. The student's oral skills will be enhanced through careful and guided readings that will lead to open class discussions of fiction and nonfiction materials from around the Hispanic/Latino world. Students will be required to do a significant amount of reading, and writing in order to prepare themselves for class discussions and for their oral presentations. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 220
INTRODUCTION TO LITERARY ANALYSIS IN SPANISH
Undergraduate
The main purpose of this course is to provide students with the critical tools and vocabulary that they need in order to analyze various types of literary texts written in Spanish. Students will read and discuss a variety of poems, short stories, and plays, focusing on their various levels of meaning and also on the various ways by which they (or their authors or their readers) create meaning. Other aims of the course include helping students improve their oral and written communication in Spanish, introducing them to research methods in literary studies, and familiarizing them with the MLA style for documenting sources. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 221
INTRODUCTION TO PENINSULAR CIVILIZATION
Undergraduate
This course introduces students to the cultures of Spain and provides them with a panoramic view of peninsular civilization from ancient times to the present. Students will explore selected topics related to geography, language, politics, religion, literature, art, architecture, music, dance, and film. This course is a good preparation for those who plan to study in Spain. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 225
INTRODUCTION TO TRADITIONAL AND TECHNOLOGICALLY BASED APPROACHES TO TRANSLATION
Undergraduate
The main objective of this course is to introduce students to the history, theory and fundamental principles of translation practice as well as the latest technologies available to the translator. Students will practice the art of translation through the newest technologies available in fields such as medicine, law, sports, travel, education, and business. This introductory course will train students to recognize, comprehend and translate idioms and fixed expressions into Spanish and/or English equivalencies. Students will learn to use monolingual dictionaries and constitute glossaries, computer-based tools and the internet for translating. Students will gain the necessary skills to proof and edit professional documents in order to provide polished and professional translations. A whole range of texts, videos from Spanish to English, and from English into Spanish, will be used for practice. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 242
INTRODUCTION TO SPANISH LINGUISTICS
Undergraduate
This course is an introduction to the structure of the Spanish language and its use in the Spanish speaking world. It is offered to those students who have already studied Spanish for at least two years. The objectives of this course are the following: (1) introduce basic linguistic terminology and the fundamentals of this science, (2) help the student to analyze the grammatical structures and sounds of the Spanish language, (3) familiarize the student with different varieties of Spanish, (4) introduce the student to the study of linguistics as a cognitive science. This course counts toward the major and minor in Spanish and prepares students for later linguistics courses. Strongly recommended for students planning to take any 300-level linguistics course. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 243
INTRODUCTION TO TRADITIONAL AND TECHNOLOGICALLY BASED APPROACHES TO TRANSLATION
Undergraduate
The main objective of this course is to introduce students to the history, theory and fundamental principles of translation practice as well as the latest technologies available to the translator. Students will practice the art of translation through the newest technologies available. This introductory course will train students to recognize, comprehend and translate idioms and fixed expressions into Spanish and/or English equivalencies. Students will learn to use monolingual dictionaries and constitute glossaries, computer-based tools and the internet for translating. Students will gain the necessary skills to proof and edit professional documents in order to provide polished and professional translations. A whole range of texts, videos from Spanish to English, and from English into Spanish, will be used to practice. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 251
SPANISH FOR THE MEDICAL PROFESSIONS
Undergraduate
This course aims at developing communication skills for students, health care professionals (physicians, nurses, nurse practitioners, social service workers) and workers in related fields. It reviews structures of Spanish grammar and introduces medical terms and expressions, in the context of "real life" situations. Emphasis is given to developing cultural awareness of the U.S. Hispanic population and to preparing students to handle crises and daily concerns in a hospital or medical office setting and in other health care situations. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 252  
COMMERCIAL SPANISH I  
Undergraduate

An introduction to Commercial Spanish designed to provide the business-oriented student with sufficient Spanish language skills to be able to conduct basic business activities in Spanish-speaking countries. Students will be exposed to a wide variety of vocabulary to help them explore various topics related to the cultures of the Spanish-speaking world. There will also be ample oral and written practice related to the business world. The ability to communicate and perform business-related tasks are the focus of each lesson. Classroom sessions will include oral presentations, discussions of the assigned readings and related topics. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 254  
SPANISH FOR LAW PROFESSIONALS  
Undergraduate

The objective of this course is to provide vocabulary, idiomatic expressions, and cultural information for the specific needs of the professionals in the legal field. This class is intended for those who want to learn about the general content of law and legal vocabulary which are applicable in the Spanish world. In every class the participants will analyze texts, review grammar as necessary and practice in context. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

Variable credit.

SPN 301  
SPANISH LITERATURE I: MIDDLE AGES THROUGH THE GOLDEN AGE  
Undergraduate

This course introduces students to the literature of medieval and Golden Age Spain, and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the literary genres written in Castilian from 1100 CE to 1700 CE, tracing the development of various styles and their contribution to a national literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 302  
SPANISH LITERATURE II: THE ENLIGHTENMENT TO THE PRESENT  
Undergraduate

A critical survey of Spanish peninsular literature from 1700 to the present: this course provides an overview of the historical, intellectual, artistic, and socio-political factors that have shaped Spanish life from the Enlightenment to our times as viewed through selected literary texts. (Literature category #2: Spanish literature from 1700 to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 303
LATIN AMERICAN LITERATURE & CULTURE I
Undergraduate
A critical survey of Spanish American literature from its origins to modernism. The course is an overview of the physical, intellectual, artistic, and socio-political currents of Spanish American literature that have helped to shape its thought and culture. Classroom sessions will include lectures and discussions of the assigned readings and related topics. Students in the course will read a number of representative works written by a diverse variety of the period's principal writers. Genres included are poetry, prose fiction, theater, and the essay. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 304
LATIN AMERICAN LITERATURE AND CULTURE II
Undergraduate
This course is a critical survey of Spanish American literature from 1880 to the present. It is an overview of the physical, intellectual, artistic, and socio-political currents of Spanish American literature that have helped to shape its thought and culture. Classroom sessions will include lectures and discussions of the assigned readings and related topics. Students in the course will read a number of representative works written by a diverse variety of the period's principal writers. The readings will provide a wide sample of different types of writing; genres included are poetry, prose fiction, theater, and the essay. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 305
LATIN AMERICAN NOVEL
Undergraduate
This course is a survey of contemporary Latin American novels and will include works by a variety of Latin American authors. Throughout the course students will explore the development of the novel in Latin America; the revision and reinterpretation of history, gender, and the concept and construction of the novel and characters from the perspective of twentieth and twenty first century authors. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 306
HISPANIC LITERATURE OF THE CARIBBEAN
Undergraduate
This course covers Hispanic literature of the Caribbean from a variety of perspectives and may have different topics each quarter. Variable topics may include: Cuban, Puerto Rican, Dominican or Afro-Caribbean Literature. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 307
PENINSULAR CIVILIZATION
Undergraduate
This course is an integrated survey of civilization and culture of the Iberian Peninsula from prehistoric times to the present. The survey course concentrates on Spanish arts and intellectual achievements. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 308
MEDIEVAL SPANISH LITERATURE
Undergraduate
This course introduces students to the literature of medieval Spain, and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the poetry, prose, and drama written in Castilian from 1100 to 1500, tracing the gradual unification of a national language and literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 309
SPANISH BALLAD
Undergraduate
This course will explore social diversity and the Spanish visions of Identity and Peninsular culture through the Spanish Ballad. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 310
GOLDEN AGE POETRY
Undergraduate
This course will introduce students to the Spanish poetry of the sixteenth and seventeenth centuries, from Boscan and Garcilaso to Calderon and Sor Juana. Students will emphasize the major poetic movements, such as Petrarchism, misticism, conceptismo and culteranismo. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 311
CERVANTES
Undergraduate
This advanced course focuses on Miguel de Cervantes's Don Quijote. This course will consider how this "first modern novel" responds critically to developments in Renaissance literature, religious and political thinking, and theories of fictional and non-fictional representation. In addition to the Quijote, students will also read short selections of background material and criticism in order to situate this work in its historical context and to understand why it is considered to be among the most influential works of world literature. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 312
THE SPANISH NOVEL
Undergraduate
This advanced course is a survey of modern and contemporary Spanish novels and will include works by a variety of authors. Throughout the course students will explore the development of the novel in Spain; the revision and reinterpretation of history, gender, and the concept and construction of the novel and characters from the perspective of modern and contemporary authors. Group work, class discussions and individual projects will help the student gain a comprehensive view of the significant currents of the Spanish peninsular novel. This course will stress and encourage the examination of the roles of women, class, culture, and religion. (Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 313
THE GENERATION OF 1898
Undergraduate
This advanced course will focus on the key group of Spanish writers known as the Generation of 1898. These writers felt that Spain at the end of the 19th century did not measure up to European standards of modernity and progress, and that its cultural and social life was at an inferior level when compared to the leading European countries. Spain was diagnosed as having a national malaise known as “abulia”; it was a kind of national sluggishness that prevented the country from profiting from and adjusting to the rapidly changing currents of modern world civilization. The task facing the Generation of 1898 was to bring Spain up to the level of the times. Students in the course will read a number of representative works written by some of the Generation's principal members. (Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 314
CONTEMPORARY HISPANIC LITERATURE
Undergraduate
This course is a panoramic study of the principal works and authors of Puerto Rican Literature from the Spanish colonial period to the present. The literary production of representative authors is studied and analyzed. Students will take a thematic approach to the textual analysis of works by selected poets, musical artists, dramatists, essayists and fiction writers and examine the rise of national society in Puerto Rico and the literary forms in which it finds articulated expression. Furthermore, students will evidence the evolution of nationality and the national through the various historical contexts including Spanish colonialism, United States occupation, and mass migration. (Literature category #3: Latin American literature from the origins through Romanticism or Literature category #4 Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 315
MEXICAN LITERATURE
Undergraduate
This course is an overview of Mexican literature from the colonial period to the present. Through the writings, films, arts, and music, the course explores the intellectual, political, social, and historical events that have shaped the life and experience of Mexican people. Particular emphasis will be placed on the Mexican Revolution and the post Revolution, as well as U.S. presence in Mexico and Mexicans in the United States. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4 Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 316  
THE HISPANIC ESSAY  
Undergraduate  
This advanced course will explore the history of ideas, cultural diversity and Latin American visions of identity through the Latin American essays. In this class students will decode and analyzed problems of theory, criticism and study of this genre. Through the works of a selection of authors, such as Eduardo Galeano, Octavio Paz, Jose Marti, Manuel Gonzalez Prada and others, this class will study how political, social, economical, rhetorical and gender issues have affected this genre. Students will examine issues such as the construction of power, the treatment of sex, gender and cultural difference in literature; how the Latin American experience is reflected in these readings; and how they contribute to Hispanic literature as a whole. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4: Latin American literature from Modernism to present) SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 317  
THE HISPANIC SHORT STORY  
Undergraduate  
This course explores the Hispanic short story from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latino short story. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 318  
THE HISPANIC THEATER  
Undergraduate  
This course explores Hispanic theater from a variety of perspectives and may have different topics each quarter. Through the discussion and analysis of theatrical texts, students will improve their knowledge of Hispanic culture, socio-political vision, and tools of literary expression. Variable topics may include: Peninsular, Latin American or Latino theater. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 319  
CONTEMPORARY POETRY  
Undergraduate  
This advanced course in modern Latin American and Spanish literature focuses on the following issues: poetical representations of identity; poetical representations of gender and the cultural readings of “machismo”; the role of poetry and other forms of artistic expression in shaping societies; theory and critical analysis of poems as a way to understand culture, the politics of marginality and forms of political mobilization among other issues. (Literature category #4: Latin American literature from Modernism to present or Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 320  
COMMERCIAL SPANISH II  
Undergraduate  
This is a course designed to provide the business-oriented student with sufficient Spanish language skills to be able to function credibly in a business environment where a knowledge of Spanish is necessary. Students will be exposed to a wide variety of commercial terminology and will have ample oral and written practice related to the business world. Principal topics include: 1) readings on business topics, translation, writing; 2) study and practice of business vocabulary; 3) study and discussion of business topics; 4) readings on Spanish-speaking countries and their people and economies to provide the students with an increased awareness of the diversity and complexity of the cultures and business practices in the many different countries in Latin America and other Spanish-speaking areas. SPN 106 or equivalent, or permission of instructor, is recommended.

SPN 321  
U.S. LATINO/A WRITERS  
Undergraduate  
This advanced course is a critical survey of Latino literature. This course will provide the student with an overview (cultural, social, and political) of the contributions of Latinos to the development of society in the United States. The course will call attention to topics that are and have been important to Latino culture and identity. Particular emphasis will be given to topics such as: oppression, isolation, cultural identity (within the U.S.), education and anti-immigrant issues. The objective of this course is to provide the student with a better understanding of the Latino communities in the United States, as seen by themselves. Through the works read in class, films and music the student will also acquire a better understanding of the social and political situation of Latinos in the United States. Literature category #4 (Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 322
HISPANIC WOMEN WRITERS
Undergraduate
This advanced course explores Hispanic women writers from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latina writers of the United States. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 323
REVOLUTION IN LATIN AMERICAN LITERATURE
Undergraduate
This advanced course explores Revolution in Latin American literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: The Mexican Revolution, the Cuban Revolution, Revolutions in Central America, or a Survey of Revolutionary Movements. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 324
THE BIRTH OF THE NOVEL IN SPAIN
Undergraduate
In this advanced course students will read and discuss examples of the major sixteenth-century narrative genres (chivalric romance, prose drama, picaresque, pastoral, la novela morisca, and historiography) that paved the way for Cervantes's synthesis. Texts include, Amadis de Gaula (selections), La Celestina, El Abencerraje, La vida de Lazarillo de Tormes, and two of Cervantes's novellas. Topics to be treated include questions of social class and caste, gender roles, notions of love and honor, the rise of the modern nation-state, imperialism, mysticism, verisimilitude, literal and figurative language, and the problems associated with interpreting texts that are culturally distant from modern readers. Class will consist primarily of discussion of the assigned readings. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 325
TRANSLATION AND INTERPRETATION
Undergraduate
This course will focus on the translation of journalistic, legal, literary, pedagogical and commercial texts. The course will also improve the student's knowledge of translation and interpretation theory and provide, through a variety of translation assignments, the opportunity to review their writing skills and knowledge of the culture in order to be able to work within different registers and learn appropriate vocabulary. Guest lectures may provide the students with first-hand experience in the field and the opportunity to explore possible future use of their experience in translation. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 326
SPANISH STYLISTICS
Undergraduate
This advanced expression class builds on the skills developed in Spanish 201 & 202 (or 205 & 206) with a clear emphasis on writing. Students will write numerous texts of different length and purpose. The focus will be on developing a more effective and sophisticated prose style. In-class time will be spent on writing activities which will give students practice in performing specific writing tasks following a variety of writing styles. In-class time will also be spent on oral and written exercises designed to reinforce the correct use of grammatical structures. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 327
AREA STUDIES IN LATIN AMERICAN LITERATURE
Undergraduate
This course explores Area Studies in Latin American literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: Central American, Andean, or Southern Cone literature. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 328
MODERN LATIN AMERICAN THEATRE
Undergraduate
This course explores Modern Latin American theatre from a variety of perspectives and may have different topics each quarter. Variable topics may include: a survey of representative dramas from the “revolutionary” period in modern Latin American theater, 1960s-1970s or other specialized topics. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 329
LATINO GAY AND LESBIAN LITERATURE
Undergraduate
This course explores Latino gay and lesbian literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: a survey of representative texts of Latino and Hispanic gay and lesbian authors or other specialized topics. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 330
LATIN AMERICAN, LATINO AND SPANISH CINEMA
Undergraduate
This course explores Latin American, Latino and/or Peninsular cinema from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latino film directors and their works in Spain, Latin America or the United States. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 331
FILM AS A SUBVERSIVE ART
Undergraduate
This course explores contested images of resistance in Latin American, Latino and/or Peninsular films from a variety of perspectives and may have different topics each quarter. The course questions the construction of individual and collective identities in film, focusing on the intersections of cultural factors such as gender, race and ethnicity, social class, and language, among others. It also examines the ideological underpinnings involved in the shaping and conforming of those identities by cultural institutions and social systems. Variable topics may include: Decoding literature through Peninsular, Latin American or Latino films based on literary works by Peninsular, Latin American or Latino authors, or other specialized topics. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 332
NINETEENTH CENTURY SPANISH NOVEL
Undergraduate
This advanced course is based on the reading, discussion and critique of major representative works in nineteenth-century Peninsular novel. The course will focus on the conflicting interest of nineteenth-century society paying special attention to the theme of marriage and relationship between sexes. This course will stress and encourage the examination of the roles of women, class, culture, and religion. (Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 333
GOLDEN AGE THEATER
Undergraduate
This advanced course will introduce students to the Spanish theater of the seventeenth century, with a focus on the comedia, a new popular art form that appealed to audiences across social classes. Students will endeavor to read these literary works in their cultural contexts and consider their current relevance. Students may also view film adaptations of some of the plays. Topics include questions of class and caste, gender roles, various notions of honor, the early modern monarchy, the idea of free will within the context of the Counter Reformation, and the theatrical elements of everyday life. Class will consist primarily of discussion of the assigned readings. (Literature category #1: Spanish literature before 1700). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 335
U.S. LATINA WRITERS
Undergraduate
This course is a survey of literature by modern Latina women writers from the United States, focusing on the social, cultural and political development of Latinas and their affirmation and reaffirmation of identity through their literature in today's society. (Literature category #4: Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 339
THE GENERATION OF 1927
Undergraduate
This advanced course examines the peninsular Spanish "Generation of 1927" in considerable depth with emphasis on the best known literary figure in the group, Federico García Lorca. (Literature category #2: Spanish literature from the Enlightenment to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 340
SPANISH CREATIVE WRITING WORKSHOP
Undergraduate
This advanced course seeks to reinforce and further develop the student's expression in Spanish by exploring different techniques in writing poetry and fiction. After approaching some basic concepts involved in the creative writing process, and with the constant practice of writing, students will be able to create texts in the style of preference. They will also gain more confidence with linguistics abilities. This class will be conducted in a workshop format, consisting of in-class writing exercises, workshop-like peer-sharing of texts, and discussions about the creative process. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 351
SPANISH IN THE U.S.
Undergraduate
Spanish is the second most widely spoken language in the United States; it has been spoken in this country longer than English has. This course is an introduction to the varieties of Spanish spoken in the US. Students will examine the evolution of the phonological, grammatical, and lexical linguistic system of the Spanish of US Latino/a communities. Students will also explore how sociolinguistic concepts such as bilingualism, diglossia, code-switching, linguistic variation, linguistic change, standard vs. non-prestigious varieties, and language attitudes manifest in the US Spanish context. This course is intended to familiarize the students with issues about language use in social context. Students will discuss results of research on the relationship between language and society in US Spanish-speaking communities. They will become familiar with sociolinguistic concepts. Students also acquire experience in carrying out sociolinguistic research. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 352
SPANISH PHONOLOGY AND PHONETICS
Undergraduate
This is an introductory course on the nature and structure of the sound system of the Spanish language. This course is offered to students who, having studied the language for at least two years, need a solid grounding of Spanish phonology and in the case of non-native speakers of Spanish a systematic practice of correct pronunciation patterns. It is also a requirement for Spanish majors. After a thorough study of the Spanish sound system, students will explore some related topics such as Spanish orthography, the history of the Spanish language, its place among Romance, Iberian, and American languages, and its rich dialectal variation. Lectures and discussions will be based on the required textbook and on additional materials (both written and audio). This class will be conducted in Spanish. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 353
THE STRUCTURE OF SPANISH
Undergraduate
This course is an introduction to the scientific study of the structure of language, with a special emphasis on Spanish. It examines the structure of sentences (syntax), the formation of words (morphology), and the construction of meaning (semantics/pragmatics) in Spanish, and in contrast to English and other languages. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 354
SPANISH SOCIOLINGUISTICS
Undergraduate
This course is an introduction to the study of the relationship between language and society through the Spanish varieties in the Spanish-speaking world. Students will examine and revise ideologies, attitudes and beliefs about the Spanish language to understand this relationship. To lead students to examine their own beliefs and attitudes about language, they will be equipped with methods of linguistic analyses and strategies to find the social in the linguistic and the linguistic in the social from a critical perspective. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 355
THE HISTORY OF THE SPANISH LANGUAGE
Undergraduate
This course is a journey through the history of the Spanish language from Latin to the present day. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 370
LATIN AMERICAN CIVILIZATION
Undergraduate
This course is an introduction to the history and cultures from pre-Columbian times to the present. The course will explore the politics, social structures, traditions, artistic movements and historical periods of Latin America. The scope of the course covers the main pre-Columbian civilizations, the time of the Spanish discovery and colonization, the rise of new nationalities and their development, especially in relation to the United States and the emerging globalized world. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 371
CULTURAL DIVERSITY AND LEGACIES THROUGH FILM
Undergraduate
This course explores Latin American, Latino and/or Peninsular cultures which grapple with various historical, socio-economic and political issues through film. Throughout the course, students will question the construction of individual and collective identities in film, focusing on the intersections of cultural factors such as gender, race and ethnicity, social class, and language, among others. Students will also focus on the ideological substructures involved in the shaping and conforming of those identities by cultural institutions and social systems. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 372
LITERATURE OF THE DOMINICAN REPUBLIC
Undergraduate
This advanced course will explore cultural diversity and the Dominican Republic political, gender and ethnic visions through poetry. Through poetic class experience students will decode culture and society in the Caribbean and U.S. Dominican Latino communities. Students will focus on the following issues: political representations of identity; representations of gender and the cultural readings of "machismo"; the role of art and other forms of cultural expression in shaping identity; cultural criticism of poems as a way to understand culture and the politics of marginality and forms of political mobilization. Literature category #4 (Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 373
AFRO-HISPANIC LITERATURE
Undergraduate
This course in contemporary literature will seek to determine what distinguishes the Afro-Hispanic novel, short story, drama or poetry from other works in these genres written in Spanish from a variety of perspectives and may have different topics each quarter. Students will read original works in order to analyze how the use of language, imagery and narrative voice reflect the experience of people of African descent in the Spanish-speaking world as seen (or heard) in the text and context of these works. In addition, students will explore how race, class, politics and culture interact and find expression in Afro-Hispanic literature. (Literature category #2: Spanish literature from the Enlightenment to the present or Literature category #4: Latin American literature from Modernism to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 374
LITERATURE OF THE CONQUEST
Undergraduate
This advanced course in Latin American literature explores the early encounters between Europe and the Americas. Students will analyze letters, reports, histories, and political tracts from European, Amerindian, and Mestizo sources. Students will also consider some visual documents, such as images from the Lienzo de Tlaxcala and early maps. Typical areas of focus include the initial contact (Columbus), Mexico (Cortes, Diaz del Castillo, the Florentine Codex), Peru (Xerez, "El Inca" Garcilaso, Guaman Poma de Ayala), and the sixteenth-century debates over the wars of conquest (Las Casas, Sepulveda). Topics include the role of these texts as instruments of empire, strategies of representation, strategies of resistance to imperialism, the role of women in the conquest, debates over what constitutes a "just" war, and the relevance of these texts for modern Latin American identities. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 375
LATIN AMERICAN LITERATURE FROM INDEPENDENCE TO MODERNISM
Undergraduate
This advanced course in Spanish literature will introduce students to the most important literary movements in Hispanic American countries, beginning with the wars of independence from Spain until the last part of 19th century. Special attention will be given to authors such as Jose Marti, Jorge Issacs, Andres Bello and Ruben Dario, among others. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended

SPN 376
SOR JUANA INES DE LA CRUZ
Undergraduate
This advanced course in literature will explore the main works of the most influential Mexican poet of the Colonial period, Sor Juana Ines de la Cruz (1648-1695). One of the major themes in Sor Juana's work is the right of women to education. Sor Juana wrote poetry, plays, and essays in seventeenth-century Mexico, a society in which women's intellectual inquiry and access to knowledge was an unsafe endeavor and controlled by patriarchal hierarchies. Students will examine the relationship between politics, gender and writing in the context of the historical period, and analyze the spaces and borders occupied and visited by Sor Juana's lyric, ludic, astronomical, polemical, theatrical, theological, cosmological, culinary, colonial, and criollo writings. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 377
PERUVIAN REALITIES IN A MULTICULTURAL SOCIETY: HISTORY, CULTURE, POLITICS, VIOLENCE & SOCIAL JUSTICE
Undergraduate
This interdisciplinary course will introduce students to the history, culture, politics, and general life of the peoples of Peru. Through an exploration of a vast array of interdisciplinary readings, visual arts and films, students will gain a deep understanding of Peru's history from its extraordinary pre-Columbian civilizations to its citizens' twenty-first century post civil war struggles to achieve dignity and justice in a multicultural, multilingual and multiethnic nation where Andean, Amazonian, African, Asian and European traditions meet. As a consequence of immense economic and social inequalities, Peru has a long history of violence that resulted in an internal war that ended recently. Particular attention will be given to contemporary developments in terms of the interaction between culture and politics. (Literature category #3: Latin American literature from origins through Romanticism or Literature category #4 (Latin American literature from Modernism to present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 378
FOUNDATIONAL FICTIONS
Undergraduate
This advanced course in Latin American literature explores the relationship of national consolidation and romantic novels. This course is based on the reading, discussion and critique of major representative "Foundational Fictions" in 19th-century Latin American literature. Students will examine how the construction of gender and race in these novels portrays the quest to forge new national identities. At the same time, students will analyze how the novels use their characters' romantic relationships to suggest their nation's political relationships, and thus contribute to the discourse on building the new societies that would replace Spain's colonial empire and serve as a prototype for the modern Latin American state. (Literature category #3: Latin American literature from origins through Romanticism). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 391
SOCIOLINGUISTICS OF HERITAGE LANGUAGE LITERACY
Undergraduate
A heritage language learner has been described as "a student who is raised in a home where a non-English language is spoken, who speaks or merely understands the heritage language, and who is to some degree bilingual in English and the heritage language" (Valdes 2000:1). It is well-documented that for such students, literacy in the heritage language is often lost within just one or two generations. In this third course of DePaul's series on Latino Literacy, students will identify the prominent sociolinguistic issues that intersect with heritage language literacy. Through the reading of selected bibliography and guided reflections on both personal and service learning experiences, each student will arrive at a personalized assessment of the key topics affecting heritage language literacy. Possible topics include language socialization, language ideology and identities, and issues related to language contact with English such as code-switching and language shift/loss. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.
SPN 392
TRANSNATIONALISM AND SOCIAL JUSTICE
Undergraduate
This course explores the overarching theme of violence across different Latin American social realities. This course uses an interdisciplinary approach to explore the experience of revolution and repression in contemporary Latin America. Focusing on twentieth-century literature, films and culture, students will explore the making and unmaking of revolutionary political projects and human rights issues, the construction of distinct forms of cultural resistance and the different expressions of violence. (Literature category #4: Latin America from Modernism to the present). SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 393
LATINO MEDIA AND DIGITAL CULTURE LITERACY
Undergraduate
This course will explore the role and impact of the media in the Latino community, and how, in this context, Latinos view themselves and how others view them. Students will explore Latino communities’ participation as creators and consumers of popular and media culture. Students will examine media organizations and their participants in their role in shaping popular culture. Finally, students will study the various ways that Latino communities exercise cultural citizenship as a form of resistance and in their struggle for just representation in an increasingly global society. This is an upper-level undergraduate/graduate inter-disciplinary seminar that draws on readings in cultural economy, political economy, cultural studies, history and sociology. Students who choose to take the class for JYEL credit are required to do a minimum of 25 hours of service. SPN 106 or equivalent, including placement test or permission of instructor, is recommended.

SPN 394
LATINO CULTURAL LITERACY AND COMMUNITY ENGAGEMENT
Undergraduate
This course explores local Chicago histories and institutions and their engagement in politics and advocacy for Latinos. This is a Junior Year Experiential Learning (JYER) course, and as such requires 25 hours of service.

SPN 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Spanish. Students must have the equivalent of 106 or higher ability in Spanish to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

SPN 397
SPECIAL TOPICS IN SPANISH
Undergraduate
See schedule for current offerings.

SPN 398
STUDY ABROAD
Undergraduate
Variable credit.

SPN 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

SPN 401
SPANISH LITERATURE I: MIDDLE AGES THROUGH THE GOLDEN AGE
Graduate
This course introduces students to the literature of medieval and Golden Age Spain, and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the literary genres written in Castilian from 1100 CE to 1700 CE, tracing the development of various styles and their contribution to a national literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts. (Literature category #1: Spanish literature before 1700).
SPN 402
SPANISH LITERATURE II: THE ENLIGHTENMENT TO THE PRESENT
Graduate
This course is a critical survey of Spanish peninsular literature from 1700 to the present and provides an overview of the historical, intellectual, artistic, and socio-political factors that have shaped Spanish life from the Enlightenment to our times as viewed through selected literary texts. (Literature category #2: Spanish literature before 1700).

SPN 403
LATIN AMERICAN LITERATURE & CULTURE I
Graduate
This course is a critical survey of Spanish American literature from its origins to modernism. It is an overview of the physical, intellectual, artistic, and socio-political currents of Spanish American literature that have helped to shape its thought and culture. Classroom sessions will include lectures and discussions of the assigned readings and related topics. Students in the course will read a number of representative works written by a diverse variety of the period's principal writers. The readings will provide a wide sample of different types of writing; genres included are poetry, prose fiction, theater, and the essay. (Literature category #3: Latin American literature from origins through Romanticism).

SPN 404
LATIN AMERICAN LITERATURE AND CULTURE II
Graduate
This course is a critical survey of Spanish American literature from 1880 to the present. It is an overview of the physical, intellectual, artistic, and socio-political currents of Spanish American literature that have helped to shape its thought and culture. Classroom sessions will include lectures and discussions of the assigned readings and related topics. Students in the course will read a number of representative works written by a diverse variety of the period's principal writers. The readings will provide a wide sample of different types of writing; genres included are poetry, prose fiction, theater, and the essay.

SPN 405
LATIN AMERICAN NOVEL
Graduate
This course is a survey of contemporary Latin American novels and will include works by a variety of Latin American authors. Throughout the course students will explore the development of the novel in Latin America; the revision and reinterpretation of history, gender, and the concept and construction of the novel; and characters from the perspective of twentieth and twenty first century authors.

SPN 406
HISPANIC LITERATURE OF THE CARIBBEAN
Graduate
This course covers Hispanic literature of the Caribbean from a variety of perspectives and may have different topics each quarter. Variable topics may include: Cuban, Puerto Rican, Dominican or Afro-Caribbean Literature.

SPN 407
PENINSULAR CIVILIZATION
Graduate
This course is an integrated survey of civilization and culture of the Iberian Peninsula from prehistoric times to the present. The survey course concentrates on Spanish arts and intellectual achievements.

SPN 408
MEDIEVAL SPANISH LITERATURE
Graduate
This course introduces students to the literature of medieval Spain, and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the poetry, prose, and drama written in Castilian from 1100 to 1500, tracing the gradual unification of a national language and literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts.

SPN 409
SPANISH BALLAD
Graduate
This course will explore social diversity and the Spanish visions of Identity and Peninsular culture through the Spanish Ballad.
SPN 410
GOLDEN AGE POETRY
Graduate
This course introduces students to the poetry of Golden Age Spain (1500-1700), and to the basic philological and interpretative skills necessary to understand this literature. Students will read and analyze representative examples of the poetry written in Castilian from 1500 to 1700, tracing the development of major styles and their contribution to a national literary culture. The course gives special attention to recognizing and evaluating the cultural forces (such as aesthetic movements or linguistic norms), social structures (such as race, class, or gender), and economic or political circumstances engaged in particular texts.

SPN 411
CERVANTES
Graduate
This advanced course focuses on Miguel de Cervantes's Don Quijote. This course will consider how this “first modern novel” responds critically to developments in Renaissance literature, religious and political thinking, and theories of fictional and non-fictional representation. In addition to the Quijote, students will also read short selections of background material and criticism in order to situate this work in its historical context and to understand why it is considered to be among the most influential works of world literature.

SPN 412
THE SPANISH NOVEL
Graduate
This advanced course is a survey of modern and contemporary Spanish novels and will include works by a variety of authors. Throughout the course students will explore the development of the novel in Spain; the revision and reinterpretation of history, gender, and the concept and construction of the novel and characters from the perspective of modern and contemporary authors. Group work, class discussions and individual projects will help the student to gain a comprehensive view of the significant currents of the Spanish peninsular novel. This course will stress and encourage the examination of the roles of women, class, culture, and religion.

SPN 413
THE GENERATION OF 1898
Graduate
This advanced course will focus on the key group of Spanish writers known as the Generation of 1898. These writers felt that Spain at the end of the 19th century did not measure up to European standards of modernity and progress, and that its cultural and social life was at an inferior level when compared to the leading European countries. Spain was diagnosed as having a national malaise known as “abulia”; it was a kind of national sluggishness that prevented the country from profiting from and adjusting to the rapidly changing currents of modern world civilization. The task facing the Generation of 1898 was to bring Spain up to the level of the times. Students in the course will read a number of representative works written by some of the Generation's principal members.

SPN 414
CONTEMPORARY HISPANIC LITERATURE
Graduate
This course is a panoramic study of the principal works and authors of Puerto Rican Literature from the Spanish colonial period to the present. The literary production of representative authors is studied and analyzed. Students will take a thematic approach to the textual analysis of works by selected poets, musical artists, dramatists, essayists and fiction writers and examine the rise of national society in Puerto Rico and the literary forms in which it finds articulated expression. Furthermore, the course will evidence the evolution of nationality and the national through the various historical contexts including Spanish colonialism, United States occupation, and mass migration.

SPN 415
MEXICAN LITERATURE
Graduate
This course is an overview of Mexican literature from the colonial period to the present. Through the writings, films, arts, and music, the course explores the intellectual, political, social, and historical events that have shaped the life and experience of Mexican people. Particular emphasis will be placed on the Mexican Revolution and the post Revolution, as well as U.S. presence in Mexico and Mexicans in the United States.
SPN 416
THE HISPANIC ESSAY
Graduate
This advanced course will explore the history of ideas, cultural diversity and Latin American visions of identity through the Latin American essays. In this class students will decode and analyzed problems of theory, criticism and study of this genre. Through the works of a selection of authors, such as Eduardo Galeano, Octavio Paz, Jose Marti, Manuel Gonzalez Prada and others, this class will study how political, social, economical, rhetorical and gender issues have affected this genre. Students will examine issues such as the construction of power, the treatment of sex, gender and cultural difference in literature; how the Latin American experience is reflected in these readings; and how they contribute to Hispanic literature as a whole.

SPN 417
THE HISPANIC SHORT STORY
Graduate
This course explores the Hispanic short story from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latino short story.

SPN 418
THE HISPANIC THEATER
Graduate
This course explores Hispanic theater from a variety of perspectives and may have different topics each quarter. Through the discussion and analysis of theatrical texts, students will improve their knowledge of Hispanic culture, socio-political vision, and tools of literary expression. Variable topics may include: Peninsular, Latin American or Latino theater.

SPN 419
CONTEMPORARY POETRY
Graduate
This advanced course in modern Latin American and Spanish literature focuses on the following issues: poetical representations of identity; poetical representations of gender and the cultural readings of "machismo"; the role of poetry and other forms of artistic expression in shaping societies; theory and critical analysis of poems as a way to understand culture, the politics of marginality and forms of political mobilization among other issues.

SPN 420
COMMERCIAL SPANISH II
Graduate
Advanced Commercial Spanish is designed to provide the business-oriented student with sufficient Spanish language skills to be able to function credibly in a business environment where a knowledge of Spanish is necessary. Students will be exposed to a wide variety of commercial terminology and will have ample oral and written practice related to the business world.

SPN 421
U.S. LATINO/A WRITERS
Graduate
This advanced course is a critical survey of Latino literature. This course will provide the student with an overview (cultural, social, and political) of the contributions of Latinos to the development of society in the United States. The course will call attention to topics that are and have been important to Latino culture and identity. Particular emphasis will be given to topics such as: oppression, isolation, cultural identity (within the U.S.), education and anti-immigrant issues. The objective of this course is to provide the student with a better understanding of the Latino communities in the United States, as seen by themselves. Through the works read in class, films and music the student will also acquire a better understanding of the social and political situation of Latinos in the United States.

SPN 422
HISPANIC WOMEN WRITERS
Graduate
This advanced course explores Hispanic women writers from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latina writers of the United States.
SPN 423
REVOLUTION IN LATIN AMERICAN LITERATURE
Graduate
This advanced course explores Revolution in Latin American literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: The Mexican Revolution, the Cuban Revolution, Revolutions in Central America, or a Survey of Revolutionary Movements.

SPN 424
THE BIRTH OF THE NOVEL IN SPAIN
Graduate
"The Birth of the Novel in Spain" is an advanced course in Spanish literature (category #1: Spanish literature before 1700). Students will read and discuss examples of the major sixteenth-century narrative genres (chivalric romance, prose drama, picaresque, pastoral, la novela morisca, and historiography) that paved the way for Cervantes's synthesis. Texts include, Amadis de Gaula (selections), La Celestina, El Abencerraje, La vida de Lazarillo de Tormes, and two of Cervantes's novelas ejemplares. Topics to be treated include questions of social class and caste, gender roles, notions of love and honor, the rise of the modern nation-state, imperialism, mysticism, verisimilitude, literal and figurative language, and the problems associated with interpreting texts that are culturally distant from modern readers. Class will consist primarily of discussion of the assigned readings.

SPN 425
TRANSLATION AND INTERPRETATION
Graduate
This course will focus on the translation of journalistic, legal, literary, pedagogical and commercial texts. The course will also improve the student's knowledge of translation and interpretation theory and provide, through a variety of translation assignments, the opportunity to review their writing skills and knowledge of the culture in order to be able to work within different registers and learn appropriate vocabulary. Guest lectures may provide the students with first-hand experience in the field and the opportunity to explore possible future use of their experience in translation.

SPN 426
SPANISH STYLISTICS
Graduate
This advanced expression class has a clear emphasis on writing numerous texts of different length and purpose. The focus will be on developing a more effective and sophisticated prose style. In-class time will be spent on writing activities which will give students practice in performing specific writing tasks following a variety of writing styles. In-class time will also be spent on oral and written exercises designed to reinforce the correct use of grammatical structures.

SPN 427
AREA STUDIES IN LATIN AMERICAN LITERATURE
Graduate
This course explores Area Studies in Latin American literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: Central American, Andean, or Southern Cone literature.

SPN 428
MODERN LATIN AMERICAN THEATRE
Graduate
This course explores Modern Latin American theatre from a variety of perspectives and may have different topics each quarter. Variable topics may include: a survey of representative dramas from the "revolutionary" period in modern Latin American theater, 1960s-1970s or other specialized topics.

SPN 429
LATINO GAY AND LESBIAN LITERATURE
Graduate
This course explores Latino gay and lesbian literature from a variety of perspectives and may have different topics each quarter. Variable topics may include: a survey of representative texts of Latino and Hispanic gay and lesbian authors or other specialized topics.
SPN 430
LATIN AMERICAN, LATINO AND SPANISH CINEMA
Graduate
This course explores Latin American, Latino and/or Peninsular cinema from a variety of perspectives and may have different topics each quarter. Variable topics may include: Peninsular, Latin American or Latino film directors and their works in Spain, Latin America or the United States. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative.

SPN 431
FILM AS A SUBVERSIVE ART
Graduate
This course explores contested images of resistance in Latin American, Latino and/or Peninsular films from a variety of perspectives and may have different topics each quarter. The course questions the construction of individual and collective identities in film, focusing on the intersections of cultural factors such as gender, race and ethnicity, social class, and language, among others. It also examines the ideological underpinnings involved in the shaping and conforming of those identities by cultural institutions and social systems. Variable topics may include: Decoding literature through Peninsular, Latin American or Latino films based on literary works by Peninsular, Latin American or Latino authors, or other specialized topics. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative.

SPN 432
NINETEENTH-CENTURY SPANISH NOVEL
Graduate
This advanced course is based on the reading, discussion and critique of major representative works in nineteenth-century Peninsular novel. The course will focus on the conflicting interest of nineteenth-century society paying special attention to the theme of marriage and relationship between sexes. This course will stress and encourage the examination of the roles of women, class, culture, and religion.

SPN 433
GOLDEN AGE THEATER
Graduate
This advanced course will introduce students to the Spanish theater of the seventeenth century, with a focus on the comedia, a new popular art form that appealed to audiences across social classes. Students will endeavor to read these literary works in their cultural contexts and consider their current relevance. Students may also view film adaptations of some of the plays. Topics include questions of class and caste, gender roles, various notions of honor, the early modern monarchy, the idea of free will within the context of the Counter Reformation, and the theatrical elements of everyday life. Class will consist primarily of discussion of the assigned readings.

SPN 435
U.S. LATINA WRITERS
Graduate
This course is a survey of literature by modern Latina women writers from the United States, focusing on the social, cultural and political development of Latinas and their affirmation and reaffirmation of identity through their literature in today's society.

SPN 439
THE GENERATION OF 1927
Graduate
This advanced course examines the peninsular Spanish "Generation of 1927" in considerable depth with emphasis on the best known literary figure in the group, Federico Garcia Lorca.

SPN 440
SPANISH CREATIVE WRITING WORKSHOP
Graduate
This advanced course seeks to reinforce and further develop the student's expression in Spanish by exploring different techniques in writing poetry and fiction. After approaching some basic concepts involved in the creative writing process, and with the constant practice of writing, students will be able to create texts in the style of preference. They will also gain more confidence with linguistics abilities. This class will be conducted in a workshop format, consisting of in-class writing exercises, workshop-like peer-sharing of texts, and discussions about the creative process.
Spanish is the second most widely spoken language in the United States; it has been spoken in this country longer than English has. This course is an introduction to the varieties of Spanish spoken in the US. Students will examine the evolution of the phonological, grammatical, and lexical linguistic system of the Spanish of US Latino/a communities. Students will also explore how sociolinguistic concepts such as bilingualism, diglossia, code-switching, linguistic variation, linguistic change, standard vs. non-prestigious varieties, language attitudes, manifest in the US Spanish context. This course is intended to familiarize the students with issues about language use in social context. Students will discuss results of research on the relationship between language and society in US Spanish-speaking communities. They will become familiar with sociolinguistic concepts. Students also acquire experience in carrying out sociolinguistic research. SPN 242 strongly recommended.

This is an introductory course on the nature and structure of the sound system of the Spanish language. This course is offered to students who, having studied the language for at least two years, need a solid grounding of Spanish phonology and in the case of non-native speakers of Spanish a systematic practice of correct pronunciation patterns. It is also a requirement for Spanish majors. After a thorough study of the Spanish sound system, students will explore some related topics such as Spanish orthography, the history of the Spanish language, its place among Romance, Iberian, and American languages, and its rich dialectal variation. Lectures and discussions will be based on the required textbook and on additional materials (both written and audio). This class will be conducted in Spanish.

This course is an introduction to the scientific study of the structure of language, with a special emphasis on Spanish. It examines the structure of sentences (syntax), the formation of words (morphology), and the construction of meaning (semantics/pragmatics) in Spanish, and in contrast to English and other languages.

This course is an introduction to the study of the relationship between language and society through the Spanish varieties in the Spanish-speaking world. Students will examine and revise ideologies, attitudes and beliefs about the Spanish language to understand this relationship. To lead students to examine their own beliefs and attitudes about language, they will be equipped with methods of linguistic analyses and strategies to find the social in the linguistic and the linguistic in the social from a critical perspective.

This course is a journey through the history of the Spanish language from Latin to the present day.

This course explores Latin American, Latino and/or Peninsular cultures which grapple with various historical, socio-economic and political issues through film. Throughout the course, students will question the construction of individual and collective identities in film, focusing on the intersections of cultural factors such as gender, race and ethnicity, social class, and language, among others. Students will also focus on the ideological substructures involved in the shaping and conforming of those identities by cultural institutions and social systems. Students will also learn vocabulary and techniques for analyzing the formal aspects of film as well as film narrative.
SPN 472  
**LITERATURE OF THE DOMINICAN REPUBLIC**  
Graduate  
This advanced course will explore cultural diversity and the Dominican Republic political, gender and ethnic visions through poetry. Through poetic class experience students will decode culture and society in the Caribbean and U.S. Dominican Latino communities. Students will focus on the following issues: political representations of identity; representations of gender and the cultural readings of "machismo"; the role of art and other forms of cultural expression in shaping identity; cultural criticism of poems as a way to understand culture and the politics of marginality and forms of political mobilization.

SPN 473  
**AFRO-HISPANIC LITERATURE**  
Graduate  
This course in contemporary literature will seek to determine what distinguishes the Afro-Hispanic novel, short story, drama or poetry from other works in these genres written in Spanish from a variety of perspectives and may have different topics each quarter. Students will read original works in order to analyze how the use of language, imagery and narrative voice reflect the experience of people of African descent in the Spanish-speaking world as seen (or heard) in the text and context of these works. In addition, students will explore how race, class, politics and culture interact and find expression in Afro-Hispanic literature.

SPN 474  
**LITERATURE OF THE CONQUEST**  
Graduate  
This advanced course in Latin American literature explores the early encounters between Europe and the Americas. Students will analyze letters, reports, histories, and political tracts from European, Amerindian, and Mestizo sources. Students will also consider some visual documents, such as images from the Lienzo de Tlaxcala and early maps. Typical areas of focus include the initial contact (Columbus), Mexico (Cortes, Diaz del Castillo, the Florentine Codex), Peru (Xerez, "El Inca" Garcilaso, Guaman Poma de Ayala), and the sixteenth-century debates over the wars of conquest (Las Casas, Sepulveda). Topics include the role of these texts as instruments of empire, strategies of representation, strategies of resistance to imperialism, the role of women in the conquest, debates over what constitutes a "just" war, and the relevance of these texts for modern Latin American identities.

SPN 475  
**LATIN AMERICAN LITERATURE FROM INDEPENDENCE TO MODERNISM**  
Graduate  
This advanced course in Spanish literature will introduce students to the most important literary movements in Hispanic American countries, beginning with the wars of independence from Spain until the last part of 19th century. Special attention will be given to authors such as Jose Marti, Jorge Issacs, Andres Bello and Ruben Dario, among others.

SPN 476  
**SOR JUANA INES DE LA CRUZ**  
Graduate  
This advanced course in literature will explore the main works of the most influential Mexican poet of the Colonial period, Sor Juana Ines de la Cruz (1648-1695). One of the major themes in Sor Juana's work is the right of women to education. Sor Juana wrote poetry, plays, and essays in seventeenth-century Mexico, a society in which women's intellectual inquiry and access to knowledge was an unsafe endeavor and controlled by patriarchal hierarchies. Students will examine the relationship between politics, gender and writing in the context of the historical period, and analyze the spaces and borders occupied and visited by Sor Juana's lyric, ludic, astronomical, polemical, theatrical, theological, cosmological, culinary, colonial, and criollo writings.

SPN 477  
**PERUVIAN REALITIES IN A MULTICULTURAL SOCIETY: HISTORY, CULTURE, POLITICS, VIOLENCE & SOCIAL JUSTICE**  
Graduate  
This interdisciplinary course will introduce students to the history, culture, politics, and general life of the peoples of Peru. Through an exploration of a vast array of interdisciplinary readings, visual arts and films, students will gain a deep understanding of Peru's history from its extraordinarily pre-Columbian civilizations to its citizens? twenty-first century post civil war struggles to achieve dignity and justice in a multicultural, multilingual and multicthnic nation where Andean, Amazonian, African, Asian and European traditions meet. As a consequence of immense economic and social inequalities, Peru has a long history of violence. This resulted in an internal war that ended ten years ago. Particular attention will be given to contemporary developments in terms of the interaction between culture and politics. (Literature category #3: Latin American literature from origins through Romanticism/Literature category #4 (Latin American literature from Modernism to present).
SPN 478
FOUNDATIONAL FICTIONS
Graduate
New Course Description: This advanced course in Latin American literature explores the relationship of national consolidation and romantic novels. This course is based on the reading, discussion and critique of major representative "Foundational Fictions" in 19th century Latin American literature. Students will examine how the construction of gender and race in these novels portrays the quest to forge new national identity/ies. At the same time, students will analyze how the novels use their characters' romantic relationships to suggest their nation's political relationships, and thus contribute to the discourse on building the new society/ies that would replace Spain's colonial empire and serve as a prototype for the modern Latin American state. (Literature category #3: Latin American literature from origins through Romanticism).

SPN 491
THE SOCIOLINGUISTICS OF HERITAGE LANGUAGE LITERACY
Graduate
A heritage language learner has been described as "a student who is raised in a home where a non-English language is spoken, who speaks or merely understands the heritage language, and who is to some degree bilingual in English and the heritage language" (Valdes 2000:1). It is well-documented that for such students, literacy in the heritage language is often lost within just one or two generations. In this third course of DePaul's series on Latino Literacy, students will identify the prominent sociolinguistic issues that intersect with heritage language literacy. Through the reading of selected bibliography and guided reflections on both personal and service learning experiences, each student will arrive at a personalized assessment of the key topics affecting heritage language literacy. Possible topics include language socialization, language ideology and identities, and issues related to language contact with English such as code-switching and language shift/loss.

SPN 492
TRANSNATIONALISM AND SOCIAL JUSTICE
Graduate
This course explores the overarching theme of violence across different Latin American social realities. This course uses an interdisciplinary approach to explore the experience of revolution and repression in contemporary Latin America. Focusing on twentieth-century literature, films and culture, students will explore the making and unmaking of revolutionary political projects and human rights issues, the construction of distinct forms of cultural resistance and the different expressions of violence.

SPN 496
PRACTICUM IN SPANISH INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

SPN 497
SPECIAL TOPICS IN SPANISH
Graduate
See schedule for current offerings.

SPN 498
STUDY ABROAD
Graduate
Variable credit.

SPN 499
INDEPENDENT STUDY
Graduate
Variable credit.
STEM 230  
INTRODUCTION TO EARTH AND SPACE SCIENCE  
Undergraduate  
This course provides an overview of the dynamic geological nature of Earth, its place in the solar system and universe, and the fundamental Earth-sky-human relationship. The format of the course is lecture, discussion, laboratory activities, and student group presentations. The course content is aligned with the Illinois Earth and Space Science Content Area Standards for educators and thus also meets the needs of secondary education majors wishing to pass the Illinois state exam for certification in earth and space science. LSP 120 or HON 180 is recommended. Formerly SDV 230.

STEM 231  
INTRODUCTION TO EARTH AND SPACE SCIENCE (WITHOUT LAB)  
Undergraduate  
This course provides an overview of the dynamic geological nature of Earth, its place in the solar system and universe, and the fundamental Earth-sky-human relationship. Students will develop an understanding of 1) the processes that shape Earth's surface and interior over geologic time, 2) the formation, evolution, and physical properties of the sun and its planets, asteroids, and comets, 3) the physical basis for phenomena such as eclipses, phases, and seasons, 4) the formation, evolution, and properties of stars, galaxies, and the universe, 5) the historical progression of human understanding of Earth's geologic history and its place in space and time, and 6) the associated technologies that have enabled this progression. Students will encounter several historical examples that illustrate the provisional nature of science and the interaction of experiment, observation, and theory. The format of the course is lectures, discussions, laboratory activities, and student group presentations. Formerly SDV 231.

STEM 240  
SCIENCE AT THE EDGE OF SPACE  
Undergraduate  
Earth's atmosphere and near-space environment play an increasingly important role in our lives in areas such as global warming, ozone depletion, and telecommunications. The upper atmosphere is also a starting point for human exploration of space beyond Earth. In addition to learning about Earth's upper atmosphere and beyond, students will build simple scientific experiments and launch them on a weather balloon to an altitude of 100,000 feet. Formerly SDV 240.

STEM 310  
SCIENTIFIC MODELING  
Undergraduate  
Introduction to mathematical models used in scientific work: discrete dynamical systems, continuous models, stochastic models, Markov chains, and compartment models. Course is example-driven, with models being implemented on the computer. MAT 151 recommended. Formerly SDV 310.

MAT 150 or LSP 120 and 121 are a prerequisite for this class.

STEM 360  
SCIENTIFIC DATA ANALYSIS I  
Undergraduate  
Descriptive methods of data analysis, probability models, statistical inferential procedures including regression and analysis of variance, especially as it relates to scientific data arising from observations and experiments. Includes the use of one or more computer statistical analysis packages. MAT 150 recommended. Formerly SDV 360.

STEM 361  
SCIENTIFIC DATA ANALYSIS II  
Undergraduate  
Advanced statistical and data-mining methods with science-related case studies. Topics include multiple regression, logistic regression, decision trees, and naive Bayesian classification. STEM 360 recommended. Formerly SDV 361.

STEM 390  
SENIOR CAPSTONE I  
Undergraduate  
Students will examine a scientific issue with historical or public policy significance from multiple points of view, ethical, social, as well as scientific. The topic will necessarily be one in which the interpretation and visualization of data plays a significant role in framing debate. Students will work individually or in small groups to create projects featuring the interplay of quantitative and non-quantitative approaches. STEM 361 recommended. Formerly SDV 390.
Students work on a quarter-length project whose end product is either a detailed mathematical analysis or a visualization of several large scientific data sets. The project will integrate a few of the science topics done in SDV 390 with data analysis and visualization. Collaborations with researchers and organizations such as educational institutions and museums are especially encouraged. Formerly SDV 391.

Variable credit. Formerly SDV 399.

This course provides a broad survey of ecological principles through laboratory and field investigations appropriate in an urban setting. The course focus is on the use of local environments to promote awareness of and appreciation for the complexity, diversity and structure of the natural world while developing skills in hypothesis testing, experimental design and data analysis. Formerly SDV 405.

This course develops the mathematical methods that support the teaching of science at the middle school level: proportional reasoning, rates, exponents and scientific notation, graphing, and elementary modeling. The course incorporates the use of technology such as calculators and spreadsheets for scientific analysis.

Selected topics in science and science education. Formerly SDV 410.

This course explores the nature of scientific inquiry, using a historical case study of the development of classical physics in the work of Copernicus, Brahe, Kepler, Galileo, and Newton. It explores the roles of observation, classification, experiments, theory, and mathematical models in science as well as the character of scientific change. Formerly SDV 411.

Fundamental concepts of physics examined quantitatively: velocity, acceleration, surface area, volume, density. Elementary modeling for data analysis, including spreadsheets and data acquisition software. Scaling of physical quantities. Formerly SDV 412.

Fundamentals of wave motion with application to light, water, and sound. Teachers are introduced to a variety of physical science topics in the curriculum as well as an example of the extraordinary unifying power of physics concepts such as waves. Formerly SDV 413.

The structure and composition of matter. Physical and chemical change, examined from conceptual viewpoints which include atomic theory, stoichiometry, periodicity, bonding, equilibrium, thermodynamics and kinetics. Formerly SDV 420.
STEM 421
CELL BIOLOGY FOR TEACHERS
Graduate
This course focuses on the chemical and cellular nature of living organisms, cell structure and function, and heredity. Enzymes, the movement of materials across membranes, photosynthesis, respiration, cell division, and basic genetics. Formerly SDV 421.

STEM 422
EVOLUTION AND DIVERSITY FOR TEACHERS
Graduate
This course explores the subjects of biological evolution and species diversity. Topics covered include the history of our understandings of the origin and nature of species, mechanisms that produce evolutionary change, geographic variation and speciation, current theories and evidence of life's origin and the history of life on earth. Controversies in biological evolution, both scientific and cultural will be discussed. Formerly SDV 422.

STEM 423
PLANT AND ANIMAL BIOLOGY FOR TEACHERS
Graduate
This course focuses on the structure and function of living organisms. Students will investigate how different organisms solve common problems of food acquisition, digestion and the distribution of nutrients, waste removal, gas exchange, maintenance of homeostasis and reproduction. While this course examines the diversity of living forms, there is a special emphasis on the structure and function of the human body. Formerly SDV 423.

STEM 425
TOPICS IN LIFE SCIENCES FOR TEACHERS
Graduate
Diverse topics in Life Sciences appropriate for middle school and high school students.

STEM 430
ASTROBIOLOGY FOR TEACHERS
Graduate
Astrobiology focuses on basic questions such as: How does life of any kind begin and develop? Does life exist elsewhere in the universe? What are the environmental limits for life? What is the future of life on the earth and beyond? The course reviews the origin and evolution of life on Earth and goes on to examine the prospects of habitats capable of supporting life in our solar system, and the potential for planets and life to exist orbiting other stars. Students will work with NASA remote sensing data of the earth, the other planets, and their moons. Formerly SDV 430.

STEM 431
ASTRONOMY FOR TEACHERS
Graduate
This course emphasizes astronomy particularly relevant to the middle school science curriculum. The structure of the solar system, motion of the sun, phases of the moon, familiarity with the night sky, stellar structure and evolution, galaxies, and introduction to cosmology. Students will be familiarized with student reading materials particularly appropriate for the combined teaching of science and reading. Students will make observations and use sky simulation software. Formerly SDV 431.

STEM 432
GEOLOGY AND PLANETARY SCIENCE FOR TEACHERS
Graduate
Planetary formation and evolution. Plate tectonics and the rock cycle, including volcanism, planetary interiors, weathering, sedimentation, and metamorphism. Formerly SDV 432.

STEM 440
HEAT AND ENERGY FOR TEACHERS
Graduate
Concept of energy, its nature, forms, and transfer with applications to physical science and earth science. Definition of energy in terms of work, potential and kinetic energy, conservation of energy, thermal energy, solar energy, energy in earth systems. Formerly SDV 440.
STEM 441
WEATHER AND CLIMATE FOR TEACHERS
Graduate
Basic physical and chemical processes that shape weather and climate. Solar radiation and the seasons, composition and structure of the atmosphere, atmospheric processes, human effects, historical and contemporary climate change. This course emphasizes quantitative methods. Formerly SDV 441.

STEM 442
ENVIRONMENTAL SCIENCE FOR TEACHERS
Graduate
A general introduction to the scientific background of some of the most important environmental problems facing urban areas, the nation and the world. Population dynamics, water and energy resources, ecosystem degradation, extinction and the loss of biodiversity, and climate change. The course will include a field observation and experiment.

STEM 490
SCIENCE TEACHING CAPSTONE
Graduate
Teachers will further examine current research on how students at the middle school level learn science concepts and conduct an action research project involving science teaching. STEM 405, STEM 412, STEM 413 and six content courses recommended. Formerly SDV 490.

STEM 698
TOPICS FOR MATHEMATICS AND SCIENCE TEACHERS
Graduate
Diverse topics in teaching and learning of mathematics and science. These courses are designed for current and future teachers.

STEM 699
INDEPENDENT STUDY
Graduate
Variable credit. Formerly SDV 699.

SUD 401
SUSTAINABLE URBAN DEVELOPMENT I: PLANNING, POLICY & COMMUNITY DEVELOPMENT
Graduate
This course addresses the concepts, practices, and tools for sustainable planning and provides an understanding for how to apply these to urban communities. The course is an intensive, topics-based overview of sustainable land use, housing, transportation, infrastructure, and community and economic development practices. The course is largely directed at contemporary policy issues and technical processes within the United States.

SUD 402
SUSTAINABLE URBAN DEVELOPMENT II: GREEN INFRASTRUCTURE & THE ENVIRONMENT
Graduate
This class focuses on the environmental aspects of city planning, including: resource management, environmental policy, transportation, LEED ratings and measures of environmental impact, integration of ecosystems within a land use planning framework, and community-based solutions to historical environmental injustice.

SUD 403
BROWNFIELDS REDEVELOPMENT: PRACTICE AND IMPLEMENTATION
Graduate
Students form a grounded understanding of the Brownfield lifecycle: how and why they were created and the general processes governing their redevelopment. The class will review the current regulatory, economic, environmental, community, public health, and development conditions of brownfields, through site visits and, when possible, discussions with stakeholders from public agencies, community organizations, and the private sector. Through a practice component, class members work in teams to apply their general brownfields knowledge to particular challenges in the field and gain hands-on experience in applied environmental and economic development research and analysis, community brownfield practices, and sustainability planning.
SUD 404  
**URBAN DESIGN LABORATORY**  
Graduate  
This course teaches digital methods of creating visual information. Software used may include: Adobe Creative Suite, Google SketchUp, and advanced techniques for Microsoft PowerPoint, which can be applied by students in the SUD 501 and 502 courses.

SUD 490  
**SPECIAL TOPICS**  
Graduate  
A course related to sustainable urban development.

SUD 499  
**INDEPENDENT STUDY**  
Graduate  
Intensive study of a topic of special interest; requires that the student and instructor work together independently on a specific topic or project. Instructor consent required.

SUD 501  
**PROFESSIONAL INTERNSHIP**  
Graduate  
A 100-hr internship with one of the following: a local government, non-profit organization, or private corporation. Students are encouraged to work onsite, integrating their learning into a Chicago-area organization. Students unable to identify an internship will be assisted by the Steans Center for Community-based Service Learning, the Chaddick Institute, and other DePaul resources.

SUD 502  
**CAPSTONE - PROFESSIONAL PORTFOLIO**  
Graduate  
A discussion seminar that puts the skills learned on site into the wider academic context of the course. Students will draw from their internship to complete a project report as the culmination of this course.

SUD 600  
**CANDIDACY CONTINUATION**  
Graduate  
Students who must take extra time to complete the requirements for the Master's portfolio must enroll in candidacy continuation each quarter of the academic year until this Master's requirement has been completed. Students may register for this course by permission of the graduate director and no more than three times. Non-credit.

SUD 601  
**CANDIDACY MAINTENANCE**  
Graduate  
Masters candidates who are not actively working on a portfolio during a given quarter but who want to maintain active university status can register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit.

SW 105  
**INTRODUCTION TO COMPUTER INFORMATION TECHNOLOGY**  
Undergraduate  
In this Bridge course, students will learn about personal computing by exploring Windows Vista operating systems, including an introduction to common personal computer productivity applications software using MS Office 2007. Students will learn the basic, intermediate, and advanced level of MS Word, Excel, Power Point, and Access. They will also explore home networks and wireless systems, developing basic technical skills in designing, managing, and securing home networks. May be taken for a maximum of 3 competences.
SW 106
MIND, BRAIN, CONSCIOUSNESS: THE MIND AND BIOTECH REVOLUTION
Undergraduate
What is so special about the mind? Why is brain-death the death of the human? What is consciousness and how do we define it? Does artificial intelligence actually exist or is this a construct of the technologists? In this Bridge course, we will examine questions about the mind-body division, right brain-left brain distinctions, the differences between robots and humans, and how the brain processes information and sensory data. We will use both biotechnology research and artistic experience to explore these questions. Can be taken for up to 3 competences.

SW 121
INTERNET APPLICATIONS FOR SMALL BUSINESSES
Undergraduate
This course examines the design and development of web applications for small business. The course focuses on Internet technology to support consumer-oriented e-commerce, enterprise e-business solutions, and emerging business-to-business trading models. The topics will cover e-business models, internet marketing, online transactions ethical and social issues and internet security. Students will study different models for e-commerce applications and build a web application for small business using HTML, VB Script and Active Server Page.

SW 126
S5 / EXPERIENTIAL LEARNING EVALUATION: INFORMATION TECHNOLOGY
Undergraduate
S5 Information Technology. Can use contemporary information technology effectively.

SW 141
MARINE ECOLOGY
Undergraduate
This course focuses on the biology and ecology of marine ecosystems and oceanography. The biological, chemical, physical and geographical factors of marine ecosystems are explored, including the inter-tidal zones, sandy and rocky shores, the ocean floor, seagrass, mangroves, coral reefs, open ocean, and the abyss. A survey of the biodiversity of marine organisms includes algae, plankton, invertebrates, reptiles, birds, fishes and mammals. Behavioral characteristics of unique species are discussed. The impact of humans on the marine environment, conservation, and management are highlighted. A theme of sustainability runs throughout. Discussion and activities will be emphasized.

SW 142
EVOLUTION: THEN & NOW
Undergraduate
This course is a survey of the biological theory of evolution and the study of evolutionary processes. Major topics include a history of evolutionary studies, fossil evidence, embryology, comparative anatomy, skull structure, molecular evaluation, mathematical theory, the basic mechanisms for evolution, basic genetics, the origin and history of life, and primate evolution. Special topics include the origins and maintenance of biodiversity, an examination of the role of humans in the extinction of other species, and the effects of climate change on evolution. A theme of sustainability runs throughout. Discussion and activities will be emphasized.

SW 152
STRESS REDUCTION USING HUMOR AND SPIRITUALITY
Undergraduate
Stress affects the body in dramatic ways, and is a major contributing factor in chronic and degenerative diseases. We will understand/describe the physiology and biochemistry of stress and, more importantly, apply effective methods to reduce and manage it. Effective stress reduction and burnout prevention then become important health, wellness, productivity and disease prevention strategies for individuals, schools, businesses, the medical industry and the culture. The effective stress reduction techniques include breathing, biofeedback, humor, spiritual exploration, connection and inspiration. The holistic paradigm of body, mind and spirit supports our informed search for meaning, connection, calm productivity and enhanced health.

SW 153
SCIENCE FOR CITIZENS
Undergraduate
Students will learn basic knowledge of science as they engage in activities that are connected to their everyday life. They will explore their natural ecosystem and be able to describe various functions. They will engage in the scientific method through observations, hypotheses, data collection and basic data analysis. Students will apply their critical thinking based on the scientific method to local environmental or science related issues/events.
SW 160
CLIMATE AND CLIMATE CHANGE
Undergraduate
Climate impacts every moment of our lives. We are, in fact, dependent for survival upon climatic conditions remaining within certain rather narrow ranges of the possible variation. However, for the past ten millennia climate has been comfortable enough to permit the rise (and fall) of many civilizations. Climate stability over the last 4,500 years has permitted us to invent cities and engage in agriculture and hydraulic engineering, science, and many other activities which we recognize as civilized and like to think of as advances. However, in an extremely short period of time, only two centuries, we have reached a stage of interaction with the climate which jeopardizes the very regularities in climate on which we depend. In order to understand what our options are we must learn to understand the climate system within large interacting frameworks of geography, geology, chemistry, physics, and ecology over long spans of time. This level of complexity urgently calls on us humans for an exploration of a robust Earth-oriented ethic. In this course we will build from simple observations to more complex understandings and the exploration of possible futures with scenario thinking. We will engage in discussion around lectures illustrated with power point, texts, and current developments reported in scientific journals, contemporary press, and on the web.

SW 175
CAREGIVING AND WELLNESS
Undergraduate
Who takes care of the family caregiver? All of us at one time or another inevitably face the challenge of either being a caregiver for a child, sibling, partner or parent, supporting another family member in this role, or caring for ourselves. This human experience can be overwhelming and affects the caregiver’s mental, emotional, spiritual and physical well-being. It is well-documented that this role can take an emotional toll. Although caregiving can be very rewarding, it can also be a difficult experience plagued with stress, fear, anxiety, depression and isolation. These factors add strain to all members of the family and can either threaten our health or compound an existing health condition. Students review the implications of being a caregiver, develop a plan, learn to recognize health-threatening symptoms, identify support systems and prepare to be proactive in finding solutions to remain healthy while they face any life challenge. This course also teaches students how to overcome obstacles and practice relaxation techniques. The final paper may consist of writing a personal health plan to maintain optimal health or a plan for how to remain a healthy family caregiver.

SW 193
THE SCIENCE OF SEXUAL ORIENTATION
Undergraduate
This course will engage you in scientific inquiry on the nature of sexual orientation. You will be challenged to master the scientific content of leading programs of research on twins, brain and other anatomical structures, hormones, genetic linkages, birth-order, and animal behavior through assigned readings, lectures, and multimedia resources. Moreover, you will also engage in the scientific process through a collaborative research project concerning an aspect of sexual orientation that leads you through the steps of stating a question, designing a study, collecting and analyzing data, and interpreting the results. You will also develop skills in identifying the limits to particular forms of scientific inquiry by recognizing the constraints of methods, sources of bias, reliability of results, and certainty of conclusions. This course will encourage you to place the modern research within ethical and social contexts in which to make judgments about the potential relevance and impacts of scientific knowledge about sexual orientation.

SW 195
ELEMENTS OF ALGEBRA
Undergraduate
This course provides an introduction to the use of algebra. Students will begin by exploring arithmetic and plane geometry skills including fractions, decimals, percentages, and metrics. When ready for algebra, the class will learn to manipulate equations. The emphasis will be placed on building confidence in solving everyday problems through algebra. Although the course will move to complex and simultaneous equations, the focus will remain on algebra basics and their applications. You may register for up to 2 competencies.

SW 201
WEB PAGE DESIGN
Undergraduate
With so many people jumping on the web publishing bandwagon, you can easily feel like you've been left in the dust. Today, people are cranking out publications with worldwide distribution and impact as a result of web publication software. This course is designed for webpage content creators and aims to give you the skills needed to build basic pages on the internet.

SW 202
WEB PAGE DEVELOPMENT AND DESIGN
Undergraduate
This course describes the tools and techniques needed to design a web site for personal and professional use. We will cover the fundamentals of web site design practices, HTML, forms, image creation and editing, and Javascript through lecture, discussion, lab and homework. Students will complete a series of exercises that lead toward building a functional web site using these tools and techniques. Successful completion of Exploring the Internet is required to register.
SW 203
STATISTICS FOR USE
Undergraduate
This course is designed for students who, for their careers or further academic studies, need to cover quantitative and numerical skills. Topics will include the center and risk associated with financial data, identifying trends and making predictions for economic and scientific data, measuring the likelihood of an occurrence in a game of chance, or even estimating a political candidate's chances based on polls. Examples will be used to introduce and reinforce theory. The student will build confidence and learn to solve practical problems by using statistics. Some facility with algebra is required.

SW 204
URBAN GROWTH AROUND THE GLOBE
Undergraduate
This course will analyze the interrelationships among population, the environment, and economics. Past, current, and potential future policies relative to these issues will be evaluated.

SW 205
PRACTICAL ALGEBRA
Undergraduate
This course covers algebraic concepts and computational skills ranging from basic variable representation to solving equations and deriving/using advanced mathematical formulas to solve financial problems. The basic skills needed for comprehension will be reviewed as each new concept is introduced. Calculators will be used throughout the course. A scientific calculator with the "log" function is the most useful.

SW 206
NUTRITION AND BIOLOGICAL DEVELOPMENT
Undergraduate
Today's consumers want and need to be educated about taking charge of their own health. With the current fast-paced world that has spilled over into our eating habits, food choices have become unlimited. Choosing a healthful approach to diet requires basic information about our body's nutritional needs. The greater our understanding of our basic bodily needs, the better we are able to make choices concerning our health. This course will offer an overview of the basic science of nutrition, with an emphasis on the relationship between disease and nutrition, and current research findings.

SW 207
PUBLIC HEALTH ISSUES IN AFRICA
Undergraduate
Public health issues have an impact on any ministry in which a student might serve. This course will build students' capacities to understand the scientific information that explains public health issues such as HIV/AIDS, malaria and other infectious diseases. They will learn about health care practices and strategies that can be used to address public health issues, especially in their ministries. They will examine cultural and gender dimensions of public health issues. Through this course, therefore, students will develop and demonstrate their competence to describe, categorize, and analyze the interactions and exchanges between living organisms and their physical environments and to assess health care practices based on an understanding of the biological and social factors that contribute to definitions of health.

SW 208
ISSUES IN SCIENCE AND RELIGION
Undergraduate
This course develops students' understandings of the scientific and religious constructions of self in the modern world (natural and social). The institutions and bodies of knowledge comprising science, religion, and their overlap are critically analyzed. Key historic debates are examined, for example: the Vatican's trial of Galileo for his teachings of a heliocentric universe; the controversial reception of Darwin's theory of evolution; and the 2001 U.S. policy on embryonic stem cell research. Through such analyses, the course develops students' skills in making ethically-informed decisions and thus recognizing their roles in the public debates involving the intersection of science and religion.
SW 209
BIODIVERSITY
Undergraduate

The study of biological diversity, which is the measurement of the amount of genetic, species and ecological variation on earth, is emerging as one of science's and society's most important and urgent endeavors. Scientific efforts to study biodiversity have intensified because of our growing appreciation of the pivotal roles human population growth and urbanization play in accelerating the extinction of plant and animal species through the destruction of critical habitats. In this course, we will examine the central questions: How is the security of humanity dependent on the perpetuation of biological diversity? Do we have an obligation to future generations to keep life on the planet as diverse as possible? Since life on earth has been evolving and diversifying for at least 3.8 billion years and most of the diversity that once existed (as much as 99%) has been lost to extinction processes, we will focus on the character and causes of earth's past biodiversity crises in order to critically assess the severity of the current "biodiversity crisis." Students will be introduced to major biodiversity issues through discussions, readings, lectures, labs, field trips, and original inquiry. Subjects will include: the ways different cultures view the biosphere, biodiversity measurements and monitoring, biodiversity trends in earth's geologic past, the value of and human dependence on biodiversity, global and regional biodiversity currently at risk, policies to protect biodiversity ("the regulation of extinction"), the role of science and technology in preserving biodiversity, restoration ecology and ecological economics. Students will develop a detailed research paper, adhering to a scientific reasoning format, on a biodiversity issue of their choice.

SW 210
ENVIRONMENTAL ISSUES OF THE 21ST CENTURY
Undergraduate

Have you ever wanted to enhance your environmental awareness locally, nationally, and internationally? Do you ponder your impact on the earth's natural resources? Students will explore environmental quality, sustainability, natural resources, water, soil, and air quality, global warming, and human interactions with the environment. A series of discussions, activities, guest speakers, debates, oral presentations, and computer modeling exercises will offer concept comprehension as well as insight in improving environmental quality. At the end of the course students will reflect on ways to improve environmental quality individually and as a community.

SW 211
USING INFORMATION TECHNOLOGY EFFECTIVELY
Undergraduate

Dealing with change has become essential for all of us, in our private lives and in our organizations and businesses. For some people, change is a stimulating adventure. For others, it is painfully anxiety-provoking. Yet the reality of today's business world is that no one can avoid change. The implementation of information technology in the workplace results in complex changes and poses challenges for supervisors and employees. In this course, we will examine issues regarding the individual and social aspects of implementing information technology in work and community. We will explore questions of access to and control of information technology, and concerns for individual privacy. The students will be exposed to a variety of conceptual frameworks and perspective that they may use for interpreting problems and managing change related to integrating computer technology into social systems of work. We will explore each framework or perspective by applying it to case studies. We will reflect on the effectiveness and shortcomings of each interpretive perspective.

SW 212
URBAN ENVIRONMENTAL SCIENCE
Undergraduate

The study of environmental science uncovers the relationship between the built environment and the natural processes of the earth. This includes human interactions and the impact on habitats, plants, animals and those non-living entities that we rely on such as water, air and soil. An examination of the dynamics of human population growth and migration, food production and climate issues, chemical toxicology and health, waste and sustainability, energy production and consumption will illustrate how these issues are connected by increasing global urbanization. This course will provide the framework to guide your decisions as a consumer and a citizen in both a global and local environment. Role-playing and discussions on everything from the choices of fabrics for clothes, transportation, animal rights to the amount of water used while brushing your teeth will show the connections of your behavior to global consequences. Through reading, research, writing, class discussion, individual and group projects, students will learn the key to a sustainable future.

SW 213
MEASURING GLOBAL CLIMATE CHANGE
Undergraduate

In this course we will view global climate change from several angles and through various lenses. What happened to climate during the last 800 million years? What happened since the beginning of the industrial revolution? We'll evaluate predictions and prescriptions for the future. We'll consider politics, economics, and human beliefs and behaviors as they relate to the current global warming trend. Topics for study can range from one person's daily decisions about tooth-brushing or commuting, up to larger issues such as "Why did nearly 200 countries, but not the U.S., ratify the Kyoto Protocol?" or "What happens to Europe, and the rest of us, if the Atlantic Ocean Gulf Stream stalls out?" Doing a major paper or project for each chosen competence will allow you to focus on whatever aspects of global climate change you find most compelling. The overall goal is to become more informed, and to act more responsibly, about Earth, its living organisms and climates, and our influences on them.
SW 214
OUTCOME ORIENTED COMMUNICATION
Undergraduate
Businesses are run by people who work in a constantly changing communication and organizational environment. Modern communication involves many types of communication media such as written reports, telephone, email, websites, text messaging, online conferencing and face-to-face meetings. All of these communication media are not equal when addressing business problems and using the wrong communication media for specific types of problems can actually create problems that were not there in the first place. The "Outcome Oriented Communication" method covered in this class presents communication as a proactive tool for avoiding problems instead of as a remediation tool for correcting problems that might have been avoided with proper communication. It was developed by the instructor in conjunction with his consulting, academic and professional work. Students will be encouraged to use their "life as a laboratory" during the duration of this course as a way of testing the concepts against their own reality, finishing the course with a much better understanding of how to adapt their personal communication style to different personal and business problem solving situations.

SW 215
STRESS MANAGEMENT FOR HEALTH AND WELLNESS
Undergraduate
This course will explore the effect of stress upon the physiology of the body and offer a variety of alternative methods to alleviate these symptoms. Students will gain an understanding of the body's stress response mechanisms and how this response when not checked can lead to consequences that diminish the quality of life. Students will learn techniques for activating the body's relaxation response mechanisms. We will explore the theoretical and practical application of relaxation techniques such as controlled breathing, meditation, self-massage, biofeedback, Yoga, Tai Chi and other alternative health practices. The importance of nutrition as a means of combating stress will also be covered. Through experiencing the physiological response of the body to stress reduction techniques, students will gain the ability to assess and manage their own stress. Other skills students will be able to acquire include: recognizing stress symptoms in self and others, how to choose a stress reduction method, understanding the relationship between stress and wellness, and devising stress reduction regimes for others. Journaling, a short paper, selected readings and demonstration of advanced Yoga and Tai Chi techniques by a guest speaker will enhance the learning experience.

SW 216
THE SCIENCE AND COMMERCE OF COFFEE AND TEA
Undergraduate
The class will use a variety of readings, discussions, and activities to explore the science and economics of popular hot beverages. This class will focus on the science behind growing and brewing coffees and teas (and tisanes) and the effect of these beverages on the human body. Coffees, in particular, teas and tisane elements less so, are grown in highly specific ecosystems. The class will learn about and compare these ecosystems, earth-friendlier alternative ecosystems for these commodities and common forest ecosystems that are found in Northern Illinois. The class will also look at the historic and current state of coffee and tea commerce. The class will include field trips to locations such as: local orchards, area coffee houses, area organic food stores, teahouses, etc. Some of these trips will be during regularly scheduled class time and others may be assigned as independent student work outside of class. WARNING: Basic taste testing during the class will focus on coffee and tea without additions. While students will have many opportunities to review popular, flavored coffee and tea drinks, in-class taste tests will focus on unadulterated coffee and tea comparisons. Students must be willing to sample espressos and coffees black.

SW 217
UNDERSTANDING AND MEASURING INTELLIGENCE
Undergraduate
In this course, students examine intelligence testing and its uses in employee selection and placement. Students learn the principles of assessing human traits (reliability, validity, bias and other systematic errors), and apply them to intelligence testing. We will work to define "intelligence" and consider various approaches to intelligence, contrasting the theories of unitary vs. multiple intelligences. Students will examine the implications of the definitions and measurement approaches on different groups of people, both historically and currently, with attention to the unintended effects of the biases of test developers and the ethical implications of different approaches and uses of intelligence testing.

SW 218
WHAT IT MEANS TO BE HUMAN
Undergraduate
Self-awareness distinguishes humans from other species of animals and allows us to raise questions about ourselves. This course will examine the works of Freud, Jung, Adler, Skinner, Maslow, and others. Emphasis will be placed on the evolution of questions as well as answers in personality theories. Through readings, lectures, videos, discussions, and written assignments, students will examine the application of the scientific process to themselves and others.
**SW 219**
THE AGING (OR REENGAGING) BRAIN?
Undergraduate

In this course, we will examine the latest research on the aging process and, specifically, its relationship to the brain. We will cover a mix of material from psychological and, especially, neuroscientific fields. Students will also be introduced to the field of neuroplasticity, which is revolutionizing the way we understand the functioning power of the brain. Neuroplasticity, in simple terms, is the brain's ability to rearrange its connections and, therefore, its functions based on experiences. In other words, the brain has the capacity to literally change itself, based on experiences, to achieve positive results. The goals of this course are to understand how the brain works, examine its impact on our daily actions, study how aging impacts brain functioning, discover the learning and adjustment potential of the brain, and apply the principles of the 3 P's. We will use numerous examples to understand the brain, including health, work, relational, and personal settings. Students will ultimately answer the question of whether they will have an aging or reengaging brain.

**SW 220**
COSMIC HISTORY: FROM BIG BANG TO MANY UNIVERSES
Undergraduate

This course invites students to enter into some of the universe's most mysterious spaces, especially black holes, red shifts, and tenth dimensions. Scientific studies of the cosmos have reached a remarkable level of consensus, but mysteries continue to boggle astrophysicists' minds. Einstein's Theory of General Relativity, Hubble's "Big Bang," and subsequent theories regarding dark energy, dark matter, black holes, and other features of cosmic history are now supported by a growing body of evidence from studies of background radiation, "red shifts," and other astrophysical data. But puzzles remain that compel the boldest of thinkers to reconsider the physics of both the cosmic and the subatomic. This course invites students to engage in critical analyses of twentieth-century developments in the science of cosmic history, its creative process, and its movement toward connecting diverse aspects of the universe within a Grand Unified Theory.

**SW 221**
BUILDING AN ONLINE CATALOG OF CHICAGO ACTIVISM
Undergraduate

This class will chart, categorize, and record all the civic activism and social change organizations working in Chicago and post mini-profiles to a Wikipedia space that the general public will be able to search by type of issue and neighborhood. This publishing project will grow with each class's contributions and will allow viewers to post comments and add links and other resources. Students will be provided with information about the types of community change organizations working in Chicago and will then have a choice of assignments such as the following: research groups within a specific setting (e.g. recycling); research groups working in a specific community (e.g. Lawndale); research a hero/heroine of social change (e.g. Gail Cincotta); or research a specific incident in Chicago's social change history (e.g. The Haymarket Riot). Students will also work on the user interface and conduct user experience tests to see how casual viewers use the site. Viewers on the site will be able to browse the organizations by type of issue and neighborhood. This reference will be a significant resource for citizens who want to make a difference in Chicago.

**SW 222**
WEB SITE DESIGN
Undergraduate

Designing a web site, for personal or professional use, requires a number of skills. This course serves as an introduction to the tools and methods for creating effective web sites. Students will learn the fundamentals of HTML, forms, image creation and editing, and JavaScript through exercises which will lead to the creation of a functional web site by the end of the course. In addition to these practical skills, the course will also discuss the effective design practices for a successful web site. Successful completion of "Exploring the Internet" course, familiarity with Windows, ability to use a word processor, and some experience using the Internet are recommended.

**SW 223**
PRINCIPLES OF A SUSTAINABLE LIFESTYLE
Undergraduate

Our consumer choices, habits and lifestyle have a local and global impact. The items we consume, such as housing, furnishings, clothing, transportation, travel, food, recreation, entertainment, and disposables mainly come from non-renewable natural resources produced in far away lands and have a cradle-to-grave lifecycle. Awareness and education as to the safety and efficacy of consumer products is often suspect with contradicting information from the media, manufacturers, government and advocacy groups. Employing a sustainable paradigm for all of your consumer choices will allow you to have a smaller footprint, (ecological and carbon) on the planet and live a healthier, guilt free existence. We will explore the meaning of the "triple bottom line" or cradle to cradle approach to consumption. Consumer models, field trips and personal experiments will help pave the way to become a conscientious global citizen.
SW 224
ENVIRONMENTAL SOCIOLOGY
Undergraduate
This course opens the discussion of the relationships and conflicts of society's perception of the built and natural landscape. It crosses the intersection of technology and industry and their resulting social problems. The study of society includes the phenomena of equity and inequality that beset humans and the living and non-living components that we experience daily. The act of consumption and the economy of technology, over time, impact human populations, mold our social experiences, and inform the actions that determine the physical environment in which we live. Ideologies, cultural, moral and ethical values present risk and knowledge that hone the attitudes and actions within our human communities. Humans, often being pragmatic, ultimately learn to mediate conflicts (environmental, social, cultural, economic and political) in order to perpetuate the institutions and social dynamics of our civilization.

SW 225
INFORMATION TECHNOLOGY
Undergraduate
The world in which students will live and minister will be shaped more and more by information technology. In this course, students will learn how to effectively use computers and computer programs. They will develop computing skills that they can use in their academic studies, in their community lives, and in their ministries. They will learn how to use computers to communicate more effectively, to do research, to find information on the Internet, to organize and analyze data, to manage financial information, and to present information to others. Through this course, therefore, students will develop and demonstrate their competence to use contemporary information technology effectively and to understand general computing principles and solve problems using computer-based applications.

SW 226
CAREERS IN SCIENCE
Undergraduate
This is a course designed to enlighten and broaden your knowledge about the many science careers (i.e. environmental science, biology, chemistry, food science, nutrition, geology, math etc). You will determine the appropriate career path that is best suited to your interests, knowledge, skills and abilities. This course will also offer graduate school and/or professional training preparation.

SW 227
HUMAN GROWTH AND AGING
Undergraduate
As we progress through life and its stages, we realize and experience the fact that the human body is biologically changing, growing and aging. This course provides a study of the basic structure and functions of the human body, its anatomy and physiology. With this foundation, age-related characteristics and some dysfunctions associated with the aging process are studied. Students will apply learned theoretical principles by using their own bodies and through the examination of preserved materials in laboratory experiments to explore and assess anatomy and body functions as they apply to age-related changes.

SW 228
ENVIRONMENTAL SCIENCE
Undergraduate
Africa has some of the most valuable environmental resources in the world. But it is also experiencing some of the greatest environmental tragedies. Everyone is affected by the degradation of the land, the destruction of forests, the loss of biodiversity and the pollution of air, water and food. The poor and marginalized are the most vulnerable to these problems. Justice and peace are impossible without healthy, sustainable environmental policies and practices. Everyone ministering in the contemporary Church and society must understand and address these environmental challenges. This course will help students learn how to interpret contemporary scientific information about the environmental issues that impact every aspect of life in Africa. They will examine gender and cultural issues that relate to environmental problems. They will also critique potential solutions to environmental problems. Through this course, therefore, students will develop and demonstrate their competence to describe and explain connections among diverse aspects of nature and to understand the scientific and social dimensions of an environmental issue.
SW 229
ISSUES IN HEALTH POLICY AND ADMINISTRATION
Undergraduate
The goal of this course is to provide a general overview of the American health care and health insurance systems. We first will discuss the debates over the enactment and framing of the American constitution, and the political institutions that the nation then developed. We then will analyze the health care system that emerged in this political context, focusing on 1) the rise of the private health insurance system; 2) the incentives provided by government to encourage employers to purchase such insurance on behalf of their employees; and 3) the debate over the role of government in providing coverage for those outside the employer-sponsored health insurance systems. We will examine in some depth the evolution and current context of the Medicaid Program, taking a close look at the politics that led to the 2003 Medicare Modernization Act, as well as the issues raised by the implementation of that law. The following questions will be examined in this course: Is it possible to provide coverage to the uninsured without increasing the national debt? What are the main drivers of rising health care costs and what are the options for cost-containment? What are the options for aiding the uninsured? What are the options for paying for any such initiatives? What are the longstanding obstacles to comprehensive reform proposals? What are the politics of the current, Affordable Care Act, reform initiative? Why is it that the American health delivery system suffers from specialty maldistribution (too many specialists and not enough generalists) and geographic maldistribution (too many providers in some communities and too few in others)? What is managed care? What does the managed care industry look like today? What is the difference between disease management, care management and the current efforts to create “medical homes?” What are provider profiles and how are they used to improve quality? Why is it that the nation does not have an effective long-term care insurance system? What are the alternatives to institutionalization for those in need of long-term care services?

SW 230
UNDERSTANDING AND APPLYING PROJECT MANAGEMENT
Undergraduate
Project Management is a very important business discipline that can become very complicated. There are numerous Project Management methodologies, and all of them share the same basic steps and tools. The purpose of this course is to demystify Project Management by presenting its basic framework and tools. The course translates Project Management theory into a practical and effective methodology the student will be able to apply on the job. Starting with working definitions of Project and Project Management, the course describes how projects are initiated, evaluated and organized with analytic techniques such as discounted cash flow and PERT/CPM. Project execution and control are covered next, along with the documentation and communications skills that are needed to keep a project on track. The course concludes with an overview of Project Management applied to computer software development.

SW 231
URBAN DIRT
Undergraduate
This is a course designed for the student who desires to know the difference, complexity, and the diversity between soil and dirt. The benefit of learning about soil is multi-fold: understanding the Earth, understanding how and where your food grows, gardening, impact on water quality, and most of all understanding your role in improving overall environmental quality and sustainability. In addition, this class will offer introductory knowledge of soil and its dynamism. Although learning about soil can be very scientific, there are several social and artistic views of soil. If you ever wanted to know why soils are various colors and fertility, and home to various organisms, as well as the uses and mapping of soils, then this is the course to take. Understanding the complexities of soil will aid in understanding Earth and its intricacy.

SW 232
DIMENSIONS OF AGING: CHANGING IDENTITIES
Undergraduate
Living longer provides us many opportunities and challenges. Our parents, our relatives, our friends and we ourselves are all involved in aging. This is a journey that we all take without much planning or preparation. We will explore many facets and perspectives on aging to deepen our understanding and empathy and enable us to develop our own plan. Students will examine the aging process from many perspectives, including social, psychological, economic, physical, and health. We will identify and analyze our attitudes toward aging. Through reading, lectures, guest speakers, interviews and personal planning we will: Analyze and evaluate broad societal and specific cultural attitudes toward aging; evaluate strategies for successful aging and design a personal plan; and, develop interviewing and discussion skills around complex and changing identities related to aging.
SW 233
APPLIED INFORMATION MANAGEMENT SYSTEMS
Undergraduate
This course introduces students to the key concepts in the field of Management Information Systems (MIS) and enhances understanding of the issues that business organizations face when developing and managing information systems. In this course, students will be presented with a broad overview of the field to first examine the increasing impact of information technology in business organizations, and second, in preparation for more advanced courses in data analytics and information systems. Specifically, the three major topics covered include (1) e-businesses and networks, (2) databases, as well as (3) enterprise resource planning (ERP) and process models. These topics are designed to prepare students for further inquiry on web analytics, data mining, project management, supply chain management, as well as business in general. By completing the course, students should be better equipped to apply IT skills to solve business problems, to participate in IT projects, and to communicate more knowledgeably with IT professionals.

SW 234
VIRTUAL PALEONTOLOGY
Undergraduate
Paleontology is the study of fossils which are the remains and traces of past living things. The investigation of fossils is essential to our understanding of how life originated and evolved on earth. Fossils provide us with critical information regarding the character and age of the most significant biological events in earth's history, including: the earliest forms of life, the pivotal development of multi-celled plants and animals, the rise and demise of the dinosaurs, the adaptive diversification of mammals, and the origin of our own species. This course will examine how fossils can be used to decipher ancient patterns of development and change within earth's physical and biological systems, how biodiversity patterns for fossil groups compare to living groups, and how the anatomy of plant, invertebrate, and vertebrate fossil groups evolved in both form and function. Other topics will include: fossil preservation, determining the age of fossils, reconstructing ancient environments and ecosystems, lifestyles of fossils, dinosaurs, mass extinctions and the evolution-creation controversy.

SW 235
YOGA AND WELL-BEING
Undergraduate
The ancient practice of yoga offers a combination of benefits: physical endeavor, relaxation, contemplation and stress reduction. This course will explore the many dimensions of yoga. Class meetings provide time for the practice of yoga movement, focused breathing and meditation, all of which help to reduce stress. Students explore the impact of these practices on body and mind through independent research, reflection and class discussion. As a result of this course, students will learn fundamental yoga movement; identify the impact of yoga on the physical body; explore yoga philosophy; and understand how yoga is one component of well-being.

SW 236
ADVANCED INTERNET
Undergraduate
This course is designed for students who want to move their basic computer skills up to the next level. It addresses more advanced concepts of computer literacy. Students in this course will take their Internet skills to new levels, gaining comfort with surfing the web, and learning how to navigate the flood of information once they find what they're looking for. Students will learn how to enhance the effectiveness of search engines, expand their knowledge about other browser applications and general networking concepts, and apply techniques to safeguard against viruses and SPAM and keep computers free from unwanted visitors. Students will find helpful information on the most talked about newcomers to the online world such as social networking sites like Facebook and MySpace, blogging, and downloading media content from YouTube and iTunes, as well as an introduction to personal email and instructions for safe surfing.

SW 237
INTRODUCTION TO COMPUTERS AND INFORMATION TECHNOLOGY
Undergraduate
This course provides an overview of microcomputer applications including Microsoft Windows 8, Microsoft Office 2013, Microsoft Word 2013, Microsoft Excel 2013, Microsoft Access 2013, and Microsoft PowerPoint 2013.

SW 238
BIOLOGY OF AGING
Undergraduate
Students will explore current and historical understanding of the human aging process, with emphasis on normal versus abnormal changes. Each student will select 1) a body system and 2) a related disorder/abnormality to focus on in anchoring their experiences. In addition, students will complete a project for each competence selected on enrollment.
SW 239
THE BOTANICAL WORLD
Undergraduate
All life is dependent on plants. They are our most precious resource. Our relationship with the plant world encompasses things we take for granted: food, clothes, furniture, musical instruments, medicines, homes and the aesthetic qualities of plants that permeate and refresh the human condition. Recent scientific successes in genetics and biotechnology have made us more aware of what has been done to plants. In this highly interactive course, we will explore these new controversial revelations and the connections between plants and our individual lives. While this is not a laboratory course, we will look at and take apart real plants in and outside the classroom, and even grow some lower plants (molds) at home. There will be one field trip to the Lincoln Park Conservatory and a walk around the Loop (weather permitting).

SW 240
THE SCIENCE OF TRADITIONAL CHINESE MEDICINE
Undergraduate
This is a 10-week, four competence course that explores the science of Oriental Medicine and its system of interconnection to nature and the human body. Students will study Chinese Medicine (CM) theory, investigating this healthcare model that is based on imbalances or blockages in the body leading to illness. They will study CM Five Element theory which connects personal constitution to nature and the elements. Students will explore the system of "meridians" or nerves whose interconnectedness generate health in CM. Through processes of self-exploration, written essays and reflection, students will review the sciences of CM theory, pathology, diagnosis and basic applications of the medicine (Acupressure/herbology).

SW 241
GOLD, OIL, GEMS AND SOIL: THE SCIENCE OF MINERAL AND ENERGY RESOURCES
Undergraduate
From the oil, coal, and nuclear materials that supply us energy to the metallic minerals and soils that provide building materials, electronics, jewelry and food, modern civilization is dependent on an assortment of non-renewable resources. This course will introduce you to the geologic processes that generate society's principal mineral and energy resources including oil, natural gas, coal, nuclear materials, gold, industrial metals, gems, and soils. We will investigate how geological circumstances result in the geographic distribution and scarcity of mineral and energy resources, the historic interdependence and competition of societies for these resources, and the geopolitical and economic consequences of resource depletion due to population growth and global industrialization. Topics investigated will include: oil formation and peak oil; coal/natural gas formation and cap and trade policies; nuclear fuels and enviro-statism; gold formation, gold as money, and gold as a cultural artifact; gem formation, crystallography and gem use in jewelry; metallic mineral formation, industrial use, and scarcity trends; soil formation, farming and soil depletion; and the global outlook on mineral and energy resources.

SW 242
FOOD: CULTURE, CUISINE AND SCIENCE
Undergraduate
This course sets students loose in the environment of their own kitchens with a number of structured exercises that demonstrate scientific principals first hand. It includes classroom discussion and examination of these principles. Furthermore, students will discuss how cuisine and cooking styles are unique to and important to world cultures and the people who experience them. In addition to attendance and discussion, learners will keep food journals and write short final papers or give presentations.

SW 243
DESIGNING ONLINE TRAINING
Undergraduate
This course looks at instructional design in much more depth than the Technology, Training and Human Performance Course. In this course, the student will study what Instructional Design is, how it works, and why it is important in the creation of all types of career and educational training. The course will present various models of instructional design, then have the students design actual instructional training modules.

SW 244
STATISTICAL REASONING: UNDERSTANDING AND USING STATISTICS
Undergraduate
This course will teach students the basic concepts of statistics. Students will investigate topics including descriptive statistics, correlation, normal distributions, probability, sampling distributions and hypothesis testing. By the end of this course, students will able to complete a statistical analysis of datasets using Microsoft Excel as the primary tool. Considerable time will also be devoted to discussing how statistics are used and abused.
SW 245
GLOBAL PERSPECTIVES: AFRICA AND TECHNOLOGY
Undergraduate
This course is designed to provide learning opportunities that derive their unique attributes from a focus on the African continent. We will review definitions of technology and globalization as they apply to emerging African nations. We will study how the general application and use of various technologies have affected the developing countries of Africa from a social, cultural, economic and practical perspective. Technologies to be reviewed include electrification, radio and television, telecommunications, computers, and the Internet. Students will participate in a live video conference with a group of United Nations delegates assigned to committees that oversee technology matters around the world for the purpose of discussing the dispersion of technology. Students must have regular access to the Internet because of research requirements.

SW 246
PHARMACOLOGY AND HEALTH
Undergraduate
This course will be an overview of the main human biological systems in health while highlighting and emphasizing the chief pharmacological agents used to treat common human diseases and pathologies of those systems. Discussion will include pharmacokinetics, drug action mechanisms, side effects, costs, and the role that prevention might play in attempting to minimize drug utilization. The course will include a historical overview of the use of medicine throughout the ages and consider current drug development. Through the use of a textbook, current literature review, discussion and audio visual adjuncts, the course will help to build a foundation for basic understanding of the relationship between healthy human biological systems, pathology development, and how pharmaceutical agents relate to health and disease.

SW 247
SCIENCE TECHNOLOGY SOCIETY
Undergraduate
The 20th century has experienced the most profound and greatest number of changes of any in our history. From the invention of plastic to the identification of genes, science and its practical application through technology has changed the way we think and perceive our environment. This course will be an overview of some major discoveries that occurred in the past 100 years and how these discoveries have affected society for better or worse. We will look at how the work of women and minority scientists has been included or not included in the mainstream.

SW 248
THE SCIENCE BEHIND ENVIRONMENTAL SCIENCE
Undergraduate
This course is designed to equip students with the necessary learning experiences to enable them to make informed decisions that affect environmental well-being and environmental sustainability. Learning experiences will include, but are not limited to, classroom instruction, group discussions, and individual research.

SW 249
ANIMAL SCIENCE AND THE ROLE OF MODERN ZOOs
Undergraduate
The main objective of this course is for students to increase their love and understanding of animals!!! It will be a fun and interactive course where you will gain a general understanding of the animal kingdom and how animals are classified. You then will be able to identify animals as an individual organism, describe their natural habitat and better understand their role or ecological niche as it relates to its environment. Students will discover the importance of zoos and how they have become leaders in providing the knowledge needed to preserve the natural world. You?ll learn what zoos do with that information and how they make a difference with regards to environmental issues such as habitat destruction and the importance of species preservation. Students will investigate different zoological institutions and compare how each are unique in their animal collections, the way they support and conduct research, and convey that knowledge to the scientific community and the general public.

SW 250
WIDGETS, CLICKS, & TWEETS: ESSENTIALS OF APPLIED WEB TECHNOLOGY
Undergraduate
This course will provide students with an overview of the history of the Internet and basic marketing strategies as they relate to the Internet and Web 2.0 technologies. Students will learn about how to keep abreast of new technology, how these technologies can be used to market services and products as well as how they can be used to create and maintain social networks for professional use.
SW 251
UNDERSTANDING GLOBAL HEALTH CONCEPTS AND PRACTICES
Undergraduate
Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences and humanities, learners will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. We will explore the factors shaping the global distribution of disease and their connection with issues of social, economic and political development, as reflected in the Millennium Development Goals. We will also consider the impacts of globalization on health risks and availability of health resources. By engaging in critical assessment and proposing innovative solution ideas, we will develop all four competences offered for this course.

SW 252
ENVIRONMENT AND HEALTH
Undergraduate
Using scientific reasoning, the student will determine how and to what extent the quality of health and life can be altered in varied geographic and personal environments. As a foundation, emphasis will be placed on the scientific method, cellular structure and reproduction, and an overview of environmental issues impacting health today. Relationships of the nutrition-digestive and respiratory systems of the human body as environmental portals will be studied. Problem-solving skills will be employed in the manipulation of data. Investigation of norms and their deviations in selected physiological systems will also be studied.

SW 253
USING STATISTICS
Undergraduate
This course is designed to introduce the basic concepts of descriptive statistics, employ their use in everyday life, and make sense of the data. Students will create statistical analyses of data and learn to make decisions from reports that they produce in Excel. Understanding statistical concepts is emphasized instead of memorization of formulas. Students will learn from group projects how to analyze data using Excel spreadsheets. The course involves participation in discussion, presentation of cases and demonstration of analyses.

SW 254
ENVIRONMENTAL SUSTAINABILITY AND ADVOCACY
Undergraduate
BRIDGE PROGRAM COURSE. This course focuses on the interdisciplinary study of humans, the environment, and their interrelationships. It includes natural resources and processes, growth and change, values, and individual responsibility and civic engagement. It will explore the complex relationship of the individual to urban systems and of urban systems to the world environment. Emphasis will be given to the ecology of metropolitan Chicago, engaging and challenging students to propose and advocate for programs and policies that bring about a more sustainable city --- “What could a sustainable metropolitan Chicago look like? What are you willing to do to achieve that ideal?” Writing assignments and field work, as appropriate to the discipline, are part of the course.

SW 255
BRAIN, MIND AND BEHAVIOR
Undergraduate
Scientists have only recently found means to isolate chemicals of the brain, analyze its electrical systems and try to answer questions such as: How does the brain strike a balance between its genetic blueprint and influences from the environment? Where does it “hold” language? This course explains what science knows and does not know about the human brain. It draws on the most current findings, theories, and applications of brain science. Students will meet for guided discussions and will be given textual material for class activities and independent assignments.

SW 256
EVERYDAY ECOLOGY
Undergraduate
Every week, we learn of typhoons and landslides, floods and hurricanes, droughts and other natural catastrophes. Scientists now agree that the major cause of climate shift is man-made, specifically our use and abuse of global energy resources. In Everyday Ecology we will analyze our energy use patterns and explore practical alternatives. The word “ecology” originates from the meshing of two Greek words meaning the “study of homes.” Although the main focus of this course is the individual household, another household we must take into account is the economy. Ecological economics examines how both disciplines need to look toward the other to be viable long term. We will examine options to bring the earth household (ecology) and the human household (economy) together for the benefit of both. This course observes how man is connected to the world around him. It allows us to see our options in response to growing concern over global climate change. Through readings, field trips, activities, discussions and an analysis of our personal use of energy, this course enables us to become increasingly aware of ecological issues. You will learn to evaluate the effect of personal choices on the earth and be introduced to alternative, “greener” options.
SW 258
THE CITY IN THE YEAR 2030
Undergraduate
What will cities be like 25 years from now? The history of cities throughout the world offers clues to this question. This course will explore the theories of leading experts in the field of urban research and prognostication. Students will examine these views in the context of the political system, population trends, and urban economic activity. Recommended strategies to improve the strength of historically great cities will be analyzed and compared. Practical application of concepts utilized in other areas will be evaluated in terms of their potential use in the City of Chicago.

SW 259
PREHISTORIC LIFE
Undergraduate
This course promotes students’ investigation of fossils to interpret the character of 3.5 billion years of biological evolution and ecological change on earth. By way of scientific reasoning, mathematical inference, and applicable technologies, emphasis is on the exploration of earliest evidence of life, development of multi-celled plants and animals, dinosaur evolution, mass extinction events, mammal diversification, human origins as well as appraisal of the societal reliance on fossil resources and the persistent debate over evolution versus creation. Learning is assessed through labs, a fieldtrip, an exam, video summaries, contributions to online discussions, and a research paper in a scientific format.

SW 260
DE-CODING HUMAN BEHAVIOR
Undergraduate
This course targets the link between the physical environment and social behavior. Every physical space is also a social space; its organization contains a “code” of responsive behavior for people to understand. We focus on these “codes,” and examine the ways they provoke conformity and deviance from individuals and groups. Students are expected to enter the social environment and gather publicly-observable data for analysis in the classroom setting. The ethics of social research, and of an observer’s interaction with the environment, are key points of inquiry during the quarter. Students in this course work at a “pre-ethnography” level, and are primed by its conclusion to enter and analyze any social group and its physical surround.

SW 261
EXPLORATIONS IN BIOLOGY
Undergraduate
This course provides an introductory study of organic macromolecules, the cell, genetic activity and the theory of evolution. Throughout the course we will stress the interdependence of the three biological sub-specialties of genetics, ecology and evolution.

SW 262
THE HAPPINESS PROJECT
Undergraduate
What is happiness? How do we know that we are happy? How can we become happier in our lives? In recent years, there have been an increasing number of college courses dedicated to the study of happiness, positive psychology, life satisfaction, etc. This course will be an introduction to how various fields and disciplines are examining topics relevant to the nature of happiness and well-being, while providing an opportunity for students to examine their own ideas and expectations for happiness. Using Gretchen Rubin’s popular book, The Happiness Project, as a guide, we will review the latest theories and research in psychology, the sciences, religion, and the arts, as well as ancient wisdom and popular culture, to determine what is known and assumed about happiness. Participants in the course will develop and assess their own happiness project during the last several weeks of the course.

SW 263
THE CITY IN NATURE: WRITING THE URBAN LANDSCAPE
Undergraduate
In the 200-year-old tradition of American Nature Writing, its practitioners—from John Muir to Thoreau to Edward Abbey—have been indifferent if not openly hostile to cities. The nature essay has tended to focus on the writer’s experience of landscapes where people are not normally resident: deserts, mountains, the deep forests. This focus suggests that nature is out there, and that to feel a part of it, we must leave where we live and go visit it. In this nonfiction writing course, students use the conventional essay to offer an alternative possibility: that we inhabit nature wherever we live, including cities, and that the intersection of nature and culture in urban environments is an important subject for analysis and exposition. To prepare themselves to write their own nature essays, students will read along the extraordinary canon of American nature writing; become familiar with the natural history of their own local environments; keep an urban nature journal; and familiarize themselves with current readings in environmental philosophy and ecopsychology.
SW 264
ANIMALS AND CONTEMPORARY LIFE
Undergraduate
This is a Service Learning, Externship. Students will pursue literature on the historical connections between animals and humans, and will review philosophies concerning treatment of animals. Students will also be exposed to current issues in animal welfare, including a volunteer experience in an animal shelter. In this course, faculty will provide a framework for assessing the roles and condition of animals, particularly domestic animals, in our culture. Assigned readings range from Peter Singer's noted work on animal experimentation Animal Liberation to excerpts from Black Elk Speaks, a Native American treatise on hierarchy and respect for life in American aboriginal culture. Students will pursue their own interests through further readings and commentary.

SW 266
AN APPROACH TO SYSTEM THINKING
Undergraduate
This course provides an introduction to the form of systems thinking called system dynamics. This course introduces the theory and application of the system dynamics modeling approach as it is used to support strategic decision making in complex social systems. It involves the qualitative and quantitative mapping of the relevant system structure (including physical processes, information links and human decision-making) and the simulation of the dynamic consequences of that structure. The aim is both to examine the general modes of behavior that result so as to gain qualitative insights and also to experiment with alternative policies in order to formulate ones which improve behavior. It has three distinctive themes: the concept of information feedback, the use of computer simulation models to explore complex behavior and the need to work with the mental models of relevant system actors (with a view both to drawing on the relevant knowledge and interpretations of the system and to implementing the insights gained from the modeling process). The course deals with all stages of the modeling approach as well as introducing some research topics in the field. Students will use 'state of the art' simulation software with a graphical interface (such as STELLA/iThink) and will be expected to work with quantitative computer models. The practical application of system dynamics will be emphasized throughout, using various cases studied from business public-policy making and elsewhere.

SW 267
NUTRITION FOR A LIFETIME
Undergraduate
Today's consumers want and need to be educated about taking charge of their own health. With the current fast-paced world that has spilled over into our eating habits, food choices have become unlimited. Choosing a healthful approach to diet requires basic information about our bodies' nutritional needs. The greater our understanding of our basic bodily needs, the better we are able to make choices concerning our health. This course will offer an overview of the basic science of nutrition, with an emphasis on the relationship between disease and nutrition, and current research findings.

SW 268
WOMEN, NATURE, AND ECOLOGY
Undergraduate
Women and nature have been linked since earliest times. As our ideas about both have changed, so have our ideas of their relationship. Changing conceptions of the body, as part of nature, have impacted our understanding of the mind's functioning, approaches to physical and psychological health, and religious thought. Students will study three models of nature to formulate how each looks at the human relationship to nature, defines sex roles, impacts health, and religious standards. We will use readings and discussion.

SW 269
ENERGY AND HEALTH
Undergraduate
This course will provide a framework for understanding human energy systems, such as digestion and respiration, in relation to current healthcare practices to enhance their effectiveness (dietary approach, manipulation therapies, acupuncture, exercise, and meditation). We will consider connections between social and environmental variables such as constitution, stress, lifestyle, and vital physiological functions. Each class will build on the basic understanding of biological systems in relation to energy through lecture and discussion. We will review literature on various healthcare practices to discern sound approaches and practical applications. Students will cultivate an appreciation for daily health choices that cumulatively affect their health.
SW 270
MAKING STATISTICAL WORK
Undergraduate
This highly interactive course will help students understand and use statistics to their advantage at work, and in their lives as informed citizens, consumers, and/or parents. Using examples from daily life and work, students will learn to frame and solve common problems. Despite its scary (or boring) reputation, statistics is at heart a set of very powerful tools for thinking and communicating. With the tools learned in this course, students will be better able to cut through reports at work, weigh the claims of political candidates, drill holes in misleading information, and hammer out the real significance of the news. This is a course for all those who have ever wondered: how likely they are to be hit by lightning, whether they are “normal,” what percentage of the population really elects the President, or what the odds are of winning the Lottery.

SW 271
CHEMICALS IN THE ENVIRONMENT
Undergraduate
Confusion and controversy permeate the discussion of the role man-made chemicals play in the environment. This course will provide an understanding of some basic principles of chemistry, so students can evaluate current environmental issues in their communities, and in the press. A major emphasis will be on the total picture: benefits, costs, risks, and hazards associated with common man-made chemicals. We will follow the chemicals from their manufacture through their use and ultimate disposal. Demonstrations, discussions, readings, and reports will stimulate the student to critically evaluate the impact a group of chemicals has on the quality of our lives, and on the ecosystem.

SW 274
IMPACTS OF VARIED ENVIRONMENTS ON HEALTH
Undergraduate
Using scientific reasoning, the student will determine how and to what extent the quality of health and life can be altered in varied geographic and personal environments. The physiological relationships of the nutrition-digestive, and respiratory systems of the human body will be studied in depth as systems susceptible to negative environmental influences. Use of mathematics and problem-solving skills will be employed in the manipulation of data in the investigation of norms and the deviations from these norms in selected physiological systems. Students will be actively involved in the learning process. Class activities will include lecture, laboratory group projects (including examination of preserved materials), videos, readings and manipulations of data.

SW 275
BODY, MIND, SPIRIT: YOGA AND MEDITATION
Undergraduate
Why are 20 million Americans practicing yoga? This course answers that question with an introduction to yoga and meditation techniques and the underlying scientific and philosophical principles of the system of yoga. The first half of each class will be experiential, conducted as a yoga and meditation class for beginners, providing tools to reduce stress, focus the mind, and cultivate inner peace. This first hour and a half will use yoga postures, breathing exercises, and meditation techniques. The second half of each class will use readings, reflection, and discussion to examine the scientific and philosophical knowledge of yoga as a way to ease stress, strengthen the bone and muscle structures, lower blood pressure, increase flexibility and strength, improve mind functioning, and provide spiritual sustenance. We will read Yoga Mind Body and Spirit: A Return to Wholeness by Donna Farhi, and the The Yoga Sutras of Patanjali, research articles on the scientific studies of yoga’s benefits from journals and websites, etc. Students will keep weekly reflection journal observations on the changes(s) they notice in themselves. This course will refresh, relax, rejuvenate. Yoga mats and other props will be provided. Bring/wear comfortable clothes (no jeans, belts, dresses). This is a Gentle Yoga class for beginners. Yoga means to unite or yoke so course will explore the ways to unite body, mind, spirit. This course is designed to 1) help establish good health and well-being; 2) gain scientific knowledge and understanding of the various systems of the human body; and 3) explore the spiritual benefits of meditation.

SW 278
BIOMEDICAL ASPECTS OF STRESS
Undergraduate
As many as 93% of diseases are now believed to be related to stress. This astounding figure underscores the importance of understanding the various aspects of stress, particularly the biological dimensions. The links among perceptions, personality type, brain chemistry, and the endocrine and cardiovascular functions are becoming increasingly well established. More recently, links between our immune system and the activities of the brain are helping us to recognize the truly integrated functions of our bodies in ways which will have very important impacts on our conceptions of health and disease. Students will develop an understanding of stress and stressors, the relationship of stress and the General Adaptation Syndrome as a focal point for applying this information. Exploration of individual differences in stress responses and stress-management techniques will provide a platform for synthesizing information on a personal basis and for analyzing environment/biological interactions.
SW 280
GROWTH AND DECLINE: A DEMOGRAPHIC PUZZLE
Undergraduate
The search for balance between economic goals and environmental concerns is an ongoing struggle faced by communities, states, and countries throughout the world. The successes and failures of population and environmental planning will be reviewed in both an historical and a theoretical context. Students will explore issues involved in establishing vital and healthy places to work and live. Through lecture-discussions, readings, films, and independent research, the relationships among population, public services, corporate growth and development, and environmental regulations will be examined. Students will select an area for study and formulate their own demographic and planning strategies.

SW 281
ALASKA
Undergraduate
From the mid-century push for statehood and the 1960's fight for Native land rights, through the pipeline boom of the 1970's and the economic bust of the 1980's, Alaska's recent history has been tumultuous and presents an ideal context for exploring the challenges of resource development. Many of the controversies which have recently divided Alaska result from the complex relationship between rights of indigenous people and development of the state's rich natural resources.

SW 282
NUTRITION BASICS AND BEYOND
Undergraduate
This introductory course will provide a framework for understanding the fundamentals of nutrition, vitamins and minerals, nutrition and disease prevention, food labeling, nutrition through the life cycle, weight management and more. Each class will build upon the basics by exploring current issues and research related to specific topics. Throughout the course, students will begin to separate information from misinformation as well as gain practical knowledge to incorporate into day to day life.

SW 283
SOCIETIES IN TRANSITION: ERITREA AND ETHIOPIA
Undergraduate
Throughout the world, societies are changing as former political and economic structures are supplanted by emerging democratic systems. SNL has developed travel-study courses under the general title "Societies in Transition" as a way of introducing adult learners to these dramatic changes and as a means of allowing them to experience rich and diverse histories, new cultures, and extraordinary physical environments. Emergent Eritrea: Independence Along the Red Sea is the first in the series to focus on the Horn of Africa, a region of significant geopolitical importance. This course provides students first hand exposure to Eritrea, one of Africa's newest nations, during its critical phase of postwar reconstruction and modernization. Our exploration of the geographic features, ecology and natural resources of Eritrea will elucidate the environmental challenges facing the inhabitants of this sub-Saharan region. Students will have the opportunity to meet with individuals from many sectors of this society, including artisans, teachers, Eritrean students, government officials, freedom fighters, priests, members of the women's federation, and business owners.

SW 285
PRECALCULUS
Undergraduate
The purpose of this course is to continue to develop the student's logical, pattern recognition, organizational, and algebraic skills. The goals are to prepare the student to deal with the increasing mathematical nature of life's problems and to prepare the student for possible future calculus courses. The course will rely heavily on the interactive approach. Examples will be studied to introduce theory and applications. Discussion and questions will be encouraged. Homework will be recommended and discussed, and the student will do problems in class.

SW 286
SEXUAL HEALTH
Undergraduate
We will study the male/female anatomy and physiology, and its dysfunction, including impotency and infertility. We will discuss how these dysfunctions affect normal sexual function, and how sexually transmitted diseases are identified and avoided. Emphasis will be on healthy and safe sexual physiological function. We will explore sexual development throughout the life cycle from adolescence, middle age to maturity and how these biological changes impact our sexual health. The learning experience will include lectures, discussions, and expert speakers from the field.
SW 287
ROCKET TO THE STARS 2000: SPACE FLIGHT IN FILM SOCIETY
Undergraduate
This course explores the impact of space flight in the 20th century. We have witnessed development of space flight, and have extended our reach beyond the surface of our planet. Outer space has provided a host of new discoveries that have revolutionized our understanding of ourselves, the universe, and our significance within it. It has also created serious social, economic, and political repercussions for our society. Culturally, Space has also been a kind of blank screen upon which we project our aspirations, our fears, and our speculations. We will examine how popular film has also fashioned our hopes, our fears, and reflected our thoughts about space flight.

SW 288
DESIGNER LIVING: RELATING WORK AND LIVING TO HEALTH
Undergraduate
Creating a balanced lifestyle is coming to be seen as the core of preventive medicine and holistic approaches to health. In this course, students will create a self-care program comprising diaphragmatic breathing, the relaxation response, pacing, exercise, and a balanced diet. In class, focus will be placed on such issues as reappraising our concept of work and leisure, the impact of belief-systems on human biology, and the influence of our concept of time and of light on the human body.

SW 289
MAKING MULTIMEDIA BUSINESS PRESENTATIONS
Undergraduate
This course will instruct the student in the use of popular multimedia software for the development of professional-quality business presentations. Training will be provided in the areas of video and audio editing, graphics enhancement, slideshow creation, and moviemaking. Students will demonstrate their work through in-class presentations and via the internet. The primary focus of each student's multimedia presentation will be the impact of technology on the current state of the U.S. economy. Each student will select and research a specific issue related to technology and finance, prepare a professional-quality video, and present the results of his/her work in class.

SW 290
CONCEPTS IN MATHEMATICS
Undergraduate
This course will focus on interpreting numerical data and problem-solving using basic mathematical tools. Selected topics from branches of mathematics will be reviewed, including: probability, statistics, charts, graphs, linear equations, and solving word problems through basic algebra. Methods will include lectures, hands-on applications, small group problem-solving, quizzes, and research.

SW 291
HISTORY OF LIFE ON EARTH
Undergraduate
The study of fossils, the remains and traces of past living things, is essential for understanding and reconstructing the history of life on earth. Fossils provide us with critical information regarding the character and age of the most significant biological events in earth's history including the earliest forms of life, the pivotal development of multi-celled plants and animals, the rise, success, and demise of the dinosaurs, the diversification of the mammals, and the origins of our own species. In this course, you will explore how fossils and scientific reasoning are integrated to discern the complex history of life on earth. You will also evaluate the impact the discovery and recognition of earth's fossil record has had on society over the last several hundred years such as the position of humans among other species and the corresponding creation-evolution debate.

SW 292
EXPLORING EARTH'S PHYSICAL FEATURES
Undergraduate
This course advances student exploration of earth's 4.5 billion year geologic record in order to evaluate the planet's evolution and the interrelationships between humans and landforms. Through the application of scientific reasoning, mathematical inference, and prevailing technologies used by geologists, emphasis is on plate tectonics, geologic time, the rock cycle, weathering, earthquakes, fluvial features, rock structures, volcanoes, mountains, plateaus, plains, glacial features, deserts, caves, and coasts. Students also assess human reliance on landforms, the economics of landforms, and cases of earth pseudoscience. Learning is assessed through labs, fieldtrips, a scientifically-formatted research paper, an exam, and contributions to online discussions.
SW 293
AGING REASON
Undergraduate
Reasoning, like human life, comes in layers that need to be unravelled if we are to make sense of it. As Bernard Shaw put it, "Reason makes a good servant but a bad master" That may come as a surprising thought to those of us brought up to think that everything desirable and true is scientific and science is based on reason. This course will examine the maturing of the reasoning processes employed in science, the mechanisms or methodologies used to validate data, namely the development of scientific reasoning in the Western hemisphere from naive realism through logical positivism to Popperian falsification. This will help us to clarify the status of the data that we use or write about. It will also examine the maturing of the biological processes of the human being, the mechanisms of aging, including modern research experience demonstrating the way in which underlying assumptions can influence both reasoning about and experience of biological aging processes. Class presentation and discussion backed up by library-based reading. In class, we will focus on the key concepts of paradigms in science and religion, in youth and aging and the way in which basic assumptions influence perception, behavior, and experience.

SW 294
GLOBAL ENVIRONMENTAL CHANGE
Undergraduate
Many ongoing changes in the natural environment are so extensive in scale that scientists consider them a threat to sustaining a reasonable quality of life for humans worldwide. Examples of issues of particular and urgent concern are: the rapid changes in the chemistry of the atmosphere that can alter the earth's prevailing climate patterns; the amount of pollutants in the oceans that can breach essential parts of the food chain; the consumption or contamination of natural resources, such as minerals for industrial use, petroleum, groundwater, and agriculturally important soils and; the spatial reduction of terrestrial biomes with corresponding extinctions of organisms. In this course, we will review and analyze the recent earth science research on these and other global change issues in order to assess their relative importance for the human community. We will also examine and evaluate how human activities can have direct and causal relationships to specific adverse global environmental changes. Additional topics that will be addressed include emerging theories of sustainable development, ecological ("Green") economics, and environmental laws. Through readings, discussions, lectures, and original inquiry, students will be introduced to the principal global environmental change issues. Students will select one issue for more detailed analysis and utilize the course learning experience to formulate a plan for personal, governmental, and/or global action to address an environmental problem.

SW 295
SUCCESSFUL INTERVIEWING
Undergraduate
Interviewing "the process of asking and answering questions" is a part of everyday experience. This course introduces and explores the fundamental principles, theories and techniques of interviewing including the interpersonal communication process, common types of interviews, interview structure, questions and responses. Through collaborative and experiential learning activities, students will prepare for and participate in all aspects of the interview process as the interviewer and interviewee.

SW 296
A BIOLOGICAL APPROACH TO VIOLENCE
Undergraduate
There is a significant difference of opinion concerning aggressive or violent human behavior. Is it a social response to an environment of poverty and other psychological phenomena? Or can it be explained in terms of a biochemical syndrome consistent with scientific data and therefore remediable with psychoactive drugs? In this course, students will be introduced to normal brain anatomy and biochemistry and the technologies that have helped us understand cerebral function. We will examine literature in the biological, medical, and psychological sciences in an effort to develop and demonstrate critical reading and analytic skills of both scientific and pseudoscientific material. We will explore the relative contributions of environment and biology to understanding aggressive and violent behavior as well as potential modifiers of the same.

SW 297
WRITING THE EARTH
Undergraduate
In this course, students will learn creative writing while exploring geologic history. Geology is the window into the history of the earth and all the organisms that have lived and died here. Every rock in quarries, road cuts, or pebbles on a beach carries part of the earth's story. Students will learn to read rocks and open the book of the earth's history. There, one can find the drama of evolution and mass extinction, the violent uplift of mountains and their slow erosion into plains, the crashing of seas flooding the continents and the drying of sediments abandoned as the seas recede, the first steps of an ape that would be human and the changes that made all of us from that beginning. Earth history is filled with drama, with actual adventure, and light romance, and grim catastrophe. Factual writing alone cannot communicate the emotions we feel as we experience earth's own poetry. For that, we need the depth and energy of creative expression. In this course, students will learn the basics of reading rocks and explore earth history for themselves. They will also learn to communicate their experience to others through creative writing in fiction, essays, or poetry. Regular class meetings will be held with full day field trips. Class time will be divided between the explorations of geologic concepts and creative writing. Geologic concepts will be introduced through readings, discussion, and hands-on experience with real rocks. Creative writing will be introduced through readings, discussions, and writing exercises. Most of the writing exercises for each class will be based on student's hands-on experience in that class.
SW 298
EXPLORING THE INTERNET
Undergraduate
In this introductory-level course, you will develop a broad knowledge of the Internet technology and understand how it can be useful to personal and work life. The class will be "hands on" and you will learn how to access Internet applications and use them. We will discuss the history of the Internet, getting connected to the Internet, and the various functions used on the Internet. We will also create websites, focusing on their design.

SW 299
MATTERS OF SCIENCE
Undergraduate
One set of laws describes all motion. All matter is made of atoms (actually quarks and leptons!). Stars live and die like everything else. All life is based on the same genetic code. These basic ideas of science and their application to technology are the focus of this course and they offer you what will probably be a new way of thinking about science. If you can get excited about recognizing and discovering what lies behind many everyday encounters with the world around you -- and some not so everyday as well -- just for the enjoyment of learning about them and how they work, this course may be the way to put capstones on your Physical World competencies. This will be a course unlike any other you have experienced -- you will be learning on an independent study basis but also interacting and exchanging ideas with others in a virtual classroom located on the Internet. Through your research in response to questions and pursuit of independent projects, guidance by a primary text, other readings and the instructor, the fruits of your classmates' efforts, and the unexpected that can come from (written) conversation, this course will touch on the roots of most scientific disciplines (e.g., physics, chemistry, astronomy, biology, ecology). It will do so in ways that should help you to see their connections to each other and to various technologies. You will also examine your own problem-solving strategies and various aspects of scientific inquiry. An overall outcome of achieving the competencies of this course will be the development of a scientific literacy to build on in the future. You are invited to visit the course home page: www.depaul.edu/~mfiddler/ms/home.

SW 300
SUSTAINABILITY AND PROFESSIONAL PRACTICE
Undergraduate
Environmental sustainability problems are multidimensional and interconnected to both the earth and human relationships. In this course, students will analyze their workplace, organization or a desired professional setting using the principles of environmental sustainability and recognized best practices. On the basis of this analysis, they will make recommendations. Students will learn to use decision tools and data to conduct this analysis and make strategic environmentally sustainable decisions within their professions. Learners will explore how to make complex and current science content relevant, accessible, and personal. They will be able to explain the science behind sustainability and environmental management, as well as how sustainability connects with the human dimensions of organizational relationships. Additionally, this course will provide a hands-on approach to allow learners to acquire the analytic, communication, and work skills required to be problem-solving professionals and contributors to human sustainability within organizations.

SW 315
ENVIRONMENTAL ETHICS AND SUSTAINABILITY
Undergraduate
This experiential class focuses on readings from Leopold's A Sand County Almanac, including his important essay, "Thinking Like a Mountain" as well as readings from John Muir, who grew up in nearby Portage, Wisconsin. Students will visit the Leopold Center, the world's greenest building, as well as the famous 'shack' where Leopold lived and wrote. They will also tour the Crane Foundation, which works with endangered waterbirds around the world. A visit to one of America's largest farmers' markets, followed by a sustainable lunch at a Wisconsin restaurant, will provide ideas on how Leopold's philosophy can be brought into daily life. During the class, students will reside at Holy Wisdom, a retreat center with a restored prairie in Madison. The area to be visited is unique in the Midwest. Most of the prairie land in the region was formed when vast glaciers crushed the land flat during various Ice Ages in the past. But a small area of southwestern Wisconsin, northwestern Illinois, and eastern Minnesota were never glaciated. There, the hill-and-stream erosion of more than 400,000 years has led to a quite different environment than the surrounding area. Called the "Driftless Area" (because there was no glacial "drift" or dust), the region is famously scenic and was home to the great American architect Frank Lloyd Wright, whose designs reflect the landscape of the region. As the course will be held in autumn, we may anticipate beautiful colors in the deciduous forests.
SW 316
RISE OF THE MAMMALS
Undergraduate
The modern world is dominated by mammals. Mammals have evolved, adapted and currently thrive in tremendously diverse habitats, including the oceans, lakes, rivers, tropical and temperate forests, mountain regions, caves, deserts, grasslands, the arctic tundra and polar regions. How did mammals become so diverse on the planet? Why did they remain small and relatively insignificant for the first two-thirds of their extraordinary 200 million year history? Where and when did modern mammal groups originate? What does the fossil record indicate about the character and timing of human physical and behavioral evolution? In this course, we will explore the extensive fossil record of mammals in order to gain insights to these and other questions concerning the history of this critically important animal group. Through discussions, readings, lectures, labs, examination of fossil specimens, original inquiry, analysis of museum exhibits, and application of scientific reasoning, students will be introduced to the fossil record of mammals and its critical role in establishing patterns of mammalian evolution and historical biogeography. Topics will include: fossil preservation; determining the age of fossil mammals; the transition from reptiles to mammals; Mesozoic mammals; the rise of mammals and extinction of large dinosaurs; evaluating the ecology of ancient mammals; and, the origins and diversification of modern mammal groups. Particular emphasis will be placed on examining the fossil record of primates leading to Homo sapiens and relating ancient mammal biodiversity patterns to current mammal extinction concerns.

SW 317
BODY SCAN: PRACTICAL ANATOMY AND YOUR ENVIRONMENT
Undergraduate
We are confronted daily with a barrage of physical challenges to our body - particularly, our musculoskeletal system. This we experience as pain and altered or loss of function: headaches, backaches, muscle spasms, pinched nerves, etc. When assessing the physical ramifications of stress and strain, an understanding of basic anatomy in the context of our environmental issues (ie., work, exercise) and the process of aging, is key to making positive choices and changes. In this course, students will utilize a text/workbook, clinical case histories, presentation of a research topic, and class discussions.

SW 318
THE UNIVERSE, SCIENCE, AND THE QUEST FOR UNDERSTANDING
Undergraduate
Astronomy, one of the oldest sciences, links our wonder at the beauty of the night sky, and our quest for meaning, and practical necessities such as navigation and communications. Students will discover in a playful, conceptual, and generally non-mathematical way how science, with intuition, inspiration, and logic helps us to understand our most basic questions: how are the stars made, how is the stuff that we are made of produced, where is the universe headed, and what lies at the end of time? Learning in class will be achieved by a combination of readings, discussion, observational exercises, with one field trip to a major scientific site.

SW 319
ENCOUNTERING UNCERTAINTY AND CHANGE
Undergraduate
Ambiguity, confusion, doubt -- these seem to be synonyms for uncertainty. But the word has had a special meaning since quantum physicist Werner Heisenberg articulated the Uncertainty Principle more than 50 years ago. What effect does an observer have on an event? Can we accurately judge two things at once? How does the decision of what to analyze affect the outcome of the analysis? These are some of the questions which the Uncertainty Principle poses. This class explores the revolutionary change from mechanistic science to relativity and quantum theory. The challenge of Uncertainty in the arts and social sciences will also be considered. Finally, the role which Uncertainty plays in our lives will be explored. This course will involve selected readings, including nonmathematical explanations of Heisenberg's work as well as application of his theory to other disciplines. Videos and films will provide other texts for examination. Classroom work will include thought experiments, small-group interaction, and nongraded writing; tour of Fermilab particle accelerator will be required.

SW 320
CHAO S AND COMPLEXITY
Undergraduate
Chaos: the word is often used to indicate a state of utter disorder. Yet dynamical systems theory -- the science of chaos -- suggests that the connection between chaos and order is not a simple opposition. Chaos may, in fact, be the seed-bed for emergent order. This course examines theories of chaos and the connected theories of complexity, both in terms of scientific applications and as metaphors for the creative process. Students will develop a solid grounding in the development and current state of chaos/complexity theory. Several media, together with simple experimentation, will be used to study fractal geometry, entropy and negentropy, and thermodynamics. After this grounding, students will have the opportunity to analyze their own creative process in terms of the principles of chaos and complexity.
SW 321
BIOLOGY AS DESTINY: GENETICS AND THE RE-MAKING OF HUMANKIND
Undergraduate
From scholarly conferences which debate the site of the "gene for criminality" to mass-appeal treatises on IQ such as The Bell Curve, contemporary biological research is "turning up the heat" on the long-simmering "nature vs. nurture" controversy. The question of whether we are determined by our biology or are products of our culture is once again on the center stage of public concern. Moreover, it seems the very definition of ourselves as unique organisms is under assault. From transplanting the organs of other species into humans, test-tube babies, and surrogate mothers - to genetic testing, DNA fingerprinting, and sex selecting - from cloning to engineering super-humans: these are but a small sample of the disturbing potential suggested by biology's current "tinkering with life." This course explores the intermingling of biological theories and methods, political ideologies, and social dynamics found in research such as the project to map the human genome. Primarily through lecture, we will first establish a basic knowledge of current genetics. On that basis, through discussion and class exercises, we will explore the history and present status of the shifting definition of "human nature." We will be interested particularly in how the scientific and social processes involved are influenced by class, race, culture, and gender considerations.

SW 322
EVOLUTION: A HISTORY OF CONTROVERSY
Undergraduate
The biological universe is wondrously complex and diverse. Evolutionary biologists study the processes that brought about that diversity and complexity. Evolutionary theory attempts to answer many questions. What are the different kinds of organisms? Why are there these kinds of organisms and not others? By what mechanisms do new kinds appear or old kinds change? What is a biologic species? Why do some organisms have sex while others do not? The history of evolutionary thought is a history of controversies in evolutionary thought. We will examine the evidence and arguments on all sides of a question and we will discover how that evidence and those arguments changed through time. Through lecture, readings, and hands-on activities, students will be introduced to form and content of major evolutionary debates. Through class discussion and short position papers, students will argue their opinions on these debates from the point of view of their selected competencies. Students will be expected to complete an exploratory visit to the Field Museum as a homework assignment. The Internet is a lively resource for any course on evolution. In this class, students will gain some Internet literacy as they search for sources and view newsgroup debates. They may even correspond with some of today's evolutionary thinkers. We will also have a pass-word-protected newsgroup for private class discussion.

SW 323
EARTH SCIENCE AND THE HUMAN FUTURE
Undergraduate
This course is rooted in the scientific investigation of the earth, its elements and history, with an eye toward patterns leading to probable future changes. The learning experience includes current literature in relevant disciplines, journal writing and an outdoor lab component.

SW 324
THE BUSINESS OF ENERGY
Undergraduate
In this class we will be discussing some of the history of electrical power generation and regulations that formed the way the business developed in the United States. We will review environmental regulations and their effect on the electrical power generation business today. We will evaluate the deregulation of the electrical generation business and discuss the facts, the pros and cons and current events occurring throughout the United States. Finally, the students will be challenged to propose solutions to avoid energy shortages in the future.

SW 325
THROUGH THE EYES OF THE SCIENTISTS: THE EVOLVING UNIVERSE
Undergraduate
Science appears daunting, but few subjects are as exciting and dramatic as the ageless story of the human mind challenging itself to figure out something altogether new about our evolving universe. Through rich and varied original writings of the greatest scientific thinkers, we will explore some of the most remarkable milestones and breakthroughs in scientific thought from physics to paleontology. Famous scientific personalities will come to life in their vivid explanations of astonishing insights and experiences of discovery in their memoirs and biographies. We will glean understanding into the adventure of the creative process by looking through the eyes of the scientist and ponder the paradoxes, mystery and beauty of human life and what it means to be human. We will emphasize both the contrasts and continuity of scientific thought between the ancient and modern eras, and proceed from the premise that science is inspired by simple wonder and curiosity about the universe of life. By asking "why?", we will live science in its purest form, for each answer only sparks new questions and allows us to take the words of Einstein to heart: "The important thing is not to stop questioning. Curiosity has its own reason for existing. Never lose a holy curiosity."
SW 326
ENERGY: WHAT IT IS AND HOW WE USE IT EVERY DAY
Undergraduate

Energy: what is it? Many of us take it for granted without understanding it. We typically use up to three different forms of energy dozens of times a day. Where does it come from? How do we use it? Because it is so interwoven into our daily lives, we need to be aware of how we use energy and the consequences. This course will explore these ideas while laying the foundation for basic understanding of energy in our daily lives. Topics covered will include what energy is, the different ways we consume it, the technologies behind the different ways we use energy, including different fuels, energy conversion, electricity, nuclear power, energy from water, wind power, and solar energy. Finally, we'll take a look to the future and discuss resources, costs and prices, and alternatives. Demonstrations and mini lab sessions will be included to offer students direct experience with forms of energy.

SW 327
WEB SITE DESIGN FOR ELEMENTARY SCHOOLS
Undergraduate

In this web page design course, students will design a web site for a Catholic elementary school as a service learning project in a collaboration between SNL and the Office of Catholic Education, Chicago. Depending on the size of the school, two students may volunteer to collaborate on one school or work alone. Students will meet for seven to eight classes and allocate time to meet with their school representative the other two to three classes. These meetings do not have to be traditional class time but can be scheduled at the convenience of the student and school representative. Students will receive material from their school representative that includes text and images and will collaborate with the school representative in designing the web site. Class time will include editing images, scanning, inserting sound clips and evaluating school web pages. Students must know inserting formatted text, links, tables and targets. Because of the skill level required for this project, students must apply for and be approved by the instructor before course registration. Applicants must have successfully passed the Internet Technology and Its Applications course or have significant experience in fundamentals of web page design.

SW 328
INFECTIOUS DISEASE: A GLOBAL CHALLENGE
Undergraduate

In 1967 the United States Surgeon General announced that it was "time to close the book on infectious disease". Antibiotics had been introduced in the 1940's, there was an ever-lengthening list of diseases for which immunization was available, and many world health officials imagined a future free of infectious diseases. Yet, as we begin the twenty-first century, infectious diseases are still the leading cause of death in the world. Why? How do we begin to understand the emergence of AIDS, Ebola virus, Lyme disease or Hantavirus? How can we explain the worldwide reemergence of tuberculosis, a disease that had come close to being relegated to history books? In this online course we will seek answers as we study the nature of microbes and the complex, often interrelated factors that contribute to their ability to challenge us even as we pit our science and technologies against them. We will examine such factors as population growth, urbanization, ecological disruption, human migration and antibiotic misuse. In 1996 the Director-General of the World Health Organization announced, "We stand on the brink of a global crisis in infectious diseases." Clearly the book on infectious disease is still wide open, and we will read some of its pages.

SW 329
DATABASE DEVELOPMENT FOR MANAGING INFORMATION
Undergraduate

Using MS Office tools suite (in particular Access), this course takes students through the entire process for building a database system that will be used to capture, store and present information. In addition to database concepts like designs, reports and SQL queries, the students will discuss and analyze relationships between technology and society.

SW 330
THE LIVING BIOSPHERE: A NEW LOOK AT LIFE ON EARTH
Undergraduate

This course will expose students to nature's dynamic synergy through a variety of integrative learning techniques using modern technology, videos, group projects and provocative readings. Students will develop a strong understanding of Gaia theory and its place in contemporary natural science. This theory, proposed by the English chemist, James E. Lovelock, conceptualizes the earth as a large nesting, interactive system of life, soil, atmosphere and ocean. Earth is assumed to be a breathing biosphere; a symbiotic world. This course presents radical and cutting-edge views of life on earth for learners' discussion, reflection and critique.
SW 331
BIRDS IN THE ENVIRONMENT: ORNITHOLOGY
Undergraduate

Does habitat and biodiversity loss pertain to cities like Chicago? Can species and habitats still exist in urban areas, which are so different from jungle and ocean? The answer to both questions is "yes" when we look at seasonal bird migration. Birds have migrated to and from nesting and breeding sites for thousands of years. They can travel from pole to pole, not only passing through our backyards, but even staying and nesting there. The goal of our class is to experience birds and habitat that are unique to this area and to study their relationship to humans. This relationship puts birds in peril by forcing them into concentrated, small patches of habitat, yet shows signs of hope in the form of protecting habitats such as our forest preserves and restoring habitats such as the Midewin prairie. Participants should expect to work in the field.

SW 332
VIRTUAL BIODIVERSITY: EXAMINING LIFE ON EARTH
Undergraduate

The exploration and measurement of the amount of genetic, species, and ecological variation on earth is emerging as one of science's and society's most important and urgent endeavors. Scientific efforts to study earth's biodiversity have intensified because of our growing appreciation of the role human population growth and urbanization play in accelerating the extinction of plant and animal species through the destruction of critical habitats. Since life on earth has been diversifying for at least 3.8 billion years, but most of the biodiversity that once existed (as much as 99%) has been lost to extinction processes, we will focus on exploring what are "normal" levels of extinction on earth. Central questions addressed in this course are: How is the security of humanity dependent on biological diversity? Is a mass extinction event currently in progress on earth? Do we have an obligation to future generations to keep life on the planet as diverse as possible? Students will be introduced to major biodiversity issues through discussions, readings, lectures, labs, and original inquiry. Students are required to participate in a self-directed fieldtrip to a biological reserve and to develop a detailed research paper on a biodiversity issue of their choice structured in a scientific format. This course will employ a great variety of online biodiversity resources available at institutional websites. Subjects of the course will include: different views of the biosphere; biodiversity trends in earth's fossil record; the value of and human dependence on biodiversity; biodiversity at risk; policies, economics, and technology to protect biodiversity.

SW 333
THE HUMAN GENOME PROJECT
Undergraduate

This course presents a basic understanding of genetic principles necessary to discuss the impact on society of the Human Genome Project. Classical genetics, from its inception as a discipline, held that every organism's genetic makeup was conditioned primarily by environmental factors. Darwin summarized this by claiming that environmental pressures produced organisms whose genetic makeup ensured survival in a particular environment (the survival of the fittest). Contemporary genetics, however, is entering a new era in which both the environment and genetic technologies share in the mission of modifying an organism's genetic makeup. The project of sequencing the human genome has enabled scientists for the first time to identify health-related genes and, based on this, to design new treatments for age-old diseases. At the same time, the Human Genome Project, and genetic research based on it, is raising ethical concerns for the way genetic knowledge will impact health care into the 21st century. Genomics, as the new discipline is being called, explores this complex but fascinating world of cutting-edge genetic research. It is this very world that we will explore in our class setting through a variety of methods including laboratory investigations, class discussions, and student presentations. You may register for up to three competencies.

SW 334
EVERYDAY CHEMISTRY
Undergraduate

Each day we are immersed in chemicals and are participants in and observers of many chemical reactions. This course is designed to teach chemistry and physical science through the observation and explanation of many events we observe in daily life. It has been specially planned for students who have little or no background in science. We will examine the chemistry of substances from table salt and food additives, to fuels for our cars and homes, to semiconductors, new plastics, and revolutionary materials that will improve our lives in the 21st century. This class will emphasize the interconnections in our world through science. We will address safety and the "positive" and "negative" impact of chemicals on our world. There is a chemistry kit required for this course, so that you can perform the experiments safely at home.

SW 335
USING THE INTERNET TO ENHANCE YOUR CAREER
Undergraduate

The Internet has radically expanded the options available to people looking for employment and the alternatives available to employers looking for people. These new options are available for the most part only to people who know how to use the PC, who understand the internet, and who can capitalize on the bewildering array of resources in this new medium. This course will focus on how to make effective use of electronic media to manage and enhance your career. Students will participate in both individual and group exercises designed to sharpen their web-based research, networking, personal marketing, and communication skills.
The twentieth century not only brought us the dawn of the Information Age, but continued to bring us rapid changes in information technology. All computer systems and applications will change over time. As business requirements change and new techniques are implemented, computers and applications will need changes to keep pace. As we begin the 21st century, computer literacy will undoubtedly become prerequisite in whatever career a student chooses. In this course, we will enhance your knowledge of Microsoft Office software applications. The class consists of some lecture and mostly computer lab activities. We will expand your knowledge and skills required for communicating and moving information electronically by introducing you to application shortcuts and seldom used features. We will also gain an appreciation for the effect of information technology on people. The framework of this course is based on the use of Microsoft Office.

This course will address the principles of genetics with an emphasis on the genetic code of the human genome. In this course we will examine: how the genetic code is stored, how it is used, how it is evolving, how it is passed from one generation to the next, the consequences of genetic code errors, the medical, technological, legal and ethical issues associated with the human genome. We will discuss how we can, and how we should, use the information on the human genome.

In ancient times, science and philosophy were one and the same. Our contemporary views of nature and the scientific method are relatively late additions to the world's bank of knowledge. In this class, students will explore how thinkers in older societies make sense of nature. Systems to be examined include mythological approaches to explaining the natural world, and ancient laws derived from Anthropology, Archeology, Astronomy and the theories of Quantum Physics. Students may take this course for only one competence.

This course concerns the effective use of microcomputer technology for working professionals, business analysts, project administrators, and support specialists. The course utilizes a project-oriented approach to achieving computer software proficiency in a PC environment, using word processing, spreadsheets, databases, e-mail, and Internet applications. Students will analyze real-world situations, identify underlying issues and possible solutions, and apply best use of technology and available resources to accomplish tasks and goals. Students should have a basic familiarity with the use of microcomputers in a Windows environment.

Today, global climate change is threatening human society. Sometimes incorrectly called "global warming," these shifts in the earth's weather systems have been tied to the burning of fossil fuels in industrialized countries like the United States. But we have to drive to work, don't we? We need to heat our homes, don't we? Besides, what difference does one person make? This course considers the way that human life is connected to the world around us. It also provides an opportunity to see how you might make changes in response to growing concern over global climate change. The course does not propound one solution over another. Rather, it encourages you to become aware of ecological issues and to determine your own answers to the questions they raise. In this class, you will learn to assess the effect of personal choices on the earth and be introduced to other possible choices.

The objective of this course is to provide a basic understanding of Information Technology security. It will address technology approaches in detail for both home and work protection. This course will provide an overview of the objectives of security and a framework for understanding fundamentals which should be in place for an Information Technology setting to achieve an adequate security level.
What is human biology? What are cellular functions? Homeostasis? How, precisely, does the human being work? In this course, students will examine how biological systems work together to create a functional human. Each week, students look at a different human biological system, will examine the basic cellular makeup/anatomy of that system as well as the general functioning of that system, and then will apply that information to overall health issues.

In this course, students will be introduced to the world of the Internet. Students will develop some knowledge of internet technology and how it can be useful in personal and work life. Items to be discussed include Internet history, getting connected, and such functions as email, browsing and search engines.

As the workplace becomes increasingly sophisticated, more and more companies expect employees to create attractive PowerPoint presentations, use Publisher to create flyers, brochures and newsletters, and create attractive Word documents. In this course, students will learn design skills in creating work and classroom presentations using PowerPoint, Word and Publisher. Students are encouraged to use course materials from other classes and/or from the workplace and format these materials in PowerPoint, Word and Publisher. Students can then present these projects in other classes and at the workplace but are not required to do so. This course utilizes a project-oriented approach to achieving skills in presentation software. Students will analyze real-world situations, identify appropriate software solutions and apply the best software to accomplish tasks and goals.

What comes to mind when you think about science and technology? Do they seem mysterious, incomprehensible and yet powerful? Could science and the machines it creates both benefit some and harm others? In the best sense, science is about asking questions and continually questioning itself. It is considered a systematic, precise, objective way to study the natural world. Yet if science attempts to be neutral and unbiased in its approach, its results historically leave us with a bitter irony. One example is nuclear energy. It gives us terrible power to destroy and creates extremely harmful radioactive waste, yet through modern medicine using nuclear equipment it has also saved many lives and eliminated suffering. Our daily lives are governed by scientific and technological systems run by experts. Foresters know how to plant trees, but not how to establish conditions under which villagers in developing countries can manage natural forests for themselves. Engineers know how to develop technologies that benefit industries, but not how to dissuade factories from polluting. How much do we really know about the definition of science and its influence on our culture? Did pre-farming cultures use science as a way of understanding their role in the world or is science a phenomenon of modern cultures? In this course, students will examine through critical thinking the nature and history of science and its effects on the future. Students will also address issues in conflicting global views of the use and abuse of technology and developing methods of sharing, controlling, and monitoring our scientific output.

For thousands of years humans, from the time they were able to make the first tools to the production of nuclear technologies, have changed and in many cases radically altered their environment. Their perceptions (values and culture) with respect to the human relationship (and or responsibility) to the environmental spaces in which they lived and or the global commons (like space and the oceans) for the benefit of their current or future society has been critical in influencing the way in which the integrity of the environment and global commons has been impacted. This course will provide a survey of various environmental ethics that have emerged during human history among Western and non-Western cultures; and how these divergent environmental ethics have shaped and influenced not only planetary but space ecosystems. This course is an excellent elective for business, education, religion, sociology/anthropology and science/engineering focus area who seek to understand the foundations and ramifications of human ethics, values and culture on decisions and policies which impact the global environment (or ecosystems).
SW 348
NATURE WRITING
Undergraduate
Observation is the beginning of science. It is also the beginning of the process of writing. This class is designed to encourage you to observe the natural world and to write clearly about it. Thus you will be simultaneously strengthening your observational skills and your expressive skills. You will observe a single natural setting over the course of a quarter, writing short prose pieces that follow specific guidelines. Some of these pieces will be posted on the class website for those outside the class to read, thus providing you with an experience of online publication. Basic skills in grammar and punctuation are assumed; although it is not a prerequisite, you will find it helpful to have completed College Writing before you start this class.

SW 349
RELATIONSHIPS BETWEEN PLANT AND HUMAN LIFE
Undergraduate
The purpose of this course is to increase student's awareness and understanding of plant structure, function and diversity, and to help students discover past, current and potential future uses of plants. This course uses Ethnobotany to help students understand how the scientific process leads to new understandings about how our world works and how it can aid us in understanding ways we use science in our lives. Specific learning objectives of the course are to understand and appreciate: (1) plant structure and function and the relationship between the two, (2) plant adaptations and how these adaptations affect the distribution and abundance of plants in nature, (3) the diversity of plants and the ways in which botanists group plants, (4) the way that science contributes to our understandings of how the world works and informs our decisions of how we want our society to be.

SW 350
CAPSTONE SEMINAR: PHYSICAL WORLD
Undergraduate
Capstone Seminar is designed to permit students to explore a topic as a group integrating various methods of inquiry. Pre-99 students will address one set of capstone competencies of their choice. Specific assessment and evaluation criteria as well as learning activities will be articulated by the instructor for a particular section of the course. Successful completion of Research Seminar is required to register.

SW 352
TECHNOLOGY, TRAINING, AND HUMAN PERFORMANCE
Undergraduate
What Robinson and Robinson describe as "the shift from providing training to improving performance" has been cited as a top priority in our fast-paced, global economy. This course covers the principles of training and human performance through an analysis of real case studies in a number of work environments. The course will also present the necessary technology and instructional design tools so that students can design their own training program and develop a basic training and performance plan that reflects their own work environments. Students are expected to have basic computer skills, including the ability to use and save work with Microsoft Word.

SW 353
THE CREATIVE BRAIN
Undergraduate
While brain structure and function can seem daunting, exploring this organ from the perspective of creative output gives learners a non-threatening frame of reference to which all can relate. Learners will look into traditional and contemporary theories of both creativity and brain versus mind, as well as how creativity is perceived in society.

SW 354
INTEGRATING MS OFFICE APPLICATIONS FOR REPORT WRITING
Undergraduate
Students will use an array of Microsoft applications and the Internet to set up a marketing conference spanning several days. They will create documents and solve problems using multiple applications to complete these tasks more efficiently.

SW 355
COMPUTERS AND SOCIETY
Undergraduate
This course explores how computing technologies such as computer software, hardware, and networking have affected our society. We will examine the basics of how these technologies work and how they have affected areas of human endeavors, as well as how they have changed, improved, simplified and complicated society.
SW 356
DATABASE DESIGN AND IMPLEMENTATION FOR SMALL BUSINESS APPLICATIONS
Undergraduate
This course will teach non-computer literate persons to be able to translate a business problem into a conceptual database design, and further to convert the design into a database application using Microsoft Access. By the end of the course, the student should be able to apply knowledge to the following: (1) describing basic database concepts and using common database terminologies; (2) designing databases using appropriate designing notations; (3) translating a schema into a database application in Access; (4) conducting simple user-interface design; and (5) designing small business-based applications.

SW 357
URBAN GEOGRAPHY: THE STUDY OF CITIES
Undergraduate
Course topics include the following: early settlement patterns, their political and social development; transportation mechanisms and their impact on concentrated centers of population; consumerism and trade; locational factors for settlements; neighborhood development, from ghettos to gentrification; urban planning issues; ethnic diversity, poverty and social planning; the built environment of structures; modes of communication with respect to technology, its impact on the global population; comparisons / contrasts of contemporary development between global world cities and American cities.

SW 358
INTRODUCTION TO SPREADSHEETS
Undergraduate
This is an introductory course with Microsoft Excel. Topics include spreadsheet basics, formatting and printing, formulas and functions, charting, and data management. No prior knowledge of spreadsheet software is required; however, students are expected to have a working knowledge of Windows. Upon successful completion of this course, students will be able to do the following: create and test spreadsheets using Microsoft Excel; explain and use functions, create pie, bar, column, and line graphs; explain and use linking and embedding; use clip art to add visual interest to a spreadsheet; and explain and use data management capabilities such as data forms, query, filter, subtotals, sort, and pivot tables.

SW 359
EVERYDAY BIOMEDICAL ETHICS
Undergraduate
'Right, wrong; sometimes right, rarely wrong; wrong for children, right for women': Biomedical issues are in the news almost every day, and often it's hard to understand what to think, even less how to think, about their ethical implications. Some ethical issues have a long history and substantial background, while others are so new that even ethical experts struggle. How can a non-expert intelligently read and understand what's published?

SW 360
SOCIETY AND INFORMATION TECHNOLOGIES
Undergraduate
Humans have a long line of technological advances that includes tools, weapons, transportation, mechanical, industrial, and medical advances. On one hand, the computer is just another invention that is part of this long line of technological advances. On the other hand, the ability to program the computer makes it different with an incredible diversity of uses. Computer technology has made large impacts in diverse areas such as sports management, health care, employment, manufacturing, education, defense, and automobiles and many other areas. This course explores how computing technologies such as computer software and hardware, and networking has affected our society. Students will examine the basics of how these technologies work and how they have affected areas of human endeavors. We will examine how these technologies changed, improved, simplified and complicated society.

SW 361
INTRODUCTION TO COMPUTER PRODUCTIVITY
Undergraduate
Microsoft Office is the most ubiquitous application suite in personal computing. There is little Office cannot do, from document creation and editing, e-mail and scheduling, spreadsheet and database management, desktop publishing, image editing and even Web design. In this course, we will explore several component applications of Office, focusing on word processor Word, spreadsheet Excel and presentation software PowerPoint, with the goal of developing facility with each application individually and using an integrated approach.
SW 362
INSTRUCTIONAL DESIGN FOR TRAINING
Undergraduate
This course will look at instructional design in much more depth than the Technology, Training and Human Performance Course. In this course, the student will study what Instructional Design is, how it works, and why it is important in the design of all types of career and educational training. The course will present various models of instructional design, then have the students design actual instructional training modules.

SW 363
THE SCIENCE OF YOGA
Undergraduate
Yoga is an ancient system of spiritual development and transformation. In the process of spiritual development, the practitioner of Yoga acquires a wide array of physical and psychological benefits that improve health and well being. Yoga and meditation (meditation is a branch of Yoga) have been demonstrated to be effective in relieving stress, treating anxiety and depression, preventing and healing injuries and improving the functioning of children with special needs. The Science of Yoga will explore the positive physical and psychological benefits of Yoga from a scientific perspective. We will examine scientific studies that have been done on the effects of Yoga and meditation to gain an understanding of why this system of spirituality has become an increasingly integral part of modern health and fitness practice. The ancient origins and philosophical foundations of Yoga will be evaluated in the context of modern understanding of physiological and psychological processes. Students in this class will practice Yoga and meditation techniques and keep a journal of the effects that they experience. They will compare their experiences with the data from scientific studies. Students will also share and compare their experiences from practicing Yoga and meditation with their classmates.

SW 364
WOMEN OF SCIENCE
Undergraduate
Students will explore the contributions of women scientists through recorded history, the essence and importance of their work, the social world in which they worked and their contemporaries, and the challenges they faced at various times in history. Each student will select a scientist about whom he or she will develop a final project, to include: biographical data, a synopsis of the scientist's socioeconomic and political world, description of her work and how it affected contemporary understanding of the world. Also, students will work in teams to find and present initiatives undertaken since 1945 to encourage involvement of women in science, math and technology fields.

SW 365
ADDICTION STUDIES
Undergraduate
This is an introductory course in the field of addiction studies. In this course we will examine the relationship between drugs and behavior, the personal and social concerns of drug-taking behavior and how drugs work in the body and mind. Legal and legally restricted drugs as well as medical drugs will be discussed. We will also cover issues of prevention, treatment and education. By the end of this course students will understand (1) the differences between use, abuse and addiction to drugs; (2) the extent of substance abuse in the United States today; (3) the legal, social and cultural ramifications of substance abuse; (4) methods of treatment and prevention of substance abuse; (5) major classifications of addictive substances; and (6) how drugs work in mind and body. This course will be a mix of lecture, discussion, videos and other supplemental materials. In addition to their competence papers, students will work in small groups on projects related to addiction and will present their group's findings to the class.

SW 366
EXPRESSIVE ARTS THERAPY
Undergraduate
This course offers a multi-arts approach in which different art modalities are woven into the therapeutic process as appropriate to a client's situation. It is grounded not in any particular techniques or media but in the capacity of the arts to respond to human suffering. Various arts--poetry, movement, drawing, painting, journaling, improvisation, music, and sculpture--are used in a supportive setting to facilitate growth and healing. Expressive arts processes have been used successfully in almost all psychotherapeutic contexts, ranging from work with the severely ill to the facilitation of human growth and potential. There is a growing use of the arts in health education, hospice work, and in community art projects especially after catastrophic events. The class will be conducted in a workshop format in which theoretical content will be combined with experiential learning. Lecture, discussion, audio-visual presentation, experiential exercise, guest speakers, and field trips comprise the structure of the class.
SW 367
LEISURE, RECREATION, AND HEALTH
Undergraduate
This course will stimulate your thinking about the meaning of leisure in your life. Leisure today and historically has been central to the human experience. It is an elemental experience, essential to the total well-being of every person; it is a reflection and expression of the cultural values of a society; it is an important vehicle for treatment. Leisure and recreation services are also essential for healthy communities in terms of social climate, environmental quality, and economic stability. Leisure services comprise one of the largest and fastest growing industries in the world, whether measured in dollars spent, persons served, hours of time devoted, or resources used. The study of leisure and recreation is a broad discipline, combining diverse fields of study and professional practice. This course will (1) illustrate the importance of leisure to you and your loved ones, (2) contribute to your ability to become an informed consumer of leisure, (3) question the binary relationship of work and leisure and, (4) teach you how to use leisure to increase emotional and physical health, resulting in a higher quality of life. The course will be interactive and participatory.

SW 368
ADVANCED POWERPOINT AND WORD
Undergraduate
In this advanced course, students will master higher level skills in PowerPoint and Word and study beginning principles of design. Course skills include organizing content, formatting content, collaborating on documents, and formatting and moving documents. This course will begin with studying the Microsoft Certificate Exams for PowerPoint and Word.

SW 369
CHRONIC ILLNESS: WHEN SOMETHING IS ALWAYS WRONG
Undergraduate
Everyone has either a disorder or a relative with a disorder, but often we focus only on the clinical information that physicians give us, especially since they can't quantify suffering and impact. We will do a bit of applied anatomy, and look at the psychosocial aspects of chronic illness.

SW 370
SEXUAL HEALTH AND DEVELOPMENT
Undergraduate
This course will introduce students to a variety of topics related to human sexuality. The course will begin with a historical view of sexuality and lead to an analysis of current topics in sexuality related to health and physical development, culture and politics. The format of the course will consist of class meetings every other week and attentive participation to the online discussion board in between class sessions. Students will be required to read articles provided by the instructor and discuss them during class and on the course discussion board. The course will be divided into several modules related to sexual and physical health, relationships and gender issues, atypical sexual behavior and the roles of spirituality, culture, media, gender and aging. Students will participate in class presentations and present research on the web board related to the competencies taken in the class.

SW 371
DINOSAURS
Undergraduate
Dinosaurs are one of the most diverse and successful groups of vertebrates in earth's history. Originating over 220 million years ago, they dominated earth's land biomes for over 150 million years and diversified to include the largest land animals in earth's history, a wide range of aquatic groups, and even a diverse clade capable of flight (the birds). Consequently, mammals remained in the background as small nocturnal creatures during the dinosaurs' long reign. Only after a cataclysmic extinction event 65 million years ago involving most dinosaur groups did the mammals diversify into modern groups including our own primate lineage. This course will introduce students to the remarkable dinosaurs, tracking their origin, surveying their success, and evaluating their decline. Learning will emphasize investigation of the forms, function, and variation within the major dinosaur groups as well as the connections of dinosaur evolution to diverse factors such as climate change, ecology, biological competition, and mass extinction. The course learning activities will encompass discussions, readings, lectures, labs, internet resources, museum resources and original inquiry.

SW 372
MICROCOMPUTERS AND HOME NETWORKING
Undergraduate
In this course, students will be introduced to common computer applications in MS Office: Word, Excel, Power Point, Access and Outlook. Students will also learn how to use browsers as well as learn how to navigate the Web, mark favorite pages, save pages, set options and security levels. We will explore PCs and Mac operating system environments; reviewing their similarities and differences. Finally, we will develop basic technical skills in designing and managing home networks in terms of connections, security, and wireless systems.
SW 300
SUSTAINABILITY AND PROFESSIONAL PRACTICE
Undergraduate
Environmental sustainability problems are multidimensional and interconnected to both the earth and human relationships. In this course, students will analyze their workplace, organization or a desired professional setting using the principles of environmental sustainability and recognized best practices. On the basis of this analysis, they will make recommendations. Students will learn to use decision tools and data to conduct this analysis and make strategic environmentally sustainable decisions within their professions. Learners will explore how to make complex and current science content relevant, accessible, and personal. They will be able to explain the science behind sustainability and environmental management, as well as how sustainability connects with the human dimensions of organizational relationships. Additionally, this course will provide a hands-on approach to allow learners to acquire the analytic, communication, and work skills required to be problem-solving professionals and contributors to human sustainability within organizations.

T&L 400
CLINICAL EXPERIENCES WITH INFANTS AND TODDLERS
Graduate
Teacher candidates will observe and interact with infants and toddlers (25 clock hours). Appropriate lesson planning and assessment techniques and tools will be emphasized in the seminar.

T&L 401
CLINICAL EXPERIENCE IN EARLY LANGUAGE AND LITERACY DEVELOPMENT
Graduate
Teacher candidates will observe and interact with young children and their families in programs, related to language and literacy development. A weekly seminar is required.

T&L 402
CLINICAL EXPERIENCES WITH PRE-SCHOOLERS
Graduate
Candidates will observe and interact with preschool-age children (25 clock hours). Appropriate early childhood curricula, assessment and instructional methodologies will be emphasized. COREQUISITE(S): T&L 407.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 403
CLINICAL EXPERIENCES IN PRIMARY GRADES
Graduate
Students will observe, interact with, and teach primary-age children (25 clock hours). Appropriate curricula, assessment and instructional methodologies for children in the primary grades (K-3) will be emphasized.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 404
INTRODUCTION TO ELEMENTARY EDUCATION
Graduate
This is the first in a sequence of theory and practice courses that serves to familiarize teaching candidates with the world of elementary and middle schools. Through observation and participation in schools, self-reflection, independently created assignments, cooperative learning assignments and classroom discussion, candidates will acquire familiarity with schools and classrooms including: social/cultural context, classroom climate, classroom management, curricular coherence, standards-based instruction, and teacher professional beliefs and practices. Written critical reflections and papers serve as initial foundation for the development of teaching philosophies. COREQUISITES: For T&L EE majors, concurrent enrollment in SCG 403 and T&L 583 is required.

T&L 406
LANGUAGE DEVELOPMENT OF THE YOUNG CHILD
Graduate
This course will focus on the development of language in young children, including techniques and materials for use in assessing and enhancing speech and language development with appreciation for dialectic variations. Emphasis will be on issues relating to second language learners and young children with special needs.
T&L 407
PREPRIMARY PROGRAMS: CURRICULUM AND STRATEGY
Graduate
Students will plan, implement and evaluate activities that promote the physical, emotional, social, spiritual, creative, and cognitive
development of preschool children from diverse cultural and socioeconomic backgrounds. Methods of facilitating children's play,
individualization through building on children's experiences, learning styles and interests, using technology, and developing learning centers
will be emphasized. Assessment practices are incorporated in this experience.

T&L 409
PROFESSIONAL PRACTICE IN ELEMENTARY SCHOOLS
Graduate
This course is an introduction to the professional roles required of elementary school teachers. Students will develop a knowledge-based
framework for considering the many factors involved in decision-making in an elementary classroom. This framework will serve to guide
students as they create a social studies curriculum unit, which integrates planning skills, teaching strategies, classroom management and
evaluation techniques. Daytime clinical hours are required during this course. (Only for Special and Elementary Education (SEE) majors).

T&L 410
CHILDREN'S LITERATURE AND FAMILY LITERACY
Graduate
This course addresses literacy development in young children and the roles of families and early childhood programs in fostering that
development. Strategies for enhancing literacy, such as word play, storytelling, conversations will be provided and all appropriate genres of
children's literature will be explored. Finally, the course features appropriate poetry, early books for infants and toddlers, read-aloud
materials, and all genres of children's literature for young children.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 411
ASSESSMENT IN EARLY CHILDHOOD SPECIAL EDUCATION
Graduate
Candidates will study, use, and evaluate early childhood assessment methods and tools that are appropriate for young children with diverse
learning, cultural, and socioeconomic experiences. Focus of the course is on the teacher candidate's acquisition of knowledge and skill
regarding an array of formal and informal assessment instruments and techniques used to gather information needed for making decisions
about typical and atypical children served in individual and group learning situations. Focus is directed toward the development of curricular
goals and instructional approaches that evolve from the assessment information. Such information is used to create learning plans, including
Individualized Family Service Plans (IFSP) and Individualized Education Plans (IEP), serving child and family responsively.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 412
EMERGING READING AND LANGUAGE ARTS
Graduate
This course focuses on the curriculum content and sequence, instructional and assessment strategies as well as considerations integral to the
creation of authentic, effective emergent literacy environments and engagements for pre-kindergarten through third grade. Theory and
practice principles are woven into course assignments and required field experiences designed to observe, teach, and reflect upon instructional
decisions made for individual as well as groups of children. Prevailing curricular and instructional models (e.g., code-based, meaning-
oriented, balanced) and their histories are compared and contrasted. The influences of development, home language(s) and dialect(s)
especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidate instructional planning and
teaching. Case studies and lesson planning facilitate the application of course content. COREQUISITES: For T&L EE majors, concurrent
enrollment in T&L 415 and T&L 583 is required.

(T&L 404 or T&L 408) and Advanced Teacher Candidate Standing are prerequisites for this class.
T&L 413
READING/LANGUAGE ARTS IN THE MIDDLE GRADES
Graduate
This course extends Emerging Reading and Language Arts to facilitate increased independence in students as strategic readers and competent writers. It focuses on the further development of reading comprehension and writing abilities in the intermediate grades and middle school. Emphasis is placed on the complex nature of literacy addressing issues such as content-area literacies, learning in and across languages, and critically consuming and producing a wide variety of texts (including online, multimedia and print based). Application of course material is facilitated through fieldwork focusing on the design, teaching, and reflection on literacy lesson(s) for intermediate learners. COREQUISITES: For T&L EE majors, concurrent enrollment in LSI 446 and T&L 583 in a public school is required.
T&L 412 and Advanced Teacher Candidate Standing or admission in the SEE program are prerequisites for this class.

T&L 415
TEACHING AND LEARNING ELEMENTARY SCHOOL SCIENCE
Graduate
This course is an introduction to materials, methods and strategies for helping students in grades K-8 become scientifically literate: i.e., to understand the nature of science and its impact on technology. Particular attention will be given to theoretical views about how children learn science, the proper use of materials and equipment, the development of scientific thinking, e.g., skills in observing, classifying, collecting, and interpreting data, questioning strategies, and ways to assess student progress. Inquiry-based lesson plans and case studies invite application of course content. Daytime field required during this course. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 419 and T&L 584 is required.
T&L 404 or T&L 409 and Advanced Teacher Candidate Standing are a prerequisite for this class.

T&L 416
TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS
Graduate
This course is an introduction to materials, processes for developing, and strategies for mathematical literacy in grades K-8. Particular attention will be given to theoretical views about how children learn mathematics, the proper use of manipulative materials, the development of mathematical thinking, e.g., skills in estimation, pattern recognition, or spatial perception; the use of technology, and ways to assess student progress. Lesson planning, teaching, and critical reflection are an integral component of this course. Clinical hours required.
COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 412 and T&L 583 is required.
T&L 404 or T&L 409 and Advanced Teacher Candidate Standing are a prerequisite for this class.

T&L 418
LEARNING THROUGH THE ARTS
Graduate
This course focuses on the arts (visual art, music, drama and dance) as an integral component of teaching and learning in the elementary school curriculum. Students will explore a variety of art forms and disciplines to develop a critical aesthetic and artistic vocabulary. Students learn to help children utilize artistic media in the exploration and expression of thoughts and feelings. Emphasis is placed on design, construction, and implementation, and assessment of authentic conceptual classroom arts activities that integrate the arts with other classroom curricula. Daytime clinical hours (10) are required during this course. Formerly CDG 418. COREQUISITES: For T&L EE majors, concurrent enrollment in SCG 408 is required.

T&L 419
CURRICULUM AND STRATEGIES: SOCIAL STUDIES
Graduate
This course is an introduction to an integrated view of social studies for engaged citizenship. Through the study of strategies (such as concept formation, historical inquiry, role-play, etc), materials (such as primary sources) teacher candidates will learn and apply principles of curricular integration to create curriculum/units that engage elementary learners in the exploration of issues, ideas, and perspectives that impact our world. COREQUISITES: For T&L EE majors, concurrent enrollment in T&L 415 and T&L 584 is required.
Advanced Teacher Candidate Standing is a prerequisite for this class.
T&L 420
MATH AND SCIENCE IN EARLY CHILDHOOD
Graduate
This course applies child development principles to the planning of science and mathematics experiences for both typically and atypically developing young children. Emphasis is placed on understanding how children develop problem-solving skills, and on recognizing how teachers can facilitate inquiry-discovery experiences for young children with diverse learning styles and needs. Course assignments include participation in experiments and field-based experiences in mathematics and sciences. Teacher candidates are required to develop and provide developmentally and culturally appropriate activities in science and mathematics activities for young children.

SCG 404, T&L 432, and Advanced Teacher Candidate Standing are prerequisites for this class.

T&L 421
CHILD AND FAMILY IN THE URBAN COMMUNITY
Graduate
This course focuses on understanding the diversity of children and families in approaches to development, learning, and disability. Strategies in developing positive and supportive relationships with families of young children with special needs, including family-centered practices, will be explored. Particular attention is given to the challenges faced by teachers and other professionals in early intervention in assessing children?s needs and providing services, which are reflective of the child?s development within his/her diverse cultural and community context. In addition, the course examines ways to develop and maintain productive and collaborative relationships among professionals and families, communities, and other professionals across the range of support systems in the IFSP and IEP planning processes.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 422
CLASSROOM ASSESSMENT
Graduate
This course focuses on study, use, and evaluation of assessment practices in diverse, K-8 contexts. Assessment is addressed as part of instructional systems, attending to issues including: the appropriate use of standardized measures, formal and informal classroom assessment, portfolio development, as well as reporting to all stakeholders. This course also emphasizes ways of involving students and parents in assessment processes, how to observe and assess children individually and in classroom settings, and the use of numerous technologies as components of a classroom assessment system.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 423
FUNCTIONAL BEHAVIOR ASSESSMENT: POSITIVE BEHAVIORAL SUPPORT AND INTERVENTION METHODS
Graduate
This course is designed to prepare early childhood pre-service teachers to work with children who present a variety of challenging behaviors in the classroom. Grounded in principles of Applied Behavior Analysis, the philosophy of the course is based on the premise that understanding the underlying causes of children?s externalizing and internalizing behavior enables the teacher to utilize appropriate techniques in conducting behavior intervention and classroom management. Using Positive Behavioral Support and Functional Behavior Analysis (a competency required for all teachers under the provisions of IDEA), students will learn how to design and develop a Behavior Intervention Plan. Diverse methods for addressing a variety of behaviors are explored and practiced through field-based assignments that include application of behavioral assessment and intervention tools, as well as techniques. Understanding the impacts of current legislation, policy and research on practice is fostered and developed.

SCG 404 and Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 424
INTRODUCTION TO SECONDARY EDUCATION
Graduate
This course is an introduction to the DePaul Secondary Education program as well as the professional world of secondary school teaching. In this course, candidates develop the knowledge and skills necessary for being a reflective practitioner. Candidates focus on understanding themselves (professional identity) and their behaviors in teaching situations with students in schools. These insights, combined with subject-matter knowledge, guide the development of various course assignments. Candidates will learn how to observe effectively in a school setting, to identify school governance issues, to understand school environment and the current social issues that shape it, and will experience a variety of teaching methods and resources for their future teaching. Candidates will acquire knowledge of important social concepts and theories that affect education, especially as they affect educational change in urban societies. As candidates become aware of differences in individual, ethnic, and cultural group attitudes, values and needs, they also will learn to recognize the complexities of teaching and learning in a pluralistic society. Candidates will be committed to teaching as responsible professionals who act ethically as well as in a collegial fashion. In addition to class attendance, candidates are required to complete 15 daytime fieldwork hours as part of the course. It is highly recommended that this course be taken concurrently with SCG 406.
T&L 425
CURRICULUM AND INSTRUCTION IN SECONDARY EDUCATION
Graduate
This course will examine materials, methods, and techniques appropriate for teaching in secondary schools. Topics include writing instructional objectives, developing lesson plans, designing a curriculum unit, understanding classroom management and assessment related issues. Students will be encouraged to reflect upon their own emerging educational philosophies as well as draw from previous courses they have taken. Students will be given many opportunities for planning, using and evaluating a variety of instructional strategies while preparing and teaching a micro lesson in front of their peers. Students will be committed to teaching as a professional acting responsibly, ethically, and collegially in accordance to Vincentian Personalism. 30 hours Level 1 Field Experience required.

T&L 426
TEACHING WRITING
Graduate
Prepares teacher candidates for teaching writing and composition at the middle and secondary school levels. The course focuses upon methods of teaching composition, examination of literature and research about the composing process, the development of language and reading skills, and the assessment and evaluation of writing. The development of writing curriculums will also be explored. 30 hours Level 2 Field Experience required

T&L 427
YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS
Graduate
This course is a survey of the field of early childhood special education, including the Early Intervention System. Characteristics of infants, toddlers, and young children with special needs are examined in this course. Methods of working with different disabilities during children's early years will be explored. Strengths and needs of families of young children with disabilities and collaboration with family members will be emphasized. Understanding the impacts of current legislation, policy, and research on practice is fostered and developed. Completing 15 hours of field experience in an early childhood special education setting is a part of this course's requirements.

SCG 404 and Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 428
TEACHING LITERATURE
Graduate
Prepares teacher candidates for teaching literature at the middle and secondary school levels. Examines contemporary issues in the teaching of literature, explores methods of teaching major literary genres, addresses problems of literacy and focuses on the transactional nature of reading and writing. Emphasis on developing a repertoire of ways of teaching literature and a variety of literature curriculums. 30 hours Level 2 Field Experience required.

T&L 429
TEACHING YOUNG ADULT LITERATURE
Graduate
This course is devoted to the study of Young Adult Literature: an exciting, emerging field. Issues and ideas to be examined include the following: current debates regarding issues in curriculum and teaching; selecting, reading, evaluating, and teaching young adult literature; cultivation of life-long reading habits and literacy development. Students will become familiar with major writers of young adult literature, read diverse texts, explore major genres, review award winning novels, consider the role of the media, and develop creative projects.

T&L 425 and Advanced Standing are a prerequisite for this class.
T&L 430
TEACHING LITERACY K-12
Graduate
This course provides an overview of the curriculum, instruction, and assessment strategies used in K-12 classrooms to foster and develop students’ L1 and L2 literacies. Through guided examination of prevailing theories of language acquisition and development that currently influence classroom practices across the K-12 continuum, this course enables future teachers of world languages to grow in their understanding of the literacy-learning contexts that students will bring to their language classrooms. Issues that emerge in planning and conducting literacy instruction in schools are discussed and deliberated through university classroom experiences as well as required field experiences (15 hours, minimum; level 1). Course participants enjoy multiple opportunities to apply and analyze theories; to observe, critique, and practice instructional strategies; to make informed curricular and instructional decisions; and to use assessment to inform one's planning.

T&L 431
EARLY LANGUAGE AND LITERACY DEVELOPMENT
Graduate
This course will focus on enhancing language development and promoting early literacy in young children. It addresses instruction and assessment of language and literacy skills. Students will learn how family/child and teacher/child interactions promote language and literacy development and learning. Implementation of language and literacy curricula and activities that lead to growth in the key areas of literacy development for preschool and primary aged children will be explored. (Combination of previous T&L 406 and T&L 412).

T&L 432
EARLY CHILDHOOD CURRICULUM STRATEGIES AND PHILOSOPHY (BIRTH-8)
Graduate
Operating from a constructivist curricular perspective that considers individual child and the social learning context, candidates will plan, implement and evaluate activities that promote the physical, emotional, social, spiritual, aesthetic, creative, and cognitive development of young children from diverse cultural and socioeconomic backgrounds. Methods of facilitating children’s play; individuation through building on children's experiences, learning styles and interests; using technology and, developing learning centers will be emphasized. A variety of teaching methods and classroom management strategies will be discussed and illustrated, including teacher led instruction and student-centered instruction. Students will be encouraged to reflect upon their own emerging educational philosophies and teaching styles as they take part in laboratory and field experiences. Many opportunities for planning, using and evaluating a variety of teaching methods will be offered. Each student will write at least one teaching unit on a primary social studies theme. (Combination of previous T&L 407 and T&L 408)

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 433
EARLY CHILDHOOD SPECIAL EDUCATION STRATEGIES
Graduate
This course focuses on a range of curricular and instructional strategies that foster individual abilities and meet the individual learning needs within the contexts of group and individualized instruction in a variety of learning situations: classrooms, community and home environments. Teacher candidates acquire knowledge and skill to develop individual long-term and short-term educational service plans based on knowledge of children’s needs and abilities; families’ goals, priorities, and concerns for their children; communities; content areas; and early childhood curriculum goals. (Replaced HSC 408).

T&L 434
LITERACY, LITERATURE, & THE YOUNG CHILD
Graduate
This course addresses the phenomenal process of literacy development in young children. Strategies for enhancing literacy through unlocking the phonemic code, acquiring vocabulary, and comprehending oral as well as print messages are emphasized within the context of choosing and using high-quality literature for children from birth through age 8. Curriculum content and sequence, instructional strategies, and assessment processes are interwoven across course assignments and field experiences. The influences of development, home languages and dialects (especially those of U.S. metropolitan areas), and educational settings are studied and applied to candidates’ instructional planning and teaching.

SCG 404 and Advanced Standing are a prerequisite for this class.
T&L 436
TEACHING AND LEARNING SECONDARY SCHOOL MATHEMATICS
Graduate
Prepares teacher candidates for teaching mathematics at the middle school and secondary school levels. Examines contemporary issues in teaching mathematics, methods of teaching secondary mathematics, and recent history in mathematics curriculum development of alternative teaching strategies and the implementation of the NCTM Standards. Lesson and unit development, evaluation and classroom management also will be discussed. 30 hours Level 2 Field Experience required.

T&L 439
METHODS OF SECONDARY SCIENCE EDUCATION
Graduate
This course is designed to update teachers in the methods of teaching science. This involves reviewing the processes of science, theories of learning, and instructional strategies appropriate to laboratory science. This course also provides an update on the current trends and issues in science education as well as an analysis of successful science curricula programs. 30 hours Level 2 Field Experience required.

T&L 440
EARLY CHILDHOOD EDUCATION CROSS-CULTURAL STUDIES
Graduate
The course will discuss the historical, philosophical and cultural foundations of the education of young children in a multicultural society, emphasizing the role of ethnicity in development of young children within the context of families, childcare centers, and educational systems. Topics include: history of immigration and predictions for the future; the effects of population shifts on the education of English Language Learners; the impact of laws, litigation and executive orders on bilingual/English-as-a-Second- Language education; understanding cultural and linguistic differences regarding locating and using educational resources.

T&L 441
EARLY CHILDHOOD METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS
Graduate
This course focuses on best practices in teaching and learning in ESL and bilingual early childhood classroom contexts. Students will learn about different approaches and methodologies currently used to support the development of listening, speaking, reading and writing in social and academic contexts in learners of English as a second language. Curriculum based-assessment, cultural awareness and self-reflective practice will also be addressed.

T&L 442
EARLY LITERACY DEVELOPMENT AND SECOND LANGUAGE ACQUISITION
Graduate
This course will examine the process of learning and using a second language. Research in second language acquisition (SLA) is multi-disciplinary in nature, reflecting the complexity of language learning and use. Linguistic, psychological and social processes that underlie language(s) learning and use will be introduced and applied to the understanding of this learning in young children. In this course, language acquisition theory concerning relationships between early literacy and oral language development in first and subsequent languages will be addressed.

T&L 443
ASSESSING YOUNG BILINGUAL/ ESL LEARNERS
Graduate
This course will focus on the discussion of basic principles and current approaches to assessment of language learning students in ESL Children’s language learning or language learning of children in EST and bilingual early childhood and early elementary educational settings. The different purposes of process and product assessment tools, authentic and curriculum-based forms of assessment, issues in the assessment of English Language Learners (ELLs), and assessment in academic areas for early elementary ELLs will be explored.
T&L 444
EARLY CHILDHOOD BILINGUAL/ESL PRACTICUM
Graduate
This course will focus on application of the theories in effective teaching practices, and assessment procedures appropriate for young English Language learners. It will emphasize on application of knowledge gained from previous ESL/ELL courses, and demonstration of skills necessary to work collaboratively and effectively with families of young English Language learners. Professional behaviors that respect, value, and support all children's native language and culture will be reinforced.
T&L 440, T&L 441, T&L 442, T&L 443, T&L 444, BBE 408 and BBE 409 or permission of the ECE Program Director are prerequisites for this class.

T&L 449
STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
Graduate
This course prepares candidates to teach world languages at the elementary, middle and secondary school levels consonant with an aligned approach to meeting national and state WLE standards and Common Core standards. It examines the theory and practice of traditional or standard methods of teaching world languages (e.g., communicative approach, natural approach, etc.) with an emphasis on developing alternative, post-method strategies and using diverse resources, as well as on reformulating world languages instruction to integrate subject matter content into the curriculum, including science, social studies, math, fine arts, etc. Engages candidates in understanding and applying the Five Cs - Communication, Cultures, Connections, Comparisons, and Communities outlined in the national standards - toward this end. Lesson and unit development, evaluation/assessment, and classroom management also will be discussed. Issues that emerge in planning and instruction are discussed and deliberated through university classroom experiences as well as required fieldwork (20/15 hours; level 1 in language of certification).

T&L 453
TEACHING HISTORY AND SOCIAL SCIENCE IN SECONDARY SCHOOLS
Graduate
Teaching, History and Social Science in Secondary Schools. Prepares for teaching history and social sciences at the middle and secondary school levels. Examines the nature and purpose of history and social sciences curriculum within secondary schools, the current status of social studies materials and practices, and issues confronting today’s secondary social studies teachers. Emphasis on alternative teaching strategies, resources for teaching and learning, teachers’ responsibilities in curriculum development and decision-making, and methods and materials for addressing cultural diversity. Lesson and unit development, evaluation and classroom management also will be discussed. 30 hours Level 2 Field Experience required.
T&L 425 and Advanced Standing are a prerequisite for this class.

T&L 455
READINGS IN AMERICAN HISTORY
Graduate
Prepares students for teaching American history at the secondary level. Readings focus on the foundational texts of American history from the colonial era to the late 20th century, with an emphasis on gaining content knowledge and applying it to teaching in the secondary classroom. Class discussions focus on matters of interpretation, evidence, and historiography. Offered during Fall and Summer terms.

T&L 465
ART AND PEDAGOGY
Graduate
This course alongside T&L 466 is intended as a two-course sequence each complementing the other. As T&L 466 explores the source materials and major concepts of visual art's content, T&L 465 focuses on teaching visual art. Building from the content requirements from their program or experience, students will understand how the art studio (content) experiences where ideas are developed translate to the preparation of teaching. Students will do this through multiple curriculum based projects intended for use in their own classrooms, including a 6th - 12th grade general course reader to assist in introducing an art historical overview that influences and connects to general middle and high school studio practices. As students work on these projects, they will continue to reflect on the coursework they have done in the content area as well as watching and learning from classroom teachers and teaching artists in the field. They will contemplate such questions as: "What are the connections among the arts disciplines? How can they be taught together, creating interdisciplinary courses at the middle and high school levels? What are the differences among the arts disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about artists, artistic periods and the nature of how artworks are produced. Site visits required. 30 hours Level 2 Field Experience required.
T&L 425 and Advanced Standing are a prerequisite for this class.
T&L 466  
**TEACHER AS ARTIST**  
Graduate  
This course builds on the work in T&L 465, which alongside T&L 466 is intended as a two-course sequence each complementing the other. As T&L 465 focuses on the art of teaching the visual arts, T&L 466 explores the source materials and major concepts of visual art content. Historically, artistic movements have shaped and currently identify the theories we use to define our most immediate environment. The major concepts can be connected to the artist studio and to the descriptions some artists make about the studio as a teaching space. In the course students will be introduced to a wide range of artists and their work, artistic movements and the individual artists who use teaching as a medium. How does an emerging artist or pre-service teaching artist draw on the understanding of their own work as a platform to build core principles of pedagogy? What is the link that combines a dynamic studio practice with an inspired methodology for teaching visual art? We will address these questions through creating a visual art teaching curriculum portfolio and writing a reflective artist monograph, produce a final exhibition of art and work alongside teachers and artists in the field. Site visits are required. 30 hours Level 2 Field Experience required.

T&L 425 and Advanced Standing are a prerequisite for this class.

T&L 480  
**INTERNSHIP WITH INFANTS AND TODDLERS**  
Graduate  
Candidates conduct 75 hours of intense supervised fieldwork in an infant/toddler center where they are observing and documenting behavior and interactions, planning activities, and assessing development in children ages birth to 3. Candidates will also participate in a twice a quarter, hour and a half, seminar to reflect and discuss aspects of infant/toddler development and care, making connections between theory and practice. Onsite meetings with groups of candidates will be held weekly for supervision and reflection on practice.

T&L 481  
**INTERNSHIP IN PRESCHOOL SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE)**  
Graduate  
Candidates conduct 75 hours of intense supervised field work in preschool during the winter quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have either taken ECE 310: Preprimary Programs: Curriculum and Strategy (at the undergraduate level), and T&L 432: ECE Curriculum Strategies and Philosophy (at the graduate level) in a previous quarter, or they are taking these courses as co-requisites with this internship.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 482  
**INTERNSHIP IN PRIMARY SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE)**  
Graduate  
Candidates conduct 75 hours of intense supervised field work in a primary grade (K-3) during the spring quarter. The internship is designed for advanced ECE candidates to be taken before student teaching. Candidates taking this internship have either taken ECE 311: Curriculum and Instruction in Primary Grades (at the undergraduate level), and T&L 432: ECE Curriculum Strategies and Philosophy (at the graduate level) in a previous quarter, or they are taking these courses as co-requisites with this internship.

Advanced Teacher Candidate Standing is a prerequisite for this class.

T&L 525  
**READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM**  
Graduate  
This course analyzes the relationships among reading, writing, speaking and listening. It encourages middle level and high school teachers in all disciplines to take these interrelationships into account and to plan curricula that include current teaching strategies to enable students to become better readers, writers and thinkers in their various content-areas. This course will also concentrate on group process and its role in effective teaching within and across content-areas. Language use, learning and teaching are considered from a multicultural perspective. 30 hours Level 2 Field Experience required.

TCH 471 or TCH 472 or TCH 473 or TCH 474, and Advanced Teacher Candidate Standing are prerequisites for this class.
T&L 565
INDEPENDENT STUDY TOPICS
Graduate
This course is a self directed graduate course in the Visual Arts Education Program. Candidates who consider this course must develop a written proposal for their work and identify professional expectations of this quarter long immersion in advanced study. Candidates may select from a range of possible pursuits from preparing a new body of work or preparing an exhibition to working within a host of selected museums or galleries as an art education intern throughout the city and suburbs. All candidates are required to meet with a faculty member for an initial interview to discuss contact hours, needs and limitations, critique times and locations and the required documentation from the 11 week experience. All proposals must be approved by a faculty member in the program.

T&L 575
WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
Graduate
This course engages students in WLE curriculum development and language program advocacy, creation, and sustainability based on an examination of federal and state WLE history and policies and on a review of national and state standards. Reviews theory and application of curriculum development to world language instructional programs, such as design, scope and sequence, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal world language education program models are examined and analyzed in light of WLE history, policy, and standards (20/15 hours; level 1).

T&L 575, BBE 407, BBE 526, BBE 560 and BBE 570 are prerequisites for this class.

T&L 583
FIELD EXPERIENCE LAB
Graduate
This field-based course will facilitate pre-service teacher candidates' experiences working in elementary and middle school classrooms. This supervised field experience is an opportunity to apply content and pedagogical knowledge in authentic settings. 24 clock hours are scheduled at school sites and visible during registration though subject to modification based on changes in schools' schedules. Students will enroll in this course multiple times during their program across diverse sites and will engage in different activities aligned with concurrent courses. COREQUISITES: For T&L EE majors, T&L 404 and SCG 403; or T&L 412 and T&L 416; or T&L 413 and LSI 446.

T&L 584
PRE-STUDENT TEACHING FIELD EXPERIENCE
Graduate
This field-based experience occurs in teacher candidates' student teaching sites. Scheduling is negotiated between teacher candidate and mentor teacher based on classroom social studies and science content area schedule. This supervised field experience is an opportunity to apply content and pedagogical knowledge as well as gain introductory contextual understandings of student teaching site. For T&L EE majors, completed application to student teaching. COREQUISITES: For T&L EE majors, T&L 419 and T&L 415.

T&L 585
ELEMENTARY STUDENT TEACHING
Graduate
Students will be placed for a minimum of 10 weeks in an elementary school. Seminar will meet once a week, in the participating schools and/or at DePaul. At first, they will focus on issues of immediate concern to student teachers. As the students gain experience the seminar will examine six or eight classroom issues, that is, topics which students have found to be significant on the basis of their experience. These would include such things as assessment, evaluation, classroom management, curriculum planning, and relationships with colleagues. After delineating what the issues are, students would be expected to analyze and discuss readings which relate to the issues. Open only to DePaul students.

T&L 586
ELEMENTARY STUDENT TEACHING SEMINAR
Graduate
This course is taken concurrently with T&L 585, Elementary Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and careers as teachers. COREQUISITE(S): T&L 585

T&L 588
INDEPENDENT STUDY IN TEACHING AND LEARNING
Graduate
PREREQUISITE(S): Permission of instructor, department chair and Associate Dean.
A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

SCG 451 and an approved thesis proposal is a prerequisite for this class.

T&L 590
SECONDARY STUDENT TEACHING
Graduate
Students will be placed for a minimum of 10 weeks in a secondary school. Seminar will meet once a week, in the participating schools and/or at DePaul. At first, they will focus on issues of immediate concern to student teachers. As the students gain experience, the seminar will examine six or eight classroom issues; that is, topics which students have found to be significant on the basis of their experience. These would include such topics as assessment, evaluation, classroom management, curriculum planning, and relationships with colleagues. After delineating what the issues are, students would be expected to analyze and discuss readings that relate to the issues. Open only to DePaul students.

T&L 591
SECONDARY STUDENT TEACHING SEMINAR
Graduate
This course is taken concurrently with T&L 590, Secondary Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and careers as teachers. COREQUISITE(S): T&L 590

T&L 592
WORLD LANGUAGES STUDENT TEACHING
Graduate
Student teaching is the culminating experience of the World Languages certification program. It is a ten-week, 30-hour/week experience. Students must successfully complete student teaching with a grade of B- or better in a language classroom in which they are seeking certification to teach. The course is taken concurrently with T&L 593, World Languages Seminar. Open only to DePaul students.

T&L 593
WORLD LANGUAGES SEMINAR
Graduate
This course is taken concurrently with T&L 592, World Languages Student Teaching. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and careers as teachers. COREQUISITE(S): T&L 592

T&L 595
EARLY CHILDHOOD STUDENT TEACHING
Graduate
This course requires students to participate in supervised teaching at a cooperating school, five full days per week, for an academic quarter. Part of the teaching will be in a preprimary setting and part will be in a primary setting. Feedback and discussion of issues encountered in student teaching as well as new materials and techniques of student teaching will be included. Open only to DePaul students.

T&L 596
EARLY CHILDHOOD STUDENT TEACHING SEMINAR
Graduate
In this seminar, candidates will reflect upon their teaching experiences with young children, and collaborate with colleagues and instructor to identify alternative strategies for problematic situations. Candidates will outline ways to maintain strategies for lifelong learning. In addition, candidates will share resume development and job-search strategies. COREQUISITE: T&L 595.
T&L 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
Registration is this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

T&L 611
INDUCTION INTO THE TEACHING PROFESSION: SECONDARY
Graduate
This course is designed to assist first-year secondary teachers to make the transition from student teaching to teacher. The course creates a bridge between first-year teachers' formal education and the realities of their classrooms. In particular, the course provides assistance with the following: 1) understanding their induction into the profession; 2) analyzing their new educational contexts; 3) actualizing their educational philosophies; 4) developing their pedagogical knowledge; and 5) identifying and making the most of professional support systems within their schools.

T&L 590 is a prerequisite for this class.

T&L 614
INDUCTION INTO THE TEACHING PROFESSION: EARLY CHILDHOOD
Graduate
This course is designed to assist first-year early childhood teachers in making the transition from student teaching to teacher. It creates a bridge between first-year teachers' formal education and the realities of their classrooms, providing assistance with: understanding their induction into the profession; analyzing their new educational contexts; actualizing their educational philosophies; developing their pedagogical knowledge; and identifying and making the most of professional support systems within their schools.

T&L 595 is a prerequisite for this course.

T&L 615
SPECIAL TOPICS IN TEACHING AND LEARNING
Graduate
Current issues and problems in education will be discussed. Focus will be current research and best practices.

T&L 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

TCH 320
EXPLORING TEACHING IN THE URBAN HIGH SCHOOL
Undergraduate
(JYEL CREDIT) This course is an invitation to secondary education as a profession, an opportunity for students considering education as a career to explore the reality of teaching and learning a disciplinary content area in a variety of Chicago-area schools. Students will become familiar with different narratives of teaching through teacher and student biographies, testimonials, literature, film, and classroom observations. They will explore the interrelationships between, for example, popular cultural beliefs about schooling; teacher and student identities; and classroom interaction. The instructor will coordinate observations in several classrooms as the basis for intensive, guided reflective work, aimed at supporting students' initial and subsequent efforts of developing identities as disciplinary content educators (25 hours of high school classroom observation required). Course is also an introduction to the TEACH Program. Offered during Fall, Winter, and Spring terms.
TCH 390
CAPSTONE: INTEGRATING EDUCATION & DISCIPLINARY FOUNDATIONS
Undergraduate
This course is designed to help students conceptualize issues and opportunities in teaching their disciplinary content to diverse students and in different classroom contexts. Up to ten hours of community-based service/observation required. In this course, students will analyze and reflect on how teaching in their disciplines is informed by diverse cultures of schooling and youth, including the influences of economic, social, cultural, political, gender, and religious factors on schooling, educational policy and opportunity. Students will use disciplinary content to critically and creatively reflect on the teaching of that content in secondary schools. Students will be introduced to issues and ways of presenting essential disciplinary content in ways that engage diverse learners, including learners who have not been served well by formal education. Students will also develop a theory of teaching that emphasizes the intersection of disciplinary content with multicultural perspectives. Offered during Spring term only.

TCH 401
TEACHING AS A PROFESSION IN SECONDARY SCHOOL
Graduate
This course is an introduction to the TEACH Program, including the College of Education's conceptual framework and teacher dispositions, and to the professional world of secondary school teaching, including the policy bodies and stakeholders that impact teaching. Within this developing understanding of the larger context of secondary education, students will begin to articulate clearly professional identities and the behaviors inherent in those identities, including their impact on student learning. Drawing on previous coursework and their growing understanding of differences in individual, ethnic, and cultural group attitudes, values, and needs, students also will learn to recognize the complexities of teaching and learning in a pluralistic society. Ultimately, students will be committed to teaching as a responsible professional who acts in an ethical and collegial fashion. 25 Level 2 field experience required. Offered during Fall term only.

TCH 411
THE NATURE OF ENGLISH
Graduate
This course is designed to help students to see that the field of English Studies is bigger than the component they probably identify as English (it's Literature, Writing, and Linguistics/Grammar). Students will explore the formation of the discipline up to the current day, focusing on the shifting understanding of ways of reading, writing and thinking about language. They will strive to answer the questions: "What does it mean to be a student of language and literature?" and, "What are the ways of knowing characteristic of English and Writing, Rhetoric, & Discourse majors?" In doing so, students will relate the disciplinary content of their major to their daily lives and interests and to the larger framework of human endeavor and understanding, including identifying its importance to the personal lives of high school students. The course is a prerequisite for TCH 421. Offered during Winter term only.

TCH 412
THE NATURE OF HISTORY AND THE SOCIAL SCIENCES
Graduate
This course builds on the content course work students have done in the seven disciplines grouped under the heading "social sciences" (history, political science, geography, sociology, anthropology, economics, and psychology). In this class students will get further exposure to the basic concepts of the social science disciplines and consider the connections as well as differences between them. The course emphasizes how different disciplinary backgrounds lead students to bring different perspectives to their study of social phenomena and helps them see these phenomena from multiple vantage points. The course will employ a case study approach framed around social issues of interest to all seven disciplines (e.g. social control, threats, development, natural disasters). By the end of the course, students will have applied the knowledge and skills of multiple social science disciplines to evaluate social phenomena, considered the relationship and differences between those disciplines, and be prepared to enter TCH 422 where they will apply their content knowledge to inquiry and teaching in the field. Offered during Winter term only.

TCH 413
THE NATURE OF MATHEMATICS
Graduate
This course builds on students' mathematics understanding by emphasizing the universality of mathematics as a cultural endeavor. In it, students will explore the historical trends in mathematic and how those trends have been taught. Students will understand that, mathematics, at its core, is deductive; however, it also requires intuition. Thus, the course examines the interaction among intuition, experimentation, conjecture, abstraction, and deductive reasoning not only in the classroom but also in the everyday use of mathematics. It also examines the interplay between concrete problem-solving and generalization. Offered during Winter term only.
TCH 414
THE NATURE OF SCIENCE
Graduate
This course is about the nature of science and the interactions between science and society. It will build on the foundation of understandings that students already have about the processes and conventions of science developed through their years as science students to create opportunities for deeper understandings of the beliefs and assumptions inherent to the creation of scientific knowledge. These opportunities will be developed through direct interactions with professional scientists as well as through case studies and readings that illustrate the strengths, limits and pitfalls of the scientific endeavor as well as provide opportunities for students to relate science to their daily lives and interests and to a larger framework of human endeavor and understanding (e.g., relationships among systems of human endeavor including science and technology; relationships among scientific, technological, personal, social and cultural values). Cases will be drawn from different scientific disciplines as well as from modern and historic times. In this way, science students will have a better understanding of what it means to be a scientist and how science interfaces with society. The course is a prerequisite for TCH 424. Offered during Winter term only.

TCH 421
INQUIRY & APPLICATION IN DEVELOPING SECONDARY ENGLISH PEDAGOGY
Graduate
This course builds on TCH 411 by preparing teacher candidates to distinguish between what needs to be taught (content) and how it is taught (pedagogy), with an emphasis on understanding the historical shifts in the teaching of content and how these shifts inform teaching and learning in today's English language arts classrooms. The course also introduces students to methods of inquiry and reflection on content pedagogical knowledge. Students will examine their own educational experience through the lens of the historical trends, focusing on how they learned and what they understood their teachers to be doing. This initial case study will serve as an introduction into case study methods. Students will also develop expertise in one of the three historical trend areas -reading, writing, and language - and examine how the trend has informed teaching and learning and shaped curriculum, pedagogy, and assessment. Students will develop a case study of a practicing teacher using the lens of the historical trend in which they are developing expertise. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 411 is a prerequisite for this class.

TCH 422
INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY
Graduate
This course builds on the content knowledge students developed and reinforced in TCH 412. More, it asks them to make the shift from considering how a person prepared in the social sciences analyzes social phenomena to how such a person teaches the social sciences. Students will do this by developing two units of inquiry-based case studies that they could use in their own classrooms. The topics of these case studies will vary from section to section, depending on the needs of the students and expertise of the instructor. Possible topics include the Constitution, the Cold War, slavery, and the Iraq War. As students work on these projects, they will continue to reflect on the course work they have done in the content areas as well as the instruction they see teachers delivering in their field experiences. They will contemplate such questions as: "What are the connections between the social science disciplines? How can they be taught together, creating interdisciplinary courses at the high school level? What are the differences between the social science disciplines and what does this mean for secondary pedagogy? How can teachers use inquiry with their students, making sure they have enough guidance to learn about social events but also the freedom to pursue their interests and make sense of the world on their own terms?" By the end of this course, students through readings and their projects will have advanced their learning about the nature of inquiry, its implementation in the classroom, and the connections and differences between the social science disciplines. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 412 is a prerequisite for this class.

TCH 423
INQUIRY & APPLICATION IN DEVELOPING SECONDARY MATHEMATICS PEDAGOGY
Graduate
This course builds on TCH 413 by introducing students to inquiry methods to understand the teaching and learning of mathematics. Students will explore how mathematics has been and is taught by examining major paradigm shifts in mathematics education and the impact those paradigms and shifts have on pedagogical content knowledge, or knowledge of how to teach disciplinary content. Students will use case study methods to look at instructional practices and begin to articulate their own mathematics teaching pedagogy. With the completion of this course, students will have a deeper understanding of mathematical literacy and the barriers to understanding and teaching mathematics, as well as being able to identify what makes an exceptional math teacher who is able to address the needs of all students. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 413 is a prerequisite for this class.
TCH 424
RESEARCH METHODS & DISCIPLINARY INQUIRY: MATHEMATICS
Graduate
Following TCH 414, this course transitions from asking “what does a scientist do?” to a consideration of why science literacy in the general public has been so difficult to achieve. The focusing questions for TCH 424 are: “How do we teach science? What is science literacy? Why is an understanding of science important to the general public? and What are the major obstacles and strategies to achieving science literacy?” The course begins by participants self-reflecting on their own educational experiences that led to their paths in science education: what have been their successful learning strategies, how have teachers influenced their education and what have been successful (and less than successful) classroom instructional strategies? From this, students will begin science classroom observation, discussing their observations with their peers, and speaking with educators about their experiences teaching high school science and about the goals and short-comings of science education. Throughout this process, students will read seminal literature on science literacy and explore cases challenging their notions of the teacher-learner relationship and the relationship between science and society. As a result of this course, students will gain a deeper understanding of scientific literacy and the barriers to understanding and teaching science as well as identify what makes an exceptional science teacher able to prepare both future scientists and a knowledgeable public. 25 Level 1 Field Experience hours required. Offered during Spring term.

TCH 414 is a prerequisite for this class.

TCH 451
RESEARCH METHODS & DISCIPLINARY INQUIRY: ENGLISH
Graduate
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, the course focuses on research related to the teaching of the English language arts in the middle school and high school and pedagogical content knowledge, including research on teaching and learning, curricula and instructional delivery, assessment, and the relationship of socio-cultural, economic, and language use to teaching and learning disciplinary-specific content. Students will develop and implement small discipline-specific research projects, identifying research questions, conducting a literature search, developing a theoretical framework, and collecting and analyzing data. NOTE: Offered concurrently with TCH 481.

TCH 452
RESEARCH METHODS & DISCIPLINARY INQUIRY: HISTORY AND THE SOCIAL SCIENCES
Graduate
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, the course focuses on research related to the teaching of history and the social sciences in the middle school and high school and pedagogical content knowledge, including research on teaching and learning, curricula and instructional delivery, assessment, and the relationship of socio-cultural, economic, and language use to teaching and learning disciplinary-specific content. Students will develop and implement small discipline-specific research projects, identifying research questions, conducting a literature search, developing a theoretical framework, and collecting and analyzing data. NOTE: Offered concurrently with TCH 482.

TCH 453
RESEARCH METHODS & DISCIPLINARY INQUIRY: MATHEMATICS
Graduate
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, the course focuses on research related to the teaching of mathematics in the middle school and high school and pedagogical content knowledge, including research on teaching and learning, curricula and instructional delivery, assessment, and the relationship of socio-cultural, economic, and language use to teaching and learning disciplinary-specific content. Students will develop and implement small discipline-specific research projects, identifying research questions, conducting a literature search, developing a theoretical framework, and collecting and analyzing data. NOTE: Offered concurrently with TCH 483.
TCH 454  
RESEARCH METHODS & DISCIPLINARY INQUIRY: SCIENCE  
Graduate  
This course introduces students to education research methods and discipline-specific research and inquiry. During the first five weeks, the course focuses on basic questions, issues, and theoretical frameworks central to the purpose, conceptualization, conducting, writing, reading and using education research as a means for informing education theory, practice and policy. Candidates will be exposed to the multiple frameworks that inform education research and various methodologies employed in collecting and analyzing data. During the last 6 weeks of the course, the course focuses on research related to the teaching of the sciences in the middle school and high school and pedagogical content knowledge, including research on teaching and learning, curricula and instructional delivery, assessment, and the relationship of socio-cultural, economic, and language use to teaching and learning disciplinary-specific content. Students will develop and implement small discipline-specific research projects, identifying research questions, conducting a literature search, developing a theoretical framework, and collecting and analyzing data. NOTE: Offered concurrently with TCH 481.

TCH 471  
TEACHING ENGLISH IN THE HIGH SCHOOL 1  
Graduate  
This course introduces students to the theoretical and practical issues of teaching the English language arts in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 451 or SCG 451. Offered during Fall term.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

TCH 472  
TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1  
Graduate  
This course introduces students to the theoretical and practical issues of teaching history and the social sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 452 or SCG 451. Offered during Fall term.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

TCH 473  
TEACHING MATHEMATICS IN THE HIGH SCHOOL 1  
Graduate  
This course introduces students to the theoretical and practical issues of teaching mathematics in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of mathematics in all its representations. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 453 or SCG 451. Offered during Fall term.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.
TEACHING THE SCIENCES IN THE HIGH SCHOOL 1  
Graduate  
This course introduces students to the theoretical and practical issues of teaching the sciences in secondary classrooms. The course introduces candidates to research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics. Students will practice and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods, including the use of technology resources, that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. Students will reflect on their own emerging educational philosophies and theories. They will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 454 or SCG 451. Offered during Fall term.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

TEACHING THE SCIENCES IN THE HIGH SCHOOL 2  
Graduate  
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 421 and TCH 471. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of reading, writing, speaking, and listening skills and sensibilities, with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 471, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 451 or SCG 451. Offered during Winter term.

TCH 471 and Advanced Teacher Candidate Standing are prerequisites for this class.

TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2  
Graduate  
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 422 and TCH 472. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the basic concepts of the seven social science disciplines with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 472, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 452 or SCG 451. Offered during Winter term.

TCH 472 and Advanced Teacher Candidate Standing are prerequisites for this class.

TEACHING MATHEMATICS IN THE HIGH SCHOOL 2  
Graduate  
This course continues students' immersion into the pedagogical content knowledge development and practices that began in TCH 423 and TCH 473. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of mathematics in all its representations with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 473, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 453 or SCG 451. Offered during Winter term.

TCH 473 and Advanced Teacher Candidate Standing are prerequisites for this class.
TCH 484
TEACHING THE SCIENCES IN THE HIGH SCHOOL 2
Graduate
This course continues students’ immersion into the pedagogical content knowledge development and practices that began in TCH 424 and TCH 474. The course provides students opportunities to continue to explore and develop research-based and theoretically grounded best practices in the teaching of the different sciences, including biology, chemistry, environmental science, and physics with an emphasis on reflective and collaborative practice. The course provides extensive opportunities for planning, using, and evaluating a variety of instructional strategies, including the use of technology resources, through teaching demonstrations and modeling and field experiences. Students will fine-tune and reflect on writing instructional objectives, developing lesson plans, designing a curriculum unit, creating a classroom environment, and implementing instructional delivery strategies and methods that meet the needs of diverse learners, including English language learners and students who speak nonmainstream dialects of English. And like in TCH 474, students will reflect on and clearly articulate orally, in writing, and through practice an educational philosophy and theory. Students will also demonstrate commitment to teaching as a professional who acts responsibly, ethically, and collegially in accordance to Vincentian personalism. 30 Level 2 Field Experience hours required. COREQUISITE(S): Taken concurrently with TCH 454 or SCG 451. Offered during Winter term.

TCH 474 and Advanced Teacher Candidate Standing are prerequisites for this class.

TCH 495
ASSESSMENT ISSUES IN SECONDARY EDUCATION
Graduate
This course introduces candidates to theoretical and philosophical issues related to educational assessment. It addresses the range of assessments teachers will encounter in school settings, including individual cognitive and social and emotional assessments; course material, curricula, and disciplinary program assessments; and large scale high-stakes testing. The course provides candidates opportunities to explore student, program, and curricular assessment issues, including assessment methods and tools; standardized, quantitative, and qualitative assessments; formal and informal assessments; formative and summative assessments; integrated, self-, and peer assessments; cultural, social, economic, and language influences on assessments; and issues of reliability and validity in assessment. Offered during Fall, Winter, and Spring terms. COREQUISITE(S): Taken in conjunction with TCH 471/TCH 472/TCH 473/ TCH 474 OR TCH 481/TCH 482/TCH 483/TCH 484.

T&L 425 and Advanced Teacher Candidate Standing are prerequisites for this class.

TCH 590
STUDENT TEACHING
Graduate
(6 credit hours) This course is the culminating experience for TEACH Program students and requires 11 weeks of onsite student teaching in a high school content area classroom. The course requires students to be in a high school full-time, participating in both in-class instruction and extra-curricular activities related to the school. Open only to TEACH Program Students; Student teaching application and approval required.

TCH 591
STUDENT TEACHING SEMINAR
Graduate
(2 credit hours) This course must be taken concurrently with TCH 590. The seminar format provides students an opportunity to reflect on their student teaching experiences and to reach back and consider what they have learned in the TCH Program and their next steps as practicing teachers. COREQUISITE(S): TCH 590.

TDC 261
BASIC COMMUNICATION SYSTEMS
Undergraduate
(Formerly TDC 361) Introduction to voice, data, and multi-media network communications fundamentals. Wired, Wireless, and Optical applications in Local, Metropolitan, Wide Area Networks are explored. The overview explains how technical, regulatory, competitive, standardization and cultural factors impact modern network applications. Approved for Scientific Inquiry credit. PREREQUISITE(S): NONE.

TDC 311
COMPUTERS IN TELECOMMUNICATIONS SYSTEMS
Undergraduate
This course is an introduction to computer architecture and operating systems with an emphasis on network systems. Topics covered include computer components and functions, logic circuits, process management, memory management, file management, interrupts and I/O peripheral devices, as well as computer networks, distributed systems, and network administration. Students will have several hands-on labs utilizing a Linux environment and will use Shell script for basic systems and network administration as well. PREREQUISITE(S): None
TDC 362
PRINCIPLES OF DATA COMMUNICATIONS
Undergraduate
ZTheory and components of data communication systems, modes, codes, and error detection techniques for data transmission, network protocols and line control procedures, communication carrier facilities and system planning. PREREQUISITE(S): (TDC 311 or CSC373) and (IT 263 or TDC261)

TDC 363
INTRODUCTION TO LOCAL AREA NETWORKS
Undergraduate
This course covers the principles of local area network (LAN) technologies including protocols, hardware, LAN software and design concepts. The course will focus on the lower layers of the OSI model and explore Ethernet, bridging/switching, VLANs, securing the network and Spanning-tree and Rapid-Spanning-tree protocols. Basic inter-VLAN routing will also be investigated. The course will involve several extensive lab exercises and troubleshooting activities to help reinforce the concepts. PREREQUISITE(S): TDC 261 or IT 263

TDC 364
VOICE COMMUNICATIONS TECHNOLOGIES
Undergraduate
A detailed study of transmission, signaling and switching systems for facilities-based public and private voice networks. Voice digitization and transmission over circuit-switched and packet-switched infrastructures. Computer telephony integration techniques. Quality of service issues in integrated voice-over-data systems. Course may include laboratory work with PBX lab. PREREQUISITE(S): NONE.

TDC 365
NETWORK INTERCONNECTION TECHNOLOGIES
Undergraduate
A comprehensive study of network interconnection technologies including layer 2 bridges and switches, layer 3 routers and higher-layer gateways. The TCP and IP protocols will be studied in detail, including IP address management and router operations and management along with associated Internet protocols. RIP and OSPF protocols will be considered. Course includes laboratory work with protocol analyzers and router administration. PREREQUISITE(S): TDC 363

TDC 368
NETWORK PROGRAMMING
Undergraduate
Programming distributed client/server applications; the sockets interface and multitasking issues; client/server models; remote procedure call; examples of applications such as electronic mail and file transfer. PREREQUISITE(S): CSC261 or CSC309.

TDC 369
NETWORK PERFORMANCE ANALYSIS AND DESIGN
Undergraduate
Quantitative foundations of network performance analysis. Probability theory and queueing theory will be developed and applied to problems in LAN performance, traffic engineering, and the analysis of throughput and response time measures for data communications networks. Performance tradeoffs in network design. PREREQUISITE(S): IT223 and MAT151 and TDC365.

TDC 371
WIRELESS COMMUNICATIONS NETWORKS
Undergraduate

TDC 372
DIGITAL ACCESS SERVICES
Undergraduate
A survey of access line technologies used to access Internet and other business network services. Topics will include traditional DS1, DS3 and SONET transport as well as Integrated Services Digital Network (ISDN), Digital Subscriber Line (DSL), Cable Modems, satellite services, Asynchronous Transfer Mode (ATM), and wireless data access methods. PREREQUISITE(S): TDC 362
TDC 375
NETWORK PROTOCOLS
Undergraduate

TDC 376
NETWORK PROJECT
Undergraduate
Case study in developing a large network project. Students will work in groups to analyze and design a major network system. PREREQUISITE(S): TDC 365.

TDC 377
FUNDAMENTALS OF NETWORK SECURITY
Undergraduate
Fundamentals of Network security design and implementation. Review of components used in an enterprise security infrastructure including routers, firewalls, security auditing and assessment tools, Virtual Private Networks (VPN) and Intrusion Detection Systems (IDS). The integration of the different components will be studied in detail, including IP addressing, Network Address Translation (NAT), design of firewall rule sets and performance considerations. Course includes laboratory work with routers, firewalls, Virtual Private Networks and security assessment tools. Pre-req: TDC 365.

TDC 378
INFORMATION STORAGE AND MANAGEMENT
Undergraduate
This course provides a comprehensive overview of network-based storage technology and information storage infrastructure. Major topics include the storage architectures, service features, and benefits of Intelligent Storage Systems. Networked storage technologies include fiber channel (FC), based Storage Area Network (SAN), Network Attached Storage (NAS), and IP-SAN. Advanced storage technologies on Content Addressed Storage (CAS), information security, and storage virtualization are also discussed. PREREQUISITE(S): none.

TDC 379
TELECOMMUNICATION AND NETWORK SECURITY PRACTICUM
Undergraduate
Design and implementation of telecommunication and network security infrastructure. This laboratory-based class includes the setup of realistic network infrastructure environment using bridges, routers, layer 2/3 switches and servers. Advanced routing infrastructure implementation using OSPF, RIPv2, EIGRP, BGP, multi-homed BGP setups and IGP/EGP redistribution. Network infrastructure hardening using routers and switches. PREREQUISITE(S): TDC 365 or Instructor consent. Good knowledge of TCP/IP is required.

TDC 384
SCRIPTING FOR NETWORK MANAGEMENT
Undergraduate
This is a hands-on course on using script languages to develop practical applications for Network Management. Students will first learn the fundamentals of Linux system and script language(s) for task automation, and use scripts to develop dynamic web sites. After that, the course will cover Simple Network Management Protocol (SNMP), and use Application Programming Interface (API) to automate networks tasks of Fault Management, Configuration Management, Accounting Management, Performance Management, and Security Management (FCAPS). The final project of the course is to develop a dynamic web site with the above five functional areas to manage Linux servers, Ethernet switches and IP routers. Prerequisite: (IT263 or TDC261) and (CSC211 or CSC261).

TDC 390
TOPICS IN NETWORK TECHNOLOGY
Undergraduate
May be repeated for credit. (PREREQUISITE(S): Completion of TDC 363 and TDC 365 or consent of the instructor).

TDC 399
INDEPENDENT STUDY
Undergraduate
Independent study for variable credit. PREREQUISITE(S): Requires approval of faculty advisor and consent of the Dean.
TDC 405
VOICE AND DATA NETWORK FUNDAMENTALS
Graduate
This course provides an introduction to voice and data networking technologies, including public and private voice services, Ethernet and Internet data technologies, network security, business applications and network management. The structure, regulation, and history of the telecom and data network industry will be discussed as well. PREREQUISITE(S): None

TDC 411
INTRODUCTION TO COMPUTER AND NETWORK SYSTEMS
Graduate
This course is an introduction to computer architecture and operating systems with an emphasis on network systems. Topics covered include computer components and functions, logic circuits, process management, memory management, file management, interrupts and I/O peripheral devices, as well as computer networks, distributed systems, and network administration. Students will have several hands-on labs utilizing a Linux and Cisco IOS environment and will use Shell script for basic systems and network administration as well. PREREQUISITE(S): None

TDC 413
INTRODUCTION TO LAN AND WAN
Graduate
This course covers the principles of local area network (LAN) and wide area network (WAN) technologies including structured cabling, protocols, network devices, and network operating systems. Students will learn the theories and practices of designing, provisioning, and deploying LAN and WAN in an enterprise environment. Assigned lab exercises involving LAN/WAN configuration and troubleshooting will help reinforce various concepts. PREREQUISITE(S): None

TDC 431
EMERGING WIRELESS AND MOBILITY NETWORKS
Graduate
A study of evolving 2.5, 3rd & 4th Generation Wireless Networks, and disruptive technologies like WiFi(802.11), WiMax, Bluetooth, RFID, Ultra-Wideband and the security implications of mobility networks. This course provides a balanced view of the Wireless Industry in transition, through evolving technology, regulation, competition and standards. Students will be better prepared to deal with the rapid changes and seize the opportunities as data mobility impacts traditional telecommunications and private networks. In addition students will have access to extensive Global Wireless Education Consortium materials to support their individual advanced interests. Formerly TDC 531. PREREQUISITE(S): TDC 405

TDC 460
FOUNDATIONS OF NETWORK TECHNOLOGIES
Graduate
An introductory course on network technologies for local and wide area networks. The course examines in detail the core concepts of network architectures, Ethernet systems including wired, wireless, and Metro, virtual local area networks, storage area networks, optical networking, and the more traditional network services such as T-1, frame relay, Asynchronous Transfer Mode (ATM), and SONET. PREREQUISITE(S): TDC 405 and TDC 413

TDC 463
COMPUTER NETWORKS AND DATA SYSTEMS
Graduate
A detailed discussion of the upper layers of network architectures. Network protocol organization will be discussed using TCP/IP as an example. IP addresses, subnetting, supernetting, and CIDR. Routing algorithms. Transport layer protocols. Application layer protocols. Introduction to IPv6. PREREQUISITE(S): TDC 405 and TDC 413

TDC 464
CONVERGED MULTIMEDIA NETWORKS
Graduate
Exploration of multimedia networks including voice, data, and video services offered by network carriers and Internet Service Providers (ISP) to both enterprise and residential customers. The course starts with an overview of current voice and data networks and presents the driving forces leading to a converged multimedia network. The focus is on Voice over IP (VoIP), including signaling, protocols, equipment, network architecture/design, traffic engineering, and service deployment strategy. PREREQUISITE(S): TDC 405
TDC 468
NETWORK PROGRAMMING
Graduate
The course covers the basic and advanced issues of TCP/IP networking programming such as multiple processes, I/O multiplexing, multi-threaded processes, multicasting and secure network programming USING C/C++. Application examples such as Internet browsing, instant messaging, proxy filtering and file transfer protocols are discussed. PREREQUISITE(S): (TDC 463 OR CSC 435) and CSC 404

TDC 477
NETWORK SECURITY
Graduate
Network infrastructure security issues, including perimeter security defense, firewalls, Virtual Private Networks, Intrusion Detection Systems, wireless security, network security auditing tools and ethical considerations. Strategies for the deployment of "Defense-In-Depth" mechanisms in an enterprise computing environment. PREREQUISITE(S): TDC 463 or CSC 435

TDC 478
INFORMATION STORAGE AND MANAGEMENT
Graduate
This course provides a comprehensive overview of network-based storage technology and information storage infrastructure. Major topics include the storage architectures, service features, and benefits of Intelligent Storage Systems. Networked storage technologies include fiber channel (FC), based Storage Area Network (SAN), Network Attached Storage (NAS), and IP-SAN. Advanced storage technologies on Content Addressed Storage (CAS), information security, and storage virtualization are also discussed. PREREQUISITE(S): none

TDC 484
SCRIPTING FOR NETWORK MANAGEMENT
Graduate
This is a hands-on course on using script languages to develop practical applications for Network Management. Students will first learn the fundamentals of Linux system and script language(s) for task automation, and use scripts to develop dynamic web sites. After that, the course will cover Simple Network Management Protocol (SNMP), and use Application Programming Interface (API) to automate networks tasks of Fault Management, Configuration Management, Accounting Management, Performance Management, and Security Management (FCAPS). The final project of the course is to develop a dynamic web site with the above five functional areas to manage Linux servers, Ethernet switches and IP routers. Prerequisite: TDC 405 and (IT 211 or CSC 401)

TDC 511
TELECOMMUNICATIONS PRACTICUM
Graduate
Introduction to the functionality and management of voice and data communications equipment in the Telecommunications and Local Area Networks laboratories. Emphasis will be on practical understanding and experience through laboratory exercises. PREREQUISITE(S): TDC 411 and TDC 460 and TDC 463

TDC 512
CELLULAR AND WIRELESS TELECOMMUNICATIONS
Graduate
A survey course which includes an overview of all the design and network elements that comprise the foundation of today's cellular networks. Topics include the evolution of cellular technology; basic cellular design and operation principles; cell base station design and function; a review of digital wireless technologies; radio frequency (RF) and antenna propagation basics; an overview of towers; microwave radio systems; roaming and intercarrier networking; the business side of wireless and landline interconnection to the Public Switched Telephone Network (PSTN). PREREQUISITE(S): TDC 464

TDC 514
COMPUTER TELEPHONY
Graduate
A study of enabling technologies allowing the integration of voice communications services with personal computers, LANs and mainframes. Telephony programming interfaces, call management software, intelligent fax/data retrieval and interactive voice response systems will be considered. PREREQUISITE(S): TDC 463 and TDC 464.
TDC 532  
**WIRELESS SYSTEM ENGINEERING AND DEPLOYMENT**  
Graduate  
The course covers technologies and theories that support the design, deployment and operation of modern-day digital wireless networks. The first half of the course will address concepts of RF theory, RF propagation, base station engineering, and antenna propagation. The second half of the course focuses on distributed antenna systems (DAS), and various digital wireless technologies used on modern networks and emerging technologies for the future. IP Multimedia Subsystem (IMS) technology and architectures, along with its interfaces to future wireless networks, will also be addressed. PREREQUISITE(S): TDC 512

TDC 542  
**PROTOCOLS FOR ADVANCED WIRELESS NETWORKS**  
Graduate  
This course provides students with an in-depth study of the advanced wireless communication protocols and technologies. It starts with an overview of the wireless evolution from the first generation network to the modern and future wireless technologies. It will then go on to explore major aspects of each advanced wireless technology: air interface, smart antennas, network infrastructure, network elements and their functions, QoS, security, mobility, and performance. Wireless protocols, including both User-to-Network Interface (UNI) and Network-to-Network Interface (NNI), are also studied in detail. Students will also learn new service opportunities provided by these advanced wireless technologies. PREREQUISITE(S): TDC 512

TDC 560  
**ADVANCED NETWORK TECHNOLOGIES AND DESIGN**  
Graduate  
This course introduces advanced network technologies and design, including Multi-Protocol Label Switching (MPLS), MPLS Virtual Private Networks, IP storage networks, content distribution, capacity planning and traffic engineering. PREREQUISITE(S): TDC 460, TDC 463

TDC 562  
**COMPUTER-COMMUNICATION NETWORK DESIGN & ANALYSIS**  
Graduate  
This course provides an in-depth study of Internet protocols from the perspective of network planning, simulation and troubleshooting. The course includes in-depth study of Internet traffic, traffic measurement techniques, network planning and simulation using simulation tools, and packet management techniques. PREREQUISITE(S): TDC 463

TDC 563  
**PROTOCOLS AND TECHNIQUES FOR DATA NETWORKS**  
Graduate  
Advanced topics in TCP/IP including IPv6, TCP traffic control, routing protocols, multicast routing protocols, and upper layer protocols supporting Quality of Service (QoS) in the new generation of the Internet; compression techniques; introduction to SNA and APPN, SNA and TCP/IP integration. PREREQUISITE(S): TDC 463

TDC 567  
**TELECOMMUNICATION SYSTEMS DESIGN AND MANAGEMENT**  
Graduate  
The theory and practice of Telecommunication system design. Ongoing systems management. Telecommunication management including selection of vendors/systems, structuring an RFP systems proposal analysis, computer aided telecommunications management. Telecommunication management strategies from a business perspective. PREREQUISITE(S): TDC 463.

TDC 568  
**NETWORK MANAGEMENT**  
Graduate  
The five major areas of network management—fault management, performance management, security, accounting and configuration management—are discussed. Advanced topics such as fault diagnosis and isolation, event correlation, MIB design, SNMP programming, performance monitoring, service level agreements and network security architectures are also discussed. PREREQUISITE(S): TDC 463.
TDC 577
NETWORK SECURITY II
Graduate
This course is an advanced class in network security. Topics include: Intrusion Detection and Prevention Systems; Security Engineering processes; Advanced firewall considerations; Honeypots; Incident response; Forensics; Enterprise security policy development and complex enterprise security infrastructure design and integration. PREREQUISITE(S) TDC 477 or TDC 572

TDC 593
TOPICS IN TELECOMMUNICATIONS
Graduate
This is an independent study course. PREREQUISITE(S): Consent of instructor. Independent study form required.

TDC 594
NETWORK CAPSTONE
Graduate
In this class students will synthesize knowledge from previous courses to design, build, test, and demonstrate a comprehensive network project as members of a project team. Topics introduced or reviewed, and used in completing the project, will include network requirement analysis, network architecture design, vendor evaluation, planning, experimental design, physical design, logical design, security design, testing strategy, documentation, change management, and network management strategy. Other topics include reasoning about uncertain user requirements, negotiation, online meeting techniques, and group dynamics. The capstone course will extensively use the DLPOD environment and the OPNET for network design and experiment. PREREQUISITE(S): TDC 511 and TDC 560 and TDC 563

TDC 597
TOPICS IN DATA COMMUNICATIONS
Graduate
This is an independent study course. (PREREQUISITE(S):Consent of instructor. Independent Study form required).

TDC 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit.

TDC 690
RESEARCH SEMINAR
Graduate
Readings and discussion on current research topics. Students may register for this course no more than twice. PREREQUISITE(S): Consent of the instructor.

TDC 696
MASTER’S PROJECT
Graduate
(4 credit hours) Students may register for this course only after their advisor has approved a written proposal for their project. PREREQUISITE(S): Consent of advisor. Independent study form required.

TDC 698
MASTER’S THESIS
Graduate
(2 credit hours) Students may register for this course only after their advisor has approved a written proposal for their thesis. Students must continue to register for this course every quarter after their first registration in it until they complete their project or thesis to the satisfaction of their advisor. They earn two hours of credit for each such registration but only four hours of credit will apply for degree credit. PREREQUISITE(S): Consent of advisor. Independent study form required.
TEC 104
INTRODUCTION TO THEATRE TECHNOLOGY
Undergraduate
(3 quarter hours) This course introduces students to technical systems and standard technical theatre practices. The course emphasizes proper industry-accepted nomenclature of systems, tools, materials, and integrated infrastructure and introduces the steps involved in larger processes. In addition, a specific focus of the course is the establishing of collaborative team work between peers.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 105
INTRODUCTION TO STAGE MANAGEMENT
Undergraduate
Intro to Stage Management is a required class which takes place during the fall quarter of the stage management students’ first year. The class covers a combination of stage management methods used at The Theatre School and best professional practices for the beginning stage manager. Visits to The Theatre School shops and discussions with shop supervisors introduce the first year stage managers to the needs, requirements, and preferred professional methods as defined by the construction processes of the shops.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 107
THEATRE CREW
Undergraduate
Theatre Crew (2 quarter hours) All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 108
THEATRE CREW
Undergraduate
Theatre Crew (2 quarter hours) All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 109
THEATRE CREW
Undergraduate
Theatre Crew (2 quarter hours) All students in the first year of the program are assigned on a rotating basis throughout the year to various crews which build and run the shows in the Showcase, Playworks, New Directors, and Workshop Series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 120
SOUND SOFTWARE
Undergraduate
This class is an overview of the computer programs Sound Design majors will need to create their work. This helps them get a jump-start on how to manipulate sound files on the computer within Peak and Logic, with an overview of the M7CL console they will be using when they start designing the following year.

TEC 151
TECHNICAL DRAWING I
Undergraduate
First course in a 3 course sequence. Mechanical drawing techniques and projection theories are practiced, including drawing-board geometry, scale and dimensioning, and orthographic principles.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 152
TECHNICAL DRAWING I
Undergraduate
Second course in a 3 course sequence. Mechanical drawing techniques and projection theories are practiced, including drawing-board geometry, scale and dimensioning, and orthographic principles.

TEC 151 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 153
TECHNICAL DRAWING I
Undergraduate
Third course in a 3 course sequence. Mechanical drawing techniques and projection theories are practiced, including drawing-board geometry, scale and dimensioning, and orthographic principles.

TEC 152 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 154
INTRODUCTION TO VECTOR WORKS
Undergraduate
Students will learn to use the Vector Works drafting program to create construction drawings and Light Plots. Classes will include an instructional lecture/demo and instructed work time. This course is a requirement for Lighting Design Majors.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 208
SOUND TECHNOLOGY I
Undergraduate
This class introduces students to the fundamentals of sound technology. Students will become familiar with a range of audio components and specifications, and learn how they function, how they connect to each other, and why they are used in a modern theatre. Students will be able to put together a sound system and understand how audio signals flow thru that sound system.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 209
SOUND TECHNOLOGY I
Undergraduate
This class teaches the history of the recording industry by learning about the most popular studios that shaped the sound of recorded music. You will also learn the practice and set-up of studio recording.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 210
SOUND TECHNOLOGY I
Undergraduate
Every day of this class presents you with a sound system that is not producing sound. And each day there is a lesson to learn about how to approach and troubleshoot problems that often arise when designing sound for theatre.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 251
TECHNICAL DRAWING II
Undergraduate
First course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 252  
TECHNICAL DRAWING II  
Undergraduate  
Second course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I. TEC 251 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 253  
TECHNICAL DRAWING II  
Undergraduate  
Third course in a 3 course sequence. Advanced techniques and theory are practiced, building on the skills covered in Technical Drawing I. TEC 252 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 254  
COSTUME TECHNOLOGY I  
Undergraduate  
First course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes. Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 255  
COSTUME TECHNOLOGY I  
Undergraduate  
Second course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes. TEC 254 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 256  
COSTUME TECHNOLOGY I  
Undergraduate  
Third course in a 3 course sequence. Students are introduced to draping and drafting of patterns for basic garments, various problems of layout and cutting, and specialized sewing techniques for costumes. TEC 255 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 257  
CONSTRUCTION AND RIGGING I  
Undergraduate  
First course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware. Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 258  
CONSTRUCTION AND RIGGING I  
Undergraduate  
Second course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware. TEC 257 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
**TEC 259**  
**CONSTRUCTION AND RIGGING I**  
**Undergraduate**  
Third course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

TEC 258 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**TEC 267**  
**STAGE MANAGEMENT I**  
**Undergraduate**  
First course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day “nuts and bolts” in the stage management process.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**TEC 268**  
**STAGE MANAGEMENT I**  
**Undergraduate**  
Second course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day “nuts and bolts” in the stage management process.

TEC 267 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**TEC 269**  
**STAGE MANAGEMENT I**  
**Undergraduate**  
Third course in a 3 course sequence. This course will be divided into pre-production, rehearsal period, tech/running, and maintenance of production segments. The objective is to thoroughly introduce the student to the different venues of theatre from small storefront theatre to large regional theatres. Although the emphasis will be on management practices for theatre in all venues, there will be an element of the practical, day-to-day “nuts and bolts” in the stage management process.

TEC 268 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**TEC 271**  
**TECHNICAL PRODUCTION PRACTICE I**  
**Undergraduate**  
First course in a 3 course sequence. For all technical students, this course makes production assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**TEC 272**  
**TECHNICAL PRODUCTION PRACTICE I**  
**Undergraduate**  
Second course in a 3 course sequence. For all technical students, this course makes production assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 273
TECHNICAL PRODUCTION PRACTICE I
Undergraduate
Third course in a 3 course sequence. For all technical students, this course makes production assignments based on the student’s ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 310
COSTUME MANAGEMENT
Undergraduate
Within the theatre there are three costume areas that can be approached from a managerial point of view: shop management, costume storage management, and wardrobe management. Each area can be independent of each other or responsibilities can overlap in a given theatre. This course will cover the responsibilities and challenges of each area from a managerial perspective.

TEC 320
TECHNICAL COLLABORATION
Undergraduate
This class is designed to teach students how to collaborate, and hone their tech cueing skills, within a small storefront theatrical setting that they will undoubtedly come across when they graduate and move into the Chicago theatre community. In this class, the students will learn how to create opening and closing cues; transitions that punctuate, build/decline, propel, and show passage of time. The cues will then be amended in the workshop, to help the students learn to work quickly in changing timings and mood. Making quick artistic decisions and implementing them efficiently is the goal.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 354
COSTUME TECHNOLOGY II
Undergraduate
First course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students’ knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

TEC 256 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 355
COSTUME TECHNOLOGY II
Undergraduate
Second course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students’ knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

TEC 354 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 356
COSTUME TECHNOLOGY II
Undergraduate
Third course in a 3 course sequence. The first quarter examines the various methods of generating period patterns using primary and secondary sources. The second quarter introduces corset-making and moves toward draping, drafting, cutting, sewing, fitting, altering, and finishing a dress based on a period pattern. The third quarter examines period garments from the 19th and early 20th Centuries, focusing on making detailed observations and drawings of the construction of these garments. Emphasis is placed on developing the students’ knowledge concerning pattern shapes, inner structure of garments, sewing techniques, textiles used, and proportional relationships.

TEC 355 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 357
CONSTRUCTION AND RIGGING II
Undergraduate
First course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

TEC 359 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 358
CONSTRUCTION AND RIGGING II
Undergraduate
Second course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

TEC 357 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 359
CONSTRUCTION AND RIGGING II
Undergraduate
Third course in a 3 course sequence. Lecture and demonstration in building, rigging, and handling of stage scenery. Special attention is given to the proper use of tools, materials, and stage hardware.

TEC 358 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 367
STAGE MANAGEMENT II
Undergraduate
First course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 368
STAGE MANAGEMENT II
Undergraduate
Second course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions.

TEC 367 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 369
STAGE MANAGEMENT II
Undergraduate
Third course in a 3 course sequence. This course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions.

TEC 368 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 371
TECHNICAL PRODUCTION PRACTICE II
Undergraduate
First course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 372
TECHNICAL PRODUCTION PRACTICE II
Undergraduate
Second course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 373
TECHNICAL PRODUCTION PRACTICE II
Undergraduate
Third course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 399
INDEPENDENT STUDY: TECHNICAL
Undergraduate
Independent Study: Technical

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 454
COSTUME TECHNOLOGY III
Undergraduate
First course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.

TEC 356 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

TEC 455
COSTUME TECHNOLOGY III
Undergraduate
Second course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.

TEC 454 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

TEC 456
COSTUME TECHNOLOGY III
Undergraduate
Third course in a 3 course sequence. Fall Quarter examines various craft skills and materials used in costume construction. Winter Quarter examines various techniques for tying, painting, and distressing textiles and costumes for the theatre. Spring Quarter focuses on various millinery techniques including the creation of patterns, construction of buckram, wire, and wool felt bases, fitting, finishing, and trimming.

TEC 455 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

TEC 457
PRODUCTION MANAGEMENT SEMINAR
Undergraduate
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 458
PRODUCTION MANAGEMENT SEMINAR
Undergraduate
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 459
PRODUCTION MANAGEMENT SEMINAR
Undergraduate
Explores through lectures and projects the roles of the managerial staff in the modern theater. A basic knowledge of theater terminology and some knowledge of management practice is required.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 460
THEATRE MANAGEMENT
Undergraduate
Theatre Management
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 467
STAGE MANAGEMENT III
Undergraduate
A continuation of 369 - this course will simultaneously cover two main elements in the world of the stage manager. The first will explore the stage manager's place in the world of legitimate theatre. The second will explore options outside of that world. To this end, guest members of the professional community will provide insight regarding the role of the stage manager in these many different settings. Additionally, a portion of each class will be dedicated to discussion of practical problems encountered in the students' productions. With the addition of a lab session.
TEC 369 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 468
STAGE MANAGEMENT III
Undergraduate
A continuation of 467 with the addition of a lab session.
TEC 467 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 469
STAGE MANAGEMENT III
Undergraduate
A continuation of 467 with the addition of a lab session.
TEC 468 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 471
TECHNICAL PRODUCTION PRACTICE III
Undergraduate
First course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.
Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
TEC 472
TECHNICAL PRODUCTION PRACTICE III
Undergraduate
Second course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 473
TECHNICAL PRODUCTION PRACTICE III
Undergraduate
Third course in a 3 course sequence. For all technical students, assignments will be commensurate with ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

TEC 490
INTERNSHIP
Undergraduate
The internship provides the student with an opportunity to learn by working with experienced professionals in an area related to his or her area of study at The Theatre School.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 100
WORLD OF THE THEATRE
Undergraduate
Through the aesthetic analysis of plays and dramatists that were foundational in the development of dramatic literature, the student is encouraged to develop basic critical standards for the understanding and appreciation of dramatic production. Can be taken by non-Theatre School students.

THE 105
HISTORY OF DRAMATIC LITERATURE
Undergraduate
Second course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 106
HISTORY OF DRAMATIC LITERATURE: CLASSICAL GREECE AND ROME
Undergraduate
Third course in a 3 course sequence.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 141
DESIGN WORKSHOP
Undergraduate
First course in a 3 course sequence. This course will introduce the student to the art of theatre design through the examination of the principles of design and composition, the elements of theatrical design, and the nature of collaboration and communication. It is intended for those who plan to work in the theatre in areas other than design. The focus is on the aesthetic, rather than the technical, aspects of design and on how design fits into the framework of the study of theatre in general. The class is intended to prepare those pursuing a career in theatre for communicating and working with designers. Assignments will emphasize the development of creative skills and a common vocabulary in order to establish a framework for informed choices, and for an appreciation of theatre design and its various areas of specialization. In this first course we will explore the fundamentals of visual design. Students will do several basic design projects during the quarter. The process of theatrical design will be introduced by working with a classic script for design analysis and preliminary design parameters.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 142
DESIGN WORKSHOP
Undergraduate
Second course in a 3 course sequence. In the second quarter the class will focus on applying the fundamentals of the first course to the specific task of theatre design. The emphasis is on scenic design, but costumes, lighting, and sound will also be featured. The script analyzed in the first course will continue to be used to explore the integration of design parameters with the aesthetic and conceptual goals of production. We will also discuss the design process and some of the techniques utilized by designers. Later in the quarter another classic script will be used as the foundation for a final design project culminating in a scenic design for that script.

THE 141 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 143
DESIGN WORKSHOP
Undergraduate
Third course in a 3 course sequence. In the third quarter the emphasis is on group artistic work. In this ‘practicum’ quarter students will collaborate in small groups on a design for a mythological story. Following that, and for the bulk of the quarter, students will be assigned to design teams consisting of director and designers. These teams will follow the entire design process, using a Shakespeare script, culminating in the formal presentation of a fully designed production. It is important to understand that the focus of this course is on design process and communication. The technical aspects of theatre design are kept to a minimum. The course aims to help theatre artists in their collaboration with theatre designers.

THE 142 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 200
THEATRE & THE ART OF PRODUCTION: GENDER & SEXUALITY IN THE THEATRE
Undergraduate
Through lecture, discussion, projects and actual theatre attendance, students explore the human nature of the theatrical impulse and its evolution into theatrical form. Plays and readings deal with issues of gender identity, sexual orientation, and sexuality in performance. Students follow the process of specific drama productions from script to stage and examine the artistic process and the role that sexuality and gender play in performance and rehearsal.

THE 201
THEATRE MANAGEMENT I: INTRODUCTION TO MANAGEMENT CONCEPTS IN THE PERFORMING ARTS
Undergraduate
Through lecture, discussion, reading, projects, and actual theatre attendance, the student learns about styles of arts leadership, contemporary issues and best practices in the field of non-profit arts management, the history of non-profit arts administration in the US including leaders in the field and opportunities for careers in the arts. Emphasis is placed on how non-profit organizations balance their commitment to the Art, the Artist and the Audience. Specific areas of non-profit arts management to be addressed include the role of the arts manager; the primacy of the mission; planning, change and adaptation; leadership and group dynamics; and human resources. (Cross Listed with PAM 301)

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 202
THEATRE MANAGEMENT I: ORGANIZATIONAL STRUCTURE AND FINANCIAL MANAGEMENT
Undergraduate
Through lecture, discussion and projects, the student learns about non-profit arts organizational structures, short and long-term planning, intersection of mission/vision/values and programming with growth and sustainability, producing vs. presenting organizations, financial management, management information systems and budgeting. (Cross-listed with PAM 302)

THE 201 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 203
THEATRE MANAGEMENT I: MARKETING FOR THE ARTS
Undergraduate
Through lecture, discussion and projects, the student learns about strategies and objectives in marketing and promoting the performing arts. Specific focus is given to integrated marketing and communication strategies; market research and evaluation techniques; organizational image and branding; patron support services; and audience development. Students will create marketing and public relations plans and materials, both independently and on teams, which incorporate targeting audiences; promotions, publicity, and advertising; and working with various forms of media, including social networking and technology-based platforms. (Cross-listed with PAM 303)

THE 202 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.
THE 204
HISTORY OF DRAMATIC LITERATURE
Undergraduate
First course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasizes theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 205
HISTORY OF DRAMATIC LITERATURE
Undergraduate
Second course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasizes theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 206
HISTORY OF DRAMATIC LITERATURE
Undergraduate
Third course in a 3 course sequence. A study of the development of playscripts, the physical theatre, and means of production from ancient Greek and Roman societies through contemporary theatre. The course emphasizes theatre's changing role in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 207
THEATRE MANAGEMENT I: INSTITUTIONAL ADVANCEMENT AND COMMUNITY ENGAGEMENT
Undergraduate
Through lecture, discussion and special projects, the student learns about institutional advancement and development as well as collaborations with internal and external constituencies. Topics include forming partnerships, community outreach, board development and engagement, fundraising and grant writing, donor cultivation, and the philanthropic community. This course is the final course in the four-course sequence on Performing Arts Management, and integrates the topics, vocabulary, themes, and subjects introduced in the previous three courses. (Cross-listed with PAM 304)

THE 203 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 208
UNDERAGE ONSTAGE
Undergraduate
This class examines theatrical literature from the Ancient Greeks through today to uncover how and why playwrights include children in their works and what effect this has on audiences. Contributing variables examined while studying these plays include the time period in which they were written, the social, political, and cultural context, the playwright's style, and the genre. The class will also explore the choice faced by a number of directors: whether to use children true to the age in the script, or adults who can still play young people. The vocabulary of Dramatic Text Analysis will be taught and used when providing written and oral examination of plays covered.

THE 209
SKETCH COMEDY
Undergraduate
Live performances of sketch comedy present theatre in one of its most elemental forms. With a focus on actors and text rather than technical elements, stagings of sketch revues explore the relationship between audience and artist in a dynamic and revealing way. This course will explore both the theoretical underpinnings of comedy and the practical techniques for the creation of this work. The class will examine as literature this work that is often overlooked by critics and theorists because of its perception as a "low" art form.

THE 210
SCRIPT ANALYSIS
Undergraduate
A study of classical text analysis. Using dramatic literature from naturalism to the avant garde, students will dissect how the plays work structurally.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
**THE 212**  
**INTRODUCTION TO THEATRE STUDIES**  
Undergraduate  
This course is a general introduction to the aesthetics of the various forms and permutations of theatrical performance. It is a study of performance as an art, with particular emphasis upon its cultural and social influences in our society, and its relationship with the other arts and humanities. The course will emphasize the development of skills for articulate verbal and written response to performances.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**THE 213**  
**SCI-FI AND OTHER GENRE FICTION IN THEATRE**  
Undergraduate  
Science Fiction, Horror, Fantasy, and Superhero as genres of fiction are prevalent in popular culture and successful (almost saturated) in Film, Television, Prose Literature, Graphic Novels, and other forms of storytelling media. Why, then, are they underrepresented in the world of the theatre? And why are the few more well-known examples of these genres in theatre so often unsuccessful, commercially and critically? How can these genres translate to the stage successfully? Which technical characteristics of the theatre and of the theatrical language of storytelling are advantages and disadvantages for bringing these genres to life, as opposed to the other media in which they are more prevalent and successful? This course will attempt to answer these questions by examining extant theatrical works of "genre" fiction and their financial successes and critical receptions. We will also examine critically-acclaimed pieces of "genre" fiction in other media to determine why those pieces were successful and how to translate that success to the stage.

**THE 214**  
**ETHICAL DECISION MAKING IN THE THEATRE**  
Undergraduate  
Ethical decisions are a challenging part of every profession. Ethical Decision-Making in the Theatre assumes two basic questions: What is an ethical decision, and why is ethics of particular resonance for theatre professionals? Through readings, writing assignments, and class discussions, this course will work to define ethics by examining examples of both ethical and unethical behavior, will examine the ethical role that theatre plays in our society, and will debate the responsibilities that we carry into the profession as theatre artists and professionals. Through group work we will determine a framework for ethical thinking and will apply this framework to specific situations facing the theatre profession today, ultimately determining whether or not the result is an ethical decision.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

**THE 215**  
**PLAYS ABOUT SPORTS**  
Undergraduate  
There is a curious relationship between sports and theatre; that is to say, the inherent theatricality of sports and the inherent athleticism of theatre. A significant component in this relationship is the concept of performance and what that entails. We speak of high-performance cars and trucks, we applaud and then discuss, blog, and tweet (sometimes to an extraordinary degree) the performances of both athletes and actors, we talk about academic performance, we see performing seals, dolphins, and whales at Shedd Aquarium, a member of the clergy performs a wedding ceremony, and the list continues. A highly contested term, performance is bound to the team role as it relates to sports, theatre, and everyday life. What is your role on the team? What role were you cast in? What is your role in the company? The team role is aligned with function and also with the context in which the "role is played."

More than anything perhaps, both sports and theatre deal with highly charged relationships. In the plays that we will examine in the course, it is the sport itself that serves as both the context of and trigger for the relationships that are created, strengthened, weakened, or in the worst-case scenarios, totally shattered.

**THE 216**  
**SCREEN TO STAGE**  
Undergraduate  
There is a long and storied tradition of adapting plays to film. Glengarry Glen Ross, Chicago, A Few Good Men, Harvey, Romeo + Juliet - the list goes on and on. More recently, however, there has been a continuing trend in the opposite direction: major works of theatre, particularly Broadway musicals, are adaptations of films. This course will examine this trend from several angles. We will discuss some of the reasons for this trend, we will discuss the challenges inherent in translating work written for film to the techniques of the stage, and we will compare and contrast artistic, critical, and financial successes and failures of plays adapted from films.
THE 217
THE ART OF STORYTELLING
Undergraduate
Storytelling is one of our oldest art forms. By exploring stories in performance and writing, students acquire the tools necessary to sculpt and perform their own stories. Then, students discover how storytelling can be used in multiple applications - from marketing to change management to human resources to diversity training. Through discussion, projects, and viewing live and recorded performance, students understand the art and building blocks of good storytelling. Studying different forms will illuminate the connection between content and form. Stories have the power to change people and this class explores how and why.

THE 224
DRAMATIC THEORY: TRAGEDY
Undergraduate
An introduction to the major developments in dramatic theory from Aristotle to the present. Through reading essays on theory along with plays, the course will create a context for understanding how the ethical, aesthetic and social philosophies of dramatic theory inform theatrical production and literature. May be taken by non-Theatre majors.

THE 206 is a prerequisite for this class.

THE 225
DRAMATIC THEORY: COMEDY
Undergraduate
An introduction to the major developments in dramatic theory from Aristotle to the present. Through reading essays on theory along with plays, the course will create a context for understanding how the ethical, aesthetic and social philosophies of dramatic theory inform theatrical production and literature. May be taken by non-Theatre majors.

THE 206 is a prerequisite for this class.

THE 227
PLAYWRITING I
Undergraduate
First Course in a three course sequence. A practical course introducing students to the fundamentals of dramatic writing. Students engage in a variety of writing exercises exploring various elements of writing for the stage. Each quarter students will complete short works for the stage that include 10 minute plays, one acts or first acts of longer works.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 228
PLAYWRITING I
Undergraduate
Second in a three course sequence. A practical course introducing students to the fundamentals of dramatic writing. Students engage in a variety of writing exercises exploring various elements of writing for the stage. Each quarter students will complete short works for the stage that include 10 minute plays, one acts or first acts of longer works.

THE 227 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 229
PLAYWRITING I
Undergraduate
Third in a three course sequence. A practical course introducing students to the fundamentals of dramatic writing. Students engage in a variety of writing exercises exploring various elements of writing for the stage. Each quarter students will complete short works for the stage that include 10 minute plays, one acts or first acts of longer works.

THE 228 and Status as an Undergraduate Theatre student is a prerequisite for this class.
THE 232
PLAYWRIGHT’S SEMINAR I
Undergraduate
In this course students explore the underlying formal principles found in various works of architecture, music, visual art, literature, and theatre. Each week students apply these principles to the writing and presentation of short theatrical works. The goal of this course is to expose students to a wide array of approaches to dramatic form.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 234
DRAMATURGY I: INTRODUCTION TO DRAMATURGY
Undergraduate
The first course in the three-term Dramaturgy I sequence. Through reading about the history of dramaturgy, the course develops the intellectual framework necessary to think about the art and science of the discipline and focuses on the study of dramaturgical issues of the past two decades. Students work on theoretical projects. Some attendance at theatre productions may be required.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 235
DRAMATURGY I: INTRODUCTION TO PRODUCTION DRAMATURGY
Undergraduate
The second class in the three-term Dramaturgy I sequence, this course continues the work of THE 234 and emphasizes writing in a workshop context as well as the process of collaboration and hands-on collaboration itself. Much of the student work focuses on in-house theoretical theatre productions. Students who are dramaturgy-criticism majors prepare to work on their first dramaturgy project, the MFAI short plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 236
DRAMATURGY I: TYA AND PLAYWORKS DRAMATURGY
Undergraduate
The third class in the three-term Dramaturgy I sequence, this course focuses on the dramaturgy for theatrical productions aimed at young audiences. A major emphasis in the class is the preparation of the actor packets and study guides for The Theatre School’s Playworks series.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 241
ARE WE STILL FABULOUS?: QUEER IDENTITY IN CONTEMPORARY DRAMA
Undergraduate
Born out of ACT UP and the AIDS militant movement of the late 1980s and early 1990s, Queer Nation concerned itself with the issue of gay and lesbian enfranchisement and power. They created the battle cry, “We’re here, we’re queer, we’re fabulous, get used to it,” thereby granting the gay community ownership of the word “fabulous.” Fabulousness not only became a new manifesto for queer politics and camp, but also became synonymous with irony, tragic history, defiance, gender-fuck, glitter, and drama. Currently, young playwrights have shifted the visor of gay drama from overtly political dramas to stories of identity and love. In replacing direct political messages with more personal appeals for social progress, is contemporary gay drama still fabulous? By interpreting and analyzing the most current queer plays, reading critical and reflective essays, and through discussion, students in the course will decide for themselves if “fabulous” is a thing of the past or stronger than ever in the present.

THE 242
STAGE DIRECTION FOR NON-MAJORS
Undergraduate
This course is designed to introduce students to the director’s craft. The focus is on the director’s relationship to text through the analysis of playscripts and the use of that analysis to plan an interpretation of a play. Analysis will come from a variety of perspectives—personal, psychological, social, and historical. In addition to preparing and presenting their projects, students will attend performances and write papers in response. The class combines lecture, discussion, group exercises, and in-class activities.
THE 244
DRAMATIC WRITING FOR NON-MAJORS
Undergraduate
This course is designed as an introduction to the process of playwriting. The emphasis is on the exploration of a range of techniques and tools available to the playwright. Through the completion and discussion of a series of writing exercises, the class will examine the various elements of playwriting. Particular attention will be paid to the connections between form and meaning. Work for the course will include weekly exercises, written responses to plays in production, and the presentation of projects. Instructional methods will include lecture, discussion, group exercises, and in-class activities. The final project of the class will be the completion of a draft of a 10-minute play.

THE 246
STAGE DESIGN FOR NON-MAJORS
Undergraduate
The course introduces the essential principles of designing for the stage. The art of stage design is explored through the analysis and interpretation of dramatic literature. Students will engage in script analysis, creative research, critical writing, model building and rendering to present visual and written work that represents their personal reflection on the plays examined in the class.

THE 250
AMERICAN FUNNY: STAGE COMEDY FROM GROUCHO MARX TO TINA FEY
Undergraduate
We're a funny people. We like to watch people be funny. AMERICAN FUNNY is a survey course that looks at American comedy in theatre from the early 20th century to the present day. We view performances of plays on video, read and write about American plays and playwrights, and discuss what is special about going to the theatre. We explore a historical progression of comedy, different types of comedy, the development of the American Comic Hero, and how comedy brings us together as theatregoers and as Americans.

THE 251
STAGE TO SCREEN: CINEMATIC TRANSLATIONS OF THE DRAMATIC CANON
Undergraduate
It is almost always the case that audiences are introduced to the dramatic canon with cinematic translations of the great plays, rather than actual productions. In this course we will examine what elements theatre and film share as well as what elements one or the other medium possesses exclusively if any. What is lost or, indeed gained in cinematic translation? What is the notion of theatricality? What cannot be translated to the film? What societal elements come into play when translating a play for the screen? Socio-political and historical milieu of the original plays will be examined as well as those of the screen plays.

THE 253
THEME PARK THEATRE
Undergraduate
Theme parks have become contemporary equivalents of the ancient Greek theatre festivals - places where the citizenry gather to revisit the myths and history of the community. While much has been written about theme parks from the perspective of cultural studies, urban planning, and commerce, little attention has been paid to their function as performance or theatre. In this class we will attempt to develop criteria for evaluating theme park attractions as works of art. How do theme parks fulfill or challenge traditional definitions of theatre? What is the relationship between audience and performer? Can/should theme parks aspire to do more than entertain? How are stories told physically and architecturally? How have theme parks influenced theatre and other art forms?

THE 254
POLITICAL THEATRE
Undergraduate
This course surveys political theatre from the ancient Greeks right up until today. Through an examination of the political contents of specific plays and of theoretical reading, such as manifestos, the course instructs students in critical thinking, the relationship between form and content, and between a society and one genre of art.

THE 255
ANGELS, PUNKS AND RAGING QUEENS: THE ECLECTIC QUILT OF AIDS DRAMA
Undergraduate
Acquired Immune Deficiency Syndrome (AIDS) has left an indelible mark on both the history and culture of the world. While fear and loss can paralyze, they can also mobilize. In addition to destroying generations of artists, AIDS has become what some call "the great unifier," giving voice to a new generation of theatre artists. But what are these voices? Cries for social change? Political rants? Stories of remembrance? Lessons to educate? All of the above? What does AIDS mean when it appears onstage in a performance? By interpreting and analyzing plays from both national and global AIDS perspectives, reading critical and reflective essays, and through discussion, students in the course will discover how the ritual of theatre has been used to create the eclectic quilt of voices that is AIDS drama.
THE 256
THEATRE FOR YOUNG AUDIENCES DRAMATIC LITERATURE: PLAYS FOR THE ONCE AND FUTURE AMERICAN AUDIENCE
Undergraduate
Over the past one hundred years or so, artists and educators in the United States have specifically dedicated themselves to sharing and creating aesthetic, creative experiences for young people. But what have been the impulses behind these plays and creations? Why specifically devise a theatre for young audiences (TYA)? Are children just little adult theatre goers or has an approach and methodology developed through the years to speak directly to young people? The goal of this introductory course is find some answers to thesequestions by surveying the history of dramatic literature for children in the United States from the beginning of the last century to the present day. Through readings, lectures, workshops, and discussions students will gain insight into the TYA theories, philosophies, styles, and practices that have accumulated over the years. By excavating the past and examining the present, students will achieve further appreciation and understanding of the spectrum of theatrical experiences written and improvised for children.

THE 257
WRITING LOCALLY, THINKING GLOBALLY: INTERNATIONAL THEATRE FOR YOUNG AUDIENCES DRAMATIC LITERATURE
Undergraduate
While writing and performing for their local communities, various international artists have made a global impact on the field of theatre for young audiences. This course is an investigation of the principles, procedures, and practices of theatre for young audiences playwrights and artists worldwide. Through analysis of readings, lectures, workshops, and discussions students will explore the skills and aesthetic techniques that theatre creators from around the globe use to communicate with their audiences. By examining historical, theoretical, and artistic intercontinental connections, students will hopefully gain further appreciation and understanding of the contemporary, global theatre for young audiences (TYA) field.

THE 258
SHADOWS OF UNDERSTANDING: THE HOLOCAUST IN THEATRE AND PERFORMANCE
Undergraduate
The Holocaust of the 20th Century perpetrated and executed by Nazi Germany, has both seared itself into people's consciousness and become very much a part of world culture. Theatre and performance have been created to try to understand this event and search for meaning. Created through multiple perspectives and styles - historical and political, philosophical and religious, realistic and surrealistic, using dark humor and the power of memory, focusing on gender relations -- there is no one method of presenting the Holocaust artistically. Through a close investigation of key theatre and performances, students will discover many works that were unknown to them and that will help to shed some light on these representations more deeply, reflecting thecomplexity of the Holocaust in a search for understanding and ultimately seeking to answer this imperative, "Can and should art be made from representations of genocidal atrocity?"

THE 259
PERFORMING MOSAIC: JEWISH CULTURE'S INFLUENCE ON AMERICAN THEATRE AND PERFORMANCE
Undergraduate
Over the years the abundance of artistic contributions from Jewish creators--playwrights, performers, composers and lyricists, acting teachers and producers-- has helped to shape the American Theatre as we know it. Through a critical reading of the plays in their context and viewing performances on video this course will explore the unique synthesis and the long and colorful relationship between Jews and theatre in America. Critical questions to be asked are: How does the ethnic mosaic of America and American values and multi-culturalism act as an incubator? How did anti-Semitism and stereotypes play a role? Does the cultural memory of the Jew as the "outsider and survivor in history" provide a particular aesthetic?

THE 260
CHICKS, MEAN GIRLS AND FEMMES FATALES: WOMEN WRITING IN THE AMERICAN THEATRE
Undergraduate
This course examines ninety years of women's dramatic writing in America from the jazz age to today. We will look at plays written by women, and theoretical essays about the plays and playwrights; biographies, as well as historical materials illuminating plays; themes and forms. Identity has always been important to American dramaturgy and women have always occupied a unique place in the theatre: as actresses, as spectators, as icons, as demons, and finally as creators. Women have been playwrights but they have also been producers and theatre adventurers.

THE 261
OCULAR PROOF: SHAKESPEARE'S INFLUENCE IN CINEMA
Undergraduate
Shakespeare's plays explore the scope and depth of the human experience. Using the visual elements of cinema, these epic stories translate effectively for modern audiences. Students will read four plays by Shakespeare, and explore their thematic and dramatic interpretations on film: two adapted from Shakespeare's themes and two cinematic versions of the plays themselves which will elucidate the 'ocular proof' of Shakespeare's influence on cinema.
THE 268
INTRODUCTION TO THE PRODUCTION PROCESS
Undergraduate
This course introduces students to the specifics of the production process and focuses on similarities and differences between the curricular perspective of the production process at The Theatre School and that of the professional world. Through readings, lecture, and discussion, students will gain an orientation to the responsibilities and expectations of first-year crew assignments, basic skills involved in stage management, examples of the production process from both the Chicago and national theatre scenes, and the concept of collaboration as a fundamental component of all production work.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 269
STAGE MANAGEMENT WORKSHOP
Undergraduate
Second course in a 2 course sequence. A survey of the stage manager's role in pre-production, rehearsal, tech and performance. The course will explore the techniques and responsibilities of the stage manager in a variety of theatrical venues.

THE 268 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 271
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
First course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 272
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
Second course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 273
THEATRE STUDIES PRODUCTION PRACTICE I
Undergraduate
Third course in a 3 course sequence. For all Theatre Studies students, this course makes assignments related to the student's major, including Dramaturgical work, assistant directing, and stage managing.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 291
PERFORMANCE WORKSHOP I
Undergraduate
The first course in a 3-course sequence. Students work on basic performance skills through individual and group exercises in acting, voice and speech, and movement. The work culminates in in-class performances of selected scenes and/or monologues from a variety of contemporary American plays.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 292
PERFORMANCE WORKSHOP II
Undergraduate
The second course in a 3-course sequence. Students expand on basic performance skills emphasized in Performance Workshop 1. The emphasis in this second quarter focuses on the actor's approach to text, intentionality and motivation, objectives, obstacles, the tactics used in realizing physical actions in performance, and an introduction to the director-actor relationship in rehearsal.

THE 291 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 293
PERFORMANCE WORKSHOP III
Undergraduate
The third course in a 3-course sequence. The focus of the final course is on the practical dynamics of the director-actor relationship. Students in Performance Workshop 3 serve as the acting company for those students in the third quarter of the BFA Directing sequence.

THE 292 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 301
THEATRE MANAGEMENT II: INTRODUCTION TO COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about the current environment in the world of commercial theatre. Focusing on the study of producing, students will learn about the nature of the work of the producer, general manager, and other key figures; securing rights to theatrical properties; raising capital for theatrical productions (filings, offerings, Securities and Exchange Commission); facilities and touring issues. Studies include researching commercial theatre entities and individuals.

THE 301 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 302
THEATRE MANAGEMENT II: HUMAN RESOURCES MANAGEMENT IN THE COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about human resource management and compliance with federal employment laws including review of employee handbooks, employee benefits, payroll and withholding, I-9, W-2 and W-4 forms, employee vs independent contractor status as well as hiring someone who is a corporation. The course reviews the history, membership, contracts and work rules of the theatrical unions in the United States, collective bargaining, labor arbitration and non-union human resource management in commercial theatre.

THE 301 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 303
THEATRE MANAGEMENT II: FINANCIAL MANAGEMENT IN THE COMMERCIAL THEATRE
Undergraduate
Through lecture, discussion and projects, the student learns about financial planning, budgeting and accounting, box office income, booking agreements and deals, paying labor and other expenses, income statements, and settlements. Attention is paid to distinguishing between facility licensing agreements and booking contracts.

THE 302 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 320
MOVEMENT WORKSHOP
Undergraduate
By exploring a beginning approach to one or more methodologies intended to increase an actor’s movement and use of self, this course provides a starting point for the analysis of the processes an actor uses to broaden, deepen, and clarify physical work on a character and as a member of an artistic ensemble.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 324
DRAMATIC THEORY
Undergraduate
This course explores the art and craft of reviewing and writing about theater and the other performing arts in a variety of different media, from newspapers to alternative weeklies to magazines. The course also aims at developing for the student a systematic understanding of the concepts and issues that have historically informed theatrical criticism, as well as those that inform the contemporary period.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 325
DRAMATIC CRITICISM
Undergraduate
Through reading, lecture, discussion, and writing practicum, the course introduces foundational concepts in descriptive and evaluative criticism. Through the process of writing critical responses to theatre performances, the course addresses topics from criteria for script evaluation to expected outcomes of the theatrical experience. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 326
DRAMATIC CRITICISM
Undergraduate
Through reading, lecture, discussion, and writing practicum, the course introduces foundational concepts in descriptive and evaluative criticism. Through the process of writing critical responses to theatre performances, the course addresses topics from criteria for script evaluation to expected outcomes of the theatrical experience. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 327
PLAYWRITING II
Undergraduate
First course in a 3 course sequence. Students in this year long course focus on the completion of a major, full length work for the stage. Through writing exercises, table work sessions, storyboarding, targeted rewriting, minimal staging, and other means, students will experience the various stages of the process of writing a major work - from conception to development to public presentation. Plays written in this course are presented in the annual Wrights of Spring Festival and considered for production in the Theatre School season.

THE 229 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 328
PLAYWRITING II
Undergraduate
Second course in a 3 course sequence. Students in this year long course focus on the completion of a major, full length work for the stage. Through writing exercises, table work sessions, storyboarding, targeted rewriting, minimal staging, and other means, students will experience the various stages of the process of writing a major work - from conception to development to public presentation. Plays written in this course are presented in the annual Wrights of Spring Festival and considered for production in the Theatre School season.

THE 327 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 329
PLAYWRITING II
Undergraduate
Third course in a 3 course sequence. Students in this year long course focus on the completion of a major, full length work for the stage. Through writing exercises, table work sessions, storyboarding, targeted rewriting, minimal staging, and other means, students will experience the various stages of the process of writing a major work - from conception to development to public presentation. Plays written in this course are presented in the annual Wrights of Spring Festival and considered for production in the Theatre School season.

THE 328 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 330
MUSICAL THEATRE WORKSHOP
Undergraduate
This course provides an introduction to musical theatre through performance (including solo and group singing and scene preparation) and historical and theoretical studies (including vocal technique, musical theatre history and literature, and music theory).

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 332
PLAYWRIGHT’S SEMINAR II
Undergraduate
Continues and deepens the exploration of form students begin in Playwrights Seminar I. In this course students explore the underlying formal principles found in various works of architecture, music, visual art, literature, and theatre. Each week students apply these principles to the writing and presentation of short theatrical works. The goal of this course is to expose students to a wide array of approaches to dramatic form.

THE 232 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 334
DRAMATURGY II: CLASSICAL DRAMATURGY
Undergraduate
The first class in the three-term Dramaturgy II sequence, this course continues the work of Dramaturgy I and focuses on the preparation for work on a classical play.

THE 234, 235, 236 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 335
DRAMATURGY II: NEW PLAY DRAMATURGY
Undergraduate
This course is taught in conjunction with The Theatre School's playwriting program and focuses on the dramaturgical work involved in new play development.

THE 234, 235, 236 and status as an Undergraduate or Graduate Theatre student or permission of instructor is a prerequisite for this class.

THE 336
DRAMATURGY II : DRAMATURGY CAPSTONE
Undergraduate
The final class in the dramaturgy sequence, this course focuses on issues relevant to dramaturgical work. Students in the class will be required to write a thesis essay that emphasizes a dramaturgical issue relevant to their own production work.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 344
HAMLET IN PERFORMANCE: SCRIPT, STAGE, SCREEN
Undergraduate
It is through performance that the essence of Shakespeare materializes. In this course we will examine the relationship of Hamlet to theory, theatrical performance, and film. What makes a good production of Hamlet or a bad one? Was Hamlet rooted in economic necessity? What is lost or gained by filmic representation? To comprehend Shakespeare as a writer whose Hamlet continues to fascinate modern audiences, the course looks at not only the page-to-stage translations but also the critical cultural context in which he first achieved artistic success.

THE 345
POLITICAL THEATRE
Undergraduate
This course surveys political theatre from the ancient Greeks right up until today. Through an examination of the political contents of specific plays and of theoretical reading, such as manifestos, the course instructs students in critical thinking, the relationship between form and content, and between a society and one genre of art.

THE 371
THEATRE STUDIES PRODUCTION PRACTICE II
Undergraduate
First course in a 3 course sequence. This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 372
THEATRE STUDIES PRODUCTION PRACTICE II
Undergraduate
Second course in a 3 course sequence.  This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 373
THEATRE STUDIES PRODUCTION PRACTICE II
Undergraduate
Third course in a 3 course sequence.  This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 381
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
First course in a 3 course sequence.  The styles and aesthetics of art, architecture, fashion and the decorative arts from ancient Egypt through the first half of the 20th century are examined. Emphasis is placed on periods and countries that are most important to American theatre. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 382
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
Second course in a 3 course sequence.  The styles and aesthetics of art, architecture, fashion and the decorative arts from ancient Egypt through the first half of the 20th century are examined. Emphasis is placed on periods and countries that are most important to American theatre. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 383
SURVEY OF THE ARTS FOR THEATRE
Undergraduate
Third course in a 3 course sequence.  The styles and aesthetics of art, architecture, fashion and the decorative arts from ancient Egypt through the first half of the 20th century are examined. Emphasis is placed on periods and countries that are most important to American theatre. Can be taken by non-Theatre School students with permission of instructor.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 399
INDEPENDENT STUDY
Undergraduate
Independent Study

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 408
CAPSTONE: PREPARING FOR THE PROFESSION
Undergraduate
Preparing for the Profession is the first course in the 2-term Capstone sequence.  This course serves as a cumulative and summative examination of both the academic and practical components of a 4-year BFA program in theatre studies. Through readings, writing, and discussion, the course will emphasize a number of theoretical issues such as the question of ethical decision-making in theatre practice and the interrelationship between liberal studies coursework (what we make theatre about) and theatre coursework (how we make theatre). From a more practical perspective, this course will also provide students with an introduction to portfolio preparation and cover letters and resumes for prospective jobs as students prepare to enter the professional market.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 410
THEATRE STUDIES CAPSTONE
Undergraduate
Graduating students will explore the practical and philosophical issues of contemporary theatre. Topics will range from the preparation of resumes and portfolios for various positions to explorations of the role of the arts in society.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 412
PORTFOLIO PREPARATION
Undergraduate
Portfolio Preparation expands and heightens the work begun in THE 408, Preparing for the Profession, and THE 410, Capstone. Students during the spring quarter course will work to develop a variety of cover letters for prospective jobs, refine and finesse their resumes, review interviewing techniques, and participate in a series of mock interviews for specific theatre companies - all in preparation for Theatre Studies participation in Graduate Showcase.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 424
SEMINAR: TOPICS IN THEATRE STUDIES
Undergraduate
Seminars will offer intensive study of various areas of theatrical study including history, criticism, performance and production. The courses may be organized around specific topics, issues, artists or themes.

THE 204, 205, 206 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 425
SEMINAR: TOPICS IN THEATRE STUDIES
Undergraduate
Seminars will offer intensive study of various areas of theatrical study including history, criticism, performance and production. The courses may be organized around specific topics, issues, artists or themes.

THE 204, 205, 206 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 426
SEMINAR: TOPICS IN THEATRE STUDIES
Undergraduate
Seminars will offer intensive study of various areas of theatrical study including history, criticism, performance and production. The courses may be organized around specific topics, issues, artists or themes.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 427
PLAYWRITING III
Undergraduate
First course in a 3 course sequence. Advanced playwrights work on independent projects one on one with faculty. Students have the opportunity to refine existing work for workshop in Wrights of Spring or production in the Theatre School season. Students will also be exposed to the practical business of being a playwright entering the profession.

THE 329 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 428
PLAYWRITING III
Undergraduate
Second course in a 3 course sequence. Advanced playwrights work on independent projects one on one with faculty. Students have the opportunity to refine existing work for workshop in Wrights of Spring or production in the Theatre School season. Students will also be exposed to the practical business of being a playwright entering the profession.

THE 427 and Status as an Undergraduate Theatre student is a prerequisite for this class.
THE 429
PLAYWRITING III
Undergraduate
Third course in a 3 course sequence. Advanced playwrights work on independent projects one on one with faculty. Students have the opportunity to refine existing work for workshop in Wrights of Spring or production in the Theatre School season. Students will also be exposed to the practical business of being a playwright entering the profession.

THE 428 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 430
TOPICS IN PLAYWRITING I
Graduate
The first in a three sequence course. In these courses, advanced playwriting students are exposed to a wide array of approaches to playwriting. Topics might include improvisational based dramatic writing, the playwright-dramaturg relationship, adaptation, collaboratively written work and writing from a multicultural framework.

THE 332 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 431
TOPICS IN PLAYWRITING II
Graduate
The second course in a three course sequence. In these courses, advanced playwriting students are exposed to a wide array of approaches to playwriting. Topics might include improvisational based dramatic writing, the playwright-dramaturg relationship, adaptation, collaboratively written work and writing from a multicultural framework.

THE 430 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 432
TOPICS IN PLAYWRITING III
Graduate
The third course in a three course sequence. In these courses, advanced playwriting students are exposed to a wide array of approaches to playwriting. Topics might include improvisational based dramatic writing, the playwright-dramaturg relationship, adaptation, collaboratively written work and writing from a multicultural framework.

THE 431 and Status as an Undergraduate Theatre student is a prerequisite for this class.

THE 434
SEMINAR: TOPICS IN DRAMATIC LITERATURE
Undergraduate
Seminars will offer intensive study of various areas of literature created for the theatre. The courses may be organized around specific playwrights, historical periods, styles or themes.

THE 204, 205, 206 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 435
SEMINAR: TOPICS IN DRAMATIC LITERATURE
Undergraduate
Seminars will offer intensive study of various areas of literature created for the theatre. The courses may be organized around specific playwrights, historical periods, styles or themes.

THE 204, 205, 206 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 436
SEMINAR: TOPICS IN DRAMATIC LITERATURE
Undergraduate
Seminars will offer intensive study of various areas of literature created for the theatre. The courses may be organized around specific playwrights, historical periods, styles or themes.

THE 204, 205, 206 and status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.
THE 471
THEATRE STUDIES PRODUCTION PRACTICE III
Undergraduate
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 472
THEATRE STUDIES PRODUCTION PRACTICE III
Undergraduate
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 473
THEATRE STUDIES PRODUCTION PRACTICE III
Undergraduate
This course makes assignments based on the student's ability and experience.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 490
THEATRE STUDIES INTERNSHIP
Undergraduate
The internship provides the student with an opportunity to learn by working with professionals in an area related to his/her area of study at The Theatre School.

Status as an Undergraduate or Graduate Theatre student is a prerequisite for this class.

THE 511
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training course as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of tickets sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure.

Status as Graduate Theatre student is a prerequisite for this class.

THE 512
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure.

Status as Graduate Theatre student is a prerequisite for this class.

THE 513
GRADUATE MANAGEMENT PRACTICUM
Graduate
Work training as full-time employment at Chicago Shakespeare Theater. Specialized training in company operations of ticket sales, gift processing, customer service, house management, producing, company management, budget development, special event planning, subscription campaign, marketing and development, facilities operations, and organizational structure.

Status as Graduate Theatre student is a prerequisite for this class.
The 521
Arts Leadership Synthesis Seminar
Graduate
All study revolves around this weekly seminar that includes aspects of the Chicago Shakespeare work experience and DePaul course integration in addition to readings, field trips, projects, and time for independent study. The Synthesis Seminar is fluid and reflective, allowing for both examination of coursework and on-the-job experience. Each seminar session synthesizes the students' weekly studies, experiences both at work and in the community, independent research, and natural curiosity in close connection with Theatre School faculty, program director, and the Chicago Shakespeare department heads.

Status as Graduate Theatre student is a prerequisite for this class.

The 522

THE 681  
ARTS LEADERSHIP THESIS PROJECT  
Graduate  
As the final term of the Synthesis Seminar, this course focuses on the culmination of the program and successful completion of a final capstone project. These projects will be individually selected in conference with the Program Director during the second year of the program. Possible projects include analytical reports, a specific and substantial employment undertaking, and exploration and treatise with an innovative focus in the industry.  
Status as Graduate Theatre student is a prerequisite for this class.

TV 110  
FOUNDATIONS OF TELEVISION  
Undergraduate  
This course provides an introduction and framework of the history of television production. Evolving story forms will be examined from television's beginnings to the present. Developments in story and production styles will be analyzed and discussed. Professionals from different sectors of the Chicago television industry will speak to the class in panels.

TV 271  
INTRODUCTION TO TELEVISION PRODUCTION  
Undergraduate  
An introduction to the basic principles, procedures, and techniques of television production. The course heavily utilizes Digital Cinema's TV studio. Students are organized in teams and create various TV broadcasts. Students learn how to operate TV switchers, TV cameras, sound, and graphic equipment. The course covers the fundamentals of producing, scripting, directing, and editing for television.

TV 289  
THE BUSINESS OF TELEVISION  
Undergraduate  
Course provides historical background of the television business, beginning with the initial launch of the industry in the 1940s. Students examine the establishment of the regulatory system, including the Federal Communications Commission (FCC), the operational structure of stations and networks, the development of cable and satellite broadcasting, and the programming policies and strategies of the present broadcasting industry. PREREQUISITE(S): DC 271
TV 301
THE WRITERS ROOM: DEVELOPING THE HOUR LONG DRAMA
Undergraduate
This is a creative and intense course that takes you from the germ of a story idea to a fully thought out one-hour drama. In this class, you will work with your colleagues and the instructor to enhance your skills in storytelling and in laying out a complete season of your show for cable, broadcast or digital distribution. Additionally you will develop a minimum of one outline for an episode in the season. PREREQUISITE(S): DC 272 and DC 307

TV 302
THE WRITERS ROOM: DEVELOPING THE HALF HOUR COMEDY
Undergraduate
This is a creative and intense course that takes you from the germ of a story idea to a fully thought out half-hour comedy series. In this class, you will work with your colleagues and the instructor to enhance your skills in storytelling and in laying out a complete season of your show for cable, broadcast or digital distribution. Additionally you will develop a minimum of one outline of an episode in the season. PREREQUISITE(S): DC 272 and DC 306

TV 310
TV PRODUCTION WORKSHOP
Undergraduate
In this workshop students will produce projects for internal and external clients. Students will learn professional practices and work with clients to create projects such as promos, documentaries, commercials, short series and live events from concept inception to finished product. Through this process, students will examine different professional roles involved in the TV production process. PREREQUISITE(S): None

TV 320
EDITING FOR TELEVISION
Undergraduate
Class emphasizes editing and post production producing under tight deadlines. Students edit commercials, trailers, and PSA projects. PREREQUISITE(S): DC 220, DC 271

TV 330
DIGITAL SERIES PRODUCTION
Undergraduate
Students will write, produce, edit, screen and webcast a series of five-minute webisodes over the course of the quarter, focusing on short form storytelling for online distribution. Students will have to think creatively, collaborate and act quickly to complete the webisodes on deadline. The class will focus on short serial storytelling discussing composition, structure and editing for the various forms the work will take (narrative, documentary, sitcom, reality, etc...). Production groups will be assigned and create a series. Each student will write at least one script of that series that will be produced. All will take part in the production process. PREREQUISITE(S): DC 210

TV 351
ADVANCED TELEVISION PILOT PRODUCTION
Undergraduate
Advanced production class focused on the pre-production, casting, production, and post of a pilot script. PREREQUISITE(S): DC 210, TV 271

TV 372
TOPICS IN TV PRODUCTION
Undergraduate
This course is a hands-on experience in television production of news and public affairs programs. Students learn through theory and practice the role TV Producers and their teams play in creating various TV programs. PREREQUISITE(S): None

TV 373
REALITY TELEVISION PRODUCTION
Undergraduate
Advanced production class develops a reality or factual show concept and treatment. Students will produce and cast a pilot based on their treatments. The class will focus on techniques and methods to build engagement and conflict within the reality or factual genre.
TV 381
LIVE EVENT/ TALK TV WORKSHOP
Undergraduate
In this workshop students will produce events with guest artists, presented in front of a live studio audience. Students will help prep each appearance and participate as crew members in the multi-camera production and telecasting of the events. They will learn the professional practices and positions that constitute talk-show format television production. Post-production and finishing for Web Streaming and VOD delivery will also be addressed. 2 credits. May be repeated for credit.

TV 385
PRODUCING TELEVISION
Undergraduate
This is a course discussing the different roles of the television producer and show runners. Particular emphasis will be put on exploring and discussing the difference between line, segment, coordinating, field, executive (show-runner), and supervising producers. Students wear many television producer hats through the quarter, and will explore those roles in relation to different scripted and non-scripted formats. Examining and performing various tasks like budgets, staffing, and scheduling will give students a comprehensive view of the needs and responsibilities of different producers. Additional consideration will be given to the on-set roles and responsibilities of the showrunner in the television production environment. The class will culminate in the creation of short promo segments of various styles of television shows.
PREREQUISITE(S): DC 210, TV 306 or TV 307

TV 398
TELEVISION CAPSTONE
Undergraduate
This course provides a television-specific capstone experience for the student. The capstone course will connect the student's television production course work with the University courses s/he has taken through three components: student-generated production packages, class/instructor discussions, and the actual production of the student's production proposal.

TV 430
DIGITAL SERIES PRODUCTION
Graduate
Advanced production class focused on the techniques and production methods of a television program. Students will learn three-camera and one-camera directing and on-set and on-location television shooting and lighting workflows. The class will culminate in the pre-production, casting, production, and post of a television pilot script in a collaborative environment.

TV 451
ADVANCED SCRIPTED TELEVISION PRODUCTION
Graduate
Advanced production class focused on the techniques and production methods of a television program. Students will research and create case studies comparing the methods of productions of different shows. Students will learn three-camera and on-camera directing and on-set and on-location television and lighting workflows and will create short scene studies using the different methods of production. Collaboratively, students will work to create a television pilot using an advanced production technique of their choosing.

TV 481
LIVE EVENT/ TALK TV WORKSHOP
Graduate
In this workshop students will produce events with guest artists, presented in front of a live studio audience. Students will help prep each appearance and participate as crew members in the multi-camera production and telecasting of the events. They will learn the professional practices and positions that constitute talk-show format television production. Post-production and finishing for Web Streaming and VOD delivery will also be addressed. 2 credits. May be repeated for credit.

UIP 240
CAREER PATHWAYS: EXPLORE CAREER OPTIONS
Undergraduate
This 2-credit course will help you analyze your values, skills, personality preferences and studies as a foundation for career possibilities. You will meet with a mentor from the Chicago community, who shares your career interests, and you will examine a variety of career paths, supported by research and personal reflection.
UIP 241
UNCOVERING YOUR SKILLS
Undergraduate
In this 2-credit course, you will learn how your academic studies, as well as your work and campus activities, will transfer to the workplace. By the end of the course, you will know how to articulate both your academic accomplishments and relevant skills in a way that will impress potential employers.

UIP 250
YOU, YOUR WORK AND THE WORLD
Undergraduate
UIP 250 integrates academic curriculum with supervised work experiences in both the private and public sectors. Internships are an essential part of a student's academic experience at DePaul. The course promotes the life-long education process of integrating work and learning; enables students to view their internship experiences within a broad world perspective; assists career decision-making; drives individual success through on-the-job experiences; and provides students with valuable networking and other career-development opportunities. The course includes 5 2-hour classroom meetings and ongoing D2L discussions. Some sections of UIP 250 are completely online. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 251
VALUES-BASED LEADERSHIP
Undergraduate
In UIP 251 students will learn about the principles and practices of effective leadership through the study of leadership topics and by researching visionary leaders. Students will also strengthen key leadership skills, apply those skills at their internship sites and identify ways to be a leader in a potential career. This is a hybrid course that will meet five times per quarter. Students are required to work 100 hours. Attendance at an internship orientation is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 252
CREATIVITY AS A CHANGE AGENT THE WORKPLACE
Undergraduate
Creativity as a Change Agent in the Workplace examines creative innovations related to invention, leadership, advertising and marketing, teaming concepts and collaboration, and the drive behind entrepreneurship. This is a hybrid course that will meet five times per quarter. Students are required to work at least 100 hours during the quarter. Attendance at an internship orientation meeting is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 253
EXPLORE NONPROFIT, GOVERNMENT AND COMMUNITY CAREERS
Undergraduate
Public service careers involve working with organizations that produce a public good. Those organizations may be nonprofits (providing low-income housing, or supporting the arts, e.g.); community organizing groups; foundations, which typically provide funding; unions; and the local, state, and federal governments. Students will familiarize themselves with career options and gain valuable networking opportunities. This hybrid course will meet five times per quarter. Students are required to work 100 hours during the quarter. Attendance at an internship orientation is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 254
CORPORATE SOCIAL RESPONSIBILITY
Undergraduate
Students will examine their own internship experiences, along with real world case studies, research, and commentary, to learn about the critical decision-making processes organizations address as they balance competitive advantages against the weight of social progress. This is an online course. Students are required to work at least 100 hours during the quarter in which they are enrolled in the class. Attendance at an internship orientation is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.
UIP 350
NAVIGATING THE CHANGING WORKPLACE
Undergraduate
UIP 350 is an online course, where students use their current work experience to examine and report on key issues impacting their organizations and personal work lives. Students will study internal and external factors affecting their work environment, traditional and virtual work arrangements, the increased influence of technology, as well as ethical questions and leadership styles. They will also develop interviewing and networking skills. Requirements for UIP 350 enrollment are more than three years of work experience or an already-completed department or UIP internship course. Students are required to work 100 hours during the quarter. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

UIP 367
GLOBAL PERSPECTIVES
Undergraduate
Global Perspectives is designed to support students’ developing viewpoints and experiential reflections during an intensive internship in Honduras. Students will explore case studies, commentary, research, and personal interviews in order to draw conclusions and apply what they’ve learned to their own future careers. Students are required to work 100 hours. Attendance at an internship orientation meeting is required. All of our 4-credit UIP courses fulfill the JYEL learning requirement. If you have completed the requirement already, the course will be counted as a general elective course.

VFX 200
INTRODUCTION TO VISUAL EFFECTS
Undergraduate
Students will explore contemporary concepts and approaches to production in the current state of film and video effects work. Digital and traditional methodologies will be covered, with a concentration on digital exercises illustrating modern techniques. PREREQUISITES: NONE

VFX 321
DVD AUTHORING
Undergraduate
This course is designed to guide the student in the creation of a fully interactive DVD with menus, chapters, multiple tracks, "Easter eggs," and special features. Students will utilize the current editing/motion graphics/compression/titling software in the creation of their professional quality DVD’s. The class will also explore Blu-Ray and HDDVD formats. PREREQUISITES: DC 220

VFX 374
DIGITAL COMpositiNG I (Formerly VFX 278)
Undergraduate
Compositing is the art of combining all the elements of a visual effect in one shot, making it look as if it were all shot at the same time, under the same lights, with the same camera. This class introduced the fundamental techniques of digital compositing, using Adobe After Effects.

VFX 378
DIGITAL COMpositiNG II
Undergraduate
This course expands on topics covered in VFX 278. Emphasis is on developing the student's understanding of advanced compositing techniques and design. PREREQUISITES: VFX 278

VFX 391
VIRTUAL CINEMA
Undergraduate
Utilizing traditional, live-action, filmmaking techniques along with green screen compositing and CGI students will create high-definition narrative motion pictures. Working on a "digital backlot" students will employ HD cameras while actors work in front of a green screen to all for the artificial backgrounds as well as some major foreground elements to be added later during the post-production stage. Students will be expected to collaborate with animation students in the creation of their final projects. PREREQUISITES: VFX 378, DC 390
Compositing is the art of combining all the elements of a Visual Effect in one frame, making it look like it was all shot at the same time, under the same lights, with the same camera. This class introduces the fundamental techniques of digital compositing, using Adobe After Effects. It also introduces students to the design, planning and production workflows of a modern VFX project, through a VFX story written, planned and produced in class.

This course expands on topics covered in VFX 278. Emphasis is on developing the student's understanding of advanced compositing techniques and design. PREREQUISITE(S): VFX 278 or DC 460.

This course will introduce students to Women's & Gender Studies by exploring a range of issues that contemporary women face through experiences stratified by race, class, gender, sexuality, and disability. Topics will include women's identities; body image and the media; women's sexuality; intimate relationships and families; women, violence and criminalization; women's work, wage discrimination, and welfare reform; women's health issues, such as reproductive rights, and medical research. Participants will have opportunities to examine ways that this stratification interacts in varied eras, cultures, and sub-cultures to shape women's lives. Students will engage in an activist focus as they are introduced to the layers of oppression that affect many women's lives, from the personal to the global. As they analyze social, cultural, and political issues through "gendered lenses", participants may expand a view of their personal lives to include a framework that encourages resilient responses to such oppression.

This course is a transnational approach to Women's & Gender Studies, examining how goods, money, and media images of women cross national in new ways. A further focus is on how this transformation of national boundaries depends not only upon political changes but also upon economic and cultural shifts. This transnational perspective pays attention to the inequalities and differences intersecting race, class, and gender that arise from new forms of globalization as well as from older histories of colonialism and racism. The course is designed to give the student an in-depth look at a world of connections that do not necessarily create similarities in how women variously experience that world. It introduces students to research by and about women that reflects transnationality in all of its possibilities and challenges.

This course examines what it means to grow up female in the contemporary U.S. It explores the ways in which girls develop and are socialized through childhood and adolescence, focusing on how families, schools, peers, and the larger culture influence young women's lives and the ways in which race, ethnicity, class and sexual orientation affect their growth and learning and how their interaction might affect the behaviors and choices of young women as they mature.

This course examines gender as a social construct and its meanings within the context of educational institutions, its implications for teaching and learning, and organizational practices that may oppress and/or empower groups or individuals. Emphasis is given to social forces within the larger society that affect education and schooling; sex-stereotyping and gender bias; teacher behaviors; attitudes, practices, and expectations; student motivation and achievement; principles of non-sexist education; gender bias in settings outside of schools; current issues in the media and popular culture; and the ways in which gender bias and sexism interact with other forms of prejudice, inequality, and oppression.
WGS 225  
CONSTRUCTING GENDER AND SEXUALITY  
Undergraduate  
This course will explore through interdisciplinary theory and research how gender and sexuality are socially constructed. It will examine how such constructions have evolved over time and how individuals of diverse identities and cultural backgrounds have been affected by the changes. Discussion will focus on the roles played by powerful societal institutions (e.g., religious, political, and medical) in effectively defining what is considered gender-appropriate behavior and legitimate sexual expression. Finally, the activism of recent social movements to psychological and politically empower individuals who are neither heterosexual nor traditionally masculine or feminine will be explored.

WGS 230  
CONTESTED BODIES  
Undergraduate  
This course will consider the theories and practices of differential embodiments and the experiences of bodies that don't fit the norm: queer bodies, fat bodies, transgender bodies, bodies of color. In Western/Global North cultures, the mind is given more importance than the body, and historically, oppressed groups have been associated more with bodies than minds. The course will aid in understanding and questioning the dominant norms that promote "normal" bodies and normative embodiment and offer alternative theories and practices of embodiment. Students interested in the performing arts, social and health sciences, fat studies and disability studies, as well as women's and gender studies students will find valuable frameworks in this class.

WGS 249  
GENDER AND POLITICS IN IRELAND  
Undergraduate  
This course explores the relationship between gender and politics in Ireland, focusing on the political history of gender relations in Ireland, women's political involvement throughout the enormous changes of the 20th Century, and contemporary legal and public policy issues related to sex/gender. The attitudes and behaviors of women as voters, activists, officeholders and peace activists will be examined, as will Ireland's place in global gender issues. We will pay particular attention to the changes that have taken place since Ireland's entry into the EU, the "Celtic Tiger" transformations of the Irish economy, and the impact of the recent worldwide economic recession on gender and politics in Ireland, along with the efforts of women, North and South, to further the process of peace in the North, which has been wracked by violence for several decades. Cross-listed with IRE 249.

WGS 250  
FEMINIST FRAMEWORKS  
Undergraduate  
This course introduces feminist theories and methodologies with an emphasis on how theoretical frameworks shape specific research, policies, and praxis. The course will provide an introductory exploration of feminist frameworks in relationship to specific issues and questions within women's studies, with some attention to the resulting research/analytic methods. The class will delineate, analyze and compare the underlying assumptions and frameworks of a variety of feminist theories (i.e. historical materialist, liberal, radical, standpoint and identity-based, critical race, postcolonial, and transnational theoretical frameworks) in relation to a set of issues and questions (e.g. violence against women, sex discrimination, reproductive rights). The class will explore the relationship between these frameworks and knowledge production, public policy, and social change efforts within national and transnational contexts. Thus, the students will be able to discern how theories frame research questions and methods, as well as how they frame policy issues and action proposals; and students will be able to analyze the theoretical frameworks comparatively.

WGS 255  
DECONSTRUCTING THE DIVA  
Undergraduate  
This course studies the figure of the diva as a powerful cultural text, central to both understanding historical conceptions of socially normative femininity and to uncovering and examining our own present-day conceptions of what it means to be feminine, to be a woman. Through fiction, drama, biography, autobiography, film, audio recordings, and gender, the course explores representations of the diva in literature, art, and popular and high culture. The goal of this course is to investigate the ways that "diva" has actually been code for women (and sometimes men) behaving outside of societal norms. Students will do this both historically and thematically, uncovering a path in which "women behaving badly" are routinely censured, and silenced. Students will also investigate how women both resist and re-appropriate this label. This course also seeks to explore the lives of both extraordinary and ordinary women, contextualizing the historical moments that they both contested and were sometimes consumed by.

WGS 260  
GENDER, SEXUALITY AND VIOLENCE  
Undergraduate  
This course explores the social, political, and cultural contexts of interpersonal violence with a focus on sexual violence and dating violence among and against adolescents and young adults. This course also will emphasize activist strategies and anti-violence movements.
WGS 270
WOMEN IN CARIBBEAN SOCIETIES
Undergraduate
This is a survey course which focuses on the diverse social, cultural and political realities of women in the Caribbean region across and within historical periods marked by colonialism, slavery and indentureship; anti-colonial, nationalist and labor movements; economic globalization and the emergence of the postcolony. Drawing on primary documents, images, feminist postcolonial writings, the course investigates how women of indigenous, African, Chinese, Indian and multiracial (or "mixed") descent have been positioned within various societies, and in relationship to each other. Topics covered include visual representations of women, gender and sexuality; forms of resistance and political engagement; motherhood, reproduction and the State; women in various religious traditions; work and economic status; social class, color and femininities; popular culture.

WGS 275
BLACK FEMINIST THEORIES IN A U.S. CONTEXT
Undergraduate
This course introduces students to the major figures, statements, and movements that shape Black feminist thinking, writing and activism in the United States. Issues examined may include social and economic equity, beauty and voice, activism and social change; and the exploration of identity and subjectivity through the lens of intersectionality, including race, gender, sexual orientation, class, citizenship, and immigrant status. Throughout we will consider Black feminist thought's situatedness in larger frameworks of Western feminist thought and its linkages with international feminist discourses.

WGS 290
SPECIAL TOPICS
Undergraduate
See course schedule for current offerings.

WGS 300
FEMINIST THEORIES
Undergraduate
Disagreements about what counts as feminist theory have raged as the borders of feminist discourse have shifted over the past two and a half decades. Yet most feminists continue to insist that sex/gender be considered basic categories of analysis and theory. Broadly conceived, feminist theory--historical or contemporary--represents an attempt to understand and interpret the roots and causes of women's place in the world. This course examines how different theoretical perspectives address gender, class, racial, and sexual inequalities and the method(s) proposed for social change. Students will be required to critically engage these theories in terms of how they address the commonalities and differences among women, especially insofar as these are grounded in race, class, and sexual identifications and dissonances. This course is a core requirement for the Women's & Gender Studies major.

WGS 250 is a prerequisite for this course.

WGS 303
GENDER, VIOLENCE AND RESISTANCE
Undergraduate
This course explores the social and cultural contexts of interpersonal violence in women's lives, with a focus on domestic violence, rape, harassment. The course seeks to understand how gender, race, class, sexuality, and national differences and inequalities shape the experiences of violence, the social and institutional responses to violence, and strategies for resistance and change.

WGS 306
GENDER AND FAMILIES
Undergraduate
Gender and Families is an upper-level undergraduate course that considers issues raised by the diverse roles that women, men, and children play in families. It focuses particular attention on the social construction of gender in families, and examines families in their social, economic, and political contexts. Topics covered include adult intimate relationships, the social construction of motherhood and fatherhood, and shifting gender relations of power in families, family stress and adaptation, and the impact of social policies on families' lives.

WGS 307
WOMEN IN THE MIDDLE EAST: BEYOND THE VEIL
Undergraduate
This course explores how Middle Eastern Women have been represented in the media outside of the Middle East, by Arab women scholars, and "Third World" feminists and challenges these representations by focusing on issues such as veiling, the everyday lives of Middle Eastern Women, political activism, literary works, economics and social class, and media representations.
WGS 310
Feminist Ethics
Undergraduate
This course explores theoretical issues regarding women’s moral experience and feminist approaches to liberation from various forms of socio-cultural and political oppression. It explores the moral status of women from their own experiences and perspectives, in contrast to traditional Western ethics’ characterizations, as well as feminist ethical perspectives on oppressive social practices, such as racism and violence against women, and the ethical dimensions of difference among women.

WGS 314
Antiracist Feminisms
Undergraduate
This course introduces students to the wide array of feminist thinking regarding ideologies of race, racism, white privilege, ethnocentrism, racial and ethnic identifications, and their relationship to gender, class, sexual and national identities and locations. The ways that racism has divided women’s movements and feminist organizations will be examined along with the work of feminist scholars, writers, activists, and advocates who have articulated explicitly anti-racist theories, analyses, and programs within the U.S. as well as internationally.

WGS 316
Representations of the Body
Undergraduate
This course reflects the current explosion of intellectual interest in the body as a site of cultural meaning. The course addresses the questions of how the body is socially created and sustained. It explores those questions in terms of tensions between nature and culture, body and spirit, and how discourses of power converge in and on the body.

WGS 320
Transformative Justice: Theory and Practice
Undergraduate
This course introduces students to transformative justice responses to violence that do not rely on state institutions. These include collective processes for support and healing, intervention, accountability, and prevention. The pedagogical praxis of learning will be through communal peacemaking circles and collective strategy sessions to create community responses to violence. Cross-listed as WGS 420.

WGS 322
Female Identities: Young Adult Literature
Undergraduate
This course is an introduction to Young Adult Literature as a genre and explores how this literature relates to adolescent girls’ experiences in diverse cultural contexts. It addresses themes related to physical and emotional development, the development of personal values and beliefs; the construction of identity; beliefs and attitudes about the body; interpersonal relationships; gender and sexuality; and coping with change, death, belonging, alienation, and escape. Course materials are multicultural with a focus upon the experiences of female adolescents in terms of ethnicity, culture, gender, religion, disability, as well as other dimensions of difference within national and international contexts.

WGS 324
Women In Theatre: A Global Perspective
Undergraduate
This course examines the concepts of gender and theatrical performance with reference to history, culture, critical response, viewer interpretation, and identity in a global context. Students will study character as a dramatic construct with respect to gender, race, and class; it examines how dramatic images are as diverse as their cultural contexts; explores the concepts of reader and viewer response to theater; and interrogates the relationship between the American theatrical image and the larger global context within which images are created.

WGS 326
Women And Law
Undergraduate
This course investigates the variety of ways in which women come into relation with the law, e.g., through laws and judicial decisions dealing with equal opportunity. Cross-listed as PSC 363.
WGS 330
LESBIAN LIVES
Undergraduate
This course explores constructions of lesbian lives, politics, and communities in the U.S. using the political cartoons of artist Alison Bechdel as a primary text, along with theoretical and historical readings. Students examine the constructions of identities and politics within lesbian culture, paying particular attention to how these have changed and evolved over time, and how community can be created and sustained. Cross-listed with WGS 430.

WGS 332
CREATING CHANGE: CONTEMPORARY GLBT POLITICS
Undergraduate
This course explores the historical roots and contemporary realities of gay, lesbian, bisexual, and transgendered (GLBT) politics, nationally and internationally. GLBT groups and individuals are gaining political recognition, challenging institutions, and creating change by asserting claims to rights and protections under law. Such issues as hate crimes, marriage, AIDS, and ballot initiatives over non-discrimination law and policy have entered the political mainstream since the 1970's. This course examines the GLBT movement, its political and social strategies, conflicts and issues, and the political roles played by its members as participants in political culture. Cross-listed as PSC 312 and LGQ 332.

WGS 334
GROWING UP FEMALE IN A GLOBAL CONTEXT
Undergraduate
This course will address issues related to growing up female and coming of age in the 21st century within a global context. We will focus on the following questions, what does it mean to be female, a girl, a young woman in diverse cultural and cultural contexts, examining the ways in which community, family, peers, schools and relationships with others, popular culture and public policy influence their lived experiences, attitudes, beliefs, behaviors, choices and possibilities. The analytical framework will be rooted in understanding how the intersections of race, ethnicity, class, sexual orientation, religion, and belief systems influence notions of the self, the body, and the construction of female identities.

WGS 336
WOMEN AND FILM
Undergraduate
This course explores one or more ways in which film as art, as cultural product, or as industry has dealt with women, as subjects, artists, consumers or critics of film.

WGS 338
SEXUAL JUSTICE: LESBIANS, GAYS AND THE LAW
Undergraduate
This course examines the historical and contemporary relationships between lesbians, gays, and the law in the U.S., focusing on the intersections of power, sexuality, and identity with issues of sexuality-based discrimination. It focuses on case law, along with social science and legal literature, seeking out a diversity of voices and experiences. Primary emphasis will be on cases that have come before the U.S. Supreme Court since the mid-1950's, with particular attention paid to how groups and individuals have reached out to the court system for redress of injustice and how these groups and individuals have exercised or failed to exercise power within the legal process. Cross-listed with PSC 369, LGQ 338.

WGS 342
QUEER PIONEERS: CULTURE, GENDER, AND POLITICAL ACTIVISM
Undergraduate
This course examines some of the historical roots and contemporary realities of lesbian and gay politics in the United States through the biographies of pioneering individuals whose lives and work shaped an ongoing struggle for civil rights and social justice. The biographies of individuals who, as activists and artists, rose to challenge the conventions of culture, gender, and political exclusion will be studied in-depth to both illuminate the politics of social movement and suggest how these diverse individuals and experiences may influence past and future efforts for cultural and political change.

WGS 345
WOMEN, WAR AND RESISTANCE
Undergraduate
This course aims to make feminist sense of contemporary wars and conflicts. It analyzes the intersections between gender, race, class, and ethnicity in national conflicts. The class traces the gendered processes of defining citizenship, national identity and security, and examines the role of institutions like the military in the construction of femininity and masculinity. The course focuses on the gendered impact of war and conflict through examining torture, mass rape, genocide, and refugee displacement.
WGS 352
GENDER, COMMUNITY, AND ACTIVISM: COMMUNITY-BASED LEARNING IN WGS
Undergraduate
Gender, Community, and Activism: Community-Based Learning in WGS is an interdisciplinary experiential/service learning seminar designed for undergraduate and graduate students in the field of Women's and Gender Studies. In an effort to provide students with an experience that integrates the feminist-informed theoretical work of the classroom with practical application in the community, the course will pair students with internship opportunities at community-based organizations that focus on a cause/issue related to their particular area of scholarly interest. The course is designed to encourage learning by doing and reflecting, where students will be asked to reflect on their internship experiences outside of the classroom through course readings, written assignments, and class discussion.

WGS 354
CONTEMPORARY KNITTING: GENDER, CRAFT, AND COMMUNITY SERVICE
Undergraduate
This course will explore the gendered history of knitting and its contemporary popularity as both a creative leisure-time activity and a means of providing community service. The social history and social construction of a gendered division of labor surrounding knitting, with its complexities, provide the theoretical foundation of the course. Students will learn the basic techniques of knitting and will be expected to practice their new skills in- and out-side of the classroom. They will reach a level of proficiency sufficient to producing a minimum of three contributions to service knitting projects.

WGS 355
WOMEN AND ART
Undergraduate
This class considers both the history of women artists and representations of women from other cultures around the world, from prehistory to the contemporary era. In addition, it will introduce feminist methodologies that can be applied to specific case studies. Cross-listed with HAA 366, WGS 455 and MLS 474.

100/200-level History of Art and Architecture course or instructor permission is a prerequisite for this course.

WGS 363
GLOBALLY QUEER: TRANSNATIONAL LGBTQ POLITICS
Undergraduate
This course explores how political issues affecting lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities and individuals are linked to global and transnational politics of citizenship, power, security, and political economy. It focuses on how gender roles, relationships, and identities are constructed, deployed, challenged, and resisted around the world, paying particular attention to how these systems and structures are interconnected. Cross-listed as WGS 463 and LGQ 363.

WGS 375
FEMINISM OF THE BLACK DIASPORA
Undergraduate
This course is designed to offer a critical examination of black women's experiences and thought within a global and transnational framework. The course examines works by and about black women in diverse social, political, and geographical contexts: the continent of Africa, Western Europe, Canada, Latin America, the Caribbean, and Australia. Topics to be explored include: issues of politics and ideology; power and inequality based on intersectionality of race and other dimension of identity; agency, activism, and social movements; the mass media, popular culture and social policies. Cross-listed with WGS 475.

WGS 378
UTOPIAN AND DYSTOPIAN LITERATURE AND FILM: GENDER, RACE AND BEYOND
Undergraduate
What does the future hold for humankind on this planet and elsewhere? What will life be like in the not too distant as well as far distant futures? How will societies be organized? What kinds of cultural milieus will shape life and living? How will identities be articulated and negotiated? Who will govern? Who will be in resistance? Who will be present and who will be absent? How will things come to be? These questions will form the core of our study of a genre devoted to social commentary, envisioning vastly different ideas about the future, emergent from 20th century works.
WGS 386
BLACK WOMEN'S EXPERIENCES: VARIABLE TOPICS
Undergraduate
Topics vary. This course is designed to address issues related to the particular experiences of women in the Black Diaspora. Topics will vary in terms of their particular focus in addressing issues that are important to understanding Black women's experiences in a US context and globally--making interconnections to the experiences of women of other ethnic, cultural, and national backgrounds. The course will provide occasions for students to study and examine issues such as Black women's cultural criticism, Black women in the arts, engagement in activism and social and political movements--literature and the media. Cross-listed with WGS 486 and ABD 386.

WGS 387
TEEN VIOLENCE PREVENTION
Undergraduate
This course is an interdisciplinary experiential/service learning seminar in which students will participate in, and critically reflect upon, a relationship violence prevention program in Chicago area high schools. This class will explore adolescent development, considering the ways in which economic, social, political and cultural contexts influence that development. In addition, we will focus on adolescent relationships, group work with teens, aggression and violence in intimate -- in particular teen -- relationships, and evaluation of programs to prevent teen violence. Each week students will address a set of theoretical and/or practical themes that in some way relate to teen violence and aggression, as well as prevention of such violence. Discussions of each theme will draw on course readings, lecture materials, and perhaps most importantly, students' experiences working with teens in schools.

WGS 388
QUEER THEORY: AN INTRODUCTION
Undergraduate
This course examines some of the central texts of queer theory in order to contextualize and historicize the notion of homosexuality as a primary category of identity. The issue of sexual normativity as it relates to gay and lesbian assimilation will also be discussed. Because of the significant relationship of gender and sexuality, we will also examine theories of embodiment and take up the debates around the politics of intersex and transgender identities. Formerly WMS 284.

WGS 390
WOMEN ACROSS CULTURES
Undergraduate
A critical analysis of the experiences of women around the world in diverse social contexts, examined through different disciplines, with a special emphasis on economics, politics and culture. Focus is on African, Asian and Latin American cultures and nondominant groups within western societies. (Cross-listed as WGS 490 and MLS 441)

WGS 391
METHODS AND SCHOLARSHIP IN WOMEN'S STUDIES
Undergraduate
An exploration of the transforming effects that feminist methodologies and scholarship have had in the social sciences and humanities. This course emphasizes interdisciplinary research approaches, feminist publishing, and the interplay of research and activism, as it prepares students to write a research proposal. Not recommended for non-majors. (Cross-listed as WGS 491)

WGS 392
INTERNSHIP
Undergraduate
By arrangement. Variable credit.

WGS 394
WOMEN, SELF, AND SOCIETY SEMINAR
Undergraduate
Women, Self and Society Seminar (cross-listed as Women's and Gender Studies 480 and Master's of Liberal Studies 468). Variable Topics. See course schedule for current offerings.
WGS 395  
**WOMEN’S STUDIES ADVANCED SEMINAR**  
Undergraduate  
The Advanced Seminar emphasizes interdisciplinary methodology and students' independent research. Designed to be an integrating experience, the seminar will focus on discussion, response to research, and blending theory and application. The primary goal of the Advanced Seminar is the successful completion of a project or thesis reflecting your knowledge and passionate interests developed in your Women's and Gender Studies major, and it is designed to facilitate this process. Not recommended for non-majors.

WGS 391 or instructor permission is a prerequisite for this course.

WGS 398  
**TRAVEL/ STUDY**  
Undergraduate  
(Cross-listed with WGS 498)

WGS 399  
**INDEPENDENT STUDY**  
Undergraduate  
By arrangement. Variable credit.

WGS 400  
**FEMINIST THEORIES**  
Graduate  
This course is designed to provide you with an introduction to the development of some contemporary feminist theories: local, global, transnational. The theories are interpretive frameworks to analyze, understand and act in the world. The theorists/writers offer concepts to critically analyze structures and practices of oppression, privilege, resilience, and resistance; they provide frameworks for conducting feminist research, advocacy, and activism for personal, social, intellectual, and/or political change and transformation. In this course, we will examine how these theoretical perspectives seek to understand and address various systems of inequality and power and the method(s) that we - theorists, scholars, researchers, advocates, activists, artists, writers - propose for change. We will discuss how these various feminisms continue to develop and evolve in relation to one another and to changing historical, political, social, economic contexts. Cross-listed with MLS 440.

WGS 406  
**GENDER AND FAMILIES**  
Graduate  
This course considers issues raised by the diverse roles that women, men, and children play in families. It focuses particular attention on the social construction of gender in families, and examines families in their social, economic, and political contexts. Topics covered include adult intimate relationships, the social construction of motherhood and fatherhood, and shifting gender relations of power in families, family stress and adaptation, and the impact of social policies on families' lives.

WGS 407  
**WOMEN IN THE MIDDLE EAST: BEYOND THE VEIL**  
Graduate  
This course explores how Middle Eastern Women have been represented in the media outside of the Middle East, by Arab women scholars, and "Third World" feminists and challenges these representations by focusing on issues such as veiling, the everyday lives of Middle Eastern Women, political activism, literary works, economics and social class, and media representations.

WGS 410  
**FEMINIST ETHICS**  
Graduate  
This course explores theoretical issues regarding women's moral experience and feminist approaches to liberation from various forms of socio-cultural and political oppression. It explores the moral status of women from their own experiences and perspectives, in contrast to traditional Western ethics' characterizations, as well as feminist ethical perspectives on oppressive social practices, such as racism and violence against women, and the ethical dimensions of difference among women.
WGS 414
ANTIRACIST FEMINISMS
Graduate
This course introduces students to the wide array of feminist thinking regarding ideologies of race, racism, white privilege, ethnocentrism, racial and ethnic identifications, and their relationship to gender, class, sexual and national identities and locations. The ways that racism has divided women's movements and feminist organizations will be examined along with the work of feminist scholars, writers, activists, and advocates who have articulated explicitly anti-racist theories, analyses, and programs within the U.S. as well as internationally.

WGS 415
CONTENTIONS IN FEMINIST AND GENDER THEORIZING: NEW DIRECTIONS
Graduate
This course addresses different aspects of feminist and gender theorizing and their interrelationships, focusing on exploration and critical examination of controversies and debates in the field. The course content engages students in examining philosophical, ideological, social, political, and cultural fault lines that offer opportunities to deepen and extend our understandings about discourses on women's and gender studies constructions and negotiations, in the late 20th century as well as in the early 21st century. The lens through which particular issues and ideas are viewed draws upon multiple perspectives, taking into consideration issues of culture and context, grounded in examining specificities of the local in relationship to global or transnational dynamics.

WGS 416
REPRESENTATIONS OF THE BODY
Graduate
This course reflects the current explosion of intellectual interest in the body as a site of cultural meaning. The course addresses the questions of how the body is socially created and sustained. It explores those questions in terms of tensions between nature and culture, body and spirit, and how discourses of power converge in and on the body.

WGS 420
TRANSFORMATIVE JUSTICE: THEORY AND PRACTICE
Graduate
This course introduces students to transformative justice responses to violence that do not rely on state institutions. These include collective processes for support and healing, intervention, accountability, and prevention. The pedagogical praxis of learning will be through communal peacemaking circles and collective strategy sessions to create community responses to violence. Cross-listed with WGS 320.

WGS 422
FEMALE IDENTITIES: YOUNG ADULT LITERATURE
Graduate
This course is an introduction to Young Adult Literature as a genre and explores how this literature relates to adolescent girls' experiences in diverse cultural contexts. It addresses themes related to physical and emotional development, the development of personal values and beliefs; the construction of identity; beliefs and attitudes about the body; interpersonal relationships; gender and sexuality; and coping with change, death, belonging, alienation, and escape. Course materials are multicultural with a focus upon the experiences of female adolescents in terms of ethnicity, culture, gender, religion, disability, as well as other dimensions of difference within national and international contexts.

WGS 424
WOMEN IN THEATRE: A GLOBAL PERSPECTIVE
Graduate
This course examines the concepts of gender and theatrical performance with reference to history, culture, critical response, viewer interpretation, and identity in a global context. Students will study character as a dramatic construct with respect to gender, race, and class; it examines how dramatic images are as diverse as their cultural contexts; explores the concepts of reader and viewer response to theater; and interrogates the relationship between the American theatrical image and the larger global context within which images are created.

WGS 426
WOMEN AND LAW
Graduate
This course investigates the variety of ways in which women come into relation with the law, e.g., through laws and judicial decisions dealing with equal opportunity.
WGS 430
LESBIAN LIVES
Graduate
This course explores constructions of lesbian lives, politics, and communities in the U.S. using the political cartoons of artist Alison Bechdel as a primary text, along with theoretical and historical readings. Students examine the constructions of identities and politics within lesbian culture, paying particular attention to how these have changed and evolved over time, and how community can be created and sustained. Cross-listed with WGS 330.

WGS 440
GENDERED COMMUNICATION (CROSS-LISTED WITH CMN 523)
Graduate
Examines research into the ways the various aspects of communication are affected by and affect the social construction of gender. Topics covered include language and language usage differences, interaction patterns and perceptions of the sexes generated through language and communication. (Cross-listed as CMNS 523)

WGS 445
WOMEN, WAR AND RESISTANCE
Graduate
This course aims to make feminist sense of contemporary wars and conflicts. It analyzes the intersections between gender, race, class, and ethnicity in national conflicts. The class traces the gendered processes of defining citizenship, national identity and security, and examines the role of institutions like the military in the construction of femininity and masculinity. The course focuses on the gendered impact of war and conflict through examining torture, mass rape, genocide, and refugee displacement. Cross-listed as WGS 345.

WGS 452
GENDER, COMMUNITY, AND ACTIVISM: COMMUNITY-BASED LEARNING IN WGS
Graduate
Gender, Community, and Activism: Community-Based Learning in WGS is an interdisciplinary experiential/service learning seminar designed for undergraduate and graduate students in the field of Women’s and Gender Studies. In an effort to provide students with an experience that integrates the feminist-informed theoretical work of the classroom with practical application in the community, the course will pair students with internship opportunities at community-based organizations that focus on a cause/issue related to their particular area of scholarly interest. The course is designed to encourage learning by doing and reflecting, where students will be asked to reflect on their internship experiences outside of the classroom through course readings, written assignments, and class discussion.

WGS 455
WOMEN AND ART
Graduate
Examines the work of the most significant women artists from the Renaissance to the present. It will also investigate how women have been represented in Western art by both male and female artists. (Cross-listed as MLS 474 and ART 356)

WGS 460
GENDER AND SOCIETY
Graduate
Attention to the growing literature and empirical research on changing patterns in economic, psychological, and social outcomes for women and men. Consideration of various theories of gender differentiation and equality. (Cross-listed as MLS 447 and SOC 470)

WGS 463
GLOBALLY QUEER: TRANSNATIONAL LGBTQ POLITICS
Graduate
This course explores how political issues affecting lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities and individuals are linked to global and transnational politics of citizenship, power, security, and political economy. It focuses on how gender roles, relationships, and identities are constructed, deployed, challenged, and resisted around the world, paying particular attention to how these systems and structures are interconnected. Cross-listed as WGS 363 and LGQ 363.
WGS 465
GLOBALIZATION, TRANSNATIONALISM, AND GENDER
Graduate
This course examines how gender-based inequities are linked to global and transnational politics of power, security, political economy, militarism, and ecology. There will be a focus on how gender roles, relationships, and identities are constructed, deployed, challenged, and resisted around the globe, paying particular attention to how systems and structures of gender, race, class, sexuality, age, ability, culture, religion, nation etc. are interconnected. It will explore how resistance to structural inequities is constructed within and across national boundaries, paying particular attention to the role of non-governmental organizations (NGOs) worldwide and how the responses of NGOs to crises (e.g., nuclearism, uneven economic development, environmental degradation) highlight the shortcomings of state-centered decision making.

WGS 470
ADVANCED PSYCHOLOGY OF WOMEN AND GENDER
Graduate
A review of research and theory on women's and gender, including sexist biases and methodology, feminist therapy, violence against women, and gender differences in the development of power and sexuality. Cross-listed as MLS 478 and PSY 561.

WGS 475
FEMINISMS OF THE BLACK DIASPORA
Graduate
This course is designed to offer a critical examination of black women's experiences and thought within a global and transnational framework. The course examines works by and about black women in diverse social, political, and geographical contexts: the continent of Africa, Western Europe, Canada, Latin America, the Caribbean, and Australia. Topics to be explored will include issues of politics and ideology; power and inequality based on intersectionality of race and other dimension of identity; agency, activism, and social movements; the mass media, popular culture and social policies. Cross-listed with WGS 375.

WGS 478
UTOPIAN & DYSTOPIAN LITERATURE AND FILM: GENDER, RACE AND BEYOND
Graduate
What does the future hold for humankind on this planet and elsewhere? What will life be like in the not too distant as well as far distant futures? How will societies be organized? What kinds of cultural milieus will shape life and living? How will identities be articulated and negotiated? Who will govern? Who will be in resistance? Who will be present and who will be absent? How will things come to be? These questions will form the core of our study of a genre devoted to social commentary, envisioning vastly different ideas about the future, emergent from 20th century works.

WGS 480
SELECTED TOPICS: WOMEN, SELF AND SOCIETY
Graduate
Topics vary. See schedule for current offerings. [Cross-listed as MLS 468 and WGS 394]

WGS 485
WOMEN, GENDER, AGENCY, AND SOCIAL CHANGE
Graduate
This course will examine women's individual and collective involvement in social, economic, and political resistance and change. The course will focus on women's participation with attention to the ways that gender shapes the history and development of social movements organized at local, national, regional and global levels, within and across differences of race, class, ethnicity, nationality, religion, geographic location and sexuality. Concrete examples of women's and gender movements within particular historical and geographical contexts, including within Africa, Latin America, Europe, the Middle East, Asia, the United States, among others, will be highlighted.

WGS 486
BLACK WOMEN'S EXPERIENCES: VARIABLE TOPICS
Graduate
Topics vary. This course is designed to address issues related to the particular experiences of women in the Black Diaspora. Topics will vary in terms of their particular focus in addressing issues that are important to understanding Black women's experiences in a US context and globally: making interconnections to the experiences of women of other ethnic, cultural, and national backgrounds. The course will provide occasions for students to study and examine issues such as Black women's cultural criticism, Black women in the arts, engagement in activism and social and political movements --literature and the media.
WGS 488
QUEER THEORY: AN INTRODUCTION
Graduate
This course examines some of the central texts of queer theory in order to contextualize and historicize the notion of homosexuality as a primary category of identity. The issue of sexual normativity as it relates to gay and lesbian assimilation will also be discussed. Because of the significant relationship of gender and sexuality, we will also examine theories of embodiment and take up the debates around the politics of intersex and transgender identities.

WGS 490
WOMEN ACROSS CULTURES
Graduate
A critical analysis of the roles of women in societies around the world, with special emphasis on economics, politics and culture. Focus is on African, Asian and Latin American cultures and nondominant groups within Western societies. Topics vary each quarter. (Cross-listed as MLS 441 and WGS 390)

WGS 491
METHODS AND SCHOLARSHIP IN WOMEN’S & GENDER STUDIES
Graduate
An exploration of the transforming effects that feminist methodologies and scholarship have had in the social sciences and humanities. This course emphasizes interdisciplinary research approaches, feminist publishing, and the interplay of research and activism, as it prepares students to write a research proposal.

WGS 400 is a prerequisite for this course.

WGS 493
FINAL PROJECT INDEPENDENT RESEARCH
Graduate
This course involves individual investigation and research (toward completion of the Master's thesis, project, or portfolio) under the supervision of a faculty member. A minimum of 4 credit hours required. Course can be repeated for a total of 8 credit hours.

WGS 495
SPECIAL TOPICS IN WOMEN’S STUDIES
Graduate
Topics vary. See schedule for current offerings.

WGS 496
CANDIDACY CONTINUATION
Graduate
Students who must take extra time to complete the requirements for the Master's thesis, project, or portfolio must enroll in candidacy continuation each quarter of the academic year until this Master's requirement has been completed. Non-credit.

WGS 497
CANDIDACY MAINTENANCE
Graduate
Masters candidates who are not actively working on their thesis, project, or portfolio during a given quarter but who want to maintain active university status can register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit.

WGS 498
FOREIGN STUDY
Graduate
Foreign Study

WGS 499
INDEPENDENT STUDY
Graduate
WLE 326
THEORETICAL FOUNDATIONS OF ESL AND WLE
Undergraduate
Presents an introduction to the field of second and world language, with attention to basic concepts of second language acquisition in various language learning contexts. Discusses interdisciplinary perspectives of second and world language acquisition and their application to classroom practices. Topics include interlanguage, communicative competence, D/discourses, investment/motivation, sociocultural approaches to language learning, universal grammar, etc. The different factors influencing the acquisition of ESL and WLE are examined as well as current research in applied linguistics and different approaches to language teaching.

WLE 349
STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
Undergraduate
This course prepares candidates to teach world languages at the elementary, middle and secondary school levels consonant with an aligned approach to meeting national and state WLE standards and Common Core standards. It examines the theory and practice of traditional or standard methods of teaching world languages (e.g., communicative approach, natural approach, etc.) with an emphasis on developing alternative, post-method strategies and using diverse resources, as well as on reformulating world languages instruction to integrate subject matter content into the curriculum, including science, social studies, math, fine arts, etc. Engages candidates in understanding and applying the ?Five Cs??Communication, Cultures, Connections, Comparisons, and Communities outlined in the national standards?toward this end. Lesson and unit development, evaluation/assessment, and classroom management also will be discussed. Issues that emerge in planning and instruction are discussed and deliberated through university classroom experiences as well as required fieldwork (20/15 hours; level 1 in language of certification).

WLE 360
SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
Undergraduate
This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective at the K-12 levels. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and SLA; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second and world language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences (20/15 hours; level 2).

WLE 370
SECOND & WORLD LANGUAGE LITERACIES AND CULTURES
Undergraduate
This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the word. Especial focus is placed on these topics as they pertain to the extant research on language, literacy, and culture represented in the WLE certification language communities, as well as in the literature, art, music, and popular culture of those communities as means of advocating students? sense of identity as global citizens (20/15 hours; level 1).

WLE 375
WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
Undergraduate
This course engages students in WLE curriculum development and language program advocacy, creation, and sustainability based on an examination of federal and state WLE history and policies and on a review of national and state standards. Reviews theory and application of curriculum development to world language instructional programs, such as design, scope and sequence, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal world language education program models are examined and analyzed in light of WLE history, policy, and standards (20/15 hours; level 1).

WLE 326, WLE 349, WLE 360, WLE 370 and BBE 307 are prerequisites for this class.

WLE 384
CAPSTONE IN WORLD LANGUAGE EDUCATION
Undergraduate
This course is taken concurrently with WLE 385, Student Teaching in World Languages. In this course, students will have opportunities to reflect on their student teaching experience and prepare materials to support their employment searches and career as teachers. COREQUISITE(S): WLE 385.
WLE 385
STUDENT TEACHING IN WORLD LANGUAGES
Undergraduate
(12 credits) Student teaching is the culminating experience of the World Languages certification program. It is a ten-week, 30-hour/week experience. Students must successfully complete student teaching with a grade of B- or better in a language classroom in which they are seeking certification to teach. The course is taken concurrently with WLE 384, World Languages Capstone. Application and approval required. Open only to DePaul students.

WRD 98
PREPARATION FOR COLLEGE READING
Undergraduate
For students who need extra preparation in the development of college reading skills. Emphasizes development of reading strategies suitable for understanding a range of texts.

WRD 102
BASIC WRITING II
Undergraduate
WRD 102 prepares students for college-level writing by examining composing processes and the way writers function in a community of other writers and readers. The course helps students increase the effectiveness of their writing practices and develop a sense of confidence in themselves as writers. The course is ideal for students with less writing experience or those who want more exposure before taking WRD 103.

WRD 103
COMPOSITION AND RHETORIC I
Undergraduate
An introduction to the forms, expectations, and conventions of writing at the college level. Emphasis on audience analysis, rhetorical stance, and the nature of the composing process.

WRD 103X
COMPOSITION AND RHETORIC I (FOR NON-NATIVE SPEAKERS)
Undergraduate
An introduction to the forms, expectations, and conventions of writing at the college level. Emphasis on audience analysis, rhetorical stance, and the nature of the composing process. These sections are specifically designed for students whose first or dominant language is not English. Students will have the opportunity to focus on writing challenges that are unique to writing in a second or additional language, including increased attention to language skills and to the cultural expectations of U.S. academic audiences. The lower enrollment capacity of this section will allow for greater attention to students' individual writing needs. These sections address the same course objectives all WRD 103 sections.

WRD 104
COMPOSITION AND RHETORIC II
Undergraduate
Developing a convincing argument with information and evidence drawn from a variety of sources. Emphasis on effective research strategies and professional use of sources.

WRD 104X
COMPOSITION & RHETORIC II (FOR NON-NATIVE SPEAKERS)
Undergraduate
Designed specifically for non-native English speakers, this course focuses on developing a convincing argument with information and evidence drawn from a variety of sources. Emphasis on effective research strategies and professional use of sources.

WRD 103X or equivalent is a prerequisite for this class.
WRD 108
COLLEGE READING
Undergraduate
Devoted to the acquisition and development of analytical, critical, and interactive reading skills essential to continued success in college, regardless of intended major. Emphasizes effective reading techniques, vocabulary development, and comprehension improvement applicable to all academic disciplines.

WRD 111
TRANSITION DEPAUL
Undergraduate
This course prepares new international transfer students for academic success at DePaul. It serves as an introduction to academic support services and opportunities available at DePaul, and the conventions of US academic culture, and the City of Chicago as an academic and culture resource. Topics include differences in approaches to teaching and learning; creating and sustaining productive student-faculty relationships; successful study patterns; and the relationship between liberal and professional education in American culture. Students will do assigned reading on course topics, keep a reflective journal, and engage with each other through discussion and presentation.

WRD 200
WRITING IN THE DISCIPLINES
Undergraduate
Preparation for writing in academic disciplines. Special attention to forms, conventions, and expectations in university writing at the intermediate level.

WRD 201
DIGITAL WRITING
Undergraduate
An introduction to the study and practice of writing in the digital age. Students will consider a range of digital text types, such as web pages, social media, blogs, online videos, and interactive media, to better understand the technologies, rhetorical conventions, and practices that contribute to and emerge from digital texts. Students will also produce digital texts of their own. No prior digital production experience is necessary.

WRD 103 or HON 100 is a prerequisite for this course.

WRD 202
PROFESSIONAL WRITING FOR BUSINESS
Undergraduate
Effective organization and design of documents common in business life - letters, memos, reports, and resumes. Attention to audience, purpose, and style. Two quarter hours credit.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 203
STYLE FOR WRITERS
Undergraduate
This course provides students with opportunities to explore stylistic choices in written prose. Students will examine both published work and their own writing to explore how to manipulate language in specific contexts to achieve specific ends. Writing workshops will help students provide and receive constructive comments aimed at revision of drafts.

WRD 204
TECHNICAL WRITING
Undergraduate
In this course, students learn to communicate and interpret specialized information for readers' practical use. The course highlights the action-orientated goals of technical writing and the importance of accurately communicating information to users. The course provides an overview of key issues related to technical writing such as usability, audience analysis, designing pages and screens, effective collaboration with peers, interpreting and presenting data, and writing clearly and persuasively. Students learn to write, revise and present common technical writing genres such as instructions, tutorials, manuals, reports, product/process descriptions, proposals, and oral presentations.
Literacy is traditionally defined as the ability to read and write. This course will expand that definition to also explore the technological, cultural, and political aspects of literacy from the earliest archeological record of writing to modern information technology and digital literacy. Students will examine practices and narratives surrounding literacy, learn how both physical media and social power constrain what information gets recorded and how, and question the implications of these constraints on the ways we define and engage literacy and writing.

In this introductory course, students learn fundamentals of professional writing, with a special focus on distinguishing academic writing from workplace writing. The course provides a solid foundation that students can build on as they develop specializations in their professional fields. Through a series of short assignments, students explore the structure and format of typical professional writing documents, examine a variety of workplace writing situations, and begin developing a clear and concise style appropriate for professional settings. Students analyze and write a number of workplace genres, such as memos, emails, letters, resumes, short reports, web documents, and professional presentations.

An introduction to key concepts in the history of rhetoric, the development and current state of rhetoric and writing, and the impact of rhetoric on contemporary life. The course aims at understanding rhetoric as a theoretical approach, a set of practices, and a discipline.

Study of the problems of reasoned discourse, emphasizing invention and construction of arguments for varied audiences.

In this class, students examine how discourse and genres are used to frame issues and instantiate values and beliefs. Students will explore theories of genre and discourse, learn to analyze how genre and discourse operate, understand the relationship of formal features to beliefs and practices, and produce texts in a variety of genres.

Students in this course will learn techniques for constructing argumentative writing, working with rhetorical methods of inventing and arranging written arguments. Students will examine different genres of argument, but the focus in the course will be on student production and revision. This course builds on and extends skills in argumentative writing that students gain in the first-year writing program.

This course will introduce students to methods for analyzing symbolic acts and artifacts in order to understand the perspectives and motivations which shaped them. Students will analyze a variety of rhetorical artifacts from several perspectives including classical rhetoric, argumentation, metaphor, feminism, dramatism, and ethics. Through analysis, students will learn how messages are constructed in order to produce certain effects as well as how to question and respond critically to communication.
WRD 261
DIGITAL CULTURE
Undergraduate
Digital information technologies proliferate in our culture, significantly impacting the rhetorical contexts in which we work and play. This course will explore a variety of topics related to the expansion of digital culture and rhetoric such as the development of the Internet; gaming; the construction of personal and group identity; media convergence; the distribution of work; community, group, and subculture formation online; political and policy issues; cyberterrorism; privacy, and the representation of technology in popular media.

WRD 262
THE RHETORIC OF EVERYDAY TEXTS
Undergraduate
From transit signs to nutritional information, to tagging, to social media posts, we encounter "everyday texts" continually in our day-to-day lives. This course examines the social, rhetorical, and technological contexts that form and are formed by such texts, while examining how and why such texts can and do become notable or even extraordinary. The course considers print, digital, and hybrid platforms for both readers and writers. No prior experience with production technologies is necessary.

WRD 270
ACADEMIC READING FOR INTERNATIONAL/ MULTILINGUAL STUDENTS
Undergraduate
This course prepares international/multilingual students to become more efficient, effective, and critical readers. By developing a range of focused reading strategies, and a deeper awareness of how academic texts function rhetorically within scholarly conversations, students will strengthen their abilities to understand, analyze, and respond to academic readings. Students will practice applying critical reading skills to selected texts from their specific majors. WRD 103 is recommended.

WRD 281
WRITING CENSORSHIP
Undergraduate
An introduction to censorship as both a mechanism of social control and a fundamental element of all rhetorical situations. Explores the history of censorship in the West and engages theoretical questions about the power of language and its suppression as a force for violence. Affords students opportunities to experiment with effective strategies of resistance by writing under varied conditions of censorship.

WRD 282
ETHICS OF PUBLIC AND PROFESSIONAL WRITING
Undergraduate
This course introduces a critical moral philosophical framework for the study of public and professional writing. Students will learn to critique historic and contemporary texts from an ethical perspective. Students will also explore contemporary ethical issues for writing in digital environments and varied professional contexts.

WRD 283
ENVIRONMENTAL WRITING
Undergraduate
In this class, students will develop knowledge, critical thinking skills, and multi-modal literacies that define writing practices in the environmental community. In order to become more proficient writers, students will analyze and practice a range of genres relevant to environmental issues in the workplace and the larger public sphere, from professional documents such as proposals and reports to research articles aimed at the general public and published in traditional or electronic media. Students will also analyze various new-media genres as indicators of public interests and as tools for reaching and engaging diverse audiences. WRD 104 is recommended.

WRD 284
SPORTS WRITING IN AMERICA: MYTHS, MEMORIES, HEROES AND VILLAINS
Undergraduate
This course explores the role of writing within and across multiple sports, viewed through historic, cultural, social, and economic lenses. Students will read, analyze, and discuss multiple genres, including reporting, memoir/nonfiction, and argument, and draft and revise their own writing in these genres on the sports of their choice. WRD 104 is recommended.

WRD 103 or HON 100 is a prerequisite for this course.
WRD 290
WRITER’S TOOLS WORKSHOP
Undergraduate
Introduction to and practical engagement with specific digital technologies and/or multimodal environments. Two Credit Hours. Tools/topics vary. Can be repeated for credit as topics vary.

WRD 300
COMPOSITION AND STYLE
Undergraduate
Advanced instruction in invention, arrangement, and style, toward developing clear and effective prose styles.
WRD 104 or HON 100 is a prerequisite for this course.

WRD 301
WRITING IN WORKPLACE CONTEXTS
Undergraduate
Students examine the roles of writing (transactional, informative, and persuasive) in professional contexts and learn common features of workplace writing situations (internal vs. external documents, collaboration, distribution of expertise and authority, content management, globalization) and strategies for responding to them. They will also learn about stylistic conventions common to workplace genres (building an effective professional persona through writing - tone, document design) and their typical formats. Theory and analysis will ground discussions of production and production-based projects.

WRD 306
RHETORICAL TRADITIONS
Undergraduate
In this historical survey course, students examine a variety of traditions in rhetorical thought. Students will become familiar with key concepts in the Western rhetorical traditional, while also interrogating the centrality of that tradition by examining marginalized or resistant currents in rhetorical thought.

WRD 309
TOPICS IN WRITING, RHETORIC AND DISCOURSE
Undergraduate
May be repeated for credit as topics vary. See schedule for current offerings.
WRD 103 or HON 100 is a prerequisite for this course.

WRD 320
TOPICS IN PROFESSIONAL WRITING
Undergraduate
May be repeated for credit as topics vary. This course provides students opportunities to explore concepts in depth and apply specialized practices related to a rotating selection of dedicated topics in technical and professional writing.

WRD 321
WRITING IN THE LEGAL PROFESSION
Undergraduate
This course explores the role of writing, thinking, and problem-solving in legal contexts. Students will gain an understanding of the principles involved in writing effective narrative and persuasive prose for a variety of legal purposes, and be able to apply these principles to their own writing.
WRD 104 or HON 100 is a prerequisite for this course.
WRD 322
WRITING AND METADATA
Undergraduate
Writing in digital environments often involves layers of information beyond the written text itself, ranging from the markup languages that identify and structure the text, to hashtags and similar grouping data. Students in this class explore the way those additional layers shape meaning and rhetorical strategies in for both human and machine readers in digital environments; the semantic elements of markup languages; and cultural understandings of metadata, machine reading, and privacy.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 323
EDITING
Undergraduate
Students will explore a range of practices associated with the revision of prose for publication. Students will learn to edit for style and consistency at the document, paragraph, and sentence levels. They will also compare and learn to apply differing style guides, learn technologies central to modern editorial practice, and examine related topics such as the Plain Language Movement and preparing documents for translation.

WRD 324
WRITING FOR PUBLIC HEALTH AND HEALTH CARE
Undergraduate
This course will explore writing in public health and health care. You will analyze contemporary writing produced by government and NGOs, research organizations, public and professional forums and related sites of action. You will apply what you learn to a health writing project on a topic of your own choice.

WRD 330
LANGUAGE AND LINGUISTICS
Undergraduate
This course introduces students to major concepts in and approaches to studying language, covering topics such as language structure, language acquisition, dialect variation, language and identity, language policy, and literacy. The course presumes no prior knowledge of linguistics and will be relevant to students studying in a wide variety of majors.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 340
WRITING AND REVISING
Undergraduate
This course operates on the assumption that the secret to strong writing is revision. Students will learn about theories of revision, studying how successful writers revise, and will then put those techniques into practice. The goal of the course is to develop strategies and understanding of the rhetorical situations of writing in different contexts. Students will work on developing voice, taking ownership of work, and creating strong, well supported arguments.

WRD 345
GHOSTWRITING
Undergraduate
This course explores the phenomenon of ghostwriting and affords students opportunities to develop ghostwritten projects. Considers the appearance of ghostwriting across historical and contemporary genres, in print and online, in academic, professional, and imaginative contexts. An introduction to interview as research method and attention to related ethical questions will inform students' own ghostwriting.

WRD 103 or HON 100 is a prerequisite for this course.

WRD 360
TOPICS IN RHETORIC
Undergraduate
May be repeated for credit as topics vary. This course provides students opportunities to explore concepts in depth and apply specialized practices related to a rotating selection of dedicated topics in the theory and history of rhetoric.
WRD 361
TOPICS IN ALTERNATIVE RHETORICS
Undergraduate
Women, ethnic minorities, gay/lesbian/and transgender writers, and individuals with disabilities are forced to navigate the dominant culture through strategies that draw upon and transform dominant cultural practices. Courses in this topics category will consider questions raised by alternative rhetorics and examine the way rhetorical acts construct such categories and shape the ways in which people are included or excluded from social groups and movements through language use. Students will examine and assess these mediation strategies while also developing theoretical frameworks to analyze and understand them. May be repeated for credit as topics vary.

WRD 362
SEMIOTICS
Undergraduate
Nonverbal codes and their implications for understanding rhetoric and culture.

WRD 363
VISUAL RHETORIC
Undergraduate
As both consumers and producers, we engage daily with a variety of textual and graphical elements. Participation in this course encourages critical consideration of such encounters. Students will examine the assumptions and practices that inform the authorship and interpretation of both print-based and electronic texts. The course will explore cultural and rhetorical frameworks for understanding, evaluating, and composing visual elements in various media.

WRD 368
GLOBAL ENGLISHES
Undergraduate
At the start of the 21st century, English is a global language used in commerce, technology, research, education, and even popular culture around the world. This course explores the role and nature of the English language in a global context. Course readings and discussions will examine the historical context and cultural legacy of the spread of English, global varieties of English, uses and contexts of English, issues of ownership and identity, and the future of English.

WRD 376
FIELDWORK IN ARTS WRITING
Undergraduate
The study and production of writing about art as social engagement, this course explores various genres of arts writing and their functions from the perspective of critic and artist. Combines fieldwork in the Chicago arts scene “collaborating and conversing with artists and professional writers” with classroom-based discussion. Students produce a portfolio of writing about art in a variety of genres including the critical, informative, and reflective.

WRD 377
WRITING AND SOCIAL ENGAGEMENT
Undergraduate
Using writing within community service. See schedule for current offerings.

WRD 104 or HON 100 is a prerequisite for this course.

WRD 378
TEACHING ENGLISH AS A SECOND LANGUAGE IN CHICAGO
Undergraduate
Students explore the theory and practice of learning and teaching English as a Second Language (ESL) through readings and classroom discussion while teaching or tutoring adult ESL learners at a Chicago-area community center. Classroom and service experiences together help students develop an understanding of second language learning, teaching strategies and approaches, and issues of immigration and language policy in both U.S. and global contexts. (Can count for both JYEL credit and minor credit.)
WRD 390
RHETORIC AND PUBLIC WRITING
Undergraduate
This course encourages a reflective stance on the development of the individual writer through the educational process, particularly as that relates to the interplay of the Liberal Studies experience and the WRD major. Students will be asked to look back for the purpose of looking forward, to consider how this broad preparation to excel at rhetorical action across communities of discourse prepares one for public life as a writer. Students will develop a reflective portfolio of prior work and prepare new writing for contexts beyond undergraduate life.

WRD 395
WRITING CENTER THEORY & PEDAGOGY
Undergraduate
Introduction to current theories and practices in writing instruction; prepares students to develop and administer writing centers and to work as writing consultants. (Writing Center practicum required).

WRD 395 requires WRD 104 or HON 100 as a prerequisite.

WRD 396
WRITING FELLOWS THEORY AND PRACTICE
Undergraduate
A seminar on tutoring writing across the curriculum. Students will read articles and do writing assignments designed to familiarize Fellows with theories of writing and tutoring and to stimulate thinking about the issues these theories raise. This course will also help develop tutoring skills, including practice writing comments on sample papers, participating in mock conferences, and sharing specifics from students' experiences as Fellows.

WRD 396 requires WRD 104 or HON 100 as a prerequisite.

WRD 398
INTERNSHIP
Undergraduate
An approved internship obtained in consultation with the department's Internship Coordinator. In addition to internship duties, students will produce weekly journal entries that reflect on internship activities and related coursework; and compile a portfolio of written work product developed during the internship. May be repeated for credit.

WRD 399
INDEPENDENT STUDY
Undergraduate
Independent study guided by a faculty member. Written permission of supervising faculty member and by department chair required before registration. May be repeated for credit.

WRD 399 requires WRD 104 or HON 100 as a prerequisite.

WRD 500
PROSEMINAR
Graduate
An introduction to the intellectual/scholarly traditions of writing studies, rhetorical theory, and discourse. Students learn different theoretical perspectives as well as the field's lexical-conceptual vocabulary, providing a gateway to the field and the program's concentration areas.

Status as a Graduate Writing, Rhetoric and Discourse student is a prerequisite for this class.

WRD 503
ANCIENT RHETORICS
Graduate
A survey of rhetorical theory from ancient Greece and Rome and as well as various Eastern traditions. The course examines important definitions and discussions of rhetoric from Plato to Augustine, with attention to their implications for an understanding of the roles of rhetoric and writing in modern society.
WRD 505  
CONTEMPORARY RHETORICS  
Graduate  
A survey of theories and practices in 19th- and 20th-century rhetoric. Examines psychological, social and philosophical roots of contemporary rhetorics and the influence of scientific and literary studies on theories of discourse.

WRD 506  
MULTICULTURAL RHETORICS  
Graduate  
An introduction to written rhetoric and culture. Explores competing conceptions of culture and meanings of literacy, particularly as they relate to American literacy education.

WRD 507  
GLOBAL ENGLISHES  
Graduate  
Explores the role and nature of the English language in a global context, focusing on the historical context and cultural legacy of the spread of English, global varieties of English, uses and contexts of English, issues of ownership and identity, and writing and language instruction. Course content draws upon theoretical models of World Englishes, scholarly debates, descriptions of spoken and written English around the world, and artifacts of global Englishes.

WRD 508  
DISCOURSE AND STYLE  
Graduate  
Explores discourse theory and practice in examining features of style, including linguistic and rhetorical perspectives.

WRD 509  
GENRE THEORY AND PRACTICE  
Graduate  
An overview of the study of non-literary genres, focusing on contemporary theories and practices of genre and genre learning. Students become familiar with various disciplinary perspectives on genre theory, methods for analyzing non-literary genres, and pedagogical approaches to teaching genre in the writing classroom. Explores genres from textual, social, and critical perspectives, considering how genres within social and institutional contexts such as the academy, the workplace, and the public sphere.

WRD 510  
TOPICS IN RHETORICAL HISTORY  
Graduate  
Explores topics in rhetorical history. May be repeated for credit as topics vary.

WRD 511  
TOPICS IN COMMUNITY, CULTURE AND IDENTITY  
Graduate  
Explores topics related to community, culture, and identity from the perspectives of rhetoric and discourse. May be repeated for credit as topics vary.

WRD 512  
TOPICS IN LANGUAGE  
Graduate  
Explores topics related to language and its intersections with rhetoric and discourse. May be repeated for credit as topics vary.

WRD 513  
SEMIOTICS  
Graduate  
An introduction to semiotics, or the study of 'the sign'; a theory of meaning that is concerned with anything intended to or interpreted to stand for something else, including objects, pictures, sounds, gestures, and body language. The course examines the construction of meaning in manifold contexts, extending the notion of 'text' beyond the written page to any artifact that functions as a 'message' embodied in a genre and a medium.
WRD 514
SOCIOLINGUISTICS
Graduate
An introduction to the study of language in social contexts. Explores the principles of language variation and change within social contexts.

WRD 515
THE ESSAY
Graduate
Explores the history of the essay as genre from the Renaissance to the present, compares and contrasts literary essays with those written in most school settings, and offers students the opportunity to write their own extended essays on personal and professional topics.

WRD 520
COMPUTERS AND WRITING
Graduate
Explores the cultural, institutional, professional, and pedagogical implications of digital writing technology, drawing upon theories of technology as well discussions from the field of computers and composition.

WRD 521
TECHNICAL WRITING
Graduate
An introduction to various aspects of technical writing, including readability, document design, editing and usability.

WRD 522
WRITING IN THE PROFESSIONS
Graduate
Improves writing skills useful in semitechnical and nontechnical professions; emphasis on style, tone, awareness of purpose and audience; effective memo, proposal and report design.

WRD 523
EDITING
Graduate
An introduction to editing principles and practices in professional and technical fields.

WRD 524
DOCUMENT DESIGN
Graduate
Theories, concepts, and components of effective document design, including the interrelation of visual displays and written texts across a range of electronic and print genres.

WRD 525
WRITING FOR THE WEB
Graduate
An introduction to various genres of web-based communication and the roles played by writers, readers, and users of web sites. Includes analysis, design, and revision of web-based writing as well as practice producing written documents which accompany the development of web information.

WRD 526
GRANT AND REPORT WRITING
Graduate
An introduction to the purpose and structure of these common workplace genres through analysis of successful documents and guided practice in producing their own.
WRD 530
TOPICS IN PROFESSIONAL AND TECHNICAL WRITING
Graduate
Explores topics in professional and technical writing. May be repeated for credit as topics vary.

WRD 540
TEACHING WRITING
Graduate
Introduction to teaching composition at the secondary and college undergraduate levels. The course helps students develop methods of teaching composition based on modern theories of rhetoric, reading and language acquisition. Formerly ENG 480.

WRD 541
COMPOSITION THEORY
Graduate
Explores the development of contemporary theories of written composition; focuses on contexts for writing, the writing process, and reader-writer relationships.

WRD 542
URBAN LITERACIES
Graduate
Explores the multiple definitions of literacy with a special emphasis on adult literacy in an urban environment. Students examine the relationship between theory and practice, reading about theories of literacy from psychology, cognitive science, education, composition & rhetoric and linguistics while engaging in literacy tutoring at Chicago-area literacy sites.

WRD 543
TEACHING ESL WRITING
Graduate
Provides an overview of the theory and practice of writing in a second language. Examines distinctions between first and second language writing and major issues and dilemmas within the field, including composing processes, error correction and feedback, contrastive rhetoric, culture, course design, plagiarism, and U.S. composition classrooms.

WRD 544
TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE
Graduate
A survey course in the teaching and learning of English as a Second Language (ESL). Familiarizes students with theoretical foundations and basic principles of second language learning and teaching, the components of the major language skills (listening, speaking, reading, writing), and the social and political dimensions of teaching and learning ESL.

WRD 545
TEACHING WRITING ONLINE
Graduate
Explores the teaching of writing in online-supported distance-learning. Introduces students to challenges and best practices and techniques for specific technologies.

WRD 546
PEDAGOGICAL GRAMMAR
Graduate
An introduction to grammar instruction for language and writing classrooms. Introduces students to current research in grammar instruction and applies that research to develop strategies for the instruction of a range of aspects of English grammar, with an emphasis on rhetoric and context.
WRD 547
AP INSTITUTE IN ENGLISH LANGUAGE AND COMPOSITION
Graduate
A workshop designed to help Advanced Placement teachers prepare their students for the AP exam in English Language and Composition and for the demands of college writing. The institute is a week-long, full-day intensive workshop that covers teaching, reading, writing, style, assessment, and argumentation in accelerated high school classes. This course is offered in the summer only.

WRD 550
TOPICS IN TEACHING WRITING AND LANGUAGE
Graduate
Explores topics related to teaching writing and language. May be repeated for credit as topics vary.

WRD 551
TEACHING APPRENTICESHIP PRACTICUM
Graduate
Ongoing support in instructional practice to include grading and responding to student work; facilitating in-class activities such as discussion and peer workshopping; student-teacher conferencing; classroom management; and related topics. Available only to MA in WRD students admitted to the Teaching Apprenticeship Program.

WRD 540 is a prerequisite for this course.

WRD 582
WRITING CENTER THEORY AND PEDAGOGY
Graduate
Introduction to current theories and practices in writing instruction; prepares students to develop and administer writing centers and to work as writing consultants. (Writing Center practicum required.)

WRD 586
WRITING FOR PUBLIC POLICY
Graduate
Specifically for those admitted to the M.S. in Economics and Public Policy Analysis and M.B.A. in Economic Policy Analysis, this course provides instruction in writing and presentation skills that allow students to communicate research findings to economists, non-economists, business executives, interest groups, and public officials.

Status as an MS in Economics and Public Policy Analysis or MBA in Economic Policy Analysis student is a prerequisite for this class.

WRD 587
AMERICAN ACADEMIC CULTURE FOR INTERNATIONAL GRADUATE STUDENTS
Graduate
This course is intended for international graduate students from across the university who want to participate successfully in American academic culture. Through advanced readings and discussions, students will learn how to navigate the writing conventions, classroom practices, and research expectations that shape American academic life both broadly and within their chosen fields. Class projects will allow students to investigate genres in their specific areas of study and practice the kinds of writing that define their disciplines.

WRD 590
INTERNSHIP IN PROFESSIONAL/TECHNICAL WRITING
Graduate
Internship in professional and/or technical writing. May be repeated for credit.

WRD 591
INTERNSHIP IN TEACHING WRITING AND LANGUAGE
Graduate
Internship in teaching writing and/or language. May be repeated for credit.
WRD 595  
INDEPENDENT STUDY  
Graduate 
Independent study guided by a faculty member. May be repeated for credit.

WRD 597  
CANDIDACY MAINTENANCE  
Graduate 
Masters candidates who are not enrolled in a course during a given quarter but who want to maintain active university status should register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit.

WRD 598  
THESIS RESEARCH  
Graduate 
Independent thesis research guided by a WRD faculty member. Written permission of supervising faculty member and of graduate director required before registration. This course may be taken up to two times for credit.

WRD 599  
PORTFOLIO  
Graduate 
A capstone seminar course in which students select, revise, and write supplementary documentation for a collection of their work appropriate to a job search in their area of concentration or for doctoral program application.

About This Handbook

The Handbook provides University policies that support both academic and behavior expectations.

In addition to the University-wide policies and information included in this Handbook, the College of Law has specific guidelines, policies, and procedures for which you are responsible.

The Handbook also includes sections on General Information and University Resources.

About DePaul

DePaul University was founded in 1898, by the Congregation of the Mission (or Vincentian) religious community, which follows the teachings of 17th century French priest St. Vincent de Paul. The university's mission emphasizes academic excellence, service to the community, access to education and respect for the individual.

**Admission**

Admission to graduate programs is determined by each individual graduate program. Please consult the catalog of the respective college for additional information. For general information or to apply to a graduate program consult the Office of Admission website.

**DePaul Campuses**

Students of any school or college may register for classes on any campus, arranging hours and courses in a manner designed to afford maximum educational advantage.

**The Lincoln Park Campus** is situated about three miles north of the Chicago Loop in the vicinity of Webster (2200 N), Halsted (800 W) and Racine (1200 W). The offices for the College of Liberal Arts and Social Sciences, the College of Science and Health, the School of Music, the College of Education, and The Theatre School are located on this campus.

**The Loop Campus** is located at 1 East Jackson Boulevard, between State, Jackson and Wabash. The offices for the Driehaus College of Business, the College of Computing and Digital Media, the College of Communication, the College of Law and the School for New Learning are located on this campus.

**Suburban Sites**

The Kellstadt Graduate School of Business, the College of Science and Health, the College of Education, the College of Communication and the School for New Learning offer some courses at a number of the following suburban sites:

**The Naperville Campus** is located at 150 W. Warrenville Road, Naperville, Illinois (at I-88 and Naperville Road).

**The O'Hare Campus** is located in the Triangle Plaza, 8770 W. BrynMawr Ave Suite 100, Chicago, Illinois (at I-90 and Cumberland).

**Rosalind Franklin University of Medicine and Science** is located 3333 Green Bay Road in North Chicago, Illinois. DePaul students have the option of taking the Master's Entry in Nursing Practice (MENP) on the RFU campus.
Schools and Colleges

Driehaus College of Business

Established in 1912, the Driehaus College of Business is the nation's tenth oldest business school and serves individuals and organizations seeking access to the highest quality business education as a means for achieving intellectual and professional goals. The College also encompasses our highly respected graduate programs in business.

The Kellstadt Graduate School of Business prepares students to be leaders by frequently updating its programs to keep pace with the dynamics of global business.

College of Communication

The College of Communication provides students with a combination of timeless principles and up-to-the-minute tools, whether they're pursuing journalism; public relations and advertising; media studies; radio, television and film; relational, group and organizational communication; or intercultural communication.

College of Computing and Digital Media

The College of Computing and Digital Media (CDM) offers students a collaborative education where technology, artistry and business intersect. CDM is organized into three schools:

The School of Cinematic Arts is home to our animation and cinema programs, which merge creativity, technology, imagination, technique, vision and execution.

The School of Computing houses programs across the technology spectrum, and combines theoretical fundamentals with hands-on practice.

The School of Design – CDM's newest school – is home to programs in graphic design, interactive and social media, game development, human computer interaction, and digital communication and media arts.

College of Education

The College of Education offers degree programs in bilingual/bicultural education; counseling; curriculum studies; early childhood education; educational leadership; elementary education; middle school mathematics education; reading specialist education; secondary education; social and cultural foundations of education; special education; sport, fitness and recreation leadership; and world language education.

College of Law

The DePaul College of Law was one of the first law schools in the country to introduce educational innovations like the study of negotiation techniques, courses in international criminal law and pre-trial courses in skills techniques. Today, our health law and intellectual property programs are among the best in the country, according to U.S. News & World Report.

College of Liberal Arts and Social Sciences

The oldest college at DePaul, the College of Liberal Arts and Social Sciences (LAS) offers more than 28 undergraduate and 30 graduate degree programs. Courses meet during the day, evenings and on weekends, primarily on the Lincoln Park Campus.

College of Science and Health

The College of Science and Health (CSH) was established in 2011 to help its students meet the demands of the growing fields of science and health. CSH offers multiple undergraduate majors and graduate programs in the areas of biology, chemistry, environmental science, mathematics, nursing, physics and psychology.
School of Music

DePaul's School of Music was founded in 1912 and is dedicated to excellence in both music teaching and performance. When they're not working with DePaul students, many of the school's faculty serve as members of the Chicago Symphony Orchestra, Lyric Opera of Chicago, or the Grant Park Symphony Orchestra, or as some of the city's most prominent freelance, chamber and jazz musicians.

School for New Learning

Created in 1972 to serve the learning needs of adult students, the School for New Learning (SNL) is one of the first university-wide efforts in the United States catering to older students through a separate college. SNL's innovative approach to teaching the adult student, which gives students credit toward degrees for life experience, has earned it international acclaim.

The Theatre School

Founded in 1925 as the Goodman School of Drama, The Theatre School at DePaul is the Midwest's oldest theatre training conservatory. Known for its highly structured program and set in a world-renowned theater city, the school has earned a reputation as a standard of excellence in American professional theatre training.

Institutional Accreditation

DePaul University is accredited by:
The Higher Learning Commission of the North Central Association of Colleges and Schools
230 South LaSalle Street, Suite 7-500 Chicago, IL 60604-1413

The master's in nursing program at DePaul University is accredited by the Commission on Collegiate Nursing Education [http://www.aacn.nche.edu/ccne-accreditation](http://www.aacn.nche.edu/ccne-accreditation).

The RN to MS program at DePaul University is pursuing initial accreditation by the Commission on Collegiate Nursing Education [http://www.aacn.nche.edu/ccne-accreditation](http://www.aacn.nche.edu/ccne-accreditation). Applying for accreditation does not guarantee that accreditation will be granted.

The Doctor of Nursing Practice at DePaul University is accredited by the Commission on Collegiate Nursing Education [http://www.aacn.nche.edu/ccne-accreditation](http://www.aacn.nche.edu/ccne-accreditation).

Students may provide feedback or register complaints with DePaul’s accreditors at the contact information listed above.
DePaul University Mission

This mission statement embodies the principal purposes of DePaul University. As such it is the nexus between past, present and future; the criterion against which plans are formulated and major decisions made; the bond which unites faculty, students, staff, alumni, and trustees as an academic community. As a university, DePaul pursues the preservation, enrichment, and transmission of knowledge and culture across a broad scope of academic disciplines. It treasures its deep roots in the wisdom nourished in Catholic universities from medieval times. The principal distinguishing marks of the university are its Catholic, Vincentian, and urban character.

Central Purposes

DePaul, in common with all universities, is dedicated to teaching, research, and public service. However, in pursuing its own distinctive purposes, among these three fundamental responsibilities this university places highest priority on programs of instruction and learning. All curricula emphasize skills and attitudes that educate students to be lifelong, independent learners. DePaul provides sufficient diversity in curricular offerings, personal advisement, student services, and extracurricular activities to serve students who vary in age, ability, experience, and career interests. Full-time and part-time students are accorded equivalent service and are held to the same academic standards.

As a comprehensive university, DePaul offers degree programs at the undergraduate and graduate levels and a range of professional programs. The liberal arts and sciences are recognized not only for their intrinsic value in undergraduate and graduate degree programs, but also because they are foundational for all specialized undergraduate programs and supportive of all advanced professional programs. The university maintains that depth of scholarship to offer the doctorate in selected academic disciplines. Libraries, computer resources, and other academic support services match the levels and diversity of degree programs.

Research is supported both for its intrinsic merit and for the practical benefits it offers to faculty, students, and society. Broadly conceived, research at the university entails not only the discovery and dissemination of new knowledge but also the creation and interpretation of artistic works, application of expertise to enduring societal issues, and development of methodologies that improve inquiry, teaching and professional practice.

In meeting its public service responsibility, the university encourages faculty, staff and students to apply specialized expertise in ways that contribute to the societal, economic, cultural and ethical quality of life in the metropolitan area and beyond. When appropriate, DePaul develops service partnerships with other institutions and agencies.

Students and Faculty

DePaul invites to its programs of study students from across the nation. Originally founded for students from the greater Chicago area, and still serving them predominantly, DePaul continues its commitment to the education of first generation college students, especially those from the diverse cultural and ethnic groups in the metropolitan area. Admission standards for all degree programs are selective or highly selective. In admitting students the university places greatest weight on intellectual potential and academic achievement. It seeks diversity in students’ special talents, qualities, interests, and socio-economic background.

DePaul University seeks to manage its resources effectively so as to control the costs it charges students for programs and services. Moreover, it makes available as much financial aid as possible to assure access to a broad range of talented students. The university identifies and offers special assistance to students of high potential who have been handicapped by educational, personal or societal obstacles beyond their control. From its first charter DePaul has supported a philosophy which now is expressed as being an equal opportunity educator and employer. DePaul continues to provide equal opportunities to students and employees without regard to age, national origin, race, sex, handicap, creed or color. Moreover, it strives to recruit faculty and staff who reflect the diverse mix of the student body.

The faculty, learned yet learning, gives substance to the mission of the university. These men and women personify the intrinsic value of scholarly inquiry and the force of creative and intellectual efforts. Through their dedication to learning, their contributions to a personalistic environment, and their faith in the potential of their students, the faculty and staff serve as role models for students.

Distinguishing Marks

By reason of its Catholic character, DePaul strives to bring the light of Catholic faith and the treasures of knowledge into a mutually challenging and supportive relationship. It accepts as its corporate responsibility to remain faithful to the Catholic message drawn from authentic religious sources both traditional and contemporary. In particular, it encourages theological learning and scholarship; in all academic disciplines it endorses critical moral thinking and scholarship founded on moral principles which embody religious values and
the highest ideals of our society.

On the personal level, DePaul respects the religiously pluralistic composition of its members and endorses the interplay of diverse value systems beneficial to intellectual inquiry. Academic freedom is guaranteed both as an integral part of the university's scholarly and religious heritage, and as an essential condition of effective inquiry and instruction.

The university derives its title and fundamental mission from St. Vincent de Paul, the founder of the Congregation of the Mission, a religious community whose members, Vincentians, established and continue to sponsor DePaul. Motivated by the example of St. Vincent, who instilled a love of God by leading his contemporaries in serving urgent human needs, the DePaul community is above all characterized by ennobling the God-given dignity of each person. This religious personalism is manifested by the members of the DePaul community in a sensitivity to and care for the needs of each other and of those served, with a special concern for the deprived members of society. DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.

As an urban university, DePaul is deeply involved in the life of a community which is rapidly becoming global, and is interconnected with it. DePaul both draws from the cultural and professional riches of this community and responds to its needs through educational and public service programs, by providing leadership in various professions, the performing arts, and civic endeavors and in assisting the community in finding solutions to its problems.

Adopted
by the Board of Trustees
November, 1991

Vincentian Identity

The university derives its title and fundamental mission from St. Vincent de Paul, the founder of the Congregation of the Mission, a religious community whose members, Vincentians, established and continue to sponsor DePaul. Motivated by the example of St. Vincent, who instilled a love of God by leading his contemporaries in serving urgent human needs, the DePaul community is above all characterized by ennobling the God-given dignity of each person. This religious personalism is manifested by the members of the DePaul community in a sensitivity to and care for the needs of each other and of those served, with a special concern for the deprived members of society. DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.

Complaints and Grievances

DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.

In support of this mission, DePaul University is committed to treating every member of its community with dignity, justice and respect fostering a positive learning environment and providing quality service. It is important for students to know how to address concerns and issues that may be contrary to this commitment.

Complaints or concerns that a policy or procedure has been incorrectly or unfairly applied can often be resolved through an initial conversation with the staff, faculty member or department where the issue originated and his/her supervisor if necessary.

DePaul has established a number of policies and procedures for responding to particular types of concerns. Contact information for these policies and procedures can be found in the bottom section of this page:

- Concerns about grades are addressed through the University's Grade Challenge policy. Detailed information is available in the Academic Handbook section of the University Catalog.
- Concerns about academic integrity are addressed through the Academic Integrity policy and process. Detailed information is available on the Academic Integrity website.
- Concerns related to student conduct are addressed through the Code of Student Responsibility, and the Student Conduct Process. Detailed information is available in the Academic Handbook section of the University Catalog.
- Concerns about discrimination or harassment on the basis of a variety of protected characteristics are addressed by the Office of Institutional Diversity and Equity through the Anti-Discrimination and Anti-Harassment Policy and Procedures.
- Concerns based on sexual violence, sexual harassment, or other sex discrimination (Title IX) are addressed through the Dean of Students Office, the Office of Institutional Diversity and Equity, or through Public Safety. DePaul's Title IX Coordinator is the Dean of Students. Detailed information is available in the Academic Handbook section of the University Catalog.
- Concerns about the confidentiality of education records (FERPA-Family Educational Rights and Privacy Act), are addressed through the Office of Student Records.
- Concerns about academic issues relating to faculty or staff can often be resolved through an initial conversation with the faculty, staff member or student employee involved in the situation. Therefore, students with academic complaints or concerns should address the issue following the steps indicated below:

  1. The issue should first be discussed with the faculty or staff member.
  2. If this does not resolve the issue the student should then discuss the issue with the department chairperson or program director for faculty issues or the individual's supervisor for staff. If you are unsure of the appropriate college contact, please see below for a directory of College and College Dean's Offices.
  3. If the issue is still not resolved, the student should then discuss the matter with the Office of the Dean of the faculty member's college for faculty issues or the department supervisor for staff issues.
  4. If the issue is still not resolved, the student may discuss the issue with the Office of the Provost.

The Dean of Students Office is a central location to which students can turn with problems they have been unable to resolve. The Dean of Students Office hears student concerns and helps students understand their options for resolving the concerns and/or locating appropriate services: http://offices.depaul.edu/student-affairs/about/departments/Pages/dos.aspx.

In addition, the University Ombudsperson is available to provide consultation about conflict resolution, to clarify policies and procedures, and to help find the right person or department to respond to questions. Students may also always choose to report concerns or misconduct through the University's confidential reporting mechanisms: 877.236.8390 or https://compliance.depaul.edu/hotline/index.asp

The U.S. Department of Education requires institutions offering online education to provide contact information for students to file complaints with its accreditor and state agencies. Contact information for DePaul's regional accreditor (the Higher Learning Commission), programmatic/specialized accreditor and state agencies is available in the Handbook section of the University Catalog.

University Learning Goals and Outcomes

Preamble

In common with all universities, DePaul strives to ensure that its students come away from their experience with knowledge and skills that will enable them to fulfill their personal and professional aspirations, interact productively with others in all their diverse perspectives, contribute meaningfully to society, and continue learning throughout their lives. Moreover, DePaul shares with other universities the goal that students will use their knowledge and skills to conduct themselves ethically and humanely, with an appreciation for the past and an eye towards shaping an even better future.

At the same time, DePaul’s mission – Catholic, Vincentian, urban -- calls on us to consider these broad goals for learning in a manner that honors the university’s distinctive qualities. DePaul’s Catholic heritage encourages us to study religious traditions, and to critically examine the moral underpinnings of all academic disciplines. The example of St. Vincent, who worked with people from all strata of society in order to address urgent human needs, infuses our understanding of both education and service with a concern for social justice, for the university mission statement reminds us that “the DePaul community is above all characterized by ennobling the God-given dignity of each person.” And as an urban university, DePaul’s deep involvement in multiple communities, within Chicago and beyond, invites us to both draw on the city’s rich opportunities for learning and serve as partners in helping them move forward. In sum, the mission statement tells us, “DePaul University emphasizes the development of a full range of human capabilities and appreciation of higher education as a means to engage cultural, social, religious, and ethical values in service to others.”

With the university’s mission as their foundation, these Learning Goals and Outcomes prepare students to engage in the world of the twenty-first century, carrying with them the heritage and values that distinguish
DePaul.

**Goal 1. Mastery of Content**

This goal embraces the breadth and depth of ideas, theories, approaches, and information which DePaul students encounter through and beyond their studies.

Outcomes: DePaul graduates will demonstrate and be able to apply:

- general knowledge of cultures, religions, science, the arts, history, and computational reasoning.
- specialized knowledge and skills from within a specific discipline or field.

**Goal 2. Intellectual and Creative Skills**

In order to fully engage with knowledge, whether for a specific purpose or for its own sake, DePaul students are encouraged to develop the ability to think critically and imaginatively, formulate their own understanding, and effectively communicate their ideas. This goal articulates specific skills that comprise these broader abilities.

Outcomes: DePaul graduates will be able to:

- systematically access, analyze and evaluate information and ideas from multiple sources in order to identify underlying assumptions, and formulate conclusions.
- solve quantitative problems.
- create and support arguments using a variety of approaches.
- use existing knowledge to generate and synthesize ideas in original ways.
- communicate clearly in speech and writing.

**Goal 3. Personal and Social Responsibility**

This goal honors the notion that knowledge reflects and contributes to the values of individuals and communities. DePaul students, in particular, are challenged to consider their own values in light of the university’s mission.

Outcomes: DePaul graduates will be able to:

- articulate their own beliefs and convictions, as well as others’ beliefs, about what it means to be human and to create a just society.
- articulate what is entailed in becoming a self-directed ethical decision-maker and living a life of personal integrity.
- evaluate ethical issues from multiple perspectives and employ those considerations to chart coherent and justifiable courses of action.
- benefit their communities through socially responsible engagement and leadership.

**Goal 4. Intercultural and Global Understanding**

This goal speaks to the likelihood that, in our diverse and increasingly interdependent world, the future depends on individuals being able to learn from each other and make the best use of finite resources.

Outcomes: DePaul graduates will demonstrate:

- respect for and learning from the perspectives of others different from themselves.
- knowledge of global interconnectedness and interdependencies.
- knowledge to become a steward of global resources for a sustainable future.

**Goal 5. Integration of Learning.**

Given the wide range of opportunities for learning at DePaul, it is important for students to develop the ability to consider relationships among individual experiences of learning so as to make meaning of their education in all its variety.

Outcomes: DePaul graduates will be able to:

- relate their learning -- curricular and co-curricular -- to multiple fields and realms of experience.
- make connections among ideas and experiences in order to synthesize and transfer learning to daily practice.
- design, develop, and execute a significant intellectual project.

**Goal 6. Preparation for Career and Beyond**

This final learning goal builds on all the rest and calls on students to be ready to apply their knowledge and skills
to the changing world that awaits them.

Outcomes: DePaul graduates will be able to effectively:

- set goals for future work that are the result of realistic self-appraisal and reflection.
- articulate their skills and knowledge and represent themselves to external audiences.
- work toward goals independently and in collaboration with others.
- employ technology to create, communicate, and synthesize ideas.
- set priorities and allocate resources.
- apply strategies for a practice of life-long learning.

**Additional Notes**

These University Learning Goals and Outcomes were approved by Faculty Council and the Interim Provost in October 2012.

A prior version of this document was drafted in Spring 2011 by a group of faculty, staff and students in the early stages of the strategic planning process that led to Vision 2018. In Autumn 2011, at Faculty Council’s direction, the draft went to the university’s Committee on Learning and Teaching, which sought input from stakeholders across the university and incorporated their valuable contributions into the revised document here. As a result of this process, the University Learning Goals and Outcomes represent a true community effort.

These university-wide goals do not exhaust the learning goals pursued at DePaul. Notably, they do not explicitly refer to the expectations specific to the various schools and departments. Nor will they be pursued in the same manner nor to the same degree in every unit. Nevertheless, the education of all recipients of DePaul undergraduate degrees should be characterized by these goals along with the goals specific to the student's unit. Since graduate and professional schools encounter students at different stages of their education and at different levels of maturity, their approaches to these goals and their methods of measuring them will have to be adjusted accordingly.

**Academic Advising, Statement on**

Academic Advising at DePaul helps students achieve their educational, personal, and career goals by providing guidance and assistance in the decision-making process. Academic Advising is most effective when all participants anticipate their future needs, commit to the process, do their part, and then reflect on their results. Students should work closely with their advisors to plan workable educational goals, to understand the degree options and requirements, to understand the financial implications of their decisions, to assess their strengths and challenges as scholars, and to clarify realistic career objectives for themselves upon graduation.

**Students bear ultimate responsibility for decisions and actions that determine their success at DePaul University.**

- Students will make informed decisions and register for classes on time.
- Students will obtain the necessary information for course selection and planning in their individualized programs.
- Students will make and keep appointments with their advisors.
- Students will communicate honestly and fully in these advising discussions.
- Students will regularly reflect on the consequences, both academic and financial, of their decisions as they progress in their academic careers toward life choices.

**Advisors are responsible for helping students improve their decision making skills.**

- Advisors guide students through this learning process during regular interactions at key points during their academic careers.
- Advisors will be available on a regular basis for consultation and encourage students to make and keep regular advising appointments.
- Advisors will monitor their advisees’ academic progress.
- Advisors will encourage students to consult available material related to their program and career choice.
- Advisors will encourage students to reflect on the academic and financial consequences of their decisions about degree programs and course-taking plans.
- Advisors will assist students to set realistic career goals that extend beyond their time at DePaul.
- Advisors will encourage students to incorporate their basic values and beliefs into their decision making process.
The university is responsible for providing the infrastructure for students, faculty, and staff to support effective advising.

- The university will provide the information that students and their advisors need to make informed and timely decisions.
- The university will provide adequate resources of personnel, funding and facilities to support the advising process.
- The university will clearly communicate to advisors and students the policies and options regarding student financial aid.
- The university will regularly evaluate the policies and procedures surrounding advising to improve the advising process on an ongoing basis.
- The university will provide training to help both advisors and students work more effectively together.
- The university will acknowledge the important contribution advisors make by recognizing advising within the institutional reward system.

- Rates are subject to change without prior notice.
- **DUAL DEGREE STUDENTS** Students enrolled in dual-degree programs between two schools or colleges at DePaul may be charged per credit hour per course according to the program that offers each particular course. If you are registered for classes from both the College of Law and College of Computing and Digital Media, for instance, tuition for each course will reflect the tuition rate of the school or college offering that course.
- If you have any questions regarding tuition rates, please contact Student Accounts, (312) 362-8610.
Financial Aid

Financial aid applicants must meet the federal eligibility requirements for aid, and if asked, provide documents as needed to support eligibility:

- You must be a U.S. citizen or eligible non-citizen.
- You must be accepted and currently active in a graduate or professional degree program, or a financial aid-eligible non-degree graduate program.
- For most financial aid programs, and for loan deferment, you must enroll in your program at least half-time. Your classes must be taken for credit and must be part of your degree or a financial aid-eligible non-degree graduate program.
- Audited courses are not eligible for financial aid consideration. In addition, if it is determined that you have completed your degree or your aid-eligible non-degree graduate program requirements, or if you wish to repeat a course for which you have previously earned credit, your financial aid options are limited: please contact the Office of Financial Aid for more information. You must be in good academic standing and making satisfactory academic progress in your course of study.
- You must not be in default on any federal loan or owe a repayment on any federal grant.
- You must comply with all federal regulations governing Selective Service registration and use of funds for educational purposes.
- You must meet all federal eligibility requirements. To learn more about these eligibility requirements, including information about any prior drug conviction and federal student aid eligibility, please refer to the FAFSA questions and answers at http://studentaid.ed.gov/eligibility.

Additional information is available on the Financial Aid website.

Scholarships

Scholarships and assistantships are awarded at the program level. Please consult your college or school for additional information.

Veterans Assistance

The Office of Financial Aid handles the following VA educational benefit programs:

- The Post-9/11 GI Bill Program (Chapter 33) – for those who served at least 30 consecutive days on active duty after September 10, 2001
- The Post-9/11 GI Bill Yellow-Ribbon Program – for qualified Post-9/11 applicants
- The Montgomery GI Bill – Active Duty Program (Chapter 30) – for those who enlisted after July 1, 1985
- The Montgomery GI Bill – Selective Reserve Program (Chapter 1606)
- The Montgomery GI Bill – Reservist Educational Assistance Program (Chapter 1607)
- The Survivors’ and Dependents’ Educational Assistance Program (Chapter 35) – for spouses and children of deceased or disabled veterans
- The Vocational Rehabilitation Program (Chapter 31) – for disabled veterans approved by Veterans Affairs for study at DePaul
- The Marine Sergeant John David Fry Scholarship – this additional provision of the Post-9/11 GI Bill may be awarded to a surviving spouse and children of an active duty member of the Armed Forces, who has died in the line of duty, on or after September 11, 2001. Eligible children may be married and under the age of 33.
Additional information specific to veteran students is available through the Admission and Aid website.

**DePaul DREAM Statement**

At DePaul University we affirm the dignity of the individual. We value diversity and culture because these are part of our core values and traditions as a Catholic, Vincentian, and urban university. DePaul University has decided to take a strong and public stand for supporting undocumented students, and DREAM Act legislation. We believe supporting undocumented students is smart policy that will yield significant benefits for our university, city, state, and nation. We also know these young people who enter our doors are part of the next great generation who will build our collective future. It is for this reason that DePaul admits students regardless of their citizenship status. Because we welcome these students, it is incumbent upon all members of the DePaul community to understand DePaul's position on assisting undocumented students, realize the value that they bring to our university, and support their success as we support all of our students.

**Academic Integrity**

DePaul University is a learning community that fosters the pursuit of knowledge and the transmission of ideas within a context that emphasizes a sense of responsibility for oneself, for others and for society at large. To preserve the quality of education offered to students, the university is responsible for maintaining academic integrity and protecting all those who depend on it, including DePaul's community partners and institutional affiliates. Violations of academic integrity, in any of their forms, are, therefore, detrimental to the values of DePaul, to the students' own development as responsible members of society, to the pursuit of knowledge, and to the transmission of ideas. All members of the university community share the responsibility for creating conditions that support academic integrity.

Violations of academic integrity include but are not limited to the following categories: cheating; plagiarism; fabrication; falsification or sabotage of research data; destruction or misuse of the university's academic resources, alteration or falsification of academic records; academic misconduct; and complicity. Violations do not require intent. This policy applies to all courses, programs, learning contexts, and other activities at the university, including but not limited to experiential and service-learning courses, study abroad programs, internships, student teaching, providing false information on an application, and not disclosing requested information. If an instructor finds that a student has violated the Academic Integrity Policy, the appropriate initial sanction is at the instructor's discretion. Actions taken by the instructor do not preclude the university from taking further action, including dismissal from the university. Conduct that is punishable under the Academic Integrity Policy could also result in criminal or civil prosecution.

Additional Information and the complete Academic Integrity policy can be found on the Academic Integrity website (http://academicintegrity.depaul.edu/).

For purposes of the Academic Integrity policy, participation in a law journal or moot court constitutes participation in a course.

**Admission**

Admission to DePaul University College of Law is competitive. We consider numerous factors in evaluating each applicant, including undergraduate academic performance, Law School Admission Test (LSAT) scores, advanced degrees, professional work experience, writing ability, potential for leadership, professional and academic

DePaul University Autumn 2015-2016 Page 1571 of 1633
recommendations and the student's special talents, qualities, interests, and socioeconomic and cultural background. No single factor is dispositive when determining admission.

Personal qualities that demonstrate intellectual depth, high ideals and diligence also are considered, as are economic, societal or educational obstacles that have been successfully overcome. Diversity in background and experience among the members of each entering class is a continuing objective. Having a diverse student body allows us to encourage and foster the exchange of different ideas. In addition, a candidate's prior relations with the DePaul University community and her or his potential for furthering DePaul's institutional goals are considered.

Because applications are reviewed on a rolling basis, early application is highly recommended, especially for those who desire merit scholarship and financial aid consideration. For first-year applicants with no previous law school credit, admission is granted only for the fall semester. First-year applicants should ensure that their application and all necessary documents are on file in the Office of Admissions prior to the suggested application deadline of March 1.

Character and Fitness Disclosures

The Illinois Board of Admissions to the Bar requires that the Dean of the law school certify that each student sitting for the bar has earned the JD degree. As part of that certification, the Dean must answer questions regarding the character and fitness of each bar applicant. Most other states require similar certificates to be completed by the Dean before students may take the bar exam.

Students are advised that they have a duty to supplement their law school files if any adverse criminal, civil, administrative or financial events occurred before or during law school. If any discrepancy exists between information disclosed on the original law school application and the bar application, the student may be asked to meet with bar admission staff or the Board of Law Admissions. Adverse information not disclosed may result in the denial of a license to practice law. Students who do not fully disclose adverse information when they apply to DePaul University College of Law must do so at the earliest opportunity. If not, they may be cited for a violation of the College of Law Honor Code. Penalties, including letters of reprimand, suspension or expulsion, may be imposed for failure to make full or complete disclosure.

Class Attendance Policy

Attendance is mandatory for all law school classes. Each instructor may establish penalties for lack of attendance, including lowering the final grade for the class. If a student registers for a limited enrollment class such as a senior research seminar or a professional skills course and does not attend the first week of the class, the instructor may assign a failing grade.

Students are required to attend the section of a course for which they are registered. A student may not attend another section of the same course, even if taught by the same instructor.

Students who never attend or cease to attend a class without withdrawing may receive a grade of FX. The FX is calculated into the student's GPA as an F.
Class Ranks and Dean's List

Class Ranks

JD students who have completed at least one semester at the College of Law are ranked by cumulative GPA in percentage increments. LLM students are not ranked. Students who transfer to DePaul are ranked once they receive DePaul grades. Transfer credits are not used to determine class ranks but are used to determine honors at graduation. Class ranks are posted in February and July on the College of Law website.

Ranks are listed by percentile, in five percent increments, through the 50th percentile. The lower half of the class is ranked by quartile. Full-time and part-time students are ranked separately. Once released, class ranks are not affected by any subsequent grade changes or withdrawals. Numeric class ranks are not available.

In communicating with prospective employers or otherwise, a student must report his or her class rank precisely as listed on the College of Law website. Students may not round off grade point averages to achieve a higher rank.

To verify a class rank, a student should order an unofficial transcript or official transcript from Campus Connection or through the University Office of Student Records (http://sr.depaul.edu). Students then should compare their cumulative GPA to the percentage class ranks on the College of Law website. If an employer requests verification of class rank, the student should give the employer the unofficial or official transcript and a copy of the ranks from the College of Law website or refer the employer to the website.

Dean's List

Students who rank in the upper 25 percent of their class based on one semester's grades qualify for the Dean's List. Dean's List notes appear on unofficial and official transcripts, available on Campus Connection. Total credits, graded as well as pass/fail, count toward earned credit hours.

To qualify for the Dean's List, a full-time student must be registered for at least 12 credits graded other than pass/fail or audited. A part-time student must be registered for at least nine credits graded other than pass/fail or audited. Once released, the Dean's List is not affected by any subsequent grade changes or withdrawals.

J D Classifications for Class Ranks and the Dean's List

For purposes of determining class ranks and the Dean's list, JD students are classified by the number of credit hours they have earned:

Full-Time

- First-Year = 28 or fewer earned credit hours
- Second-Year = 29 to 54 earned credit hours
- Third-Year = 55 or more earned credit hours

Part-Time

- First-Year = 20 or fewer earned credit hours
- Second-Year = 21 to 43 earned credit hours
- Third-Year = 44 to 67 earned credit hours
- Fourth-Year = 68 or more earned credit hours

Dismissal

College of Law students who are not in good standing are dismissed effective at the end of the academic year. However, formal dismissal letters typically are not issued until final grades are processed in June.
Students whose grade point averages are 2.20 or below after the Fall semester are advised to meet with the Associate Dean of Student Affairs to discuss their performance. They also may not register for the following Summer session.

**Dismissal/ Readmission**

Academic dismissals from the College of Law are typically final. However, under limited circumstances, students may seek readmission to the College of Law by filing a petition with the Readmissions Committee. The Readmissions Committee consists of at least five faculty members appointed by the Dean. All decisions by the Committee are final and are not subject to appeal.

Students seeking to be readmitted must submit a petition describing how they satisfy the readmissions criteria described below. An electronic copy of the petition and supporting documentation must be submitted to the Associate Dean of Student Affairs. Students should include all documentation they feel may be of assistance to the Committee.

A student dismissed at the end of the first year may not resume classes until passage of at least one calendar year after a dismissal. Students dismissed at the end of their first academic year may file a readmissions petition no earlier than January 15 and no later than March 1 of the year following their dismissal.

JD students dismissed after the second, third or fourth year may apply for readmission after they receive a dismissal letter, but no later than August 1 for admission in the Fall semester of that year. If students are dismissed and not readmitted within two years, they must apply for admission as a new student and must be ratified by the Readmissions Committee.

**Readmission Criteria**

The Readmissions Committee applies the following criteria in passing on a petition for readmission. Except in extraordinary circumstances, all of the requirements must be satisfied. The conditions upon which readmission is predicated are individually determined:

1. The applicant's academic failure must have been caused by unforeseeable and uncontrollable circumstances with which the applicant could not reasonably cope. The applicant has the obligation to submit independent documentation verifying such circumstances.

2. Unless unreasonable to do so under the circumstances, the applicant must have promptly brought such unforeseeable circumstances to the attention of the appropriate College of Law officials prior to dismissal.

3. In the Committee's judgment, the applicant must be able to successfully perform in the College of Law if readmitted.

**Interviews with the Readmissions Committee**

A first-time applicant for readmission may request a personal interview with the Readmissions Committee. The interview is the time to explain and amplify the written petition and to highlight any information the applicant feels is important for the Committee members to know. The Committee may ask applicants to return for a second interview to further develop answers or to present and explain documents that may help the Committee members better understand an applicant's law school performance. Second-time applicants are not given an interview.

**Readmissions Committee Meetings**

The Readmissions Committee meets twice during the academic year. For students dismissed after the second, third or fourth year, the Committee will meet shortly before the beginning of the Fall semester. For students dismissed after their first year, the Committee will meet toward the end of the Spring semester of the year following dismissal to consider petitions for the following Fall semester.

**Limits on the Number of Readmissions Petitions**

A student may not apply for readmission more than twice, irrespective of the Committee's decision. A student must apply for readmission within two years of the dismissal date.

**Students Enrolled In Summer Session Before Notice of Dismissal**
A student who is dismissed at the end of the first year and who is enrolled in a Summer course will be withdrawn from the Summer course. Tuition will not be refunded.

An upper-level student who is dismissed while enrolled in a Summer course may either withdraw from the course (without a refund) or may finish the Summer class. Should the student elect to remain in the class, credit will not be given unless the student's petition for readmission is granted.

**American Bar Association Standard 505 and Readmissions**

American Bar Association Standard 505 applies to all ABA-accredited law schools, including DePaul University College of Law. The standard states:

A law school may admit or readmit a student who has been disqualified previously for academic reasons upon an affirmative showing that the student possesses the requisite ability and that the prior disqualification does not indicate a lack of capacity to complete the course of study at the admitting school. In the case of an admission to a law school other than the disqualifying school, this showing shall be made either by a letter from the disqualifying school or, if two or more years have elapsed since that disqualification, by the nature of interim work, activity, or studies indicating a stronger potential for law study. For admission or readmission of a previously disqualified individual, a statement of the considerations that led to the decision shall be placed in the admittee's file.

**Employment Limitation for Full-Time J D Students**

College of Law full-time JD students cannot be employed for more than 20 hours per week while fall and spring semester classes are in session. If a student must work more than 20 hours per week, the student must transfer to the part-time division. If full-time first-year JD students feel compelled to work, they should be careful to limit their hours so as not to interfere with their studies.

Students are expected to arrange their work schedules around College of Law classes. Adjustments in the curriculum or final exams will not be made because of work conflicts.

**Evaluation and Credit/ Limitations**

**No Credit for Course Work Taken Prior to Matriculation in the JD and LLM Programs**

The American Bar Association Standards provide that credit for a J.D. degree shall only be given for course work taken after the student has matriculated in a law school. A law school may not grant credit toward the J.D. degree for work taken in a pre-admission program.

**Requirements to Visit Another Law School**

A DePaul student may take selected cross-listed courses at other law schools that have a cross-listing agreement with DePaul College of Law. Students who take such courses shall continue to be registered at, and pay tuition to, DePaul College of Law. The course instructor shall send the student's final grade to the Associate Dean of Student Affairs of the DePaul College of Law.

Except for the cross-listed courses referenced above, or an approved Summer study abroad visit at another law school, which is strongly discouraged, a student will be permitted to receive credit for courses taken at another law school only if the student faces an unforeseen change of circumstances of an emergency nature that makes the student's continued presence at DePaul an exceptional hardship. Such circumstances may include but are not limited to death or extreme illness in the student's immediate family, which necessitates a move to another city to alleviate severe financial, medical or other stress. A student must document his or her claim of extraordinary
hardship to the Associate Dean of Student Affairs. The student must have at least a 3.00 DePaul GPA. NOTE: Financial concerns or the need to accompany or join a spouse, without other significant factors, will not constitute an exceptional hardship; neither will a desire to work or study in another location constitute such a hardship.

Courses taken at another university or college that are not part of a regularly accredited law school curriculum will not be applied toward a law degree.

FERPA/Annual Notification

Annual Notification for DePaul Students: Your FERPA Rights

We want to take this opportunity to provide you with a summary of your rights under The Family Educational Rights and Privacy Act (FERPA), the federal law that governs release of and access to student education records. Please view Understanding FERPA, a DePaul Central Learning Center video for information and instructions.

Your FERPA rights include:

1. The right to inspect and review your education record within 45 days after the University receives a request for access. If you want to review your record, contact the University office that maintains the record to make appropriate arrangements.

2. The right to request an amendment of your education record if you believe it is inaccurate or misleading. If you feel there is an error in your record, you should submit a statement to the University official responsible for the record, clearly identifying the part of the record you want changed and why you believe it is inaccurate or misleading. That office will notify you of their decision and advise you regarding appropriate steps if you do not agree with the decision.

3. The right to provide written consent before DePaul discloses personally identifiable information contained in your education records, except to the extent that FERPA authorizes disclosure without consent.

Some examples of exceptions include:

- School officials with "legitimate educational interests." A school official has a legitimate educational interest if the official has a professional need to review your education record in order to fulfill his or her official responsibilities. Examples of people who may have access, depending on their official duties, and only within the context of those duties, include: university faculty and staff, agents of the institution, students employed by the institution or who serve an official institutional committees, and representatives of agencies under contract with the University.
- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student's enrollment or transfer.
- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local educational authorities, such as a state postsecondary authority that is responsible for supervising the university's state-supported education programs. Disclosures under this provision may be made in connection with an audit or evaluation of federal- or state-supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs. These entities may make further disclosures of personally identifiable information to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, enforcement or compliance activity on their behalf.
- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate or administer predictive tests; (b) administer student aid programs; or (c) improve instruction.
- To accrediting organizations in order to carry out their accrediting functions.
- To appropriate officials in connection with a health or safety emergency.
- Information the school has designated as "directory information."

Directory information may be released without your written consent and includes the following: name, address, e-mail, telephone number, date of birth, college of enrollment, year in school, major, enrollment status (including current enrollment, dates of attendance, full-time/part-time or withdrawn), degrees, awards and honors received (e.g., Dean’s List recognition), participation in officially recognized activities and sports, weight
and height of members of athletic teams, photographs (including ID pictures), videos depicting and/or concerning University life, and previous educational institutions attended. Please note that you have the right to withhold the release of directory information except to the extent that FERPA authorizes disclosure without consent (see #3 above).

To withhold the release of your directory information, you must log into the student portal, Campus Connect, and, under Student Privacy settings, indicate your preference. Please note two important details regarding placing a "No Release" on your record:

1. A "No Release" on your record will prevent your name from being included on lists of students released to honor societies, dean's list and graduation announcements to local newspapers, and enrollment and degree verification to anyone, including potential employers.
2. A "No Release" applies to all elements of directory information on your record.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

For additional information, please consult the U.S Department of Education (http://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.htm/) website.

Questions concerning FERPA should be referred to DePaul Central:

DePaul Central
Lincoln Park: Schmitt Academic Center, 101
Loop: DePaul Center, Suite 9100
Tel: (312) 362-8610 | dpcl@depaul.edu | depaulcentral.depaul.edu

Final Exams

The method of evaluation of student performance in a course lies solely within the discretion of the instructor. In many courses, a student's grade is based primarily on one written examination given at the conclusion of the course. Some instructors also give a midterm examination or assign papers. Final Exam times are posted in the class schedule.

Exam Administration

During closed book examinations, all books, notes, cell phones, tablets, iPods, outlines, backpacks, briefcases, and other materials must be placed in the back of the room. During open book exams, students may have whatever materials the professor approves for use during an examination. For SofTest exams, the proctor will announce the start time and write the exam password on the board. SofTest will automatically shut down after the allotted time. For bluebook and Scantron exams, the test proctor will advise the students of the time at which the exam will end and will write the ending time on the blackboard. When time has expired, the proctor will announce that the exam is over. Students must stop writing immediately and turn in their examinations. Failure to stop writing immediately is a violation of the Honor Code. Students are not permitted to leave their seats for any reason during the last half hour of an exam.

Anonymous Examination Numbers

Each student is randomly assigned an anonymous exam number each semester, and most exams are graded anonymously. Generally, upper-level seminars and skills courses are not anonymously graded.

For exams graded anonymously, a student must identify herself or himself only by assigned anonymous examination number. A student must not identify himself or herself by name, student identification number or any other designation or symbol anywhere on the examination questions or answers. A student should not disclose the examination number to the instructor, either directly or indirectly, until the instructor has submitted the final grades for the course. Failure to comply with these provisions may be a violation of the Honor Code.
Exam Schedule and Conflicts

The final examination schedule is published with the class schedule prior to registration each semester on Campus Connect. Students should select their courses to avoid exam conflicts.

All students must take their examinations at the scheduled time. If two sections of a course are offered, students must take the exam at the time scheduled for the section in which they are enrolled.

Final exams will be rescheduled only in extraordinary circumstances, or according to the rescheduled exam policy below. Exams will not be rescheduled because of job commitments, weddings, graduations, vacation plans, travel plans or for other personal reasons.

Rescheduled Examinations

Under certain limited circumstances, students may shift one examination to a different day. This policy is known as the “rescheduled exam” option.

If you have two in-class exams on the same day or within 24-hours (i.e., less than 24-hours), you can designate one exam as a “rescheduled exam.” You must take the rescheduled exam within two weekdays of the original exam date, which may be before or after the regularly scheduled exam. Rescheduled exams are held between 9:30 a.m. - 12:30 p.m. on designated days when no first-year exams are scheduled. The application form is available online.

Students may only request one rescheduled exam per semester. Students must register no later than the sixth week of classes. Forms are available on the College of Law website. First-year students, both full-time and part-time, may not reschedule exams because their exam schedule is set up with several days between exams. Rescheduled exams are not available in Summer term.

Missing an Examination

Students are expected to take examinations when scheduled, even though ill or inconvenienced. However, in the event of serious illness or for other extraordinary or compelling cause beyond a student’s control, the Associate Dean for Student Affairs or the dean on duty may excuse a student from taking the exam at its scheduled time. Students will not be excused from an examination for job-related reasons, weddings, travel, graduations, vacations or for other personal reasons. Students are expected to adjust their outside commitments to conform to the law school examination schedule.

A student who must miss an exam must notify the Associate Dean for Student Affairs on or before the scheduled exam day. If prior notice is not possible, the student must contact the Associate Dean as soon as the inability to take the exam becomes manifest. If a student does not notify the Associate Dean for Student Affairs at the first available opportunity, the student will receive a failing grade. A student should never contact the professor about rescheduling an examination that will be graded anonymously.

A student who is more than ten minutes late for an exam will not be permitted to take it unless authorized by the Associate Dean for Student Affairs. A student who is less than ten minutes late may take the exam but will not be allotted additional time and may not type his or her exam. Students who miss an exam must use bluebooks and cannot type their answers.

Examination Accommodations

Students who wish to request accommodations on the basis of a disability should contact, and register with, the Center for Students with Disabilities. Students who have been approved to receive accommodations should also notify the Associate Dean for Student Affairs at the start of each semester.

Accommodations of time and one half per in-class exam are offered to international College of Law non-JD students (LLM, MJ, Visiting and Exchange) for whom English is not a first language. Students who qualify should contact the Office of Student Affairs at least one month before each exam period to confirm accommodations.

International College of Law non-JD Students for whom English is not a first language will be permitted to use a standard English dictionary while taking in-class final exams. Eligible international students must be registered with the DePaul University Office of International Students and Scholars. Eligible students may not use their own dictionary, but must use a standard English dictionary (Merriam-Webster or comparable) provided by the College of Law at the time of the exam. This policy applies to final exams that are closed book or where there are restrictions on materials that would otherwise prevent the use of a dictionary.
Good Standing

To be considered in good standing, a JD student must have a cumulative GPA of 2.0 at the end of the academic year in May; a LLM student must have a cumulative GPA of 2.5 over three semesters.

Grades received in the Summer session are not included in a student’s GPA for the prior academic year.

Grades

Grades and Grading Scale

Grades can be accessed online via Campus Connect. Grades can be viewed and printed using the Unofficial Transcript in the Student Center in Campus Connect.

Once a grade is assigned, university policy prohibits faculty from changing the grade unless the professor made a clerical or computational error when calculating it. Removal of an incomplete grade in accordance with University policy is an exception to the grade change policy.

Faculty may not assign or accept additional graded material in order to improve a student’s final grade. They may not conduct a substantive reevaluation of the student’s exam or coursework.

Grades are assigned in accordance with the following definitions (a plus or minus grade represents a slight variance from the indicated definition):

A
The instructor judged the student to have accomplished the stated objectives of the course in an EXCELLENT manner.

B
The instructor judged the student to have accomplished the stated objectives of the course in a VERY GOOD manner.

C
The instructor judged the student to have accomplished the stated objectives of the course in a SATISFACTORY manner.

D
The instructor judged the student to have accomplished the stated objectives of the course in a POOR manner.

F
The instructor judged the student NOT to have accomplished the stated objectives of the course.

FX
Student failed to accomplish the stated objectives of the course due to non-attendance. Non-attendance is defined as never attending or ceasing to attend an in-person course (or never participating or ceasing to participate in an online course) without officially withdrawing. The FX is calculated into the student’s GPA as an F. Instructors are required to provide the last date of attendance/participation.

Temporary grade indicating that, following a request by the Student, the Associate Dean of Student Affairs and the Instructor have given permission for the student to receive an incomplete grade. In order to qualify, the student must have:
1. satisfactory record in the work already completed in the course; and
2. encountered unusual or unforeseeable circumstances, which prevent him/her from completing the course requirements before the end of the term; and
3. applied to the instructor and to the Associate Dean for permission to receive the IN. The incomplete will expire at the end of the following semester. If the work is not complete, the student will receive a failing grade.
PA Passing achievement in a pass/fail course. (Grades A through D represent passing performance.)

W Withdrawal from the course instituted by the student after the last day to drop with a refund and before the final withdrawal deadline.

WA Withdrawal from the course initiated by an administrator at a student's request, usually outside of established deadlines. Administrative withdrawals may be granted under extraordinary circumstances and require documentation for support.

M Final grade not submitted by instructor.

AU Auditor status; course does not earn credit.

First-Year Grade Curve and Upper-Level Classes with 50 or More JD Students

The following mandatory grade curve applies to all first-year courses and to upper-level classes with 50 or more enrolled JD students:

- A: 12%-17%
- A- and/or B+: 20%-30%
- B: 20%-30%
- B- and/or C+: 20%-30%
- C or below: 10%-15%

In addition, the mean or average for all DePaul JD students in any course subject to this grade curve must be between 2.95 and 3.15. All LARC sections taught by the same instructor during the semester are aggregated into one course for purposes of this curve.

Upper-Level Grade Curve: Classes with 21 - 49 JD Students

The mean or average for all DePaul JD students in any upper-level course with an enrollment between 21 and 49 students must be between 2.95 and 3.15.

Upper-Level Classes with 20 or Fewer JD Students

No mandatory grade curve applies to courses with enrollments of 20 or fewer DePaul JD students. However, any instructor submitting grades for DePaul JD students more than half of which are grades of A shall provide the Associate Dean of Academic Affairs with a brief explanation of the methodology that led to this result.

LLM, MJ and other non-JD students are not included in the grade curves set forth in this subsection.

Computation of GPA

GPAs are computed by dividing the total number of grade points earned by the total number of graded credit hours. Graded credit hours do not include courses graded WA, W, PA, IN, M, or AU, but do include courses...
Grades, Challenges to

A. General Policies on Grading

1. Grades are determined solely on the basis of the academic performance of each student according to pre-established criteria determined by the course instructor and consistent with university, college and departmental policies.
2. Grade determination is the prerogative of the instructor subject to the constraint that any successfully challenged grade will be changed through faculty action.
3. The criteria for evaluating academic performance are to be consistent with a course's goals and objectives, which have been approved by the appropriate academic authority before the course is scheduled. On the first day of class of each course the instructor is to explain in writing to the students the criteria for evaluating as well as the methods for grading student performance (examinations, papers, reports, etc.).
4. The instructor in each course shall decide what criteria and methods for evaluating students are to be applied in the specific course. These decisions of the instructor, however, must be compatible with any policies previously accepted by the faculty of a department or college with respect to particular courses, especially courses offered in sequence where the qualifications of a student to begin an advanced course depend upon performance in a previous course. The methods of conducting a course are determined by the instructor within limitations set by the classification of a course as lecture-discussion, seminar, laboratory, etc. An instructor may vary the teaching methodology to meet particular circumstances of a course (type or number of students enrolled, concentrated calendar as in summer sessions, etc.) or the instructor's own desires to innovate or experiment with different approaches.

Any method selected must be compatible with the predetermined goals and objectives of the course. While teaching methodology may change after the course has begun, grading methodology may be changed only with the consent of a majority of students in the course, taking into consideration hardships imposed upon students opposed to the change.
5. The actual evaluation and grading of academic performance is subject to the professional judgment of each instructor. Considerable personal discretion is required in these judgments - a justifiable margin of difference can exist between the evaluations made by two or more professional persons of the same academic performance.
6. Students are entitled to compare their work in the course with the criteria applied in deciding the final grade for the course. Accordingly, the course instructor is required either to return major papers and examinations to students or to make such available for students until the end of the following term. Spring Quarter materials are to be available until the end of the Autumn Quarter. For pedagogic reasons, an instructor may vary the teaching methodology to meet particular circumstances of a course (type or number of students enrolled, concentrated calendar as in summer sessions, etc.) or the instructor's own desires to innovate or experiment with different approaches.

B. Policies Regarding Grade Challenge

1. All Grade Challenge Review Boards must follow the procedures listed below.
2. A challenge to a grade will be reviewed and decided by tenured faculty unless the college or school has an insufficient number of tenured faculty to staff a Review Board.
3. The student who challenges a grade bears the full burden of proof that there are sufficient grounds for changing a grade.
4. Only the final grade of a course and its means of determination may be challenged.

Grades are graded F or FX. Grade point averages are reported to three digits and cannot be rounded up. Students must report their grade point average as it appears on official and unofficial transcripts.
C. Procedures for Establishing Grade Challenge Review Boards

1. At the beginning of each academic year, the Committee on Committees will recommend to the Faculty Council, the faculty members and alternates for one Review Board for each of the following colleges: Business, Computing and Digital Media, Communication, Education, Law, Music, School for New Learning, Science and Health, and Theatre.

2. It will recommend two boards for Liberal Arts and Social Sciences covering the following areas: Humanities and Behavioral and Social Sciences. The Faculty Council will make all appointments to Review Boards. The dean of a college may request the establishment of additional Review Boards.

3. Each Review Board will consist of three faculty members and two alternate faculty members and one student. Faculty members may not serve on challenges in which they are involved. Involvement includes assignment of the grade in question and/or attendance or participation in the class. In either of these cases, one of the alternates will be asked to serve.

4. The student representative on the Review Boards in Business, Computing and Digital Media, Communication, Education, Liberal Arts and Social Sciences, Science and Health, Law, Music, School for New Learning, and Theatre will be the elected Senator from the college or school. In cases where this Senator is involved in the claim; i.e., had registered for, attended or participated in the class, the SGA EVP of Academic Affairs will serve as an alternate or if necessary, the president may appoint the alternate.

5. The Review Board will select its own chair and vice chair (to serve in the absence of the chair). The Chair of the Review Board receives all requests for hearing from the dean or chair of the affected department, sets the calendar, notifies all board members and involved parties of the dates and times of the hearings and informs students by written notice of the recommendations of the board. The chair is responsible for adherence to the Procedures for Filing a Grade Challenge.

6. The boards will serve until the beginning of the Autumn Quarter of the academic year.

7. A quorum of the Review Board consists of three members of the board.

8. Challenges will be upheld by a vote of three or more of the four member board. All members are voting members.

D. Procedures for Filing a Grade Challenge

In order to provide a forum for the fair resolution of academic disputes involving individual students and appropriateness of course grades, the following procedures have been developed and will be applied to all cases involving DePaul University students.

1. A student who is considering a grade challenge must discuss the grade with the instructor before the end of the following regular term. (Spring and Summer Quarter challenges must be made before the end of the Autumn Quarter. Law students challenging a Fall semester grade have a deadline of March 1 of the following Spring semester. Law students challenging a Summer/Spring semester grade have a deadline of October 1 of the following Fall semester) The instructor is expected to explain the reason for the grade to the student. Only if the instructor is not at the university during the following regular term after the grade was issued, may the student proceed to challenge the grade without meeting with the instructor.

2. If, after the discussion with the faculty member, the student still disputes the final grade, the student may continue his or her challenge by submitting a written request for a hearing to the office of dean of the college or school in which the course was offered within the term following the award of the disputed grade. Since the following burden of proof rests upon the student, it is important that the student include a clear and coherent statement (typed) with the reason for the appeal, together with any supporting documents the student may wish to include. Students may request that copies of supporting documents in possession of the faculty members be forwarded to the chair of the Review Board. All challenges will be thoroughly and fairly reviewed.

3. The dean of the college or school shall forward a copy of the request to the chair of the Review Board, the involved faculty person and the student. This must be signed and dated by the dean or chair of the affected department.

4. Once filed, the formal challenge is automatically forwarded through all stages of the appeal process unless the Review Board determines it to be groundless or frivolous. Additionally, the student has the option to discontinue the appeal at any stage by submitting a letter stating such to the instructor and chair of the Review Board.

Both the student and instructor will be informed in writing of all committee recommendations and decisions as well as any new written information bearing on the case. Only the instructor and/or the Review Board are empowered to change a grade.

5. The Review Board chair will send a copy of the grade appeal request and relevant materials received with it to the instructor involved. The instructor will return the materials with a written response within two weeks unless circumstances warrant an extension.

The chair is responsible for monitoring the time period. A copy of the instructor's response will be forwarded to the student who has filed the challenge. If the instructor does not respond within the time period, the committee will conclude its deliberations and vote on the challenge.
6. The Review Board may, at its discretion, seek oral clarification of the written responses from the student and faculty member. If it requests this further clarification, the Review Board must meet with both the student and faculty member separately if the student requests.

7. The Review Board shall evaluate the challenge and vote to approve or deny. Decisions of the Review Board arrived at by secret ballot are to be determined by a majority vote.

Such action must be taken within two months of the date of filing. (If the grade appeal is not passed along its designated route within the times specified, the student should notify the dean of the school or college who will determine the reason for the delay.)

8. The Review Board is to reach one of the three following decisions:

   1. Challenge affirmed and settled by consent: i.e., the Review Board conducting the review devises a conciliation mutually acceptable to the student and the instructor who gave the grade. Should the acceptable conciliation involve a change of grade, the instructor will submit a change of grade.

   2. Challenge affirmed and the Review Board may submit a change of grade card to the dean of the college in which the course was taught.

   In determining the student's final grade, the Review Board will take into account all evidence of the student's academic performance in the course under challenge as well as the implications for the student's grade of the instructor's actions in the case in question.

   3. Challenge denied; original grade stands.

9. The decision reached by the Review Board is to be communicated by the chair of the Review Board in writing directly to the dean of the college or school, the instructor, and the student. The explanation for the decision will also be communicated.

10. Decisions by the Review Board are final and binding on all parties. The board's decision does not require the approval of the dean of the college or school, or the chair of the affected department.

---

**Grades, Incomplete (IN)**

The grade of Incomplete (IN) is assigned when a student has been excused from taking the final examination on good cause shown or, with permission, has failed to complete all of the required coursework. To receive an incomplete, a student must receive written permission from the instructor and the Associate Dean of Student Affairs. All course work must be completed by the end of the following semester or the student will receive a permanent failing grade (F).

---

**Grades, Pass/ Fail**

The faculty has designated certain courses for pass/fail status. A student may not elect to take a course pass/fail that has not been so designated.

---

**Grades, Repeating Classes**

A student who receives a grade of F or FX in a course may NOT retake the course (with the exception of Legal Profession, which must be completed successfully in order to obtain a J.D.). Courses may not be repeated in order to obtain a higher grade.
Graduation Requirements

Each student is solely responsible for ensuring that he or she fulfills all requirements for the degree being sought. Graduating seniors should undertake an independent review of their records before they register for their final semester by ordering a degree progress report or an unofficial transcript from Campus Connect. **If a prospective graduate has not fulfilled all degree requirements, he or she will not receive a degree and will not be certified for admission to the bar.**

Note: Participation in the graduation ceremony does not establish entitlement to a degree. The actual degree award does not take place until the University completes its degree audit. Degree requirements are reviewed at the end of the expected completion term indicated. If all requirements are met, the degree will be conferred within 30 days of the end of the term. Diplomas are mailed (to graduates without financial holds), generally within 45-60 days after the end of the term.

Graduation with Honors

**Juris Doctor Honors**

JD students whose cumulative grade point average (GPA) places them in certain categories graduate with honors.

- Top 5%: summa cum laude
- Top 10%: magna cum laude
- Top 20%: cum laude

The awards are given to the entire class that graduates in an academic year, full-time and part-time students combined. The awards are announced at the end of the academic year. Once the awards are announced and posted by the College of Law and the University Student Records Office, the awards are not affected by any subsequent grade changes.

Students who transfer to the College of Law after they complete first-year coursework at another law school are eligible for graduation honors. Grades earned at a transfer student’s prior law school are included in the GPA computation for honors eligibility. Grades earned when students visit another law school after their first year are included in the GPA for honors eligibility if they take 12 or more credits at another law school.

**Order of the Coif**

JD graduates who rank in the top 10 percent of their class will be elected by the faculty to the Order of the Coif. Coif awards are announced in the Summer at the end of the academic year. Once announced and posted by the University Student Records Office, the awards are not affected by any subsequent grade changes. The rules for honors awards for transfer students also apply to election to Order of the Coif.
**Graduation and Certificate Application**

Graduating students must apply online for degree conferral in Campus Connection by June 1 for a July graduation, by October 1 for a December graduation, or February 1 for a May graduation. Once your online application has been submitted, you will be prompted to order your cap and gown and reserve a place for you and your guests at the May commencement ceremony.

Applicants for the JD, JD/joint degree, JD/LLM, and LLM must also submit a paper graduation application. Students applying for a certificate must complete and submit a certificate application, which is attached to the graduation application.

**Graduation, Commencement Ceremony**

Commencement is held annually in May. If a student is short no more than three credits for a degree, the student may attend the commencement ceremony but will not be awarded the degree until the credits are completed.

**Graduation, Degree Conferral**

Final certification of degrees is completed by Student Records thirty days after the conferral date.

In dual degree programs authorized by the colleges, the degrees will be conferred simultaneously.

Academic records will be locked upon degree conferral. Under no circumstances will changes be made to the academic record after degree conferral.

If the student begins a new program of study at DePaul, the student's GPA will be restarted. The one exception to this rule involves Masters' students whose DePaul Master's Degree is accepted to meet DePaul's PhD requirements either in the same or a new field. In this instance the GPA in the PhD program will include the GPA from the DePaul Master's Degree.

**Combined Bachelors/ Masters Degree Program**

Students combining a Masters degree with a Bachelors degree in an approved DePaul Combined Bachelor's/Master's Program will restart their GPA at the beginning of their graduate career.

**JD/ LLM Program**

In the case of students who are accepted into the joint JD/LLM program, the students' GPA in the LLM program will include the GPA from the JD program. Students who have completed the JD degree and are independently pursuing the LLM degree will have their GPA restarted.
Guided Research

Students who wish to register for Guided Research must make supervisory arrangements with a full-time faculty member. A student must have completed a minimum of 28 credit hours with a cumulative GPA of at least 2.0. Guided Research is offered for either one or two credits and is graded pass/fail. Guided Research does not fulfill the JD advanced writing requirement.

To register for Guided Research, a student must obtain written approval from the supervising faculty member and the Associate Dean for Student Affairs. Guided Research forms are available on the College of Law website. Completed forms should be turned in to the Office of Student Affairs.

College of Law Honor Code

All College of Law Students are expected to abide by the University Code of Student Responsibility. The College of Law Honor Code supplements the Code of Student Responsibility and Academic Integrity Policy of DePaul University.

§ 1. Presumption of Knowledge of the Honor Code

All students are conclusively presumed to know the provisions of the Honor Code. Lack of familiarity with the Code shall not constitute a defense to an alleged violation.

§ 2. Standard of Responsibility

A student is responsible for an act or omission deemed to be a violation of the Code if the student knew or should have known that there was a high probability that the act or omission would be found to be a violation of the Code.

§ 3. Unprofessional Conduct

A student violates the Code if the student engages in any conduct related to the student’s academic career that is inconsistent with the standards of honesty expected of a member of the legal profession, as defined by the American Bar Association’s Model Rules of Professional Conduct. Such conduct includes, but is not limited, to the following:

Application for Admission

It shall be a violation of the Code for any student to fail to disclose, or to make a false statement of, a material fact on his or her law school application. A fact is material if it would reasonably have been considered as a factor in the decision whether to admit the student. It shall also be a violation of the Code for a student to fail to update and amend his or her law school application to disclose material facts that arise from the date he or she applies to the College of Law through matriculation and graduation. The obligation of truthfulness and accuracy is a continuing obligation and extends beyond the filing of any application.

Examinations

With respect to examinations, students shall be presumed to know all applicable exam rules and it shall be a violation of this Code to do or attempt to do any of the following:

a. Obtain or receive unauthorized information concerning the content of an examination prior to the examination;

b. Seek or voluntarily receive unauthorized aid in any manner from any source with respect to any
Required Course Work, Assignments, and Other Academic Exercises

With respect to any work done in conjunction with and/or required by any course for academic credit, including Independent Study, Guided Research, Legal Writing, seminars, or any other academic exercise, the student shall be presumed to know all applicable rules governing an assignment and it shall be a violation of this Code to do any of the following:

a. Engage in any act prohibited by the instructions governing an assignment;
b. Submit as one’s own, and without appropriate citation, writings or ideas of another, including those prepared by another student;
c. Submit for credit work not originally prepared for the course for which it is submitted, without explicit permission of the instructor of the course obtained after the instructor has been advised of the origins of the work.

"Academic exercise" refers to any work constituting a basis upon which a student will be evaluated to earn credit or other College of Law honors including, but not limited to, examinations, research papers (including topic proposals, outlines, and drafts), other writing assignments, oral presentations, work done for credit in clinical programs or on law journals and work performed in any moot court or other competition sponsored or conducted by the College of Law.

Plagiarism

The University Code of Student Responsibility defines plagiarism as a major form of academic dishonesty involving the presentation of the work of another as one’s own. Plagiarism includes, but is not limited to, the following:

a. The direct copying of any material, computer files, recordings, video programs or musical scores, in whole or in part, whether published or unpublished, without proper acknowledgement that it is someone else’s;
b. Copying of any source in whole or part with only minor changes in wording or syntax, even with acknowledgement;
c. Submitting as one’s own work a report, examination paper, computer file, lab report or other assignment that has been prepared by someone else including, research papers purchased or acquired from another person or entity;
d. The paraphrasing of another’s work or ideas without proper acknowledgement.

Plagiarism, like other forms of academic dishonesty, is always a serious matter. If an instructor finds that a student has plagiarized, the appropriate penalty is at the instructor’s discretion. Actions taken by the instructor do not preclude the College of Law from taking further punitive action under the Honor Code.

§ 4. Theft and Unauthorized Use of Property

It shall be a violation of the Code to do any of the following:

a. Damage, hide or otherwise exert unauthorized control over any library property or class-related materials including, but not limited to, all DePaul University library materials;
b. Damage, hide or otherwise exert unauthorized control over property belonging to another student, a faculty member or a student organization; or
c. Use for unauthorized purposes University equipment or services including, but not limited to, photocopying machines, mailroom facilities and computer research or word processing equipment.

§ 5. Conduct Relating to Career Services

With respect to students seeking employment, whether permanent, part-time or as an extern, it shall be a violation of the Code to do any of the following:

a. Furnish to any person information known to be false which is related to the student’s academic record or which concerns activities related to the College of Law; or
b. Misrepresent another student’s academic record or otherwise make comment known to be false about another interviewee to any prospective employer.

§ 6. Obstruction of Honor Code Proceedings

With respect to any proceeding before the Academic Integrity Hearing Board, it shall be a violation of the Code to do any of the following:

a. Testify falsely;
b. Fail without just cause to appear at any hearing pursuant to a request issued by the Board;
c. Give false information to the presenter; or
d. Harass any person who provides information or testimony pertaining to a violation of this Code or who participates in the enforcement of this Code.

§ 7. Failure to Report Violations

It shall be a violation of the Code for a student to fail to report any suspected violation of the Code where such student has reasonable grounds to believe that such a violation has occurred.

If a student is the subject of a pending Honor Code proceeding, that student shall not be granted a degree. Every reasonable attempt shall be made to expedite proceedings in the case of a student who has applied to graduate.

§ 9. Procedures for Obtaining Information

Non-Examination Violations

Persons, other than examination proctors, who have information about a possible Honor Code violation of any kind by a law student shall, as soon as possible, notify the Office of the Dean and the Associate Dean for Student Affairs in writing of the facts and circumstances. If the person possesses any materials that may become exhibits, the person should give those materials to the Dean and the Office of the Assistant Dean.

Examination Violations

1. Procedures During Examinations
If an examination proctor witnesses conduct which the proctor believes to be a violation of the exam rules, the proctor shall immediately verbally notify a dean, exam coordinator, the professor of that class or the professor’s delegate. Once the proctor provides verbal notice of an alleged violation, the dean, professor or professor’s delegate may confiscate any improper materials and advise the student to discontinue talking or otherwise continue violating exam rules. Confiscated materials shall be transferred to the Office of the Associate Dean for Student Affairs. Students who allegedly violate exam rules shall be permitted to finish the exam during the allocated time.

2. Procedures After the Examination
As soon as possible after the proctor gives verbal notice to a dean, exam coordinator, professor or professor’s delegate, the proctor shall, in a signed report, describe the alleged violation. The report should include a physical description of the student or students alleged to be involved in the violation and of the acts that constitute the violation. If possible, the student’s anonymous number shall be given as soon as possible after the exam to one of the deans of the College of Law. When a professor, the professor’s delegate or a dean is informed of the alleged violation, that person shall notify the Office of the Student Affairs forthwith in writing.
Immunization, Proof of

DePaul University complies with Illinois Public Act 85-1315, effective July 1, 1989, which requires post secondary institutions to submit an annual report on student immunization. Illinois law requires that all students, born on or after January 1, 1957 and enrolled half-time (Undergraduate: 6 hours, Graduate: 4 hours) or more at a post-secondary institution, provide proof of immunization for the following: Tetanus/Diphtheria, Measles (Rubeola), Mumps and Rubella (German Measles). Illinois law requires that universities prevent students from registering for any subsequent terms if proof of immunization is not provided.

Please consult the Admission website for additional information.

Independent Study

Independent Study permits a student to pursue an area of interest in-depth under the supervision of a full-time faculty member. The student must produce a research paper of publishable quality on a topic not substantially covered by a currently-offered course. Independent Study fulfills the JD advanced writing requirement. A student may enroll for a maximum of two independent studies during law school.

To register for Independent Study, a JD student must have completed 28 credit hours and have at least a 3.0 cumulative GPA. The student must make supervisory arrangements with a full-time tenured or tenure-track faculty member with expertise in the student's area of interest. Application forms for Independent Study are available on the College of Law website. Completed forms should be turned in to the Office of Student Affairs.

Recording Class Sessions and Events

Classes may be recorded only with the permission of the instructor.

Students with disabilities who must record classes as an accommodation for their disability should make arrangements with the University Center for Students with Disabilities.

Members of student organizations and journals wishing to video or audio record events, including panels, discussions and presentations, must obtain approval from the designated faculty advisor or the Associate Dean for Student Affairs.

Registration and Credit Limits

Registration takes place according to a schedule pre-arranged in advance by the University Office of Student Records. A student’s enrollment date is based on seniority according to the number of cumulative credits earned. Registration for the Summer and Fall semesters takes place in the Spring. Registration for the Spring semester takes place in the Fall. Students must use Campus Connect to register, add or drop a course.
Add/Drop Deadlines

Once registration begins, it remains open until the end of the add/drop period, which is two weeks after the beginning of each semester.

Course Changes after Add/Drop Deadline

A class may not be added after the last day to add a class deadline, which is published in the Academic Calendar of the College of Law. A student shall not receive retroactive credit for any work completed by the student. A student must register in advance, within the applicable registration period, to receive credit for any work completed.

A student may withdraw from a class on Campus Connect up until the end of the eighth week of the semester (the withdrawal deadline). Thereafter, a student who wishes to withdraw from a course must contact the College of Law Office of Student Affairs to request approval for a late withdrawal. Simply not attending class does not constitute a withdrawal.

For any course dropped after the deadline to drop a class, but before the withdrawal deadline, a grade of "W" will appear on the student's transcript. For any course that is approved to be dropped after the withdrawal deadline, a grade of WA ("administrative withdrawal") will appear on the student's transcript. W and WA grades do not affect the student's GPA.

Deadline for Tuition Refunds

Students withdrawing from a course at a date which is after 20% of the scheduled term will not receive any tuition refund. The deadline is published in the Academic Calendar for the College of Law.

Non-Classroom Credit Hours: 12-Credit Limit

With the exception of students enrolled in the Third Year in Practice (3YP) program, a JD student may earn a maximum of 12 credit hours for non-classroom courses, most of which are graded pass/fail. Courses that count toward the 12-credit non-classroom limit include: the Journal of Art, Technology & Intellectual Property Law Editorial Board; the Business & Commercial Law Journal Editorial Board; Field Placement; the Health Care Law Journal Editorial Board; the Law Review Editorial Board; The Journal of Social Justice Editorial Board; The Journal of Sports Law and Contemporary Problems Editorial Board; National and International Moot Court Competitions; Guided Research; LARC and ASP TA's and Independent Study. With the exception of Independent Study, all of the above courses are graded pass/fail.

Distance Education Credit Limit

ABA rules specify that JD students may earn a maximum of 15 credit hours toward the JD degree for distance education courses. The College of Law offers both fully online and hybrid courses. A hybrid course is a course in which some, but not all, of the instructional time is online. All fully-online courses, and some hybrid courses, qualify under the ABA rule as distance education courses.

Journal and Competition Registration

Subject to the limitations set forth above, JD students may earn a maximum of 12 hours of Journal and Competition credit while enrolled in law school.

In order to receive journal credit, students must obtain a permission slip, have it completed by the supervising member of the faculty and turn in the completed slip to the Office of Student Affairs.

In order to receive course credit for participating in moot court, trial team, or transactional competitions, students must obtain permission from the Associate Dean for Experiential Education prior to the expiration of the add-drop period for the semester in which the competition will take place. All participants in competitions must register for credit unless the competition is one for which credit is not granted. Students may not receive Guided Research credit for participation in a competition.

Journal and competition credit will not be awarded if the appropriate registration is not completed.

Auditing Classes

A JD or LLM student may audit a course only if the student registers to do so with the Office of Student Affairs.

The following courses may not be audited: courses required for graduation, advanced writing courses, litigation skills courses, practice skills courses, clinics, externships, guided research, independent study and non-classroom pass/fail courses.
An auditor does not receive a grade in or credit for the course. Students may not convert from auditing to graded status or vice versa. A student who has audited a course may not thereafter take that course for credit. A person not enrolled as a student at the College of Law may audit a course only with the permission of the Associate Dean for Academic Affairs.

To register to audit a course, students register for the class via Campus Connect and file a request form in the Office of Student Affairs.

**Minutes of Instruction**

In accordance with ABA standards, the College of Law requires 700 minutes of instruction time per credit. Under the College of Law’s semester system, classes are offered in units of 50 minutes of class time per credit.

---

**Registration, Student Enrollment Classifications**

**Enrollment Reporting Classifications**

Credit is accumulated on the basis of semester hours:

**Full-time Student Status**

- For JD Day students a twelve semester hour course load is considered full-time (6 semester hours for summer study).
- For JD Evening students a nine semester hour course load is considered full-time (6 semester hours for summer study).
- For LLM students a twelve semester hour course load is considered full-time.

**Half-time Student Status**

- For JD Day students a six semester hour course load is considered half-time (3 semester hours for summer study).
- For JD Evening students a six semester hour course load is considered half-time (3 semester hours for summer study).

**Law Maximum Credit Hours**

Upper level full-time students may register for a maximum of 16 credit hours per semester. After their third semester, part-time students may register for a maximum of 12 credit hours per semester.

**Law Minimum Credit Hours**

First-year full-time JD students take 14 credit hours per semester. First-year part-time JD students take 10 credit hours per semester.

Full-time JD students must take a minimum of 12 credit hours per semester except that full-time graduating seniors in their final semester need only take the number of credit hours necessary for them to graduate. Part-time JD students must register for a minimum of nine credit hours per semester except that graduating seniors need only take the number of credit hours necessary for them to graduate.
Required Courses & Prerequisites

Students must take all required courses at the time prescribed and in the sequence designated by the College of Law. First-year JD students may not drop required courses or take reduced class loads unless there are extraordinary extenuating circumstances and the student obtains the consent of the Associate Dean for Student Affairs. Required courses must be taken at DePaul and cannot be taken at another law school, with the exception of students who transfer to DePaul after their first year.

Some courses have mandatory prerequisites. Prerequisites must be completed before a student may enroll in those courses. Students may not take a course and its prerequisite course simultaneously.

Requirement Term

A student will complete the law program requirements in place at the time of the student's first enrollment term in that program. A student who changes programs while his/her studies are in progress will complete the requirements in place at the time he or she enrolls in the new program.

A student who changes programs during a break between terms will follow the requirements in place for the term immediately following the break.

A student who applies for readmission will be subject to the program requirements in place in the enrollment term of readmission.

Other Information

A student currently enrolled in a degree program in which revisions are approved while their studies are in progress may elect to formally adopt the revised requirements.

Requirements, Curriculum

Official changes in courses, course numbers, titles, descriptions, and prerequisites and minor changes in program requirements may be made on a quarterly basis.

Multiple changes or thorough revisions in the requirements of a program, major, or concentration or the addition of new majors or concentrations which have received the required university approvals may be made twice each year. Changes approved by May 15th will be effective for the Autumn term, and those by October 15th will be effective for the Winter/Spring/Summer terms.
Rule 711 License - Senior Law Student Certification

Upon completing 43 credit hours (one half of the credits required to graduate), a JD student may obtain an Illinois Supreme Court Rule 711 License to practice law under the terms and conditions set forth in the Rule. Licenses are available only for students who perform legal services for government agencies or not-for-profit organizations.

A student may apply for the license at the end of the semester in which he or she completes the requisite number of hours; however, the license cannot be processed until grades for those hours have been submitted, which occurs either in late January (Fall semester), late June (Spring semester), or mid August (Summer term). The link to the Court's application form is on the law school website on the Student Resources page. Completed applications (including the supervising adviser's signature and the required photograph) should be turned in to the Office of Student Affairs. The application will be forwarded to the Administrative Office of the Illinois Courts, which issues the license and mails it to the student. Processing time is three to six weeks.

Study Abroad Programs Other than DePaul Programs

Enrolling in a semester or summer abroad program offered by a school other than DePaul is strongly discouraged. A student must have a minimum GPA of 3.00 to attend a summer study abroad program sponsored by another law school.

If a student wishes to attend a program sponsored by another law school, the Associate Dean for Academic Affairs must approve the request. The student must submit a cover letter to the Associate Dean requesting permission to study abroad, together with copies of the course descriptions of the courses the student proposes to take and the number of credits each course is worth. The cover letter must explain why the student's goals cannot be attained by studying in one of the DePaul-sponsored programs. Differences in curricula or locales between the programs offered by DePaul and those of other schools will not, without more, justify participation in another school's program.

If the Associate Dean for Academic Affairs approves the request, the student must request a letter of good standing from the Associate Dean for Student Affairs through the College of Law website. The student will pay a nonrefundable fee for each letter of good standing.

If a student's application for summer study abroad at another institution is approved, the Financial Aid Office may be contacted to arrange a consortium agreement between DePaul and the other law school. Once a consortium agreement is entered into, loan funds granted by DePaul may be used to pay tuition charges for the summer abroad program.

After a student completes the program, he or she must order an official transcript from the other U.S. law school (not the foreign school) and have it sent directly to the Associate Dean for Student Affairs. The Associate Dean will forward the transcript to the University Transcript Articulation Office, which will post the credits to the student's transcript. The transcript will not list grades. Instead, all courses will be listed as “T” or transfer.

A maximum of seven credits may be earned during a summer program sponsored by another law school. Credits will only be awarded if the program is approved by the American Bar Association. Grades earned in another law school's summer abroad program do not count toward a student's DePaul GPA and do not satisfy Certificate requirements.
Transcripts

The Office of Student Records processes official transcript requests for DePaul University. Official transcripts can be requested on-line through Campus Connect.

The Family Educational Rights and Privacy Act of 1974 prohibits release of confidential transcript information without the student's authorization.

Transcripts will be issued only after the student has fulfilled all financial obligations to the University.

Tuition

All tuition and fees are due to DePaul University by the published tuition due date for that term. All charges must be paid in-full by the payment date.

Tuition charges for any course registrations made after the due date must be paid in full within 24 hours of registration.

Tuition bills may be accessed online through Campus Connect. The student will be required to sign up for E-Bill to access their bills or to grant access to a guest user.

Students whose accounts show a balance due after the tuition due date will be subject to a late fee and prohibited from future registration, receiving transcripts and other university services.

Withdrawal

A. Withdrawal from a class:

Students who must withdraw either from a course or from the University may do so by using the University's web registration system. Students unable to use the web registration system should contact their home school/college office, whether in person or by phone. Withdrawals processed via the web or through direct contact with the home school/college office are effective the day on which they are made. Simply ceasing to attend, or notifying the instructor, or nonpayment of tuition, does not constitute an official withdrawal from class and will result in academic as well as financial penalty.

B. Withdrawal from all classes:

1. Withdrawal from the university:
   In most cases, students wishing to withdraw from the university during a term must fill out an on-line form (whether from home or in the school/college office) and submit it to the student's home school/college. Students who are physically unable to contact the university may designate someone to act on their behalf. The student's official withdrawal date will be the date the form is received by that office.

2. Students who appear to be eligible to enroll but don't register.
   A student's status at the university will be changed to "discontinued" if:
   1. There is no activity for three consecutive quarters (or for Law two semesters), excluding summers. In these cases students must seek readmission.
   2. No progress has been made towards their degree for three consecutive terms, excluding summers. (Candidates for theses and students on year-long study abroad programs are excluded from this rule.) In these cases, students must meet with a college academic advisor to get permission to register and or readmission.

C. Leave of Absence
These come under three headings: personal, military, and medical. The Music and Theatre Schools already have leave of absence policies in place.

Any student wishing to take a leave of absence must complete a “Leave of Absence Application.” Students may complete the online form from home, or by visiting their home school/college office.

Military: Students called for military service should fill out an online “Military Leave Form.” Upon their return, they will meet with an academic advisor to discuss resuming their studies.

Non-military leaves of absence are for at most one year and non-renewable during the student’s career. Military leaves are variable depending on their orders.

D. Graduation Separation

Students must have completed all requirements by the last day of term for which they apply for degree conferral. In the normal course, students will receive their diplomas 8-10 weeks after the date of degree conferral. The university’s responsibility is to confer the degree and identify the student as “graduated” within 30 days of the end of the term in which they complete all the requirements for their degree.

E. Late Withdrawals and Additions

1. Decision-making for late withdrawals resides primarily in the Withdrawal Appeals Committee, chaired by the Dean of Students, for personal/medical issues; and in the School/College Offices for all other issues. These principles underlie the decision-making processes:

   1. All policies are driven by academic concerns.
   2. Decisions are guided by the best interests of the students.
   2. Decisions will be made in compliance with federal regulations.

2. Restrictions on requesting approval for late withdrawal

   Requests for late withdrawals from one or more courses in a given quarter must be submitted to either the student’s home School/College Office or the Dean of Students Office, depending on the situation that led to the requested withdrawal by the following deadlines:

   - For Undergraduate/Graduate:
     - Autumn Quarter: Last day of the last final exam of the subsequent winter quarter.
     - Winter Quarter: Last day of the last final exam of the subsequent spring quarter.
     - Spring Quarter: The end of the second week of the subsequent autumn quarter.
     - Summer Terms: Last day of the last final exam of the subsequent autumn quarter.

   - For the College of Law:
     - Fall Semester: Last day of the final exam period for the fall semester.
     - Spring Semester: Last day of the final exam period for the spring semester.

   - For College of Law Students filing a late withdrawal appeal in the Fall or Spring semester of the first year of law school must request withdrawal from all classes.

   College of Law Specific Withdrawal & Leave of Absence Policies

   During their college career, students may be allowed one medical/personal approved administrative withdrawal and one college office approved withdrawal. Each for one or more courses in a single term.

   For College of Law, the deadline for filing a request for a leave of absence is the 4th day of the first term. Students must request withdrawal and leave of absence from all classes.

   To withdraw or transfer from the College of Law in good standing (either during or between semesters), a student must file a request online on the University Campus Connection website and send an email to the Associate Dean for Student Affairs. If the student seeks to withdraw during a semester, the student must see the Registrar in the Office of Student Affairs to drop all courses for which the student registered.
In the event that a student withdraws from the College of Law before the end of his or her first semester, or if the student is continuously absent for more than two years, the student will be deemed a new applicant in the event that he or she wishes to return and will be required to comply with all the steps and procedures required of all new applicants to the College of Law.

**Withdrawal From the College of Law While Not in Good Standing**

A student may withdraw while not in good standing if the student submits a request online to the University Campus Connection website and a written request to the Associate Dean for Student Affairs. However, if the student withdraws from classes while not in good standing, the student will be dismissed for academic deficiencies at the end of the academic year. If the student thereafter desires to return to the College of Law, he or she must follow the readmission procedures.

**Withdrawal, Tuition**

Students must withdraw from classes through the registration function in Campus Connect. Students unable to use the web registration system should contact their home school/college office, whether by email, in person, or by phone. Withdrawals processed via the web or through direct contact with the home school/college office are effective the day on which they are made. Simply ceasing to attend, or notifying the instructor, or nonpayment of tuition, does not constitute an authorized withdrawal from class and will result in academic as well as financial penalty.

When the withdrawal occurs, the tuition charge for courses during a semester will be reduced according to the following schedule, in accord with the tuition package:

<table>
<thead>
<tr>
<th>Percentage of Term</th>
<th>Refund Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 20%</td>
<td>100% refund</td>
</tr>
<tr>
<td>After 20% of the term</td>
<td>0% refund</td>
</tr>
</tbody>
</table>

Even if you have tuition charges reduced, you will still be responsible for the non-refundable $25 registration fee, the new student fee, and college office deposits.

**Notes**

- Students receiving financial aid are advised to contact a Financial Aid Counselor to discuss the consequences of a withdrawal impacting academic progress and aid eligibility at DePaul University or any other school to which they may transfer. Students in university housing are advised to contact Housing to discuss the consequences of withdrawal impacting eligibility to maintain residence.
- Students who are enrolled in fully online programs and reside in the State of Maryland are subject to a refund policy that complies with the policy established by the Maryland Higher Education Commission COMAR 13B.05.01.10.
- Students who are enrolled in fully online programs and reside in the State of Wisconsin are subject to a refund policy that complies with the policy established by the Wisconsin state legislature in Wisconsin Administrative Code Educational Approval Board (EAB) Chapter 8.05.

**University Resources**

This section provides information on an array of university resources, all designed to help you make the most of your experience at DePaul. We encourage you to read through this whole section when you arrive at DePaul, and then refer back to individual pages for information on specific resources as you need them.
Adult, Veteran and Commuter Student Affairs

Through collaborations with university and external partners, the Office of Adult, Veteran and Commuter Student Affairs assists students in their transition to college, provides support, resources and programs that help students persist and succeed academically, and works to promote an environment that is inclusive of the non-traditional student experience in which adult, veteran and commuter students can thrive as engaged members of the DePaul community.

Career Center

The Career Center at DePaul University offers DePaul students and alumni dynamic connections to the workplace, providing comprehensive one stop career services. No matter where you are in your career search, whether it's deciding on a major or career path, making a career change, or preparing for your first job interview, we can help.

- Explore career options whether you are just starting your job search or are looking for a change.
- Get career and graduate school advice and resources from specialists in your field. Our career advisors are available to meet one-on-one with you to discuss your needs.
- Gain experience and earn academic credit with an internship through the University Internship Program.
- Find a job with one of the thousands of employers who recruit DePaul grads.
- Connect with DePaul alumni for career-related networking and mentoring.

The Career Center is located at DePaul's Lincoln Park Campus in SAC 192 and at the Loop Campus in DePaul Center 9500. Students may contact the office at (312) 362-8437 for appointments, or visit careercenter.depaul.edu for additional information.

Law Career Services

The Office of Law Career Services is located on the third floor of the Lewis Building, in the College of Law Student Services Suite. The counselors in the Law Career Services Office advise students and alumni on all aspects of the job search process and assist them in defining and achieving their career goals. Students are assigned to an individual advisor to ensure that students have a constant resource available to them.

Center for Students with Disabilities

The Center for Students with Disabilities (CSD) coordinates DePaul University's provision of accommodations and other services to students with disabilities pursuant to the Americans with Disabilities Act and Section 504 of the Rehabilitation Act. CSD regularly works with students diagnosed with a range of disabilities such as learning disabilities, AD/HD, medical conditions, chronic illness, mental health disorders, and physical/visual disabilities, amongst others. Student success is at the core of the CSD's mission and fits integrally with DePaul University as a diverse learning community.

Students are encouraged to enroll with CSD to receive accommodations and additional support services. CSD students are enrolled in all Colleges and Schools at DePaul, and may be full-time, part-time, undergraduate, or graduate level students. Some accommodations and services may include extended time on exams, assistance with note-taking, adaptive equipment, real-time captioning, classroom accommodations, advocacy, and assistive technologies amongst other support services.
CSD enrollment procedures require appropriate documentation of a student's disability and other identified information, as well as a personal meeting with CSD staff.

CSD is also a resource for faculty and staff who may have questions about accommodating, or otherwise working with, students with disabilities.

CSD has two full-service office locations:
Lincoln Park Campus, Student Center 370, 773/325-1677
Loop Campus, Lewis Center 1420, 312/362-8002

For more information, please view the Center for Students with Disabilities website http://offices.depaul.edu/student-affairs/about/departments/Pages/csd.aspx or contact staff at csd@depaul.edu.

Dean of Students Office

The Dean of Students Office is an invaluable resource, advocate and support for providing and identifying resources and services for students. The office helps individuals in navigating the university, particularly during difficult situations, as in personal, medical, mental health, and/or family crises. The Dean of Students Office is also responsible for overseeing the Code of Student Responsibility and managing the Student Conduct Process.

Additional information is available from the Dean of Students Office http://offices.depaul.edu/student-affairs/about/departments/Pages/dos.aspx

College of Law Office of Student Affairs

The College of Law Office of Student Affairs is located in the Student Services Suite on the third floor of the Lewis Building. The Office of Student Affairs and the Associate Dean for Student Affairs provide invaluable services to law students including academic and personal advising and assistance with registration, examinations, and letters of good standing, among other matters.

Additional information regarding the College of Law Office of Student Affairs is available at www.law.depaul.edu/student_life.

DePaul Central

DePaul Central is your one-stop shop for help managing Financial Aid, Student Financial Accounts and Student Records. DePaul Central ensures student issues are resolved in a timely manner and with the right level of attention and care they deserve so students can focus on what really matters: their academics.

- Visit with DePaul Central staff:
  - Lincoln Park: Schmitt Academic Center 101, 2320 N. Kenmore Avenue
Financial Fitness

Financial Fitness provides free services, resources and tools to help students manage costs from freshman year through graduation and beyond. Services include:

- Confidential one-on-one financial counseling
- Accessible written and online resources and tools

Additional information is available from the DePaul Central office. Financial Fitness is located within DePaul Central's Lincoln Park Campus in SAC 101. Students can get additional information by visiting the website http://financialfitness.depaul.edu or calling (773) 325-8640.

Health Services

The DePaul Student Health Service is offered through Presence SAGE medical group. It is available to all enrolled students for a fee. If you live in a residence hall, with the exception of 1237 West Fullerton or University Center, you are automatically enrolled in DePaul Student Health Services.

Student Health Service is NOT health insurance; you may need additional coverage.

Additional information is available from the Office of Health Promotion and Wellness http://offices.depaul.edu/student-affairs/support-services/health-wellness/Pages/health-services.aspx.

Housing Services

The Department of Housing Services provides facilities and services that create the premiere residential experience at DePaul University. Grounded in DePaul University’s Vincentian values and distinguishing marks, staff of the department of Housing Services administer the processes for living on campus and partner with others in promoting this experience. We strive to provide exceptional services within our high-quality, residential facilities while also encouraging residents’ personal growth and community responsibility.

For more information, visit http://offices.depaul.edu/housing.
Libraries

The University Library provides information resources and services to students, faculty, and staff at three library locations: the John T. Richardson Library in Lincoln Park, the Loop (DePaul Center) Library, and the Vincent G. Rinn Law Library. The suburban campuses have access to the full array of electronic resources provided by the Library as well as delivery service for print materials. E-journals, e-books, and scholarly databases in the humanities, business, social sciences, computer science and other sciences, are available remotely as well as on campus, notably in the new Information Commons in the Richardson Library. Print book and journal collections in the two Chicago campus libraries may be supplemented with direct borrowing from other Illinois libraries through the I-Share system and outside Illinois through the ILLiad inter-library loan system. Librarians provide research support and research skills instruction in person and via the online “Ask a Librarian” email and IM chat reference services.

Additional information is available from the DePaul University Library.

Vincent G. Rinn Law Library

The DePaul University College of Law Library occupies the 4th through 6th floors of the Lewis Center, located at 25 E. Jackson Blvd. The law library entrance is on the 5th floor. As a participant in the Federal Depository Library Program, DePaul's Rinn Law Library is open to the public.

For additional information on the Rinn Law Library, visit www.law.depaul.edu/library.

Office of Multicultural Student Success

The Office of Multicultural Student Success seeks to cultivate academic success and personal development for students of color, low-income college students, or first generation college students through sustained developmental programming, financial resources, and advocacy.

Additional information is available from the Office of Multicultural Student Success http://offices.depaul.edu/student-affairs/about/departments/Pages/omss.aspx.

Student Affairs

The Division of Student Affairs provides programs and services that are a direct extension of DePaul University's mission to emphasize skills and attitudes that educate students to be lifelong, independent learners. Student Affairs contributes to the DePaul student experience by cultivating learning opportunities that inspire students to explore their personal identities, faiths, values and roles in a multicultural world. Through the division's diverse offering of programs, leadership opportunities and quality support services, Student Affairs seeks to create an environment that fosters students' overall development and reduces barriers to enable students to reach their highest potential.

College of Law Student Affairs

The College of Law Office of Student Affairs is located in the Student Services Suite on the third floor of the Lewis Center. Additional information regarding the College of Law Office of Student Affairs is available at www.law.depaul.edu/student_life.
Student Involvement

The Office of Student Involvement fosters student learning and success by providing opportunities for engagement through a wide variety of campus activities and organizations, holistic and intentional advising of student leaders, and the development of purposeful and mutually beneficial partnerships across the University and City of Chicago to maximize access to resources for a rich DePaul campus experience.

Additional information is available from the Office of Student Involvement http://offices.depaul.edu/student-affairs/about/departments/Pages/student-involvement.aspx

Technology Resources

The following list introduces some of the technology resources that are available to students at DePaul. Additional information is available on the Information Services website (is.depaul.edu).

Campus Connect

Campus Connect provides access to many of DePaul's primary services, including course registration, grades, tuition billing, transcripts, Demon Express and much more.

Computer Labs and Classrooms

There are many technology-enabled classrooms across the DePaul campuses. Technology resources in these rooms include desktop computers, LCD projectors, connections for laptops, and integrated, amplified sound systems. Specialty rooms exist across the university for classes with specific needs, and additional technology is available upon request.

DePaul also has computers available for use by students, faculty or staff, located in computer labs, lounges and lobbies across the campuses. Additional technology access is available to residence hall students; each residence hall is outfitted with study lounges allowing for student access to computers and printers at any time.

CTA U-Pass

Your CTA U-Pass provides unlimited rides on the CTA bus and rail systems during an academic term. It also functions as a Ventra card, allowing you to add funds to be used during university breaks. All students meeting the requirements are automatically enrolled in the program. If your eligibility changes before the last day to drop courses, your U-Pass will be adjusted accordingly.

U-Pass pick-up dates are held at the beginning of each quarter. Students must pick up CTA U-PASS cards in person, by presenting a valid DePaul ID Card. Your Ventra U-Pass is valid for 4 years. It will be deactivated and reactivated each quarter based on your enrollment. Do not discard your U-Pass, or you will be assessed a fee by the CTA for a replacement card.

Full details regarding the U-Pass can be found on the DePaul U-Pass website http://upass.depaul.edu/.

DePaul ID Card

Your DePaul ID Card serves as your identification to enable access to various DePaul buildings, computer labs, printers, and libraries and is used to purchase items using your Demon Express account and meal plan. You must have your ID Card on hand while on campus. New students receive their ID Card at student orientation. Students can also visit ID Services to obtain an ID card.

Demon Express

Demon Express is a prepaid debit account that is linked to your DePaul ID Card. Demon Express can be used at DePaul cafeterias, coffee shops, campus bookstores, libraries, printers, copiers, and other areas.
Desire2Learn (D2L)

D2L is an electronic course management system that enables interaction between students and faculty. D2L incorporates document sharing, discussion boards, e-mail, an online grade book, assignment drop boxes, chat rooms, small group areas, online quizzes, and more. To log in, use your Campus Connect username and password. If you need assistance using D2L, training is available.

Discounts

Demon Discounts provides discounted goods and services, including computer hardware and software, to DePaul students.

E-Mail

All students are provided a free DePaul e-mail account. Additional information is available on the Information Services website.

Printing

The Intelliprint system allows students to print from DePaul computer labs. Students use their DePaul ID card to pay for prints and are entitled to a set amount of free printing per quarter. Additional funds can be added to Demon Express as needed. You may also print to the Intelliprint system wirelessly.

Residence Hall Technology

Lincoln Park residence hall rooms are equipped with high speed Internet connections, wireless Internet access, and free telephone connections.

Technical Support

The Technology Support Center (TSC) is your first point of contact for technical assistance. TSC provides free assistance via phone, e-mail and web for current DePaul students. We support all DePaul wireless networks, telephones, e-mail accounts and software.

Technology Training

Media Production and Training (MPT) offers free technology training on a variety of topics, including the Microsoft Office suite, both Mac and Windows operating systems, D2L, and more.

Wireless Internet Access

Wireless internet access is available to students on all DePaul campuses.

University Center for Writing-based Learning

The University Center for Writing-based Learning (UCWbL) works with all members of the DePaul University community to support writers and to promote the use of writing in teaching and learning through five major initiatives:

The Writing Center

Peer writing tutors offers DePaul students, staff, faculty, and alumni individualized and small group writing feedback on any type of writing at any stage of the writing process. Tutors provide feedback face-to-face on the
Lincoln Park and Loop campuses, through written feedback via email, and real time online through IM and webcam. The Writing Center also facilitates Writing Groups at the Loop, Lincoln Park, and Suburban Campuses.

**The Writing Fellows Program**

The Writing Fellows Program links undergraduate peer writing tutors with writing-intensive courses across the curriculum -- from physics to journalism, religious studies to computer science. Writing Fellows work with the same set of writers from a particular course for an entire quarter, responding to two of their papers through written comments on drafts and in individual conferences.

**Workshops**

The UCWbL offers both in-class and in-house interactive writing workshops on topics ranging from grammar and usage to thesis development to ePortfolios.

**The Collaborative for Multilingual Writing and Research (CMWR)**

The CMWR is open to all members of DePaul’s community interested in multilingual and cross-cultural interactions. To support English Language Learners specifically, the CMWR hosts a range of enterprises such as conversation opportunities, workshops, and publications.

**Faculty Development**

The UCWbL provides a range of support to DePaul instructors who teach with writing and who are working on their own writing projects.

For more information, please visit www.depaul.edu/writing.

**General Information**

To the University Community,

The Dean of Students Office is committed to partnership in the educational mission of DePaul University. This mission is enhanced by a Code of Student Responsibility, which outlines expectations and standards of behavior for the student community. Any community of more than 23,000 people needs rules. As a DePaul University student, the DePaul Code of Student Responsibility isn’t a list of things you can do wrong; it’s a code designed to protect your rights and those of all DePaul students. Any student who feels that another student in the community has violated their rights is encouraged to use this Code and the Dean of Students Office as a resource.

The Dean of Students Office can be an invaluable advocate and support in identifying resources and services for students. In an institution of such size and complexity it is often difficult to know where to begin when a student is struggling or having difficulty navigating the University setting. This office can be of particular help in areas of personal and/or family crisis, economic distress, or a medical/personal leave of absence. The office serves as principal liaison and resource for students and other divisions and departments within the University community.

Finally, our work with students is guided by the Socially Responsible Leader framework which is grounded in our Catholic, Urban and Vincentian mission. The development of socially responsible leaders in today’s complex, global and ever-changing world requires a campus community that is committed to holistic learning and the fostering of a campus community based on respect. It is our hope that you will make full use of the opportunities to reach your full potential that are available for you at DePaul University. In that regard, the Dean of Students Office is here to serve you with locations on both the Loop and Lincoln Park campuses.

Locations:  
Student Center 307  
Lincoln Park Campus  
(773) 325-7290  
DePaul Center 11001  
Loop Campus  
(312) 362-8066

In emergency situations, the office can also be reached 24 hours a day through our Public Safety Office at (773) 325-7777.

Sincerely,  
Ashley Knight, Ed.D.
Student Rights

As a registered DePaul University student, the DePaul Code of Student Responsibility is designed to protect your rights and those of all DePaul students.

Student Rights

1. The University shall be open to all students who qualify under its admission standards, regardless of race, religion, national origin, age, disability, marital status, sexual orientation or gender. All students have equal right of access to the public facilities and services of the University, in accordance with University policies.
2. Students have the right to their own ideas, beliefs and political associations. Students have the right to ask questions and express their opinions without affecting their academic evaluations, as long as such do not interfere with the normal operations of their classes or infringe on the rights of other students in their classes. Instructors shall evaluate students’ performances without prejudice.
3. A student has the right to a hearing within the established University procedures, in all matters that can result in the imposition of sanctions for misconduct. Usually, a student's status within the University will not be permanently altered until final outcome of any conduct action. However, the University reserves the right to take actions to reasonably ensure safety and security, including removing and/or suspending a student from the University on an interim basis pending final determination of any conduct action.
4. A student duly admitted to and registered at the University has the right to receive a clear and concise written statement concerning academic and nonacademic regulations and commitments made by the University prior to or upon initial registration for classes. A student also has the right to be advised of any changes in such matters.
5. Students have the right to join associations and are free to promote their common interests. This includes the right to become affiliated with any recognized student organization without discrimination or prejudice regarding race, color, ethnicity, religion, national origin, age, physical or mental disability, marital status, parental status, family relationship status, military status, sexual orientation, sex, gender, or other status protected by local, state, or federal law in its education settings, although fraternities and sororities are exempt from the restriction of discrimination due to gender.
6. Students have the right to participate in the governance of the University through the Student Government Association.
7. Under the guidelines established by the University, students have the right to edit and/or operate the student media.
8. In accord with University policy, for all classroom courses, a syllabus must be distributed in written form beginning on the first day of class. The dean of the college is responsible for implementing the syllabus requirements.
9. Students shall be given the opportunity to be represented at all departmental meetings by at least one full-time student majoring in the appropriate discipline. The student representative shall be chosen annually in accordance with Student Government Association guidelines and shall be a full-time voting member. The student who accepts this responsibility has the moral obligation to attend these departmental meetings.
10. Students shall have the right to vote on search committees that choose academic deans. Membership on such committees shall be achieved through the auspices of the Student Government Association.
11. Students have the right to petition institutional authority for changes in either academic or nonacademic regulations.
12. Students have the right to regular academic advisement. Undergraduate and graduate students have the right to an assigned academic advisor who is available and informed to assist and advise in class selections, to meet academic requirements and career goals.
13. Students have the right of reasonable access to University administrators and faculty during specified office hours.
14. Undergraduate and graduate students (in all colleges but the College of Law) have the right to be informed formally of their academic standing in class by the midpoint of each quarter.
15. Students have the right of protection from University personnel engaging in unreasonable search or seizure unless:

   1. there is probable cause that a violation of University policy is likely to occur, is presently occurring or has occurred;
   2. there is an apparent emergency or danger to self or others;
   3. in order to repair damage to University property;
4. Students’ rights shall always remain subject to the searches of law enforcement officers who are performing their statutory duties in accordance with legally defined procedures governing search and seizure.

Notification of FERPA Rights

Annual Notification for DePaul Students: Your FERPA Rights

We want to take this opportunity to provide you with a summary of your rights under The Family Educational Rights and Privacy Act (FERPA), the federal law that governs release of and access to student education records. Please view Understanding FERPA, a DePaul Central Learning Center video for information and instructions.

Your FERPA rights include:
1. The right to inspect and review your education record within 45 days after the University receives a request for access. If you want to review your record, contact the University office that maintains the record to make appropriate arrangements.

2. The right to request an amendment of your education record if you believe it is inaccurate or misleading. If you feel there is an error in your record, you should submit a statement to the University official responsible for the record, clearly identifying the part of the record you want changed and why you believe it is inaccurate or misleading. That office will notify you of their decision and advise you regarding appropriate steps if you do not agree with the decision.

3. The right to provide written consent before DePaul discloses personally identifiable information contained in your education records, except to the extent that FERPA authorizes disclosure without consent.

Some examples of exceptions include:

- School officials with “legitimate educational interests.” A school official has a legitimate educational interest if the official has a professional need to review your education record in order to fulfill his or her official responsibilities. Examples of people who may have access, depending on their official duties, and only within the context of those duties, include: university faculty and staff, agents of the institution, students employed by the institution or who serve an official institutional committees, and representatives of agencies under contract with the University.

- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer.

- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or state and local educational authorities, such as a state postsecondary authority that is responsible for supervising the university’s state-supported education programs. Disclosures under this provision may be made in connection with an audit or evaluation of federal- or state-supported education programs, or for the enforcement of or compliance with federal legal requirements that relate to those programs. These entities may make further disclosures of personally identifiable information to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, enforcement or compliance activity on their behalf.

- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid.

- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate or administer predictive tests; (b) administer student aid programs; or (c) improve instruction.

- To accrediting organizations in order to carry out their accrediting functions.

- To appropriate officials in connection with a health or safety emergency.

- Information the school has designated as “directory information.”

Directory information may be released without your written consent and includes the following: name, address, e-mail, telephone number, date of birth, college of enrollment, year in school, major, enrollment status (including current enrollment, dates of attendance, full-time/part-time or withdrawn), degrees, awards and honors received (e.g., Dean’s List recognition), participation in officially recognized activities and sports, weight and height of members of athletic teams, photographs (including ID pictures), videos depicting and/or
concerning University life, and previous educational institutions attended. Please note that you have the right to withhold the release of directory information except to the extent that FERPA authorizes disclosure without consent (see #3 above).

To withhold the release of your directory information, you must log into the student portal, Campus Connection, and, under Student Privacy settings, indicate your preference. Please note two important details regarding placing a "No Release" on your record:

1. A "No Release" on your record will prevent your name from being included on lists of students released to honor societies, dean's list and graduation announcements to local newspapers, and enrollment and degree verification to anyone, including potential employers.
2. A "No Release" applies to all elements of directory information on your record.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

For additional information, please consult the U.S Department of Education (http://www2.ed.gov/policy/gen/guid/fpco/ferpa/index.htm/) website.

Questions concerning FERPA should be referred to DePaul Central:

DePaul Central
Lincoln Park: Schmitt Academic Center, 101
Loop: DePaul Center, Suite 9100
Tel: (312) 362-8610 | dpcl@depaul.edu | depaulcentral.depaul.edu

Introduction to the Code/ Policies

A student by voluntarily joining the University community agrees to abide by the standards that have been instituted by DePaul University. Students are responsible for being familiar with all of the policies and procedures included in the Code of Student Responsibility. The Code of Student Responsibility was developed by Student Affairs to give formal recognition to the rights and responsibilities of students at DePaul University and is based on the following principles:

1. The intrinsic value of the person stands above other values. The personal rights and dignity of individuals are to be held inviolate. They take precedence over any academic goal set forth by the University.
2. The student is respected as a responsible person. He or she is, therefore, encouraged to make informed decisions with respect to his or her own education and to be involved in University decisions to the fullest extent possible.
3. The University is by definition a corporation. Just as the individual student has his or her own personal right, so the University, as a corporate person, has an obligation to exercise its rights and privileges in conformity with the laws and procedures governing its actions.
4. DePaul University recognizes that freedom to teach and freedom to learn depend upon opportunities and conditions in the classroom, on the campus and in the larger community. The responsibility to secure and respect general conditions conducive to learning is shared by all members of the academic community. Freedom is meaningless unless responsibility is also present.

The above rights can be exercised effectively and without fear only if they are incorporated into policies and regulations that are as precise and informative as possible, and only if there are adequate procedures to settle disputes that arise in their regard. The Code of Student Responsibility protects students’ rights by making explicit all conduct procedures so that no student may be subject to conduct procedures except in strict adherence to prescribed policies.

As an academic and religious institution, DePaul has a vested interest in both the safety and well-being of the members of its campus community. As a result of the high caliber of individuals DePaul University attracts, the Code of Student Responsibility reflects the emphasis on responsibility in both the academic and nonacademic areas of university life. It is the intent of the Code to provide the necessary guidelines to support and advance the educational and religious aims of the University without unduly restricting or diminishing the university
The Code, together with other applicable University policies, outlines the minimum acceptable level of
conduct expected of every student at DePaul. The policies and procedures outlined are those that students,
faculty and administrators at the University have designed to further the educational and religious aims of the
institution and to assist all students in the pursuit of their educational, personal and social development.

A student by voluntarily joining the DePaul community assumes the responsibility for abiding by the standards
that have been instituted by DePaul. The Vice President for Student Affairs, or his/her designee, maintains
exclusive authority for imposing sanctions for behaviors that violate the Code of Student Responsibility. The Vice
President for Student Affairs, or his/her designee, is also responsible for interpreting and/or implementing
additional University procedures or policies to address issues that are not specifically covered by the various
parts of this Code. University personnel charged with enforcement of the Code will at all times endeavor to
adhere to the intent of fundamental fairness so that each student's concern is addressed in an impartial and
consistent manner.

The University may exercise jurisdiction for an offense committed on-campus. Additionally, the University may
exercise jurisdiction for an offense committed off-campus (including on-line communities) when:

A. The victim of such offense is a member of the campus community (student, faculty or staff); or

B. The offense occurred at a college-sponsored or sanctioned event; or

C. The student used his or her status as a member of the University community to assist in the commission of
the offense (for example student ID card to pass a bad check); or

D. The offense affects the University.

The University's adjudication of any violation of this Code may proceed independently of any action taken by
state, federal or municipal agencies. The University reserves the right to refer incidents of misconduct to civil or
criminal authorities.

This Code is designed to protect the rights of all members of the University community so they can prosper
academically, socially and personally. In order for this Code to work effectively, however, students must take
responsibility for confronting behaviors exhibited by their peers that negatively impact their experiences and
violate established standards of behavior. It is imperative that students work in partnership with University
faculty and staff members to protect the rights that have been afforded them.

DePaul University reserves the right to change policies or procedures maintained herein at any time during a
student's enrollment period provided such changes are updated in the on-line Undergraduate Handbook.
Students and student organizations are advised to read this Code and any other relevant policies carefully so all
are aware of the policies which guide the University in its dealings with them. Students should review the
Academic Policies section of the Undergraduate Handbook or contact their college office for specific information
on the policies used to govern academic expectations at the University.

## Alcohol

### University Policy

DePaul community members owe it to themselves and others to make educated decisions about their use or
distribution of alcohol. The State of Illinois prohibits the sale, use or possession of all forms of alcoholic
beverages by persons under 21 years of age. Students are responsible for adhering to the university Drug Free
Workplace & Legal Drinking Age Compliance policy. Students living on campus should consult the Guide to
Student Housing for additional information about alcohol policies and prohibitions in the residence halls.

### Health Promotion & Wellness

DePaul University expects students to uphold the law when it comes to the purchase and consumption of
alcohol. This institution also seeks to educate students about making safe, responsible decisions when it comes
to substance use. The Alcohol & Substance Abuse Prevention Specialist is the point of contact for all outreach
and initiatives pertaining to responsible substance use. Students who are found responsible for violating DePaul
University’s alcohol policy may be mandated to meet with the Alcohol & Substance Abuse Prevention Specialist
and participate in an intervention called BASICS (Brief Alcohol Screening and Intervention for College Students).
Other students may also request to meet with the Alcohol & Substance Abuse Prevention Specialist and/or participate in BASICS. Students who have concerns about their alcohol use (or someone else’s) may contact the Alcohol & Substance Abuse Prevention Specialist at any time and will not get into trouble for seeking help or information. The Alcohol & Substance Abuse Prevention Specialist can be reached at (773) 325-4550.

Students should be prepared to seek help or call 911 when a peer may be experiencing a drug overdose or alcohol poisoning. Students are expected to take action in such situations and not be a passive bystander. Here are the symptoms of alcohol poisoning, and remember that not all symptoms need to be present for alcohol poisoning to occur:

- Person is unconscious and cannot be roused;
- Person is in a stupor or exhibits confusion;
- Person is vomiting (prop unconscious persons on their sides so that they won't choke on their own vomit);
- Skin is pale, has a blue tinge, and/or skin is unusually cold to the touch;
- Abnormally slow breathing (less than 8 breaths per minute) and/or irregular breathing (a gap of more than 10 seconds between breaths);
- Seizures.

Drug overdoses can vary depending on the drug consumed, but here is a general list of symptoms that indicate help is needed. Remember that not all symptoms need be present for an overdose to occur:

- Abnormal pupil size;
- Agitation, aggressive, and/or violent behavior;
- Convulsions;
- Delusional or paranoid behavior;
- Difficulty breathing;
- Drowsiness;
- Hallucinations;
- Nausea and vomiting;
- Nonreactive pupils (pupils that do not change size when exposed to light);
- Staggering or unsteady gait;
- Sweating or extremely dry, hot skin;
- Tremors;
- Unconsciousness or death.

Additionally, the following regulations govern alcohol use by students and student organizations:

1. All casual possession or consumption of alcohol by students in designated common or non-reserved areas on university premises is prohibited regardless of age.
2. For specific policies regarding alcoholic beverages in the residence halls, please see the Guide to Student Housing.
3. Consumption of alcohol which results in behavior that infringes on the rights of others in the community is prohibited.
4. Alcoholic beverages may not be served at student-sponsored or student organization-sponsored events without written authorization from the Dean of Students or his/her designee. Authorization will not be given to any student organization that is hosting an event at which students under 21 will, or could be, present. Notification of such authorization will be sent to the student organization itself, the organization's moderator/advisor, the building director and the Public Safety Office.

This authorization will detail the provisions for maintaining control of the consumption of alcoholic beverages at the event. In making the final determination for authorization, the Dean of Students or his/her designee will consider the following points:

1. the presence of adequate control measures (e.g., hiring a professional bartender to serve alcohol, security, presence of university representative, method of age identification and monitoring of the event, etc.);
2. the type of event;
3. adherence to area/building procedures;
4. the presence of food and nonalcoholic beverages in a prominent place; and
5. the possible requirement of a special events permit or other license to dispense alcoholic beverages.

Depending on the location and type of event, student organizations that are sponsoring events should also consult the Catering Services Exclusivity policy and Catering Donations policy.

Student organizations may not advertise the availability of alcohol in their event publicity.

When student organizations sponsor events at which alcoholic beverages are offered for consumption, the organization and its officers shall be solely responsible for the conduct of such affairs in accord with civil law and university policies.
Civil or Criminal Law

Any student who violates any state, federal or municipal law shall be subject to conduct action for said offense(s) up to and including suspension and expulsion. The adjudication of such violations may proceed regardless and/or independently of any action taken by state, federal or municipal agencies.

Damage to Personal or Private Property

A student shall take no action that damages, or tends to damage, personal or private property not his or her own without the consent of the owner or person legally responsible for such property.

Demonstrations

Orderly and peaceful demonstrations on the campus are permitted. However, the University has the obligation to ensure the safety of individuals, the protection of property and the continuity of the educational process. When picketing or other forms of peaceful protest take place outside University buildings, the University insists on the right of free passage for all through the areas where members of the University community have a right to be. When such demonstrations take place inside University buildings, the University insists on orderliness, free passage to all rooms, lack of excessive noise, and no interference with classes, libraries, offices, assemblies or normal administrative functions. Students participating in off-campus demonstrations will be subject to University discipline for reasons stated above as well as for the deliberate misrepresentation of the position of the University, outrageous abuse of the name of the University or participation in demonstrations adjacent to the campus that disrupt University functions.

Disorderly, Violent, Intimidating or Dangerous Behavior to Self or Others

Students are not to engage in behavior that threatens, harms or causes to place in harm themselves or other persons, or to exhibit behavior that is illegal, destructive, lewd, indecent, obscene or disorderly. The types of conduct that this regulation is designed to cover include, but are not limited to, the following examples:

1. Intentionally inflicting bodily harm upon any person; taking any action for the purpose of inflicting physical harm upon any person; taking reckless action that results in physical harm to any person; taking any action that creates a substantial risk of physical harm to any person; or threatening by any means of transmission the use of force to physically harm or injure any person.
2. Disrupting the peace, impeding classes, causing significant emotional harm, bullying, and/or endangering the safety, health or life of any person on campus through actions or words.
3. Obstructing fire escape routes such as hallways or stairwells.
4. Committing acts of an indecent or lewd nature.
5. Climbing or scaling the exterior of any University building or facility.
6. Production of sound through amplification or other means (including voices) that unreasonably disturbs or disrupts the peace of others or violates University standards.
7. Using electronic or other devices to make an audio or video recording of any person without his/her prior knowledge, or his/her effective consent.

Emergency Regulations

The specific emergency regulations and evacuation procedures for University buildings must be obeyed at all times to ensure the safety of all.

False Information

Students are not to provide false information in any form to University officials. Students are not to knowingly misuse, misrepresent or falsify any University record, I.D. card, form, computer resource or procedure. Students are not to use, possess, manufacture or distribute identification cards or devices that are false or fraudulent or that misrepresent an individual's identity, age, or other personal characteristics, including using another individual's identification.

Students who assist by any means the providing of false information as described in this expectation will be considered in violation.

Students are not to take any action (verbal, written, or behavior), based on known incorrect data, with direct intent to be hurtful or harmful to the University.

False Report of an Emergency

The intentional false reporting of a bomb, fire, attack or other emergency on any University-owned or -controlled property is strictly prohibited.
Gambling

In accordance with applicable Illinois and Federal gambling laws, DePaul University prohibits gambling or any form of illegal wagering, bookmaking or unauthorized games or contests of chance on University premises, including but not limited to University Housing and/or University-sponsored functions including sporting events. In addition, students shall not knowingly provide information to assist any individual involved in any gambling activities.

Guest Responsibility and Visitation

Students and student organizations are responsible for the behavior of their guests while they are on property owned or controlled by the University or in attendance at its sponsored events. The host students or student organizations assume full responsibility for their guests’ compliance with all proscribed University policies and procedures, including those specific to building hours and residence hall visitation.

Hazing

The hazing of students at DePaul University is strictly prohibited. Hazing is defined in accordance with all applicable local, state, and/or federal laws and includes any action taken or situation created to produce mental or physical discomfort, embarrassment, ridicule or endangerment of a student or group of students for the purpose of initiation into, affiliation with, or admission to, or as a condition for continued membership in a group, team, club or other organization. Such activities include, but are not limited to: use/abuse of alcohol, paddling in any form, creation of excess fatigue, physical and psychological shocks, treasure hunts, scavenger hunts, road trips or other similar activity, wearing of public apparel that is conspicuous and normally not in good taste, and morally degrading or humiliating games and activities. Acceptance of an activity on the part of a new member or individual does not justify participation in or sponsorship of the activity.

Illegal Use or Possession of Drugs or Controlled Substances

University Policy

Students may not illegally use, sell, possess or distribute any substance prohibited by State Law, federal law, or other applicable law on University-owned or controlled property. The University reserves the right to take any action deemed necessary to protect the University's interests and the safety of its students in cases involving the use, sale, possession or distribution of illegal or controlled drugs. Students are responsible for adhering to the university Drug Free Workplace & Legal Drinking Age Compliance policy. Students living on campus should consult the Guide to Student Housing for additional information about prohibited substances within the residence halls.
Students should be aware that it is unlawful to distribute prescription medication to other students for whom the medication was not prescribed. In addition to illegal drugs such as marijuana, hallucinogens, narcotics, club drugs, and medications obtained without a prescription for the user, the following substances are prohibited on campus: MDPV or “bath salts,” Salvia, K2, and Spice.

**Health Promotion & Wellness**

DePaul University expects students to uphold laws prohibiting the purchase and use of drugs and controlled substances prohibited by State Law, federal law, or applicable law. DePaul University also seeks to educate students about making safe, responsible decisions when it comes to substance use. The Alcohol & Substance Abuse Prevention Specialist is the point of contact for all outreach and initiatives pertaining to responsible substance use. Students who are found responsible for violating DePaul University’s Illegal Use or Possession of Controlled Substances policy may be mandated to meet with the Alcohol & Substance Abuse Prevention Specialist, and may also be asked to participate in an intervention called BASICS (Brief Alcohol Screening and Intervention for College Students). Other students may also request to meet with the Alcohol & Drug Prevention Specialist and/or participate in BASICS. Students who have concerns about their drug use (or someone else's) may contact the Alcohol & Substance Abuse Prevention Specialist at any time and will not get into trouble for seeking help or information. The Alcohol & Substance Abuse Prevention Specialist can be reached at (773) 325-4550.

Students should be prepared to seek help or call 911 when a peer may be experiencing a drug overdose or alcohol poisoning. Students are expected to take action in such situations and not be a passive bystander. Here are the symptoms of alcohol poisoning, and remember that not all symptoms need to be present for alcohol poisoning to occur:

- Person is unconscious and cannot be roused;
- Person is in a stupor or exhibits confusion;
- Person is vomiting (prop unconscious persons on their sides so that they won't choke on their own vomit);
- Skin is pale, has a blue tinge, and/or skin is unusually cold to the touch;
- Abnormally slow breathing (less than 8 breaths per minute) and/or irregular breathing (a gap of more than 10 seconds between breaths);
- Seizures.

Drug overdoses can vary depending on the drug consumed, but here is a general list of symptoms that indicate help is needed. Remember that not all symptoms need be present for an overdose to occur:

- Abnormal pupil size;
- Agitation, aggressive, and/or violent behavior;
- Convulsions;
- Delusional or paranoid behavior;
- Difficulty breathing;
- Drowsiness;
- Hallucinations;
- Nausea and vomiting;
- Nonreactive pupils (pupils that do not change size when exposed to light);
- Staggering or unsteady gait;
- Sweating or extremely dry, hot skin;
- Tremors;
- Unconsciousness or death.

**Information Display**

Students and external groups may not distribute post, affix or otherwise attach writing or any printed materials (i.e., posters, signs, handouts, brochures, handbills, pamphlets, etc.) on University property without proper authorization. All information display and distribution must be in accordance with the University policies. Further information on University policies regarding Information Display and Distribution may be obtained from the Office of Student Involvement, the DePaul Student Center Information Desk or Residential Education.
Student Conduct Process Compliance

A student who fails to agree to participate in a required Student Conduct Process or abide by a conduct sanction, takes action to influence or coerce testimony in a Student Conduct Process, takes action that disrupts, or impairs the Student Conduct Process, or attempts to retaliate against a complainant or witness on account of their participation in the Student Conduct Process may be found in violation of failure to comply with the Student Conduct Process. Any student who knowingly provides false information and/or publically releases confidential information regarding to, or learned through, a Student Conduct Process may also be found in violation of this or other parts of the Code of Student Responsibility or other applicable institutional policy.

Reasonable Directives from a University Official or Office

Students are not to disregard reasonable directives, either verbal or written, issued by a University official or office, or obstruct an official in the carrying out of his/her assigned duties or responsibilities. Failure to follow reasonable directives may result in conduct sanctions or, if appropriate, involuntary withdrawal from the University.

Residential Education and Housing Services Policies and Procedures

Students living in DePaul housing are responsible for abiding by all of the policies and procedures set forth by Residential Education and Housing Services. Failure to do so could result in consequence imposed by those departments, as well as in additional sanctions as a violation of the Code of Student Responsibility.

Safety Equipment

The unauthorized alteration, misuse or tampering with of any equipment or device intended for use in preserving or protecting the safety of members of the University community, including but not limited to keys, exit signs, fire extinguishers, fire alarms, fire boxes, standpipes, first aid equipment or emergency telephones, is prohibited.
Theft, Misappropriation, Misrepresentation or Unauthorized Sale or Use

Students are to refrain from the unauthorized occupancy, use, possession or removal from a designated area, of property belonging to the University, its community members (faculty, staff and students), guests or vendors. Services provided to or by members or guests of the University may not be used or obtained unless authorized in advance by the appropriate agent. This includes the misuse or unauthorized use of University telephones, computer services, electronic communications, facilities or funds. Also, students may not represent themselves as having the authority to enter into contracts or agreements that affect DePaul University in any way.

Only officers of DePaul, or their specific designees, are empowered to sign contracts that bind the University. Students are not to take any action (verbal, written, or behavior), based on known incorrect data, with direct intent to be hurtful or harmful to the University.

Unauthorized Entry or Exit from University Facilities

Forcible or unauthorized entry into any building, structure, facility, room or container (file cabinet, desk drawer, etc.) on the premises of University-owned or -controlled property is prohibited. Improper use of designated exits is also prohibited.

University Policies Applicable to Students

Students must abide by all University policies applicable to them as students. Students should make themselves aware of all University policies. The policies listed below are some of the policies that are most relevant to the day to day lives of students. This list is not intended to exempt students from all other University policies applicable to students.

Space Reservations

This Policy establishes guidelines for reserving event space at DePaul University and associated rental costs. For the entire policy please check the University Secretary’s website.
Smoking Policy

The purpose of this policy is to comply with the Clean Indoor Air Ordinance of the City of Chicago, which requires all employers to adopt a smoking policy, and to protect the health and safety of students, faculty, staff and the general public while on university property.

The university maintains a smoke-free environment. Smoking is prohibited within all university buildings.

For the entire policy please check the University Secretary’s website.

Sexual & Relationship Violence Prevention and Response

DePaul University is committed to providing and maintaining a healthy learning and working environment for all students, staff, and faculty members. In accordance with DePaul's Catholic and Vincentian values and its role as an educational institution, the university condemns any form of sexual or relationship violence. This policy details the ways in which the university promptly and effectively responds to reports of sexual and relationship violence. The policy also outlines the university's commitment to prevention programming and training regarding sexual and relationship violence.

For the entire policy please check the University Secretary’s website.

Sales and Solicitation - Residence Halls

The use of any space in the residence halls/university apartment community for any commercial purpose except with the express written approval of the Department of Housing Services is prohibited. Solicitation by residents or any others without the explicit written approval of the Department of Housing Services is prohibited. The posting and/or distribution of any advertisement without stamped approval of the Residence Hall Council or the Department of Residential Education is prohibited.

For the entire policy please check the University Secretary’s website.

Prohibition of Weapons

This policy bans weapons from University property and University-sponsored events. The policy describes limited exceptions for this prohibition on weapons and outlines the process for reporting weapons violations, as well as resulting disciplinary procedures.

For the entire policy please check the University Secretary's website.

*This page was amended in January 2014 after catalog publication to coincide with new laws going into effect in the State of Illinois
Political Campaign Activities Policy

This policy provides guidelines for DePaul University and its faculty, staff and students about political activities. DePaul, as an organization exempt from tax under Section 501(c)3, may undertake no activity whatsoever on behalf of or in opposition to any candidate for public office, whether such office be federal, state or local.

This is an absolute prohibition. For the entire policy please check the University Secretary's website.

HI V/ AIDS Guidelines

DePaul University asserts that "the intrinsic values of the human person stand above other values. The personal rights and dignity of individuals are held to be inviolate." In an effort to maintain these principles, guidelines have been established regarding the rights of students, faculty, and staff who are HIV infected or have AIDS. The DePaul University guidelines are available throughout the University at the libraries, college offices, Student Affairs Office and the University Counseling Center.

For the entire policy please check the University Secretary's website.

Endorsements Policy

DePaul's reputation and stature make it an attractive partner for many organizations and entities, but some uses of DePaul's name by others may not always promote the purposes of the university. All members of the university and the institution as a whole benefit when its name is well used and suffer when it is ill used.

The university takes a legitimate interest in the use of its name and logos for at least three reasons:

- The university and its members have a responsibility to ensure that any implied association with the university is accurate.
- Attaching the DePaul name to an event, project or publication implies a close connection with the university, usually sponsorship or endorsement. For example, such forms as the "DePaul Project on..." or the "DePaul University Guide to..." should be used only when they refer to activities for which the university itself or one of its delegated authorities is accountable. Involvement by individual faculty, students or staff members is not, by itself, a sufficient basis to title an activity as "DePaul" sponsored. Rather the activity must be one for which the university takes institutional responsibility.
- The university and its members have a responsibility to ensure that the activities with which it is accurately associated maintain standards consistent with its educational purposes.

In academic endeavors under the supervision and control of university departments, centers, institutes, or programs, adherence to these standards is assured through the normal processes of review. In other activities, relevant standards of quality and appropriateness should be established and maintained. Even some projects that satisfy the standards of quality may not appropriately use the university name (for example, partisan political activities or outside ventures carried on by individual faculty, students or staff members; see Faculty Handbook).

The university and its members have a responsibility to protect its assets by seeking a fair share of the economic value that the use of the DePaul name produces.
"DePaul University" has become a widely known and respected trademark. The commercial fruits of this fortunate reputation are largely attributable to the contributions of many generations of faculty, students and staff. Therefore they should be allocated for the benefit of the university as a whole. Any use of the DePaul name that may depreciate its long-term value should be avoided.

In accord with these responsibilities, the following standards regulate the use of the DePaul name by schools, units and individuals within the university as well as their use by individuals and institutions outside the university, as authorized.

The use regulated by this policy refers to the identification, statement or display of DePaul's name in any way that may reasonably be interpreted as implying endorsement, approval or sponsorship by the university or one of its units. Nothing in this policy is intended to discourage fair use of DePaul's name to comment on activities of the university or any of its units.

For the entire policy please check the University Secretary's website.

**Drug Free Workplace and Legal Drinking Age Compliance**

Institutions receiving federal financial assistance are required to develop and distribute to faculty, staff, students, and others, a public statement certifying compliance with the Drug Free Workplace Act and the Drug Free Schools and Communities Act.

The State of Illinois prohibits the sale, use, or possession, of alcoholic beverages by persons who are under 21 years of age.

This policy states DePaul's commitment to maintain a drug free workplace and restrict the consumption of alcohol at university events, including classes, to persons 21 years or older.

For the entire policy please check the University Secretary's website.

**Anti-Discrimination and Anti-Harrassment Policy and Procedures**

The Anti-Discrimination and Anti-Harassment Policy provides the overall philosophy and specific approaches for addressing discrimination, harassment, and/or related retaliation issues. It serves to augment other university-wide policies and is in accordance with federal, state, and local laws and regulations. The Anti-Discrimination and Anti-Harassment Policy combines and replaces the predecessor Sexual Harassment Policy and the Anti-Discriminatory Harassment Policy. The Anti-Discrimination and Anti-Harassment Policy encompasses the University's Section 504 Grievance Procedures.

It is the policy of DePaul University that no person shall be the object of discrimination or harassment on the basis of race, color, ethnicity, religion, sex, gender, sexual orientation, national origin, age, marital status, parental status, family relationship status, physical or mental disability, military status, or other status protected by local, state, or federal law in its employment or its educational settings. DePaul University reserves the right to take actions that are consistent with its policies and procedures to deal with individuals found to have engaged in harassment, discrimination and/or retaliation in violation of this policy.

For the entire policy please check the University Secretary's website.
Acceptable Use Policy/ Network Security

This Policy defines guidelines for acceptable use of computing resources within the University and explains various violations of acceptable use. This Policy is intended to promote a greater computer and network security posture for DePaul University.

For the entire policy please check the University Secretary's website.

Clery Act

DePaul University complies with its reporting obligations pursuant to the Clery Act. Any information regarding Clery Act reports and reporting can be obtained at Public Safety.

Emergency Contacts

In an emergency situation, the University reserves the right to contact a student's parent, legal guardian, spouse, and/or other designated emergency contact.

Drug Free Schools and Community Act

DePaul University complies with the requirements of the Drug Free Schools and Communities Act. The University shall review its compliance on a biennial basis to determine its effectiveness and to ensure that the standards of conduct and conduct sanctions have been consistently enforced. This review shall be documented in a report.

Standards of Conduct: The unlawful possession, use, distribution, sale or manufacture of controlled substances is prohibited on any premises owned or controlled by DePaul University. Under no circumstance will the University tolerate unlawful possession, use, distribution, sale or manufacture of controlled substances or the unlawful use of alcohol on campus or at University-sponsored activities.

Conduct Sanctions: Students who violate these Standards of Conduct will be subject to conduct action up to and including expulsion, in accordance with university policy, the Code of Student Responsibility, and the Student Conduct Process. A conduct sanction for violating this policy may include the completion of an appropriate intervention program.

Programs for Students Requiring Assistance: Any DePaul student who has a drug or alcohol related problem may call upon the University for assistance. Anyone needing help should contact the Alcohol and Substance Abuse Prevention Specialist in the Office of Health Promotion and Wellness. This professional can provide a confidential referral to a drug or alcohol treatment program.

Health Risks: The use of drugs and alcohol can have a substantial and detrimental effect on health. These effects
are often permanent and can lead to severe physical and psychological impairment, disability and premature death. Information on the effects of drugs and alcohol is available through the Office of Health Promotion and Wellness, University Counseling Services, the Ray Meyer Fitness Center and Sage Medical/DePaul Health Services.

Legal Sanctions: Use of illicit drugs by any person is illegal under both the state and federal statutes. Use of alcohol by persons under 21 years of age is illegal under state law. Penalties for conviction under state and federal law include incarceration and fines. Property used in connection with illegal drugs may be confiscated. Federal student loans and grants may be denied to those convicted for a violation of a criminal drug statute.

Students should also consult the Alcohol policy and the Drug Free Workplace & Legal Drinking Age Compliance Policy. This policy can be found in the Undergraduate Student Handbook and on the University Secretary’s website.

Also review Drug Free Workplace and Legal Drinking Age Compliance.

Information Regarding Registered Sex Offenders

If you would like information regarding registered sex offenders enrolled or employed at DePaul University, please visit the Office of Public Safety.

Involuntary Withdrawal

DePaul University places the utmost priority on student welfare and community safety. When a student demonstrates conduct that violates DePaul’s Code of Student Responsibility or other DePaul policies, that conduct will be addressed through the appropriate disciplinary processes. This Policy is not intended to be disciplinary in nature. Rather, this Policy outlines the criteria and procedures for when and how a student may be involuntarily withdrawn from the University for demonstrating behavior that creates a direct threat to the safety or health of the student or others or that unreasonably disrupts the normal education processes and orderly operation of the University. There may be situations in which both this Policy and the Code of Student Responsibility and/or other DePaul policies are applicable.

Criteria

A student may be involuntarily withdrawn from DePaul if the University determines, in accordance with the procedures listed below, that the student:

(a) Demonstrates behavior that is unreasonably disruptive to the normal education processes and orderly operation of the University;

(b) Demonstrates behavior that endangers him/herself, or;

(c) Demonstrates behavior that endangers others or that creates a direct threat that the student may endanger others.

Determination

The involuntary withdrawal process begins when the Dean of Students Office receives a referral or other information regarding a student who appears to be demonstrating behavior consistent with one or more of the criteria listed above. If, after reviewing the information received, a staff member in the Dean of Students Office (typically, an Assistant Dean) determines that the student has demonstrated behavior consistent with one or more of the criteria for involuntary withdrawal from the University as stated above, the staff member will inform the student of this determination. At the time of this communication, the staff member will inform any student who is involuntarily withdrawn about the student’s right to appeal the decision to the Dean of Students, and will
explain to the student the conditions for returning to the DePaul community (see below).

Prior to proceeding with the involuntarily withdrawal process, the staff member will always encourage the student to voluntarily withdraw.

**Appeal**

A student may appeal the staff member’s determination regarding involuntary withdrawal (or the designated conditions for readmission following an involuntary withdrawal) to the Dean of Students. A student has five (5) business days to request this appeal. Within five (5) business days of being received by the University, the Dean of Students shall review all the available information (i.e.—all of the information made available to the Dean of Students Office and any additional information subsequently made available by the student), and shall, if deemed necessary by the Dean of Students, have the opportunity to ask the student additional questions.

After reviewing all the available information described above, the Dean of Students shall assess whether the student has or has not met the criteria for involuntary withdrawal from the University as stated above. The decision of the Dean of Students will promptly be communicated to the student in writing. This decision is final.

**Interim Suspension Pending Appeal**

A student who demonstrates behavior that creates an immediate direct threat to him/herself or others, or who demonstrates behavior that is immediately and significantly disruptive to the normal education processes and orderly operation of the University, may be suspended from the University on an interim basis pending an appeal.

All decisions regarding interim suspensions pending appeals will be made by the appropriate staff within the Dean of Students Office in consultation with the Dean of Students and/or Vice President for Student Affairs.

**Effect of Involuntary Withdrawal**

Students who have been involuntarily withdrawn from the University are generally not permitted to be on University premises or participate in University events. However, a student who has been involuntarily withdrawn or suspended on an interim basis pending an appeal may be on campus, with the permission of the Dean of Students and/or the Vice President for Student Affairs, for the purposes of participating in the processes detailed in this Policy or as otherwise required and appropriate in the discretion of the Dean of Students and/or the Vice President for Student Affairs.

Students are responsible for contacting appropriate University offices in order to ensure that their academic and financial affairs are in order (including any on-campus housing). All determinations as to the effect of an involuntary withdrawal in these areas will be made by the applicable offices in accordance with existing University policies.

**Returning to Campus—Conditions for Readmission**

A student who has satisfied the conditions for readmission outlined at the time of his or her involuntary withdrawal will be considered for readmission to the University.

Readmission conditions will be individually-tailored so as to be appropriate to each student but will always be premised on the notion that the student is no longer a direct threat to him/herself or others, and/or no longer demonstrates behavior that is disruptive to the normal educational processes and orderly operation of the University. Specific conditions for readmission might include:

(a) Appropriate documentation indicating that the student no longer demonstrates the behavior which led to the involuntary withdrawal;

(b) A treatment plan from a mental health professional or other appropriate care provider and/or verification from the provider that the student is complying with a treatment plan (or has been satisfactorily complying with a treatment plan for a designated length of time);

Students wishing to be readmitted must schedule a face-to-face meeting with the Dean of Students to discuss the student’s compliance with, and appropriate documentation of, the designated conditions for readmission. All determinations as to whether the conditions for readmission have been satisfied will be made by the Dean of Students. These determinations are final.

Because conduct that gives rise to an involuntary withdrawal under this Policy might also result in sanctions in accordance with the Code of Student Responsibility, it is possible that a student who has met the designated conditions for readmission following an involuntary withdrawal might still not be eligible for re-enrollment at DePaul due to student conduct sanctions (similarly, it is possible that a student who has satisfied all student conduct sanctions might still not be eligible for re-enrollment at DePaul because of an inability to meet the designated conditions for readmission in accordance with this Policy).
The Dean of Students or their designee may make such reasonable exceptions to this Policy and these procedures as circumstances may require for the welfare of the institution and/or the involved student(s), provided that fundamental elements of fairness and due process are observed.

Speakers Guidelines

DePaul University encourages its recognized student organizations to sponsor guest speakers whose presentation will contribute to the role of the university as a forum for intellectual discussion, debate, investigation and/or artistic expression. Through this forum, speakers bring to the University an opportunity for students to hear and discuss opposing viewpoints on a wide range of issues. It should be understood that providing a forum in no way implies DePaul approval or endorsement of the views expressed by the sponsored speaker. A statement indicating that the presence of the speaker on campus does not imply that DePaul has approved or endorse the views expressed by the speaker must be included in all publications for and advertising about the event.

Student Organizations

The University supports and encourages student organizations in a variety of areas including scholarly, ethnic, honorary, University-sponsored, Greek and special interest. The University recognizes the value and contribution that student organizations make in a student’s total college experience and education. DePaul’s Recognition Policy and Procedures is a formal system used to maintain the quality and high standards of our current organizations. Recognition as a student organization accords certain rights and responsibilities. These rights and responsibilities are defined in the recognition policy along with the requirements for new student organization recognition, renewal of recognition status for current organizations and loss of recognition of current student organizations. It is each student organization’s responsibility to become familiar with this policy as it applies to all organizations. This policy may be obtained from the Office of Student Life. University-sponsored organizations will have an advisor appointed by the University. All other organizations will select their own faculty or staff advisor with the approval of the Office of Student Life. Any off-campus action of any recognized student organization is the sole responsibility of the student organization and its officers. In compliance with the reporting requirements of the Clery Act and Campus Security Act, an officer of the organization must file a report of any off-campus crimes (as defined by the act) with the Dean of Students Office within 24 hours of said offense.

Student Organizations are expected to adhere to all applicable institutional regulations. The University reserves the right to determine the appropriate time, place, content, and manner for conducting activities, and posting and distribution of materials on any of its campuses. Consequently, the University may deny or restrict the activities of student organizations. Student organizations are expected to exercise good judgment in planning and promoting their activities. Failure to do so may result in conduct action being initiated against the organization; consequently, policies, procedures and sanctions set forth within the Code of Student Responsibility apply to student organizations collectively as well as to individual students. The Office of Student Involvement will work in conjunction with the Dean of Students Office in any conduct action.
Title IX Information for Students

As required by Title IX of the Education Amendments of 1972, DePaul University prohibits discrimination on the basis of sex in its education programming and activities. DePaul’s Dean of Students is the primary Title IX coordinator for DePaul University. Any student seeking to file a Title IX complaint (meaning a complaint based on sexual violence, sexual harassment, or other sex discrimination) can do so through the Dean of Students Office, the Office of Institutional Diversity and Equity, or through Public Safety. As appropriate, the Dean of Students works with other offices to address Title IX complaints and other Title IX compliance issues. These offices include the Office of Institutional Diversity and Equity (sexual harassment complaints involving faculty and staff), Human Resources (certain complaints involving employees), and Athletics (athletics Title IX compliance).

Student Rights Within the Student Conduct Process

A student participating in the Conduct Process is entitled to the following rights as a guarantee of fundamental fairness:

1. An opportunity for a hearing in order to answer charges of alleged misconduct.
2. A written statement of the alleged violations in sufficient enough detail to enable the complainant and referred student(s) to prepare.
3. The right to be accompanied by an Advisor. (See Explanation of Important Aspects of the Student Conduct Process—Advisors.)
4. For the complainant and referred student(s), a written statement of the possible sanctions that may be imposed.
5. The right to submit Witnesses on one's behalf and, to the extent necessary, to question Witnesses' statements, whether verbally or in writing. (See Explanation of Important Aspects of the Student Conduct Process—Witnesses.)
6. The right to have the Student Conduct Process explained and to ask for clarification of any policies or procedures.
7. The right to have reasonable access to information specific to one's case.
8. The right to a separate hearing when a single incident gives rise to charges against more than one student.
9. The right to speak on one's own behalf.
10. The right to disqualify a member of any University Board or Administrative Hearing Officer for justifiable reason.
11. The right to have proceedings and documentation kept confidential. All hearings, proceedings and case information are considered confidential except to those who have a legitimate educational interest in them, or as permitted or required under FERPA, the Clery Act, or any other legal mandate.
12. The right to a written decision, which the University will take reasonable measures to provide within five business days of completion of the last hearing.
13. The right to request an appeal on specific grounds.
14. The right for any student registered with the Center for Students with Disabilities to request accommodations to ensure their full and equal participation in any conduct process and/or proceeding. Accommodation requests are to be made directly to the Dean of Students Office. Accommodations are determined on an individual basis in consultation with the Center for Students with Disabilities.

Student Organization Rights Within the Student Conduct Process

A Student Organization participating in the Conduct Process is entitled to the following rights as a guarantee of fundamental fairness:

1. An opportunity for a hearing in order to answer charges of alleged misconduct.
2. A written statement of the alleged violations in sufficient enough detail to enable the referred organization
to prepare a response.

3. The right to be accompanied by an Advisor. (See Explanation of Important Aspects of the Student Conduct Process—Advisors.)

4. For the referred organization, a written statement of the possible sanctions that may be imposed.

5. The right to submit Witnesses on the organization’s behalf and, to the extent necessary, to question Witnesses’ statements, whether verbally or in writing. (See Explanation of Important Aspects of the Student Conduct Process—Witnesses.)

6. The right to have the Student Conduct Process explained and to ask for clarification of any policies or procedures.

7. The right to have reasonable access to information specific to an organization’s case.

8. The right to a separate hearing when a single incident gives rise to charges against more than one organization.

9. The right to speak on the organization’s behalf.

10. The right to disqualify a member of any University Board for justifiable reason.

11. The right to have proceedings and documentation kept confidential. All hearings, proceedings and case information are considered confidential except to those who have a legitimate educational interest in them, or as permitted or required under FERPA, the Clery Act, or any other legal mandate. Individual students’ records are protected by federal law and University policy. However, sanctions and outcomes for Student Organizations that do not contain personally-identifiable student information are generally not protected under FERPA.

12. The right to a written decision, which the University will take reasonable measures to provide within five business days of completion of the last hearing.

13. The right to request an appeal on specific grounds.

14. The right for any student registered with the Center for Students with Disabilities to request accommodations to ensure their full and equal participation in any conduct process and/or proceeding. Accommodation requests are to be made directly to the Dean of Students Office. Accommodations are determined on an individual basis in consultation with the Center for Students with Disabilities.

---

University Rights Within the Student Conduct Process

The University reserves the right to:

1. Refer any case involving a violation of criminal or civil law to the proper law enforcement agency.

2. Pursue conduct action against a student on behalf of the University based on reliable information from a member of the DePaul community indicating that a violation of the Code of Student Responsibility or other DePaul policy may have taken place.

3. Exercise jurisdiction for an offense committed on-campus. Additionally, the University may exercise jurisdiction for an offense committed by a student off-campus (including on-line communities) when:
   1. the victim of such offense is a member of the campus community (student, staff, faculty); or
   2. the offense occurred at a college-sponsored or sanctioned event; or
   3. the student used his or her status as a member of the University community to assist in the commission of the offense (for example, using a student ID card to pass a bad check); or
   4. the offense affects the University.
   (See Explanation of Important Aspects of the Student Conduct Process—Jurisdiction.)

4. Suspend or otherwise sanction a student on an interim basis in accordance with the procedures described below.

5. Share the outcomes of the Student Conduct Process with those members of the University community who have a legitimate educational interest in them, or as permitted or required under FERPA, the Clery Act, or any other legal mandate.

6. In keeping with its commitment to offer a fundamentally fair process for all students involved in the Student Conduct Process, adapt certain aspects of the Student Conduct Process in specific circumstances, in order to meet the interests of all involved parties, including the University.
Other University Processes Including Residential Education

In general, the Dean of Students Office is responsible for managing the Student Conduct Process. However, other University departments may initiate investigations, manage hearing processes, or impose sanctions in accordance with other University policies and procedures, and in consultation with the Dean of Students Office and Student Affairs when appropriate. Examples of other areas that may initiate investigations, manage hearing processes, or impose sanctions in accordance with other University policies and procedures include Internal Audit and the Office of Institutional Diversity and Equity.

Students should be particularly aware that Residential Education maintains a separate conduct system for violations of Residential Education policies and, as appropriate, violations of other policies that occur in DePaul housing. Students should consult Residence Education for information regarding those policies and procedures, including information on how to file a complaint with Residential Education.

Student Conduct Records

Records of Student Conduct cases that result in sanctions under this Student Conduct Hearing Process shall be kept in a referred student's conduct file located in the Dean of Students Office. Student conduct records are destroyed ten years after graduation or a student's last date of attendance. Students who are suspended or dismissed from the University will have a notation placed permanently on their transcripts and the case files related to the suspension or dismissal will be retained permanently. The University will not release conduct records except to those who have a legitimate educational interest in them, or as permitted or required under FERPA, the Clery Act, or any other legal mandate.

General Information about the Student Conduct Process

Initiating a Complaint

A student conduct action may be initiated by any member of the DePaul community (student, faculty, or staff) who feels that they have been adversely affected by a student's actions in violation of the Code of Student Responsibility or other policy, or who has reasonable cause to believe that a student has violated the Code of Student Responsibility or other policy.

Complaints shall be made in writing to the Dean of Students Office or other appropriate office.

Relationship Between the Student Conduct Process & Legal Proceedings

A student may be subject to the Student Conduct Process in addition to any civil or criminal proceedings. The University, in its sole discretion, will make the decision whether or not to delay the Student Conduct Process until the conclusion of any civil or criminal action associated with a complaint. If a referred student chooses not to participate in the Student Conduct Process because of a pending legal action, the hearing officer may render a decision based solely on the written documentation and/or the complainant's testimony available at the time without the benefit of information from the referred student.

The Student Conduct Process is designed to be educational, not legal, in nature. Rules of evidence and discovery do not apply to the Student Conduct Process. Students should not draw parallel interpretations between the Code of Student Responsibility or other DePaul policies and criminal or civil law. The outcome of a legal proceeding is not determinative on the Student Conduct Process.
Delivery of Written Notices

All written notices regarding student conduct actions will be delivered personally or via the postal service or email. It is a student’s responsibility to ensure that their information (including address, phone number and email) is current in Campus Connect.

Investigation

When the university is made aware of a potential violation of the Code of Student Responsibility, it may be necessary for appropriate staff members to conduct an investigation prior to referring the incident to the Student Conduct Process. Such investigations are either conducted by or in collaboration with the Dean of Students Office. Staff charged with conducting an investigation may gather information, conduct interviews, and solicit materials. Investigations will be conducted with all reasonable speed. At the conclusion of the investigation, an investigator submits all materials to the Dean of Students Office who will determine whether the Student Conduct Process will begin. A student may choose to have an Advisor at any meeting related to an investigation.

Initial Review

Upon a written complaint that an alleged violation has occurred, the Dean of Students Office or other designated office shall conduct an initial review.

At the time of the initial review, the student will be given the following:

- A written statement of the alleged violations in sufficient enough detail to enable the student to prepare.
- Reasonable access to information specific to one’s case.
- An explanation of, and opportunity to ask questions about the Student Conduct Process, including (a) an explanation of the two hearing possibilities (Administrative Hearing and University Board Hearing) and the University’s determination as to which type of hearing will be conducted; (b) an explanation of “Important Aspects of the Student Conduct Process;” (c) an explanation of possible sanctions; and (d) an explanation of appeal procedures.
- Instructions on how to schedule the appropriate hearing.
- Information regarding any interim sanctions, if applicable.

The initial review will include a determination as to whether the University has jurisdiction over the violation. (See Explanation of Important Aspects of the Student Conduct Process—Jurisdiction.) This initial review could consist of requesting additional information from the complainant or referred student, or otherwise collecting additional information. This initial review is intended only to provide information pertinent to the incident under review and is not designed to result in a binding decision. The designated reviewer will take reasonable measures to ensure that the initial review is completed within five business days of the date of written complaint that a violation has occurred. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper initial review of all relevant material.

If the referred student acknowledges that a violation, or the conduct giving rise to a violation, has occurred at any time during the initial review, the process may immediately move to the sanction process. These sanctions may be appealed in accordance with the procedures detailed in the Conduct Appeals Procedures.

Initiating a Hearing

If, after the initial review, the designated reviewer determines that there is not reasonable cause to believe that the allegation has occurred, the review shall promptly cease and the Student Conduct Process will not move forward.

If, after the initial review, the designated reviewer determines that there is reasonable cause to believe that a violation of policy has occurred, the Student Conduct Process will move forward.

Interim Sanctions

In order to protect the health, safety, security and well-being of the University community and its members, the University reserves the right to immediately impose interim sanctions upon a student when it determines, in its sole discretion, that the continued presence of the referred student does any of the following:

1. constitutes a threat to the safety or well-being of the referred student, any other member of the University community, or any invited guest;
2. risks destruction of property; or
3. risks disruption of classroom or other campus activities.

The University will take reasonable measures to ensure that any student suspended or otherwise sanctioned on an interim basis shall have a final determination of the charges made through appropriate hearing procedures within ten business days of such suspension. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure proper review of all relevant material. During this time the referred
student shall forfeit those rights and privileges as the University deems appropriate. Should it be found that the student did not commit the act(s), the interim sanction shall be revoked.

**Prior Record of Sanctions**

Because a student’s prior record of conduct will be used as a basis for more stringent conduct action, previous sanctioned violations in the student’s conduct file may be considered before assigning any conduct sanction(s). Any previously imposed sanctions may provide additional justification that more progressive action is necessary to ensure that the student understands the full impact his/her pattern of behavior is having on the DePaul community.

**Failure to Participate**

Failure of a student to agree to, appear at, or participate in a hearing, or to otherwise disrupt the normal hearing process, may in itself constitute a violation. The University reserves the right to pursue this additional violation in the same or a separate hearing. If a referred student chooses not to have the hearing process explained, chooses not to participate in the hearing process, or otherwise fails to appear at a hearing, the hearing officer may render a decision and if appropriate, impose sanctions based solely on the information available at the time without the benefit of information from the referred student. These sanctions may be appealed in accordance with the procedures detailed in Conduct Appeals Procedures.

**Standard for Hearing Determinations**

The standard of “whether it is more likely than not” that the student is in violation of the policy(ies) at issue will be the basis for determining findings and imposing any sanctions. A finding of “IN VIOLATION” means that, based on the information available at the time, it is more likely than not that the student is in violation of the policy(ies) at issue. A finding of “NOT IN VIOLATION” means that, based on the information available at the time, it is more likely than not that the student is not in violation of the policy(ies) at issue.

**Additional Procedures Regarding Sexual and Relationship Violence**

Please also refer to the Sexual & Relationship Violence Prevention and Response policy for additional procedural information for Student Conduct Process matters involving a potential violation of that policy.

**Administrative Hearing Process**

If the University determines that an Administrative Hearing is appropriate, the University will take reasonable measures to ensure that the first session of the Administrative Hearings takes place within five business days of when a referred student is first notified of the conduct charge. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material. A mutually convenient time for the Administrative Hearing will be decided upon. If necessary, and at the discretion of the Administrative Hearing Officer, an Administrative Hearing may take place over the telephone and/or video conferencing.

The actual Administrative Hearing will proceed as follows:

1. The incident report(s) will be reviewed by the Administrative Hearing officer.
2. The Administrative Hearing officer and student will discuss the alleged violation(s) that occurred.
3. The student will have an opportunity to give a statement about the incident, including an admission or denial of the alleged violations.
4. The student will submit Witness names to give statements and be questioned by the Administrative Hearing officer. (See Explanation of Important Aspects of the Student Conduct Process—Witnesses.)
5. The Administrative Hearing officer will review any relevant information and discuss the incident with the student.
6. After the Administrative Hearing officer has examined all of the information and heard from all of the approved Witnesses, the Administrative Hearing officer will determine that the student is or is not in violation of the Code expectation or other policy outlined.
7. If the Administrative Hearing officer finds the student in violation, they will determine the appropriate sanctions. Any sanctions imposed become effective immediately unless otherwise stipulated. Sanctions imposed by an Administrative Hearing officer may be appealed in accordance with the procedures detailed in the Conduct Appeals Procedures. Students will be informed of these Conduct Appeals Procedures, including to whom a request for an appeal should be directed, at the conclusion of the Administrative Hearing. The University will take reasonable measures to notify the complainant and referred student of the outcome and sanctions in writing within five business days of the last session of an Administrative Hearing. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material. The University will place all appropriate information in the referred student’s conduct file.

The Administrative Hearing officer will hold as many meetings as necessary to ensure a fair disposition of the case. If a referred student fails to attend an Administrative Hearing or otherwise participate in the process, the Administrative Hearing officer may decide the case based on the information available at the time. Any imposed sanctions will be effective immediately unless otherwise stipulated.

University Board Hearing Process

If the University determines that a University Board Hearing is appropriate, the Moderator (See Explanation of Important Aspects of the Student Conduct Process—Moderators.) will take reasonable measures to ensure that the referred student is notified of the following within five business days; however, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material:

1. The nature of the alleged violation(s) made against the student.
2. A copy of the University Board Hearing procedures.
3. The time, date and location of the University Board Hearing.

The complainant and referred student(s) have the right to show cause to the Moderator as to why any member of the University Board pool should be removed because of possible prejudice. If a student wishes to have a member of the University Board pool removed, the student must notify the Moderator in writing at least two business days prior to the first scheduled University Board Hearing. Any member of the University Board pool has an obligation to disqualify him/herself if he/she has any personal interest in the case.

The Moderator will set a date by which all materials for the conduct hearing will be sent to the University Board. Materials turned into the Moderator after that date will be sent to the University Board if feasible.

Reasonable efforts will be made to have the first session of the University Board Hearing within seven business days after the referred student has been notified of the above. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

At the discretion of the University Board, more than one hearing session may be necessary before a final determination is made.

The actual University Board Hearing will proceed as follows:

1. The Chairperson convenes and presides over the University Board Hearing only if the appropriate quorum is present. (See Explanation of Important Aspects of the Student Conduct Process—University Boards.) The Chairperson is also charged with maintaining orderly discussion throughout the University Board Hearing, generally limiting testimony per session to a maximum of three hours and ensuring that there is equal time for both the complainant and the referred student to present their information.
2. The Chairperson acknowledges the Advisors. (See Explanation of Important Aspects of the Student Conduct Process—Advisors.)
3. The Chairperson confirms that the referred student understands his/her rights.
4. The Chairperson reads into the record the University’s opening statement and all statements of alleged violation(s).
5. The Chairperson or Moderator will ensure that the referred student(s) and complainant(s) have copies of all incident reports.
6. The complainant makes a statement or, in cases where the University is bringing the action, a University representative will present the University’s case. The opening statement by the complainant may be read aloud or be submitted in writing for the University Board.
7. The referred student makes an opening statement, including an admission or denial of the charges. The opening statement by the referred student may be read aloud by the student or may be submitted in
8. Witnesses and/or other information is presented. Witnesses will be presented one at a time. A Witness can only be present at the University Board Hearing during his/her own testimony. (See Explanation of Important Aspects of the Student Conduct Process—Witnesses.)

9. Members of the University Board, the Moderator, the referred student and the complainant may question any Witness who is present. All questions must be directed to the Chairperson. The Chairperson may rule any question out of order.

10. Written testimony from Witnesses unable to be at the University Board Hearing may be accepted but its validity will be ruled on by the Chairperson. (See Explanation of Important Aspects of the Student Conduct Process—Witnesses.)

11. The University Board may recall any Witness it wishes to question further.

12. Members of the University Board may ask questions to the complainant and the referred student. At this time the complainant and the referred student may also question each other. All questions must be directed to the Chairperson. The Chairperson may rule any question out of order.

13. After all Witnesses, information, and testimony have been presented, the Chairperson will ask each side if there is any additional information pertaining to the case that has not been heard or submitted in writing.

14. Closing statements of no longer than five minutes may be made by the referred student and complainant. Closing statements by either party may be read aloud by the student or may be submitted in writing for the University Board.

15. At this point, all are dismissed except for the Chairperson, University Board members and the Moderator. The University Board determines if the student is or is not in violation of the Code expectation or other policy outlined.

16. If the referred student is to be found in violation, the University Board shall determine the appropriate sanction(s). A simple majority vote by the board members will determine all outcomes. All decisions will be reviewed with the Moderator, who will share with the University Board a referred student's prior record of sanctions as appropriate.

17. When deliberations have been completed, the Chairperson invites the referred student back into the room and announces the University Board's decision. Any sanctions imposed become effective immediately unless otherwise stipulated. Sanctions imposed by the University Board may be appealed in accordance with the procedures detailed in the Conduct Appeals Procedures. Students will be informed of these Conduct Appeals Procedures, including to whom a request for an appeal should be directed, at the conclusion of the University Board Hearing. The University will take reasonable measures to notify the complainant and referred student of the outcome and sanctions in writing within five business days of the last University Board Hearing. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material. The University will place all appropriate information in the referred student's conduct file.

If a referred student fails to attend the scheduled University Board Hearing or otherwise participate in the process, the University Board may decide the case based on the information available to it at the time. Any imposed sanctions will be effective immediately unless otherwise stipulated.

---

**Conduct Sanctions**

The Student Conduct Process is an educational one by which the University strives to instill in its students an understanding that they are responsible for their actions. When a student fails to uphold the responsibilities outlined in the Code of Student Responsibility or other policies, the University has an obligation to help them come to a deeper understanding of how their behavior impacts the campus environment.

There are several reasons for imposing conduct sanctions:

1. To redirect a student's or organization's behavior toward a standard more acceptable for members of the University community;
2. To protect the University community from possible harm or injury;
3. To require restitution for University property that is lost, stolen or damaged; and
4. To give support for financial redress to a victim for loss, harm or destruction of his/her personal property.

If, after an Administrative Hearing or University Board Hearing has taken place, there is sufficient information that a violation has occurred, the hearing officer(s) may impose the appropriate sanction(s).

All imposed sanctions shall become effective immediately at the completion of the hearing unless otherwise stipulated.
Sanctions may be appealed in accordance with the procedures detailed in Conduct Appeals Procedures.

The following is a list of sanctions that the University may impose on a student, group of students or student organization:

1. University Reprimand: A University reprimand does not necessarily restrict the student in any way but does signify that any further violation may result in additional conduct sanctions. A written record of the reprimand will be placed in the student's conduct file.

2. University Censure: University Censure indicates to the student that further violations will result in more serious consequences. University censure usually is given for a specified period of time not to exceed one year. This level of sanction may include restriction of activities and/or ineligibility to receive financial assistance from a University source.

3. No Contact Restriction – A no contact restriction denotes that the student is prohibited from having any contact with a particular person or persons. This contact includes but is not limited to: in person, email, text message, instant message, the internet, phone, or through other people. This contact may include any university gatherings on or off campus.

4. University Probation: University probation is a written statement to the student indicating that the student's behavior is of such a nature as to jeopardize continued enrollment at the University. University probation can be for a specified period of time or for as long as the student is enrolled. Any behavioral infraction during the probationary period may cause the student to be removed from the University.

5. Suspension: A suspended student must carry out a total and immediate separation from the University for a required period of time and/or until particular conditions for readmission are met. Suspension may include various prohibitions regarding a student's ability to be on University property or participate in University activities. A sanction of suspension shall be permanently noted on a student's transcript, regardless of whether or not the student is successfully readmitted. At the end of the suspension period and/or once the student can demonstrate that the conditions for readmission have been met, the student may be required to meet with the Dean of Students or other designee before being readmitted to the University.

6. Dismissal: Dismissal constitutes a permanent and immediate separation from the University. The imposition of this sanction shall be permanently noted on the student's transcript and is a permanent bar to their readmission to DePaul University. Dismissal may include various prohibitions regarding a student's ability to be on University property or participate in University activities.

Any of the above sanctions may be combined with one or more of the following actions in order to more fully address all issues involved in a conduct case:

1. Restitution or Assessment: A student who damages University property may be required to pay actual repair or replacement costs. Failure to pay may result in withholding of the student's records and/or additional conduct sanctions.

2. Educational Projects: An educational project designed to assist the student in better understanding the overall impact of his/her behavioral infraction(s) may be imposed. Such assigned projects might include research papers, the creation of educational materials, or the planning and/or presentation of educational programs related to the policy infraction. Assigned projects may not include physical labor unless they are directly related to the violations(s) and do not cause humiliation or degradation to the student.

3. Restriction: Restrictions upon a student's University privileges may be imposed for a set period of time. These restrictions may include, but are not limited to, denial of the right to represent the University in any way, access to facilities or individuals, parking privileges, and/or participation in co-curricular activities.

The sanctions of Residence Hall Probation and Removal from the Residence Halls may also be imposed through the Conduct Review Process on students who live in DePaul housing. Additionally, because Residential Education maintains a separate conduct system for violations of Residential Education policies and, as appropriate, violations of other policies that occur in DePaul housing, students should consult Residential Education for information as to when a student can be placed on probation in, or be removed, from DePaul housing.

Students who are removed from DePaul housing will be subject to all of the policies and procedures set forth by Residential Education and Housing Services. Students should consult these departments for more information.
Conduct Appeal Procedures

Both complainants and referred students have the right to request an appeal on specified grounds. The reason for an appeal is to guarantee that the situation has been resolved through a fundamentally fair hearing in accordance with established policies and procedures.

A complainant and referred student may only request to appeal the determination or sanction on the following three grounds:

1. A substantial procedural error occurred that unreasonably impaired the ability to achieve a fair process or final decision and made the process or the final decision fundamentally unfair;
2. New information of substantive nature, impossible for the hearing officer to have heard at the time of the hearing, has been discovered and it would be fundamentally unfair for the Administrative Hearing Officer or University Board to not consider the information; or
3. The initial sanction(s) are fundamentally unfair or inappropriate.

In order to request an appeal, the complainant and/or referred student must submit a written request for appeal to the designated office within five business days of being notified of the initial decision. Complainants and referred students will be notified at the conclusion of a hearing who is the designated University representative to submit their request for an appeal. Typically, requests for appeals from University Board Hearings will be submitted to the Dean of Students, while requests for appeals from Administrative Hearings will be submitted to the supervisor of the Administrative Hearing Officer. The individual designated to review the appeal request may decide that the sanctions imposed should be suspended pending the outcome of the appeal. Complainant and Referred students should understand, however, that, unless otherwise stipulated, sanctions are considered in effect once a hearing is completed, regardless of whether an appeal is requested.

The individual designated to review the request for an appeal will make a determination that:

1. The request for an appeal is denied because none of the grounds for an appeal above have been met; or
2. The request for an appeal is granted because one or more of the grounds for an appeal have been met.

The designated reviewer will take reasonable measures to notify the complainant and/or referred students of the appeal determination within five business days of when the University receives the request for an appeal. However, the University reserves the right to extend this time limit, in its sole discretion, in order to ensure a proper review of all relevant material.

If a request for an appeal is granted, then the individual designated to review the request for an appeal will determine whether the matter can be resolved without a new hearing (for example, modification of sanctions so that they are not fundamentally unfair or inappropriate) or whether new hearing is necessary. If a new hearing is necessary, the University will determine whether this hearing will be an Administrative Hearing or a University Board Hearing. All hearings that take place after an appeal has been granted will proceed in accordance with established procedures for Administrative Hearings and University Board Hearings.

All decisions regarding whether an appeal request will be granted are final. If the request for an appeal is denied, then all sanctions imposed will remain in effect.

Explanation of Important Aspects of the Student Conduct Process

Advisors

It is a student's right to bring one Advisor to a meeting related to an investigation, an Administrative Hearing, a University Board Hearing, or any other meeting included within the Student Conduct Process. This right applies to referred student(s), complaint(s) and witnesses. An Advisor must be a current member of the DePaul community (faculty, staff, or student). However, an Advisor cannot be a person who is involved in the same conduct matter being reviewed. All Advisors must be approved in advance of a scheduled meeting or hearing by

DePaul University Autumn 2015-2016
the Moderator, Administrative Hearing Officer, or other University designee. Because an Advisor must be a current member of the DePaul community, students are prohibited from having an attorney or legal representative who is not a current member of the DePaul community be an Advisor during the Student Conduct Process. Students may choose to consult or retain independent legal counsel as a result of their participation in the Student Conduct Process, but such legal counsel may not attend any meetings or hearings related to the Student Conduct Process, and does not have a role in the Student Conduct Process.

The role of the Advisor is to act as a support person for the student by conferring quietly with the student. The Advisor is not to directly address the members of the University Board, an Administrative Hearing officer, or anyone else present at a meeting or hearing.

The Dean of Students retains a pool of faculty and staff that are trained to serve as Advisors for students and can be provided at the student's request. Furthermore, if a student selects an Advisor who is not part of this trained pool, the Dean of Students Office offers information and consultation on the role of the Advisor if needed and requested by the student or their Advisor.

For student conduct cases involving the Sexual & Relationship Violence Prevention and Response policy, please refer to the University Secretary's website for details regarding Advisors in the conduct process.

Hearings

There are two types of conduct hearings:

1. Administrative Hearing: An Administrative Hearing is a hearing in which the hearing officer is a University designee, such as the Dean of Students or another Student Affairs professional. The procedures for an Administrative Hearing are set forth above in the "Administrative Hearing Process" section. There is no Moderator for an Administrative Hearing.
2. University Board Hearing: A University Board Hearing is a hearing in which the hearing officers are selected from the University Board pool of members. The procedures for a University Board Hearing are set forth above in the "Conduct Hearing Process" section. The University Board Hearing process is managed by a Moderator.

The University will make the determination as to which type of hearing is appropriate in a particular situation.

University Boards

The members of the University Board pool are:

1. At least six current students with at least sophomore status appointed by the Student Government Association.
2. At least six faculty members appointed by the Faculty Council.
3. At least six staff members appointed by the Staff Council.

Three members (one from each constituency) will comprise the panel for a University Board Hearing. This panel shall be chosen by the Moderator prior to the University Board Hearing. The Chairperson shall be decided upon at the time of the University Board Hearing.

Student Affairs is responsible for training the pool of University Board members.

Students should consult Residential Education for information about hearing boards in the Residential Education conduct process.

Jurisdiction

The University may exercise jurisdiction (i.e.—initiate this Student Conduct Process) for all offenses committed on campus. Additionally, the University may exercise jurisdiction for an offense committed off-campus (including on-line communities) when:

1. The victim of such an offense is a member of the campus community (student, faculty, or staff ); or
2. The offense occurred at a college-sponsored or sanctioned event; or
3. The referred student used his or her status as a member of the University community to assist in the commission of the offense (for example, using a student ID card to pass a bad check); or
4. The offense affects the University.

Moderators

All University Board Hearings will be assigned a Moderator. The Moderator may be the Dean of Students or another University designee (for example, other staff in the Dean of Students Office, or other Student Affairs professionals). The Moderator is responsible for managing the University Board Hearing process, including assisting with scheduling and selecting members from the University Board pool to participate in a hearing. The
Moderator will be present at the University Board Hearing. The Moderator has no voting role in the outcome of any University Board Hearing, but all determinations by a University Board as to whether a violation has occurred or regarding sanctions must be reviewed with the Moderator.

There is no Moderator for an Administrative Hearing.

**Witnesses**

Students involved on either side of a conduct case, as complainants or referred students, may submit Witnesses for an Administrative Hearing or a University Board Hearing to support their statements. All Witnesses must be approved in advance by the University, and the University reserves the right to disallow any Witness. All Witnesses must generally be current members of the DePaul community (faculty, staff or students), except as otherwise approved by the University. Witness intended to present information that does not directly bear upon the circumstances of the case or duplicates all or part of testimony already presented may not be allowed. Appearance of Witnesses at the appropriate time, date and location of any hearing is the responsibility of the involved students. In some cases, the University will approve the use of written statements from Witnesses who are not available to appear at a hearing.

Witnesses will be presented one at a time. A Witness can only be present at a hearing during his/her own testimony.

The University recognizes it cannot compel any student to present him/herself as a Witness against his/her will. However, all students are encouraged to comply with the Student Conduct Process. Witnesses will be informed that giving false information may result in conduct action.
